23 b. Aid for career education. There shall be apportioned to such city
24 school districts and other school districts which were not components of
25 a board of cooperative educational services in the base year for pupils
26 in grades ten through twelve in attendance in career education programs
27 as such programs are defined by the commissioner, subject for the
28 purposes of this paragraph to the approval of the director of the budg-
29 et, an amount for each such pupil to be computed by multiplying the
30 career education aid ratio by [~~three thousand nine hundred dollars~~] the
31 district's selected foundation aid as determined pursuant to subdivision
32 four of this section. Such aid will be payable for weighted pupils
33 attending career education programs operated by the school district and
34 for weighted pupils for whom such school district contracts with boards
35 of cooperative educational services to attend career education programs
36 operated by a board of cooperative educational services. Weighted pupils
37 for the purposes of this paragraph shall mean the sum of the attendance
38 of students in grades ten through twelve in career education sequences
39 in trade, industrial, technical, agricultural or health programs plus
40 the product of sixteen hundredths multiplied by the attendance of
41 students in grades ten through twelve in career education sequences in
42 business and marketing as defined by the commissioner in regulations.
43 The career education aid ratio shall be computed by subtracting from one
44 the product obtained by multiplying fifty-nine percent by the combined
45 wealth ratio. This aid ratio shall be expressed as a decimal carried to
46 three places without rounding, but not less than thirty-six percent.

47 Any school district that receives aid pursuant to this paragraph shall
48 be required to use such amount to support career education programs in
49 the current year.

50 A board of education which spends less than its local funds as defined
51 by regulations of the commissioner for career education in the base year
52 during the current year shall have its apportionment under this subdivi-
53 sion reduced in an amount equal to such deficiency in the current or a
54 succeeding school year, provided however that the commissioner may waive
55 such reduction upon determination that overall expenditures per pupil in
56 support of career education programs were continued at a level equal to

1 or greater than the level of such overall expenditures per pupil in the
2 preceding school year.
3 § 3. This act shall take effect immediately and shall apply to the
