Introduced by Sen. PALUMBO -- read twice and ordered printed, and when printed to be committed to the Committee on Higher Education

AN ACT relating to authorizing the state university of New York at Stony Brook to lease certain lands for the purpose of constructing a facility to support research and development to address the national semiconductor chip shortage and related environmental sustainability issues

The People of the State of New York, represented in Senate and Assembly, do enact as follows:

1 Section 1. Legislative findings. The legislature finds that the State
2 University of New York at Stony Brook ("Stony Brook") is in need of
3 additional facilities to support the research and development needs of
4 faculty, staff, students, and the community and seeks to use approxi-
5 mately 8 acres of underutilized land on Stony Brook's Research and
6 Development Park to build a facility to address these research and
7 development needs, which may include supporting services to address the
8 national semiconductor chip shortage and related environmental sustaina-
9 bility issues, fulfilling a necessary and vital public purpose. The
10 legislature further finds that granting the trustees of the State
11 University of New York the authority and power to lease and otherwise
12 contract to make available grounds and facilities of the campus of the
13 State University of New York at Stony Brook will ensure such land is
14 utilized for the benefit of Stony Brook and the surrounding community.

15 § 2. Notwithstanding any other law to the contrary, the State Univer-
16 sity of New York trustees are authorized and empowered, without any
17 public bidding, to lease and otherwise contract to make available to a
18 ground lessee a portion of the lands of the university generally
19 described in this act for the purpose of developing, constructing, main-
20 taining and operating a facility to support the research and development
21 needs of faculty, staff, students, and the community, which may include
22 supporting services to address the national semiconductor chip shortage
23 and related environmental sustainability issues. Such lease or contract
24 shall be for a period not exceeding ninety-nine (99) years without any
25 fee simple conveyance and otherwise upon terms and conditions determined
