9086

IN SENATE

April 22, 2024

- Introduced by Sen. PARKER -- read twice and ordered printed, and when printed to be committed to the Committee on Energy and Telecommunications
- AN ACT to amend the public service law and the public authorities law, in relation to creating a resilient electric vehicle charging system pilot program

The People of the State of New York, represented in Senate and Assembly, do enact as follows:

1	Section 1. The public service law is amended by adding a new section
2	66-x to read as follows:
3	<u>§ 66-x. Resilient electric vehicle charging system pilot program. 1.</u>
4	For the purposes of this section:
5	(a) "Resilient carbon free power generation" shall mean only those
6	generating stations which are:
7	(i) manufactured, installed, and operated in accordance with applica-
8	ble government and industry standards;
9	(ii) connected to the electric system and operated in conjunction with
10	an electric corporation's transmission and distribution system;
11	(iii) operated in compliance with any standards and requirements
12	established under this section;
13	(iv) utilize a synchronous generator with black start capability,
14	frequency control, and disconnect capability; and
15	(v) do not include the active use of fossil fuels and have a name
16	plate capacity of 1.5 megawatts or less.
17	(b) "Resilient electric vehicle charging system" shall mean an elec-
18	tric vehicle (EV) microgrid designed to provide uninterrupted electric
19	service for electric vehicle charging throughout an extended outage.
20	(c) "Extended outage" shall mean an outage of the electric distrib-
21	ution system that continues for a period of twenty-four hours or longer.
22	(d) "Uninterrupted" shall mean that the resilient electric vehicle
23	charging system generates electricity throughout an extended outage,
24	with the exception of momentary interruptions associated with transi-
25	tions to and from grid parallel and grid-islanded operations.

EXPLANATION--Matter in <u>italics</u> (underscored) is new; matter in brackets [-] is old law to be omitted.

LBD14221-02-4

S. 9086

1	(e) "EV microgrid" is a group of energy generating resources with at
2	least one source of resilient carbon free power generation and energy
3	storage within clearly defined electrical boundaries that acts as a
4	single controllable entity with respect to the grid for the purpose of
5	electric vehicle charging and other emergency response needs during an
6	extended outage. An EV microgrid can connect and disconnect from the
7	grid to enable it to operate in both grid-connected or island-mode.
8	2. The commissioner shall promulgate such rules, policies, and proce-
9	dures necessary and appropriate no later than one hundred eighty days
10	following the effective date of this section for:
11	(a) creating a resilient electric vehicle charging system pilot
12	program at the commercial retail rate with a monthly cash out option
13 14	program and a total program cap of 50 megawatts; (b) establishing a value stack adder for valuation of uninterrupted
$14 \\ 15$	resilient carbon free power generation generated within an EV microgrid
16	that is participating in the pilot program that supports a resilient
17	electric vehicle charging system at the commercial retail rate; and
18	(c) creating a timely interconnection process for resilient carbon
19	free power generation comprising an EV microgrid.
20	§ 2. Section 1005 of the public authorities law is amended by adding a
21	new subdivision 31 to read as follows:
22	31. The authority in a manner consistent with section sixty-six-x of
23	the public service law, shall promulgate such rules, policies, and
24	procedures necessary and appropriate no later than one hundred eighty
25	days following the effective date of this subdivision for:
26	(a) creating a resilient electric vehicle charging system at the
27	commercial retail rate with a monthly cash out option program and a
28	<u>total program cap of 50 megawatts;</u>
29	(b) establishing a value stack adder for valuation of uninterrupted
30	resilient carbon free power generation generated within an EV microgrid
31	that is also a participant of the pilot program that supports a resil-
32	ient electric vehicle charging system at the commercial retail rate; and
33	(c) creating a timely interconnection process for resilient carbon
34 25	free power generation comprising an EV microgrid.
35 36	§ 3. Section 1020-f of the public authorities law, as added by chapter 517 of the laws of 1986, is amended by adding a new subdivision (11) to
37	read as follows:
38	(11) The authority in a manner consistent with section sixty-six-x of
39	the public service law, shall promulgate such rules, policies, and
40	procedures necessary and appropriate no later than one hundred eighty
41	days following the effective date of this section for:
42	1. creating a resilient electric vehicle charging system at the
43	commercial retail rate with a monthly cash out option program and the
44	total program cap of 50 megawatts;
45	2. establishing a value stack adder for valuation of uninterrupted
46	resilient carbon free power generation generated within an EV microgrid
47	that is also a participant of the pilot program that supports a resil-
48	ient electric vehicle charging system at the commercial retail rate; and
49	3. creating a timely interconnection process for resilient carbon free
50	power generation comprising an EV microgrid.
51	§ 4. This act shall take effect immediately.
