

STATE OF NEW YORK

9179

IN SENATE

May 2, 2024

Introduced by Sen. MAY -- read twice and ordered printed, and when printed to be committed to the Committee on Labor

AN ACT to amend the labor law, in relation to providing protections for telecommunications tower technicians

The People of the State of New York, represented in Senate and Assembly, do enact as follows:

1 Section 1. Legislative intent. Installation and maintenance of tele-
2 communications equipment on towers is sensitive work that requires dili-
3 gent consideration of safety concerns. Tower climbing is an essential
4 yet dangerous job - between 2003 and 2022, 166 workers in the cell tower
5 industry died on the job - but there are few regulations and safety
6 standards in place.

7 Additionally, the existence of multi-layered employment structures in
8 the industry can weaken employer accountability for ensuring safe condi-
9 tions, impacting both workers and the public.

10 The work tower technicians perform ensures New Yorkers have access to
11 reliable and convenient cell service that is essential to daily life, as
12 well as reliable 911 services. Many of these towers are state assets or
13 on state-owned land. New York state has a proprietary and economic
14 interest in ensuring that its property is properly maintained and safe-
15 guarded, that equipment installed on state property does not cause any
16 undue risk to property or livelihood.

17 § 2. The labor law is amended by adding a new article 21-B to read as
18 follows:
