CENSUS DATA: The number of members who will benefit in the future from this proposed legislation is unknown. The estimates presented herein are based on preliminary census data collected as of June 30, 2025. The census data for the potentially impacted population used to develop the average costs is summarized below.

	NYCERS
Active Members	
- Number Count:	555
- Average Age:	46.9
- Average Service:	14.2
- Average Salary:	83,400

IMPACT ON MEMBER BENEFITS: Currently, active Tier 4 or Tier 6 members of NYCERS who are employed as Probation Officers and become disabled due to heart disease would generally be eligible for an applicable ordinary disability retirement after attaining 10 years of service. The disability benefit is generally a lifetime payment equal to the greatest of 1/3 of Final Average Salary (FAS), 1/60th of FAS times service, or the service retirement benefit, if eligible.

Under the proposed legislation, the performance of duty disability benefit for Tier 4 or Tier 6 Probation Officer members who are disabled from heart disease would be equal to 75% of FAS without an offset for Workers' Compensation.

The ordinary death benefit for NYCERS Probation Officers is a lump sum payment generally equal to three times the member's salary, plus a refund of member contributions. Under the proposed legislation, the performance of duty death benefit would generally be equal to a lifetime benefit of 50% of a member's wages earned during their last year of service, payable to certain beneficiaries.

ASSUMPTIONS AND METHODS: The estimates presented herein have been calculated based on the Revised 2021 Actuarial Assumptions and Methods of the impacted retirement systems.

The number of members who will benefit from this proposed legislation is unknown. The cost of this proposed legislation could vary greatly depending on the number of future members who benefit and on their length of service, age, and salary history. In particular, the increase would be greater for a member who is not yet eligible for an ordinary disability benefit when disabled.

The estimated financial impact for disabled members has been calculated assuming 50% would have retired under the current ordinary disability benefit, and 50% would have continued working if the proposed legislation were not passed.

RISK AND UNCERTAINTY: The costs presented in this Fiscal Note depend highly on the actuarial assumptions, methods, and models used, demographics of the impacted population, and other factors such as investment, contribution, and other risks. If actual experience deviates from actuarial assumptions, the actual costs could differ from those presented herein. Quantifying these risks is beyond the scope of this Fiscal Note.

This Fiscal Note is intended to measure pension-related impacts and does not include other potential costs (e.g., administrative and Other Postemployment Benefits). This Fiscal Note does not reflect any chapter laws that may have been enacted during the current legislative session.

STATEMENT OF ACTUARIAL OPINION: Marek Tyszkiewicz and Gregory Zelikovsky are members of the Society of Actuaries and the American Academy of Actuaries. We are members of NYCERS, but do not believe it impairs our objectivity, and we meet the Qualification Standards of the American Academy of Actuaries to render the actuarial opinion contained herein.
