

STATE OF NEW YORK

10392

IN ASSEMBLY

March 3, 2026

Introduced by M. of A. PHEFFER AMATO -- read once and referred to the Committee on Governmental Employees

AN ACT to amend the administrative code of the city of New York, in relation to first grade firefighters and promotions from the firefighter rank

The People of the State of New York, represented in Senate and Assembly, do enact as follows:

1 Section 1. The administrative code of the city of New York is amended
2 by adding a new section 15-110.1 to read as follows:

3 § 15-110.1 Longevity bonuses. a. Notwithstanding any provision of law
4 to the contrary, when a member shall have accrued twenty-five years of
5 uniformed service with the New York city fire department, and retires in
6 any rank, they shall have five per centum of the highest grade of pay
7 under the applicable collective bargaining agreement of such rank in
8 which they retire, added to the applicable salary used for the purposes
9 of computing pension benefits under the plan in which they are enrolled
10 with the New York city fire department pension fund.

11 b. In addition to the increase set forth in subdivision a of this
12 section, commencing with the twenty-sixth year of service and for each
13 year thereafter, such member shall receive an additional one per centum
14 of the highest grade of pay under the applicable collective bargaining
15 agreement of such rank in which they retire for each year exceeding
16 twenty-five years, added to the applicable salary used for the purposes
17 of computing pension benefits under the plan in which they are enrolled
18 with the New York city fire department pension fund, provided, however,
19 that the total additional credit provided by this subdivision does not
20 exceed fifteen per centum and shall be capped upon the completion of
21 thirty-five years of uniformed service with the department.

22 § 2. This act shall take effect immediately.

FISCAL NOTE.--Pursuant to Legislative Law, Section 50:

SUMMARY: This proposed legislation, as it relates to the New York City Fire Pension Fund (FIRE), would increase the salary used for determining pension benefits for members who retire with at least 25 years of uniformed FIRE service.

EXPLANATION--Matter in italics (underscored) is new; matter in brackets [-] is old law to be omitted.

LBD14801-02-6

EXPECTED INCREASE (DECREASE) IN EMPLOYER CONTRIBUTIONS
by Fiscal Year for the first 25 years (\$ in Millions)

Year	FIRE
2027	0.0
2028	3.2
2029	6.4
2030	9.8
2031	13.3
2032	16.8
2033	20.5
2034	24.3
2035	28.1
2036	32.0
2037	36.0
2038	40.0
2039	44.1
2040	48.2
2041	52.4
2042	53.6
2043	54.7
2044	55.8
2045	56.8
2046	57.9
2047	58.9
2048	60.0
2049	61.1
2050	62.2
2051	63.4

Employer Contribution impact beyond Fiscal Year 2051 is not shown. Projected contributions are based on historical experience for Tier 2 members. Future retirement patterns may differ due to a shift in population from Tier 2 to Tier 3.

The entire increase in employer contributions will be allocated to New York City.

PRESENT VALUE OF BENEFITS: The Present Value of Benefits (PVFB) is the discounted expected value of benefits paid to current members if all assumptions are met, including future service accrual and pay increases.

The enactment of this proposed legislation is expected to increase the PVFB by approximately \$26.8 million in the first year and every year thereafter, adjusted for inflation, group demographics, and the actual experience of benefiting retirees. Each year's PVFB increase will be recognized in the year benefits are first payable.

UNFUNDED ACCRUED LIABILITY (UAL): Actuarial Accrued Liabilities are the portion of the Present Value of Benefits allocated to past service. Changes in UAL were recognized as future gain/loss.

AMORTIZATION OF UNFUNDED ACCRUED LIABILITY

Recognized as Ongoing Gain/Loss	FIRE
Increase (Decrease) in UAL:	26.8 M
Number of Payments:	14
Amortization Payment:	3.2 M

CENSUS DATA: The estimates presented herein are based on preliminary census data collected as of June 30, 2025. The census data for FIRE active members is summarized below.

Active Members	FIRE
- Number Count:	11,178
- Average Age:	40.3
- Average Service:	13.1
- Average Salary:	141,300

The 2024 salaries used in this analysis were provided by the Uniformed Firefighters Association and are summarized below. The salaries were increased with assumed inflation.

- * Firefighters would use a highest grade of pay of \$140,392.
- * Lieutenants would use a highest grade of pay of \$157,751.
- * Captains would use a highest grade of pay of \$179,842.
- * Chiefs would use a highest grade of pay of \$255,863.
- * Marshals would use a highest grade of pay of \$223,866.
- * Medical Officers would use a highest grade of pay of \$235,229.

Data from the prior eleven years of actuarial valuations was used to estimate the number of retirees who could potentially benefit from this proposed legislation each year and is summarized below.

Average Number Number Retired per Year	Firefighters	Lieutenants	Captains	Chiefs	Marshals*
At least 25 but less than 26 years of service	17	5	3	1	1
At least 26 but less than 27 years of service	12	5	3	1	1
At least 27 but less than 28 years of service	10	5	2	1	1
At least 28 but less than 29 years of service	9	3	2	1	1
At least 29 but less than 30 years of service	7	5	3	1	1
At least 30 but less than 31 years of service	7	4	3	2	0
At least 31 but less than 32 years of service	7	2	2	3	1
At least 32 but less than 33 years of service	6	3	3	2	0
At least 33 but less than 34 years of service	4	2	2	2	0
At least 34 but less than 35 years of service	4	2	2	2	0

service	4	2	2	4	1
At least 35 years of service	11	8	8	17	2

* Includes Medical officers.

IMPACT ON MEMBER BENEFITS: The proposed legislation would increase the applicable salary used for computing pension benefits for members who retire with at least 25 years of uniformed FIRE service.

The increase in applicable salary would be equal to:

* 5% for members with at least 25 years of service plus an additional 1% for each year of service exceeding 25, but not more than 15%, multiplied by

* The highest grade of pay under the applicable collective bargaining agreement of the rank in which the member retires.

For example, a Tier 2 firefighter who retires with 32 years of uniformed FIRE service would receive an increase in their annual pension of approximately \$10,143 (based on adding 12% of the highest pay grade for firefighters with assumed overtime and salary inflation of \$158,622 to the applicable salary used for the benefit calculation). Additional benefits would then be subject to applicable Cost-of-Living or Escalation increases.

Based on an estimate of the number of FIRE members who are expected to be impacted by this proposed legislation, the annual increase in FIRE pension benefits paid will be approximately \$2.3 million in the first year and increase in every year thereafter.

With respect to an individual member, the impact on benefits due to this proposed legislation could vary greatly depending on the member's age, years of service, retirement cause, and Tier.

ASSUMPTIONS AND METHODS: The estimates presented herein have been calculated based on the Revised 2021 Actuarial Assumptions and Methods of the impacted retirement systems. In addition:

* New entrants were assumed to replace exiting members so that total payroll increases by 3% each year for impacted groups. New entrant demographics were developed based on data for recent new hires and actuarial judgement.

* Future contribution impacts have been developed assuming a homogeneous population and a consistent retirement pattern.

* Costs for Tier 3 members have been developed by applying the increased salary directly to Final Average Salary (i.e., without limiting salaries in the average based on prior years).

RISK AND UNCERTAINTY: The costs presented in this Fiscal Note depend highly on the actuarial assumptions, methods, and models used, demographics of the impacted population and other factors such as investment, contribution, and other risks. If actual experience deviates from actuarial assumptions, the actual costs could differ from those presented herein. Quantifying these risks is beyond the scope of this Fiscal Note.

This Fiscal Note is intended to measure pension-related impacts and does not include other potential costs (e.g., administrative and Other Postemployment Benefits). This Fiscal Note does not reflect any chapter laws that may have been enacted during the current legislative session.

STATEMENT OF ACTUARIAL OPINION: Marek Tyszkiewicz and Gregory Zelikovsky are members of the Society of Actuaries and the American Academy of Actuaries. We are members of NYCERS but do not believe it impairs our objectivity and we meet the Qualification Standards of the American

Academy of Actuaries to render the actuarial opinion contained herein. To the best of our knowledge, the results contained herein have been prepared in accordance with generally accepted actuarial principles and procedures and with the Actuarial Standards of Practice issued by the Actuarial Standards Board.

FISCAL NOTE IDENTIFICATION: This Fiscal Note 2026-12 dated February 10, 2026 was prepared by the Chief Actuary for the New York City Retirement Systems and Pension Funds and is intended for use only during the 2026 Legislative Session.
