

STATE OF NEW YORK

1614

2025-2026 Regular Sessions

IN ASSEMBLY

January 10, 2025

Introduced by M. of A. GLICK -- read once and referred to the Committee on Environmental Conservation

AN ACT to establish the New York state reforest, restore and sustainable agriculture commission

The People of the State of New York, represented in Senate and Assembly, do enact as follows:

1 Section 1. Legislative intent. The state of New York, the nation and
2 the world are facing a climate emergency. There has been a dramatic loss
3 of forests and ecological habitat worldwide. A summary report issued in
4 May 2019 by the intergovernmental science-policy platform on biodiversi-
5 ty and ecosystem services of the United Nations concludes that human
6 activity is leading an unprecedented number of species into extinction
7 which are critical for human survival. Human-made climate change is a
8 result of increased greenhouse gases, including carbon dioxide. Forests
9 and other ecosystems act as natural carbon sinks, which absorb carbon
10 and reduce the impact of climate change. The commission shall seek to
11 find out the extent of such loss and to make recommendations for their
12 preservation, conservation, mitigation, restoration and expansion for
13 the purpose of stopping climate catastrophe, ensuring clean water, air
14 and land for the public health and strong economy, promoting outdoor
15 recreation and preserving our natural resources and cultural heritage.

16 § 2. A temporary state commission, to be known as the New York state
17 reforest, restore and sustainable agriculture commission, hereafter
18 referred to as the commission, is hereby created to evaluate and make
19 recommendations concerning the reforestation and restoration of forests
20 and ecological habitats in the state of New York.

21 § 3. (a) The commission shall consist of seventeen members, to be
22 appointed as follows: four members to be appointed by the governor;
23 three members to be appointed by the temporary president of the senate;
24 three members to be appointed by the speaker of the assembly; one member
25 to be appointed by the minority leader of the senate; one member to be

EXPLANATION--Matter in italics (underscored) is new; matter in brackets
[-] is old law to be omitted.

LBD04188-01-5

1 appointed by the minority leader of the assembly; one member to be
2 appointed by the commissioner of environmental conservation or such
3 commissioner's designee; one member to be appointed by the commissioner
4 of agriculture and markets or such commissioner's designee; one member
5 to be appointed by the commissioner of the office of parks, recreation
6 and historic preservation or such commissioner's designee; one member to
7 be appointed by the executive director of the Adirondack park agency or
8 such executive director's designee; and one member to be appointed by
9 the director of the canal corporation or such director's designee. The
10 governor shall designate the chairperson of the commission. Vacancies in
11 the membership of the commission and among its officers shall be filled
12 in the manner provided for original appointments or designations.

13 (b) The members of the commission shall receive no compensation for
14 their services, but shall be allowed their actual and necessary expenses
15 incurred in the performance of their duties under this act. The commis-
16 sion may employ and at pleasure remove such personnel as it may deem
17 necessary for the performance of its functions and fix their compen-
18 sation within the amounts made available by appropriation therefor.

19 (c) The department of environmental conservation shall provide the
20 commission such facilities, assistance, and data as will enable the
21 commission to carry out its powers and duties. Additionally, all other
22 departments or agencies of the state or subdivisions thereof shall, at
23 the request of the chairperson, provide the commission such facilities,
24 assistance, and data as will enable the commission to carry out its
25 powers and duties.

26 § 4. The commission shall evaluate and make recommendations on the
27 following three major areas:

28 (a) Forests and ecological habitats. Explore the extent of loss or
29 degradation of forests and ecological habitats, including wildlife, both
30 flora and fauna in the state of New York and find ways to mitigate,
31 restore and prevent future loss and degradation of such forests and
32 habitats.

33 (b) Preservation and restoration of other natural resources and
34 ecological habitats, including both flora and fauna wildlife, in the
35 state of New York. The commission shall research the loss and degrada-
36 tion of natural resources other than forests, including wetlands,
37 streams, rivers, lakes, ponds, coastlines, waterways, grasslands and
38 open spaces generally. Open space shall be defined as an area of land or
39 water that either remains in its natural state or is used for agricul-
40 ture, free from intensive development for residential, commercial,
41 industrial or institutional use. Open space can be publicly or privately
42 owned and shall include agricultural and forest land, undeveloped coas-
43 tal and estuarine lands, undeveloped scenic lands, public parks and
44 preserves. It shall also include bodies of water such as lakes and bays.

45 (c) Sustainable agriculture. The commission shall investigate various
46 forms of sustainable agriculture as defined in 7 USC 3103 as an inte-
47 grated system of plant and animal production practices having a site-
48 specific application that will over the long term satisfy human food and
49 fiber needs, enhance environmental quality and the natural resource base
50 upon which the agricultural economy depends, make efficient use of
51 nonrenewable resources and on-farm resources and integrate, where appro-
52 priate, natural biological cycles and controls, sustain the economic
53 viability of farm operations and enhance the quality of life for farmers
54 and society overall. The basic goals of sustainable agriculture shall be
55 environmental health, economic profitability, and social and economic
56 equity, seek to better the conditions and treatment of farmworkers,

1 including migrant workers, improve the humane treatment of farm animals,
2 and explore "carbon farming", which shall mean farming methods which
3 reduce greenhouse gas emissions and/or capture and hold carbon in vege-
4 tation and soils. Carbon farming shall cover small changes in land
5 management, such as introducing no-till cropping, stubble retention,
6 agroforestry, or methane-reducing feed supplements.

7 § 5. (a) For the accomplishment of its purposes, the commission may
8 meet and hold public and/or private hearings within or without the
9 state, and shall have all the powers of a legislative committee pursuant
10 to the legislative law. The commission is authorized and empowered to
11 undertake any studies, inquiries, surveys or analyses it may deem rele-
12 vant through its own personnel or in cooperation with or by agreement
13 with any other public or private agency.

14 (b) To the maximum extent feasible, the commission may request and
15 shall be entitled to receive and shall utilize and be provided with such
16 facilities, resources and data from any court in the state and from any
17 subdivision, department, board, bureau, commission, office, agency or
18 other instrumentality of the state or of any political subdivision ther-
19 eof as it deems necessary or desirable for the proper execution of its
20 powers and duties and to effectuate the purposes set forth in this act.

21 (c) The commission is hereby authorized and empowered to enter into
22 any agreements and to do and perform any acts that may be necessary,
23 desirable or proper to carry out the purposes and objectives of this
24 act.

25 § 6. The commission shall make recommendations and a report of its
26 findings. The commission shall submit such recommendations and report
27 developed by it relating to issues involving: (a) the reforestation and
28 restoration of forests and ecological habitats in the state of New York;
29 (b) the preservation and restoration of other natural resources and
30 ecological habitats, including wildlife, both flora and fauna, in the
31 state of New York; and (c) the promotion of sustainable agriculture in
32 the state of New York. The report shall include any recommendations for
33 legislative action as it may deem necessary and appropriate, to the
34 governor, the temporary president of the senate and the speaker of the
35 assembly no later than December 1, 2026.

36 § 7. This act shall take effect immediately.
