IMPACT ON MEMBER BENEFITS: Currently, Tier 3 normal service retirement, early service retirement, and vested retirement benefits for Sanitation and Correction members in 22-Year Plans are subject to an offset equal to 50% of the primary social security benefit as defined in Retirement and Social Security Law (RSSL) Section 511 beginning at age 62.

Under the proposed legislation, the offset for such benefits would be eliminated resulting in an increase in benefits.

ASSUMPTIONS AND METHODS: The estimates presented herein have been calculated based on the Revised 2021 Actuarial Assumptions and Methods of the impacted retirement systems. In addition:

- * New entrants were assumed to replace exiting members so that total payroll increases by 3% each year for impacted groups. New entrant demographics were developed based on data for recent new hires and actuarial judgement.

RISK AND UNCERTAINTY: The costs presented in this Fiscal Note depend highly on the actuarial assumptions, methods, and models used, demographics of the impacted population, and other factors such as investment, contribution, and other risks. If actual experience deviates from actuarial assumptions, the actual costs could differ from those presented herein. Quantifying these risks is beyond the scope of this Fiscal Note.

This Fiscal Note is intended to measure pension-related impacts and does not include other potential costs (e.g., administrative and Other Postemployment Benefits). This Fiscal Note does not reflect any chapter laws that may have been enacted during the current legislative session.

This Fiscal Note does not include cost analyses relating to provisions contained in RSSL Section 500(c).
