FISCAL NOTE.--Pursuant to Legislative Law, Section 50:

This bill would change the overtime ceiling percentage increase for  
Tier 6 members in the New York State and Local Employees' Retirement  
System (NYSLERS) to the greater of three percent or the rate of annual  
inflation, beginning January 1, 2026. Under current law, the ceiling was  
set at \$15,000 at the inception of Tier 6 and is increased annually by  
the rate of inflation.

The provisions of Section 25 of the Retirement and Social Security Law  
shall not apply.

Insofar as this bill affects NYSLERS, the increased costs would be  
shared by the State of New York and the local participating employers in  
NYSLERS. If this bill were enacted during the 2025 Legislative Session,

the increase in the present value of benefits would be approximately \$290 million.

NYSLERS	Increase in present value of benefits	Increase in required contributions
Actives Tiers 1-5 (Closed)	\$ 0 mn	\$ 53 mn
Actives Tier 6 (Open)	\$ 290 mn	\$ 237 mn
Total	\$ 290 mn	\$ 290 mn

In the NYSLERS, this benefit improvement will be funded by increasing the billing rates charged annually to cover both retrospective and prospective benefit increases. The annual contribution required of all participating employers in NYSLERS is 0.1% of billable salary, or approximately \$13 million to the State of New York and approximately \$20 million to the local participating employers. This permanent annual cost will increase as Tier 6 salary grows and will vary by employer based upon the plan coverage and salary reported in Tier 6.

These estimated costs are based on 295,617 affected Tier 6 members, with annual salary of approximately \$14 billion as of March 31, 2024.

To develop the above costs, our models included a Monte Carlo analysis consisting of 5,000 simulations, each consisting of thirty years of annual CPI-U projections. In all 5,000 simulations, for at least one year in the thirty-year period, the 3% floor provided by the proposed legislation resulted in a higher overtime ceiling. The 3% floor exceeded annual inflation projections in approximately 60% of the 150,000 trial years.

Summary of relevant resources:

The inflation measurement used in this analysis was based on the February 2025 Consumer Price Index for All Urban Consumers: U.S. City average, published by the U.S. Bureau of Labor Statistics.

Membership data as of March 31, 2024 was used in measuring the impact of the proposed change, the same data used in the April 1, 2024 actuarial valuation.
