8553

2025-2026 Regular Sessions

## IN ASSEMBLY

May 20, 2025

Introduced by M. of A. WRIGHT -- read once and referred to the Committee on Environmental Conservation

AN ACT to amend the environmental conservation law, in relation to permit modifications, suspensions, revocations, renewals, reissuances and recertifications under the air quality control program

The People of the State of New York, represented in Senate and Assembly, do enact as follows:

1 Section 1. Section 70-0115 of the environmental conservation law is  
2 amended by adding two new subdivisions 3 and 4 to read as follows:

3 3. The following provisions shall apply to any permit required by the  
4 state air quality control program pursuant to title three or five of  
5 article nineteen of this chapter relating to air pollution and air  
6 contamination and any related enforcement activities. The provisions of  
7 this subdivision shall not apply to any registration issued to a facili-  
8 ty under article nineteen of this chapter pursuant to regulations by  
9 reason of (i) having annual emissions that are less than half of the  
10 level that would subject it to permitting under section 19-0311 of this  
11 chapter, (ii) not requiring the use of permit conditions to limit emis-  
12 sions below the thresholds that would otherwise make it subject to state  
13 or federal standards as determined by the department pursuant to regu-  
14 lation, and (iii) having emissions of high toxicity air contaminants  
15 that do not equal or exceed the applicable thresholds for permitting as  
16 set forth in regulations by the department:

17 (a) Any permit which does not expire pursuant to its terms and which  
18 has been in effect for more than five years shall expire on the date  
19 which is two years after the effective date of this subdivision, and any  
20 renewal thereof shall include an expiration date which is no later than  
21 five years after the expiration contemplated by this subdivision, unless  
22 another period for expiration of ten years or less is applicable under  
23 this chapter.

EXPLANATION--Matter in italics (underscored) is new; matter in brackets  
[-] is old law to be omitted.

LBD11307-03-5

1 (b) The provisions of this paragraph shall apply only to permits for  
2 air pollution sources subject to Title V of the federal Clean Air Act  
3 regulated under section 19-0311 of this chapter. With respect to a  
4 permit that has been extended pursuant to subdivision two of section  
5 four hundred one of the state administrative procedure act by reason of  
6 the applicant making a timely and sufficient application:

7 (i) If the department does not make a final determination on such  
8 application within twenty-four months of the later of the effective date  
9 of this subdivision or the date the application is received, the permit  
10 holder shall, within ninety days of such date, pay an amount equal to  
11 the annual fees owed by such permit holder pursuant to section 72-0303  
12 of this chapter to the air quality improvement fund as established in  
13 section ninety-nine-rr of the state finance law; provided, however, that  
14 notwithstanding any provision of such section to the contrary, expendi-  
15 tures from such fund for such amount shall be limited to spending that  
16 directly benefits communities which are directly affected by air  
17 pollution from the facility.

18 (ii) If the department has not made a final determination on such  
19 application within thirty-six months of the later of the effective date  
20 of this subdivision or the date the application is received, such permit  
21 shall automatically be suspended and the application shall automatically  
22 be denied.

23 (iii) A suspension pursuant to subparagraph (ii) of this paragraph  
24 shall not take effect for a period of two years if (A) there is a deter-  
25 mination by the federally designated bulk system operator, the local  
26 transmission/distribution owner, or the New York state public service  
27 commission that such suspension would compromise energy reliability and  
28 (B) a permanent solution to resolve the energy reliability constraint  
29 has been selected by the federally designated bulk system operator,  
30 the transmission/distribution owner, or the New York state public  
31 service commission, and that solution is in the process of permitting  
32 or construction but not yet online.

33 (iv) The two-year period of delay specified by subparagraph (iii) of  
34 this paragraph shall terminate and the permit shall be automatically  
35 suspended pursuant to subparagraph (ii) of this paragraph if either (A)  
36 the determination made pursuant to clause (A) of subparagraph (iii) of  
37 this paragraph is rescinded or (B) a permanent solution to such energy  
38 reliability constraint has been identified by the federally designated  
39 bulk system operator, the local transmission/distribution owner, or the  
40 New York state public service commission, and such solution has been  
41 placed online.

42 (c) Notwithstanding the provisions of subdivision two of section four  
43 hundred one of the state administrative procedure act, a permit that is  
44 denied or the terms of which are limited by the department as contem-  
45 plated by such subdivision shall automatically be suspended on the date  
46 which is two years from the date on which the department made the deter-  
47 mination regarding denial or limitation; provided, however, that a  
48 permit that was denied or limited as contemplated by such subdivision  
49 prior to the effectiveness of this subdivision shall not be suspended  
50 pursuant to this subdivision until the date which is two years after the  
51 effective date of this subdivision.

52 4. No later than January thirty-first of each year following the  
53 effective date of this subdivision the department shall publish on a  
54 dedicated webpage on its website a list of the permits subject to the  
55 provisions of paragraphs (b) and (c) of subdivision three of this  
56 section. Information published shall include the name of the permit

1 holder, the name of the facility, the facility's address, the types and  
2 amounts of air pollution emitted by the facility, the initial issuance  
3 date of the permit, the expiration date of the permit, the reasons why  
4 the facility is not operating on a current permit, and the status of the  
5 permit application.

6 § 2. This act shall take effect sixty days after it shall have become  
7 a law.
