IMPACT ON MEMBER BENEFITS: Pension benefits for TBTA 20-Year Plan members may increase if the wages included in Final Average Salary (FAS) increase.

Under the proposed legislation, members may, for purposes of determining FAS, replace the actual overtime earnings during the period beginning with the second pay period in March 2020 and ending with the second pay period in December 2021 with projected overtime earnings calculated based on the rate of pay during such period multiplied by the overtime hours earned during 2022.

A member whose FAS includes projected overtime would be required to pay employee contributions (without interest) that would have been due had the member rendered such additional overtime service.

ASSUMPTIONS AND METHODS: The estimates presented herein have been calculated based on the Revised 2021 Actuarial Assumptions and Methods of the impacted retirement systems.

RISK AND UNCERTAINTY: The costs presented in this Fiscal Note depend highly on the actuarial assumptions, methods, and models used, demographics of the impacted population, and other factors such as investment, contribution, and other risks. If actual experience deviates from actuarial assumptions, the actual costs could differ from those presented herein. Quantifying these risks is beyond the scope of this Fiscal Note.

This Fiscal Note is intended to measure pension-related impacts and does not include other potential costs (e.g., administrative and Other Postemployment Benefits). This Fiscal Note does not reflect any chapter laws that may have been enacted during the current legislative session.
