Under the proposed legislation, the service retirement benefit for Tier 6 basic plan members of NYCERS, TRS, and BERS who have 20 or more years of Credited Service would be equal to 40% of FAS plus 2% of FAS for each year of Credited Service in excess of 20.

ASSUMPTIONS AND METHODS: The estimates presented herein have been calculated based on the Revised 2021 Actuarial Assumptions and Methods of the impacted retirement systems. In addition:

\* New entrants were assumed to replace exiting members so that total payroll increases by 3% each year for impacted groups. New entrant demographics were developed based on data for recent new hires and actuarial judgement.

RISK AND UNCERTAINTY: The costs presented in this Fiscal Note depend highly on the actuarial assumptions, methods, and models used, demographics of the impacted population, and other factors such as investment, contribution, and other risks. If actual experience deviates from actuarial assumptions, the actual costs could differ from those presented herein. Quantifying these risks is beyond the scope of this Fiscal Note.

This Fiscal Note is intended to measure pension-related impacts and does not include other potential costs (e.g., administrative and Other Postemployment Benefits). This Fiscal Note does not reflect any chapter laws that may have been enacted during the current legislative session.

FISCAL NOTE IDENTIFICATION: This Fiscal Note 2026-16 dated February 13, 2026 was prepared by the Chief Actuary for the New York City Retire-

ment Systems and Pension Funds and is intended for use only during the 2026 Legislative Session.

FISCAL NOTE.--Pursuant to Legislative Law, Section 50:

This bill would provide Tier 6 members of the New York State and Local Employees' Retirement System (NYSLERS) with a benefit of 40% of FAS upon attaining 20 years of service credit. Currently the benefit is 35% of FAS. The benefit increase for each year of service credit beyond 20 would remain 2% of FAS.

The provisions of section 25 of the retirement and social security law shall not apply.

Insofar as this bill affects NYSLERS, the present value of benefits would increase by approximately \$2.5 billion.

Benefit improvements will be funded by increasing the billing rates charged annually. The annual contribution required by all participating employers in NYSLERS would increase 0.8% of billable salary, with Tier 6 billing rates further increasing by 0.4% of salary (for a 1.2% total annual rate increase). In total, annual contributions would increase approximately \$110 million to the state of New York and \$170 million to the local participating employers.

Required contributions will increase significantly as Tier 6 grows. Employer costs would vary according to plan coverage and salary reported in Tier 6.

These estimated costs are based on 323,488 Tier 6 members in NYSLERS with annual salary of approximately \$17 billion as of March 31, 2025.

FISCAL NOTE.--Pursuant to Legislative Law, Section 50:

Bill Description:

This fiscal note is prepared for legislative bill draft #06549-06-6. This bill would amend Section 604 of the Retirement and Social Security Law to improve the retirement benefit formula for Tiers 5 and 6 members of the New York State Teachers' Retirement System. The Tier 5 benefit formula would match the Tier 4 formula with eligibility for the 2%

multiplier at 20 years of service instead of 25 years as it is currently. The retirement benefit formula for Tier 6 members with 20 or more years of service would be 40% of final average salary plus 2% for each additional year of service over 20. Currently, the benefit formula for Tier 6 members with 20 or more years of service is 35% of final average salary plus 2% for each additional year of service over 20.

Cost:

The annual cost to the participating employers of the New York State Teachers' Retirement System for this benefit is estimated to be \$109.6 million or 0.53% of payroll if this bill is enacted.

The System's "new entrant rate," a hypothetical employer contribution rate that would be charged if we started a new retirement system without any assets, is equal to 5.52% of pay under the current Tier 6 benefit structure. This can be thought of as the long-term expected employer cost of Tier 6, based on current actuarial assumptions. For the proposed change to the Tier 6 benefit structure under this bill, this new entrant rate is estimated to increase to 6.19% of pay, an increase of 0.67% of pay.

Data:

Member data as of June 30, 2025, prepared for the most recent actuarial valuation was used in determining this cost. The most recent data distributions and statistics can be found in the System's Annual Report for the fiscal year ended June 30, 2025. System assets are as reported in the System's financial statements which can be found in the System's Annual Report. This data will also be provided in the System's Actuarial Valuation Report as of June 30, 2025.

Methods and Assumptions:

A summary of actuarial assumptions and methods will be provided in the System's Actuarial Valuation Report as of June 30, 2025. Further details can be found in the most recent Recommended Actuarial Assumptions 2025 Report.

Actuarial Certification:
