2 amended by adding a new subdivision d to read as follows:

7 this section otherwise would have been applicable, may submit an appli-
8 cation for an accidental disability retirement allowance that is based

10 of one year from the effective date of this subdivision. No application
11 filed after the expiration of such one-year period shall be accepted.

3 (b) For purposes of this subdivision, a police officer who is not
4 presently employed shall be eligible to apply for accidental disability
5 retirement benefits based upon diseases of the heart only as expressly

FISCAL NOTE.--Pursuant to Legislative Law, Section 50:

This bill would allow service retirees to apply for an accidental disability benefit under section 809 of the retirement and social security law, which provides benefits for heart disease. They must have retired on or after January 1, 2021. If approved, increased benefits will only be paid prospectively, commencing on the date of application.

Insofar as this bill affects the New York State and Local Retirement System (NYSLRS), there are 89 benefiting retirees collecting annual pension payments of approximately \$16 million. Should these members apply and be approved for a 75% accidental disability benefit, annual pension payments would increase \$2.8 million, generating a past service cost of \$30 million. The cost will be shared by the participating employers in NYSLRS and spread over future billing cycles.

The number of future retirees who could be affected by this legislation cannot be readily determined. The cost of each additional accidental disability benefit approved will depend upon the applicant's age, service, salary, and plan, but is expected to average 2.5 times the member's compensation. All future costs will be borne by the state of New York and local participating employers in NYSLRS.
