LBD14618-02-6

This bill would provide a performance of duty (POD) disability presumption to certain members employed by the Nassau county police department who perform police medic or police emergency ambulance related services, are impaired due to contracting HIV, tuberculosis, or hepatitis following exposure to bodily fluids. Members must be covered under section 607-j of the retirement and social security law. The benefit is 50% of final average salary.

This proposal would likely lead to an increased number of POD disability benefits for future retirees.

We estimate that the annual contributions of Nassau county will not materially increase because of this proposal.

There will be an immediate past service cost of \$84,300 which will be borne by Nassau county as a one-time payment. This estimate assumes that payment will be made on February 1, 2027. If Nassau county elects to amortize this cost over 10 years, the cost for each year will be \$10,800.

Further, there could be some administrative costs to implement the provisions of this legislation.

These estimated costs are based on 126 affected members employed by Nassau county, with annual salary of approximately \$21 million as of March 31, 2025.
