FISCAL NOTE.--Pursuant to Legislative Law, Section 50:

This bill would create a presumption providing accidental death benefits to active Tier 1-3 members of the New York State and Local Retirement System (NYSLRS) who die by suicide. To qualify for the accidental death benefits, the member must experience a traumatic event and thereupon be diagnosed with post-traumatic stress disorder (PTSD) or die within 45 days of the traumatic event. The traumatic event must occur on-the-job while employed in a position providing public safety services - such as peace officers, correction officers, deputy sheriffs, and first responders - or while acting at the direction of such public safety personnel.

Insofar as this bill affects NYSLRS, the number of accidental death benefits granted would increase. The additional cost for each death in the Employees' Retirement System is expected to average 4.5 times final average salary; the additional cost of each death in the Police and Fire Retirement System is expected to average 13 times final average salary.

Further, we anticipate significant administrative costs to implement the provisions of this legislation.

The number of current and future members who could be affected by this legislation cannot be readily determined.
