CENSUS DATA: The estimates presented herein are based on salary data provided by the New York City Fire Pension Fund (FIRE). The Ordinary Death Benefit estimated is based on Mr. Floyd's earnings in his last 12 months of service of approximately \$92,200. The salary data was not audited but was reviewed for reasonableness.

BACKGROUND: Former New York City probationary firefighter Derek Floyd died on April 15, 2024, after his employment with the New York City Fire Department ceased on November 9, 2023, so that his beneficiaries were

not entitled to the Ordinary Death Benefit afforded to members in active service.

This proposed legislation would treat Mr. Floyd as an active member at the time of his death, entitling his beneficiary to an additional lump sum death benefit equal to three times his final year's earnings, rounded up to the nearest \$1,000.

ASSUMPTIONS AND METHODS: The estimates presented herein have been calculated based on the Revised 2021 Actuarial Assumptions and Methods of the impacted retirement systems

RISK AND UNCERTAINTY: The costs presented in this Fiscal Note depend highly on the actuarial assumptions, methods, and models used, demographics of the impacted population, and other factors such as investment, contribution, and other risks. If actual experience deviates from actuarial assumptions, the actual costs could differ from those presented herein. Quantifying these risks is beyond the scope of this Fiscal Note.

This Fiscal Note is intended to measure pension-related impacts and does not include other potential costs (e.g., administrative and Other Postemployment Benefits). This Fiscal Note does not reflect any chapter laws that may have been enacted during the current legislative session.
