1 protect and enhance the natural, recreational, economic and educational
2 values of the region, which the state and local governments may adopt.
3 § 59-0105. Legislative findings and intent.

4 The legislature hereby finds that the counties of Dutchess and Putnam
5 contain a wetland ecosystem of statewide importance known as the Great
6 Swamp.

7 The legislature finds that within the Great Swamp the federal, state,
8 county and local governments own and manage significant properties in
9 the form of parks, preserves, historic sites and protected open space,
10 where there is an interdependent and reciprocal relationship between
11 human activities and natural processes, and where fishing, agriculture
12 and tourism have been the dominant industries for more than three
13 hundred fifty years.

14 The legislature finds that the Great Swamp, an area encompassing over
15 six thousand acres in the counties of Dutchess and Putnam, is of crit-
16 ical importance to the state because it is a wetland comprised of two
17 critical watersheds. The Great Swamp is interconnected by the Swamp
18 River and the East Branch Croton River, and the ecologic and hydrologic
19 integrity of this system must be protected.

20 The legislature also finds that the Great Swamp contains one of the
21 greatest concentrations and diversities of endangered, threatened and
22 special concern species of plants and animals to be found in the state,
23 and that protection of their habitats is in the best interest of the
24 people of New York. The legislature further finds that the Great Swamp
25 contains many other unique natural, agricultural, historical, cultural
26 and recreational resources that are mutually supportive and ultimately
27 dependent upon maintenance of the hydrologic and ecologic integrity of
28 this region.

29 Therefore, the legislature finds that the purpose of this article is
30 to authorize and direct the state and local governments to protect,
31 preserve and properly manage the unique natural resources of the Great
32 Swamp and to encourage coordination of existing programs and studies
33 affecting land and water resources in the region and to protect the
34 value of the existing public and private investment that has already
35 been made to acquire land in the region.

36 The legislature further finds that a portion of the system known as
37 the Great Swamp area requires the preparation and implementation of a
38 state supported Great Swap protection land use and management plan that
39 will assist in the preservation of the core preservation area,
40 protection of the Great Swamp area and for the designation of compatible
41 growth areas to accommodate appropriate patterns of regional growth with
42 recognition of the rights of private land owners and the purpose of
43 preservation of the core area.

8 tivity could best be protected and managed through the development of a

10 publicly owned lands and/or privately owned land dedicated for such
11 purposes.
