Based on a hypothetical example of a surviving spouse aged 45 currently receiving an accidental death benefit of \$40,000 per year who remarries. As shown, no costs are expected for those receiving Special Accidental Death Benefits (SADB); however, the allocation among beneficiaries may change.

The potential increases in employer contributions will be allocated to New York City.

PRESENT VALUE OF BENEFITS: The Present Value of Benefits is the discounted expected value of benefits paid to current members if all assumptions are met, including future service accrual and pay increases. Future new hires are not included in this present value.

INITIAL INCREASE (DECREASE) IN ACTUARIAL PRESENT VALUES
as of June 30, 2024 (\$ in Thousands)

Present Value (PV)	SADB Eligible	Not SADB Eligible
(1) PV of Employer Contributions:	0	275
(2) PV of Employee Contributions:	0	0
Total PV of Benefits (1) + (2):	0	275

UNFUNDED ACCRUED LIABILITY (UAL): Actuarial Accrued Liabilities are the portion of the Present Value of Benefits allocated to past service. Changes in UAL per incident would be recognized as ongoing gain/loss.

AMORTIZATION OF UNFUNDED ACCRUED LIABILITY

Recognized as Gain/Loss	SADB Eligible	Not SADB Eligible
Increase (Decrease) in UAL:	0	275 K
Number of Payments:	N/A	14
Amortization Payment:	0	33 K

CENSUS DATA: The illustration presented herein uses a hypothetical example of a non-Special Accidental Death Benefits (SADB) accidental death benefit of \$40,000 per year for a member who is survived by a spouse, currently aged 45, and a youngest child, currently aged 15, with no other contingent beneficiaries.

The following table contains the preliminary census data for active Tier 3 members as of June 30, 2024 across NYCERS, POLICE and FIRE, split between those eligible and not eligible for SADB.

Active Members	SADB Eligible	Not SADB Eligible
- Number Count:	33,078	81
- Average Age:	35.1	34.5
- Average Service:	7.5	4.9
- Average Salary:	119,700	83,900

IMPACT ON SURVIVOR BENEFITS: The accidental death benefits payable to beneficiaries of Tier 3 NYCERS members are made up of accidental death benefits (RSSL 509) and, if eligible, SADB under General Municipal Law 208-f, totaling approximately 100% of salary. The SADB is paid to the deceased member's surviving spouse, if alive, regardless of their marital status.

Currently, surviving spouses receiving accidental death benefits who subsequently remarry, stop receiving the non-SADB portion of the accidental death benefit. Instead, the non-SADB death benefit would potentially be paid to the deceased member's dependent children, parents, or other eligible beneficiaries, if any. If there are no other eligible beneficiaries, then the SADB would allow the spouse to receive 100% of the accidental death benefit.

Under the proposed legislation, surviving spouses who are in pay status on or after the effective date, and subsequently remarry, would continue to receive both the non-SADB and SADB portion of the accidental death benefit. Any beneficiaries lower in the hierarchy of eligible recipients (such as qualifying dependent children or parents) would forfeit eligibility to such non-SADB accidental death benefits to the extent the surviving spouse who remarries is still alive.

ASSUMPTIONS AND METHODS: The estimates presented herein have been calculated based on the Revised 2021 Actuarial Assumptions and Methods of the impacted retirement systems.

To illustrate the potential impact of this proposed legislation, a hypothetical example was used as disclosed in the Census Data section. The actual cost of this proposed legislation could vary greatly depending on the number of future surviving spouses who remarry, their age and benefit amount, and the demographics of other eligible beneficiaries.

RISK AND UNCERTAINTY: The costs presented in this Fiscal Note depend highly on the actuarial assumptions, methods, and models used, demographics of the impacted population, and other factors such as investment, contribution, and other risks. If actual experience deviates from actuarial assumptions, the actual costs could differ from those presented herein. Quantifying these risks is beyond the scope of this Fiscal Note.

This Fiscal Note is intended to measure pension-related impacts and does not include other potential costs (e.g., administrative and Other Postemployment Benefits). This Fiscal Note does not reflect any chapter laws that may have been enacted during the current legislative session.
