§ 40. The superintendent of financial services shall establish rates for policies providing coverage for physicians and surgeons medical malpractice for the periods commencing July 1, 1985 and ending June 30, [~~2026~~] **2027**; provided, however, that notwithstanding any other provision of law, the superintendent shall not establish or approve any increase in rates for the period commencing July 1, 2009 and ending June 30, 2010. The superintendent shall direct insurers to establish segregated accounts for premiums, payments, reserves and investment income attributable to such premium periods and shall require periodic reports by the insurers regarding claims and expenses attributable to such periods to monitor whether such accounts will be sufficient to meet incurred claims and expenses. On or after July 1, 1989, the superintendent shall impose a surcharge on premiums to satisfy a projected deficiency that is attributable to the premium levels established pursuant to this section for such periods; provided, however, that such annual surcharge shall not exceed eight percent of the established rate until July 1, [~~2026~~] **2027**, at which time and thereafter such surcharge shall not exceed twenty-five percent of the approved adequate rate, and that such annual surcharges shall continue for such period of time as shall be sufficient to satisfy such deficiency. The superintendent shall not impose such surcharge during the period commencing July 1, 2009 and ending June 30, 2010. On and after July 1, 1989, the surcharge prescribed by this section shall be retained by insurers to the extent that they insured physicians and surgeons during the July 1, 1985 through June 30, [~~2026~~] **2027** policy periods; in the event and to the extent physicians and surgeons were insured by another insurer during such periods, all or a pro rata share of the surcharge, as the case may be, shall be remitted to such other insurer in accordance with rules and regulations to be promulgated by the superintendent. Surcharges collected from physicians and surgeons who were not insured during such policy periods shall be apportioned among all insurers in proportion to the premium written by

each insurer during such policy periods; if a physician or surgeon was insured by an insurer subject to rates established by the superintendent during such policy periods, and at any time thereafter a hospital, health maintenance organization, employer or institution is responsible for responding in damages for liability arising out of such physician's or surgeon's practice of medicine, such responsible entity shall also remit to such prior insurer the equivalent amount that would then be collected as a surcharge if the physician or surgeon had continued to remain insured by such prior insurer. In the event any insurer that provided coverage during such policy periods is in liquidation, the property/casualty insurance security fund shall receive the portion of surcharges to which the insurer in liquidation would have been entitled. The surcharges authorized herein shall be deemed to be income earned for the purposes of section 2303 of the insurance law. The superintendent, in establishing adequate rates and in determining any projected deficiency pursuant to the requirements of this section and the insurance law, shall give substantial weight, determined in [~~his~~] **their** discretion and judgment, to the prospective anticipated effect of any regulations promulgated and laws enacted and the public benefit of stabilizing malpractice rates and minimizing rate level fluctuation during the period of time necessary for the development of more reliable statistical experience as to the efficacy of such laws and regulations affecting medical, dental or podiatric malpractice enacted or promulgated in 1985, 1986, by this act and at any other time. Notwithstanding any provision of the insurance law, rates already established and to be established by the superintendent pursuant to this section are deemed adequate if such rates would be adequate when taken together with the maximum authorized annual surcharges to be imposed for a reasonable period of time whether or not any such annual surcharge has been actually imposed as of the establishment of such rates.

§ 282. Definitions. As used in this title, the following terms shall have the following meanings:

1. "Generic prescription drug" means a drug that is approved pursuant to an application submitted under subdivision (j) of section 355 of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. Sec. 301 et seq.), or a biosimilar, as defined under the federal Public Health Service Act (42 U.S.C. Sec. 262) that is not under patent.

2. "Partnerships" means agreements for the procurement of generic prescription drugs by way of contracts or purchasing by a payer, state governmental agency, group purchasing organization, nonprofit organization, or other entity.

§ 283. Partnerships; production and distribution of generic prescription drugs. 1. (a) The commissioner shall enter into partnerships, consistent with paragraph (b) of subdivision two of this section, in consultation with all appropriate state agencies and the department of health or equivalent institution of any other state as determined by the commissioner, to increase competition, lower prices, and address shortages in the market for generic prescription drugs, to reduce the cost of prescription drugs for public and private purchasers, taxpayers, and consumers, and to increase patient access to affordable drugs.

(b) The department shall have the ability to hire staff to oversee and project-manage the partnerships for manufacturing or distribution of generic prescription drugs.

2. (a) The commissioner shall enter into partnerships resulting in the production or distribution of generic prescription drugs, with the intent that these drugs be made widely available to public and private purchasers, facilities licensed pursuant to article twenty-eight of this chapter, and pharmacies as defined in section six thousand eight hundred two of the education law, as appropriate. The generic prescription drugs shall be produced or distributed by a drug company or generic drug manufacturer that is registered with the United States Food and Drug Administration.

(b) (i) The commissioner shall only enter into partnerships pursuant to paragraph (a) of this subdivision to produce a generic prescription drug at a price that results in savings, targets failures in the market for generic drugs, and improves patient access to affordable medications.

(ii) For top drugs identified pursuant to the criteria listed in subparagraph (v) of this paragraph, the department shall determine if viable pathways exist for partnerships to manufacture or distribute generic prescription drugs by examining the relevant legal, market, policy, and regulatory factors.

(iii) The department shall consider the following, if applicable, when setting the price of the generic prescription drug:

(1) United States Food and Drug Administration user fees.

(2) Abbreviated new drug application acquisition costs amortized over a five-year period.

(3) Mandatory rebates.

(4) Total contracting and production costs for the drug, including a reasonable amount for administrative, operating, and rate-of-return expenses of the drug company or generic drug manufacturer.

(6) Other initial start-up costs amortized over a five-year period.

(iv) Each drug shall be made available to providers, patients, and purchasers at a transparent price and without rebates, other than federally required rebates.

(v) The department shall prioritize the selection of generic prescription drugs that have the greatest impact on lowering drug costs to patients, increasing competition and addressing shortages in the prescription drug market, improving public health, or reducing the cost of prescription drugs to public and private purchasers.

(c) (i) In identifying generic prescription drugs to be produced, the department shall consider prescription drug retail price lists made pursuant to section two hundred seventy-eight of this article.

(ii) The partnerships entered into pursuant to paragraph (a) of this subdivision shall include the production of at least one form of insulin, provided that a viable pathway for manufacturing a more affordable form of insulin exists.

(iii) The department shall prioritize drugs for chronic and high-cost conditions.

(d) The department shall consult with all of the following public and private purchasers to assist in developing a list of generic prescription drugs to be manufactured or distributed through partnerships and to determine the volume of each generic prescription drug that can be procured over a multiyear period to support a market for a lower cost generic prescription drug:

(i) The department of mental hygiene, the office for people with developmental disabilities, the office of general services, and the department of corrections and community supervision, or the entities acting on behalf of each of those state purchasers.

(ii) Health insurers licensed pursuant to the insurance law.

(iii) Hospitals.

(iv) Any other entity as determined by the commissioner.

(e) Before effectuating a partnership pursuant to this section, the commissioner shall determine minimum thresholds for procurement of an entity's expected volume of a targeted drug from the company or manufacturer over a multiyear period.

(f) All state agencies shall be required to purchase generic prescription drugs from the department or entities that contract or partner with the department pursuant to this chapter.

(g) The department shall not be required to consult with every entity listed in subparagraphs (ii), (iii) and (iv) of paragraph (d) of this subdivision, so long as purchaser engagement includes a reasonable representation from these groups.

§ 284. Reporting. 1. On or before January first, two thousand twenty-eight, the department shall submit a report to the legislature that assesses the feasibility of directly manufacturing generic prescription drugs and selling generic prescription drugs at a fair price. The report shall include, but not be limited to, an analysis of governance structure options for manufacturing functions, including chartering a private

organization, a public-private partnership, or a public board of directors.

2. On or before March first, two thousand twenty-seven, the department shall report to the legislature on both of the following:

(a) A description of the status of all drugs targeted under this chapter.

(b) An analysis of how the activities of the department may impact competition, access to targeted drugs, the costs of those drugs, and the costs of generic prescription drugs to public and private purchasers.

§ 285. Proprietary information. Notwithstanding any provision of law to the contrary, all nonpublic information and documents obtained by the department pursuant to this title shall not be required to be disclosed pursuant to article six of the public officers law.

§ 3. Severability. If any clause, sentence, paragraph, section or part of this act shall be adjudged by any court of competent jurisdiction to be invalid and after exhaustion of all further judicial review, the judgment shall not affect, impair or invalidate the remainder thereof, but shall be confined in its operation to the clause, sentence, paragraph, section or part of this act directly involved in the controversy in which the judgment shall have been rendered.

PART X

Section 1. The public health law is amended by adding a new article 25-AA to read as follows:

ARTICLE 25-AA

NEW YORK STATE ABORTION CLINICAL TRAINING PROGRAM ACT

Section 2599-bb-10. Policy and purpose.
2599-bb-11. Definitions.
2599-bb-12. Establishment of the New York state abortion clinical training program.
2599-bb-13. Reporting.

§ 2599-bb-10. Policy and purpose. 1. New York has long held that comprehensive reproductive health care is a fundamental component of every individual's health, privacy and equality, and that access to reproductive health care services is integral to their ability to choose to carry a pregnancy to term, to give birth to a child, or to have an abortion.

2. Abortion care is provided in hospitals, clinics, and private medical practices across the state, with a majority of this care delivered by community-based providers. However, growing maternal health care deserts have made it difficult for individuals to access this vital form of care. The need for abortion care continues to increase while the number of providers trained to perform these services is declining. Although there are community-based abortion facilities in every region of the state, only seven out of ten regions have community-based facilities that perform abortion care beyond fifteen weeks of pregnancy. In three regions, only two facilities provide abortion care up to twenty weeks of pregnancy. This has resulted in pregnant people having to trav-

el further, and in some cases out of state, to access care, especially later in pregnancy.

3. While any physician and health care practitioner licensed by the state with abortion in their scope of practice is authorized to provide this care under law, there is no structured training program available to them for this purpose.

4. New York is in a strong position to address the training needs of these individuals by establishing a statewide abortion clinical training program. There are multiple abortion providers who are experienced, utilize innovative abortion care procedures, and interested in training their peers but require funding to do so.

5. It is the purpose of this article to create new training opportunities for New York health care practitioners in the delivery of abortion care through such a program, thereby protecting every individual's right to health, privacy and equality.

§ 2599-bb-11. Definitions. As used in this article, the following terms shall have the following meanings:

1. "Abortion" shall mean the termination of a pregnancy pursuant to section twenty-five hundred ninety-nine-bb of this chapter.

2. "Health care services" shall mean the range of care related to the provision of abortion pursuant to section twenty-five hundred ninety-nine-bb of this chapter.

3. "Health care practitioner" shall mean any health care practitioner authorized to provide health care services pursuant to section twenty-five hundred ninety-nine-bb of this chapter or an intern or resident who is employed by a hospital or otherwise enrolled in an accredited graduate medical education program.

4. "Professional educators" shall mean organizations providing reproductive health care, continuing education programs for qualified providers through professional associations or clinical education programs that meet professionally recognized training standards.

§ 2599-bb-12. Establishment of the New York state abortion clinical training program. 1. (a) There is hereby established within the department the New York state abortion clinical training program for the purpose of training health care practitioners in the performance of abortion and related reproductive health care services. The commissioner in consultation with the state education department, shall adopt a comprehensive curriculum and competency based-standards for the training of health care practitioners in the performance of a full range of abortion and related reproductive health care services. Such curriculum and standards shall be consistent with evidence-based training methods and shall include, but not be limited to:

(i) counseling and informed consent;

(ii) miscarriage management;

(iii) patient-centered care;

(iv) pre-abortion evaluation;

(v) contraception and aftercare;

(vi) telehealth delivery;

(vii) procedural abortion;

(viii) medication abortion; and

(ix) potential complications and required care.

(b) The commissioner shall update the adopted curriculum and standards at least every five years.

(c) The commissioner shall consult a range of experts, including, but not limited to, individuals and entities providing abortion care, abortion funds, and other organizations whose mission is to expand

access to abortion care, to ensure the program structure reflects the needs of abortion providers, abortion funds and consumers in developing the initial curriculum and standards and all subsequent updates.

(d) For professional educators currently operating an abortion clinical training program within the state and selected by the department to facilitate training through the program, the commissioner shall approve the existing curriculum for use in the New York state abortion clinical training program so long as the curriculum meets adopted statewide standards.

3. (a) The commissioner is authorized to enter into agreements with professional educators to facilitate clinical training related to abortion care and other related reproductive health services at a minimum of four sites across the state. In entering such agreements, the commissioner shall consider organizations that:

(i) comply with applicable state laws and regulations;

(ii) are capable of providing culturally congruent care and implicit bias training;

(iii) have demonstrated experience in coordinating abortion care training programs; and

(iv) have sufficient patient volume to accommodate training need.

(b) Professional educators shall not be required to provide training in all areas of the approved curriculum, provided, however, special consideration shall be given to professional educators who have the capability to provide the full range of abortion care and related reproductive health care services.

(c) The commissioner may engage the services of a consultant on a contract basis to support the administration and operation of the program. Such consultant shall be a professional educator that has the demonstrated ability to provide programmatic oversight on a statewide level including, but not limited to candidate selection and screening, and adherence to the approved curriculum and clinical standards.

(d) Each professional educator receiving funding pursuant to this paragraph shall submit a written certification in such form and at such time as the commissioner shall prescribe, attesting how any award made was used to support training health care practitioners in the performance of abortion and related reproductive health care services including, but not limited to the number of health care practitioners selected for training; the number of health care practitioners completing the training; and the areas of the state served by the health care practitioners selected.

(e) Notwithstanding any inconsistent provision of law to the contrary, the commissioner shall be authorized to recoup any award made and determined to have been used in a manner inconsistent with the purposes of the abortion clinical training program. The commissioner is authorized to employ any legal mechanism to recoup such funds, including an offset of other funds that are owed to such professional educator.

4. The commissioner shall prioritize eligible health care practitioners who will provide abortion and related reproductive health care services to underserved communities in the state to receive training.

5. The commissioner shall award and distribute grants to address practical support needs of eligible health care providers. Funds may be awarded to support an eligible health care practitioner in obtaining clinical education on abortion care and other reproductive health services, including, but not limited to, financial support for travel and lodging associated with attending the program.

6. The commissioner shall promulgate rules and regulations as are necessary to carry out the provisions of this section.

7. Nothing in this article shall be construed to limit or restrict abortion training that occurs within New York state separate and apart from the New York state abortion clinical training program.

§ 2599-bb-13. Reporting. The commissioner shall submit a report no later than twelve months after the effective date of this section and annually thereafter, to the governor, the temporary president of the senate and the speaker of the assembly, which shall include, but not be limited to, the total amount of grants issued, the number of eligible participants, the number of eligible providers, and the region of the state where the eligible providers are located. Notwithstanding any other provision of law, the commissioner shall not report any identifying information of eligible participants in the program.

§ 2. This act shall take effect on the first of April next succeeding the date upon which it shall have become a law. Effective immediately, the addition, amendment and/or repeal of any rule or regulation necessary for the implementation of this act on its effective date are authorized to be made and completed on or before such effective date.

PART II

Section 1. Legislative findings. The legislature finds that following the enactment of the National Nutrition Monitoring and Related Research Act of 1990, the Economic Research Service (ERS) of the United States Department of Agriculture (USDA) began issuing an annual food insecurity report. ERS's annual report collects and analyzes data gathered from the Census Bureau of the United States Department of Commerce through its annual Current Population Survey (CPS)-Food Security Supplement (FSS). The annual FSS survey asks about food security, food spending, and the use of federal and community nutrition assistance programs. Using the CPS-FSS data on households in the United States, including in New York, ERS has consistently reported on national and state-level household food insecurity and provided detailed documentation and data files for public use. Nonetheless, as of September 2025, the USDA announced that ERS will no longer issue the annual food insecurity report.

The legislature additionally finds that some New York households experience food insecurity at times during the year due to lack of money and other resources. According to the Food Insufficiency Data Brief released by the NY Health Foundation on March 31, 2025, "The food insufficiency rate in New York State is 10.4%, which is higher than it was during the early days of the pandemic in 2020 (10.2%)." New York households often look to the Supplemental Nutrition Assistance Program (SNAP, also known as "food stamps") when facing food insecurity, however, the latest federal budget bill (H.R.1) makes deep cuts to SNAP which are expected to significantly increase the number of New Yorkers experiencing food insecurity. In light of these circumstances, information on food security trends is now more important than ever to help the New York legislature and other stakeholders better understand hunger trends and make

decisions for investing taxpayer dollars as efficiently and effectively as possible.

§ 2. Subdivision 1 of section 201 of the public health law is amended by adding a new paragraph (z) to read as follows:

(z) include as part of the department's annual participation in the Behavioral Risk Factor Surveillance System, the U.S. Household Food Security Survey Module: Six-Item Short Form Economic Research Service, developed by the United States department of agriculture, and publicly report annually the results of such survey module broken down to the county level on the public website of the department.

§ 3. This act shall take effect immediately.

The inspector shall use the totality of the record to determine if the documentation or signature requirement, as outlined in statute or regulation, is met, and/or consider submitted attestations to resolve the issue. If the inspector rejects such supporting documentation, an explanation for such rejection shall be provided in writing.
