IMPACT ON MEMBER CONTRIBUTIONS: Members of the EMT 25-Year Plan for Tier 6 members currently contribute basic member contributions, which range from 3% to 6% of pensionable pay, plus additional member contributions of 6.25% of pensionable pay until attaining 30 years of Allowable Service.

Under the proposed legislation, additional member contributions would be reduced, as necessary, so that total employee contributions do not exceed 9.25% of pensionable pay. Basic member contributions would remain the same.

The following table provides further illustration of the proposed changes in employee contributions.

ASSUMPTIONS AND METHODS: The estimates presented herein have been calculated based on the Revised 2021 Actuarial Assumptions and Methods of the impacted retirement systems. In addition:

* New entrants were assumed to replace exiting members so that total payroll increases by 3% each year for impacted groups. New entrant demographics were developed based on data for recent new hires and actuarial judgement.

RISK AND UNCERTAINTY: The costs presented in this Fiscal Note depend highly on the actuarial assumptions, methods, and models used, demographics of the impacted population, and other factors such as investment, contribution, and other risks. If actual experience deviates from actuarial assumptions, the actual costs could differ from those presented herein. Quantifying these risks is beyond the scope of this Fiscal Note.

This Fiscal Note is intended to measure pension-related impacts and does not include other potential costs (e.g., administrative and Other Postemployment Benefits). This Fiscal Note does not reflect any chapter laws that may have been enacted during the current legislative session.
