2. No photo speed violation monitoring system shall be used in a village authorized to establish a demonstration program pursuant to this section unless (i) on the day it is to be used it has successfully passed a self-test of its functions; and (ii) it has undergone an annual calibration check performed pursuant to paragraph four of this subdivision. The village shall install signs giving notice that a photo speed violation monitoring system is in use to be mounted on advance warning signs notifying motor vehicle operators of such upcoming speed zone and/or on speed limit signs applicable within such speed zone, in conformance with standards established in the MUTCD.

3. Operators of photo speed violation monitoring systems shall have completed training in the procedures for setting up, testing, and operating such systems. Each such operator shall complete and sign a daily set-up log for each such system that the village operates that (i) states the date and time when, and the location where, the system was set up that day, and (ii) states that such operator successfully performed, and the system passed, the self-tests of such system before producing a recorded image that day. The village shall retain each such daily log until the later of the date on which the photo speed violation monitoring system to which it applies has been permanently removed from use or the final resolution of all cases involving notices of liability issued based on photographs, microphotographs, videotape or other recorded images produced by such system.

4. Each photo speed violation monitoring system shall undergo an annual calibration check performed by an independent calibration laboratory which shall issue a signed certificate of calibration. The village shall keep each such annual certificate of calibration on file until the final resolution of all cases involving a notice of liability issued during such year which were based on photographs, microphotographs, videotape or other recorded images produced by such photo speed violation monitoring system.

5. (i) Such demonstration programs shall utilize necessary technologies to ensure, to the extent practicable, that photographs, microphotographs, videotape or other recorded images produced by such photo speed violation monitoring systems shall not include images that identify the driver, the passengers, or the contents of the vehicle. Provided, however, that no notice of liability issued pursuant to this section shall be dismissed solely because such a photograph, microphotograph, videotape or other recorded image allows for the identification of the driver, the passengers, or the contents of vehicles where the village shows that it made reasonable efforts to comply with the provisions of this paragraph in such case.

(ii) Photographs, microphotographs, videotape or any other recorded image from a photo speed violation monitoring system shall be for the exclusive use of the village for the purpose of the adjudication of liability imposed pursuant to this section and of the owner receiving a notice of liability pursuant to this section, and shall be destroyed by the village upon the final resolution of the notice of liability to which such photographs, microphotographs, videotape or other recorded images relate, or one year following the date of issuance of such notice of liability, whichever is later. Notwithstanding the provisions of any other law, rule or regulation to the contrary, photographs, microphotographs, videotape or any other recorded image from a photo speed violation monitoring system shall not be open to the public, nor subject to civil or criminal process or discovery, nor used by any court or administrative or adjudicatory body in any action or proceeding therein

(2) shall be furnished in response to a subpoena duces tecum signed by a judge of competent jurisdiction and issued pursuant to article six hundred ten of the criminal procedure law or a judge or magistrate of a federal court authorized to issue such a subpoena duces tecum under federal law, where the judge finds and the subpoena states that there is reasonable cause to believe such information is relevant and material to the prosecution, or the defense, or the investigation by an authorized law enforcement official, of the alleged commission of a misdemeanor or felony in this state or another state, provided, however, that if such offense was against the laws of another state, such judge or magistrate shall only issue such subpoena if the conduct comprising such offense would, if occurring in this state, constitute a misdemeanor or felony in this state; and
