Projected contributions include future new hires that may be impacted. For Fiscal Year 2051 and beyond, the expected increase in normal cost as a level percent of pay for impacted new entrants is approximately 0.16% for NYCERS, 0.13% for TRS, 0.18% for BERS, 0.11% for POLICE, and 0.16% for FIRE.

The initial increase in employer contributions of \$871.4 is estimated to be \$708.0 million for New York City and \$163.4 million for the other obligors of NYCERS.

PRESENT VALUE OF BENEFITS: The Present Value of Benefits is the discounted expected value of benefits paid to current members if all assumptions are met, including future service accrual and pay increases. Future new hires are not included in this present value.

IMPACT ON MEMBER BENEFITS: Currently, the COLA provides an annual increase equal to a percentage of the maximum annual retirement allowance but limited to the first \$18,000 of retirement allowance.

The costs in the tables above are based on providing for an increase in the \$18,000 limit starting on September 1, 2025 and each year thereafter. This increase would be equal to the increase in CPI in the one-year period ending on the prior March 31st, rounded to the next higher one-tenth of one percent, but not more than 3% nor less than 1%.

IMPORTANT NOTE: An alternate interpretation of the proposed legislation could use the increasing \$18,000 as the base for all retirees for calculating COLA rather than as the limit of the retirement allowance subject to the COLA increase. To the extent that implementation of the proposed legislation follows this alternate interpretation, the costs for this proposed legislation may be as much as 75% higher than the costs disclosed above (i.e., a \$2.7 billion total initial increase in PV of Benefits).

ASSUMPTIONS AND METHODS: The estimates presented herein have been calculated based on the Revised 2021 Actuarial Assumptions and Methods of the impacted retirement systems. In addition:

* New entrants were assumed to replace exiting members so that total payroll increases by 3% each year for impacted groups. New entrant demographics were developed based on data for recent new hires and actuarial judgement.

RISK AND UNCERTAINTY: The costs presented in this Fiscal Note depend highly on the actuarial assumptions, methods, and models used, demographics of the impacted population, and other factors such as investment, contribution, and other risks. If actual experience deviates from actuarial assumptions, the actual costs could differ from those

presented herein. Quantifying these risks is beyond the scope of this Fiscal Note.

This Fiscal Note is intended to measure pension-related impacts and does not include other potential costs (e.g., administrative and Other Postemployment Benefits). This Fiscal Note does not reflect any chapter laws that may have been enacted during the current legislative session.

STATEMENT OF ACTUARIAL OPINION: Marek Tyszkiewicz and Gregory Zelikovsky are members of the Society of Actuaries and the American Academy of Actuaries. We are members of NYCERS, but do not believe it impairs our objectivity, and we meet the Qualification Standards of the American Academy of Actuaries to render the actuarial opinion contained herein. To the best of our knowledge, the results contained herein have been prepared in accordance with generally accepted actuarial principles and procedures and with the Actuarial Standards of Practice issued by the Actuarial Standards Board.

FISCAL NOTE IDENTIFICATION: This Fiscal Note 2025-12 dated February 11, 2025 was prepared by the Chief Actuary for the New York City Retirement Systems and Pension Funds and is intended for use only during the 2025 Legislative Session.
