1 2. (a) A homeowners' association may not adopt or enforce any rules or
2 regulations that would effectively prohibit, or impose unreasonable
3 limitations on, the installation or use of an apiary on property owned
4 or leased which is subject to the covenants, conditions, and
5 restrictions of such homeowners' association where (i) the colony is
6 maintained for the purpose of the production of honey, and (ii) the
7 beekeeper is in compliance with the provisions of article fifteen of the
8 agriculture and markets law. A restriction on use which effectively
9 prohibits the installation or use of an apiary is unenforceable and
10 shall be void as contrary to public policy.

11 (b) For the purposes of this subdivision, an unreasonable limitation
12 includes, but is not limited to, any restriction on use that:

13 (i) inhibits an apiary from functioning at its intended maximum effi-
14 ciency; or

15 (ii) increases the apiary's installation or maintenance costs by an
16 amount which is estimated to be greater than ten percent of the total
17 cost of the initial installation of the apiary, including the costs of
18 labor and equipment.

19 3. Notwithstanding subdivision two of this section, a homeowners'
20 association may adopt or enforce a restriction on use to prohibit the
21 installation of an apiary where such restrictions are consistent with
22 the provisions of article fifteen of the agriculture and markets law.

23 4. If approval for the installation or use of an apiary is required by
24 a homeowners' association, the application for approval shall be proc-
25 essed and approved by the association in a manner prescribed by the
26 association and shall not be willfully avoided or delayed. The approval
27 or denial of an application shall be in writing. Any denial of an appli-
28 cation shall include a detailed description of the exact basis for the
29 denial and shall include specific examples of the homeowners' associ-
30 ation's concerns, if applicable. If an application is not denied in
31 writing within sixty days from the date of receipt of the application,
32 the application shall be deemed approved, unless that delay is the
33 result of a reasonable request for additional information.

34 5. An apiary shall meet the requirements established by any local,
35 state or federal law, rule or regulation on health and safety standards
36 and those requirements imposed by state and local permitting authori-
37 ties.

38 6. In any action by an individual requesting to have an apiary and
39 seeking to enforce compliance with this section, the individual shall be
40 awarded reasonable attorney's fees if such individual prevails.

41 § 2. This act shall take effect on the sixtieth day after it shall
42 have become a law.
