

STATE OF NEW YORK

9423

IN SENATE

March 11, 2026

Introduced by Sen. SKOUFIS -- read twice and ordered printed, and when printed to be committed to the Committee on Housing, Construction and Community Development

AN ACT to amend the real property law, in relation to providing for the adaptive reuse of certain parcels which are zoned for commercial, office, retail, or parking

The People of the State of New York, represented in Senate and Assembly, do enact as follows:

1 Section 1. This act shall be known and may be cited as the "Redevelop-
2 ing Empty and Vacant Infrastructure for Vibrant Economies Act" or the
3 "REVIVE Act".

4 § 2. The Legislature finds and declares: For decades, shopping plazas,
5 retail centers, and office parks played a vital role in New York's
6 economic and social fabric. Today, however, many of these properties are
7 in decline due to changing economic conditions, evolving consumer pref-
8 erences, and the rise of alternative retail and business models. Many
9 such centers and their parking lots have become underutilized or
10 outright⁰ vacant, such that academics and planners have deemed them to
11 be "stranded assets."

12 At the same time, New York is confronting a severe housing crisis that
13 demands an aggressive, coordinated response. Addressing this crisis
14 requires innovative approaches that unlock the potential of stranded
15 assets for housing and community development, while thoughtfully balanc-
16 ing statewide housing goals with the needs and preferences of locali-
17 ties. A 2024 report by New York State Comptroller Thomas DiNapoli
18 concludes that, "The State must take action to stimulate community-ap-
19 propriate development actions and enhance the supply and diversity of
20 the housing stock." An efficient way for the State to increase the hous-
21 ing supply is to open up and streamline the processes for turning vacant
22 retail and parking lots into new homes.

23 Converting obsolete retail centers and parking lots into vibrant
24 mixed-use communities would promote the general welfare by revitalizing
25 underused properties, creating new opportunities for housing, busi-
26 nesses, and recreation, and strengthening the economic and social vital-

ity of New York's municipalities. One significant impediment to these conversions is the continued application of outdated and rigid municipal zoning regulations that unnecessarily separate residential and commercial uses. To promote the development of dynamic, mixed-use communities that serve both local and statewide interests, it is appropriate for the Legislature to establish standards that remove barriers to the redevelopment of stranded assets, while balancing the desires of municipalities, to unlock numerous housing opportunities for everyday New Yorkers.

§ 3. The real property law is amended by adding a new article 17 to read as follows:

ARTICLE 17

REVIVE OR REDEVELOPING EMPTY AND VACANT INFRASTRUCTURE FOR VIBRANT ECONOMIES ACT

Section 530. Definitions.

531. Eligible projects.

532. Density, height, parking, and other requirements.

§ 530. Definitions. For the purposes of this article, the following terms shall have the following meanings:

1. "Adaptive reuse" means the repurposing of existing buildings, structures, or lots in whole or in part for residential purposes.

2. "Serviced lot" refers to a legal parcel of land connected to both municipal water and sewer systems or has access to equivalent water and sewer infrastructure to ensure adequate service availability.

3. "Ministerial review" means a non-discretionary approval process based on objective planning standards, without public hearings or subjective local review.

4. "Commercial zone" refers to areas designated under the local zoning code primarily for commercial, office, retail, or parking uses. The term "commercial zone" shall not include zones primarily designated for industrial purposes, except where residential uses are expressly permitted under the applicable municipal zoning regulations.

5. "Parking uses" refers exclusively to sites zoned solely for parking purposes, with no allowance for other types of development or uses.

6. "Eligible project" means a residential or mixed-use development that meets the criteria outlined in section five hundred thirty-one of this article.

7. "Vacancy rate" means the percentage of unoccupied or unused square footage in a building, structure, facility compared to the total square footage of the building, structure or facility.

8. "Eligible project site" means any parcel of land or group of one or more contiguous parcels of land upon which an eligible project is being developed.

§ 531. Eligible projects. Notwithstanding any provision of law, local law, ordinance, resolution or regulation to the contrary, residential and mixed-use developments shall be deemed eligible projects for the purposes of this article and permitted by right on legal parcels that meet all of the following criteria:

1. are a minimum of fifteen thousand square feet.

2. are located in commercial zones or are parcels designated for commercial, office, retail, or parking uses.

3. have a vacancy rate of at least fifty percent for a continuous period of at least one year immediately preceding the application for development.

4. are serviced lots.

1 5. are not included in any active payment in lieu of taxes agreement,
2 if located entirely outside of a city with a population of one million
3 or more, unless such agreement including the legal parcels to be devel-
4 oped is modified to explicitly not include such parcels.

5 § 532. Density, height, parking, and other requirements. 1. (a) For
6 any eligible project site that lies within an urban area as defined by
7 the United States census bureau, municipalities shall not limit the
8 density of such site to less than twenty dwelling units per acre.

9 (b) For any eligible project site that lies outside an urban area as
10 defined by the United States census bureau, municipalities shall not
11 limit the density of such site to less than fifteen dwelling units per
12 acre.

13 (c) For any eligible project site, the maximum density of a proposed
14 development shall be either: (i) the greatest density allowed on or
15 after January first, two thousand twenty-six for a residential or mixed-
16 use development located within the municipality's jurisdiction within
17 one mile of the proposed development; or (ii) the minimum density
18 required under this subdivision, whichever is greater.

19 2. (a) Any eligible project site located within a city with one
20 million or more inhabitants shall be allowed up to a height of ten feet
21 above the maximum height otherwise applicable to such site on or after
22 January first, two thousand twenty-six; provided, however, that if such
23 site is located within eight hundred feet of a zoning district that
24 permits a height or density for residential use greater than what is
25 otherwise provided for in this paragraph, then the city shall allow the
26 eligible project site up to the maximum height permitted in such zoning
27 district.

28 (b) Any eligible project site located within a village, town, or city
29 with fewer than one million inhabitants shall be allowed up to a height
30 equivalent to the maximum height otherwise applicable to such site
31 anywhere within the municipality on or after January first, two thousand
32 twenty-six.

33 3. No municipality or county shall adopt or enforce an ordinance,
34 order, zoning restriction, or other regulation that provides or requires
35 more than one parking space per dwelling unit for eligible projects.

36 4. For an eligible project site that lies within an urban area as
37 defined by the United States census bureau:

38 (a) (i) The municipality shall review and approve eligible project
39 applications:

40 (A) within sixty days for such projects with fewer than one hundred
41 fifty units.

42 (B) within ninety days for such projects with one hundred fifty or
43 more units.

44 (ii) If the municipality fails to meet the deadlines established under
45 this paragraph, the eligible project shall be automatically deemed
46 approved.

47 (b) The municipality shall provide public access to a standardized
48 process for ministerial review, including but not limited to clearly
49 defined timelines and submission requirements.

50 (c) If a municipality rejects an application relating to an eligible
51 project, such municipality shall provide a letter identifying the
52 specific eligibility standards and/or zoning requirements that the
53 proposal is not compliant with.

54 (d) A municipality may conduct non-binding design review hearings for
55 eligible projects; provided that such hearings shall not extend the
56 review timelines specified in this subdivision.

1 § 4. Severability. If any clause, sentence, paragraph, subdivision,
2 section or part of this act shall be adjudged by any court of competent
3 jurisdiction to be invalid, such judgment shall not affect, impair, or
4 invalidate the remainder thereof, but shall be confined in its operation
5 to the clause, sentence, paragraph, subdivision, section or part thereof
6 directly involved in the controversy in which such judgment shall have
7 been rendered. It is hereby declared to be the intent of the legislature
8 that this act would have been enacted even if such invalid provisions
9 had not been included herein.

10 § 5. This act shall take effect immediately.
