

CHAPTER 664

An ACT to repeal and reenact chapter forty-three-B of the consolidated laws, to amend the public health law, and to repeal certain articles, titles, parts and sections of the conservation law, the public health law, the agriculture and markets law, the executive law, and chapter seven hundred one of the laws of nineteen hundred fifty-two, entitled "An act providing for joint action by the states of Delaware, New Jersey and New York and the commonwealth of Pennsylvania in developing, utilizing, controlling, and conserving the water resources of the Delaware river basin in order to assure an adequate water supply; authorizing the governor, for these purposes, to enter into a compact on behalf of the state of New York with the states of Delaware and New Jersey and the commonwealth of Pennsylvania and to apply on behalf of the state of New York to the congress of the United States for its consent thereto; creating the Delaware River basin water commission and specifying the powers and duties thereof, including the power to finance projects by the issuance of bonds; providing for the appointment of the state of New York members of the said commission; approving an integrated water project; requiring the commission to prepare and report plans and specifications for specific projects; and requiring certain prior approvals by the legislature of the compacting states," in relation to environmental conservation generally

Became a law May 31, 1972, with the approval of the Governor. Passed by a majority vote, three-fifths being present

The People of the State of New York, represented in Senate and Assembly, do enact as follows:

CHAPTER 43-B OF THE CONSOLIDATED LAWS

ENVIRONMENTAL CONSERVATION LAW

- Article 1. General provisions (§ 1-0101 to 1-0303).
3. Department of environmental conservation; general functions, powers, duties and jurisdiction (§ 3-0101 to 3-0321).
6. State smart growth public infrastructure policy act (§ 6-0101 to 6-0111).
7. Council of environmental advisors (§ 7-0101 to 7-0109).
8. Environmental quality review (§ 8-0101 to 8-0117).
9. Lands and forests (§ 9-0101 to 9-2304).

11. Fish and wildlife (§ 11-0101 to 11-2503).
13. Marine and coastal resources (§ 13-0101 to 13-0705).
14. New York ocean and Great Lakes ecosystem conservation act
(§ 14-0101 to 14-0113).
15. Water resources (§ 15-0101 to 15-3305).
16. Flood control (§ 16-0101 to 16-0119).
17. Water pollution control (§ 17-0101 to 17-2105).
19. Air pollution control (§ 19-0101 to 19-1105).
21. Pollution control compacts (§ 21-0101 to 21-1707).
22. Mining of uranium (§ 22-1010 to 22-1070).
23. Mineral resources (§ 23-0101 to 23-2723).
24. Freshwater wetlands (§ 24-0101 to 24-1305).
25. Tidal Wetlands (§ 25-0101 to 25-0601).
27. Collection, treatment and disposal of refuse and other
solid waste (§ 27-0101 to 27-3321).
28. Pollution prevention (§ 28-0101 to 28-0113)
29. Low-level radioactive waste facilities
(§ 29-0101 to 29-0703).
33. Pesticides (§ 33-0101 to 33-1503).
34. Coastal erosion hazard areas (§ 34-0101 to 34-0113).
35. Detergents and other household cleansing products
(§ 35-0101 to 35-0109).
36. Participation in Flood Insurance Programs
(§ 36-0101 to 36-0115).
37. Substances Hazardous or Acutely Hazardous to Public
Health, safety or the Environment
(§ 37-0101 to 37-1101).
38. Chlorofluorocarbon compounds (§ 38-0101 to 38-0111).
39. Sewage system cleaners and additives used in restricted
geographical areas (§ 39-0101 to 39-0107).
40. Hazardous Substances Bulk Storage Act
(§ 40-0101 to 40-0123).
41. Powers and duties of the department applicable only to the
sixth park region (§ 41-0101 to 41-0107).
42. Historic Saratoga-Washington on the Hudson Partnership
(§ 42-0101 to 42-0117).
43. Lake George park commission (§ 43-0101 to 43-0125).

- 44. Hudson River Valley Greenway (§ 44-0101 to 44-0121).
- 45. State nature and historical preserve trust
(§ 45-0101 to 45-0117).
- 46. Albany Pine Bush preserve commission
(§ 46-0101 to 46-0115).
- 47. County and regional environmental management councils
(§ 47-0101 to 47-0117).
- 48. Environmental justice (§ 48-0101 to 48-0113).
- 49. Protection of natural and man-made beauty
(§ 49-0101 to 49-0505).
- 51. Implementation of Environmental Quality Bond Act of 1972
(§ 51-0101 to 51-1105).
- 52. Implementation of Environmental Quality Bond Act of 1986
(§ 52-0101 to 52-0911).
- 53. Tree conservation and urban forestry
(§ 53-0101 to 53-0307).
- 54. Environmental protection act (§ 54-0101 to 54-1523).
- 55. Sole source aquifer protection (§ 55-0101 to 55-0119).
- 56. Implementation of the clean water/clean air bond act of
1996 (§ 56-0101 to 56-0611).
- 57. Long Island Pine Barrens Maritime Reserve Act
(§ 57-0101 to 57-0213).
- 58. Implementation of the environmental bond act of 2022
"restore mother nature" (§ 58-0101 to 58-1301).
- 70. Uniform procedures (§ 70-0101 to 70-0121).
- 71. Enforcement (§ 71-0101 to 71-4412).
- 72. Environmental regulatory program fees
(§ 72-0101 to 72-1011).
- 73. New York state canal flood mitigation task force
(§ 73-0101 to 73-0107).
- 75. Climate change (§ 75-0101 to 75-0119).
- 76. Climate change adaption cost recovery program
(§ 76-0101 to 76-0105).

ARTICLE 1
GENERAL PROVISIONS

Title 1. Declaration of policy

3. Short title; general definitions

TITLE 1

DECLARATION OF POLICY

Section 1-0101. Declaration of policy.

§ 1-0101. Declaration of policy.

1. The quality of our environment is fundamental to our concern for the quality of life. It is hereby declared to be the policy of the State of New York to conserve, improve and protect its natural resources and environment and to prevent, abate and control water, land and air pollution, in order to enhance the health, safety and welfare of the people of the state and their overall economic and social well being.

2. It shall further be the policy of the state to improve and coordinate the environmental plans, functions, powers and programs of the state, in cooperation with the federal government, regions, local governments, other public and private organizations and the concerned individual, and to develop and manage the basic resources of water, land, and air to the end that the state may fulfill its responsibility as trustee of the environment for the present and future generations.

3. It shall further be the policy of the state to foster, promote, create and maintain conditions under which man and nature can thrive in harmony with each other, and achieve social, economic and technological progress for present and future generations by:

a. Assuring surroundings which are healthful and aesthetically pleasing;

b. Guaranteeing that the widest range of beneficial uses of the environment is attained without risk to health or safety, unnecessary degradation or other undesirable or unintended consequences;

c. Promoting patterns of development and technology which minimize adverse impact on the environment;

d. Preserving the unique qualities of special resources such as the Adirondack and Catskill forest preserves;

e. Providing that care is taken for the air, water and other resources that are shared with the other states of the United States and with Canada in the manner of a good neighbor.

TITLE 3

SHORT TITLE; GENERAL DEFINITIONS

Section 1-0301. Short title.

1-0303. General definitions.

§ 1-0301. Short title.

This chapter shall be known as the "Environmental Conservation Law," and may be cited as "ECL."

§ 1-0303. General definitions.

Whenever used in this chapter, unless a different meaning clearly appears from the context or unless a different meaning is stated in a definition applicable to only a portion of this chapter:

1. "Air pollution emergency" means a combination of circumstances which requires immediate action to reduce the quantity of contaminants in the atmosphere due to danger to public health and welfare, injury to agricultural crops and livestock, damage to and deterioration of property, hazards to air and ground transportation or impairment of environmental quality.

2. "Article," "title," "section" and "subdivision" shall mean such article, title, section or subdivision of this chapter.

4. "Commissioner" shall mean the state Commissioner of Environmental Conservation.

5. "Consolidated health district" shall mean a health district established under section 390 of the Public Health Law.

6. "Council" shall mean the Council of Environmental Advisers.

7. "County department of health" shall mean that division of the county government having jurisdiction over the public health of a county or part-county health district.

8. "County health commissioner" shall mean the executive officer of a county department of health.

9. "County health district" shall mean a health district comprising the entire county heretofore or hereafter established.

10. "County legislative body" shall mean the board of supervisors, or the elected county legislative body, if the county has one.

11. "Department" shall mean the state Department of Environmental Conservation.

12. "Health district" shall mean a county health district, part-county health district, city, town, village or consolidated health district having a separate board of health.

13. "Local board of health" shall mean the board of health of a county, part-county, city, village, town or consolidated health district.

14. "Local health officer" shall mean the health officer of a county, part-county, city, village, town or consolidated health district.

15. As used in sections 3-0109 through 3-0115, inclusive, and sections 3-0305 and 3-0307 of article 3; articles 9, 11, 13 and 15; titles 7, 9, 11 and 13 of article 21; article 23; title 3 of article 27; articles 43, 45 and 47; and titles 1 through 13 inclusive and title 33 of article 71 applicable to these provisions, "local public corporation" shall mean any "municipal corporation" or "district corporation" as defined in subdivisions two and three of section sixty-six of the general construction law.

16. As used in articles 17 and 19 of this chapter, "municipality" shall mean a city, village, town or consolidated health district.

17. "Part-county health district" shall mean all that part of a county outside of a city or cities having a population of fifty thousand or more heretofore or hereafter established as a health district.

18. "Person" shall mean any individual, public or private corporation, political subdivision, government agency, department or bureau of the state, municipality, industry, co-partnership, association, firm, trust, estate or any other legal entity whatsoever. Provided, however, that for purposes of sections 3-0109 through 3-0115 inclusive, and sections 3-0305 and 3-0307 of article 3; articles 9, 11, 13 and 15; titles 7, 9, 11 and 13 of article 21; article 23; articles 43, 45 and 47; sections 57-0121 and 57-0123 of article 57; and titles 1 through 13 inclusive and title 33 of article 71 applicable to these provisions, "person" means any individual, firm, co-partnership, association or corporation other than the state and a "public corporation".

19. "Pollution" shall mean the presence in the environment of conditions and or contaminants in quantities of characteristics which are or may be injurious to human, plant or animal life or to property or which unreasonably interfere with the comfortable enjoyment of life and property throughout such areas of the state as shall be affected thereby.

20. As used in sections 3-0109 through 3-0115 inclusive, and sections

3-0305 and 3-0307 of article 3; articles 9, 11, 13 and 15; titles 7, 9, 11 and 13 of article 21; article 23; title 3 of article 27; articles 43, 45 and 47; and titles 1 through 15 inclusive and title 33 of article 71 applicable to these provisions, "public corporation" shall mean "public corporation" as defined in subdivision 1 of section 3 of the General Corporation Law and includes all public authorities.

21. As used in sections 3-0109 through 3-0115 inclusive, and sections 3-0305 and 3-0307 of article 3; articles 9, 11, 13 and 15; titles 7, 9, 11 and 13 of article 21; article 23; title 3 of article 27; articles 43, 45 and 47; and titles 1 through 15 inclusive and title 33 of article 71 applicable to these provisions, "state public corporation" shall mean public benefit corporation to which the Governor appoints a majority of the members. A person who is a member of a public corporation by virtue of holding another state office shall be deemed to be selected as a member of the public benefit corporation in the manner in which he was selected for such other office.

22. "Infant" or "minor" shall mean any person who has not attained the age of eighteen years.

23. "Arbor day" shall mean the last Friday of April.

24. "Sole source aquifer" shall mean an aquifer system that the United States environmental protection agency, pursuant to Public Law 93-523 which is known as the federal Safe Drinking Water Act of 1974, has designated as the sole or principal drinking water source for an area and which, if contaminated, would create a significant hazard to public health.

25. "Telecommuting" shall mean the conservation of energy through the reduction of travel by employees of the department to and from their designated workplace through the use of telecommunication and computer technology in tasks including, but not limited to, information transfer and processing.

26. "Nature-based solution" shall mean a project that utilizes or

mimics nature or natural processes and functions and that may also offer environmental, economic, and social benefits, while increasing resilience. Nature-based solutions include both green and natural infrastructure.

ARTICLE 3

DEPARTMENT OF ENVIRONMENTAL CONSERVATION; GENERAL FUNCTIONS, POWERS, DUTIES AND JURISDICTION

Title 1. Department of environmental conservation

3. General functions, powers, duties and jurisdiction

TITLE 1

DEPARTMENT OF ENVIRONMENTAL CONSERVATION

Section 3-0101. Continuation of department.

3-0103. Commissioner of environmental conservation.

3-0105. Offices of department.

3-0107. Organization of department; officers and employees.

3-0109. Eligibility for certain offices.

3-0113. The New York State Conservationist.

3-0115. Establishment of forestry and wildlife management areas
by United States; consent of state.

3-0117. Activities of local governmental agencies.

3-0119. Laboratory tests.

§ 3-0101. Continuation of department.

The Department of Environmental Conservation, which was established by chapter 140 of the Laws of 1970, is hereby continued, and all the powers, functions, duties and obligations possessed by the department pursuant to such chapter immediately preceding the effective date of this chapter are hereby continued.

§ 3-0103. Commissioner of environmental conservation.

The head of the department shall be the Commissioner of Environmental Conservation, who shall be appointed by the Governor, by and with the advice and consent of the Senate, and hold office at the pleasure of the Governor by whom he was appointed and until his successor is appointed and has qualified.

*** § 3-0105. Offices of department.**

The principal office of the department shall be in the County of Albany.

* NB Effective prior to Dept. of Environmental Conservation moving to the city of Albany

*** § 3-0105. Offices of the department.**

The principal office of the department shall be in the city of Albany.

* NB Effective upon Dept. of Environmental Conservation moving to the city of Albany

§ 3-0107. Organization of department; officers and employees.

1. Notwithstanding any inconsistent provision of law the commissioner may, from time to time, create, abolish, transfer and consolidate divisions, bureaus, field offices and other units within the department, including those transferred to the department by chapter 140 of the laws of 1970, as he may determine necessary for the efficient operation of the department, subject to the approval of the Director of the Budget.

2. The commissioner may appoint such deputies, directors, assistants and other officers and employees as may be needed for the performance of his duties and may prescribe their powers and duties and fix their compensation within the amounts appropriated therefor, subject to the approval of the Director of the Budget.

§ 3-0109. Eligibility for certain offices.

No person shall be eligible for or shall continue to hold the office of commissioner, deputy commissioner, secretary to the department, if any there be, or head of a division who is engaged in the business of lumbering in any forest preserve county or who is engaged in any business in the prosecution of which hydraulic power is used or in which water is distributed or sold under any public franchise or who is an officer or holder of stocks or bonds of any corporation engaged in such business within the state.

§ 3-0113. The New York State Conservationist.

1. To the end that there shall be promoted a wider understanding of the problems affecting conservation of natural resources in this state, it is declared advisable to authorize the agents who issue hunting, fishing and trapping licenses to sell annual subscriptions to the official magazine of the department, "The New York State Conservationist."

2. Any entity which is authorized by section 11-0713 of this chapter to sell hunting, trapping and fishing licenses is hereby authorized, but not required, to sell annual subscriptions to the department's official magazine, "The New York State Conservationist." The fee to be charged for a subscription to such magazine shall be such fee as the commissioner may, after consultation with the division of the budget, deem necessary for the best interest of the state. Such fee shall be collected from each subscriber at the time of receiving application for subscription. All collected fees, minus a 5.5 percent commission, shall be remitted monthly, on a schedule to be determined by the department. All receipts of the department from subscriptions shall be deposited in an account in the miscellaneous special revenue fund-other. The comptroller is authorized and directed to permit interest earnings on any balances to accrue to the benefit of this account.

§ 3-0115. Establishment of forestry and wildlife management areas by United States; consent of state.

1. To implement and supplement federal statutes now in effect and to authorize the acquisition by the United States of America of upland area for conservation purposes, the consent of the State of New York is hereby granted to the United States of America:

a. To acquire, on or before July 1, 1940, by means of purchase, devise, gift or condemnation such upland areas in the State of New York and outside the statutory boundaries of the Adirondack and Catskill parks as are necessary and suitable for forestry and wildlife management areas; and

b. To forest or reforest such areas and to construct or erect upon such lands, such truck trails, bridges, ditches, fire lanes, water holes, service structures and similar improvements as are necessary for the protection and administration of these lands as forestry or wildlife management areas; and

c. To hold title to such upland areas herein described and heretofore acquired for the foregoing purposes, reserving, however, to the State of New York, full and complete jurisdiction and authority over all such areas not incompatible with the administration, maintenance, and protection thereof by the United States of America; provided, however, that the United States of America shall make no regulations governing such areas which shall be in conflict with the provisions of the Conservation Law, as amended or as may hereafter be amended, or those provisions of the Environmental Conservation Law of the State of New York which were derived from the Conservation Law.

2. Such lands as are under contract of purchase by the United States of America, or to acquire which condemnation proceedings have been commenced on or before July 1, 1940 shall be deemed acquired within the meaning of paragraph a of subdivision one of this section.

§ 3-0117. Activities of local governmental agencies.

1. Activities of local health boards, departments and officers and other local government agencies pertaining to functions, powers and duties which were transferred pursuant to chapter 140 of the Laws of 1970, from the Department and Commissioner of Health to the Department and Commissioner of Environmental Conservation shall be eligible for aid under the provisions of titles 1, 2, and 3 of article 6 of the Public Health Law to the same extent such activities were eligible for such aid if conducted immediately prior to the effective date of chapter 140 of the Laws of 1970. The Commissioner of Environmental Conservation shall exercise the same powers of approval and supervision with respect to such activities as were exercised by the Commissioner of Health immediately prior to the effective date of that chapter.

2. Counties and cities shall be eligible for aid for other environmental conservation activities pertaining to functions, powers and duties other than those which were so transferred pursuant to chapter 140 of the Laws of 1970. Such other activities shall be described under rules and regulations adopted pursuant to subdivision four of this section.

3. A county or city shall be eligible for aid whenever it shall appropriate or otherwise make funds available and expend monies for the purpose of defraying expenses incurred in undertaking environmental conservation activities under this section. The appropriations made or to be made by the legislature for the purpose of carrying out the provisions of this section shall be apportioned and made available by the director of the budget to the Commissioner of Environmental Conservation. The rate of aid shall be set annually by the Commissioner of Environmental Conservation, provided however, that except as otherwise provided in the public health law, the rate shall not exceed fifty percentum of the amount expended annually by a county or city. In the event that the amount appropriated by the legislature is insufficient to make full payment of all state aid to which eligible counties and cities would otherwise be entitled under this section, the amounts appropriated shall be apportioned in proportion to the amounts

to which such counties and cities would otherwise be entitled.

4. The Department of Environmental Conservation shall adopt rules and regulations to implement the provisions of this section, which shall include, but not be limited to the establishment of the following: information and reporting requirements; activity, facility, construction, equipment, service, administration and work eligibility requirements and standards; department inspection, examination and approval procedures; qualifications for persons engaged in environmental conservation activities; and minimum criteria for the composition of county and city government bodies that may be authorized to engage in activities for which aid may be sought.

§ 3-0119. Laboratory tests.

Any laboratory tests or sample analysis required pursuant to article seventeen, nineteen or twenty-seven of this chapter for which the commissioner of health issues certificates of approval pursuant to section five hundred two of the public health law shall be conducted by a laboratory which has been issued a certificate of approval.

TITLE 3

GENERAL FUNCTIONS, POWERS, DUTIES AND JURISDICTION

- Section 3-0301. General functions, powers and duties of the department and the commissioner.
- 3-0302. Review of state-owned lands.
- 3-0303. Statewide environmental plan.
- 3-0304. The department shall compile and maintain an inventory of educational resources for teaching the principles of environmental conservation in New York state.
- 3-0305. Acquirement of real property by purchase or appropriation.
- 3-0306. Registry of public agencies and private organizations; notice of department hearings.
- 3-0307. Acquisition of federal lands.

- 3-0309. Stand-by contracts.
- 3-0311. Municipal notification of environmental violations.
- 3-0311*2. State agency environmental audits.
- 3-0313. Adopt-a-beach stewardship program.
- 3-0315. Geographic information system.
- 3-0317. Cancer incidence and environmental facility maps project.
- 3-0319. Sea level rise projections.
- 3-0321. Gifts, donations, capital improvements.

§ 3-0301. General functions, powers and duties of the department and the commissioner.

1. It shall be the responsibility of the department, in accordance with such existing provisions and limitations as may be elsewhere set forth in law, by and through the commissioner to carry out the environmental policy of the state set forth in section 1-0101 of this chapter. In so doing, the commissioner shall have power to:

a. Coordinate and develop policies, planning and programs related to the environment of the state and regions thereof;

b. Promote and coordinate management of water, land, fish, wildlife and air resources to assure their protection, enhancement, provision, allocation, and balanced utilization consistent with the environmental policy of the state and take into account the cumulative impact upon all of such resources in making any determination in connection with any license, order, permit, certification or other similar action or promulgating any rule or regulation, standard or criterion;

bb. Prescribe the qualifications for operators of public sewage treatment plants.

c. Provide for the propagation, protection, and management of fish and other aquatic life and wildlife and the preservation of endangered species;

cc. Prescribe and certify the qualifications for operators of solid waste management facilities as defined in section 27-0701 of this chapter; provided, however, that the commissioner shall not require the certification of operators until the commissioner shall have identified or established programs of training within the state that satisfy such qualifications;

d. Provide for the care, custody, and control of the forest preserve;

e. Provide for the protection and management of marine and coastal resources and of wetlands, estuaries and shorelines;

f. Foster and promote sound practices for the use of agricultural land, river valleys, open land, and other areas of unique value;

g. Encourage industrial, commercial, residential and community development which provides the best usage of land areas, maximizes environmental benefits and minimizes the effects of less desirable environmental conditions;

gg. Develop a plan to maximize the use of telecommuting to conserve energy otherwise used by the personnel of the department in commuting to their assigned workplace. Within one year of the effective date of this paragraph, the department shall submit a report to the governor and the legislature on the impact of such plan to include, but not be limited to, energy conservation, air quality, workforce acceptance, office costs and potential cost savings.

h. Assure the preservation and enhancement of natural beauty and man-made scenic qualities;

hh. Cooperate with the office of probation and correctional alternatives by identifying appropriate worksites where persons performing community service as part of a criminal disposition may be assigned to provide cleanup and other maintenance services in order to preserve and enhance the state's natural beauty and human-made scenic

qualities. Such sites may include but are not limited to the state's shorelines, beaches, parks, roadways, historic sites and other natural or human-made resources.

i. Provide for prevention and abatement of all water, land and air pollution including, but not limited to, that related to hazardous substances, particulates, gases, dust, vapors, noise, radiation, odor, nutrients and heated liquids;

j. Promote control of pests and regulate the use, storage and disposal of pesticides and other chemicals which may be harmful to man, animals, plant life, or natural resources;

k. Promote control of weeds and aquatic growth, develop methods of prevention and eradication, and regulate herbicides;

l. Provide and recommend methods for the recovery, recycling and reuse; or, where recycling and reuse are not possible, the disposal of solid wastes, including domestic and industrial refuse, junk cars, litter and debris consistent with sound health, scenic, environmental quality, and land use practices;

m. Prevent pollution through the regulation of the storage, handling and transport of solids, liquids and gases which may cause or contribute to pollution;

n. Promote restoration and reclamation of degraded or despoiled areas and natural resources;

o. Encourage recycling and reuse of products to conserve resources and reduce waste products;

p. Administer properties having unique natural beauty, wilderness character, or geological, ecological or historical significance dedicated by law to the state nature and historical preserve;

q. Formulate guides for measuring presently unquantified environmental

values and relationships so they may be given appropriate consideration along with social, economic, and technical considerations in decision-making;

r. Encourage and undertake scientific investigation and research on the ecological process, pollution prevention and abatement, recycling and reuse of resources, and other areas essential to understanding and achievement of the environmental policy;

s. Assess new and changing technology and development patterns to identify long-range implications for the environment and encourage alternatives which minimize adverse impact;

t. Monitor the environment to afford more effective and efficient control practices, to identify changes and conditions in ecological systems and to warn of emergency conditions;

u. Encourage activities consistent with the purposes of this chapter by advising and assisting local governments, institutions, industries, and individuals;

v. Undertake an extensive public information and education program to inform and involve other public and private organizations and groups and the general public in the commitment to the principles and practices of environmental conservation and develop programs for the teaching by others of such principles and practices;

w. Cooperate with the executive, legislative and planning authorities of the United States, neighboring states and their municipalities and the Dominion of Canada in furtherance of the policy of this state as set forth in section 1-0101;

x. Exercise and perform such other functions, powers and duties as shall have been or may be from time to time conveyed or imposed by law, including, but not limited to, all the functions, powers and duties assigned and transferred to the department from the Department of Health, Conservation Department, Department of Agriculture and Markets,

and Office for Local Government in the Executive Department by chapter 140 of the laws of 1970.

y. To prevent and control air pollution emergencies, as defined in subdivision 1 of section 1-0303 hereof. In exercising such prevention and control the department and the commissioner may limit the consumption of fuels and use of vehicles, curtail or require the cessation of industrial processes and limit or require the cessation of incineration and open burning, and take any other action he may deem necessary to prevent and/or control air pollution emergencies. The department and commissioner shall adopt and implement by rule and regulation a plan designed to prevent and control such air pollution emergencies.

z. Within amounts appropriated to the department, to contract, outside the city of New York, with federally-funded nonprofit organizations that are organized for the purpose of beautification of highways, parks and recreation areas and employ persons sixty years of age or older whose net annual income does not exceed one thousand dollars to carry out such activities. The contract shall name the organization, the amount and manner of payment for the service to be rendered, nature of such service, the rendering of a verified account of the disbursements and verified or certified vouchers therefor attached, a refund of any unused amount, and such other conditions upon the use thereof as may be deemed proper.

2. To further assist in carrying out the policy of this state as provided in section 1-0101 of the chapter the department, by and through the commissioner, shall be authorized to:

a. Adopt, amend or repeal environmental standards, criteria and those rules and regulations having the force and effect of standards and criteria to carry out the purposes and provisions of this act. Any such environmental standard, criterion, rule or regulation or change thereto shall become effective thirty days after being filed with the Secretary of State for publication in the "Official Compilation of Codes, Rules, and Regulations of the State of New York" published pursuant to section

one hundred two of the Executive Law. This provision shall not in any way restrict the commissioner in the exercise of any function, power or duty transferred to him or her and heretofore authorized to be exercised by any other department acting through its commissioner to promulgate, adopt, amend or repeal any standards, rules and regulations. No such environmental standards, criterion, rule or regulation or change thereto shall be proposed for approval unless a public hearing relating to the subject of such standard shall be held by the commissioner prior thereto not less than sixty days after date of notice therefor, any provision of law to the contrary notwithstanding. Notice shall be given by public advertisement of the date, time, place and purpose of such hearing.

aa. (1) A "construction emergency" is damage to or an imminent danger of failure, or the malfunction of buildings, structures or property caused by a sudden and unexpected occurrence which involves a pressing necessity for immediate repair, reconstruction or maintenance in order to permit the safe continuation of necessary public use or function, or to protect the property of the state of New York, or the life, health or safety of any person.

(2) Whenever the commissioner determines and declares that a construction emergency exists, the commissioner may have immediate work performed to protect life, limb, property, public health or safety, or essential services by utilizing the services of a contractor selected in accordance with procedures developed by the department and approved by the state comptroller.

(3) Such procedures shall provide for consideration of solicitation of sufficient competition to the extent practicable, from responsible contractors representative of the contracting community by inviting at least five contractors who are capable of performing such work; permitting said contractors to examine the site and submit bids for the required emergency restoration work at a time and place to be determined by the commissioner; and submission of a notice of emergency award for publication in the procurement opportunities newsletter as soon as practicable after the award.

(4) Such emergency work shall reasonably be expected to be completed within a period of thirty days and emergency contracts shall be let only for work necessary to remedy or alleviate a construction emergency.

(5) If the selected contractor is already under contract to the department such work may be undertaken as additional work on the existing contract, notwithstanding the existing scope of work.

(6) The commissioner shall promptly notify the office of the state comptroller, the office of the attorney general, and the office of the division of the budget, and shall provide an estimate of the cost and duration of the emergency work.

b. Enter into contracts with any person to do all things necessary or convenient to carry out the functions, powers and duties of the department.

bb. Develop and implement an "I Love New York Fishing" passbook program to encourage additional fishing in this state. The program shall be administered according to the provisions of subdivision five of section 11-1307 of this chapter.

c. Review and appraise programs and activities of state departments and agencies in light of the policy set forth in section 1-0101 of this chapter for the purpose of determining the extent to which such programs and activities are contributing to the achievement of such policy and to make recommendations to such departments and agencies with respect thereto, including but not limited to, environmental guidelines for their use.

cc. Cooperate with the department of agriculture and markets, the environmental facilities corporation, and other state agencies and public authorities to establish methods to facilitate loans to eligible borrowers to prevent and control non-point source water pollution and to develop educational materials for potential borrowers, including, without limitation, members of the agricultural community, about the low-interest loans available through the water pollution control linked deposit program and to develop an application form to be provided to lenders for the linked deposit loan requests. The department may promulgate rules and regulations necessary and reasonable for the operation of the program.

d. Consult with and co-operate with:

(1) Officials of departments and agencies of the state having duties and responsibilities concerning the environment;

(2) Officials and representatives of any public benefit corporation in the state;

(3) Officials and representatives of the federal government, of other states and of interstate agencies on problems affecting the environment of this state;

(4) Persons, organizations and groups, public and private, utilizing, served by, interested in or concerned with the environment in the state;

(5) The appropriate committee or committees of the Legislature.

e. Appear and participate in proceedings before any federal regulatory agency involving or affecting the purposes of this department.

f. Undertake any studies, inquiries, surveys or analyses it may deem relevant through the personnel of the department or in co-operation with any public or private agencies, including educational, civic and research organizations, colleges, universities, institutes or foundations, for the accomplishment of the purposes of the department.

g. Enter and inspect any property or premises for the purpose of investigating either actual or suspected sources of pollution or contamination or for the purpose of ascertaining compliance or noncompliance with any law, rule or regulation which may be promulgated pursuant to this chapter. Any information relating to secret processes or methods of manufacture shall be kept confidential.

h. Conduct investigations and hold hearings and compel the attendance of witnesses and the production of accounts, books, documents, and nondocumentary evidence by the issuance of a subpoena.

i. Advise and cooperate with municipal, county, regional and other local agencies and officials within the state, to carry out the purposes of chapter 140 of the laws of 1970.

j. Act as the official agency of the state in all matters affecting

the purposes of the department under any federal laws now or hereafter to be enacted, and as the official agency of a county, town, city, village or authority in connection with the grant or advance of any federal or other funds or credits to the state or through the state to its local governing bodies for the purposes of chapter 140 of the laws of 1970.

k. Report from time to time to the Governor and make an annual report to the Governor and the Legislature.

l. Formulate and execute contracts, keep accounts, record personnel data, acquire real or personal property, including acquisition by condemnation, appropriation, gift grant, devise or bequest, adjust claims, compile statistics and engage in research opportunities; all according to the statutes or department orders and regulations in such cases made and provided.

m. Adopt such rules, regulations and procedures as may be necessary, convenient or desirable to effectuate the purposes of this chapter.

n. Study, monitor, control and regulate pollution from motor vehicle exhaust emissions.

o. When requested to do so by another state with which New York has reciprocally agreed to provide personnel and equipment, provide such personnel and equipment for use in suppression of forest fires upon lands within such other state.

p. Notwithstanding any other provision of this chapter, delegate to municipal health or environmental departments or agencies or other appropriate governmental entities including the state soil and water conservation committee and the soil and water conservation districts, any of which shall meet such qualifications relating to adequate authority, expertise, staff, funding and other matters as may be prescribed, such functions of review, approval of plans, issuance of permits, licenses, certificates or approvals required or authorized by this chapter as the commissioner may deem appropriate in order to

expedite the review of matters within the jurisdiction of the department, to provide for better coordination among different levels of government or to enhance environmental protection, subject to such conditions as he may establish. The powers delegated pursuant to this part may be withdrawn by the commissioner, at any time, upon thirty days written notice to the department, agency or other governmental entity including the state soil and water conservation committee and the soil and water conservation districts holding such powers by virtue of this paragraph.

q. Require that a written instrument submitted pursuant to this chapter or a rule or regulation adopted pursuant hereto contain a form notice to the effect that false statements made therein are punishable pursuant to section 210.45 of the penal law.

r. Notwithstanding the provisions of article six of the public officers law, deny access to inspection of records which identify locations of habitats of species designated endangered pursuant to section 11-0535 of this chapter, protected pursuant to section 9-1503 of this chapter or any other species or unique combination of species of flora or fauna where the destruction of such habitat or the removal of such species therefrom would impair their ability to survive provided, however, that the commissioner may, in his discretion permit access to such inspection to persons engaged in legitimate scientific and academic research.

s. Coordinate and conduct Arbor day ceremonies on the last Friday of April in cooperation with the department of education and the department of agriculture and markets.

t. Establish a program, in consultation with the conservation fund advisory council for the sale of limited edition prints of fish and wildlife paintings with the proceeds to be credited to the conservation fund established pursuant to section eighty-three of the state finance law.

u. Notwithstanding any other provisions of this chapter, establish a

program to offer for sale to the public of items symbolic of contributions made to support department activities performed as steward of lands under its jurisdiction. The terms upon which such items will be available and the relevant donations for such items shall be set forth in regulations to be promulgated by the commissioner provided, however, that no such item shall be offered unless the amount of such donation exceeds the value of the item. All receipts of the department from such contributions shall be deposited in and separately accounted for in an account in the miscellaneous state special revenue fund, expenditures from which shall be limited to the activities of the department pursuant to this paragraph and activities performed as steward of lands under its jurisdiction.

v. Except for the forest preserve which is under the care, custody and control of the department pursuant to paragraph d of subdivision one of this section and subdivision one of section 9-0105 of this chapter, administer and manage the real property under the jurisdiction of the department for the purpose of preserving, protecting and enhancing the natural resource value for which the property was acquired or to which it is dedicated, employing all appropriate management activities.

w. Shall prepare and submit to the federally appointed "Aquatic Nuisance Species Task Force" two comprehensive management plans, after notice and opportunity for public comment, for funding of New York state activities under the Federal Non-indigenous Aquatic Nuisance Prevention and Control Act of 1990, Public Law 101-646, by January 1, 1992. One such plan shall identify those areas or activities within the state, other than those related to public facilities, where technical and financial assistance is needed within the state to eliminate or reduce environmental, public health and safety risks and to mitigate the financial impact upon the state associated with non-indigenous aquatic species, particularly zebra mussels. The other plan shall be a "public facility management plan" which is limited solely to identifying those public facilities within the state for which technical and financial assistance is needed to reduce infestations of zebra mussels. Each plan shall identify the management practices and measures that will be undertaken to reduce infestations of aquatic nuisance species,

especially zebra mussels, and include the following: (1) a description of the state and local programs for environmentally sound prevention and control of the target species; (2) a description of federal activities that may be needed for environmentally sound prevention and control of aquatic nuisance species and a description of the manner in which those activities should be coordinated with state and local government activities; and (3) a schedule for implementing the plan, including a schedule of annual objectives. In developing and implementing these management plans, the department shall, to the maximum extent practicable, involve local governments, regional entities and public and private organizations that have expertise in the control of aquatic nuisance species. Copies of these plans shall also be submitted to the temporary president of the senate and the speaker of the assembly, and the department shall annually, on or before January first, submit to the temporary president of the senate and speaker of the assembly a report on the activities of the department under these plans.

x. Consistent with paragraph v of subdivision 1 of this section, offer for sale advertising or corporate sponsorship space in various departmental publications, including but not limited to "The Conservationist", the annual compilation and syllabus of laws, rules and regulations governing fish and wildlife as required by section 11-0323 of this chapter, and offer for sale informational and promotional material related to lands, facilities and resources under the jurisdiction of the department. Any proceeds realized from the sale of advertising or corporate sponsorships shall be deposited in a special revenue account to be selected by the department and the division of the budget except that proceeds from advertising or corporate sponsorship in "The Conservationist" shall be deposited in the environmental conservation special revenue fund, "The Conservationist" magazine account, and proceeds from advertising or corporate sponsorship in the annual compilation and syllabus of laws, rules and regulations governing fish and wildlife as required by section 11-0323 of this chapter shall be deposited in the conservation fund.

* y. The department, by contract or otherwise, is hereby authorized to engage in games, contests or other promotions or advertising schemes or plans, hereinafter referred to as "an event or events," which are

intended to increase, improve, stabilize or otherwise assist in development of the subscriber base of "The Conservationist" in accordance with the following:

(1) An event may include sweepstakes and other similar marketing techniques intended to heighten public awareness, interest and participation in department programs including but not limited to purchasing of subscriptions, licenses, or camping permits.

(2) The department is authorized to offer the opportunity to receive gifts, prizes or gratuities, as determined by chance, without any consideration therefor.

(3) The department shall develop a statement, which shall be included in any and all promotions of an event, which shall contain the following information:

- (i) the minimum number of entry forms to be made available;
- (ii) the minimum number of prizes that shall be included in the event;
- (iii) the proportionate opportunity of winning prizes;
- (iv) the minimum value of prizes to be made available;

(v) the rules pertaining to the event, which shall include the period of time and the geographic area to be covered by the event and which shall not be subject to the rulemaking procedures of the state administrative procedure act; and

(vi) such additional information as may be deemed in the best interests of the state as determined by the commissioner.

(4) The department is authorized to accept donations for the purposes of providing publicity, prizes, incentives or other inducements for participation in the event. Donations may be of goods and services, shall not exceed five thousand dollars in value, per donor per contest, and must be of a nature consistent with the purposes of the department, and in the best interests of the state as determined by the commissioner.

* NB Repealed August 1, 2027

z. Issue and amend guidance memoranda and similar documents of general applicability which are to be relied upon by department personnel for implementation of this chapter, and rules and regulations promulgated pursuant thereto, and for guidance to the general public in complying with the requirements of this chapter; provided, however, that (1) in no

event shall any such document be issued by the department in violation of the state administrative procedure act where and to the extent that a duly promulgated rule or regulation would be required, and (2) no such document shall be implemented until thirty days after the full text, or a summary thereof, along with information on how the full text may be obtained, has been published in the environmental notice bulletin, as defined in section 70-0105 of this chapter. At a minimum, the full text of each such document shall be made available by the department on and after the date of such publication to the public upon request, and, in addition, at least one copy shall be made available in the department's main office and in each regional office for public inspection. The department shall publish and invite public comment on a draft version of any such document, unless it determines that to do so would delay or otherwise impede compliance with the underlying statute or regulation, provided that, when a document is issued without making provisions for public comment, the department shall also publish its reason or reasons for deeming such provisions inappropriate. This paragraph shall not apply to (i) declaratory rulings issued pursuant to section two hundred four of the state administrative procedure act or (ii) documents which only concern the internal management of the agency and which do not have any effect on the rights of or procedures or practices available to the public. Each January, the department shall publish in the environmental notice bulletin an index of its existing guidance documents, and indicate how the full text thereof may be obtained; provided, however, that the secretary of state may exempt the department from compliance with this publication requirement upon a determination that the department has published on its website the full text of all guidance documents on which it currently relies. The secretary of state shall publish a notice of such determination identifying the website in the state register.

2-a. a. To further assist in carrying out the policy of this state as provided in section 1-0101 of this chapter, the department, by and through the commissioner shall:

(1) authorize and encourage the use of nature-based solutions as the preferred alternative, where appropriate, for stabilizing tidal shorelines in the state when promulgating and implementing rules and

regulations relating thereto, specifically including, but not limited to, those promulgated and implemented for articles fifteen, twenty-five and thirty-four of this chapter. The department shall consult with the United States army corps of engineers to ensure the minimization of conflicts with federal law and regulation.

(2) continue developing integrated guidance for the management of tidal shoreline systems to provide a technical basis for the coordination of permit decisions required by any regulatory entity exercising authority over a shoreline management project. Such guidance shall:

(i) communicate to stakeholders and regulatory authorities that it is the policy of the state that some shorelines shall remain natural unless stabilization is necessary, and when stabilization is deemed necessary, it shall support nature-based solutions as the preferred alternative for stabilizing tidal shorelines;

(ii) identify preferred shoreline management approaches for the shoreline and community types found in the state;

(iii) explain the risks and benefits of protection provided by various shoreline system elements associated with each management option; and

(iv) recommend procedures to achieve efficiency and effectiveness by the various regulatory entities exercising authority over a shoreline management project.

(3) give preference to a permit application for a shoreline management project based on nature-based solution design unless an alternative analysis containing a review of nature-based solutions that have been evaluated using the best available information shows that such approaches are not suitable. If this analysis shows that a nature-based solution approach is unsuitable or inconsistent with land-use regulations, the department shall require the applicant to incorporate, to the maximum extent possible, elements of a nature-based solution that are suitable for the project where appropriate.

b. (1) For the purposes of this subdivision, "nature-based solution" shall have the same meaning as defined in subdivision twenty-six of section 1-0303 of this chapter and shall specifically mean techniques applied within the tidal zone that incorporate natural, native living features.

(2) When considering a nature-based solution the department should prioritize techniques, including but not limited to those that:

(i) control or reduce shoreline erosion while maintaining benefits comparable to the natural shoreline including, but not limited to, allowing for natural sediment movement;

(ii) improve, restore, or maintain the connection between the upland and water habitats; and

(iii) incorporate habitat enhancement and natural elements, including but not limited to native re-vegetation or establishment of new vegetation consistent with a natural shoreline typical of the current site location either:

(A) under current conditions, or

(B) as adjusted for science-based state sea-level rise projections, utilizing the appropriate projection scenario at a time interval appropriate for the anticipated lifespan of the project but not less than twenty years after the anticipated project completion, pursuant to section 3-0319 of this title for such location.

3. The department shall not alter the boundaries of any of the nine administrative regions from the boundaries existing on January first, nineteen hundred seventy-seven without first holding public hearings in each region affected.

4. The commissioner shall cooperate with the commissioner of the state department of health, district attorneys and the department of law in providing assistance in the investigation and prosecution of violations of article twenty-seven of this chapter.

5. To facilitate the practice of forestry by electing to comment upon proposed local laws or ordinances that may restrict the practice of forestry.

§ 3-0302. Review of state-owned lands.

Within amounts appropriated therefor, by January first, nineteen hundred ninety-five, the commissioner, in consultation with the New York

state biodiversity research institute created pursuant to section two hundred thirty-five-a of the education law, shall conduct a review of lands currently in state-ownership and under the department's jurisdiction to identify lands and waters that harbor plants, animals, and ecological communities that are rare in New York state.

§ 3-0303. Statewide environmental plan.

1. The department shall formulate and from time to time revise a statewide environmental plan for the management and protection of the quality of the environment and the natural resources of the state, in furtherance of the legislative policy and purposes expressed in chapter 140 of the laws of 1970.

2. The department shall submit such plan to the Governor and to the Department of State on or before October first, nineteen hundred seventy-five, and thereafter shall submit periodic revisions of such plan to the governor and to the Department of State. The Department of State shall review such plan and such revisions and shall submit a report thereon together with such recommendations within sixty days as it may deem appropriate to the Governor. The governor shall approve, approve with modifications, or reject such plan within sixty days.

3. In formulating such plan and any revisions, the department shall:

a. Conduct one or more public hearings;

b. Consult with and cooperate with:

(1) Officials of departments and agencies of the state having duties and responsibilities concerning the environment;

(2) Officials and representatives of the federal government, of neighboring states and of interstate agencies on problems affecting the environment of this state;

(3) Officials and representatives of local government in the state;

(4) Officials and representatives of science, industry, and education;

(5) Persons, organizations and groups, public or private, utilizing,

served by, interested in or concerned with the environment of the state;
and

c. Request and receive from any department, division, board, bureau, commission or other agency of the state or any political subdivision thereof or any public authority such assistance and data as may be necessary to enable the department to carry out its responsibilities under this section.

§ 3-0304. The department shall compile and maintain an inventory of educational resources for teaching the principles of environmental conservation in New York state.

Inventory of educational resources for teaching the principles of environmental conservation in New York state. 1. Legislative findings. The people of the state of New York, through the temporary state commission on youth education in environmental conservation, have expressed the need for resource information assistance if they are to improve their local programs in environmental education.

The legislature hereby affirms this need and declares that a regionally responsive system for identifying resources through a statewide inventory and for referring inquiries to appropriate sources must be developed if we are to maintain and improve the quality of our environment.

The department, in consultation with the department of education and the office of parks, recreation and historic preservation shall compile and maintain an inventory of education resources for teaching the principles of environmental conservation in New York state.

2. This information shall be used as the basis for a clearing house for materials pertaining to environmental conservation education which shall be available for public use. A revised and up-to-date inventory shall be available to the public and widely distributed on or before September 1, 1991. The clearinghouse shall maintain information on, but

not limited to, the following:

- a. Natural resources and facilities which can be used for educational purposes.
- b. Conservation and environmental organizations, both public and private.
- c. Resource personnel.
- d. Curriculum resources.
- e. A calendar of environmental education activities.

§ 3-0305. Acquirement of real property by purchase or appropriation.

1. The commissioner when moneys therefor have been appropriated by the legislature or are otherwise available, may acquire any real property which he deems necessary for any of the purposes or functions of the department, by purchase or as provided in the eminent domain procedure law. Title to such real property shall be taken in the name of and be vested in the people of the state of New York. No real property shall be so acquired by purchase unless the title thereto is approved by the attorney general. The terms "property" or "real property" as used in this section shall mean "real property" as defined by section one hundred three of the eminent domain procedure law.

2. Whenever real property is to be so acquired pursuant to the provisions of the eminent domain procedure law, by appropriation, the commissioner shall cause to be made an accurate acquisition map as so provided in said law.

3. On the approval of such map by the commissioner, the original tracing of map shall, pursuant to the eminent domain procedure law, be filed in the main office of the department.

4. If the commissioner shall determine, prior to the filing of a copy of such acquisition map in the office of the county clerk, that changes, alterations or modifications of such map as filed in the main office of the department should be made, he or she shall, subject to the provisions of article two of the eminent domain procedure law, if applicable, direct the preparation of an amended map. On the approval of such amended map by the commissioner, it shall be filed in the main office of the department in the same manner as the original map was filed and the amended map shall thereupon in all respects and for all purposes supersede the map previously filed.

5. If the commissioner shall determine prior to filing a copy of an acquisition map in the office of the county clerk, as provided in section four hundred two of the eminent domain procedure law, that such map should be withdrawn, he or she shall file a certificate of withdrawal in the offices of the department and of the department of law. Upon the filing of such certificate of withdrawal, the map to which it refers shall be cancelled and all rights thereunder shall cease and determine.

6. The commissioner shall deliver to the attorney general a copy of such acquisition map, whereupon it shall be the duty of the attorney general to advise and certify to the commissioner the names of the owners of the real property described in the said acquisition map, including the owners of any right, title or interest therein, pursuant to the requirements of section four hundred three of the eminent domain procedure law.

7. If, at or after the vesting of title to such property in the people of the state of New York in the manner provided for in the eminent domain procedure law, the commissioner shall deem it necessary to cause the removal of an owner or other occupant from such property, he may cause such owner or occupant to be removed therefrom by proceeding in accordance with section four hundred five of such law. The proceeding shall be brought in the name of the commissioner as agent of the state and the attorney general shall represent the petitioner in the proceedings. No execution shall issue for costs, if any, awarded

against the state or the commissioner, but they shall be part of the costs of the acquisition of the real property and be paid in like manner. Proceedings may be brought separately against one or more of the owners or occupants of any such property, or one proceeding may be brought against all or several of the owners or occupants of any or all such property within the territorial jurisdiction of the same court, justice or judge; judgment shall be given for immediate removal of persons defaulting in appearance or in answering, or withdrawing their answers, if any, without awaiting the trial or decision of issues raised by contestants, if any.

8. Upon making any agreement provided for in section three hundred four of the eminent domain procedure law, the commissioner shall deliver to the comptroller such agreement and a certificate stating the amount due such owner or owners thereunder on account of such appropriation of his or their property and the amount so fixed shall be paid out of the state treasury after audit by the comptroller from moneys appropriated for the acquisition of such real property, but not until there shall have been filed with the comptroller a certificate of the attorney general showing the person or persons claiming the amount so agreed upon to be legally entitled thereto.

9. Application for reimbursement as provided in section seven hundred two of the eminent domain procedure law, shall be made to the commissioner upon forms prescribed by him and shall be accompanied by such information and evidence as the commissioner may require. Upon approval of such application, the commissioner shall deliver a copy thereof to the comptroller together with a certificate stating the amount due thereof, and the amount so fixed shall be paid out of the state treasury after audit by the comptroller from moneys appropriated for the acquisition of property under this section.

10. The commissioner with the approval of the director of the budget, shall establish and may from time to time amend rules and regulations authorizing the payment of actual reasonable and necessary moving expenses of occupants of property acquired pursuant to this section; of actual direct losses of tangible personal property as a result of moving

or discontinuing a business or farm operation, but not exceeding an amount equal to the reasonable expenses that would have been required to relocate such property, as determined by the commissioner; and actual reasonable expenses in searching for a replacement business or farm, or in hardship cases for the advance payment of such expenses and losses. For the purposes of making payment of such expenses and losses only the term "business" means any lawful activity conducted primarily for assisting in the purchase, sale, resale, manufacture, processing or marketing of products, commodities, personal property or services by the erection and maintenance of an outdoor advertising display or displays, whether or not such display or displays are located on the premises on which any of the above activities are conducted. Such rules and regulations may further define the terms used in this subdivision. In lieu of such actual reasonable and necessary moving expenses, any such displaced owner or tenant of residential property may elect to accept a moving expense allowance, plus a dislocation allowance, determined in accordance with a schedule prepared by the commissioner and made a part of such rules and regulations. In lieu of such actual reasonable and necessary moving expenses, any such displaced owner or tenant of commercial property who relocates or discontinues his business or farm operation may elect to accept a fixed relocation payment in an amount equal to the average annual net earnings of the business or farm operation, except that such payment shall be not less than two thousand five hundred dollars nor more than ten thousand dollars. In the case of a business, no such fixed relocation payment shall be made unless the commissioner finds and determines that the business cannot be relocated without a substantial loss of its existing patronage, and that the business is not part of a commercial enterprise having at least one other establishment, which is not being acquired by the state or the United States, which is engaged in the same or similar business. In the case of a business which is to be discontinued but for which the findings and determinations set forth above cannot be made, the commissioner may prepare an estimate of what the actual reasonable and necessary moving expenses, exclusive of any storage charges, would be if the business were to be relocated and enter into an agreed settlement with the owner of such business for an amount not to exceed such estimate in lieu of such actual reasonable and necessary moving

expenses. Application for payment under this subdivision shall be made to the commissioner upon forms prescribed by him and shall be accompanied by such information and evidence as the commissioner may require. Upon approval of such application, the commissioner shall deliver a copy thereof to the comptroller together with a certificate stating the amount due thereunder, and the amount so fixed shall be paid out of the state treasury after audit by the comptroller from moneys appropriated for the acquisition of property under this section. As used in this subdivision the term "commercial property" shall include property owned by an individual, family, partnership, corporation, association or a non-profit organization and includes a farm operation. As used in this subdivision the term "business" means any lawful activity, except a farm operation, conducted primarily for the purchase, sale, lease and rental of personal and real property, and for the manufacture, processing, or marketing of products, commodities, or any other personal property; for the sale of services to the public; or by a non-profit organization.

11. The commissioner pursuant to section three hundred five of the eminent domain procedure law, may make agreements on such terms, condition and consideration as he deems beneficial to the state with respect to any property heretofore or hereafter acquired, whereby such property may be used and occupied by the former owner, tenant or by any other party from a date specified in said agreement, until such time as the state requires and obtains actual physical possession. The agreements for the use and occupancy of such property may be managed, supervised and enforced (1) by the staff, forces and equipment of the department of environmental conservation; or (2) by the commissioner of environmental conservation contracting for the management, supervision and enforcement thereof with any person, firm or corporation; or (3) by a combination of such methods.

The use and occupancy of such property under the provisions of this section and the right of the state or its duly authorized agent to recover possession thereof shall not be subject to the emergency housing rent control law.

Expenses which are determined by the commissioner to have been incurred in connection with the use and occupancy of such property may be paid out of the state treasury after audit by the comptroller from moneys appropriated for the duly authorized project for which the property was acquired. However, such expenses incurred under a contract for management and supervision of such property may be paid out of the gross revenue therefrom. All moneys received by the commissioner for such use or occupancy shall be paid into the treasury of the state to the credit of the capital construction fund.

12. Authorization is hereby given to the commissioner to make supplemental relocation payments, separately computed and stated, to displaced owners and tenants of residential property acquired pursuant to this section who are entitled thereto, as determined by him. The commissioner with the approval of the director of the budget, may establish and from time to time amend rules and regulations providing for such supplemental relocation payments. Such rules and regulations may further define the terms used in this subdivision. In the case of property acquired pursuant to this section, which is improved by a dwelling actually owned and occupied by the displaced owner for not less than one hundred eighty days immediately prior to initiation of negotiations for the acquisition of such property, such payment to such owner shall not exceed fifteen thousand dollars. Such payment shall be the amount, if any, which, when added to the acquisition payment equals the average price, established by the commissioner on a class, group or individual basis, required to obtain a comparable replacement dwelling that is decent, safe and sanitary to accommodate the displaced owner, reasonably accessible to public services and places of employment and available on the private market, but in no event shall such payment exceed the difference between acquisition payment and the actual purchase price of the replacement dwelling. Such payment shall include an amount which will compensate such displaced owner for any increased interest costs which such person is required to pay for financing the acquisition of any such comparable replacement dwelling. Such amount shall be paid only if the dwelling acquired pursuant to this section was encumbered by a bona fide mortgage which was a valid lien on such dwelling for not less than one hundred eighty days prior to the

initiation of negotiations for the acquisition of such dwelling. Such amount shall be equal to the excess in the aggregate interest and other debt service costs of that amount of the principal of the mortgage on the replacement dwelling which is equal to the unpaid balance of the mortgage on the acquired dwelling, over the remainder term of the mortgage on the acquired dwelling, reduced to discounted present value. The discount rate shall be the prevailing interest rate paid on savings deposits by commercial banks in the general area in which the replacement dwelling is located. Any such mortgage interest differential payment shall, notwithstanding the provisions of section twenty-six-b of the general construction law, be in lieu of and in full satisfaction of the requirements of such section. Such payment shall include reasonable expenses incurred by such displaced owner for evidence of title, recording fees and other closing costs incident to the purchase of the replacement dwelling, but not including prepaid expenses. Such payment shall be made only to a displaced owner who purchases and occupies a replacement dwelling which is decent, safe and sanitary within one year subsequent to the date on which he is required to move from the dwelling acquired pursuant to this section or the date on which he receives from the state final payment of all costs of the acquired dwelling, whichever occurs later, except advance payment of such amount may be made in hardship cases. In the case of property acquired pursuant to this section from which an individual or family, not otherwise eligible to receive a payment pursuant to the above provisions of this subdivision, is displaced from any dwelling thereon which has been actually and lawfully occupied by such individual or family for not less than ninety days immediately prior to the initiation of negotiation, for the acquisition of such property, such payment to such individual or family shall not exceed four thousand dollars. Such payment shall be the amount which is necessary to enable such individual or family to lease or rent for a period not to exceed four years, a decent, safe, and sanitary dwelling of standards adequate to accommodate such individual or family in areas not generally less desirable in regard to public utilities and public and commercial facilities and reasonably accessible to his place of employment, but shall not exceed four thousand dollars, or to make the down payment, including reasonable expenses incurred by such individual or family for evidence of title,

recording fees, and other closing costs incident to the purchase of the replacement dwelling, but not including prepaid expenses, on the purchase of a decent, safe and sanitary dwelling of standards adequate to accommodate such individual or family in areas not generally less desirable in regard to public utilities and public and commercial facilities, but shall not exceed four thousand dollars, except if such amount exceeds two thousand dollars, such person must equally match any such amount in excess of two thousand dollars, in making the down payment. Such payments may be made in installments as determined by the commissioner. Application for payment under this subdivision shall be made to the commissioner upon forms prescribed by him and shall be accompanied by such information and evidence as the commissioner may require. Upon approval of such application, the commissioner shall deliver a copy thereof to the comptroller, together with a certificate stating the amount due thereunder, and the amount so fixed shall be paid out of the state treasury after audit by the comptroller from moneys appropriated for the acquisition of property under this section.

13. Any owner may present to the court of claims, pursuant to section five hundred three of the eminent domain procedure law, a claim for the value of such property appropriated and for legal damages, as provided by law for the filing of claims with the court of claims. Awards and judgments of the court of claims shall be paid in the same manner as awards and judgments of that court for the acquisition of lands generally and shall be paid out of the state treasury after audit by the comptroller from moneys appropriated for the acquisition of such real property.

14. Expenses incurred in the acquisition of the real property, including the cost of making surveys, and preparing maps of property to be acquired, serving notices, making appraisals and agreements and of searches ordered and examinations and readings of title made by the attorney general, and expenses incurred by the commissioner or attorney general in proceedings for removal of owners and occupants, shall be deemed to be part of the cost of the acquisition of such real property.

15. If the commissioner shall determine subsequent to the acquisition

of a temporary easement in any real property that the purposes for which such easement right was acquired have been accomplished and that the exercise of such easement is no longer necessary, the commissioner shall make a certificate that the exercise of such easement is no longer necessary and that such easement right is therefore terminated, released and extinguished. The commissioner shall cause such certificate to be filed in the main office of the department and upon such filing all rights acquired by the state in such real property shall cease and determine. The commissioner shall cause a certified copy of such certificate as so filed in the main office of the department to be mailed to the owner of the property affected, as certified by the attorney general, if the place of residence of such owner is known or can be ascertained by a reasonable effort and such commissioner shall cause a further certified copy of such certificate to be filed in the office of the recording officer of each county in which the property affected or any part thereof is situated. On the filing of such certified copy of such certificate with such recording officer, it shall be his duty to record the same in his office in the books used for recording deeds and to index the same against the name of the people of the state of New York as grantor.

16. The commissioner may, by official order filed in the department and subject to such limitations as he may prescribe, authorize the exercise of any of his powers or the performance of any of his duties under this section by such deputy commissioners as he may designate; and any act performed pursuant to such authorization shall be as valid and effectual as if performed by the commissioner pursuant to this section.

§ 3-0306. Registry of public agencies and private organizations; notice of department hearings.

1. The commissioner shall develop and maintain a registry of government agencies and officials and of private organizations of statewide, regional, county and local scope, with interests in the regulatory and other programs of the department for the purpose of providing written notice to such agencies and organizations of the time,

date, place, subject and nature of hearings on rules and regulations under consideration by the department, or on applications to the department for permits relating to the use, improvement, construction, change or any modification whatsoever of the air, land, or water resources within the state, or in relation to any other business before the department for which issuance of a public notice is required or is appropriate and desirable in accord with the interests of public participation in environmental planning and decision-making.

2. To aid in the compilation of the registry, the commissioner shall advertise its purposes no less than annually to governmental agencies and the public through news releases and other media available to the department, stating that interested agencies and organizations may apply to be listed in the registry by completing forms requiring such information as may be prescribed by the commissioner. Said registry shall be prepared by the department to be as comprehensive as possible and the entries contained therein shall not be limited to those obtained in response to advertisement by the department of the purposes of the registry.

3. The commissioner shall publish and distribute or cause to be published and distributed said registry, not less frequently than annually and in whole or in part as deemed appropriate and desirable by the commissioner, for the purpose of providing a directory to assist with communications between public agencies and private organizations in all manner of environmental affairs.

4. Notices, as described herein, shall, at the discretion of the commissioner, be published not less frequently than once every two weeks in a departmental publication which shall be mailed to registered agencies and organizations in the area to be affected by the subject of said notices and to other persons subscribing to such publication; provided that the commissioner may require the payment of a subscription fee not to exceed the reasonable costs of such publication; and provided further that the commissioner may in lieu of publishing any such notice mail a copy thereof to registered agencies or organizations. In setting such fee the commissioner shall take into account the purposes of this

section to provide broad public notice of department actions. Unless otherwise provided by statute or regulation, failure to provide notice as herein described shall in no way affect the ordinary proceedings of the department.

§ 3-0307. Acquisition of federal lands.

The State of New York may acquire from the United States of America by gift, lease or purchase or otherwise, and subject to such conditions as may be prescribed by the United States of America, lands suited for reforestation, game management, fish propagation, park purposes and/or any other activities permitted by sections 3-0109 through 3-0115 inclusive, and sections 3-0305 and 3-0307 of article 3; articles 9, 11, 13 and 15; titles 7, 9, 11 and 13 of article 21; article 23; title 3 of article 27; articles 43, 45 and 47; and titles 1 through 15 inclusive and title 33 of article 71 applicable to these provisions and may by written order of the commissioner filed in the office of the department, assign and transfer at anytime, wholly or in part, the direct jurisdiction and control of any such lands to one or more divisions of the department to be administered in connection with any of the various activities permitted by such provisions. Upon the assignment of such lands to a division and notwithstanding any other provision of law, such division may expend any funds appropriated for such activities in the development, maintenance and operation of lands so acquired.

§ 3-0309. Stand-by contracts.

1. Consistent with the commissioner's authority to undertake such activities pursuant to this chapter, the state public health law, the public authorities law and the state finance law, the commissioner may enter into stand-by contracts for the purpose of achieving timely and effective remedies in a cost-effective manner for:

a. services related to a release or a suspected release of a hazardous substance as defined in section 40-0105 of this chapter and regulations

promulgated thereunder;

b. other than for major physical construction associated with permanent remedial actions, the cleanup or return to its original state of any area where hazardous wastes were disposed, possessed, or dealt in unlawfully in violation of section 27-0914 of this chapter;

c. emergency response action to clean up spills or abate other public health or environmental hazards involving hazardous wastes; and

d. other than for major physical construction associated with permanent remedial actions, all services related to the investigation in support of, or to the development, implementation and oversight of the program for remediation of inactive hazardous waste disposal sites pursuant to article 27 of this chapter.

2. For the purposes of this section, a stand-by contract shall mean a contract which provides for services and goods to be rendered to the department, at prenegotiated rates or predetermined unit prices, with such services or goods to be supplied by the contractor only when and where directed to do so by the commissioner. All such contracts shall be subject to the approval of the state comptroller in accordance with section one hundred twelve of the state finance law; however, such approval shall not obligate to any particular contract any specific amount of funds, but shall obligate on an individual basis, as such contracts are utilized, the actual amount required to pay for work performed pursuant to such contracts except that a maximum dollar amount shall be placed on each such contract. Any necessary approvals of availability of funds for a particular project in accordance with any provision of the state finance law shall be made as soon as possible after any activity identified in subdivision one of this section is ordered by the commissioner, or undertaken by the contractor.

3. Nothing in this section shall be deemed to alter the authority conferred upon the commissioner to conduct the activities identified in subdivision one of this section, or to modify the requirements which are established by this chapter, the state public health law, the public

authorities law, or section ninety-seven-b of the state finance law and are applicable to such activities.

4. The department in cooperation with the state comptroller shall as soon as practicable and prior to the execution of stand-by contracts pursuant to this section develop and implement a stand-by contract management protocol system. Such system shall provide for but not be limited to:

a. guidelines for selecting contractors based upon section one hundred thirty-six-a of the state finance law, if applicable, and upon other factors which shall include but are not limited to past performance, reasonableness of prices charged for specific tasks, and overall qualifications of the contractor;

b. departmental bid or proposal analysis and negotiation documentation requirements;

c. contractor reporting and documentation requirements;

d. formal procedures for inspecting contractor work and reviewing payment requests;

e. maintenance of equipment inventory with location; and

f. requirements and controls for subcontractors.

5. The department shall submit to the director of the division of the budget, the temporary president and minority leader of the senate, the speaker and minority leader of the assembly, the chairman and ranking minority member of the senate finance committee and the chairman and ranking minority member of the assembly ways and means committee an evaluation and audit of the department's use of stand-by contracts pursuant to this section prepared by an entity independent of the department. Such entity may be the office of the state comptroller. Such evaluation and audit shall be submitted by September first, nineteen hundred ninety and by September first, every two years

thereafter.

*** § 3-0311. Municipal notification of environmental violations.**

Notwithstanding any other provision of law and except when any criminal investigation is pending, the commissioner shall notify the chief executive officer of the municipality together with the chief executive officer of the county where any violations of article 17, 19, 24, 25 or 27 of this chapter are found to exist within the boundaries of such municipalities including, but not limited to, any municipal landfill or municipal solid waste disposal or recovery facility within seventy-two hours of determining that sufficient evidence exists to commence an enforcement action.

* NB There are 2 § 3-0311's

*** § 3-0311. State agency environmental audits.**

1. Each state agency as defined in subdivision five of this section shall annually audit the environmental problems created by its operations or the operations of contractors it has hired and over whom it has exercised or is required to exercise direct oversight, acting in fulfillment of their contracts. Such audit shall identify the extent to which these operations are in violation of this chapter, or regulations adopted thereunder. Each such state agency shall submit a report to the department on or before April first of each year. The report shall:

a. describe:

(1) each identified violation, including the year each violation was first reported to the department;

(2) the progress made in remedying any identified violations, and in remedying the violations identified in the previous year's audit and the past problems previously identified in the department's report dated "January 1990" titled "Past Practices Assessment Report";

(3) disbursements to remedy individual violations or past problems made during the previous year and disbursements recommended to be made

or made during the current fiscal year; and

(4) the steps being taken to assure future compliance with state laws and regulations, including any new policies developed to address patterns of violations identified by the audit.

b. rank each violation and past problem based on the threat each poses to the public health or the environment, so that each is placed into one of the following classifications:

(1) presents an imminent substantial threat to the public health or the environment;

(2) presents a potential substantial threat to the public health or the environment;

(3) presents a discernible but not substantial threat to the public health or the environment; or

(4) no evidence of discernible threat to the public health or the environment.

c. include a remedial plan for the correction of all existing identified violations and uncorrected past environmental problems previously identified in the "Past Practices Assessment Report". Such remedial plan shall specify:

(1) the actions the agency intends to take to remedy each violation or problem;

(2) an estimate of the costs, if any, of bringing each violation or problem into compliance, and a total cost estimate for remedying all violations and uncorrected past problems; and

(3) a projected time schedule for remedying each violation or problem.

2. In addition to the audit prepared pursuant to subdivision one of this section, each state agency shall report to the department any violation of this chapter, or regulations adopted thereunder, that presents an imminent substantial, potential substantial, or discernible threat to the public health or the environment, which has been committed on agency property by the agency's lessees or other persons and of which the agency has become aware.

3. The department shall, before September first of each year, submit

an annual report to the governor, the director of the budget, the temporary president of the senate, the speaker of the assembly, the chairman of the senate environmental conservation committee, the chairman of the assembly environmental conservation committee, the chairman of the senate finance committee, the chairman of the assembly ways and means committee, and the chairman of the assembly committee on oversight, analysis and investigation.

The report shall include:

a. a summary of the major categories of violations or uncorrected past problems previously identified in the "Past Practices Assessment Report" dated January, nineteen hundred ninety;

b. a description of each violation or uncorrected past environmental problem, including an indication of the year each violation was first reported to the department and an identification of the rank as determined by each agency, pursuant to paragraph (b) of subdivision one of this section, with any reordering of rankings as determined by the department;

c. a description of the progress made in remedying any reported violations or past environmental problems, and in remedying the violations identified in the previous year's audit, and a listing of disbursements to remedy violations or past problems made during the previous year and disbursements recommended to be made or made during the current fiscal year;

d. a description of enforcement efforts which the department has completed to remedy violations noted in the current or previous year's audit report, including whether the department has taken administrative, civil, or criminal enforcement actions;

e. if the department and the agency have entered into a consent decree regarding the violation or problem, the date the violation or problem was first identified by the department; the date the consent decree was signed; the date by which, according to the consent decree, the

violation or problem is to be remedied; and if the remedy date has been extended, the date such extension was granted and the revised remedy date;

f. a description of each agency's remedial plan for the correction of all existing identified violations and uncorrected past environmental problems, specifying:

(1) the actions the agency intends to take to remedy each violation or past problem;

(2) the agency's estimate of the costs, if any, of bringing each violation or problem into compliance, and a total estimate for each agency of the costs of remedying all violations and uncorrected past problems; and

(3) the agency's projected time schedule for remedying each violation or past problem;

g. a determination by the department of the adequacy of each agency's proposed remedial plan:

(1) for violations and past problems that pose an imminent substantial threat to the public health or the environment;

(2) for violations and past problems that pose a potential substantial threat to the public health or the environment; or

(3) that the department has been required to review pursuant to subdivision four of this section prior to the disbursement of any appropriation for such purpose.

If the department determines that the agency's plan is inadequate, the department shall provide a statement explaining this determination. No determination of adequacy need be included in the report for remedial plans that are the subject of a pending enforcement action or permit proceeding. Remedial plans that are included as part of a completed enforcement action or permit proceeding shall be deemed to have been determined to be adequate; and

h. a listing of violations committed by lessees or other persons reported by each state agency pursuant to subdivision two of this section, and the actions the department has taken to cause each such

violation to be remedied.

i. The department may, at its discretion, include any of the information listed in paragraphs (b) through (h) of this subdivision or any additional appropriate material within appendices to the report.

4. Within its requested budget, each state agency shall set forth in the aggregate all proposed appropriations for the purposes of remedying its violations of the environmental conservation law or regulations adopted thereunder. The amount requested to remedy each functional category of violation as well as project specific information for each functional category of violation shall also be set forth. A priority criterion to be considered in determining such proposed appropriations shall be the ranking of such violations as determined by the agency pursuant to paragraph (b) of subdivision one of this section, with any reordering of rankings as determined by the department. Amounts appropriated shall be disbursed for remediation of the violation or environmental problem only upon review and determination by the department of the adequacy of the remedial plan for correction of any such violation or environmental problem.

5. As used in this section, the term "state agency" or "agency" shall mean:

a. each state department;

b. Division of Military and Naval Affairs, Division of State Police, Division of Housing and Community Renewal, Division for Youth, Office of General Services, Office of Parks, Recreation and Historic Preservation, and State University of New York;

c. any other division, board, commission, office, or bureau of the state which is required to obtain a permit or approval from the department or which undertakes an activity for which it must register with the department;

d. Albany Port District Commission, Battery Park City Authority,

Capital District Transportation Authority, Central New York Regional Transportation Authority, Dormitory Authority of the State of New York, Facilities Development Corporation, Metropolitan Transportation Authority (including the operations of all of its operating units), New York State Energy Research and Development Authority, New York State Environmental Facilities Corporation, New York State Olympic Regional Development Authority, New York State Thruway Authority, New York State Urban Development Corporation, Niagara Frontier Transportation Authority, Ogdensburg Bridge and Port Authority, Port Authority of New York and New Jersey, Port of Oswego Authority, Power Authority of the State of New York, Rochester-Genesee Regional Transportation Authority; and

e. any other major agency, public authority or public benefit corporation which performs a state function and which is identified by the commissioner for the purpose of complying with this section.

6. On or before February fifteenth, nineteen hundred ninety-two and thereafter as may be necessary, the department shall develop guidelines for the preparation of environmental audits by state agencies and for the ranking of violations and problems based on the threat each poses to the public health or the environment, pursuant to paragraph (b) of subdivision one of this section.

* NB There are 2 § 3-0311's

§ 3-0313. Adopt-a-beach stewardship program.

1. The commissioner may enter into stewardship agreements with any person or persons for the purposes of preserving, maintaining, or enhancing a state-owned beach, shoreline area or portion thereof in accordance with the policies of this chapter.

2. The stewardship agreement shall provide that the beach or shoreline area be preserved and maintained in its natural state or managed to enhance or restore the natural values it provides, consistent with the provisions of this chapter. Activities may include: remediating

vandalism and storm damage, picking up litter and trash, establishing or maintaining access or nature trails, providing interpretive services for school groups and other citizens, and otherwise providing positive benefits to the beach or shoreline area.

3. Stewardship agreement with any person or persons may provide for assistance of personnel, facilities and supplies of the department for the purposes of supporting appropriate activities under such stewardship agreement, in accordance with the provisions of this chapter.

4. The department shall establish procedures by which a person or persons may apply for a stewardship agreement, and shall be responsible for working with such persons to identify specific sections of a state-owned beach or shoreline area and specific activities deemed appropriate for such stewardship agreement. The department may consider factors such as safety, environmental sensitivity, need, cost and other factors deemed relevant in determining which beach or shoreline areas or activities may be eligible or appropriate for a stewardship agreement.

5. The department shall provide recognition of the stewardship activities by appropriate signage on or near the adopted beach or shoreline area, and may provide recognition by such other measures as it may determine to be appropriate, including but not limited to press releases, certificates, and newsletters.

6. The stewardship agreement may be modified in scope or altered in any other manner at the sole discretion of the department, not inconsistent with the provisions of this section. The person or persons shall have the option of renewing the agreement subject to the approval of the department and the continuation by the department of the adopt-a-beach stewardship program. The department may immediately remove the signs and it may terminate the agreement upon thirty days notice, if in its sole judgment it finds and determines that the person or persons are not meeting the terms and conditions of the agreement.

7. Notwithstanding any inconsistent provision of law, the state and its employees shall not be liable for damages suffered by any person

resulting from the actions or activities of such volunteers.

§ 3-0315. Geographic information system.

1. The department in conjunction with the commissioner of health shall create and maintain a geographic information system, and associated data storage and analytical systems for purposes of collecting, streamlining, and visualizing integrated data, permits, and relevant sites about drinking water quality including, but not limited to, incorporating supply well and monitoring well data, emerging contaminant data, water quality monitoring data, pertinent data from remediation and landfill sites, permitted discharge locations and other potential contamination risks to water supplies. Such system shall also incorporate information from the source water assessment program collected by the department of health, data from annual water supply statements prepared pursuant to section eleven hundred fifty-one of the public health law, information from the database pursuant to title fourteen of article twenty-seven of this chapter, and any other existing data regarding soil and groundwater contamination currently gathered by the department, as well as data on contamination that is readily available from the United States geological survey and other sources determined appropriate by the department. In addition to facilitating interagency coordination and predictive analysis to protect water quality, such system shall provide state agency information to the public through a website, within reasonable limitations to ensure confidentiality and security.

2. The department shall make reasonable efforts to include additional data, including data from well logs currently required to be filed with the department pursuant to section 15-1525 of this chapter.

3. Parties required to submit data pursuant to any reporting requirements set forth in this section shall, upon request of the department, submit such data in an electronic format acceptable to the department.

*** § 3-0317. Cancer incidence and environmental facility maps project.**

1. For purposes of this section, "environmental facility" shall mean a facility or site which is:

- (a) permitted as an industrial or municipal facility pursuant to titles 7 or 8 of article 17 of this chapter;
- (b) registered pursuant to title 10 of article 17 of this chapter;
- (c) permitted pursuant to article 19 of this chapter;
- (d) permitted or registered pursuant to title 7 or 9 of article 27 of this chapter;
- (e) required to file an annual report pursuant to subdivision 6 of section 27-0907 of this chapter;
- (f) regulated pursuant to title 13 or 14 of article 27 of this chapter;
- (g) regulated as a vehicle dismantler pursuant to title 23 of article 27 of this chapter;
- (h) permitted pursuant to article 29 of this chapter;
- (i) a holder of a commercial permit pursuant to section 33-0901 of this chapter;
- (j) registered pursuant to article 40 of this chapter;
- (k) the subject of an environmental restoration project pursuant to title 5 of article 56 of this chapter;
- (l) subject to corrective action pursuant to section 71-2727 of this chapter;
- (m) participating in the department's voluntary cleanup program; or
- (n) licensed pursuant to article 12 of the navigation law as a major oil storage facility.

2. The department shall, pursuant to established security protocols, provide to the department of health the GPS coordinates, category of license or permit, facility identification number, and address on current environmental facilities that are necessary for the department of health to develop and maintain cancer incidence and environmental facility maps required pursuant to section twenty-four hundred one-b of the public health law, and shall provide any technical assistance necessary for the development of such maps. The department, in consultation with the department of health, shall update such data not

less than once every five years.

3. The department shall work with the office of homeland security to establish security protocols regarding the disclosure of data on current environmental facilities.

* NB Repealed May 1, 2028

§ 3-0319. Sea level rise projections.

The department shall, no later than January first, two thousand sixteen, adopt regulations establishing science-based state sea level rise projections. In adopting such regulations, the department shall consider information including, but not limited to, reports of the Intergovernmental Panel on Climate Change, the National Oceanic Atmospheric Administration Climate Assessment, the Sea Level Rise Task Force report created pursuant to chapter six hundred thirteen of the laws of two thousand seven, projections prepared by the New York City Panel on Climate Change and any other relevant regional, state and local reports. The department shall update such regulations no less than every five years.

§ 3-0321. Gifts, donations, capital improvements.

1. Notwithstanding the provisions of the state finance law, or any other state law to the contrary, and subject to approval of the director of the budget, the commissioner is authorized to accept an unconditional grant, gift, devise or bequest, either absolutely or in trust, from persons and entities for the maintenance of any educational or recreational facilities or for programs that promote the use or stewardship of state owned lands under the department's jurisdiction or management; establish a special fund or funds consisting of monies so acquired and administer such fund or funds; and expend such monies.

2. Notwithstanding the provisions of the state finance law, or any other state law to the contrary, the commissioner is authorized to:

(a) receive, hold and administer personal property and any income thereof, acquired by grant, unconditional gift, devise or bequest, either absolutely or in trust, for the maintenance of any educational or recreational facilities or for programs that promote the use or stewardship of state owned lands under the department's jurisdiction or management; establish a special fund or funds consisting of monies so acquired and administer such fund or funds; and expend such monies; and

(b) seek investment from private philanthropic interest or not-for-profit corporations for capital improvements at state owned facilities under the department's jurisdiction or management.

3. For purposes of this section, educational or recreational facilities or programs that promote the use or stewardship of state-owned lands under the department's jurisdiction or management shall include, but not be limited to, campgrounds, fish hatcheries, historic areas and facilities, kiosks, signage, programs for maintenance and development of roads and trails, and programs to improve access for persons with disabilities.

4. The commissioner shall not accept any grant, gift, devise or bequest from or enter into any contract or agreement authorized pursuant to subdivisions one, two, and, three of this section with persons or entities:

- (a) named in a pending lawsuit by or against the department;
- (b) under investigation by the department;
- (c) with a permit or license application pending before the department or currently holding a department-issued permit or license, except for permits or licenses that are ministerial in nature, such as sporting licenses, use of state land permits, or general permits;
- (d) engaged in settlement negotiations with the department regarding any civil, criminal or administrative matter; or
- (e) subject to a consent order issued by the department.

ARTICLE 6

STATE SMART GROWTH PUBLIC INFRASTRUCTURE POLICY ACT

Section 6-0101. Short title.

6-0103. Definitions.

6-0105. State smart growth public infrastructure policy.

6-0107. State smart growth public infrastructure criteria.

6-0109. Smart growth advisory committees.

6-0111. Private right of action.

§ 6-0101. Short title.

This article shall be known and may be cited as the "state smart growth public infrastructure policy act".

§ 6-0103. Definitions.

As used in this article:

1. "Criteria" shall mean the state smart growth public infrastructure criteria provided in section 6-0107 of this article.

2. "State infrastructure agency" shall mean the department, the department of transportation, the department of education, the department of health, the department of state, the New York state environmental facilities corporation, the New York state housing finance agency, the housing trust fund corporation, the dormitory authority, the thruway authority, the port authority of New York and New Jersey, the empire state development corporation, the New York state urban development corporation and all other New York authorities. Any subsidiary of, or corporation with the same members or directors as, a public benefit corporation identified in this subdivision shall also be deemed to be within the definition of state infrastructure agency under this article.

3. "Municipal centers" shall mean areas of concentrated and mixed land uses that serve as centers for various activities, including, but not limited to, central business districts, main streets, downtown areas, brownfield opportunity areas, downtown areas of local waterfront

revitalization program areas, transit-oriented development, environmental justice areas, and hardship areas. Municipal centers shall also include: areas adjacent to municipal centers, as defined in this subdivision, which have clearly defined borders, are designated for concentrated development in the future in a municipal or regional comprehensive plan, and exhibit strong land use, transportation, infrastructure and economic connections to a municipal center; and areas designated in a municipal or comprehensive plan, and appropriately zoned in a municipal zoning ordinance, as a future municipal center.

§ 6-0105. State smart growth public infrastructure policy.

It is the purpose of this article to augment the state's environmental policy by declaring a fiscally prudent state policy of maximizing the social, economic and environmental benefits from public infrastructure development through minimizing unnecessary costs of sprawl development including environmental degradation, disinvestment in urban and suburban communities and loss of open space induced by sprawl facilitated by the funding or development of new or expanded transportation, sewer and waste water treatment, water, education, housing and other publicly supported infrastructure inconsistent with smart growth public infrastructure criteria.

§ 6-0107. State smart growth public infrastructure criteria.

1. In addition to meeting other criteria and requirements of law governing approval, development, financing and state aid for the construction of new or expanded public infrastructure or the reconstruction thereof, no state infrastructure agency shall approve, undertake, support or finance a public infrastructure project, including providing grants, awards, loans or assistance programs, unless, to the extent practicable, it is consistent with the relevant criteria specified in subdivision two of this section.

2. The following are the state smart growth public infrastructure

criteria:

- a. to advance projects for the use, maintenance or improvement of existing infrastructure;
- b. to advance projects located in municipal centers;
- c. To advance projects in developed areas or areas designated for concentrated infill development in a municipally approved comprehensive land use plan, local waterfront revitalization plan and/or brownfield opportunity area plan;
- d. to protect, preserve and enhance the state's resources, including agricultural land, forests, surface and groundwater, air quality, recreation and open space, scenic areas, and significant historic and archeological resources;
- e. to foster mixed land uses and compact development, downtown revitalization, brownfield redevelopment, the enhancement of beauty in public spaces, the diversity and affordability of housing in proximity to places of employment, recreation and commercial development and the integration of all income and age groups;
- f. to provide mobility through transportation choices including improved public transportation and reduced automobile dependency;
- g. to coordinate between state and local government and intermunicipal and regional planning;
- h. to participate in community based planning and collaboration;
- i. to ensure predictability in building and land use codes; and
- j. to promote sustainability by strengthening existing and creating new communities which reduce greenhouse gas emissions and do not compromise the needs of future generations, by among other means encouraging broad based public involvement in developing and

implementing a community plan and ensuring the governance structure is adequate to sustain its implementation.

k. to mitigate future physical climate risk due to sea level rise, and/or storm surges and/or flooding, based on available data predicting the likelihood of future extreme weather events, including hazard risk analysis data if applicable.

3. Before making any commitment, including entering into an agreement or incurring any indebtedness for the purpose of acquiring, constructing, or financing any project covered by the provisions of this article, the chief executive officer of a state infrastructure agency shall attest in a written smart growth impact statement that the project, to the extent practicable, meets the relevant criteria set forth in subdivision two of this section, unless in any respect the project does not meet such criteria or compliance is considered to be impracticable, which shall be detailed in a statement of justification.

4. Nothing in this section shall contravene any federal law governing the expenditure of disbursement of federal infrastructure funding administered by the state.

§ 6-0109. Smart growth advisory committees.

The chief executive officer of each state infrastructure agency shall create a smart growth advisory committee to advise the agency regarding the agencies' policies, programs and projects with regard to their compliance with the state smart growth public infrastructure criteria. Such committees shall consist of appropriate agency personnel designated by the chief executive officer to conduct the evaluation required by section 6-0107 of this article. Such committees shall solicit input from and consult with various representatives of affected communities and organizations within those communities, and shall give consideration to the local and environmental interests affected by the activities of the agency or projects planned, approved or financed through such agency.

§ 6-0111. Private right of action.

Nothing contained in this article or in the administration or application hereof shall be construed to create any private right of action on the part of any person, firm or corporation against the state of New York or any state infrastructure agency as defined in subdivision two of section 6-0103 of this article.

ARTICLE 7

COUNCIL OF ENVIRONMENTAL ADVISERS

Section 7-0101. Council of environmental advisers; creation; membership; qualifications.

7-0103. Terms of office; vacancies.

7-0105. Personnel.

7-0107. General functions, powers and duties.

7-0109. Compensation.

§ 7-0101. Council of environmental advisors; creation; membership; qualifications.

There is hereby continued in the Executive Department a council to be known as the Council of Environmental Advisers, to provide special counsel to the Governor on environmental policy matters affecting the state. The council shall consist of seven members who shall be private citizens, representative of a broad range of interests and disciplines related to the quality of our environment and responsive to the full range of needs and concerns of our present and future generations. The Governor shall appoint the members by and with the advice and consent of the Senate and designate one from among the members to serve as chairman of the council.

§ 7-0103. Terms of office; vacancies.

1. The members of the council shall hold office at the pleasure of the Governor.

2. Vacancies shall be filled by appointment by the Governor, by and with the advice and consent of the Senate.

§ 7-0105. Personnel.

1. The council shall appoint an executive director and shall assign to such director such powers, functions and duties as it shall deem appropriate to fulfill the purposes of this article.

2. The council shall have the power to employ and compensate, within appropriations available therefor, such other personnel as it shall determine necessary to carry out its duties under this article.

§ 7-0107. General functions, powers and duties.

1. In providing counsel to the Governor on environmental policy matters, the council shall:

a. Advise the Governor on comprehensive environmental management policy for the state.

b. At the request of the Governor, provide an overview in both the public and private sector on matters affecting the environment, giving its judgment on specific matters referred to it.

c. Develop or cause to be developed guidelines for weighing the complex interrelationships between environmental quality, economic development, and the growing population associated with economic growth.

d. Study and from time to time report to the Governor on environmental conditions and trends in the state.

e. Recommend state environmental policies, including legislation for implementation thereof, to improve the functioning of the state and the environment of the state.

2. To assist in carrying out the aforementioned functions as provided in this section, the council may:

a. Request and shall receive from any court, department, division, board, bureau, commission or agency of the state or any political subdivision thereof, such assistance as will enable it properly to carry out its powers and duties under this section.

b. Make or recommend such special environmental studies as it deems appropriate or desirable.

c. Hold public and private hearings for specified purposes, take testimony, subpoena witnesses, and require production of books, records, and papers.

d. Report its findings to the Governor.

§ 7-0109. Compensation.

The members of the council shall receive no compensation for their services but shall be allowed their actual and necessary expenses incurred in the performance of their duties.

ARTICLE 8

ENVIRONMENTAL QUALITY REVIEW

Section 8-0101. Purpose.

8-0103. Legislative findings and declaration.

8-0105. Definitions.

8-0107. Agency implementation.

8-0109. Preparation of environmental impact statement.

8-0111. Coordination of reporting; limitations; lead agency.

8-0113. Rules and regulations.

8-0115. Severability.

8-0117. Phased implementation.

§ 8-0101. Purpose.

It is the purpose of this act to declare a state policy which will encourage productive and enjoyable harmony between man and his environment; to promote efforts which will prevent or eliminate damage to the environment and enhance human and community resources; and to enrich the understanding of the ecological systems, natural, human and community resources important to the people of the state.

§ 8-0103. Legislative findings and declaration.

The legislature finds and declares that:

1. The maintenance of a quality environment for the people of this state that at all times is healthful and pleasing to the senses and intellect of man now and in the future is a matter of statewide concern.

2. Every citizen has a responsibility to contribute to the preservation and enhancement of the quality of the environment.

3. There is a need to understand the relationship between the maintenance of high-quality ecological systems and the general welfare of the people of the state, including their enjoyment of the natural resources of the state.

4. Enhancement of human and community resources depends on a quality physical environment.

5. The capacity of the environment is limited, and it is the intent of the legislature that the government of the state take immediate steps to identify any critical thresholds for the health and safety of the people

of the state and take all coordinated actions necessary to prevent such thresholds from being reached.

6. It is the intent of the legislature that to the fullest extent possible the policies, statutes, regulations, and ordinances of the state and its political subdivisions should be interpreted and administered in accordance with the policies set forth in this article. However, the provisions of this article do not change the jurisdiction between or among state agencies and public corporations.

7. It is the intent of the legislature that the protection and enhancement of the environment, human and community resources shall be given appropriate weight with social and economic considerations in public policy. Social, economic, and environmental factors shall be considered together in reaching decisions on proposed activities.

8. It is the intent of the legislature that all agencies conduct their affairs with an awareness that they are stewards of the air, water, land, and living resources, and that they have an obligation to protect the environment for the use and enjoyment of this and all future generations.

9. It is the intent of the legislature that all agencies which regulate activities of individuals, corporations, and public agencies which are found to affect the quality of the environment shall regulate such activities so that due consideration is given to preventing environmental damage.

§ 8-0105. Definitions.

Unless the context otherwise requires, the definitions in this section shall govern the construction of the following terms as used in this article: 1. "State agency" means any state department, agency, board, public benefit corporation, public authority or commission.

2. "Local agency" means any local agency, board, district, commission

or governing body, including any city, county, and other political subdivision of the state.

3. "Agency" means any state or local agency.

4. "Actions" include:

- (i) projects or activities directly undertaken by any agency; or projects or activities supported in whole or part through contracts, grants, subsidies, loans, or other forms of funding assistance from one or more agencies; or projects or activities involving the issuance to a person of a lease, permit, license, certificate or other entitlement for use or permission to act by one or more agencies;
- (ii) policy, regulations, and procedure-making.

5. "Actions" do not include:

- (i) enforcement proceedings or the exercise of prosecutorial discretion in determining whether or not to institute such proceedings;
- (ii) official acts of a ministerial nature, involving no exercise of discretion;
- (iii) maintenance or repair involving no substantial changes in existing structure or facility.

6. "Environment" means the physical conditions which will be affected by a proposed action, including land, air, water, minerals, flora, fauna, noise, objects of historic or aesthetic significance, existing patterns of population concentration, distribution, or growth, and existing community or neighborhood character.

7. "Environmental impact statement" means a detailed statement setting forth the matters specified in section 8-0109 of this article. It includes any comments on a draft environmental statement which are received pursuant to section 8-0109 of this article, and the agency's response to such comments, to the extent that such comments raise issues not adequately resolved in the draft environmental statement.

8. "Draft environmental impact statement" means a preliminary statement prepared pursuant to section 8-0109 of this article.

9. "Disadvantaged community" shall have the same meaning as subdivision five of section 75-0101 of this chapter.

10. "Pollution" shall have the same meaning as defined by subdivision nineteen of section 1-0303 of this chapter.

11. "Previously disturbed site" means a parcel of land that:

(i) is determined by a responsible agency to have been substantially altered by an occupied, formerly occupied, or demolished building or by another improvement or use at least two years prior to the application for a permit or authorization for an action;

(ii) for any parcel located within a city, town, or village with a population of fewer than one million persons and located outside of an urban area, as such term or equivalent term is or comes to be defined by the United States Census Bureau in the most recent decennial census beginning on or after the two thousand twenty decennial census, such parcel shall abut, adjoin, or be opposite from another parcel that is or has been occupied or formerly occupied by a building, or demolished building, or another improvement or use at least two years prior to the application for a permit or authorization for an action, provided such abutting, adjoining, or opposite parcel shall not be occupied by an industrial or agricultural use;

(iii) for any parcel that is located within a city, town, or village with a population of fewer than one million persons, is not located in a Federal Emergency Management Agency (FEMA) designated 100-year floodplain, or special flood hazard area, provided that this paragraph shall not apply if such a city, town, or village has adopted a law or ordinance that requires new construction to be elevated above the base flood elevation as defined by FEMA;

(iv) for any parcel that is located within a city, town, or village with a population of more than one million persons, is not located in a flood hazard area, as defined in section two hundred two of the New York city building code, provided that this paragraph shall not apply if such a city, town, or village has adopted a law or ordinance that requires new construction to be elevated above the base flood elevation as defined by FEMA;

(v) is not currently being used for agricultural purposes and has not been used for agricultural purposes within: (a) the immediately preceding two years, or (b) three of the last five years before the application for a permit or authorization for an action; and
(vi) is not located in a designated coastal erosion hazard area.

12. "Small community water system" means a public water system which serves at least five service connections used by year-round residents or regularly serves at least twenty-five year-round residents, and serves thirty-three hundred or fewer persons.

13. "Public school facilities" shall mean educational facilities, as defined in section twenty-five hundred ninety-a of the education law, of a city school district in a city having a population of one million or more persons, over which the department of education for such city has jurisdiction, for purposes of meeting the class size compliance targets set forth in subdivision two of section two hundred eleven-d of the education law.

§ 8-0107. Agency implementation.

All agencies shall review their present statutory authority, administrative regulations, and current policies and procedures for the purpose of determining whether there are any deficiencies or inconsistencies therein which prohibit full compliance with the purposes and provisions of this article, and shall recommend or effect such measures as may be necessary to bring their authority and policies into conformity with the intent, purposes, and procedures set forth in this article. They shall carry out its terms with minimum procedural and administrative delay, shall avoid unnecessary duplication of reporting and review requirements by providing, where feasible, for combined or consolidated proceedings, and shall expedite all proceedings hereunder in the interests of prompt review.

§ 8-0109. Preparation of environmental impact statement.

1. Agencies shall use all practicable means to realize the policies and goals set forth in this article, and shall act and choose alternatives which, consistent with social, economic and other essential considerations, to the maximum extent practicable, minimize or avoid adverse environmental effects, including effects revealed in the environmental impact statement process.

2. All agencies (or applicant as hereinafter provided) shall prepare, or cause to be prepared by contract or otherwise an environmental impact statement on any action they propose or approve which may have a significant effect on the environment. Such a statement shall include a detailed statement setting forth the following:

(a) a description of the proposed action and its environmental setting;

(b) the environmental impact of the proposed action including short-term and long-term effects;

(c) any adverse environmental effects which cannot be avoided should the proposal be implemented;

(d) alternatives to the proposed action;

(e) any irreversible and irretrievable commitments of resources which would be involved in the proposed action should it be implemented;

(f) mitigation measures proposed to minimize the environmental impact;

(g) the growth-inducing aspects of the proposed action, where applicable and significant;

(h) effects of the proposed action on the use and conservation of energy resources, where applicable and significant, provided that in the case of an electric generating facility, the statement shall include a demonstration that the facility will satisfy electric generating capacity needs or other electric systems needs in a manner reasonably consistent with the most recent state energy plan;

(i) effects of proposed action on solid waste management where applicable and significant;

(j) effects of any proposed action on, and its consistency with, the comprehensive management plan of the special groundwater protection area program, as implemented by the commissioner pursuant to article fifty-five of this chapter;

(k) effects of any proposed action on disadvantaged communities, including whether the action may cause or increase a disproportionate pollution burden on a disadvantaged community; and

(l) such other information consistent with the purposes of this article as may be prescribed in guidelines issued by the commissioner pursuant to section 8-0113 of this chapter.

Such a statement shall also include copies or a summary of the substantive comments received by the agency pursuant to subdivision four of this section, and the agency response to such comments. The purpose of an environmental impact statement is to provide detailed information about the effect which a proposed action is likely to have on the environment, to list ways in which any adverse effects of such an action might be minimized, and to suggest alternatives to such an action so as to form the basis for a decision whether or not to undertake or approve such action. Such statement should be clearly written in a concise manner capable of being read and understood by the public, should deal with the specific significant environmental impacts which can be reasonably anticipated and should not contain more detail than is appropriate considering the nature and magnitude of the proposed action and the significance of its potential impacts.

3. An agency may require an applicant to submit an environmental report to assist the agency in carrying out its responsibilities, including the initial determination and, (where the applicant does not prepare the environmental impact statement), the preparation of an environmental impact statement under this article. The agency may request such other information from an applicant necessary for the review of environmental impacts. Notwithstanding any use of outside resources or work, agencies shall make their own independent judgment of the scope, contents and adequacy of an environmental impact statement.

4. As early as possible in the formulation of a proposal for an action but not more than one year from the establishment of a lead agency, the responsible agency shall make an initial determination as to whether an environmental impact statement need be prepared for the action. In making such determination for any proposed action the responsible agency

shall consider whether such action may cause or increase a disproportionate pollution burden on a disadvantaged community that is directly or significantly indirectly affected by such action. When an action is to be carried out or approved by two or more agencies, such determination shall be made as early as possible after the designation of the lead agency.

With respect to actions involving the issuance to an applicant of a permit or other entitlement, the agency shall notify the applicant in writing of its initial determination specifying therein the basis for such determination. Notice of the initial determination along with appropriate supporting findings on agency actions shall be kept on file in the main office of the agency for public inspection.

If the agency determines that such statement is required, the agency or the applicant at its option shall prepare or cause to be prepared a draft environmental impact statement. If the applicant does not exercise the option to prepare such statement, the agency shall prepare it, cause it to be prepared, or terminate its review of the proposed action. Such statement shall describe the proposed action and reasonable alternatives to the action, and briefly discuss, on the basis of information then available, the remaining items required to be submitted by subdivision two of this section. The purpose of a draft environmental statement is to relate environmental considerations to the inception of the planning process, to inform the public and other public agencies as early as possible about proposed actions that may significantly affect the quality of the environment, and to solicit comments which will assist the agency in the decision making process in determining the environmental consequences of the proposed action. The draft statement should resemble in form and content the environmental impact statement to be prepared after comments have been received and considered pursuant to subdivision two of this section; however, the length and detail of the draft environmental statement will necessarily reflect the preliminary nature of the proposal and the early stage at which it is prepared.

For any action for which the agency determines that such statement is

not required and which would take place in a special groundwater protection area, as defined in section 55-0107 of this chapter, the agency shall show how such action would or would not be consistent with the comprehensive management plan of the special groundwater protection program, as implemented by the commissioner pursuant to article fifty-five of this chapter.

The draft statement shall be filed with the department or other designated agencies and shall be circulated to federal, state, regional and local agencies having an interest in the proposed action and to interested members of the public for comment, as may be prescribed by the commissioner pursuant to section 8-0113. In addition, unless impracticable, the draft statement shall be posted on a publicly-available Internet website. The website posting of such draft statement may be discontinued when the environmental impact statement is posted pursuant to subdivision six of this section.

5. After the filing of a draft environmental impact statement the agency shall determine whether or not to conduct a public hearing on the environmental impact of the proposed action. If the agency determines to hold such a hearing, it shall commence the hearing within sixty days of the filing and unless the proposed action is withdrawn from consideration shall prepare the environmental impact statement within forty-five days after the close of the hearing, except as otherwise provided. The need for such a hearing shall be determined in accordance with procedures adopted by the agency pursuant to section 8-0113 of this article. If no hearing is held, the agency shall prepare and make available the environmental impact statement within sixty days after the filing of the draft, except as otherwise provided.

Notwithstanding the specified time periods established by this article:

(a) an agency shall vary the times so established herein for preparation, review and public hearings to coordinate the environmental review process with other procedures relating to review and approval of an action. An application for a permit or authorization for an action upon which a draft environmental impact statement is determined to be

required shall not be complete until such draft statement has been filed and accepted by the agency as satisfactory with respect to scope, content and adequacy for purposes of subdivision four of this section. Commencing upon such acceptance, the environmental impact statement process shall run concurrently with other procedures relating to the review and approval of the action so long as reasonable time is provided for preparation, review and public hearings with respect to the draft environmental impact statement; and

(b) for actions involving applications for a permit or authorization, the agency shall prepare and make available the environmental impact statement within two years after the date a draft environmental impact statement is determined to be required, unless the agency extends the deadline in writing and, in consultation with an applicant and at the discretion of the agency, establishes a new deadline that provides only so much additional time as is necessary to complete the environmental impact statement, considering any changes made by the applicant to the project design after the issuance of the scoping document that result in new significant environmental impacts, or additional actions that could not have been reasonably anticipated during scoping, or the failure of an applicant to timely provide necessary information despite good faith effort by an agency, or delay in circumstances beyond the control of an agency or an applicant.

6. To the extent as may be prescribed by the commissioner pursuant to section 8-0113, the environmental impact statement prepared pursuant to subdivision two of this section together with the comments of public and federal agencies and members of the public, shall be filed with the commissioner, made available to the public, and, unless impracticable, posted on a publicly-available Internet website prior to acting on the proposal which is the subject of the environmental impact statement. The website posting of such statement may be discontinued one year after all necessary permits have been issued by the federal, state and local governments.

7. a. An agency may charge a fee to an applicant in order to recover the costs incurred in preparing or causing to be prepared or reviewing a draft environmental impact statement or an environmental impact

statement on the action which the applicant requests from the agency; provided, however, that an applicant may not be charged a separate fee for both the preparation and review of such statements. The technical services of the department may be made available on a fee basis reflecting the costs thereof, to a requesting agency, which fee or fees may appropriately be charged by the agency to the applicant under rules and regulations to be issued under section 8-0113.

b. Such rules and regulations shall require the applicant to reimburse the conservation fund, as established pursuant to subdivision (a) of section eighty-three of the state finance law, in order to recover all costs incurred in preparing or causing to be prepared or reviewing a draft environmental impact statement or an environmental impact statement by employees of the department, whose salary and expenses are paid, in whole or in part, from the conservation fund.

8. When an agency decides to carry out or approve an action which has been the subject of an environmental impact statement, it shall make an explicit finding that the requirements of this section have been met and that consistent with social, economic and other essential considerations, to the maximum extent practicable, adverse environmental effects revealed in the environmental impact statement process will be minimized or avoided.

9. An environmental impact statement shall be prepared for any action found to have a significant impact on the special groundwater protection area, as defined in section 55-0107 of this chapter. Such statement shall meet the requirements of the most detailed environmental impact statement required by this section or by any such rule or regulation promulgated pursuant to this section.

§ 8-0111. Coordination of reporting; limitations; lead agency.

1. State and federal reports coordinated. Where an agency as herein defined directly or indirectly participates in the preparation of or prepares a statement or submits material relating to a statement

prepared pursuant to the requirements of the National Environmental Policy Act of 1969, whether by itself or by another person or firm, compliance with this article shall be coordinated with and made in conjunction with federal requirements in a single environmental reporting procedure.

2. Federal report. Where the agency does not participate, as above defined, in the preparation of the federal environmental impact statement or in preparation or submission of materials relating thereto, no further report under this article is required and the federal environmental impact statement, duly prepared, shall suffice for the purpose of this article.

3. State and local coordination. Necessary compliance by state or local agencies with the requirements of this article shall be coordinated in accordance with section 8-0107 and with other requirements of law in the interests of expedited proceedings and prompt review.

4. Effective date of coordinated reporting. The requirements of this section with regard to coordinated preparation of federal and state impact materials and reporting shall not apply to statements prepared and filed prior to the effective date of this article.

5. Exclusions. The requirements of this article shall not apply to:

(a) Actions undertaken or approved prior to the effective date of this article, except:

(i) In the case of an action where it is still practicable either to modify the action in such a way as to mitigate potentially adverse environmental effects or to choose a feasible and less environmentally damaging alternative, in which case the commissioner may, at the request of any person or on his own motion, in a particular case, or generally in one or more classes of cases specified in rules and regulations, require the preparation of an environmental impact statement pursuant to this article; or

(ii) In the case of an action where the responsible agency proposes a modification of the action and the modification may result in a

significant adverse effect on the environment, in which case an environmental impact statement shall be prepared with respect to such modification.

* (b) Actions subject to the provisions requiring a certificate of environmental compatibility and public need in articles seven and ten of the public service law or requiring a major renewable energy facility or a major electric transmission facility siting permit under article eight of the public service law; or

* NB Effective until December 31, 2040

* (b) Actions subject to the provisions requiring a certificate of environmental compatibility and public need in articles seven, ten and the former article eight of the public service law or requiring a siting permit under section ninety-four-c of the executive law; or

* NB Effective December 31, 2040

(c) Actions subject to the class A or class B regional project jurisdiction of the Adirondack park agency or a local government pursuant to section eight hundred seven, eight hundred eight or eight hundred nine of the executive law, except class B regional projects subject to review by local government pursuant to section eight hundred seven of the executive law located within the Lake George park as defined by subdivision one of section 43-0103 of this chapter.

5-a. Exemptions. (a) Notwithstanding any law, rule, or regulation to the contrary, the qualified actions listed in paragraph (b) of this subdivision shall be exempt from the requirements of this article as determined by the responsible agency. In making this determination, the responsible agency shall consider the action as a whole. If the responsible agency determines that no aspect of the action requires review under this article, meaning every aspect of the action meets criteria for exemption pursuant to paragraph (b) of this subdivision or is otherwise exempt from the requirements of this article, the agency may proceed in accordance with the criteria and standards for final decision under other applicable laws, regulations, and ordinances.

(b) An action that is not otherwise exempt from the requirements of this article, which may include building permits, special use permits, variances, subdivision approvals, site plan approvals, zoning text or map amendments, disposition or acquisition of real property, provision

of financial assistance, any other actions governed by laws, rules, regulations, or procedures concerning land use, zoning, permitting, real property acquisition or disposition, or development financial assistance, or any combination thereof, shall be a qualified action exempt from the requirements of this article if the responsible agency determines that the action is for the purposes of:

(i) construction of housing in cities, towns, and villages with populations of one million or more that shall:

(1) be connected to existing community or public water and sewerage systems at the commencement of habitation;

(2) be located at a previously disturbed site;

(3) not be located within an area zoned exclusively for industrial uses;

(4) contain no more than fifty thousand square feet of commercial, retail, community facility, or other non-industrial non-residential uses;

(5) not exceed two hundred fifty dwelling units, provided, however, that for housing that shall be located within a zoning district where, at the time of application, (A) the standard maximum residential building height is greater than forty-five feet, (B) the maximum height of a building is regulated by something other than a horizontal plane and that allows residential buildings to exceed forty-five feet, or (C) there is no such maximum building height, such housing shall not exceed five hundred dwelling units; and

(6) not include construction of only one single-family residence on a parcel of one-half or more acres;

(ii) construction of housing in cities, towns, and villages with populations of fewer than one million persons that shall:

(1) be connected to existing community or public water and sewerage systems at the commencement of habitation;

(2) be located at a previously disturbed site;

(3) contain no more than twenty percent commercial, retail, community facility, or other non-industrial non-residential uses by gross floor area;

(4) not exceed one hundred dwelling units, provided, however, for housing within cities, towns, or villages without zoning, such housing shall not exceed twenty dwelling units, and provided further, that for

housing not within cities, towns, or villages without zoning but within an urban area, as such term or equivalent term is or comes to be defined by the United States Census Bureau in the most recent decennial census beginning on or after the two thousand twenty decennial census, such housing shall not exceed three hundred dwelling units; and

(5) not include construction of only one single-family residence on a parcel of one or more acres;

(iii) construction located at a previously disturbed site of public parks that do not include performance centers, athletic stadiums, or other venues for mass gatherings, or other buildings or structures which do not serve public park, recreation, or open space purposes;

(iv) construction located at a previously disturbed site of multi-use bicycle and pedestrian trails;

(v) construction of public school facilities to be connected at the commencement of use to existing community or public water and sewerage systems, including sewage treatment works, in a city with a population of one million or more;

(vi) water and wastewater infrastructure projects that:

(1) replace, rehabilitate or reconstruct municipal water or wastewater infrastructure, in-kind and on the same site, including lead service line replacement;

(2) replace, rehabilitate, upgrade or reconstruct an existing small community water system, including lead service line replacement; or

(3) provide sewer service to a disadvantaged community served by one or more inadequate sewage treatment systems that has been determined by the department not to require a permit or approval pursuant to articles fifteen, twenty-four or twenty-five of this chapter or any rules or regulations promulgated thereunder; or

(vii) retrofit of an existing structure and its appurtenant areas to incorporate green infrastructure.

(c) (i) For an application for a permit or authorization for a qualified action listed in subparagraph (i) or (v) of paragraph (b) of this subdivision, to qualify for exemption from the requirements of this article pursuant to this subdivision, such action shall be subject to a requirement to comply with local municipal requirements regarding hazardous materials remediation to the extent applicable, and the applicant for a permit or authorization for such qualified action shall

certify that (1) it has followed and will follow all applicable laws, rules, and regulations regarding hazardous waste, (2) for an application for a permit or authorization for a qualified action other than a land use action, zoning text amendment, zoning map amendment, or variance, a Phase I Environmental Site Assessment has been conducted for the parcel in accordance with the all appropriate inquiries regulations of the United States Environmental Protection Agency under the federal Comprehensive Environmental Response, Compensation and Liability Act (40 CFR § 312) to identify any recognized environmental conditions, (3) it has followed or will follow all applicable recommendations of the Phase I Environmental Site Assessment, and (4) it will report contamination at, on, or under the parcel as required by applicable laws, rules, and regulations.

(ii) For an application for a permit or authorization for a qualified action listed in subparagraph (ii) of paragraph (b) of this subdivision, other than a land use action, zoning text amendment, zoning map amendment, or variance, to qualify for exemption from the requirements of this article pursuant to this subdivision, the applicant for a permit or authorization for such qualified action shall certify to the responsible agency that (1) a Phase I Environmental Site Assessment has been conducted for the parcel in accordance with the all appropriate inquiries regulations of the United States Environmental Protection Agency under the federal Comprehensive Environmental Response, Compensation and Liability Act (40 CFR § 312) to identify any recognized environmental conditions, (2) it has followed and will follow all applicable laws, rules, and regulations regarding hazardous waste, including, to the extent applicable, complying with local municipal requirements regarding hazardous materials remediation, (3) it has followed or will follow all applicable recommendations of the Phase I Environmental Site Assessment, and (4) it will report contamination at, on, or under the parcel as required by applicable laws, rules, and regulations.

(iii) The requirements of this paragraph shall not apply (1) to a qualified action initiated by an agency, or (2) if the applicant was previously granted an exemption pursuant to subparagraphs (i), (ii), or (v) of paragraph (b) of this subdivision for the same parcel.

(d) For actions involving applications for a permit or authorization,

the responsible agency shall determine whether such action is a qualified action pursuant to this subdivision within one hundred twenty days of receipt of such application, unless the responsible agency extends the deadline in writing and, in consultation with an applicant and at the discretion of the agency, establishes a new deadline that provides only so much additional time as is necessary to make such determination. In no event shall the deadline be extended by more than thirty days, except where (i) changes are made by the applicant to the application after its submission to the responsible agency and such changes relate to the criteria for exemption pursuant to paragraph (b) of this subdivision, (ii) an applicant fails to timely provide necessary information despite good faith effort by an agency, or (iii) there are circumstances beyond the control of the agency or an applicant that cause delay requiring an extension beyond thirty days. If the responsible agency fails to make a determination pursuant to this subdivision within the delineated time limits, an applicant may institute a proceeding in a court of competent jurisdiction under article seventy-eight of the civil practice law and rules seeking appropriate relief from the court, which may include an order directing the agency to make a determination by a deadline specified by the court.

6. Lead Agency. When an action is to be carried out or approved by two or more agencies, the determination of whether the action may have a significant effect on the environment shall be made by the lead agency having principal responsibility for carrying out or approving such action and such agency shall prepare, or cause to be prepared by contract or otherwise, the environmental impact statement for the action if such a statement is required by this article. In the event that there is a question as to which is the lead agency, any agency may submit the question to the commissioner and the commissioner shall designate the lead agency, giving due consideration to the capacity of such agency to fulfill adequately the requirements of this article.

7. Statute of limitations. The time to commence a proceeding to review an agency determination under the provisions of this article or under the rules or regulations implementing the provisions of this article shall begin to accrue when the agency determination to approve or

disapprove the action becomes final and binding upon the petitioner or the person whom the petitioner represents in law or in fact.

8. Construction. Nothing contained in the chapter of the laws of two thousand twenty-six which added this subdivision shall be interpreted or construed as superseding, limiting, modifying or affecting any authorizations, requirements, or procedures under the national historic preservation act of nineteen hundred sixty-six, the New York state historic preservation act of nineteen hundred eighty, the parks, recreation and historic preservation law, or any other state or local law governing the identification, protection, or management of historic properties, or under any rules or regulations promulgated thereunder. Nor shall anything in the chapter of the laws of two thousand twenty-six which added this subdivision be interpreted or construed as superseding, limiting, modifying or affecting any authorizations, requirements, or procedures, including but not limited to laws, rules and regulations applicable to disadvantaged communities, stormwater management or the protection of water quality, air quality, soil erosion and drainage, freshwater wetlands, tidal wetlands, critical environmental areas, or threatened or endangered species, or any otherwise applicable statutory or regulatory standards, criteria, and permitting procedures, other than those pertaining to environmental review conducted pursuant to this article and any state and local regulations promulgated thereunder. Nor shall anything in the chapter of the laws of two thousand twenty-six which added this subdivision be interpreted or construed as superseding, limiting, modifying or affecting the authority or discretion of cities, towns, and villages under applicable state or local law, rule, regulation, charter, code, resolution, or ordinance regarding zoning or land use, including but not limited to any such authority or discretion regarding site plan review or other discretionary zoning or land use permits, procedures, review, or approvals, such as traffic studies, contamination testing, and determinations of the sufficiency of wastewater and drinking water capacity.

§ 8-0113. Rules and regulations.

1. After consultation with the other agencies subject to the provisions of this article, including state agencies and representatives of local governments and after conducting public hearings and review of any other comments submitted, the commissioner shall adopt rules and regulations implementing the provisions of this article within one hundred and twenty days after the effective date of this section.

2. The rules and regulations adopted by the commissioner specifically shall include:

(a) Definition of terms used in this article;

(b) Criteria for determining whether or not a proposed action may have a significant effect on the environment, taking into account social and economic factors to be considered in determining the significance of an environmental effect, including whether it may cause or increase a disproportionate pollution burden on a disadvantaged community;

(c) Identification on the basis of such criteria of:

(i) Actions or classes of actions that are likely to require preparation of environmental impact statements;

(ii) Actions or classes of actions which have been determined not to have a significant effect on the environment and which do not require environmental impact statements under this article. In adopting the rules and regulations, the commissioner shall make a finding that each action or class of actions identified does not have a significant effect on the environment;

(d) Typical associated environmental effects, and methods for assessing such effects, of actions determined to be likely to require preparation of environmental impact statements;

(e) Categorization of actions which are or may be primarily of statewide, regional, or local concern, with provisions for technical assistance including the preparation or review of environmental impact statements, if requested, in connection with environmental impact review by local agencies.

(f) Provision for the filing and circulation of draft environmental impact statements pursuant to subdivision four of section 8-0109, and environmental impact statements pursuant to subdivision six of section 8-0109, including, in addition to any other circulation and public availability requirements, making such statements available free of

charge to the public and government agencies on the publicly-available Internet website, unless impracticable. Printed filings and public notices shall clearly indicate the address of the website at which such filing is posted;

(g) Scope, content, filing and availability of findings required to be made pursuant to subdivision eight of section 8-0109;

(h) Form and content of and level of detail required for an environmental impact statement; and

(i) Procedures for obtaining comments on draft environmental impact statements, holding hearings, providing public notice of agency decisions with respect to preparation of a draft environmental statement; and for such other matters as may be needed to assure effective participation by the public and efficient and expeditious administration of the article.

(j) Procedure for providing applicants with estimates, when requested, of the costs expected to be charged them pursuant to subdivision seven of section 8-0109 of this article.

(k) Appeals procedure for the settlement of disputed costs charged by state agencies to applicants pursuant to subdivision seven of section 8-0109 of this article. Such appeal procedure shall not interfere or cause delay in the determination of environmental significance or prohibit an action from being undertaken.

(l) A model assessment form to be used during the initial review to assist an agency in its responsibilities under this article.

3. Within the time periods specified in section 8-0117 of this article the agencies subject to this article shall, after public hearing, adopt and publish such additional procedures as may be necessary for the implementation by them of this article consistent with the rules and regulations adopted by the commissioner.

(a) Existing agency environmental procedures may be incorporated in and integrated with the procedures adopted under this article, and variance in form alone shall constitute no objection thereto. Such individual agency procedures shall be no less protective of environmental values, public participation, and agency and judicial review than the procedures herein mandated.

(b) Such agency procedures shall provide for interagency working

relationships in cases where actions typically involve more than one agency, liaison with the public, and such other procedures as may be required to effect the efficient and expeditious administration of this article.

4. Coordination with agricultural districts program. The commissioner, in consultation with the commissioner of agriculture and markets, shall amend the regulations promulgated pursuant to the provisions of this section as necessary and appropriate to assure the adequate consideration of impacts of public acquisitions, or the advancement of public monies for non-farm development on lands used in agricultural production and unique and irreplaceable agricultural lands within agricultural districts in accordance with the provisions of subdivision four of section three hundred five of the agriculture and markets law.

§ 8-0115. Severability.

The provisions of this article shall be severable, and if any clause, sentence, paragraph, subdivision or part of this article shall be adjudged by any court of competent jurisdiction to be invalid, such judgment shall not affect, impair or invalidate the remainder thereof, but shall be confined in its operation to the clause, sentence, paragraph, subdivision or part thereof directly involved in the controversy in which such judgment shall have been rendered.

§ 8-0117. Phased implementation.

1. With respect to the actions directly undertaken by any state agency, the requirement of an environmental impact statement pursuant to subdivision two of section 8-0109 of this article shall take effect on the first day of September, nineteen hundred seventy-six.

2. With respect to actions or classes of actions identified by the department as likely to require preparation of environmental impact statements pursuant to subparagraph (i) of paragraph (c) of subdivision

two of section 8-0113 of this article directly undertaken by any local agency, whether or not such actions are supported in whole or in part through contracts, grants, subsidies, loans, or other forms of funding assistance from one or more state agency; and all other actions or classes of actions identified by the department as likely to require preparation of environmental impact statements pursuant to subparagraph (i) of paragraph (c) of subdivision two of section 8-0113 of this article supported in whole or in part through contracts, grants, subsidies, loans, or other forms of funding assistance from one or more state agency, the requirement of an environmental impact statement pursuant to subdivision two of section 8-0109 of this article shall take effect on the first day of June, nineteen hundred seventy-seven.

3. With respect to actions or classes of actions identified by the department as likely to require preparation of environmental impact statements pursuant to subparagraph (i) of paragraph (c) of subdivision two of section 8-0113 of this article supported in whole or in part through contracts, grants, subsidies, loans, or other forms of funding assistance from one or more local agency; and with respect to actions or classes of actions identified by the department as likely to require preparation of environmental impact statements pursuant to subparagraph (i) of paragraph (c) of subdivision two of section 8-0113 of this article involving the issuance to a person of a lease, permit, certificate or other entitlement for use or permission to act by one or more state or local agency, the requirement of an environmental impact statement pursuant to subdivision two of section 8-0109 of this article shall take effect on the first day of September, nineteen hundred seventy-seven.

4. With respect to all other actions not included in subdivision two or three of this section which are subject to this article, the requirement of an environmental impact statement pursuant to subdivision two of section 8-0109 of this article shall take effect on the first day of November, nineteen hundred seventy-eight.

5. Agencies subject to this article shall adopt and publish the additional necessary procedures described in subdivision three of

section 8-0113 of this article, as follows:

(a) With respect to actions included within subdivision one of this section, no later than August 1, 1976.

(b) With respect to actions included within subdivision two of this section, no later than April 1, 1977.

(c) With respect to actions included within subdivision three of this section, no later than July 1, 1977.

(d) With respect to actions included within subdivision four of this section, no later than November 1, 1978.

Any agency which has not adopted and published the additional necessary procedures described in subdivisions two and three of section 8-0113 of this article according to the dates set forth in this section shall utilize those procedures found in Part 617 of title six (environmental conservation) of the official compilation of the codes, rules and regulations of the state of New York for purposes of implementing this article until such time as such agency has adopted and published its own procedures.

TITLE 1
GENERAL PROVISIONS

Section 9-0101. Definitions.

9-0105. General powers and duties.

9-0107. Acceptance by department of lands for parks and for silvicultural research.

9-0109. Acquisition of lands within the Adirondack or Catskill parks.

9-0111. Delegation of authority to license guides.

9-0113. Adopt-a-natural resource stewardship program.

§ 9-0101. Definitions.

The following words and phrases, when used in this article, unless otherwise expressly stated, are defined as follows:

1. The "Adirondack park" shall include all lands located in the forest preserve counties of the Adirondacks within the following described boundaries, to wit: Beginning at the most southerly corner of lot 166 of the John Glen and 44 Others Patent in the line between such patent and the twenty-first allotment of the Kayaderosseras Patent; thence northeasterly along the said line and along the southerly bounds of John Glen and 44 Others Patent and of the Sanders Patent to the southeasterly corner of the Sanders Patent; thence continuing northeasterly along the division line between the twenty-second and twenty-fourth allotments of the Kayaderosseras Patent to the southeasterly corner of the twenty-fourth allotment of the Kayaderosseras Patent; thence northerly along the division line between the twenty-fourth and the twenty-fifth allotments of that patent to the northeasterly corner of the twenty-fourth allotment; thence easterly along the north line of the twenty-fifth allotment and the southerly lines of John Glen and 44 Others Patent, the Luzerne Tract and the Glen Patent to the southeasterly corner of the Glen Patent; thence northerly along the easterly lines of the Glen Patent and the Luzerne Tract to the northwesterly corner of the Queensbury Patent; thence easterly along the

northerly bounds of the Queensbury Patent to the northeasterly corner thereof; thence southerly along the easterly bounds of the Queensbury Patent to the northwesterly corner of the Kingsbury Patent; thence easterly along the northerly bounds of the Kingsbury Patent to the southwesterly corner of the Artillery Patent; thence northerly along the westerly line of the Artillery Patent to the northwesterly corner of the Artillery Patent; thence easterly along the northerly bounds of the Artillery Patent to the southwesterly corner of the town of Whitehall; thence northerly along the westerly line of the town of Whitehall to the southern boundary of the town of Dresden; thence in a general northerly and easterly direction along the town line to the state boundary at the outlet of South Bay; thence in a northerly direction along the state boundary to the northeastern corner of the town of Peru in Clinton county; thence in a westerly direction to the low water line of Valcour Island; thence in a general northerly and westerly direction along the northern shore of Valcour Island to the northern boundary of the town of Peru; thence in a westerly direction along the northern boundary of the town of Peru to the eastern edge of the Delaware and Hudson railroad right-of-way; thence southerly along said eastern edge of the railroad right-of-way to the intersection of said right-of-way with the eastern edge of the right-of-way of U. S. Highway No. 9; thence in a general southerly direction along the eastern edge of said highway right-of-way to the southern boundary of the town of Peru; thence westerly along the southern boundary of the town of Peru to the western boundary of Platt's Great Location; thence northerly to the northeastern corner of lot 4 of Tharp's Tract; thence westerly along the northern line of lots 4, 7, 14, 17 and 24; thence northerly along the westerly line of Tharp's Tract to the northern boundary of the town of Peru; thence westerly along the town of Peru boundary to the southwestern corner of lot 30 of Livingston's Patent in the town of Saranac; thence in a northerly direction along the western line of lots 30, 29, 28, 27 and 26 to the northern line of Livingston's Patent; thence easterly to the southwestern corner of lot 12 of Canada and Nova Scotia Refugee Tract in the town of Saranac; thence northerly along the western line of lot 12 to the southwestern corner of lot 11; thence easterly along the northern line of lot 12 to the eastern boundary of the town of Saranac; thence northerly along the eastern boundary of the town of Saranac to the

southern boundary of the town of Dannemora; thence easterly along the southern boundary of the town of Dannemora to the southeastern corner of said town; thence northerly along the eastern boundary of the town of Dannemora to the northeastern corner of said town; thence northerly along the eastern line of lots 22 to 15 inclusive of Duer's Patent in the town of Altona to the northeastern corner of lot 15; thence westerly along the northern line of lots 15 and 14 of Duer's Patent to the southwestern corner of lot 160 of the Canada and Nova Scotia Refugee Tract in the town of Altona; thence northerly along the western line of lots 160 and 161 to the northwest corner of lot 161; thence in a westerly direction along the northern line of lots 163 and 186 to the northwestern corner of lot 186; thence southerly along the western line of lot 186 to the northeastern corner of lot 188; thence westerly along the northern boundary of lot 188 to the eastern line of the B. Wallace Patent; thence southerly and westerly along the B. Wallace Patent boundary to the eastern boundary of the town of Ellenburg; thence northerly along the town of Ellenburg line to the northeastern corner of lot 1 of the Hannah Murray Allotment; thence westerly along the northern boundary of lots 1 to 30 inclusive to the northeastern corner of lot 1, Township 8, Old Military Tract on the county line between Clinton and Franklin counties; thence along the northern line of Township 8 to the western boundary of the town of Bellmont; thence southerly along the town of Bellmont boundary to the southwestern corner of lot 80, Township 8 of the Old Military Tract; thence easterly along the southern line of lots 80 and 79 to the southeastern corner of lot 79; thence southerly along the westerly line of lots 88 and 98 to the line between townships 8 and 9 of the Old Military Tract; thence westerly to the southwesterly corner of township 8, said tract; thence northerly along the line between the towns of Bellmont and Duane to the northeasterly corner of the town of Duane; thence westerly along the southerly bounds of the towns of Malone, Brandon and Dickinson and the northerly bounds of Duane, Santa Clara and Waverly to the easterly bounds of great tract 2, Macomb's Purchase, and the line between Franklin and St. Lawrence counties; thence northerly along said county line to the northeasterly corner of township number 15 Macomb's Purchase, great tract 2; thence westerly along the northerly line of said township to the easterly line of township number 14 in said great tract; thence southerly along the

line between townships 14 and 15 to the northeasterly corner of lot number 2 in said township number 14; thence westerly along the northerly bounds of lots 2, one, 32, 31, 14 and 13 of township 14 and of lots 47 and 39 of township 13, said great tract, to the northwesterly corner of lot number 39; thence southerly along the westerly bounds of lots 39, 38, and 37 in township 13 to the northerly line of township number 11 in great tract number 2; thence westerly along the northerly line of township 11 to the northwesterly corner thereof and the northeasterly corner of the town of Colton; thence southerly along the westerly line of township 11 and the line between the towns of Colton and Parishville to the southwesterly corner of lot number 31 in township number 11; thence westerly along the northerly lines of lots 42, 41, 40, 39, 38 and 37 of township 10, great tract 2, to the westerly line of township 10; thence southerly along the westerly line of township 10 to the northeasterly corner of township 6, Macomb's Purchase, great tract number 3, and the northeasterly corner of the town of Clare; thence westerly along the northerly line of township number 6 and of the town of Clare to the northwesterly corners thereof; thence southerly along the westerly lines of township number 6 and of township number 10 in the great tract and along the line between the towns of Clare and Russell to the northeasterly corner of the town of Fine; thence westerly along the northerly bounds of the town of Fine to the northwesterly corner thereof; thence southerly along the line between the town of Fine and the towns of Edwards and Pitcairn to the northeasterly corner of lot number 90 in township 11, Macomb's Purchase, great tract number 3; thence westerly along the northerly line of lots 90, 89, 88, 87, 86, 85, 84, 83, and 24 of township 11 to the northwesterly corner of lot number 24; thence southerly along the westerly lines of lots 24, 99, 102, 119 and 123 to the southwesterly corner of lot number 123 in the northerly line of lot number 140 in township 11; thence westerly along the northerly line of lot number 140 to the line between the counties of St. Lawrence and Lewis; thence southeasterly along the county line to the most northerly corner of lot number one, Macomb's Purchase, great tract 4 in the town of Diana; thence southwesterly along the northwesterly line of lots one, 2 and 3 in the great tract and town to the most westerly corner of lot number 3; thence southeasterly along the southerly lines of lots 3, 9 and 14 to the most northerly corner of lot

number 16; thence southwesterly along the northwesterly line of lot number 16 to the northerly bounds of great tract 5, Macomb's Purchase, and the line between the towns of Diana and Croghan; thence easterly along said line to the northwesterly corner of lot number 24, range 11, Macomb's Purchase, great tract 5, Chassanis Tract; thence southerly along the line between ranges 10 and 11 of said great tract to the most southerly corner of lot number 13 in range 11 of said tract, and the northerly line of Watson's West Triangle in the line between the towns of Croghan and Watson; thence southwesterly along the said town line and along the northwesterly bounds of Watson's West Triangle and the northerly line of lots 292 and 302 of Watson's West Triangle to the westerly line of lot number 302, Watson's West Triangle; thence southerly along the westerly lines of lots 302, 301, 300, 299, 298, 297, 296, 295, 294 and 293 to the line between the towns of Watson and Greig and the northerly line of the Brantingham Tract; thence westerly along the northerly bounds to the northwesterly corner of lot number 7 in said tract; thence southerly along the westerly lines of lots 7, 25, 43, 61, 79, 97, 115, 133, 151, 169, and 187; thence westerly along the northern line of lots 204 and 203 to the midpoint of the northern line of lot 203; thence southerly to the midpoint of the southern line of lot 203; thence easterly along the southern line of lots 203 and 204 to the southeastern corner of lot 204; thence southerly along the westerly line of lots 223, 241, 259, 276, 293, 309, 325 and 340 to the southwesterly corner of lot number 340 in the Brantingham Tract; thence easterly along the southerly lines of lots 340, 341, 342, 343, 344, 345 and 346 to the southeasterly corner of lot 346 and the westerly line of lot number 347; thence southerly along the westerly line of lot 347 to the line between the counties of Oneida and Lewis and in the north line of the Seymour Tract in Adgates Eastern Tract; thence southwesterly along the northwesterly line of the Adgates Eastern Tract to the westerly line of said tract; thence southerly along the westerly line and along the line between the towns of Boonville and Forestport to the southwesterly corner of said Adgates Eastern Tract; thence easterly along the line between Adgates Eastern Tract and the Woodhull Tract to the line between the counties of Oneida and Herkimer; thence southerly along the said county line to the northeastern corner of lot 8 of the Woodhull Tract; thence westerly along the northern line of lot 8; thence southerly along

the western line of lot 8, thence easterly along the southern line of lot 8 to the county line; thence southerly along the county line; thence southerly to the northern line of the Remsenburg Patent; thence southwesterly along the northern line of lot 8; thence southerly along the western line of lot 8 to the midpoint of said line; thence northeasterly along the southern boundary of state land in lot 8 to the county line; thence southerly along the county line to the northern line of lot 84 of the Remsenburg Patent; thence southwesterly along the northern line of lot 84, thence southerly along the western line of lot 84 to the northern boundary of the Walker Tract; thence northeasterly along this boundary to the county line; thence southerly along the said county line to its intersection with the southerly line of the Jerseyfield Patent; thence southeasterly along the southerly line of the Jerseyfield Patent to the northwestern corner of lot 142 of the Fourth Allotment of the royal grant in the town of Salisbury; thence southerly, easterly and northerly along the boundaries of the forest preserve land in lot 142 to the southerly line of the Jerseyfield Patent; thence southeasterly along the southerly line of the Jerseyfield Patent to the line between the counties of Herkimer and Fulton; thence southerly along the county line to the southwesterly corner of Lott and Low's Patent; thence southeasterly along the southerly line of said Lott and Low's Patent to the southeasterly corner thereof; thence northerly along the line between said Lott and Low's Patent and the Kingsborough Patent to the division line between the towns of Johnstown and Caroga; thence northeasterly along the line between the towns of Caroga and Johnstown to the southeasterly corner of the town of Caroga; thence northerly along said town line to the southerly line of the Mayfield Patent; thence easterly along the southerly line of the Mayfield Patent to the southeasterly corner thereof and the westerly line of the Sacandaga Patent; thence southeasterly along the southwesterly lines of lots 41 and 28 in said patent to the most southerly corner of lot 28 and the westerly line of John Glen and 44 Others Patent; thence northerly, southeasterly and northeasterly along the line between the Sacandaga and the said John Glen and 44 Others Patent to the northwesterly corner of lot 161 of John Glen and 44 Others Patent; thence southeasterly along the southwesterly line of lots 161 and 166 of said patent to the place of beginning.

2. The "Catskill park" shall include all lands located in the counties of Greene, Delaware, Ulster and Sullivan within the following described boundaries, to wit: Beginning in Ulster county at the intersection of the easterly line of the Hardenburgh Patent with the southerly bounds of the Rondout Reservoir; thence running southwesterly along the easterly line of Great Lot 4 of the Hardenburgh Patent to the southeasterly corner of lot one of the East Allotment, east division of Great Lot 4; thence northwesterly along the southerly bounds of lots one, 7, 8, 14, 17, 22, 26, 33, 37 and 46 of said East Allotment, east division of Great Lot 4 and along the southerly bounds of lots 67, 49, 48, 47, 46, 45, 44, 43, 42 and 41 of the Middle Allotment, east division of Great Lot 4 to the center of the Neversink creek; thence northerly along the center of the Neversink creek to the southeasterly corner of lot 37 of the West Allotment, east division of Great Lot 4; thence northwesterly along the southerly bounds of lots 37, 27, 22, 11 and 6 of said West Allotment, east division of Great Lot 4 to a point in the easterly line of the town of Rockland in Sullivan county; thence southerly along the easterly line of the town of Rockland in Sullivan county to the northeasterly corner of the town of Liberty; thence northwesterly along the northerly line of the town of Liberty in Sullivan county to the southwesterly corner of lot 120 of the East Allotment, middle division of Great Lot 4; thence northwesterly along the southerly bounds of lots 119 and 118 of the East Allotment, middle division of Great Lot 4 to a point in the center of the Willowemoc creek; thence westerly down the center of the Willowemoc creek to its confluence with the Beaver Kill; thence northwesterly down the center of said Beaver Kill to the southwesterly line of the town of Colchester in Delaware county; thence northwesterly along said southwesterly line of the town of Colchester in Delaware county to the westerly bank of the east branch of the Delaware river; thence along the westerly bank of the said east branch of the Delaware river and the westerly bounds of the Pepacton reservoir to its intersection with the mouth of the Bush Kill at or near the village of Arkville; thence up along the center of said Bush Kill to the New York Central Railroad; thence along the said New York Central Railroad easterly to the line between the counties of Delaware and Ulster; thence northeasterly along that line to the southerly line of Greene county; thence northwesterly

along the southerly line of Greene county to the southwesterly corner of Great Lot No. 21, Hardenburgh Patent; thence northeasterly along the westerly line of said Great Lot No. 21, Hardenburgh Patent to the south bank of the Batavia Kill; thence along the southerly bank of the Batavia Kill easterly to the west line of the State Land Tract; thence northerly, easterly and southerly along the line of the said State Land Tract to the line of the Hardenburgh Patent; thence easterly and southerly along the general easterly line of the Hardenburgh Patent to the southwest corner of the town of Saugerties in Ulster county; thence easterly along the southerly line of the town of Saugerties to the westerly bounds of the New York State Thruway; thence southerly along the westerly bounds of the said New York State Thruway to the northerly bounds of the Esopus creek; thence in a general westerly direction up and along the northerly bounds of said Esopus creek to its intersection with the southwesterly line of the town of Ulster; thence northwesterly to the southwest corner of the Hurley Patentee Woods Allotment; thence in a general southwesterly direction along the southeasterly line of the Hurley Patentee Woods Allotment to the northerly line of the town of Marbletown; thence northwesterly along said northerly line of the town of Marbletown to the town of Olive; thence southwesterly along the line between the towns of Olive and Marbletown to the line of the town of Rochester; thence northwesterly along the line between the towns of Olive and Rochester to the point where the Mettakahonts creek crosses the same flowing easterly; thence southwesterly parallel with the northwesterly line of the town of Rochester to the southerly bounds of the Rondout creek; thence westerly along the southerly bounds of the Rondout creek and the southerly bounds of the Rondout Reservoir to the easterly line of the Hardenburgh Patent, the point or place of beginning.

3. A "fire patrolman" shall be an able-bodied person whose duty is to patrol a given portion of railroad right of way for the purpose of detecting promptly any fires which may be caused by the operation of the railroad, or other fires which may occur upon such portion of the railroad right of way, and secure their extinguishment.

4. A "forest fire" is a fire which is burning forest or wood lands, or

which, if permitted to extend, would burn forest or upon forest lands.

5. "Forest land" includes not only lands which may be covered with tree growth but also lands which are best adapted to forests.

6. The "forest preserve" shall include the lands owned or hereafter acquired by the state within the county of Clinton, except the towns of Altona and Dannemora, and the counties of Delaware, Essex, Franklin, Fulton, Hamilton, Herkimer, Lewis, Oneida, Saratoga, Saint Lawrence, Warren, Washington, Greene, Ulster and Sullivan, except:

a. Lands within the limits of any village or city;

b. Lands not wild lands and not situated within either the Adirondack park or the Catskill park acquired by the state on foreclosure of mortgages made to loan commissioners; and

c. Lands acquired under the provisions of sections 9-0107 and 9-0501.

7. "Person" means any individual, firm, co-partnership, association or corporation, other than the state or a public corporation, as the latter is defined in subdivision 1 of section 3 of the General Corporation Law.

8. "Railroad" or "railroad company" includes all common or contract carriers or other transportation facilities operating on rails.

9. "Railroad right of way" is the land adjacent to the tracks of a railroad and shall be construed to be 50 feet in width on each side of the center of the track but if the company owns a lesser width it shall include the entire width owned by it.

§ 9-0105. General powers and duties.

For the purpose of carrying out the provisions of this article, the department shall have the power, duty and authority to:

1. Exercise care, custody and control of the several preserves, parks and other state lands described in this article.

2. Consistent with the provisions of section 9-0109 of this chapter, establish, acquire, control and manage state parks, historic sites and parkways in the forest preserve counties within the sixth park region as defined in section 41-0101 and to acquire lands for such purposes when moneys have been appropriated therefor.

3. Make necessary rules and regulations to secure proper enforcement of the provisions hereof. In particular, the department shall have authority to make rules and regulations prohibiting any person or persons from entering upon any state-owned lands, or restricting the activities of the public on such lands, whenever it determines that a serious fire hazard exists thereon, and with the consent of the owner to extend the applicability of such rules and regulations, in whole or in part, to privately-owned forest lands.

4. Establish, operate and maintain nurseries for the production of trees to be used in reforestation. Such trees may be used to reforest any land owned by the state, supplied to owners of private land at a price not exceeding cost of production, or used for planting on public lands under such terms as may be deemed to be for the public benefit.

5. Prepare, print, post or distribute printed matter relating to forestry and make investigations or experiments with regard to forestry practices.

6. Receive and accept, in the name of the people of the state, by gift, devise, or otherwise, the fee or other interest or estate therein of lands or timber or both, for general conservation purposes, including but not limited to water-shed protection, forest management, production of timber or other forest products, silviculture, forest and outdoor recreation and kindred purposes.

7. Acquire, when moneys therefor have been appropriated by the legislature or are otherwise available, real property or any interest in

any timber thereon, situated within the Adirondack or the Catskill parks or contiguous, connected with or adjacent to either park, deemed necessary for the enlargement of the forest preserve or for the conservation of the lands, forests and waters within the state, and real property deemed necessary for the purpose of protecting the forests within the state from fire.

7-a. Acquire, with the approval of the director of the budget and within such appropriations as may be made available therefor by the legislature, such abandoned railroad rights-of-way and other real property pursuant to subdivision seven of this section as may be necessary to develop a system of trails in the Adirondack and Catskill parks which shall mesh, where possible, with the comprehensive statewide trails system promulgated by the commissioner of parks and recreation; and promulgate, develop and improve such trails systems within said parks in order to make such trails suitable and available for use. For the purposes of this subdivision "trails" shall include footpaths, bikeways, snowmobile trails, horse trails, cross country ski trails, roads and other rights-of-way suitable for hiking, strolling, cycling, horseback riding, skiing and other means of motorized and non-motorized travel for recreational purposes and shall include combinations and systems of trails, including connecting and side trails, and trails leading to scenic and recreational areas.

8. Examine the forest lands under the charge of the several state institutions, boards or other management for the purpose of advising and cooperating in securing proper forest management of such lands.

9. Bring any action or proceeding for the following purposes:

a. to enforce the state's rights or interests in real property which an owner of land would be authorized to bring in like cases;

b. to insure the enforcement of the provisions of this article;

c. to determine in trespass, ejectment or other suitable actions, the title to any land claimed adversely to the state;

d. to cancel tax sales or to set aside cancellations of tax sales.

10. Compromise or adjust any judgment or claims arising out of violations of any provisions of this article, except where title to land is involved.

11. Have custody of all abstracts of title, papers, contracts or memoranda relating thereto, except original deeds to the state, for any lands purchased or conveyed to the state for forest preserve purposes.

12. Enter into cooperative agreement with the United States Department of Agriculture, the United States Department of Labor, the United States Office of Economic Opportunity, municipalities or persons for the purpose of better protecting the forests of the state from fire and pests and promoting the practice of forestry. Moneys received from the United States government, municipalities or persons in accordance with such agreements shall be deposited with the Division of Finance in the Department of Taxation and Finance, and may be withdrawn by the Division of Finance upon the warrant or order of the Commissioner of Environmental Conservation. The provisions of section 121 of the State Finance Law shall not apply to any moneys received pursuant to the provisions of this subdivision if used for the purposes indicated.

13. When an honest dispute arises as to the location of the boundary line between land owned by the state, over which the department has control and supervision, and land privately owned, execute a boundary line agreement between the owners of such private lands and the state, subject to the approval of the Commissioner of General Services.

14. Designate or approve, whenever the Commissioner of Correction or the director of the division for Youth so requests, sites on land under its control for the establishment of work camps to which persons transferred to the correctional camps for youth, or to youth opportunity or youth rehabilitation centers may be sent; designate and approve work for such persons in conservation projects on publicly owned lands or lands over which the State has a permanent easement for fishing right

purposes, and provide technical supervision for such work; and designate and approve work for such persons in conservation projects on lands owned by Cornell University for the use of the State University College of Agriculture, and by Syracuse University for the use of the State University of New York College of Environmental Science and Forestry.

15. Make rules and regulations and issue permits for the temporary use of the forest preserve.

16. Nothing in this chapter shall be construed as extending the jurisdiction of the department over the real or personal property now or hereafter under the control or in the custody of Palisades Interstate Park Commission, but the department, subject to the powers of the commissioner, is authorized to cooperate with Palisades Interstate Park Commission by the joint employment of wardens, foresters and keepers for the mutual protection of the lands under their respective jurisdiction and other commissions and the preservation of the forests thereon and of the fish and game therein.

17. Refund, to the persons entitled thereto, moneys heretofore or hereafter received by the department pursuant to any law or to an order, rule or regulation made and prescribed by the commissioner regulating the discharge of the functions, powers and duties of the department and deposited to the general fund, upon satisfactory proof of entitlement. Such refunds shall, upon approval of the commissioner and after audit by the Comptroller, be paid from any moneys available to the department in the general fund.

18. Establish, operate and maintain a search and rescue program in fire towns and fire districts of the state. For the purposes of this section fire towns shall mean such towns provided for in section 9-1107 of this chapter and fire districts shall be deemed to be the fire protection areas provided for in section 9-1109 of this chapter and regulations promulgated pursuant to the authority of such sections. Pursuant to such program the forest ranger force of the department shall have the authority to organize, direct and execute search operations for lost persons or civilian aircraft and conduct rescue operations for

persons injured or in serious danger of injury in the wild, remote and forested areas of fire towns and fire districts of the state; provided that, where criminal conduct is suspected or fugitive search is involved such search or rescue operations shall be conducted under the jurisdiction of the appropriate law enforcement agency. Search and rescue operations outside of fire towns and fire districts may be conducted by the forest ranger force upon request of the agency conducting such operation.

19. Identify, manage and conserve plants and ecological communities that are rare in New York state, located on state-owned lands under the jurisdiction of the department, and participate in the New York natural heritage program, created pursuant to section 11-0539 of this chapter, to identify rare plants, animals and ecological communities.

20. Exercise such other powers and duties as are provided by law.

§ 9-0107. Acceptance by department of lands for parks and for silvicultural research.

Notwithstanding any other provisions of this article, the department is hereby authorized to accept, for the state, grants or deeds of gift of any lands, upon approval of the title thereto by the Attorney General, as follows:

1. a. Lands, located in any county named in subdivision 2 of section 9-0105, or in subdivision 6 of section 9-0101 of this article, which the department may deem suitable for park or reservation purposes. The grant or deed must recite that it is given for acceptance under the provisions of this subdivision of this section.

b. Property so accepted shall forever be under the jurisdiction of the commissioner and his successors in office and, by virtue of the acceptance thereof, shall be irrevocably dedicated to be used for the purposes of a public park or reservation under the care, custody, control and management of the department and shall not become a part of

the forest preserve. Such property shall forever remain open to the public for the enjoyment of the scenic and natural beauties of the premises, and receive such improvement or development, by the erection of buildings, roads, highways, railroads and other structures, including the improvement, alteration and maintenance of the structures now on such premises as the legislature may from time to time determine. The department may, in its discretion, lease a part or all of such premises upon such terms and conditions as it may determine not inconsistent with the reasonable use of such premises by the public, provided that any such lease shall first have been approved by the Attorney General as to form.

2. a. Lands, located in any county named in subdivision 6 of section 9-0101 of this article, which the department may deem suitable for use for the purposes of silvicultural research and experimentation in the science of forestry to the end that forest practices most beneficial to the economy of the state and the health, welfare and comfort of the people of the state may be ascertained and demonstrated. The grant or deed to the state of any such lands must recite that it is given for acceptance under the provisions of this subdivision of this section.

b. Property so accepted shall be under the jurisdiction of the commissioner and his successors in office and, until otherwise provided by law, shall be dedicated for use only for the purposes of silvicultural research and experimentation in the science of forestry, including purposes incidental thereto, under the care, custody, control and management of the department and its successors in office and shall not become a part of the forest preserve. Under such conditions as it may deem consistent with the purposes aforesaid, and upon such terms as it may deem to be for the best interests of the state, the department may sell trees, timber and other products on any such lands. All trees, timber or other products to be sold shall be plainly marked or otherwise designated prior to cutting and no such material shall be removed from such land until paid for. No such material shall be sold at less than the fair market value in the county or counties in which it is located, which value shall be the value fixed by a department forester or other competent appraiser in a report made after an examination of the

materials to be sold, provided such appraisal is approved by the department. The department may sell any such materials at not less than the fair market value so fixed and under such conditions as it may prescribe, provided, however, that no sale of such materials appraised at five hundred dollars or more shall be made without public notice of sale, and after receipt of sealed bids. The award shall be made only to the highest bidder. Such notice of sale and bids, the awarding of the contract and the execution and filing of the contract shall otherwise be in accordance with the procedure specified in sections 9-0501 through 9-0505 of this article for the sale after public notice, of trees, timber, and other forest products on reforestation areas. All moneys received from any such sale shall be paid over to the State Comptroller and shall be deposited by him in the forest preserve expansion fund established by section 97-e of the State Finance Law.

§ 9-0109. Acquisition of lands within the Adirondack or Catskill parks.

1. Unless deemed necessary for the conservation of critical and unique natural land areas or of significant wild forest land areas, the state shall not acquire or accept fee simple ownership of structures or improvements in the Adirondack or Catskill parks listed or eligible to be listed on the state register of historic places including that amount of land on which such structures or improvements are located that is necessary for their maintenance and use.

2. Prior to any land acquisition by a state agency within the Adirondack or Catskill parks, the commissioner or responsible chief executive officer proposing such acquisition shall undertake a review of such action pursuant to the state environmental quality review act as provided in article eight of this chapter and, when applicable, the New York state historic preservation act of 1980.

3. If such structures or improvements in the Adirondack or Catskill parks are offered to the state for purchase or as a gift, it shall be the responsibility of the state agency to which such offer is made, in accordance with guidelines prepared for notifying potential private

purchasers, to search for a private purchaser or donee who would preserve such structures or improvements, if the present owner thereof consents.

4. Historic structures and improvements which are located within the Adirondack and Catskill parks and owned by the state prior to the effective date of this section and which existed prior to acquisition by the state may be maintained provided that:

a. the commissioner of parks, recreation and historic preservation finds that such structures and improvements are listed or are eligible to be listed on the state register of historic places pursuant to subdivision one of section 14.07 of the parks, recreation and historic preservation law; and

b. the commissioner finds that such structures and improvements can be maintained for public enjoyment and understanding of the forest preserve or for departmental activities necessary in protecting forest preserve lands in the parks in a manner that will not disturb the existing degree of wild forest character of land on which the pre-existing structures or improvements are located or the wild forest character of land adjacent thereto; and

c. such maintenance is in accordance with reasonable regulation of the forest preserve in the Adirondack and Catskill parks consistent with article fourteen of the state constitution.

The recording provisions of section sixty-three of the public buildings law shall apply if such structures and improvements are not maintained or are substantially altered or demolished.

§ 9-0111. Delegation of authority to license guides.

The commissioner may delegate the authority to administer the licensing of guides pursuant to section 11-0533 of this chapter to the office of public protection.

§ 9-0113. Adopt-a-natural resource stewardship program.

1. The commissioner may enter into stewardship agreements with any person or persons for the purposes of preserving, maintaining, or enhancing a state-owned natural resource or portion thereof in accordance with the policies of this article.

2. The stewardship agreement shall provide that the natural resource be preserved and maintained in its natural state or managed to enhance or restore the natural resource values they provide, consistent with the provisions of this chapter and purposes of this article. Activities may include: remediating vandalism, picking up litter and trash, establishing or maintaining access or nature trails, providing interpretive services for school groups and other citizens, managing fish and wildlife habitat, and otherwise providing positive benefits to the natural resource.

3. Stewardship agreement with any person or persons may provide for assistance of personnel, facilities and supplies of the department for the purposes of supporting appropriate activities under such stewardship agreement, in accordance with the provisions of this article.

4. The department shall establish procedures by which a person or persons may apply for a stewardship agreement, and shall be responsible for working with such persons to identify specific sections of a state-owned natural resource and specific activities deemed appropriate for such stewardship agreement. The department may consider factors such as safety, environmental sensitivity, need, cost and other factors deemed relevant in determining which natural resource or activities may be eligible or appropriate for a stewardship agreement.

5. Consistent with other laws of the state and regulations of the department, the department shall provide recognition of the stewardship activities by appropriate signage on or near the adopted natural resource, and may provide recognition by such other measures as it may

determine to be appropriate, including but not limited to press releases, certificates, newsletters, and articles in the conservationist.

6. The stewardship agreement may be modified in scope or altered in any other manner at the sole discretion of the department, not inconsistent with the provisions of this section. The person or persons shall have the option of renewing the agreement subject to the approval of the department and the continuation by the department of the adopt-a-natural resource stewardship program. The department may terminate the agreement and remove the signs upon thirty day notice, if in its sole judgment it finds and determines that the person or persons are not meeting the terms and conditions of the agreement.

7. The department shall, to the maximum extent practicable, provide assistance to other state agencies that are interested in developing stewardship programs for natural resources under their jurisdiction.

8. Notwithstanding any inconsistent provision of law, the state and its employees shall not be liable for damages suffered by any person resulting from the actions or activities of such volunteers.

TITLE 3

USE OF LANDS AND FORESTS

Section 9-0301. Use and diminution of Adirondack and Catskill parks.

9-0303. Restrictions on use of state lands.

9-0305. Signs and advertising in Adirondack and Catskill parks.

9-0307. Forest preserve lands; detached parcels outside Adirondack and Catskill parks.

§ 9-0301. Use and diminution of Adirondack and Catskill parks.

1. All lands in the Catskill park and in the Adirondack park, except those lying within the town of Dannemora, now owned or which may hereafter be acquired by the state, shall be forever reserved and

maintained for the free use of all the people, except that nothing herein shall prohibit the charging of a fee for services rendered or facilities provided.

2. No law diminishing the area of the Adirondack and Catskill parks, as defined in section 9-0101 hereof, shall be effective unless enacted by the legislature at two successive regular sessions.

§ 9-0303. Restrictions on use of state lands.

In order to protect the state lands described in this article the following provisions shall apply:

1. Trees or timber. Except as provided in subdivision 2 of section 9-0107 and in sections 9-0501 through 9-0507 of this article no person shall cut, remove, injure, destroy or cause to be cut, removed, injured or destroyed any trees or timber or other property thereon or enter upon such lands with intent to do so.

2. Structures. No building shall be erected, used or maintained upon state lands except under permits from the department.

3. Agricultural use. No person shall use any portion of the forest preserve for agricultural purposes, nor shall cattle or domestic animals of any kind be permitted to graze thereon.

4. Deposit rubbish. No person shall deposit or leave on state lands any rubbish or other waste material.

5. Transfer or lease. No person shall lease, transfer or accept any lease or transfer of any lands in the forest preserve or of any improvements thereon.

6. Disposal of improvements. The department may dispose of any improvements upon state lands under such conditions as it deems to be to the public interest.

7. Removal of materials generally. No person shall remove any material belonging to the state from the state lands without the authorization of the department.

§ 9-0305 Signs and advertising in Adirondack and Catskill parks.

1. In order to conserve the natural beauty of the Adirondack and Catskill parks, to preserve and regulate the said parks for public uses for the resort of the public for recreation, pleasure, air, light and enjoyment, to keep them open, safe, clean, and in good order for the welfare of society, and to protect and conserve the investment of the state in forest lands, campsites and other interests in real property in said parks, no person shall erect or maintain within the boundaries thereof any advertising sign, advertising structure or device of any kind, except under written permit from the department. The provisions of this section shall not apply to signs erected or maintained upon a parcel of real property in connection with the principal business or principal businesses conducted thereon and which advertise such business or businesses only, or to signs within the limits of an incorporated village.

As to signs, structures or devices existing within the Catskill park on May 26, 1969, and which require a permit pursuant to this section, the same may continue to be maintained without permit until January 1, 1976 provided that the property owner or owner of such sign, structure or device registers the same with the department on or before January 1, 1972.

As to signs, structures or devices existing on May 31, 1972 in those portions of the Adirondack park added thereto by chapter six hundred sixty-six of the laws of nineteen hundred seventy-two, and which require a permit pursuant to this section, the same may continue to be maintained without permit until January 1, 1978, provided that the property owner or owner of such sign, structure or device registers the same with the department on or before January 1, 1975.

2. Whenever a sign, structure or device has been erected or is being maintained in violation of the provisions of subdivision one of this section, the commissioner shall cause a notice of such violation, specifying as nearly as may be the nature and location of such sign, structure or device, to be personally served upon the owner of record of the real property upon which the same is located, hereinafter referred to as the property owner. In addition, a copy of such notice shall be personally served upon the owner of such sign, structure or device, if his name and address and the fact that he is the owner is clearly indicated thereon.

3. The property owner or the owner of such sign, structure or device shall remove the same within ten days from the date of the last service of such notice or copy thereof as hereinabove specified. In the event of the failure of the property owner or the owner to remove such sign, structure or device within such ten day period, the commissioner may cause an agent or employee of the department to enter upon the property where such sign, structure or device is located and to remove the same.

4. No action for trespass or damages shall lie on account of entry upon private property by an authorized agent or employee of the department engaged in carrying out any of the provisions of this section.

§ 9-0307. Forest preserve lands; detached parcels outside Adirondack and Catskill parks.

Any lands of the state, now owned or hereafter acquired, constituting the forest preserve, but outside of the Adirondack and Catskill parks as now fixed by law and not acquired or dedicated for the practice of forest or wild life conservation, and consisting in any case of not more than 100 contiguous acres entirely separated from any other portion of the forest preserve, may be dedicated, used, sold or exchanged as follows:

1. The department may dedicate any of such lands for the practice of forest or wild life conservation, or may use any of such lands for public recreational or other state purposes, under the care, custody and control of the division of lands and forests. Such dedication or use shall be by written order of the commissioner, filed in his office, a certified copy of which shall be forthwith filed by him in the office of the Secretary of State.

2. The department may consent to a transfer of jurisdiction over any such lands by the Office of General Services, and such office may make such transfer in accordance with the provisions of subdivision 4 of section 3 of the Public Lands Law governing transfers of jurisdiction in general, for the purpose of thereby dedicating such lands for the practice of forest or wild life conservation or for the use thereof for public recreational or other state purposes.

3. The department may consent to a sale or exchange of any of such lands in accordance with the provisions of section 24 of the Public Lands Law.

TITLE 5

REFORESTATION AREAS

Section 9-0501. Power to acquire reforestation areas; prohibition against compensation or gratuity.

9-0503. Certificate of purchase; exemption from taxation.

9-0505. Sale of products from reforestation areas.

9-0507. Leasing of oil and gas rights on reforestation areas.

9-0509. Lease of land to federal government for use by the federal aviation agency.

§ 9-0501. Power to acquire reforestation areas; prohibition against compensation or gratuity.

1. In order to provide for the acquisition of lands outside of the Adirondack park and the Catskill park as defined by subdivisions 1 and 2

of section 9-0101, which are adapted for reforestation and the establishment and maintenance thereon of forests for watershed protection, the production of timber and other forest products, and for recreation and kindred purposes, the department may acquire in the name of the state, by gift, purchase or appropriation, reforestation areas which shall consist respectively of not less than five hundred acres of contiguous lands, which shall be forever devoted to the planting, growth and harvesting of such trees as shall be deemed by the commissioner best suited for the lands to be reforested. Lands divided only by highway, railroad, transmission line, telephone line, telegraph line, pipe line or other rights of way or only by canals or streams shall be deemed to be contiguous within the meaning of this section. Plantations and other forests thereon shall be established, managed and protected under his supervision pursuant to such provisions of law as shall from time to time be established or to such rules and regulations as may be prescribed by him.

2. No officer or any other person acting for the department in securing options for the purchase of lands acquired or to be acquired under provisions of this title 5 shall directly or indirectly receive or accept from a vendor of lands acquired or to be acquired by the state as herein provided any commission, compensation or gratuity, and no town or county officer shall receive any compensation for services rendered to the department in connection with such acquisition.

§ 9-0503. Certificate of purchase; exemption from taxation.

Immediately upon acquiring by gift, purchase or appropriation lands for a reforestation area the commissioner shall transmit to the state agency authorized by law to approve assessments of state lands and to the Department of Audit and Control, respectively, a certificate which shall set forth, with respect to each parcel of such lands so acquired, a description thereof, the area in acres, from whom acquired, whether acquired by gift, purchase or appropriation, the price paid for such parcel in the case of a purchase (except as hereinafter provided), the date of the recording of the deed, if acquired by deed, the effective

date of the devise, if acquired by devise, and the assessed valuation of such parcels as shown by the assessment rolls of the town in which such parcel is located two years prior to the gift, if acquired by gift and separately assessed. If such a purchase shall include more than one parcel of such lands and it is impossible for the commissioner to determine the price paid for such parcel included in such purchase, he shall specify in such certificate the price paid for the entire tract purchased. Such lands shall be exempt from taxation only as provided in the Real Property Tax Law.

§ 9-0505. Sale of products from reforestation areas.

1. The commissioner, upon such terms as may be deemed by him to be for the best interests of the state and subject to the following rules and regulations, may sell the trees, timber and other products on any areas outside of the forest preserve counties heretofore or hereafter acquired by gift, purchase or appropriation and on any lands within the forest preserve counties, but outside of the Adirondack and Catskill parks as now fixed, or hereafter extended by law, heretofore or hereafter acquired pursuant to this section by the department. For the purposes of this section, the term "other products" shall also include, but not be limited to, the sap from maple trees.

2. All trees, timber or other products to be sold shall be plainly marked or otherwise designated prior to selling and no such material shall be removed from said land until paid for.

3. No such material shall be sold at less than the fair market value in the county or counties in which it is located. Fair market value shall be the value fixed by a department forester or other competent appraiser in a report made after an examination of the materials to be sold, provided such appraisal is approved by the commissioner. The commissioner shall have authority to sell such materials at not less than the value thus fixed and under such conditions as he may prescribe.

4. a. No sale of such materials appraised at ten thousand dollars or

more shall be made without public notice of sale, and after receipt of sealed bids which shall be opened only at the time and place specified in the notice of sale. Award shall be made only to the highest bidder.

b. The public notice of the sale of such materials shall be a notice describing the materials and location thereof, the date when and place where bids will be opened and the address at which said forms and specific details of the sale may be obtained. Such notice shall be printed in the Procurement Opportunity Newsletter, and in such other newspapers as will be most likely to give adequate notice of the sale of such materials, for such time and in such manner as shall be determined by the commissioner.

c. The state may reject all bids submitted if the highest bid is below the fair market value as determined above. No bids shall be withdrawn or cancelled until after the award shall have been made, but the state may reject any bids which do not conform to rules and regulations and may reject all bids and again advertise for bids in the manner herein provided if the interests of the state shall be promoted thereby. Each bidder with his bid shall deposit with the commissioner a certified check drawn upon some legally incorporated bank in this state or money for five per centum of the amount of his bid as a guarantee that he will enter into the contract of sale if it be awarded to him. Notice of the requirement of such deposit with the bid shall be embodied in the public notice for such letting and such notice shall also require the giving of a bond in such amount as the commissioner may prescribe for the faithful performance of the contract and for the indemnification of the state for any unnecessary injury to property of the state, forest growth or other materials not marked or otherwise designated for removal under such contract, which may result from the removal of the materials sold. In lieu of such bond the bidder may deposit cash or a certified check with the commissioner. The contract when awarded shall be executed in triplicate, one triplicate original shall be forthwith filed in the office of the commissioner, one together with the bond accompanying such contract in the office of the State Comptroller and one furnished to the contractor. The contractor shall present to the commissioner evidence that he is insured against all claims for workmen's compensation and

public liability.

d. For sales appraised at more than five hundred dollars and less than ten thousand dollars the commissioner, at a minimum, shall develop a local bid procedure to ensure that the public is aware of such sales and that such sales be awarded to the highest responsible bidder.

5. Notwithstanding any rule or regulation to the contrary, the commissioner shall be authorized to enter into contracts for the lease or use of state lands for the purpose of tree tapping and sap production for a term of up to, but not to exceed, ten years. For the purposes of this section, the terms "tree tapping" and "sap production" shall include trees and sap from species of trees including, but not limited to, maple.

§ 9-0507. Leasing of oil and gas rights on reforestation areas.

Notwithstanding any provisions of Article VII of the Public Lands Law to the contrary, the department, with the approval of the state geologist, may, in any lands acquired by the state in accordance with section 9-0501, enter into leases for the purpose of aiding in discovering and removing any oil or gas upon such lands or storage of gas or oil thereon, under such terms as may be prescribed by the department, and upon such conditions that the exercise of such leasehold rights shall not interfere with the operation of such reforestation areas for the purposes for which they were acquired and as defined in Section 3 of article XIV of the Constitution. Any lease made and entered into pursuant to this section shall be recorded in the Office of General Services.

§ 9-0509. Lease of land to federal government for use by the federal aviation agency.

1. Notwithstanding any contrary provision of this article, the department is hereby authorized upon such terms and conditions as it may

deem appropriate to lease to the federal government, for use by the federal aviation agency, the following described land:

From the United States Coast and Geodetic Survey Monument "SHED" located at Latitude North 42°-47'-21", Longitude West 75°-49'-37" proceed S 88°-15' E a distance of 325 feet to a point on the common property line between the lands of Howard Williams and the lands of the New York State Department of Environmental Conservation, said point being the Northeast corner of Lot 12, Proposal B, Reforestation Area 3, Madison County and also the point of beginning of the herein described area:

Thence S 8°-15' W a distance of 540.0 feet to a point;

Thence S 41°-15' W a distance of 565.0 feet to a point;

Thence N 36°-15' W a distance of 638.0 feet to a point;

Thence N 11°-15' E a distance of 535.0 feet to a point;

Thence S 83°-30' E a distance of 725.0 feet to a point of beginning, containing in all 14 acres more or less, all being situated in Lot 12, Proposal B, Reforestation Area 3, Madison County, State of New York. All bearings are magnetic.

2. The lease of the above described premises shall include the right to construct thereon a very high frequency omni-range navigation facility, together with the right to operate and maintain the same, with easements of access for laying, operating and maintaining utility lines in connection therewith.

TITLE 7

COOPERATIVE FOREST MANAGEMENT PROGRAM

Section 9-0701. Purpose of program.

9-0703. Forest regions.

9-0713. State assistance.

- 9-0715. Cooperating owner.
- 9-0717. Community forests.

§ 9-0701. Purpose of program.

In order that the practice of forestry may be encouraged, the damage caused by unplanned cutting may be avoided and the industries of the state dependent upon forest products may be stabilized as far as possible, the cooperative program provided in this title 7 is hereby authorized.

§ 9-0703. Forest regions.

The commissioner shall establish not to exceed nine forest regions of one or more counties each, which shall include all counties of the state.

§ 9-0713. State assistance.

The commissioner shall adopt forest practice standards. The department shall notify owners of forest land that the commissioner is prepared to assist cooperating owners in connection with the application of forest practice standards. The commissioner shall provide to cooperating forest and farm woodland owners technical services in connection with all phases of forest management including but not limited to, plantation establishment and care, the marking of timber, marketing assistance and silvicultural treatment of immature stands.

§ 9-0715. Cooperating owner.

A cooperating forest or farm woodland owner shall be an owner of forest land within a forest region who shall agree with the commissioner or his representative to comply with the approved forest practice

standards of the forest region, in which his land is located, for a specified period of time which may be extended from time to time by mutual consent and may be reduced to writing at the option of the commissioner. The failure of such owner to comply with the provisions of such agreement will relieve the commissioner and the state forthwith from the obligation to render to any such failing owner any state assistance provided for in section 9-0713. The commissioner may provide limited or sample services to non-cooperating owners with such owners' consent and without agreement.

§ 9-0717. Community forests.

1. Power and authority. A county, city, town, village, school district or any other political subdivision of the state, may acquire by purchase, or gift, or take over lands in its possession within the boundaries of the state and use the same for forestry purposes. The governing board of a county, city, town or school district may appropriate money for the purchase of lands for the purposes herein provided, to establish forest plantations or for the care and management of forests.

2. Procedure. Such boards may undertake such work at regular or special meetings by majority vote of such board after two weeks' public notice setting forth the fact that such plan is contemplated and that moneys are to be appropriated for such purposes.

3. Assistance and trees and shrubs. The department may assist and advise such boards in its reforestation and wildlife habitat improvement work, and the department may furnish trees and shrubs for planting such publicly owned lands without charge provided they are planted in accordance with the instructions of the department.

4. Use. Such governing board shall have full power and authority to acquire, maintain, manage and operate such forests, and sell the produce thereof, for the benefit of the inhabitants of its district.

5. Revenue. The net income from such lands shall be paid into the general fund of such municipal division and shall be used only upon order of its governing board.

TITLE 8

FOREST RESOURCES PLANNING

Section 9-0801. Legislative purpose and findings.

9-0803. Forest resources assessment.

9-0805. Forest resources plan.

9-0807. Committees.

9-0809. Public participation.

9-0811. Cooperation with federal agencies.

9-0813. Assistance from state agencies.

9-0815. Request for comment on local laws or ordinances pertaining to the practice of forestry.

§ 9-0801. Legislative purpose and findings.

It is the purpose of this act to provide for the development and maintenance of a forest resources planning program, consistent with article fourteen of the state constitution, in furtherance of the policy of the state of New York to conserve, improve and protect its natural resources and environment. The legislature recognizes that the needs and opportunities which affect the use, management and protection of the forest resources of the state are interrelated and require a comprehensive approach to issue resolution and policy development. To best serve the public interest, forest resources programs and efforts should be based upon periodic assessments and analyses of present and anticipated use, demand for, and supply of renewable forest resources from the public and private forest lands of the state. The department shall consult and cooperate with the Adirondack park agency in the preparation of those parts of the assessment and plan with respect to the forest resources of the Adirondack park. The legislature hereby designates the department of environmental conservation as the official state agency with the responsibility to plan for present and future

demands on the state's forest resources and declares that the department shall conduct a program of long range comprehensive forest resource planning which planning program shall include the periodic preparation of a forest resources assessment and the periodic development of a forest resources plan.

§ 9-0803. Forest resources assessment.

The department is authorized to carry out a comprehensive statewide assessment (hereinafter referred to as the assessment) of the present and anticipated future conditions of the forest resources of New York state. The initial assessment shall be prepared on or before September thirtieth, nineteen hundred eighty-six and subsequent assessments shall be prepared at least once every ten years. Assessments shall include but not be limited to the following:

1. an inventory of present supply of and demand for renewable forest resources;

2. an analysis of future supply of and demand for renewable forest resources; and

3. a description of present programs and responsibilities of all major organizations involved in the management of public and private forest resources.

The assessment will include all of the ecologic, sociologic, aesthetic, and economic data necessary to achieve the purposes of this act. The department shall develop and maintain an efficient system for collecting, storing, and analyzing these data, and shall prepare an assessment update at least once every five years.

§ 9-0805. Forest resources plan.

The department shall prepare a comprehensive statewide forest

resources plan. The plan shall be prepared no later than March thirtieth, nineteen hundred eighty-seven and shall be updated at least every fifth year thereafter. The plan shall include but not be limited to the following:

1. an inventory of significant forest resources issues, specific needs, and opportunities facing public and private forest resources;
2. an identification of alternative goals and strategies which address such issues, needs and opportunities and which propose specific actions to be taken; and
3. an identification of final recommended goals and strategies.

§ 9-0807. Committees.

The commissioner shall appoint an advisory committee and a technical review committee to assist directly in carrying out the provisions of this act by promoting a constructive interchange among agencies and organizations interested in planning for the use, management and protection of public and private forest resources and to enhance the prospect of common acceptance of plan recommendations.

1. The advisory committee membership shall be representative of forest resources related agencies and organizations in this state. The committee shall provide interdisciplinary review and analysis of policy development throughout the planning process. The committee shall meet at least annually and shall file a written annual report to the department and the legislature which report shall include a statement of progress made toward attaining the goals and objectives stated in the forest resource plan, recommendations for amendment of the plan and any other matter the committee deems necessary to be included. The members of the advisory committee shall not receive any remuneration except that the department may reimburse members thereof for reasonable expenses incurred in attending meetings.

2. The technical review committee membership shall be representative of the full range of expertise in use, management and protection of forest resources. The committee will provide scientific and technical review and analysis in development of the forest resources assessment. The members of the technical review committee shall not receive any remuneration except that the department may reimburse members thereof for reasonable expenses incurred in attending meetings.

§ 9-0809. Public participation.

To assure that all segments of the public have an opportunity to participate in the development of the plan, the planning program will be conducted with a structured program of public participation. The department shall establish procedures to keep the public informed about the planning process and to provide opportunities for the public to contribute to that process.

§ 9-0811. Cooperation with federal agencies.

To assure the availability and compatibility of planning data and federal assistance, the department shall cooperate with the United States department of agriculture, forest service, as provided for by the Forest and Rangeland Renewable Resources Planning Act of 1974 (16 USC 1601 et seq.) and the Cooperative Forestry Assistance Act of 1978 (16 USC 2101 et seq.). The department shall cooperate with any other federal agency that may be involved with planning for forest resources.

§ 9-0813. Assistance from state agencies.

The department is authorized to seek assistance from the professional staff of other state agencies when the expertise of the staff of such other state agency is needed for the development of the plan. Nothing in this title shall alter or supercede section eight hundred one of the executive law.

§ 9-0815. Request for comment on local laws or ordinances pertaining to the practice of forestry.

The commissioner upon his or her own initiative, or upon the written request of a municipality or an owner of forest land within the municipality, may elect to comment upon a proposed local law or ordinance which may restrict the practice of forestry. The requesting municipality or owner of forest land shall provide, at a minimum, the full text of the proposed local law or ordinance to the commissioner with such request.

1. Upon receipt of such written request or upon the commissioner's determination to comment on a local law or ordinance, the commissioner shall notify the municipal legislative body, in writing, of the receipt date or the date of such determination.

2. An owner of forest land shall provide notice to the municipal legislative body proposing the local law or ordinance of a written request to the commissioner in the time, manner, and form as may be prescribed by the commissioner.

3. The commissioner, in preparing his or her comments for consideration by the municipality, may consider factors including, but not limited to, the impact of the proposed local law or ordinance upon the long-term viability of forests in the municipality and any modifications or alternatives which a municipality may undertake to minimize the impacts to the practice of forestry in preparing his or her comments.

4. The commissioner shall have forty-five days after receipt of an ordinance to provide his or her comments, if any, to the municipal legislative body proposing the law or ordinance. Any municipal legislative body shall defer the adoption of such local law or ordinance pending receipt of comments, if any, from the commissioner or the passage of forty-five days from the date of receipt of the proposed

local law or ordinance by the commissioner. The commissioner shall have the opportunity to respond only to the original proposal considered by the local governing body.

5. For purposes of this section, "forest land" shall mean land that is suitable to forest crop production.

TITLE 9

RECREATION

Section 9-0901. Jurisdiction of certain parks and reservations.

9-0903. Recreation facilities.

§ 9-0901. Jurisdiction of certain parks and reservations.

The department shall have care, custody, control and management of the Crown Point reservation in Essex county and Lake George battlefield park.

§ 9-0903. Recreation facilities.

1. The department shall have care, custody, control and management of the Lake George beach facility in Warren county, the Belleayre mountain ski center in Ulster and Delaware counties, the Whiteface mountain ski center and the New York world war veterans memorial highway in Essex county and the Gore mountain ski center and the Prospect Mountain Veteran's Memorial Highway in Warren county. The New York world war veterans memorial highway in Essex county and the Prospect Mountain Veteran's Memorial Highway in Warren county shall continue to be maintained by the Department of Transportation.

2. The commissioner shall have the power and is authorized to impose and provide for the collection of such fees or charges as he may deem necessary and for the best interests of the state for the use of all facilities and their appurtenances. All moneys received therefrom shall

be deposited in the State Treasury pursuant to the provisions of the State Finance Law.

3. The department shall have the supervision and jurisdiction over all locks and adjacent state property between the Saranac river and lower Saranac lake and between lower Saranac and middle Saranac lake in the county of Franklin and make such improvements and repairs thereto from time to time as may be necessary.

4. The commissioner shall have the power and is authorized to encourage investment by the private sector for the provision of equipment and capital improvements for concession facilities operated at the Belleayre Mountain ski center and the Gore Mountain ski center by entering into concession license agreements for extended periods not to exceed ten years in total. Such extended term shall be for the purpose of assuring a concessionaire of adequate protection against loss of investment in structures, fixtures, equipment, supplies and other improvements, and the length of such term shall have a direct relationship to the period required to amortize the investment. The bid prospectus submitted to prospective bidders shall contain specific information concerning the nature of the capital improvements or equipment to be provided by the successful bidder.

TITLE 11

FOREST FIRE CONTROL

Section 9-1101. Proclamation by Governor.

9-1103. Additional powers of department.

9-1105. General prohibitions.

9-1107. Fire towns.

9-1109. Fire protection areas.

9-1111. Forest fire protection.

9-1113. Top lopping evergreen trees.

9-1115. Railroad patrol.

9-1117. Condition of rights of way.

9-1119. Use of protective devices.

9-1121. Fire moneys and accounts.

§ 9-1101. Proclamation by Governor.

Whenever the forests of the state are in danger of fire, the Governor by proclamation may (a) prohibit any person or persons from entering forests, woodlands, waters and open lands; (b) prohibit the starting of fires in the out-of-doors; (c) prohibit the smoking of tobacco in forests, woodlands and open lands and (d) suspend any open season for, or prohibit the taking of, fish, birds and quadrupeds. Such proclamation may contain exceptions to the activities prohibited, and may apply to all or a portion of the state. Such proclamation shall be in full force and effect at the expiration of 24 hours after notice is given in such manner as the Governor may determine and shall remain in full force until rescinded by the Governor.

§ 9-1103. Additional powers of the department.

In addition to the powers provided in section 9-0105 and in connection with the control of fire, the department shall have the power to:

1. Maintain a system of forest fire protection in such areas of the state as the department determines necessary.
2. Purchase necessary equipment, tools or supplies, employ men or incur other expenses as may be necessary to furnish adequate forest fire protection.
3. Establish, maintain, equip and operate forest fire observation stations, telephone lines or other structures therefor as the public interest requires.
4. Make contracts, agreements or purchases either for construction, operation or maintenance of telephone lines for fire protection purposes. Any telephone company may grant the state a preferred rate.

5. With consent of owner build or improve fire roads, ditches, trails or fire lines. No action for trespass shall lie on account of injury to private property on such account, if the act is performed in the protection of the forests from fire.

6. Appoint necessary employees to perform such duties as are required by this title 11.

7. Order removed from service, on forty-eight hours' notice, any railroad locomotive, operating in the fire towns, not properly equipped with fire protection devices.

8. Grant an extension of time in which owners may comply with section 9-1113 when the department is satisfied that such an extension of time will not endanger the forests to fire, but in no case shall an extension be granted for a period of more than six weeks from the time of cutting, except in connection with operations for the clearing of a reservoir site under the authority of section 15-1507.

9. Relieve railroads from maintaining railroad fire patrol, or clearing right of way when in the judgment of the department the absence of such patrol or clearing will not subject the forests to fire menace.

10. Request the Public Service Commission to hear and determine whether any railroad, person or company operating railroad locomotives through forest land is using such devices and precautions against the setting of forest fires, as the public interest requires.

11. Designate persons who shall have authority to issue permits as required by subdivision 5 of section 9-1105.

12. Enter into working agreements with land owners for the purpose of securing better forest fire protection in the fire towns.

13. Make rules and regulations to secure better fire protection within all or any portion of those areas designated as fire districts under

subdivision 2 of section 9-1109 or defined as fire towns by section 9-1107.

§ 9-1105. General prohibitions.

1. The following are prohibited:

(a) setting of fires on or near forest land and leaving such fires unattended and unquenched;

(b) setting of a fire which will endanger the property of another;

(c) setting of forest land on fire except where necessary to implement any provision of this chapter, including, but not limited to, paragraph v of subdivision two of section 3-0301 of this chapter; provided, however, that nothing contained in this paragraph shall permit the setting on fire of any land constituting the forest preserve or of any state land within the Adirondack Park or the Catskill Park for any purpose other than fire suppression. The department shall promulgate regulations governing the use of fire which shall include provisions for notification of, or waiver of notification by, local fire officials;

(d) setting of a permitted fire in or near forest land without all inflammable material having first been removed for a distance of 3 feet around the fire;

(e) the dropping, throwing or otherwise scattering of lighted matches, burning cigars, cigarettes or tobacco on forest land;

(f) the defacing, destruction or removal of any posted notice containing forest fire warnings, laws or rules and regulations.

2. It shall be unlawful to deposit, and leave in any of the fire towns, or in any town included in a fire district as defined in subdivision 2 of section 9-1109 of this title, brush or inflammable material upon the right of way of highways.

3. No device for generating power which burns wood, coke, lignite or coal shall be operated in, through or near forest land, unless the escape of sparks, cinders or coals shall be prevented in such manner as may be required by the department.

4. In any of the fire towns, or in any town included in a fire district as defined in subdivision 2 of section 9-1109, brush, logs, slash or other inflammable material shall not be left or allowed to remain on land within 25 feet of the right of way of a railroad or within 20 feet of the right of way of a public highway.

5. It shall be unlawful to set or cause to be set or sustain any open fire for purpose of burning logs, leaves, sawdust, slabs, brush, stumps, dry grass or other debris, in any of the fire towns, without first having obtained from the department a written permit so to do.

6. Prescribed burns. (a) For the purposes of this subdivision, the term "prescribed burn" shall mean the intentional setting of forest land on fire, under carefully controlled conditions, in order to manage, enhance, or restore populations of plants or animal species or natural communities on such land.

(b) Notwithstanding the provisions of this section or any other provision of law, the department may authorize a landowner to conduct prescribed burn activities pursuant to a written prescribed burn management plan prepared by or for such landowner. The prescribed burn management plan shall include, but not be limited to, the following elements:

(i) a discussion of the landowner's training and expertise in conducting prescribed burn activities;

(ii) a map and narrative description identifying the area or areas on which prescribed burn activities will be undertaken;

(iii) a description of the ecological purposes and objectives of the prescribed burn, including an identification of the specific species or natural communities that are intended to be impacted by the burn;

(iv) a description of the vegetative cover and fuel loads on each area to be subjected to prescribed burning;

(v) a description of physical parameters, such as time of year, wind speed and direction, and air temperature and humidity, which must be met before a prescribed burn is initiated;

(vi) a description of the anticipated intensity and duration of the prescribed burn given the fuel loads and physical prescriptions established in subparagraphs (iv) and (v) of this paragraph;

(vii) a description of the logistics of the prescribed burn operation, number of personnel, and fire management equipment that will be deployed to assure that the burn is restricted to the area or areas identified for prescribed burn management;

(viii) a description of fire suppression activities to be immediately implemented should the prescribed burn threaten to escape, or actually escape, beyond the boundaries identified for such burn;

(ix) a procedure for notifying appropriate local fire officials and law enforcement personnel of the actual date, time, and estimated duration of any prescribed burn;

(x) a procedure for notifying adjacent landowners prior to the undertaking of a prescribed burn;

(xi) a description of the procedures that will be undertaken to assure that the prescribed burn is fully extinguished at the conclusion of the burn.

(c) The department shall promulgate regulations implementing this subdivision prior to authorizing any landowner to undertake prescribed burn activities. Such regulations shall include, but not be limited to, a listing of the necessary elements of the prescribed burn management plan, and standards for determining whether a request for authorization to conduct prescribed burn activities should be granted.

(d) The department shall reject any application for authorization to conduct a prescribed burn pursuant to this subdivision if the department determines that the landowner has not demonstrated the necessary expertise to properly implement the prescribed burn plan.

(e) Before granting a landowner authorization to conduct prescribed burn activities, the department shall give the chief or other official in charge of the fire department or company within whose territorial jurisdiction the proposed prescribed burn is located an opportunity to review and comment on the written prescribed burn management plan.

(f) No burning shall be prescribed under this subdivision within seventy-five feet of the boundary of a landowner's property without the written approval of the adjacent landowner. In addition, the department may prohibit burning in a buffer zone in excess of seventy-five feet from the boundary of an adjacent property owner if specific conditions at the site warrant such buffer.

§ 9-1107. Fire towns.

The following towns, including the area within the boundaries of incorporated villages, are hereby designated as "fire towns": All towns in Essex and Hamilton counties; the towns of Altona, Ausable, Black Brook, Dannemora, Ellenburg and Saranac, Clinton county; the towns of Andes, Colchester, Hancock and Middletown, Delaware county; the towns of Altamont, Belmont, Brighton, Duane, Franklin, Harrietstown, Santa Clara and Waverly, Franklin county; the towns of Bleecker, Caroga, Mayfield, Northampton and Stratford, Fulton county; the towns of Hunter, Jewitt, Lexington and Windham, Greene county; the towns of Ohio, Russia, Salisbury and Webb, Herkimer county; the towns of Crogham, Diana, Grieg, Lyonsdale and Watson, Lewis county; the towns of Forestport and Remsen, Oneida county; the towns of Corinth, Day, Edinburg and Hadley, Saratoga county; the towns of Clare, Clifton, Colton, Fine, Hopkinton, Parishville, Piercefield, Pitcairn, Saint Lawrence county; the towns of Neversink, Rockland, Sullivan county; the towns of Denning, Gardiner, Hardinburgh, Olive, Rochester, Shandaken, Shawangunk, Wawarsing and Woodstock, Ulster county; the towns of Bolton, Chester, Hague, Horicon, Johnsburch, Lake George, Luzerne, Queensbury, Stoney Creek, Thurman and Warrensburgh, Warren county; the towns of Dresden, Fort Ann and Putnam, Washington County.

§ 9-1109. Fire protection areas.

Facilities for protection against forest fire shall be available as follows:

1. In fire towns. The department, for the prevention of forest fires and the extinguishment of fires burning or threatening forests, shall, in the fire towns defined in section 9-1107, maintain an approved fire protection system, including fire observation stations and other equipment necessary to prevent and extinguish forest fires.

2. In forest fire districts. The department may establish a forest

fire protective system in such other parts of the state as it may deem necessary. In such regions the department may maintain an approved fire protection system, including fire observation stations and other equipment necessary to prevent and extinguish forest fires.

§ 9-1111. Forest fire protection.

1. Towns adjacent to fire towns and fire districts. The department may when necessary in its judgment, in order to protect the forests in the fire towns and fire districts from fire, take steps to extinguish fires actually burning in any town adjacent to a fire town or district.

2. Impressing fire fighting assistance. Any department employee or any other officer charged by the department with the duty of fire fighting shall, notwithstanding the provisions of any other law to the contrary or in conflict herewith, have the power to summon and hire for the purpose of fighting fires any person who shall have attained sixteen years of age, and to incur other expenses deemed necessary to the extinguishment of particular fires.

3. Additional protection by towns in Suffolk county. Any town in the county of Suffolk may appropriate not exceeding the sum of one thousand dollars in any one year without the vote of town meeting for the purpose of purchasing equipment and establishing fire patrols for the prevention of forest fires within any such town. The patrols and equipment shall be under the direction and supervision of the town board. Moneys appropriated pursuant to this subdivision shall be assessed, levied and collected in the same manner as moneys for other town charges are assessed, levied and collected.

§ 9-1113. Top lopping evergreen trees.

Every person who shall, within any of the fire towns or within any fire district or part thereof when so designated by department regulation, fell or cause to be felled or permit to be felled any

evergreen tree for sale or other purposes or engage in salvaging any blown down evergreen tree shall cut off or cause to be cut off from the tree at the time of felling or salvaging the tree, unless otherwise authorized by the department before the trees are felled or salvaged, all the limbs thereof up to a point where the trunk of the tree has a longest diameter which does not exceed three inches, unless the tree be felled or salvaged for use with the limbs thereon.

§ 9-1115. Railroad patrol.

All railroads shall, on such parts of their rights of way as are operated through forest lands, maintain from April first to November fifteenth of each year a sufficient number of competent fire patrolmen unless relieved by the department. The railroad shall file in the office of the department on or before April first of each year a complete list of such patrol indicating the names of the persons, their post-office address and portion of right of way assigned to each patrolman. If any changes are subsequently made similar data shall be furnished the department.

§ 9-1117. Condition of rights of way.

1. The railroad right of way of all railroads which are operated through forest lands shall be kept cleared of all inflammable material whenever required by the department.

2. Fire, live coals or hot ashes shall not be deposited unless properly protected upon any track or railroad right of way on or near forest land.

§ 9-1119. Use of protective devices.

1. Employees of a railroad which operates through forest lands shall at all times use in a proper and effective manner the fire protective

appliances provided by such railroad.

2. No locomotive operating through forest lands shall be operated unless equipped with fire protective devices of ash pan and front end which have been approved by the department. Such devices shall be maintained and properly used.

§ 9-1121. Fire moneys and accounts.

In order to carry into effect the provisions of this title the following is prescribed:

1. Temporary loan. The State Comptroller shall have, subject to the approval of the Governor, the authority to make, on behalf of the state a temporary loan not exceeding one hundred thousand dollars in any fiscal year, for the use of the department in protecting the forests and extinguishing fires as provided by title 11 of this article upon the certification of the department that any emergency exists whereby through insufficiency of appropriations it is found to be impossible to protect the forests from fire. The Comptroller shall thereupon borrow such sums as may be directed by the Governor for such purposes and shall report such transactions to the legislature which shall thereupon appropriate the moneys borrowed. Section 41 of the State Finance Law shall not apply to any indebtedness so incurred.

2. Payment of fire bills. All salaries and other expenses incurred by the department and its employees in protecting the forests from fire shall be paid by the state.

3. Rebate by counties. The full expense incurred by a town supervisor acting as superintendent of fires as provided in subdivision twelve of section twenty-nine of the town law and paid by the town in extinguishing fires actually burning except salaries and expenses of regular employees shall be a charge upon the county in which the fire burned provided that the county has within its borders any fire town or fire district as provided in subdivision 1 or 2 of section 9-1109 of

this title and provided that no part of the expenses incurred in extinguishing fires on Indian reservations located in Cattaraugus or Suffolk county shall be a charge upon or payable by such counties. The supervisors acting as superintendents of fires shall on or before September first, of each year, transmit to the clerk of the board of supervisors or county legislative body of each county in which such expense of extinguishing fires was incurred, a summary statement of expenses incurred together with the amount charged against the county, except that a detailed statement of expenses shall be furnished for any designated fire or fires when so requested by a county. The clerk shall thereupon cause the amount due to the town to be included in the budget and levied upon the taxable property of such county at the same time and in the same manner as other county charges, and the amount due the town so levied shall be paid by the County Treasurer, on or before May first following the levy thereof to the town supervisor according to such claim.

4. May pay accounts. If any person incurs expenses fighting forest fires in a fire town, or in a town included in a fire district as defined in subdivision 2 of section 9-1109, the department may upon the receipt of satisfactory proof and accounts filed in its offices within sixty days from the time the expense was incurred audit and pay all or such portion thereof as in its judgment the public interest requires.

5. Recovery of expenses. Any moneys necessarily expended by the state, a municipality, or any person in fighting forest fires may be sued for by the state, municipality or person expending the same and recovered from the person causing the fire. Such actions may be maintained in addition to other actions for damages or penalties and may be demanded in the same or separate actions.

6. Certain towns raise fire fund. Towns other than fire towns may raise necessary funds for prevention and extinguishment of forest fires in their towns either by levy or pursuant to the Local Finance Law.

7. Advance by Comptroller. Upon request of the department, the Comptroller may advance a sum, not to exceed five thousand dollars at

any time, to the department for the purpose of facilitating payment of fire accounts.

§ 9-1123. Northeastern Interstate Forest Fire Protection Compact.

The Northeastern Interstate Forest Fire Protection Compact as first enacted by chapter seven hundred forty-four of the laws of nineteen hundred forty-nine, and as re-enacted by chapter two hundred sixty-three of the laws of nineteen hundred sixty-three, is hereby continued as follows:

NORTHEASTERN INTERSTATE FOREST FIRE PROTECTION COMPACT

Article I

The purpose of this compact is to promote effective prevention and control of forest fires in the northeastern region of the United States and adjacent areas in Canada by the development of integrated forest fire plans, by the maintenance of adequate forest fire fighting services by the member states, by providing for mutual aid in fighting forest fires among the states of the region and for procedures that will facilitate such aid, and by the establishment of a central agency to coordinate the services of member states and perform such common services as member states may deem desirable.

Article II

This agreement shall become operative immediately as to those states ratifying it whenever any two or more of the states of Maine, New Hampshire, Vermont, Rhode Island, Connecticut, New York and the Commonwealth of Massachusetts have ratified it and the congress has given its consent. Any state not mentioned in this article which is contiguous with any member state may become a party to this compact. Subject to the consent of the congress of the United States, any province of the Dominion of Canada which is contiguous with any member state may become a party to this compact by taking such action as its laws and the laws of the Dominion of Canada may prescribe for ratification. In this event, the term "state" in this compact shall include within its meaning the term "province" and the procedures

prescribed shall be applied in the instance of such provinces, in accordance with the forms and practices of the Canadian government.

Article III

Each state joining herein shall appoint three representatives to a commission hereby designated as the Northeastern Forest Fire Protection Commission. One shall be the state forester or officer holding an equivalent position in such state who is responsible for forest fire control. The second shall be a member of the legislature of such state designated by the commission or committee on interstate cooperation of such state, or if there be none, or if said commission on interstate cooperation cannot constitutionally designate the said member, such legislator shall be designated by the governor thereof; provided that if it is constitutionally impossible to appoint a legislator as a commissioner from such state, the second member shall be appointed by the governor of said state in his discretion. The third member shall be a person designated by the governor as the responsible representative of the governor. In the event that any province of the Dominion of Canada shall become a member of this commission, it shall designate three members who will approximate this pattern of representation to the extent possible under the law and practices of such province. This commission shall be a body corporate with the powers and duties set forth herein.

Article IV

It shall be the duty of the commission to make inquiry and ascertain from time to time such methods, practices, circumstances and conditions as may be disclosed for bringing about the prevention and control of forest fires in the area comprising the member states, to coordinate the forest fire plans and the work of the appropriate agencies of the member states and to facilitate the rendering of aid by the member states to each other in fighting forest fires.

The commission shall formulate and, in accordance with need, from time to time, revise a regional forest fire plan for the entire region covered by the compact which shall serve as a common forest fire plan for that area.

The commission shall, more than one month prior to any regular meeting of the legislature in any signatory state, present to the governor and to the legislature of the state its recommendations relating to enactments to be made by the legislature of that state in furthering the interests and purposes of this compact.

The commission shall consult with and advise the appropriate administrative agencies of the states party hereto with regard to problems connected with the prevention and control of forest fires and recommend the adoption of such regulations as it deems advisable.

The commission shall have power to recommend to the signatory states any and all measures that will effectuate the prevention and control of forest fires.

Article V

Any two or more member states may designate the Northeastern Forest Fire Protection Commission as a joint agency to maintain such common services as those states deem desirable for the prevention and control of forest fires. Except in those cases where all member states join in such designation for common services, the representatives of any group of such designating states in the Northeastern Forest Fire Protection Commission shall constitute a separate section of such commission for the performance of the common service or services so designated provided that, if any additional expense is involved, the states so acting shall appropriate the necessary funds for this purpose. The creation of such a section as a joint agency shall not affect the privileges, powers, responsibilities or duties of the states participating therein as embodied in the other articles of this compact.

Article VI

The commission may request the United States forest service to act as the primary research and coordinating agency of the Northeastern Forest Fire Protection Commission, in cooperation with the appropriate agencies in each state and the United States forest service may accept the initial responsibility in preparing and presenting to the commission its

recommendations with respect to the regional fire plan. Representatives of the United States forest service may attend meetings of the commission and of groups of member states.

Article VII

The commission shall annually elect from its members a chairman and a vice-chairman. The commission shall appoint such officers or employees as may be required to carry the provisions of this compact into effect, shall fix and determine their duties, qualifications and compensation, and may at its pleasure, remove or discharge any such officer or employee. The commission shall adopt rules and regulations for the conduct of its business. It may establish and maintain one or more offices for the transaction of its business and may meet at any time or place but must meet at least once a year.

A majority of the members of the commission representing a majority of the signatory states shall constitute a quorum for the transaction of its general business, but no action of the commission imposing any obligation on any signatory state shall be binding unless a majority of the members from such signatory state shall have voted in favor thereof. For the purpose of conducting its general business, voting shall be by state units.

The representatives of any two or more member states, upon notice to the chairman as to the time and purpose of the meeting, may meet as a section for the discussion of problems common to those states.

Sections established by groups of member states shall have the same powers with respect to officers, employees and the maintenance of offices as are granted by this article to the commission. Sections may adopt such rules, regulations and procedures as may be necessary for the conduct of their business.

Article VIII

It shall be the duty of each member state to formulate and put in effect a forest fire plan for that state and to take such measures as may be recommended by the commission to integrate such forest fire plan

with the regional forest fire plan.

Whenever the state forest fire control agency of a member state requests aid from the state forest fire control agency of any other member state in combatting, controlling or preventing forest fires, it shall be the duty of the state forest fire control agency of that state to render all possible aid to the requesting agency which is consonant with the maintenance of protection at home.

Each signatory state agrees to render aid to the forest service or other agencies of the government of the United States in combatting, controlling or preventing forest fires in areas under their jurisdiction located within the member state or a contiguous member state.

Article IX

Whenever the forces of any member state are rendering outside aid pursuant to the request of another member state under this compact, the employees of such state shall, under the direction of the officers of the state to which they are rendering aid, have the same powers (except the power of arrest), duties, rights, privileges and immunities as comparable employees of the state to which they are rendering aid.

No member state or its officers or employees rendering outside aid pursuant to this compact shall be liable on account of any act or omission on the part of such forces while so engaged, or on account of the maintenance or use of any equipment or supplies in connection therewith.

All liability that may arise either under the laws of the requesting state or under the laws of the aiding state or under the laws of a third state on account of or in connection with a request for aid, shall be assumed and borne by the requesting state.

Any member state rendering outside aid pursuant to this compact shall be reimbursed by the member state receiving such aid for any loss or damage to, or expense incurred in the operation of any equipment answering a request for aid, and for the cost of all materials,

transportation, wages, salaries, and maintenance of employees and equipment incurred in connection with such request. Provided, that nothing herein contained shall prevent any assisting member state from assuming such loss, damage, expense or other cost or from loaning such equipment or from donating such services to the receiving member state without charge or cost.

Each member state shall provide for the payment of compensation and death benefits to injured employees and the representatives of deceased employees in case employees sustain injuries or are killed while rendering outside aid pursuant to this compact, in the same manner and on the same terms as if the injury or death were sustained within such state.

For the purposes of this compact the term employee shall include any volunteer or auxiliary legally included within the forest fire fighting forces of the aiding state under the laws thereof.

The commission shall formulate procedures for claims and reimbursement under the provisions of this article.

Aid by a member state to an area subject to federal jurisdiction beyond the borders of such state shall not be required under this compact unless substantially the same provisions of this article relative to powers, liabilities, losses and expenses in connection with such aid are embodied in federal laws.

Article IX-A

The provisions of article IX of this compact which relate to mutual aid in combating, controlling or preventing forest fires shall be operative as between any member state and any other state which is party to a regional forest fire protection compact in another region; provided that the legislature of such other state shall have given its consent to such mutual aid provisions of this compact.

Article X

When appropriations for the support of this commission or for the

support of common services maintained by the commission or a section thereof under the provisions of article V are necessary, the commission or section thereof shall allocate the costs among the states affected with consideration of the amounts of forested land in those states that will receive protection from the service to be rendered and the extent of the forest fire problem involved in each state, and shall submit its recommendations accordingly to the legislatures of the affected states.

The commission shall submit to the governor of each state, at such time as he may request, a budget of its estimated expenditures for such period as may be required by the laws of such state for presentation to the legislature thereof.

The commission shall keep accurate books of account, showing in full its receipts and disbursements, and said books of account shall be open at any reasonable time to the inspection of such representatives of the respective signatory states as may be duly constituted for that purpose.

On or before the first day of December of each year, the commission shall submit to the respective governors of the signatory states a full and complete report of its activities for the preceding year.

Article XI

The representatives from any member state may appoint and consult with an advisory committee composed of persons interested in forest fire protection.

The commission may appoint and consult with an advisory committee of representatives of all affected groups, private and governmental.

Article XII

The commission may accept any and all donations, gifts and grants of money, equipment, supplies, materials and services from the federal or any local government, or any agency thereof and from any person, firm or corporation, for any of its purposes and functions under this compact, and may receive and utilize the same subject to the terms, conditions and regulations governing such donations, gifts and grants.

Article XIII

Nothing in this compact shall be construed to authorize or permit any member state to curtail or diminish its forest fire fighting forces, equipment, services or facilities, and it shall be the duty and responsibility of each member state to maintain adequate forest fire fighting forces and equipment to meet normal demands for forest fire protection within its borders.

Nothing in this compact shall be construed to limit or restrict the powers of any state ratifying the same to provide for the prevention, control and extinguishment of forest fires, or to prohibit the enactment or enforcement of state laws, rules or regulations intended to aid in such prevention, control and extinguishment in such state.

Nothing in this compact shall be construed to affect any existing or future cooperative relationship or arrangement between the United States forest service and a member state or states.

Article XIV

1. This compact shall continue in force and remain binding on each state ratifying it until the legislature or the governor of such state takes action to withdraw therefrom. Such action shall not be effective until six months after notice thereof has been sent by the chief executive of the state desiring to withdraw to the chief executive of all states then parties to the compact.

2. The original notice of ratification received from the governor or other duly authorized official of any state or province joining in the compact shall be filed with the official copy of the compact in the office of the secretary of state of this state, and such notice, if any, as may be received from the president or the congress of the United States, signifying the consent of the congress to the compact, shall be filed in the same manner.

3. Pursuant to article three of the compact the three representatives of this state on the Northeastern Forest Fire Protection Commission,

hereinafter called commissioners, shall be: an officer of the Department of Environmental Conservation designated by the Commissioner of Environmental Conservation; a member of the legislature who is also a member of the joint legislative committee on interstate cooperation, who shall be designated by said committee; and a citizen of the state designated by the Governor as his responsible representative to serve at the pleasure of the Governor. The commissioners shall have, exercise and perform, on behalf of the state of New York, all of the powers and duties conferred and imposed by the compact upon members of the Northeastern Forest Fire Protection Commission. They shall serve as such commissioners without compensation, but shall be reimbursed for their expenses, including travel and other expenses both within and without the state, actually and necessarily incurred by them in the performance of their duties under this section and such compact. Such expenses shall be payable on the audit and warrant of the Comptroller, on vouchers certified or approved by the Commissioner of Environmental Conservation in the manner prescribed by law, out of any moneys appropriated or available therefor to the Department of Environmental Conservation. The commissioners serving on the effective date of this section shall continue in office until their successors have qualified, or until otherwise ceasing to be commissioners pursuant to law.

4. The Comptroller of the state of New York is hereby authorized and empowered to examine from time to time the accounts and books of the commission, including its receipts, disbursements and such other items referring to its financial condition as he may deem proper and to report the results of such examinations to the Governor of this state.

5. a. The Northeastern Forest Fire Protection Commission shall submit annually, in accordance with the laws and practices of this state, to the Governor for study and consideration by him, an estimate of moneys required to administer, manage and support the commission. Such estimate shall include any request for appropriation of funds by New York and shall be accompanied by a tabulation of similar requests which the commission expects to make to each other member state and the formula or factors upon which such respective requests are based.

b. The Commissioner of Environmental Conservation shall be afforded an opportunity to comment on any budget request by the commission, and the commission shall be furnished with a copy of any such comments.

6. No provision of the Conservation Law and no provision of the Environmental Conservation Law, if such provision of the Environmental Conservation Law was derived from a provision of the Conservation Law, which is inconsistent with the provisions of the Northeastern Interstate Forest Fire Protection Compact shall be applicable to the commission or to any matter governed by the Northeastern Interstate Forest Fire Protection Compact.

7. On August 15, 1964 and at intervals of four years thereafter, the Commissioner of Environmental Conservation shall evaluate the role of the commission with respect to forest fire protection in New York and shall report to the commission thereon. The Commissioner of Environmental Conservation shall transmit a copy of such report to the Governor. The Commissioner of Environmental Conservation may make such additional reports to the commission and the Governor as he deems appropriate.

8. If any part or provision of this section or of the compact contained herein shall be adjudged unconstitutional by a court of competent jurisdiction, all other parts of this section or of such compact, as the case may be, shall nevertheless continue in full force and effect. If it shall be adjudged by a court of competent jurisdiction that any commissioner appointed pursuant to subdivision three of this article is disqualified from serving or is ineligible to serve as such commissioner for any reason or cause, such commissioner shall not thereby forfeit any other public office then held by him or any of the emoluments thereof and the vacancy on the commission thereby created shall be filled by the Governor by the appointment of a citizen and resident of this state not subject to such disqualification or ineligibility.

FOREST INSECT AND DISEASE CONTROL

Section 9-1301. White pine blister rust and currant rust.

9-1303. Forest insects and other forest tree diseases.

§ 9-1301. White pine blister rust and currant rust.

For the purpose of suppressing and controlling white pine blister rust and currant rust (*Cronartium ribicola*), the following provisions shall apply:

1. Certain cultivars of black currant declared a public nuisance. Unless otherwise provided for by this section, the planting, growing, propagating, cultivating, or selling plants, roots, or cuttings of any species of cultivated black currants (*Ribes nigrum*) other than cultivars that are immune or resistant to white pine blister rust or currant rust is hereby prohibited in this state; provided, however, that the planting, growing, propagating, cultivating, or selling plants, roots or cuttings of any species of cultivated black currants is authorized in all fruiting currant districts or potentially fruiting currant districts. Such unauthorized bushes, roots, cuttings, or plants may be destroyed by the agents of the department.

2. Fruiting currant districts and potential fruiting currant districts defined. Districts where the growing of all species of currants, including black currants, for the production of fruit is carried on and is a commercial enterprise or a potentially important commercial enterprise shall be determined and designated as "fruiting currant districts" or "potential fruiting currant districts", and in such districts the provisions of subdivision three of this section shall apply. The location and extent of such districts shall be determined by the department and the state department of agriculture and markets.

3. No measures for the control of white pine blister rust shall be undertaken by the department within the boundaries of designated fruiting currant districts or potential fruiting currant districts.

4. Control measures outside of fruiting currant districts or potential fruiting currant districts. Whenever such action is desirable as a means of controlling white pine blister rust or currant rust, the department or its duly authorized agents may eradicate any unauthorized plants of the genus *Ribes* (currants and gooseberries), either wild or cultivated, except within nurseries which are annually certified by the state department of agriculture and markets to be free from disease. Owners shall remove from their lands, subject to the direction and the approval of the duly authorized agents of the department, the plants of the genus *Ribes* within a distance of not more than 900 feet of the white pine on the land of adjoining owners who have protected their white pine from white pine blister rust. If any owner, upon not less than thirty days' notice in writing, fails to destroy unauthorized *Ribes* on his or her property as provided in this subdivision, the commissioner may cause such plants to be destroyed, and the expense of such work shall be a charge against the owner, which shall constitute a lien upon the land.

5. Quarantine regulations. The department shall have the authority, by order, to establish quarantine districts in any part or parts of the state. In such districts, it may prohibit the possession of any five-leafed pine trees or plants of the genus *Ribes* (currants and gooseberries), or so much thereof as is deemed necessary. It may also prohibit the transportation of any plants, roots, or cuttings of the genus *Ribes* (currants and gooseberries) from or to any quarantine district within the state, or from any diseased area or locality in which the disease exists outside of the state to any point within the state. Such prohibitions shall be effective on and after the tenth day from the date of the order made with respect thereto. On the making of such order, the department shall cause a certified copy of the same to be filed in the office of the clerk of each county affected by such quarantine and shall give such other notice thereof as it may deem necessary. The provisions of this subdivision shall not apply to undiseased cultivated plants or to the fruit of diseased plants of the genus *Ribes* (currants and gooseberries) included within fruiting currant districts or potential fruiting currant districts or to the merchantable contents of any pine trees; provided that any diseased part thereof is first destroyed.

6. Diseased trees or plants defined. A plant of the genus *Ribes* which is visibly infected by *Cronartium ribicola* or any five-leaved pines upon which white pine blister rust has been found growing shall be construed to be and be, within the meaning of this section only, a diseased plant, and, as such, may be destroyed without compensation under the provisions of this section.

7. Authority to eradicate and compensation. Agents or employees of the department may enter upon any land to carry out the provisions of this section if proper precautionary measures are taken by them to prevent the spread of this disease, and no action for trespass shall lie therefor. Fair compensation shall be allowed for all undiseased trees or undiseased cultivated *Ribes* destroyed, except for prohibited varieties of cultivated black currants (*Ribes nigrum*) located outside of a fruiting currant district or potential fruiting currant district. No compensation shall be paid by the state for any species of *Ribes* destroyed in connection with the establishment of a *Ribes*-free zone around commercial nurseries, but fair compensation for such *Ribes* must be paid by the person owning or operating the nursery protected by such destruction of bushes. The rate of fair compensation shall be determined by the commissioner of agriculture and markets or a committee appointed by him or her. If the commissioner of agriculture and markets determines to appoint a committee for the purpose of making such determination, such committee shall be appointed prior to May 1 in each year.

§ 9-1303. Forest insects and other forest tree diseases.

For the purpose of control and preventing the spread of forest insects and forest tree diseases (except white pine blister rust and currant rust, covered by section 9-1301) the following provisions shall apply:

1. The department may enter into cooperative agreements with any other state, the federal government, any foreign government, any municipal subdivision of New York state or private individuals in order to obtain proper working agreements.

2. The department may accept and expend gifts of money for control and prevention work.

3. The department may conduct necessary investigations for the purpose of discovering better methods of control or prevention of spread of forest insects and forest tree diseases either within or without the state.

4. Duly authorized agents of the department may enter upon any lands for the purpose of determining if such property is infested with forest insects or forest tree diseases, and the extent of such infestation.

5. The department shall have the authority by order to establish quarantine districts in any part or parts of the state, and to prohibit the movement of materials which may be harboring forest insects or forest tree diseases in any of their different forms. On the making of such an order, the department shall cause a certified copy of the same to be filed in the office of the clerk of each county, affected by such quarantine, and shall give such other notice thereof as it may deem necessary. Such order shall be effective on and after the tenth day from the filing thereof.

6. The department shall have discretionary authority to poison forest areas in or near sections infested by insect pests or forest tree diseases.

7. The department may take steps to establish barrier or protective zones for the purpose of preventing the spread of forest insect and disease pests, and in so doing shall have the authority and right to enter upon private lands for this purpose, and thereon make such modifications in the composition of the forest growth as it may deem necessary. In such barrier or protective zones trees or other vegetation may be sprayed, cut, destroyed, or otherwise treated when in the judgment of the department, the same may be necessary, but the owner of the property shall be entitled to a just compensation for damage done through the acts of such agents, except that no compensation shall be

paid for the destruction of infested trees.

8. The department shall have power to ascertain the amount of damage done upon lands of private owners by the acts of the agents of the department in establishing and maintaining barrier zones, by having an agent of the department appraise the same. If the owner is not satisfied with the amount of damage as fixed by such appraisal, he may, within six months after service upon him of a copy of such appraisal, take an appeal therefrom to the Court of Claims, which court is hereby authorized to pass upon the questions involved and determine the amount due such owner.

9. The department may by order make rules and regulations governing any and all operations designed for the purpose of preventing the spread of or for the purpose of controlling forest insects and forest tree diseases, their pupae, eggs and caterpillars, and plants or trees infested by them, all of which are hereby declared a public nuisance. Such rules and regulations shall become effective in any county on and after the tenth day from the filing of a certified copy in the office of the clerk of that county.

10. No action for trespass shall lie on account of entry on private lands by an agent of the department for the exercise of any power authorized by this section.

11. No person shall wilfully resist or obstruct the work of any agents duly employed by the department, engaged in the suppression of forest insects or forest tree diseases.

12. The department shall have the authority to incur expenses in connection with the training of persons at points outside of the state of New York, if the same is deemed by it necessary.

TITLE 15

REMOVAL OF TREES AND PROTECTED PLANTS

Section 9-1501. Removal of trees.

9-1503. Removal of protected plants.

§ 9-1501. Removal of trees.

No person shall cut, pull or dig up for the purpose of removal, injure or destroy or cause to be so removed, injured or destroyed, any tree on the lands of another without consent of the owner. Any peace officer, acting pursuant to his or her special duties, or police officer may enforce the provisions of this section.

§ 9-1503. Removal of protected plants.

1. For the purposes of this section, "plants" shall mean species of native shrubs, trees, herbs, ferns, fern-allies and wild flowers; "endangered species" shall mean those species of plants in danger of extinction throughout all or a significant portion of their ranges within the state, and requiring remedial action to prevent such extinction; "threatened species" shall mean those species of plants that are likely to become endangered within the foreseeable future throughout all or a significant portion of their ranges within the state; "rare species" shall mean those species of plants that have small populations within their ranges in the state, and "exploitably vulnerable species" shall mean those species of plants that are likely to become threatened in the near future throughout all or a significant portion of their ranges within the state if causal factors continue unchecked.

2. The department may, by rule and regulation, promulgate and adopt a list or lists of protected plants which by reason of their endangered, rare, threatened or exploitably vulnerable status should not be picked or removed from their natural habitat. In promulgating and adopting such list or lists the department shall consult with and cooperate with the departments of agriculture and markets and education and other affected public or private organizations. Plants included in such list or lists may be so included for purposes of the entire state or portions thereof. Such list or lists may be modified in whole or in part through the

institution of a permit or waiver-issuing procedure.

3. No person shall, in any area designated by such list or lists, knowingly pick, pluck, sever, remove, damage by the application of herbicides or defoliants or carry away, without the consent of the owner thereof, any protected plant. An offense under this section shall be a violation, punishable by a fine of not to exceed twenty-five dollars.

4. The department is authorized to regulate the harvesting, collection, sale, and exportation of American ginseng (*Panax quinquefolius*) plants, roots and cuttings. The department is further authorized to promulgate rules and regulations to implement the authority conferred herein.

TITLE 17

NEW YORK INVASIVE SPECIES COUNCIL

Section 9-1701. Legislative findings.

9-1703. Definitions.

9-1705. New York invasive species council.

9-1707. New York invasive species advisory committee.

9-1709. General powers and duties of the department.

9-1710. Aquatic invasive species; spread prevention.

9-1711. Aquatic invasive species inspection stations in the Adirondack park.

§ 9-1701. Legislative findings.

The legislature finds that invasive plant and animal species pose an unacceptable risk to New York state's environment and economy and that this risk is increasing through time as more invasive species become established within the state. The legislature additionally finds that invasive species are having a detrimental effect upon the state's fresh and tidal wetlands, water bodies and waterways, forests, agricultural lands, meadows and grasslands, and other natural communities and systems by out-competing native species, diminishing biological diversity,

altering community structure and, in some cases, changing ecosystem processes. Moreover, the legislature recognizes that the ecological integrity of an increasing number of publicly and privately-owned parks and preserves is being adversely affected by invasive plants and animals, challenging the ability of land management agencies to effectively manage these sites. The legislature further recognizes that nearly half (forty-six percent; fifty-seven percent of the plants, thirty-nine percent of the animals) of the species on the federal list of endangered species are declining, at least in part, due to invasive species. The legislature additionally finds that invasive species have an adverse impact on the New York state economy. Particularly affected by these species are the water supply, agricultural, and recreational sectors of the state economy. The economic impact to the national economy has been estimated to be as high as one hundred thirty-seven billion dollars annually.

§ 9-1703. Definitions.

As used in this title:

1. "Advisory committee" means the New York invasive species advisory committee established by section 9-1707 of this title.

2. "Council" means the New York invasive species council established by section 9-1705 of this title.

3. "Control" means, as appropriate, eradicating, suppressing, reducing, or managing invasive species populations, preventing spread of invasive species from areas where they are present, and taking steps such as restoration of native species and habitats to reduce the effects of invasive species and to prevent further invasions.

4. "Ecosystem" means the complex of a community of organisms and its environment.

5. "Introduction" means the intentional or unintentional escape,

release, dissemination, or placement of a species into an ecosystem as a result of human activity.

6. "Native species" means, with respect to a particular ecosystem, a species that, other than as a result of an introduction, historically occurred or currently occurs in that ecosystem.

7. "Species" means a group of organisms all of which have a high degree of physical and genetic similarity, generally interbreed only among themselves, and show persistent differences from members of allied groups of organisms.

8. "Plan" means the plan developed pursuant to section 9-1705 of this title.

9. "GIS" means geographic information system.

10. "Invasive species" means a species that is:

(a) nonnative to the ecosystem under consideration; and

(b) whose introduction causes or is likely to cause economic or environmental harm or harm to human health. For the purposes of this paragraph, the harm must significantly outweigh any benefits.

§ 9-1705. New York invasive species council.

1. There is hereby established the New York invasive species council. Such council shall consist of a total of nine members and shall include the commissioner, the commissioners of agriculture and markets, transportation, parks, recreation and historic preservation, education, the secretary of state, the chairperson of the New York state thruway authority, the director of the New York state canal corporation, and the chairperson of the Adirondack Park agency, or a designee of such department, agency or public authority.

2. The commissioner of agriculture and markets and the commissioner or their designees shall serve as joint chairs of the council.

3. The council shall meet at least quarterly and shall regularly consult with the advisory committee.

4. The council may consult with any organization, educational institution, or governmental agency, including, but not limited to, the United States Department of Agriculture, the United States Coast Guard, the port authority of New York and New Jersey, the National Invasive Species Council and the New York Ocean and Great Lakes Ecosystem Conservation Council.

5. The role of the council includes, but is not limited to:

(a) from time to time assessing the nature, scope and magnitude of the environmental, ecological, agricultural, economic, recreational, and social impacts caused by invasive species in the state;

(b) from time to time identifying actions taken by members of the council, state and local governments and the public to: prevent the introduction of invasive species; detect and respond rapidly to and control populations of invasive species in a cost-effective and environmentally sound manner; monitor invasive species populations accurately and reliably; provide for restoration of native species and habitat conditions in ecosystems that have been invaded; conduct research on invasive species and develop technologies to prevent introduction; provide for environmentally sound control of invasive species; promote public education on invasive species; and the means to address invasive species;

(c) the development of a "comprehensive plan for invasive species management". Such plan shall address all taxa of invasive species. The comprehensive plan should, at a minimum: recommend interagency responsibilities; describe coordination among different agencies and organizations; recommend approaches to funding invasive species work; address prevention, early detection and rapid response; identify opportunities for control and restoration, including research needs; and describe effective outreach and education. Such plan shall recommend responsibilities for different agencies with the goal of reducing or eliminating, where practicable, contradictory or conflicting policies or programs. Such plan should identify needs for additional staff positions

at state agencies and recommend New York state or federal legislation or regulation. Such plan shall place an emphasis on both prevention and early detection and rapid response to prevent future damage. Such plan shall evaluate and incorporate, as appropriate: the approved New York State Aquatic Nuisance Species Management Plan; the Lake Champlain Basin Aquatic Nuisance Species Management Plan; and the Adirondack Park Aquatic Nuisance Species Management Plan;

(d) providing input on funding priorities and grant applications regarding monies made available for the implementation of this title and grants for projects related to the control and management of invasive species, education and outreach efforts, and for projects aimed at the early detection and prevention of invasive species;

(e) organizing and convening a biennial invasive species summit to focus and maintain attention on the state's comprehensive invasive species program;

(f) encouraging industries and trade organizations to develop and adopt voluntary codes of conduct designed to reduce or eliminate the use and distribution of invasive species, reviewing such voluntary codes of conduct and officially recognizing approved codes;

(g) supporting within available funds and encouraging Partnerships for Regional Invasive Species Management in their efforts to address invasive species through coordination, recruitment and training of volunteers, education, early detection, rapid response, eradication, research, and planning;

(h) submitting to the legislature and the governor prior to January first, two thousand ten a report, produced in consultation with the advisory committee, recommending a four-tier system for nonnative animal and plant species. The system shall contain: (i) a list of prohibited species, which should be unlawful to possess, import, purchase, transport, or introduce except under a permit for disposal, control, research, or education; (ii) a list of regulated species which should be legal to possess, sell, buy, and transport but not be introduced into a free-living state; (iii) a list of unregulated species which are nonnative species that should not be subject to regulation; and (iv) a procedure for the review of a nonnative species that is not on the prohibited, regulated, or unregulated lists before the use, distribution or release of such nonnative species. Nothing contained in the report

shall have the force of law. The council shall recommend legislation regarding the four-tier system, including penalties for violations of the four-tier system; and

(i) developing recommendations on statutory actions to prohibit, manage and control invasive species.

§ 9-1707. New York invasive species advisory committee.

1. There shall be established a New York invasive species advisory committee which shall provide information, advice and guidance to the council, including but not limited to providing assistance with the development of the four-tier classification system for nonnative animal and plant species.

2. The commissioner and the commissioner of agriculture and markets shall select up to twenty-five at-large members with at least one member from each of the following: New York biodiversity research institute, New York state's land grant university, New York sea grant, a statewide organization formed to address invasive species, a statewide land conservation organization, a statewide agricultural organization, a nursery business, a boating organization, the darrin freshwater institute, the soil and water conservation districts, the natural heritage program, a New York state forestry school, a lake association, the New York city department of environmental protection, and a statewide local government organization.

3. The members of the advisory council shall serve without compensation, except members shall be allowed their necessary and actual expenses incurred in the performance of their duties under this section.

§ 9-1709. General powers and duties of the department.

1. The department, in cooperation with the department of agriculture and markets, shall restrict the sale, purchase, possession, propagation, introduction, importation, transport and disposal of invasive species

pursuant to this section. The department and the department of agriculture and markets in consultation with the council, shall, after public hearing, promulgate joint regulations to develop:

- (a) a permit for prohibited species disposal, control, research and education;

- (b) a list of prohibited species, which shall be unlawful to knowingly possess with the intent to sell, import, purchase, transport or introduce;

- (c) a list of prohibited species which shall be unlawful to import, sell, purchase, propagate, transport, or introduce except under a permit for disposal, control, research, or education; and

- (d) a list of regulated species which shall be legal to possess, sell, buy, propagate and transport but may not be knowingly introduced into a free-living state or introduced by a means that one knew or should have known would lead to the introduction into a free-living state.

As part of the regulatory process, the departments and the council shall consider establishing grace periods for prohibited and regulated species so businesses can plan the management of existing stock.

2. For the purpose of carrying out the provisions of this title, the department in cooperation with the department of agriculture and markets shall have the authority, within funds available, to:

- (a) establish, operate and maintain state-wide databases and clearinghouses for all taxa of invasive species that incorporate existing data from agencies and organizations in the state, as well as from nearby states, provinces, Canada, and the federal government. Such databases and clearinghouses may provide the aggregate data on-line in a GIS;

- (b) coordinate state agency and public authority actions to do the following:

- (i) phasing out uses of invasive species;

- (ii) expanding use of native species;

- (iii) promoting private and local government use of native species as alternatives to invasive species; and

- (iv) wherever practical and where consistent with watershed and/or regional invasive species management plans, prohibiting and actively

eliminating invasive species at project sites funded or regulated by the state; and

(c) in collaboration with the council, aid in the review and reform of relevant regulatory processes to remove unnecessary impediments to the restoration of invaded ecosystems.

§ 9-1710. Aquatic invasive species; spread prevention.

1. For purposes of this section:

(a) "Watercraft" shall mean every motorized or non-motorized boat or vehicle capable of being used or operated as a means of transportation or recreation in or on water.

(b) "Launch" shall mean to place a watercraft or floating dock into a public waterbody or any inlet or outlet to such waterbody for any purpose, including by trailer or other device or carrying by hand a watercraft into the waterbody.

2. No person shall launch a watercraft or floating dock unless it can be demonstrated that reasonable precautions such as removal of any visible plant or animal matter, washing, draining or drying as defined by the department pursuant to rules and regulations, have been taken.

3. The department may create and maintain a self-issuing certification designed for a person to demonstrate that reasonable precautions have been taken prior to launching a watercraft.

4. The department shall conduct education and outreach efforts including, but not limited to the following:

(a) establish and maintain a public website for the dissemination of educational materials to promote cleaning, draining and drying of watercrafts;

(b) develop and distribute educational materials including, but not limited to, the most effective methods to prevent the spread of aquatic invasive species, and the potential for live wells and other interior water compartments to carry all stages of aquatic invasive species including those that are small-bodied and microscopic; and

(c) include boat washing education in approved boating safety courses.

§ 9-1711. Aquatic invasive species inspection stations in the Adirondack park.

1. The department may establish aquatic invasive species inspection stations at any location in the Adirondack park and within a ten-mile radius of the Adirondack park boundary, including, but not limited to locations adjacent to or near waters; and at state-owned facilities to provide compliance with the requirements of section 9-1710 of this title.

2. When an aquatic invasive species inspection station adjacent to a public waterbody is open for operation, owners or operators of motorized watercraft who are not in possession of either a self-issuing certification or an inspection or decontamination certificate from an aquatic invasive species inspection station, issued since the last operation of such watercraft in a waterbody, shall obtain such certification or certificate before entering the public waterbody to ensure compliance with section 9-1710 of this title. The department shall maintain on their website a list of such stations and their operating hours in order to assist motorized watercraft owners and operators in locating stations where they can inspect and clean their watercraft.

3. The department or other entity designated by the department may issue an inspection or decontamination certificate to the owner or person in possession of a motorized watercraft that has been inspected. Such certificate shall include the following details: (a) the name of the department or program that conducted the inspection; (b) the date, place, and time of inspection; and (c) any preventative measures performed.

4. If the department or designated entity issues an inspection or decontamination certificate to the owner or person in possession of the motorized watercraft, the department or designated entity may attach a

tamperproof tag to the motorized watercraft to certify such motorized watercraft arriving at a boat launch with unbroken tags could launch without an additional inspection. Such tag may only be removed prior to a launch.

5. The department may recognize an inspection or decontamination certificate issued by another governmental entity, if the other governmental entity adheres to the minimum standards for inspection and decontamination as determined by the department, including but not limited to recognized uniform standards.

6. Annually the department will review all data collected at aquatic invasive species inspection stations, including any data from designated entities, to identify practical improvements to reduce the potential spread of aquatic invasive species.

TITLE 19

TOWNSHIP FORTY SETTLEMENT ACT

Section 9-1901. Legislative purpose and intent.

9-1903. Definitions.

9-1905. List of disputed parcels.

9-1907. Process for clearing title.

9-1909. Attorney general to file suit.

9-1911. Conveyances to the state.

9-1913. Adirondack park agency jurisdiction.

9-1915. Notarized statement.

§ 9-1901. Legislative purpose and intent.

1. During the last one hundred years, both the state and private parties have claimed title to identical portions of township forty, Totten and Crossfield Purchase, in the town of Long Lake, county of Hamilton. Indeed, some private parties have occupied and improved a number of such parcels to which the state claims title and, in many cases, both the state and private parties have paid taxes on such

parcels. In the last several decades, the state and some private parties have commenced litigation, at significant expense and with limited success, to establish their respective claims over disputed parcels. As a result of longstanding claims to disputed parcels, the free transfer of the parcels has been inhibited, thereby creating economic and social hardship in township forty which, in turn, has prevented both state and private parties from the full use and enjoyment of the parcels. The legislature has determined that the judicial system is not an appropriate forum to resolve these longstanding title disputes and that a statutory solution is required.

2. For these reasons and as authorized by the provisions of section one of article fourteen of the state constitution, the legislature finds that it is in the public interest to comprehensively and expeditiously resolve these longstanding title disputes in a manner which is fair and equitable. The legislature finds that it is in the best interests of the state, the county of Hamilton, the town of Long Lake, and the private parties who claim title to portions of township forty to resolve these title disputes in a structured and efficient manner that results in clarification of ownership interests, enhancement of public access to forest preserve lands, and the quiet enjoyment of private property.

3. The legislature further finds that resolution of these title disputes shall be accomplished in a manner that ensures the integrity of the forest preserve in the Adirondack park and that results in a net benefit to the forest preserve when compared to the contested parcels.

4. The legislature further finds that the title disputes associated with township forty constitute a unique situation, found nowhere else in the state, and that consequently it is equitable and appropriate for the state to relinquish its claim of title to disputed parcels within the township. This relinquishment of claims to title shall not be deemed to set precedent for the relinquishment of claims to title with respect to other lands owned by the state.

§ 9-1903. Definitions.

For purposes of this title, the following terms shall have the following meanings:

1. "County" means the county of Hamilton.
2. "Disputed parcel" means a parcel of land located in township forty to which both the state and a person claim title.
3. "Person" means any individual, firm, partnership, association, trust, limited liability company or corporation that claims title to a disputed parcel.
4. "Town" means the town of Long Lake, in the county of Hamilton.
5. "Township forty" means township forty, Totten and Crossfield Purchase.

§ 9-1905. List of disputed parcels.

The following parcels of land, identified by the county's two thousand twelve assessment rolls and the county's online mapping system as of October, two thousand twelve, and any subsequent conveyances therefrom, are the disputed parcels that are the subject of the provisions of this title:

The disputed parcels identified in this section are not intended to be legal descriptions, but are intended to identify disputed parcels by tax lot number only.

§ 9-1907. Process for clearing title.

1. Within thirty days of the effective date of this section, the department shall submit a written request to the county tax assessor for a certified list, to be prepared from the most current tax roll, of the names and addresses of all persons who claim title to the disputed parcels listed in section 9-1905 of this title. The assessor shall prepare such a list within seven days after receiving the department's request, and include on the list the names and addresses of all persons on the most current tax roll and the names and addresses of all persons who, not less than seven days prior to the date on which the assessor received the department's request, notified the assessor that they claim title to a disputed parcel. The department shall be entitled to rely upon the information contained in the certified list, and failure by the department to give notice to any person claiming title who is not included on the list or is not at the address included on the list shall not invalidate any proceeding or actions authorized by this title.

Within thirty days after receipt of the certified list from the assessor, the department shall send, by first class mail, a letter to each person included on the list, informing the person that a constitutional amendment has been adopted and legislation enacted that authorizes a resolution of title issues on disputed parcels in township forty, including the disputed parcel to which the person claims ownership rights. The department shall send a separate letter to each person claiming title to each disputed parcel. Such letter shall describe the process for resolving title set forth in this title and state that, until such time as the state is estopped from asserting its claim of title to the disputed parcel pursuant to subdivision seven of this section, any person claiming title to the disputed parcel shall assume all the risk with respect to subdividing or adding new structures or improvements to the disputed parcel. The department shall provide a copy of each such letter to the attorney general. The department shall also, within thirty days after receipt of the list from the assessor, publish written notice of the process to clear title, including a list by tax lot number of the parcels listed in section 9-1905 of this title, in the state register, the environmental notice bulletin and a newspaper of general circulation in township forty.

2. Within ninety days of the receipt of the department's letter, pursuant to subdivision one of this section, for each disputed parcel, a person shall provide to the department, with copies to the office of the attorney general and the town, a separate notarized statement as set forth in section 9-1915 of this title, notifying the department either:

a. that he or she will participate in the process set forth in this title to resolve title to the disputed parcel or parcels, and, if so, whether he or she intends to provide as a gift to the state a specified portion of a disputed parcel in fee simple without reservations for inclusion in the forest preserve or a conservation easement to the town restricting development over all or a specified portion of a disputed parcel, with a secondary right of enforcement in the state; or

b. that he or she declines to participate in the process established by this title to resolve title to disputed parcels.

3. With respect to a parcel or conservation easement which the person intends to provide as a gift to the state or the town, respectively, as specified in paragraph a of subdivision two of this section, the town shall provide the person with an assessed value of the proposed conveyance, with a copy to the department, within one hundred twenty days of the town's receipt of a copy of the notification concerning such gift.

4. Within twelve months of the date of the letters sent by the department pursuant to subdivision one of this section, all persons who are participating in the process set forth in this title to resolve title to disputed parcels shall convey to the state any land which such persons expressed an intent to so convey pursuant to paragraph a of subdivision two of this section, convey to the town any conservation easements which such persons expressed an intent to so convey pursuant to paragraph a of subdivision two of this section, and make payment to the town in the amount due pursuant to subdivision five of this section.

5. Within twelve months of the date of the letters sent by the department pursuant to subdivision one of this section, persons participating in the process set forth in this title to resolve title to disputed parcels shall pay the town an amount that approximates the state's administrative costs in resolving the disputed parcels situated within township forty. The payment amount for each individual disputed parcel shall be the sum of: (a) a flat rate of two thousand dollars per parcel; and (b) an amount equal to the total assessed value of the parcel, including structures and improvements situated thereon, as determined by the two thousand twelve town assessment, less the assessed value of any portion of such parcel conveyed to the state in fee or any conservation easement conveyed to the town, pursuant to paragraph a of subdivision two of this section, divided by the total assessed value of all disputed parcels, including structures and improvements situated thereon as determined by the two thousand twelve town assessment, multiplied by two hundred thousand dollars. The town shall use all such payments to acquire land for inclusion in the forest preserve pursuant to subdivision six of this section.

6. Within eighteen months of the date of the letters sent by the department pursuant to subdivision one of this section, the department shall identify lands for the town to acquire for inclusion in the forest preserve. Subject to legislative approval, such lands shall provide a net benefit to the forest preserve as compared to the disputed parcels to which the state is estopped from asserting a claim pursuant to subdivision seven of this section. The town shall use all payments acquired pursuant to subdivision five of this section for the acquisition of such lands. Such lands shall be conveyed from the owner directly to the state. Title to land to be conveyed to the state pursuant to this title and the deed to the state shall be approved by the attorney general, as to form and manner of execution and recordability, before the deed shall be accepted on behalf of the state.

7. The commissioner shall cause to be prepared an accurate survey map showing the boundaries of all disputed land to which the state will be releasing and extinguishing its right, title and interest and record the survey map in the Hamilton county clerk's office. The commissioner shall also cause legal descriptions of such boundaries to be prepared from the map. Except for those parcels the title to which will be litigated pursuant to section 9-1909 of this title, upon legislative approval of the lands to be provided to the state pursuant to subdivision six of this section, the completion of the conveyances to the state, and certification by the commissioner that each respective person has complied with all applicable terms and conditions of this title, and notwithstanding the provisions of the public lands law, the commissioner shall be authorized to release and extinguish all right, title and interest of the state in the disputed parcels that are located within these surveyed boundaries, without reservation and exception. The legal descriptions shall be approved by the commissioner and incorporated into the release and extinguishment document. The commissioner shall send notice of the state's release and extinguishment of rights to a disputed parcel by separate letter to each person for each parcel of land the title to which has been settled pursuant to this title, and upon release and extinguishment of rights, the state shall be estopped from asserting any claim of title to disputed parcels based upon (a) facts or actions

that occurred prior to the effective date of this title, and (b) deeds, tax sales or other documents that predate the effective date of this title. The commissioner shall also cause to be prepared an accurate survey map, to be recorded in the county clerk's office, and a legal description from the survey map, for each individual parcel of land the claimant of which has filed a notice pursuant to paragraph b of subdivision two of this section or has not complied in a timely fashion with the requirements of subdivisions two, four or five of this section. The department shall provide a copy of such survey and legal description to the office of the attorney general to assist in the litigation required by section 9-1909 of this title.

§ 9-1909. Attorney general to file suit.

The attorney general, within twenty-four months of either a person's failure to comply with the requirements of subdivision two of section 9-1907 of this title with respect to a particular disputed parcel, a person's filing of a notice of nonparticipation pursuant to paragraph b of subdivision two of section 9-1907 of this title with respect to a particular disputed parcel, a person's failure to make the required conveyance required by subdivision four of section 9-1907 of this title with respect to a particular disputed parcel, or a person's failure to make the required payment required by subdivisions four and five of section 9-1907 of this title with respect to a particular disputed parcel, shall commence an action in a court of competent jurisdiction pursuant to the real property actions and proceedings law to determine title to such parcel. Nothing contained in this title shall be applicable to such action. Failure by the attorney general to commence such action within such time frame shall not subsequently prevent the attorney general from commencing such an action or create a presumption against the state's claim of title.

§ 9-1911. Conveyances to the state.

Nothing in this title shall be interpreted as at any time preventing

any person claiming a disputed parcel from offering to convey any such parcel, any portion of such parcel, or any interest in such parcel to the state on such terms and conditions as the owner finds acceptable, provided the state may, solely in its discretion, decide whether to accept any such offer.

§ 9-1913. Adirondack park agency jurisdiction.

Nothing in this title shall be interpreted as altering or affecting the regulatory jurisdiction of the Adirondack park agency over any land located within township forty.

§ 9-1915. Notarized statement.

The format for the notarized statement described in subdivision two of section 9-1907 of this title shall be as follows:

NOTARIZED STATEMENT RELATING TO THE SETTLEMENT OF COMPETING CLAIMS OF
TITLE

TOWNSHIP FORTY, TOTTEN AND CROSSFIELD PURCHASE

TOWN OF LONG LAKE, COUNTY OF HAMILTON

Name(s):

Mailing address(es):

Telephone number(s):

Tax parcel number:

Circle either 1 or 2; if you circle 1, you must also circle a or b:

1. I (we) elect to participate in the process to resolve title issues regarding the above-referenced parcel as authorized by title nineteen of article nine of the environmental conservation law.

a. I (we) intend to reduce my (our) payment by gifting to the state a specified portion of a disputed parcel in fee simple without reservation for inclusion in the forest preserve or a conservation easement to the town restricting development over all or a specified portion of a disputed parcel, with a secondary right of enforcement in the state. The

intended gift is described in the attached document.

b. I (we) do not intend to reduce my (our) payment to the state by gifting any portion of the parcel to the state or by gifting a conservation easement over any portion of the parcel to the town; or

2. I (we) elect to not participate in the special process to resolve title issues regarding the above-referenced parcel as authorized by title nineteen of article nine of the environmental conservation law. I (we) understand that: within twenty-four months of my (our) filing of this notice, the attorney general shall commence an action in a court of competent jurisdiction to determine title to such parcel; nothing in title nineteen of article nine of the environmental conservation law shall be applicable to such litigation; and failure by the attorney general to commence such action within such twenty-four month time frame shall not subsequently prevent the attorney general from commencing such an action or create a presumption against the state's claim of title.

TITLE 21

FOREST PRESERVE HEALTH AND SAFETY LAND ACCOUNT AND PUBLIC UTILITY IMPROVEMENTS

Section 9-2101. Health and safety land account creation and use.

9-2103. Highway right of way public utility improvements.

9-2105. Department reporting.

§ 9-2101. Health and safety land account creation and use.

1. Definitions. For purposes of this section:

a. "eligible project" means a public health or safety-related project necessary where no viable alternative exists, limited to the following:

(i) address bridge hazards to improve public safety on county highways and town highways;

(ii) elimination of the hazards of dangerous curves and grades on county and town highways to improve public safety;

(iii) relocation, maintenance, and reconstruction of county highways and town highways, including associated culverts, for the purpose of addressing public safety provided that no relocation of any single relocated portion shall exceed one mile in length;

(iv) water wells and necessary appurtenances when such wells are necessary to meet drinking water quality standards and are located within five hundred thirty feet of state highways, county highways and town highways; and

(v) stabilization devices for an existing utility pole adjacent to, or no more than the minimum distance from the width of highway necessary to comply with standard safety practices.

Eligible projects shall not include the use of chemicals/herbicides for clearing state land; the removal of trees and vegetation shall be minimized and the area shall promptly be restored to pre-project conditions to the maximum extent practicable.

b. "county highway" shall have the same meaning as defined in subdivision four of section three of the highway law.

c. "forest preserve expansion fund" shall mean the fund established pursuant to section ninety-seven-e of the state finance law.

d. "project sponsor" means a town, village, or county located in the counties of Clinton, Delaware, Essex, Franklin, Fulton, Greene, Hamilton, Herkimer, Lewis, Oneida, Saratoga, Saint Lawrence, Sullivan, Ulster, Warren and Washington.

e. "no viable alternative" means that no other option exists for the eligible project to address ongoing public health or safety concerns other than through the use of state lands.

f. "state highway" means a state highway as defined in subdivisions one, two and three of section three of the highway law.

g. "state lands" means lands owned by the state in forest preserve counties that are under the jurisdiction of the department.

h. "town highway" means a town highway, as defined in subdivision five of section three of the highway law, in existence as of January first, two thousand fifteen, listed on the local highway inventory maintained by the department of transportation, and annually plowed and regularly maintained.

i. "width of the highway" shall have the same meaning as paragraph k of subdivision one of section 9-2103 of this title.

2. Following approval by the legislature of two hundred fifty acres of land to be added to the forest preserve, a health and safety land account of not more than two hundred fifty acres is created for use by project sponsors for eligible projects necessary to protect health and safety where no viable alternative is available. The account will be administered by the department.

3. A project sponsor with an eligible project may apply to the health and safety land account to receive fractional or whole acreage for an eligible project. Such application shall include:

a. a resolution from the governing body of the project sponsor that includes:

(i) attestation that the project is necessary to address public health or safety and no viable alternatives exist;

(ii) attestation that such lands will only be used for eligible purposes and that any real property acquired shall not be sold, leased, exchanged, donated or otherwise disposed of or used for other than the eligible purposes for which it was approved without the express authority of an act of the legislature.

b. a detailed summary of the proposed eligible project, including the whole action and all related activities, a detailed summary of the alternatives the project sponsor explored prior to arriving at the conclusion there were no viable alternatives;

c. specific metes and bounds, including total proposed acreage;

d. a narrative about the project, including a justification that the size of the fractional or whole acreage sought for such eligible project from the health and safety land account is the minimum amount required;

e. monies at least equivalent to the fair market value of the state land proposed to be conveyed;

f. any necessary permits and authorizations; and,

g. an accurate survey.

4. Immediately upon determining that an application is complete, the department shall cause a notice of application, which shall also include the time period for public comments, to be published in the next available state register and environmental notice bulletin as well as in a newspaper having general circulation in the area in which the eligible project is proposed to be located. Newspaper publications shall be provided by the project sponsor.

5. The department shall hold a public hearing on each eligible project at which the public shall be given an opportunity to be heard.

6. The department, following consultation with the department of transportation to determine that any required authorization has been provided, shall only deem a project sponsor eligible to receive fractional or whole acreage from the health and safety land account following a determination that:

a. the project meets the eligible project criteria, is necessary to protect public health or safety and the eligible project has no viable alternative on land not owned by the state;

b. the project minimizes adverse environmental impact to the maximum extent practicable;

c. the project will not adversely impact viewsheds or lands with historical, ecological, environmental or recreational value, as determined by the department based on a resource inventory and assessment;

d. the monies to be paid by the project sponsor into the forest preserve expansion fund, are at least equivalent to the fair market value of the state land proposed to be conveyed; and

e. the project minimizes the fractional or whole acreage from the health and safety land account to the maximum extent practicable.

7. Once an application has been approved the commissioner shall cause to be prepared an accurate survey map showing the boundaries of all state land proposed to be conveyed and shall notify the legislature.

8. a. Prior to the actual transfer of title or issuance of letters patent for an eligible project that is longer than one quarter mile that has been approved by the department, the legislature shall approve each eligible project and the monies to be paid into the forest preserve expansion fund equal to or greater than the fair market value of the acreage to be conveyed from the health and safety land account. Once approved by the legislature, title to the land shall be approved and the deed to the people of the state of New York of any lands dedicated shall be approved by the attorney general as to form and manner of execution and recordability prior to its delivery.

b. Prior to the actual transfer of title or issuance of letters patent for an eligible project that is less than one quarter linear mile total, which shall run and be measured parallel to the county highway or town highway, and which runs no more than ten feet perpendicular beyond the width of the highway which shall mean three rods or the deeded, recorded municipal or state right of way or municipal or state easement in the existence as of January first, two thousand fifteen and, which has been approved by the department, title to land shall be approved and the deed to the people of the state of New York of any lands dedicated shall be

approved by the attorney general as to form and manner of execution and recordability prior to its delivery.

9. Real property acquired, developed, improved, restored or rehabilitated by or through a project sponsor pursuant to this section shall not be leased, exchanged, donated or otherwise disposed of or used for other than the eligible project for which it was approved without the express authority of an act of the legislature. When the project sponsor determines such eligible project is no longer needed, the lands shall revert to the state for inclusion in the forest preserve. The department shall prescribe the terms and conditions for the removal of any improvements to the land and restoration of the land to a natural, vegetative state.

§ 9-2103. Highway right of way public utility improvements.

1. Definitions. For purposes of this section:

a. "county highway" shall have the same meaning as defined in subdivision four of section three of the highway law.

b. "eligible project" shall mean burial or co-location of a public utility line or construction and maintenance of bicycle paths by a project sponsor within the width of a highway of a town highway, county highway or state highway that traverses state forest preserve land.

c. "project sponsor" shall mean a village, town, a county, located in the counties of Clinton, Delaware, Essex, Franklin, Fulton, Greene, Hamilton, Herkimer, Lewis, Oneida, Saratoga, Saint Lawrence, Sullivan, Ulster, Warren and Washington or, for:

- (i) bicycle paths, the department of transportation,
- (ii) for water lines, a public water supplier; or
- (iii) for electric, telephone or broadband lines, a public utility company.

d. "public utility company" shall have the same meaning as such term

is defined in section two of the public service law; provided, however, that for broadband projects a person subject to article eleven of the public service law shall be included.

e. "public utility line" shall mean only electric, telephone, broadband, water or sewer lines, including any necessary conduit used to protect such lines. Public utility line shall not include the construction of any new intrastate natural gas or oil pipelines that have not received all necessary state and local permits and authorizations as of June first, two thousand sixteen.

f. "public water supplier" shall mean a county or town water improvement district, village, New York city, public benefit corporation or public authority established pursuant to state law and empowered to construct and operate a municipal water management facility, as defined in section twelve hundred eighty-one of the public authorities law.

g. "state highway" shall mean a state highway as defined in subdivisions one, two and three of section three of the highway law.

h. "state lands" shall mean lands owned by the state in forest preserve counties that are under the jurisdiction of the department.

i. "town highway" shall mean a town highway, as defined in subdivision five of section three of the highway law, in existence as of January first, two thousand fifteen, listed on the local highway inventory maintained by the department of transportation, and annually plowed and regularly maintained.

j. "water supply projects" shall mean drinking water wells.

k. "width of the highway" shall mean three rods or the deeded, recorded municipal or state right of way or easement in existence as of January first, two thousand fifteen.

2. Pursuant to approval by the department and the department of transportation and following a public hearing on each eligible project

at which the public shall be given an opportunity to be heard, a public utility line may be co-located within or buried beneath the width of the highway of any state highway, county highway, or town highway.

3. A project sponsor for an eligible project within the width of the highway shall submit an application for a permit to the department that at minimum shall include:

a. a resolution from the governing body of the project sponsor, or in the case of a public utility seeking to utilize the width of highway of a town highway, the governing body of the town, or the width of highway of a county, the county governing board, that includes:

(i) approval of the project;

(ii) attestation that such width of highway lands will only be used for eligible purposes;

(iii) attestation that the project will minimize the removal of trees and vegetation and restore the area to pre-project condition to the maximum extent practicable.

b. specific metes and bounds, including total proposed acreage of the width of highway land sought;

c. a narrative about the project, including a justification;

d. any necessary permits and authorizations; and,

e. an accurate survey.

4. Immediately upon determining that an application is complete, the department shall cause a notice of application, which shall also include the time period for public comments, to be published in the next available state register and environmental notice bulletin as well as in a newspaper having general circulation in the area in which the eligible project is proposed to be located. Newspaper publications shall be provided by the project sponsor.

5. The department shall hold a public hearing on each eligible project

at which the public shall be given an opportunity to be heard.

6. The department, following consultation with the department of transportation to determine that any required authorization has been provided, shall only approve an application for an eligible project permit following a determination that:

- a. the eligible project meets the eligible project criteria;
- b. the eligible project minimizes adverse environmental impact to the maximum extent practicable; and
- c. the eligible project will not adversely impact lands with environmental, ecological or recreational value, as determined by the department based on a resource inventory and assessment.

7. After a hearing and opportunity to be heard, if the commissioner determines that a project sponsor is utilizing land for a purpose other than as authorized by the department, the commissioner may require removal of any improvements to the land and restoration of the land to a natural, vegetative state.

8. The department is authorized to promulgate such rules and regulations as may be necessary to implement and administer the provisions of this article.

§ 9-2105. Department reporting.

1. The department shall issue an annual report to the legislature detailing the use of the health and safety land account and the highway right of way public utility improvement permits including: the number of applications received; the number of eligible projects applications approved and denied; the project description, narrative and acreage of eligible projects; the cumulative total of eligible projects listed by project sponsor; total deposits by each project sponsor into the forest preserve fund; annual disbursements from the forest preserve fund and

the amount of land acquired with such disbursements; total number of public utility improvement permits issued; and the cumulative total and project type of permits issued listed by project sponsor.

2. The information contained in such report shall also be made available on the department's website and updated no less than annually.

* TITLE 23

THE MOUNT VAN HOEVENBERG OLYMPIC SPORTS COMPLEX

Section 9-2301. Legislative purpose and intent.

9-2302. Definitions.

9-2303. Construction, operation, and maintenance of the Mount Van Hoevenberg Olympic Sports Complex.

9-2304. Land to be acquired for inclusion in the forest preserve in the Adirondack park.

* NB Effective on the same date as a certain CONCURRENT RESOLUTION OF THE SENATE AND ASSEMBLY (see chapter 488 of 2025 § 2)

*** § 9-2301. Legislative purpose and intent.**

1. It is the intent of the legislature to hereby implement the amendment to section one of article fourteen, of the New York state constitution pertaining to the Mount Van Hoevenberg Olympic Sports Complex located on forest preserve lands in the town of North Elba in Essex County.

2. The legislature further intends that implementation of the constitutional amendment should be accomplished in a manner that ensures the integrity of the forest preserve land on which the sports complex is situated and results in a significant increase of forest preserve acreage in the Adirondack park.

3. The legislature intends that, as offset for the use of forest preserve lands for the sports complex, the state shall acquire as an addition to the forest preserve at least two thousand five hundred acres

of true forest land located in the Adirondack park. To ensure that such lands will be acquired and have characteristics suitable for inclusion in to the forest preserve, the legislature intends to review and approve the acquisition of such lands.

4. For these reasons and as authorized by the provisions of section one of article fourteen of the state constitution, the legislature finds that it is in the public interest to hereby implement the constitutional amendment pertaining to the Mount Van Hoevenberg Olympic Sports Complex.

* NB Effective on the same date as a certain CONCURRENT RESOLUTION OF THE SENATE AND ASSEMBLY (see chapter 488 of 2025 § 2)

*** § 9-2302. Definitions.**

For purposes of this title, the following terms shall have the following meanings:

1. "Appurtenances" shall mean those facilities that are directly related to and necessary for the construction, operation, maintenance, and public use of modern Nordic skiing and biathlon trails, such as access roads, parking lots, sanitary facilities, offices, day lodges and amenities, snowmaking, five kilometer of paved training trails, and an open-air Nordic skiing and biathlon stadium. This term shall not include:

(a) facilities such as zip lines, hotels, condominiums, swimming pools, all-terrain vehicles or off-road vehicles for public use, tennis courts and other structures and improvements which are not directly related to and necessary for operation, maintenance, and public use of the sports complex; or

(b) any structure located at or above an elevation of two thousand two hundred feet above sea level used for the sale of any goods, services, merchandise, food, or beverage.

2. "Mount Van Hoevenberg Olympic Sports Complex" means a one thousand thirty-nine and two-tenths acre parcel of forest preserve land located in the town of North Elba in Essex County on which the Mount Van

Hoevenberg Olympic Sports Complex is currently located. For purposes of this title, land owned by the town of North Elba which is located adjacent to forest preserve land and over which the state has an easement, including land on which the Olympic bobsled run is located, shall not be considered part of such sports complex.

* NB Effective on the same date as a certain CONCURRENT RESOLUTION OF THE SENATE AND ASSEMBLY (see chapter 488 of 2025 § 2)

*** § 9-2303. Construction, operation, and maintenance of the Mount Van Hoevenberg Olympic Sports Complex.**

Not more than three hundred twenty-two and twenty-six hundredths acres of forest preserve land at the Mount Van Hoevenberg Olympic Sports Complex may be used for the construction, operation, and maintenance of Nordic skiing and biathlon trails, and appurtenances thereto. Any and all development at the sports complex shall conform to guidelines set forth in the Adirondack park state land master plan and shall be authorized by a unit management plan, as required by section eight hundred sixteen of the executive law.

* NB Effective on the same date as a certain CONCURRENT RESOLUTION OF THE SENATE AND ASSEMBLY (see chapter 488 of 2025 § 2)

*** § 9-2304. Land to be acquired for inclusion in the forest preserve in the Adirondack park.**

As an offset for the use of forest preserve lands for the sports complex, the state shall acquire no less than two thousand five hundred acres of land for inclusion in the forest preserve in the Adirondack park, subject to legislative approval. Such approval shall include a metes and bounds description and an accurate survey of the lands proposed for inclusion in the forest preserve.

* NB Effective on the same date as a certain CONCURRENT RESOLUTION OF THE SENATE AND ASSEMBLY (see chapter 488 of 2025 § 2)

ARTICLE 11

FISH AND WILDLIFE

- Title
1. Short title; definitions; general provisions
 3. General powers and duties of the department
 5. Fish and wildlife management practices cooperative program; prohibitions; taking of fish, wildlife, shellfish and crustacea for scientific or propagation purposes; destructive wildlife; rabies control; guides; endangered species
 7. Hunting, fishing and trapping licenses
 9. Hunting
 10. Falconry
 11. Trapping
 12. Hunting while intoxicated
 13. Fishing
 15. Commercial inland fisheries
 17. Importation and sale of fish, wildlife and game from outside the state; sale of domestic and foreign game and hatchery trout; bird plumage; taxidermy
 19. Propagation; shooting preserves; farm fish ponds; fishing preserves
 20. New York state bird conservation area program
 - 20-A. Marine mammal and sea turtle protection area
 21. Conservation areas and facilities; private refuges and posted lands
 23. Administration of fish and wildlife law
 25. Interstate wildlife violator compact

TITLE 1

SHORT TITLE; DEFINITIONS; GENERAL PROVISIONS

- Section 11-0101. Short title.
- 11-0103. Definitions.
- 11-0105. State ownership and control.
- 11-0107. Application of Fish and Wildlife Law.
- 11-0109. Standard Time of the state.
- 11-0110. Interference with lawful taking of wildlife prohibited.

11-0111. Limitation of powers of boards of supervisors and county legislative bodies.

11-0113. Manner of reference to and amendment of provisions contained in tables.

§ 11-0101. Short title.

Article 11 together with article 13 of the Environmental Conservation Law shall be known as the Fish and Wildlife Law. Sections of article 11 or of article 13 may be cited either as sections of the Environmental Conservation Law or as sections of the Fish and Wildlife Law.

§ 11-0103. Definitions.

As used in the Fish and Wildlife Law:

1. a. "Fish" means all varieties of the super-class Pisces.

b. "Food fish" means all species of edible fish and squid (cephalopoda).

c. "Migratory fish of the sea" means both catadromous and anadromous species of fish which live a part of their life span in salt water streams and oceans.

d. "Fish protected by law" means fish protected, by law or by regulations of the department, by restrictions on open seasons or on size of fish that may be taken.

e. Unless otherwise indicated, "Trout" includes brook trout, brown trout, red-throat trout, rainbow trout and splake. "Trout", "landlocked salmon", "black bass", "pickerel", "pike", and "walleye" mean respectively, the fish or groups of fish identified by those names, with or without one or more other common names of fish belonging to the group. "Pacific salmon" means coho salmon, chinook salmon and pink

salmon.

* f. "Speargun" and "under-water gun" means any speargun that stores potential energy provided from the spearfisher's muscles only and is used while submerged under the water. Such gun may only release that amount of energy that the diver has provided to it from such diver's own muscles. Common temporary energy storing devices for spearguns shall include, but not be limited to: rubber bands, springs, and sealed air chambers.

* NB Repealed June 1, 2029

2. "Game" is classified as (a) game birds; (b) big game; (c) small game.

a. "Game birds" are classified as (1) migratory game birds and (2) upland game birds.

(1) "Migratory game birds" means the Anatidae or waterfowl, commonly known as geese, brant, swans and river and sea ducks; the Rallidae, commonly known as rails, American coots, mud hens and gallinules; the Limicolae or shorebirds, commonly known as woodcock, snipe, plover, surfbirds, sandpipers, tattlers and curlews; the Corvidae, commonly known as jays, crows and magpies.

(2) "Upland game birds" (Gallinae) means wild turkeys, grouse, pheasant, Hungarian or European gray-legged partridge and quail. Grouse means ruffed grouse and every member of the grouse family. Pheasant means the ring-necked, dark-necked and mutant pheasants and all species and subspecies of the genus Phasianus representing the true or game pheasants.

b. "Big game" means deer, bear, moose, elk, except captive bred and raised North American elk (*Cervus elaphus*), caribou and antelope.

c. "Small game" means black, gray and fox squirrels, European hares, varying hares, cottontail rabbits, native frogs, native salamanders, native turtles, native lizards, native snakes, coyotes, red fox (*Vulpes vulpes*) and gray fox (*Urocyon cinereoargenteus*) except captive bred red fox or gray fox, raccoon, opossum, or weasel, skunk, bobcat, lynx, muskrat, mink, except mink born in captivity, fisher, otter, beaver,

sable and marten but does not include coydogs.

3. "Wild game" means all game, except (a) domestic game bird and domestic game animal as defined in subdivision 4; (b) carcasses of foreign game as defined in section 11-1717, imported from outside the United States; (c) game propagated or kept alive in captivity as provided in section 11-1907 of this article; (d) game imported alive pursuant to license of the department, or artificially propagated, until such game is liberated; and (e) game so imported or propagated when liberated for the purpose of a field trial and taken during the field trial for which it was liberated.

4. a. "Domestic game bird" means ducks, geese, brant, swans, pheasants, quail, wild turkey, ruffed grouse, Chukar partridge and Hungarian or European gray-legged partridge, propagated under a domestic game bird breeder's license pursuant to section 11-1901 or a shooting preserve license pursuant to section 11-1903, or propagated on a preserve or island outside the state under a law similar in principle to title 19 of this article.

b. "Domestic game animal" means white-tailed deer propagated under a domestic game animal breeder's license pursuant to section 11-1905 or propagated on a preserve or island outside the state under a law similar in principle to title 19 of this article.

c. To qualify as such domestic game bird or domestic game animal, (1) live game must be held in private ownership, on such licensed premises, and in the case of deer must be held on a preserve which is fenced, or is an island, as provided in section 11-1905, or must be held in confinement in course of transportation, and (2) the carcasses or flesh of such game coming from outside the state must originate on premises operated by the holder of a domestic game certificate as provided in section 11-1715.

5. a. "Unprotected wild birds" means the English sparrow and starling, and also includes pigeons and psittacine birds existing in a wild state, not domesticated.

b. "Protected birds" means all wild birds except those named in paragraph a of this subdivision.

6. a. "Wildlife" means wild game and all other animal life existing in a wild state, except fish, shellfish and crustacea.

b. "Wild bird" means birds which are "wildlife".

c. "Protected wildlife" means wild game, protected wild birds, protected insects, species of special concern and endangered and threatened species of wildlife designated by the department pursuant to section 11-0535 of this article, species listed in section 11-0536 of this article and species protected pursuant to section 11-0311 of this article.

d. "Unprotected wildlife" means all wildlife which is not "protected wildlife".

e. "Wild animal" shall not include "companion animal" as defined in section three hundred fifty of the agriculture and markets law. Wild animal includes, and is limited to, any or all of the following orders and families:

(1) Nonhuman primates and prosimians,

(2) Felidae and all hybrids thereof, with the exception of the species *Felis catus* (domesticated and feral cats, which shall mean domesticated cats that were formerly owned and that have been abandoned and that are no longer socialized, as well as offspring of such cats) and hybrids of *Felis catus* that are registered by the American Cat Fanciers Association or the International Cat Association provided that such cats be without any wild felid parentage for a minimum of five generations,

(3) Canidae (with the exception of domesticated dogs and captive bred fennec foxes (*vulpes zerda*)),

(4) Ursidae,

(5) All reptiles that are venomous by nature, pursuant to department regulation, and the following species and orders: Burmese Python (*Python m. bivittatus*), Reticulated Python (*Python reticulatus*), African Rock

Python (*Python sabae*), Green Anaconda (*Eunectes maurinus*), Yellow Anaconda (*Eunectes notaeus*), Australian Amethystine Python (*Morelia amethystina* and *Morelia kinghorni*), Indian Python (*Python molurus*), Asiatic (water) Monitor (*Varanus salvator*), Nile Monitor (*Varanus nilocitus*), White Throat Monitor (*Varanus albigularis*), Black Throat Monitor (*Varanus albigularis ionides*) and Crocodile Monitor (*Varanus salvadori*), Komodo Dragon (*Varanus komodensis*) and any hybrid thereof, (6) Crocodylia.

7. "Protected insect" means any insect with respect to the taking of which restrictions are imposed by the Fish and Wildlife Law or regulations of the department pursuant thereto.

8. "Plumage" is defined in section 11-1729.

9. "Shellfish" means oysters, scallops, and all kinds of clams and mussels.

10. "Hunting" means pursuing, shooting, killing or capturing (other than trapping as defined in subdivision 11) wildlife, except wildlife which has been lawfully trapped or otherwise reduced to possession, and includes all lesser acts such as disturbing, harrying or worrying, whether they result in taking or not, and every attempt to take and every act of assistance to any other person in taking or attempting to take wildlife.

11. "Trapping" means taking, killing and capturing wildlife with traps, deadfalls and other devices commonly used to take wildlife, and the shooting or killing of wildlife lawfully trapped, and includes all lesser acts such as placing, setting or staking such traps, deadfalls and other devices whether they result in taking or not, and every attempt to take and every act of assistance to any other person in taking or attempting to take wildlife with traps, deadfalls or other devices.

12. a. "Fishing" means the taking, killing, netting, capturing or withdrawal of fish from the waters of the state by any means, including

every attempt to take and every act of assistance to any other person in taking or attempting to take fish.

b. "Angling" means taking fish by hook and line. It includes bait and fly fishing, casting, trolling and also includes the use of landing nets in completing the catch of fish taken by hook and line. To constitute "angling" the taking must be in accordance with the following requirements: (1) the operator must be present and in immediate attendance when lines are in the water;

* (2) one person may operate not more than two lines, with or without rod, except that one person may operate up to three lines in freshwater;

* NB Effective until December 31, 2027

* (2) one person may operate not more than two lines, with or without rod;

* NB Effective December 31, 2027

(3) each line shall have not more than five lures or baits, or a combination of both, and in addition each line shall have not exceeding fifteen single hooks, or seven double hooks, or five triple hooks, or any combination of such hooks, provided the total number of hook points thereof does not exceed fifteen. Angling does not include snatching or hooking or the use of tip-ups.

c. "Hooking", "snatching" or "snagging" means taking fish that have not taken or attempted to take a bait or artificial lure into their mouth, by impaling fish with one or more hooks or similar devices, whether or not baited, into any part of their body.

d. "Net" means a non-metallic fabric wrought or woven into meshes and includes the types known as seine, gill, pound, trap, scap, fyke, dip, scoop and stake net.

e. "Spear" means a hand-propelled single or multiple pronged pike, blade or harpoon, and does not include the mechanically propelled device commonly called a spear gun or under-water gun.

13. "Taking" and "take" include pursuing, shooting, hunting, killing, capturing, trapping, snaring and netting fish, wildlife, game,

shellfish, crustacea and protected insects, and all lesser acts such as disturbing, harrying or worrying, or placing, setting, drawing or using any net or other device commonly used to take any such animal. Whenever any provision of the Fish and Wildlife Law permits "taking", the taking permitted is a taking by lawful means and in a lawful manner.

14. "Baiting" means the placing, exposing, depositing, distributing or scattering of shelled, shucked, or unshucked corn, wheat or other grain, salt or other feed in such a manner as to lure, attract, or entice upland game birds to any area where hunters are attempting to take them; "baited area" means any area where shelled, shucked, or unshucked corn, wheat or other grain, salt or other feed whatsoever capable of luring, attracting, or enticing such birds is placed, exposed, deposited, distributed or scattered.

15. "Marine district" means the waters described in section 13-0103.

16. a. "Northern Zone" as used in the Fish and Wildlife Law or in any regulation of the department pursuant thereto means that part of the state situated northerly of a line commencing at a point at the north shore of the Salmon river and its junction with Lake Ontario and extending easterly along the north shore of that river to the village of Pulaski, thence southerly along Route 11 to its intersection with Route 49 in the village of Central Square, thence easterly along Route 49 to its junction with Route 365 in the city of Rome, thence easterly along Route 365 to its junction with Route 28 in the village of Trenton, thence easterly along Route 28 to its junction with Route 29 in the village of Middleville, thence easterly along Route 29 to its junction with Route 4, thence northerly along Route 4 to its junction with Route 22, thence northerly and westerly along Route 22 to the eastern shore of South Bay on Lake Champlain in the village of Whitehall, thence northerly along the eastern shore of South Bay to the New York-Vermont boundary.

b. "Southern Zone" as used in the Fish and Wildlife Law or in any regulation of the department pursuant thereto means that part of the state not included in the "Northern Zone".

17. "Wilderness Hunting Areas" means the following areas:

a. South branch of Moose river--West Canada creek area. Commencing at a point in the village of Indian Lake at the intersection of Route 28 with Route 30, thence southerly along Route 30 to the village of Speculator and its junction with Route 8, thence westerly along Route 8 to its junction with Route 287, thence westerly along Route 287 to its intersection with the Herkimer county line, thence northerly along the Herkimer county line to its intersection with Route 28 near the village of McKeever, thence northerly and easterly along Route 28 to the point of beginning.

b. Essex Chain Lakes area. Commencing with the village of Indian Lake on Route 28, thence northwesterly on Route 28 to its junction with Route 28-N at the village of Blue Mountain Lake, thence northerly along Route 28-N to the village of Long Lake, thence easterly, and southerly along Route 28-N to its junction with Route 28 in the village of North Creek, thence northwesterly along Route 28 to the point of beginning.

c. Cold River area. Commencing at the village of Long Lake, thence northerly along Route 30 to its junction with Route 3 in the village of Tupper Lake, thence easterly along Route 3 to its intersection with Route 86 in the village of Saranac Lake, thence easterly along Route 86 to its junction with Route 73 in the village of Lake Placid, thence easterly and southerly along Route 73 to its junction with Route 9, thence southerly along Route 9 to the village of Schroon River and the junction of the Blue Ridge road, thence westerly along the Blue Ridge road through the village of Blue Ridge to its junction with the Tahawus road, thence southerly along the Tahawus road to its junction with Route 28-N, thence westerly along Route 28-N to the point of beginning.

d. Oswegatchie-Beaver river flow area and Independence river area. Commencing in the village of Blue Mountain Lake, thence westerly along Route 28 through Old Forge to the intersection of Route 28 with the Adirondack state park boundary at the vicinity of White Lake, thence westerly and northerly along the Adirondack state park boundary to the

point where said boundary crosses Route 3 between the villages of East Pitcairn and Fine, thence easterly along Route 3 to its intersection with Route 30 at the village of Tupper Lake, thence southerly along Route 30 to the point of beginning.

e. Middle branch of Grass river area. Commencing in the village of Cranberry Lake on Route 3, thence northeasterly along Route 3 to its junction with Route 56 near the village of Sevey, thence northerly along Route 56 to its intersection with the Adirondack state park boundary southeast of the village of South Colton, thence west and south along said park boundary to its intersection with the Degrasse-Cranberry Lake road, thence easterly and southerly along said road to its junction with Route 3 approximately one mile west of the village of Cranberry Lake thence easterly along Route 3 to the point of beginning.

f. West branch of St. Regis river area. Commencing at the village of Tupper Lake, thence northeasterly along Route 30 to the junction of the Brandon road leading from Paul Smiths to St. Regis Falls, thence westerly and northerly along said Brandon road to its junction with Route 72 about three miles west of the village of Santa Clara, thence northwesterly along Route 72 to its junction with the St. Regis-Lake Ozonia road, thence southerly and westerly along the St. Regis-Lake Ozonia road to Lake Ozonia, thence northerly and westerly along the Lake Ozonia-Hopkinton road to its intersection with the Adirondack state park boundary, thence westerly, southerly, and westerly along the Adirondack state park boundary to its intersection with the Parishville-Stark road, thence southerly along said road to the village of Stark, thence westerly along the Stark-Hubbards road to its junction with Route 56, thence southerly along Route 56 to its junction with Route 3 near the village of Sevey, thence easterly along Route 3 to the point of beginning.

18. "Inhabited" means a permanent occupancy by a species as contrasted with a temporary presence of an occasional individual.

19. a. "Person" means an individual, a co-partnership, joint stock company or corporation.

b. In construing any provision of the Fish and Wildlife Law, gender and number shall be disregarded whenever necessary to give effect to the purpose of the provision.

c. A reference to the "immediate family" of a person means all persons who are related by blood, marriage or adoption to the person whose immediate family is referred to, and are domiciled in the house of such person.

20. "Environmental conservation officer" includes sworn officers in the division of law enforcement in the department.

21. "Carrier" means a person engaged in the business of transporting goods, and includes a common carrier, contract carrier and private carrier.

22. "Closed area" means any area of lands, or waters, or lands and waters of the state, in which the taking of fish, wildlife or protected insects, or one or more of them, is prohibited, or in which hunting, fishing or trapping, or one or more of them, is prohibited by the Fish and Wildlife Law, by proclamation of the Governor pursuant to section 9-1101, or by rule or regulation of the department.

23. a. "Open season" means the time during which fish, game, wildlife, shellfish, crustacea or protected insects may be legally taken. "Closed season" means the time during which they may not legally be taken.

b. Whenever an open season or a closed season is provided by the fixing of dates, such dates shall be deemed part of such open season or closed season.

24. "Enclosed lands" or "wholly enclosed lands" means lands the boundaries of which may be indicated by wire, ditch, hedge, fence, road, highway or water, or in any visible or distinctive manner which indicates a separation from the surrounding contiguous territory. Except as otherwise provided, any such indication of boundaries is sufficient

to constitute the lands within the boundaries "enclosed".

25. "Hunting related incident" means the injury to or death of a person caused by the discharge of a firearm, crossbow or longbow while the person causing such injury or death, or the person injured or killed, is taking or attempting to take game, wildlife or fish.

26. "Muzzle loading firearm" means a gun which is loaded through the muzzle, shooting a single projectile and having a minimum bore of .44 inch.

27. "Leashed tracking dog" means a leashed dog which has been certified by the department pursuant to section 11-0928 of this chapter to track and find wounded or injured big game.

28. "Captive bred" means born in captivity.

29. "Non-native big game mammal" means a mammal species presently found in the wild and hunted as big game that is:

a. Native or an original inhabitant of the continents of Africa, Asia, South America, Australia, or Europe, whether or not captive bred; or

b. A captive bred North American big game mammal including: cougar, wolf, bear, bison, big horn sheep, mountain goat, antelope, elk, musk ox, mule deer, black tailed deer, caribou, and a domestic game animal as defined in paragraph b of subdivision four of this section, provided, however, that nothing herein shall be deemed to expand, diminish, or alter the department's authority under existing statute or regulation to regulate the taking of big game as defined in paragraph b of subdivision two of this section or other protected wildlife as defined in paragraph c of subdivision six of this section.

30. "Facility" means any type of zoo, petting zoo, circus, game farm, game preserve, or similar entity, or part thereof, where non-native big game mammals are housed, held, fed or provided for in any manner.

31. "Pet" means an animal kept for the primary purpose of companionship that is normally maintained in or near the household of the owner or person who cares for such domesticated animal.

32. "Wildlife sanctuary" means an organization as described in section 170(b)(1)(A)(vi) of the Internal Revenue Code of 1986 and that is in compliance with all applicable provisions of the Animal Welfare Act, 7 USC Sec. 2131 et seq. and operates a place of refuge where abused, neglected, unwanted, impounded, abandoned, orphaned, or displaced wild animals are provided care for their lifetime or rehabilitated and released back to their natural habitat, and, with respect to any animal owned by the organization, does not:

a. Use the animal for any type of entertainment, recreational or commercial purpose except for the purpose of exhibition as defined by the department;

b. Sell, trade, lend or barter the animal or the animal's body parts;
or

c. Breed the animal.

33. "Long bow" includes longbows, recurve bows, compound bows, and crossbows.

§ 11-0105. State ownership and control.

The State of New York owns all fish, game, wildlife, shellfish, crustacea and protected insects in the state, except those legally acquired and held in private ownership. Any person who kills, takes or possesses such fish, game, wildlife, shellfish, crustacea or protected insects thereby consents that title thereto shall remain in the state for the purpose of regulating and controlling their use and disposition.

§ 11-0107. Application of Fish and Wildlife Law.

1. No person shall, at any time of the year, pursue, take, wound or kill in any manner, number or quantity, any fish protected by law, game, protected wildlife, shellfish, harbor seals, crustacea protected by law, or protected insects, except as permitted by the Fish and Wildlife Law.

2. No person shall, at any time of the year, buy, sell, offer or expose for sale, transport, or have in his possession any fish protected by law, game, protected wildlife, shellfish, harbor seals, crustacea protected by law, or part thereof, or protected insect, whether taken within the state or coming from without the state, except as permitted by the Fish and Wildlife Law.

§ 11-0109. Standard Time of the state.

Provisions of the Fish and Wildlife Law, or regulations of the department pursuant thereto, stating the periods of the day during which fish, game or wildlife may be taken shall be construed as referring to the Standard Time of the state as defined in section 52 of the General Construction Law, notwithstanding any act of Congress of the United States or of the legislature of this state or any law or ordinance of a subdivision of the state declaring another basis of reckoning time.

§ 11-0110. Interference with lawful taking of wildlife prohibited.

1. As used in this section "wildlife" means wild game and all other animal life existing in a wild state, including fish, shellfish and crustacea, and "process of taking", in addition to any act described in subdivision thirteen of section 11-0103 of this article, includes travel, camping, and other acts preparatory to taking, which occur on lands or waters upon which the affected person has the right or privilege to take such wildlife.

2. A person is guilty of interfering with the lawful taking of wildlife when, with intent to prevent the taking of wildlife, in season,

in a place where hunting, fishing or trapping is lawful, and by a person properly licensed to take such wildlife, he:

(a) strikes, shoves, kicks or otherwise subjects the licensed person to physical contact, or attempts or threatens to do the same; or

(b) follows the licensed person in or about such place and engages in a course of conduct or repeatedly commits acts which alarm or seriously annoy such licensed person and which serve no legitimate purpose.

Notwithstanding any other provision of law to the contrary, no one shall be arrested for violation of this section by other than a duly designated peace officer acting pursuant to his special duties, or a police officer.

§ 11-0111. Limitation of powers of boards of supervisors and county legislative bodies.

Boards of supervisors of counties and county legislative bodies shall not, except as expressly provided in the Fish and Wildlife Law, exercise powers (other than powers to appropriate money), vested in them by any other law, to provide for the protection, preservation or propagation of fish, game, wildlife, or shellfish within the county, or to prescribe or enforce collection of penalties for the violation thereof.

§ 11-0113. Manner of reference to and amendment of provisions contained in tables.

1. Any portion of any table contained in a section of the Fish and Wildlife Law, which portion is capable of identification by reference as provided in this section or otherwise may be quoted, cited, amended or repealed, as if the portion so quoted, cited, amended or repealed, constituted a complete numbered paragraph.

2. In the tables in sections 11-0905 and 11-0907 each letter of the alphabet in column one identifies and furnishes the citation for the matter in column one following such letter and also identifies and

furnishes the citation for the matter appearing in column two and column three opposite the matter so identified in column one.

3. All matter identified by a letter of the alphabet printed in lower-case print and enclosed in parentheses may be referred to as an "item"; all matter identified by a figure printed in arabic numerals and enclosed in parentheses may be referred to as a "sub-item".

4. The headings appearing at the top of the columns are not part of the identification and citation of any part of the table, but the portion of any item or sub-item appearing in a column may be referred to as the portion of that item appearing in that column and "relating to" species, open season, bag limit, area, game and open season, manner of taking, specified waters of the state, or open season, size limits and limits of catch, as the case may be.

5. This section does not make ineffective or affect the construction or operation of any other form or manner of reference used in any act enacted by the legislature.

TITLE 3

GENERAL POWERS AND DUTIES OF THE DEPARTMENT

- Section 11-0303. Management of fish and wildlife resources; general purposes and policies governing manner of exercise of powers.
- 11-0305. General powers and duties of the department.
- 11-0306. The Hudson River estuary management program.
- 11-0306-a. The Flax Pond tidal wetlands sanctuary.
- 11-0307. Migratory game birds; regulation.
- 11-0308. Sale of small lead fishing sinkers prohibited.
- 11-0309. Extension of open seasons after emergency closing.
- 11-0311. Additional or other protection.
- 11-0313. Waters closed to taking of fish.
- 11-0315. Hudson River shad fishery.
- 11-0317. Seasons and limits for taking fish in certain border waters.

- 11-0319. Seasons, limits and manner of taking fish in waters of New York City water supply open to public.
- 11-0321. "Restricted areas"; additional enforcement on private premises.
- 11-0323. Publication of Fish and Wildlife Law.
- 11-0325. Control of dangerous diseases.
- 11-0327. Conservation fund advisory board.
- 11-0329. Outdoor recreation and trail maintenance; regulation.

§ 11-0303. Management of fish and wildlife resources; general purposes and policies governing manner of exercise of powers.

1. The general purpose of powers affecting fish and wildlife, granted to the department by the Fish and Wildlife Law, is to vest in the department, to the extent of the powers so granted, the efficient management of the fish and wildlife resources of the state. Such resources shall be deemed to include all animal and vegetable life and the soil, water and atmospheric environment thereof, owned by the state or of which it may obtain management, to the extent that they constitute the habitat of fish and wildlife as defined in section 11-0103. Such management shall be deemed to include both the maintenance and improvement of such resources as natural resources and the development and administration of measures for making them accessible to the people of the state. To obtain these results it shall include, to the extent authorized by law, the undertaking and execution of reciprocal and cooperative arrangements with the government of the United States, with other states, and with other departments and agencies of this state, political subdivisions and public corporations of this state and owners and lessees of privately owned lands and waters, and shall also include continuation of research and educational programs.

2. To such extent as it shall deem feasible without prejudice to other functions in the management of fish and wildlife resources of the state and the execution of other duties imposed by law, the department is directed, in the exercise of the powers conferred upon it, to develop and carry out programs and procedures which will in its judgment, (a)

promote natural propagation and maintenance of desirable species in ecological balance, and (b) lead to the observance of sound management practices for such propagation and maintenance on lands and waters of the state, whether owned by the state or by a public corporation of the state or held in private ownership, having regard to (1) ecological factors, including the need for restoration and improvement of natural habitat and the importance of ecological balance in maintaining natural resources; (2) the compatibility of production and harvesting of fish and wildlife crops with other necessary or desirable land uses; (3) the importance of fish and wildlife resources for recreational purposes; (4) requirements for public safety; and (5) the need for adequate protection of private premises and of the persons and property of occupants thereof against abuse of privileges of access to such premises for hunting, fishing or trapping.

3. The department may, until December thirty-first, two thousand twenty-seven, fix by regulation measures for the management of striped bass, including size limits, catch and possession limits, open and closed seasons, closed areas, restrictions on the manner of taking and landing, requirements for permits and eligibility therefor, recordkeeping requirements, requirements on the amount and type of fishing effort and gear, and requirements relating to transportation, possession and sale, provided that such regulations are no less restrictive than requirements set forth in this chapter and provided further that such regulations are consistent with the compliance requirements of applicable fishery management plans adopted by the Atlantic States Marine Fisheries Commission and with applicable provisions of fishery management plans adopted pursuant to the Federal Fishery Conservation and Management Act (16 U.S.C. § 1800 et seq.).

§ 11-0305. General powers and duties of the department.

In addition to the powers and duties provided in other sections of the Fish and Wildlife Law, the department shall have the following powers and duties:

1. To sell or furnish trees, shrubs and other plants to owners or lessees of private lands situated in the state on such terms as it deems to be for the public benefit;

2. To issue the licenses and permits provided for by law, to fix their terms, and the fees therefor, when no statutory provision is made, to designate agents to sell and promote the sale of licenses, to adopt procedures for the issuance of licenses, to establish the design and format of licenses and the information to be contained thereon, to provide where it deems appropriate for tags and buttons, to adopt license conditions respecting tagging or identifying fish and wildlife being possessed or transported, to establish procedures and requirements for reporting license sales and handling and remittance of license revenues by persons or entities issuing such licenses, to provide for acceptable methods of payment of license fees, and to revoke licenses and permits as provided by law;

3. To regulate the taking of fish in any manner other than angling, except as to migratory fish of the sea within the marine district;

4. To increase by regulation the size, as established by statute, of mesh of nets that may be used for taking fish;

5. To declare by regulation that waters, specified in the regulation, are not inhabited by trout, whenever it shall determine that the waters specified in the regulation, previously inhabited by trout, are no longer so inhabited, or shall determine that the waters specified in the regulation are unsuitable for trout;

6. To control, manage, propagate and distribute, and to regulate the transportation, importation and exportation of shellfish, cephalopoda and crustacea;

7. To regulate the examination and inspection of shellfish grounds, boats used in taking and buildings used for storage of shellfish, the handling and shipment of shellfish, the floating of shellfish, the removal of shellfish from unsanitary beds and their deposit on

unpolluted grounds;

8. To enforce all laws relating to lands under water which have been or shall be designated, surveyed and mapped out pursuant to law as oyster beds or shellfish grounds and to grant leases of such lands, belonging to the state, for shellfish culture, according to law;

9. To conduct, manage and control all hatching and biological stations, game farms, game refuges, rearing stations and public hunting and fishing grounds owned or operated by the state;

10. To enforce all provisions of the Fish and Wildlife Law and regulations pursuant thereto, and all laws relating to fish, wildlife, protected insects, shellfish, crustacea and game;

11. To settle or compromise in its discretion any action or cause of action to recover a penalty under the provisions of this chapter as it may deem advantageous to the state;

12. To grant refunds of moneys erroneously received by the department, within two years of receipt thereof and upon satisfactory proof of entitlement, which refunds, upon approval of the commissioner and audit by the State Comptroller, shall be paid from any moneys available to the department in the Conservation fund.

13. Notwithstanding any other provision of law, to regulate the possession, transportation, sale, barter and purchase of Pacific salmon and parts thereof; and to require permits or otherwise regulate the sale, barter and purchase of raw or unprocessed Pacific salmon eggs.

14. Notwithstanding any inconsistent provision of law, the commissioner may designate no more than eight days in each year that shall be effective in every administrative region of the department, as free sport fishing days during which any person may, without having a sport fishing license and without the payment of any fee, exercise the privileges of a holder of a sport fishing license, subject to all of the limitations, restrictions, conditions, laws, rules and regulations

applicable to the holder of a sport fishing license. Free sport fishing days shall be designated in a manner determined by the department to best provide public notice thereof and to maximize public participation therein, so as to promote the recreational opportunities afforded by sport fishing.

15. To identify, manage and conserve plants, animals and ecological communities that are rare in New York state, located on state-owned lands under the jurisdiction of the department.

16. Notwithstanding any inconsistent provision of law, to authorize free sport fishing clinics. A free sport fishing clinic shall include, but not be limited to, instruction provided by employees of the department or its designee in recreational angling, including its benefits and values, and may also include instruction and other information relevant to an understanding of fisheries management, ethics and aquatic ecology and habitat. No license or recreational marine fishing registration is required to take fish by angling while participating in a fishing clinic conducted by the department or its designee that has been designated by the commissioner as a free sport fishing clinic. Such clinics shall be implemented consistent with department standards and in a manner determined by the department to best provide public notice thereof and to maximize public participation therein, so as to promote the recreational opportunities afforded by sport fishing. Further, the commissioner may designate additional fishing events organized through the department that provide physical or emotional rehabilitation for veterans, as defined in subdivision three of section one of the veterans' services law, or active duty members of the armed forces of the United States. No license or recreational marine fishing registration shall be required for such veterans or active duty members to take fish by angling while participating in these events.

17. To prepare or cause to be prepared voluntary habitat stamps and furnish such stamps annually to license issuing agents and officers for sale and issuance in the same manner as licenses and other types of stamps. The department shall, by rule, establish the fee for the habitat stamp which shall be no less than five dollars plus an additional amount

for the issuing agent or officer. The purchase of a stamp is voluntary and a stamp need not be possessed in order to take fish or wildlife.

18. To provide a mechanism for a one dollar voluntary contribution to the venison donation account on all hunting and fishing license applications administered by the department. The option to utilize the mechanism shall be voluntary and the mechanism need not be utilized in order to process hunting or fishing license applications.

§ 11-0306. The Hudson River estuary management program.

1. There is established a Hudson River estuarine district which shall include the tidal waters of the Hudson River, including the tidal waters of its tributaries and wetlands from the federal lock and dam at Troy to the Verrazzano-Narrows.

2. The department shall establish a Hudson River estuary management program for the Hudson River estuarine district and associated shorelands, with consideration to the remainder of the Hudson River, New York bight, and the waters around Long Island only as they impact the Hudson River estuary, in order to protect, preserve and, where possible, restore and enhance the Hudson River estuarine district.

3. The commissioner shall appoint a Hudson River estuary management advisory committee with whom he or she shall consult on regulatory, policy and other matters affecting the management, protection and use of the Hudson River estuarine district and on the formulation of a Hudson River estuary management program. Such committee shall consist of not less than eleven members who represent interests directly involved in the Hudson River estuarine district and shall include representatives of commercial fishing, sportsmen, research, conservation, and recreation. For the purpose of immediate implementation of this section, the committee shall consist of the current members of the Hudson River fishery advisory committee.

4. The commissioner shall maintain in the department the position of

Hudson River estuary coordinator to manage the Hudson River estuary management program and to assist the commissioner and the advisory committee in its development and implementation.

5. There is established a Hudson River estuarine sanctuary for the purpose of protecting areas of special ecological significance within the Hudson River estuarine district and associated shorelands. The estuarine sanctuary shall be managed as a long-term estuarine field laboratory for research and education concerning the Hudson River ecosystem. The estuarine sanctuary shall be composed initially of the four sites now within the Hudson River national estuarine research reserve (HRNERR). The department shall adopt the Hudson River national estuarine research reserve program as a program of the department for the purpose of operating the estuarine sanctuary. The sanctuary shall be managed by the department in cooperation with the Hudson River estuary management advisory committee and the commissioner shall have the authority to designate additional sites for inclusion within the estuarine sanctuary. The estuarine sanctuary shall be open to those activities that are compatible with the primary purposes and management goals of the estuarine sanctuary and its individual sites.

6. The department, in cooperation with the Hudson River estuary management advisory committee, shall report to the chairpersons of the assembly committee on environmental conservation and the senate committee on environmental conservation on or before March first, nineteen hundred eighty-eight with an estuary management strategy for the development of a continuing fifteen-year estuary management program for the preservation, protection, restoration and enhancement of the Hudson River estuarine district and associated shorelands including but not limited to its natural resources, its fish and wildlife and the habitats within it. The estuary management strategy shall include but not be limited to the following:

a. A discussion of how the Hudson River estuary functions and the relative role of different species and an explanation of the role of the Hudson River estuary as a distinct ecosystem, as a habitat for fish and wildlife, as a commercial fishery and as a recreational resource.

b. Identification of areas of special ecological significance within the estuarine district and associated shoreland including but not limited to spawning, nursery, wintering, feeding and foraging habitat for marine, anadromous, catadromous, riverine, and freshwater species and a description of the annual dynamics of such habitats including the geochemical, thermodynamic, biological, hydrodynamic and hydrological states and mechanisms critical to habitat maintenance.

c. A plan for the development and operation of the Hudson River estuarine sanctuary which shall include criteria for the identification of additional areas of special ecological significance and for additions to the Hudson River estuarine sanctuary and a program of education and research which shall be consistent with the purposes of subdivision five of this section.

d. A status report on the populations and relative abundance of species that have potential or existing recreational or commercial value or that play a key role in the functioning of the estuary and on the diversity of species in the estuarine district, including a plan for maintaining an accurate evaluation of populations and relative abundance and diversity on an annual basis.

e. Evaluation of the impact of the uses of water on the Hudson River estuarine district including present and future demands for water and their impact on the balance of fresh and salt water in the estuary and the role of the location of the salt front in the estuary.

f. Identification of areas of potential ecological significance which may require rehabilitation.

g. A status report on the levels of toxicants in and their effects on important estuarine indicator species and for species that have potential or existing recreational or commercial value.

h. Identification of the anthropogenic activities and the conservation and management problems that pose an existing or potential threat to the

resources and the functioning of the estuary.

i. An inventory of ownership and tenancy of underwater lands in the estuarine district.

j. Recommendations for developing the economic potential of the Hudson River fishery and maintaining its traditional commercial fishery.

k. Recommendations for implementation of a fifteen-year estuary management program including a list of tasks that must be accomplished to implement the purposes stated in this subdivision and address the findings and implement the recommendations of the estuary management strategy.

l. Evaluation of the existing resources and authority of the department to implement the estuary management program including research, information and data needs and legislative, administrative and regulatory recommendations and the potential role of private sources and institutions.

7. On or before January first, nineteen hundred eighty-nine, the commissioner shall present the department's Hudson River estuary management program at a public hearing. This public hearing shall be advertised in official newspapers in each county along the Hudson River corridor from the city of New York to Albany and Rensselaer counties. The program and public comments regarding it shall be included in a report on the program to be filed with the chairperson of the assembly environmental conservation committee and the chairperson of the senate committee on environmental conservation on or before March first, nineteen hundred eighty-nine.

8. On or before the first day of March of each year, commencing on March first, nineteen hundred ninety, the commissioner shall prepare a report detailing the progress of the estuary management program including but not limited to consideration of those matters listed in subdivision six of this section as well as any planned or anticipated regulatory or policy changes which may affect the estuarine district.

The commissioner shall present the department's annual report at a special public meeting for the purpose of public review and to hear public comment on the annual report. The report shall be filed with the chairpersons of the assembly committee on environmental conservation and the senate committee on conservation and recreation.

9. The commissioner shall consult with the advisory committee regularly and in a timely fashion in the preparation of the estuary management strategy, the estuary management program and his or her yearly report to the legislature regarding any planned or anticipated regulatory or policy changes which will affect the estuarine district. The commissioner shall include in his or her reports to the legislature the comments, recommendations and observations of the advisory committee and a discussion of the consulting role that was played by the advisory committee.

10. The advisory committee shall consult with department personnel on matters affecting the Hudson River estuary on a regular basis and report to the commissioner on or before the first day of December of each year on its activities and concerns.

11. Any agreement or negotiated settlement which existed between the commissioner and the previously existing Hudson River fishery advisory committee, whose membership will comprise the Hudson River estuary management advisory committee for the immediate purposes of implementing this section, shall be binding between the commissioner and the Hudson River estuary management advisory committee.

§ 11-0306-a. The Flax Pond tidal wetlands sanctuary.

1. There is established a Flax Pond tidal wetlands sanctuary for the purpose of protecting areas of special ecological significance within the Flax Pond tidal marsh. The sanctuary shall be composed of the tidal wetlands located in the village of Old Field, county of Suffolk as designated on the March tenth, nineteen hundred sixty-six survey filed in the Suffolk County Clerk's office as file number 136899 and including

a permanent easement for the State University of New York as designated on the March ninth, nineteen hundred sixty-six survey filed in the Suffolk County Clerk's office as file number 81558, and including acreage of 146.162 acres. The sanctuary shall be managed by the department in cooperation with the state university at Stony Brook. The sanctuary shall be managed as a long-term field laboratory for research and education to provide:

a. a natural area for academic research across a wide variety of disciplines including, but not limited to, the fields of community ecology, population ecology, predator-prey relationships, food chain and web dynamics, nutrient and energy flow, hydrology, ornithology, botany, and forestry management;

b. opportunities for instruction between teaching faculty and students by using the property as an "outdoor classroom";

c. opportunities for students, faculty, and the public to connect with the natural world around them;

d. a meaningful contribution toward protection of local and regional biodiversity;

e. lawful recreational angling, however no commercial fishing or shellfishing, nor the taking of invertebrates for bait shall be permitted within the sanctuary;

f. lawful waterfowl hunting during the appropriate open season following receipt of a tidal wetlands access permit issued pursuant to department regulations; and

g. boating by sail, human propelled oar or paddle, or mechanically propelled vessels having a source of power less than ten horsepower.

§ 11-0307. Migratory game birds; regulation.

* 1. The department may adopt rules and regulations in relation to

migratory game birds, provided such regulations are no less restrictive than federal regulations made under authority of the Migratory Bird Treaty Act of July 3, 1918, (16 U.S.C. secs. 703-711), as may be amended from time to time.

* NB Effective until December 31, 2027

* 1. The department shall adopt rules and regulations in relation to migratory game birds consistent with federal regulations made under authority of the Migratory Bird Treaty Act of July 3, 1918, (16 U.S.C. secs. 703-711), as presently constituted or as hereafter amended.

* NB Effective December 31, 2027

2. The department shall, by rule and regulation, establish the means or method for creation of both voluntary migratory bird stamps and migratory bird art prints, their administration, sale and distribution and other matters relating to such voluntary stamps and art prints. The department shall select appropriate works of art that will reflect migratory bird species and/or aquatic ecosystem scenes. The department may prepare or cause to be prepared voluntary migratory bird stamps and prints for any year in excess of the number otherwise to be issued for sale to collectors or other persons desiring to purchase such voluntary stamps or prints.

3. The department shall prepare or cause to be prepared voluntary migratory bird stamps and shall furnish such migratory bird stamps annually to license issuing agents and officers for issuance or sale in the same manner as other types of licenses. The department shall, by rule and regulation, establish the fee for such voluntary stamps which shall not exceed five dollars as a fee and fifty cents for the issuing agent or officer for a stamp sold in the year in which it was issued. The purchase of a stamp is voluntary and need not be possessed in order to hunt migratory waterfowl.

§ 11-0308. Sale of small lead fishing sinkers prohibited.

1. No person shall sell at retail or offer for retail sale lead fishing sinkers weighing one-half ounce or less. Each day of sale or

offering for sale shall constitute a separate violation of this section.

2. For the purposes of this section, the following terms shall have the following meanings:

(a) "sinker" shall mean any device that is designed to be attached to a fishing line and intended to sink the line. Such term shall not include artificial lures, weighted line, weighted flies or jig heads.

(b) "sell at retail" or "retail sale" shall mean the sale to any person in the state for any purpose other than for resale.

3. The department shall provide notice of the prohibition of the retail sale or offering for sale of lead fishing sinkers weighing one-half ounce or less in the state fishing regulations guide.

§ 11-0309. Extension of open seasons after emergency closing.

Whenever open seasons for hunting, fishing or trapping have been curtailed by a proclamation of the Governor pursuant to section 9-1101 of this chapter closing forests and woodlands, or open lands or waters to the public, or suspending an open season for taking fish or wildlife, because of danger of fire, the department, at the expiration of the effective period of the proclamation, shall have power, within the limits of counties affected by the proclamation, to extend by regulation any open season, for a period not to exceed the effective period of the proclamation.

§ 11-0311. Additional or other protection.

1. The department shall have power to give to any wildlife or fish, other than migratory fish of the sea, protection or additional protection to that afforded by this article, if ten or more citizens file with the department a petition signed by them stating the grounds on which such protection is necessary and giving their addresses. If the department entertains the petition it shall within twenty days thereafter hold a public hearing thereon in a place determined by it in

the locality affected. At least ten days before the hearing, notice thereof shall be advertised in a newspaper published in each county affected. The notice shall state the grounds of the application and a copy thereof shall be mailed to each petitioner at least ten days before the hearing.

2. If after the hearing the department determines that by reason of disease danger of extermination or from other cause or reason, such species of fish or wildlife requires such additional or other protection, either local or state-wide, the department may adopt regulations restricting the destruction, disturbance or taking of such species. Such regulations may be adopted for the entire state or any part of it.

3. A regulation adopted pursuant to this section is effective according to its terms notwithstanding any other provision of the Fish and Wildlife Law.

§ 11-0313. Waters closed to taking of fish.

The department shall have power by regulation to close any waters of the state to the taking of fish whenever an environmental investigation it causes to be made reveals that fish life in such waters is in imminent danger of undue depletion because of low water levels brought on by drought. Any such regulation shall remain in force until the department finds that the low water emergency has passed and repeals the regulation.

§ 11-0315. Hudson River shad fishery.

The department is authorized in its discretion to adopt regulations establishing restrictions as to numbers and lengths and types of nets and other gear, compulsory lift periods, licenses, closed season, protected waters or other like measures, as in its judgment may be desirable for the protection of the shad fishing in the Hudson River. In

adopting any such regulation, due regard shall be given to the needs of persons earning their livelihood by shad fishing, opportunity to be heard shall be given, and there shall be no discrimination in such additional regulations against the citizens of any other state.

§ 11-0317. Seasons and limits for taking fish in certain border waters.

1. After consultation with the appropriate agencies of the neighboring states or provinces mentioned in this section, the department shall have power to adopt regulations establishing open seasons, minimum size limits, manner of taking, creel and seasonal limits for the taking of fish in the waters of Indian Lake and Mianus Reservoir, both situated partly in New York and partly in Connecticut, and in the waters of Greenwood Lake, situate partly in New York and partly in New Jersey, and in the Delaware River, situate partly in New York and partly in Pennsylvania and in the waters of Lake Champlain situate partly in New York, partly in Vermont and partly in the Province of Quebec. Such open seasons, manner of taking and limits shall, whenever possible, be made uniform, with those fixed by the neighboring state or province for the waters in question with respect to all species upon which agreement can be reached with the appropriate agency of that jurisdiction.

2. When the department shall find that conditions permit restoration and maintenance of the shad run of the Delaware River and that restrictions imposed under the foregoing powers are inadequate to cooperate with Pennsylvania and New Jersey in maintaining the maximum sustained yield of such fishery, the department is authorized after consultation with the appropriate agencies of Pennsylvania and New Jersey to declare by regulation that an emergency exists and in its discretion to impose such additional restrictions for the taking of shad in the Delaware River and its tributaries as to numbers and lengths and types of nets and other gear, compulsory lift periods, licenses, closed season, protected waters or other like measures as may in its judgment be necessary to maintain such maximum sustained yield. In adopting any such regulation, the department shall observe the conditions prescribed in section 11-0315.

3. After consultation with the appropriate agencies of the neighboring states and the Province of Ontario, the department shall have power to adopt regulations establishing open seasons, minimum size limits, manner of taking, and creel and seasonal limits for the taking of fish in the waters of Lake Erie, Lake Ontario, the Niagara river and the St. Lawrence river. Such open seasons, manner of taking and limits shall, whenever possible, be made uniform with those fixed by the neighboring states and the Province of Ontario, as the case may be, for the waters in question with respect to all species upon which agreement can be reached with the appropriate agency of that jurisdiction.

§ 11-0319. Seasons, limits and manner of taking fish in waters of New York City water supply open to public.

Notwithstanding any other provision of this article and subject to the approval of the New York City Department of Environmental Protection, the department shall have power to adopt regulations establishing open seasons, minimum size limits, manner of taking and daily and seasonal limits for taking fish in the waters of the New York City water supply which are open or may be opened in the future to the public for fishing.

§ 11-0321. "Restricted areas"; additional enforcement on private premises.

1. Without limitation of the purpose and policy described in section 11-0303, or of the powers conferred in other sections, the department is authorized:

a. to adopt by regulation, classifications of "restricted areas" lying within the boundaries of premises, or of two or more sets of contiguous premises, privately owned and with respect to which a cooperation agreement pursuant to section 11-0501 is in force, or owned by the state or a political subdivision or public corporation thereof, in which hunting, fishing or trapping, or any of them, shall be, as provided by

such regulation with respect to the classification in question, prohibited, or shall be restricted or regulated as to the manner, time or conditions applicable to the exercise in such "restricted areas" of the privilege of entry upon such premises for purposes of hunting, fishing or trapping;

b. to adopt regulations with respect to the manner in which, and the conditions upon which, such "restricted areas" shall be recognized, including obligations to be undertaken by the owner or lessee of the premises for the furtherance of sound management practices and public access for hunting, fishing or trapping, to premises outside the "restricted area", identification and notice to the public of the boundaries of the "restricted area", and the manner in which, and the grounds upon which, the recognition of a "restricted area" may be revoked or its classification changed;

c. to adopt regulations with respect to prohibitions applicable to each classification of a "restricted area";

2. Such restricted areas may be established pursuant to this section and regulations may be made with respect to the use of such areas for one or more of the following purposes:

a. providing safety zones in and around buildings;

b. providing safety zones deemed necessary for temporary periods of time for the protection of life or property during farm and woodlot operations;

c. protecting agricultural or forest crops from trampling or other damage during critical growth periods;

d. development or carrying out of a program of research in game management in connection with which the department deems it desirable to control the hunting, fishing or trapping pressures or to put into effect special regulations authorized by section 11-0311 or by any other provision of the Fish and Wildlife Law;

e. protecting the water supply or otherwise providing for the protection of the health of the people of the state;

f. such other purposes relating to farm operation, woodlot development, fish and wildlife habitat improvement or public health and safety which in the opinion of the department require special restrictions on the use of particular premises.

3. No person shall charge or collect a fee or rental for the privilege of hunting, fishing or trapping in a restricted area established under the authority of this section.

4. a. Notwithstanding the provisions of section 11-2111, a restricted area shall be deemed to be in existence and subject to the regulations established pursuant to this section with respect to restricted areas of the classification to which it is assigned, when signs identifying its existence shall have been erected on the premises in such manner as may be required by the regulations of the department applicable thereto, made as prescribed in paragraph b of subdivision 1 of this section.

b. No person shall enter or remain unlawfully or engage in any activity upon land which has been posted pursuant to such regulations in violation of the terms of such posted signs.

c. No unauthorized person shall injure, conceal, deface or remove a sign erected and maintained in accordance with such regulations.

d. The requirements of posting provided in section 11-2111 shall not be applicable to the erection of signs identifying a restricted area.

e. Restricted areas may be established notwithstanding that the lands or waters or part of them, included within said restricted area may have been stocked with fish and game by the state.

f. The existence of the restricted area shall terminate in such manner as may be provided by regulations of the department.

5. The department is further authorized, at the discretion of the commissioner, to exercise all of the powers and authority set forth in this section, in relation to premises with respect to which agreements are in effect between the owner of such premises and the Agricultural Stabilization and Conservation Service of the United States Department of Agriculture and such agreements provide for such regulations, whether or not such premises are the subject of an agreement pursuant to section 11-0501. Payments to such landowners by the United States Department of Agriculture under such agreements shall not constitute a fee or rental within the meaning of subdivision 3 of this section.

§ 11-0323. Publication of Fish and Wildlife Law.

1. The department shall compile and index each year after the adjournment of the legislature the laws relating to fish and wildlife, as well as invasive species (as defined in section 9-1703 and 9-1710 of this chapter), as amended to date. Copies of the compilation shall be printed in pamphlet form of pocket size in the number for which the legislature may appropriate funds.

2. The department shall also prepare a syllabus of such laws and information informing migratory game bird hunters where they can obtain information regarding open seasons and bag limits, federal regulations pursuant to sections 11-1721 and 11-1723 of this article and of laws relating to invasive species (as defined in section 9-1703 of this chapter). The department shall deliver copies of such syllabus to county, city, town and village clerks in numbers sufficient for the furnishing of one copy to each person to whom a hunting, trapping or fishing license is issued. Each such licensee shall be entitled to one copy of such syllabus.

§ 11-0325. Control of dangerous diseases.

1. Whenever it is jointly determined by the Department of

Environmental Conservation and the Department of Health or the Department of Agriculture and Markets, and certification is made to the Commissioner of Environmental Conservation by the Commissioner of Health or the Commissioner of Agriculture and Markets, that a disease, which endangers the health and welfare of fish or wildlife populations, or of domestic livestock or of the human population, exists in any area of the state, or is in imminent danger of being introduced into the state, the department shall adopt any measures or regulations with respect to the taking, transportation, sale, offering for sale or possession of native fish or feral animals it may deem necessary in the public interest to prevent the introduction or spread of such disease. The department may undertake such fish or wildlife control measures it may deem necessary to eliminate, reduce or confine the disease.

2. Whenever it is determined by the Department of Environmental Conservation that an epizootic disease which endangers the health and welfare of native fish or feral animal populations only, exists in any area of the state, or is in imminent danger of developing or being introduced into the state, the department may adopt any measures or regulations with respect to the taking, transportation, sale, offering for sale or possession of native fish or feral animals deemed necessary in the public interest to prevent the development, spread or introduction of such disease.

§ 11-0327. Conservation fund advisory board.

1. Creation of conservation fund advisory board. (a) The conservation fund advisory council is hereby continued and reestablished in the department to be the conservation fund advisory board, which shall make recommendations to state agencies on state government plans, policies, and programs affecting fish and wildlife as more specifically outlined below. Such board shall be composed of eleven voting members, including a member designated by the state fish and wildlife management board, a member designated by the New York state conservation council, three members appointed by the governor, two members appointed by the temporary president of the senate, one member appointed by the minority

leader of the senate, two members appointed by the speaker of the assembly, and one member appointed by the minority leader of the assembly. None of the members shall be employees of the department. Of the members appointed by the governor, the temporary president of the senate, the minority leader of the senate, the speaker of the assembly, and the minority leader of the assembly, no two shall be residents of the same department of environmental conservation region. Each member shall be a resident of the region which that person is appointed to represent. The board shall be representative of individual and organized sportsmen's interests in each region of the state. In addition to these voting members, the commissioner and the chairmen of the senate finance committee, the senate environmental conservation committee, the assembly ways and means committee and the assembly committee on environmental conservation or their designees shall serve as ex officio, non-voting members of the advisory board.

(b) Persons designated or appointed to the advisory board, excluding ex officio members, shall have demonstrated a long-standing interest, knowledge and experience in fish and wildlife management, including hunting or fishing, as evidenced in part by the holding of a valid New York state hunting, fishing or trapping license at the time they are designated or appointed to such board and for each of the three years immediately preceding their designation or appointment to such board. One member, who may not be an ex officio member, shall be elected chairman of the advisory board by a majority vote of the members of such board, excluding ex officio members.

(c) The designation or appointment of any person to the advisory board, excluding ex officio members, shall be considered terminated if, in the course of any one-year period commencing from the date of their designation or appointment, such person shall have accrued three unexcused absences from meetings of the board. Excuses for absences are to be accepted at the discretion of the chairman. In the event of such termination, the resulting vacancy shall be filled as described in subdivision five of this section.

2. Meetings of the advisory board. The board shall meet at least quarterly at the call of the chairman.

3. Duties of the advisory board. The advisory board shall have the following powers and duties:

(a) To review the allocations and expenditures of the department for fish and wildlife purposes as provided in section 11-0303 of this title and report to the commissioner by November fifteenth of each year. To assist the board in its review, the department shall by September first of each year make available to the board, the governor and the legislature current and anticipated income and expenditures for the fish and wildlife programs, including planned expenditures by time and activity code for the next fiscal year. Such report shall include the findings of the advisory board regarding such allocations and expenditures, including expenditures and appropriations from the conservation fund and the extent to which such expenditures and appropriations are consistent with the requirements of state law. The report shall also include recommended maximum annual fees for the licenses and bowhunting and/or muzzle-loading privileges identified in subdivision 3 of section 11-0715 of this article. In recommending such fees the board shall consider economic indicators, the status of the conservation fund, and such program indicators as it may deem appropriate. The commissioner shall submit such report, in its entirety, to the governor and the legislature.

(b) To make reports and release information from time to time, as it deems necessary, to sportsmen and the general public regarding the conservation fund and the fish and wildlife program.

(c) To consult with fish and wildlife interests and render annual reports to the commissioner on fiscal needs and make recommendations on how such needs shall be met.

(d) To assist the department's efforts to expand the available sources of income for the conservation fund and advise the department with respect to the needs of various fish and wildlife programs.

(e) To adopt, promulgate, amend or rescind suitable procedural rules with respect to the composition, internal organization and functioning of the board; and such other rules, regulations and procedures as may be necessary or desirable to effectuate the purposes of this section.

(f) To work to encourage both residents and non-residents to hunt, fish and trap in New York, and to promote conservation and management of New York's natural resources.

4. Advisory board members; expenses. Conservation fund advisory board members shall receive no salary, but the necessary traveling expenses of voting members when attending meetings of the board shall be paid from moneys appropriated to the board for travel and shall be paid on vouchers certified by the chairman of the board upon the audit of the comptroller in the manner provided by law.

5. Term of office. All voting members of the board shall serve terms of three years. An appointment to fill a vacancy shall be made for the remainder of the affected term in the same manner as the original appointment was made. Such appointment shall be made within sixty days of the date the position becomes vacant.

6. State assistance. The commissioner shall, at any time requested by the board, make any and all information readily available to the board which the board indicates is needed to properly and thoroughly carry out its responsibilities. The commissioner shall also make available to the board such secretarial and/or clerical aid reasonably necessary to allow the board to carry out its duties and responsibilities.

§ 11-0329. Outdoor recreation and trail maintenance; regulation.

1. The department shall, by rule and regulation, establish the means or method for the creation of voluntary outdoor recreation and trail maintenance pins and patches, their administration, sale and distribution, the fee therefor, and other matters relating to such voluntary pins and patches.

2. The department shall prepare or cause to be prepared voluntary outdoor recreation and trail maintenance pins and patches and furnish such pins and patches annually to license issuing agents and officers for sale and issuance in the same manner as licenses and other types of pins and patches. The purchase of such pins and patches shall be voluntary and need not be possessed in order to participate in outdoor recreational activities.

TITLE 5

**FISH AND WILDLIFE MANAGEMENT PRACTICES COOPERATIVE
PROGRAM; PROHIBITIONS; TAKING OF FISH, WILDLIFE,
SHELLFISH AND CRUSTACEA FOR SCIENTIFIC OR PROPAGATION
PURPOSES; DESTRUCTIVE WILDLIFE; RABIES CONTROL;
GUIDES; ENDANGERED SPECIES**

- Section 11-0501. Fish and wildlife management practices cooperative program.
- 11-0503. Polluting streams prohibited.
- 11-0505. Interference with fish and wildlife.
- 11-0507. Liberation of fish, shellfish and wildlife.
- 11-0509. Water chestnut.
- 11-0511. Possession and transportation of wildlife.
- 11-0512. Possession, sale, barter, transfer, exchange and import of wild animals as pets prohibited.
- 11-0513. Pigeons.
- 11-0514. Eurasian boars prohibited.
- 11-0515. Licenses to collect, possess or sell for propagation, scientific or exhibition purposes.
- 11-0517. Taking for propagation and stocking; fish hindering propagation of food fish or shellfish.
- 11-0519. Disposition of fish, wildlife, game, shellfish, crustacea or protected insects seized by or surrendered to enforcement officers.
- 11-0521. Destructive wildlife; taking pursuant to permit.
- 11-0522. Urban deer management pilot program.
- 11-0522-a. Long Island deer management pilot program.
- 11-0523. Destructive or menacing wildlife; taking without permit.
- 11-0524. Nuisance wildlife control operators.
- 11-0525. Control of rabies in wildlife.
- 11-0527. State aid to counties participating in control of rabies in wildlife.
- 11-0529. Cats hunting birds; dogs pursuing deer or killing other wildlife in certain areas.

- 11-0531. Bounties prohibited.
- 11-0533. Licensing of guides.
- 11-0535. Endangered and threatened species, species of special concern.
 - 11-0535-a. Illegal ivory articles and rhinoceros horns.
 - 11-0535-b. Vulnerable species.
 - 11-0535-c. Endangered and threatened species mitigation bank fund.
- 11-0536. Sale of certain wild animals or wild animal products prohibited.
- 11-0537. Bald and golden eagles; prohibited acts.
- 11-0538. Direct contact between public and big cats prohibited.
- 11-0539. New York natural heritage program.
- 11-0540. Prohibition on permits authorizing the use of elephants in entertainment acts.
- 11-0541. Monarch preservation plan.

§ 11-0501. Fish and wildlife management practices cooperative program.

1. Purpose.

The cooperative program provided in this section is authorized for the purpose of obtaining on the privately owned or leased lands and waters of the state practices of fish and wildlife management which will preserve and develop the fish and wildlife resources of the state and improve access to them for recreational purposes by the people of the state.

2. Definitions.

a. "Fish and wildlife management" means management of either fish or wildlife, or both.

b. "Region" means a fish and wildlife management region established as provided in subdivision 3.

c. "Regional board" means a board constituted as provided in subdivision 4. "State board" means the board constituted as provided in subdivision 5.

d. "Cooperator" means a person with whom an agreement is made as provided in subdivision 9.

e. "Regional supervisor for natural resources" means the employee of the department bearing that title in each region.

f. "Department", "commissioner", "fish" and "wildlife" have the meanings stated in section 11-0103.

3. Fish and wildlife management regions.

The commissioner shall establish not to exceed fifteen fish and wildlife management regions of one or more counties each, which shall include all counties of the state not wholly included within a city.

4. Regional fish and wildlife management boards.

a. A regional fish and wildlife management board shall be appointed in each of the regions established under subdivision 3 of this section. Such regional board shall consist of three members from each county within the region which has appointed its members. In each county, one member shall be a member of or represent the board of supervisors or county legislative body, one member shall represent the landowners of the county and one member shall represent the sportsmen of the county. Such members from each county shall be appointed by the chairman of the board of supervisors of such county with the approval of the board of supervisors, except that in a county having a county president, a county executive or other chief executive officer, the chief executive officer shall appoint the members representing such county with the approval of the board of supervisors of such county. In a county having an elected legislative body the presiding officer shall appoint the members representing such county with the approval of the legislative body. If

there is no presiding officer then the members representing such county shall be appointed by the legislative body as a whole. If a member of the board of supervisors or legislative body is not available to actively participate on the fish and wildlife management board, a representative shall be selected who is an elected county official or who is employed by the county government in a position having administrative or managerial authority. A landowner representative must actually reside upon rural lands within the county and actually be engaged in the operation of such lands for production of agricultural commodities or forest products. If a landowner representative with such qualifications is not available to actively participate on the fish and wildlife management board, a representative may be appointed who has been for at least five of the past ten years, before commencing his first term in any series of consecutive terms, engaged in such operation of rural lands, and who resides within the county he represents. If no landowner representative with either of these qualifications is available to actively participate on the fish and wildlife management board a representative may be appointed who is a resource manager engaged in such operations on rural lands, and designated by the corporate owner of those lands to represent the landowner's agricultural or silvicultural interests. In the case of certain counties designated by the full state board with a scarcity of rural lands operated for production of agricultural commodities or forest products, the landowner representative shall own such rural lands in New York state, whether or not those properties lie within the county wherein he resides and represents. A sportsman representative must be a resident of the county. The said chief executive officer, presiding officer or legislative body shall receive and consider for appointment as the landowner representative, the recommendations made by the county farm bureau and Pomona grange, and for appointment as the sportsmen's representative, the recommendations made by the county units of organized sportsmen's groups, as well as considering the advantages of new representatives. The term of office of regional board members shall be two calendar years. A member shall be eligible for reappointment to successive terms of office where otherwise qualified. The term of the sportsmen's representative and the board of supervisors or county legislative body representative shall expire at the end of the odd numbered years; the

term of the landowner representative shall expire at the end of the even numbered years. An alternate board of supervisors or county legislative body representative, sportsmen's representative and landowner representative may also be appointed, who shall be available to serve in the event of the temporary inability of the member sportsmen's representative or member landowner representative or board of supervisors or county legislative body representative to so function. A vacancy in membership of a regional board shall be filled in the same manner as the original appointment for the balance of the unexpired term during which the vacancy occurs; if a supervisor member or county legislative body member shall cease to be a supervisor or member of the legislative body before the expiration of his term as a member of the regional board, a successor shall be appointed for the unexpired balance of the term as a member of the regional board. The chairman of the Board of Directors of each soil and water conservation district and the chairman of each regional forest practice board within the fish and wildlife management region, or his or their representatives, shall be advisory members without vote.

b. Each regional board shall elect annually from its members a chairman, a vice chairman and a representative to the state board and may elect a secretary. The regional supervisor for natural resources may serve as secretary of the board if the board so requests, but in any event such supervisor's services shall always be available to the board.

5. State fish and wildlife management board.

a. There shall be a state fish and wildlife management board which shall consist of three representatives, one each representing landowners, sportsmen, and county legislative bodies, from each of the existing regional boards, and, as advisory members of the board without vote, the following persons during their term of office as such, or their representatives: the Commissioner of Environmental Conservation, the Commissioner of Agriculture and Markets, the Commissioner of Transportation, the Commissioner of Parks, Recreation and Historic Preservation, the dean of the New York State College of Agriculture and Life Sciences, the president of the State University of New York College

of Environmental Science and Forestry, the chairman of the State Soil and Water Conservation Committee, the chairman of the State Forest Practice Board, the president of the New York Farm Bureau, the Master of the New York State Grange, the president of the New York State Conservation Council, and the president of the New York State Division of Izaak Walton League.

b. Each member other than the advisory members shall be elected by and from the membership of the respective regional boards for a term of one year from the day of his election, unless within such period he shall cease to be a member of the regional board which elected him, in which event he shall cease to be a member of the state board on the day he ceases to be a member of such regional board. Any vacancy in the state board other than in the office of an advisory member shall be filled for the balance of the unexpired term so vacated by election from its membership by the regional board in which such vacancy occurred.

c. The members of the state board shall elect one of their voting members to serve as chairman, and another as vice chairman, to serve in the absence or inability to serve of the chairman. An officer of the department designated by the commissioner may act as secretary for the board if the board so elect; otherwise a secretary shall be elected from the membership.

d. The state board shall meet at the call of the chairman or secretary when and where necessary within the state.

6. Regional and state board members; expenses.

Regional and state board members, including advisory members, shall receive no salary, but their necessary traveling expenses when attending meetings of the regional or state boards shall be paid from moneys appropriated to the department for travel and shall be paid on vouchers certified by the chairman of the appropriate regional board or state board upon the audit of the comptroller in the manner provided by law.

7. Duties of regional boards.

a. Each regional board shall formulate a statement of fish and wildlife management practices appropriate for its region and submit it for approval to the state board and the commissioner. After such a statement of practices has been approved by the state board and the commissioner, the regional board shall formally adopt such statement of practices and encourage landowners, lessees and sportsmen within the region to adopt and carry out the practices approved.

b. A copy of each resolution so adopting a statement of practices shall be filed in the principal office of the department.

c. Any practices formulated in specific terms shall, unless otherwise expressly limited by the words "without variation", "without alternative", or the like, be interpreted as permitting such variations or alternatives as shall be accepted by the regional board as satisfying the purpose of the practices. But no such variation or alternatives shall be deemed to be a compliance with the practices for purposes of subdivisions 9 and 10 unless the approval of the regional board is recorded in writing.

8. Duties of the state board.

a. The state board shall pass upon and approve or disapprove the fish and wildlife management practices formulated by the regional boards. The state board may, with the advice of the commissioner, and upon recommendations from the regional boards, formulate recommended uniform fish and wildlife management practices for similar ecological types within the various ecological regions of the state. Such uniform practices may thereafter be incorporated expressly or by reference in the statement of practices formulated by regional boards, but shall not be operative as practices of any region unless so incorporated.

b. The state board shall also have the following duties and powers:

(1) to recommend to the regional boards such policies and procedures for the carrying out of fish and wildlife management practices as it deems appropriate;

(2) to keep the several regional boards informed of the activities and experience of all other regional boards in the state and to facilitate an interchange of advice and experience between such regional boards and cooperation between them, and to provide advice and assistance in coordinating the programs of the several regional boards.

c. The state board may submit to the commissioner, recommendations with respect to matters delegated by statute to the department in any case where a statute or regulation of the department may affect the carrying out of fish and wildlife management practices under this section.

9. Cooperation agreements.

a. The commissioner shall have power, through his representative, to enter into an agreement in writing with an owner or lessee of rural lands or waters lying within a fish and wildlife management region or an interest in such lands or waters, or with two or more such owners or lessees who agree jointly and severally, for furnishing of services and benefits as provided in subdivision 10, in exchange for and subject to the condition that such owner or lessee, or owners or lessees, adopt and carry out for a specified period of time, upon such premises or specified parts thereof, one or more of the fish and wildlife management practices adopted by the regional board.

b. The commissioner shall provide standard forms for such cooperation agreements.

c. The agreement shall state the period during which it shall be in force and may provide for renewal. It may also provide for termination before the expiration of such period, and for the conditions upon which and the manner in which any privilege of termination may be exercised.

d. Without limitation by paragraph c or by any term of the agreement pursuant to paragraph c the failure of a cooperator, or of any one of two or more cooperators who agree jointly and severally, to perform his agreement shall relieve the commissioner and the state from the

obligation to furnish the services and benefits provided for in subdivision 10.

10. State assistance.

a. Upon the establishment of such region, the commissioner may, and upon organization of the regional board, the commissioner shall provide personnel from the department to assist the boards and the cooperators within the region.

b. The commissioner shall furnish to cooperators:

(1) technical services;

(2) trees and shrubs from any of the nurseries operated by the department without charge at the nursery, to the extent and subject to the conditions specified in the agreement with the cooperator;

(3) a subscription, without cost, to the New York State Conservationist magazine.

c. The commissioner may also furnish to cooperators such further technical assistance, labor and materials, as may be required in compliance with practices approved by the region and authorized by order of the commissioner.

d. The commissioner may also furnish to premises covered by an agreement and to fish and wildlife upon such premises such protection by way of posting, patrol by environmental conservation officers or forest rangers, inspection or checking stations, fire patrols or other appropriate means, within the limitation of appropriations and of the manpower available as may be advisable in his judgment to protect fish and wildlife resources, provide for public safety and encourage the opening of private lands and waters to public hunting and fishing; but neither this subdivision nor any provision of any agreement pursuant to this section shall be deemed to constitute an undertaking by the state or the department on its behalf to furnish such posting, patrol or protection and neither such agreement nor any provision of the Fish and Wildlife Law shall be deemed to create a ground of liability of the state for damage to person or property caused by the failure or neglect

of the state or its agents, officers or employees to furnish such posting, patrol or protection.

e. The agreement with the cooperator may provide for use by him for purposes compatible with its function in wildlife management, of any structure or facility created or maintained on his premises with funds of the department, or for furnishing to him the incidental products of any activity conducted on his premises for purposes of wildlife management.

§ 11-0503. Polluting streams prohibited.

1. No dyestuffs, coal tar, refuse from a gas house, cheese factory, creamery, condensary or canning factory, sawdust, shavings, tan bark, lime, acid, oil or other deleterious or poisonous substance shall be thrown or allowed to run into any waters, either private or public, in quantities injurious to fish life, protected wildlife or waterfowl inhabiting those waters or injurious to the propagation of fish, protected wildlife or waterfowl therein.

2. a. No person shall place sewage or other matter injurious to fish where it can find its way into water used by any state fish hatchery or allow others to do so on or through premises owned or occupied by him.

b. No person shall erect or maintain any privy, pigsty, inclosure for poultry, barn or barnyard, or drain from any building, whence drainage or refuse may find its way into water used by any state fish hatchery. Every such privy, pigsty, inclosure, barn, barnyard and drain is hereby declared to be a public nuisance and may be summarily abated by the department.

3. Oil, acid, sludge, cinders or ashes from a vessel of any type shall not be thrown, dumped or allowed by any person to run into the waters of the Hudson or Mohawk rivers.

4. No earth, soil, refuse or other solid substances, except snow or

ice, shall be disposed of in any stream or tributary thereto which is inhabited by trout; nor shall any earth, soil, refuse or other solid substance, except snow or ice, be disposed of on the banks of trout streams or tributaries thereto in such a manner that such solid substance can enter the stream at any stage of water level. Dumps and disposal areas for refuse along the banks of trout streams, or tributaries thereto, shall be operated by the owner or lessee of such an area in such manner that the solid substances deposited thereon shall not enter the stream at any stage of water level.

5. This section does not prohibit the control or elimination of aquatic vegetation, insects and aquatic animals, authorized by the department in order to effectuate the provisions of paragraph a of subdivision 2 of section 11-1911 and subdivision 8 of section 11-1913 of the Fish and Wildlife Law.

6. Nothing contained in this section shall prohibit the enactment by the appropriate governing or legislative body of any county, city, town or village of local laws, not inconsistent with this chapter, prohibiting the disposal of earth, soil, refuse, or other solid substance, in streams, ponds or lakes within its jurisdiction.

§ 11-0505. Interference with fish and wildlife.

1. a. Except as permitted by the department, no person shall obstruct the passage of fish in any stream or river by a screen or otherwise. The department may order such obstruction removed by the person erecting the same or by the owner of the land on which it is located. A copy of the order shall be served on such person or owner and failure to comply with its terms within ten days after service thereof shall be deemed a violation of this subdivision. This subdivision shall not apply to dams heretofore or hereafter erected.

b. Flumes or raceways in streams stocked with fish by the state shall be screened as the department may direct.

2. No person shall:

a. hold back or divert water in any stream which supplies a state hatchery so as to prevent the flow of sufficient water for hatchery purposes, or

b. take fish from the waters of any state hatchery operated by the department, except under the authority of the department.

* 3. No deer or bear traps shall be made, set or used upon land inhabited by deer or bear. No salt lick shall be made, set or used upon land inhabited by deer or bear, except that:

a. the department may do so on state wildlife refuges and wildlife management areas; and

b. a nuisance wildlife specialist with a permit issued pursuant to section 11-0522 of this title may do so provided that such activities are in furtherance of the site-specific deer management plan.

c. a nuisance wildlife specialist with a permit issued pursuant to section 11-0522-a of this title may do so provided that such activities are in furtherance of the site-specific deer management plan.

* NB Effective until January 1, 2027

* 3. No deer or bear traps shall be made, set or used upon land inhabited by deer or bear. No salt lick shall be made, set or used upon land inhabited by deer or bear, except that the department may do so on state wildlife refuges and wildlife management areas.

* NB Effective January 1, 2027

4. No person shall use any device which prevents frogs from having free access to and egress from water.

5. No person shall rob or wilfully destroy a nest of any protected birds unless a permit shall first be obtained from the department.

6. Except as permitted by the department, no person shall at any time disturb a beaver dam, house or den or a muskrat house or den or any

structure constructed by a muskrat in which it can take shelter.

7. No person shall at any time disturb a nest box or any structure constructed for the purpose of harboring wild birds whether or not such structure is inhabited by wild birds, except for annual maintenance of such structure or when deemed necessary by the owner of the property whereupon such structure is located.

8. No person shall place, give, expose, deposit, distribute or scatter any substance with the intent to attract or entice deer to feed within three hundred feet of a public highway. Normal agricultural practice of planting, cultivating or harvesting and the feeding of deer held captive for agricultural purposes or the feeding of deer held captive in zoos and wildlife parks shall not be considered attracting or enticing deer to feed for the purposes of this section.

* 9. A nuisance wildlife specialist with a permit issued pursuant to section 11-0522 of this title may, in accordance with the parameters of such permit and the consultation of local law enforcement, entice deer in the manner prohibited in subdivision eight of this section provided that such activities are in furtherance of the site-specific deer management plan.

* NB Repealed January 1, 2027

* 10. A nuisance wildlife specialist with a permit issued pursuant to section 11-0522-a of this title may, in accordance with the parameters of such permit and the consultation of local law enforcement, entice deer in the manner prohibited in subdivision eight of this section provided that such activities are in furtherance of the site-specific deer management plan.

* NB Repealed January 1, 2027

§ 11-0507. Liberation of fish, shellfish and wildlife.

1. Fish or fish eggs shall not be placed in any waters of the state unless a permit is first obtained from the department; but no permit shall be required to place fish or fish eggs in an aquarium.

2. No person shall liberate or import or cause to be imported for the purpose of liberation within the state any European hare (*Lepus europaeus*), European or San Juan rabbit (*Oryctolagus cuniculus*), Texas or jack rabbit (*Lepus californicus*), gray fox (*Urocyon cinereoargenteus*), including captive bred gray fox, red fox (*Vulpes vuples*), including captive bred red fox or nutria (*Myocastor coypus*), whether taken from within or without the state. Nutria may be imported only by permit of the department for scientific, exhibition or for breeding purposes.

3. No person shall willfully liberate within the state any wildlife except under permit from the department. The department may issue such permit in its discretion, fix the terms thereof and revoke it at pleasure. These provisions do not apply to migratory game birds, importation of which is governed by regulation of the department.

4. No person shall intentionally liberate zebra mussels (*Dreissena polymorpha*) into any waters of the state. No person shall buy, sell, or offer to buy or sell, or intentionally possess or transport zebra mussels except under a license or permit issued pursuant to section 11-0515. Zebra mussels, except those lawfully held pursuant to a license or permit, may be destroyed by any person at any time.

§ 11-0509. Water chestnut.

No person shall plant, transport, transplant or traffic in plants of the water chestnut or the seeds or nuts thereof nor in any manner cause the spread or growth of such plants.

§ 11-0511. Possession and transportation of wildlife.

Subject to the provisions of section 11-0512 of this article, no person shall, except under a license or permit first obtained from the department containing the prominent warning notice specified in subdivision nine of section 11-0917 of this article, possess, transport

or cause to be transported, imported or exported any live wolf, wolfdog, coyote, coydog, fox, skunk, raccoon, venomous reptile, endangered species designated pursuant to section 11-0535 of this title, species named in section 11-0536 of this title or other species of native or non-native live wildlife or fish where the department finds that possession, transportation, importation or exportation of such species of wildlife or fish would present a danger to the health or welfare of the people of the state, an individual resident or indigenous fish or wildlife population. Environmental conservation officers, forest rangers and members of the state police may seize every such animal possessed without such license or permit. No action for damages shall lie for such seizure, and disposition of seized animals shall be at the discretion of the department.

§ 11-0512. Possession, sale, barter, transfer, exchange and import of wild animals as pets prohibited.

1. It shall be prohibited for any person to:

a. knowingly possess, harbor, sell, barter, transfer, exchange or import any wild animal for use as a pet in New York state, except as provided in subdivision three of this section; or

b. intentionally release or set at-large any wild animal, authorized by this section for use as a pet, from the location where the animal is permitted to be possessed or harbored.

2. This section shall not apply to the following persons and entities with respect to wild animals owned or harbored by them solely for a purpose other than for use as a pet:

a. Zoological facilities licensed pursuant to 7 USC. Sec. 2131 et seq.;

b. Exhibitors licensed pursuant to the Animal Welfare Act, 7 USC. Sections 2132-2134 and reptile exhibitors who have demonstrated to the

department, in accordance with regulations promulgated by the commissioner, that the sole purpose for which the wild animal or animals are used is for exhibition to the public for profit or compensation;

c. Research facilities as defined in the Animal Welfare Act, 7 USC. Section 2132 (e), which are licensed by the United States Secretary of Agriculture;

d. Licensed veterinarians and incorporated humane societies, animal shelters, societies for the prevention of cruelty to animals or animal welfare organizations in temporary possession of wild animals;

e. State universities, private colleges or universities, or state agencies working with wild animals;

f. Wildlife rehabilitators licensed pursuant to the provisions of subdivision three of section 11-0515 of this title and regulations promulgated thereunder, who are tending to sick or injured wild animals;

g. A person having custody of a wild animal solely for the purpose of transporting it to a licensed veterinarian, wildlife rehabilitator, humane society or other entity authorized by this section to handle or treat wild animals;

h. A wildlife sanctuary as defined in subdivision thirty-two of section 11-0103 of this article;

i. A person who is not a resident of this state who is in the state only for the purpose of travelling between locations outside the state. In no event shall this time period exceed ten days;

j. A person who is paralyzed from the neck down who possesses a new world monkey trained to perform tasks for its owner by an organization described in section 501(c) of the Internal Revenue Code of 1986 and dedicated to improving the quality of life of persons paralyzed from the neck down.

3. Any person who possesses or harbors a wild animal for use as a pet at the time that this section takes effect may retain possession of such animal for the remainder of its life, provided that such person:

a. Has not been convicted of any offense relating to cruelty to animals or under a judicial order prohibiting possession of animals;

b. Applies to the department within six months of the effective date of this section, and obtains from the department, a license pursuant to subdivision four of this section;

c. Complies with all applicable federal, state, or local laws, including any ordinance, rule or regulation adopted by a local board of health, or any rules and regulations established by the department as requisites for ownership of such wild animal; and

d. Reports a release to the local police department and animal control immediately upon discovery of the release. Each escape during a twelve month period of time will subject the possessor to penalties by the department pursuant to subdivisions eight and nine of this section.

4. The department shall be required to issue licenses authorizing possession of wild animals only to those persons who comply with the provisions of subdivision three of this section and with any regulations promulgated by the department thereunder. Such licenses shall be valid in any jurisdiction within the state where possession of a wild animal is not prohibited by local law or ordinance, rule or regulation adopted by a local board of health, and shall be renewable biennially during the life of the animal subject to continued compliance with the provisions of this section and with any regulations promulgated thereunder. The department shall forward copies of such licenses to the clerk of the city, town or village in which each wild animal is harbored.

a. License applications shall include, but shall not be limited to, the following:

(1) The name, address and telephone number of the person who owns, possesses or harbors the wild animal or animals, including an

acknowledgment that the person who owns, possesses or harbors the wild animal or animals is twenty-one years of age or older.

(2) The address of the location where the wild animal or animals will be kept, if different from the above.

(3) A detailed description of each wild animal owned, possessed or harbored, including species, gender, age, any identifying characteristics, and an identification tag or tattoo if required by the department, with proof, acceptable to the department, that each such wild animal was acquired prior to the effective date of this section.

(4) The name, address and telephone number of the veterinarian, who has agreed to treat the wild animal.

(5) An acknowledgment indicating that the wild animal or animals will not be bred.

(6) A detailed certification establishing that the location in which the wild animal will be kept complies with all appropriate standards of care and at minimum complies with the standards for animal care set forth in the Federal Animal Welfare Act and other applicable federal, state and local standards, including, but not limited to housing, temperature, ventilation, drainage, sanitation, food, water, exercise and veterinary care appropriate to the species and sufficient to maintain the wild animal in good health.

(7) An acknowledgment that the wild animal will not be tied, tethered, or chained outdoors, allowed to run at large and that the wild animal will not be brought to any public park or commercial or retail establishment unless it is being brought to a veterinarian or veterinary clinic.

(8) An acknowledgment that possession, harboring or owning such wild animal does not violate any applicable federal, state or local law, including any ordinance, rule or regulation adopted by a local board of health.

b. The department shall set biennial license fees for the possession of wild animals pursuant to subdivision three of this section in an amount determined to be reasonable but not more than one hundred seventy-five dollars for two years for each wild animal. License fees shall be used solely for the implementation and enforcement of this section.

5. The provisions of the state administrative procedure act shall apply to the denial or revocation of a license.

6. Any person in possession of a wild animal as a pet that has been granted a license pursuant to subdivision four of this section shall not breed, or sell, trade, barter or exchange such wild animal.

7. A person possessing, owning or harboring a wild animal who is denied a license pursuant to subdivision four of this section, or whose license is revoked, shall surrender such wild animal to the department or an authorized agent thereof at a location designated by the department for such surrender or a police or peace officer of this state, a local animal control officer, or a duly incorporated society for the prevention of cruelty to animals, or provide proof that the animal has been humanely euthanized according to American Veterinary Medical Association standards by a licensed veterinarian.

8. The department, any police or peace officer of this state, a local animal control officer, or a duly incorporated society for the prevention of cruelty to animals is hereby authorized to enforce the provisions of this section and issue notices of violation to persons in violation of this section, and shall have the authority to seize any wild animal held in violation of this section. A county society for the prevention of cruelty to animals must obtain a warrant before seizing a wild animal or arresting a person who owns or possesses a wild animal under this section. Wild animals seized or surrendered pursuant to the provisions of this section shall be transferred to a duly incorporated wildlife sanctuary as defined in this section, or a zoological facility, or shall be humanely euthanized. Any costs associated with seizing, transferring, recapturing or euthanizing a wild animal shall be borne by the person who owned, harbored or possessed the animal. The department shall also have the authority to seek injunctive relief in any court of appropriate jurisdiction to prevent continued violations of this section.

9. Notwithstanding any other provision of law, any person who

knowingly breeds a wild animal or knowingly possesses, owns, harbors, sells, barter, transfers, exchanges, or imports a wild animal for use as a pet or intentionally releases or sets at-large any wild animal, authorized by this section for use as a pet, from the location where the animal is permitted to be possessed or harbored in violation of the provisions of this section shall be subject to a penalty of not more than five hundred dollars for the first offense and not more than one thousand dollars for a second and subsequent offenses. Each instance of breeding, owning, harboring, sale, barter, release, transfer, exchange, or import of a wild animal in violation of this section shall constitute a separate offense.

10. Nothing contained in this section shall prevent any city, town or county from enacting more restrictive provisions governing the possession of wild animals for use as pets.

§ 11-0513. Pigeons.

1. No person shall at any time, by any means or in any manner capture, kill or attempt to capture or kill any Antwerp or homing pigeon, wearing a ring or seamless leg band with its registered number stamped thereon; nor shall any person remove such mark. No person except the lawful owner shall detain, possess, or transport Antwerp or homing pigeons wearing a ring or seamless leg band with the registered number thereon.

2. Notwithstanding any other law to the contrary, the local legislative body of any city, town or village, or in the city of New York the Department of Health may take or issue a permit to any person to take pigeons at any time and in any humane manner in such municipality, whenever such body or administration finds that pigeons within such municipality are or may become a menace to public health or a public nuisance; provided, however, that no pigeon may be taken in a manner which will endanger other animal life, persons or property.

§ 11-0514. Eurasian boars prohibited.

1. For purposes of this section, "Eurasian boar" shall mean any subspecies, breed, or hybrid of swine recognized as Eurasian boar, Russian boar, wild boar, wild hog, razorback, or feral swine. "Eurasian boar" shall not include domestic pigs (*sus scrofa domestica*) possessed for meat production or as pets, or animals possessed or owned by a zoological park accredited by the Association of Zoos and Aquariums.

2. No person, firm, partnership, corporation, or government entity shall knowingly import, allow to breed, or introduce into the wild Eurasian boars.

3. Beginning September first, two thousand fifteen, no person, firm, partnership, corporation or government entity shall knowingly possess, sell, offer for sale, distribute, transport, or otherwise market or trade live Eurasian boars.

4. The department may adopt rules and regulations necessary to implement and administer this section.

§ 11-0515. Licenses to collect, possess or sell for propagation, scientific or exhibition purposes.

1. The department may issue to any person a license revocable at its pleasure to collect or possess fish, wildlife, shellfish, crustacea, or aquatic insects, birds' nests or eggs for propagation, banding, scientific or exhibition purposes. The department in its discretion may require an applicant to pay a license fee of ten dollars, and to file a bond of two hundred dollars to be approved by the department that he or she will not violate any provisions of this article. Each licensee shall file with the department a report containing such information as the department may require. Such license shall be in force for one year only and shall not be transferable.

2. The department may also issue a license revocable at its pleasure to possess and sell protected fish, wildlife, shellfish, crustacea or

aquatic insects for propagation, scientific or exhibition purposes. The department in its discretion may require a license fee of ten dollars. Such license shall be in force for one year only and shall not be transferable. Each licensee shall file with the department a report containing such information as the department may require. Fish, wildlife, shellfish, crustacea or aquatic insects lawfully possessed under this section may be sold at any time by the licensee for propagation, scientific or exhibition purposes only.

3. The department may also issue a revocable license to possess distressed wildlife for rehabilitation purposes. The department may adopt regulations concerning the qualifications, appointment and duties of wildlife rehabilitators and the procedures for license issuance and revocation.

4. The department shall have power to make regulations governing the possession of such fish, wildlife, shellfish, crustacea and aquatic insects to protect them from cruelty, disease or undue discomfort and to protect the public from attack or contamination.

§ 11-0517. Taking for propagation and stocking; fish hindering propagation of food fish or shellfish.

1. The department may take, or it may permit any person to take wildlife for propagation or stocking purposes, or fish or shellfish for propagation purposes.

2. It may also remove, or permit to be removed, in any manner it may prescribe, from either public or private waters, fish or shellfish which hinder the propagation of food fish or shellfish, or which are in imminent danger of being killed by pollution or otherwise. Such fish or shellfish shall be disposed of as the department may direct.

3. No person shall take fish within one hundred feet of any leader or net operated by the department or permitted under subdivisions 1 or 2 of this section and fish confined therein shall be handled or taken

therefrom only by an employee of the department or by the permittee.

§ 11-0519. Disposition of fish, wildlife, game, shellfish, crustacea or protected insects seized by or surrendered to enforcement officers.

1. When any fish, game, wildlife, shellfish, crustacea or part thereof, or any protected insect, or any bird plumage, is

a. seized by an enforcement officer as provided in section 71-0907 and it is thereafter determined that the possession thereof, by the person from whom it was seized, was unlawful under any provision of the Fish and Wildlife Law or regulation pursuant thereto; or

b. found in or released from a trap, snare, net or other device constituting a nuisance which the officer is authorized summarily to abate as provided in section 71-0915; or

c. surrendered to an enforcement officer for disposition by any person having lawful custody or possession; possession thereof shall be deemed vested in the department on behalf of the state. All such things shall be disposed of as may be determined by the enforcement officer, subject to law and any applicable regulations of the department.

§ 11-0521. Destructive wildlife; taking pursuant to permit.

1. The department may direct any environmental conservation officer, or issue a permit to any person, to take any wildlife at any time whenever it becomes a nuisance, destructive to public or private property or a threat to public health or welfare, provided, however, that where such wildlife is a bear, no such permit shall be issued except upon proof of damage to such property or threat to public health or safety presented to the department. Upon presentation of such proof, the department may issue a permit authorizing the use of trained tracking dogs pursuant to section 11-0928 of this article, and, if the

department has determined that no other alternative is feasible, a separate permit to take the bear. Wildlife so taken shall be disposed of as the department may direct. Any person, agency, corporation or municipality who obtains a migratory bird depredation permit or order issued by the federal department of the interior pursuant to 50 C.F.R. 13 and 50 C.F.R. 21, as may be amended from time to time, shall not be required to obtain a permit from the department to conduct the authorized activities.

2. The department may, by permit issued to a landowner, permit such landowner, and any person he may designate in writing as his agent, to take beaver on lands owned by the permittee, during any specified period, in any specified number, and by any specified means, notwithstanding the provision contained in paragraph d of subdivision 3 of section 11-0901 or any other provision of the Fish and Wildlife Law. Beaver so taken shall be disposed of as the department may direct.

3. Nothing in this section shall be construed as requiring or obligating the department to issue a permit to take wildlife or to direct the taking of any wildlife when in its opinion the nuisance, destruction of property or threat to public health and welfare will not be effectively abated thereby.

*** § 11-0522. Urban deer management pilot program.**

1. For the purposes of this section, "nuisance wildlife specialist" shall mean an employee of or a contractor for the federal or state government responsible for wildlife management acting pursuant to a deer management plan and deer cull permit. A nuisance wildlife specialist must be in compliance with criteria established by the department that at a minimum shall require:

a. a minimum level of marksmanship qualifications appropriate to the firearm or hunting implement to be used;

b. liability insurance coverage or other financial arrangements

identified by the department;

c. a copy of the cull permit and a copy of the log of nuisance wildlife specialists using the permit, be on the nuisance wildlife specialist's person when exercising any privilege of such permit; and

d. reporting requirements.

2. The department may, after reviewing the city of Syracuse's cull permit application and site-specific deer management plan, and upon a finding by the city of Syracuse that deer have become a nuisance, destructive to public or private property or a threat to public health or welfare, issue a deer cull permit for use within the boundaries of the city of Syracuse, authorizing use of a nuisance wildlife specialist to take deer pursuant to the terms of the deer cull permit.

3. Each cull permit application shall at a minimum include requirements for: the timeframe during which the permit must be used, a site-specific deer management plan, a geographic description of the area for which the permit is being requested, a written contract with the city of Syracuse, a list which identifies participating nuisance wildlife specialists and eligibility based on the criteria established by the department, provided by the city of Syracuse, requests for any authorization pursuant to subdivisions three and nine of section 11-0505 of this title, subdivision two of section 11-0901 of this article, and subdivisions two and four of section 11-0931 of this article, provided that any such authorization subsequently granted shall be explicitly included on any cull permit, and details regarding expected local law enforcement consultation.

4. Nothing in this section shall be construed as requiring or obligating the department to issue a permit to take deer when in its opinion the nuisance, destruction of property or threat to public health and welfare will not be effectively abated thereby.

* NB Repealed January 1, 2027

*** § 11-0522-a. Long Island deer management pilot program.**

1. For the purposes of this section, "nuisance wildlife specialist" shall mean an employee of or a contractor for the federal or state government responsible for wildlife management acting pursuant to a deer management plan and deer cull permit. A nuisance wildlife specialist must be in compliance with criteria established by the department that at a minimum shall require:

a. a minimum level of marksmanship qualifications appropriate to the firearm or hunting implement to be used;

b. liability insurance coverage or other financial arrangements identified by the department;

c. a copy of the cull permit and a copy of the log of nuisance wildlife specialists using the permit, be on the nuisance wildlife specialist's person when exercising any privilege of such permit; and

d. reporting requirements.

2. The department may, after reviewing the town of Southold's cull permit application and site-specific deer management plan, and upon a finding by the town of Southold that deer have become a nuisance, destructive to public or private property or a threat to public health or welfare, issue a deer cull permit for use within the boundaries of the town of Southold, authorizing the use of a nuisance wildlife specialist to take deer pursuant to the terms of the deer cull permit.

3. Each cull permit application shall at a minimum include requirements for: the timeframe during which the permit must be used, a site-specific deer management plan, a geographic description of the area for which the permit is being requested, a written contract with the town of Southold, a list which identifies participating nuisance wildlife specialists and eligibility based on the criteria established by the department, provided by the town of Southold, requests for any authorization pursuant to subdivisions three and nine of section 11-0505

of this title, subdivision two of section 11-0901 of this article, and subdivisions two and four of section 11-0931 of this article, provided that any such authorization subsequently granted shall be explicitly included on any cull permit, and details regarding expected local law enforcement consultation.

4. Nothing in this section shall be construed as requiring or obligating the department to issue a permit to take deer when in its opinion the nuisance, destruction of property or threat to public health and welfare will not be effectively abated thereby.

* NB Repealed January 1, 2027

§ 11-0523. Destructive or menacing wildlife; taking without permit.

1. Owners and lessees and members of their immediate families actually occupying or cultivating lands, and persons authorized in writing and actually employed by them in cultivating such lands, may take (a) unprotected wildlife other than birds and (b) starlings, common crows and, subject to section 11-0513, pigeons, when such wildlife is injuring their property or has become a nuisance thereon. Such taking may be done in any manner, notwithstanding any provision of the Fish and Wildlife Law, except section 11-0513, or the Penal Law or any other law.

2. Any bear killing or worrying livestock on land occupied or cultivated, or destroying an apiary thereon, may be taken or killed, at any time, by shooting or device to entrap or entice on such land, by the owner, lessee or occupant thereof, or any member of the owner's, lessee's or occupant's immediate family or by any person employed by such owner, lessee or occupant. The owner or occupant of such lands shall promptly notify the nearest environmental conservation officer and deliver to such officer the carcass of any bear killed pursuant to this subdivision. The environmental conservation officer shall dispose of the carcass as the department may direct.

3. Red-winged blackbirds, common grackles and cowbirds destroying any crop may be killed during the months of June, July, August, September

and October by the owner of the crop or property on which it is growing or by any person in his employ.

4. Varying hares, cottontail rabbits and European hares which are injuring property on occupied farms or lands may be taken thereon, at any time, in any manner, except by the use of ferrets, fitch-ferrets or fitch, by the owners or occupants of such farms or lands or by a person authorized in writing by them and actually employed by them in cultivating such farm lands.

5. Skunks injuring property or which have become a nuisance may be taken at any time in any manner.

6. Raccoons, muskrats, coyotes or fox injuring private property may be taken by the owner, occupant or lessee thereof, or an employee or family member of such owner, occupant or lessee, at any time in any manner.

7. Whenever black, grey and fox squirrels, opossums or weasels are injuring property on occupied farms or lands or dwellings, they may be taken at any time in any manner, by the owners or occupants thereof or by a person authorized in writing by such owner or occupant.

8. No license or permit from the department is required for any taking authorized by this section.

9. Varying hares, cottontail rabbits, skunks, black, grey and fox squirrels, raccoons, muskrats, opossums or weasels taken pursuant to this section in the closed season or in a manner not permitted by section 11-0901 shall be immediately buried or cremated. No person shall possess or traffic in such skunks or raccoons or the pelts thereof or in such varying hares or cottontail rabbits or the flesh thereof.

§ 11-0524. Nuisance wildlife control operators.

1. No person shall charge a fee to take, possess, transport or release wildlife whenever it becomes a nuisance pursuant to section 11-0505,

11-0507, 11-0521, or 11-0523 of this title unless such person has been issued a nuisance wildlife control operator license by the department.

2. No person shall be issued a license by the department under this section unless he or she provides evidence satisfactory to the department, that he or she has completed nuisance wildlife control training. In addition to any other requirements of the department, such training shall include training in site evaluation, methods of resolving common nuisance wildlife problems, including, but not limited to, non-lethal methods; exclusion methods; habitat modification; and capture and handling techniques.

3. The department may issue a revocable nuisance wildlife control operator license and adopt regulations concerning the qualifications for such license and the terms and conditions of such license provided, however, that any such regulations, terms and conditions include training requirements consistent with subdivision two of this section.

4. The fee for a nuisance wildlife control operator license shall be fifty dollars paid annually to be deposited in the conservation fund established pursuant to section eighty-three of the state finance law, provided, however, that a municipality shall not be subject to this fee.

5. Any person licensed pursuant to this section shall submit annually a report to the department which specifies each client's name and address, the date work was performed, the species controlled, the abatement method used, the disposition of the animal, and any other information as required by the department. The department shall annually update a list of nuisance wildlife control operators and make it available to the public in both printed and electronic formats.

§ 11-0525. Control of rabies in wildlife.

1. Whenever the disease rabies occurs in any area of the state and the infection of wild foxes or other wildlife populations is certified to exist therein by the joint determination of the Departments of Health,

Agriculture and Markets and Environmental Conservation, and certification is made to the Commissioner of Environmental Conservation by the Commissioners of Health and of Agriculture and Markets that the health and welfare of the human population or the health and welfare of domestic livestock are in danger therefrom, the department is thereupon authorized and directed to undertake through the use of professional trappers or by other means such fox control or wildlife control measures in the certified area as in its judgment will eliminate, reduce or confine the disease.

2. Such control measures shall be continued until the Commissioners of Health, Agriculture and Markets and Environmental Conservation shall jointly determine that control measures should be terminated.

3. Necessary expenses for such control work shall be financed by moneys made available by appropriation or otherwise to the department out of moneys in the state treasury, in the general fund, to the credit of the state purpose fund not otherwise appropriated.

§ 11-0527. State aid to counties participating in control of rabies in wildlife.

1. The board of supervisors or county legislative body of any county may appropriate moneys for the purpose of controlling the disease rabies in wildlife.

2. Any county situated in an area wherein the infection of wild foxes or other wildlife populations is certified to exist with danger to health and welfare, in accordance with the provisions of section 11-0525, may submit a plan for joint approval by the state departments of Health, Agriculture and Markets and Environmental Conservation for the purposes of eliminating, reducing or confining the disease rabies. If such plan, or a modification of such plan, is approved by such departments and is duly carried out by any such county in accordance with such regulations as may be adopted by the Department of Environmental Conservation (which regulations when adopted shall be made

a part of such plan) then such county shall be reimbursed by the state to the extent of fifty per centum of the amount by it expended in the execution of such plan; provided, however, that such reimbursement to any county shall not exceed six thousand dollars in any state fiscal year.

3. A county shall not be reimbursed for any moneys expended by it for the payment of bounties for the taking of wildlife.

4. Not later than the last day of each of the months of June, September, December and March the county treasurer of each such county which has been certified under section 11-0525 and approved under this section, and has incurred expenditures pursuant to the provisions of this section during the three months' period ending on such days, shall make a report to the Commissioner of Environmental Conservation of the amount of such expenditures and apply for the state reimbursement herein authorized.

5. Such report and application shall be in such form and contain such information as may be required by the Commissioner of Environmental Conservation. The commissioner shall thereupon promptly certify to the comptroller for payment the amount of state reimbursement due the county thereon. The amounts so certified by the Commissioner of Environmental Conservation, after audit by and on the warrant of the Comptroller, shall be paid to the county treasurers of the respective counties to which such reimbursement is due, from any moneys available by appropriation therefor. No reimbursement shall be made for expenditures incurred by any county after such time as the Departments of Health and Agriculture and Markets shall have certified that danger to health and welfare from the disease rabies no longer exists in such county.

§ 11-0529. Cats hunting birds; dogs pursuing deer or killing other wildlife in certain areas.

1. Any person over the age of twenty-one years possessing a hunting license may, and environmental conservation officers and peace officers,

acting pursuant to their special duties, or police officers shall humanely destroy cats at large found hunting or killing any protected wild bird or with a dead bird of any protected species in its possession.

2. Every environmental conservation officer, forest ranger and member of the state police may kill any dog (a) pursuing or killing deer within the Adirondack or Catskill parks, at any time; (b) pursuing or killing any game or wildlife on a state-owned game farm or wildlife refuge; or (c) pursuing or killing any game or wildlife on a state-owned or leased wildlife management area, except a dog being legally used for hunting small game or for dog training.

3. Every park patrolman, park ranger and member of the state police, county police and town police may kill any dog pursuing or killing deer within any state park or state park reservation at any time.

4. At any time (a) any environmental conservation officer, dog warden, forest ranger or member of the state police, anywhere in the state, (b) any member of any town police within the limits of the town of which such member is an officer, (c) any member of the Westchester County Parkway police on any park, parkway or reservation owned or controlled by the county of Westchester or (d) any member of a police force or department of any county, city, town or village in which such member has jurisdiction and is regularly employed may kill any dog pursuing or killing deer and any coyote killing a domestic animal.

5. No action for damages shall lie against any authorized person for the killing of a cat, dog or coyote as provided in this section.

§ 11-0531. Bounties prohibited.

Notwithstanding any other provision of this chapter, or any other law, rule or regulation to the contrary, it shall be unlawful for any department or division of this state, or any political subdivision thereof to pay bounties on the taking of wildlife, except when the state

Department of Health, or any local health authorities, determine that a given type or class of animals constitute a health hazard as carriers or potential carriers of disease.

§ 11-0533. Licensing of guides.

1. As used in this section, the term "guide" shall mean a person who offers services for hire part or all of which includes directing, instructing, or aiding another in fishing, hunting, camping, hiking, white water canoeing, rafting or rock and ice climbing.

2. All guides engaging in the business of guiding on all lands and waters of the state shall possess a license issued by the department, except for any persons operating or assisting upon a public vessel for hire (passenger carrying vessels), licensed by the United States Coast Guard or New York state, upon the Atlantic Ocean and all other marine and coastal waters, tidal waters including the Hudson river up to the Troy barrier dam, St. Lawrence river, Great Lakes and the navigable portion of their tributaries, and other navigable waters, as determined by the department.

3. Except while guiding for the purposes of hunting and/or fishing, no license as defined in section 11-0701 is required for such acts.

4. Employees of children's camps as defined in subdivision one of section one thousand four hundred of the public health law shall be exempt from the provisions of subdivisions one and two of this section, provided such activities are carried out within the scope of said employment.

5. A license as required under subdivision two of this section shall be issued for a period of five calendar years and the fee therefor shall be established by the department, not to exceed two hundred dollars.

6. Every licensed guide while engaged in guiding shall wear in plain sight identification furnished by the department. Licensed guides shall

be at least eighteen years of age. They shall be skilled in the use of boats and canoes whenever use of these craft is required and shall be persons competent to guide one or more of the following: camping, hunting, fishing, hiking, white water canoeing/rafting, rock or ice climbing or other similar activities. The department shall by regulation establish standards and procedures for testing and licensing of guides.

7. Any licensed guide who violates any provision of this chapter or who makes any false statement in his application for a license shall in addition to any other penalties, immediately surrender his license to the department, which may be revoked by the department for up to one year following the date of such surrender.

8. The department shall publish a list of guides annually.

§ 11-0535. Endangered and threatened species, species of special concern.

1. For the purposes of this section, "endangered species" shall mean those species of fish, shellfish, crustacea and wildlife designated by the department, by regulation filed with the Secretary of State, as seriously threatened with extinction, "threatened species" shall mean those species of fish and wildlife designated by the department, by regulation filed with the Secretary of State, which are likely to become endangered species within the foreseeable future throughout all or a significant portion of their range, and "species of special concern" shall mean those species of fish and wildlife designated by the department, by regulation filed with the Secretary of State, which are found by the department to be at risk of becoming threatened in New York. Such regulation shall include, but not be limited to, endangered and threatened species as so designated by the Secretary of the Interior, provided, however, that such regulation shall take effect sixty days after it has been filed with the Secretary of State, and provided, further, that any endangered or threatened species as so designated by the Secretary of the Interior shall be subject to the restrictions of this section, regardless of the removal of such

designation as an endangered or threatened species by the Secretary of the Interior. The commissioner may exclude any such species as the commissioner may determine after investigation to be no longer endangered or threatened from the restrictions of this section.

2. Notwithstanding any other provision of this chapter, the taking, importation, transportation, possession or sale of any endangered or threatened species of fish, shellfish, crustacea or wildlife, or hides or other parts thereof, or the sale or possession with intent to sell any article made in whole or in part from the skin, hide or other parts of any endangered or threatened species of fish, shellfish, crustacea or wildlife is prohibited, except under license or permit from the department.

3. Notwithstanding any other provision of this chapter, the department may promulgate regulations to the taking, importation, transportation, possession or sale of any species of special concern as the department deems necessary for the proper protection of such species.

§ 11-0535-a. Illegal ivory articles and rhinoceros horns.

1. As used in this section:

a. "Distribute" means a transfer or change in possession with an accompanying change in legal ownership.

b. "Ivory article" means any item containing worked or raw ivory from any species of elephant or mammoth.

c. "Raw ivory" means any elephant or mammoth tusk, and any piece thereof, the surface of which, polished, or unpolished, is unaltered or minimally carved.

d. "Worked ivory" means any elephant or mammoth tusk, and any piece thereof, which is not raw ivory.

2. Except as otherwise provided in subdivision three of this section, no person shall sell, offer for sale, purchase, trade, barter or distribute an ivory article or rhinoceros horn.

3. Unless such activity is prohibited by federal law, rule or regulation, the commissioner may issue licenses or permits for the sale, offering for sale, purchase, trading, bartering or distribution of ivory articles or rhinoceros horns, provided that:

a. the ivory article or rhinoceros horn is part of a bona fide antique and is less than twenty percent by volume of such antique, and the antique status of such antique is established by the owner or seller thereof with historical documentation evidencing provenance and showing the antique to be not less than one hundred years old;

b. the distribution or change of possession of the ivory article or rhinoceros horn is for bona fide educational or scientific purposes, or to a museum chartered by the board of regents pursuant to the education law or to a museum authorized by a special charter from the legislature of this state; or

c. the distribution of the ivory article or rhinoceros horn is to a legal beneficiary of a trust or to an heir or distributee of an estate; or

d. the ivory article or rhinoceros horn is part of a musical instrument, including, without limitation, string and wind instruments and pianos, and the owner or seller provides historical documentation as the department may require, demonstrating provenance and showing the item was manufactured no later than nineteen hundred seventy-five.

§ 11-0535-b. Vulnerable species.

1. As used in this section, "vulnerable species" shall mean any species of wildlife designated by the department, by regulation filed with the secretary of state, which meet the following criteria:

(a) On the basis of credible scientific evidence, which may include information contained on the international union for conservation of nature and natural resources red list of threatened species, or other similar data:

(i) the species has an observed, estimated or projected population decline that if unreversed, will likely result in the species becoming endangered or threatened within the foreseeable future; or

(ii) other factors that may cause the species to go extinct if they are not identified and reversed;

(b) The species is known to be in trade in this state;

(c) The species is not protected as an endangered or threatened species by the secretary of the interior; and

(d) The species is not protected under the Marine Mammal Protection Act.

2. Except as otherwise provided in subdivision three of this section, no person shall sell, or possess with the intent to sell, any article made in whole or in part from the skin, hide, or other parts of any vulnerable species, except under license or permit from the department.

3. The commissioner may issue licenses or permits for the sale or possession with intent to sell of any article made in whole or in part from the skin, hide, or other parts of any vulnerable species, provided that:

(a) the article is part of a bona fide antique and the antique status of such antique is established by the owner or seller thereof with historical documentation evidencing provenance and showing the antique to be not less than one hundred years old; or

(b) the article is for bona fide educational or scientific purposes, or to be made part of a temporary or permanent collection of a museum chartered by the board of regents pursuant to the education law or to a museum authorized by a special charter from the legislature of this state, provided that the article is not thereafter sold to any private party.

4. The department shall maintain a list of vulnerable species identified pursuant to this section and post such list on the

department's website.

5. Species shall not be designated as a vulnerable species for the purposes of this section if:

(a) the species is protected pursuant to any other provision of this chapter; or

(b) the taking of the species is regulated by the department pursuant to permit or license.

*** § 11-0535-c. Endangered and threatened species mitigation bank fund.**

1. The department is hereby authorized to utilize funds in the endangered and threatened species mitigation bank fund, established pursuant to section ninety-nine-hh of the state finance law, for the purposes of implementing an endangered and threatened species mitigation plan approved by the department.

2. Such fund shall consist of contributions, in an amount determined by the department, deposited by an applicant granted a siting permit to construct a major renewable energy facility, where such applicant has been ordered to mitigate harm to a threatened or endangered species or its habitat.

3. In administering the provisions of this article, the commissioner:

a. May, in the name of the state, enter into contracts with not-for-profit corporations, private or public universities, and private contractors for services contemplated by this title. Such contracts shall be subject to approval by the state comptroller and, as to form, by the attorney general.

b. Shall approve vouchers for payments pursuant to an approved contract. All such payments shall be paid on the audit and warrant of the state comptroller;

c. May, in the name of the state, enter into contracts with a

not-for-profit corporation to administer grants made pursuant to this title, including the approval and payment of vouchers for approved contracts; and

d. May perform such other and further acts as may be necessary, proper, or desirable to carry out the provisions of this article.

4. Nothing in this article shall be construed to limit or restrict any powers of the commissioner or any other agency pursuant to any other provision of law.

5. The commissioner is authorized and directed to promulgate any regulations deemed necessary to implement this section.

** 6. The commissioner shall annually report to the department of public service, the governor, the temporary president of the senate and the speaker of the assembly on the status of the fund and all monies added to and expended from the fund.

** NB Repealed December 31, 2040

* NB Repealed December 31, 2030

§ 11-0536. Sale of certain wild animals or wild animal products prohibited.

1. Except as provided in subdivision three hereof, no part of the skin or body, whether raw or manufactured, of the following species of wild animals or the animal itself may be sold or offered for sale by any individual, firm, corporation, association or partnership within the state of New York:--Leopard (*Panthera pardus*), Snow Leopard (*Uncia*), Clouded Leopard (*Neofelis nebulosa*), Tiger (*Panthera tigris*), Asiatic Lion (*Panthera leo persica*), Cheetah (*Acinonyx jubatus*), Alligators, Caiman or Crocodile of the Order Crocodylia (except as provided in subdivision two of this section), tortoises of the genus *Gopherus*, marine turtles of the family Cheloniidae and the family Dermochelidae, Vicuna (*Vicugna vicugna*), Wolf (*Canis lupus*), Red Wolf (*Canis niger*), or Tasmanian Forester Kangaroo (*Macropus giganteus tasmaniensis*) or Polar Bear (*Thalarctos maritimus*), Mountain Lion, sometimes called Cougar

(*Felis Concolor*), Jaguar (*Panthera onca*), Ocelot (*Felis pardalis*), or Margay (*Felis wiedii*), Sumatran Rhinoceros (*Dicerorhinus sumatrensis*), or Black Rhinoceros (*Dicero bicornis*).

2. The commissioner may permit, under such terms and conditions as he may prescribe, the importation and sale of the skin, body or parts therefrom of Alligators, Caiman or Crocodile of the Order Crocodylia.

3. Any officer or agent authorized by the commissioner, or any police officer of the state of New York, or any police officer of any municipality within the state of New York, shall have authority to execute any warrant to search for and seize any goods, merchandise or wildlife sold or offered for sale in violation of this section, or any property or item used in connection with a violation of this section; such goods, merchandise, wildlife or property shall be held pending proceedings in any court of proper jurisdiction. Upon conviction, or upon the entry of a judgment restraining the sale or offer for sale of such goods, merchandise or wildlife on the ground that such items were sold or offered for sale in violation of this section, such seized goods, merchandise or wildlife shall be forfeited and, upon forfeiture, either offered to a recognized institution for scientific or educational purposes, or destroyed.

4. The commissioner may permit, under such terms and conditions as he may prescribe, the importation, transportation, possession or sale of any species or subspecies of fish or wildlife listed in this section for zoological, educational, and scientific purposes, and for the propagation of such fish or wildlife in captivity for preservation purposes, unless such importation, transportation, possession or sale is prohibited by any federal law or regulation.

§ 11-0537. Bald and golden eagles; prohibited acts.

It shall be unlawful to knowingly or with wanton disregard for the consequences of this act to take, possess, sell, purchase, barter, offer to sell, purchase or barter, transport, export or import, at any time or

in any manner, any bald eagle commonly known as the American eagle, or any golden eagle, alive or dead, or any part, nest, or egg thereof of the foregoing eagles without a permit from a lawful authority.

§ 11-0538. Direct contact between public and big cats prohibited.

1. As used in this section:

(a) "Big cat" shall mean any live species of lion (*panthera leo*), tiger (*panthera tigris*), leopard (*panthera pardus*) (with the exception of clouded leopards (*neofelis nebulosa*)), jaguar (*panthera onca*), mountain lion, sometimes called cougar (*felis concolor*) or any hybrid of such species.

(b) "Direct contact" means physical contact or proximity where physical contact is possible, including, but not limited to, allowing a photograph to be taken without a permanent physical barrier designed to prevent physical contact between the public and big cats.

(c) "Dealer" shall mean any person who, in commerce, for compensation or profit, delivers for transportation, or transports, except as a carrier, buys, sells, or negotiates the purchase or sale of any animals.

(d) "Exhibitor" shall mean any person (public or private) exhibiting any animals, which were purchased in commerce or the intended distribution of which affects commerce, or will affect commerce, to the public for compensation, as determined by the commissioner, and such term includes carnivals, circuses, and zoos exhibiting such animals whether operated for profit or not.

2. It shall be unlawful for any person licensed or required to be licensed as an exhibitor or dealer pursuant to the Animal Welfare Act, 7 USC 2132-2134, including agents or employees of such person, to knowingly allow the public to have direct contact with a big cat.

3. Any person who violates the provisions of this section shall be subject to a penalty of not more than five hundred dollars for the first offense and not more than one thousand dollars for a second and subsequent offenses. Each instance of allowing direct contact of a big cat with the public in violation of this section shall constitute a

separate offense.

4. Nothing in this section shall be construed to limit or restrict veterinary examination, treatment or care of a big cat or transportation of the animal for such purpose.

§ 11-0539. New York natural heritage program.

1. There is hereby established within the department the New York natural heritage program. The program is charged with:

a. analyzing existing sources of information, monitoring and taking censuses of plant and animal populations, and cooperating with other public agencies and scientific and educational institutions, including the New York state museum and the office of parks, recreation and historic preservation, to identify the location and status of plant and animal species and ecological communities, with an emphasis on rare species and rare ecological communities;

b. developing systems for ranking the state and global rarity of plant and animal species and ecological communities and producing lists of such rankings in consultation with the state biological survey and other appropriate entities and individuals; and

c. maintaining comprehensive data management systems integrating information on the location and status of rare plants, animals, and ecological communities, and analyzing and interpreting such information for the purpose of conserving and managing the state's biological diversity.

2. Upon request, and subject to the provisions of subdivision four of this section, the department shall provide information from the New York natural heritage program to other state agencies, public authorities, counties, towns, villages, cities and landowners or their authorized representatives.

3. The department may contract with a private entity to administer the New York natural heritage program.

4. Notwithstanding the provisions of article six of the public officers law or any other provision of law, the department may deny access to inspection of records, data or information collected or maintained by the New York natural heritage program that identify locations or habitats of rare, threatened or endangered species or ecological communities where the destruction of such habitat or the removal of such species therefrom would impair their ability to survive, provided, however, that the commissioner may permit access to such records, data or information to persons, educators, schools or universities engaged in legitimate scientific and academic research.

5. No provision contained in this section shall in any way be construed to diminish or extend the department's authority to protect threatened or endangered species of wildlife or rare, threatened or endangered species of plants pursuant to sections 9-1503, 11-0535 and 11-0536 of this chapter or any other provision of law.

6. Nothing in this section shall authorize any person to enter private land without the permission of the private landowner.

7. State-owned waters, lands or portions thereof may be designated as natural heritage areas in order to conserve and manage plants, wildlife or ecological communities, with an emphasis on rare plants, wildlife, and ecological communities which support such plants or wildlife.

a. For purposes of this title, a site shall be eligible for designation as a "natural heritage area" if it matches one or more of the following criteria:

(i) provides habitat for "endangered species" or "threatened species" as defined in section 11-0535 of this title for animals and 9-1503 of this chapter for plants;

(ii) provides habitat for rare species where rare means species ranked as S1, S2 or S3 under criteria developed pursuant to paragraph b of subdivision one of this section; or

(iii) contains "significant ecological communities" where such term means all rare ecological communities as well as the best examples of common communities.

b. Any property designated as a natural heritage area shall be described and depicted upon a map. The description shall include a narrative setting forth the plants, animals or ecological communities present on the property. The department shall make maps depicting natural heritage areas available for public inspection except as provided in subdivision four of this section.

c. Designation may be accomplished by the head of any state agency or entity having jurisdiction over state lands or waters for such appropriate properties as may exist within their respective jurisdictions and consistent with their respective missions, provided the commissioner is consulted, and approves, prior to such designation.

d. A designating state agency or entity shall publish notice concerning the designation of a natural heritage area in the environmental notice bulletin prior to such designation. Such notice shall provide for a thirty day public comment period following publication of the notice.

e. The head of any state agency or entity having jurisdiction over state lands or waters previously designated as natural heritage areas may seek to remove all or a portion of such lands or waters from such designation provided, however, that prior to such removal the commissioner publishes a finding that the designated area or portion of such area no longer meets the criteria in paragraph a of this subdivision. Such finding shall be published in the environmental notice bulletin and shall provide for a thirty day public comment period following publication of the notice.

§ 11-0540. Prohibition on permits authorizing the use of elephants in entertainment acts.

The department shall not issue any license or permit that would authorize the use of an elephant in an entertainment act pursuant to section three hundred eighty of the agriculture and markets law.

§ 11-0541. Monarch preservation plan.

Beginning within one year of the effective date of this section, the department shall take feasible actions to conserve monarch butterflies and the unique habitats they depend upon for successful migration. These actions may include, but are not limited to, habitat restoration on department and state owned lands, education programs, and voluntary agreements with private landowners. The department may partner with federal agencies, state agencies, nonprofit organizations, academic programs, private landowners, and other entities that undertake actions to conserve monarch butterflies and aid their successful migration. When undertaking actions to conserve monarch butterflies and their habitats pursuant to this section, the department shall use the best available science and consider, as appropriate and feasible, all of the following:

1. restoring or revegetating monarch caterpillar habitat using regionally or locally appropriate native milkweed species and native nectar plant species;
2. controlling nonnative weed species that threaten native milkweed species, and controlling pests and disease, using current best management practices consistent with integrated pest management principles that pose low risk to monarch butterflies and their habitat;
3. identifying alternatives to pest management practices that may be harmful to monarch butterflies, their food or their habitat, including but not limited to alternatives to the use of pesticides that may cause such harm;
4. incorporating diverse tree species, structures, and arrangements when restoring or establishing winter habitat sites to match monarch butterfly preferences for temperature, light, moisture, wind, and other

microclimate characteristics; and

5. increasing the number of partnerships and making the most of partnerships to use residential and institutional landscaped areas, agricultural lands that are not in active production, transportation corridors, and conservation easements to create, restore, or enhance monarch butterfly habitat.

TITLE 7

HUNTING, FISHING AND TRAPPING LICENSES

Section 11-0701. Definitions of licenses and privileges of licensees.

11-0702. Lifetime hunting, fishing, trapping, archery and muzzle-loading licenses.

11-0703. General provisions.

11-0704. Transfer of a lifetime license.

11-0705. Failure to carry license, tag or bowhunting and/or muzzle-loading privileges.

11-0706. Gift cards for hunting and fishing licenses.

11-0707. Exemptions from requirement of hunting, big game, fishing and trapping licenses.

11-0709. Circumstances in which license under section 11-0701 not required.

11-0713. Procedure in issuing licenses.

11-0715. Fees.

11-0719. Revocation and suspension of licenses and of right to hunt, fish or trap without license.

§ 11-0701. Definitions of licenses and privileges of licensees.

1. A hunting license:

a. entitles a holder who is twelve or thirteen years of age to hunt wildlife, except big game, as provided in title 9 of this article subject, specifically, to the provisions of section 11-0929 of this article. It entitles such holder to possess firearms as provided in

section 265.05 of the penal law. A holder who is twelve or thirteen years of age shall not hunt with a crossbow.

b. entitles a holder who is fourteen or fifteen years of age to hunt wildlife, including wild deer and bear, as provided in title 9 of this article, subject, specifically, to the provisions of section 11-0929 of this article. It entitles such holder to possess firearms as provided in section 265.05 of the penal law.

2. a. A hunting license entitles the holder to hunt wildlife subject to the following:

(1) a holder who is eighteen years of age or older may hunt wildlife as provided in title 9 of this article,

(2) a holder who is sixteen years of age or older may hunt wildlife, except big game, as provided in title 9 of this article, and

(3) a holder who is between the ages of sixteen and eighteen may hunt big game pursuant to the provisions of title 9 of this article while the holder is accompanied by a parent, guardian or person over the age of eighteen as required by section 11-0929 of this article.

A holder may take fish with a longbow as provided in titles 9 and 13 of this article.

b. A special antlerless deer license is applicable to the hunting of wild antlerless deer in a special open season fixed pursuant to subdivision 6 of section 11-0903 of this article in a tract within a Wilderness Hunting Area and entitles the holder of a hunting license to hunt antlerless deer in such special open season, as provided in title 9 of this article if he or she has on his or her person while so hunting both his or her hunting license and his or her special antlerless deer license.

3. A bowhunting privilege when included on a hunting license entitles a holder:

(1) who is between the ages of twelve and sixteen years to hunt wild deer and bear with a longbow during the special archery season and during the regular season, as provided in title 9 of this article,

subject to the provisions of section 11-0929 and subdivision 3 of section 11-0713 of this article;

(2) who is eighteen years of age or older to hunt wild deer and bear with a longbow, as provided in title 9 of this article, in a special longbow season; and

(3) who is sixteen or seventeen years of age to exercise the same privileges subject to the provisions of section 11-0929 and subdivision 3 of section 11-0713 of this article.

4. A fishing license entitles the holder to take fish by angling, spearing, hooking, longbow and tipups, to take frogs by spearing, catching with the hands or by use of a club or hook, and to take bait fish for personal use, as provided in titles 9 and 13 of this article, except that such license shall not entitle the holder to take migratory fish of the sea or to take fish from the waters of the marine district.

5. A non-resident bear tag entitles a person who has not been a resident of the state for more than thirty days who also possesses a hunting license to hunt bear during the regular open season therefor or in an open season fixed by regulation pursuant to subdivision eight of section 11-0903 of this article. It entitles a non-resident holder who also possesses a hunting license with bowhunting privilege to hunt bear with a longbow during the open bear season. It entitles a non-resident holder who also possesses a hunting license with muzzle-loading privilege to hunt bear with a muzzleloader during the open bear season.

6. A seven-day fishing license entitles the holder to exercise the privileges of a fishing license for the seven consecutive days specified in the license.

7. A one-day fishing license entitles the holder to exercise the privileges of a fishing license on the day specified on the license.

8. A trapping license entitles the holder to trap beaver, otter, fisher, mink, muskrat, skunk, raccoon, bobcat, coyote, fox, opossum, weasel, pine marten and unprotected wildlife except birds, as provided in title 11, subject to the provisions of section 11-0713 of this

article.

9. A muzzle-loading privilege when included on a hunting license entitles a holder who is fourteen years of age or older to hunt wild deer and bear with a muzzle-loading firearm or crossbow, as provided in title 9 of this article, in a special muzzle-loading firearm season.

§ 11-0702. Lifetime hunting, fishing, trapping, archery and muzzle-loading licenses.

1. There are hereby created the following lifetime hunting, fishing, trapping, archery and muzzle-loading privileges and fees therefor subject to the same privileges and obligations of a comparable short term license:

Licenses	Fees
a. Lifetime license including a hunting license, fishing license and turkey permit. If purchased, for a child four years of age or younger	\$380.00
for a child age five through eleven years of age	\$535.00
for a person age twelve through sixty-nine years of age	\$765.00
for a person age seventy and over.	\$65.00
b. Lifetime hunting license.	\$535.00
c. Lifetime fishing license for a person age sixty-nine or younger.	\$460.00
d. Lifetime fishing license for a person age seventy and over.	\$ 65.00
e. Lifetime trapping license.	\$395.00
f. Lifetime archery privilege.	\$235.00

g. Lifetime muzzle-loading privilege.	\$235.00
h. For transfer to a person pursuant to section 11-0704 of this title	\$50.00

The holder of a lifetime hunting license or lifetime fishing license may, at any time, convert such license to a lifetime license pursuant to paragraph a of this subdivision for an additional fee equal to the difference between the current fee for the new license and the fee originally paid for the license.

2. Legal residency within the state of New York shall be a prerequisite for persons to obtain, or have obtained for them, any lifetime licenses included within this section. Lifetime licenses so obtained shall continue to be valid for use within the state by the person to whom the lifetime license was issued, regardless of a change in residency of that lifetime license holder. Holders of lifetime hunting licenses who become non-residents of the state may continue to obtain resident bowhunting and muzzle-loading privileges, including lifetime archery and muzzle-loading privileges. Holders of lifetime bowhunting and muzzle-loading privileges who become non-residents of the state may continue to obtain resident hunting privileges, including any lifetime licenses that include any hunting privileges. Possession of lifetime licenses is nontransferable.

3. Notwithstanding any other provision of law, the commissioner shall promulgate rules and regulations, which the department deems necessary to implement the establishment of lifetime licenses.

Such rules and regulations shall provide:

- a. for a permanent, counterfeit-resistant identification card with the necessary identification information;
- b. for annual issuance of necessary tags;
- c. (i) for the replacement of a lost license upon application with a notarized affidavit and a fee of five dollars and (ii) for gift

inscriptions, up to twenty-three characters, on lifetime licenses for an additional fee of five dollars;

d. that conditions for lifetime licenses shall include compliance with all conditions presently required for holders of short term licenses;

e. that lifetime license fees shall be increased only when short term or annual licenses are increased and shall be increased at the same percentage level and that such increases shall not be retroactive.

4. All moneys collected from the sale of lifetime licenses shall be deposited in the state fish and game trust account pursuant to section eighty-three of the state finance law.

§ 11-0703. General provisions.

1. a. The privileges of the licenses and stamps defined in section 11-0701 may be exercised only at the times and places, and in the manner and to the extent, permitted by provisions of the Fish and Wildlife Law and applicable regulations of the department, including provisions contained and regulations authorized in sections of the Fish and Wildlife Law other than those specifically referred to in section 11-0701.

b. No license or stamp authorizes the holder (a) to trespass upon private lands or waters or to interfere with property belonging to another person; (b) to take fish or wildlife on an Indian reservation; (c) to enter upon, or to take or disturb fish or wildlife upon, state lands or waters posted by the department except in accordance with a written permit from the department or an order adopted by the department; (d) to take any fish or wildlife in any area closed to the taking of fish or wildlife, or to take any species of fish, wildlife or protected insect in an area closed to the taking of such species.

2. Except as provided in section 11-0704 of this title, no license, permit, tag or privilege is transferable. No person shall alter, change,

lend to another or attempt to transfer to another any license or any permit, tag or privilege issued therewith. No person, while hunting, shall possess a license, permit, tag or privilege which was issued to another person unless actually accompanied by the person to whom such license, permit, tag or privilege was issued. No person shall purchase, possess or use more than one hunting license, trapping license, bowhunting privilege, muzzle-loading privilege or special permit for the current license year, except as permitted by regulation of the department. Notwithstanding the prohibitions contained in this subdivision, the department may authorize by rule or regulation the transfer of deer management permits, issued pursuant to section 11-0913 of this article, to any person licensed to hunt deer pursuant to this title.

3. Any license, stamp or certificate in lieu of a lost or destroyed license, obtained by fraud, or by a person not authorized to hold it, or who makes a false statement in applying for it, is void.

4. a. Non-resident bear tags are issuable only to non-residents and persons who have been residents for less than thirty days immediately preceding the date of application.

b. A person is ineligible for a hunting license, trapping license, bowhunting privilege or muzzle-loading privilege unless such person meets the requirements of subdivision 3 of section 11-0713 of this title.

c. Only the following persons are eligible for resident fees: (1) persons who have been residents in the state for thirty days immediately prior to the date of application for the licenses, or who are enrolled as full-time students at a college or university within the state and who are in residence in the state for the school year, or who are out of state or foreign exchange high school students enrolled as full-time students in a high school within the state and who are in residence in the state for the school year; (2) Indian residents or members of the six nations residing on any reservation wholly or partly within the state; and (3) members of the United States armed forces in active

service, stationed in this state, regardless of the place of residence at the time of entry into the service.

d. Only persons who possess a hunting license are eligible for a bowhunting privilege or muzzle-loading privilege.

e. A person under the age of twelve years is ineligible for a hunting license.

5. a. One-day and seven-day fishing licenses expire on the date stated on them.

b. A fishing license issued without charge to a resident as formerly provided in subdivision 2 of section 11-0715, shall remain effective for the life of the licensee.

c. A special antlerless deer license is effective during the special open season for which it is issued.

d. All other licenses and privileges defined in section 11-0701 are effective for a license year beginning September 1 and ending August 31; provided, however, a fishing license shall remain effective one year from the date on which it was issued.

6. a. Except as provided in section 11-0707 and section 11-0709 of this title, no person shall (1) hunt wildlife unless such person holds and is entitled to exercise the privileges of a hunting license; (2) hunt antlerless deer in a special open season therefor pursuant to subdivision 6 of section 11-0903 of this article unless such person holds and is entitled to exercise the privileges of and has on his or her person while so hunting a hunting license, bowhunting privilege or muzzle-loading privilege, and a special antlerless deer license; (3) take fish or frogs in the manner described in subdivision 4 of section 11-0701 of this title unless such person is entitled to exercise the privileges of a fishing license; (4) trap wildlife unless such person holds a trapping license.

b. Except as provided in section 11-0707 and section 11-0709 of this title, no person shall (1) hunt wild deer or bear unless such person holds and is entitled to exercise the privileges of a hunting license, and meets the requirements of this article; (2) hunt wild deer or bear with a longbow in a special longbow season unless such person holds and is entitled to exercise the privileges of a hunting license with a bowhunting privilege and meets the requirements of this article; or (3) hunt wild deer or bear with a muzzle-loading firearm in a special muzzle-loading firearm season unless such person is at least fourteen years old and holds a hunting license with a muzzle-loading privilege and meets the requirements of this article.

c. No non-resident shall hunt wild bear unless such person holds a hunting license and a non-resident bear tag and meets the requirements of this article.

§ 11-0704. Transfer of a lifetime license.

A lifetime license, as provided in section 11-0702 of this title, is not transferable to any person unless:

1. the person to whom such license and permit was issued dies within one year of the issuance date of such license and permit; and

2. the person to whom such license and permit is to be transferred is a legal resident of this state pursuant to this title; and

3. the person to whom such license and permit is to be transferred would otherwise be eligible to purchase such license and permit; and

4. the person to whom such license is to be transferred is related to the person to whom such license was issued by the first degree of consanguinity, or legal marriage to such person, or is the adopted child or step child or step sibling of such person; and

5. designation is made by the personal representative of the

decedent's estate; and

6. The application for transfer is made within three years of the issuance of the license; and

7. the person to whom such license and permit is transferred pays the fee as set forth in section 11-0702 of this title; and

8. such license and permit has not been previously transferred.

Provided, however, that subdivisions one, six and seven of this section shall not apply when the person to whom such license was issued was a member of the armed forces of the United States or a member of the national guard or other reserve component of the armed forces of the United States who died in combat zone or combat zone of operations or while deployed for active military duty, other than training, on or after the eleventh day of September, two thousand one.

§ 11-0705. Failure to carry license, tag or bowhunting and/or muzzle-loading privileges.

1. a. The holder of a license, tag, bowhunting privilege or muzzle-loading privilege defined in section 11-0701 of this title shall:

(1) have such license, tag or privilege on the holder's person in an electronic or other acceptable format pursuant to regulations, while exercising any privilege of that license stated in section 11-0701 of this title, or while assisting or accompanying a minor in hunting as provided in section 11-0929 of this article, and

(2) shall exhibit it on demand to any police officer, peace officer or owner, lessee or person in control of the lands or waters or the designees of the owner, lessee or person in control of the lands or waters on which the license holder is present.

2. Failure of a licensee to have the holder's license, tag or license with bowhunting and/or muzzle-loading privilege included, on the holder's person in an electronic or other acceptable format pursuant to

regulations, while hunting, fishing or trapping, is presumptive evidence that the holder is hunting, fishing or trapping, as the case may be, without holding the license, tag or license and bowhunting or muzzle-loading privilege required by subdivision 6 of section 11-0703 of this title.

§ 11-0706. Gift cards for hunting and fishing licenses.

1. The commissioner is authorized to establish gift cards for the licenses and bowhunting and muzzle-loading privileges set forth in section 11-0701 of this title.

2. For the purposes of this title, the term "gift card" shall mean a restricted monetary equivalent or voucher that, when redeemed by the holder, entitles such person to a valid license or bowhunting and/or muzzle-loading privilege as set forth in section 11-0701 of this title.

§ 11-0707. Exemptions from requirement of hunting, fishing and trapping licenses.

1. Resident owners and lessees and members of their immediate families, actually occupying and cultivating farm lands, on such farm lands and the waters thereof, shall have the right,

a. to hunt wildlife except wild deer and bear,

b. to trap bobcat, coyote, fox, mink, muskrat, raccoon, opossum, weasel, skunk, and unprotected wildlife that may lawfully be taken by trapping (except that only the owner or lessee thereof may trap without license on a registered muskrat marsh) and

c. to take fish and frogs, except that they may not take bait fish by net or trap, all as if they held the licenses defined in section 11-0701 and required by section 11-0703, subdivision 6.

2. Minors under the age of sixteen may take fish and frogs as if they held fishing licenses, except that they may not take bait fish by net or trap.

3. Any person who is a patient at any facility in this state maintained by the United States Veterans Health Administration or at any hospital or sanatorium for treatment of tuberculosis maintained by the state or any municipal corporation thereof or resident patient at any institution of the department of Mental Hygiene, or resident patient at the rehabilitation hospital of the department of Health, or any incarcerated individual of a conservation work camp within the youth rehabilitation facility of the department of corrections and community supervision, or any incarcerated individual of a youth opportunity or youth rehabilitation center within the Office of Children and Family Services, any resident of a nursing home or residential health care facility as defined in subdivisions two and three of section twenty-eight hundred one of the public health law, or any staff member or volunteer accompanying or assisting one or more residents of such nursing home or residential health care facility on an outing authorized by the administrator of such nursing home or residential health care facility may take fish as if he or she held a fishing license, except that he or she may not take bait fish by net or trap, if he or she has on his or her person an authorization upon a form furnished by the department containing such identifying information and data as may be required by it, and signed by the superintendent or other head of such facility, institution, hospital, sanitarium, nursing home, residential health care facility or rest camp, as the case may be, or by a staff physician thereat duly authorized so to do by the superintendent or other head thereof. Such authorization with respect to incarcerated individuals of said conservation work camps shall be limited to areas under the care, custody and control of the department.

4. If persons holding fishing licenses issued under the New York Fish and Wildlife Law are not required to have licenses issued by a state named in paragraph a, b, c or d of this subdivision when fishing in that part of the waters, specified in such paragraph, which lies within that state, then, in such case, a person holding a fishing license issued by

such state may, without a fishing license issued under the New York State Fish and Wildlife Law, take fish as provided in title 13, from that part of such waters specified in paragraph a, b, c or d which lies within this state:

a. License issued by Vermont: that part of Lake Champlain lying between New York and Vermont;

b. License issued by Pennsylvania: that part of the Delaware River lying between New York and Pennsylvania;

c. License issued by Connecticut: those parts of Indian Lake, and of Samuel Bargh Reservoir (Mianus Reservoir) lying between New York and Connecticut;

d. License issued by New Jersey: that part of Greenwood Lake lying between New York and New Jersey.

7. The owner or lessee of a registered muskrat marsh may, without license, trap muskrat, bobcat, coyote, fox, mink, raccoon, opossum, weasel, skunk, and unprotected wildlife permitted to be taken by trapping, on such registered muskrat marsh.

8. The enrolled members of an Indian tribe having a reservation located wholly or partly within the state and such other Indians as are permitted by the tribal government having jurisdiction over such reservation may hunt, fish, trap upon such reservation subject only to rules, regulations and fish and wildlife laws established by the governing body of such reservation. Before fish and wildlife taken on reservations by Indians shall be transported or possessed off the reservation it shall be tagged for identification purposes in a manner to be required by the governing body of such reservation. This subdivision shall in no way limit or otherwise impair the existing powers of any tribal government to regulate hunting, fishing and trapping and/or to issue licenses for same.

9. A minor under the age of twelve may accompany and assist a licensed

trapper who is the minor's parent or legal guardian or who is a person eighteen years of age or older designated in writing by the minor's parent or legal guardian on a form prescribed by the department and such parent, legal guardian or designee has had at least three years of trapping experience. Such minor may assist the licensed adult in all aspects of trapping without possessing a trapping license.

§ 11-0709. Circumstances in which license under section 11-0701 not required.

1. When a license or permit issued by the department, other than a license defined in section 11-0701, permits taking of fish or wildlife, such taking is exempted from the requirement of a license, defined in section 11-0701, which would otherwise be required, unless the license or permit or the statute authorizing its issuance states that such license is required.

2. Whenever taking of destructive or menacing wildlife is authorized in section 11-0523 of this article, such taking is exempt from the requirement of a license which authorizes the holder to hunt wildlife or trap, unless the provision authorizing such taking specifies that such license is required.

3. The holder of a farm fish pond license, members of his immediate family and persons actually employed by him in the cultivation of his farm or in the management of the licensed pond may, without fishing license, take fish in accordance with section 11-1911 and regulations governing the taking of fish from such fish ponds.

4. The holder of a fishing preserve license, members of his immediate family, and any person to whom the licensee has granted permission to take fish from such licensed fishing preserve waters may, without fishing or netting license, take fish in accordance with section 11-1913 and regulations governing the taking of fish from such fishing preserve waters.

§ 11-0713. Procedure in issuing licenses.

1. a. All licenses, bowhunting privileges, muzzle-loading privileges, tags, permits, registrations, and permit applications authorized by this title or section 13-0355 of this chapter, and any additional privileges authorized by the department shall be issued by:

(1) clerks of a county, town or city, except a city having a population of one million or more, although such clerks may request authorization from the department to cease issuing such licenses or registrations,

(2) clerks of a village having more than one thousand inhabitants according to the last preceding federal census, or of a village in a county of less than five hundred thousand inhabitants, adjoining a city of over one million inhabitants, both according to such census, although such clerks may request authorization from the department to cease issuing such licenses or registrations, and

(3) license issuing officers as may be appointed by the commissioner. Applicants for designation as license issuing officers shall be over the age of eighteen years and shall meet such other requirements of eligibility, including posting bond, as the department may by regulation specify. Such issuing officers shall be entitled to receive and keep the same fees for issuing licenses and stamps that are specified in section 11-0715 of this title for issuing clerks, and shall file reports and remit license fees to the appropriate regional environmental conservation officer or the department as required by regulation.

b. Special antlerless deer licenses shall be issued by the department as provided in subdivision 6 of section 11-0903 of this article.

c. One-day fishing licenses may be issued by any person who has never been convicted of or pleaded guilty to a misdemeanor under this chapter within the past three years, and has not been convicted of a crime under any other law. Such licenses shall be issued to any such person following payment of the applicable license fee for each license. One-day fishing licenses may be sold by the initial purchaser for no more than the applicable license fee, plus one dollar for the person

selling such license. In the case of misuse or fraud in handling the fishing licenses, the department shall have the authority to revoke the privilege to buy and sell the licenses.

2. The issuing officer shall not issue a hunting license or bowhunting privilege or muzzle-loading privilege to a person between the ages of twelve and sixteen years unless, at the time of issuance, the applicant is accompanied by his or her parent or legal guardian who shall consent to the issuance of the license and shall so signify by signing his or her name in ink across the face of it. At no time shall such licenses be issued by mail to persons between the ages of twelve and sixteen years.

3. a. Subject to the provisions of paragraph b of this subdivision, the issuing officer shall not issue a license, privilege, tag, permit, or permit application which authorizes the holder to hunt wildlife, to any person unless the applicant presents:

(1) a license which authorizes the holder to hunt wildlife issued to him previously; or

(2) an affidavit from a license issuing officer stating that applicant previously has been issued a license which authorizes the holder to hunt wildlife; or

(3) a certificate of qualification in responsible hunting, responsible bowhunting and responsible trapping practices, including safety, ethics and landowner-hunter relations, issued or honored by the department, pursuant to this subdivision.

b. (1) The issuing officer shall not issue a bow hunting privilege to any person unless the applicant presents a hunting license issued to that person for the corresponding license year and a New York state license which authorizes the holder to exercise the privilege of hunting with a longbow issued in 1980 or later, an affidavit as provided in subparagraph 2 of paragraph a of this subdivision or a certificate of qualification in responsible bowhunting practices issued or honored by the department.

(2) The issuing officer shall not issue a trapping license to any person unless the applicant presents a trapping license issued to him or her previously, an affidavit as provided in subparagraph 2 of paragraph

a of this subdivision or a certificate of qualification in responsible trapping practices.

(3) The issuing officer shall not issue a muzzle-loading privilege to any person unless the applicant presents a hunting license issued to that person for the corresponding license year and such person is at least fourteen years old.

c. Certifications of qualification in responsible hunting, responsible bowhunting and responsible trapping practices may be made by duly qualified and designated persons, whose fitness to give instructions in said practices has been determined by an agent of the department. The department may designate any person it deems qualified to act as its agent in the giving of instruction and the making of certification. No charge shall be made for any certificate or instruction given to a person to qualify him or her to obtain a license or privilege other than for certain instruction and materials accredited by the department to provide preparation for final instruction and testing by agents of the department or for replacement education certificates for a commission of one dollar to the issuing agent. The department shall make available to the public courses without charge which do not require additional preparation at the expense of students, and may also offer optional courses which require preparatory instruction which may be at the expense of the student. The department may make rules and regulations which in its opinion effectuate better the purpose of this subdivision.

4. a. A person who has lost or accidentally destroyed a license or privilege authorizing the holder to hunt, fish, or trap may apply to the officer who issued it for a certificate in lieu thereof. Such officer shall issue a certificate stating the name and address of the applicant, the type of license issued and the fee, if any, paid for it. Applications and certificates furnished by the department shall be used for this purpose.

b. A person who has lost or accidentally destroyed a tag issued with such a license or privilege may apply to any license issuing officer for a duplicate and the department shall issue a duplicate tag when satisfied that the application is made in good faith.

c. A person who has lost or accidentally destroyed a deer management permit may apply to any license issuing officer for a duplicate. Such officer shall issue a duplicate tag when satisfied that the application is made in good faith. The officer shall also issue a certificate stating the name and address of the applicant, the identifying number of the tag that is being issued and the fee, if any, paid for it. Applications and tags furnished by the department shall be used for this purpose.

5. The commissioner shall establish a toll-free telephone number or a dedicated number for use to purchase sporting licenses by credit card purchasers. Notwithstanding any inconsistent provision of this chapter, the commissioner may authorize the sale of licenses via the internet, telephone or mail and establish procedures therefor, and may, through bulk sales or otherwise, furnish licenses for retail sale to outdoor and recreational outlets and not-for-profit organizations, and the department may sell licenses at department facilities. Except as provided in subdivision 1 of this section, a license sold at retail shall not be sold for a price which exceeds the fee for such license established in the fish and wildlife law.

6. The department shall require training in the safe use of hunting with a crossbow and safe hunting practices in the basic hunter education course required for all new hunters. All persons who have completed hunter education and who have not certified their completion of a safety course which includes crossbow hunting training prior to April first, two thousand fourteen shall complete an online or other training program approved by the department prior to using a crossbow to hunt.

7. The commissioner shall ensure that space is provided on any form for application or renewal of a license issued pursuant to this title so that the applicant shall register or decline registration in the donate life registry for organ, eye and tissue donations pursuant to section forty-three hundred ten of the public health law and that the following is stated on the form in clear and conspicuous type:

"You must fill out the following section: Would you like to be added

to the Donate Life Registry? Check box for 'yes' or 'skip this question'."

The commissioner of health shall not maintain records of any person who checks "skip this question". Except where the application is made in person or electronically, failure to check a box shall not impair the validity of an application, and failure to check "yes" or checking "skip this question" shall not be construed to imply a wish not to donate. In the case of an applicant under eighteen years of age, checking "yes" shall not constitute consent to make an anatomical gift or registration in the donate life registry, except as otherwise provided pursuant to the provisions of paragraph (b) of subdivision one of section forty-three hundred one of the public health law. Where an applicant has previously consented to make an anatomical gift or registered in the donate life registry, checking "skip this question" or failing to check a box shall not impair that consent or registration.

§ 11-0715. Fees.

1. When any license or privilege listed in this section is issued by the department or an officer or employee of the department, the license fee is the amount specified in this section plus the amount, if any, specified as a fee to the issuing clerk.

2. A member of the Shinnecock tribe or the Poospatuck tribe or a member of the six nations, residing on any reservation wholly or partly within the state, is entitled to receive free of charge a fishing license, a hunting license, a muzzle-loading privilege, a trapping license, and a bowhunting privilege; a resident of the state who is a member of the United States armed forces in active service who is not stationed within the state and has not been herein longer than thirty days on leave or furlough, is entitled to receive free of charge a fishing license, a hunting license, and a trapping license; a resident of the state who is an active member of the organized militia of the state of New York as defined by section one of the military law, or the reserve components of the armed forces of the United States, and

excluding members of the inactive national guard and individual ready reserve, is entitled to receive free of charge a fishing license, a hunting license, and a trapping license; and a resident who is blind is entitled to receive a fishing license free of charge. For the purposes of this subdivision a person is blind only if either: (a) his or her central visual acuity does not exceed 20/200 in the better eye with correcting lenses, or (b) his or her visual acuity is greater than 20/200 but is accompanied by a limitation of the field of vision such that the widest diameter of the visual field subtends an angle no greater than 20 degrees.

A resident in the state for a period of thirty days immediately prior to the date of application who has attained the age of seventy is entitled to receive a fishing license, a trapping license, and a hunting license, at a cost of five dollars for each license.

A resident in the state for a period of thirty days immediately prior to the date of application who has attained the age of seventy is entitled to receive free of charge a bowhunting privilege and a muzzle-loading privilege.

3. Each applicant for a license, permit or privilege shall pay to the issuing officer a fee, according to the license, permit or privilege issued and the residence or other qualification of the applicant.

a. In the case of persons who meet the criteria set forth in paragraph c of subdivision four of section 11-0703 of this title:

License	Fee
(1) (a) Hunting	\$22.00
(b) Hunting ages fifteen and under	\$5.00
(2) Fishing	\$25.00
(3)(a) Trapping	\$20.00
(b) Trapping ages fifteen and under	\$5.00
(4) Muzzle-loading privilege	\$15.00
(5)(a) Bowhunting privilege	\$15.00
(b) Bowhunting privilege	

ages fifteen and under	\$4.00
(6) Turkey permit	\$10.00
(7) Seven-day fishing	\$12.00
(8) One-day fishing	\$ 5.00

b. In the case of a non-resident and persons resident in the state for less than thirty days:

License	Fee
(1) (a) Hunting	\$100.00
(b) Hunting ages fifteen and under	\$5.00
(2) Fishing	\$50.00
(3) Seven-day fishing	\$28.00
(4)(a) Trapping	\$275.00
(b) Trapping ages fifteen and under	\$5.00
(5)(a) Bowhunting privilege	\$30.00
(b) Bowhunting privilege ages fifteen and under	\$4.00
(6) Muzzle-loading	\$30.00
(7) Turkey permit	\$20.00
(8) One-day fishing	\$10.00

c. In all cases:

(1) Certificates in lieu of lost license or privilege or tag	\$5.00
(2) Duplicate for lost or destroyed permit or tag	\$10.00

4. A person, resident in the state for at least thirty days immediately prior to the date of application, who (a) has been honorably discharged from service in the armed forces of the United States, or (b) has a qualifying condition, as defined in section one of the veterans' services law, and has received a discharge other than bad conduct or dishonorable from such service, or (c) is a discharged LGBT veteran, as defined in section one of the veterans' services law, and has received a discharge other than bad conduct or dishonorable from such service, and is certified as having a forty percent or greater service-connected disability is entitled to receive all licenses, privileges, tags, and

permits authorized by this title for which he or she is eligible, except turkey permits, renewable each year for a five dollar fee.

5. Prior to the first day of February in the second year following the year in which this subdivision shall have become a law, and prior to the first day of February of every second year thereafter, the conservation fund advisory council shall submit recommendations to the commissioner regarding the level of fees established by this section taking into account economic indicators, the status of the conservation fund, and such program indicators as it may deem appropriate. The commissioner shall transmit the recommendations in their entirety to the governor, the legislature and interested individuals and organizations, and the governor may submit a budget bill incorporating his recommendations thereon to the legislature.

6. a. License issuing officers may retain 1.1 percent of the gross proceeds from the sale of all lifetime licenses listed in section 11-0702 of this title.

b. License issuing officers may retain 5.5 percent of the gross proceeds from sale of all other license, privileges, certificates and permits, including any application fees associated with such licenses, privileges, certificates and permits.

7. Notwithstanding the provisions of subdivision three of this section, the commissioner may offer for sale licenses, privileges and permits listed in this section at a reduced price up to ten days per year to encourage resident and out-of-state hunters, trappers and anglers to utilize New York's hunting, trapping and fishing opportunities. These days shall be designated in a manner determined by the department to best provide public notice thereof and to maximize public participation therein.

§ 11-0719. Revocation and suspension of licenses and of right to hunt, fish or trap without license.

1. a. In the circumstances described in paragraph b of this subdivision the department may revoke any license, bowhunting privilege, or muzzle-loading privilege, of any person, to hunt, fish or trap, defined in section 11-0701 of this title or issued pursuant to any provision of the Fish and Wildlife Law, or it may revoke all of such licenses, bowhunting privileges, or muzzle-loading privileges. It may also deny such person, for a period not exceeding five years, the privilege of obtaining such license or licenses, bowhunting privilege, or muzzle-loading privilege, or of hunting, trapping or fishing, anywhere in the state with or without license, bowhunting privilege, or muzzle-loading privilege, except as provided in subdivision 1 of section 11-0707 of this title or in section 11-0523 of this article. It may also require that such person successfully complete a department-sponsored course and obtain a certificate of qualification in responsible hunting including responsible crossbow hunting, responsible bowhunting or responsible trapping practices before being issued another license.

b. This subdivision applies to any person who:

(1) is convicted of a violation of the Fish and Wildlife Law involving the taking of deer or bear with the aid of an artificial light or signs an acknowledgment of such violation of that law for the purpose of effecting a settlement by civil compromise or by stipulation; or

(2) is convicted of a violation of the Fish and Wildlife Law involving the illegal taking of a deer, moose or bear, or signs an acknowledgment of any such violation of that law for the purpose of effecting a settlement by civil compromise or by stipulation; or

(3) is convicted of any violation of the Fish and Wildlife Law or signs an acknowledgment of any violation of that law for the purpose of effecting a settlement by civil compromise or by stipulation, and previously during the five years immediately preceding such conviction or the signing of such acknowledgment has been so convicted or has signed such an acknowledgment; or

(4) is convicted of an offense involving a violation of subdivisions one and two of section 11-0901 of this article relating to taking of wildlife when the person taking is in or on a motor vehicle while such motor vehicle is on a public highway or an offense involving a violation of subdivision one of section 11-0901 of this article and subparagraph

one of paragraph a of subdivision four of section 11-0931 of this article relating to taking wildlife when the person taking is in or on a motor vehicle and discharging a firearm, crossbow or longbow in such a way that the load, bolt or arrow passes over a public highway or a part thereof or signs an acknowledgment of any such violation for the purpose of affecting a settlement by civil compromise or by stipulation.

c. Upon receipt of a court notification of the failure of a person to appear within three months of the return date or new subsequent adjourned date pursuant to an appearance ticket, uniform appearance ticket or uniform appearance ticket and simplified information charging such person with a violation of the Fish and Wildlife Law, or any rule or regulation adopted pursuant thereto, the department may suspend any license of such person to hunt, fish or trap pending receipt of notice from the court that such person has appeared in response to such appearance ticket. Such suspension shall take effect no less than thirty days from the day upon which notice thereof is sent by the department to the person whose license is to be suspended.

2. a. The department may revoke the licenses, tags, bowhunting privileges, or muzzle-loading privileges, which authorize the holder to hunt and/or trap wildlife, and may deny the privilege of obtaining such licenses, tags, bowhunting privileges, or muzzle-loading privileges, and may deny the privileges of hunting and/or trapping with or without a license.

(1) of any person who, while engaged in hunting or trapping,

(i) causes death or injury to any person by discharging a firearm, crossbow or longbow, or

(ii) so negligently discharges a firearm, crossbow or longbow as to endanger the life or safety of another, or

(iii) so negligently and wantonly discharges a firearm, crossbow or longbow as to destroy or damage public or private property; or

(2) of any agent of the department authorized to issue certificates of qualification in responsible hunting including responsible crossbow hunting, bowhunting, or trapping practices who improperly issues any such certification to a person whom he or she has not trained, or whom he or she knows has not satisfactorily completed all of the requirements

necessary for such certification.

b. Action by the department resulting in the revocation of such license or denial of the privilege to hunt and trap as provided in this subdivision shall be only after a hearing held by the department upon notice to the offender, at which proof of facts indicating the violation is established to the satisfaction of the commissioner or of the hearing officer designated by him or her and concurred in by the commissioner. Provided that where a person, while hunting, causes death or injury to any person by discharge of a firearm, crossbow or longbow, the commissioner may, in his or her discretion, suspend such person's license or licenses to hunt and suspend such person's right to hunt without a license for a period of up to sixty days pending a hearing as provided for in this subdivision.

c. In case such discharge of a firearm, crossbow or longbow causes death or injury to any person, the license or licenses, bowhunting privilege, and muzzle-loading privilege shall be revoked and the ability to obtain any such license and of hunting or of trapping anywhere in the state with or without a license denied, for a period not exceeding ten years, except that no revocation shall be made in cases in which facts established at the hearing indicate to the satisfaction of the commissioner that there was no negligence on the part of the shooter or bowhunter. In all other cases the license or licenses, bowhunting privilege, or muzzle-loading privilege, shall be revoked and the privilege of obtaining such license, bowhunting privilege, or muzzle-loading privilege, and of hunting or of trapping anywhere in the state with or without a license denied for a period not exceeding five years. The department may also require that the person causing such death or injury successfully complete a department-sponsored course and obtain a certificate of qualification in responsible hunting including responsible crossbow hunting or bowhunting practices before being issued another hunting license.

d. Every person injuring himself, herself or another person in a hunting related incident, and the investigating law enforcement officer summoned to or arriving at the scene of such incident shall within ten

days from the occurrence of such incident file a report of the incident in writing with the department. Every such person or law enforcement officer shall make such other and additional reports as the department shall require. Failure to report such incident as herein provided by the person causing injury or to furnish relevant information required by the department shall be a violation and shall constitute grounds for suspension or revocation of such person's hunting licenses and bowhunting and muzzle-loading privileges and denial of the ability to obtain any such license and of hunting with or without a license following a hearing or opportunity to be heard. In addition, the department may temporarily suspend the license of the person failing to report a hunting related incident within the period prescribed herein until such report has been filed. In the case of a non-resident, the failure to report an incident as herein provided shall constitute grounds for suspension or revocation of his or her privileges of hunting within this state. The report required by this section shall be made in such form and number as the department may prescribe.

3. A hunting license issued to a person who is at least twelve and less than sixteen years of age or a hunting license with bowhunting privilege issued to a person who is between the ages of twelve and sixteen years may be revoked by the department upon proof satisfactory to the department that such person, while under the age of sixteen, has engaged in hunting with a gun, crossbow or longbow, in circumstances in which a license and/or bowhunting or muzzle-loading privilege is required, while not accompanied by his or her parent, guardian or other adult as provided in section 11-0929 of this article. Additionally, the department may revoke the hunting and/or bowhunting or muzzle-loading privilege of any parent, guardian, youth mentor or other adult upon proof satisfactory to the department that such person allowed the holder of a hunting license, bowhunting privilege or muzzle-loading privilege to hunt with a gun, crossbow or longbow in violation of section 11-0929 of this article. If such license or privilege is revoked the department shall fix the period of such revocation, which is not to exceed six years. The department may require that such person successfully complete a department sponsored course and obtain a certificate of qualification in responsible hunting including responsible crossbow hunting, or

responsible bowhunting practices before being issued another hunting or bowhunting license.

4. A person whose license to hunt, trap, or fish has been suspended or revoked as provided in this section is ineligible for such license during the period determined by the department as provided in this section. No such person shall, during such period, procure any license for which he or she is ineligible. No person shall without license hunt, trap, or fish during any period in which the privilege to do so has been denied by the department as provided in this section.

5. When the department has revoked a license, or has denied to any person the ability to obtain a license, or of hunting, trapping or fishing without a license, it shall cause the fact of such revocation or denial, or both, as the case may be, and the terms and extent thereof, to be entered in the minutes of the department, and shall forthwith send a written notice of its action as so entered in the minutes to the person affected, at his last known address, either by registered or certified mail or by delivery personally by a representative of the department. Within five days after service of such notice, such person shall deliver to the department the license or licenses revoked, together with any tags issued in connection with them. If the license was one entitling the holder to a bowhunting or muzzle-loading privilege and the revocation concerned some but not all of such privileges, any license, or tag so delivered shall be returned by the department to the person to whom it was issued, appropriately marked or stamped to show the extent to which it is revoked.

TITLE 9

HUNTING

Section 11-0901. Prohibitions.

11-0903. Open hunting seasons and bag limits fixed by regulation.

11-0905. Open hunting seasons and bag limits for upland game birds and small game.

11-0907. Deer and bear; open hunting seasons; bag limits.

- 11-0909. Hunting hours.
- 11-0911. Procedure on taking wild deer and bear; transportation of wild deer.
- 11-0913. Deer management permits.
- 11-0914. Yearling buck protection program.
- 11-0915. Disposal of deer, moose and bear killed unintentionally by collision.
- 11-0917. Possession, transportation and sale of wild game and other wildlife.
- 11-0919. Aid to wildlife in distress.
- 11-0921. Surrender of game unfit for human consumption; permit for taking another of species surrendered.
- 11-0923. Dogs.
- 11-0925. Special dog training areas.
- 11-0927. Field trials.
- 11-0928. Tracking dogs.
- 11-0929. Hunting by minors.
- 11-0931. Prohibitions on the use and possession of firearms.
- 11-0933. Taking small game by crossbow.
- 11-0935. Deer hunting pilot program.

§ 11-0901. Prohibitions.

1. No person while in or on a motor vehicle, as defined in section 11-0931 of this chapter, shall take wildlife other than migratory game birds, or use any lights on any such vehicle for such purpose.

* 2. Wildlife shall not be taken on or from any public highway, except:

a. that in the forest preserve counties it may be taken from highways other than state, county or town highways; and

b. by a nuisance wildlife specialist with a permit issued pursuant to section 11-0522 of this article provided that such activities are in furtherance of the site-specific deer management plan.

c. by a nuisance wildlife specialist with a permit issued pursuant to section 11-0522-a of this article provided that such activities are in furtherance of the site-specific deer management plan.

* NB Effective until January 1, 2027

* 2. Wildlife shall not be taken on or from any public highway, except that in the forest preserve counties it may be taken from highways other than state, county or town highways.

* NB Effective January 1, 2027

3. a. Migratory game birds shall be taken only as permitted by regulations of the department adopted pursuant to section 11-0307.

b. Wild deer and bear shall not be taken except by gun, crossbow or by long bow. Where an open season, set forth in the table of open seasons in section 11-0907 of this title or otherwise established by law or fixed by regulation, is specified as an open season for taking such game by shotgun or long bow only, or is specified as an open season for taking such game by long bow only, they shall not be taken except as so specified.

c. Wild small game and wild upland game birds shall be taken only by longbow or gun, or by the use of raptors as provided in title 10 of this article, except that:

(1) skunk, raccoon, bobcat, coyote, fox, mink and muskrat may be taken in any manner not prohibited in this section or in title 11 of the Fish and Wildlife Law;

(2) frogs may also be taken by spearing, catching with the hands, or by the use of a club or hook; and

(3) crossbows may be used but only by licensees who are fourteen years of age or older.

d. Muskrat shall not be taken by the use of a spear and shall not be taken by shooting except that until the state of Vermont shall prohibit taking of muskrats on Lake Champlain by shooting, muskrats may be taken, by shooting with a firearm not larger than twenty-two caliber, on Lake Champlain, exclusive of the tributary streams flowing into such lake. Possession of pierced or stabbed muskrats shall be presumptive evidence

that they were unlawfully taken. Wild mink shall not be taken by the use of firearms in the Northern Zone nor elsewhere within the state with a firearm larger than twenty-two caliber. Skunk, raccoon, bobcat, mink and muskrat shall not be taken by the use of smoke, chemicals, gas or poison. Beaver, fisher and otter shall not be hunted.

e. Wild pheasant shall be taken only by shotgun or long bow, or by the use of raptors as provided in title 10 of this article. Except as specifically authorized by regulation of the department adopted pursuant to section 11-1007 or whenever the department determines that the taking of hen pheasants will result in better pheasant management and not be detrimental to the natural propagation of such pheasants, only male wild pheasants shall be taken.

f. No wildlife shall be taken with an arrow with an explosive head or shaft, or with an arrow, dart or any device, propelled by any means, that is used for the purpose of injecting or delivering any type of drug into the blood system of such wildlife. Nothing in this paragraph shall be construed as prohibiting a wildlife biologist or employee of the department or anyone acting under a license from the department from using any method to take wildlife if he is doing so within the scope of his employment for the department, or pursuant to the license issued by the department.

g. Wildlife shall not be taken by the use of a device commonly called a spear gun.

4. a. Wild deer and bear shall not be taken in water.

b. No person shall hunt deer:

(1) with the aid of a dog, or aircraft of any kind; or

(2) with the aid of a jacklight, spotlight, headlight or other type of artificial light; or

(3) with a pistol, revolver or rifle using rim-fire ammunition; or

(4) with a shotgun of less than twenty gauge or loaded with shells other than shells each carrying a single round ball or a single slug, provided however, the use of a shotgun of twenty gauge or larger having

a rifled barrel or a smooth bore barrel fitted with a rifled choke, loaded with shells each carrying a single round ball or a single slug, shall not be prohibited so long as only shells having a non-metallic case, except for the base, are used; or

(5) with a long bow with a draw weight of less than thirty-five pounds; or

(6) with an arrow or bolt with an arrowhead that measures less than seven-eighths of an inch at its widest point or that has fewer than two sharp cutting edges; or

(7) with the aid of a pre-established bait pile other than those areas established by standard agricultural production practices; or

(8) with an arrow with a barbed broadhead arrowhead; or

(9) with a crossbow unless such crossbow shall consist of a bow and string, either compound or recurve, mounted upon a stock with a trigger that holds the string and limbs under tension until released. The trigger unit of such crossbow must have a working safety. The minimum peak draw weight of such crossbow shall be one hundred pounds.

c. No person shall hunt bear:

(1) with the aid of a dog, or aircraft of any kind; or

(2) with the aid of a jacklight, spotlight, headlight or other type of artificial light; or

(3) with a pistol, revolver or rifle using rim-fire ammunition; or

(4) with a shotgun of less than twenty gauge or loaded with shells other than shells each carrying a single round ball or a single slug, provided however, the use of a shotgun of twenty gauge or larger having a rifled barrel or a smooth bore barrel fitted with a rifled choke, loaded with shells each carrying a single round ball or a single slug, shall not be prohibited so long as only shells having a non-metallic case, except for the base, are used; or

(5) with a long bow with a draw weight of less than thirty-five pounds; or

(6) with an arrow or bolt with an arrowhead that measures less than seven-eighths of an inch at its widest point or that has fewer than two sharp cutting edges; or

(7) with the aid of a pre-established bait pile other than those areas established by standard agricultural production practices; or

(8) with an arrow with a barbed broadhead arrowhead; or

(9) with a crossbow unless such crossbow shall consist of a bow and string, either compound or recurve, mounted upon a stock with a trigger that holds the string and limbs under tension until released. The trigger unit of such crossbow must have a working safety. The minimum peak draw weight of such crossbow shall be one hundred pounds.

d. The use upon land inhabited by deer or bear of a jacklight, spotlight or other type of artificial light by any person who is or is accompanied by a person who is in possession, at the time of such use, of a long bow, a crossbow or firearm of any kind, shall be presumptive evidence that such person is hunting deer or bear with the aid of such light, in violation of this subdivision, unless:

(1) such long bow or crossbow is unstrung, or such a firearm is taken down, or securely fastened in a case, or locked in the trunk of a vehicle, or

(2) the firearm is a pistol or revolver, or

(3) the firearm is not in or on a motor vehicle and is a rifle designed or adapted for use of rim-fire ammunition and neither the person in possession of the gun, nor any member of his party, has in his possession any twenty-two caliber ammunition other than twenty-two caliber rim-fire ammunition, or

(4) the firearm is not in or on a motor vehicle and is a shotgun and neither the person in possession of the gun, nor any member of his party, has in his possession ammunition other than shells loaded with scatter shot of size number four or smaller.

e. (1) No person shall use a jacklight, spotlight or other type of artificial light upon lands inhabited by deer or bear within five hundred feet from a dwelling house, farm building or farm structure actually occupied or used, for the purpose of locating, spotting, harrying, worrying or otherwise disturbing deer or bear.

(2) The prohibition contained in subparagraph one of this paragraph shall not apply to (i) the owner or lessee of the dwelling house, or members of his immediate family residing therein, or a person in his employ, or the guest of the owner or lessee of the dwelling house acting with the consent of said owner or lessee; provided however, that nothing

herein shall be deemed to authorize such persons to use a jacklight, spotlight or other type of artificial light within five hundred feet from any other dwelling house, farm building or farm structure actually occupied or used, for the purpose of locating, spotting, harrying, worrying or otherwise disturbing deer or bear or (ii) the authorized use of a spotlight or other artificial light regularly operated and maintained by a police department or other law enforcement agency or by any local or state department or agency duly authorized to render services for the protection of life and property.

5. a. Varying hares shall not be taken by the use of ferrets, fitch-ferrets or fitch.

b. Cottontail rabbits shall not be taken by the use of ferrets, fitch-ferrets or fitch unless permitted by regulation of the department or unless a permit for such taking has first been obtained from the department.

c. The possession afield of ferrets, fitch-ferrets or fitch shall be presumptive evidence of their illegal use.

d. The department may adopt regulations specifying towns or counties in which ferrets, fitch-ferrets or fitch may be used to take cottontail rabbits. Whenever cottontail rabbits are injuring property on occupied lands, the department, on request of the owner or occupant of such lands, may issue a permit to use ferrets, fitch-ferrets or fitch to take them if it is satisfied there exists sufficient damage to warrant its issuance.

6. Skunks shall not be taken from holes or dens by digging or by the aid of dogs.

7. Raccoons shall not be taken from dens or houses or by cutting den trees.

8. Traps shall not be used except as permitted in title 5 or title 11 of the Fish and Wildlife Law.

9. No protected wild bird for which no open season is established by law or fixed by regulation shall be taken.

10. No wild game shall be taken except in an open season established by law as provided in section 11-0905, 11-0907 or 11-1103 or fixed by regulation as provided in section 11-0903, or in section 11-0307 in the case of migratory game birds, or in section 11-1103, in the areas for which such open seasons are established or fixed, and during the hours permitted for such taking; nor shall any wild game be taken in excess of bag limits specified in section 11-0905 or section 11-0907, or fixed by regulation as provided in section 11-0903 or section 11-0307.

11. No long bow equipped with a mechanical device which is used to draw, hold or release the bow string or arrow and which is attached to a portion of the bow other than the bow string may be used or carried afield. The shooting of a long bow shall only be accomplished by holding the bow at arm's length, with arrow on the string, and may only be drawn, pulled or released by hand.

12. Upland game birds shall not be taken with the aid of baiting or on or over any baited area.

13. Persons engaged in hunting deer and/or bear with a longbow must possess a current bowhunting privilege or a valid certificate of qualification in responsible bowhunting practices issued or honored by the department.

14. It shall be unlawful for any person to organize, sponsor, conduct, promote, or participate in any contest, competition, tournament, or derby with the objective of taking or hunting wildlife for prizes or other inducement, or for entertainment. The remains of any wildlife killed during the course of a contest, competition, tournament, or derby conducted in violation of this subdivision shall be forfeited by every organizer, promoter, participant or any other person conducting or involved in such contest, competition, tournament, or derby and the remains of such wildlife shall become the property of the department.

The provisions of this subdivision shall not apply to: (a) any contest, competition, tournament, or derby with the object of taking or hunting white-tailed deer, turkey, or bear; or (b) special dog training areas or field trials pursuant to sections 11-0925 and 11-0927 of this title, or any similar canine performance events.

15. This section does not:

a. restrict the authority of any special permit or license issued by the department;

b. limit title 11 or provisions of title 3, title 5, or title 19 authorizing taking of wildlife;

c. limit prohibitions set forth in any other section of the Fish and Wildlife Law.

16. Notwithstanding any inconsistent provision of this section, the department may adopt regulations to allow the taking of big game or small game by the use of a long bow equipped with a mechanical device for holding and releasing the bowstring, attached to the handle section of an otherwise legal long bow, to any person with a physical disability who is physically incapable of drawing and holding a long bow because of a physical disability, subject to such restrictions as the department may adopt by regulation. For the purpose of this subdivision, a person with a physical disability shall mean any person who submits to the department a statement of a physician duly licensed to practice medicine that such person is physically incapable of arm movement sufficient to draw, hold and release a long bow as defined in subdivision four of this section or as otherwise defined in department regulation. The department is authorized to adopt regulations requiring documentation to establish that an applicant is eligible to use a mechanical device pursuant to this subdivision.

17. Notwithstanding any inconsistent provision of this section, the department may issue to a physically disabled person a permit to take big game or small game by the use of a cross-bow equipped with an

apparatus permitting release of the bowstring by means of such person's discharge of breath. For the purposes of this subdivision, "physically disabled person" shall mean any person who submits to the department a statement of a physician duly licensed to practice medicine in this state that such person is permanently physically incapable of arm movement sufficient to release a pre-drawn bow authorized under subdivision fifteen of this section.

§ 11-0903. Open hunting seasons and bag limits fixed by regulation.

* 1. Open seasons and bag limits with respect to migratory game birds shall be those published annually in the federal register by the U.S. Department of the Interior, unless the department adopts regulations pursuant to section 11-0307. Notice of such open seasons and bag limits shall be provided by department press release and any other means that the department determines to be appropriate and effective, including posting on the department's public website.

* NB Effective until December 31, 2027

* 1. Open seasons and bag limits with respect to migratory game birds shall be those fixed by the department in regulations pursuant to section 11-0307, to conform with federal regulations made under authority of the Migratory Bird Treaty Act of July 3, 1918 (16 U.S.C. §§ 703-711).

* NB Effective December 31, 2027

2. The department may fix annually by regulation the open seasons and bag limits for wild game of the following species, until the date specified:

a. Hungarian partridge;

b. black, gray and fox squirrels, bobcat, lynx, coyote, fox, European hare, varying hare and cottontail rabbits, and may regulate or prohibit the use of dogs in hunting varying hare during any regular open season for deer;

c. pheasants anywhere in the state other than Long Island;

* c-1. pheasants on Long Island, but only for those individuals who hold a junior license, and provided that such youth pheasant hunting days are held prior to the start of the open season as indicated in paragraph d of subdivision two of section 11-0905 of this title;

* NB Repealed December 31, 2028

d. raccoon;

e. wild turkeys;

f. frogs, salamanders, turtles, lizards and snakes.

Such open seasons and bag limits may be fixed for the entire state, except on Long Island in the case of pheasants, or for any county or part thereof, giving due regard to abundance of the species and potential hunting pressure. The department may regulate the taking, possession and disposition of wild turkeys.

3. Any open season for pheasants, fixed by regulation of the department in the counties of Albany, Clinton, Columbia, Delaware, Dutchess, Essex, Franklin, Fulton, Greene, Herkimer, Jefferson, Lewis, Montgomery, Oneida, Orange, Oswego, Otsego, Putnam, Rensselaer, Rockland, St. Lawrence, Schenectady, Sullivan and Ulster shall include the intervening Sundays as part of such open season.

4. The department shall fix annually by regulation open seasons and bag limits for ruffed grouse and, whenever possible, and in its opinion it is in the public interest, shall make such seasons run concurrently with open seasons for taking woodcock.

5. Whenever in its opinion deer shall become numerous enough, on state or federal lands closed to the hunting of deer with firearms, to require population control for proper deer management, the department may by regulation permit the taking of deer of either sex, by long bow only, on such lands or any parts thereof during the regular open season for the surrounding area as provided in subdivision 2 of section 11-0907, provided, however, that no regulation adopted pursuant hereto shall

include within its provisions any of the areas set forth in subdivision 5 of section 11-0907. Only persons properly licensed to hunt during the special archery season established in paragraph a of subdivision 1 of section 11-0907 shall be eligible to hunt pursuant to this subdivision.

6. a. Whenever investigation made by the department within the Adirondack park shows that deer have become numerous enough to cause overbrowsing of the range within any "Wilderness Hunting Area" defined in section 11-0103, the department may fix by regulation an open season for taking antlerless deer in a tract within such area. The boundaries of any such tract shall not be less than three miles from any state, county or township road. Any such open season shall be fixed within the open season established by law, in the county or part of the county affected, for deer having antlers not less than three inches in length. For the purposes of this subdivision and of other provisions referring thereto, "antlerless deer" means deer having no antlers or having antlers measuring less than three inches in length.

b. Subject to this section and other applicable provisions of the Fish and Wildlife Law, the department shall have power to fix the conditions for taking "antlerless deer" in any such open season, and of possession, transportation and tagging thereof, and to regulate the issuance of special antlerless deer licenses applicable to the tracts in which such open season is fixed and of seals to be issued to licensees.

c. The department shall issue special antlerless deer licenses, in such form as it shall prescribe, for each tract in which an open season is fixed pursuant to this subdivision and shall have power to limit the number of such licenses to the number necessary in its judgment for proper management with respect to deer in the Area in which such tract is situated. Announcement of the opening of a tract to the taking of antlerless deer and of the number of licenses to be issued for such tract shall be made not later than August 1 of the year in which such open season is fixed. Application for such licenses shall be made not earlier than September 1, and the method of application for and issuance of such licenses, including eligibility and allocation among applicants, shall be specified in the regulations fixing the open season for the

tract. No person shall be entitled to hold more than one special antlerless deer license in a calendar year.

7. Notwithstanding any other provision of this title, the department may, by regulation fix open seasons for taking wild deer of either sex in the counties of Westchester and Suffolk, or any part thereof, and may fix the conditions of such season provided the regulations pertaining thereto shall conform to the following:

a. In Westchester county, such season shall not include Saturdays or Sundays;

b. Such season shall not commence earlier than during the first full week in January nor shall it continue later than January 31 in any year;

c. Deer may be taken only by holders of a license authorizing the taking of big game who have also obtained a special permit provided by the department and issued by the town clerk of each town where such season is fixed; provided, however, in Suffolk county a town may, by local law, waive the requirements that a permit is necessary to take deer during such seasons;

d. Permits issued by a town clerk shall authorize hunting only within the town where issued and only on property where permission of the owner or lessee is granted to the permittee for such hunting;

e. Applications for permits shall be only on forms provided by the department, and each application, before being presented to a town clerk, shall be endorsed by a person who owns or leases ten or more acres of land in the town where application is to be made, certifying that such owner or lessee gives consent to the applicant to hunt deer on his premises in accordance with the conditions of such season;

f. The number of permits to be issued in each town shall be fixed by the department and the town clerk shall issue permits in the order in which valid applications are received until the number fixed for the town is exhausted;

g. Town clerks shall be entitled to charge and receive a fee of one dollar for each permit issued;

h. Such a season shall be fixed only in towns or parts thereof where the discharge of firearms is not prohibited by town ordinance, and deer shall be taken only by means of shotguns using a single ball or slug or muzzle loading firearms, provided, however that a deer may also be taken by long bow in Suffolk county.

8. Notwithstanding any provision of law, rule or regulation to the contrary, the department may, until December thirty-first, two thousand twenty-seven, fix by regulation the open seasons, open areas, bag limit, manner of taking, possession and disposition of bear and parts of bears, and the intentional and incidental feeding of bears. Such regulations shall implement the provisions of this article. Such regulations, as the department deems appropriate, may provide for special permits and permit quotas. When a special permit is required, the department may fix by regulation a fee for each such permit issued.

9. a. Until December thirty-first, two thousand twenty-seven, whenever in its opinion deer shall become numerous enough in any area to cause substantial damage to property or overbrowsing of deer range, the department may fix by regulation special open seasons for taking wild deer of either sex. Subject to this subdivision, the department may fix the conditions of such seasons.

b. Such seasons may be fixed only in counties or parts of counties in which an open season for taking deer by the use of firearms is established by law.

c. Such seasons may be fixed for any number of days during the period beginning on the eleventh day after the close of a regular open season for deer established by law and ending on February 10 immediately following.

d. The department shall designate by regulation areas of the state

consisting of a county, a part of a county, or any combination of counties or parts of counties, excluding the northern zone as defined in subdivision sixteen of section 11-0103 of this chapter, for which separate special open seasons are fixed, and shall issue separate special permits for hunting in each such area so designated, and for each permit shall receive a fee of three dollars to cover the cost of permit issuance and special deer tags.

e. A regulation fixing a season pursuant to this subdivision shall include:

(1) a requirement that hunting deer during such special season shall be only by holders of both a license authorizing the taking of big game and a special permit for the area where hunting is permitted,

(2) a limitation on the number of such special permits to be issued for the area where such open season is fixed,

(3) the method of application for and issuance of such special permits,

(4) suspension of the provisions of subdivision one of section 11-0911 with regard to the manner of reporting deer taken, provided an alternative method of reporting is established, and

(5) such other rules and regulations as the department shall deem necessary for the orderly and efficient conduct of such seasons.

f. This subdivision does not increase the limit of one deer per person per license year.

10. Notwithstanding any inconsistent provision of subdivision 10 of section 11-0901 or subdivision 2, subdivision 3 or subdivision 8 of section 11-0907 of this title, until December thirty-first, two thousand twenty-seven, the department is authorized to adopt regulations with respect to the manner of taking, possession, open seasons and bag limits for deer. The authority to adopt such regulations is in addition to any authority contained in this section or section 11-0913 of this title respecting regulations fixing open seasons for deer and the issuance of deer management permits.

11. The department shall have the authority to establish by

regulation, deer management assistance permits to allow land/resource managers to meet the deer management needs of their property. Such permits shall be valid only on the permittee's lands and shall address site specific management goals including but not limited to agricultural damage, areas where existing statutes do not allow for adequate harvest and areas where public access may be limited for justifiable security reasons. Deer taken under this subdivision are in addition to the one deer per year authorized in section 11-0907 of this title.

§ 11-0905. Open hunting seasons and bag limits for upland game birds and small game.

1. Game of the species listed in column one of the table set forth below may be taken in the open season or seasons specified in column two opposite the name of the species, in the areas for which the open season is so specified, or if no area is specified, anywhere in the state. Such game, of the species listed in column one, may be taken to the extent of the bag limits specified in column three opposite the name of the species. Unless the bag limits are stated separately for different areas they limit the total amount of the species that may be taken by one person in a calendar year, whether hunting is done in one area or more than one area. Where the words "fixed annually by regulation" appear in column two or column three, the species may be taken in open seasons, and to the extent of bag limits, fixed by such regulations of the department pursuant to section 11-0903 or 11-0307.

2. Table

Column One Species	Column Two Open Season	Column Three Bag Limit
* a. Migratory game birds, all species	Fixed annually by federal regulation, unless the state adopts regulation	Fixed annually by federal regulation, unless the state adopts regulation

* NB Effective until December 31, 2027

r. Weasel	Fixed annually by regulation	Fixed annually by regulation
s. Common snapping turtle	Fixed annually by regulation. Until December 31, 2006 these species may be taken from July 1 through September 30.	Fixed annually by regulation. Until December 31, 2006 the bag limit shall be five per day, thirty per season.
t. Diamondback terrapin	Fixed annually by regulation.	Fixed annually by regulation.

- | | | |
|--|---|--|
| u. Spotted salamander, red-spotted newt, dusky salamander, red-backed salamander, northern slimy salamander and two-lined salamander | Fixed annually by regulation. Until December 31, 2006, the open season for these species shall be all year. | Fixed annually by regulation. Until December 31, 2006, the bag limit for all species combined shall be five in one day, and thirty total for the season. |
| v. Northern water snake, brown snake, red-bellied snake, common garter, green snake, northern ringneck snake and milk snake | Fixed annually by regulation. Until December 31, 2006, the open season for these species shall be all year. | Fixed annually by regulation. Until December 31, 2006, the bag limit for all species combined shall be five in one day, and thirty total for the season. |

3. Skunk, bobcat, coyote, fox, mink and muskrat may be hunted in any manner not prohibited in section 11-0901 during the open seasons for such species established in section 11-1103 or fixed by regulation as provided in section 11-1103. They may be taken in any number.

4. Notwithstanding any inconsistent provision of this section or section 11-0903, the department is authorized to adopt regulations with respect to taking of small game and upland game birds by trained raptors as provided in title 10 of this article from October first through March thirty-first in areas where an open hunting season is established, or if no area is specified, anywhere in the state.

§ 11-0907. Deer and bear; open hunting seasons; bag limits.

1. a. Wild deer without antlers or having antlers measuring less than three inches in length shall not be taken unless it is taken (1) by long bow in a special long bow season established in subdivision three of this section, or (2) by muzzle-loading firearm in a special

muzzle-loading firearm season established in subdivision eight of this section, or (3) by long bow in Westchester and Suffolk Counties in a year in which a regular season for deer of either sex is established for such counties, or (4) in a special open season for deer of either sex fixed by regulation pursuant to subdivision five or seven of section 11-0903 of this title, or (5) pursuant to a special antlerless deer license in a special open season for antlerless deer in a tract within a Wilderness Hunting Area fixed by regulation pursuant to subdivision six of section 11-0903 of this title, or (6) pursuant to a deer management permit by a person eligible to take such deer pursuant thereto as provided in section 11-0913 of this title, or (7) pursuant to a permit issued to an eligible non-ambulatory person, pursuant to subdivision two of section 11-0931 of this title, while in possession of a valid license issued by the department which authorizes the holder to hunt big game. Nothing in this subparagraph shall be construed to limit the power of the department to designate by regulation an area or areas of the state consisting of a county or part of a county where such season shall apply and whether the number of such special permits shall be limited.

b. Except in the Northern Zone as defined in subdivision 15 of section 11-0103, bear which the taker knows or should know to be less than one year old shall not be taken.

* c. The limit for wild deer is one deer per person in a license year except that (1) a person entitled to exercise the privileges of a special antlerless deer license may take an antlerless deer while hunting pursuant to such license in addition to the limit of one deer in a license year otherwise applicable, (2) a person who is a member of a hunting group holding a deer management permit or permits issued pursuant to section 11-0913 of this article may take additional deer while hunting in accordance with the conditions of the permit or permits, (3) the holder of a bowhunting privilege or a muzzle-loading privilege may take up to two additional deer, pursuant to regulations promulgated by the department, and (4) an eligible non-ambulatory person, pursuant to subdivision 2 of section 11-0931 of this article may take a deer of either sex in any wildlife management unit area where deer management permits have been issued by the department, while in possession of a valid hunting license. Nothing contained in this section

shall be construed to limit the power of the department to designate by regulation an area or areas of the state consisting of a county or part of a county where such season shall apply and whether the number of such special permits shall be limited.

* NB Effective until December 31, 2027

* c. The limit for wild deer and bear is one deer and one bear per person in a license year except that (1) a person entitled to exercise the privileges of a special antlerless deer license may take an antlerless deer while hunting pursuant to such license in addition to the limit of one deer in a license year otherwise applicable, (2) a person who is a member of a hunting group holding a deer management permit or permits issued pursuant to section 11-0913 of this article may take additional deer while hunting in accordance with the conditions of the permit or permits, (3) the holder of a bowhunting privilege or a muzzle-loading privilege may take up to two additional deer, pursuant to regulations promulgated by the department, and (4) an eligible non-ambulatory person, pursuant to subdivision 2 of section 11-0931 of this article may take a deer of either sex in any wildlife management unit area where deer management permits have been issued by the department, while in possession of a valid hunting license. Nothing contained in this section shall be construed to limit the power of the department to designate by regulation an area or areas of the state consisting of a county or part of a county where such season shall apply and whether the number of such special permits shall be limited.

* NB Effective December 31, 2027

d. (1) A person who holds licenses and privileges authorizing the holder to hunt deer during a special archery season and the regular open season and who has taken a deer by longbow in a special archery season and who has not taken a deer in a regular open season may, in addition to the limit of one deer in a license year otherwise applicable, take during the same license year additional deer as specified by department regulation in a special archery season following the close of the regular open deer season.

(2) A person who holds licenses and privileges authorizing the holder to hunt deer during a special archery season and the regular open season and who has taken a deer by longbow in the regular open season for deer

in Westchester or Suffolk counties may, in addition to the limit of one deer in a license year otherwise applicable, take during the same license year additional deer as specified by department regulation during such Westchester or Suffolk county regular open deer season.

e. A person who holds licenses and privileges authorizing the holder to hunt deer during a special muzzle-loading season and the regular open season and who has taken a deer by muzzle-loading firearm in a muzzle-loading season and who has not taken a deer in a regular open season may, in addition to the limit of one deer in a license year otherwise applicable, take during the same year additional deer as specified by department regulation in a special muzzle-loading season following the close of the regular deer season.

2. Regular seasons. * a. Regular open hunting seasons for deer are established separately for the named regions or parts of regions, or named counties listed in column one of the table set forth in this subdivision, and are specified as seasons for taking by pistol, rifle, shotgun or long bow, or for taking by shotgun, crossbow or long bow only, or for taking by long bow only, as indicated in column three entitled "Manner of Taking". Where taking of big game by shotgun is permitted by this chapter such shotgun may contain rifling in all or a portion of the barrel, provided, however, if the barrel or a portion thereof does contain rifling only shells having non-metallic cases, except for the base, may be used. In the areas identified in column one except in the "closed areas" specified in subdivision five of this section the game specified in column two may be taken in the open season stated in column two immediately following the specification of the game, in the manner specified in column three.

TABLE

Column One Area	Column Two Game and Open Season	Column Three Manner of Taking
(a) Northern Zone	Deer, next to last Saturday in October through first Sunday in December	Pistol, rifle, shotgun, crossbow or long bow
(b) Catskill region	Deer, first Monday	Pistol, rifle,

except Delaware,	after November 15	shotgun, crossbow
Greene, Sullivan,	through first Tuesday	or long bow
Ulster counties	after December 7	
and those counties		
or portions thereof		
listed in item (i)

and the city of North		
Tonawanda		

** NB Repealed October 1, 2028

* NB Effective December 31, 2027

* b. Regular open hunting seasons for bear are fixed by regulation pursuant to subdivision 8 of section 11-0903. The implements allowed for bear hunting will be the same as those allowed for deer hunting as listed in column three of the table set forth in paragraph a of this subdivision.

* NB Expires December 31, 2027

3. Special archery seasons.

* a. In every area identified in column one of the table set forth in subdivision 2 of this section, except Westchester and Suffolk Counties in which a regular open season for taking deer by firearms is established and effective, a special open season is established for taking deer of either sex, by the use of a long bow only by holders of a hunting license with a valid bowhunting privilege.

* NB Effective until December 31, 2027

* a. In every area identified in column one of the table set forth in subdivision 2 of this section, except Westchester and Suffolk Counties in which a regular open season for taking deer by firearms is established and effective, a special open season is established for taking deer of either sex, and bear, by the use of a long bow only by holders of a hunting license with a valid bowhunting privilege.

* NB Effective December 31, 2027

* b. Such special open deer hunting season for each area shall be from October 15 through the day immediately preceding the regular open season for deer stated in column two of the table set forth in subdivision 2, except that in the Northern Zone each special season shall be from September 27 through the Friday immediately preceding the next to last Saturday in October, and in the Southern Zone such special season shall also include the five days following the closing of the regular open season.

* NB Effective until December 31, 2027

* b. Such special open season for each area shall be from October 15 through the day immediately preceding the regular open season for deer stated in column two of the table set forth in subdivision 2, except that in the Northern Zone each special season shall be from September 27 through the Friday immediately preceding the next to last Saturday in October, and in the Southern Zone such special season shall also include the five days following the closing of the regular open season.

* NB Effective December 31, 2027

* c. A similar special open bear hunting season may be fixed by regulation pursuant to subdivision 8 of section 11-0903.

* NB Expires December 31, 2027

4. a. "Northern Zone" and "Southern Zone" are defined in section 11-0103.

b. "Catskill region" means that part of the Southern Zone consisting of the counties of Greene, Sullivan, Ulster; those parts of Broome and Chenango counties easterly of the Susquehanna River from its junction with the Unadilla River at the Chenango-Otsego County boundary line to a point where it intersects the New York-Pennsylvania line; that part of Otsego County south of the main line tracks of the Delaware and Hudson Railroad Company; and those parts of Delaware and Schoharie counties lying south and west of a line beginning at the intersection of the main line tracks of the Delaware and Hudson Railroad Company with the Otsego-Schoharie County line to the village of Richmondville, thence south on Route 10 to its intersection with Route 23 in the village of Stamford, thence easterly along Route 23 to its intersection with

Schoharie County Route 342 thence easterly along Schoharie County Route 342 to its intersection with Schoharie County Route 3; thence easterly along Schoharie County Route 3 to the Albany-Schoharie County line.

c. "Eastern region" means that part of the Southern Zone easterly of a continuous line formed by the Susquehanna river commencing at its intersection with the New York-Pennsylvania boundary in the town of Windsor in Broome county to its confluence with the Unadilla river, by the Unadilla river from its confluence with the Susquehanna river to its intersection with the Herkimer-Otsego county boundary, by the Otsego-Herkimer county boundary and by the Oneida-Herkimer county boundary to the Northern Zone, except (1) the "Catskill region" defined in paragraph b and (2) Westchester county.

d. "Southern tier, central and western region" means that part of the Southern Zone lying westerly of the continuous line described in paragraph c.

5. Closed areas. The following areas are closed to the taking of deer and bear:

a. In Monroe County, the area bounded and described as follows: On the west by Route 261 (Manitou Road) beginning at Manitou Beach on Lake Ontario in the town of Greece and continuing southerly along such road to its intersection with the Barge Canal, thence easterly along such canal to East Avenue in the village of Pittsford, thence northeasterly along East Avenue to Allen Creek in the town of Brighton, thence northerly along Allen Creek to Irondequoit Creek, thence northerly along Irondequoit Creek to Irondequoit Bay, thence northerly along the easterly shore of Irondequoit Bay to Lake Ontario; except that deer of either sex may be taken during the regular and special deer hunting seasons provided for in this title by the use of a longbow by holders of licenses which authorize the holder to hunt deer during a special archery season and provided further that this exception permitting the taking of deer by a longbow shall not apply within an area in the town of Greece bounded and described as follows: On the west by Long Pond Road beginning at Latta Road and continuing southerly along such road to

its intersection with Maiden Lane, thence easterly along Maiden Lane to its intersection with Mt. Read Blvd., thence northerly along Mt. Read Blvd. to its intersection with Latta Road, thence westerly along Latta Road to its intersection with Long Pond Road at the point of beginning.

b. In Erie County, the area bounded by a continuous line beginning at the point of confluence of the east branch of the Niagara River and the Tonawanda Creek, and from said point of beginning easterly along the south bank of Tonawanda Creek to its intersection with highway 78, thence southerly along highway 78 to its intersection with Greiner Road, thence easterly along Greiner Road to its junction with highway 268, thence southerly along highway 268 to its intersection with highway 5, thence westerly along highway 5 to its junction with Ransom Road, thence southerly along Ransom Road to its intersection with highway 33, thence westerly along highway 33 to its intersection with highway 78, thence southerly along highway 78 to its intersection with highway 20, thence southwesterly along highway 20 to its intersection with highway 20-a, thence westerly along the extension of highway 20-a to Lake Erie, thence northerly along the shores of Lake Erie and the Niagara River to the place of beginning.

c. Nassau County.

d. In Herkimer county, town of Webb, the area bounded by a continuous line beginning at the intersection of the Judson Road and the Herkimer-Hamilton county boundary line, thence westerly to the Higby road, continuing southwesterly to its intersection with the Big Moose road (Herkimer county highway 1), thence north and westerly along the Big Moose road to its intersection with the Martin road and easterly along the Martin road to its end, thence back to the lake shore and back along and around the shore of Big Moose lake (starting westerly) to the Herkimer-Hamilton county boundary on the shore and then south along the boundary line ending at the Judson road, the point of beginning.

e. In Herkimer and Hamilton counties, the area bounded by a continuous line beginning at the junction of the South Shore Road and Route 28 in the village of Old Forge and extending northeasterly along Route 28 to

the hamlet of Inlet and thence southwesterly along the South Shore Road to the point of beginning.

7. Areas restricted to long bow only.

a. The area described in this subdivision is closed to the taking of deer and bear by firearms, but shall be open for taking deer by the use of a longbow only by holders of licenses which authorize the holders to hunt deer during a special archery season as follows: during the special deer season stated in subdivision 3 of this section and during the regular season stated in subdivision 2 of this section, deer of either sex may be taken.

b. This subdivision applies to that area in Albany county east of the Penn Central West Shore railroad starting at the Schenectady county line in the town of Guilderland and continuing to its confluence with the Penn Central Hudson River connecting railroad, thence along such Penn Central Hudson River connecting railroad until it meets Route 32 in Feura Bush and northeast on Route 32 to its juncture with Feura Bush road, then east along Feura Bush road to its juncture with Route 144 in Glenmont, then south along Route 144 to the Vlaman Kill, then east along the Vlaman Kill to the Hudson river.

8. Muzzle-loading firearm big game season.

a. In every area identified in column one of the table set forth in subdivision two of this section, except those areas restricted to special seasons for taking deer by longbow only, special open seasons may be established by regulation for taking deer and/or bear, by the use of muzzle-loading firearms, of not less than .44 caliber shooting a single projectile by the holders of a hunting license with a valid muzzle-loading privilege.

b. Such special open season for the Southern Zone shall be for the seven day period immediately preceding the regular open season for deer stated in column two of the table set forth in subdivision two of this section, except that the department may, by regulation, fix such open

season in the Southern Zone or any portion thereof to be either the seven days immediately preceding or immediately following the regular open season for deer.

c. Until December thirty-first, two thousand twenty-seven, such special season for the Northern Zone or any portion thereof may by regulation be for up to a fourteen-day period preceding the regular open season for deer stated in column two of the table set forth in subdivision 2 of this section or may be for up to a fourteen-day period following such open season or any combination thereof, provided that a maximum of sixteen days is not exceeded for any open area. Regulations establishing such Northern Zone muzzle-loading firearm big game season may specify the taking of deer of either sex, antlerless deer only, legal bucks only, or any combination thereof, and may require that persons participating in the Northern Zone muzzle-loading firearm big game season obtain a special permit from the department. When establishing these regulations, the department must consider the condition of the herd and communities', property owners', hunters' and other relevant interests.

9. Notwithstanding any inconsistent provision of this chapter, big game may be taken on any day of the week during open season or a special season in those parts of New York state east of a line starting at the juncture of the shore of Lake Ontario and West Bay road; then southerly along West Bay road to Route 104A; then easterly along Route 104A to Route 38; then southerly along Route 38 to the New York State Thruway Interstate 90 at Port Byron; then southwesterly along Interstate 90 to Route 90 near Montezuma; then southerly along Route 90 to Route 20; then westerly along Route 20 to the east bank of Seneca River; then southerly along the east bank of Seneca River to the east shore of Cayuga Lake; then southerly along the east shore of Cayuga Lake to Cayuga Creek; then southerly along the east bank of Cayuga Creek to Route 96 in Ithaca; then southerly along Route 96 to Sabin Road in Spencer; then southerly and westerly along Sabin Road to Dean Creek Road; then southwesterly along Dean Creek Road to Route 34; then southerly along Route 34 to the Pennsylvania boundary.

10. Notwithstanding any provision of this chapter, or any prior notwithstanding language in this article, the department may, by regulation, authorize the taking of big game by the use of a crossbow by any licensed person in any big game season in any area in which a long bow is permitted.

§ 11-0909. Hunting hours.

1. Bobcat, mink, muskrat, raccoon, coyote, fox and skunk may be taken at any hour, day or night.

2. Migratory game birds shall be taken only during the hours specified in regulations adopted by the department pursuant to section 11-0307.

3. a. Wild deer and bear, wild upland game birds, and small game other than bobcat, mink, muskrat, raccoon, coyote, fox and skunk, taken in any open season, shall be taken only between the hours of sunrise and sunset, unless otherwise provided in regulations of the department.

b. The department shall have the authority to establish by regulation hours of hunting wild deer and bear, wild upland game birds, and small game, other than bobcat, mink, muskrat, raccoon, coyote, fox and skunk, during the open season provided therefor.

c. Such regulations shall provide for uniform hunting hours for all species of game for which an open season is provided, during all or any part of the period covered by such regulations, other than bobcat, mink, muskrat, raccoon, coyote, fox and skunk.

d. The department shall have the authority to provide in such regulations for different hours of hunting in different areas as set forth in such regulations, and shall have the authority in such regulations to provide for different hours of hunting for a part or parts of any open season.

e. A summary of regulations adopted pursuant to this subdivision shall

be published each year in the hunting and fishing syllabus of the department issued pursuant to section 11-0323.

§ 11-0911. Procedure on taking wild deer and bear; transportation of wild deer.

1. a. When a wild deer is taken the taker shall immediately fill out the deer tag in an electronic or other acceptable format as provided in regulations of the department. The taker shall report details of the location and date of harvest and data on the deer as required by regulation.

b. When a bear is taken, the taker shall immediately fill out the bear tag in an electronic or other acceptable format as provided in regulations of the department. The taker shall report details of the location and date of harvest and data on the bear as required by regulation.

c. The department shall adopt regulations for the tagging or designating by self-locking metal seals or other means of deer of either sex taken in Westchester county pursuant to the provisions of paragraph c of subdivision 1, of section 11-0907, in addition to the limit of one deer in a license year.

2. The taker shall remove his deer out of the woods or open country to a camp or other inhabited location by midnight of the day immediately following the expiration of the open season in the county or part of a county in which the deer was taken.

3. A person licensed to hunt deer pursuant to this chapter who has filled all of his/her valid deer tags may assist and/or supervise other licensed hunters in hunting deer, except that such person shall not shoot or attempt to shoot deer.

4. a. The taker may transport the entire carcass of his deer, with the head attached in a natural way and his license tag attached to the

carcass.

b. He may detach the head of a male deer for mounting only and transport it to a licensed taxidermist. If the head is detached, the taker shall immediately attach to it a tag supplied by himself bearing his signature, address and license number, the name and address of the taxidermist and the number of points on each antler, and the head shall be shipped to the taxidermist immediately. The tag shall remain attached to the head continuously until the head is received by the taxidermist and retained by him for six months after the head is mounted. If at any time during transportation the head is in possession of a person other than the taker or a carrier, his name and address shall be written on the tag at the time the head comes into his possession.

c. The head of a female deer with antlers not less than the minimum legal length may be detached for mounting. The detached head shall be handled in the manner provided in this subdivision with respect to the head of a male deer.

d. The taker may transport the carcass of a male deer, from which he has removed the head, if the carcass bears evidence of sex, or the carcass of a female deer from which the head has been removed, if the metal tag is attached thereto, provided in either case that his deer tag is attached to the carcass and on the reverse side of the tag there appears the name and address of the taxidermist to whom the head is to be delivered and the number of points on each antler.

5. a. The taker may transport by carrier, except parcel post, one deer to which his deer tag is attached, together with an additional tag supplied by him stating the name and address of the consignee. He shall be in personal attendance on the carcass of his deer while it is being transported by any method other than by carrier, except that if the head has not been removed, and if there are attached to the carcass the taker's deer tag and a tag supplied by him on which is written legibly in ink the name and address of the person transporting the deer and the name and address of the consignee, the deer may be transported for him by another.

b. The taker may cut portions of the meat from the carcass and transport or cause them to be transported to consignees for consumption as food only, provided that his deer tag remains attached at all times to the portion of the carcass retained by him, and that each portion transported has attached a tag supplied by the taker and personally signed by him, on which he shall write legibly in ink his name, address and license number, the date when the portions were cut, and the name and address of the consignee. If at any time during transportation any such portion is in possession of a person other than the taker or his consignee, the name and address of such person shall be written legibly on the tag in ink. The tag shall remain attached to the meat until it is prepared for consumption. Where such portions are transported wrapped or boxed, the outside of the package shall bear the word "venison" and be marked as provided in this paragraph for tags. Portions of deer tagged as provided in this paragraph, and packages containing portions of deer, so marked, may be transported by carrier except parcel post.

6. a. The taker may transport the carcass of the bear, for the purposes of harvesting the gallbladder and/or bile, only if the bear tag is attached thereto.

b. No person taking, possessing or transporting bear shall fail to comply with the mandatory requirements of this section and section 11-0917 of this title.

7. No person taking, possessing or transporting wild deer shall fail to comply with the mandatory requirements of this section, and no person shall possess or transport wild deer or any portion of a wild deer except as provided in this section, or at a time not permitted by section 11-0917.

§ 11-0913. Deer management permits.

1. a. Until December thirty-first, two thousand twenty-seven, whenever in its opinion the population of deer in any area of the state except in

the northern zone is such that additional harvest of deer is reasonably necessary to properly manage the deer herd in the state in balance with the available deer range and natural food supply, the department may provide by regulation for issuance of deer management permits, permitting the taking of one deer for the permit, in addition to the limit of one deer that may otherwise be taken by one person in a license year.

b. In the issuance of permits, the department may give preference to resident license holders and may give preference to service-connected disabled veterans having 40 percent or greater service-connected disability as evidenced by a compensation rating from the United States Department of Veterans Affairs or the United States Department of Defense who shall only have to provide proof of service-connected disability at the time of initial issuance of the permit, and to the applications of groups which include a person or the spouse of a person, provided that such spouse lives in the same household, who owns at least 50 acres of land in one parcel in the specified area.

c. "Owner" as used in this section shall include the owner or spouse of the owner of record of such parcel, provided that such spouse lives in the same household as the owner, or a purchaser or spouse of such purchaser of such parcel, provided that such spouse lives in the same household as such purchaser, under an executory contract duly recorded in the office of the recording officer in the county in which real property to which it relates is situate, who actually occupy and cultivate such parcel.

2. Each such regulation shall specify, with respect to the permits to which it relates:

a. The open season or part thereof and the day or days of such season in which such permits may be used;

b. The specific area in which they are valid;

c. The manner of taking for which such permits are valid, which shall

conform with the specifications as to the manner of taking deer in the open season for which the permits may be used;

d. The method of application for and issuance of such permits, including eligibility and allocation among applicants;

e. The number of persons, no fewer than one nor more than six, who must join in the application; and

f. Such other regulations as the department may determine.

3. Each member of a group issued a permit pursuant to this section shall possess a license which authorizes the holder to hunt deer before the permit may be validated.

4. During a license year, no person shall use more than one license which authorizes the holder to hunt deer during the regular open season in making application for a deer management permit.

5. The provisions of paragraph a of subdivision 1 of section 11-0911 shall not apply when a deer is taken pursuant to a deer management permit, but the department may by regulation provide an alternative method of identifying and reporting the deer so taken.

6. With each deer management permit there shall be issued a tag or seal and a reporting form as the department shall determine to be appropriate, and the additional deer may be taken only by the group member who, at the time, is in physical possession of the permit and any tag, seal and reporting form issued with it.

7. The department shall charge and receive a fee of ten dollars for the application and the processing of such permit or permits. Applicants who are successful in the computerized selection shall receive the permit or permits free of any additional charge. The application fee shall be non-refundable. The department may waive the application fee for holders of a lifetime sportsman license existing as of October first, two thousand nine and holders of a hunting license less than

sixteen years of age.

8. Except with respect to deer management unit thirty-four the provision of this section shall not apply to the "Northern Zone" of the state as defined in subdivision sixteen of section 11-0103 of this chapter.

9. Nothing set forth in this section shall prevent the department from permitting the issuance of deer management permits in those portions of Franklin, St. Lawrence, Jefferson and Lewis counties and Northern Zone portions of Oneida and Oswego counties which are situated in the area generally described as the Lake Ontario Plain, St. Lawrence Valley and peripheral Adirondacks/peripheral Tug Hill region. The department is authorized and directed to promulgate any rules or regulations necessary to more particularly describe the region of land set forth in this subdivision.

§ 11-0914. Yearling buck protection program.

1. Definitions. a. An "antlered deer" is defined as a deer with at least one antler measuring three inches or more in length.

b. "Wildlife management unit" means wildlife regions as demarcated by the department.

2. Restrictions and application. a. Any person who hunts or takes antlered deer under a valid permit or license during the bowhunting, regular and muzzleloading deer seasons is restricted to the hunting or taking of antlered deer with at least one antler with at least three points. Each point must be at least one inch long measured from the main antler beam.

b. This program applies to all public and private land within the specified wildlife management units.

3. Wildlife management units. These restrictions shall only apply to

that portion of wildlife management unit 3A south and west of state route twenty-eight.

4. Exemptions from requirements. Hunters under the age of seventeen are exempt from the provisions of this section and may take any deer with an antler or antlers measuring three inches or more in length.

§ 11-0915. Disposal of deer, moose and bear killed unintentionally by collision.

The owner of a motor vehicle which has been damaged by unintentional collision with a deer, moose or bear shall be entitled to possess such deer, moose or bear under the following conditions:

1. The accident is reported to an environmental conservation officer, a member of the State Police, a member of the sheriff's department in which the accident occurred or, if the accident occurred on lands under the jurisdiction of the office of parks, recreation and historic preservation, to an officer of the regional park police having law enforcement responsibilities on such lands, or to any police officer of a city, town or village located in the county of such accident within 24 hours thereafter.

2. The officer shall investigate and, if he finds the deer, moose or bear has been killed or so injured as to require that it be killed and the damage has been done as alleged, he shall issue a permit to the owner of the motor vehicle entitling such owner to possess the carcass. Such permit shall authorize the owner of the motor vehicle to transfer the carcass to a designated person.

3. Whenever the owner of such damaged motor vehicle declines to possess such deer, moose or bear, the officer may in his discretion, issue a permit to possess the carcass to any other party requesting such possession.

§ 11-0917. Possession, transportation and sale of wild game and other wildlife.

1. Wild game and other wildlife, taken in this state, and parts thereof, may, if lawfully taken, be

a. possessed.

b. transported within the state and from within to without the state, and

c. bought and sold, as provided in this section and in the sections of the Fish and Wildlife Law and regulations of the department to which this section refers, and not otherwise. It shall not be possessed, transported, bought or sold unless lawfully taken, nor transported, bought or sold unless lawfully possessed. Nothing in this section applies to any game which is not wild game, as defined in subdivision 2 of section 11-0103.

2. Unprotected wildlife may be possessed, transported, bought and sold without restriction except as provided in subdivision 9 or subdivision 10.

3. Game for propagation purposes may be transported without restriction except as provided in subdivision 8 or subdivision 10.

4. The carcasses, flesh, head, hide, feet or fur of wildlife, except birds, may be bought and sold without restriction, except as provided in subdivisions 8, 9 or 10. The head, skin plumage, hide, feet or fur of wildlife may be possessed and transported without restriction except (a) as provided in section 11-0911 with respect to deer, (b) as provided in subdivision 9 with respect to birds, and (c) as provided in subdivision 8 or subdivision 10.

5. Game taken and possessed in one part of the state may be transported as provided in this section by the taker, or any person who acquires it lawfully from the taker, and possessed by the taker or by

such person in any part of the state for the period during which it may be possessed at the place where taken.

6. Skunk, bobcat, mink, raccoon and muskrat may be bought and sold alive during their respective open seasons.

8. Migratory game birds and beaver, fisher, otter, bobcat, coyote, fox, raccoon, skunk, muskrat and mink shall be possessed, transported and disposed of only as permitted by regulation of the department.

9. a. The flesh of cottontail rabbits, varying hares, European hares, squirrels, bear and deer shall not be bought or sold.

b. Bear gallbladders and bile shall not be possessed, bartered, sold or offered for sale or offered for barter unless a valid bear tag is attached. For the purposes of this paragraph a valid bear tag shall mean the tag or similar identification required by the governmental entity that permitted the legal taking of such bear. Possession of a bear gallbladder without a valid bear tag shall be prima facie evidence of a violation of this paragraph. A minimum five thousand dollar penalty shall be issued per infraction of this paragraph. Nothing in this section prohibits an officer, employee, or agent of the federal government or the department from possessing, transporting, delivering, or receiving bear gallbladders or bile, for wildlife law enforcement purposes.

c. Notwithstanding paragraph a of this subdivision, game legally taken may be possessed, prepared and served by a non-profit organization at any meeting for the members and guests provided that there is no charge for the meal.

d. Game legally taken may be donated to, and possessed, prepared and distributed by a charitable or not-for-profit organization which serves or distributes food without cost to the poor or needy. Game or packages of game donated pursuant to this paragraph shall, notwithstanding the requirements for tagging and labelling of game contained in paragraph b of subdivision 5 of section 11-0911 of this title, be tagged, labelled

or marked "not for sale" and such tag, label or marking shall identify the type of meat, the license number of the taker, the name and address of the professional processor of the game and the date of processing. The department shall make available instructions for the safe and sanitary preparation of game, a list of professional processors where potential donors may take their game for preparation and packaging and a list of charitable or not-for-profit organizations which accept donations of game. Professional processors, charitable and not-for-profit organizations may notify the department of their intention to participate in such distribution, and the department shall include them in its lists unless good cause otherwise exists.

e. The dead bodies of birds belonging to all species or subspecies native to this state, defined in subdivision five of section 11-0103 of this article, as protected wild birds, or belonging to any family of which any species or subspecies is native to this state, and is so defined in subdivision five of section 11-0103 of this article, shall not be sold, offered for sale or possessed for sale, for food purposes.

f. The plumage, skin or body of any wild bird shall not be sold, possessed for sale or offered for sale.

g. No live wolf, coyote, coydog, fox, skunk, venomous reptile or raccoon shall be possessed or transported, except under a license or permit issued by the department. Every such license or permit shall contain a prominent notice thereon warning the licensee or permittee of his or her duty to exercise due care in safeguarding the public from attack by such wild animal or venomous reptile and that failure to do so is a crime under section three hundred seventy of the agriculture and markets law. The provisions of the opening paragraph of section three hundred seventy of the agriculture and markets law except the last sentence thereof shall be set forth on such license or permit immediately following such warning notice.

10. No wildlife shall be possessed, transported or sold contrary to the terms of any statute, or regulation, permit or license of the department, pursuant to which it was taken or acquired.

§ 11-0919. Aid to wildlife in distress.

1. Notwithstanding any provision of law, rule or regulation to the contrary, any person who may discover protected wildlife in distress, except foxes and skunks, may capture the same and render necessary aid. For the purposes of this section "in distress" shall mean the apparent inability to survive in the wild thus requiring human assistance. Such person shall, as soon as possible after capture of such wildlife, deliver it to a person licensed pursuant to section 11-0515 to rehabilitate wildlife.

2. Notwithstanding any provision of law, rule or regulation to the contrary, a wildlife rehabilitator licensed pursuant to section 11-0515 of this article shall be authorized to capture, transport, rehabilitate, release and euthanize rabies vector species, provided that such wildlife rehabilitator has completed a training course approved by the commissioner or provided by the department. A rabies vector species exhibiting signs or symptoms of central nervous system disorder when first encountered by a wildlife rehabilitator or while under the care of a wildlife rehabilitator shall be euthanized immediately by such rehabilitator and disposed of as directed by the local county health department office. The commissioner shall, in consultation with the commissioner of health, promulgate regulations as necessary for the implementation of this subdivision.

§ 11-0921. Surrender of game unfit for human consumption; permit for taking another of species surrendered.

When a wild turkey, wild deer or wild bear is taken by a person holding a license or permit and, upon presentation to an environmental conservation officer or other authorized employee of the department, it is shown to the satisfaction of such officer or authorized employee that its flesh was unfit for human consumption at the time it was killed, the taker may surrender the carcass to the officer or authorized employee

and the officer or authorized employee shall issue the taker a special permit to take another specimen of the same species as surrendered and for which the season is still open.

§ 11-0923. Dogs.

1. No owner or trainer of a dog shall:

a. allow it to hunt deer, or to run at large on enclosed lands on which wildlife or domestic game is possessed under license issued pursuant to the Fish and Wildlife Law or in any state park, state park reservation, state-owned game farm or wildlife refuge or state-owned or leased wildlife management area;

b. allow it to run at large in fields or woods inhabited by deer outside the limits of any city or village, except on lands actually farmed or cultivated by the owner or trainer of the dog or a tenant of such owner or trainer.

2. No owner or trainer of a dog shall take it afield for training on wild game except from August 16 to April 15 or as otherwise permitted by department order.

3. Dogs may be trained on artificially propagated game which is shackled, or led or confined game, legally possessed, or on training dummies or other artificial devices at any time on lands owned or leased by the owner or trainer of the dog or on lands for which he has written permission of the owner or lessee, provided such training is done in a manner to preclude any disturbances injurious to wildlife.

4. During the training of a dog, the trainer and any person in his company shall not possess afield a firearm loaded with ammunition other than blank shells or blank cartridges, or inflict any injury to animals or game birds contrary to law.

5. Dogs hunting deer, or hunting any wildlife or domestic game on

enclosed lands described in paragraph a of subdivision 1 or on a state game farm or wildlife refuge or wildlife management area, may be killed as provided in section 11-0529.

6. Wildlife, except skunk, deer and bear, may be taken with the aid of a dog, provided, however, that the department is authorized to establish a training season during which only persons licensed by the department pursuant to section 11-0928 of this article may train tracking dogs on bear. Such season shall not begin before July first and shall end at least eight days in advance of any open hunting season for bear and no person participating in such training shall possess a firearm of any kind or a longbow. Nothing in this subdivision shall be construed to invalidate or otherwise affect a permit to track or take bear issued pursuant to subdivision one of section 11-0521 of this article.

§ 11-0925. Special dog training areas.

1. a. A dog owner or trainer may establish and maintain a special dog training area on land which the owner or trainer owns or has legal control.

b. The operator of a special dog training area may at any time during the year train the operator's own dogs or the dogs of other persons on such area, and permit others to train dogs. The operator may hold field trials on wild game, or on liberated game, or on liberated artificially propagated game, or on led or confined game, or may in writing permit others to hold such trials, under such conditions as shall be agreed upon by the operator and such other person; but no game shall be taken by shooting at such field trial. No persons shall, on a special dog training area, train a dog, hold a field trial, enter accompanied by a dog, or permit a dog of which he is the owner or trainer to enter, except as provided in this section or in rules adopted pursuant hereto. A permit from the department must be obtained before liberation of any wildlife, and such a permit may be withheld if, in the opinion of the department, granting it would endanger the health of native wildlife species.

2. The department may adopt rules regulating the use of special dog training areas.

3. No person shall hunt on a special dog training area except as provided in this section or rules adopted pursuant thereto. The owner of the lands may hunt unprotected wildlife thereon at any time, and the owner of the land and others authorized by such owner may hunt deer thereon during the open season but at no other time.

§ 11-0927. Field trials.

1. No person shall hold a field trial except as provided in this section or take part in a field trial not conducted in accordance with the provisions of this section.

2. a. A field trial may be held on liberated game, liberated artificially propagated game, led or confined game legally possessed, or on wild game on a licensed dog training area at any time without license, provided such game is not taken by shooting or otherwise killed; and, on areas other than a licensed dog training area, such field trials may be held on wild game from August 16 to April 15 without license, or at such other times when licensed by the department from April 16 to August 15.

b. A permit from the department is required for liberation of any wildlife.

3. Wild game shall not be taken by shooting or otherwise killed in the course of a field trial. Other game on which a field trial may be held as provided in this section may be taken by shooting in the course of a field trial, except a field trial held on a licensed dog training area, provided a license for such shooting has been procured from the department. Game so taken shall be immediately identified on forms provided by the department until the game is finally prepared for consumption.

4. Game so identified may be possessed, transported, bought and sold at any time, without limitation by section 11-0917 of this article.

§ 11-0928. Tracking dogs.

Notwithstanding any other provision of this chapter, the department may by regulation provide for the certification of leashed tracking dogs and may authorize the use of such dogs by persons licensed by the department to track and find dead, wounded or injured big game, and for the certification of trained tracking dogs and may authorize the use of such dogs by persons licensed by the department to track bear pursuant to subdivision one of section 11-0521 of this article.

§ 11-0929. Hunting by minors.

1. A licensee who is twelve or thirteen years of age shall not hunt wildlife with a gun or a longbow unless he or she is accompanied by his or her parent or legal guardian, or by a person twenty-one years of age or older designated in writing by his or her parent or legal guardian on a form prescribed by the department, who holds a hunting license. A licensee who is twelve or thirteen years of age shall not hunt with a crossbow.

2. A licensee who is fourteen or fifteen years of age shall not:

a. hunt wildlife with a gun, crossbow or longbow, other than wild deer or bear as provided in paragraph b of this subdivision, unless he or she is accompanied by his or her parent or legal guardian holding a hunting license, or by a person eighteen years of age or older, designated in writing by his or her parent or legal guardian, holding such license;

b. hunt wild deer or bear with a crossbow or gun unless:

(1) he or she is accompanied by his or her parent or a legal guardian, or a youth mentor who is twenty-one years of age or older designated in

writing by the parent or legal guardian of the licensee on a form prescribed by the department; and

(2) such parent, guardian or youth mentor has had at least three years of experience in hunting big game; and

(3) such parent, guardian or youth mentor holds a hunting license; and

(4) such parent, guardian or youth mentor maintains physical control over the minor he or she is accompanying at all times while hunting; and

(5) such parent, guardian or youth mentor and the minor he or she is accompanying remain at ground level at all times while hunting; and

(6) such parent, guardian or youth mentor and the minor he or she is accompanying shall each display either a minimum total of two hundred fifty square inches of solid fluorescent orange or pink or patterned fluorescent orange or pink consisting of no less than fifty percent fluorescent orange or pink material worn above the waist and visible from all directions, or a hat or cap with no less than fifty percent of the exterior consisting of solid fluorescent orange or pink material and visible from all directions. For purposes of this paragraph, "physical control" shall mean that the physical proximity of the minor to the parent, guardian or youth mentor is such that the parent, guardian or youth mentor is reasonably able to issue verbal directions and instructions, maintain constant visual contact, and otherwise provide guidance and supervision to the minor.

3. A licensee who is sixteen or seventeen years of age and who has not previously had a license which authorizes the holder to hunt big game issued to him or her and engaged in hunting pursuant to it shall not hunt deer or bear unless he or she is accompanied by his or her parent or legal guardian, or by a person designated in writing by his or her parent or legal guardian on a form prescribed by the department and who is eighteen years of age or older and who has had at least one year's experience in hunting deer or bear, and such accompanying parent, guardian or person holds a hunting license.

4. A hunting licensee with a bowhunting privilege, who is fourteen or fifteen years of age, shall not hunt deer or bear unless he or she is accompanied by his or her parent or legal guardian, or by a person designated in writing by his or her parent or legal guardian on a form

prescribed by the department who is eighteen years of age or older and who has had at least one year's experience in hunting deer or bear by longbow, and such accompanying parent, guardian or person holds a hunting license with a bowhunting privilege.

5. A hunting licensee with a bowhunting privilege, who is twelve or thirteen years of age, shall not hunt deer or bear unless:

(a) he or she is accompanied by his or her parent or legal guardian, or by a person designated in writing by his or her parent or legal guardian on a form prescribed by the department who is twenty-one years of age or older and

(b) such parent, guardian or person has had at least three year's experience in hunting deer or bear by longbow and

(c) such parent, guardian or person holds a hunting license and

(d) such parent, guardian or person maintains physical control over the minor he or she is accompanying at all times while hunting. For the purposes of this paragraph "physical control" shall mean that the physical proximity of the minor to the parent, guardian or person is such that the parent, guardian or person is reasonably able to issue verbal directions and instructions, maintain constant visual contact, and otherwise provide guidance and supervision to the minor.

§ 11-0931. Prohibitions on the use and possession of firearms.

1. No person except a law enforcement officer in the performance of his official duties shall use in hunting or possess in the fields or forests or on the waters of the state for any purpose:

a. the apparatus known as a silencer;

b. any automatic firearm, or any firearm which has been converted to an automatic type, or any firearm which has a built-in mechanical adjustment which will permit it to function as an automatic arm; or

c. any auto-loading firearm of a construction to contain more than six shells in the magazine and chamber combined, except

- (1) such a firearm using twenty-two caliber rim-fire ammunition, or
- (2) such a firearm which has been altered so as to reduce its capacity to not more than six shells at one time in the magazine and chamber combined, or
- (3) an auto-loading pistol having a barrel less than eight inches in length.

d. An automatic firearm is defined as one which will continue to fire as long as the trigger is held back. An auto-loading firearm is defined as one which reloads itself after each shot and requires that the trigger be pulled back for each shot.

* 2. a. No crossbow or firearm except a pistol or revolver shall be carried or possessed in or on a motor vehicle unless it is uncocked, for a crossbow or unloaded, for a firearm in both the chamber and the magazine, except that a loaded firearm which may be legally used for taking migratory game birds may be carried or possessed in a motorboat while being legally used in hunting migratory game birds, and b. no person except a law enforcement officer in the performance of his official duties or a nuisance wildlife specialist with a permit issued pursuant to section 11-0522-a of this article, provided that such activities are in furtherance of the site-specific deer management plan, shall, while in or on a motor vehicle, use a jacklight, spotlight or other artificial light upon lands inhabited by deer if he or she is in possession or is accompanied by a person who is in possession, at the time of such use, of a longbow, crossbow or a firearm of any kind except a pistol or revolver, unless such longbow or crossbow is unstrung or such firearm or crossbow is taken down or securely fastened in a case or locked in the trunk of the vehicle. For purposes of this subdivision, motor vehicle shall mean every vehicle or other device operated by any power other than muscle power, and which shall include but not be limited to automobiles, trucks, motorcycles, tractors, trailers and motorboats, snowmobiles and snowtravelers, whether operated on or off public highways. Notwithstanding the provisions of this subdivision, the department may issue a permit to any person who is non-ambulatory, except with the use of a mechanized aid, to possess a loaded firearm in or on a motor vehicle as defined in this section, subject to such restrictions as the department may deem necessary in the interest of

public safety. Nothing in this section permits the possession of a pistol or a revolver contrary to the penal law.

* NB Effective until January 1, 2027

* 2. No crossbow or firearm except a pistol or revolver shall be carried or possessed in or on a motor vehicle unless it is uncocked, for a crossbow or unloaded, for a firearm in both the chamber and the magazine, except that a loaded firearm which may be legally used for taking migratory game birds may be carried or possessed in a motorboat while being legally used in hunting migratory game birds, and no person except a law enforcement officer in the performance of his official duties shall, while in or on a motor vehicle, use a jacklight, spotlight or other artificial light upon lands inhabited by deer if he or she is in possession or is accompanied by a person who is in possession, at the time of such use, of a longbow, crossbow or a firearm of any kind except a pistol or revolver, unless such longbow or crossbow is unstrung or such firearm or crossbow is taken down or securely fastened in a case or locked in the trunk of the vehicle. For purposes of this subdivision, motor vehicle shall mean every vehicle or other device operated by any power other than muscle power, and which shall include but not be limited to automobiles, trucks, motorcycles, tractors, trailers and motorboats, snowmobiles and snowtravelers, whether operated on or off public highways. Notwithstanding the provisions of this subdivision, the department may issue a permit to any person who is non-ambulatory, except with the use of a mechanized aid, to possess a loaded firearm in or on a motor vehicle as defined in this section, subject to such restrictions as the department may deem necessary in the interest of public safety. Nothing in this section permits the possession of a pistol or a revolver contrary to the penal law.

* NB Effective January 1, 2027

3. No person shall discharge a firearm in a "restricted area" established pursuant to section 11-0321, contrary to the terms of the restriction prohibiting or restricting such discharge.

4. a. No person shall:

(1) discharge a firearm, crossbow or long bow in such a way as will result in the load, bolt, or arrow thereof passing over a public highway

or any part thereof;

(2) discharge a firearm within five hundred feet, a long bow within one hundred fifty feet, or a crossbow within two hundred fifty feet from a dwelling house, farm building or farm structure actually occupied or used, school building, school playground, public structure, or occupied factory or church;

(3) use a firearm or a long bow for the hunting of migratory game birds in Larchmont Harbor, specifically those portions bounded by the following points of land:

BEGINNING AT A POINT KNOWN AS UMBRELLA POINT ON THE EAST SHORE OF LARCHMONT HARBOR THEN PROCEEDING IN A NORTHERLY DIRECTION TO CEDAR ISLAND; THENCE NORTHWESTERLY TO MONROE INLET; THENCE NORTHEASTERLY TO DELANCY COVE BEING IN THE TOWN OF MAMARONECK; THENCE IN A SOUTHWESTERLY DIRECTION FROM DELANCY COVE TO GREACEN POINT; THENCE RUNNING THE AREA BETWEEN DELANCY COVE AND THE WEST SHORE OF SATANS TOE NORTHEAST; THENCE SOUTHEAST THEN ALONG THE WEST SHORE OF SATANS TOE SOUTHWEST AND THEN SOUTH TO THE SOUTHERLY POINT OF SATANS TOE TO EDGEWATER POINT.

(4) Use of a firearm or a long bow for the hunting of migratory game birds in Udall's Cove, specifically those portions of Little Neck Bay within Nassau and Queens counties lying east of a line running north from the foot of Douglaston Parkway to the shore opposite.

b. The prohibitions contained in subparagraph 2 of paragraph a above shall not apply to:

* (1) The owner or lessee of the dwelling house, or members of his immediate family actually residing therein, or a person in his employ, or the guest of the owner or lessee of the dwelling house acting with the consent of said owner or lessee, provided however, that nothing herein shall be deemed to authorize such persons to discharge a firearm within five hundred feet, a long bow within one hundred fifty feet, or a crossbow within two hundred fifty feet of any other dwelling house, or a farm building or farm structure actually occupied or used, or a school building or playground, public structure, or occupied factory or church; provided further, that a nuisance wildlife specialist with a permit issued pursuant to section 11-0522 of this article acting in furtherance of the site specific deer management plan may discharge a firearm within

five hundred feet of any dwelling houses, structures, schools or playgrounds, provided that the owners or lessees thereof have been notified by certified mail of the date or dates, and time period of the expected activity, and discharge a firearm within two hundred fifty feet of such dwelling houses, structures, schools or playgrounds provided that all the owners or lessees thereof have provided written consent; provided further, that a nuisance wildlife specialist with a permit issued pursuant to section 11-0522-a of this article acting in furtherance of the site-specific deer management plan may discharge a firearm within five hundred feet of any dwelling houses, structures, schools or playgrounds, provided that the owners or lessees thereof have been notified by certified mail of the date or dates and time period of the expected activity, and discharge a firearm within two hundred fifty feet of such dwelling houses, structures, schools or playgrounds provided that all the owners or lessees thereof have provided written consent;

* NB Effective until January 1, 2027

* (1) The owner or lessee of the dwelling house, or members of his immediate family actually residing therein, or a person in his employ, or the guest of the owner or lessee of the dwelling house acting with the consent of said owner or lessee, provided however, that nothing herein shall be deemed to authorize such persons to discharge a firearm within five hundred feet, a long bow within one hundred fifty feet, or a crossbow within two hundred fifty feet of any other dwelling house, or a farm building or farm structure actually occupied or used, or a school building or playground, public structure, or occupied factory or church;

* NB Effective January 1, 2027

(2) Programs conducted by public schools offering instruction and training in the use of firearms or long bow;

(3) The authorized use of a pistol, rifle or target range regularly operated and maintained by a police department or other law enforcement agency or by any duly organized membership corporation;

(4) The discharge of a shotgun over water by a person hunting migratory game birds if no dwelling house, farm building or farm structure actually occupied or used, school building, school playground, or public structure, factory or church, livestock or person is situated in the line of discharge less than five hundred feet from the point of

discharge.

5. a. No person shall use a rifle for hunting on Long Island or in Westchester County. If a person be found carrying a rifle in the woodlands on Long Island or in Westchester County, that fact shall be presumptive evidence that he is illegally using it for hunting in that area; but this provision does not apply to members of a duly organized target shooting club carrying unloaded rifles to and from the target range.

b. In the counties, or parts of counties, where the use of a rifle other than a muzzle loading firearm is not permitted in the taking of deer, a person afield shall not possess a rifle larger than twenty-two caliber rim-fire other than a muzzle loading firearm during the open season for deer.

c. In the Northern Zone no person, while engaged in hunting with the aid of a dog or while afield accompanied by a dog, shall possess a rifle larger than .22 caliber using rim-fire ammunition or possess a shotgun loaded with a slug, ball or buckshot, or possess a crossbow; but this paragraph does not apply to persons, engaged in coyote hunts with dogs during any open season on coyotes established pursuant to the provisions of section 11-0903 of this title.

6. No person while engaged in hunting deer or bear pursuant to a bowhunting privilege, and no person accompanying him or her or a member of his or her party, while he or she is so engaged during a special longbow season, shall have in his or her possession a firearm of any kind, and no person while engaged in hunting deer or bear pursuant to a muzzle-loading privilege, and no person accompanying him or her or a member of his or her party, while he or she is so engaged during a special muzzle-loading firearm season, shall have in his or her possession a firearm of any kind other than a muzzle-loading firearm.

7. During any open season for deer, a person afield shall not possess shotgun shells loaded with a slug or ball unless he holds a valid license or permit to take deer or bear.

8. a. No person in Westchester, Nassau, or Suffolk county shall discharge a crossbow within five hundred feet of a dwelling house, a farm building or farm structure actually occupied or used, or a school building or playground, public structure, or occupied factory or church.

b. A county not enumerated in paragraph a of this subdivision may opt by local law to be covered by the provisions of such paragraph.

§ 11-0933. Taking small game by crossbow.

Notwithstanding any provision of this chapter, or any prior notwithstanding language in this article, the department may, by regulation, authorize the taking of small game and wild upland game birds by the use of a crossbow by any licensed person fourteen years of age or older, in any small game season, in any area designated in items (a), (b), (c), (d), (e), (f), (i), (k), and (l) of paragraph a of subdivision two of section 11-0907 of this title in which a shotgun or muzzle loader is permitted.

*** § 11-0935. Deer hunting program.**

1. Notwithstanding subdivision one-a of section 11-0701 and the crossbow prohibition of subdivision one of section 11-0929, a hunting license holder who is twelve or thirteen years of age may hunt deer with a crossbow, rifle, shotgun, or muzzle-loading firearm as provided in this title in an eligible area provided that:

(a) such minor is accompanied by their parent or legal guardian, or by a person designated in writing by such parent or legal guardian on a form prescribed by the department who is twenty-one years of age or older; and

(b) such parent, guardian or person has had at least three year's experience in hunting deer; and

(i) such parent, guardian or person holds a hunting license; and

(ii) such parent, guardian or person maintains physical control over

the minor at all times while hunting. For the purposes of this paragraph "physical control" shall mean that the physical proximity of such minor to the parent, guardian or person is such that the parent, guardian or person is reasonably able to issue verbal directions and instructions, maintain constant visual contact, and otherwise provide guidance and supervision to the minor; and

(iii) such parent, guardian or person and the minor remain at ground level at all times while hunting; and

(c) such parent, guardian or person and the minor shall each display either a minimum total of two hundred fifty square inches of solid fluorescent orange or pink or patterned fluorescent orange or pink consisting of no less than fifty percent fluorescent orange or pink material worn above the waist and visible from all directions, or a hat or cap with no less than fifty percent of the exterior consisting of solid fluorescent orange or pink material and visible from all directions.

2. For the purposes of this section "eligible area" shall include a county that has passed a local law authorizing participation in the pilot program and has notified the department of such participation, provided, however, that the following counties: Westchester; Richmond; Bronx; New York; Kings; Queens; Nassau; and Suffolk shall not be deemed to be eligible.

3. The department shall prepare a report by February first of each year including the following information at a minimum: number of violations; hunting related incidents and revocations pursuant to section 11-0719; the number of counties participating; the number of minors participating; and the number of deer taken.

* NB Repealed December 31, 2028

TITLE 10

FALCONRY

Section 11-1001. Definitions.

11-1003. Falconry license.

11-1005. Falconry advisory board.

11-1007. Department authority.

11-1009. Prohibitions.

§ 11-1001. Definitions.

(1) "Raptors" means all species of the orders Strigiformes and Falconiformes and shall include but not be limited to falcons, hawks, owls and eagles except the golden eagle (*Aquila chrysaetor*) and bald eagle (*Haliaeetus leucocephalus*) and all birds listed as endangered or threatened pursuant to section 11-0535 of this article. However, properly banded peregrine falcons which are the progeny of birds lawfully acquired prior to 1978 are raptors within the meaning of this section. (2) "Falconry" means the sport of hunting by the use of trained raptors and includes the training, feeding and handling of such birds and their recapture after being released for hunting or training.

§ 11-1003. Falconry license.

Any resident of this state may be issued a falconry license. The department shall prescribe and furnish forms for application for such license. The fee for the license shall be forty dollars. Falconry licenses shall expire on December 31 every fifth year and shall be renewable at the discretion of the department. A falconry license shall authorize the licensee to obtain, buy, sell, barter, possess and train raptors for falconry and to engage in falconry, provided that no game shall be taken or killed except during an open season therefor, and further provided that such licensee shall also possess a license pursuant to this chapter which authorizes the holder to hunt wildlife. Any non-resident, who legally possesses a raptor where he or she resides and who may legally engage in falconry where he or she resides, may engage in falconry in New York without a falconry license provided he or she possesses a valid non-resident hunting license.

§ 11-1005. Falconry advisory board.

The commissioner shall appoint a falconry advisory board of not less than five members who are residents of the state and who shall serve at the pleasure of the commissioner and who shall be qualified by reason of their association with state or national organizations or institutions with primary interests in ornithology, falconry or wildlife conservation. The duties of the falconry advisory board shall include (i) recommending qualifications for eligibility of applicants for falconry licenses, (ii) reviewing and screening applications for falconry licenses and recommending action to be taken on each application, (iii) recommending the species and number of raptors which may be possessed or taken from the wild by each applicant and the manner of such taking, and (iv) recommending falconry hunting seasons and regulations for various game species.

§ 11-1007. Department authority.

The department shall make such rules and regulations governing the issuance and use of falconry licenses as it shall deem proper and necessary, giving due consideration to the recommendations of the falconry advisory board. The department may fix by regulation special open seasons for the taking of small game or upland game birds by falconry. The department may revoke any falconry license and may seize raptors held pursuant thereto if the licensee (i) fails to provide proper care for the raptors in the licensee's possession, (ii) allows raptors in the licensee's possession to become a public nuisance, (iii) is convicted of or settles by civil compromise any violation of any provision of this chapter or regulation of the department, or (iv) fails to comply with any of the terms or conditions of the falconry license.

§ 11-1009. Prohibitions.

(1) Raptors for use in falconry shall not be bought, sold or bartered, or offered for sale or barter, except that this section shall not apply to the captive bred progeny of lawfully acquired raptors.

(2) No person shall possess or maintain in captivity any raptor or raptors, except as otherwise provided by law, unless he shall first

obtain a falconry license.

TITLE 11

TRAPPING

Section 11-1101. Prohibitions.

11-1103. Open trapping seasons.

11-1105. Procedure.

11-1107. Possession, transportation and sale.

11-1109. Registered muskrat marshes.

§ 11-1101. Prohibitions.

1. Except as provided in title 5 or in sections 11-1901 or 11-1903, no wild bird shall be trapped, netted or snared, or if so taken, possessed.

2. Traps shall not be set for the taking of any protected wildlife except (a) in an open season as provided in section 11-1103 for taking the species for which the trap is set; or (b) in accordance with a license or permit issued by the department pursuant to title 5; or (c) as provided in title 5 or title 19 with respect to rabies control and predatory, destructive or menacing wildlife; or (d) on a registered muskrat marsh as provided in section 11-1109. Protected wildlife taken or captured in a trap shall not be killed or possessed while captive unless it is a species of wildlife for which the trap was or might lawfully have been set at the time of capture.

3. In waters of the Southern Zone, as so defined, from December 5 through January 31, no person shall set, place or maintain a trap of any kind except (a) spring hole trap sets for the purpose of taking fox, or (b) water sets during any open season established for the taking of muskrat, otter and beaver, or (c) traps set on a registered muskrat marsh pursuant to permit, issued as provided in section 11-1109.

4. On the opening day of an open season for trapping, no person shall stake, set or place any trap or deadfall for the purpose of taking the

species of game for which such open season is established or fixed, in the area for which such open season is established or fixed, before 7:00 A.M.

5. Except as provided in subdivision 1 or 2 of section 11-0523 with respect to destructive and menacing wildlife, no person shall (a) set or use a trap of the leg-gripping type having teeth in the jaws; (b) set a trap so that wildlife when caught is suspended; (c) use, locate or set a snare or a device consisting of a noose of any material whereby an animal may be taken.

6. a. No person shall set or use a trap of the leg-gripping type (a) having a spread of jaws exceeding 7 1/4" measured at right angles to the axis upon which the jaws operate and excluding the gripping surface of each jaw, when used under water during the open season for trapping beaver or otter, or (b) in any other case, except as provided in title 5 or in section 11-1109, having a spread of jaws exceeding 5-3/4" as so measured.

b. No person shall set or use a body gripping type trap with a dimension of more than 7-1/2 inches except:

(a) when used in water during the open season for trapping beaver and otter; or

(b) as further permitted by the department by regulation.

The dimension of the body gripping trap shall be ascertained when the trap is set in the extreme cocked position and shall be the maximum distance between pairs of contacting body gripping surfaces except for rectangular devices which shall be the maximum perpendicular distance between pairs of contacting body gripping surfaces.

c. Traps of the leg-gripping type having a spread of jaws exceeding 4" measured as described in paragraph a of this subdivision, when set on land (excluding traps originally set in water) (a) shall be covered at the time the trap is set or visited; if the trap becomes uncovered after it is set the covering shall be replaced at the time the trap is visited; coverings shall include but not be limited to soil, sand,

leaves, needles, other plant materials, and other substances as permitted by department regulation; such substances shall completely cover the jaws of the trap, and (b) shall be equipped with a pan tensioning device which shall include but not be limited to a bolt and nut, notches grooved in the pan and dog or lever, sheer pins, a spring under the pan or strip of band steel, or other devices or modifications as permitted by regulation of the department.

7. Except as provided in section 11-1109, (a) no person shall take muskrat by the use of a box, wire or cage trap, except that they may be taken in such a trap of a construction incapable of taking any species of wildlife until wildlife previously taken therein has been released; (b) except as otherwise permitted by department regulation, no person shall set, stake or use a trap within a distance of five feet from a muskrat den or house or any structure constructed by a muskrat in which it can take shelter; (c) smoke, chemicals, gas or poison shall not be used on or near any trap used to take beaver, otter, fisher, bobcat, coyote, fox, mink, raccoon, muskrat or skunk.

8. Except as permitted by the department, no person shall set, stake or use a trap within a distance of fifteen feet from a beaver dam, den or house.

9. No person shall take, possess or remove from any legally set trap any lawfully trapped wildlife or shall wilfully disturb, destroy, take or possess, any legally set trap, without the permission of the owner of such trap.

10. Traps shall not be set or placed on a public highway.

11. Beaver, fisher and otter shall be taken only as permitted by the department.

12. No person shall trap wildlife within one hundred feet of a dwelling, school building, school playground or church without the written consent of the owner or lessee of the property where the trap is set.

§ 11-1103. Open trapping seasons.

1. The department may by regulation permit trapping of beaver, fisher, otter, bobcat, coyote, fox, raccoon, opossum, weasel, skunk, muskrat, pine marten and mink, or any of them, in specified areas, and may regulate the taking, possession and disposition of such animals. The periods in which trapping of such animals is so permitted are open seasons for the trapping of the species for which the period is fixed, in the area or areas for which it is so fixed.

2. When an investigation made by the department in the month of March of any year reveals that during the current open season for muskrats in any county or part thereof in the Southern Zone, reasonable opportunities were not afforded to trappers to harvest the muskrat crop of such season because of abnormal trapping conditions, the department shall have power to extend by regulation the open season in such county or part thereof for a period not to exceed twenty days.

§ 11-1105. Procedure.

1. Traps set for taking wildlife shall bear the name and residence address or the assigned identification number of the operator legibly at all times, provided, that state, county and municipal law enforcement agencies shall have access to the name, address and telephone number of such operator who was assigned such identification number. They shall be visited once in each twenty-four hours, except in the Northern Zone where they shall be visited once in each forty-eight hours or a shorter interval of no less than twenty-four hours as the department may, by regulation, require, and all wildlife held captive shall immediately be removed from the traps.

2. Wildlife lawfully taken alive in traps may be killed in any manner, except that where the taking is pursuant to a permit or special license, it may not be killed in violation of any term of such permit or license.

§ 11-1107. Possession, transportation and sale.

Wildlife taken by trapping may be possessed, transported, bought and sold as provided in section 11-0917, and shall not be possessed, transported, bought or sold except as so provided.

§ 11-1109. Registered muskrat marshes.

1. Applicability. A registered muskrat marsh is an enclosed marsh which was registered with the department prior to September 1 of the year previous to the year in which a privilege granted or a rule provided by this section is invoked or applied.

2. Registration. Application for registration of a muskrat marsh shall be made upon forms supplied for such purpose by the department. If the department is satisfied that the marsh covered by the application is being managed in accordance with sound management practices, it shall issue a certificate of registration which shall entitle registrant to apply for the permission provided for in this section. The department shall be entitled to receive ten dollars as a registration fee.

3. Control of muskrats on registered marshes. The owner or lessee of a registered marsh may apply to the department for permission to trap within specified dates during the closed season in order to allow the removal of surplus muskrats, not required for breeding stock.

4. Investigation; permit. The department shall cause an investigation to be made of the allegations of all trapping applications filed with it by registered applicants, and may, in its discretion, issue a permit to such applicant, allowing him, and persons whom he may designate in writing, to trap muskrats within specified dates during the closed season, except that no such permit shall be issued for the trapping of muskrats during the period from May 1 through October 31. The name and address of every person designated in writing to trap shall, prior to

the time designee begins to trap, be forwarded by the registrant to the Department of Environmental Conservation, Albany, New York, by registered mail.

5. Regulations. Notwithstanding any other provisions of the Fish and Wildlife Law to the contrary, the department may make regulations governing the manner of trapping muskrats on registered marshes; provided, however, that no such regulations shall be made which are more restrictive than provisions of this chapter expressly regulating the manner of taking muskrats.

6. Reports. Registrants shall, not later than May 1 of each year, furnish the department with a report covering the number of muskrats trapped.

7. License. No person other than the owner or lessee thereof shall engage in trapping on a registered marsh unless he holds a trapping license.

TITLE 12

HUNTING WHILE INTOXICATED

Section 11-1201. Definitions.

11-1203. Hunting while intoxicated prohibited.

11-1205. Enforcement.

11-1207. Evidence admitted in court.

11-1209. Penalties.

11-1211. Savings clause.

§ 11-1201. Definitions.

For the purposes of this title:

1. "Hunting" means shooting or killing wildlife, including shooting or killing wildlife lawfully trapped or otherwise reduced to possession, or pursuing or capturing wildlife with any weapon, projectile, or other

device or instrumentality; and includes all lesser acts such as disturbing, harrying, or worrying, whether they result in taking or not, when done with the aid or accompaniment of any weapon, projectile, or other device or instrumentality; and every attempt to take and every act of assistance to any other person in taking or attempting to take wildlife, when done with the aid or accompaniment of any weapon, projectile, or other device or instrumentality. "Wildlife" as used in this subdivision means "wildlife" as that term is defined in subdivision six of section 11-0103 of the environmental conservation law.

2. "Intoxicated condition" shall mean the presence of .08 of one per centum or more by weight of alcohol in a person's blood as shown by chemical analyses of his blood, breath, urine, or saliva made pursuant to section 11-1205 of this title. An "impaired condition" shall mean a state of impairment of a person's capacity to think or act correctly, or of a loss, even in part of a person's control of his physical or mental faculties due to his consumption of alcohol or use of a drug.

3. "Drug" means "drug" as that term is defined in section one hundred fourteen-a of the vehicle and traffic law.

4. "License to hunt", or "permit to hunt" means any license, permit, or other privilege granted pursuant to section 11-0701 of this article which authorizes the holder to hunt wildlife.

§ 11-1203. Hunting while intoxicated prohibited.

1. No person shall engage in hunting while he is in an intoxicated condition.

2. No person shall engage in hunting while his ability to engage in such hunting without creating unreasonable risk of injury or death to himself or other human life is impaired by his consumption of alcohol or use of a drug.

§ 11-1205. Enforcement.

1. Police officers and officers named in subdivision one of section 71-0907 of this chapter shall have power to enforce the provisions of this title and to take actions, make arrests, and conduct tests thereunder in pursuance of such enforcement.

2. Any person engaged in hunting in this state shall be deemed to have given his consent to a chemical test of his breath, blood, urine, or saliva for the purpose of determining the alcoholic or drug content of his blood, provided that such test is administered at the direction of a police officer or officer of the department of environmental conservation: (a) having reasonable grounds to believe such person to have been engaged in hunting in violation of any subdivision of section 11-1203 of this title, and within two hours after such person has been placed under arrest for any such violation, or (b) within two hours after a breath test, administered pursuant to the provisions of subdivision one of this section, indicates that alcohol has been consumed by such person, and in accordance with the rules and regulations established by the law enforcement unit of which the administering officer is a member.

3. If such person, having been placed under arrest or after a breath test indicates the presence of alcohol in his system and having thereafter been requested to submit to chemical test, refuses to submit to such chemical test, the test shall not be given, and a report of such refusal shall be forwarded by the officer under whose direction the test was requested to the department of environmental conservation within seventy-two hours and the department shall revoke all licenses, bowhunting privileges, muzzle-loading privileges, and permits to hunt which such person may possess; provided, however, that such revocation shall become effective only after a hearing held by the department upon notice to such person, unless such hearing is waived by such person.

4. A license, bowhunting privilege, muzzle-loading privilege, or permit to hunt may, upon the basis of a report, verified as hereinafter provided, of the administering officer that he had reasonable grounds to

believe such person to have been engaged in conduct in violation of any subdivision of section 11-1203 of this title and that said person had refused to submit to such test, be temporarily suspended without notice pending the determination upon any such hearing. Such report may be verified by having the report sworn to, or by affixing to such report a form notice that false statements made therein are punishable as a class A misdemeanor pursuant to section 210.45 of the penal law and such form notice together with the signature of the deponent shall constitute a verification of the report.

5. No license, bowhunting privilege, muzzle-loading privilege, or permit to hunt shall be revoked because of a refusal to submit to such chemical test if the hearing officer is satisfied that the person requested to submit to such chemical test had not been warned prior to such refusal to the effect that a refusal to submit to such chemical test may result in the revocation of such license, bowhunting privilege, muzzle-loading privilege, or permit to hunt whether or not he is found guilty of the charge for which he has been arrested.

6. The department of health shall issue and file rules and regulations approving satisfactory techniques or methods, to ascertain the qualifications and competence of individuals to conduct and supervise chemical analyses of a person's blood, urine, breath or saliva. If the analyses were made by an individual possessing a permit issued by the department of health, this shall be presumptive evidence that the examination was properly given. The provisions of this subdivision do not prohibit the introduction as evidence of an analysis made by an individual other than a person possessing a permit issued by the department of health.

§ 11-1207. Evidence admitted in court.

Upon the trial of any action or proceeding arising out of conduct alleged to have been committed by any person arrested for a violation of any subdivision of section 11-1203 of this title, the court shall admit evidence of the amount of alcohol or drugs in the defendant's blood as

shown by a test administered pursuant to the provisions of section 11-1205 of this title. Evidence that there was five-hundredths of one per centum or less by weight of alcohol in such person's blood is prima facie evidence that the ability of such person to engage in hunting without creating unreasonable risk of injury or death to himself or other human life was not impaired by the consumption of alcohol. Evidence that there was less than eight one-hundredths of one per centum by weight of alcohol in such person's blood is prima facie evidence only that such person was not in an intoxicated condition due to the consumption of alcohol.

§ 11-1209. Penalties.

1. Whoever shall hunt while his ability is impaired by the consumption of alcohol shall be guilty of a violation of law.

2. Whoever shall hunt while in an intoxicated condition or while his ability to hunt is impaired by the use of a drug shall be guilty of a misdemeanor, punishable by imprisonment in a penitentiary or county jail for not more than one year, or by a fine of not more than five hundred dollars, or by both such fine and imprisonment.

3. Notwithstanding any provision in section 11-1205 of this title, the department may revoke, for a period not exceeding two years, any or all licenses, bowhunting privileges, muzzle-loading privileges, or permits to hunt of any person who violates any subdivision of section 11-1203 of this title. Action by the department resulting in such revocation shall become effective only after a hearing held by the department upon notice to such person, at which proof of facts indicating the violation is established to the satisfaction of the commissioner, or of the hearing officer and concurred in by the commissioner. A person whose license to hunt has been revoked as provided in this subdivision is ineligible for such license during the period determined by the department as provided in this section. No such person shall, during such period, procure any license for which he is ineligible. No person shall without license hunt or trap during any period in which the privilege to do so has been

denied him by the department as provided in this section. When the department has revoked a license, or has denied to any person the ability to obtain a license, it shall cause the fact of such revocation or denial, or both, as the case may be, and the terms and extent thereof, to be entered in the minutes of the department, and shall forthwith send a written notice of its action as so entered in the minutes to the person affected, at his last known address, either by registered or certified mail or by delivery personally by a representative of the department. Within five days after service of such notice, such person shall deliver to the department the license or licenses revoked, together with any bowhunting privileges, muzzle-loading privileges or tags issued in connection with them. If the license was one entitling the holder to the privilege of several licenses, and the revocation concerned some but not all of such privileges, any license, bowhunting privilege, muzzle-loading privilege or tag so delivered shall be returned by the department to the person to whom it was issued, appropriately marked or stamped to show the extent to which it is revoked.

4. Violation of any subdivision of section 11-1203 of this title shall constitute grounds for forfeiture pursuant to the provisions of and under the procedures prescribed in subdivisions one, two, five, six and seven of section 71-0909 of this chapter.

§ 11-1211. Savings clause.

If any word, clause, sentence, paragraph, section, or other part of this title is adjudged by any court of competent jurisdiction to be invalid, such judgment shall not affect, impair, or invalidate the remainder of this title, but shall be confined in its operation to the word, clause, sentence, paragraph, section, or other part thereof, directly involved in the controversy in which such judgment is rendered.

TITLE 13 FISHING

Section 11-1301. General provisions.

11-1303. Open seasons, size and catch limits and manner of taking fish fixed by regulation.

11-1305. Size and catch limits.

11-1307. Fishing promotion program.

11-1311. Fishing in waters impounded by dams constructed for power purposes.

11-1315. Taking and sale of bait fish.

11-1316. Use of fish as bait.

11-1317. Fish-bait; protection of aquatic insects.

11-1319. Possession, transportation and sale of fish.

11-1321. Other prohibited acts.

§ 11-1301. General provisions.

1. Except as specifically provided in this article or in article 13, or any regulation adopted pursuant thereto:

a. No fish, other than migratory food fish of the sea in the marine and coastal district, shall be taken except by angling.

b. Fish named by regulation adopted pursuant to section 11-1303 of this title shall be taken only during the open seasons specified in such order and only if they are within the minimum size limits established by such regulation.

* c. Except as otherwise prohibited by law, fish may be taken by spear or speargun in the marine and coastal district only for recreational purposes. A speargun must be submerged when used to take fish. Provided, however, that no food fish may be taken by spear or speargun within one hundred yards of a public bathing area.

* NB Repealed June 1, 2029

2. Except when taken pursuant to section 11-0515 or 11-0517 of this article, or when taken in nets as provided by title 15 or article 13, fish named by regulation adopted pursuant to section 11-1303 of this title shall not be taken in excess of the daily or seasonal catch limits

established by such regulation.

3. Fish shall not be taken contrary to the restrictions contained in any regulation of the department, made pursuant to any provision of the Fish and Wildlife Law, closing waters to the taking of fish, or restricting the use of nets or other devices, or fixing seasons, size limits or daily or seasonal catch limits, or otherwise restricting the taking of fish.

4. Fish unintentionally taken contrary to any provision of the Fish and Wildlife Law or regulation of the department shall be returned to the water at once without unnecessary injury.

5. Notwithstanding any inconsistent provision of the Fish and Wildlife Law, the department may adopt regulations for catch and release fishing in all waters of the state.

§ 11-1303. Open seasons, size and catch limits and manner of taking fish fixed by regulation.

Notwithstanding any other provision of this chapter, the department may, until December thirty-first, two thousand twenty-eight, fix by regulation open seasons, size and catch limits and manner of taking of all species of fish in all waters of the state, except marine fish named in subdivisions 2 and 3 of section 13-0339 of this chapter and except to the extent that such open seasons, size and catch limits and manner of taking are otherwise specifically provided for in article 13 of this chapter.

§ 11-1305. Size and catch limits.

The department may promulgate regulations restricting possession on the waters of the state, except the marine and coastal district, of fish, except bait fish named in section 11-1315 of this title, that have been cleaned, filleted or skinned in such a manner that (a) the species

of fish taken cannot be identified, (b) the number of fish taken cannot be determined, or (c) the length of fish taken cannot be ascertained. Such regulations shall initially provide that walleye, largemouth bass, smallmouth bass, brook trout and lake trout may not be so possessed if they have been dismembered, filleted or otherwise prepared for cooking or consumption beyond removal of the gills and viscera and that other species of fish may not be so possessed if they have been dismembered or otherwise prepared for cooking or consumption, except that the gills and viscera may be removed and such fish may be filleted, provided the skin is not removed from the fillet.

§ 11-1307. Fishing promotion program.

The commissioner shall develop and implement a fishing promotion program. The commissioner shall, in conjunction with the commissioner of economic development and the commissioner of parks, recreation and historic preservation, develop and implement a program which will encourage residents and out-of-state fishermen to utilize New York state's fishing opportunities. Such program shall include, but not be limited to:

1. working with conservation organizations, local sportmen's clubs, retail stores, and county chambers to develop and conduct educational fishing clinics for children and adults to teach angling techniques for both fresh and salt water fishing and to provide information about stocking programs that will increase the odds of a successful and safe fishing experience;

2. conducting public outreach, including working with local community and youth organizations, tourism promotion agencies and local governments, to develop programs in conjunction with the two free fishing days annually per department region provided by the legislature, such as educational seminars, day-long fishing festivals, and tackle and rod loaner programs, which will encourage individuals to take up the sport of fishing;

3. making available to the fishing public, via both brochures and the agency's website, the following information:

a. Public fishing sections of streams, ponds, and lakes;

b. Public access points for streams, ponds, and lakes;

c. Handicapped access points for all water bodies; and

d. The location of state lands, including forests, parks, wildlife management areas, trails, campsites by type, ski areas, hatcheries, and environmental education centers and camps;

4. posting fishing reports, including current fishing conditions statewide, on the department's website;

5. developing and implementing a "learn-to-fish" and "instructional" passbook and stamp program. a. The department shall make available, wherever licenses are sold, a "learn-to-fish" passbook and stamps to children under sixteen years of age. Such stamps shall include various types of fish indigenous to New York state and shall also include with the distribution of the "learn-to-fish" passbook one "learn-to-fish" stamp. A child under sixteen years of age may collect stamps and when the "learn-to-fish" passbook is complete shall return such completed "learn-to-fish" passbook to the department via mail and the department shall issue a patch, to be determined by the commissioner, to "learn-to-fish" passbook holders who have participated in and completed the "learn-to-fish" passbook program created pursuant to this subdivision.

b. A licensee shall also be issued an "instructional passbook" and may place a "learn-to-fish" stamp previously issued to a child under sixteen in his or her "instructional passbook" whenever he or she teaches a person under sixteen years of age how to fish. Once that licensee has earned fifty "learn-to-fish" stamps in his or her "instructional passbook", that person shall return such completed "instructional passbook" to the department via mail and the department shall issue a

free fishing license for the season following that in which he or she gets their fiftieth "learn-to-fish" stamp. The department shall include in the "instructional passbook" information relating to the instruction of fishing techniques to children, and shall also include current fishing regulations in the "instructional passbook".

§ 11-1311. Fishing in waters impounded by dams constructed for power purposes.

The waters impounded by any dam hereafter constructed for power purposes on any stream or waterway in the state, and impressed with a public interest pursuant to section 15-1713 of this chapter, shall be open to the public to fish thereon, when authorized by other applicable provisions of this chapter, subject to the following conditions and limitations:

a. Such fishing must be conducted in accordance with rules and regulations of the commissioner in agreement with the person, association or corporation proposing to construct the dam.

b. Such rules and regulations must provide, among other things, that fishing upon any such waters shall be conducted in such a manner as not to interfere injuriously with the operation and maintenance of the dam or of any manufacturing plant operated by power generated therefrom.

c. Damages sustained by a person while fishing or in connection therewith shall not constitute a claim either against the state or the person, association or corporation owning the dam or his or its lessee or other assignee in interest.

d. The commissioner, of his own motion or upon application, after a public hearing held pursuant to notice, shall have power, in his discretion, to exempt from the provisions of this section, the waters impounded by any dam hereafter constructed for power purposes. Notice of such a hearing shall be posted at least ten days before the hearing in five conspicuous places in the locality where the dam is to be

constructed.

e. Rules and regulations of the commissioner, so far as practicable, shall be uniform, but may vary in different localities of the state.

f. Warning notices or signboards not less than one foot square shall be conspicuously posted not more than forty rods apart close to and along the entire boundary of such impounded waters. Posting of such notices shall be sufficient provided that illegal and destroyed signs be replaced once a year during the months of March, July, August or September. Warning notices shall contain such information as the commissioner by rule or regulation may prescribe.

§ 11-1315. Taking and sale of bait fish.

1. a. Except as provided in subdivision 2, no person, without first obtaining the appropriate license from the department, shall take for sale as bait, nor sell as bait the following fish: minnows (family Cyprinidae), except carp or goldfish; top minnows or killifish (family Cyprinodontidae); mudminnows (family Umbridae); darters (family Estheostomidae); sticklebacks (genus Eucalia); tadpole stone cats (genera Noturus and Schilbeodes); smelt or ice fish (Osmerus mordax); alewives, saw bellies or blueback herring (family Clupeidae); suckers (family Catostomidae).

b. Fish taken pursuant to such license shall be used only for bait in hook and line fishing. All carp, goldfish, and lamprey larvae (family Petromyzonidae) taken in nets operated pursuant to such license shall be destroyed immediately.

2. No license under this section is required to take for sale as bait or to sell as bait any marine species of fish taken in the marine district. A minor under the age of sixteen years may, without a license, sell as bait such of the fish listed in subdivision 1 as he has lawfully taken by angling.

3. Bait fish named in subdivision 1, when otherwise permitted by law, may be taken for use or sale as bait by:

- a. angling,
- b. nets when permitted by subdivisions 4 and 5 of this section, or
- c. stunning in the case of tadpole stone cats. "Stunning" means tapping a stone with implement or other stone.

4. a. Fish named in subdivision 1, taken for use as bait for personal use and not for sale, may be taken:

(1) in waters not inhabited by trout, by means of a seine or scap net not larger than thirty-six square feet, and

(2) in any waters of the state by means of a glass, plastic or wire trap not more than twenty inches in length, having no wings or leaders and having an entrance not larger than one inch in diameter, and such trap shall bear legibly at all times when in the water the name and address of the operator.

b. In Keuka Lake, Canandaigua Lake, Cayuga Lake, Seneca Lake, Canadice Lake and Hemlock Lake, alewives or sawbellies taken for such purpose may also be taken by gill nets measuring not more than twenty-five feet in length, having a mesh not larger than one inch.

c. Nets for taking bait fish shall not be hauled after sunset or before sunrise, except as permitted by the department.

d. Fish named in subdivision 1 may be taken for personal use or sale as bait under license from the department in the waters of the Hudson river by means of cast nets not exceeding ten feet in diameter.

5. Fish named in subdivision 1, taken for sale as bait under license from the department, may be taken by the types of nets specified in such license. In issuing such licenses the department may permit the use of nets of metallic or plastic mesh, notwithstanding the definition of "net" as contained in section 11-0103 of the Fish and Wildlife Law.

6. a. Carp, goldfish, and lamprey larvae (family Petromyzonidae) shall not be used as bait or sold for bait.

b. No person shall take smelt for bait from Upper and Lower Saranac lakes or Lake Champlain, except by angling.

c. Nets and traps for the taking of bait fish shall not be placed or operated within one hundred feet of any dock, pier, or boat landing on the St. Lawrence River without the consent of the owner.

7. The license provided for in subdivision 1 shall be issued only to residents of this state and to residents of a state in which residents of this state may be licensed, or are permitted without license, to take such fish for sale as bait.

8. This section does not supersede any provision of section 13-0343 restricting the use of nets in certain waters of the marine district or subdivision 2 of section 11-1307.

§ 11-1316. Use of fish as bait.

1. The department may, by regulation designating the waters in which such use is not permitted, prohibit the use of minnows or other species of fish as bait in the lakes or ponds and tributaries thereto in which:

a. trout are the predominant protected species of fish and which lakes, ponds or tributaries are not infested with yellow perch; or

b. fish have been eradicated by chemical treatment and in which trout or other game fish have been restocked. The list of the water to which this section shall be applicable shall be published in the fishing guide.

2. No person shall possess any species of fish either dead or alive, in or on waters where the use of fish as bait is prohibited, except

species actually present in such waters naturally or by stocking or as permitted by the department by order.

§ 11-1317. Fish-bait; protection of aquatic insects.

1. No aquatic insect nor any insect that lives in the water during any of its life stages shall be taken from waters inhabited by trout nor from the banks thereof at any time.

2. No person shall take from the waters of the state or the banks thereof for sale as bait, and no person shall sell as bait, any such insect, without first obtaining from the department a license to take such insects for sale as bait or to sell such insects as bait.

3. The license provided for in subdivision 2 shall be issued only in the discretion of the department. Licenses to take for sale as bait insects described in this section shall be issued only to residents of this state and to residents of a state in which residents of this state may be licensed, or are permitted without license, to take such insects for sale as bait.

§ 11-1319. Possession, transportation and sale of fish.

1. Application.

a. This section governs possession, transportation and sale of all fish taken in waters of the state, including the marine and coastal district except (1) trout and black bass raised under permit from the department and identified as provided in section 11-1909, (2) fish taken from a farm fish pond licensed as provided in section 11-1911, and (3) fish taken from licensed fishing preserve waters as provided in section 11-1913.

b. Fish lawfully taken may be (1) possessed, (2) transported within the state and from within to without the state, and (3) bought and sold,

as provided in this section and in the sections of the Fish and Wildlife Law and regulations of the department to which this section refers, and not otherwise. Such fish shall not be possessed, transported, bought or sold unless lawfully taken, nor transported, bought or sold, unless lawfully possessed.

c. No fish shall be possessed, transported or sold contrary to the terms of any statute, regulation, permit or license of the department, pursuant to which it is taken or acquired.

2. Sale.

a. Trout, including rainbow trout, Atlantic salmon, black bass, walleye and muskellunge shall not be bought and sold.

b. Bait fish named in section 11-1315 shall not be sold for bait except as provided in that section.

c. The following fish may be bought and sold at any time: (1) the marine species named in section 13-0339 or in regulations of the department provided they are of the minimum size limits stated in such section or in such regulations; (2) fish that may be taken with nets in the Hudson River, Lake Erie and Lake Ontario as authorized by regulations of the department provided they are of the minimum size limits stated in such regulations; (3) fish not specifically named in paragraph d of this subdivision or in section 13-0339, 11-1521 or 13-0347 or in regulation adopted pursuant to section 11-1303; (4) fish for which such regulations specify no minimum size limits and specify generally without exceptions, that the open season is "any time".

3. Possession.

A person shall not possess on waters of the state nor the shores thereof, any species of fish (other than fish legally taken in a net or fish legally taken by the holder of a license issued pursuant to section 13-0335 of this chapter) in excess of the number of such species which may be legally taken by one person in one day.

4. Transportation.

a. Carcasses, and parts thereof, of fish which may be sold as provided in subdivision 2 may be transported within and from within to without the state by any person, at any time, in any number and in any manner.

b. Carcasses, and parts thereof, of fish which may not be sold as provided in subdivision 2 may be transported within and from within to without the state by any person, at any time, subject to the following restrictions: (1) no person shall transport in one day a quantity of fish for which a catch limit is provided in regulations adopted pursuant to section 11-1303 or 11-1505 greater than the quantity that may lawfully be taken by one person in two days, unless such transportation is authorized by permit issued by the department or the fish so transported is frozen or otherwise processed and packaged for storage and is transported from a place of processing to a place of storage or of consumption or from a place of storage to a place of storage or consumption; (2) such carcasses or parts thereof shall not be shipped by parcel post, and if shipped by carrier, they or the package containing them shall have attached a card or label showing the name and address of the taker, his license number, the name and address of the consignee, and if the fish is shipped in a package, the nature of the contents of the package.

§ 11-1321. Other prohibited acts.

1. No person shall take fish (a) by use of explosives or (b) by shutting or drawing off water.

2. Explosives shall not be used or possessed in or on the waters of the state or shores or islands thereof except for mining or mechanical purposes. Possession of explosives in such places by any person shall be presumptive evidence of violation of this subdivision.

3. Bass, walleye, trout, lake trout and salmon shall not be disturbed

on spawning beds in the closed season, nor shall their spawn or milt be taken from spawning beds at any time.

4. Any noise or disturbance of waters or the banks thereof by any means with intent to drive fish into a net, which practice is commonly known as thumping, is prohibited unless expressly permitted in the terms of a license or permit issued by the department.

5. No person owning, leasing, operating or maintaining a dam holding back water which such person knows or has reason to know is inhabited by fish shall draw off such water in such quantities as to cause directly the loss of a substantial number of fish within the impoundment, if such person knows or has reason to know that such loss is likely to occur, without the written permission of the department. The provisions of this subdivision shall not apply, (a) to the federal government or any agency or subdivision thereof, (b) to any hydropower project licensed by the Federal Energy Regulatory Commission pursuant to the Federal Power Act (16 U.S.C. 791a et seq.), (c) in the event of an emergency, such as fire, flood, storm, drought, and the like, where the drawing off of such impounded water is required for public safety or public health, (d) to any artificial or man-made body of water lying wholly within the boundaries of privately owned or leased lands and operated as a farm pond, licensed farm fish pond, licensed fishing preserve water or licensed private trout or bass hatchery, or (e) to any city having a population of one million or more.

6. No person taking or assisting in the taking of fish in other than the marine and coastal district, as described in section 13-0103 of this chapter shall discard any fish carcass or parts thereof into the waters of this state or upon any public lands contiguous to and within one hundred feet of such waters or upon any private lands contiguous to and within one hundred feet of such waters unless such lands are owned by such person or unless such person enters or remains with the permission of the owner of record or his representative or agent. The provisions of this section shall not be deemed to prohibit: the return to the water of live fish or fish required to be returned to the water pursuant to section 11-1301 or 11-1303 of this chapter or rules and regulations

promulgated pursuant thereto; the use of fish or parts thereof as bait; the discarding of fish carcasses or parts thereof into waters not within one hundred feet of any shore; the proper disposal of fish carcasses or parts thereof into suitable garbage or refuse collection systems or by burial; or the incidental cleaning of fish for consumption except that no wastes resulting from such cleaning of fish may be disposed of in waters or lands contiguous to and within one hundred feet of any public boat launching sites or public docking facilities or on such sites or facilities except by proper disposal into suitable garbage or refuse collection systems or by burial.

7. Spears, spear guns and underwater guns shall not be possessed by any person on any body of water within the Adirondack park boundary nor within a distance of two hundred feet of the high water mark of any body of water within the Adirondack park boundary at any time when the use of spears in the taking of fish from such body of water within the Adirondack park boundary is not permitted by law or regulation of the department; except that nothing contained herein shall be construed to prevent the possession of spears in any dwelling or building within two hundred feet of the high water mark of such body of water.

8. Spears, spear guns, underwater guns, and snatch hooks shall not be possessed by any person on Lake George nor within a distance of two hundred feet of the high water mark of such lake, except in a dwelling or building, at any time when the use of such devices in the taking of fish in such lake is not permitted by law or regulation of the department.

9. Pacific salmon shall not be taken by hooking, snatching or snagging. Pacific salmon taken by hooking, snatching or snagging shall not be possessed, transported or otherwise trafficked in.

TITLE 15

COMMERCIAL INLAND FISHERIES

Section 11-1501. Application of title.

11-1503. Nets; license required; power of department.

- 11-1505. Open seasons, size and catch limits and manner of taking and possession of fish; regulations.
- 11-1519. Vessels to carry employees of department.
- 11-1521. Management of striped bass in the Hudson River.

§ 11-1501. Application of title.

1. This title 15 of the Fish and Wildlife Law and regulations adopted pursuant hereto do not apply to (a) the taking of fish by angling as permitted in title 13; (b) the taking of fish or the use of nets in the marine and coastal district as defined in section 13-0103, or in a trout or black bass hatchery operated under permit from the department as provided in section 11-1909, or in a farm fish pond licensed as provided in section 11-1911 or in a fishing preserve licensed as provided in section 11-1913; (c) the sale or taking for sale of bait fish named in section 11-1315.

2. This title 15 and regulations adopted pursuant hereto do not restrict the use of landing nets in completing the catch of fish taken by hook and line, or limit the provisions of section 11-1315 authorizing use of nets and traps for taking bait fish, or of regulations of the department authorizing use of eel weirs and eel pots. It does not limit the provisions of section 11-0517, or the terms of any permit or license issued by the department pursuant to any other provision of the Fish and Wildlife Law.

§ 11-1503. Nets; license required; power of department.

The department may regulate the use of nets and other devices commonly used to take fish. No person shall use a net or device to take fish without first obtaining a license to do so. Gill nets shall not be operated in Lake Erie. No gill net license for use in Lake Ontario, including Chaumont Bay and all its other embayments, shall be issued except to holders of a gill net license valid on or prior to December 31, 1986, and all licenses issued on or prior to that date are

non-transferable.

§ 11-1505. Open seasons, size and catch limits and manner of taking and possession of fish; regulations.

The department may fix by regulation the manner of taking fish with nets and other devices including but not limited to open seasons, size and catch limits and manner of possession and transportation.

§ 11-1519. Vessels to carry employees of department.

Any person operating a boat used in taking fish shall permit conservation officers or other employees of the department to board it and inspect its contents and shall carry such persons for the purpose of inspecting nets or taking fish eggs.

§ 11-1521. Management of striped bass in the Hudson River.

Notwithstanding any provision of law to the contrary:

1. Striped bass (*Morone saxatilis*) less than eighteen inches in total length may not be taken, possessed, bought, sold or offered for sale.

2. Striped bass shall not be taken in the Hudson River from the George Washington bridge north to the Federal dam at Troy from December 1 through March 15. Striped bass unintentionally taken in violation of this subdivision shall be returned to the water immediately without unnecessary injury.

3. Striped bass shall not be taken in the Hudson River from the George Washington bridge north to the Federal dam at Troy with seines, fykes, hoop nets or trawls.

4. From March 15 through June 15, gill nets with stretched mesh size

greater than 3 1/2 inches and less than 5 inches shall not be set in the Hudson River from the George Washington bridge north to the Federal dam at Troy nor possessed while on those waters.

5. In addition to the restrictions set forth in subdivision four hereof, from March 15 through June 15, no person shall set a gill net other than a drift gill net in the waters of the Hudson River lying between the Bear Mountain bridge and the Hamilton Fish Newburgh-Beacon bridge nor possess any gill net other than a drift gill net while on the shores or waters of that portion of the Hudson River. For the purposes of this subdivision a drift gill net is defined as a gill net that is not anchored or staked and is free to move with water currents. The department shall identify additional spawning areas and allocate fishing locations within these spawning areas.

6. Striped bass unintentionally taken in violation of subdivision one, three, four or five of this section shall be returned to the water at once without unnecessary injury, except that fish taken in gill nets need not be so returned to the water but shall not be bought, sold or trafficked in. For the purposes of this section "trafficked in" includes possession or transportation in any boat or vehicle other than the boat in which such striped bass were landed after being taken. Nothing in this subdivision shall be construed as permitting any person to possess striped bass of less than legal size.

7. On or before March 15, 1984 the department shall adopt rules and regulations limiting entry to the traditional commercial fishery for striped bass in the Hudson River. Such rules and regulations may include the establishment of a limit on the number of commercial striped bass licenses to be issued, the establishment of equipment restrictions necessary to maintain traditional fishing methods, the establishment of a striped bass harvest quota for allocation among licensees and the establishment of a Hudson River commercial fishing board whose members will be appointed by the commissioner and which will function to approve or deny applications for commercial striped bass licenses on the basis of rules promulgated by the department, to establish criteria for the allotment of individual licensee catch quotas and to allot the catch

quotas when the department establishes striped bass harvest limits for allocation among licensees. Such rules and regulations shall be publicly reviewed each year by the Hudson River Advisory Committee and revised as needed to insure maintenance of an economically viable, stable and traditional striped bass commercial fishery in the Hudson River and to provide proper protection for the Hudson River striped bass population.

8. No person shall sell or expose or offer for sale, trade or barter striped bass without first obtaining a commercial striped bass license. A commercial striped bass license is required only for initial sale, exposing or offering for sale, trade or barter and is not required for subsequent sales. The resident fee for such license shall be determined by the commissioner and shall not exceed one hundred dollars. Fees for licensing nets in the Hudson River as required by department rules and regulations shall be credited toward purchase of the commercial striped bass license. The nonresident fee for such license shall be two hundred dollars.

TITLE 17

IMPORTATION AND SALE OF FISH, WILDLIFE AND GAME FROM OUTSIDE THE STATE; SALE OF DOMESTIC AND FOREIGN GAME AND HATCHERY TROUT; BIRD PLUMAGE; TAXIDERMY

Section 11-1701. Application of sections 11-1703, 11-1705 and 11-1707.

11-1703. Importation, possession and sale of fish without license or permit; prohibitions.

11-1705. Importation, possession and sale of wildlife and game other than domestic and foreign game.

11-1707. Importation and possession of non-saleable fish, game and wildlife and saleable fish, game and wildlife imported during the closed season.

11-1709. Importation and transportation of certain fish or fish eggs.

11-1717. Foreign game.

11-1721. Identification of carcasses and parts thereof.

11-1723. Sale of game and trout; transportation within the state.

11-1725. Shipment by carriers.

11-1727. Hatchery trout and domestic or imported foreign game in sealed containers.

11-1728. Sale of live wild birds.

11-1733. Taxidermy.

§ 11-1701. Application of sections 11-1703, 11-1705 and 11-1707.

1. Sections 11-1703, 11-1705 and 11-1707 apply to fish, wildlife and game lawfully taken outside the state and lawfully transported from the place of taking, except trout raised in a private hatchery, domestic game as defined in section 11-0103, fish from a licensed fishing preserve and carcasses of foreign game as defined in section 11-1717.

2. Sections 11-1703, 11-1705, and 11-1707 do not limit the privileges of the holder of a license issued under section 11-0515 to import live fish and wildlife, or his privileges with respect to possession, transportation and sale, within the state.

3. Fish referred to by their common names are the fish so referred to and more specifically identified in an order adopted pursuant to section 11-1303 and in section 13-0339 of this chapter. The open seasons for fish are specified by order adopted pursuant to section 11-1305 of this article; those for game are specified in sections 11-0905, 11-0907 and 11-1103 of this article.

4. For the purposes of sections 11-1703, 11-1705 and 11-1707, there is an open season for a species (a) if it is a fish not protected by law or is unprotected wildlife, at any time, and (b) in any other case, at any time when there is an open season for taking it, anywhere in the state.

5. Sections 11-1705, 11-1711, 11-1721, 11-1723 and 11-1725 do not apply to the importation, possession, or sale of captive bred and raised North American elk (*Cervus elaphus*).

§ 11-1703. Importation, possession and sale of fish without license or permit; prohibitions.

1. Except as provided in subdivision 3 and subdivision 4; (a) all species of fish taken outside the state, except trout, black bass, muskellunge and landlocked salmon other than Atlantic salmon, may be imported and transported by any means and in any number, and may be possessed, bought and sold without permit or license, during the open season; (b) Atlantic salmon taken outside the state may be imported, transported, bought and sold at any time.

2. Except as provided in subdivision 3 and subdivision 4, any person may, during the closed season, without license or permit, and without limitation by section 11-1707, transport into the state, buy, possess, transport and sell, lake sturgeon, lake trout, whitefish, pickerel, pike, walleye and striped bass taken outside the state, provided he keeps a record and enters therein the name, residence and post office address of every person from whom he buys and every person to whom he sells or ships such fish. But this subdivision does not require that a record be kept of persons to whom such fish are sold for personal or home consumption, nor by persons who purchase in this state for consumption and not for resale. A person required by this subdivision to keep records shall permit the department or its agents to examine all books and papers relating to such purchase and sale at any time and shall on demand furnish invoices, freight or express receipts used in such transactions.

3. a. No person shall sell, offer for sale or expose for sale, under the name or designation of Lake Champlain fish, any fish other than fish that have been taken from the waters of Lake Champlain, its bays, coves or tributaries, the Missisquoi Bay or the Richelieu River. No person shall wilfully and with intent to deceive, affix, apply or annex, or use in connection with any fish, or any container of the same, any words or other symbols, tending falsely to identify the origin of the contents as the waters described in this paragraph.

b. No person shall possess or transport into the state any fish except

eels caught in that part of Missisquoi Bay in Lake Champlain lying in the Province of Quebec or in the Richelieu River.

4. Fish of the following species taken outside the state shall not be bought or sold or otherwise trafficked in if they are of less than the size limits specified in this subdivision or in the sections to which it refers:

a. striped bass, fluke or summer flounder, blue porgie, weakfish, mackerel, sea bass, king fish, cod fish, blackfish, winter flounder, all as specified in section 13-0339;

b. lake trout, pickerel, Atlantic sturgeon, Atlantic (landlocked) salmon, whitefish, northern pike, all as specified in regulations of the department.

5. Fish named in subdivision 4 of less than the size limits specified, may be imported, transported and possessed as provided in section 11-1707.

6. No person shall import, export, own, possess, acquire or dispose of live piranha fish (*Serrasalmus*, *Rooseveltiella* or *Pyrocentrus*), grass carp (*Ctenopharyngodon idella*) or hybrid grass carp within the state without a license or permit issued at the discretion of the department for scientific, biological or exhibition purposes.

7. Fish, except those specified in subdivision 6 of this section, may be imported and transported at any time, for propagation purposes, and the provisions of section 11-1707 do not apply.

§ 11-1705. Importation, possession and sale of wildlife and game other than domestic and foreign game.

1. Frogs taken outside the state may be imported and transported by any means and in any number, possessed, bought and sold during the open season. During the closed season any person may transport into the

state, without license or permit, and may possess, transport, buy and sell frogs, if he keeps a record with respect thereto, as provided in section 11-1703, subdivision 2 with respect to fish.

2. The carcasses of varying hares and cottontail rabbits may be imported from outside the state and possessed, transported, bought and sold at any time without license or permit.

3. Game for propagation purposes and the plumage or skin of game birds may be imported and transported at any time, without license or permit. Such plumage or skin shall not be sold or offered for sale or possessed for sale except as permitted by section 11-1729 or 11-1731.

4. Deer of all species, except white-tail deer, may be imported, possessed, transported, bought and sold alive at any time, without license or permit. Wild white-tail deer shall not be imported.

5. Skunk, bobcat, mink, muskrat, fisher, beaver, otter, marten or sable may be imported alive at any time without license or permit, and may be bought and sold, possessed and transported alive, by any means, during their respective open seasons. During the closed season such animals shall not be possessed or transported alive without permit or license from the department.

6. The head, skin or hide, fur and feet of game and wildlife, except birds, may be imported and transported, by any means, without license or permit, at any time, and may be bought and sold at any time.

7. The flesh of game and wildlife, except birds, black, grey or fox squirrels, lynx, bear, deer, moose, elk, caribou and antelope may be imported and transported by any means during the open season, without permit or license, and may be imported during the closed season, as provided in section 11-1707, and may be bought and sold at any time.

8. The flesh of bear, deer, moose, elk, caribou, and antelope may be imported, transported and possessed as provided in section 11-1707. The flesh of such game, except bear and white-tail deer, may also be

imported, transported and possessed pursuant to permit under section 11-1711, and if so imported, may be bought and sold when tagged as provided in section 11-1721, but if so imported shall not be possessed or transported unless so tagged.

9. Flesh of bear may be imported, transported, possessed, bought and sold for food purposes as provided in section 11-1713, under permit as provided in that section and when tagged as provided in section 11-1721.

10. The dead bodies of birds belonging to all species or subspecies native to this state, defined in subdivision 5 of section 11-0103, as protected birds, or belonging to any family, any species or subspecies of which is native to this state and is so defined, shall not be sold, offered for sale or possessed for sale for food purposes within this state. They may be imported, transported and possessed, except for sale, as provided in section 11-1707.

§ 11-1707. Importation and possession of non-saleable fish, game and wildlife and saleable fish, game and wildlife imported during the closed season.

1. a. Carcasses or parts thereof, of trout, black bass, muskellunge and landlocked salmon, other than Atlantic salmon, and fish, the sale of which is prohibited by subdivision 4 of section 11-1703, and of wildlife (other than migratory game birds), sale of which without license or permit is not authorized by section 11-1705, may be imported during the open season as provided in subdivision 2, and may be imported during the closed season as provided in subdivision 3 or subdivision 4.

b. Carcasses and parts thereof, of other fish and wildlife, may be imported during the closed season as provided in subdivisions 3 or 4.

c. Importation of migratory game birds is governed by regulation of the department pursuant to section 11-0307.

2. During the open season, carcasses described in paragraph a of

subdivision 1 may be transported by the taker from without to within the state, without permit or license, in any manner except by parcel post, provided that if they are shipped by carrier, they or the parcel containing them shall have attached a card or label showing the name and address of the taker, the name and address of the consignee, and if the shipment is a package, the nature of its contents.

3. During the closed season, the taker may transport carcasses or parts thereof of any fish or wildlife (other than migratory game birds), from without to within the state, provided he accompanies them and has with him a license issued by the department permitting such transportation; or he may ship such carcasses or parts thereof by carrier except parcel post if he has obtained a license issued by the department permitting such transportation and if the carcasses or the package containing them has attached thereto a card or label showing the name and address of the taker, the name and address of the consignee, and if the shipment is a package, the nature of its contents; or he may import into the state and transport therein carcasses and parts of lawfully taken big game animals without such license, provided he accompanies them and the carcasses and parts are tagged and identified in accordance with the laws of the jurisdiction where the big game animal was taken.

4. From September 1 to February 10 any resident of the state may cause to be transported, from without to within the state, in any manner except parcel post, (a) carcasses of fish and wildlife described in paragraph a of subdivision 1, or (b) carcasses of other fish and wildlife (other than migratory game birds) for which there is no open season at the time of such transportation, if he first obtains a license from the department permitting such transportation, and if the shipment has attached a tag showing the name and address of the shipper, and the name and address of the licensee and the number of his license permitting such transportation. The department may refuse to issue such license to any person for any reason it deems sufficient.

5. Carcasses of fish and wildlife imported as provided in subdivision 2 or subdivision 3 may be possessed and transported within the state at

any time. Carcasses of fish and wildlife imported pursuant to subdivision 4 may be possessed by the licensee and transported by him within the state during the term of the license and for thirty days immediately following.

§ 11-1709. Importation and transportation of certain fish or fish eggs.

Notwithstanding any other provision of the Fish and Wildlife Law the department may establish by order regulations governing the importation from without the state or transportation within the state of any live fish or viable eggs of any species of the family Salmonidae (trout, salmon, whitefish and grayling).

§ 11-1717. Foreign game.

1. Foreign game means pheasants of all species, Scotch grouse, Norwegian ptarmigan, Norwegian white grouse, European black game, European black plover, European gray-legged partridge, European red-legged partridge, Egyptian quail, tinamou and species or subspecies of birds not native to this state, and European red deer, fallow deer and roebuck.

2. The carcasses, or parts thereof, of foreign game imported from outside the United States may be bought and sold.

§ 11-1721. Identification of carcasses and parts thereof.

1. The provisions of this section apply to carcasses and parts thereof of

a. domestic game killed on the premises of the holder of a domestic game bird breeder's license pursuant to section 11-1901 of this article, domestic game animal breeder's license pursuant to section 11-1905 of this article or shooting preserve license pursuant to section 11-1903 of

this article;

b. bear possessed under license pursuant to section 11-0515 of this article or outside the state under a license similar in principle and killed for food purposes;

c. trout, black bass, lake trout, landlocked salmon, muskellunge, pike, pickerel and walleye taken from fishing preserve waters licensed pursuant to section 11-1913 of this article.

2. All such carcasses and parts shall be identified with a form provided by the department.

3. Carcasses and parts shall not be possessed unless accompanied by a form provided by the department as required by this section.

§ 11-1723. Sale of game and trout; transportation within the state.

1. a. Except as provided in paragraph b, game and trout required by section 11-1721 of this title to be identified, may be possessed, bought and sold, and subject to section 11-1725 of this title may be transported within and from within to without the state by any means.

b. No domestic duck, goose, brant or swan killed by shooting shall be bought or sold unless marked in accordance with requirements set forth in rules and regulations established by the department of the interior pursuant to 50 C.F.R. 21 as may be amended from time to time. Such information shall be provided by department press release and any other means that the department determines to be appropriate and effective, including posting on the department's public website.

2. No person shall sell or offer for sale any such game or trout unless it is so identified.

§ 11-1725. Shipment by carriers.

1. Carriers may receive, and may transport, within and from within to without the state, carcasses and parts thereof of game, described in subdivision 1 of section 11-1721 and identified as provided in that section, when they are also labeled as provided in this section.

2. a. When received in this state by a carrier, or transported within or from within to without the state by a carrier, every shipment of game required by section 11-1721 to be identified, shall also have attached a card or label with the following data plainly printed or written thereon: names and addresses of consignor and consignee, number and kind of carcasses or parts thereof.

b. If the consignor is the person who holds the game breeder's license or shooting preserve license by authority of which such game (other than imported foreign game) is saleable, or if the game is imported foreign game shipped by a licensed game dealer, the card or label shall also state the name and address of the holder of such license, and the number of the license.

3. No carrier or employee thereof shall, while engaged in such business, transport as owner any fish or game not lawfully saleable. No carrier or employee thereof shall knowingly receive or possess any fish or game, whether packed or unpacked, for shipment for any person, unless (a) if it is game or trout described in section 11-1721 of this title, it is identified as required by that section, and (b) in any case, it bears the tag, card, identification or label required by this section or by sections 11-0911, 11-0917, 11-1319 or 11-1913 of this article.

§ 11-1727. Hatchery trout and domestic or imported foreign game in sealed containers.

Trout raised in a private hatchery under permit from the department or outside the state under certificate pursuant to section 11-1715, and carcasses or parts thereof of processed imported foreign game and domestic game, packed within or without the state in sealed containers,

may be imported, transported, exported, bought and sold at any time. No person in this state shall possess, transport, import, export, buy or sell any such trout, imported game or domestic game in a sealed container unless such container shall bear a label describing the contents and the name of the person by whom processed.

§ 11-1728. Sale of live wild birds.

Except as permitted by rule and regulation of the department, no person shall sell live wild birds, as defined in paragraph b of subdivision six of section 11-0103 of this chapter, unless such birds were born and raised in captivity.

§ 11-1733. Taxidermy.

Persons engaged for hire in the business of preparing, stuffing or mounting of skins of fish or wildlife shall keep in their place of business a true and complete record, in such form as is required by the commissioner showing the name or description of every specimen received, the date of receipt and the name and address of the person from whom received. In addition, such persons shall also record all bear gallbladders and bile received along with information from the valid bear tag required in paragraph b of subdivision nine of section 11-0917 of this article. In the event that such person sells or barter any gallbladder or bile the record shall also include the name and address of the person or persons to whom such items were sold or bartered. Such information shall be reported to the department annually and retained for at least five years. Conservation officers and other persons authorized by the department shall have access to the register at all times.

TITLE 19

**PROPAGATION; SHOOTING PRESERVES; FARM FISH PONDS;
FISHING PRESERVES**

Section 11-1901. Breeding of domestic game birds.
11-1903. Shooting preserves.
11-1904. Canned shoots prohibited.
11-1905. Breeding of domestic game animals.
11-1906. On-line shoots prohibited.
11-1907. Propagation of fur-bearing animals.
11-1909. Private trout and black bass hatcheries.
11-1911. Farm fish ponds.
11-1913. Fishing preserves.

§ 11-1901. Breeding of domestic game birds.

1. The department may, in its discretion, issue to an owner or lessee of wholly enclosed lands, or an entire island, a domestic game bird breeder's license permitting him to possess and propagate such species of domestic game birds as, in its opinion, he has facilities for propagating on the licensed premises. The license shall expire on March 31 every fifth year. The department shall prescribe and furnish forms for application for such license. Applicants shall pay to the department, and the department shall be entitled to receive, fees according to the type of license so issued as follows:

a. Class A license, two hundred dollars. This license shall allow the holder thereof to purchase, possess, propagate, transport and sell domestic game birds, dead or alive, and their eggs.

b. Class B license, forty dollars. This license shall allow the holder thereof to purchase, possess and propagate domestic game birds for his own use. Birds may be killed for food or released to the wild for restocking. No live birds or their eggs or carcasses may be sold, exchanged or given away.

2. The department may revoke the license of any licensee convicted of a violation of this section, and no license shall be issued to him for the ensuing two years. The licensee, unless he shall waive such right, shall have an opportunity to be heard. Notice of hearing shall be given

by mailing the same in writing to the licensee at the address contained in his license. Attendance of witnesses may be compelled by subpoena. Revocation shall be deemed an administrative act reviewable by the supreme court as such.

3. Only domestic game birds legally propagated or acquired shall be possessed under these licenses.

4. On the licensed premises the licensee may kill domestic game birds at any time in any manner except by shooting. Nothing in this section shall be construed to prohibit the shooting of domestic game birds liberated on the licensed premises if such shooting is done during the open season for such species or pursuant to a license under section 11-1903.

5. Each such domestic duck, goose, brant and swan shall be marked in accordance with requirements set forth in rules and regulations established by the department of the interior pursuant to 50 C.F.R. 21 as may be amended from time to time. Such information shall be provided by department press release and any other means that the department determines to be appropriate and effective, including posting on the department's public website. Birds so marked, which have escaped, may be recaptured by the licensee. Escaped birds may be recaptured only on the premises of the licensee.

6. The holder of a domestic game bird breeder's license shall keep records and make reports as required by and upon forms furnished by the department. The reports shall be subscribed by the licensee, and shall contain an affirmation that the statements therein are made subject to the penalties of perjury. The records shall be continuous and current and shall be kept on the licensed premises, and the licensee shall allow any representative of the department to enter upon the premises to inspect his operations and records. Records must be retained for a period of three years.

7. On the licensed premises the licensee may take any unprotected wild bird, or any predatory wildlife except, protected birds, disturbing

domestic game. Such birds or wildlife may be taken at any time and in any manner, except that no trap of the leg-gripping type, having teeth in the jaws or having a greater spread of jaws than six inches, shall be used for such purpose, nor shall a trap be set so that any wildlife when caught shall be suspended. Carcasses of such birds or wildlife shall be immediately buried or cremated, except that carcasses of unprotected wildlife, and of protected wildlife other than birds if taken during their respective open seasons, may be possessed, transported, bought and sold to the extent permitted by section 11-0917.

8. Domestic game bird carcasses and parts shall be identified as required by section 11-1721 of this article.

§ 11-1903. Shooting preserves.

1. The department may, in its discretion, issue to an owner or lessee of wholly enclosed lands or an entire island a shooting preserve license permitting him or her to purchase, possess, rear and transport, and to release and take by shooting therein, domestic game birds legally possessed or acquired. No birds may be held for propagation after April 15 unless the owner or lessee also has a domestic game bird breeder's license as provided for in section 11-1901 of this title. In the case of leased lands, the applicant shall furnish with his or her application evidence of a written lease executed by each lessor covering the premises to be licensed. The license shall expire on April 15 every fifth year. The department shall prescribe and furnish forms for application for such license. Applicants shall pay, and the department shall be entitled to receive, fees according to the type of license issued as follows:

a. Class A license, two hundred dollars. This license shall allow the holder thereof to operate a commercial club or membership shooting preserve with a minimum of one hundred acres and charge a daily fee for hunting or charge a fee for each bird killed or a combination thereof. Birds may be killed by the licensee for his or her own use and may be sold dead or alive.

b. Class B license, sixty dollars. This license shall allow the holder thereof to operate a shooting preserve with use restricted to the licensee, his or her family and invitees, provided no fees are charged for the privilege of hunting or for birds shot. Birds may be killed by the licensee for his or her own use but no live birds, or their eggs, or carcasses may be sold unless the licensee holds a Class A game bird breeder's license.

3. The department may revoke the license of any licensee convicted of a violation of this section, and no license shall be issued to him or her for the ensuing two years. The licensee, unless he or she shall waive such right, shall have an opportunity to be heard. Notice of hearing shall be given by mailing the same in writing to the licensee at the address contained in his or her license. Attendance of witnesses may be compelled by subpoena. Revocation shall be deemed an administrative act reviewable by the supreme court as such.

5. The boundaries of a shooting preserve shall be posted with appropriate signs in accordance with section 11-2111.

7. Domestic game birds may not be killed, by shooting, on the premises specified in the application for the license, except under the following conditions:

a. Birds shall be marked as provided in subdivision 5 of section 11-1901 of this title. Birds so marked, which have escaped, may be recaptured by the licensee. Escaped birds may be recaptured only on the premises of the licensee.

b. Ducks, geese, brant and swans liberated under this section may be taken only under rules and regulations made by the department or adopted by the federal department of the interior; provided, however, that any federal regulations shall be provided by department press release and any other means that the department determines to be appropriate and effective, including posting on the department's public website.

c. On the premises described in the application for the license, the licensee may kill domestic game birds by shooting from September 1 through April 15 and in any manner, other than by shooting, at any time, or any person may take domestic game birds by shooting from September 1 through April 15 with the consent of the licensee.

8. The holder of a shooting preserve license shall keep records and make reports as required by and upon forms furnished by the department. The reports shall be subscribed by the licensee, and shall contain an affirmation that the statements therein are made subject to the penalties of perjury. The records shall be continuous and current and shall be kept on the licensed premises, and the licensee shall allow any representative of the department to enter upon the premises to inspect his operations and records. Records must be retained for a period of three years.

9. On the premises described in the application for the license, the licensee may take any unprotected wild birds, or any predatory wildlife except protected birds, disturbing domestic game. Such birds or wildlife may be taken at any time and in any manner, except that no trap of the leg-gripping type, having teeth in the jaws or having a greater spread of jaws than six inches, shall be used for such purpose, nor shall a trap be set so that any wildlife when caught shall be suspended. Carcasses of such birds or wildlife shall be immediately buried or cremated, except that carcasses of unprotected wildlife, and of protected wildlife other than birds if taken during their respective open seasons, may be possessed, transported, bought and sold to the extent permitted by section 11-0917.

10. a. Carcasses and parts of domestic game birds shall be accompanied by a form provided by the department pursuant to section 11-1721 of this article. No domestic game birds so killed shall be possessed or transported without such form. Only an authorized person as provided in the rules and regulations of the department shall have in his or her possession such form.

b. Domestic game bird carcasses and parts shall be identified as

required by section 11-1721 of this article.

11. Notwithstanding any provision in this section to the contrary, any person may conduct a field trial on the grounds of a shooting preserve at any time under the provisions of section 11-0927.

§ 11-1904. Canned shoots prohibited.

1. No person who owns, operates or manages a facility that harbors non-native big game mammals shall knowingly permit:

a. The taking on such premises by any person who pays a fee to take a live non-native big game mammal by any of the following means:

(1) the shooting or spearing of a non-native big game mammal that is tied or hobbled;

(2) the shooting or spearing of a non-native big game mammal that is staked or attached to any object;

(3) the shooting or spearing of a non-native big game mammal that is confined in a box, pen, cage or similar container of ten or less contiguous acres from which there is no means for such mammal to escape;

(4) the deliberate release of a non-native big game mammal that is confined in a box, pen, cage or similar container of ten or less contiguous acres in the presence of any person who is, or will be, shooting or spearing such non-native big game mammal.

b. For purposes of this section:

(1) shooting shall mean the discharge of any type of firearm or bow and arrow; and

(2) spearing shall mean the use of any hand or mechanically propelled single or multiple pronged pike, blade, or harpoon.

2. Nothing contained in this section shall be deemed to prohibit:

a. The lawful taking, hunting or trapping of an animal as provided in this chapter or other law, rule or regulation of the state of New York; or

b. The lawful slaughtering of an animal as provided in the agriculture and markets law of New York state or as permitted by the United States Department of Agriculture; or

c. The killing of an animal that is menacing in a manner likely to cause serious injury or death to human beings.

§ 11-1905. Breeding of domestic game animals.

1. The department may, in its discretion, issue to an owner or lessee of wholly enclosed lands or an entire island a domestic game animal breeder's license permitting him to possess and propagate domestic game animals provided such animals are confined and cared for according to specifications and regulations which the department, by order, shall adopt. The license shall expire on March 31 every fifth year. The department shall prescribe and furnish forms for application for such license. Applicants shall pay, and the department shall be entitled to receive, fees in accordance with the type of license issued.

a. Class A license, two hundred dollars. This license shall allow the holder thereof to purchase, possess, propagate, transport and sell domestic game animals dead or alive.

b. Class B license, forty dollars. This license shall allow the holder thereof to purchase, possess and propagate domestic game animals for his own use. No animals may be sold, exchanged or given away except that portions of the carcass may be given away provided they are packaged and the package bears the name and license number of the licensee.

2. The department may revoke the license of any licensee convicted of a violation of this section, and no license shall be issued to him for the ensuing two years.

3. Only domestic game animals legally propagated or acquired shall be possessed under these licenses.

4. On the premises described in the application for the license, the licensee may kill domestic game animals at any time and in any manner and, with the consent of the licensee, any person may take domestic game animals by shooting at any time.

5. The holder of a domestic game animal breeder's license shall keep records and make reports as required by and upon forms furnished by the department. The reports shall be subscribed by the licensee, and shall contain an affirmation that the statements therein are made subject to the penalties of perjury. The records shall be continuous and shall be kept on the licensed premises, and the licensee shall allow any representative of the department to enter the premises to inspect his operations and records. Records must be retained for a period of three years.

6. Domestic game animal carcasses and parts shall be identified as required by section 11-1721 of this article.

§ 11-1906. On-line shoots prohibited.

1. No person, firm, corporation, partnership, limited liability company, association or other business entity shall:

a. own or operate a shooting range or gallery located in this state for purposes of the on-line shooting or spearing of targets or animals; or

b. create, maintain or utilize a website via the internet, or a service or business via any other means, from any location within this state for purposes of the on-line shooting or spearing of targets or animals.

2. For purposes of this section:

a. "on-line shooting or spearing" shall mean the firing of a hunting

instrument from a remote location by using a computer, a website via the internet or a service or business via any other means, and any combination of cameras, viewers and sites, or any other devices or controls, to operate such hunting instrument, regardless of whether such operation is live-action, in real-time or delayed;

b. "hunting instrument" shall mean any type of firearm, bow and arrow or mechanically propelled single or multiple pronged pike, blade, or harpoon;

c. "shooting" shall mean the discharge of any type of firearm or bow and arrow;

d. "spearing" shall mean the use of any mechanically propelled single or multiple pronged pike, blade, or harpoon; and

e. "shooting range or gallery" shall mean any place equipped with targets, animals or both, where a hunting instrument is fired.

§ 11-1907. Propagation of fur-bearing animals.

1. Beaver, bobcat, coyote, raccoon, sable or marten, skunk, otter, fisher, nutria and muskrat may be propagated, or kept alive in captivity, provided a license shall first be obtained from the department. The fee for the license shall be twenty-five dollars and the license shall be in force during the calendar year in which it was issued. The license is not transferable.

2. Animals propagated or kept alive in captivity pursuant to such license may be disposed of alive for propagation, exhibition, scientific, or educational purposes or they may be killed and pelted at any time, in any manner. Carcasses and pelts of such animals may be possessed, transported, bought or sold at any time.

3. On or after April first, two thousand twelve, the department shall not issue any new licenses pursuant to this section.

§ 11-1909. Private trout and black bass hatcheries.

1. The department in its discretion may issue to any person a hatchery permit, valid during the calendar year of issue, to propagate, raise and sell trout. The department shall establish by order regulations governing the identification of trout raised under such a permit which are offered for sale, sold or transported.

2. The department in its discretion may issue to any person a hatchery permit, valid during the calendar year of issue, to propagate, raise and sell black bass. The department shall establish by order, regulations governing the transportation of black bass raised under such a permit.

§ 11-1911. Farm fish ponds.

1. "Farm fish pond" means a body of water, impounded by a dam, of not more than ten acres of water surface when full, lying wholly within the boundaries of privately owned or leased lands. It does not include any pond used in connection with any private camp, boarding house, hotel or other establishment catering to the public.

2. The department may issue to the owner or lessee of a farm fish pond a license, effective for a period of five years, entitling the holder to manage such fish pond for the production of fish. The department shall fix the terms of each such license and may include therein (a) permission to control undesirable fish, aquatic vegetation and insect life, interfering with the production of fish and (b) permission, notwithstanding any other provisions of this chapter to the contrary, to release, stock and propagate fish in the licensed pond. The department may specify in the license methods of control to be used and the manner of taking and type, size and mesh of gear to be used in taking fish. The department may, for cause, revoke or suspend any license issued pursuant to this section.

3. No person shall release any species of fish into a farm fish pond unless permission to do so is first obtained from the department.

4. A licensee, any member of his immediate family, and any person actually employed by him in the cultivation of his farm or the management of the licensed pond may without license issued under title 7 of the Fish and Wildlife Law, take fish of any size, in any number, at any time, in any manner permitted by the department.

5. The holder of any type of fishing license, or a person entitled to exercise the privileges of such a license, may, with the permission of the licensee, take fish by angling from the licensed pond provided the holder complies with the provisions of title 13 of the Fish and Wildlife Law, with respect to open seasons, minimum size limits and daily and seasonal possession limits.

6. a. Fish protected by law, except trout, black bass, muskellunge and landlocked salmon, legally taken from a licensed farm fish pond, may be bought and sold during their respective open seasons, and may be possessed and transported at any time. Trout, black bass, muskellunge and landlocked salmon, legally taken from a licensed farm fish pond may be possessed and transported during their respective open seasons and until March 1 immediately following, but unless such fish were taken by a person described in subdivision 4 or are frozen or otherwise processed and packaged for storage and are being transported to a place of storage or consumption, no person shall transport in any one day a quantity of such fish exceeding the quantity which may be legally taken from that farm fish pond by a person described in subdivision 5.

b. Fish protected by law shall not be removed from the premises of the licensee unless such fish or the package containing them bears the name and address of the licensee and his license number and the name and address of the person in whose possession they are.

c. Fish not protected by law, legally taken from a licensed farm fish pond, may be possessed, transported, bought and sold at any time, except that taking and sale of bait fish shall be permitted only under license

pursuant to section 11-1315.

§ 11-1913. Fishing preserves.

1. "Fishing preserve waters" means any artificial or man-made body of water, without limitation of size, lying wholly within the boundaries of privately owned lands, operated for the purpose of permitting the owner to provide fishing facilities to fishermen. Such waters shall not include natural streams, natural ponds or waters impounded by the damming of natural streams. The sources of water for such ponds shall be limited to surface run-off, natural springs or waters diverted from a natural stream.

2. a. The department may, in its discretion, after application on forms furnished by it, issue to an owner of such fishing preserve waters a fishing preserve license permitting the holder thereof to manage such fishing preserve waters and to possess, propagate and rear, and to take or permit others to take therefrom, fish therein legally propagated or acquired. Such license shall expire on the last day of December in the year in which it is issued unless previously revoked. A separate license is required for each body of water defined in subdivision 1 as fishing preserve waters. Two or more ponds under one ownership, supplied by one common water source and located on one continuous parcel of land, shall be considered as one body of water requiring one license.

b. The license so issued, shall:

(1) contain the name of the town and county in which such fishing preserve waters are located;

(2) specify the species of fish authorized to be stocked therein;

(3) authorize the licensee to stock, propagate, raise and release such fish in such licensed fishing preserve waters and to buy, sell or otherwise traffic in fish taken therefrom;

(4) specify the manner of identification of fish taken from the licensed waters, and

(5) specify the means of acquisition of fish stocked therein.

c. The license may also:

(1) authorize the licensee to control undesirable protected fish, wildlife and insects and specify means of control of the same.

(2) specify such other restrictions and controls for the management of the fishing preserve waters as in the judgment of the department may be deemed advisable for proper fish management.

d. The fee for the license shall be fifty dollars, payable at the time application is made.

e. The department may for cause revoke or suspend the license of any licensee.

3. Lands containing fishing preserve waters so licensed shall be posted with appropriate signs in accordance with section 11-2111.

4. A licensee or any member of his immediate family may without license issued under title 7 of the Fish and Wildlife Law, or license to take fish by net or device, take fish of any size, in any number, at any time and in any manner permitted by the license.

5. a. Any licensee, during the term of his license may sell fish taken from the licensed fishing preserve waters and may grant permission to other persons to take fish in or from the licensed fishing preserve waters and charge a fee for such fishing or for the fish taken, or, if the licensee is a club, it may impose dues permitting such angling by members of such club.

b. Persons to whom such permission to fish is granted or who have paid for the privilege of fishing in the licensed waters or dues paying members of a club which is a licensee may fish in such waters without license issued under title 7 of the Fish and Wildlife Law, or other license.

c. The licensee may prescribe such restrictions or limitations as he sees fit with respect to the size of fish, limits of catch, open season and manner of taking fish from the licensed waters. Except as

specifically noted in the license, the provisions of title 13 or title 15 of the Fish and Wildlife Law shall not be applicable to fishing in such licensed fishing preserve waters.

6. a. All trout, black bass, lake trout, landlocked salmon, muskellunge, pike, pickerel and walleye taken from the licensed fishing preserve waters, shall be immediately identified on forms provided by the department as prescribed in the license or by order of the department.

b. The identification form shall accompany the fish until the same is finally prepared for consumption.

c. No fish, required to be identified as specified in paragraph a of this subdivision, taken pursuant to this section shall be possessed off the premises of the fishing preserve without such identification form, and no person shall sell such fish without such identification form.

d. Fish taken from such fishing preserves and identified as provided in this subdivision, may be possessed, bought, sold and offered for sale, and transported without restriction. Fish raised or possessed under license issued under this section may be sold at any time for scientific, exhibition, propagation or stocking purposes.

7. The holder of a fishing preserve license shall keep such records as the department may require and make annual reports to and upon forms furnished by the department. The records shall be continuous and shall be kept on the licensed premises, and the licensee shall allow any representative of the department to enter upon the premises and inspect his operations and records.

8. Farm fish ponds, previously licensed pursuant to section 11-1911, may be licensed as fishing preserves, provided that the waters so sought to be licensed under this section meet the requirements of subdivision 1 hereof, and provided further that such waters have not been stocked by the department during the five year period immediately preceding the application for fishing preserve license.

9. The department may, by special permit or authorization contained in the license, authorize the licensee to use fish toxins in the management of the licensed waters, but unless so specifically authorized by permit or license no toxins or poisons may be introduced into the licensed waters.

10. Nothing in this section shall abridge, alter or affect the rights or liabilities, riparian or otherwise, that would otherwise exist or accrue by reason of the impounding of the water, except that fishing preserve waters are waters of the state within the meaning of section 11-0503 of the Fish and Wildlife Law and article 17 of this chapter.

11. The department may, by order made pursuant to section 11-2301, make such rules and regulations with respect to the management and operation of fishing preserves, not inconsistent with the provisions of this section, as it shall deem necessary and proper to carry into effect the provisions of this section.

TITLE 20

NEW YORK STATE BIRD CONSERVATION AREA PROGRAM

Section 11-2001. New York state bird conservation area program.

11-2003. Advisory committee.

§ 11-2001. New York state bird conservation area program.

1. There shall be created a New York state bird conservation area program which shall consist of such state-owned waters, lands, or portions thereof as are necessary to safeguard and enhance populations of wild birds native to New York state and the habitats therein that birds are dependent upon for breeding, migration, shelter, and sustenance.

2. Any property designated shall be described and depicted upon a map and a copy of any and all such documents shall be forwarded to the

commissioner for inventory, research, and reference purposes for the general public. A master inventory list and maps of properties that are designated as part of the New York state bird conservation area program shall be kept on file by the commissioner who shall also deposit a copy of such at the New York state museum and science service, and at the Cornell Laboratory of Ornithology.

3. For purposes of this title the term "important bird area" shall mean a site providing habitat to one or more species of breeding or non-breeding birds bounded by natural or anthropogenic features or boundaries. To be eligible for designation under this section a site must be an important bird area. Any site that meets or matches one or more of the following criteria in this subdivision shall be eligible for designation as part of the New York state bird conservation area program because it is an important bird area.

a. Waterfowl concentration site: a location that regularly supports at least two thousand birds such as loons, grebes, cormorants, geese, ducks, coots, and moorhens.

b. Pelagic seabird site: a location that regularly supports at least one hundred birds of open water such as shearwaters, storm-petrels, terns, fulmars, gannets, jaegers, alcids, and other like birds and/or ten thousand gulls at one time during some part of the year so long as the primary food source for such birds is not anthropogenic.

c. Shorebird concentration site: a location that supports at least three hundred birds such as plovers, sandpipers, and other like birds during some part of the year.

d. Wading bird concentration site: a location that supports at least one hundred birds such as bitterns, herons, egrets, ibises, and other like birds during some part of the year.

e. Migratory concentration site: a location that is a flight corridor rest stopover site for an exceptional number or diversity of migratory songbirds during either spring or fall seasons.

f. Diverse species concentration site: a location that supports a distinctive group of indigenous bird species that is the consequence of local habitats that are resultant of unique vegetational, geological, geographical, topographical, or microclimatological circumstances.

g. Individual species concentration site: a location that supports at least one bird species during one or more seasons of the year as a regionally unique, dense (for the species) population.

h. Species at risk site: (1) a location that supports a significant population of a species that is listed either federally or by New York state as endangered, threatened, or of special concern, or (2) which supports a species that is verified by either the commissioner or the state ornithologist as being rare or declining within New York state, or (3) an exceptional, rare, or remnant native habitat, vegetative community, or landscape segment that supports one or more significant habitat dependent populations of wild bird species.

i. Bird research site: a location where a wild bird population research and/or monitoring project of at least five consecutive years duration is conducted and contributes to the science of ornithology and/or bird conservation policy through publicly accessible scholarly and/or scientific publications.

4. Designation may be accomplished by the head of any state agency or entity having jurisdiction over state lands or waters for such appropriate properties as may exist within their respective jurisdictions and consistent with their respective missions.

5. A designating state agency or entity shall publish notice concerning the designation of a New York state bird conservation area in the environmental notice bulletin prior to such designation. Such notice shall provide for a thirty day public comment period following publication of the notice.

6. The head of any state agency or entity having jurisdiction over

state lands or waters previously designated as New York state bird conservation areas may seek to remove all or a portion of such lands or waters from such designation provided, however, that prior to such removal the commissioner publishes a finding that the designated area or portion of such area no longer meets the criteria in subdivision three of this section. Such finding shall be published in the environmental notice bulletin and shall provide for a thirty day public comment period following publication of the notice.

* 7. a. The Montauk Point shoals area of the county of Suffolk, having met the criteria of subdivision three of this section, is hereby declared to be an important bird area and the commissioner shall designate such area as part of the New York state bird conservation area program.

b. For the purposes of this title, "Montauk Point shoals area" means those marine and coastal areas off the shore of Montauk Point, in the county of Suffolk, extending to the coastal waters within a sixty foot bathymetric contour that encompasses the area beginning just west of Shagwong Point on the northern shore of Montauk Point, continuing east around Montauk Point, and terminating just east of Ditch Plains on the Atlantic Ocean side of Montauk Point. Such area consisting of waters that are sixty or less feet in depth, and within between three and one-half to four miles from the shoreline. Provided, that the commissioner shall be authorized to change the boundaries of such area, by rule, as he or she shall deem necessary.

c. That portion of the New York state bird conservation area program designated pursuant to this subdivision shall be known as the "Montauk Point shoals bird conservation area".

d. Nothing in this section shall be deemed to impose new fishing restrictions.

* NB Effective October 8, 2024

§ 11-2003. Advisory committee.

There shall be created within the department a New York state bird conservation area program advisory committee whose non-governmental members shall serve without pay, meet not less than twice each year, and whose sole purpose shall be to advise as to the designation, management, educational research and utilization of those sites that are individually designated as part of and collectively comprise the New York state bird conservation area program. Provided, however, the utilization of such sites shall be consistent with the mission of the state agency or entity designating a New York state bird conservation area pursuant to section 11-2001 of this title. In addition to representatives of the department, the advisory committee shall consist of, but not be limited to one representative each from the department of state, the Conservation Fund Advisory Board, the Conservation Council, the office of parks, recreation and historic preservation, the state museum, Cornell Laboratory of Ornithology, the Nature Conservancy, the National Audubon Society, Ducks Unlimited, the New York State Biodiversity Research Institute, and the Federation of New York State Bird Clubs. The commissioner may appoint additional members as appropriate, who shall serve at his pleasure.

TITLE 20-A

MARINE MAMMAL AND SEA TURTLE PROTECTION AREA

Section 11-2050. Establishment of the marine mammal and sea turtle protection area.

§ 11-2050. Establishment of the marine mammal and sea turtle protection area.

1. There shall be created the marine mammal and sea turtle protection area consisting of the waters in the area from mean high water seaward fifteen hundred feet, except further seaward in shallow areas to the outermost limit of waters fifteen feet in depth, around Plum Island, Great Gull Island and Little Gull Island. Such protection area may also be designated as a New York state bird conservation area pursuant to section 11-2001 of this article.

2. For purposes of this title the marine mammal and sea turtle protection area shall mean:

- (a) a site providing habitat to species including:
 - (i) harbor seals (*Phoca vitulina*);
 - (ii) harbor porpoises (*Phocoena phocoena*);
 - (iii) gray seals (*Halichoerus grypus*); and
 - (iv) sea turtle species including kemp's ridley (*Lepidochelys kempii*), green turtles (*Chelonia mydas*) and leatherback (*Dermochelys coreacia*);
- (b) presence of a state-designated natural protective feature; and
- (c) location within the boundaries of two estuaries of national significance.

3. The department is authorized to promulgate regulations to prevent the harassment and for the protection of marine mammals and sea turtles within the marine mammal and sea turtle protection area.

TITLE 21

CONSERVATION AREAS AND FACILITIES; PRIVATE REFUGES AND POSTED LANDS

Section 11-2101. Powers of the department.

11-2103. Acquisition and use of property.

11-2105. State game refuges.

11-2106. National Wildlife refuge system; regulations.

11-2107. Consent for the United States to acquire land or water for the establishment of migratory bird reservations.

11-2111. Posting; service of notice.

11-2113. Effect of posting or service of notice.

11-2115. Posted and unposted lands; failure to leave on request.

11-2117. Damage to property, livestock or domestic fowl by hunters and fishermen.

§ 11-2101. Powers of the department.

1. The department shall have power:

a. to make regulations for the use of state-owned boat-launching sites and state-owned boat-access sites and public hunting, trapping and fishing grounds and to prohibit, limit and manage hunting, trapping and fishing on lands, waters or lands and waters on which such grounds are established, in such manner as it deems calculated to promote the public interest, notwithstanding any other provision of the Fish and Wildlife Law or other law;

b. by posting signs or serving notice as provided in section 11-2111 to protect any lands or waters, rights or interests therein owned, leased or otherwise acquired by the state and assigned or made available to the department for controlling, managing, propagating or distributing fish or wildlife or for conducting and managing hatcheries or biological stations, game farms, rearing stations, refuges, public hunting, trapping and fishing grounds or game management areas;

c. to fix the terms of permits issued and regulations adopted permitting the taking of fish or wildlife on, or entering upon, any area or facility mentioned in this subdivision;

d. to enter into cooperative agreement with any department of the United States government, municipality or person for the purpose of better promoting fish and wildlife conservation practices on any lands or waters owned, leased or otherwise acquired by the state and made available to the department for use by the department, or on other lands or waters as provided in sections 11-0303, 11-0321 or 11-0501.

e. to dispose of surplus products of the state's fish hatcheries and to dispose of pheasant chicks and surplus pheasant eggs of the state's game farms as it deems proper.

2. Whenever in the conduct of the public hunting, trapping and fishing grounds, game refuges and other areas held for use by the department, in the opinion of the department it becomes necessary to remove trees and other products in order to manage such areas along lines scientific research indicates are best calculated to produce the optimum conditions

for fish or wildlife, the department may, upon such terms as it may deem to be for the best interests of the state, sell the trees, timber and other products on any such grounds, refuges or other areas acquired by purchase, gift or devise for use by the department.

§ 11-2103. Acquisition and use of property.

1. The department shall have power to acquire by lease, purchase, gift, devise, agreement or otherwise from any sources, lands, waters or lands and waters, or any right or interest therein for the purpose of establishing and maintaining public hunting, trapping and fishing grounds.

2. a. The department shall have power to receive real and personal property by gift or devise from any person or from the United States Government and to accept such property in the name of the people of the state. Under this power any property of any nature or any rights therein may be received and accepted if the department deems it suitable for purposes of fish and wildlife management.

b. Lands or waters accepted under this power shall be held for the use of the department and shall be improved or developed as the department deems best for such purposes. Such lands and waters shall not become part of the forest preserve nor be subject to the limitation of section 1 of article XIV of the State Constitution.

3. The department may purchase the shooting and fishing rights on lands or waters outside the Adirondack and Catskill parks and establish game refuges thereon.

§ 11-2105. State game refuges.

1. Any enclosed land or water owned by the state may be set aside by the department as a refuge for the protection of fish, wildlife, trees and plants. Not more than one hundred thousand acres in the Adirondack

park nor more than fifteen thousand acres in the Catskill park shall be set aside for such purpose nor shall any land in the Adirondack or Catskill park be so set aside without the approval of the board of supervisors or county legislative body of the county affected. The consent of the riparian owners shall first be obtained before lands under water and the waters thereon shall be so set aside.

2. Lands and waters set aside or established by the department as a game refuge shall remain a game refuge until the department by regulation permits the taking of fish and wildlife thereon.

§ 11-2106. National Wildlife refuge system; regulations.

The department shall adopt regulations in relation to fish and wildlife on lands of the national wildlife refuge system within this state which regulations shall conform to the National Wildlife Refuge System Administration Act of 1966 (16 U.S.C. 668dd, 668ee), as presently constituted or as hereafter amended, and regulations of the Secretary of the Interior adopted pursuant thereto.

§ 11-2107. Consent for the United States to acquire land or water for the establishment of migratory bird reservations.

Consent of the state is given to the acquisition by the United States by purchase, gift, devise or lease of such areas of land or water, or of land and water, in the state of New York, as the United States may deem necessary for the establishment of migratory bird reservations in accordance with the Migratory Bird Conservation Act (16 U.S.C. § 715), reserving, however, to the state of New York full jurisdiction and authority over all such areas not incompatible with the administration, maintenance, protection and control thereof by the United States under the terms of such act of Congress.

§ 11-2111. Posting; service of notice.

1. An area protected pursuant to this title and title nineteen of this article shall be posted with signs not less than eleven inches by eleven inches, bearing a conspicuous statement as described in subdivision 2 of this section which shall cover a space of not less than eighty square inches. Such signs shall be posted not more than six hundred sixty feet apart, close to and along the boundaries of the area protected. At least one sign shall be posted on each side of the protected area and on each side of each corner of the protected area, provided the corner can be reasonably ascertained. Illegible or torn-down signs shall be replaced at least once a year. Replacement of notices on state game refuges shall be made in March, July, August or September.

2. Signs shall bear the name and address of the owner, lawful occupant, or other person or organization authorized to post the protected area. Signs shall bear a conspicuous statement which shall either (a) consist of the word "posted", or (b) warn against entry for specified purposes or all purposes without the consent of the person or organization authorized to post the protected area. A statement consisting of the word "Posted" shall have the effect of a warning against all such acts. The department may by regulation authorize additional contents of such signs, including but not limited to symbols indicating the acts which are prohibited.

3. Signs to prohibit the taking of fish may be posted by the department up to one thousand feet from a fishway or dam erected by the state in public waters, and shall read substantially: "All persons are prohibited by law from fishing in this stream between this point and the fishway (or dam)."

4. Personal service upon any person, in the name of the owner, lawful occupant, or other person or organization authorized to post signs as provided in this section, of a notice in writing containing a description of the premises and a warning provided by this section for a posted sign, shall, after the service, have the same effect with respect to the person served as if the premises described in the notice were posted with such warning as provided in this section.

5. Private lands constituting the bed, banks and shores of waters stocked with fish by the department, with the consent of the owner of such lands, shall not be posted against public fishing within five years from the date of such stocking, except where an alternate arrangement has been agreed to in writing by the department. Owner shall mean, for purposes of this subdivision, the owner, lawful occupant, or other person or organization having authority to post such lands.

6. The provisions of this section shall not apply to the posting or erection of notices identifying a restricted area pursuant to section 11-0321.

§ 11-2113. Effect of posting or service of notice.

1. No person shall enter or remain unlawfully or engage in any activity upon land which has been posted pursuant to section 11-2111 in violation of the terms of such posted signs or the terms of any written notice and warning served upon such person pursuant to subdivision four of section 11-2111.

2. No person shall post any sign prohibiting or limiting activities on land pursuant to this article, unless authorized to do so by the owner, lawful occupant or other person or organization having authority to post such lands.

3. No unauthorized person shall injure, conceal, deface or remove a sign erected and maintained as provided in section 11-2111.

§ 11-2115. Posted and unposted lands; failure to leave on request.

1. It shall be unlawful for any person engaged in hunting, trapping or fishing without permission upon the lands of another, whether or not posted as provided in section 11-2111 not to leave such lands immediately when requested to do so by the owner, lessee or lawful

occupant.

2. Upon any conviction of a violation of this section, all the current licenses held by the person convicted, issued pursuant to title 7 of the Fish and Wildlife Law, shall be revoked and he shall be ineligible for any such license during the ensuing license year, and in the discretion of the court ineligible therefor during an additional period not exceeding one license year.

3. The punishment provided in this section shall be in addition to such other fines and penalties as the person convicted may have incurred by violating any provision of this title 21 of the Fish and Wildlife Law.

§ 11-2117. Damage to property, livestock or domestic fowl by hunters and fishermen.

No person, for the purpose of or while hunting, trapping or fishing, shall without the permission of the owner, lessee or lawful occupant enter upon the land of another and while thereon kill or injure any dog, livestock or domestic fowl, or cut, destroy or damage any bars, gates or fence or any part thereof, or deface or damage any vehicle, farm equipment, buildings or appurtenances to the land, resulting in damage to the owner or occupant of the land or of the dog, livestock, domestic fowl, bars, gates, fences, vehicles, equipment, buildings or appurtenances to the land.

TITLE 23

ADMINISTRATION OF FISH AND WILDLIFE LAW

Section 11-2301. Rules and regulations.

11-2303. Disposition of moneys.

11-2305. Sale of trees, timber and other products.

§ 11-2301. Rules and regulations.

Rules and regulations adopted by the department pursuant to the Fish and Wildlife Law shall be adopted as provided in the state administrative procedure act.

§ 11-2303. Disposition of moneys.

1. Moneys received in accordance with the terms of any cooperative agreement for promoting fish and wildlife conservation practices pursuant to paragraph d of subdivision 1 of section 11-2101 unless otherwise expressly provided, shall be deposited in the conservation fund as provided by section 83 of the State Finance Law to be available, after appropriation by the Legislature, for any of the purposes specified in that section.

2. Any moneys received by gift or devise pursuant to subdivision 2 of section 11-2103 shall be deposited and disbursed as provided by sections 11 and 83 of the State Finance Law.

§ 11-2305. Sale of trees, timber and other products.

Sale of trees, timber and other products sold by the department pursuant to subdivision 2 of section 11-2101 shall be conducted as provided in section 9-0505 of this chapter.

* TITLE 25

INTERSTATE WILDLIFE VIOLATOR COMPACT

Section 11-2501. Short title.

11-2503. Adoption and text of compact.

* NB Became effective September 16, 2005 per notification from DEC

§ 11-2501. Short title.

This title shall be known and may be cited as "the interstate wildlife violator compact".

§ 11-2503. Adoption and text of compact.

The interstate wildlife violator compact is adopted and enacted into law as follows:

ARTICLE I

Findings, declaration of policy and purpose.

(a) The participating states find that:

(1) Wildlife resources are managed in trust by the respective states for the benefit of all residents and visitors.

(2) The protection of the wildlife resources of a state is materially affected by the degree of compliance with state statutes, laws, regulations, ordinances and administrative rules relating to the management of such resources.

(3) The preservation, protection, management and restoration of wildlife contributes immeasurably to the aesthetic, recreational and economic aspects of such natural resources.

(4) Wildlife resources are valuable without regard to political boundaries; therefore, every person should be required to comply with wildlife preservation, protection, management and restoration laws, ordinances, and administrative rules and regulations of the participating states as a condition precedent to the continuance or issuance of any license to hunt, fish, trap or possess wildlife.

(5) Violation of wildlife laws interferes with the management of wildlife resources and may endanger the safety of persons and property.

(6) The mobility of many wildlife law violators necessitates the maintenance of channels of communication among the various states.

(7) In some states, a person who is cited for a wildlife violation in a state other than his or her home state:

(i) Is required to post collateral or a bond to secure appearance for a trial at a later date; or

(ii) Is taken into custody until the collateral or bond is posted; or

(iii) Is taken directly to court for an immediate appearance.

(8) The purpose of the enforcement practices set forth in paragraph 7 of this subdivision is to ensure compliance with the terms of a wildlife citation by the cited person who, if permitted to continue on his or her way after receiving the citation, could return to his or her home state and disregard his or her duty under the terms of the citation.

(9) In most instances, a person receiving a wildlife citation in his or her home state is permitted to accept the citation from the officer at the scene of the violation and immediately continue on his or her way after agreeing or being instructed to comply with the terms of the citation.

(10) The practices described in paragraph 7 of this subdivision cause unnecessary inconvenience and, at times, a hardship for the person who is unable at the time to post collateral, furnish a bond, stand trial or pay a fine, and thus is compelled to remain in custody until some alternative arrangement is made.

(11) The enforcement practices described in paragraph 7 of this subdivision consume an undue amount of law enforcement time.

(b) It is the policy of the participating states to:

(1) Promote compliance with the statutes, laws, ordinances, regulations and administrative rules relating to management of wildlife resources in their respective states.

(2) Recognize the suspension of wildlife license privileges of any person whose license privileges have been suspended by a participating state and treat such suspension as if it had occurred in their state provided the violation which resulted in the suspension could have been the basis for suspension in their state.

(3) Allow a violator, except as provided in subdivision (b) of article III of this compact, to accept a wildlife citation and, without delay, proceed on his or her way, whether or not a resident of the state in which the citation was issued, provided that the violator's home state is party to this compact.

(4) Report to the appropriate participating state, as provided in the compact manual, any conviction recorded against any person whose home state was not the issuing state.

(5) Allow the home state to recognize and treat convictions recorded against its residents, which convictions occurred in a participating state, as though they had occurred in the home state.

(6) Extend cooperation to its fullest extent among the participating states for enforcing compliance with the terms of a wildlife citation issued in one participating state to a resident of another participating state.

(7) Maximize effective use of law enforcement personnel and information.

(8) Assist court systems in the efficient disposition of wildlife violations.

(c) The purpose of this compact is to:

(1) Provide a means through which a participating state may join in a reciprocal program to effectuate the policies enumerated in subdivision (b) of this article in a uniform and orderly manner.

(2) Provide for the fair and impartial treatment of wildlife violators operating within participating states in recognition of the violator's right to due process and the sovereign status of a participating state.

ARTICLE II

Definitions. As used in this compact, unless the context requires otherwise:

(a) "Citation" means any summons, complaint, summons and complaint, ticket, penalty assessment or other official document issued to a person by a wildlife officer or other peace officer for a wildlife violation which contains an order requiring the person to respond.

(b) "Collateral" means any cash or other security deposited to secure an appearance for trial in connection with the issuance by a wildlife officer or other peace officer of a citation for a wildlife violation.

(c) "Compliance" with respect to a citation means the act of answering a citation through an appearance in a court or tribunal, or through the payment of fines, costs and surcharges, if any.

(d) "Conviction" means a conviction, including any court conviction, for any offense related to the preservation, protection, management or restoration of wildlife which is prohibited by state statute, law, regulation, ordinance or administrative rule, and such conviction shall also include the forfeiture of any bail, bond or other security deposited to secure appearance by a person charged with having committed any such offense, the payment of a penalty assessment, a plea of nolo contendere and the imposition of a deferred or suspended sentence by the

court.

(e) "Court" means a court of law, including magistrate's court and the justice of the peace court.

(f) "Home state" means the state of primary residence of a person.

(g) "Issuing state" means the participating state which issues a wildlife citation to the violator.

(h) "License" means any license, permit or other public document which conveys to the person to whom it was issued the privilege of pursuing, possessing or taking any wildlife regulated by statute, law, regulation, ordinance or administrative rule of a participating state.

(i) "Licensing authority" means the department or division within each participating state which is authorized by law to issue or approve licenses or permits to hunt, fish, trap or possess wildlife.

(j) "Participating state" means any state which enacts legislation to become a member of this wildlife compact.

(k) "Personal recognizance" means an agreement by a person made at the time of issuance of the wildlife citation that such person will comply with the terms of the citation.

(l) "State" means any state, territory or possession of the United States, the District of Columbia, the Commonwealth of Puerto Rico, the provinces of Canada and other countries.

(m) "Suspension" means any revocation, denial or withdrawal of any or all license privileges, including the privilege to apply for, purchase or exercise the benefits conferred by any license.

(n) "Terms of the citation" means those conditions and options expressly stated upon the citation.

(o) "Wildlife" means all species of animals including, but not limited to, mammals, birds, fish, reptiles, amphibians, mollusks and crustaceans, which are defined as "wildlife" and are protected or otherwise regulated by statute, law, regulation, ordinance or administrative rule in a participating state. Species included in the definition of "wildlife" vary from state to state and determination of whether a species is "wildlife" for the purposes of this compact shall be based on local law.

(p) "Wildlife law" means any statute, law, regulation, ordinance or administrative rule developed and enacted for the management of wildlife resources and the uses thereof.

(q) "Wildlife officer" means any individual authorized by a participating state to issue a citation for a wildlife violation.

(r) "Wildlife violation" means any cited violation of a statute, law, regulation, ordinance or administrative rule developed and enacted for the management of wildlife resources and the uses thereof.

ARTICLE III

Procedures for issuing state.

(a) When issuing a citation for a wildlife violation, a wildlife officer shall issue a citation to any person whose primary residence is in a participating state in the same manner as though the person were a resident of the issuing state and shall not require such person to post collateral to secure appearance, subject to the exception noted in subdivision (b) of this article, if the officer receives the recognizance of such person that he will comply with the terms of the citation.

(b) Personal recognizance is acceptable (1) if not prohibited by local law or the compact manual and (2) if the violator provides adequate proof of identification to the wildlife officer.

(c) Upon conviction or failure of a person to comply with the terms of a wildlife citation, the appropriate official shall report the conviction or failure to comply to the licensing authority of the participating state in which the wildlife citation was issued. The report shall be made in accordance with procedures specified by the issuing state.

(d) Upon receipt of the report of conviction or noncompliance pursuant to subdivision (c) of this article, the licensing authority of the issuing state shall transmit to the licensing authority of the home state of the violator the information in form and content as prescribed in the compact manual.

ARTICLE IV

Procedure for home state.

(a) Upon receipt of a report from the licensing authority of the issuing state reporting the failure of a violator to comply with the terms of a citation, the licensing authority of the home state shall notify the violator and shall initiate a suspension action in accordance

with the home state's suspension procedures and shall suspend the violator's license privileges until satisfactory evidence of compliance with the terms of the wildlife citation has been furnished by the issuing state to the home state licensing authority. Due process safeguards will be accorded.

(b) Upon receipt of a report of conviction from the licensing authority of the issuing state, the licensing authority of the home state shall enter such conviction in its records and shall treat such conviction as though it occurred in the home state for the purposes of the suspension of license privileges.

(c) The licensing authority of the home state shall maintain a record of actions taken and shall make reports to issuing states.

ARTICLE V

Reciprocal recognition of suspension.

(a) All participating states shall recognize the suspension of license privileges of any person by any participating state as though the violation resulting in the suspension had occurred in their state and could have been the basis for suspension of license privileges in their state.

(b) Each participating state shall communicate suspension information to other participating states in form and content as contained in the compact manual.

ARTICLE VI

Applicability of other laws.

Except as expressly required by provisions of this compact, nothing herein shall be construed to affect the right of any participating state to apply any of its laws relating to license privileges to any person or circumstance or to invalidate or prevent any agreement or other cooperative arrangement between a participating state and a nonparticipating state concerning wildlife law enforcement.

ARTICLE VII

Compact administrator procedures.

(a) For the purpose of administering the provisions of this compact

and to serve as a governing body for the resolution of all matters relating to the operation of this compact, a board of compact administrators is established. The board shall be composed of one representative from each of the participating states to be known as the compact administrator. The compact administrator shall be appointed by the head of the licensing authority of each participating state and shall serve and be subject to removal in accordance with the laws of the state he or she represents. A compact administrator may provide for the discharge of his or her duties and the performance of his or her function as a board member by an alternate. An alternate shall not be entitled to serve unless written notification of his or her identity has been given to the board.

(b) Each member of the board of compact administrators shall be entitled to one vote. No action of the board shall be binding unless taken at a meeting at which a majority of the total number of the board's votes are cast in favor thereof. Action by the board shall be only at a meeting at which a majority of the participating states are represented.

(c) The board shall elect annually from its membership a chair and vice-chair.

(d) The board shall adopt bylaws not inconsistent with the provisions of this compact or the laws of a participating state for the conduct of its business and shall have the power to amend and rescind its bylaws.

(e) The board may accept for any of its purposes and functions under this compact any and all donations and grants of monies, equipment, supplies, materials and services conditional or otherwise, from any state, the United States or any governmental agency, and may receive, utilize and dispose of same.

(f) The board may contract with, or accept services or personnel from, any governmental or intergovernmental agency, individual, firm or corporation, or any private nonprofit organization or institution.

(g) The board shall formulate all necessary procedures and develop uniform forms and documents for administering the provisions of this compact. All procedures and forms adopted pursuant to board action shall be contained in a compact manual.

ARTICLE VIII

Entry into compact and withdrawal.

(a) This compact shall become effective at such time as it is adopted in a substantially similar form by two or more states.

(b) (1) Entry into the compact shall be made by resolution of ratification executed by the authorized officials of the applying state and submitted to the chair of the board.

(2) The resolution shall substantially be in the form and content as provided in the compact manual and shall include the following:

(i) A citation of the authority from which the state is empowered to become a party to this compact; and

(ii) An agreement of compliance with the terms and provisions of this compact.

(3) The effective date of entry shall be specified by the applying state but shall not be less than sixty days after notice has been given (i) by the chair of the board of the compact administrators or (ii) by the secretary of the board to each participating state that the resolution from the applying state has been received.

(c) A participating state may withdraw from participation in this compact by official written notice to each participating state, but withdrawal shall not become effective until ninety days after the notice of withdrawal is given. The notice shall be directed to the compact administrator of each member state. No withdrawal of any state shall affect the validity of this compact as to the remaining participating states.

ARTICLE IX

Amendments to the compact.

(a) This compact may be amended from time to time. Amendments shall be presented in resolution form to the chair of the board of compact administrators and shall be initiated by one or more participating states.

(b) Adoption of an amendment shall require endorsement by all participating states and shall become effective thirty days after the date of the last endorsement.

ARTICLE X

Construction and severability.

This compact shall be liberally construed so as to effectuate the purposes stated herein. The provisions of this compact shall be severable and if any phrase, clause, sentence or provision of this compact is declared to be contrary to the constitution of any participating state or of the United States, or the applicability thereof to any government, agency, individual or circumstance is held invalid, the validity of the remainder of this compact shall not be affected thereby. If this compact shall be held contrary to the constitution of any participating state, the compact shall remain in full force and effect as to the remaining states and in full force and effect as to the participating state affected as to all severable matters.

ARTICLE XI

Administration; expenses.

(a) The department of environmental conservation is designated as the licensing authority in this state for purposes of this compact. The commissioner of the department of environmental conservation shall furnish to the appropriate authorities of the participating states any information or documents reasonably necessary to facilitate the administration of this compact.

(b) The compact administrator from this state is not entitled to any additional compensation for his or her service as such but is eligible for reimbursement for expenses incurred in connection with his or her responsibilities as compact administrator in the same manner as expenses incurred in connection with other responsibilities of his or her office or employment.

ARTICLE 13

MARINE AND COASTAL RESOURCES

Title 1. General provisions

3. Marine fisheries

5. The marine and coastal district of New York conservation, education, and research grants program

7. Seagrass protection act

TITLE 1
GENERAL PROVISIONS

Section 13-0101. Short title.
13-0103. Marine and coastal district described.
13-0105. Marine fisheries conservation and management.

§ 13-0101. Short title.

Article 13 together with article 11 of the Environmental Conservation Law shall be known as the Fish and Wildlife Law. Sections of article 13 or of article 11 may be cited either as sections of the Environmental Conservation Law or as sections of the Fish and Wildlife Law.

§ 13-0103. Marine and coastal district described.

The marine and coastal district shall include the waters of the Atlantic Ocean within three nautical miles from the coast line and all other tidal waters within the state, including the Hudson River up to the Governor Mario M. Cuomo bridge.

§ 13-0105. Marine fisheries conservation and management.

1. (a) It is the policy of the state that the primary principle in managing the state's marine fishery resource is to maintain the long-term health and abundance of marine fisheries resources and their habitats, and to ensure that the resources are sustained in usable abundance and diversity for future generations. Utilization and allocation of available resources will be administered consistent with the restoration and maintenance of healthy stocks and habitats. The state shall actively manage its marine fisheries and shall endeavor to: protect and conserve habitats; restore habitats in areas where they have been degraded; and maintain water quality at a level that will foster

occurrence and abundance of marine resources. The state shall optimize the benefits of resource use so as to provide valuable recreational experiences and viable business opportunities for commercial and recreational fisheries.

(b) The marine fisheries conservation and management policy shall be carried out through achievement of the following objectives:

(1) the state shall strive to obtain the best possible scientific information through research and monitoring of the resources;

(2) the state shall use the best available scientific information in managing the resources;

(3) the state recognizes that an informed public is integral to the management system and shall inform and involve constituents in management decisions;

(4) the management of the state's transboundary and migratory species shall be consistent with any interjurisdictional management plans, interstate or state-federal;

(5) in the event that fishery conservation and management require actions that result in resource allocation impacts, the state shall endeavor to assure such allocation impacts are distributed equitably among user groups, giving priority to existing fisheries within the state;

(6) the state shall minimize waste and reduce discard mortality of marine fishery resources;

(7) the state shall investigate and encourage the development of aquaculture of economically important species, both to relieve pressure on and enhance wild stocks and to provide economic opportunity;

(8) the state shall encourage and, when feasible, provide access to the state's marine fishery resources consistent with marine fisheries conservation and management policy; and

(9) the state recognizes that adequate law enforcement services are integral to the success of any marine resource management program and shall endeavor to provide the necessary law enforcement services to ensure the protection of the resources and compliance of users with laws and regulations designed to manage and allocate those resources.

2. Prior to proposing regulations for the management of marine fish, mollusks (Phylum mollusca) or crustaceans (Class crustacea) found in the

marine and coastal district, the department shall identify recreational and commercial fisheries interests which may be affected by the proposed regulations and directly consult with such interests. Such consultation may include, as appropriate, the conduct of meetings with invited representatives of fisheries interests, public information meetings, public hearings, direct mailings of information and public comment solicitations, and publication of proposals and comment solicitations in trade publications, and other measures. Such consultation shall include a meeting with the marine resources advisory council. No consultation shall be required prior to proposing emergency regulations.

3. (a) In reviewing proposed regulations, the council may request comments from harvesters of marine fisheries and the commercial and recreational fishing industries.

(b) The council shall express its advice to the department as the result of a vote of the membership on a recommendation that the proposed regulations be adopted, not adopted, or adopted with specified revisions.

(c) In making its final decision on such regulations, the department shall be guided by the recommendations of the marine resources advisory council and, consistent with the marine fisheries conservation and management policy set forth in subdivision one of this section and the requirements of subparagraph three of paragraph (b) of subdivision one of this section, shall endeavor to incorporate such recommendations in the final rulemaking. The department's assessment of public comment published in the state register shall set forth the council's recommendations and an explanation of the department's final decision in regard to such recommendations and the requirements of this section.

TITLE 3

MARINE FISHERIES

- | | |
|------------------|--|
| Section 13-0301. | Lease of state-owned underwater lands for shellfish cultivation. |
| 13-0302. | Lands underwater of Gardiner's and Peconic bays. |
| 13-0303. | Tax on state-owned underwater lands held under lease or franchise for shellfish cultivation. |

- 13-0305. Marking lands prohibited; injury to monuments.
- 13-0307. Sanitary surveys.
- 13-0309. Taking, handling and importation of shellfish; general provisions.
- 13-0310. Northern or lined seahorses; prohibited acts.
- 13-0311. Digger's permit to take shellfish for commercial purposes; when not required.
- 13-0313. Shellfish growers; definitions; bed permit.
- 13-0315. Shellfish shipper's and processor's permit.
- 13-0316. Marine hatcheries; off-bottom and on-bottom culture; permits.
- 13-0317. Shipping tags.
- 13-0319. Shellfish regulations.
- 13-0321. Taking and importation of shellfish for transplanting and other purposes.
- 13-0323. Oysters; prohibited acts.
- 13-0325. Clams; prohibited acts.
- 13-0327. Scallops.
- 13-0328. Commercial licenses; limited entry.
- 13-0329. Lobsters; permit to take; prohibited acts.
- 13-0330. Whelks or conchs; license to take.
- 13-0331. Crabs; permit to take; prohibited acts.
- 13-0333. Menhaden; license; prohibited acts.
- 13-0334. Marine and coastal district food fish and crustacea dealers and shippers license.
- 13-0335. Food fish; license; prohibited acts.
- 13-0336. Marine and coastal district party and charter boat license.
- 13-0337. Return of fish, crustacea and other animals to the water.
- 13-0338. Sharks; department authority; finning prohibited.
- 13-0339. Marine fish; size limits of marine species; sale of marine species.
- 13-0339-a. Atlantic cod (*Gadus morhua*), Atlantic sturgeon (*Acipenser oxyrinchus*), shortnose sturgeon (*Acipenser brevirostrum*), American eel (*Anguilla rostrata*), Atlantic herring (*Clupea harengus*),

American shad (*Alosa sapidissima*), alewife (*Alosa pseudoharengus*), blueback herring (*Alosa aestivalis*), squid (cephalopoda), and hickory shad (*Alosa mediocris*).

- 13-0340. Bluefish (*Pomatomus saltatrix*).
- 13-0340-a. Weakfish (*Cynoscion regalis*).
- 13-0340-b. Fluke - summer flounder (*Paralichthys dentatus*).
- 13-0340-c. Winter flounder (*Pleuronectes americanus*).
- 13-0340-d. Blackfish or tautog (*Tautoga onitis*).
- 13-0340-e. Scup (*Stenotomus chrysops*).
- 13-0340-f. Black sea bass (*Centropristis striata*).
- 13-0340-g. Monkfish (*Lophius americanus*, *Lophius reticulatus* and *Lophius gastrophysus*).
- 13-0340-h. Atlantic bonito (*Sarda sarda*) and false albacore (*Euthynnus alletteratus*).
- 13-0341. Trawls; use prohibited in certain waters.
- 13-0342. Marine fisheries data.
- 13-0343. Nets other than trawls; restrictions on use of nets and trawls.
- 13-0343-a. Fish pots and traps; restrictions.
- 13-0344. Fish, shellfish and crustacea; dumping.
- 13-0345. Protection of waters; cesspools and drains.
- 13-0347. Management of striped bass in marine waters.
- 13-0349. Taking of fish for commercial purposes.
- 13-0350. Marine resources advisory council.
- 13-0355. Recreational marine fishing license.
- 13-0360. Special management areas.
- 13-0371. Atlantic States Marine Fisheries Compact.

§ 13-0301. Lease of state-owned underwater lands for shellfish cultivation.

1. Leases. a. Except as provided in paragraph b of this subdivision, the department may lease state-owned underwater lands within the marine and coastal district for the cultivation of shellfish. The written approval of the office of general services shall be obtained for the

lease of land within five hundred feet of the high water mark.

b. The following lands underwater shall not be leased: (i) lands where there is an indicated presence of shellfish in sufficient quantity and quality and so located as to support significant hand raking or tonging harvesting; (ii) lands where the leasing will result in a significant reduction to established commercial finfish or crustacean fisheries; (iii) lands where bay scallops are produced regularly on a commercial basis; and (iv) lands underwater of Gardiner's and Peconic bays and the tributaries thereof between the westerly shore of Great Peconic bay and an easterly line running from the most easterly point of Plum Island to Goff point at the entrance of Napeague harbor.

2. Regulations. a. Regulations adopted by the department for the implementation and administration of this section shall include regulations with respect to leasing forms and procedures; public notice of leasing; execution of leases; minimum rental fees; bidding procedures; posting and forfeiture of financial security, renewals, termination and assignment of leases; marking and testing of grounds; maintenance of boundary markers; collection of rental and recording fees; submission and approval of cultivation plans; harvesting gear; acreage of lands to be let and term of leases and other matters pertinent to underwater land use and shellfish cultivation.

b. Regulations adopted by the department for the implementation and administration of this section shall include the following requirements: (i) leases shall be awarded after public auction following due notice; (ii) leases shall be awarded to the highest responsible bidder; (iii) bidders shall provide a detailed cultivation plan; and (iv) cultivation of shellfish shall commence within one year of the award of the lease.

3. Summary proceedings. Upon failure to pay the rental on any date due under the terms of the lease or upon revocation, the department may, after written notice to the lessee, declare the lease cancelled as of the date set forth in such notice, and may immediately thereafter evict the lessee from such lands. The provisions of article seven of the real property actions and proceedings law shall apply and govern the

procedure in such cases.

4. Limitations. The commissioner of general services shall not grant or lease lands for shellfish cultivation. The public shall not be excluded from the taking of shellfish from underwater lands granted or leased by such commissioner for other purposes; provided, however, that should any grant or lease made by such commissioner for such other purposes include lands leased by the department for shellfish cultivation the lessee for shellfish cultivation shall have the exclusive right to use and take shellfish from such leased lands for a period of two years from the date of the grant or lease by such commissioner or until the expiration of the shellfish cultivation lease, whichever is the earliest, and may prior to the expiration of such period, remove and transplant the shellfish from such lands to other lands leased, owned or controlled by such lessee.

§ 13-0302. Lands underwater of Gardiner's and Peconic bays.

1. Underwater lands ceded to county of Suffolk. All the right, title and interest in which the people of the state of New York have in and to the lands under water of Gardiner's and Peconic bays in the county of Suffolk, except underwater lands within one thousand feet of the high water mark is hereby ceded to such county, for the purposes of shellfish or seaweed cultivation, to be managed and controlled by such county, provided that such lands shall revert to the state when they shall cease to be used for shellfish or seaweed cultivation. For the purposes of this section, the term "Gardiner's and Peconic bays" shall mean the waters of Gardiner's and Peconic bays and the tributaries thereof between the westerly shore of Great Peconic bay and an easterly line running from the most easterly point of Plum island to Goff point at the entrance of Napeague harbor.

2. Ratification. The grant of lands under the waters of Gardiner's and Peconic bays, by the commissioners of shell fisheries, in accordance with the provisions of chapter 385 of the laws of 1884, as amended, subsequently held and used by the grantees, heirs, successors, and

assigns on which all taxes and assessments have been paid, are hereby ratified and confirmed. Any underwater lands in Gardiner's and Peconic Bays previously granted that revert or escheat to the state or are subject to tax deed by the county of Suffolk shall be available to the county for leasing pursuant to this section. All other lands under such waters, which pursuant to such chapters, have escheated or reverted to the state, are hereby ceded to Suffolk county for the purposes of the cultivation of shellfish or seaweed, subject to existing valid grants and easements; provided however, that nothing in this section shall interfere with the right of the commissioner of general services to grant lands and easements under water to owners of adjacent uplands, pursuant to the provisions of the public lands law, or of the legislature to make such grants without regard to upland ownership, and to grant franchises to utilities, municipalities and governmental, educational, or scientific bodies for cables, outfalls, ecological studies, and experimentation with controlled marine life.

3. Leases for shellfish cultivation. Suffolk county may lease lands under water ceded to it by the state for the purpose of shellfish cultivation. Provided if no such leases have been executed by December thirty-first, two thousand ten, such authority to lease pursuant to this section shall terminate.

a. Leases may be issued only within areas designated as shellfish cultivation zones on a map or maps to be prepared and approved by the county of Suffolk.

b. No lease shall be granted except upon written application on forms furnished by the county of Suffolk, and properly executed and signed by the applicant.

c. Before a lease is approved, notice shall be provided for at least two months by posting such notice at the bureau of marine resources in the department, the office of the county clerk, and the office of the town clerk in which all or any part of the lands to be leased are located. Such notice shall also be published in the official newspaper of the county. The notice shall include the name of the lessee, the

boundaries of the lease, and the area of the lease. A copy of the proposed lease shall be available for public inspection and copying in the office of the county clerk.

4. Establishment of shellfish cultivation zones. Before leasing or using the lands hereby ceded to it, the county of Suffolk shall cause an accurate survey to be made of such lands, and a map or maps to be prepared therefrom. Such map or maps shall establish shellfish cultivation zones within Gardiner's and Peconic bays. Such map or maps shall be approved by local law. After such map or maps have been adopted, the county shall have the authority to issue leases for shellfish cultivation within the shellfish cultivation zones, as provided herein. Such map or maps shall be updated by the county of Suffolk every five years.

a. Underwater lands within one thousand feet of the high water mark shall not be included in a shellfish cultivation zone.

b. Underwater lands where bay scallops are produced regularly and harvested on a commercial basis shall not be included in a shellfish cultivation zone.

c. Underwater lands where there is an indicated presence of shellfish in sufficient quantity and quality and so located as to support significant hand raking and/or tonging harvesting shall not be included in a shellfish cultivation zone.

d. Underwater lands where the leasing will result in a significant reduction of established commercial finfish or crustacean fisheries shall not be included in a shellfish cultivation zone.

5. Regulations for shellfish cultivation. The county shall, by local law, before leasing any such underwater lands, adopt regulations governing:

a. applications for leases;

- b. notices to be given;
- c. the form and terms of leases;
- d. standards for the approval or denial of leases;
- e. administration of leases;
- f. the transfer or renewal of leases;
- g. marking grounds and testing;
- h. fees;
- i. recording of leases;
- j. bonds; and
- k. such other matters as are appropriate to the leasing program.

6. Department authority over shellfish cultivation. Notwithstanding any of the provisions of this section:

a. any person engaging in the cultivation or harvesting of shellfish in a shellfish cultivation zone pursuant to this section shall obtain a permit in accordance with section 13-0316 of this title; and

b. the department shall regulate and control the use of certain types of vessels and equipment for harvesting shellfish, requirements for reseeding, the right to enter upon such leased lands for reseeding or making shellfish population surveys, and enforce all other applicable state laws relating to said underwater lands.

7. Leases for seaweed cultivation. Suffolk county may lease lands under water ceded to it by the state for the purpose of seaweed cultivation, provided if no such leases have been executed by December thirty-first, two thousand thirty-one, such authority to lease pursuant

to this section shall terminate. Nothing shall preclude the county from issuing a single lease to an applicant for both shellfish and seaweed, provided that the application complies with all the requirements of this section. For the purposes of this section, "seaweed" means any marine macroalgae that is native or indigenous to the marine and coastal district and approved by the commissioner for cultivation in the waters of Gardiner's and Peconic bays.

a. Leases may be issued only within areas designated as seaweed cultivation zones on a map or maps to be prepared and approved by the county of Suffolk.

b. No lease shall be granted, except upon written application on forms furnished by the county of Suffolk, and properly executed and signed by the applicant.

c. Before a lease is approved, notice shall be provided for at least two months by posting such notice at the division of marine resources in the department, the office of the county clerk, and the office of the town clerk in which all or any part of the lands to be leased are located. Such notice shall also be published in the official newspaper of the county. The notice shall include the name of the lessee, the boundaries of the lease, and the area of the lease. A copy of the proposed lease shall be available for public inspection and copying in the office of the county clerk.

8. Establishment of seaweed cultivation zones. Before leasing or using the lands hereby ceded to it for seaweed cultivation, the county of Suffolk shall cause an accurate survey to be made of such lands, and a map or maps to be prepared therefrom. Such map or maps shall establish seaweed cultivation zones within Gardiner's and Peconic bays. Such map or maps shall be approved by local law. After such map or maps have been adopted, the county shall have the authority to issue leases for seaweed cultivation within the seaweed cultivation zones, as provided herein. Such map or maps shall be updated by the county of Suffolk every five years.

a. Underwater lands within one thousand feet of the high water mark shall not be included in a seaweed cultivation zone.

b. Underwater lands where bay scallops are produced regularly and harvested on a commercial basis shall not be included in a seaweed cultivation zone.

c. Underwater lands where there is an indicated presence of shellfish in sufficient quantity and quality and so located as to support significant hand raking and/or tonging harvesting shall not be included in a seaweed cultivation zone.

d. Underwater lands where the leasing will result in a significant reduction of established commercial finfish or crustacean fisheries shall not be included in a seaweed cultivation zone.

9. Regulations for seaweed cultivation. The county shall, by local law, before leasing any such underwater lands, adopt regulations governing:

a. applications for leases;

b. notices to be given;

c. the form and terms of leases;

d. standards for the approval or denial of leases;

e. administration of leases;

f. the transfer or renewal of leases;

g. marking grounds and testing;

h. fees;

i. recording of leases;

j. bonds; and

k. such other matters as are appropriate to the leasing program.

10. Department authority over seaweed cultivation. Notwithstanding any of the provisions of this section:

a. any person engaging in the cultivation or harvesting of seaweed in a seaweed cultivation zone pursuant to this section shall obtain all permits required by this chapter;

b. the department may regulate and control the use of certain types of vessels and equipment for harvesting seaweed, requirements for reseeding, the right to enter upon such leased lands, and enforce all other applicable state laws relating to said underwater lands; and

c. any person engaging in the cultivation or harvesting of seaweed in a seaweed cultivation zone pursuant to this section shall obtain a permit in accordance with section 13-0316 of this title.

11. Duties of the county clerk. Leases issued pursuant to this section shall be recorded in the office of the county clerk in the manner and form to be determined by local law as provided in subdivision five of this section.

12. Summary proceedings. Upon the failure of a lessee to pay the rental on any date due under the terms of the lease or upon revocation as provided for by local law pursuant to subdivision five or seven of this section, the county may, after written notice to the lessee declare the lease cancelled as of the date set forth in such notice, and may immediately thereafter evict the lessee from such lands. The provisions of article seven of the real property actions and proceedings law shall apply and govern the procedure in such case.

13. Disposition of fees and rents. All fees and rents received shall be deposited into the general fund of the county. However, in the

alternative, nothing shall prohibit the county of Suffolk, by local law, from establishing a special fund for the promotion of aquaculture where such fees and rents shall be deposited.

14. Suffolk county shall be authorized to allow the underwater lands at Gardiner's and Peconic Bays within the shellfish cultivation zone to be used for the implementation of a pilot program to conduct research and scientific assessment of the feasibility of seaweed cultivation. Such pilot program shall be limited to persons holding a lease from Suffolk county for shellfish cultivation and shall be limited to a total of five acres of such cultivation zone provided that any one person may be authorized to conduct seaweed cultivation on no more than one acre of the lease. Suffolk county shall provide a report to the legislature and the department on the pilot program no later than January first, two thousand twenty-six.

§ 13-0303. Tax on state-owned underwater lands held under lease or franchise for shellfish cultivation.

1. Tax. There shall be an annual tax of one dollar per acre on all state-owned underwater lands held by franchise for shellfish cultivation. The tax shall be levied and assessed by the department before February 1 each year on such lands held on August 1 of the preceding year. Written notice shall be mailed to each grantee showing the number of acres so assessed and the amount of tax thereon. The department shall keep an assessment book showing annually the names and addresses of all grantees, the number and location of acres held by each, the amount of tax payable and date and amount of any tax paid.

2. Payment. Such tax shall be paid on or before April 1 each year. Such tax shall be a first lien upon all the property subject thereto, including the shellfish thereon from February 1 in the year levied.

3. Collection of tax. If any tax shall not be paid on or before April 1, the department shall issue a warrant for collection thereof, with interest thereon at one per centum per month from the day such tax

became due and payable until paid, together with all fees incurred in collecting such tax, and deliver such warrant to the sheriff of the county within whose jurisdiction the lands are situate for collection. All moneys received by the department in payment of taxes and interest thereon shall be accounted for and paid by it, within thirty days after its receipt, to the Division of Finance in the Department of Taxation and Finance, for the benefit of the state.

4. Reversion of lands for non-payment of taxes. Land under water granted to individuals by franchise for shellfish cultivation by the department shall revert to state-owned public grounds if the owner defaults in payment of franchise taxes for a period of one year after such tax became due and payable.

5. Franchises not transferable. Franchised lands under water held for shellfish cultivation when returned to the state by default in payment of taxes may not be assigned, reassigned, or transferred to a new owner or owners. Such lands may be leased by the department for shellfish cultivation as provided in section 13-0301.

6. Tax in lieu of other taxes. The tax imposed by this section shall be in lieu of all other taxes on the property on which it is imposed, and no other tax except as provided herein shall be levied or imposed on such lands, or the shellfish thereon, by any authority whatsoever.

§ 13-0305. Marking lands prohibited; injury to monuments.

1. No person other than the lessee or the department shall mark out or enclose in any manner, any state-owned lands under water for the purpose of planting shellfish thereon or excluding the general public therefrom.

2. No person shall wilfully injure or remove any monument, stake or boundary marker of any kind, placed for the purpose of delineating or locating state owned shellfish lands except by authority of the department.

§ 13-0307. Sanitary surveys.

1. The department periodically shall examine all shellfish lands within the marine district and the Hudson River between the Governor Mario M. Cuomo bridge and the federal dam at Troy to ascertain the sanitary condition thereof in accordance with regulations promulgated pursuant to section 13-0319 of this title.

2. The department, following an examination, shall certify which shellfish lands are in such sanitary condition that shellfish thereon may be taken for use as food. Such lands shall be designated as certified shellfish lands, and all other shellfish lands as uncertified shellfish lands.

3. The department, annually, and as often as it deems necessary, shall publish in a newspaper in the county in which such lands are located a notice containing a description, in plain language, of uncertified shellfish lands and stating that a legal description of such lands is available from the department. The department shall make a legal description of uncertified shellfish lands available to the public upon request.

§ 13-0309. Taking, handling and importation of shellfish; general provisions.

1. a. Shellfish shall not be taken from uncertified lands except as provided in sections 13-0319 and 13-0321.

b. Shellfish from uncertified lands of other states shall not be possessed, transported or trafficked in within this state, except pursuant to permit as provided in sections 13-0319 and 13-0321.

c. Shellfish shall not be shipped or transported into this state except as provided in sections 13-0319 and 13-0321 unless such shellfish are harvested from certified shellfish lands whose quality is equivalent

to or better than that described in regulations promulgated pursuant to section 13-0319.

2. a. Shellfish shall not be taken from sunset to sunrise from any shellfish lands of this state.

b. During the period from one hour after sunset until sunrise, no person, except pursuant to a permit issued by the department, shall possess on board a vessel, or off-load from a vessel, more than the quantities of shellfish allowed to be possessed pursuant to subdivision five of section 13-0311 of this title. Possession of shellfish during the period from one hour after sunset until sunrise in quantities exceeding those set forth in subdivision five of section 13-0311 of this title shall be presumptive evidence of a violation of paragraph a of this subdivision.

3. No dredge or scrape or other device operated by power or by boats propelled by motor or other mechanical means may be used for the taking of shellfish from public or unleased lands under water except that

a. Sea scallops (*Pecten magellanicus*) may be taken from the waters of the Atlantic Ocean by any means.

b. In the taking of soft clams (*Mya arenaria*) on lands below low tide, the practice of churning with a propeller may be employed.

c. Surf, sea, hen or skimmer clams (*Spisula solidissima*; *Spisula polynyma*) and ocean quahogs (*Arctica islandica*) may be taken by mechanical means from the waters of the marine and coastal district, except as limited by any regulations promulgated pursuant to subdivision twelve of this section.

d. The department may permit the taking of shellfish for purposes of transplanting only pursuant to section 13-0321, by mechanical means, except that in the waters of Richmond county the department may permit such taking in waters at a mean low water mark of thirty feet or more.

e. Subject to the provisions of section 13-0327, bay scallops (*Pecten irradians*) may be taken with a dredge or scrape, having an opening at the mouth not to exceed thirty-six inches in width, when towed by a boat operated by mechanical power, or other means provided that such dredge or scrape is brought aboard by hand power without the use of a mechanical device.

f. The department may issue permits for the taking of mussels (*Mytilus edulis*) from underwater lands as hereinafter described by means of dredges not to exceed thirty-six inches in width, which may be equipped to be returned to boatside by means of power or mechanical devices. Mussels (*Mytilus edulis*) may be taken by such means in the following areas:

(1) In Long Island Sound generally easterly of a line extending due north from Herod Point on Long Island including those waters surrounding Fishers Island.

(2) In the Atlantic Ocean easterly of a line extending due south from the rock jetty on the east side of Shinnecock Inlet.

(3) In the bays with state-owned bottomland easterly from the Town of Riverhead to and including Block Island Sound.

(4) The limit on mussels (*Mytilus edulis*) taken in such a manner is fifteen bushels per person per day, not to exceed thirty bushels taken per boat per day. Possession of other shellfish or possession of mussels on a vessel possessing a dredge is presumptive evidence that such shellfish or mussels were taken by such dredge.

g. In the taking of hard clams (*Mercenaria mercenaria*), a pot hauler may be used onboard a vessel to assist in hauling or retrieving a clam rake from the water, provided that the basket attached to the clam rake shall not exceed twenty-six inches in width. For the purposes of this section, "pot hauler" shall mean a mechanically operated device, including but not limited to a winch, reel, windlass or capstan, which is used to haul or retrieve a clam rake from the water and return it to the harvest vessel.

4. No person shall take, carry away, interfere with or disturb shellfish of another, lawfully possessed, planted or cultivated; nor

remove any stakes, buoys or boundary marks of lawfully possessed, planted or cultivated lands. The possession of dredges, rakes or tongs overboard on any such lands shall be deemed presumptive evidence of a violation of this subdivision.

5. All boats, houses and other places, containers and equipment used in the handling of shellfish shall be maintained in a sanitary condition as provided in section 13-0319.

6. Shellfish shall not be treated by the process known as drinking, floating, plumping or swelling, and shellfish so treated shall not be possessed, bought, sold or exposed for sale; provided, however, that shellfish may be retained in water storage as provided in section 13-0319 and provided, further, that nothing herein shall be deemed to prohibit or render unlawful the practice of off-bottom culture of shellfish under permit issued pursuant to section 13-0316 hereof.

7. Shellfish in the shell, or shucked, shall not be washed preparatory to marketing except by the use of water from a water supply approved by the department.

8. The operation, use or placing, for whatever purpose, of dredges, rakes, tongs or other devices for the taking of shellfish in uncertified shellfish lands, except as provided in sections 13-0319 and 13-0321, is prohibited. The department may suspend or cancel the digger's permit of any person who is convicted of a violation of this subdivision or who signs an acknowledgment of a violation of this subdivision for the purpose of effecting a settlement by civil compromise or by stipulation.

9. No person shall in any way alter, damage, mutilate, move or carry away any buoy or marker placed by the department that is used to designate, mark or define the uncertified waters of the state.

10. The department may issue permits for the possession of a stick dredge for purposes it may deem necessary. No person without a permit from the department shall possess a stick dredge in Nassau county, Suffolk county, or in the marine and coastal district. For the purpose

of this section, a stick dredge shall be any tooth-basket combination dredging device whose construction shall allow for the installation of a stick or sticks of any type material whose purpose is to permit the direction of force upon such device and which is commonly used for the taking of *Mercenaria mercenaria* by being towed either directly or indirectly by a motorboat which has its engine engaged.

11. No person without a permit from the department shall possess rakes or tongs, of the type and design normally used by shellfish harvesters for harvesting shellfish from shellfish lands, in Nassau county, Suffolk county or the marine and coastal district except:

a. hand operated tongs having teeth in the heads spaced not less than one inch apart and the basket attached to such tongs having bars not less than fifteen-sixteenths of an inch apart, or

b. hand operated rakes having teeth spaced not less than one inch apart and the basket attached to such rake having bars not less than fifteen-sixteenths of an inch apart.

Rakes or tongs having wire netting or other material between the teeth or bars shall not be used.

12. Notwithstanding any other provision of this chapter or rule or regulation, the department shall fix by regulations open seasons, harvest areas, size limits, catch limits, manner of taking and possession, transportation, identification, sale and permit requirements for surf, sea, hen and skimmer clams (*Spisula solidissima*, *Spisula polynyma*) and ocean quahogs (*Arctica islandica*). Such regulation may provide for, but not be limited to the following:

a. a daily catch limit for surf clams not to exceed eight hundred ninety-six bushels or twenty-eight cages per vessel and a daily catch limit for ocean quahogs not to exceed eight hundred ninety-six bushels or twenty-eight cages per vessel, regardless of the number of permittees aboard such vessel;

b. requirements with respect to number of vessels which may participate in the surf clam and ocean quahog fishery;

c. limitations on harvest within specified periods of time, such as weekly and daily harvest limits, designed to minimize the number of and the duration of closures;

d. qualification of applicants and vessels to participate in the surf clam and ocean quahog fishery;

e. the regulations shall take into consideration and attempt to maintain the economic viability of those portions of the surf clam harvesting and processing industry that have a longstanding investment in the domestic surf clam industry; and

f. the regulations shall take into consideration and attempt to maintain the economic viability of the traditional established New York based commercial surf clam/ocean quahog harvesting industry, processors and packers that rely on this fishery.

13. Possession of shellfish on a vessel equipped with a dredge, scrape or other device operated by power and capable of being used for the taking of shellfish, except a scallop dredge as defined in paragraph e of subdivision three of this section, is presumptive evidence that such shellfish were taken by the use of such dredge, scrape or other device.

14. The department, until April first, two thousand ten shall be entitled to collect fifteen cents per bushel of surf clams and ten cents per bushel of ocean quahogs taken from all certified waters to be deposited in the surf clam/ocean quahog account as provided in section eighty-three of the state finance law.

15. Unless and until regulations are adopted implementing a comprehensive long-term management plan for the protection of surf clams and ocean quahogs in New York waters, the following restrictions shall apply in addition to any consistent regulations adopted prior to the date upon which such section shall take effect:

- a. a weekly catch limit not to exceed twenty-eight cages;
- b. an annual catch limit in certified waters of the Atlantic Ocean for surf clams not to exceed five hundred thousand bushels in the aggregate;
- c. an annual catch limit in certified waters other than the Atlantic Ocean for surf clams not to exceed fifty thousand bushels in the aggregate; and
- d. requiring permittees to report on a weekly basis the number of bushels harvested in the previous seven day period, and provide that the failure to file such weekly report may result in the revocation of such person's permit by the department.

§ 13-0310. Northern or lined seahorses; prohibited acts.

1. No person shall take any northern or lined seahorse (*Hippocampus erectus*) for commercial purposes.
2. The provisions of subdivision one of this section shall not apply to the taking of seahorses for scientific or educational purposes including, but not limited to, public or not-for-profit zoos and aquariums, as determined by the commissioner.

§ 13-0311. Digger's permit to take shellfish for commercial purposes; when not required.

1. Subject to the provisions of this article, a person may take shellfish from under water lands in the state for commercial purposes, including the culling, sorting or tagging of such shellfish, only upon first obtaining a digger's permit from the department, provided, however, that the application for such permit by a person sixteen years of age or under shall be signed by his parent or legal guardian, who shall thereby consent to the issuance of the permit.

2. The department shall prescribe and furnish forms for application for such permit.

3. The fee for such permit shall be fifty dollars for a person domiciled within the state. The fee for persons not domiciled within the state shall be one hundred fifty dollars. Such permit shall expire on December 31 of the year of issue. If it appears in the public interest, the department may, after hearing held on ten day's notice, suspend or cancel such permits, except that in case of a taking from an uncertified area such suspension or cancellation may be without prior notice.

4. The holder of such permit shall not ship or sell shellfish, except to a holder of a valid Class A, B, or E shipper's permit, issued pursuant to section 13-0315 of this title, who has a place of business in the county of Nassau or Suffolk, without first obtaining a shipper's permit as provided in subdivision 1 of section 13-0315.

5. Subject to the provisions of this article, a person may, without permit, take not more than a total of four pecks (one bushel) of shellfish other than bay scallops and not more than four pecks of bay scallops (*Argopecten irradians*) in any one day for the use of such person or such person's family. Within the one bushel total limit of species, other than bay scallops, which may be taken in one day the following species-specific limits shall apply:

a. Hard clams (*Mercenaria mercenaria*). Not more than one hundred individual organisms.

b. Blue mussels (*Mytilus edulis*). Not more than two pecks.

c. Oysters (*Crassostrea virginica*). Not more than two pecks.

d. Soft Clams (*Mya arenaria*). Not more than two pecks.

6. The holder of such digger's permit shall carry the permit assigned to such holder while engaged in the permitted activities, and the

failure by such holder to exhibit the permit to any shellfish inspector, environmental conservation officer, health official, peace officer, acting pursuant to such officers' special duties, police officer or magistrate shall be presumptive evidence that no valid digger's permit has been issued to the person who fails to produce such permit.

7. No person shall take shellfish or assist another in the taking of shellfish in any quantity, including the culling, sorting or tagging of such shellfish, during the time that such person's digger's permit privileges have been revoked or suspended.

8. Endorsed vessels. a. Upon application to the department on forms furnished by the department, a shellfish digger's permit may be endorsed for use on a vessel, in which case such permit shall authorize all persons on board such vessel to engage in the taking of hard clams (*Mercenaria mercenaria*) and oysters (*Crassostrea virginica*), including the culling, sorting, and tagging of such shellfish. Each application shall include a copy of one of the following documents as proof of vessel length: the certificate of documentation for the vessel issued by the United States government, or the registration for the vessel issued by any state government within the United States.

b. The fee for endorsing a shellfish digger's permit to a vessel shall be fifty dollars for a vessel that is forty feet or less in registered length, and one hundred dollars for a vessel that is greater than forty feet in registered length. Such fee shall be in addition to the permit fee provided for in subdivision three of this section.

c. Not more than one rake, tong or other shellfish harvesting device shall be used for the taking of hard clams and oysters at any given time pursuant to a digger's permit which has been endorsed to a vessel.

d. A shellfish digger's permit which has been endorsed to a vessel shall not cover any person whose shellfish digger's permit privileges have been revoked or suspended.

e. The holder of a shellfish digger's permit which has been endorsed

to a vessel shall be on board such vessel at all times when the vessel is being used for the taking of hard clams and oysters.

f. The holder of a shellfish digger's permit which has been endorsed to a vessel shall be liable for all violations of this title that occur on such vessel.

g. If the holder of a shellfish digger's permit which has been endorsed to a vessel is a corporation, the operator of such vessel shall possess a separate shellfish digger's permit issued in the operator's name, and such operator shall be liable for all violations of this title that occur on such vessel.

h. A shellfish digger's permit shall not be endorsed to more than one vessel at any one time.

i. The holder of a shellfish digger's permit which has been endorsed to a vessel shall maintain a daily log indicating the names and addresses of individuals covered by such permit for each day the vessel is used for taking hard clams and oysters and shall make such log available to the department upon request.

§ 13-0313. Shellfish growers; definition; bed permit.

1. Any person resident in this state one year or more may engage in the cultivation and marketing of shellfish subject to the provisions of sections 13-0307, 13-0309, 13-0311 and 13-0319 and shall be known as a grower.

2. A grower shall not take shellfish, for shipping or marketing from lands owned, leased or rented by him, except upon permit of the department which shall certify that such lands lie within certified areas. The department shall prescribe and furnish forms for application for such permits.

3. The fee for such permit shall be twenty-five cents for each acre

from which shellfish are to be taken; provided, however, that the minimum fee shall be five dollars. Such certificates shall expire on December 31 of the year of issue.

4. If it appears in the public interest, the department may suspend or cancel any such permit.

5. Where lands for which such permit has been issued are found to be in part within an uncertified area, the department shall issue without fee, a new permit covering the remaining portion of such lands.

6. In case of assignment or transfer of rights or ownership of any private or leased lands under water, or parts thereof, a new permit shall be required.

§ 13-0315. Shellfish shipper's and processor's permit.

1. Prior to the processing, transportation or shipment of shellfish, either in intra-state or inter-state commerce, an appropriate permit to do so shall be obtained from the department. Such permit shall be required of all shippers and dealers in fresh and frozen shellfish within the state, except retail dealers, and shall certify that the holder thereof has complied with all the requirements of sections 13-0309, 13-0311, 13-0313, 13-0317 and 13-0319 and rules and regulations adopted pursuant thereto.

2. A shellfish shipper's and/or processor's permit shall be issued only to a person eighteen years or older. The department shall prescribe and furnish forms for application for such permit.

3. Applicants shall pay, and the department shall be entitled to receive, fees according to the type of permit issued, as follows:

a. Class A permit. This permit shall allow the holder thereof and any person in the employ of the permit holder, in accordance with regulations adopted pursuant to section 13-0319 of this title, to: (i)

reship shellfish previously shipped by the holder of a class A, B, C, D or E permit issued pursuant to this section, or similar permit issued by the shellfish sanitation control agency of another state or foreign country; (ii) pack or repack shellstock received from the holder of a digger's permit, pursuant to section 13-0311 of this title; or (iii) pack or repack shellstock from the holder of a class A, B, C, D or E permit issued pursuant to this section, or similar permit issued by the shellfish sanitation control agency of another state or foreign country. The fee for a class A permit shall be three hundred dollars.

b. Class B permit. This permit shall allow the holder thereof and any person in the employ of the permit holder to engage in the activities authorized by a class A permit, as described in paragraph a of this subdivision, and to otherwise process shellfish as authorized by regulations adopted pursuant to section 13-0319 of this title. The fee for a class B permit shall be six hundred dollars.

c. Class C permit. This permit shall allow the holder thereof and any person in the employ of the permit holder, in accordance with regulations adopted pursuant to section 13-0319 of this title, to reship shellfish previously shipped by the holder of a class A, B, C, D or E permit issued pursuant to this section, or similar permit issued by the shellfish sanitation control agency of another state or foreign country. The fee for a class C permit shall be two hundred dollars.

d. Class D permit. This permit shall allow the holder thereof, in accordance with regulations adopted pursuant to section 13-0319 of this title, to ship shellstock which the holder has legally harvested from shellfish lands of the state. The fee for a class D permit shall be seventy-five dollars.

e. Class E permit. This permit shall allow the holder thereof, members of the permit holder's immediate family and not more than two employees of the permit holder, in accordance with regulations adopted pursuant to section 13-0319 of this title, to shuck and pack bay scallops which have been received from the holder of a digger's permit, pursuant to section 13-0311 of this title, and to ship such scallops in the form of fresh

shucked stock only in intrastate commerce. The fee for a class E permit shall be fifty dollars.

f. All permits issued pursuant to this section shall expire on the thirty-first of December of the year of issue. The department may suspend or revoke any such permit at any time on failure of the holder thereof to comply with the conditions thereof.

§ 13-0316. Marine hatcheries; off-bottom and on-bottom culture; permits.

1. Marine hatcheries. The department, in its discretion, may issue permits for operation of marine hatcheries. No person shall operate a marine hatchery without first obtaining a permit from the department. The fee for such permit shall be one hundred dollars annually, except that political subdivisions of the state shall be issued permits without fee. Each such permit shall expire on December 31 of the year of issue. A marine hatchery permit entitles the holder thereof, notwithstanding any other provision hereof, to possess, raise and breed marine plant and animal life, including but not limited to shellfish, lobster, crab, shrimp and food fish and to sell the products of a marine hatchery, where less than legal size, to other permitted marine hatcheries, persons holding a valid off-bottom or on-bottom culture permit, persons holding a valid permit issued pursuant to section 11-0515 of this chapter, and, subject to department rules and regulations, to individual or commercial markets for consumption or resale. Products of a marine hatchery of legal size may be sold for consumption or resale. The department may adopt regulations with respect to the purchase, sale, harvesting, transplanting, relaying, receiving, possessing, transporting, exporting or otherwise trafficking in products of a marine hatchery including the sale to individual or commercial markets for consumption or resale.

2. Off-bottom and on-bottom culture. The department, in its discretion, may issue permits for off-bottom and on-bottom culture of marine plant and animal life, including but not limited to shellfish, lobster, crab, shrimp and fish. No person shall engage in such

off-bottom or on-bottom culture without first obtaining a permit from the department. The fee for such permit shall be one hundred dollars annually, except that political subdivisions of the state shall be issued permits without fee. Each such permit shall expire on December 31 of the year of issue. No such permit shall be issued unless the applicant has obtained any necessary permits or licenses required under any state or federal law and has obtained the written authorization of the person or political subdivision having title or legal control of the underwater lands on or above which such on-bottom or off-bottom culture shall take place. An off-bottom or on-bottom culture permit entitles the holder thereof, notwithstanding any other provision hereof, to purchase and possess, from within or without the state, marine plant and animal life of legal and less than legal size for purposes of off-bottom and on-bottom culture only and, subject to department rules and regulations, to sell such marine animal and plant life of less than legal size. Products of off-bottom and on-bottom culture of legal size may be sold to individual or commercial markets for consumption or resale. The department may adopt regulations, necessary to protect the marine environment and public health and safety, with respect to the construction, marketing and maintenance of off-bottom and on-bottom culture structures and the purchase, sale, harvesting, possessing, transporting, importing, exporting, or otherwise trafficking in products of off-bottom or on-bottom culture of marine animal and plant life.

§ 13-0317. Shipping tags.

All persons transporting, importing, exporting or otherwise distributing shellfish shall label or tag the same as provided under section 13-0319.

§ 13-0319. Shellfish regulations.

The department may adopt regulations with respect to the harvesting, transplanting, relaying, receiving, possessing, transporting, importing, exporting, processing, buying, selling of or otherwise trafficking in

shellfish; the labeling or tagging thereof; the keeping of records of shellfish received, transported and distributed; the construction, operation and maintenance of all shellfish handling, processing and distributing establishments, including facilities and equipment and the cleaning, cleansing and water storage of shellfish. The provisions of this section relating to transplanting and relaying include but are not limited to the removal of shellfish from uncertified growing areas and transplanting to certified areas for subsequent harvest for market purposes and transplanting of scallops pursuant to section 13-0327. Such regulations may provide for payment of the reasonable costs of the department of supervision of removal of shellfish from uncertified areas, except where such removal is being undertaken by a municipality or political subdivision. Such regulations shall be drawn in such a manner as to provide adequate sanitary control over all shellfish offered for sale and distribution in the state. Such regulations shall not be less restrictive than the minimum requirements of any federal agency regulating the inter-state shipment of shellfish.

§ 13-0321. Taking and importation of shellfish for transplanting and other purposes.

1. Shellfish may be taken from uncertified shellfish lands for transplanting or other purposes as the department may deem advisable subject to supervision and regulation as provided in section 13-0319.

2. Prior to the taking from uncertified shellfish lands of this state for transplanting or other purposes, a permit shall be obtained from the department and shall be issued for the taking of shellfish from a specific area. Such permit shall be valid only during the period of operations in the uncertified land for which the permit was issued. The holder of such permit may not receive, sell, offer for sale, transport, or ship any shellfish taken pursuant to this permit, except as provided by regulations made pursuant to section 13-0319.

3. Shellfish from certified or uncertified lands without the state shall not be transplanted in this state or imported into this state for

such purposes unless a permit therefor has been obtained from the department.

§ 13-0323. Oysters; prohibited acts.

1. No person shall sell or offer for sale, any oysters, or label or brand any packages containing oysters for shipment or sale under the name of blue point oysters, other than oysters which have been planted and cultivated at least three months in the waters of Great South Bay.

2. In no case shall oysters other than the species *Crassostrea virginica* be planted or transplanted in New York waters without procuring a permit from the department.

3. The department may, until December thirty-first, two thousand twenty-seven, fix by regulation measures for the management of oysters (Family Ostreidae) including size limits, catch and possession limits, open and closed seasons, closed areas, restrictions on the manner of taking and landing, requirements for permits and eligibility therefor, recordkeeping and identification requirements, requirements on the amount and type of fishing effort and gear, and requirements relating to transportation, possession and sale, provided that such regulations are no less restrictive than requirements set forth in this chapter.

§ 13-0325. Clams; prohibited acts.

1. Except for transplanting as provided in section 13-0321, no person shall take, harvest, possess, sell, offer for sale or otherwise trafficked in hard clams (*Mercenaria mercenaria*) measuring less than one inch in thickness.

2. Hard clams less than one inch in thickness may be taken by shellfish growers from leased or privately owned lands other than town lands currently under cultivation by the grower for transplanting to other such lands being cultivated by the same grower, and imported from

another state by a shellfish grower for transplanting to public or private or leased lands under cultivation, provided a permit for each separate transplanting operation is issued by the department subject to provisions of sections 13-0319 and 13-0321. The permit, providing for transplanting hard clams less than one inch in thickness, shall be issued without fee. Such clams shall not be transported to a point without the state.

3. Soft or steamer clams (*Mya arenaria*) less than one and one-half inches in the longest diameter shall not be taken, possessed, bought, sold or otherwise trafficked in.

4. a. Surf, sea, hen or skimmer clams (*Spisula solidissima*; *Spisula polynyma*) less than three inches in the longest diameter shall not be taken, possessed, bought, sold, or otherwise trafficked in except that such clams less than four inches in the longest diameter shall not be taken from the waters of the Atlantic Ocean for use as food.

b. All surf, sea, hen or skimmer clams and ocean quahogs taken from the waters of the marine and coastal district shall be landed in the state of New York.

c. Boats of nonresidents may be licensed to take surf, sea, hen or skimmer clams and ocean quahogs from the waters of the Atlantic Ocean within the marine and coastal district in accordance with paragraph c of subdivision three of section 13-0309 hereof, provided that the boat is registered in a state which accords reciprocal clamming privileges to residents of this state and provided that the owner is a citizen of the United States and a resident of a state according reciprocal privileges to residents of this state. The license shall be issued in the name of the boat and shall be on board during all licensed operations. The fee for said license shall be five hundred dollars per boat. Each license shall expire on the thirty-first day of December next succeeding its issue, and if it appears in the public interest the department may suspend or cancel such license on ten days notice in writing to the holder thereof, except that in case of a taking from an uncertified area, such suspension or cancellation may be without prior notice.

d. Any individual, while participating in the operation of a licensed boat, shall be exempt from the requirements of section 13-0311 but shall not ship or sell shellfish taken by such boat without first obtaining a shellfish shipper's permit as provided for in section 13-0315.

5. Clams shall be culled when taken in accordance with rules and regulations promulgated by the commissioner. Clams which may not be taken, possessed, offered for sale, sold or otherwise trafficked in pursuant to the provisions of subdivision 1, 3 or 4 of this section may compose not to exceed three per centum of any bushel, package or container, when unavoidably taken. Such three per centum shall be determined by the measurement of any bushel, or other package or container of different measurement of clams taken from the catch or in the possession of the person offering the same for sale.

6. Each bushel, or other package or container of different measurement containing an excess of three per centum of clams which may not be taken, possessed, offered for sale, sold or otherwise trafficked in pursuant to the provisions of subdivision 1, 3 or 4 of this section determined by count shall constitute a separate violation.

7. It shall be unlawful to knowingly:

a. Transport, conceal or convey hard shell clams obtained or possessed in contravention of the provisions of this chapter in, upon or by means of any vehicle, vessel or aircraft; or

b. Conceal or possess hard shell clams obtained or possessed in contravention of the provisions of this chapter in or upon any vehicle, vessel or aircraft.

8. The department may, until December thirty-first, two thousand twenty-eight, adopt by regulation measures for the management of hard clams (*Mercenaria mercenaria*), soft or steamer clams (*Mya arenaria*), and razor clams (*Ensis* sp.), including size limits, catch and possession limits, open and closed seasons, closed areas, restrictions on the

manner of taking and landing, requirements for permits and eligibility therefor, recordkeeping and identification requirements, requirements on the amount and type of fishing effort and gear, and requirements relating to transportation, possession and sale, provided that such regulations are no less restrictive than requirements set forth in this chapter.

§ 13-0327. Scallops.

The department may, until December thirty-first, two thousand twenty-seven, adopt by regulation measures for the management of scallops (Family Pectinidae) including size limits, catch and possession limits, open and closed seasons, closed areas, restrictions on the manner of taking and landing, requirements for permits and eligibility therefor, recordkeeping and identification requirements, requirements on the amount and type of fishing effort and gear, and requirements relating to transportation, possession and sale, provided that such regulations are no less restrictive than requirements set forth in this chapter.

§ 13-0328. Commercial licenses; limited entry.

1. Commercial food fish licenses. Commercial food fish licenses provided for by section 13-0335 of this title shall be issued as follows:

a. for the period beginning January first, two thousand eighteen through December thirty-first, two thousand twenty-six, the number of resident commercial food fish licenses and the number of non-resident commercial food fish licenses shall not exceed the following annual limits:

(i) for two thousand eighteen, the number of licenses shall be limited to the number of licenses issued in two thousand seventeen, plus fifty percent of any difference between the number of licenses issued in two thousand seventeen and nine hundred sixty-nine;

(ii) for two thousand nineteen, the number of licenses shall be limited to the number of licenses established in subparagraph (i) of this paragraph;

(iii) for two thousand twenty, the number of licenses shall be limited to the number of licenses established in subparagraph (i) of this paragraph;

(iv) for two thousand twenty-one, the number of licenses shall be limited to the number of licenses established in subparagraph (i) of this paragraph;

(v) for two thousand twenty-two, the number of licenses shall be limited to the number of licenses established in subparagraph (i) of this paragraph;

(vi) for two thousand twenty-three, the number of licenses shall be limited to the number of licenses established in subparagraph (i) of this paragraph;

(vii) for two thousand twenty-four, the number of licenses shall be limited to the number of licenses established in subparagraph (i) of this paragraph;

(viii) for two thousand twenty-five, the number of licenses shall be limited to the number of licenses established in subparagraph (i) of this paragraph; and

(ix) for two thousand twenty-six, the number of licenses shall be limited to the number of licenses established in subparagraph (i) of this paragraph.

b. for the period beginning January first, two thousand twenty-three through December thirty-first, two thousand twenty-six, persons who were issued a commercial food fish license in the previous year shall be eligible to be issued such license.

c. for the period beginning January first, two thousand twenty-three through December thirty-first, two thousand twenty-six, the department shall issue commercial food fish licenses to persons who were not issued such license in the previous year provided that the total number of such licenses issued to such persons does not exceed the difference between the number of licenses established in paragraph a of this subdivision and the number of such licenses issued pursuant to paragraph b of this

subdivision, subject to the following:

(i) licenses shall be issued in the order in which the applications were received, except that where multiple applications are received by the department on the same day, applicants for whom the department has received notice of successful completion of an apprenticeship pursuant to subdivision seven of this section shall be considered by the department prior to other applicants;

(ii) licenses may be issued to individuals only;

(iii) licenses shall be issued to applicants who are sixteen years of age or older at the time of the application; and

(iv) licenses shall be issued only to persons who demonstrate in a manner acceptable to the department that they received an average of at least fifteen thousand dollars of income over three consecutive years from commercial fishing or fishing, or who successfully complete a commercial food fish apprenticeship pursuant to subdivision seven of this section. As used in this subparagraph, "commercial fishing" means the taking and sale of marine resources including fish, shellfish, crustacea or other marine biota and "fishing" means commercial fishing and carrying fishing passengers for hire. Individuals who wish to qualify based on income from "fishing" must hold a valid marine and coastal district party and charter boat license. No more than ten percent of the licenses issued each year based on income eligibility pursuant to this paragraph shall be issued to applicants who qualify based solely upon income derived from operation of or employment by a party or charter boat. For the income evaluation of this subdivision, the department may consider persons who would otherwise be eligible but for having served in the United States armed forces on active duty, provided that such individual (1) has received an honorable or general discharge, or (2) has a qualifying condition, as defined in section one of the veteran's services law, and has received a discharge other than bad conduct or dishonorable from such service, or (3) is a discharged LGBT veteran, as defined in section one of the veteran's services law, and has received a discharge other than bad conduct or dishonorable from such service, shall not be deemed ineligible.

2. Commercial lobster permits. Commercial lobster permits provided for by section 13-0329 of this title shall be issued as follows:

for the period beginning January first, two thousand twenty-three, through December thirty-first, two thousand twenty-six, only persons who were issued a commercial lobster permit in the previous year shall be eligible to be issued such permit.

3. Commercial crab permits. Commercial crab permits provided for by section 13-0331 of this title shall be issued as follows:

a. for the period beginning January first, two thousand eighteen through December thirty-first, two thousand twenty-six, the number of resident commercial crab permits and the number of non-resident commercial crab permits shall not exceed the following annual limits:

(i) for two thousand eighteen, the number of permits shall be limited to the number of permits issued in two thousand seventeen, plus fifty percent of any difference between the number of permits issued in two thousand seventeen and five hundred sixty-three;

(ii) for two thousand nineteen, the number of permits shall be limited to the number of permits established in subparagraph (i) of this paragraph;

(iii) for two thousand twenty, the number of permits shall be limited to the number of permits established in subparagraph (i) of this paragraph;

(iv) for two thousand twenty-one, the number of licenses shall be limited to the number of licenses established in subparagraph (i) of this paragraph;

(v) for two thousand twenty-two, the number of licenses shall be limited to the number of licenses established in subparagraph (i) of this paragraph;

(vi) for two thousand twenty-three, the number of licenses shall be limited to the number of licenses established in subparagraph (i) of this paragraph;

(vii) for two thousand twenty-four, the number of licenses shall be limited to the number of licenses established in subparagraph (i) of this paragraph;

(viii) for two thousand twenty-five, the number of licenses shall be limited to the number of licenses established in subparagraph (i) of

this paragraph; and

(ix) for two thousand twenty-six, the number of licenses shall be limited to the number of licenses established in subparagraph (i) of this paragraph.

b. for the period beginning January first, two thousand twenty-one through December thirty-first, two thousand twenty-six, persons who were issued a commercial crab permit in the previous year shall be eligible to be issued such permit.

c. for the period beginning January first, two thousand twenty-three through December thirty-first, two thousand twenty-six, the department shall issue commercial crab permits to persons who were not issued such permit in the previous year provided that the total number of such permits issued to such persons does not exceed the difference between the number of permits established in paragraph a of this subdivision and the number of such permits issued pursuant to paragraph b of this subdivision, subject to the following:

(i) permits shall be issued in the order in which the applications were received, except that where multiple applications are received by the department on the same day, applicants for whom the department has received notice of successful completion of an apprenticeship pursuant to subdivision seven of this section shall be considered by the department prior to other applicants;

(ii) permits may be issued to individuals only;

(iii) permits shall be issued to applicants who are sixteen years of age or older at the time of the application; and

(iv) permits shall be issued only to persons who demonstrate in a manner acceptable to the department that they received an average of at least fifteen thousand dollars of income over three consecutive years from commercial fishing or fishing, or who successfully complete an apprenticeship pursuant to subdivision seven of this section. As used in this subparagraph, "commercial fishing" means the taking and sale of marine resources including fish, shellfish, crustacea or other marine biota and "fishing" means commercial fishing and carrying fishing passengers for hire. Individuals who wish to qualify based on income from "fishing" must hold a valid marine and coastal district party and

charter boat license. No more than ten percent of the permits issued each year based on income eligibility pursuant to this paragraph shall be issued to applicants who qualify based upon income derived from operation of or employment by a party or charter boat.

4. Commercial whelk or conch licenses. Commercial whelk or conch licenses provided for by section 13-0330 of this title shall be issued as follows:

a. for the period beginning January first, two thousand eighteen through December thirty-first, two thousand twenty-six, the number of resident commercial whelk or conch licenses and the number of non-resident commercial whelk or conch licenses shall not exceed the following annual limits:

(i) for two thousand eighteen, the number of licenses shall be limited to the number of licenses issued in two thousand seventeen plus fifty percent of any difference between the number of licenses issued in two thousand seventeen and two hundred fifty-two;

(ii) for two thousand nineteen, the number of licenses shall be limited to the number of licenses established in subparagraph (i) of this paragraph;

(iii) for two thousand twenty, the number of licenses shall be limited to the number of licenses established in subparagraph (i) of this paragraph;

(iv) for two thousand twenty-one, the number of licenses shall be limited to the number of licenses established in subparagraph (i) of this paragraph;

(v) for two thousand twenty-two, the number of licenses shall be limited to the number of licenses established in subparagraph (i) of this paragraph;

(vi) for two thousand twenty-three, the number of licenses shall be limited to the number of licenses established in subparagraph (i) of this paragraph;

(vii) for two thousand twenty-four, the number of licenses shall be limited to the number of licenses established in subparagraph (i) of this paragraph;

(viii) for two thousand twenty-five, the number of licenses shall be

limited to the number of licenses established in subparagraph (i) of this paragraph; and

(ix) for two thousand twenty-six, the number of licenses shall be limited to the number of licenses established in subparagraph (i) of this paragraph.

b. for the period beginning January first, two thousand twenty-three through December thirty-first, two thousand twenty-six, persons who were issued a commercial whelk or conch license in the previous year shall be eligible to be issued such license.

c. for the period beginning January first, two thousand twenty-three through December thirty-first, two thousand twenty-six, persons who were not issued a commercial whelk or conch license in the previous year shall be eligible to be issued such license provided that the total number of such licenses issued to such persons shall not exceed the difference between the number of licenses established in paragraph a of this subdivision and the number of such licenses issued pursuant to paragraph b of this subdivision, subject to the following:

(i) licenses shall be issued in the order in which the applications were received, except that where multiple applications are received by the department on the same day, applicants for whom the department has received notice of successful completion of an apprenticeship pursuant to subdivision seven of this section shall be considered by the department prior to other applicants;

(ii) licenses may be issued to individuals only;

(iii) licenses shall be issued to applicants who are sixteen years of age or older at the time of the application; and

(iv) licenses shall be issued only to persons who demonstrate in a manner acceptable to the department that they received an average of at least fifteen thousand dollars of income over three consecutive years from commercial fishing or fishing, or who successfully complete an apprenticeship pursuant to subdivision seven of this section. As used in this subparagraph, "commercial fishing" means the taking and sale of marine resources including fish, shellfish, crustacea or other marine biota and "fishing" means commercial fishing and carrying fishing passengers for hire. Individuals who wish to qualify based on income

from "fishing" must hold a valid marine and coastal district party and charter boat license. No more than ten percent of the licenses issued each year pursuant to this paragraph shall be issued to applicants who qualify based upon income derived from operation of or employment by a party or charter boat.

5. Marine and coastal district party and charter boat licenses. Marine and coastal district party and charter boat licenses provided for by section 13-0336 of this title shall be issued as follows, except that this subdivision shall not apply to the owner or operator of a party boat or charter boat whose vessel is classified by the United States Coast Guard as an Inspected Passenger Vessel and which is licensed to carry more than six passengers:

a. for the years two thousand twenty-three through two thousand twenty-six, the annual number of marine and coastal district party and charter boat licenses issued shall not exceed five hundred seventeen.

b. for the years two thousand twenty-three through two thousand twenty-six, persons who were issued a marine and coastal district party and charter boat license in the previous year shall be eligible to be issued such license.

c. for the years two thousand twenty-three through two thousand twenty-six, the department shall issue marine and coastal district party and charter boat licenses to persons who were not issued such license in the previous year, provided that the total number of licenses issued does not exceed five hundred seventeen, subject to the following:

(i) licenses shall be issued in the order in which the applications were received;

(ii) licenses shall be issued only to persons who hold an Uninspected Passenger Vessel license issued by the United States Coast Guard.

6. License or permit reissuance.

a. Notwithstanding the provisions of subdivisions one, two, three and four of this section, the department may permit reissuance of a license

or permit to a member of the immediate family of the prior holder of such license or permit; provided that the individual to whom the license or permit is being reissued is at least sixteen years of age. The department may permit a license or permit holder to designate in writing a member of his or her immediate family to whom the license or permit shall be reissued in the event that the license or permit holder dies prior to surrendering his or her license or permit to the department.

b. In the event that a designated immediate family member does not wish to engage in the commercial fishing activities authorized by such license or permit, the department may permit such person to identify an alternate person to whom the license or permit shall be reissued. The department is authorized to adopt regulations concerning the reissuance of licenses or permits pursuant to this subdivision.

c. The holder of a reissued license or permit shall engage in the activity authorized by the license or permit within three years of the reissuance date. If the license or permit holder fails to engage in such activity during the three years following reissuance, the license or permit shall lapse at the end of the three year period and shall not be renewed unless the department, in its discretion, determines that the license or permit holder's inactivity was justified by significant hardship or unavoidable circumstances.

d. For purposes of this section, "immediate family" shall include spouse, sibling, parent, child, grandparent, grandchild, and, in addition, all persons who are related by blood, marriage or adoption to the permit holder and domiciled in the house of the license or permit holder.

7. Commercial license apprenticeship program. The department is authorized to adopt regulations establishing an apprenticeship program for persons who wish to obtain a commercial crab permit pursuant to section 13-0331 of this title, a commercial food fish license pursuant to section 13-0335 of this title or a commercial whelk (conch) license pursuant to section 13-0330 of this title. Upon successful completion of the apprenticeship program, a person shall become eligible to receive a

commercial crab permit, commercial food fish license or a commercial whelk (conch) license, as applicable, subject to the provisions of paragraph c of subdivision one, paragraph c of subdivision three, and paragraph c of subdivision four of this section, respectively.

§ 13-0329. Lobsters; permit to take; prohibited acts.

1. Any person domiciled within the state may take and land lobsters (*Homarus americanus*) from the waters of the state or land lobsters in the state taken elsewhere upon first obtaining a permit from the department. There shall be two classes of permits: a non-commercial permit, the fee for which shall be ten dollars, and a commercial permit, the fee for which shall be one hundred fifty dollars. A non-commercial permit shall allow the holder to set no more than five lobster pots and to take or land in any one day no more than six legal lobsters by this or any other legal method for the holder's own or family use. Holders of non-commercial permits shall not sell, offer for sale, trade or barter, or otherwise traffic in lobsters so taken. A commercial permit shall allow the holder to set any number of pots and use any other legal method for taking lobsters with no restriction on the number of legal lobsters that may be taken, landed or possessed except that on the waters of Long Island Sound and its adjoining bays, harbors and estuaries (herein defined as all waters of the state north of the northern shore lines of Long Island, Plum Island, Little Gull Island, Great Gull Island and Fishers Island and all the waters of the state north of the waters that separate those islands from each other) a person holding a commercial permit who is a person operating or owning or on board a dragger or any vessel used to operate any net defined as a trawl in section 13-0341 shall not take, land nor possess any lobsters or parts thereof unless there are no such nets on board, attached to in any way, or being used by such vessel. This prohibition on the taking of lobsters by the use of a trawl shall not allow the use of a trawl in any waters where it is prohibited by sections 13-0341 and 13-0343. The department shall furnish forms for application for both classes of permits. A non-commercial permit shall be issued to an individual. A commercial permit shall be issued to an individual and it may be

endorsed for use on a fishing vessel, in which case it shall cover all persons on board such vessel. The holder of a commercial permit shall be liable for all violations that occur on the vessel for which the holder's permit is endorsed. The holder of a permit shall carry on his or her person or post on his or her vessel such permit at all times when fishing for lobsters. Except as provided in subdivision six of this section, the permit holder must be present at all times while the privileges of such permit are being exercised and while lobster fishing gear owned by the permit holder is being set out or retrieved. The holder of a commercial permit may endorse such permit to only one vessel at any one time and shall be on board such vessel at all times when it is used for fishing for lobsters.

2. a. A person not domiciled within the state but who is domiciled in a state that provides reciprocal permits or licenses to persons domiciled in New York state may, upon first obtaining a permit from the department, take and land lobsters only from the waters of the state westerly and southerly of a straight line drawn from the Flashing Green Light Number 9 Whistle Buoy at Cerebus Shoals (located approximately seven miles northwesterly to Montauk Point) northwesterly to Race Rock and thence due north to the New York-Connecticut interstate boundary line; and may land lobsters taken outside New York state waters.

b. The fee for such lobster permit shall be two hundred twenty-five dollars. The permit shall be issued to an individual and may be endorsed for use on a fishing vessel in which case it shall cover all persons on board such vessel. Except as provided in subdivision six of this section, the permit holder must be present at all times while the privileges of such permit are being exercised and while lobster fishing gear owned by the permit holder is being set out or retrieved. The holder of such permit shall be liable for all violations that occur on any vessel for which the permit may be endorsed. The holder of such permit shall carry on his or her person or post on his or her vessel such permit at all times when fishing for lobsters. The holder of a commercial permit may endorse such permit to only one vessel at any one time and shall be on board such vessel at all times when it is used for fishing for lobsters.

c. On the waters of Long Island Sound and its adjoining bays, harbors and estuaries (as defined in subdivision 1 of this section) a person holding such permit who is a person operating or owning or on board a dragger or any vessel used to operate a trawl as defined in section 13-0341 shall not take, land nor possess any lobsters or parts thereof unless there are no such nets on board, attached to in any way, or being used by such vessel. This prohibition on the taking of lobsters by the use of a trawl shall not allow the use of a trawl in any waters where it is prohibited by sections 13-0341 and 13-0343.

d. A person not domiciled in the state who is not qualified to hold a lobster permit under paragraph a of this subdivision, or person domiciled within the state who is not eligible to obtain a commercial lobster permit under subdivision one of this section, may obtain a permit to land lobsters in the state which have been legally taken outside the state. The fee for a lobster landing permit shall be three hundred dollars.

e. The department shall prescribe and furnish forms for such permits.

3. a. Lobster permits shall be non transferable and shall expire on December 31 of the year of issue. If it appears in the public interest, the department may suspend or cancel any such permit on ten days' written notice to the holder thereof.

b. No person who has had any such permit suspended or revoked shall take or land lobsters or aid in the taking or landing of lobsters until such permit has been reinstated or a new permit is issued.

c. A person who holds a permit to take or land lobsters shall notify the department of any change of address within thirty days of such change.

4. Buoys or markers of prescribed design may be used in designating the location of licensed lobster pots or traps in such manner as shall be required by the department.

5. a. Except as provided in subdivisions 13, 16 and 18 of this section, only lobsters measuring three and three-eighths inches or more and five and one-quarter inches or less may be taken, possessed, bought, sold, imported and exported. All measurements are from the rear end of the eye socket along a line parallel to the center line of the body shell (carapace) to the rear end of the body shell (carapace).

b. A lobster that has been damaged or mutilated to the extent that its length from the rear end of the eye socket along a line parallel to the center line of the body shell (carapace) to the rear end of the body shell (carapace) cannot be determined shall not be possessed, sold or offered for sale, trade or barter.

c. Lobsters in spawn shall not be taken or possessed at any time. Eggs shall not be removed from such lobsters.

d. The landing or possession, in the marine district, of lobster, or parts thereof, not in the shell, detached lobster tails or claws, or any other part of a lobster that has been separated from the lobster by any person who has a lobster permit issued by the state is prohibited.

e. The landing or possession of any V-notched female lobster is prohibited. This prohibition applies to all persons other than a final purchaser or consumer. V-notched female lobster shall mean any female lobster bearing a V-shaped notch (i.e. a straight-sided triangular cut without setal hairs, at least one-quarter inch in depth and tapering to a sharp point) in the flipper next to the right of the center flipper as viewed from the rear of the female lobster. V-notched female lobster also means any female which is mutilated in a manner which could hide, obscure or obliterate such a mark. The right flipper will be examined when the underside of the lobster is down and its tail is toward the person making the determination; however, the department shall have the authority to adopt by rule or regulation a modified definition of "V-notched female lobster" to reflect any changes to the definition the Atlantic States Marine Fisheries Commission may adopt.

6. No person other than the licensee shall set out, tend, haul or unduly disturb, or take or remove lobsters from, a lobster pot or trap or other commercial gear, or damage, take, remove or possess such gear. Possession of such gear without the consent of the licensee shall be considered prima facie evidence of violation of this subdivision. Provided, however, that in the event of a temporary emergency, a licensee may provide written authorization for a different licensee to haul and remove lobster from the licensee's pots or traps. A copy of such written authorization shall be filed with the department and the department shall determine what constitutes a temporary emergency and the appropriate maximum duration of a temporary emergency for the purposes of this subdivision.

7. a. Lobsters may be taken only by lobster pots, traps, otter trawls or similar devices, or by skin diving, including the use of self-contained underwater breathing apparatus (SCUBA), or by hand. The use of spears, gigs, gaffs, or other penetrating devices to take lobsters is prohibited.

b. The landing of more than one hundred lobsters per twenty-four hour period by gear or methods other than lobster traps or pots is prohibited. The landing of more than five hundred lobsters by gear or methods other than lobster traps or pots during a trip lasting five days or longer is prohibited.

8. A person shall not be issued a permit to take or land lobsters in New York state if said person had a license or permit to take or land lobsters in another state which has been suspended or revoked for an illegal act which is also an illegal act in New York state until such suspension or revocation has been terminated. Upon receipt of information from another state that a license or permit of a person to take or land lobsters has been suspended or revoked for an illegal act which is also an illegal act in New York state, said person, if he holds such a permit in New York state, shall have his New York permit suspended or revoked until such suspension or revocation by another state has been terminated.

9. On the waters of Long Island Sound and its adjoining bays, harbors and estuaries (as defined in subdivision one of this section) lobsters shall not be taken by any method from one hour after sunset to one hour before sunrise. The provisions of this subdivision shall not apply to the taking of lobsters by skin diving, including the use of self-contained underwater breathing apparatus (SCUBA), by holders of a valid resident non-commercial lobster permit.

10. A holder of a commercial lobster license may apply for a permit to fish a gill net as permitted in paragraph (b) of subdivision fifteen of section 13-0343 of this chapter. This permit is to be used for the purposes of obtaining bait fish to be used solely by the permittee to pursue his lobster fishery. Bait so taken shall not be sold.

11. In order to reduce mortality of lobster due to lost traps and pots, the department may adopt regulations requiring escape panels and vents in such traps and pots and describing their design, configuration, composition, size and any other necessary characteristics. Any such regulations shall be consistent with the Interstate Management Plan for American Lobster prepared by the Atlantic States Marine Fisheries Commission.

12. Lobsters shall not be transferred from one vessel to another vessel on the waters of Long Island Sound or its adjacent bays, harbors and estuaries, except that nothing in this section shall prohibit the unloading of lobsters, lawfully taken and possessed, in harbor at a vessel's permanent mooring to a transfer vessel for the purpose of transporting such lawfully taken and possessed lobsters to land.

13. The department may issue a permit, revocable at pleasure, to any person to import, possess, buy or sell lobsters of less than the size permitted to be taken and possessed pursuant to this section for scientific and educational purposes only.

14. Possession of a lobster trap or pot with a volume larger than twenty-two thousand nine hundred fifty cubic inches is prohibited.

15. (a) The department shall adopt regulations to implement and administer a lobster trap tag program. Such regulations shall be consistent with the specific requirements of the lobster fishery management plan adopted by the Atlantic States Marine Fisheries Commission and any other applicable federal lobster trap tag regulations. Lobster trap tags shall be issued by the department or an agent authorized by the department. The cost to affected permittees for each tag shall not be more than the cost of production and distribution of each tag and shall not exceed the sum of twenty cents.

(b) If the department administers a lobster trap tag program, any funds derived from such program and received by the department shall be deposited into the marine resource account established pursuant to subparagraph (i) of paragraph three of subdivision (a) of section eighty-three of the state finance law.

16. The department may, until December thirty-first, two thousand twenty-seven, adopt regulations for Atlantic States Marine Fisheries Commission Areas One, Two, Three, Four, Five, and Outer Cape Cod, to implement conservation measures that affect landings of lobsters, pursuant to the recommendations of the respective Area's Lobster Conservation Management Team as required by the Interstate Fishery Management Plan for American Lobster adopted by the Atlantic States Marine Fisheries Commission.

* 17. a. No lobster may be taken from Atlantic States Marine Fisheries Commission Area Six from September eighth through November twenty-eighth pursuant to the recommendations of the Area's Lobster Conservation Management Team as required by the Interstate Fishery Plan for Lobsters adopted by the Atlantic States Marine Fisheries Commission.

b. During the September eighth through November twenty-eighth closure, lobster permit holders who use lobster traps or pots shall remove lobster traps and pots from the water by September twenty-second.

c. No lobster trap or pot may be in the water from September twenty-second until November fourteenth unless the lobster permit holder also holds a permit or license that authorizes them to harvest other species from their lobster traps or pots.

d. Lobster permit holders may set unbaited lobster traps or pots beginning November fourteenth.

e. Lobster permit holders may set baited lobster traps or pots beginning November twenty-first.

* NB Repealed December 31, 2027

18. a. Lobsters greater in length than provided in subdivision 5 of this section may be imported into the state and possessed for exportation provided that:

i. The lobsters were legally taken in the state or country where the lobsters were landed, and, if applicable, the Atlantic States Marine Fisheries Commission Area where the lobsters were taken;

ii. The lobsters were placed in containers and sealed with tamper proof seals acceptable to the department in the state or country where the lobsters were landed;

iii. The lobsters remain in the sealed containers at all times while the lobsters are possessed in the state, including the placement of the sealed containers in holding tanks in the state;

iv. Each sealed container is accompanied with a label, invoice, bill of lading, purchase order or manifest identifying the state or country where the lobsters were landed, and, if applicable, the Atlantic States Marine Fisheries Commission Area where the lobsters were taken, the number of lobsters contained therein, and the date the container was sealed; and

v. The lobsters are imported, possessed and exported to or by a person licensed pursuant to section 13-0334 of this title.

b. Lobsters greater in length than provided in subdivision 5 of this section may be imported, possessed, sold or offered for sale in the state provided that:

i. The lobsters were legally taken in the state or country where the lobsters were landed, and, if applicable, the Atlantic States Marine Fisheries Commission Area where the lobsters were taken;

ii. Each lobster is tagged in the state or country where the lobster was landed with a tamper resistant tag acceptable to the department. The tag shall be attached to the lobster and identify the state or country where the lobster was landed and, if applicable, the Atlantic States Marine Fisheries Commission Area where the lobster was taken;

iii. The tag must remain on the lobster until it is sold to the end consumer in the state, including while in a holding tank in a restaurant or retail outlet;

iv. Each shipment of tagged lobsters is accompanied with a label, invoice, bill of lading, purchase order or manifest identifying the state or country and, if applicable, the Atlantic States Marine Fisheries Commission Area where the lobsters were taken, the number of lobsters contained therein, and the date or dates the lobsters were harvested; and

v. The lobsters are imported, possessed and sold or offered for sale in the state by a person licensed pursuant to section 13-0334 of this title.

c. The department may promulgate regulations necessary to implement this subdivision.

19. Lobsters, or parts thereof, not in the shell, detached lobster tails or claws, or any other part of a lobster that has been separated from the lobster may only be possessed, purchased, offered for sale, trade or barter, imported, or exported, provided:

a. The lobster was legally taken in the state or country where the lobster was landed, and, if applicable, the Atlantic States Marine Fisheries Commission Area where the lobster was taken;

b. The lobster parts are packaged with labels identifying the state, or country where the lobster was taken and if applicable, the Atlantic States Marine Fisheries Commission Area. Lobster parts must be packaged and properly labeled prior to being possessed, sold, purchased or imported in the state.

§ 13-0330. Whelks or conchs; license to take.

1. A person domiciled within the state may take whelks or conchs (*Busycon* spp.) for commercial purposes from the waters of the state upon first obtaining a license from the department.

a. The department shall prescribe and furnish forms for application for such permit.

b. The fee for such whelk license shall be thirty dollars.

2. A person not domiciled in the state who is domiciled in a state that provides reciprocal permits or licenses to persons domiciled in New York state may take whelks or conchs (*Busycon* spp.) for commercial purposes upon first obtaining a license from the department.

a. The department shall prescribe and furnish forms for application for such permit.

b. The fee for such whelk license shall be fifty dollars.

3. Whelk licenses shall be non-transferable, and shall expire on the last day of December of each year.

4. The holder of a whelk license must be present and must have the license in possession and available for inspection at all times when the privileges of the license are being exercised.

5. For purposes of this section, "commercial purposes" shall mean the

taking or landing of twenty-five or more whelks in any one day.

6. The department may, until December thirty-first, two thousand twenty-nine, fix by regulation measures for the management of whelk or conch (*Busycon* and *Busycotypus* spp.), including size limits, catch and possession limits, open and closed seasons, closed areas, restrictions on the manner of taking and landing, requirements for permits and eligibility therefor, recordkeeping requirements, requirements on the amount and type of fishing effort and gear, and requirements relating to transportation, possession and sale, provided that such regulations are no less restrictive than requirements set forth in this chapter and provided further that such regulations are consistent with the compliance requirements of applicable fishery management plans adopted by the Atlantic States Marine Fisheries Commission and with applicable provisions of fishery management plans adopted pursuant to the Federal Fishery Conservation and Management Act (16 U.S.C. § 1800 et seq.).

§ 13-0331. Crabs; permit to take; prohibited acts.

* 1. No person shall take crabs, including horseshoe crabs (*Limulus* sp.) for commercial purposes without first obtaining a permit from the department. For purposes of this subdivision, a presumption of "commercial purposes" shall be made wherein one takes or lands more than fifty crabs in any one day or sells or barter or offers for sale or barter any crabs he or she has taken. Permits shall be issued to individuals only but may be endorsed for use on a vessel, in which case it shall cover all persons on board such vessel.

* NB Effective until January 1, 2029

* 1. No person shall take crabs for commercial purposes without first obtaining a permit from the department. For purposes of this subdivision, a presumption of "commercial purposes" shall be made wherein one takes or lands more than fifty crabs in any one day or sells or barter or offers for sale or barter any crabs such person has taken. Permits shall be issued to individuals only but may be endorsed for use on a vessel, in which case it shall cover all persons on board such vessel.

* NB Effective January 1, 2029

1-a. The department may, until December thirty-first, two thousand twenty-six, fix by regulation the limit of Jonah crabs that may be taken for commercial purposes by commercial crab permit holders and by holders of New York commercial lobster licenses provided that such regulations shall be consistent with the compliance requirements of applicable fishery management plans adopted by the Atlantic States Marine Fisheries Commission and with applicable provisions of fishery management plans adopted pursuant to the Federal Fishery Conservation and Management Act (16 U.S.C. section 1800 et seq.).

2. A person domiciled within the state may take crabs, for commercial purposes, from the waters of the state upon first obtaining a crabbing permit from the department.

a. The department shall prescribe and furnish forms for application for such permit.

b. The fee for such crabbing permit shall be thirty dollars.

3. A person not domiciled in the state who is domiciled in a state that provides reciprocal permits or licenses to persons domiciled in New York state may take crabs, for commercial purposes, upon first obtaining a crabbing permit from the department.

a. The department shall prescribe and furnish forms for application for such permit.

b. The fee for such crabbing permit shall be fifty dollars.

4. Permits are not transferable and shall expire on December 31 following the date of issue. If it appears in the public interest, the department may suspend or cancel such permits without prior notice.

5. Female crabs with eggs visible thereon, commonly called sponge crabs, or any female crabs from which the egg pouch or bunion has been removed, shall not be taken, possessed, transported or offered for sale

at any time.

6. Crabs shall not be taken by dredging in the waters of Richmond county; Hempstead Bay and South Oyster Bay in the county of Nassau; or in the waters of Great South Bay west of Captree bridge in the county of Suffolk.

* 7. The department may, until December thirty-first, two thousand twenty-nine, fix by regulation measures for the management of crabs of any kind including horseshoe crabs (*Limulus* sp.), including minimum and maximum size limits, catch and possession limits, open and closed seasons including lunar closures, closed areas, restrictions on the manner of taking and landing including a prohibition on the harvest of crabs in amplexus, requirements for permits and eligibility therefor, recordkeeping requirements, requirements on the amount and type of fishing effort and gear, and requirements relating to transportation, possession and sale, provided that such regulations are no less restrictive than requirements set forth in this chapter and provided further that such regulations are consistent with the compliance requirements of applicable fishery management plans adopted by the Atlantic States Marine Fisheries Commission and with applicable provisions of fishery management plans adopted pursuant to the Federal Fishery Conservation and Management Act (16 U.S.C. § 1800 et seq.).

* NB Effective until January 1, 2029

* 7. The department may, until December thirty-first, two thousand twenty-nine, fix by regulation measures for the management of crabs of any kind, excluding horseshoe crabs (*Limulus* sp.), including minimum and maximum size limits, catch and possession limits, open and closed seasons including lunar closures, closed areas, restrictions on the manner of taking and landing including a prohibition on the harvest of crabs in amplexus, requirements for permits and eligibility therefor, recordkeeping requirements, requirements on the amount and type of fishing effort and gear, and requirements relating to transportation, possession and sale, provided that such regulations are no less restrictive than requirements set forth in this chapter and provided further that such regulations are consistent with the compliance requirements of applicable fishery management plans adopted by the Atlantic States Marine Fisheries Commission and with applicable

provisions of fishery management plans adopted pursuant to the Federal Fishery Conservation and Management Act (16 U.S.C. § 1800 et seq.).

* NB Effective January 1, 2029

* 8. The department shall, when adopting regulation measures for the management of horseshoe crabs (*Limulus* sp.) pursuant to subdivision seven of this section, consult with any town, village or county that requests any municipal property be subject to a harvest closure.

* NB Effective until January 1, 2029

* 8. No person shall take horseshoe crabs (*Limulus* sp.), including for commercial or biomedical purposes, from the waters of this state. Provided however that this section shall not apply to the taking of horseshoe crabs (*Limulus* sp.) for bona fide scientific or educational purposes including, but not limited to, public or not-for-profit zoos and aquaria, as determined by the commissioner pursuant to rules and regulations.

* NB Effective January 1, 2029

§ 13-0333. Menhaden; prohibited acts.

Menhaden (*Brevoortia tyrannus*) from which oil or meal is made, subject to the provisions of section 13-0343, may not be taken from the waters of the marine district with a purse seine; provided however, that the department shall have the authority to issue a temporary order allowing the use of purse seines for taking menhaden, pursuant to temporary permits, if the department determines that there is an imminent risk of a fish kill resulting from the presence of unusually large amounts of menhaden in waters of the marine and coastal district in or adjacent to waterbody segments that are characteristic of locations likely to experience fish kills or that have a history of hypoxia. Prior to issuing such temporary order, the department shall first consider other fishing methods authorized under this chapter, including but not limited to beach seines, and shall only issue a temporary order if the department determines that such other fishing methods will not sufficiently mitigate the conditions precipitating the potential fish kill. Such order shall include the department's justification for the use of purse seines, time, geography, and poundage specifications, and

any other conditions that the department deems appropriate and shall be posted on the department's website. Following the adoption of such an order, the department may issue temporary permits, not to exceed fourteen days and subject to the conditions of the department's temporary order, allowing for the harvest of menhaden.

§ 13-0334. Marine and coastal district food fish and crustacea dealers and shippers license.

1. No person shall purchase marine food fish or crustacea, whether to be used as food or bait, directly from the person taking such marine food fish or crustacea for the purpose of resale trade or barter without a valid food fish and crustacea dealers and shippers license. No person shall operate a facility for packing, holding or storing such marine food fish or crustacea prior to consignment, transport or sale without a valid food fish and crustacea dealers and shippers license.

2. No person shall ship, transport or traffic in marine food fish or crustacea for resale, trade or barter to persons other than the final consumer within the state or export food fish or crustacea landed in New York to outside the state without a valid food fish and crustacea dealers and shippers license. No such license shall be required of common carriers who transport marine food fish or crustacea. Such common carrier must carry and have ready for inspection any bill of consignment, bill of lading or other documentation showing thereon the name and address of the consignee, name and address of the shipper, the date of the shipment and the quantity of each species shipped. For purposes of this section, "common carrier" shall mean persons engaged solely in the transport of food fish or crustaceans which have been consigned or sold by a licensed harvester or by a licensed dealer and shipper to a licensed dealer and shipper within the state or to another party outside the state. A common carrier shall hold no title, ownership or financial interest in the food fish or crustacean being transported. No such license shall be required of a person who is the holder of a food fish license, a lobster license or a blue-claw crab license issued pursuant to section 13-0335, 13-0329 or 13-0331, respectively, while

transporting the species which he or she has lawfully and personally taken. For purposes of this section, "landed" means the bringing to any shore food fish or crustacea taken by a holder of a license issued pursuant to this article or the transfer of the catch taken pursuant to this article from a vessel to any other vessel or to the land or to any pier, wharf, dock or other similar structure.

3. No person who is the holder of a commercial food fish license or a commercial lobster license or a commercial crab license shall sell, trade or barter marine food fish or crustacea in New York state except to the holder of a marine and coastal district food fish and crustacea dealers and shippers license. Provided, however, that persons who possess commercial food fish, lobster, or crab licenses may sell the marine food fish or crustacea they are authorized to take for commercial purposes directly to the consumer of such marine food fish or crustacea and that such licensed harvesters shall report to the department such direct sales to consumers pursuant to paragraph a of subdivision one of section 13-0342.

4. The fee for a food fish and crustacea dealers and shippers license shall be two hundred fifty dollars and shall cover all persons employed by the licensee. Licenses issued pursuant to this section shall be valid for a single business address, shall be nontransferable and shall expire on the thirty-first day of December of each year.

5. No person licensed as a dealer or shipper shall purchase or ship marine food fish or crustacea directly from the taker of marine food fish or crustacea unless the taker presents the appropriate valid license to the person making the purchase. No person who operates a facility for the packing, holding or storing of marine food fish or crustacea prior to consignment, transport or sale shall accept such product without requiring the taker to provide his or her name, address and appropriate valid license number, the date, and quantities of product in the transaction.

6. A licensed dealer or shipper may only import, export, possess, or offer for sale, barter, or trade, lobsters greater in length than

provided by subdivision 5 of section 13-0329 of this title if:

a. The licensed dealer or shipper has notified the department in writing prior to taking such action on a form prescribed by the department; and

b. The lobsters are in a secured container in accordance with paragraph a of subdivision 18 of section 13-0329 of this title or tagged in accordance with paragraph b of subdivision 18 of section 13-0329 of this title.

7. No person licensed as a dealer or shipper may import, export, possess, or offer for sale, barter, trade, lobsters, or parts thereof, not in the shell, detached lobster tails or claws, or any other part of a lobster that has been separated from the lobster except as authorized by subdivision 19 of section 13-0329 of this title.

§ 13-0335. Food fish; license; prohibited acts.

1. A person who is domiciled in the state may take and land food fish for commercial purposes, upon obtaining a marine commercial food fishing license, except as prohibited by this chapter, from the waters of the marine and coastal district and may land food fish taken from waters outside New York state boundaries for commercial purposes. For purposes of this section "commercial purposes" shall mean the taking of food fish by any method for subsequent sale, trade or barter or to offer for sale, trade or barter and the taking of food fish when setting, maintaining, operating or using nets, except cast nets, not in excess of twenty feet in diameter, when operated by hand for the purposes of taking only Atlantic menhaden (*Brevoortia tyrannus*) and mullets (*Mugil spp*), for recreational purposes only, seines not larger than thirty feet long or four feet deep or lift nets not larger than sixteen square feet; traps, except bait traps not more than thirty inches in length; combs; pots; or hook and line, except by angling. The fee for such license shall be two hundred fifty dollars, and shall cover all persons employed by the licensee while engaged in such employment of commercial fishing.

2. A person not domiciled in the state may take food fish, except as prohibited by this chapter, from the waters of the marine and coastal district and may land food fish taken from outside New York state boundaries for commercial purposes upon first obtaining a commercial fishing license. The fee for such license shall be one thousand two hundred fifty dollars, and shall cover all persons employed by the licensee while engaged in such employment of commercial fishing. Such licenses shall be issued only to persons domiciled in states offering reciprocal fishing privileges to persons domiciled in New York state and which implemented the size limits and other management strategies recommended in fisheries management plans or amendments thereto adopted by the Atlantic States Marine Fisheries Commission or the regional management councils as provided in the Fisheries Conservation and Management Act (16 USC 1800 et seq.) which have been implemented in New York State. Such license shall only be issued during the month of January of each year.

3. A person may land food fish, except as prohibited by this chapter and except blackfish or tautog (*tautoga onitis*), taken from waters outside the marine and coastal district for commercial purposes upon first obtaining a marine and coastal district food fish landing license. The fee for such marine and coastal district food fish landing license shall be five hundred dollars and shall cover all persons employed by the licensee while engaged in such employment of landing food fish.

4. Licenses issued under this section shall be non-transferable and shall expire on the last day of December of each year. Such licenses shall be issued annually and the department shall not limit the number of licenses issued. The department may, in its discretion and after an opportunity for a hearing, revoke any such license of any person who has been convicted of a violation of title three of this article or who signs an acknowledgment of such violation for the purpose of effecting a settlement by civil compromise or by stipulation. The application for any such license by a person under the age of sixteen shall be signed by his parent or guardian who shall thereby consent to its issuance.

5. It shall be unlawful for any person to render food fish into fertilizer.

6. No person shall intentionally disturb or without the consent of the licensee take or remove fish or crustacea from any legally set or operated nets or other commercial gear, or damage, take, remove or possess any such net or gear. Possession of any such net or gear without the consent of the licensee shall be considered prima facie evidence of a violation of this subdivision.

7. The holder of any license issued pursuant to this section shall display the license and/or have the license available for inspection according to such rules and regulations as the department may promulgate.

8. The provisions of sections 13-0311, 13-0329, 13-0331 and 13-0333 of this title shall be applicable to lobsters, crabs, shellfish and menhaden and no license therefor shall be required pursuant to this section.

9. Notwithstanding the provisions of subdivision one of this section, a person may, upon obtaining a marine bait permit, take marine bait fish and sell such fish as bait at retail only, subject to the following restrictions:

a. Only Atlantic menhaden, silversides (*Minidia* spp.) and killifish (*Fundulus* spp.) may be taken and sold pursuant to this subdivision.

b. Bait fish to be sold pursuant to this subdivision may be taken only using cast nets not larger than twenty feet in diameter, seines not larger than thirty feet in length or four feet in depth, or lift nets not larger than sixteen square feet or bait traps not more than thirty inches in length.

c. Marine bait permits shall be available to any person at a fee of fifty dollars, shall be non-transferable, and shall expire on December thirty-first of the year of issue and shall identify the business name

and address of the single retail business at which the bait taken pursuant to the permit may be sold.

d. The holder of a marine bait fish permit must be present and have the permit in possession and available for inspection at all times when the bait harvesting privileges of the permit are being exercised.

§ 13-0336. Marine and coastal district party and charter boat license.

1. No owner or operator of a party boat or charter boat shall carry recreational fishing passengers in the marine and coastal district or land fish taken outside the territorial waters of the state without holding a party or charter boat license issued by the department for an annual fee of two hundred fifty dollars and a recreational marine fishing registration issued by the department. Such license and registration shall be issued only to persons domiciled in the state or in a state which affords reciprocal fishing privileges to persons domiciled in New York. Such license and registration shall be available on the vessel at all times. For purposes of this subdivision, party boats and charter boats are vessels used to carry passengers for hire wherein a fee is charged, either directly or indirectly, for the purpose of taking or attempting to take marine fish for recreational purposes.

2. Party and charter boat licenses shall expire on December thirty-first of each year.

§ 13-0337. Return of fish, crustacea and other animals to the water.

1. If any fish or crustacea are unintentionally taken contrary to any provisions of the Fish and Wildlife Law, they shall be returned to the water at once, without unnecessary injury.

2. Starfish, drills (*Urosalpinx cinerea*), periwinkle (*Litorinia*) and drum fish (*Pogonias chromis*) when taken shall not be returned alive to the waters of the state.

§ 13-0338. Sharks; department authority; finning prohibited.

1. For purposes of this section:

a. "Shark" means any species of the subclass Elasmobranchii except species in the order Batoidei;

b. "Finning" means the removal of a fin or fins from a shark and not retaining the remainder of the shark's carcass; and

c. "Shark fin" means the raw, dried or otherwise processed detached fin including the tail.

2. No person shall engage in finning on the waters of the marine and coastal district.

3. a. No person shall possess, sell, offer for sale, trade or distribute a shark fin; provided, however, that this prohibition shall not apply to any shark fin that was taken from a spiny dogfish (*Squalus acanthias*) or a smooth dogfish (*Mustelus canis*) lawfully caught by a licensed commercial fisherman.

b. A shark fin may be possessed by any person if the shark was lawfully caught and the person has a recreational marine fishing registration or a license or permit from the department for bona fide scientific research or educational purposes.

4. The department may, until December thirty-first, two thousand twenty-nine, fix by regulation measures for the management of sharks, including size limits, catch and possession limits, open and closed seasons, closed areas, restrictions on the manner of taking and landing, requirements for permits and eligibility therefor, recordkeeping requirements, requirements on the amount and type of fishing effort and gear, and requirements relating to transportation, possession and sale, provided that such regulations are no less restrictive than requirements

set forth in this chapter and provided further that such regulations are consistent with the compliance requirements of applicable fishery management plans adopted by the Atlantic States Marine Fisheries Commission and with applicable provisions of fishery management plans adopted pursuant to the Federal Fishery Conservation and Management Act (16 U.S.C. §1800 et seq.).

* 5. Sharks, excluding spiny dogfish, shall not be taken for commercial or recreational purposes by baited hooking except with the use of non-stainless steel non-offset circle hooks. In addition, no person shall conduct, sponsor or participate in any shark tournament unless said tournament's rules and regulations require the exclusive use of non-stainless steel non-offset circle hooks.

* NB Repealed December 31, 2026

§ 13-0339. Marine fish; size limits of marine species; sale of marine species.

1. a. The taking of fish with nets in the marine and coastal district is governed by sections 13-0333, 13-0335, 13-0341, 13-0343, 13-0347 and 11-1521, and regulations adopted pursuant to sections 11-0303, 11-1303, 13-0338, 13-0339-a, 13-0340, 13-0340-a, 13-0340-b, 13-0340-c, 13-0340-d, 13-0340-e, 13-0340-f and 13-0340-g of this chapter. The taking of fish by other means, in the marine and coastal district, is governed by title 13 of article 11 of the Fish and Wildlife Law, subject to restrictions in section 13-0343 as to certain waters, and to provisions of sections 13-0347 and 11-1521 and regulations adopted pursuant to section 11-0303 of this chapter as to striped bass and sections 13-0338, 13-0339-a, 13-0340, 13-0340-a, 13-0340-b, 13-0340-c, 13-0340-d, 13-0340-e, 13-0340-f and 13-0340-g as to other species of marine fish. The taking, and sale or taking for sale, of certain bait fish are governed by section 11-1315 of this chapter.

b. Open seasons, minimum size limits and catch limits for fish other than the marine species named in subdivisions 2 and 3 of this section are specified by regulations adopted pursuant to sections 11-0303, 11-1303, 13-0338, 13-0339-a, 13-0340, 13-0340-a, 13-0340-b, 13-0340-c,

13-0340-d, 13-0340-e, 13-0340-f and 13-0340-g of this chapter. All shortnose sturgeon irrespective of size and all Atlantic sturgeon under the size limits prescribed by regulations adopted pursuant to section 11-1303 of this chapter taken in gill nets shall be immediately returned to the water without unnecessary injury. Other fish named by regulations adopted pursuant to sections 11-0303, 11-1303, 13-0338, 13-0339-a, 13-0340, 13-0340-a, 13-0340-b, 13-0340-c, 13-0340-d, 13-0340-e, 13-0340-f and 13-0340-g of this chapter and under the size limits prescribed in such regulations, shall not be bought, sold or trafficked in.

c. The sale, possession and transportation of fish, other than the marine species named in subdivisions 2 and 3 of this section are governed by sections 11-1319, 11-1521 and 13-0347, and regulations adopted pursuant to sections 11-0303, 11-1303, 13-0338, 13-0339-a, 13-0340, 13-0340-a, 13-0340-b, 13-0340-c, 13-0340-d, 13-0340-e, 13-0340-f and 13-0340-g of this chapter.

2. Fluke or summer flounder (*Paralichthys dentatus*) and southern flounder (*Paralichthys lethostigma*) less than fourteen inches in length, weakfish (*Cynoscion regalis*) less than twelve inches in length, Atlantic cod (*Gadus morhua*) less than nineteen inches in length, porgy or scup (*Stenotomus chrysops*) less than seven inches, black sea bass (*Centropristis striata*) less than nine inches, and winter flounder (*Pleuorenetes americanus*) less than eleven inches in length may not be taken by angling for recreational purposes.

3. Fluke or summer flounder (*Paralichthys dentatus*) and southern flounder (*Paralichthys lethostigma*) less than fourteen inches; blue fish (*Pomatomus saltatrix*) less than nine inches; porgy or scup (*Stenotomus chrysops*) less than nine inches; weakfish (*Cynoscion regalis*) less than twelve inches; mackerel (*Scomber scombrus*) less than seven inches; black sea bass (*Centropristis striata*) less than nine inches; Atlantic cod (*Gadus morhua*) less than nineteen inches; winter flounder (*Pleuorenetes americanus*) less than twelve inches, may not be taken or possessed for commercial purposes or transported for commercial purposes nor bought, sold or offered for sale. For purposes of this subdivision, commercial

purposes includes use of any form of net, comb, dredge or hook and line, except angling.

4. All length measurements in this section shall be taken as the total length which is defined as the longest straight-line measurement from the most anterior or forward part of the fish with the jaws closed to the tip of the tail. The tail rays of a fish with a forked tail may be squeezed together to give the longest overall measurement.

5. Blue marlin (*Makaira nigricans*), white marlin (*Tetrapturus albidus*), sailfish (*Istiophorus platypterus*), and longbill spearfish (*Tetrapturus pfluegeri*) shall not be bought, sold or offered for sale. Striped marlin (*Tetrapturus audax*), black marlin (*Makaira indica*), shortbill spearfish (*Tetrapturus angustirostris*) shall not be bought, sold or offered for sale unless identified and tagged as such prior to entry into the state. Such identification and tag shall include at a minimum, the species of billfish and the place of initial landing.

§ 13-0339-a. Atlantic cod (*Gadus morhua*), Atlantic sturgeon (*Acipenser oxyrinchus*), shortnose sturgeon (*Acipenser brevirostrum*), American eel (*Anguilla rostrata*), Atlantic herring (*Clupea harengus*), American shad (*Alosa sapidissima*), alewife (*Alosa pseudoharengus*), blueback herring (*Alosa aestivalis*), squid (cephalopoda), and hickory shad (*Alosa mediocris*).

1. The department may fix, by regulation, measures for the management of the following species:

a. Atlantic cod (*Gadus morhua*) until December thirty-first, two thousand twenty-nine,

b. American eel (*Anguilla rostrata*) until December thirty-first, two thousand twenty-nine,

c. Atlantic and shortnose sturgeon (*Acipenser oxyrinchus* and

brevirostrum) until December thirty-first, two thousand twenty-nine,

d. Atlantic herring (*Clupea harengus*) until December thirty-first, two thousand twenty-nine,

e. American shad (*Alosa sapidissima*) until December thirty-first, two thousand twenty-eight,

f. alewife (*Alosa pseudoharengus*) until December thirty-first, two thousand twenty-eight,

g. blueback herring (*Alosa aestivalis*) until December thirty-first, two thousand twenty-nine,

h. squid (cephalopoda) until December thirty-first, two thousand twenty-nine, and

i. hickory shad (*Alosa mediocris*) until December thirty-first, two thousand twenty-eight.

2. Such management regulations may include size limits, catch and possession limits, open and closed seasons, closed areas, restrictions on the manner of taking and landing, requirements for permits and eligibility therefor, recordkeeping requirements, requirements on the amount and type of fishing effort and gear, and requirements relating to transportation, possession and sale, provided that such regulations are no less restrictive than requirements set forth in this chapter and provided further that such regulations are consistent with the compliance requirements of applicable fishery management plans adopted by the Atlantic States Marine Fisheries Commission and with applicable provisions of fishery management plans adopted pursuant to the Federal Fishery Conservation and Management Act (16 U.S.C. § 1800 et seq.).

§ 13-0340. Bluefish (*Pomatomus saltatrix*).

The department may, until December thirty-first, two thousand

twenty-eight, fix by regulation measures for the management of bluefish (*Pomatomus saltatrix*), including size limits, catch and possession limits, open and closed seasons, closed areas, restrictions on the manner of taking and landing, requirements for permits and eligibility therefor, recordkeeping requirements, requirements on the amount and type of fishing effort and gear, and requirements relating to transportation, possession and sale, provided that such regulations are no less restrictive than requirements set forth in this chapter and provided further that such regulations are consistent with the compliance requirements of applicable fishery management plans adopted by the Atlantic States Marine Fisheries Commission and with applicable provisions of fishery management plans adopted pursuant to the Federal Fishery Conservation and Management Act (16 U.S.C. § 1800 et seq.).

§ 13-0340-a. Weakfish (*Cynoscion regalis*).

The department may, until December thirty-first, two thousand twenty-eight, fix by regulation measures for the management of weakfish (*Cynoscion regalis*), including size limits, catch and possession limits, open and closed seasons, closed areas, restrictions on the manner of taking and landing, requirements for permits and eligibility therefor, recordkeeping requirements, requirements on the amount and type of fishing effort and gear, and requirements relating to transportation, possession and sale, provided that such regulations are no less restrictive than requirements set forth in this chapter and provided further that such regulations are consistent with the compliance requirements of applicable fishery management plans adopted by the Atlantic States Marine Fisheries Commission and with applicable provisions of fishery management plans adopted pursuant to the Federal Fishery Conservation and Management Act (16 U.S.C. § 1800 et seq.).

§ 13-0340-b. Fluke - summer flounder (*Paralichthys dentatus*).

The department may, until December thirty-first, two thousand twenty-nine, fix by regulation measures for the management of fluke or

summer flounder (*Paralichthys dentatus*), including size limits, catch and possession limits, open and closed seasons, closed areas, restrictions on the manner of taking and landing, requirements for permits and eligibility therefor, recordkeeping requirements, requirements on the amount and type of fishing effort and gear, and requirements relating to transportation, possession and sale, provided that such regulations are no less restrictive than requirements set forth in this chapter and provided further that such regulations are consistent with the compliance requirements of applicable fishery management plans adopted by the Atlantic States Marine Fisheries Commission and with applicable provisions of fishery management plans adopted pursuant to the Federal Fishery Conservation and Management Act (16 U.S.C. § 1800 et seq.).

§ 13-0340-c. Winter flounder (*Pleurenectes americanus*).

The department may, until December thirty-first, two thousand twenty-nine, fix by regulation measures for the management of winter flounder (*Pleurenectes americanus*), including size limits, catch and possession limits, open and closed seasons, closed areas, restrictions on the manner of taking and landing, requirements for permits and eligibility therefor, recordkeeping requirements, requirements on the amount and type of fishing effort and gear, and requirements relating to transportation, possession and sale, provided that such regulations are no less restrictive than requirements set forth in this chapter and provided further that such regulations are consistent with the compliance requirements of applicable fishery management plans adopted by the Atlantic States Marine Fisheries Commission and with applicable provisions of fishery management plans adopted pursuant to the Federal Fishery Conservation and Management Act (16 U.S.C. § 1800 et seq.).

§ 13-0340-d. Blackfish or tautog (*Tautoga onitis*).

1. The department may, until December thirty-first, two thousand twenty-eight, fix by regulation measures for the management of blackfish

(*Tautoga onitis*), including size limits, catch and possession limits, open and closed seasons, closed areas, restrictions on the manner of taking and landing, requirements for permits and eligibility therefor, recordkeeping requirements, requirements on the amount and type of fishing effort and gear, and requirements relating to transportation, possession and sale, provided that such regulations are no less restrictive than requirements set forth in this chapter and provided further that such regulations are consistent with the compliance requirements of applicable fishery management plans adopted by the Atlantic States Marine Fisheries Commission and with applicable provisions of fishery management plans adopted pursuant to the Federal Fishery Conservation and Management Act (16 U.S.C. § 1800 et seq.).

2. The commercial possession limit for blackfish (*tautog*) shall be 25 per trip per vessel.

§ 13-0340-e. Scup (*Stenotomus chrysops*).

The department may, until December thirty-first, two thousand twenty-nine, fix by regulation measures for the management of scup (*Stenotomus chrysops*), including size limits, catch and possession limits, open and closed seasons, closed areas, restrictions on the manner of taking and landing, requirements for permits and eligibility therefor, recordkeeping requirements, requirements on the amount and type of fishing effort and gear, and requirements relating to transportation, possession and sale, provided that such regulations are no less restrictive than requirements set forth in this chapter and provided further that such regulations are consistent with the compliance requirements of applicable fishery management plans adopted by the Atlantic States Marine Fisheries Commission and with applicable provisions of fishery management plans adopted pursuant to the Federal Fishery Conservation and Management Act (16 U.S.C. § 1800 et seq.).

§ 13-0340-f. Black sea bass (*Centropristis striata*).

The department may, until December thirty-first, two thousand twenty-nine, fix by regulation measures for the management of black sea bass (*Centropristis striata*), including size limits, catch and possession limits, open and closed seasons, closed areas, restrictions on the manner of taking and landing, requirements for permits and eligibility therefor, recordkeeping requirements, requirements on the amount and type of fishing effort and gear and requirements relating to transportation, possession and sale, provided that such regulations are no less restrictive than requirements set forth in this chapter and provided further that such regulations are consistent with the compliance requirements of applicable fishery management plans adopted by the Atlantic States Marine Fisheries Commission and with applicable provisions of fishery management plans adopted pursuant to the Federal Fishery Conservation and Management Act (16 U.S.C. § 1800 et seq.).

§ 13-0340-g. Monkfish (*Lophius americanus*, *Lophius reticulatus* and *Lophius gastrophysus*).

The department may, until December thirty-first, two thousand twenty-seven, fix by regulation measures for the management of monkfish (*Lophius americanus*, *Lophius reticulatus* and *Lophius gastrophysus*), including size limits, catch and possession limits, open and closed seasons, closed areas, restrictions on the manner of taking and landing, requirements for permits and eligibility therefor, recordkeeping requirements, requirements on the amount and type of fishing effort and gear, and requirements relating to transportation, possession and sale, provided that such regulations are no less restrictive than requirements set forth in this chapter and provided further that such regulations are consistent with the compliance requirements of applicable fishery management plans adopted by the Atlantic States Marine Fisheries Commission and with applicable provisions of fishery management plans adopted pursuant to the Federal Fishery Conservation and Management Act (16 U.S.C. § 1800 et seq.).

§ 13-0340-h. Atlantic bonito (*Sarda sarda*) and false albacore (*Euthynnus*

alletteratus).

The department may, until December thirty-first, two thousand twenty-nine, fix by regulation measures for the management of Atlantic bonito (*Sarda sarda*) and false albacore (*Euthynnus alletteratus*) including size limits, catch and possession limits, open and closed seasons, closed areas, restrictions on the manner of taking and landing, requirements for permits and eligibility therefor, recordkeeping requirements, requirements on the amount and type of fishing effort and gear, and requirements relating to transportation, possession and sale, provided that such regulations are no less restrictive than requirements set forth in this chapter and provided further that such regulations are consistent with the compliance requirements of applicable fishery management plans adopted by the Atlantic States Marine Fisheries Commission and with applicable provisions of fishery management plans adopted pursuant to the Federal Fishery Conservation and Management Act (16 U.S.C. § 1800 et seq.).

§ 13-0341. Trawls; use prohibited in certain waters.

For the purposes of this chapter, a trawl shall be defined as a net which is towed or dragged through the water column, capturing fish by straining the water, but shall not include a seine which is used to encircle fish. The term trawl shall include but not be limited to the otter trawl, the beam trawl, the Paranzella or two-boat trawl, the pair trawl, the Danish seine and the Scottish seine. Trawls shall not be set or used in the water areas of the marine district described in the following subdivisions:

1. In the waters of the county of Richmond and in the counties of Kings or Queens, northerly and westerly of a line from the sea end of the breakwater at Rockaway Point to Romer Shoal lighthouse, including Jamaica Bay and its adjacent bays, inlets, creeks and basins.

2. a. In the Atlantic Ocean within one-half mile of the coastline and in all connecting tidal waters inshore of the coastline, from Rockaway

Inlet Jetty at Rockaway Point to the Town of Babylon bathing pavilion at Cedar Island Beach, and in all tidal waters inshore of a line from the Town of Babylon bathing pavilion to the sea buoy (BW S-I, Bell) at the entrance of Fire Island Inlet and thence to the seaward end of Fire Island Inlet Jetty at Democrat Point.

b. Seaward of Rockaway Inlet within an arc with a radius of one and one-half miles measured from the point at 40°32.4' N latitude, 73°56.5' W longitude, which is at or near the most southerly terminus of the Rockaway Inlet Jetty at Rockaway Point.

c. Seaward of East Rockaway Inlet within an arc with a radius of one and one-half miles measured from the point at 40°34.9' N latitude, 73°45.3' W longitude, which is at or near the most southerly terminus of the East Rockaway Inlet Jetty at Silver Point.

d. Seaward of Jones Inlet within an arc with a radius of two miles measured from the point at 40°34.4' N latitude, 73°34.6' W longitude, which is at or near the most southerly terminus of the East (Short Beach side) Inlet Jetty, during the period January 1 through June 14.

e. Seaward of Fire Island Inlet within an arc with a radius of two miles measured from the point at 40°37.2' N latitude, 73°18.4' W longitude, which is at or near the most southerly terminus of the Fire Island Inlet Jetty at Democrat Point, during the period January 1 through June 14.

3. In Mecox Inlet within one-half mile of the narrowest part of the mouth of such inlet and seaward of Moriches and Shinnecock Inlets within separate arcs each with a radius of one and one-half miles measured from a point for Moriches Inlet at 40°45.4' N latitude, 72°45.2' W longitude, and for Shinnecock Inlet at 40°50.2' N latitude, 72°28.3' W longitude, which points are midway between the points at the most southerly termini of the east and west jetties at the entrance to each inlet.

4. In the Harlem River and the East River east of the Robert F. Kennedy Bridge and in Long Island Sound west of a line drawn from

Hewlett's (King's) Point to the north end of Hart Island, thence to the south end of Glen Island, and in their adjacent bays, coves, creeks and confluent waters.

5. In Flanders Bay, Great Peconic Bay, Little Peconic Bay, Noyac Bay and Shelter Island Sound, including all waters forming a part thereof or tributary thereto, lying westerly of an imaginary line extending from the most southerly point of Orient State Park to the most easterly point of Shelter Island, also known as Ram Head, and from this point in a generally southerly direction to the most northerly point of Cedar Point, including all of Orient Harbor, Hallock Bay and Northwest Harbor.

6. In the county of Suffolk in the waters lying westerly of an imaginary line extending in a southerly direction from the most easterly end of Plum Island to the most northerly end of Gardiners Island, and westerly of Gardiners Island, and westerly of a line extending in a southerly direction from the most southerly end of Gardiners Island to Goff Point; provided, however, that vessels and motorboats owned and operated by citizens who are residents of the state may be used in such waters in connection with the operation of trawls and other types of nets towed by such boats and vessels. Nothing in this subdivision shall be construed as legalizing the operation of any trawls in the waters described in subdivision 5 of this section.

7. In Long Island Sound, including all waters forming a part thereof or which are tributary thereto: a. west of an imaginary line from the New York-Connecticut boundary shore line extending easterly and southerly to Eaton's Point Neck on Long Island from April 1 to November 1.

b. South of a line from Hewlett Point on Great Neck eastward to Sands Point on Manhasset Neck, then to Matinick Point, then to Oak Neck Point, then to Rocky Point at Centre Island, then to Lloyd Point, then to Eaton's Neck Point, buoy 13, then to buoy "1" (privately maintained) off the Northport Power Plant, then to buoy "NR" off the north of the Nissequogue river, then to buoy "1" off Stony Brook Harbor, and then to Crane Neck Point.

c. In the Nissequogue River.

d. Within Stony Brook Harbor.

e. Within one-half mile of the shore between an imaginary line extending north from Crane Neck Point and an imaginary line extending north from the shore intersect of the Riverhead-Brookhaven town line near Wading River, including all bays, harbors and tributaries landward thereof, including Port Jefferson Harbor, Conscience Bay, Setauket Harbor and Mount Sinai Harbor.

f. Within one mile of the shore of Fishers Island, or between the shore of Fishers Island and the Connecticut-New York State boundary line wherever such boundary line is within less than one mile of the shore of Fishers Island.

8. In the waters of the Great South Bay, Moriches Bay and Shinnecock Bay, including all tidal waters and all waters forming a part thereof or tributary thereto.

9. The department is authorized to adopt regulations prescribing the minimum size net mesh, and the manner in which such nets may be possessed and used, in trawl fisheries for summer and winter flounder.

§ 13-0342. Marine fisheries data.

1. a. The department is authorized to adopt regulations which require reporting of catch, effort, area fished, gear used, by-catch, and volume and value of product purchased from fishermen, by holders of all categories of commercial food fish, lobster, and crab fishing and landing licenses, marine and coastal district food fish and crustacea dealers and shippers licenses, marine and coastal district party and charter boat license, menhaden licenses, shellfish shippers permits and diggers permits.

b. Beginning May first, nineteen hundred ninety-nine and every May first thereafter, the department shall submit a report to the legislature on the data collected pursuant to this section. Such report shall include the catch, effort, area fished, gear used, by-catch, and volume and value of product purchased from fishermen, by holders of all categories of commercial food fish, lobster, and crab fishing and licenses, marine and coastal district party and charter boat licenses, menhaden licenses, shellfish shippers permits and diggers permits.

2. The department may, by rule and regulation, provide that data collected by the department or available to the department shall be confidential and shall not be disclosed except when required under court order. The department may, by rule and regulation, prescribe such procedures as may be necessary to preserve such confidentiality except that the department may release or make public any statistics in an aggregate or summary form which does not directly or indirectly disclose the identity or business of any person who submits such statistics.

§ 13-0343. Nets other than trawls; restrictions on use of nets and trawls.

1. Nets other than trawls shall not be placed, maintained or used in any of the following waters except: (a) as permitted by this section; (b) landing nets may be used in completing the catch of fish hooked by angling; and (c) cast nets, not in excess of twenty feet in diameter, operated by hand may be used to take Atlantic menhaden (*Brevoortia tyrannus*) and mullets (*Mugil spp*), except in the waters described in subdivisions four, eight and twelve of this section. The use of cast nets shall be limited to one per boat.

2. In the waters of the marine district in the county of Richmond purse seines may not be used to take menhaden; and nets of not more than ten feet in length, operated by hand, may be used to take minnows and shrimp for bait.

3. In the Harlem River and the East River east of the Robert F.

Kennedy Bridge and in Long Island Sound west of a line drawn from Hewlett's (King's) Point to the north end of Hart Island, thence to the south end of Glen Island, and in their adjacent bays, coves, creeks and confluent waters, only such nets as are used to take lobsters or crabs may be used.

4. In the Nissequogue River fish may be taken by angling only except that nets of not more than twenty feet in length and four feet in depth, operated by hand, may be used to take bait fish during daylight hours only.

5. a. In the inland tidal waters within the town of Hempstead, no person shall at any time engage in eel dredging by the use of nets accompanied by cutting boards, chains or other similar devices.

b. In the inland tidal waters within the town of Hempstead westerly of the Wantagh State Parkway causeway, nets shall not be used except nets, not over forty feet long and four feet deep, may be used to take minnows or shrimp for bait.

6. In Jamaica Bay and its adjacent creeks, inlets and basins, nets shall not be used inshore of a line from the beacon at Rockaway Point jetty to the municipal bath houses on Coney Island, except that minnows and shrimp may be taken by hand nets not over forty feet long and four feet deep and except that nets other than trawls may be used from October 10 to December 31 in that part of such area southerly of a line from the lighted beacon at Manhattan Beach to the most southerly point on Barren Island and westerly of the Marine Parkway bridge across Rockaway Inlet.

7. In Gravesend Bay, and in the Atlantic Ocean within one-half mile of the shore from Norton's point to the municipal bath houses on Coney Island and within one-half mile of the shore from the Rockaway Inlet jetty at Rockaway Point to the East Rockaway Inlet jetty at Silver Point, nets shall not be used except as follows:

a. To take minnows or shrimp for bait, hand nets not more than forty

feet long and four feet deep.

b. To take eels, spears and eel weirs.

c. To take menhaden, vessels of forty tons or less register using nets other than trawls, except where prohibited by subdivision 13 of this section.

8. In the Carmans river, Suffolk county.

a. Nets shall not be used in the river north of a line running from the most southerly point of land within the Wertheim National Wildlife Refuge on the western shore of the river easterly to the point where the southern boundary of the refuge meets the eastern shore of the river.

b. Eel pots shall not be used north of the point where Beaver Dam road (Brookhaven avenue) meets the river. Between the point where Beaver Dam road meets the river and the line described in paragraph a of this subdivision eel pots may be used only to take eels.

9. In Jones' Inlet, nets, except haul seines of not more than one hundred twenty feet in length and six feet in depth used to take bait fish or crustacea, shall not be used inshore from an east and west line drawn from a point one-half mile southerly of the municipal bathing pavilion at Point Lookout, thence easterly to a point one-half mile southerly of the Short Beach Coast Guard tower. The inshore boundary of the Jones' Inlet area closed to certain netting shall be the bridges of the Loop and Meadowbrook Parkway.

10. In Fire Island Inlet, nets, except during the period of time from April first through May thirty-first haul seines of not more than one hundred seventy-five feet in length and twenty feet in depth used to take bait fish or crustacea, shall not be used inshore of a line drawn from the sea end of the government jetty at Democrat Point to the town of Babylon bathing pavilion at Cedar Island Beach. The inshore boundary of the Fire Island Inlet area closed to certain netting shall be the Robert Moses bridge to Fire Island.

11. Nets shall not be used in Moriches inlet, Shinnecock Inlet and in Mecox Inlet nor in the Atlantic Ocean within one-half mile of the shores thereof for a distance of one-half mile measured east and west along the beach from the east and west shores of the seaward entrances to such inlets. The department, for law enforcement purposes, may in its discretion erect suitable markers on the beach at the limit points.

12. In the Connetquot River nets shall not be used.

13. In the waters of the Atlantic Ocean and Fire Island Inlet, nets shall not be used within one thousand feet of the beach between Rockaway Inlet Jetty at Rockaway Point and the headland extending into Fire Island Inlet known as the "sore thumb".

14. In the county of Suffolk.

a. In the waters lying westerly of an imaginary line extending in a general southerly direction from Leaves Point in Southold town to Hay Beach Point in Shelter Island, and a line extending in a general northeasterly direction from Mashomack Point in Shelter Island to Cedar Point at the eastern entrance to Sag Harbor.

(1) haul seines shall not be used measuring over one hundred fifty fathoms in length, attached to which may be two wings, each measuring not more than one hundred fifty fathoms in length with a stretched mesh size including knot of not less than three and one-quarter inches in one wing and three and one-half inches in the other wing;

(2) the use of haul seines is prohibited from midnight Thursday to 6:00 P.M. Sunday.

(3) when permitted by the commissioner, pound or trap nets may be used in the waters described in paragraph a of this subdivision provided they do not interfere with or obstruct navigation or the carrying out of shellfish culture as provided in this chapter. Any such pound or trap nets shall be marked in accordance with requirements prescribed by the commissioner.

b. Waste fish shall not be left on shore or within the waters five

hundred feet from shore.

15. a. Nets shall not be used in Long Island sound west of an imaginary line from the New York-Connecticut boundary shore line extending easterly and southerly to Eaton's Point Neck on Long Island from April 1 to November 1, nor at any time in the waters of Huntington Bay, Lloyd Harbor, Northport Bay or Coldspring Harbor; provided, however, that hand nets not more than forty feet long and four feet in width may be used to take minnows and shrimp for bait, at any time.

b. Gill nets shall not be used in Long Island Sound or in harbors, bays or other waters adjacent thereto west of an imaginary line extending north from the easterly boundary of the town of Brookhaven on the north shore of Long Island in the county of Suffolk. However, as permitted under subdivision ten of section 13-0329 of this chapter, a holder of a commercial lobster license may use no more than one gill net not longer than three hundred feet with a stretched mesh size between three and one-half inches and four and one-quarter inches to take bait fish between April 1 and November 15 during each weekly period beginning 6:00 p.m., Sunday, through 9:00 a.m. Friday, providing that each net will be buoyed on each end and identified with the permittee's commercial lobster license number. The net shall be fished with the top not less than four feet below the surface of the water.

16. Unless permitted by statute, or licensed or permitted by the department, nets shall not be possessed by any person in or on waters of the marine district, in the following instances:

a. Nets of metallic fabric shall not be possessed in or on any waters or within one-half mile thereof;

b. In waters where use of trawls is prohibited by section 13-0341, such trawls shall not be possessed in the waters where their use is prohibited, or during any time when such use is so prohibited;

c. In waters where use of nets other than trawls, or use of trawls; is prohibited by this section, the nets, or trawls, as the case may be, or

nets of the kind or kinds prohibited, shall not be possessed in the waters where their use is prohibited or during any time when such use is prohibited, except that where a provision of this section expressly specifies a lesser distance from the water in which possession is prohibited, this section does not enlarge the distance from the water in which such possession is prohibited.

d. Nothing in this subdivision shall be construed as prohibiting commercial fishing vessels sailing to or from offshore fishing grounds from carrying on board fishing gear that may legally be used in such offshore waters even though they must pass through waters where the use of such gear is otherwise prohibited.

17. Within three nautical miles of the Atlantic coastline and in all other tidal waters within the state, the use of purse seines for taking food fish is prohibited.

18. Nets and seines measuring more than twenty-five feet in length and four feet in depth shall not be used in the waters of Oyster Bay Harbor.

19. a. Gill or trammel nets set or operated in the marine and coastal district shall be marked at each end with an orange flag at least twelve inches square attached to a mast rising above the surface of the water at least five feet. Nets operated after dark shall have orange and white reflective tape attached to the mast for a minimum one foot length immediately below the flag.

b. No gill or trammel net shall be set or operated in the marine and coastal district within one thousand feet of a pound or trap net.

c. Except in the waters of the Atlantic Ocean, Long Island Sound, Tiana Bay, Shinnecock Bay, Mecox Bay, Quantuck Bay, that portion of Moriches Bay within the town of Southampton, and the marine and coastal waters lying easterly of an imaginary line extending in a general southerly direction from Cleaves Point in the town of Southold to Hay Beach Point in Shelter Island, and a line extending in a general northeasterly direction from Mashomack Point in Shelter Island to Cedar

Point at the eastern entrance to Sag Harbor, no gill or trammel net shall be set in the waters of the marine and coastal district from sunset Friday to sunrise Monday during the period from April first to November first.

d. Gill or trammel nets set or operated in the waters of the Great South Bay shall not exceed twelve hundred feet in length. In addition to the requirements in paragraph a of this subdivision, nets set or operated in the Great South Bay shall display surface markers at least every one hundred feet. No gill or trammel net shall be set in the waters of the Great South Bay from May first until May thirty-first, inclusive. For the purposes of this subdivision, Great South Bay shall mean the waters extending east from Wantagh State Parkway to the Smith Point Bridge and southwest to the Robert Moses Inlet Bridge.

e. Those gill and trammel nets set in the waters of the Hudson River in accordance with section 11-1511 of this chapter shall be exempt from the provisions of this subdivision.

f. The use of gill or trammel nets for the taking of blackfish is prohibited.

§ 13-0343-a. Fish pots and traps; restrictions.

1. No person shall utilize commercial fishing gear commonly known as "fish pots" or "fish traps" within five hundred feet of any artificial reef. The department may publish a list of artificial reef sites and locations where the placing of pots or traps is prohibited.

2. The department may regulate the use and design of "fish pots" and "fish traps", including, but not limited to, the following matters: design, including, but not limited to, identification and marking; configuration and material composition; requirements for escape panels and/or vents; restrictions on the total number of traps or pots that may be fished individually or collectively; and in addition to the restrictions contained in subdivision one of this section, those areas

where such pots or traps may not be used.

3. The department may require those who hold licenses pursuant to section 13-0335 of this title to first obtain a permit from the department to set, operate, maintain or use "fish pots" or "fish traps". The department may restrict the number of permits issued pursuant to this section.

4. This section shall not apply to any "fish pot" or "fish trap" exempted under section 13-0335 of this title. Any rule or regulation proposed or adopted pursuant to this section shall be consistent with the provisions of section 13-0105 of this article. The commissioner is authorized to promulgate such rules or regulations as he deems necessary to implement this section.

5. No person shall return a fish pot or trap which contains fish to the water.

§ 13-0344. Fish, shellfish and crustacea; dumping.

It shall be unlawful for any person who has been requested or signaled to stop by any police or peace officer, to throw or dump into the water any fish, shellfish or crustacea, or the contents of any pail, bag, barrel or any container which may be used in the taking or storage of fish, shellfish or crustacea, or any implements used in the taking of fish, shellfish or crustacea before such police or peace officer has inspected the same.

§ 13-0345. Protection of waters; cesspools and drains.

1. Sludge, acid or refuse from oil works, sugar houses or other manufactories, sewage or any substance injurious to shellfish culture or fish, or which shall in any manner affect the flavor, odor, color, or sanitary condition of such shellfish so as to injuriously affect the sale thereof, or which shall cause any injury to the public and private

shell fisheries of this state, shall not be placed or allowed to run into waters of the state in the marine district.

2. Garbage, cinders, ashes, oils, acids, sludge or refuse of any kind shall not be thrown, dumped or permitted to run into the waters of the marine district.

§ 13-0347. Management of striped bass in marine waters.

Notwithstanding any provision of law to the contrary:

1. Striped Bass (*Morone saxatilis*) taken by hook and line for recreational purposes, shall not be possessed, bought, sold or offered for sale when less than twenty-four inches in total length.

2. Striped bass less than twenty-four inches in total length taken by other methods including but not limited to gill nets, haul seines and trawl nets shall not be possessed, bought, sold or offered for sale.

3. All other striped bass less than legal size shall be returned to the water immediately without unnecessary injury.

4. No person shall take or land striped bass in the marine waters of New York state during the period December 15 to April 15 inclusive. For purposes of this section "marine waters" means the tidal waters of the state including the Hudson River from the Battery to the George Washington bridge, and "land" shall mean the setting or putting on shore from any boat or vessel or to bring to any port or docking place any striped bass. Possession of striped bass imported into New York other than by boat is not prohibited during the closed season so long as such striped bass are of legal minimum size. Striped bass unintentionally taken in violation of this subdivision shall be returned to the water immediately without unnecessary injury.

6. In all waters from the Robert F. Kennedy bridge west through the East River, Harlem River and those portions of the Hudson River south of

the George Washington bridge to a line drawn from Rockaway Point to Romer Shoals lighthouse, no person shall use a net to take fish, except that landing nets and nets of not more than 10 feet in length, operated by hand, may be used to take bait and shrimp, and cast nets may be used to take Atlantic menhaden and mullets as provided in subdivision one of section 13-0343 of this title.

§ 13-0349. Taking of fish for commercial purposes.

1. No person shall take food fish, shellfish, or crustacea from the waters of the marine and coastal district for commercial purposes using a commercial fishing vessel longer than seventy feet in registered length. For purposes of this section a person shall be presumed to be taking food fish, shellfish or crustacea for commercial purposes when setting, maintaining, operating or using nets, except seines not larger than thirty feet long or four feet deep or lift nets not larger than sixteen square feet; traps, except bait traps not more than thirty inches in length; combs; dredges; pots; or hook and line, except by angling.

2. However, vessels being used to take food fish, shellfish or crustacea from the waters of the marine and coastal district prior to July first, nineteen hundred ninety-seven shall be exempt from the registered length requirement and the department shall publish a list of such vessels. In addition, such vessels which are exempt from such seventy foot in registered length requirement, and are on the list published pursuant to this section, shall also be permitted to be replaced one time without loss of such exemption.

3. All vessels of sixty-three feet or greater registered length may be replaced one time by a new vessel of up to ten percent greater registered length.

§ 13-0350. Marine resources advisory council.

1. Legislative intent. The legislature hereby finds and declares that the finfish and shellfish industry in this state plays a vital part in the economy of the state in general and the Long Island region in particular.

By establishing the marine resources advisory council the legislature publicly declares its support for the further development and advancement of such industry; such council's mandate to monitor and review fishery management regulations, programs, allocations and expenditures of the department of environmental conservation for the care, management, protection and enlargement of finfish and shellfish will provide proper input from that segment of our populace most concerned with the impact this state's programs have on finfish and shellfish resources.

2. Creation of marine resources advisory council. (a) There is hereby created within the department a marine resources advisory council to review proposed regulations for management of marine fisheries and to make recommendations on plans, policies, and programs affecting marine resources as more specifically outlined below. Such council shall be composed of fifteen members appointed by the commissioner, none of whom shall be employees of the department. Two council members representative of recreational users of marine resources and two council members representative of commercial users of marine resources shall be designated by the majority leader of the senate and two members representative of recreational users of marine resources and two council members representative of commercial users of marine resources shall be designated by the speaker of the assembly. One member will be the director of the marine sciences research center at SUNY Stony Brook or the director's designee who shall act as chairman. Of the members appointed all shall be residents of a county which borders the marine and coastal district. The council shall be representative of individual and organized commercial and recreational shellfishing and finfishing interests in the state. At no time shall there be less than seven members of the council who shall be representative of commercial harvesters of marine resources nor shall there be less than seven members of the council who shall be representative of recreational users

and harvesters of marine resources. Appointments to the advisory council shall be made no later than the first day of March next succeeding the date on which this section shall have become a law.

(b) Persons designated or appointed to the advisory council shall have demonstrated a long-standing interest, knowledge and experience in commercial or recreational harvesting of marine resources.

3. Meetings of the council. The council shall meet at least quarterly.

4. Duties of the advisory council. The advisory council shall have the following powers and duties:

(a) To review the allocations and expenditures of the department for the care, management, protection and enlargement of marine resources and report to the commissioner by January first of each year. The commissioner shall, by February first of each year, submit such report, in its entirety, to the governor, the legislature and interested individuals and organizations. Such report shall include the findings of the advisory council regarding such allocations and expenditures, including expenditures and appropriations from the conservation fund and the extent to which such expenditures and appropriations are consistent with the requirements of state law.

(b) To make reports and release information from time to time as it deems necessary to commercial and recreational harvesters and users of marine resources and the general public regarding the marine resources program.

(c) To consult with commercial and recreational users of marine resources and make recommendations on program needs and on how such needs shall be met.

(d) To assist the department's efforts to expand the available sources of income for the marine resources account and advise the department with respect to the needs of those industries involved with the commercial and recreational harvesting of marine resources.

(e) To review proposed regulations pertaining to the conservation and management of marine fisheries, to consult with commercial and recreational users of such fisheries regarding such regulations, and to make recommendations and comments to the department regarding the adoption and modification of such regulations consistent with the policy

and principles set forth in section 13-0105 of this article.

5. Term of appointment. All members of the council shall serve terms of three years provided, however, that of the members first appointed, one-third shall be appointed for a term of three years, one-third shall be appointed for a term of two years, and one-third shall be appointed for a term of one year. An appointment to fill a vacancy shall be made for the remainder of the affected term in the same manner as the original appointment was made. Such appointment shall be made within sixty days of the date the position becomes vacant.

5-a. Term of appointment. The new members appointed pursuant to subdivision two of this section as amended by a chapter of the laws of 1994 entitled "AN ACT to amend the environmental conservation law, in relation to establishing the marine fisheries conservation and management policy, various other provisions relating to the management of marine resources and repealing paragraph d of subdivision 2 of section 11-1319 of such law relating to the sale of billfish" shall be appointed to terms as follows: the member appointed by the majority leader of the senate and the member appointed by the speaker of the assembly shall each be appointed to a term of three years; and of the two members appointed by the commissioner, one shall be appointed to a term of two years and the other shall be appointed to a term of one year.

6. State assistance. The commissioner shall make any and all documents readily available to the council which the council indicates are needed to properly and thoroughly carry out its responsibilities. The commissioner shall also make available to the council such aid reasonably necessary to allow the council to carry out its duties and responsibilities.

§ 13-0355. Recreational marine fishing registration.

1. Definitions of registrations; privileges. A recreational marine fishing registration entitles the holder who is sixteen years of age or

older to take fish from the waters of the marine and coastal district and to take migratory fish of the sea from all waters of the state, except as provided in sections 13-0333 and 13-0335 of this title. A recreational marine fishing registration is effective for one year from the date it was issued.

2. General provisions. a. The privileges of a recreational marine fishing registration may be exercised only at the times and places, and in the manner and to the extent, permitted by the fish and wildlife law and applicable regulations of the department.

b. Recreational marine fishing registrations are not transferable. No person shall alter, change, lend to another person or attempt to transfer to another person any recreational marine fishing registration.

c. A registration issued in lieu of a lost or destroyed registration is void if it is obtained: (i) by fraud; or (ii) by a person who is not authorized to hold it or who makes a false statement in applying for it.

d. No registration authorizes the holder (a) to trespass upon private lands or waters or to interfere with property belonging to another person; (b) to take fish or wildlife on an Indian reservation; (c) to enter upon, or to take or disturb fish or wildlife upon, state lands or waters posted by the department except in accordance with a written permit from the department or an order adopted by the department; (d) to take any fish or wildlife in any area closed to the taking of fish or wildlife, or to take any species of fish, wildlife or protected insect in an area closed to the taking of such species.

3. Failure to carry registration. a. The holder of a recreational marine fishing registration shall:

(i) at all times have such registration on the holder's person while exercising any privilege of that registration; and

(ii) shall exhibit such registration on demand to any police officer, peace officer, or owner, lessee or other person in control of the lands or waters or the designees of the owner, lessee or person in control of the lands or waters on which the registration holder is present and is

exercising the privileges thereof.

b. Failure to have a recreational marine fishing registration on one's person while exercising any privilege of that registration is presumptive evidence that such person is fishing without holding the registration required by this section.

4. Fees. No applicant for a recreational marine fishing registration shall be required to pay a fee for such registration.

5. Exemption from requirement of recreational marine fishing registration. a. Minors under the age of sixteen may take fish as if they held a recreational marine fishing registration.

b. Recreational fishing passengers on a marine and coastal district party or charter boat licensed and registered pursuant to section 13-0336 of this title may take fish as if they held a recreational marine fishing registration.

6. Recreational marine fishing registration data. a. The department is authorized to collect data on holders of recreational marine fishing registrations, which shall include but not be limited to, a registrant's name, address and date of birth.

b. Registration holder data collected by the department or available to the department shall be confidential and shall not be disclosed except as required to comply with section 401(g) of the Magnuson-Stevens fisheries management and conservation act (16 U.S.C. 1881), as may be amended from time to time, or by court order, except that the department may release or make public any statistics in an aggregate or summary form which does not make it possible to identify any person who submits such data. The department may prescribe such procedures as may be necessary to preserve such confidentiality.

7. Reciprocity in boundary waters. If persons holding recreational marine fishing registrations issued under the New York fish and wildlife law are not required to have licenses or registrations issued by a state

named in paragraph a, b or c of this subdivision when fishing in that part of the waters, specified in such paragraph, which lies within that state then, in such case, a person holding a similar license or registration issued by such state may, without a recreational marine fishing registration issued under the New York fish and wildlife law, take fish as provided in this title, from that part of such waters specified in paragraph a, b or c of this subdivision which lies within this state:

a. License or registration issued by Connecticut: those parts of Long Island Sound lying between New York and Connecticut.

b. License or registration issued by New Jersey: those parts of New York Harbor, Hudson River, Kill Van Kull, Arthur Kill, Raritan Bay and Atlantic Ocean lying between New York and New Jersey.

c. License or registration issued by Rhode Island: those parts of Long Island Sound, Block Island Sound and Atlantic Ocean lying between New York and Rhode Island.

§ 13-0360. Special management areas.

1. For purposes of this section:

(a) "artificial reef" shall mean a hard structure, deliberately placed in a marine or coastal water body for the purpose of imitating environmental conditions found on natural underwater rock outcroppings, shellfish reefs or coral reefs; and

(b) "wreck" shall mean an abandoned shipwreck which occurred through an accidental circumstance or deliberate scuttling or sinking that was not part of artificial reef construction activities.

2. For the purposes of protecting reef ecosystems and managing reef fisheries, the department is hereby authorized to adopt regulations which designate as a special management area any area of the marine and coastal district which contains artificial reefs or wrecks simulating artificial reefs together with the surrounding areas where the biota are

dependent upon the physical characteristics of the reef.

3. Notwithstanding any other provision of this chapter, the department may, until December thirty-first, two thousand twenty-six, adopt regulations restricting the taking of fish, shellfish and crustacea in any special management area designated pursuant to subdivision two of this section. Such regulations may restrict the manner of taking of fish, shellfish and crustacea in such areas and the landing of fish, shellfish and crustacea which have been taken therefrom. Such regulations shall be consistent with all relevant federal and interstate fisheries management plans and with the marine fisheries conservation and management policy set forth in section 13-0105 of this article.

§ 13-0371. Atlantic States Marine Fisheries Compact.

1. The Atlantic States Marine Fisheries Compact as first enacted by chapter 500 of the laws of 1941, and as reenacted by chapter 474 of the laws of 1961, is hereby continued. The compact is as follows:

ATLANTIC STATES MARINE FISHERIES COMPACT

The contracting states solemnly agree:

Article I

The purpose of this compact is to promote the better utilization of the fisheries, marine, shell and anadromous, of the Atlantic seaboard by the development of a joint program for the promotion and protection of such fisheries by the prevention of the physical waste of the fisheries from any cause. It is not the purpose of this compact to authorize the states joining herein to limit the production of fish or fish products for the purpose of establishing or fixing the price thereof, or creating and perpetuating monopoly.

Article II

This agreement shall become operative immediately as to those states executing it whenever any two or more of the states of Maine, New Hampshire, Massachusetts, Rhode Island, Connecticut, New York, New

Jersey, Delaware, Maryland, Virginia, North Carolina, South Carolina, Georgia and Florida have executed it in the form that is in accordance with the laws of the executing state and the Congress has given its consent. Any state contiguous with any of the aforementioned states and riparian upon waters frequented by anadromous fish, flowing into waters under the jurisdiction of any of the aforementioned states, may become a party hereto as hereinafter provided.

Article III

Each state joining herein shall appoint three representatives to a commission hereby constituted and designated as the Atlantic states marine fisheries commission. One shall be the executive officer of the administrative agency of such state charged with the conservation of the fisheries resources to which this compact pertains or, if there be more than one officer or agency, the official of that state named by the governor thereof. The second shall be a member of the legislature of such state designated by the commission or committee on interstate cooperation of such state, or if there be none, or if said commission on interstate cooperation cannot constitutionally designate the said member, such legislator shall be designated by the governor thereof; provided that if it is constitutionally impossible to appoint a legislator as a commissioner from such state, the second member shall be appointed by the governor of said state in his discretion. The third shall be a citizen who shall have a knowledge of and interest in the marine fisheries problem to be appointed by the governor. This commission shall be a body corporate with the powers and duties set forth herein.

Article IV

The duty of the said commission shall be to make inquiry and ascertain from time to time such methods, practices, circumstances and conditions as may be disclosed for bringing about the conservation and the prevention of the depletion and physical waste of the fisheries, marine, shell and anadromous, of the Atlantic seaboard. The commission shall have power to recommend the coordination of the exercise of the police powers of the several states within their respective jurisdictions to promote the preservation of those fisheries and their protection against

overfishing, waste, depletion or any abuse whatsoever and to assure a continuing yield from the fisheries resources of the aforementioned states.

To that end the commission shall draft and, after consultation with the advisory committee hereinafter authorized, recommend to the governors and legislatures of the various signatory states, legislation dealing with the conservation of the marine, shell and anadromous fisheries of the Atlantic seaboard. The commission shall, more than one month prior to any regular meeting of the legislature in any signatory state, present to the governor of the state its recommendations relating to enactments to be made by the legislature of that state in furthering the intents and purposes of this compact.

The commission shall consult with and advise the pertinent administrative agencies in the states party hereto with regard to problems connected with the fisheries and recommend the adoption of such regulations as it deems advisable. The commission shall have power to recommend to the states party hereto the stocking of the waters of such states with fish and fish eggs or joint stocking by some or all of the states party hereto and when two or more of the states shall jointly stock waters the commission shall act as the coordinating agency for such stocking.

Article V

The commission shall elect from its number a chairman and a vice chairman and shall appoint and at its pleasure remove or discharge such officers and employees as may be required to carry the provisions of this compact into effect and shall fix and determine their duties, qualifications and compensation. Said commission shall adopt rules and regulations for the conduct of its business. It may establish and maintain one or more offices for the transaction of its business and may meet at any time or place but must meet at least once a year.

Article VI

No action shall be taken by the commission in regard to its general affairs except by the affirmative vote of a majority of the whole number

of compacting states present at any meeting. No recommendation shall be made by the commission in regard to any species of fish except by the affirmative vote of a majority of the compacting states which have an interest in such species. The commission shall define what shall be an interest.

Article VII

The fish and wildlife service of the department of the interior of the government of the United States shall act as the primary research agency of the Atlantic states marine fisheries commission cooperating with the research agencies in each state for that purpose. Representatives of the said fish and wildlife service shall attend the meetings of the commission.

An advisory committee to be representative of the commercial fishermen and the salt water anglers and such other interests of each state as the commission deems advisable shall be established by the commission as soon as practicable for the purpose of advising the commission upon such recommendations as it may desire to make.

Article VIII

When any state other than those named specifically in article two of this compact shall become a party thereto for the purpose of conserving its anadromous fish in accordance with the provisions of article two the participation of such state in the action of the commission shall be limited to such species of anadromous fish.

Article IX

Nothing in this compact shall be construed to limit the powers of any signatory state or to repeal or prevent the enactment of any legislation or the enforcement of any requirement by any signatory state imposing additional conditions and restrictions to conserve its fisheries.

Article X

Continued absence of representation or of any representative on the commission from any state party hereto shall be brought to the attention of the governor thereof.

Article XI

The states party hereto agree to make annual appropriation to the support of the commission in proportion to the primary market value of the products of their fisheries, exclusive of cod and haddock, as recorded in the most recent published reports of the fish and wildlife service of the United States department of the interior, provided no state shall contribute less than two hundred dollars per annum and the annual contribution of each state above the minimum shall be figured to the nearest one hundred dollars.

The compacting states agree to appropriate initially the annual amounts scheduled below, which amounts are calculated in the manner set forth herein, on the basis of the catch record of nineteen hundred thirty-eight. Subsequent budgets shall be recommended by majority of the commission and the cost thereof allocated equitably among the states in accordance with their respective interests and submitted to the compacting states.

Schedule of initial annual state contributions:

Maine	\$700
New Hampshire	200
Massachusetts	2,300
Rhode Island	300
Connecticut	400
New York	1,300
New Jersey	800
Delaware	200

Maryland	700
Virginia	1,300
North Carolina	600
South Carolina	200
Georgia	200
Florida	1,500

Article XII

This compact shall continue in force and remain binding upon each compacting state until renounced by it. Renunciation of this compact must be preceded by sending six months' notice in writing of intention to withdraw from the compact to the other states party hereto.

The states consenting to this amendment agree that any two or more of them may designate the commission as a joint regulatory agency with such powers as they may jointly confer from time to time for the regulation of the fishing operations of the citizens and vessels of such designating states with respect to specific fisheries in which such states have a common interest. The representatives of such states on the commission shall constitute a separate section commission for the exercise of the additional powers so granted provided that the states so acting shall appropriate additional funds for this purpose. The creation of such section as a joint regulatory agency shall not deprive the states participating therein of any of their privileges or powers or responsibilities in the commission under the general compact.

2. "The executive officer" referred to in article three of the compact shall, in the case of New York, be the Commissioner of Environmental Conservation or an officer of the department designated by him. The two other representatives shall be chosen from the classes of persons prescribed in article three of the compact, and in the manner required thereby.

3. The Atlantic States Marine Fisheries Commission shall submit annually, in accordance with the laws and practice of this state, to the Commissioner of Environmental Conservation for study and consideration by such commissioner, an estimate of moneys required to administer, manage and support the commission during the ensuing fiscal year. Such estimate shall include any request for appropriation of funds by New York and shall be accompanied by a tabulation of similar requests which the commission expects to make to each other member state and the formula or factors upon which such respective requests are based.

4. The Commissioner of Environmental Conservation shall include a suitable item or items of estimated expenditures in the budget estimates of his department, and shall give due effect to the provisions of article eleven of the Atlantic States Marine Fisheries Compact.

5. The State Comptroller is hereby authorized and empowered from time to time to examine the accounts and books of the commission, including its receipts, disbursements and such other items referring to its financial standing as such comptroller may deem proper and to report the results of such examination to the Governor.

6. No provision of the Conservation Law and no provision of the Environmental Conservation Law, if such provision of the Environmental Conservation Law was derived from a provision of the Conservation Law, which is inconsistent with the provisions of the Atlantic States Marine Fisheries Compact shall be applicable to the Atlantic States Marine Fisheries Commission or to any matter governed by the Atlantic States Marine Fisheries Compact.

7. On August 15, 1964 and at intervals of four years thereafter, the Commissioner of Environmental Conservation shall evaluate the role of the Atlantic States Marine Fisheries Commission with respect to the interstate fisheries of concern to New York and shall report to the commission thereon. The commissioner shall transmit a copy of such report to the Governor. The commissioner may make such additional reports to the Atlantic States Marine Fisheries Commission and the

Governor as he deems appropriate.

TITLE 5

THE MARINE AND COASTAL DISTRICT OF NEW YORK CONSERVATION, EDUCATION, AND RESEARCH GRANTS PROGRAM

Section 13-0501. Marine and coastal district of New York conservation, education, and research grants program.

13-0503. Marine and coastal district of New York conservation, education, and research board.

§ 13-0501. Marine and coastal district of New York conservation, education, and research grants program.

1. There is hereby created within the department the marine and coastal district of New York conservation, education, and research grants program. The program shall make grants available to eligible recipients for conservation, research, and education projects relating to such marine and coastal district. For purposes of this title, the term "eligible recipients" shall mean not-for-profit corporations located within New York state whose purpose is to promote sport fishing, increase participation in recreational angling, increase public awareness and appreciation of aquatic natural resources, encourage conservation of fisheries resources, or promote research relating to the marine and coastal district of New York.

2. The grants program may include funding for programs containing elements such as, but not limited to, the following:

(a) educational programs which raise public awareness and appreciation of the need for protecting, conserving, and restoring the state of New York's aquatic natural resources.

(b) research relating to the marine and coastal district of New York.

(c) production of informational materials in print, audio, video, electronic, or other media.

(d) production and distribution of exhibits, public service announcements, and advertisements.

(e) programs which promote angling and sport fishing through information and/or training.

3. The commissioner may accept grants from public or private sources for the program. Any such monies shall be deposited in the marine and coastal district of New York conservation, education, and research fund established pursuant to section ninety-five-c of the state finance law. The commissioner, in administering this section, shall seek to coordinate the program with other public and private efforts, and may undertake joint or cooperative programs with other public or private entities.

4. The commissioner shall make rules and regulations necessary and appropriate for the implementation of this section.

§ 13-0503. Marine and coastal district of New York conservation, education, and research board.

1. There is hereby established in the department the marine and coastal district of New York conservation, education, and research board to be composed of three members, one of whom shall be appointed by the governor, one of whom shall be appointed by the temporary president of the senate, and one of whom shall be appointed by the speaker of the assembly. Each appointing official shall also appoint an alternate who may serve in the place of the member appointed by such appointing official. A member or alternate member of the board shall serve at the pleasure of the official by whom he or she is appointed. The members of the board shall choose their chairperson.

2. The board shall have the power and duty to: (a) receive and review, and to approve or deny, applications from eligible recipients for grants from the marine and coastal district of New York conservation, education, and research fund, created pursuant to section ninety-five-c of the state finance law, for conservation, research, and education projects relating to such marine and coastal district. Approval of any such proposed project may be granted only by unanimous vote of all three

members of the board. In the event a member of the board is unable to vote, the alternate for such member may vote in his or her place;

(b) make by-laws for the management of its affairs and to do all things necessary or convenient to carry out the powers expressly given in this title;

(c) review the allocations and expenditures of the department related to the marine resources account. To assist the board in its review, the department shall by September first of each year make available to the board, the governor and the legislature current and anticipated income and expenditures for the account, including planned expenditures by time and activity code for the next fiscal year; and

(d) consult with marine fish and wildlife interests and render annual reports to the commissioner on fiscal needs and make recommendations on expenditures and how such needs shall be met.

3. The board shall meet at least two times a year, at the request of the chairperson.

4. The members of the board and alternate members shall receive no compensation for their services, but shall be entitled to reimbursement for actual and necessary expenses incurred in the performance of their official duties pursuant to this section.

TITLE 7

SEAGRASS PROTECTION ACT

Section 13-0701.Short title.

13-0703.Definitions.

13-0705.Departmental responsibilities.

§ 13-0701. Short title.

This act shall be known and may be cited as the seagrass protection act.

§ 13-0703. Definitions.

1. "Coastal community" shall mean a municipal corporation, as defined in section two of the general municipal law, in Nassau and Suffolk counties.

2. "Seagrass" shall mean rooted, vascular, flowering marine plants that are submerged in New York's bays and coastal waters, including *Zostera marina* and *Ruppia maritima*.

§ 13-0705. Departmental responsibilities.

1. The department shall designate seagrass management areas. Designation of such areas shall include consideration, on a geographic or estuarine basis, of likely threats to seagrass.

2. For each designated seagrass management area, the department shall develop and adopt a seagrass management plan to guide the development of rules and regulations pursuant to subdivision three of this section. Such plan shall be developed after consultation with local governments, representatives of recreational boating interests, the marine industries (including commercial and recreational shell fishermen, and commercial shell fish farmers), affected property owners, and other stakeholders, so as to effectively manage and protect seagrass beds and seagrass restoration efforts at those locations at which the restoration of seagrass is reasonably possible. Such plans shall, to the extent practicable, take into consideration, the goals of existing estuary programs. In addition, seagrass management plans shall seek to preserve traditional recreational activities, including recreational boating and marina operations, as well as finfishing, shellfishing and tourism while ensuring such activities do not threaten seagrass beds or negate seagrass restoration efforts.

3. The department shall have the authority to adopt rules and regulations to regulate coastal and marine activities that threaten seagrass beds or seagrass restoration efforts.

4. The department shall have the authority to restrict the use of mechanical-powered fishing or shellfishing gear which may directly impact seagrass beds, including churning, dredges, rakes and tongs.

5. The department shall identify water quality impacts such as nitrogen pollution and make recommendations on how to minimize such impacts.

6. The department shall make information concerning the importance of seagrass protection and the status of seagrass restoration efforts available on the department website.

ARTICLE 14

NEW YORK OCEAN AND GREAT LAKES ECOSYSTEM CONSERVATION ACT

Section 14-0101. Short title.

14-0103. Legislative findings and declarations.

14-0105. Definitions.

14-0107. New York ocean and Great Lakes ecosystem conservation council.

14-0109. Responsibilities of the council.

14-0111. Report to the governor and legislature.

14-0113. State agency assistance.

§ 14-0101. Short title.

This article shall be known and may be cited as the "New York ocean and Great Lakes ecosystem conservation act".

§ 14-0103. Legislative findings and declarations.

The legislature finds and declares that:

1. New York's coastal ecosystems are critical to the state's environmental and economic security, and integral to the state's high quality of life and culture. Healthy coastal ecosystems are part of the state's legacy, and are necessary to support the state's human and wildlife populations;

2. The policy of the state of New York shall be to conserve, maintain and restore coastal ecosystems so that they are healthy, productive and resilient and able to deliver the resources people want and need;

3. The governance of coastal ecosystems shall be guided by the following principles:

- a. activities in and uses of the coastal ecosystem are sustainable;
- b. ecological health and integrity is maintained;
- c. ecosystems' interconnections among land, air and water are recognized;
- d. understanding of coastal ecosystems is enhanced;
- e. decisions are informed by good science;
- f. when risks are uncertain, caution is applied; and
- g. broad public participation occurs in planning and decision making.

§ 14-0105. Definitions.

As used in this article:

1. "Coastal waters" means lakes Erie and Ontario, the St. Lawrence and Niagara rivers, the Hudson river south of the federal dam at Troy, the East river, the Harlem river, the Kill von Kull, and Arthur Kill, Long Island sound, and the Atlantic ocean, and their connecting water bodies, bays, harbors, shallows, and marshes.

2. "Coastal ecosystems" mean the resources of coastal waters and their watersheds.

3. "Council" means the New York ocean and Great Lakes ecosystem conservation council created by section 14-0107 of this article.

4. "Submerged aquatic vegetation" means native underwater plants found in coastal waters, including but not limited to, eelgrass (*Zostera marina*), widgeon grass (*Ruppia maritima*), wild celery (*Vallisneria Americana*), and pondweed (*Potamogeton crispus*).

5. "Submerged aquatic vegetation meadows" means those habitats in coastal waters vegetated with one or more species of submerged aquatic vegetation.

§ 14-0107. New York ocean and Great Lakes ecosystem conservation council.

1. There is hereby created the New York ocean and Great Lakes ecosystem conservation council. The council shall consist of the following thirteen members: the commissioners of agriculture and markets, economic development, environmental conservation, general services, parks, recreation and historic preservation, health, education and transportation; the secretary of state; the president of the energy research and development authority; the president of the environmental facilities corporation; the chairman of the state soil and water conservation committee; and the chancellor of the state university of New York; or their respective designees.

2. The commissioner shall serve as chair of the council, and the deputy secretary of state for coastal resources shall serve as such council's executive director.

3. Members of the council shall receive no compensation but shall be entitled to reimbursement for any necessary expenses incurred in connection with the performance of their duties.

4. The council shall meet at least quarterly.

§ 14-0109. Responsibilities of the council.

The New York ocean and Great Lakes ecosystem conservation council shall:

1. Promote the understanding, protection, restoration and enhancement of New York's ocean and Great Lakes ecosystems while promoting sustainable and competitive economic development and job creation;

2. Ensure that community needs and aspirations are accommodated, recognizing the interdependent goals of community well-being, environmental quality and economic viability;

3. Define and implement an adaptive approach building upon existing laws and programs to advance activities that affect coastal ecosystems in order to ensure the coexistence of healthy ecosystems with human activities;

4. Integrate and coordinate ecosystem-based management with existing laws and programs;

5. Develop guidelines for agency programs and activities that affect coastal ecosystems to advance the policy and principles delineated in section 14-0103 of this article;

6. Encourage scientific research and information sharing that will inform ecosystem-based management decisions and enhance ecosystem management capabilities;

7. Use New York's private and public academic, research and non-profit institutions more effectively in developing and advancing coastal ecosystem-based management;

8. Facilitate regional coordination and cooperation to address complex coastal resource issues which cross political and jurisdictional boundaries.

§ 14-0111. Report to the governor and legislature.

The New York ocean and Great Lakes ecosystem conservation council shall deliver a report to the governor and the legislature by November first, two thousand eight which shall:

1. demonstrate improvements that can be accomplished in the eastern Lake Ontario and the Long Island great south bay coastal ecosystems through ecosystem-based management in cooperation with resource managers, local governments, industry, conservation and community-based organizations, and academic and research institutions;

2. define executive and legislative actions necessary to integrate ecosystem-based management with existing programs needed to advance the coastal ecosystem principles;

3. include a plan, schedule, and funding opportunities for implementation of executive actions necessary to advance the policy and principles in section 14-0103 of this article;

4. create an ocean and coastal resources atlas to make information available to the public and decision makers;

5. establish a research agenda that identifies priority issues in need

of further research to enhance ecosystem-based management;

6. recommend actions to preserve, restore and protect submerged aquatic vegetation populations and meadows; and

7. identify opportunities for regional ecosystem-based management with neighboring states and the federal government.

§ 14-0113. State agency assistance.

Any state agency, department, public benefit corporation or division, bureau or agency thereof may provide the council with the services of its agents, employees and facilities without charge to the council for the purpose of carrying out this article.

TITLE 1

SHORT TITLE; STATEMENT OF POLICY; DEFINITIONS; GENERAL PROVISIONS

Section 15-0101. Short title.

15-0103. Legislative findings.

15-0105. Declaration of policy.

15-0107. Definitions as used in this article.

15-0109. General jurisdiction.

15-0111. Public Authorities Law and Administrative Code of the
City of New York are not affected.

15-0113. State to be reimbursed for costs.

§ 15-0101. Short title.

This article 15 of the Environmental Conservation Law shall be known as the Water Resources Law. However, sections of the Environmental Conservation Law falling within this article 15 may be cited either as such sections of the Environmental Conservation Law or as such sections of the Water Resources Law.

§ 15-0103. Legislative findings.

Article 15 shall be construed and administered in the light of the following findings of fact:

1. The sovereign power to regulate and control the water resources of this state ever since its establishment has been and now is vested exclusively in the state of New York, except to the extent of any delegation of power to the United States;

2. New York State has been generously endowed with water resources

which have contributed and continue to contribute greatly to the position of preeminence attained by New York in population, agriculture, commerce, trade, industry and outdoor recreation;

3. Adequate and suitable water for water supply, domestic, municipal, industrial, agricultural and commercial uses, power, irrigation, transportation, fire protection, sewage and waste assimilation, the growth of forests, maintenance of fish and wildlife, recreational enjoyment and other uses is essential to the health, safety and welfare of the people and economic growth and prosperity of the state;

4. In recent years our population growth and the development and use of new technology and processes have resulted in demands for more water and the equitable use thereof for these purposes;

5. In recent years recreational activities are making new and greater demands on lakes and streams of the state for boating, fishing, bathing and water sports, and the lands adjacent thereto for campsites, access areas and public beaches;

6. The growth of cities and urban areas and their expansion into formerly rural areas has in many cases resulted in the filling in, diversion and destruction of water courses, necessarily destroying aquatic habitat and lessening supplies of water for multiple use purposes;

7. Increased motorized highway travel and public safety are requiring the construction of new, better and larger public highways which may alter the water ways of the state and encroach upon water courses and affect their uses;

8. All fish, game, wildlife, shellfish, crustacea and protected insects in the state, except those legally acquired and held in private ownership, are owned by the state and held for the use and enjoyment of the people of the state, and the state has a responsibility to preserve, protect and conserve such terrestrial and aquatic resources from destruction and damage and to promote their natural propagation;

9. The unreasonable, uncontrolled and unnecessary interference with or defilement and disturbance of water courses create hazards to the health, safety and welfare of the people of the state causing great economic loss by erosion of soil, increased costs of water purification and treatment, the loss of crop lands and forests by flooding, the destruction and failure of natural propagation of fish and aquatic resources and the loss of water for domestic, industrial, navigational, municipal, agricultural, recreational and other beneficial uses and purposes;

10. The unreasonable and unregulated (a) interference with the channels and beds of lakes and streams by construction of dams, roads and other structures, (b) alteration of water courses and gradients, (c) impounding of water, (d) dredging and filling in of stream beds, and the unreasonable removal of sand, gravel or other materials from streams, and by other action, have resulted in pollution of such waters, increase in turbidity and the deposit of silt and debris, irregular variations of velocity, temperature and levels of water, erosion of banks and uplands and the flooding of valuable lands;

11. The department, and two of its predecessors, the Water Resources Commission and the Water Pollution Control Board, has classified substantially all of the waters of the state;

12. The department, pursuant to title 11 of article 15 of the Environmental Conservation Law, is continuing the work of its predecessor, the Water Resources Commission in undertaking comprehensive planning for the protection, conservation and development of the water resources of the state;

13. It is in the best interest of the state that provision be made for the regulation and supervision of activities that deplete, defile, damage or otherwise adversely affect the waters of the state and land resources associated therewith.

§ 15-0105. Declaration of policy.

In recognition of its sovereign duty to conserve and control its water resources for the benefit of all inhabitants of the state, it is hereby declared to be the public policy of the state of New York that:

1. The regulation and control of the water resources of the state of New York be exercised only pursuant to the laws of this state;

2. The waters of the state be conserved and developed for all public beneficial uses;

3. Comprehensive planning be undertaken for the protection, conservation, equitable and wise use and development of the water resources of the state to the end that such water resources be not wasted and shall be adequate to meet the present and future needs for domestic, municipal, agricultural, commercial, industrial, power, recreational and other public, beneficial purposes;

4. With respect to the use of the waters of the state and the water courses thereof, due consideration shall be given to the relative importance of different uses;

5. The acquisition, storage, diversion and use of water for domestic and municipal purposes shall have priority over all other purposes;

6. Alterations in the conditions of waters and water courses be planned and carried out in such manner that the important uses will be impaired as little as possible;

7. Reasonable standards of purity and quality of the waters of the state be maintained consistent with public health, safety and welfare and the public enjoyment thereof, the propagation and protection of fish and wildlife, including birds, mammals and other terrestrial and aquatic life, and the industrial development of the state, and to that end, to require the use of all known available and reasonable methods to prevent and control pollution, wastage and unreasonable disturbance and

defilement of the waters of the state;

8. In addition to other recognized public beneficial uses and control of water as provided by this article 15 or by any other statute, the regulated acquisition, storage, diversion and use of water for the supplemental irrigation of agricultural lands within the state is a public purpose and use, in the interests of the health, safety and welfare of the people of the state and for their interest.

§ 15-0107. Definitions as used in this article.

1. "Person" means any individual, firm, co-partnership, association or corporation other than the state and a "public corporation."

2. "Public corporation" means "public corporation" as defined in subdivision one of Section 3 of the General Corporation Law and includes all public authorities, except the Power Authority of the State of New York.

3. "Municipality" or "municipal corporation" includes a county, city, town and village.

4. "Waters" shall be construed to include lakes, bays, sounds, ponds, impounding reservoirs, springs, wells, rivers, streams, creeks, estuaries, marshes, inlets, canals, the Atlantic ocean within the territorial limits of the state of New York, and all other bodies of surface or underground water, natural or artificial, inland or coastal, fresh or salt, public or private, which are wholly or partially within or bordering the state or within its jurisdiction.

5. "Water power" shall be construed to mean power developed from falling or flowing water, and all electrical current and other forms of energy into which such power may be transformed.

6. The term "comprehensive planning" as used in title 11 of this article shall be deemed to mean multi-purpose planning for at least two,

and as many more as may be found to be practicable and reasonable, of the purposes and uses as provided by this article 15 or by any other statute, the provisions of which and the procedures authorized thereby are to remain in full force and effect.

7. Other definitions, applicable to this article, are found in sections 15-1301, 15-1703, 15-1973 and 15-2101.

§ 15-0109. General jurisdiction.

The department shall exercise its powers and perform its duties in any matter affecting the construction of improvements to or developments of water resources for the public health, safety or welfare, including but not limited to the supply of potable waters for the various municipalities and inhabitants thereof, the use of water for industrial and agricultural operations, the developed and undeveloped water power of the state, the facilitation of proper drainage and the regulation of flow and improvement of the rivers of the state.

§ 15-0111. Public Authorities Law and Administrative Code of the City of New York are not affected.

Nothing contained in this article shall be deemed or construed as amending, repealing, altering or otherwise modifying in whole or in part any provision of Title 1, Article 5 of the Public Authorities Law, as amended, with respect to Power Authority of the State of New York, or any provision of Title K of Chapter fifty-one and Title D of Chapter 15 of the Administrative Code of the City of New York, as amended, with respect to the City of New York, and such acts shall remain in full force and effect, except that notwithstanding the provisions of this section and title 3 of article 1 of this chapter, section 15-0103 and title 8 of this article shall apply to the city of New York, its agencies and departments. Nothing in this article shall be deemed or construed as adding to, diminishing or otherwise modifying the rights, powers, duties and obligations granted to and imposed upon Power

Authority of the State of New York and the City of New York, its or their agencies and departments by such statutes or any other statutes, except that notwithstanding the provisions of this section and title 3 of article 1 of this chapter, section 15-0103 and of title 8 of this article shall apply to the city of New York, its agencies and departments.

§ 15-0113. State to be reimbursed for costs.

In the event that the department shall carry out a project paid for by the beneficiaries, as provided by various parts in this article, the department may, if such procedure shall be found to be just and reasonable, require that the state be reimbursed for costs which may have been paid from state appropriations. This reimbursement may cover costs and expenses incurred prior to the time the project funds could be made available for salaries and expenses for regular employees of any state department who may have devoted all or a part of their time to that particular project, except this is not intended to apply to the salaries of the members of the department engaged only in general administrative work in connection with the project.

TITLE 3
POWERS AND DUTIES

Section 15-0301. Investigations.

15-0303. Examination of books, records and accounts.

15-0305. Access to property for inspection or investigation.

15-0307. Requirement of statements and reports.

15-0309. Power to sue.

15-0311. Eminent domain.

15-0313. Powers and responsibilities with respect to water pollution control.

15-0314. Powers and responsibilities with respect to certain plumbing fixtures.

15-0315. Relations with other governmental bodies and agencies.

15-0317. General powers and duties.

§ 15-0301. Investigations.

1. The department may, of its own motion, make or cause to be made such surveys and investigations as it may deem advisable and necessary for the discharge of its duties under this article.

2. The department, upon its own motion, or upon a petition presented to it by a person or public corporation pursuant to provisions of this article, may in its discretion, extend the scope of such proceeding to any improvements or developments of natural resources which may be done under any provisions of this article, and if any part of the procedure governing the matters concerning which the petition is presented cannot be made applicable in all respects to the subject matter of the proceedings as thus extended, then the procedure peculiar to such additional matter as provided for in this article may be adopted to the extent necessary.

3. The department shall make or cause to be made continuing investigations of the water resources of the state so as to accumulate comprehensive data as a basis of providing for their proper conservation, development, regulation and use.

4. The department shall conduct systematic gauging of rainfall and stream flow throughout the state when moneys shall have been appropriated therefor.

§ 15-0303. Examination of books, records and accounts.

For the purpose of ascertaining material information relevant to the function of the powers and duties of the department, the department may by its members, authorized agents or representatives freely examine at any time the books, records and accounts of any holder of a license, permit or other authorization, issued pursuant to this article.

§ 15-0305. Access to property for inspection or investigation.

The department or its duly appointed agents shall have the right to enter at all times in or upon any property, public or private, for the purpose of inspecting or investigating conditions relating to matters within the jurisdiction of the department pursuant to article 15. The department shall be liable only for actual damage done by reason of any such entry, inspection, or investigation. The amount of such damages may be agreed upon between the department and the owner and occupant of the damaged property, or if they cannot agree the amount of such damages shall be ascertained and determined by proper court action.

§ 15-0307. Requirement of statements and reports.

The department may require any holder of a license, permit or other authorization, issued pursuant to this article, at a designated time or times, to file with it statements and reports, in such form as it may prescribe, covering any data or information which it deems necessary or proper to enable it to carry into effect the provisions of this article.

§ 15-0309. Power to sue.

The department may bring actions, suits or proceedings as in its judgment may be necessary and proper to enable it to perform any of the duties imposed upon it by the provisions of this article as amended or to prevent the violation by any person or public corporation of any of the provisions thereof; and may defend such actions, suits or proceedings as may arise through the performance of any duties or functions imposed upon it by the provisions of this article as amended.

§ 15-0311. Eminent domain.

The department may, in those situations which are specifically

enumerated in this article and subject to whatever restrictions and limitations this article may impose, acquire real property pursuant to this article under an exercise of the right of eminent domain.

§ 15-0313. Powers and responsibilities with respect to water pollution control.

1. The department shall perform such duties and functions with respect to the control of water pollution as is provided in article 17 of the Environmental Conservation Law, and shall have such powers and authority as may be necessary in that regard.

2. The department is hereby authorized, upon due consideration after hearing to:

a. Alter, modify or amend the "Rules and Classifications and Standards of Quality and Purity for Waters of New York State" for the control of pollution of the waters of the state as provided in paragraph (c) of subdivision 7 of section 17-0301,

b. Classify the waters of the state in accordance with best usage in the interest of the public, and alter, reclassify, modify, change or amend the classification of waters hitherto adopted and established by the former Water Resources Commission and the former Water Pollution Control Board as provided in paragraph (c) of subdivision 7 of section 17-0301,

c. Establish new, or alter, modify, change or amend existing standards of quality and purity of the waters of the state applicable to the classification of waters.

3. In the classification of waters and the adoption of standards of purity and quality therefore, due consideration shall be given by the department to the factors and considerations specifically provided in section 17-0301.

4. The department is authorized to adopt and enforce rules and regulations governing the direct application of chemicals to or in surface waters for the purpose of altering water quality, or the direct application of pesticides to or in surface waters, notwithstanding any of the provisions of this chapter.

a. Such rules and regulations may forbid such direct application or use of pesticides and chemicals except pursuant to a permit issued by the department, or by an appropriate officer or agency authorized by such rules to issue such permits, except that a permit shall not be required for the application of a pesticide to a pond of one acre or less in size which has no outlet to surface water.

b. Such rules and regulations may specify the pesticides and chemicals and quantities and concentrations thereof which may be directly applied or used, which specified chemicals and pesticides shall be selected with maximum protection of life, health and property as criteria for their selection, and shall also provide for giving reasonable notice to persons likely to be adversely affected by such use of chemicals and may require consent of persons who may reasonably be expected to suffer substantial damage or injury thereby prior to the issuance of any permit for such use. A fee of one hundred dollars shall accompany each permit.

c. No pesticide or chemical may be introduced into any surface waters of the state classified pursuant to article 17 in violation of such rules and regulations.

§ 15-0314. Powers and responsibilities with respect to certain plumbing fixtures.

1. On and after the effective date of this section, no individual, public or private corporation, political subdivision, government agency, department or bureau of the state, municipality, industry, co-partnership, association, firm, trust, estate or other legal entity shall, for purposes of use in this state, distribute, sell, offer for sale, import or install any sink faucet or lavatory faucet, shower head,

drinking water fountain, urinal or water closet, including tank-type toilets, flushometer-tank toilets, flushometer-valve toilets, electromechanical hydraulic toilets, and all other types of toilets that use water and associated flush-valve, if any, unless it shall meet the water saving performance standards as provided for in subdivision two of this section.

2. The water saving performance standards for sink and lavatory faucets, shower heads, drinking water fountains, urinals and water closets, including tank-type toilets, flushometer-tank toilets, flushometer-valve toilets, electromechanical hydraulic toilets, dual-flush toilets and all other types of toilets that use water shall be as follows:

(a) for lavatory faucets, at a constant water pressure of sixty pounds per square inch, maximum flow shall not exceed 1.5 gallons of water per minute (or .25 gallons per cycle for lavatory faucets designed as metering faucets) and provided that those faucet models installed in public buildings must be of a self-closing variety and must be designed to limit the discharged flow rate of water to a maximum of .5 gallons per minute at a constant water pressure of sixty pounds per square inch or must be of the metering type which limit the discharge of water to a maximum of .25 gallons per cycle; and

(b) for sink faucets, at a constant water pressure of sixty pounds per square inch, maximum flow shall not exceed 2.2 gallons of water per minute; and

(c) for shower heads, at a constant water pressure of eighty pounds per square inch, maximum flow shall not exceed 2.0 gallons of water per minute; and

(d) for urinals and associated flush-valve, if any, maximum flow shall not exceed an average of 0.5 gallons of water per flush (except for urinals designated and marketed exclusively for use in prisons or mental health care facilities); and

(e) except for water closets and toilets designed and marketed exclusively for use in prisons or mental health care facilities, (1) for water closets and associated flush-valve, if any, maximum flow shall not exceed an average of 1.28 gallons of water per flush; (2) for dual-flush tank-type water closets, the average of two reduced flushes and one full

flush shall not exceed 1.28 gallons of water per flush; and (3) for dual-flush flushometer-valve water closets, maximum flow shall not exceed an average of 1.28 gallons of water per flush; and

(f) drinking water fountains must be of a self-closing variety.

3. Each shower head, sink or lavatory faucet, both box and product, shall be marked and labeled, and each water closet or urinal, or each component if the water closet or urinal is comprised of two or more components, both box and product, shall be marked and labeled in accordance with the latest revision of the standards designated American National Standards, written under American National Standards Institute (ANSI), and, as applicable, the following United States Environmental Protection Agency watersense program specification: showerheads (July 26, 2018), tank-type toilets (June 2, 2014), lavatory faucets (October 1, 2007), flushing urinals (August 14, 2009), and flushometer-valve toilets (December 17, 2015).

4. The commissioner may permit the sale and installation of water closets, blow out toilets and associated flush-valves, if any, which do not meet the standards provided for in subdivision two of this section if after application therefor it is determined by the commissioner that the installation of fixtures which meet such standards would be detrimental to the operation of the existing sewerage system or part of such system, servicing such fixtures.

5. The provisions of this section shall not apply to fixtures which were in compliance with this section and other applicable provisions of law on the date on which they were installed which are removed and relocated to another room or area of the same building or to another building owned or leased by the owner of the building from which such fixtures were removed after the effective date of this section, nor shall they apply to fixtures such as safety showers, bedpan washer equipped water closets and aspirator faucets, which, in order to perform a specialized function, cannot meet the standards specified in subdivision two of this section.

6. "Public building" as used in this section, means any building or

portion thereof, used or controlled by any department or branch of a state or local government, or which is constructed wholly or partially through state or municipal funds, including tax funds, funds obtained through bond issues or grants or loans under any state law, which is likely to be used by the public, including, but not limited to theaters, concert halls, auditoriums, museums, schools, libraries, recreation facilities, transportation terminals and stations, factories, office buildings and building establishments. In addition, "public building" includes those facilities such as stores, restaurants and hotels which have restrooms which are open to the public or the clientele of the facility but not including private restrooms which are part of sleeping quarters in such a facility. The term "public building" does not include privately owned residential structures, public housing structures, or police, fire or correction structures.

7. A violation of the provisions of this section shall be liable for a penalty pursuant to section 71-1127 of this chapter.

8. The commissioner, to the extent practicable and appropriate, shall utilize the latest revision of the standards designated American National Standards, written under American National Standards Institute (ANSI) procedures in determining requirements under this section, and, as applicable, the following United States Environmental Protection Agency watersense program specification: showerheads (July 26, 2018), tank-type toilets (June 2, 2014), lavatory faucets (October 1, 2007), flushing urinals (August 14, 2009), and flushometer-valve toilets (December 17, 2015).

§ 15-0315. Relations with other governmental bodies and agencies.

1. In order to adequately protect the interests of the state in its water resources, the department is hereby authorized to:

a. Cooperate with the appropriate agencies of the federal government or this or other states, or any interstate bureau, group, division or agency with respect to the use of water from lakes, ponds, rivers and

streams, which are without or wholly or partially contained within this state, and to endeavor to harmonize any conflicting claims which might arise therefrom.

b. Appear, represent and act for the state in respect to any proceeding before either a federal or state governmental body or agency where the water resources of the state may be affected, and may do and perform such acts in connection therewith as it deems proper to protect the interests of the state.

c. Present for the consideration of the Congress or officers of the federal government, as occasion requires, the just rights of the state in relation to its waters and institute and prosecute appropriate actions and proceedings to secure such rights, and defend any action or proceeding calculated to impair such rights.

2. The department is designated as the agent of the state to obtain the cooperation, aid and assistance of any appropriate federal agencies in the performance of the functions of the department or of any regional planning and development board created under title 11 of this article. The department may enter into contracts, when required, with any such federal agencies for such purposes. Wherever it is required by a federal statute, rule or regulations that such cooperation, aid and assistance be given on a matching-funds basis, the department, if funds have been appropriated and are available therefor, is designated as the agent of the state to enter into contracts on said basis; provided, however, that payment by the state shall not exceed one-half of the cost, including personal service, of the services rendered by the federal agencies. All contracts entered into by the department shall be executed by its commissioner and in the manner and form prescribed by law.

§ 15-0317. General powers and duties.

The department shall continue to exercise all the functions, powers and duties of the former Water Resources Commission as specified in the former Conservation Law in effect on the date of the enactment of

chapter 140 of the laws of 1970, and all the functions, powers and duties of the Water Power and Control Commission as previously established by chapter 242 of the laws of 1928 and of its predecessors and all the functions, powers and duties enumerated in this article as amended and as may hereinafter be prescribed by law.

TITLE 5

PROTECTION OF WATER

Section 15-0501. Protection of certain streams; disturbances of stream beds; permit.

15-0503. Protection of water bodies; permit.

15-0505. Protection of navigable waters; excavation or fill; permit.

15-0507. Structures impounding waters; structures in waters; responsibility of owner; inspection.

15-0509. Bonds.

15-0511. Alterations to watercourses and lakes; inspection and correction; illegal impounding of waters.

15-0513. Liability of subcontractor, employee or agent.

15-0514. Prohibition of certain incompatible uses over either primary ground water recharge areas or federally designated sole source aquifers.

15-0515. Review.

15-0516. Inspection report of dam safety.

15-0517. Water quality testing requirements for land clearing debris and compost facilities in Nassau and Suffolk counties.

§ 15-0501. Protection of certain streams; disturbances of stream beds; permit.

1. Except as provided in subdivisions 4, 5, 6 and 7 of this section, no person or public corporation shall change, modify or disturb the course, channel or bed of any stream as defined in subdivision 2, or remove any sand, gravel or other material from the bed or banks of such

a stream without a permit issued pursuant to subdivision 3 of this section.

2. For the purposes of this section, stream shall mean that portion of any fresh surface watercourse, except lakes or ponds having a surface area greater than ten acres at mean low water level, for which the department has adopted or may hereafter adopt pursuant to section 17-0301, any of the following classifications or standards:

AA and AA (T),

A and A (T),

B and B (T),

C (T)

Small ponds or lakes with a surface area at mean low water level of ten acres or less, located in the course of a stream, shall be considered a part of the stream and subject to regulation under this section.

3. Permit.

a. Before granting a permit, a permit renewal or a permit modification pursuant to this section, the department shall ascertain the probable effect on the health, safety and welfare of the people of the state, and the effect on the natural resources of the state, including soil, forests, water, fish and aquatic resources therein, likely to result from the proposed project or work.

b. In order to minimize the disturbance of a stream and in order to prevent unreasonable erosion of soil, increased turbidity of the waters, irregular variations in velocity, temperature and level of waters, the loss of fish and aquatic wildlife and the destruction of natural habitat thereof, and the danger of flood or pollution, the department shall review the permit application or request for renewal or modification of

an existing permit and may approve the manner and the extent to which the stream bed or channel may be changed, altered or modified and may limit the quantity of sand, gravel or other material to be removed, designate the location in the bed, channel or banks of the stream from which the sand, gravel or other material may be removed, or it may deny the permit or request.

c. The rules and regulations adopted by the department to implement this section and the provisions of article 70 of this chapter and rules and regulations adopted thereunder shall govern the processing of permit applications, renewals, modifications, suspensions and revocations under this section.

4. No permit under this section shall be required of any local public corporation which has entered into a written memorandum of understanding with the department establishing the plan of operation to be followed in carrying out projects or work affecting water courses so as to afford proper protection to the public beneficial uses of such water courses.

5. No permit under this section shall be required of any state department or state public corporation. State departments and state public corporations may enter into a written memorandum of understanding with the department concerning projects or work of the type for which a permit would be required under this section if the project or work were undertaken by a person or local public corporation. The memorandum may establish procedures for review by the department of the plans for such projects or work and for written recommendations by the department with respect thereto.

6. No permit under this section shall be required for emergency work in a stream or on its banks which is immediately necessary to protect the health, safety and well-being of any person or persons or to prevent damage to personal or real property, provided that the department is given written notification by registered mail or telegraph within forty-eight hours after the commencement of the work and within forty-eight hours following the completion of such work. Whenever emergency work is performed as provided in this subdivision, it shall be

performed in a manner that will cause the least change, modification, disturbance or damage to the course or bed of the stream and its banks.

7. No permit under this section shall be required for certain agricultural activities of persons and corporations actively cultivating land devoted to agriculture whether or not the same be along a stream or watercourse as described in subdivision 2; providing that these agricultural activities consist only of crossing and recrossing of such streams or watercourses by livestock or by wheeled farm equipment normally used for traditional agricultural purposes; or the use of such stream or watercourse for withdrawal of water for irrigation where such withdrawal does not require altering the bed, banks or course of the stream in any manner.

8. The requirements of this section shall be in addition to those specified in section 15-0505 of this title, provided however, that the department may, by rule and regulation, provide that only one application for a permit or request for renewal or modification of an existing permit need be filed with the proposed project or work requires a department permit under this section and section 15-0505 of this title.

§ 15-0503. Protection of water bodies; permit.

1. Except as provided in subdivision 3 of this section

a. No dam shall be erected, constructed, reconstructed or repaired by any person or local public corporation without a permit issued pursuant to subdivision 2 of this section. As used in this section, and section 15-0511 of this title, "dam" means any artificial barrier including any earthen barrier, together with its appurtenant works, which impounds or will impound waters, provided it has (1) a height equal to or greater than fifteen feet or (2) a maximum impoundment capacity equal to or greater than three million gallons; except that for purposes of this section a dam shall not include any structure which has (i) a height equal to or less than six feet regardless of the structure's impoundment

capacity, or (ii) an impoundment capacity not exceeding one million gallons regardless of the structure's height.

b. Except where a lease or other appropriate conveyance of an interest authorizing the use and occupancy of state-owned lands underwater has been obtained from the commissioner of general services pursuant to subdivision seven of section seventy-five of the public lands law, no dock, wharf, platform, breakwater, mooring, or other structure in, on or above waters shall be erected, placed, constructed, reconstructed, or expanded after the effective date of this paragraph by any person or local public corporation without a permit issued pursuant to subdivision 2 of this section. The term "reconstructed" as used in relation to docks, wharves, platforms, breakwaters, mooring or other structures pursuant to this paragraph shall mean the substantial rebuilding of structures or facilities and shall not apply to ordinary maintenance or repair of existing functional structures or facilities, such as repainting, redriving pilings or replacing broken boards in docks.

c. A city, town, village or county may submit to the commissioner a local law or ordinance regulating docks or other structures as described in paragraph b of this subdivision. The commissioner shall review such law or ordinance to determine whether it provides environmental protection comparable to, or greater than, the provisions of such paragraph and any regulations promulgated thereunder. If the commissioner determines that the local law or ordinance submitted meets such requirements, the commissioner may delegate, upon such terms and conditions as he or she deems appropriate, to the local government the authority to administer the permit program and to charge a fee for permit processing. Any delegation may be revoked by the commissioner if he or she finds that the local government has failed to carry out the program in accordance with the terms of the delegation.

2. Permits. a. Before granting a permit, a permit renewal or a permit modification pursuant to this section, the department shall ascertain the probable effect on the health, safety and welfare of the people of the state, and the effect on the natural resources of the state likely to result from the proposed project or work.

b. The department shall review the permit application or request for renewal or modification of an existing permit and may approve the manner and extent to which the waters of the state or the banks and shore thereof will be affected by the proposed project or work and may grant or deny the permit or request, or may grant the permit or request with such conditions as might appear necessary to safeguard life, property and natural resources during and after the execution of the proposed project or work.

c. The rules and regulations adopted by the commissioner to implement this section and the provisions of article 70 of this chapter and rules and regulations adopted thereunder shall govern permit applications, renewals, modifications, suspensions and revocations under this section.

d. The requirements of this section shall be in addition to those specified in sections 15-0501 and 15-0505 of this title, provided however, that the department may, by rule and regulation, provide that only one application for a permit or request for renewal or modification of an existing permit need be filed when the proposed project or work requires a department permit under this section and any other section of this title.

3. The requirement of a permit pursuant to this section shall not apply to the following facilities:

a. A dock, pier, wharf or other structure used solely as a landing place on water providing dockage for five or fewer boats and encompassing within its outer perimeter an area less than four thousand square feet;

b. A mooring facility providing mooring for fewer than ten boats;

c. Seasonal replacement or reinstallation of structures referenced and listed in paragraph b of subdivision 1 of this section installed prior to the effective date of this paragraph.

4. The design, preparation of plans, estimates and specifications and the supervision of the erection, construction, reconstruction and repair of all the structures hereinbefore referred to shall be done by a licensed professional engineer, or in the case of farm ponds for which a permit is required, by an engineer or conservationist employed by a governmental agency cooperating with a soil conservation district, or by an engineer employed by the department.

5. Notwithstanding the provisions of this or any other chapter or law to the contrary, no reservoirs for any purpose shall hereafter be constructed on the Upper Hudson River in the Adirondack park between Luzerne and the river's source; the Boreas river from its mouth to Durgin Brook; the Indian river from its mouth to Abanakee Dam; and the Cedar river from its mouth to Cedar River Flow, by the state or by any river regulating board.

§ 15-0505. Protection of navigable waters; excavation or fill; permit.

1. No person, local public corporation or interstate authority shall excavate or place fill below the mean high water level in any of the navigable waters of the state, or in marshes, estuaries, tidal marshes and wetlands that are adjacent to and contiguous at any point to any of the navigable waters of the state and that are inundated at mean high water level or tide, without a permit issued pursuant to subdivision 3 of this section. For the purposes of this section, fill shall include, but shall not be limited to, earth, clay, silt, sand, gravel, stone, rock, shale, concrete (whole or fragmentary), ashes, cinders, slag, metal, or any other similar material whether or not enclosed or contained by (1) crib work of wood, timber, logs, concrete or metal, (2) bulkheads and cofferdams of timber sheeting, bracing and piling or steel sheet piling or steel H piling, separated or in combination. Nothing contained in this section is intended to be, nor shall be construed to limit, impair or affect the memorandum of understanding which any state department enters into with the Department of Environmental Conservation or the general powers and duties of the Department of Transportation relating to canals or the general powers and duties of the Department of

Environmental Conservation relating to flood control.

2. A permit application or request for a permit renewal or modification shall be made on forms provided by the department and shall consist of a description of the character and extent of the proposed project or work, drawings, plans and specifications providing the location and details of the proposed project or work, and such additional information as the department may require.

3. Before granting a permit, a permit renewal or a permit modification pursuant to this section the department shall ascertain the probable effect on the use of such waters for navigation, the health, safety and welfare of the people of the state and the effect on the natural resources of the state, including soil, forests, water, fish and aquatic resources therein, likely to result from the proposed project or work.

4. The department shall review the permit application or request for renewal or modification of an existing permit and may grant or deny the permit or request, or may grant the permit with such conditions as will safeguard life or property against danger or destruction and as will make the navigable waters safe for use by the public.

5. The rules and regulations adopted by the department to implement this section and the provisions of article 70 of this chapter and rules and regulations adopted thereunder shall govern the processing of permit applications, renewals, modifications, suspensions and revocations under this section.

6. The provisions of subdivisions 1, 2, 3 and 4 of this section shall not apply to emergency work in waters described in subdivision 1 of this section which is immediately necessary to protect the health, safety and well-being of any person or persons or to prevent damage to personal or real property, provided that the department is given written notification by registered mail or telegraph within forty-eight hours after the commencement of the work and within forty-eight hours following the completion of the work. Whenever such emergency work is performed as provided in this subdivision, it shall be performed in a

manner that will cause the least change, modification, disturbance or damage to the environment.

7. The requirements of this section shall be in addition to those specified in section 15-0501 of this title, provided however, that the department may, by rule and regulation, provide that only one application for a permit or request for renewal or modification of an existing permit need be filed when the proposed project or work requires a department permit under this section and section 15-0501 of this title.

§ 15-0507. Structures impounding waters; structures in waters; responsibility of owner; inspection.

1. Any owner of a dam or other structure which impounds waters shall at all times operate and maintain said structure and all appurtenant structures in a safe condition. As used in this section and section 71-1109 of this chapter, "owner" means any person or local public corporation who owns, erects, reconstructs, repairs, maintains or uses a dam or other structure which impounds waters. The commissioner may promulgate regulations requiring any owner to prepare and implement a safety program for such dam or structure as necessary to safeguard life, property or natural resources. Regulations governing the safety program may include requirements for inspections, monitoring, maintenance and operation, emergency action planning, response and prevention of terrorism and cyber terrorism, financial security, recordkeeping and reporting or any other requirement the commissioner deems necessary to safeguard life, property or natural resources. Such requirement shall only apply to those dams or other structures that impound waters which pose, in the event of failure, a threat of personal injury, substantial property damage or substantial natural resource damage.

2. Whenever in the judgment of the department public safety requires, the department shall investigate dams and other structures impounding waters in the state, and docks, piers and wharves extending into such waters.

3. In addition to any other power set forth in this chapter, including the power to issue an order pursuant to section 71-0301 of this chapter, the department shall have the power, whenever in the judgment of the department it may be necessary to safeguard life or property or to protect the natural resources of the state, after hearing on due notice, to issue an order, setting forth the findings of fact and conclusions therefrom, directing any owner:

a. to conduct studies, investigations and analyses necessary to evaluate the safety of the structure, including but not limited to visual inspections, measurements, foundation exploration and testing, materials testing, hydraulic and hydrologic analyses, structural stability analyses and seepage investigations; and

b. to either remove the said structure or to erect, reconstruct or repair the same within such reasonable time and in such manner as shall be specified in said order.

It shall be the duty of every such owner to obey, observe and comply with such order and with the conditions therein prescribed. The provisions of title 9 of this article with respect to administrative procedures shall be applicable to hearings under this section.

4. It shall be unlawful for any owner to fail, omit or neglect to comply with such order within a reasonable time as designated by the department.

5. Upon the violation of any such order, the department shall have power to enter upon the lands and waters where such structures are located for the purpose of removing, repairing or reconstructing the same and to take such other and further precautions which it may deem necessary to safeguard life or property or protect the natural resources of the state against danger occasioned by the presence of such structures. In removing, repairing and reconstructing such structures or other properties so affected the department shall not deviate from the method, manner and specifications contained in the original order.

6. The department shall certify the amount of the costs and expenses incurred by the department and any state departments for the removal, repair or reconstruction aforesaid in any wise connected therewith to the county legislative body of the county or counties in which the said lands and waters are located, whereupon it shall be the duty of such county legislative body of each county to add the amount so certified to the assessment rolls of such locality or localities as a charge against the real property upon which the dam, dock or other structure is located, designated or described by the department as chargeable therewith, and to issue its warrant or warrants for the collection thereof. Thereupon it shall become the duty of such locality or localities through their proper officers to collect the amount so certified in the same manner as other taxes are collected in such locality or localities and when collected to pay the same to the department, who shall thereupon, pay the same into the State Treasury. Any amount so levied shall thereupon become and be a lien upon the real property affected thereby to the same extent as any tax levy becomes and is a lien thereon. The department may also assert other rights of recovery as may exist by law for such costs and expenses incurred.

§ 15-0509. Bonds.

The department may require the posting of a bond by permittees conditioned upon compliance with the terms of permits issued pursuant to the provisions of title 5 of this article.

§ 15-0511. Alterations to watercourses and lakes; inspection and correction; illegal impounding of waters.

1. Whenever in the judgment of the commissioner, public safety requires, or an illegal excavation, fill, or dam exists in or on the waters of the state, the commissioner may cause an investigation to be made of the nature of the hazard or violation and its probable effect on the health, safety and welfare of the people of the state, and the

effect on the environment and natural resources including forests, soil, water, fish and wildlife.

2. In addition to any other power set forth in this chapter, including the power to issue an order pursuant to section 71-0301 of this chapter, the commissioner shall have the power, after hearing on due notice, to issue an order, setting forth the findings of fact and conclusions therefrom, directing any person or local public corporation, who hereafter makes or allows to be made or is making an illegal or unsafe excavation or fill, or who constructs an illegal dam, to conduct studies, investigations, and analyses necessary to evaluate the safety of the structure, including but not limited to visual inspections, measurements, foundation exploration and testing, materials testing, hydraulic and hydrologic analyses, structural stability analysis and seepage investigations and to remove, replace or correct the dam or excavated or filled materials, within such reasonable time and in such manner as shall be specified in said order, and it shall be the duty of every such person or local public corporation to obey, observe and comply with such order and with the conditions therein prescribed. The provisions of title 9 of this article with respect to administrative procedures shall be applicable to hearings under this section.

3. It shall be unlawful for any person or local public corporation to fail, omit or neglect to comply with such order within a reasonable time as designated by the commissioner.

4. Upon the violation of any such order, the commissioner, or a duly appointed representative, shall have power to enter upon the lands and waters where such illegal or unsafe disturbances are located for the purpose of removing, replacing or correcting the same and to take such other and further precautions which the commissioner may deem necessary to safeguard life or property or protect the environment of the state against danger occasioned by the presence of the illegal or unsafe excavation, fill or dams. In removing or replacing such structures or other properties so affected the commissioner shall not deviate from the method, manner and specifications contained in the original order.

5. The commissioner shall certify the amount of the costs and expenses incurred by the department and any state departments for the removal or replacing aforesaid in anywise connected therewith to the county legislative body of the county or counties in which the said lands and waters are located, whereupon it shall be the duty of such county legislative body of each county to add the amount so certified to the assessment rolls of such locality or localities as a charge against the real property upon which the excavation, fill or dam is located, designated or described by the commissioner as chargeable therewith, and to issue its warrant or warrants for the collection thereof. Thereupon it shall become the duty of such locality or localities through their proper officers to collect the amount so certified in the same manner as other taxes are collected in such locality or localities and when collected to pay the same to the department which shall thereupon pay the same into the State Treasury. Any amount so levied shall thereupon become and be a lien upon the real property affected thereby to the same extent as any tax levy becomes and is a lien thereon. The department may also assert other rights of recovery as may exist by law for such costs and expenses incurred.

§ 15-0513. Liability of subcontractor, employee or agent.

It shall be unlawful for a subcontractor, employee or agent of a person or public corporation, or of a state department to knowingly and intentionally act, or a prime contractor of a person, public corporation or state department to act with or without an intention to violate the provisions of sections 15-0501, 15-0503 or 15-0505 in disregard of specifications provided in a construction contract protecting against stream damage.

§ 15-0514. Prohibition of certain incompatible uses over either primary groundwater recharge areas or federally designated sole source aquifers.

1. Definitions: The following terms, whenever used or referred to in

this section, shall have the following meanings:

a. "Primary groundwater recharge areas" shall mean those areas of the land surface through which water of great volume and high quality generally move downward to the deeper portions of the underlying groundwater reservoir. In the counties of Nassau and Suffolk, primary groundwater recharge areas shall mean Hydrogeologic Zones I, II, III, IV and V as defined in the Long Island Comprehensive Waste Treatment Management Plan of 1978, or any amendments to such boundaries which are accepted by the commissioner.

a-1. "Primary water supply aquifer areas" shall mean those areas in the counties of Nassau, Suffolk, Kings and Queens and the Schenectady aquifer (commonly known as the Great Flats Aquifer), as identified in the nineteen hundred eighty-one New York state department of health report on groundwater dependence in New York state, and defined in the United States Geologic Survey maps for such aquifers, or any amendments to such boundaries which are accepted by the commissioner.

b. "Incompatible uses" shall mean any hazardous waste or substances as determined by the department, that may ultimately be discharged to groundwater, or the storage of such a substance that may contaminate the groundwater.

c. "Long Island Comprehensive Waste Treatment Management Plan of 1978" shall mean the study prepared by the Long Island Regional Planning Board pursuant to section two hundred eight of the Federal Water Pollution Control Act as amended in 1972.

d. "Sole source aquifer" shall mean an aquifer system that the United States environmental protection agency, pursuant to Public Law 93-523 which is known as the federal Safe Drinking Water Act of 1974, has designated as the sole or principal drinking water source for an area and which, if contaminated, would create a significant hazard to public health.

e. "Hazardous wastes" shall include all materials or chemicals listed

as hazardous wastes pursuant to article twenty-seven of this chapter, or all toxic pollutants as defined in subdivision nineteen of section 17-0105 of this chapter.

f. "Hazardous substance" means:

(1) petroleum; or

(2) any substance or combination of substances designated as a hazardous substance under section 311 of the Federal Water Pollution Control Act (33USC1321) and which is not a hazardous waste under title 9 of article 27 of this chapter; or

(3) any substance listed by the department which because of its quantity, concentration, or physical, chemical or infectious characteristics may;

(i) Cause, or significantly contribute to an increase in mortality or an increase in serious irreversible or incapacitating reversible illness; or

(ii) Pose a substantial present or potential hazard to human health or the environment when improperly stored or otherwise managed.

The department shall promulgate a list of hazardous substances, within one year after the effective date of this section, including petroleum for the purposes of carrying out the applicable provisions of this title. Prior to the promulgation of such list the department shall solicit information on the present practices of industry and other commercial users of hazardous substances.

g. "Petroleum" means oil or petroleum of any kind and in any form including, but not limited to, oil, petroleum, fuel oil, crude oil, petroleum mixed with one or more other substances, gasoline, kerosene, naphtha and as further defined by the department in rules and regulations.

2. The Nassau - Suffolk Hydrogeologic Zones I, II, III, IV and V, and their attendant boundaries as specified in the Long Island Comprehensive Waste Treatment Management Plan of 1978, or any amendments to such boundaries which are accepted by the commissioner are hereby adopted as primary groundwater recharge areas for the counties of Nassau and

Suffolk for the purposes of this section.

3. The department shall propose, for the purposes of this section, primary groundwater recharge areas within either other designated sole source aquifer systems, excluding the counties of Nassau and Suffolk, or within primary water supply aquifer areas based upon hydrogeological conditions and recommendations within the department's groundwater management plan, within twelve months subsequent to the date at which the sole source aquifer designation becomes effective or within twelve months of the effective date of this amended subdivision, pursuant to the following procedures:

a. The department shall hold public hearings in regard to the proposed locations and boundaries of the primary groundwater recharge areas.

b. Notice of each public hearing shall be by publication in a newspaper most likely to give notice to the people residing within the primary water supply aquifer. Notice of such hearing shall be printed at least once in each of three successive weeks, but the hearing shall not be conducted less than thirty days following the date of first publication of notice of such hearing.

c. The department shall subsequently finalize and adopt specific locations and boundaries of such primary groundwater recharge areas within three months following the completion of such hearing.

d. Additional primary groundwater recharge areas or new boundaries of existing primary recharge areas may be delineated by the department based upon new hydrogeological information subject to the procedure outlined in paragraphs a, b and c of this subdivision.

4. Copies of the adopted boundaries of the delineated areas shall be kept on file in the offices of the commissioner and the regional director of the department.

5. The department shall promulgate rules and regulations which will restrict or prohibit incompatible uses over primary water supply

aquifers, giving special attention where necessary to protect primary groundwater recharge areas.

6. In undertaking its responsibilities under this section, the department shall give first attention to the protection of pristine, largely undisturbed or undeveloped areas to insure the non-degradation of the water resources of such areas.

§ 15-0515. Review.

A determination, order or issuance, modification or denial of a permit, pursuant to sections 15-0501, 15-0503 and 15-0505 shall be reviewable in a proceeding pursuant to article 78 of the Civil Practice Law and Rules.

§ 15-0516. Inspection report of dam safety.

1. Within thirty days of the creation by the department of any inspection report of any intermediate or high hazard dam, the department shall provide, to the chief executive officer of a municipality in which the dam is located, a copy of such report. Such report shall also be furnished to the chief executive officer of any other municipality in the county where the dam is located, or any county adjoining such county upon written request of the chief executive officer of such municipality.

2. For the purposes of this section, the term "chief executive officer" shall mean:

- (a) for the purposes of a village or city, the mayor of such village or city;
- (b) for the purposes of a town, the supervisor of such town;
- (c) for the purposes of a county, the chairperson of the county legislature or board of supervisors, or, if there be one, the county executive.

§ 15-0517. Water quality testing requirements for land clearing debris and compost facilities in Nassau and Suffolk counties.

1. In Nassau and Suffolk counties, the department shall promulgate rules and regulations to prevent water quality and other environmental impairments resulting from land clearing debris facilities or composting facilities. Such regulations shall at a minimum require:

- (a) quarterly up gradient and down gradient water quality testing;
- (b) setbacks from drinking water supply wells and surface water bodies; and
- (c) dust and odor suppression and fire risk minimization.

2. The department shall in the case of a primary recharge area, and may for other recharge areas, promulgate rules and regulations to be implemented twenty-four months after the effective date of this section, to prevent water quality and other environmental impairments resulting from land clearing debris facilities or composting facilities by requiring the use of an impermeable liner, in addition to the requirements of subdivision one of this section. The department may exempt a land clearing debris facility or a composting facility from the regulatory requirements of this subdivision following a review of the facility's water quality testing results and a determination by the department that such facility does not pose a risk of impairment to the primary recharge area or, if applicable, other recharge area.

3. For the purposes of this section:

(a) "land clearing debris" shall mean vegetative matter, soil and rock resulting from activities such as land clearing and grubbing, utility line maintenance or seasonal or storm related cleanup such as trees, stumps, brush and leaves and including wood chips generated from these materials.

(b) "composting facilities" shall mean facilities that accept more than three thousand cubic yards of waste, either processed or unprocessed, per year.

TITLE 6

WATER EFFICIENCY AND REUSE

Section 15-0601. Definitions as used in this title.

15-0603. Reclaimed wastewater feasibility study.

15-0605. Standards for reuse and disposal of reclaimed wastewater.

15-0607. Utilization of reclaimed wastewater registry.

§ 15-0601. Definitions as used in this title.

1. "Water reclamation project" means a project designed to utilize reclaimed wastewater or greywater for beneficial non-potable uses including, but not limited to, agricultural and landscape irrigation, commercial and industrial uses, and wetland maintenance purposes.

2. "Greywater" means untreated wastewater from bathtubs, showers, washing machines, dishwashers and sinks, but shall not include discharges from toilets or urinals or industrial discharges.

3. "Reclaimed wastewater" means water discharged from a treatment works utilizing at least effective secondary treatment as defined in section 17-0509 of this chapter.

§ 15-0603. Reclaimed wastewater feasibility study.

1. The department, in consultation with the department of health, shall conduct a study of potential uses of greywater and reclaimed wastewater in New York state, and develop a strategy for promoting water reclamation projects.

2. Such study shall be completed within eighteen months of the effective date of this section and a report of the findings from the study shall be presented to the governor, the speaker of the assembly and the temporary president of the senate within ninety days of the completion of the study.

§ 15-0605. Standards for reuse and disposal of reclaimed wastewater.

The commissioner, in consultation with the department of health, shall establish rules, regulations and standards for the reuse and disposal of reclaimed wastewater and/or greywater. The department of health shall advise the department on water quality and pathogens monitoring requirements.

1. Such rules, regulations and standards shall specify:

a. the permitted uses of reclaimed wastewater and greywater with required levels of water quality and treatment for each permitted use; permitted uses shall include, but not be limited to: industrial cooling; commercial and industrial landscaping; park and golf course irrigation; groundwater recharge; surface water supply augmentation; wetland creation and augmentation, and non-food agricultural crop and lawn irrigation.

b. operational requirements including, but not limited to, treatment facility reliability; storage requirements, if necessary; system labeling and color-coding requirements; and pipe location and placement.

2. Such rules, regulations and standards shall be promulgated within thirty months of the effective date of this section.

§ 15-0607. Utilization of reclaimed wastewater registry.

All persons utilizing reclaimed wastewater or greywater shall register such project with the department. The department shall maintain such registry.

Section 15-0701. Harmless alterations in watercourses and lakes; prescriptive rights or privileges; action for declaratory judgment; limitation of time.

§ 15-0701. Harmless alterations in watercourses and lakes; prescriptive rights or privileges; action for declaratory judgment; limitations of time.

1. An alteration (whether or not it causes water to cover or permeate land previously dry) in the natural flow, quantity, quality or condition of a natural watercourse or lake situated in this state and either on or below the surface of the earth, effected by the use either on or off riparian land, withdrawal, impoundment, or obstruction of the water in such watercourse or lake, or by the addition of water thereto, or by changes in the banks, bed, course or other physical characteristics of such watercourses or lake, is reasonable and lawful as against any person, as defined in subdivision two of section 15-0107, having an interest in such watercourse or lake, unless such alteration is causing harm to him or it, or would cause him or it immediate harm if and when begun. No action for nominal damages or for an injunction shall be maintainable because of such an alteration against any person or corporation, whether a riparian owner or not, on the ground that such alteration is an infringement of the plaintiff's private rights and privileges in the waters of, or with respect to, such watercourse or lake unless such alteration is causing plaintiff harm, or would cause him or it immediate harm if and when begun. This subdivision shall apply to such an action regardless of whether the alteration sought to be made the basis of it was caused before or after the effective date of this section.

2. For the purpose of this section, "harm" shall mean:

a. Interference with a present use of the water by the complaining party or an interference with the complaining party's present enjoyment of riparian land occurring prior to suit, or which will immediately occur when the alteration complained of is begun, regardless of whether

such interference has caused or will ever cause such party measurable financial loss; or

b. A decrease in the market value of the complaining party's interest in riparian land occurring prior to suit, or which will immediately occur when the alteration complained of is begun, regardless of whether his use of the water or enjoyment of riparian land was interfered with prior to suit, or will be immediately interfered with when the alteration complained of is begun.

3. Interference with the present enjoyment of riparian land may be established by proof that the alteration complained of or sought to be enjoined is rendering or will immediately render riparian land owned or occupied by the complainant less suitable or useful for the purpose or purposes to which he is presently devoting it. The evidence admissible to establish a decrease in the suitability or utility of such land for such purposes may include, but not be limited to, evidence tending to show that the act complained of has diminished, or when begun, will immediately diminish, the desirability for recreational purposes, or the natural beauty of the body of water to which the land owned or occupied by the complainant is riparian.

4. The cause of action essential to the initiation and creation of a prescriptive right or privilege against a private riparian owner to continue an alteration in the natural condition of such a watercourse or lake shall not be supplied by such an alteration until it shall have caused such riparian owner harm and then only if it is unreasonable.

5. Nothing contained in this section shall, however, be construed as depriving any person or corporation having an interest in such watercourse or lake of any remedy either at law or in equity which he now has, or may hereafter acquire, under the law of this state for harm caused him by an unreasonable alteration in the natural condition of such a watercourse or lake, regardless of whether such alteration was harmful and unreasonable from its initiation or subsequently became so.

6. Any person desirous of ascertaining the extent of the rights and

privileges of himself and others in the water of or with respect to the natural condition of such a natural watercourse or lake may maintain an action for a declaratory judgment defining the extent of such rights and privileges. Neither proof of present harm nor of the likelihood of future harm to the plaintiff from an alteration in the natural condition of such watercourse or lake shall be prerequisite to the maintenance of such an action, the judgment in which shall not affect the rights and privileges of any person or corporation not a party thereto. Such an action shall be maintainable by persons, corporations, governmental units, owners of land riparian to such a natural watercourse or lake, persons to whom such owners have granted their riparian rights in whole or in part, and owners of prescriptive rights or privileges in the water of or with respect to such watercourses or lakes.

7. No statute of limitations shall begin to run against a cause of action for such a declaratory judgment until a plaintiff who is empowered by this section to maintain it has been harmed by an unreasonable alteration in the natural condition of such watercourse or lake effected by the person or his predecessor in interest against whom such an action may be maintained.

8. Notwithstanding any other provision of this section, if the harm resulting from an unreasonable alteration of the natural condition of such a natural watercourse or lake is one which would not ordinarily be noticeable by an owner of land actually present thereon, no statute of limitations shall begin to run against any cause of action referred to in subdivisions four and five of this section until the party harmed is fairly chargeable with knowledge that he has been harmed.

9. Nothing herein contained shall be construed to alter or affect the right to exercise any power which the state of New York or any agency thereof, or any county, city, town or village or any agency thereof, may have to enjoin the initiation or continuance of an alteration in the natural condition of a natural watercourse or lake.

REGULATION OF RESERVOIR RELEASES

Section 15-0801. Statement of legislative findings and policy.

15-0803. Inventory of reservoirs.

15-0805. Regulation of reservoir releases.

15-0807. Public notice and hearing procedures.

§ 15-0801. Statement of legislative findings and policy.

1. In addition to the statements of policy and legislative findings as herein otherwise provided in this article, the legislature hereby finds that the volume and abrupt changes in the volume of releases of water from impounding reservoirs of water having a capacity of more than one billion gallons and located in the counties of Delaware, Greene, Putnam, Schoharie, Sullivan, Ulster and Westchester have damaged the recreational uses, such as trout fishing and canoeing, of waters affected by such releases, that such waters are a recreational resource for residents from all parts of the state of New York and elsewhere, that such recreational resource benefits the economy and welfare of this state and that the volume and rate of change of volume of such releases can be regulated to protect and enhance the recreational use of waters affected by such releases while ensuring and without impairing an adequate supply of water for power production or for any municipality which uses water from such reservoirs for drinking and other purposes.

2. It is hereby declared to be the policy of this state that the volume and rate of change of volume of releases of water from such reservoirs should be regulated to protect and enhance the recreational use of waters affected by such releases while ensuring and without impairing an adequate supply of water for power production or for any municipality which uses water from such reservoirs for drinking and other purposes.

§ 15-0803. Inventory of reservoirs.

The commissioner shall, on or before the first day of January,

nineteen hundred seventy-seven file with the secretary of state an inventory of impounding reservoirs of waters having a capacity of more than one billion gallons and located in the counties of Delaware, Greene, Putnam, Schoharie, Sullivan, Ulster and Westchester.

§ 15-0805. Regulation of reservoir releases.

1. The commissioner is authorized and directed to promulgate rules and regulations as expeditiously as possible but in no event later than the first day of April, nineteen hundred seventy-seven for releases from Schoharie reservoir through the Shandaken tunnel and for releases from Neversink, Pepacton and Cannonsville reservoirs, nor later than the first day of October, nineteen hundred seventy-eight for releases from the remaining impounding reservoirs, to carry out the policy set out in this title consistent with the findings and policies set out in this article.

2. Without limiting the foregoing, such rules and regulations may include provisions respecting the volume, timing and rate of change in volume of releases of water, monitoring, maintenance of records, inspection of records and premises, reporting and investigations by representatives of the department, may vary from time to time, on a seasonal basis and from reservoir to reservoir and shall include provisions to insure that an adequate supply of water for power production and for any municipality which uses water from such reservoir for drinking and other purposes will not be impaired, to provide for the public health and safety in the event of drought or other emergency conditions and shall be promulgated only after affected municipalities are provided an opportunity for consultation.

§ 15-0807. Public notice and hearing procedures.

The promulgation of rules and regulations pursuant to this title shall be exclusively governed by the rule-making procedures of the state administrative procedure act, except that municipalities affected by the

releases which are the subject of such rules and regulations shall also be provided an opportunity for consultation during the preparation of such rules and regulations.

TITLE 9

ADMINISTRATIVE PROCEDURES FOR ARTICLE 15

Section 15-0901. Rule-making procedure.

15-0903. Hearing procedure.

15-0905. Review.

15-0907. Services of notice, order or direction.

15-0909. Payment of costs.

§ 15-0901. Rule-making procedure.

The department may adopt rules in conformity with statute governing the procedures prescribed or authorized by this article. Such rules may include rules of practice before the department, together with forms and instructions. To assist the persons or public corporations dealing with it, the department shall so far as deemed practicable supplement its rules with descriptive statements of its procedures or requirements.

§ 15-0903. Hearing procedure.

1. The provisions of this title shall not apply to applications for permits, requests for permit renewals and modifications, or to permit modification, suspension or revocation proceedings initiated by the department where any of such actions involve title 5, 15 or 27 of this article.

2. Whenever a public hearing is to be held pursuant to this article, the notice of such hearing shall be published in such newspaper or newspapers as the department shall deem appropriate, once in each week for not more than four weeks. At least one publication shall be in a newspaper of general circulation in the area affected. Notice thereof

shall specify that on a date therein named, the department will cause such hearing to be held at such place and time as it may specify therein, for the purpose of receiving evidence and arguments from all persons and public corporations that may be affected by the proposed permit or project and shall have filed timely notices of appearance. The public notice shall specify the last day, not more than ten days prior to the day specified for the public hearing, on which notices of appearance may be filed with the department. Notices of appearance in opposition to the permit or project shall recite in the notice the interest of the person or public corporation filing such notice, and the specific grounds of objection to the permit or project. In the event that no notice of appearance in opposition to the proposed permit or project is filed within the time specified, the department may dispense with the public hearing and shall proceed to consider and examine the application, petition, maps, plans, proofs, arguments and other matters submitted in support of the proposed permit or project; provided, however, that nothing herein contained shall authorize the denial of an application unless and until the applicant or petitioner has been afforded an opportunity to present proof and argument in support of the application. The notice of hearing shall also specify the subject matter of the hearing in such detail as the department shall deem necessary.

3. Conduct of hearing shall be as follows:

a. All hearings shall be public except as to those matters where a public hearing may be dispensed with pursuant to the provisions of subdivision 1 of this section.

b. The hearings herein provided for may be conducted by the commissioner or any employee of the department to whom the commissioner shall delegate the power and authority to conduct such hearings as a hearing officer in the name of the department at any time and place.

c. In such hearings, the hearing officer may administer oaths to witnesses and may issue subpoenas in the name of the department, requiring the attendance and giving testimony by witnesses and the

production of books, papers and other documentary evidence for such hearings.

d. The record, or summary thereof, of the proceedings of such hearings shall be made and filed with the department. The department, on its own motion or if requested to do so, may cause to be taken and filed with the department a full stenographic transcript in duplicate of the testimony presented at the hearing. The cost of such department copies shall be paid by the applicant. The stenographer shall, upon payment of his fees by a person requesting the same, furnish a copy of the whole or any part of the transcript to such person.

e. The department may, for the purpose of such a hearing, provide for the taking of depositions of witnesses before any member of the department, or any person who may be designated hereunder by the department to hold hearings. In such case such member, employee or other person may administer oaths to the witnesses whose depositions are to be taken. Each deposition shall be reduced to writing and subscribed by the deponent and shall be filed with the department prior to the final adjournment of the hearings.

f. The provisions of subdivision y of section 71-0503, applicable to investigations by the department and a direction to testify made by the department, shall apply to hearings and investigations and a direction to testify or produce evidence made by a hearing officer at a hearing conducted pursuant to the provisions of this article.

g. The department and hearing officers designated by it pursuant to this article shall not be bound by the laws of evidence in the conduct of hearing proceedings, but every decision and order shall be founded upon competent, material evidence which is substantial in view of the entire record.

h. No factual information or evidence other than that in the record shall be considered in arriving at a decision in a case. However, all evidence, including records and documents in the possession of the department of which it desires to avail itself, may be offered and made

a part of the record in the case. All such documentary evidence may be received in the form of copies or excerpts, or by incorporation by reference.

i. The applicant and any person who has filed a notice of appearance shall have the right of cross-examination of witnesses who testify, and shall have the right to submit rebuttal evidence.

j. The department may take notice of judicially cognizable facts and in addition may take notice of general, technical, or scientific facts within its specialized knowledge. Parties shall be notified either before or during the hearing, or by reference in preliminary reports or otherwise, of material so noticed, and they shall be afforded an opportunity to contest the facts so noticed. The department may utilize its experience, technical competence, and specialized knowledge in the evaluation of evidence presented to it.

4. The department shall, upon any application submitted to it or initiated on its own motion, render its decision thereon in writing, including or accompanied by findings of fact, and whenever required by this article, by statutory determinations. The original of such decision, together with all maps, plans and other papers or records relating thereto, shall be filed and kept on file in the department. A copy of the decision shall be delivered or mailed to the attorney of record of the applicant and of each person who filed a notice of appearance, or to the applicant or such person directly if not represented by an attorney.

§ 15-0905. Review.

1. The applicant or any person or public corporation, who or which has filed a notice of appearance in the proceedings before the department and is affected by a decision made pursuant to this article, may review such decision under the provisions of article 78 of the Civil Practice Law and Rules.

2. A special proceeding for such review must be commenced within sixty days after the service in person or by mail of a copy of the decision upon the attorney of record of the applicant and of each person who has filed a notice of appearance, or to such applicant in person directly if not represented by an attorney.

3. In the event that upon such review, the judgment of the court modifies the decision of the department or any accompanying documents or maps, the department shall cause such judgment to be filed or recorded, as the case may be, in each place where the final decision of the department was filed and recorded, and such modified maps and documents shall be final and conclusive.

§ 15-0907. Services of notice, order or direction.

Whenever this article provides for or authorizes the service of a notice, order or direction upon a licensee or applicant for a license, or upon any other person, and does not provide for the manner of service, and no different time is provided, such service may be made either personally or in the manner provided by law for the service of a summons or by mailing a copy of the same by registered mail in a postpaid wrapper addressed to the licensee or applicant, or any other person, at the address given in the application or as subsequently communicated to the department in writing, or at the project works. Such service may be made upon a municipal corporation either personally as above provided or by mailing a copy of the same in like manner addressed to the mayor of the city or village or the supervisor of the town. Service upon unknown owners shall be made by publication in the manner provided by law for service of a summons upon unknown parties.

§ 15-0909. Payment of costs.

The expense of any hearing initiated by petition shall be certified by the department to the person or public corporation filing such petition, and shall be paid by such petitioner within thirty days after the

receipt of the certificate.

TITLE 11
**LOCAL AND REGIONAL WATER RESOURCES PLANNING AND
DEVELOPMENT**

Section 15-1101. Legislative purposes.

15-1103. Petition; proceedings; exclusion of certain counties.

15-1105. Regional planning and development board; meetings;
quorum; powers and duties.

15-1107. Plans; approval; changes, modifications and rescission.

15-1109. Additional powers and duties of the department.

15-1111. Duties of county; county charge; counties included
within a city.

15-1113. Existing rights and remedies preserved; limitations.

§ 15-1101. Legislative purposes.

In addition to the powers vested in the department by this article 15, and in order to stimulate and encourage local participation and assistance, comprehensive planning for the protection, control, conservation, development and beneficial utilization of the water resources of the state may be undertaken as provided in title 11 of this article. Nothing contained herein shall be deemed to repeal, amend or modify the powers and duties of the department as now or hereafter provided by this article 15 or by any other statute or to repeal the procedures authorized thereby.

§ 15-1103. Petition; proceedings; exclusion of certain counties.

1. Any county, city, town or village, when duly authorized to do so, or any combination thereof, except as provided in subdivision 7 hereof, may submit to the department a verified petition requesting the department to consider a proposal for a survey and study of the water resources of a specified region of which the petitioning municipality is

a part, for the purpose of preparing and providing a comprehensive plan or plans for the protection, conservation, development and beneficial use of such resources. Any such petition, prior to its submission to the department, must be approved by the county legislative body of each county wholly or partly within the specified region. The petition shall set forth the facts upon which the petitioner or petitioners rely to show that it is necessary and would be in the public interest and benefit to undertake such survey, study and comprehensive planning. The petition shall list the persons, public corporations and state agencies engaged in receiving, collecting, storing, transmitting, distributing, processing or otherwise dealing with water for a public purpose, within the region set forth in the petition, and the names and addresses of the clerks or other executive officers thereof. There shall be attached to the petition a certified copy of the resolution, ordinance or other evidence of authority authorizing the execution of the petition.

2. Upon receipt of a petition, the department with reasonable diligence shall cause public notice to be given that on a day therein named it will hold a public hearing at such place, within the region specified in the petition, as is designated in the notice for the purpose of hearing all persons, public corporations and state agencies in favor of or opposed to the proposal. Such public notice shall be given by publication as provided in subdivision 1 of section 15-0903.

3. In addition to such public notice, the department shall give notice of the time and place of the public hearing in writing, at least fifteen days prior to the date thereof, to the state Departments of Agriculture and Markets, Commerce, Health and Transportation, and the State Soil Conservation Committee; also to the clerks or other executive officers of the public corporations and state agencies, persons and other agencies as listed in the petition. The department may also give similar written notice to any other person, body or agency it may deem would have an interest in or would be affected by any comprehensive planning. Any public corporation, acting through any executive office authorized to take such action by its governing body or board, may file with the department a written request that such public corporation be notified in writing of any hearing under title 11 of this article in relation to any

region embraced in whole or in part within any area or areas of the state designated by such public corporation in its written request. After the filing of such request, where any petition shall be filed with the department setting forth any such region, but not listing such public corporation, the department shall give notice to such public corporation of any hearing on such petition, in the same manner as if it had been listed in the petition pursuant to subdivision 1 of this section. For the purpose of any hearings or proceedings under title 11 of this article or to review a decision in the manner provided by article seventy-eight of the Civil Practice Law and Rules relating to any region embraced within the area or areas designated in such request, any public corporation entitled to notice by reason of having filed such request shall be deemed to be and shall have all of the rights of a party to the same extent as if such public corporation had been listed in the petition pursuant to subdivision 1 of this section. A modification or withdrawal of any such request may be filed by any public corporation in the same manner as an original request. Any such modification shall have the same force and effect as an original request. Failure of the department to give notice pursuant to such written request shall not invalidate any proceedings had or action taken by the department.

4. The department shall, upon the day specified in the notice, or upon such subsequent day or days to which it may adjourn the hearing, proceed to take testimony and proof and to hear arguments submitted in support of and in opposition to the proposal. If in the course of the hearing, it shall appear to the department that the region specified in the petition should be enlarged in order to undertake a more comprehensive and beneficial study, survey and planning, the department shall adjourn the hearing a sufficient period of time in order to obtain the approval of the county legislative body or bodies of the county or counties in which the additional area is located for the inclusion of such additional area in the proposal. If such approval is given, the department shall give, within the additional area, similar public and written notice, and shall give similar written notice to public corporations which have filed requests, and in like manner, as provided by subdivisions 2 and 3 of this section, of the time and place fixed by

the department for the resumption of the public hearing. The hearing shall resume and proceed at such time and place as if the additional area had been included in the petition as part of the region.

5. Within thirty days after the taking of testimony and proofs, any person, public corporation or state agency, who or which has appeared at the hearing, may file with the department written objections to the proposal or parts thereof as petitioned for or as enlarged as above provided. Such objections shall specify the grounds and reasons upon which they are made. Briefs in support of and in opposition to the proposal may be filed with the department within the same thirty day period. Upon expiration of the period, the hearing shall be deemed closed, unless the department determines that the hearing should be reopened for the taking of further testimony or other proof.

6. Thereafter and with all convenient speed, the department shall render its decision, determining if it is or is not in the public interest or benefit to undertake the proposal. If the proposal is found to be in the public interest or benefit, the department shall determine the region of the state to be included in the study, survey and comprehensive planning, the minimum number of specific purposes for which the planning should be undertaken, the extent of the study, survey and planning involved and an approximate estimate of the cost of the study and survey.

7. Following this determination by the department, and before proceeding thereon, the petitioner for the survey and study decide within six months after the date of the department's determination whether to proceed with the survey and study or to withdraw its request therefor. Notice of its decision shall be given promptly to the department. The department may grant one or more extensions of six months each to the petitioner to make its decision.

8. The area of the state within the corporate limits of the city of New York shall not be included, in whole or in part, in any region proposed by a petition, or as enlarged or as determined by the department under this section, which region includes in whole or in part

the counties of Nassau or Suffolk, or either of them.

§ 15-1105. Regional planning and development board; meetings; quorum; powers and duties.

1. If the department shall determine that the proposal should be undertaken, the department, after the expiration of the time in which a review of its decision may be had or, in the event such a review has been instituted, after a final judgment or order affirming the department's decision has been entered therein, shall appoint a regional planning board, hereinafter referred to as "the board."

2. The board shall consist of seven members residing in the region of the proposal and of whom:

a. At least one member shall be representative of the municipal corporations within the region of the proposal; and service as a member of the board shall not be deemed as service rendered to any municipal corporation;

b. At least one member shall be representative of the agricultural and farming interests within the region of the proposal and shall be actively interested in the improvement and development of agricultural and farming process and techniques;

c. At least one member shall be representative of industry within the region of the proposal and actively engaged or employed in an industrial or commercial pursuit;

d. At least one member shall be representative of groups within the region of the proposal interested in the needs of fisheries and waterfowl and in forms of outdoor recreation made possible by the state's waters; and

e. At least one member shall be actively engaged in or connected with the acquisition, operation or management of public water supplies within

the region; and service as a member of the board shall not be deemed as service rendered to any municipal corporation.

3. Appointments to the board shall be made by the department from lists of nominations submitted to it, at the department's request, by the county legislative body or bodies of the county or counties within the region of the proposal. Each list of nominations shall contain fourteen names including two for each of the five representative classes specified by subdivision 2 of this section. Where more than one county is included, the county legislative body or bodies shall make all reasonable effort to agree upon a single list of nominations. The department when making its requests for nominations shall specify a date, fixed so as to permit action on the requests by the county legislative bodies; on or before which such nominations must be submitted, unless the department shall extend such time. The persons so appointed by the department shall within ten days following the date of their appointments and before entering upon the performance of their duties, take and subscribe an oath of office in the manner and form prescribed by law, and shall file the same in the office of the Secretary of State of the state of New York. Each appointee shall notify the department in writing of the date of filing his oath of office. A vacancy shall be filled from the appropriate representative class and in like manner as an original appointment.

4. The board shall hold its first meeting not later than thirty days after the oaths of office of all members have been so filed for the purpose of organization and the appointment of its officers. The board shall select from among its members a chairman, vice chairman and secretary.

5. The board shall be known and transact its affairs as the "..... Regional Water Resources Planning Board" (insert in the name of such board a word or words, chosen by the board at its first meeting, descriptive of the region of the proposal).

6. The members of the board shall serve without compensation but shall be reimbursed for their actual and necessary expenses incurred in the

performance of their duties. Vouchers for such expenses shall be prepared on forms provided by the department and shall be approved by the chairman of the board. Such vouchers shall be submitted in duplicate to the department, which shall transmit one copy of each voucher to the Comptroller of the state of New York for payment and shall retain the other copy in its files.

7. The board shall expire and the terms of office of its members shall terminate thirty days after the department has finally approved or disapproved a plan as hereinafter provided in title 11 of this article. However, the department, with the concurrence of the county legislative body or bodies of the county or counties within the region, may terminate the existence of the board and the terms of office of its members at any time it deems it in the public interest to do so; and the department, with the concurrence of the county legislative body or bodies of such county or counties, may continue the existence of the board and the terms of office of its members for a specified additional period of time after the department has finally approved a plan, for the purpose of furthering the objectives of the plan.

8. The board shall hold regular meetings monthly, keep a record of all its proceedings, and determine the rules of its own proceedings.

9. Special meetings may be called by the chairman upon his own initiative and must be called by him upon receipt of a written request therefor signed by at least two members of the board. Written notice of the time and place of such special meeting shall be given by the secretary to each member at least four days before the date fixed by the notice for such special meeting.

10. Four members of the board shall constitute a quorum to transact the business of the board at both regular and special meetings.

11. The board shall request the department within appropriations available to the department therefor, to provide office space and equipment, and to select and employ or retain clerical, technical, scientific, engineering, legal and other personnel and services to

assist the board in carrying out its duties and performing its functions under title 11 of this article.

12. The board, using the personnel so selected and employed or retained by the department, shall proceed to investigate, study, examine and survey the water resources of the region of the proposal to ascertain the present uses being made thereof, and to determine the feasibility of their future development by proper conservation and control measures, to provide a greater supply for, and an equitable distribution among domestic, municipal, agricultural, commercial, industrial and recreational users, to the end that the water resources of the region shall not be wasted and shall be conserved and utilized for the beneficial interests of all the people of the state. Particular consideration shall be given to the impounding and retention of flood waters for their future use and distribution.

13. The board may conduct informal hearings and meetings at any place or places within the region for the purpose of obtaining necessary information or other data to assist it in the proper performance of its functions and duties. The board may delegate to any member, to the secretary or to any agent of the board the power and authority to conduct such hearings and meetings, and all reasonable efforts shall be made to ascertain the views, wishes and opinions of the inhabitants of the region.

14. The board and its authorized agents may enter upon any lands as in its judgment may be necessary for the purpose of making surveys and examinations to accomplish its functions and duties under this article, without liability. Liability only for actual damage done during any such entry, survey and examination is hereby assumed by the state and consent is hereby granted to any owner of such lands to pursue his remedy for any such actual damage pursuant to the Court of Claims Act.

15. The board shall cooperate with legislative committees and commissions, and shall make available to such committees and commissions, upon request, any records and other data, and shall file monthly with the department a report of its activities and progress.

Upon termination of the board's existence, the board shall deposit all records of its proceedings with the department.

16. The board, based upon its investigations and studies, shall prepare a comprehensive plan or plans for the protection, conservation, development and utilization of the water resources of the region of the proposal, and shall submit the plan or plans to the department for its approval.

§ 15-1107. Plans; approval; changes, modifications and rescission.

1. Plans submitted pursuant to section 15-1105:

a. Shall in all cases be so drawn and of such scope as is best calculated to assure prompt or orderly development of the water resources for the beneficial use of the people of the region involved and of the state as a whole;

b. Shall show the available and feasible sites for the installation and operation of protective, conservation and regulatory works, and the benefits estimated to be derived from such installation and operation. The plan or plans shall be accompanied by such maps, profiles and other data and descriptions as will set forth and show the location and character of the works and of the property required to be taken for or to be damaged by such installation or operation or for the protection and maintenance of the works to be installed, together with an estimate of the cost thereof;

c. Shall estimate the minimum annual amount of water which would be available for all purposes if the plan or plans were to be put in operation;

d. Shall not, in the computations of water estimated to become available as a result of the execution of the plan or plans, include any amount of water, the use of which has theretofore been duly acquired or authorized pursuant to approval, license, permit or other official

sanction;

e. Shall, whenever feasible and economically justified, provide for the storage of sufficient water for distribution and use for all the purposes and uses contemplated by this article;

f. Shall not include in any plan or plans, any proposal or project providing for any action or steps which would impair or diminish any right protected by section 15-1113;

g. Shall list possible sources of income, including the sale of water, from the operation of such works, and estimate the amount thereof; and

h. Shall recommend whether the plan or plans should be carried out as a single or multiple stage project, and shall also recommend an agency, existing or proposed, to undertake the project.

2. Upon receipt of a plan from the board, the department shall cause public notice to be given that on a day therein named it will hold a public hearing at such a place as is specified in the notice and within the region covered by the plan, for the purpose of hearing all persons, public corporations and agencies of the state which may be affected by the plan. Such notice shall be published pursuant to subdivision 1 of section 15-0903. In addition to such publication, the department shall give written notice of the public hearing, as required by subdivision 3 of section 15-1103, and may give written notice thereof to additional persons, public corporations or agencies of the state, as authorized by such subdivision. At any time prior to the day specified in such notice, specified objections in writing to the plan or parts thereof may be filed in the office of the department. The department shall, upon the day specified in the notice, or upon such subsequent day or days to which it may adjourn the hearing, proceed to take testimony and proof and to hear arguments submitted in support of and in opposition to the plan, but no objectors shall be heard unless they have filed written objections as authorized by this section. At the close of the hearing, the department may fix a date or dates for the filing of briefs.

3. The department within ninety days after the last date fixed for the filing of briefs and with all convenient speed shall render its decision. The department, upon the proofs and evidence submitted at the public hearing:

a. Shall determine whether the plan as proposed by the board conforms to and complies with the purposes of title 11 of this article and would serve the public interest and benefit, or whether it should be modified in any respect, detail or part to accomplish such purposes;

b. Shall determine whether the plan as proposed by the board interferes or conflicts with the plans of any other regional water resources planning board, and would be just and equitable to the interests of other areas of the state;

c. Shall approve such plan as submitted by the board or as modified by the department; or shall disapprove the plan; or shall remit the proposal to the board for further investigation, study, survey and planning; and

d. Shall recommend with public corporations, private corporations or agencies of the state, existing or proposed, would, in its opinion, be best qualified to carry out expeditiously and efficiently the project proposed by the plan, as approved by the department, and to construct, maintain and operate the works in connection therewith. If the department recommends that a new public corporation or state agency should be established for such purposes, it shall transmit a recommendation to the legislature and the Governor for the enactment of legislation to create and establish such body or agency, or to grant authority to existing public corporations or state agencies.

4. Upon the filing of the departments decision or, in the event such decision is reviewed in the manner provided by article seventy-eight of the Civil Practice Law and Rules, upon the final determination of such review proceeding, the plan as approved by the department or as approved or modified by the court in a review proceeding, shall be the general plan for the conservation, development and utilization of the water

resources of the region, and such general plan shall be given consideration by the department in any future application before it and over which it has jurisdiction by virtue of this article or other provision of law. None of the works or projects, included in the general plan, nor any part or parts thereof shall be undertaken, constructed or put into operation until detailed and specific maps and plans therefor have been submitted to the department for approval upon the petition of an agency authorized to undertake or construct such works or projects or parts thereof. The department shall determine, after public hearing, if the detailed and specific plan before it for approval conforms to and is consistent with the general plan, and whether it is in the public interest to undertake the construction and operation of the works or projects as proposed. The department shall have the power to approve or disapprove the detailed and specific maps and plans, or to so modify them as will, on the evidence presented, bring them into conformity with the general plan.

5. Any municipality or combination of municipalities may, except as provided in subdivision 7 of section 15-1103, file with the department a verified petition requesting the department to modify, change or rescind any general plan approved by it. The petition shall set forth the facts on which the petitioner or petitioners rely to show that it is necessary and would be in the public interest to change or modify such plan as requested in the petition, or to rescind such plan. Upon receipt of such a petition, the department shall give public notice of hearing, shall give written notice of hearing to parties and persons, shall hold a public hearing on such petition, and shall take testimony and proof, in the same manner as if the department were holding a public hearing on the original submission of the plan which such petition seeks to change, modify or rescind. The department, within ninety days after the last date fixed for the filing of briefs and with all convenient speed, shall render its decision changing, modifying or rescinding such plan, or denying the petition, as the public interest shall require.

6. The department may, on its own motion, initiate proceedings to change, modify or rescind any approved plan. The proceedings and procedure with respect to any such proposal, including notice, hearing

and judicial review, shall be the same as in the case of a petition for change, modification or rescission of a plan.

7. Except as hereinafter in this subdivision provided, the provisions of sections 15-1109 and 15-1111 shall apply to the sharing and apportionment of costs and expenses incurred by the department under this section. In any case where an application under this section is filed with respect to any plan by any municipality or municipalities outside of the region specified in such plan, the share of the department costs and expenses which would otherwise be paid by the county or counties of such region, shall be paid by such municipality or municipalities.

§ 15-1109. Additional powers and duties of the department.

1. The department shall, if appropriations are available therefor, provide the board with such office space and equipment, clerical, technical, scientific, engineering, legal and other personnel and services as are reasonably necessary to assist the board in carrying out its functions, and shall fix the compensation, within appropriations available therefor, of such personnel. The department may enter into and execute contracts in the manner and form prescribed by law for technical, scientific, engineering and legal services to be made available for the board's functions, and may enter into cooperative agreements with federal agencies for research, the investigation, collection, compilation, study and analysis of information and data on the water resources and the hydrology of the state, and for the preparation and publication of reports thereon.

2. The department shall cooperate with the board and render to it advisory and consultant services whenever practicable.

3. The department shall endeavor to coordinate the activities of existing agencies and departments of the state charged with functions involving waters and to secure their cooperation with and assistance for the board in carrying out its functions, and provide the means for

coordination of the studies and development plans of all regional boards;

4. The department shall keep a true and accurate account of all expenditures incurred on behalf of the board including, but not limited to, those incurred for all proceedings, hearings (except the hearing required by section 15-1103), notifications, clerical, technical, engineering, legal and other services and expenses;

5. The department shall, within a reasonable time after the plan has been approved or disapproved, submit an itemized statement of the costs and expenses so incurred and expended to the county legislative body. Notice shall be attached to such statement that, under title 11 of this article, twenty-five per cent of the cost and expenses is a county charge which, if more than one county is involved, is to be equitably apportioned among them; that the counties may by agreement determine such equitable apportionment within sixty days from the date of such notice, and, that in the failure of the counties so to agree, the department, on a specified date after such sixty day period has expired, will hear the counties at its office and proceed to make an equitable apportionment of the county charge;

6. The department shall recommend legislation to accomplish and further the planning and development program of the water resources of the state.

§ 15-1111. Duties of county; county charge; counties included within a city.

1. The county legislative body or bodies shall comply promptly with the departments request for lists of nominations for membership on the board. The county or counties shall cooperate with and assist, so far as is reasonable and practicable, the board in carrying out its functions.

2. Of the total costs and expenses incurred by the department, twenty-five per cent shall be a county charge and shall be audited and

paid as such in the manner prescribed by the county legislative body or bodies. If more than one county is included within the region of the project, the county charge of twenty-five per cent shall be equitably apportioned among them, consideration being given to, but not limited to, prospective benefits to accrue to each in the event that the project is undertaken. If the counties fail to agree within sixty days after the statement of costs and expenses from the department upon an equitable apportionment of the county charge, the department after hearing the counties, shall make such apportionment.

3. With respect to any or all of the counties within the city of New York, except as provided and limited by subdivision 7 of section 15-1103:

a. All rights, powers and privileges granted to, and all duties, obligations and charges imposed upon any county by the provisions of title 11 of this article, are granted to or imposed upon such city; and

b. All rights, powers and privileges granted to the county legislative body of any county by the provisions of title 11 of this article (including, but not limited to the power to approve a petition for a survey and study and establishment of a regional planning board) and all duties and obligations imposed upon any such county legislative body by title 11 of this article, are granted to or imposed upon the board of estimate of such city.

§ 15-1113. Existing rights and remedies preserved; limitations.

1. Nothing in title 11 of this article is intended to or shall be construed to alter, impair, diminish or enlarge any existing or hereafter acquired public or private right, riparian or otherwise, or to create any new public or private right, riparian or otherwise, with reference to water resources and the use of the waters thereof and such rights hereby preserved shall include, but not be limited to any such right of the state or any agency thereof or any person or public corporation. Any reference in this section to a public or private right

with reference to water resources and the use of the waters thereof shall include, but shall not be limited to, any right to receive, collect, store, control, transmit, consume, supply, sell, discharge or dispose of water, any right to own, construct, operate and maintain any water supply or water treatment facilities, including reservoirs, dams, aqueducts, chlorinating and aeration plants and pumping stations, and any right to exercise control over the level, flow, discharge or disposition of waters, including water in reservoirs, rivers, streams and aqueducts.

2. Nothing in title 11 of this article is intended to alter or abridge any right of action or other remedy now or hereafter existing nor shall any act done by virtue of title 11 of this article be construed as estopping the exercise of such rights.

3. Nothing in title 11 of this article shall be held to repeal, limit or modify the jurisdiction, powers and duties of any state or local department, board, district, commission or authority, or any public corporation, or other agency, now or hereafter possessed, or to invalidate or modify, in whole or in part, any decision, order, license, permit, approval, or other act, issued or taken heretofore or hereafter by such department, board, district, commission, authority, or public corporation or other agency, or to nullify, abate or otherwise affect any rights acquired or action taken heretofore or hereafter pursuant to such decision, order, license, permit, approval, or other act.

4. Nothing in title 11 of this article shall be construed as requiring that a plan hereunder be approved for any region before any project utilizing, affecting or involving the water resources of such region in whole or in part may be authorized, approved, initiated or carried out within or without such region.

TITLE 13

COMPREHENSIVE PUBLIC WATER SUPPLY STUDIES AND REPORTS

Section 15-1301. Definitions.

15-1303. Powers and duties of the department.

- 15-1305. Powers and duties of the state Commissioner of Health.
- 15-1307. Powers of local agencies.
- 15-1309. State aid.
- 15-1311. Limitations.

§ 15-1301. Definitions.

1. "Comprehensive study and report" shall mean a comprehensive engineering and economic feasibility study and the resultant plan for the development of projects to provide adequately for present and reasonably foreseeable area-wide public water supply system needs. The study shall be designed to develop such information as may be required by the department, including, but not limited to: technical feasibility; cost estimates for construction, property rights acquisition and contingencies and for engineering, legal and other services; proposed methods of financing; and estimates of first costs and subsequent total annual costs of construction, operation and maintenance of recommended facilities. Such study shall not provide for plans and projects for public water supply system, or portions thereof, the scope or the area of which is less than that determined by the commission as necessary for comprehensive area-wide water supply system planning. Such study shall not include the preparation of detail design and engineering drawing, specifications, and contract documents.

2. "Public water supply system" means the public treatment facilities, transmission facilities and source of supply facilities to provide water for residential, commercial, industrial and fire service needs for areas located in two or more municipalities.

3. "Municipality" means a county, city, town or village.

4. "Governing body" means: (a) in a county, the county legislative body; (b) in a city, the board of aldermen, common council, commission or other body vested by its charter or other law with jurisdiction to enact ordinances or local laws, except that in a city having a population of one million or more, if there be a board of estimate, the

term "governing body" shall mean such board of estimate; (c) in a town, the town board; and (d) in a village, the board of trustees.

5. "Local agency" means the department, bureau, commission, board, division, agency, public benefit corporation, administration, or committee of municipalities, designated by the governing body of each participating municipality, or designated by the county legislative body in the case of a county acting on its own motion, to conduct and develop comprehensive studies and reports.

§ 15-1303. Powers and duties of the department.

The department shall:

1. Promulgate, and amend from time to time, such rules and regulations as the department shall deem necessary, proper or desirable to carry out the provisions and purposes of this title and to assure the appropriate coordination of water supply planning pursuant to this title with the planning, protection, conservation, development and utilization of the water resources of this state pursuant to the provisions of this chapter, the Public Health Law or any other law. Such rules and regulations shall be promulgated prior to July 1, 1964;

2. Receive applications of local agencies for state aid, pursuant to this title, in such form and containing such information as it may require;

3. Approve the area and scope of such comprehensive studies, prior to their execution, in accordance with the rules and regulations adopted by the department; and upon recommendations of the state Commissioner of Health;

4. Approve applications for state aid pursuant to this title;

5. Receive copies of final reports of local agencies; and make advisory recommendations to the state Commissioner of Health with

respect thereto;

6. Performs such other and further acts as may be necessary, proper or desirable to carry out effectively the provisions of this section.

§ 15-1305. Powers and duties of the state Commissioner of Health.

The Commissioner of Health shall:

1. Review the area and scope of any comprehensive study prior to its execution and make recommendations to the Department of Environmental Conservation with respect thereto.

2. Advise legal agencies and the participating municipalities of the approval of their applications for state aid pursuant to this title;

3. Execute contracts for the services of consulting engineers necessary for such studies and reports jointly with the local agency requesting state aid therefor;

4. Approve the amount of compensation to be paid for such engineering services and the method of determining such compensation; provided, however, that such compensation shall not be computed on a per diem or percentage of estimated costs basis;

5. Receive and approve final reports of local agencies prior to final payment;

6. Approve vouchers for the payment of state aid grants pursuant to the provisions of this title;

7. Prepare and file with the Department of Environmental Conservation for its review and evaluation an annual report on the scope and results of comprehensive studies undertaken pursuant to this section;

8. Make an estimate of the annual funds necessary to carry out the

provisions of this title and, with the approval of the Department of Environmental Conservation request such amount for inclusion in the executive budget;

9. Perform such other and further acts as may be necessary, proper or desirable to carry out effectively the provisions of this section.

§ 15-1307. Powers of local agencies.

A local agency may:

1. Apply to the department and contract with the state Commissioner of Health for state aid pursuant to this title on and after September 1, 1964.

2. Select the person or firm to perform necessary consulting engineering services for a comprehensive study and report and enter into contracts for such services, provided, however, that the state Commissioner of Health shall also be a party to any such contract;

3. Expend money received from the state pursuant to this title only for purposes consistent therewith.

§ 15-1309. State aid.

The state Commissioner of Health, may, in the name of the state, make or contract to make, within appropriations therefor, a state grant for payment during any of the ten successive fiscal years of the state, beginning with its fiscal year commencing April 1, 1964, to a local agency to cover the entire cost, as determined by him, of the preparation of a comprehensive study and report.

§ 15-1311. Limitations.

Nothing in title 13 of this article shall be held to repeal, limit or modify the jurisdiction, powers and duties of any state or local department, board, district, commission or authority, or any public corporation, or other agency, now or hereafter possessed, or to invalidate or modify, in whole or in part, any decision, order, license, permit, approval, or other act, issued or taken heretofore or hereafter by such department, board, district, commission, authority, or public corporation or other agency, or to nullify, abate or otherwise affect any rights acquired or action taken heretofore or hereafter pursuant to such decision, order, license, permit, approval, or other act.

TITLE 15

WATER SUPPLY

Section 15-1501. Water withdrawals; permit.

15-1502. Definitions.

15-1503. Permits.

15-1504. Water withdrawals for agricultural purposes.

15-1505. Interbasin diversions and water supply to other states.

15-1506. Transportation of water by vessel.

15-1507. Municipal water supply reservoirs on forest preserve lands.

15-1509. Approval of plans for forest preserve reservoir projects; petition; proceedings.

15-1511. Procedure on approval of application with respect to forest preserve reservoir projects.

15-1513. Payment of cost of construction.

15-1515. Supervision of construction and operation.

15-1517. Reservoir to be owned by the state.

15-1519. Reservoir to be kept in repair.

15-1521. Supply of water to other public water supply systems.

15-1523. Indirect damages; decision and payment as to Rochester.

15-1525. Water well drillers in New York state to obtain certificates of registration.

15-1527. Permit required for certain wells in Long Island counties.

15-1528. Moratorium on the drilling of new wells in the Lloyd

Sands.

15-1529. Approval of completed water withdrawal systems.

15-1530. Long Island water usage information.

§ 15-1501. Water withdrawals; permit.

1. Except as otherwise provided in this title, no person who is engaged in, or proposing to engage in, the operation of a water withdrawal system with a capacity of greater than or equal to the threshold volume, shall have any power to do the following until such person has first obtained a permit or permit modification from the department pursuant to this title:

a. To make a water withdrawal from an existing or new source or an increased water withdrawal from an existing permitted source;

b. To take or condemn lands for the protection of any existing sources of public water supply; or for the development or protection of any new or additional sources of public water supply;

c. To commence or undertake the construction of any works or projects in connection with the proposed withdrawal; or

d. To extend its supply or distribution mains into any new water service area or extension that has not been approved by the department or a predecessor commission; or

e. To make a significant change in the principal use of the water withdrawal system from that specified in the permit, or permit application.

2. All valid public water supply permits and approvals issued by the department or its predecessors shall remain in full force and effect for the purpose of satisfying the permit requirements of subdivision one of this section for existing water withdrawals from a source and in an amount authorized by such permit or approval. Until the department

promulgates regulations pursuant to subdivision four of this section, nothing contained in subdivision one of this section concerning permits from the department shall be applicable to water withdrawals other than for a public water supply system.

3. Nothing contained in this title concerning permits from the department for water withdrawals shall be deemed to nullify the requirements of the State Sanitary Code applicable to drinking water supplies, including public water systems and bottled water facilities, in effect on February 15, 2012, as may be amended from time to time. No supplier of water shall make, install or construct, or allow to be made, installed or constructed, a public water supply system or any addition or deletion to or modification of a public water supply system until the plans and specifications therefor have been submitted to and approved by the commissioner of health or his or her designee as may be required by the state sanitary code.

4. The department shall promulgate regulations to implement a permitting program for water withdrawals equal to or greater than the threshold volume consistent with the requirements of this section which shall establish: (a) minimum standards for operation and new construction of water withdrawal systems; (b) monitoring, reporting and recordkeeping requirements; and (c) protections for present and future needs for sources of potable water supply. Such regulations may establish quantitative standards that maintain stream flows protective of aquatic life, consistent with the policy objectives of this article and any other conditions, limitations and restrictions that the department, in consultation with the department of health, determines are necessary to protect the environment and the public health, safety and welfare and to ensure the proper management of the waters of the state. The regulations may establish exemptions from permitting requirements in addition to those exemptions specified in this section.

5. The department is authorized to consolidate existing water supply permits for a public water supply system into one permit, and may require submission of an application for such permit where the department determines that such actions are necessary to protect the

environment and the public health, safety and welfare and to ensure the proper management of the waters of the state.

6. Each person who is required under this section to obtain a permit shall annually, on a form prescribed by the department, report all information requested by the department, including but not limited to water usage and water conservation measures undertaken during the reporting period. Information on water usage and water conservation measures shall be posted on the department's website.

7. The following water withdrawals are exempt from the permit requirements established by this section: (a) withdrawals used for fire suppression or public emergency purposes; (b) withdrawals that have received an approval from a compact basin commission which administers a program governing water withdrawals; (c) closed loop, standing column, or similar non-extractive geothermal heat pumps; (d) withdrawals for which a permit has been issued pursuant to the requirements of section 15-1527 of this title; (e) existing withdrawals for agricultural purposes provided the withdrawal has been registered with the department pursuant to the requirements of title sixteen of this article or reported to the department pursuant to the requirements of title thirty-three of this article on or before February fifteenth, two thousand twelve; and (f) withdrawals at remediation sites conducted pursuant to a federal or state court order or federal or state government agency agreement or order.

8. The department shall establish a water conservation and efficiency program with the goals of (a) ensuring improvement of the waters and water dependent natural resources, (b) protecting and restoring the hydrologic and ecosystem integrity of watersheds throughout the state, (c) retaining the quantity of surface water and groundwater in the state, (d) ensuring sustainable use of state waters, and (e) promoting the efficiency of use and reducing losses and waste of water.

9. The department shall issue an initial permit, subject to appropriate terms and conditions as required under this article, to any person not exempt from the permitting requirements of this section, for

the maximum water withdrawal capacity reported to the department pursuant to the requirements of title sixteen or title thirty-three of this article on or before February fifteenth, two thousand twelve.

§ 15-1502. Definitions.

When used in this title, unless otherwise expressly stated or unless the context or subject matter otherwise requires:

1. "Coastal communities" shall mean those areas on Long Island where the Magothy aquifer is either absent or contaminated with chlorides.

2. "Lloyd Sands" shall mean that geological strata generally known to be the deepest and oldest water-bearing layer of the Long Island aquifer system and shall not include bedrock.

3. "Water well" shall mean any groundwater excavation for the purpose of obtaining water.

4. "Water well drilling" or "water well drilling activities" shall mean the construction and reconstruction of water wells, the establishment or repair of a connection through the well casing and the repair of water wells including repairs which require the opening of the well casing.

5. "Water well driller" shall mean a person who, for compensation or as part of property development and sale, engages in water well drilling activities; provided, however, that, for the purposes of this subdivision, the term "person" shall not include a public corporation, political subdivision, government agency, department, or bureau of the state or a municipality.

6. "Enforcement officer" shall mean any person authorized to enforce the provisions of this title or the building code in the municipality in which the water well drilling activities are taking place.

7. "Agricultural purpose" shall mean the practice of farming for crops, plants, vines and trees, and the keeping, grazing, or feeding of livestock for sale of livestock or livestock products, and the on-farm processing of crops, livestock and livestock products.

8. "Compact basin commission" shall mean an interstate commission having jurisdiction with respect to the regulation of water resources within a basin in the state, created by interstate compact or federal-interstate compact, including but not limited to, the Susquehanna river basin commission and the Delaware river basin commission.

9. "Environmentally sound and economically feasible water conservation measures" shall mean those measures, methods, technologies or practices for efficient water use and for reduction of water loss and waste or for reducing a withdrawal, consumptive use or diversion that: (i) are environmentally sound; (ii) reflect best practices applicable to the water use sector; (iii) are technically feasible and available; (iv) are economically feasible and cost effective based on an analysis that considers direct and avoided economic and environmental costs; and (v) consider the particular facilities and processes involved, taking into account the environmental impact, age of equipment and facilities involved, the processes employed, energy impacts and other appropriate factors.

10. "Interbasin diversion" shall mean the transfer of water or wastewater from one New York major drainage basin to another drainage basin.

11. "Person" shall mean any individual, public or private corporation, political subdivision, government agency, department or bureau of the state, municipality, industry, co-partnership, association, firm, trust, estate or any other legal entity whatsoever.

12. "Potable water" shall mean water intended for human consumption that meets the requirements for a public water system as set forth in the state sanitary code.

13. "Public water supply system" shall mean a permanently installed water withdrawal system including its source, collection, pumping, treatment, transmission, storage and distribution facilities used in connection with such system, which provides piped potable water to the public for potable purposes, if such system has at least five service connections used by year-round residents.

14. "Threshold volume" shall mean the withdrawal of water of a volume of one hundred thousand gallons or more per day, determined by the limiting maximum capacity of the water withdrawal, treatment, or conveyance system; provided that for agricultural purposes the threshold volume shall mean a withdrawal of water of a volume in excess of an average of one hundred thousand gallons per day in any consecutive thirty-day period.

15. "Water withdrawal system" shall mean any equipment or infrastructure operated or maintained for the provision or withdrawal of water including, but not limited to, collection, pumping, treatment, transportation, transmission, storage, and distribution.

16. "Withdrawal" or "withdrawal of water" shall mean the removal or taking of water for any purpose from the waters of the state.

§ 15-1503. Permits.

1. A permit application or request for a permit renewal or modification shall be made on forms prescribed by the department and shall contain all information requested by the department relative to the withdrawal, use and discharge of water, including:

a. with respect to a public water supply system, proof of adequate authorization for the proposed project;

b. such exhibits as may be necessary clearly to indicate the scope of the proposed project;

c. a map of any lands to be acquired;

d. project plans;

e. a statement of the need for and the reasons why the proposed source or sources of supply were selected among the alternative sources which are or may become available and the adequacy of the supply selected; and

f. a description of the applicant's proposed near term and long range water conservation program that incorporates environmentally sound and economically feasible water conservation measures, including implementation and enforcement procedures, effectiveness to date and any planned modifications for the future. For a public water supply system, the water conservation program may include but need not be limited to:

i. the identification of and cost effectiveness of distribution system rehabilitation to correct sources of lost water;

ii. measures which encourage proper maintenance and water conservation;

iii. a public information program to promote water conservation, including industrial and commercial recycling and reuse;

iv. household conservation measures; and

v. contingency measures for limiting water use during seasonal or drought shortages.

2. In making its decision to grant or deny a permit or to grant a permit with conditions, the department shall determine whether:

a. the proposed water withdrawal takes proper consideration of other sources of supply that are or may become available;

b. the quantity of supply will be adequate for the proposed use;

c. the project is just and equitable to all affected municipalities and their inhabitants with regard to their present and future needs for sources of potable water supply;

d. the need for all or part of the proposed water withdrawal cannot be reasonably avoided through the efficient use and conservation of existing water supplies;

e. the proposed water withdrawal is limited to quantities that are considered reasonable for the purposes for which the water use is proposed;

f. the proposed water withdrawal will be implemented in a manner to ensure it will result in no significant individual or cumulative adverse impacts on the quantity or quality of the water source and water dependent natural resources;

g. the proposed water withdrawal will be implemented in a manner that incorporates environmentally sound and economically feasible water conservation measures; and

h. the proposed water withdrawal will be implemented in a manner that is consistent with applicable municipal, state and federal laws as well as regional interstate and international agreements.

3. In order to assist the development of local water conservation programs for public water supply systems, the department shall continue to publish and distribute a water conservation manual that includes beneficial near term and long range water conservation procedures which reflect local water resource needs and conditions. Such manual shall include examples of:

a. methods of identifying and determining the cost effectiveness of distribution system rehabilitation to correct sources of lost water;

b. measures which encourage proper maintenance and water conservation;

c. a public information program to promote water conservation, including industrial and commercial recycling and reuse;

d. household conservation measures; and

e. contingency measures for limiting water use during seasonal or drought shortages.

4. The department may grant or deny a permit or grant a permit with such conditions as may be necessary to provide satisfactory compliance by the applicant with the matters subject to department determination pursuant to subdivision 2 of this section, or to bring into cooperation all persons that may be affected by the project, but it shall make a reasonable effort to meet the needs of the applicant, with due regard to the actual or prospective needs, interests and rights of others that may be affected by the project.

5. The rules and regulations adopted by the department to implement this title and the provisions of article 70 of this chapter and rules and regulations adopted thereunder shall govern permit applications, renewals, modifications, suspensions and revocations under this title.

6. A new permit for a water withdrawal system and any subsequent renewal thereof shall be valid for a period of time not to exceed ten years from the date of issuance. A new permit or permit modification must be obtained from the department prior to any transfer or change of ownership of a water withdrawal system.

7. For each permit issued for a public water supply system, the department shall post on the department's website the permittee, the maximum pumping capacity allowed under the permit, the results of well monitoring, and the information reported pursuant to subdivision six of section 15-1501 of this title.

§ 15-1504. Water withdrawals for agricultural purposes.

1. Applicability.

a. This section applies to withdrawals of water for agricultural purposes that have been registered with the department pursuant to the requirements of title sixteen of this article or reported to the department pursuant to the requirements of title thirty-three of this article on or before February fifteenth, two thousand twelve.

b. All persons making a withdrawal of water for agricultural purposes shall annually register or report the withdrawal to the department under the provisions of this section by March thirty-first of each year.

2. When used in this section:

a. "Great Lakes basin" shall mean the watershed of the Great Lakes and the St. Lawrence River, upstream from Trois-Rivieres, Quebec, consisting in New York state of the Lake Erie-Niagara River, Lake Ontario minor tributaries, Genesee River, Seneca-Oneida-Oswego River, Black River, St. Lawrence River and Lake Champlain drainage basins.

b. "Great Lakes water" shall mean the water contained in the watershed, including the lakes and rivers, of the Great Lakes basin.

3. Registration of water withdrawals in the Great Lakes basin.

a. All persons withdrawing Great Lakes water for agricultural purposes in excess of an average of one hundred thousand gallons per day in any consecutive thirty-day period shall annually register such withdrawal with the department.

b. Each registration shall be on a form and contain such information as may be prescribed by the department and consist of a statement of and supporting documentation which shall include but not be limited to the following:

- (1) The place and source of the proposed or existing withdrawal;
- (2) The location of any discharge or return flow;

- (3) The location and nature of the proposed or existing water use;
- (4) The actual or estimated average annual and monthly volumes and rates of withdrawal; and
- (5) The actual or estimated average annual and monthly volumes and rates of water loss from the withdrawal.

c. In calculating the total amount of an existing or proposed withdrawal for the purpose of determining the applicability of this subdivision, a person shall combine all separate withdrawals which the person makes or proposes to make, whether or not such withdrawals are for a single agricultural purpose or are for related but separate agricultural purposes.

d. Registrations shall be valid for a period of one year.

e. A registration may be transferred by submitting a notice of transfer to the department prior to the date of a transfer or change of ownership of a water withdrawal system associated with a registered withdrawal.

f. The department may cooperate with state soil and water conservation districts for the preparation and distribution of informational materials to persons who withdraw water for agricultural purposes, regarding the purposes, benefits and requirements of this section, and which may also provide information on complying with the registration program and on any general or applicable methods for calculating or estimating water withdrawals or water loss.

4. Water withdrawal reporting.

a. Any person who withdraws water for agricultural purposes in excess of an average of one hundred thousand gallons per day in any consecutive thirty-day period shall annually report to the department. The report shall be made on a form and contain such information as may be prescribed by the department and shall be based on the water withdrawals for the previous calendar year, and shall include but not be limited to:

- (1) the water source, the location of the water source and the source

capacity if known;

(2) the amount of water withdrawn for the reporting period, including the average or peak withdrawals for intervals specified by the department;

(3) a description of the use of the water withdrawn; and

(4) estimated amounts of water to be returned, if any, the locations of such returns and the method of such returns.

b. The following water withdrawals are exempt from the reporting requirements of this subdivision:

(1) a withdrawal registered with the department under subdivision three of this section;

(2) a withdrawal permitted pursuant to section 15-1501 of this title;

(3) a withdrawal reported to the department under any program that requires the reporting of substantially similar data, including withdrawals regulated by the Susquehanna River Basin Commission and the Delaware River Basin Commission;

(4) a withdrawal permitted under section 15-1527 of this title;

(5) closed loop, standing column, or similar non-extractive geothermal heat pumps; and

(6) reclaimed wastewater withdrawn for reuse.

5. Withdrawals of water for agricultural purposes registered or reported to the department under the requirements of this section shall be deemed to be in compliance with the requirements of title sixteen and title thirty-three of this article, as applicable.

§ 15-1505. Interbasin diversions and water supply to other states.

1. No person shall transport or carry through pipes, conduits, ditches or canals the waters of any fresh water lake, pond, brook, river, stream, or creek in this state or any well, subsurface or percolating waters of this state into any other state for use therein without first obtaining a permit from the department pursuant to this title.

2. No person shall make a new or increased interbasin diversion which

results in a diversion in excess of one million gallons per day, as determined by the limiting maximum capacity of the treatment or conveyance system, or construct facilities or equipment therefor, until such person has registered the diversion with the department. No later than February fifteenth, two thousand thirteen, all existing interbasin diversions in excess of one million gallons per day, as determined by the limiting maximum capacity of the treatment or conveyance system, shall be registered with the department.

3. Registration is not required for an interbasin diversion which is part of a water withdrawal system for which the department has issued a permit under this title, or which is operating pursuant to a duly authorized permit issued by the department or its predecessors.

4. Registration shall be renewed every year or whenever ownership of the facilities which create an interbasin diversion is transferred, whichever occurs first. Registration shall be made on forms prescribed by the department and shall contain all information requested by the department relative to the water withdrawal, use and discharge. Each person who is required under this section to register shall annually, on a form prescribed by the department, report all information requested by the department, including the amount of water diverted. Information on interbasin diversions shall be posted on the department's website.

5. No person shall make a new or increased interbasin diversion which results in a significant adverse impact on the water quantity of the source New York major drainage basin.

6. Diversions from the Great Lakes-St. Lawrence river basin are prohibited by the Great Lakes-St. Lawrence River Basin Water Resources Compact, as enacted in title ten of article twenty-one of this chapter. Limited exceptions for public water supply systems will only be considered when in compliance with that Compact.

§ 15-1506. Transportation of water by vessel.

1. Except as provided in subdivision three of this section, no person or public corporation shall transport or carry by vessel, more than ten thousand gallons in any one day of the waters of any freshwater lake, pond, brook, river, stream, or creek in this state without first obtaining a permit from the department.

2. If the department finds that the transport of such water is reasonable, and is not contrary to the conservation of the natural resources of the state or to other uses of the water, including health, safety and welfare of the people of the state, the permit shall be granted subject to reasonable conditions on the withdrawal and transport. Such permit shall be subject to annual renewal.

3. No permit shall be necessary for the taking of a volume of ballast water necessary for normal vessel activity, but this exemption shall not apply to the exchange of ballast water.

4. The department shall not issue permits for the transport of water by vessel which will conflict or be inconsistent with the provisions of any interstate compact, commission or charter relating to the allocation of water resources to which New York is a signatory.

§ 15-1507. Municipal water supply reservoirs on forest preserve lands.

Any public corporation, now or hereafter empowered by law to construct and operate a publicly owned system for the supply of water for drinking, domestic and public purposes to the inhabitants of any municipality, may make application for the construction and maintenance by the state of a water supply reservoir on lands owned by the state and constituting a part of the forest preserve thereof in the manner hereinafter set forth.

§ 15-1509. Approval of plans for forest preserve reservoir projects; petition; proceedings.

1. Any publicly owned water supply project involving the construction of a reservoir on forest preserve lands must be submitted for approval to the department as provided in sections 15-1501 and 15-1503 of this article, and the procedure on such an application shall be as therein set forth except as to the additional requirements and further procedure required by this section.

2. The petition for approval of such a project must state that it is desired to construct a reservoir on state owned forest preserve lands, giving a description of the location and extent of the lands to be occupied or flooded, and shall be accompanied by a map, based on accurate surveys, showing the boundaries of such land and the high flow line of the water to be impounded thereon. The public notices of the hearing shall state that the reservoir proposed to be constructed is on state owned lands within the forest preserve.

3. In addition to the findings required by section 15-1503 of this article, the department in such cases shall also determine whether the needs of the applicant for water are such as require the proposed public use of the land involved, whether the constitutional limitation as to the amount of such land that can be used for reservoir purposes will not be exceeded, and whether the plans are such that unsanitary conditions will not be created by the proposed project.

4. If the application is approved, the department shall apportion all the expenses of the proposed project upon the municipalities which it may find to be benefited thereby, to the extent of the benefits received; it shall also fix the amount to be paid to the state by the municipalities benefited. Such amount to be paid to the state is to be computed as follows:

a. The value of the state owned timber and other forest products to be removed during the construction of the project, such amounts to be due on the cutting of such timber or other products. Such material shall become the property of the applicant on the payment of such amount to the state. The department may direct that the amount due be paid in one lump sum or may permit partial payments to be made in such amounts and

at such times as may be specified.

b. A charge of six per centum per annum on the value of the state owned lands and rights used, unimproved and bare of timber. This value shall be determined by the department and be redetermined by it at intervals of ten years from the date of approval of the application. The amount of this charge for any year shall be due and payable on the first day of January of the succeeding year and shall be computed from the day of the actual entry of the applicant or the department on the state owned land for the purpose of beginning the clearing or the construction work.

c. An annual charge, to be determined, redetermined and payable as provided in paragraph b above, as a reasonable return to the state for its services rendered.

5. A statement of all these matters shall be included in the decision of the department approving the application.

§ 15-1511. Procedure on approval of application with respect to forest preserve reservoir projects.

1. The decision of the department on an application shall be certified to the applicant. Thereafter, and at any time within five years of the date of the decision, the applicant may petition the department that it construct the reservoir and appurtenant works in accordance with the approved plans. Such petition shall be in writing and shall be accompanied by plans and specifications for the structures to be built and such other papers as may be necessary to show to the satisfaction of the department that the project in all respects conforms to the requirements of the decision of the department. The department may permit minor modifications in the plans or specifications, provided that the general features of the project as first approved are not changed.

2. If the department decides that the project which it is asked to build is in conformity with the provisions of its decision upon the

original application it shall advertise for proposals for doing the work. Upon the receipt of such proposals, the department shall make a final determination of the probable cost of the project and shall require the applicant to state that it desires the work to proceed, and to show that it has available sufficient funds to defray the total cost thereof. If the applicant desires to carry out the project and the department is satisfied that sufficient funds are available for the purpose, the department shall thereupon let contracts for and proceed with the construction of the works.

3. In obtaining proposals and letting contracts for and in the prosecution of this work the department shall be governed by the provisions of title 19 of this article, insofar as they may be applicable to the provisions of this part of article 15.

§ 15-1513. Payment of cost of construction.

1. The cost of any such project shall be certified by the department to the applicant and shall be paid by the applicant within thirty days thereafter to the persons or corporations entitled thereto. Either total or partial costs may be thus certified, as the department shall determine. The applicant is hereby authorized to pay such costs from funds which have been raised, or which it is authorized to raise for the purpose of waterworks construction.

2. It shall be unlawful for the applicant to pay out, for any purpose other than those specified in this section, any funds which it shall have certified to the department to be available for defraying cost of this construction, until such time as the department shall have certified to the applicant that all construction costs have been paid.

§ 15-1515. Supervision of construction and operation.

1. All construction work which the Department of Environmental Conservation is authorized to undertake by virtue of the provisions of

sections 15-1507 through 15-1519 shall be done under the direction of the Commissioner of Transportation. After the works shall have been constructed, they shall thereafter be maintained and operated for the benefit of the applicant by the Commissioner of Transportation under the direction of the Department of Environmental Conservation.

2. All costs of such supervision of construction, operation and maintenance shall be paid by the applicant in the manner specified in section 15-1513 of this article, except that the applicant shall not be charged with the salaries and expenses of such officials and regular employees of the state who, in addition to other duties, exercise only general supervision over the work done under the provisions of sections 15-1507 through 15-1519.

3. The Department of Environmental Conservation is authorized to employ such engineers and other persons as may in its judgment be necessary to carry out the provisions of sections 15-1507 through 15-1519 and to fix the compensation for such employees. Such compensation shall be paid by the applicant.

4. Except for such expenses and salaries as are specifically exempted by subdivision 2 of this section, no moneys of the state shall be expended, nor shall the state incur any liability or indebtedness by virtue of the provisions of sections 15-1507 through 15-1519.

§ 15-1517. Reservoir to be owned by the state.

Any lands not owned by the state, but required for the purpose of the construction of the reservoir on forest preserve lands shall be acquired by the applicant, by purchase or condemnation, and conveyed by the applicant to the state, provided however that no rental shall be paid to the state for any land thus acquired. The reservoir and all dams, dikes, spillways, gate houses, pipe lines or any other works which the department shall construct on state owned land shall be the property of the state, but shall be operated solely for the benefit of the applicant. All real estate, reservoirs and appurtenant structures

acquired, taken or constructed pursuant to the provisions of sections 15-1507 through 15-1519 are hereby dedicated to the uses and purposes for which acquired, taken or constructed, and the right, title and interest acquired by the state therein is so acquired subject to such use and purposes.

§ 15-1519. Reservoir to be kept in repair.

The reservoir and appurtenant works shall be kept in safe, sanitary and serviceable condition and to this end shall be repaired, remodeled or additional work done thereon at the request of the applicant or as required by the department. All such work shall be done by the department at the expense of the applicant. If the applicant shall at any time determine that its needs for an additional supply of water require the enlargement of the reservoir in order that a greater quantity of water can be stored therein or drawn therefrom, a new water supply application shall be made to the department asking for approval of the desired modifications of the original plans.

§ 15-1521. Supply of water to other public water supply systems.

On any application for a new or increased withdrawal of water for a public water supply system, the department may require or authorize the applicant to make provisions for the supply and to supply water to any area of the state which as determined by the department in its decision on that application properly should be supplied with water from the source or sources of water supply sought by the applicant. The owner or operator of any existing or proposed public water supply system within such area may apply to the department for a permit to take water from that source of water supply or from any part of the public water supply system of the applicant supplied in whole or in part from that source. If the department so requires, or if it grants a permit, it shall be the duty of the applicant so to supply water, subject to such requirements as the department may impose. The price to be paid for the amount of water so to be taken may be agreed upon between the applicant and the

taker of the water, or if they cannot agree, fair and reasonable amounts and rates shall be, after due hearings thereon, fixed by the public service commission. Any such agreement or determination of the public service commission may from time to time be modified by further agreement between the parties affected thereby or by the further order of the commission.

§ 15-1523. Indirect damages; decision and payment as to Rochester.

1. Whenever the department shall decide that the execution of any water supply project by the city of Rochester will result in damages to persons and property, the determination of and payment for which are not otherwise provided for by law, the department shall so state in its decision and it may order that such damages be determined and paid in accordance with the provisions of this section.

2. Whenever the department shall make such a decision relating to the determination and payment of damages pursuant to the provisions of this section, any person who is on the date of such decision, the owner of any real estate not taken by the applicant, or the owner of any established business, directly or indirectly decreased in value by reason of the acquiring of land for or on account of a new or additional water supply project, his heirs, personal representatives and assigns, shall have a right to damages for such decrease in value. The city of Rochester may agree with such person as to the amount of such damages, and, if such agreement cannot be made, such damages, if any, shall be determined in the manner provided in the eminent domain procedure law for the ascertaining and determining of the value of the real estate taken for such project, and the court shall not be limited in the reception of evidence to the rules regulating the proof of direct damages. The amount of such damages so agreed upon, or determined, as aforesaid, shall be paid and collected in the same manner as is provided for the payment of awards in condemnation proceedings as provided in the charter of the city of Rochester for the taking of real property.

3. A person employed in a manufacturing establishment, or in an

established business, or upon any lands, who is not the owner or part owner thereof, which manufacturing establishment, or established business, is injured or destroyed, or which lands are taken or acquired under or on account of the carrying out of such project, and who has been so employed continuously for at least six months prior to the date of the decision of the department and who continues in such employment up to the time of such injury, destruction, taking or acquisition, shall have a claim for damages against the city of Rochester equal to the salary or wages paid to such employee for the six months immediately preceding the date of such decision. Such damages may be determined by agreement with the city of Rochester, or, in case such agreement cannot be made, such employee may maintain an action against the city of Rochester in the Supreme Court to recover such damages, not, however, to exceed the sum of the salary or wages paid him for the six months immediately preceding the date of the decision of the department.

4. If the department shall so approve of a project, or a part of a project, the execution of which is to be deferred, or, if for any reason such execution shall thereafter be deferred, the department shall in its decision, or in a modification thereof, fix a date, other than the date of the decision, which shall be held to be applicable to all damages arising from the execution of such project, or of such part of a project.

5. The powers, rights, privileges and duties granted, conferred and imposed by the provisions of this section are hereby granted, conferred and imposed notwithstanding any inconsistent provision in this or any other general or special law.

§ 15-1525. Water well drillers in New York state to obtain certificates of registration.

1. No person shall engage in the business of water well drilling in the state of New York without first obtaining a certificate of registration from the department as hereinafter provided. All water well drilling shall be performed in accordance with the rules and regulations

promulgated by the commissioner of health pursuant to subdivision eighteen of section two hundred six of the public health law.

2. Application for a certificate of registration shall be made upon a form prescribed and furnished by the department providing such information as the department deems necessary for the purposes of issuance of a certificate of registration.

3. The certificate of registration shall require that, before the commencement of drilling of any well or wells, the water well driller shall file a preliminary notice with the department; it shall also provide that upon the completion of the drilling of any water well or water wells, a completion report be filed with the department, giving the log of the well, the size and depth thereof, the capacity of the pump or pumps attached or to be attached thereto, and such other information pertaining to the withdrawal of water and operation of such water well or water wells as the department by its rules and regulations may require. The water well driller shall provide a copy of such completion report to the water well owner. The number of the certificate of registration must be displayed on the well drilling machinery of the registrant. The certificate of registration shall also contain a notice to the certificate holder that the business activities authorized by such certificate are subject to the provisions of article thirty-six-A of the general business law. The fee for such certificate of registration shall be ten dollars annually. The commissioner shall promulgate a water well completion report form which shall be utilized by all water well drillers in satisfying the requirements of this section and any other provision of state or local law which requires the submission of a water well completion report or water well log.

4. The department may revoke any certificate of registration for violation of any of the provisions of this section, or violation of rules made by the department pertaining thereto. A certificate of registration may be revoked by the department regardless of the criminal provisions with regard to this section found in section 71-1115.

5. a. On and after January first, two thousand three, any individual

who is responsible for the on-site supervision of water well drilling activities must have passed, with at least a seventy percent score, a two-part certification exam by the national ground water association or an equivalent exam offered or approved by the commissioner. Evidence of having passed such exam shall be provided by the person responsible for the on-site supervision of water well drilling activities upon demand of any enforcement officer.

b. Notwithstanding the provisions of paragraph a of this subdivision any individual, who is responsible for the on-site supervision of the repair or installation of water pumps, requiring the opening of the well casing, must have passed, with at least a seventy percent score, a certification exam developed by the national ground water association or the water systems council, or an equivalent exam offered or approved by the commissioner. Evidence of having passed such exam shall be provided by the person responsible for the on-site supervision of the repair or installation of water pumps, requiring the opening of the well casing, upon demand of any enforcement officer.

6. Except as otherwise provided by law, nothing in this section shall be deemed to preempt any provision of local law which requires the license or registration of water well drillers or which otherwise regulates the practice of water well drilling, provided that the provisions of such local law are at least as comprehensive as the provisions of this section.

§ 15-1527. Permit required for certain wells in Long Island counties.

1. No person or public corporation shall hereafter install or operate any new or additional wells in the counties of Kings, Queens, Nassau or Suffolk to withdraw water from underground sources for any purpose or purposes whatsoever where the installed pumping capacity of any such new well or wells singly or in the aggregate, or the total installed pumping capacity of old and new wells on or for use on one property is in excess of forty-five gallons a minute without a permit pursuant to this title.

2. Such persons or public corporations operating or proposing to operate a well or wells in excess of such capacity in any of such counties shall be subject to all the provisions of this article relating to persons or public corporations, with the same force and effect as if they were supplying or proposing to supply water to the inhabitants of a municipal corporation or other civil division of the state. In taking action on such an application the department shall have authority to impose such conditions and make such requirements and limitations as may be necessary for the protection of the interests of the applicant and of the people of the state and may issue limited or revocable permits for such wells.

3. All new well permits shall be valid for a period of time not to exceed ten years from the date of issuance. The department shall develop a permit renewal application and a time schedule for permit renewals. Well permits may be renewed, including any modifications deemed appropriate by the department, and such renewal shall be considered valid for a period specified by the department but in any case shall not exceed a period of ten years from the date of reissuance or renewal.

4. All applications for new well permits, all applications for well permit renewals, and all reopened well permits shall be evaluated, notwithstanding any other requirements of this title, according to criteria established by rule or regulation of the department which shall include but not be limited to:

a. Specific yield of the aquifer segment in which the well is or will be screened;

b. Requested rated capacity of well and anticipated or actual amount of withdrawal from such well, both seasonally and annually;

c. Whether the well site or proposed well site is in an over-stressed, transitional, or unstressed area;

d. The proposed use of the water; whether the water will be or is recharged or discharged to waste; and the likely quality of the water if

it is or will be recharged;

e. The amount of withdrawal requested and its relationship to volume of recharge occurring locally as well as the relationship of the requested withdrawal to the regional level of withdrawal and recharge;

f. The degree of consistency between the requested rate of withdrawal and any regional water management plans; and

g. If the well is to be used by a water purveyor, either public or private, or a water authority, whether such purveyor or authority has an active and on-going water conservation program, leak detection program, and metering program.

In addition, the department shall vigorously apply subdivision two of section 15-1503 of this title in its decision-making process. The department shall determine whether the watershed, which in the case of Long Island shall mean the land surface that represents the recharge catchment area recharging water for each respective well, has been adequately protected. If the well is to be used as a public water supply by a water purveyor or water authority, the department shall require as a permit condition that the water purveyor or authority prepare and submit watershed rules and regulations as described pursuant to section eleven hundred of the public health law.

5. The department shall develop a system for categorizing the counties of Kings, Queens, Nassau and Suffolk into areas that are either unstressed, transitional, or over-stressed with respect to the quality and/or quantity of the groundwater supply. For those areas which are considered to be over-stressed, as determined by the department, all valid well permits within this category shall be reopened in order to evaluate and possibly modify, add or delete any permit conditions or requirements. Special consideration shall be given to permit conditions aimed at reducing the levels of withdrawal and consumptive water use in over-stressed areas. The reopening of the well permits may be phased in over a five year period. All reopened well permits which are deemed by the department to be acceptable following review and any subsequent

changes may be renewed and shall, if renewed, be valid for a period of time not to exceed ten years from the date of reissuance or renewal. Nothing in this title shall be considered to prohibit the department from revoking a permit following the review required by this title.

6. The provisions of this section shall not apply to the installation of a fire well to which no pumping equipment is permanently attached when such well is installed by a municipal corporation, fire district or duly organized fire company or fire department.

7. The provisions of this section shall apply to the use of water for agricultural purposes. The department shall, for the purposes of section 70-0116 of this chapter, make a finding of an emergency when a replacement well is needed during the growing season for a crop. Pursuant to section 70-0116 of this chapter, the department may issue an emergency authorization for the construction and operation of such replacement well.

§ 15-1528. Moratorium on the drilling of new wells in the Lloyd Sands.

1. The department is directed to identify those areas of Long Island within the counties of Kings, Queens, Nassau and Suffolk which, for the purposes of this section, shall be considered coastal communities.

2. A moratorium shall be established on the granting of new permits to drill public water supply, private water supply or industrial wells into the Lloyd Sands or to permit new withdrawals of water from the Lloyd Sands or to permit the storage or pumping of water into the Lloyd Sands. Such moratorium shall apply to all areas that are not coastal communities, provided however that such moratorium shall apply to all areas including coastal communities for the storage or pumping of water into the Lloyd Sands. The waters of the Lloyd Sands shall be reserved for the use of coastal communities during the moratorium, however, nothing required herein shall affect the permits of wells presently screened in the Lloyd Sands and withdrawing water therefrom.

3. The moratorium shall be lifted upon a directive from the commissioner. The directive shall be based upon his finding that sufficient research has been conducted so as to provide a sound working knowledge of the details, dynamics, water volume, and levels of safe withdrawal appropriate to maintain a safe quantity of Lloyd Sands water. Further, the commissioner must find that a workable program is in place that can properly administer a well permit program for the Lloyd Sands water. Such program shall take into account both the localized and regional aspects and implications of Lloyd Sands water withdrawals, with special attention given to the prevention of water contamination and salt water intrusion. The program must ensure that a safe level of withdrawal from the Lloyd Sands is not exceeded.

4. The commissioner may grant exemptions to the moratorium upon a finding of just cause and extreme hardship. Such exemptions shall not apply to the storage or pumping of water into the Lloyd Sands. An adjudicatory hearing shall be held and findings presented to the commissioner prior to the granting of an exemption.

§ 15-1529. Approval of completed water withdrawal systems.

The construction of any new or modified water withdrawal system authorized under this title shall be under the general supervision of a person or firm licensed to practice professional engineering in the state. Upon completion of construction, such person or firm shall certify to the department that the water withdrawal system has been fully completed in accordance with the approved engineering report, plans and specifications, and the permit issued by the department pursuant to this title. The owner shall not commence operation of the new or modified water withdrawal system prior to the department receiving such certificate and prior to approval of the system by the department of health or its designee as may be required by the state sanitary code.

§ 15-1530. Long Island water usage information.

In Nassau and Suffolk counties, all water purveyors, either public or private, or a water authority, with ten thousand or more customers, shall include water usage information along with customer bills. Such usage information shall be specified in both gallons and cubic feet and at a minimum include:

1. information on year to date usage;
2. a seasonal comparison; and
3. last year's usage for the same time period.

TITLE 17

WATER POWER

Section 15-1701. Reservation of state control.

15-1703. Definitions.

15-1705. Licenses; approval by the Governor.

15-1707. Procedure on application for license.

15-1709. Preliminary permits.

15-1711. Provisions and conditions of licenses; payment to state treasury of moneys received under this title.

15-1713. Waters impounded by dams constructed for power purposes impressed with a public interest.

15-1715. Licenses and the protection of navigation.

15-1717. Provisions for the revision and readjustment of rent in licenses.

15-1719. Equitable rental for Niagara River water.

15-1721. Reservation in the license; state control of rates and use and distribution of power.

15-1723. Contribution to the cost of headwater improvement.

15-1725. Prosecution of project works.

15-1727. Maintenance of project works.

15-1729. Eminent domain.

15-1731. Eminent domain; transmission lines.

15-1733. Use of land occupied by a public highway.

- 15-1735. Contracts extending beyond license period.
- 15-1737. Transfer of license restricted.
- 15-1739. Revocation of license.
- 15-1741. Re-entry at expiration of the license period.
- 15-1743. Renewal and extension of licenses.
- 15-1745. Prohibited diversions.
- 15-1747. False entries, statements or reports.
- 15-1749. Previous grantees not to divert waters without a license.
- 15-1751. Right to amend and repeal reserved.

§ 15-1701. Reservation of state control.

Where any person takes, diverts, appropriates, or otherwise uses, whether by virtue of the provisions of title 17 of this article or otherwise, the waters of the state over which the state has the proprietary ownership of the flow and to the use of which the state has the right paramount and exclusive, or concurrently with any other jurisdiction, such waters shall remain subject to the power and control of the state for the purposes of regulating, licensing, controlling, or terminating the use and disposition of the same by such person, as well as for the purpose of exacting any rentals or charges therefor.

§ 15-1703. Definitions.

When used in title 17 of this article unless otherwise expressly stated or unless the context or subject matter otherwise requires:

1. "Licensee" means a person or public corporation holding a license issued pursuant to title 17 of this article, his successor in interest or assign;
2. "Stream" means a river or other stream and its tributaries;
3. "Water power site" means the real property including rights

appurtenant thereto or which may become appurtenant thereto which, when a water power is developed, is necessary or useful for the construction, maintenance and operation of a plant for the use of a fall of water for the generation of power;

4. "Developed water power site" is a "water power site" where the development is used or usable in its present condition for the generation of power or where the works of such development are being constructed or are in course of repair;

5. "Surplus canal waters" means such waters flowing in canal feeders, artificial canals or the canalized streams of the state, as in the judgment of the Commissioner of Transportation, are not necessary for any canal uses or purposes;

6. "Project" means a complete unit of improvements or development, consisting of a power plant, all water conduits, or dams and appurtenant works and structures which are a part of such unit, and all storage, diverting or forebay reservoirs connected therewith, the primary line or lines transmitting power therefrom to the point of junction with the distribution system, all miscellaneous structures used and useful in connection with such unit or part thereof, and all water rights, rights of ways, ditches, dams, reservoirs, lands or interest in lands, the use and occupancy of which are necessary or appropriate in the maintenance and operation of such unit;

7. "Project works" means physical structures of a "project;"

8. "Reconstruction cost" of a project or of any part thereof means the actual and reasonable original cost to the licensee of the lands or interests in the lands of such project or such part, less depreciation, if any, plus the cost of reproducing the ways, means and works thereon less the depreciation of such ways, means or works, including in such costs a reasonable allowance for organization and development expenses, but excluding therefrom any allowance for the value of the license or any contract, lease or franchise, or value as a going concern, or future profits in pending or existing contracts or prospective profits,

revenues, dividends or any other intangible element;

9. "Real property", without words of limitation, includes all uplands, lands under water, waters of any lake, pond or stream, all water and riparian rights or privileges, all dams, races, sluiceways, and machinery connected therewith, and all land, water and rights necessary to carry out any project or development provided for by title 17 of this article, including the right to divert running water of any stream or streams, and lands necessary for such diversion, and all easements and incorporeal hereditaments, and every estate, interest and right, legal or equitable in land and water, including terms for years and liens on real property as above defined and all real property as above defined, acquired and used for railroad, highway and other public purposes in any county containing a part of the forest preserve as now constituted.

10. For other definitions, also applicable in this title, see section 15-0107.

§ 15-1705. Licenses; approval by the Governor.

1. The department, subject to the provisions of title 17 of this article, may upon application issue to any person or public corporation heretofore or hereafter authorized to develop, use, furnish or sell power in this state or to a municipality of the state having such authority, a license authorizing the diversion and use for power or other purposes of any of the waters of the state in which the state has a proprietary right or interest, or the bed of which, or the real property required for use of such waters or the right to develop water power, is vested in the state; or of boundary waters of the state where the state has jurisdiction over the diversion or interference with the flow of the same solely or concurrently with any other jurisdiction or owner of a proprietary right; or to any such applicant when the owner of any water power site or sites which it uses or proposes to use for the production, sale and distribution of heat, light or power to the public; and subject to the property right of others including riparian rights, authorizing the construction, maintenance and operation in, across or

along any of such lands and waters of such dams, reservoirs, diverting canals or races, water conduits, power houses, transmission lines and other project works as are deemed necessary or convenient for the development, transmission and utilization of the developable power and authorizing in connection therewith the use of dams or other structures or contiguous or adjacent lands belonging to the state. When any water power site or property necessary to the full development of such a site is owned by the state, or water, the use of which is dependent upon the consent of the state, is not, in the opinion of the department suitable or necessary for the development of power for public use, a license may be issued to a person or public corporation for private use under like conditions and with the same restrictions.

2. Whenever the use of water or the erection of structures under a license may affect the navigable waters over which the United States shall have lawfully assumed jurisdiction for purposes of navigation, such license shall not be issued until the plans for such use and structures have been submitted to and approved by the federal authorities as required by law and any licenses shall be at all times subject to the lawful exercise of such jurisdiction over the waters affected by the license for the purposes of navigation.

3. Whenever canal lands, structures or surplus canal or canal feeder waters are covered by the license, the license shall not issue unless the Commissioner of Transportation certifies to the department in writing that the same are not necessary for the navigation or operation of the canals and shall not become effective until endorsed with his approval. Any licensee in the use of such license, structures or water shall be at all times subject to such reasonable rules and regulations as the Commissioner of Transportation shall from time to time prescribe so that the use thereof by the licensee shall not impair the efficiency of the canals and such use shall at all times be subordinate to the needs of the canals.

4. Notwithstanding any provision of title 17 of this article, no license issued by the department pursuant to the provisions of title 17 of this article shall be effective unless and until it is approved in

writing by the Governor and such approval is signed by him and affixed thereto; and notwithstanding any provision of title 17 of this article a modification of such license shall not be effective until approved by the Governor in like manner.

§ 15-1707. Procedure on application for license.

1. Each applicant for a license shall submit to the department a written verified application in such form as the department may prescribe and containing such data or information of the applicant's project as the department may require. It shall be accompanied by proposed plans and specifications showing the nature and extent of the applicant's proposed development and estimates of cost as may be required for a full understanding of the proposed project. Such maps, plans and specifications when approved by the department shall be made a part of the license; and thereafter no changes shall be made in such maps, plans or specifications until such changes shall have been approved and made a part of such license by the department. Applications shall be filed with the department in the order of their receipt.

2. Each license covering water power sites or lands, the title to which is vested in the state, shall require the payment by the licensee of an annual charge measured by a fair rental value thereof; in other cases, except where the state has no proprietary interest, an equitable annual charge may be made, in determining which the department shall give consideration to the cost of producing power by others in competition with the licensee; and every license shall require the payment by the licensee of an annual charge for the purpose of reimbursing the state for the cost of administration of the provisions of title 17 of this article. The department, by resolution, shall fix and determine such annual charge, and the time or stage of development from which rentals are to be computed, whereupon if one or more applicants signifies his readiness, and establishes to the satisfaction of the department his ability, to construct and maintain the proposed project, to pay the charge or rental fixed by the department, and otherwise to comply with the provisions of title 17 of this article in

the use of such water and property, it shall give notice of such determination and of a time, not less than fifteen days from the date of the first publication of the notice, and of the place of a meeting of the department to take action on such application or applications.

3. A copy of such determination and notice shall be served upon each applicant for the license not less than fifteen days previous to the date set for the hearing. If the application applies to or may affect any canal or canal feeder waters, a like notice shall be given to the Commissioner of Transportation. The department shall also cause such notice to be published as provided in subdivision 1 of section 15-0903.

4. At the time and place designated in such notice, or at a time and place to which the meeting may be adjourned, the department shall determine whether the plan or plans set forth in the application or applications on file with the department, or any such plan, is or may be consistent with the proper development, conservation and utilization in the public interest of power resources of the water shed, stream or localities to be affected by the determination. If it shall determine that any of the plans is consistent with such development, conservation and utilization and that there is no reason why the water power involved should at the time be withheld in the public interest from development by private interests, it may grant the application. If there be two or more such applications it shall decide which of the plans is most suitable for the proper development, conservation and utilization in the public interest of the water power resources of the water shed, stream or locality affected.

5. The department in granting the license shall accord a preference to the applicant whose plans, being approved under the preceding subdivision, are best adapted to properly develop the water power site or sites covered by the application, provided that it is satisfied that such applicant is reliable and responsible and capable of consummating the project; and provided further that as between two or more plans equally well adapted to such purpose, a preference may be given to the application of a municipal corporation, if an order shall have been previously made by the Public Service Commission approving the

installation of a municipal power plant which it proposes to install under the license, or in default of such an application to a riparian owner, and, otherwise, to the application first filed with the department; and provided further that the department may impose as a condition of granting the license that the plan be modified to improve the development or otherwise conserve the public interest or protect private rights.

6. The department from time to time, either before or after a license is granted, may permit minor changes and corrections to be made in any map, plans or specifications filed by an applicant for the purpose of improving the same. It may also permit changes to be made therein for the purpose of better adapting the same to the development, conservation and utilization in the public interest of the water power resources of the water shed, stream or locality affected. No correction or change shall be made under this subdivision until the same has been authorized by a resolution adopted by the department.

§ 15-1709. Preliminary permits.

1. The department may issue preliminary permits for the purpose of enabling applicants for a license hereunder to secure the data and to perform the acts required by section 15-1707, provided, however, that upon the filing of any application for a preliminary permit by any person or public corporation, the department before granting such application shall at once give notice of such application in writing to any municipality which, in its judgment, is likely to be interested in or affected by such application. Each such permit shall be for the sole purpose of maintaining priority of application for a license under the terms of title 17 of this article for such period or periods, not exceeding a total of three years, as in the discretion of the department may be necessary for making examinations and surveys, preparing maps, plans, specifications and estimates, and making financial arrangements.

2. The permit shall set forth the conditions under which priority shall be maintained and the license issued, and may prescribe any

condition of issuing the license for the protection of the interests of the state. Only one preliminary permit at a time shall be issued and outstanding for the same project. The same preference shall be accorded by the department in considering applications for a preliminary permit as is accorded in considering applications for a license. Each preliminary permit shall require the permittee to proceed diligently and immediately to secure the data and to perform the acts required by section 15-1707.

3. All investigation work in connection with any operations carried on under the preliminary permit shall be subject to the inspection of the department, its agents and employees, and, from time to time upon the request of the department, the permittee shall make full reports to the department of the progress of the work carried on under the preliminary permit, but such reports shall be confidential until final application is made for the license, unless the department takes proceedings to revoke the preliminary permit.

4. Permits shall not be transferable and may be cancelled by the department upon failure of the permittee to comply with the conditions thereof.

§ 15-1711. Provisions and conditions of licenses; payment to state treasury of moneys received under this title.

1. The term of the license shall not exceed fifty years from its date.

2. The licensee shall agree to accept and abide by the terms and provisions of title 17 of this article, and to pay to the state the charge or rental, if any, fixed by the department and reserved in the license, or as the same may be readjusted pursuant to law.

3. The license shall by reference to maps, plans, and specifications or otherwise clearly identify and define the improvement or development to be affected under the license.

4. If the license affects any canal or canal feeder waters, it shall contain a provision, in substance, reserving to the Commissioner of Transportation the right at any and all times to enter upon the property covered by the license, and to do and perform such acts or things, including the temporary drawing off of the water from the dam or forebay from which the licensee is drawing water and such interruption in the supply of water to the licensee, as may be deemed necessary for the repair, reconstruction or improvement of the canal or any canal works or structures and that the licensee shall be at all times subject to such reasonable rules and regulations for the management and maintenance of the canals and navigation thereof as the Commissioner of Transportation shall from time to time prescribe; also a provision in substance reserving to the department the right, on ninety days' written notice to the licensee, to retake, recapture and resume wholly or in part the use of the water and other property covered by the license, including all structures erected upon and improvements to such property, and to control and limit the manner and extent of use of such water or other property, whenever in the opinion of the Commissioner of Transportation or the Legislature, the necessary supply of water for the use of the canals of the state, or any future alterations or improvements of the canals, or the safety of the works connected therewith, may render such resumption, control or limitation necessary; also a provision in substance reserving to the state the right wholly to abandon or destroy the canal, dam or works by the erection or construction of which the surplus water covered by the license is rendered available. In either of which events, the licensee, if he promptly complies with any and all lawful directions of the department with respect to the cessation of the use of water and removal from the premises may recover from the state in the Court of Claims the damages resulting to him therefrom, but the damages for improvements on state lands shall not exceed the reconstruction cost. The damages for which the state shall be liable may be specified in the license. The state shall not be liable for any temporary interruption for the repair of or in the operation of the canal, and in case of a substantial change in the right or privilege granted, the department, by agreement, may readjust the charge or rental with the licensee.

5. The license shall contain a provision in substance that if there be a partial resumption of the use of the water or of the land which is covered by the license, the licensee, at his option, may continue for the remainder of the term specified in the license to use the residue of the water and land covered by the license, under the terms and conditions of the license, or such modified terms as may be agreed upon, upon the payment to the state of a revised and readjusted charge or rental, and that if the licensee refuses to accept or continue the use of the remaining water and land at the revised and readjusted rental, the license shall terminate and the licensee shall have his claim for damages as provided by the preceding subdivision.

6. Except as otherwise provided by law, the terms and provisions of a license may be altered only by mutual agreement between the department and the licensee, after publication as provided in subdivision 1 of section 15-0903 of a notice setting forth the time and place of the meeting at which the proposal to alter the terms and provisions of the license will be considered. If by any such agreement the amount of water available for use by the licensee is curtailed or the privileges and rights under the license are materially changed, the department may revise and readjust the rental to be paid.

7. The license may contain a provision to the effect that the licensee shall furnish to the state, free of charge or upon terms to be fixed as therein provided, the hydraulic or hydro-electric power required for the operation or lighting of certain defined state structures, works or property.

8. The license may also contain a provision in substance, that the licensee shall obtain the fee simple absolute of, or any lesser interest in, all property other than that of the state used by him in the construction of the project.

9. In issuing licenses for a minor part only of a complete project, or for a complete project of not more than one hundred horsepower capacity, the department may in its discretion waive such conditions, provisions and requirements of title 17 of this article, except the license period

of fifty years, as it may deem to be to the public interest to waive under the circumstances.

10. The department shall pay into the state treasury the moneys received by it in the course of administering the provisions of title 17 of this article in the manner provided by section 121 of the State Finance Law.

§ 15-1713. Waters impounded by dams constructed for power purposes impressed with a public interest.

The waters impounded by any dam hereafter constructed for power purposes on any stream or waterway in the state, shall be impressed with a public interest and open to the public to fish thereon, when authorized by other applicable provisions of this chapter subject to the conditions and limitations found in section 11-1311 of this chapter.

§ 15-1715. Licenses and the protection of navigation.

Before granting any license, the department shall inquire and determine to its own satisfaction that the exercise of the privilege conferred will not impair or interfere with navigation on the waters covered by the license and, whenever, the public interest requires, shall impose such conditions in granting the license as may be required to protect and safeguard navigation.

§ 15-1717. Provisions for the revision and readjustment of rent in licenses.

1. The annual charge or rental fixed by the department shall continue for the period of the license, unless the license provides for a readjustment of the charge or rental at a specified time or times, in which case the charge or rental, as fixed by the license, may be revised and readjusted by the department according to the terms of the license.

Payments on account of any such charge or rental shall be treated as a part of the operating expense.

2. The licensee shall be given ten days' notice of the time and place of the meeting of the department at which the question of the revision and readjustment of such charge or rental will be considered. The revision and readjustment shall be in the form of a resolution adopted by the department and thereafter, the revised and readjusted rental or charge, unless reviewed and reversed or modified as herein provided, shall apply to and govern the license.

3. Any such decision may be reviewed by the licensee pursuant to the provisions of section 15-0905.

4. Pending the final determination of the review proceedings, the licensee shall pay to the state the revised and readjusted rental or charge as fixed by the department; and if it shall be determined that the rental or charge shall be revised, the licensee shall be credited on later payments with any excess he may pay over the rental as finally fixed, with interest. If the credits be insufficient to satisfy such excess, the licensee may recover the balance in the Court of Claims.

§ 15-1719. Equitable rental for Niagara River water.

The department shall have the power to fix and determine, after a hearing held upon notice to the parties interested, the amount of an equitable rental, which is hereby charged pursuant to the reservations made in chapter 597 of the laws of 1918 for the diversion, as specified in such chapter, of water from the Niagara River in excess of a daily diversion at the rate of fifteen thousand one hundred cubic feet per second, and also, from July 1, 1943, the amount of an equitable rental, which is hereby charged, for the diversion of water from the Niagara River to the extent of a daily diversion at the rate of fifteen thousand one hundred cubic feet per second and not otherwise subject to the imposition of an equitable rental as specified in such chapter. Such rental shall be fixed in like manner as if application were made for a

license under the provisions of title 17 of this article before the water was used, and the people of the state may sue for and collect in behalf of the state such rentals as so fixed and determined.

§ 15-1721. Reservation in the license; state control of rates and use and distribution of power.

1. Every license issued pursuant to title 17 of this article for a project shall contain a provision expressly reserving to the state the right to regulate and control the use and distribution of the power generated by any licensee, and to fix reasonable rates to be charged by the licensee under all circumstances for furnishing heat, light or power generated wholly or partly by the use of property covered by the license, and to regulate the service, capitalization and secured debt of the licensee and licensed project.

2. Jurisdiction is hereby conferred upon, and it shall be the duty of, the Public Service Commission to regulate and control the use and distribution of all power generated by any licensee under title 17 of this article, or generated by any person or public corporation, by the use and diversion for power purposes of any waters of the state in which the state has a proprietary right or interest, and to fix reasonable rates to be charged by such licensee, or such person or public corporation, for furnishing heat, light or power generated wholly or partly by the use of water in which the state has a proprietary right or interest. In the exercise of such jurisdiction the Public Service Commission shall give preference to municipalities in the use and distribution of power generated by such licensee or by such person or public corporation. To carry out the provisions of this section, and until otherwise provided by law, complaints, inspections, investigations, hearings, rules, regulations, orders and determinations may be made or had, and rules, regulations and orders enforced, in the manner, so far as applicable, provided in the Public Service Commission Law in respect of electrical corporations and of the manufacture, sale and distribution of electricity.

3. Every license issued pursuant to this article shall contain a condition that the development of power thereunder shall be subject to the control and authority of the Public Service Commission to the extent conferred upon such Commission by this section.

§ 15-1723. Contribution to the cost of headwater improvement.

Licensees and persons exercising rights conferred by title 17 of this article shall be liable for any payments or charges resulting from the improvement of headwaters under the provisions of title 21 and title 23 of this article, according to their respective interests in the property benefited.

§ 15-1725. Prosecution of project works.

1. The licensee shall commence the construction of the project works within the time fixed therefor in the license. He shall thereafter in good faith and with due diligence continue the construction thereof, and within the time fixed in the license complete and put into operation the whole of such development work or such part or parts thereof as the license prescribes; except that when not incompatible with the public interest, the department may, from time to time, for good cause, by resolution extend the time either for the commencement of construction or for the completion thereof.

2. The licensee shall, when required by the department and as often as once in every six months during the course of the construction, file with the department a detailed statement of the cost of the project during the period covered by the statement. Within six months after the licensee has filed its final statement after the completion of the project, the department shall file a statement of the total cost of the investment.

3. The department at such time or times as it deems proper may examine any statement of the licensee, whether partial or complete, and hold a

hearing to determine whether the same correctly states the cost of the project or part thereof, as therein set forth, and shall have power to determine whether any part of the expenditure has been made wastefully, or in disregard of the terms of the license, or in bad faith, and to deduct such items improperly included as may be necessary to make such statement or statements conform to the fair and actual cost of the project or part thereof. Subject to review as provided in section 15-0905, the determination of the department shall be conclusive for all purposes as to the amount of such investment as shown by any such statement.

§ 15-1727. Maintenance of project works.

1. The licensee shall at all times maintain the project works in good repair and in efficient working order; shall promptly make all necessary renewals and replacements, including such necessary renewals or replacements as may, after a hearing, be directed by the department for this purpose, and shall establish and maintain adequate reserves therefor.

2. The department may at any time institute an investigation or hold a hearing, or both, with respect to the compliance by the licensee with the requirements of this section and the adequacy of the reserves maintained by it for the purposes herein specified. After such investigation or hearing, the department may issue such order or orders, not inconsistent with title 17 of this article, as in its judgment will insure compliance by the licensee with the provisions of title 17 of this article, in respect to all matters so investigated.

3. The licensee shall promptly conform to and comply with such directions, orders, rules or regulations as the department may make from time to time in the interests of navigation, or for the protection of life, health or property or other lawful purposes. He shall likewise promptly conform to and comply with such lawful rules and regulations as may from time to time be prescribed by the federal government, its duly authorized officers or agents relating to the navigation of the waters

covered by the license.

§ 15-1729. Eminent domain.

Real property may be acquired pursuant to title 17 of this article under an exercise of the right of eminent domain in the following cases:

1. Real property which is necessary to the full development and utilization of any water power site of which the state is the owner, in whole or in part.

2. Real property which is necessary to the full development of water power sites where such water power sites on a stream, or in a given locality cannot be developed separately as efficiently and economically for the generation of power as under a plan for their development together and the owner or owners of the right to the use of the greater part of the head and volume of usable flow for power at such sites transfer the same to a corporation organized for the production, sale and distribution of heat, light and power to the public as herein provided, or such right is owned by such a corporation and the department determines by resolution that such power sites can be more efficiently and economically developed for the production of power under such a plan than singly, and the heat, light or power is necessary for public use.

3. Real property, on the application of a corporation organized for the production of heat, light or power, after a determination by the Public Service Commission that such property is necessary to the full development and utilization of a single undeveloped water power site, a major part of the head and volume of the usable flow for power at which site is owned by such corporation, for the production of heat, light or power for sale or distribution to the public and that such heat, light or power is necessary for public use. In any county containing a part of the forest preserve as now constituted, for the purpose of establishing the right to exercise the power of eminent domain under this subdivision the ownership of wild or unoccupied land shall be presumed to be in an

applicant showing a record title under which the applicant or his grantors has claimed for a period of ten years and it appears that the state and county taxes thereon have been paid by or on behalf of such applicant or his grantors for a period of five years before the proceeding in which the application is made was begun; ownership in other lands wherever located shall be presumed on showing record title in the applicant for a period of ten years and possession thereunder for a like period.

4. Such right of eminent domain shall be exercised under the provisions of the eminent domain procedure law subject to the following restrictions and limitations:

a. The acquisition of real property for the state shall be on the application of the department, and payment therefor shall be made in the manner provided for the payment of lands appropriated by the state in the Adirondack and Catskill parks under section 3-0305 of this chapter.

b. If a water power site be taken under subdivision 2 of this section, the owner of any such power site shall have the option to receive and own such a proportion of the power resulting from the common development as the head and volume of the usable flow of the water at the site bears to the product of the total head and volume of the usable flow of the waters of the common development, provided he pays a like proportion of the cost of development, maintenance and operation, and consents that his pro rata share of such power shall be pledged to secure such payment, and assents to such reasonable and equitable provisions and regulations in relation to the development and operation thereof for the common benefit and to payment therefor as the department shall prescribe. In case of the exercise of such option by the owner of a developed water power site, such owner shall also be allowed the loss, if any, resulting to him from the excess in value, if any, of the water power owned by him before such common development over the water power right owned by him after such development, after deducting from the value of such power right his proportion of the cost of such development. Such difference in value shall be deemed a part of the damages in the condemnation proceeding, and the payment thereof shall be

secured as directed by the court.

c. Before any real property is taken under the provisions of subdivision 2 of this section, the owner or owners of the right to the use of the greater part of the head and volume of usable flow for power at the sites to be developed in common shall, unless such a corporation be already organized and be the owner of such rights, organize a corporation for the production, distribution and sale of heat, light and power to the public, and shall transfer to such corporation such sites. Such corporation shall file with the Public Service Commission a certified copy of its certificate of incorporation and shall also file with such department a map of the water power sites, and property connected therewith, of which it is the owner, with satisfactory proof that it is the owner thereof, and a map of the water power sites and property which it seeks to acquire for the purpose of making a common development. It shall also file with such department a plan of its proposed development of water power on the property which it owns and which it seeks to acquire. Such corporation shall file copies of such maps and plan certified by the president and engineer of the corporation, or a majority of the directors, in the office of the clerk of the county in which such development is to be made, or if it be in more than one county, in the office of the clerk of each county; and shall give written notice to all actual occupants of lands of which it is not the owner on which such development is to be made, of the time and place such maps and plan were filed, and that such development is to be made on the lands of such occupants. The Public Service Commission shall give an opportunity to persons interested to be heard, investigate and determine whether it is in the public interest that such development be made and whether the power to be produced is necessary for the supply of the public with heat, light or power. If it shall so determine, it may issue to such corporation a certificate that public convenience and necessity require that such development be made, but in granting the certificate the department may expressly except from its certificate any part of the property proposed to be developed as unnecessary to the plan. Such certificate when issued shall be conclusive evidence as to the matters lawfully certified therein in any proceeding under the Condemnation Law to acquire the property, or any part thereof, set forth

in such certificate.

5. Real property, on the application of a corporation authorized to do business in this state and engaged in the production, sale and distribution of heat, light or power to the public, which is necessary to perfect or improve water power already developed, provided that property taken does not impair or injure any developed water power or developed water power site. The corporation may apply for and in a proper case receive from the Public Service Commission a certificate of convenience and necessity for taking the property so to be acquired in the manner and with like effect as provided in paragraph c of subdivision 4 of this section. Any such corporation may also exercise the right of eminent domain to acquire real property in accordance with the provisions of subdivisions 2, 3 and 4 of this section.

6. If it appears that there is a defect of title or any outstanding interest in any of the real property occupied or to be occupied by the project when completed, the corporation making, or having the right to make, the development of the water power may exercise the right of eminent domain for the purpose of acquiring any such outstanding interest or any real property with respect to which the title appears to be or is defective.

7. In any county containing a part of the forest preserve as now constituted, real property, on the application of a corporation organized for the production of heat, light or power, necessary for the development of a water power site or sites, developed or about to be developed, and occupied by a railroad and real property necessary to and for the relocation of such railroad, upon application to and on order of the Public Service Commission authorizing the same and upon thirty days' notice to the railroad corporation. The Public Service Commission shall grant the order if in its judgment the public interest will be promoted thereby. The relocation of the railroad shall be at the expense of the applicant and in accordance with plans and specifications to be approved by such Public Service Commission. The applicant shall not take possession of any real property of the railroad necessary for its operation until such relocation of the railroad shall have been

completed. The Public Service Commission upon the assent of the railroad may order the abandonment of such part of the railroad as is necessary to be taken instead of ordering a relocation thereof.

8. Real property, on the application of a corporation organized for the production of heat, light or power, which is necessary for the full development of a water power site or sites, developed or about to be developed, and is used or occupied as burial place or cemetery, and real property necessary to locate and reinter any human remains removed therefrom. Proceedings shall be had for the taking of such real property and removal of such remains in the manner provided by section 15-2117, in so far as the provisions thereof are applicable thereto, but such exercise of the right of eminent domain shall be subject to the sound discretion of the court.

§ 15-1731. Eminent domain; transmission lines.

Any corporation authorized to do business in this state and engaged in the production, sale and distribution of heat, light or power to the public may exercise the right of eminent domain pursuant to the provisions of the eminent domain procedure law to acquire property necessary for the construction of transmission lines for such heat, light and power, when necessary for such sale and distribution to the public. If the corporation is a licensee under title 17 of this article it may apply to, and in a proper case receive from, the Public Service Commission a certificate of convenience and necessity for any property so required in the manner and with like effect as provided in paragraph c of subdivision 4 of section 15-1729. The court in such proceedings of condemnation may prescribe any reasonable limitations, restrictions or regulations for the construction and operation of such lines so as to protect life and prevent unnecessary injury to property.

§ 15-1733. Use of land occupied by a public highway.

1. Whenever, in order to complete any project as provided by title 17

of this article, it becomes necessary to use lands occupied by a public highway the licensee shall apply to the Commissioner of Transportation for permission to relocate such highway, the entire expense of such relocation to be borne entirely by the licensee including any damages to persons or property which may be caused by or result from such relocation. The new location shall be determined by the Commissioner of Transportation and the application of the licensee shall be accompanied by funds in an amount sufficient to provide for the cost of a survey, preliminary plans and all other expenses of the Commissioner of Transportation in determining a suitable relocation.

2. The licensee shall provide the necessary land for such relocated highway in accordance with land taking-maps prepared by the Commissioner of Transportation. If such relocation is on state land the fee to the land covered by the right of way shall remain in the state. If the licensee acquires private property for right of way in the relocation of a state or a county highway the fee in such right of way shall be deeded to the state or to the county in which the same is situated as the case may be. If the licensee acquires private property for right of way in the relocation of a town highway the fee in such right of way shall be deeded to the town or towns in which the same is situated.

3. Any such relocation shall be made by the licensee according to plans and specifications approved by the Commissioner of Transportation.

4. Upon the completion and acceptance of such relocated highway the original highway for which it is substituted shall be deemed abandoned as a public highway and the relocated highway shall thereafter be maintained in the same manner as was the original highway for which it was substituted.

5. The highway law shall apply to the relocation of highways as provided in this section so far as applicable thereto and not inconsistent with title 17 of this article.

§ 15-1735. Contracts extending beyond license period.

1. Whenever the public interest requires or justifies the execution by a licensee whose license covers any state property, or who uses water that cannot be lawfully used without the consent of the state, of a contract for the sale and delivery of power for a period extending beyond the terms of the license, such a contract may be entered into with the approval of the department and the Public Service Commission, in which event the duty to perform such contract after the expiration of the license period shall devolve upon the person or corporation to whom or which a new license covering the property of the former licensee is issued, and such new license shall so provide.

2. A licensee making such a contract shall not be liable thereon after the expiration of his license, if it cover any state property or the use of water subject to state control, unless the new license is issued to him. No such licensee without the written approval of the department shall enter into any contract for the sale or delivery of power for a term or period extending beyond the time fixed for the revision of the change or rental payable under his license.

§ 15-1737. Transfer of license restricted.

No voluntary sale, assignment, or transfer of any license or of the rights thereby granted shall be made without the written approval of the department; nor become effective until the instrument of transfer be filed and recorded in the office of the clerk of each county in which property covered by the license is located. Notice thereof must be given to the department before possession is given under such transfer, and if there be a transfer by operation of law, the transferee must give notice thereof to the department before taking possession.

§ 15-1739. Revocation of license.

1. The department may by resolution terminate and revoke any license, issued pursuant to the provisions of title 17 of this article for the

following reasons:

a. Failure of the licensee to commence, advance or complete construction of the project works within the time fixed therefor, unless the time be extended by the department; or

b. Failure of the licensee to pay, at the time or times provided in the license, the charge or rental provided for in the license or fixed pursuant to law; or

c. Failure of the licensee promptly to comply with any of the terms, conditions or provisions of title 17 of this article or of the license, or with any direction, order, rule or regulation given or made by the department or otherwise, pursuant to the license or provisions of law.

2. No action terminating or revoking a license shall be taken until the licensee is afforded an opportunity to appear before the department and be heard with respect thereto. Ten days' notice of the time and place of the meeting of the department at which the action will be considered shall be given to the licensee.

3. In case the department revokes a license as herein provided because of the failure of the licensee in good faith to commence actual construction of the project works or any specified part thereof within the required time, the licensee shall not recover any damages or compensation from the state because of such revocation.

4. If the license is terminated or revoked, the state may elect to take any and all interest of the licensee in and to state property covered by the license including all works and structures thereon.

5. In such event the department may, subject to the making of adequate appropriation therefor, provide by written agreement for the payment to the licensee of the amount of the enhancement in value, if any, of the state property which is covered by the license resulting from any improvements of the same made or effected by the licensee, not exceeding, however, the reconstruction cost, which recovery in the case

of termination and revocation pursuant to paragraph a of subdivision 1 of this section shall not include or be affected by any organization or other expenditures preliminary to actual construction work, and in the case of termination and revocation pursuant to paragraphs b and c of subdivision 1 of this section shall be less a deduction equal to that portion, if any, of the aggregate income from the project over and above actual and reasonable expenses of operation, including repairs, which shall exceed an amount equal to eight per centum per annum, to the time that the state property is taken over by the state, of the actual and reasonable cost to the licensee of the lands and interests in lands, the actual and reasonable cost to the licensee of the ways, means and works and the allowance made for organization and development expenses. If the amount involved does not exceed the indebtedness which may be lawfully incurred for such purposes without an appropriation, such agreement may provide for the payment thereof before an appropriation is made.

6. In the event that the licensee and the department are unable to agree upon the amount of damages payable to the licensee as above provided, and the same does not exceed the indebtedness which may be lawfully incurred, for such purpose without an appropriation being made therefor, the licensee may recover from the state in the Court of Claims the amount of enhanced value, if any, of the licensed property owned by the state, resulting from any and all existing improvements of the same made or effected by the licensee, not exceeding, however, the reconstruction cost, less depreciation thereof as limited above to proceedings pursuant to the provisions of paragraph a of subdivision 1, or less deduction as stated above for proceedings pursuant to paragraphs b and c of subdivision 1. If the amount of damages shall exceed the amount of such lawful indebtedness, the revocation shall not take effect until an adequate appropriation has been made therefor and in such case damages may be in like manner recovered in the Court of Claims.

7. The Attorney General at the request of the department may institute appropriate actions or proceedings in the Supreme Court in any judicial district of the state or in any court of competent jurisdiction to carry into effect the resolution of the department revoking any license and to remove from state property covered by the license, any licensee whose

license has been revoked.

§ 15-1741. Re-entry at expiration of the license period.

1. Upon the expiration of the original license period any and all interest of the licensee in and to state property which is covered by the license, together with any and all works and structures thereon, shall vest in and become the property of the state free and clear of any and all liens and encumbrances, provided, however, that the department may at the time the license is granted, or at any later time during its continuance, enter into an agreement with the licensee that an allowance will be made to the licensee for and on account of improvements to property of the state, or improvements the value of which is dependent on the use of state property, for which in view of the rent paid the licensee shall not have been compensated by the privilege of the license, but such agreement must be made before the improvement for which such allowance is to be made, is undertaken. If the amount of such allowance exceeds the amount of indebtedness, which may be lawfully incurred for such purposes without an appropriation, the time when such property is vested in the state shall be postponed until an adequate appropriation is made therefor. The allowance so made or to be made may be by way of an extension of the license pursuant to an agreement between the department and the licensee.

2. Any agreement with the licensee for an allowance on account of improvements to property of the state or improvements the value of which is dependent on the use of state property, shall not provide for an allowance in excess of the reconstruction cost, less a deduction equal to that portion, if any, of the aggregate income from the project, over and above actual and reasonable expenses of operation, including repairs, which shall exceed an amount equal to eight per centum per annum, to the time that the state property is taken over by the state, of the actual and reasonable cost to the licensee of the lands and interests in lands, the actual and reasonable cost to the licensee of the ways, means and works and the allowances made for organization and development expenses.

§ 15-1743. Renewal and extension of licenses.

The department may renew an expiring license to the same licensee on the same or different terms, or may renew the privilege from year to year under such terms as may be agreed upon.

§ 15-1745. Prohibited diversions.

1. Unless a license has been obtained therefor under this title, or the diversion of such waters is subject to the charging or imposition of an equitable rental under this title, it shall be unlawful for any person or public corporation who has been notified by the department to desist from such conduct, to willfully take, divert, draw or make use of, for power and/or other commercial or manufacturing purposes:

a. waters, or the bed or other real property required for the use of such waters, in which the state has a proprietary right or interest;

b. boundary waters of the state concerning which the state has jurisdiction over the diversion or interference with the flow of the same for power purposes, solely or concurrently with any other jurisdiction or owner of a proprietary right.

2. The use of such water, except when the right to the use thereof has been acquired by means of a written license issued pursuant to the provisions of title 17 of this article, or when the diversion of such water is subject to the charging or imposition of an equitable rental pursuant to the provisions of subdivision 1 of section 15-1719 of this article, shall be prima facie evidence of the wilfulness of the taking, drawing, diversion or use thereof and of the guilt of the person taking, diverting or making use thereof.

§ 15-1747. False entries, statements or reports.

No person shall for the purpose of deceiving, make or cause to be made any false entry in the books of accounts of a licensee, or for the purpose of deceiving, make or cause to be made any false statement or report in response to a request, order or direction from the department for statements or reports under title 17 of this article.

§ 15-1749. Previous grantees not to divert waters without a license.

A person or corporation, other than a municipal corporation, claiming or purporting to have, or to have had, by general or special act or other grant from the state, the right to divert water from Lake Erie, Niagara River or the boundary waters of the state, or to divert any waters in which the state has a proprietary interest, or the successor in interest of such a corporation, whether or not there has been or is now an actual diversion of waters or development of power therewith pursuant to such act or grant, may apply for a license under title 17 of this article to divert such waters and shall not divert such waters without having obtained such license, unless the diversion of such waters is subject to the charging or imposition of an equitable rental pursuant to the provisions of title 17 of this article, and shall otherwise be subject to the provisions of title 17 of this article.

§ 15-1751. Right to amend and repeal reserved.

The right to alter, amend or repeal title 17 of this article is expressly reserved, but substantial rights acquired pursuant to title 17 of this article shall not be lost or impaired by such repeal or amendment.

TITLE 19

DRAINAGE

Section 15-1901. Purpose.

15-1903. General provisions and definitions.

15-1905. Drainage improvement districts.
15-1907. Drainage improvement associations.
15-1909. Entry upon lands, structures and waters; condemnation.
15-1911. Petition for formation of district.
15-1913. Proceedings on petition.
15-1915. Proceedings for formation of district.
15-1917. Surveys and maps.
15-1919. Drainage enhancements.
15-1921. Proceedings on enhancements.
15-1923. Plans and estimates.
15-1925. General apportionment of cost.
15-1927. Proceedings on general apportionment of costs and final
fixation of boundaries.
15-1929. Corrections and revisions of statements of
enhancements.
15-1931. Procedure for authorization of construction.
15-1933. Construction.
15-1935. Contracts.
15-1937. Operation and maintenance.
15-1939. Special apportionment of cost.
15-1941. Major repairs of drainage works.
15-1943. Minor repairs in drainage districts.
15-1945. Minor repairs in existing drainage ditches.
15-1947. Unlawful interference with drainage works.
15-1949. Removal of beaver.
15-1951. Financing of improvements.
15-1953. Drainage improvement district fund.
15-1955. Proceedings for assessment and collection of cost.
15-1957. Drainage fund.
15-1959. Corrections and revisions of assessments,
determinations of drainage enhancements and
apportionment of costs.
15-1961. Drainage district with federal aid.
15-1963. Formation of district with federal aid.
15-1965. Construction project.
15-1967. Changes in project.
15-1969. Continuation of district.

- 15-1971. Transfer of property and discontinuance of district.
- 15-1973. Drainage section association; definitions.
- 15-1975. Drainage section association; creation.
- 15-1977. Articles of association; recording and filing.
- 15-1979. First annual meeting; members; officers; by-laws.
- 15-1981. Powers of association; limitations; voluntary dissolution.
- 15-1983. Drainage of agricultural lands; procedure.

§ 15-1901. Purpose.

To provide for the drainage of agricultural land to the end that it may be made more productive, and in order to benefit the public health, safety and welfare, the department shall possess the powers and exercise the duties hereinafter prescribed in respect to drainage.

§ 15-1903. General provisions and definitions.

The following words and phrases used in this title 19, when not otherwise specified, are defined or indicate procedure, as follows:

1. Filing. Wherever it is required that copies of maps and documents be filed, certified copies thereof shall be filed in the offices of the clerks of each county, town, city or incorporated village, any part of which is included in the district or proposed district.

2. Recorded. Whenever it is required that any document be recorded, the department shall send a certified copy thereof to the clerk of each county, any part of which is included in the district or proposed district, and it shall be the duty of such clerk thereupon to record such document and to collect the legal fees therefor.

3. Costs. Whenever it is practicable so to do, the department shall include in the cost of any surveys, maps, estimates, determinations of enhancements, apportionments of cost or assessments made, or

construction, maintenance or repair work carried out, the cost of all proceedings, hearings, notifications, filings, recordings, engineering, legal and other services and expenses which may lawfully be incurred, including the cost of acquisition of lands and rights of way, suits and prosecutions.

4. Notice. Unless otherwise specified, notice of a hearing, contemplated act or of an act performed shall be given as provided in section 15-0903.

5. Assessment. As used in title 19 of this article the term assessment shall mean the whole or any appropriate part of the procedure by which the cost of any proceeding or construction project is made a legal charge on certain properties. It may include the determination of enhancements and apportionment of construction and other costs. It includes similar proceedings once specified in earlier forms of title 19 of this article, or in former or other general and special laws with regard to drainage.

6. Initiation of proceedings. It is the intent of title 19 of this article that petition may be made to the department to make any survey or investigation or do any work that may fall under the purposes of title 19 of this article notwithstanding the special provisions hereof and that, if it is advisable or advantageous so to do, more than one procedure may be carried on at the same time or may be followed out with respect to a part rather than the whole of the district. Should such petition not fully conform as to subject matter with the following sections, the department is empowered nevertheless to give the relief desired by following the specified procedure as nearly as may be and to assess the cost of such investigations or work on the properties surveyed, investigated, appraised, included in an apportionment or improved in such manner as may be found most equitable and to conform most nearly with the specific provisions of title 19 of this article. Any procedure under this title 19 which may be initiated by petition may also be initiated by the department on its own motion. In such case the department shall adopt an initiating resolution which shall have the same force and effect as a petition.

7. Served by. A parcel of land is served by any ditch or structure useful for the drainage thereof. Thus any ditch which actually drains the parcel or which intercepts and carries away water which otherwise would reach the parcel, or any ditches which carry water collected by such drainage or intercepting ditches serve such parcel.

§ 15-1905. Drainage improvement districts.

1. Bodies corporate which shall consist of and be known as drainage improvement districts may be created as herein provided to carry out the purposes of title 19 of this article. Such drainage improvement districts are declared to be public corporations and shall have perpetual existence and the power to acquire, hold or sell such real estate or other property as may be necessary, to sue or be sued, to incur contract liabilities, to exercise the right of eminent domain, and of assessment and taxation and to do all acts and exercise all powers necessary to accomplish the purposes of title 19 of this article. Such powers shall be exercised by and in the name of the district. The governing body of the district shall be the department.

2. The debts, liabilities and obligations incurred by a drainage improvement district shall in no event be construed as debts, liabilities or obligations of the State of New York, and neither the department, nor any member thereof in his individual capacity shall be liable therefor. All drainage improvement districts heretofore formed under the provisions of this chapter or its predecessor, the Conservation Law, are hereby declared to be such bodies corporate and all the provisions of title 19 of this article shall be applicable to such drainage improvement districts.

3. Drainage improvement districts generally shall include all such portions of a natural drainage basin as should be treated as one project on the assumption that all lands in such basin needing drainage are to be improved. The department may form a portion of such basin into a district, on the assumption that the district may later be extended to

include the whole basin, but, in so far as may be possible, in that case the district formed shall be so laid out that all lands which eventually will drain into or be served by any part of the district works other than the main drainage channel, shall be included therein. It is intended that the boundaries of the district shall include all lands which would be enhanced in value by the construction of complete drainage works therefor and that land, the value of which will not be enhanced, shall be excluded, but in order to simplify the boundaries of the district certain relatively small areas of land not so enhanced may be included on condition that they bear no part of the cost of any improvement work.

§ 15-1907. Drainage improvement associations.

1. There shall be in each drainage improvement district an association to be known by the name of the district, as Drainage Improvement Association. It shall be the object of this association to represent the interests of its members in drainage matters before the department and elsewhere and to serve as a channel of communication between the members thereof and the department. Each owner of land within the district, each lessee of such land and each person who has contracted to purchase such land shall be a member of and shall have an equal vote in the association. Such association may be formed voluntarily as soon as the department has filed its first description of the boundaries of the district. As soon as practicable after recording the final order creating a district, the association, if already formed, shall call a meeting of the members of the association and perfect a permanent organization.

2. If no association has been formed, the department may call a meeting for the purpose of forming such association and a representative of the department shall preside thereat until a temporary chairman is elected. Such association shall adopt by-laws for the transaction of its business. The association shall choose from among its members a president, secretary and executive committee and such other officers and committees as the by-laws may provide. It shall be the duty of the

secretary to keep a list of the members and their addresses and to furnish the department with copies of such list on request. The annual meeting of the association shall be held during the month of February in each year, at which meeting the officers shall be elected and the association shall determine upon the drainage maintenance or construction work desired during the ensuing year.

3. Immediately after the close of the annual meeting the secretary of the association shall submit to the department a list of the names and addresses of the officers for the year and, if there be such, petitions setting forth the desires of the association and of the members thereof.

4. To defray the costs of the necessary meetings, the association may collect dues or contributions from its members.

§ 15-1909. Entry upon lands, structures and waters; condemnation.

1. For carrying out the surveys and examinations required by title 19 of this article, the department may enter upon any lands, structures and waters as in its judgment may be necessary, as provided by section 15-0305.

2. The department, its members, officers, employees and agents may enter upon any lands, structures and waters necessary for the purposes of title 19 of this article and may determine what rights in and to such property are to be acquired therein. If the owner of any property to be acquired, or on or over which an easement is needed for such improvement shall agree with the department upon the sum to be paid therefor, or for the right to use and occupy the same, or for any damages sustained, such sum shall be paid as part of the necessary expense of the project.

3. If the department cannot agree with the owners upon the compensation and damages to be paid for the property or easement to be acquired, the department shall proceed to take the title thereto or the required rights therein under the provisions of the eminent domain procedure law.

4. Whenever a construction project affects a ditch or channel which has been constructed and in use for twenty years and upwards such use and operation shall be conclusive evidence that a right of way therefor and all rights in the premises through which it passes, which are necessary and incident to the perpetual maintenance thereof, were duly obtained when such ditch or channel was constructed. All real property acquired by a drainage improvement district shall be exempt from taxation.

§ 15-1911. Petition for formation of district.

1. Any three or more persons possessing swamp, bog, pond, meadow, or other low or wet lands or any lands in the vicinity thereof, or any public corporation in which such lands are located, or in the vicinity of such lands, may present to the department a verified petition praying for the formation of a drainage improvement district.

2. Such petition shall set forth:

a. The proposed name of such district, as the
Drainage Improvement District.

b. The facts showing that the swamp, bog, pond, meadow or other low or wet lands are a menace to the public health, safety or welfare and that it is necessary for the conservation of the public health, safety or welfare to drain or improve such lands by the construction of such drains, ditches, channels, dams, dikes or other works, through or upon such lands or through or upon the lands of others, so far as necessary for any or all of such purposes.

c. A general description of the lands to be included in the proposed district.

d. A general statement of the benefits which will inure from the formation of such district and the drainage of such lands.

§ 15-1913. Proceedings on petition.

1. On receipt of a petition for the formation of a district the department shall make such preliminary investigation of the proposed district as it may find to be suitable and prepare a report thereon. Such report shall describe tentative boundaries for the district, shall contain a preliminary discussion of the present conditions, possible measures of relief, approximate cost of necessary drainage works, possible benefits and advantages therefrom, shall give an estimate of the cost of the surveys and all proceedings necessary for and including final fixation of boundaries of the district and shall set forth the recommendations of the department with regard to the formation of the proposed district.

2. Such report shall be filed and notice of such filing and of a hearing thereon given. Such notice, among other things, shall state the estimated cost of the surveys and all proceedings necessary for and including final fixation of boundaries of the district and that, should such proceedings be fully or partially completed, such cost will be assessed in one year upon the lands in the district at a uniform amount per acre of such lands.

§ 15-1915. Proceedings for formation of district.

1. At the hearing the department shall hear all persons affected by the formation of the proposed district. The department may change the tentative boundaries of the proposed district, but in that case a new hearing shall be held thereon after due notice thereof.

2. After the final hearing the department shall determine whether or not the tentative boundaries as described include all the lands which should be included in the district and exclude as far as is reasonably possible all lands which will not be benefited by drainage; whether or not the lands included therein will be made more productive by drainage,

the public health, safety or welfare will be benefited thereby and it will be to the public interest to form the drainage improvement district and carry out further proceedings for final fixation of boundaries or whether the application should be rejected. It shall embody such determination and disposition of the case in a written order, which shall be filed and notice of such filing given.

3. If the decision is favorable, such order shall declare the district to be formed and shall direct the making of surveys and the taking of the remainder of the proceedings for final fixation of boundaries for the district all as provided by sections 15-1917 to 15-1927, inclusive. Thereupon the order may be reviewed as provided by section 15-0905, and in due course shall be recorded.

4. The district shall be held to have been formed on the date of such order, but such formation shall not be effective until such order, as made or modified on review, shall have been recorded.

§ 15-1917. Surveys and maps.

1. The department may proceed to make such survey of the district as may be found to be necessary. It shall prepare maps of such district showing natural and artificial features as may be needed, the boundaries of the district, the boundaries and area of each parcel of land in the district together with the name of the owner thereof so far as the same readily may be ascertained. When a parcel is intersected by a county, town, village or city line, the area in each such political subdivision shall be given. Each parcel of land or each subdivision thereof shall be designated by a number. In the course of the proceeding further subdivision of parcels may be made if necessary or convenient.

2. The department may then determine the enhancement accruing to each such parcel due to drainage as provided in sections 15-1919 and 15-1921, prepare designs and estimates for drainage works as provided in section 15-1923, prepare a general apportionment of cost as provided in section 15-1925 and 15-1927, and fix the final boundaries of the district as

provided in section 15-1927.

§ 15-1919. Drainage enhancements.

1. For the purpose of making apportionments of the cost of future drainage construction, allowing credits for such construction already completed, determining the economic feasibility of a contemplated construction project and for other purposes, there shall be determined for each parcel of land in a district what is called the drainage enhancement for such parcel.

2. Drainage enhancement is a special form of assessed valuation made for the purposes of title 19 of this article and used only as such. Such enhancement is determined solely on the basis of estimated land value without consideration of certain specified conditions and is not dependent on or made in connection with any specific drainage construction project, completed or proposed. The drainage enhancement of any parcel of land is the increase in the value of such parcel which, on the basis of prices of land locally current at the time the determination is made, will occur as the result of improving that parcel by drainage works from its original undrained condition to the maximum condition of drainage which is practical. It is the maximum benefit which can inure to an undrained parcel by drainage to the practical limit, is the measure for the apportionment of the cost of such complete drainage construction and, as among other parcels, is the relative measure of benefits resulting from the construction of works giving a less complete drainage. Such enhancement, once determined, will remain fixed until such time as a general change in local land values is experienced.

3. The value of each parcel shall be determined (a) on the assumption that no drainage work has ever been done in the district and (b) on the assumption that the land is drained to the maximum practical extent. The difference is the drainage enhancement. In making these determinations it shall be assumed in both instances that the land is devoted to the highest use for which it will be fitted by drainage

regardless of the fact that it may have to be cleared or otherwise prepared for such use, unless it can be shown that drainage will affect the cost of such clearing and preparation in which case due allowance shall be made therefor. If a parcel contains lands of different values it may be subdivided and the enhancement determined for each subdivision.

4. The department may appoint persons as assessors to assist in the determination of such drainage enhancements.

5. These "drainage enhancements" are the same as the "benefits due to drainage" specified in earlier forms of article VIII of the Conservation Law, and "drainage enhancements" specified in article V of the Conservation Law as it read on the date of the enactment of the present chapter, and any such "benefits" heretofore determined shall remain unchanged by this amendment, but shall, after this article takes effect, be known and used as "enhancements."

§ 15-1921. Proceedings on enhancements.

1. The drainage enhancements shall be set forth in a statement signed by the department, which together with the map of the district shall be filed and notice of a hearing thereon at which grievances will be heard shall be given. At such hearing objectors shall be heard as to the property lines shown on the maps and the drainage enhancements shown on the statement thereof.

2. After the close of the hearing the department may amend both maps and statement, adopt the statement in final form and shall file such amended maps and final statement and give notice of such filing. Thereupon such amended maps and final statement shall be recorded when and as provided in section 15-1927.

§ 15-1923. Plans and estimates.

The department may make a study of the works necessary to drain the district and prepare maps, plans, estimates and reports showing a complete system of drainage therefor, the estimated cost of the various ditches and other works and parts thereof and the boundaries of the land which will be served by and therefor should contribute to the cost of each structure. These estimates of costs shall be made on the assumption that no drainage work has ever been done in the district. In addition the department may show on the plans any drainage work which has heretofore been done in the district, may estimate the cost of those works on the same basis used for the estimate of the cost of the proposed system and in similar manner may determine the boundaries of the land served by the existing ditches.

§ 15-1925. General apportionment of cost.

1. A general apportionment of the cost of the complete system of drainage shall be made as herein described. The total cost determined under the provisions of section 15-1923 shall be equitably apportioned on the various parcels of land in the district and on such public corporations as the department may find to be justly chargeable with a part of such cost in addition to what might be apportioned to them as owners of property in the district. Such charge on a public corporation shall be expressed as a percentage of the whole cost and only the remaining percentage of the cost shall be apportioned on the individual properties.

2. The general theory of such apportionment shall be that any parcel using or served by any ditch or part of a ditch shall share in the cost of that ditch or part and that share shall be in proportion to the drainage enhancement of that parcel already determined as set forth in section 15-1919 as compared with the sum of such drainage enhancements of all the parcels using or served by the same ditch or part of a ditch, but such strict rule may be modified should it lead to inequitable results.

3. The department may divide the whole drainage system into individual

ditches and appropriate parts of ditches, estimate for each ditch or part the total cost thereof, determine the boundaries of the lands which would use or be served by that ditch or part, subdivide the previously determined drainage enhancement of each parcel which may be subdivided by such boundaries and apportion the total cost of each ditch or part of a ditch accordingly. Finally all amounts apportioned to any one parcel shall be added together and compared with the drainage enhancement of that parcel. Should the total cost apportioned to any parcel exceed the drainage enhancement of that parcel, the design of the drainage system or the boundaries of the district shall be changed in such manner that for no parcel shall the costs exceed the enhancements. The department may make a similar apportionment of the cost determined under the provisions of section 15-1923 for such drainage works heretofore done which in its opinion are useful and may be incorporated into the complete system of drainage.

§ 15-1927. Proceedings on general apportionment of costs and final fixation of boundaries.

1. The department shall prepare and sign a statement of the general apportionment of cost and shall file it together with the maps, reports and estimates on which it was based and shall give notice of a hearing thereon. At the hearing the department shall consider and hear objections to the various matters covered by sections 15-1923 and 15-1925.

2. After the hearing the department shall make such revisions as it may find to be proper, shall adopt the maps, plans, estimates, boundaries and general apportionment in final form, shall file such papers and give notice of such filing. Such general apportionment in final form shall include an order fixing the final boundaries of the district. Thereupon these matters may be reviewed as provided by section 15-0905 and, if not so reviewed within sixty days after date of filing, such apportionment shall be final and conclusive and shall be recorded together with the final statement of drainage enhancements. Thereafter such apportionment in final form and the boundaries of the district

shall be fixed and determined. At the same time or as a separate proceeding the apportionment of the cost of older drainage work may be considered, heard, reviewed and recorded in like manner.

3. Thereafter all costs incurred by the department for surveys and all proceedings necessary for and including final fixation of boundaries of the district shall be apportioned on all parcels of land included in such district in proportion to the areas of such parcels of land and shall be collected on one assessment roll. Should the proceedings necessary for and including final fixation of boundaries of a district for any reason be abandoned or discontinued such costs shall, notwithstanding such action, be assessed on and collected from the lands within the boundaries of the district as fixed at the time of such abandonment or discontinuance as herein provided.

§ 15-1929. Corrections and revisions of statements of enhancements.

Should it be found necessary to correct or to revise any statements of enhancements due to drainage, general apportionment of cost, general plan for drainage works, estimates of cost of drainage works, boundaries of districts, boundaries of lands assessable for various portions of the work or any other matter above treated, such corrections and revisions may be made either upon petition or on motion of the department by following the procedure for each case as above set forth in so far as it can be made to apply.

§ 15-1931. Procedure for authorization of construction.

1. Petition may at any time after the final fixation of boundaries of a drainage improvement district be filed with the department asking that all or a part of the proposed drainage system be constructed. If the work desired is not shown on the plans filed or differs from that so shown or if the cost of the work shall have changed, the department shall on request of the association or of the executive committee thereof make plans of such work, estimate the cost thereof and make

tentative determination of the lands on which the cost of such work should be apportioned, making suitable subdivision of parcels and the enhancements thereto, if necessary.

2. Such petition must be in writing, signed and acknowledged in the manner of a deed to be recorded, by a majority of the owners of the property to share in the cost of the work and representing at least half of the total of the drainage enhancements of such property as shown by the recorded statement of enhancements, with subdivision of parcels made as above. The petition shall specify what part or parts of the work it is desired shall be built and the estimated cost thereof as the department may have determined.

3. On receipt of such petition the department shall prepare a description of the proposed work and a special apportionment of the cost thereof, shall file such statement and apportionment and, after due notice, shall hold a hearing thereon. Thereafter the department shall determine as to whether or not it is to the public interest to proceed with the work. The department may approve or reject the application or modify it and, if necessary, return it for further signatures or require a new petition to be filed in lieu thereof.

4. If the application is approved the approving order shall fix the boundaries of the land on which the cost is to be apportioned and the apportionment of such cost in final form shall be attached thereto. Certified copies of the order and apportionment in final form shall be filed and notice of such filing given. Thereupon such order and apportionment may be reviewed as provided by section 15-0905 and in due course shall be recorded.

§ 15-1933. Construction.

1. In general all construction work shall be done by contract, but in the event that the estimated cost of such work or of a specified portion thereof shall not exceed the sum of twenty-five thousand dollars, the department may, on the recommendation of the Commissioner of

Transportation, authorize the Commissioner of Transportation to do such work or part of such work by days' work under his direction.

2. All costs of supervision and inspection of construction work, costs of making surveys, plans and estimates in connection therewith and the costs of taking title to property and any other costs which may be incurred in connection with or incidental to such work shall be considered a part of the cost of such improvement.

§ 15-1935. Contracts.

1. The department may prepare contracts, plans and specifications for doing such work and furnishing the necessary materials. The work may be divided into several parts and a separate contract let for each. Each contract shall contain a provision that no extra or unspecified work shall be certified for payment unless such work is done pursuant to written order of the department. The form of such contract shall be approved by the Attorney General. Contracts shall be executed in triplicate by the department on behalf of the district.

2. Bids or proposals for any such contract work shall be called for by publishing a notice thereof once a week for two successive weeks in a newspaper published in each county affected by the proposed works, which the department shall select, and in such other papers as the department shall direct. The advertisements shall be limited to a brief description of the work proposed to be let with an announcement stating where the maps, plans and specifications are on exhibition, of the terms and conditions under which bids will be received, the time and place when the same will be opened and such other matters as may be necessary to carry out the provisions of title 19 of this article.

3. The Department of Transportation is authorized to furnish copies of such contract plans and specifications to prospective bidders at a price which it shall find to be reasonable. Every bid or proposal must be in writing and be accompanied by a money deposit in the form of a draft or certified check upon some national or state bank or trust company within

the state in good credit and payable at sight to the department for five per cent of the total amount of the proposal. In case the proposer to whom such contract shall be awarded shall fail or refuse to enter into such contract within the time fixed by the department, such a deposit shall be forfeited to the department and paid by it into the drainage improvement district fund; otherwise such deposits shall be returned.

4. The proposals received pursuant to the advertisement shall be publicly opened and read at the time and place designated. The department may reject any or all bids and readvertise and award the contract in the manner herein provided whenever in its judgment the interests of the district will be benefited thereby. No contract, the total of which exceeds by more than ten per cent the gross cost of the work as estimated by the department, shall be awarded. The contract shall be entered into with the person who shall offer to do and perform the same at the lowest price and who will give adequate security for the faithful and complete performance of the contract. Such security shall be approved as to character and sufficiency by the department and as to form by the Attorney General and shall be at least ten per cent of the amount of the estimated cost of the work according to the contract price.

5. If in the judgment of the department, the work upon any contract is not being performed according to the contract, or for the best interests of the district, it shall have power to suspend or stop the work under such contract while it is in progress and it shall thereupon become the duty of the department to complete the same in such manner as will accord with the contract specifications and be for the best interests of the district, or the contract may be cancelled and readvertised and relet in the same manner above prescribed and any excess in the cost of completing the contract beyond the price for which the same was originally awarded shall be chargeable to and paid by the contractor failing to perform the work. Partial payments for work actually done may be provided for in the contracts and paid in the manner hereinbefore provided to an amount not to exceed ninety per cent of the contract price. The payments due on account of any such contracts, or for necessary expense or work in connection therewith, shall be paid from

the drainage improvement district fund as hereinafter provided.

§ 15-1937. Operation and maintenance.

1. The care, operation and maintenance of the drainage works in a drainage improvement district shall be subject to the control and supervision of the department. It shall be the duty of the department, within the limit of the funds made available for that purpose, to maintain the drainage works in the district in serviceable condition.

2. The drainage association shall consider and make recommendations with regard to extensions and maintenance work annually and the department may make recommendations with regard thereto to be submitted to the association for discussion.

3. For such maintenance work the department is authorized to hire employees, purchase or rent land, buildings, tools, machinery or supplies, to let work by contract or to carry out projects by day labor.

4. The procedure to be followed for the authorization, financing and assessment of the cost of such work purchases shall be that specified in sections 15-1941 or 15-1943, whichever is applicable, or the proceedings may be initiated by the department of its own motion. In cases where a permanent maintenance or operating force is necessary, the department may annually prepare a maintenance budget which shall be treated as a repair project under section 15-1943.

§ 15-1939. Special apportionment of cost.

1. The special apportionment of the cost of a construction project, be it new construction, enlargement, repair or maintenance, must be based on the benefits derived from the work. This will conform to that part of the general apportionment applicable to the particular ditch or part of a ditch under consideration unless the department shall determine otherwise. It is the intent of title 19 of this article that in the

interest of justice and equity and best to meet the needs and desires of the owners of the property affected, the department may exercise some latitude in the application of the rules herein set forth and, without excluding other departures therefrom, the following are required or authorized:

a. If a parcel previously has been assessed for drainage improvements which will continue to be useful for the drainage thereof due allowance shall be made therefor. The apportionment of the cost of previous work, already made, will be used for this purpose, but may be modified to give due consideration to actual records of cost, if such can be discovered. If the present owner of such parcel has contributed labor, materials, or money to any such drainage work the department may make such allowances therefor as it finds to be just and proper.

b. If any parcel is uncleared or otherwise not immediately fit for the raising of crops, the department may make a reasonable adjustment based on the minimum time required with all due diligence to fit such parcel for such use.

2. Except by special request of the owner the capital cost of all past and future work serving a parcel shall not exceed the total drainage enhancement of that parcel.

3. Any ditch may on due petition therefor be excavated to less than full size if certain groups of properties eventually to be served by it do not desire at that time to share in the cost thereof. In that case it shall be unlawful for such properties to be drained until the owners thereof have had suitable enlargements of the outlet ditches made at their expense. If the petition shall so ask, a ditch, in the cost of which only a part of the properties eventually to be served asked to participate, may be made to full dimensions and the cost apportioned on the participating lands only, provided that the petition clearly so states and is signed by at least two-thirds of the owners of the lands to share in the cost representing at least two-thirds of the total enhancements to such lands. In that case the lands not sharing in the cost shall not be drained until the owners thereof have asked that their

share of the cost be apportioned to them and such apportionment has been made as provided above and the department shall have made suitable provision for reimbursement or credit to the persons at that time owning the property which bore the cost of such improvement in the first instance.

4. The costs of making such special apportionment of cost and proceedings thereupon shall be included in the cost of the work, or should the work be delayed or not carried out, they shall be assessed on one assessment roll on the participating lands in accordance with the apportionment made.

§ 15-1941. Major repairs of drainage works.

1. Major repairs, alterations, extensions and improvements of drainage works for a drainage improvement district may be made by the department on petition therefor and after procedure thereon similar to that specified in section 15-1931 for original construction. If additional surveys are required, they may be authorized as provided in sections 15-1911, 15-1913, 15-1915 and 15-1917, except that the cost of surveys and other expenses may be included in the cost of the improvement and assessed on the properties to be served thereby in accordance with the apportionment of cost of the repairs.

2. Except where the department shall otherwise determine, the cost of improvements and repairs to a ditch already built under the provisions of title 19 of this article, or of any former drainage laws, shall be apportioned in the same manner as the original cost was apportioned, but the department may make a new apportionment by following the procedure above specified.

§ 15-1943. Minor repairs in drainage districts.

1. Application for the repair, enlargement or cleaning out of any ditch originally constructed or repaired by assessment under the

provisions of title 19 of this article, or any former general or special drainage laws, if within a drainage improvement district and if the total cost thereof shall not exceed two per cent of the total of the drainage enhancements of all parcels served by such ditch, may be made by any three or more persons liable to be assessed therefor. Such application shall be made by written petition, verified by at least one of the signers thereof, setting forth the work desired, the estimated cost thereof and the need therefor.

2. On receipt of such petition the department shall cause an examination to be made of such ditch or ditches, an estimate of the cost of such repairs and improvements and a special apportionment of the cost thereof to be prepared, and shall file a statement of these matters. Thereafter, after due notice, the department shall hear all interested parties with regard thereto. The filing of written objections shall not be required. If after the hearing the department shall determine that the work can be done under this section, is necessary and is desired by the owners of the lands involved, it may proceed to make such repairs or enlargements. The cost of such repairs and expenses of the hearing and examination generally shall be apportioned upon the properties served by the work in accordance with the general or a previous special apportionment of the cost of such ditch or part of a ditch.

3. If the department shall find that changes should be made in the apportionment, or, for any other reason, that the work should not be done under the provisions of this section, it may so specify in its order, giving its reasons therefor, and return the case to the applicants for further petition. Money to pay for such work shall be raised pursuant to the Local Finance Law and as elsewhere herein provided. The whole cost of such work shall be collected within not to exceed three years from the date of completion of the project as may be determined by the department.

§ 15-1945. Minor repairs in existing drainage ditches.

1. Repairs of a minor nature may be made to ditches heretofore

constructed by assessment under the former drainage law, or the laws from which it was derived or under the provisions of this or any other general or special law by following the procedure set forth in section 15-1943 so far as it is applicable. The total cost of such repairs shall not exceed the sum of five thousand dollars on any one ditch for work done under one proceeding. The cost of such work shall be paid for out of the drainage fund provided by section 15-1957 hereof.

2. When such repairs or enlargements shall be finished, it shall be the duty of the department to make up an itemized account of the cost incurred in the making of such repairs or enlargements and to file the same as provided in section 15-1955 and such cost shall thereafter be assessed and collected within not to exceed three years as therein provided and as further provided herein. The expenses of such repairs and enlargements shall be apportioned among the premises to which were originally apportioned the cost of construction of such ditch or ditches, as shown by the apportionment made for such original construction and filed in the county clerk's office or elsewhere according to the valuation thereof on the last completed assessment roll or the drainage enhancements thereof, if such have been determined.

3. In case any public corporations have contributed to the construction of such ditch or ditches, such public corporations shall be liable for the repair or enlargement of the ditch or ditches, in the same proportion that they were originally assessed for the construction of the same, which shall also be levied and collected out of the taxable inhabitants of such public corporation in the same manner that other taxes are levied and collected in the corporation.

§ 15-1947. Unlawful interference with drainage works.

1. It shall be unlawful for any person to divert water from its natural watershed in such manner that it flows into a drainage district, or so to divert water in a drainage district as to prevent it from following the course laid out for such water by the department and cause it to flow into any stream, ditch or ditches into which it does not

naturally or was not designed to flow.

2. It shall be unlawful for any person without authorization to interfere with, fill up, alter or change any drainage ditch or other structure constructed under the provisions of title 19 of this article or lawfully constructed under the provisions of the conservation or the drainage laws or any other general or special statutes, or without authorization to open or close gates or other regulating works in connection therewith or to construct unauthorized ditches or drains or other interference. This shall not be held to prevent the private construction of drainage works within a district, provided that such construction is done in accordance with plans approved by the department and with its written consent.

3. It shall be unlawful to build or maintain across or in such drainage ditch any bridge or culvert which unduly impedes the flow of water in such ditch. No bridge or culvert across or in any drainage channel or ditch within or without a drainage district and necessary to the proper drainage thereof, shall hereafter be built, rebuilt or altered by any person or authority except with the written consent and approval of the department.

§ 15-1949. Removal of beaver.

In the event that any drainage improvement district is inhabited by or is invaded by beaver and the work of those animals interferes with the proper operation of the drainage system, the commissioner may cause such beaver to be removed or destroyed as he shall determine.

§ 15-1951. Financing of improvements.

1. For defraying the costs of all proceedings, surveys, studies and construction projects authorized by any section of title 19 of this article, the department may raise funds pursuant to the Local Finance Law. Such funds may not be borrowed unless the proceedings authorizing

such expenditures have become final.

2. In addition the department is authorized in the name of the district to apply for, receive and expend funds or services which may be granted or contributed for the purpose by the federal government or other public authorities or by private persons or organizations. Obligations issued for such purpose shall not be construed in any event as obligations or indebtedness of the state, and neither the state, the department or any member thereof personally shall be obligated to pay the principal or interest therefor. Bonds issued for such purpose shall be lawful investments for savings banks, trust companies, executors and trustees and for any of the funds of the state which by law may be invested.

3. The proceeds of such bonds shall be deposited in a national or state bank or trust company either in Albany or in one of the counties in which such improvement is made, to be designated by the Comptroller. Before any such deposit is made, the Comptroller shall require from the depository security for the repayment of the same to the department upon demand of the moneys so deposited in the manner provided in section 106 of the State Finance Law.

§ 15-1953. Drainage improvement district fund.

Moneys received under the provisions of title 19 of this article shall constitute a fund to be known as the drainage improvement district fund, and the portion thereof applicable to each improvement shall be separately kept by the Comptroller, and the Comptroller is authorized and directed to pay therefrom the principal and interest of such obligations as the same mature and become payable by the terms thereof, and the costs and expenses of such improvement and the maintenance thereof upon the order of the department or the authorized officer thereof.

§ 15-1955. Proceedings for assessment and collection of cost.

1. Except as otherwise provided by law, all costs and expenses necessary for the formation, improvement and maintenance of a drainage improvement district shall be met from funds collected from the owners of lands benefited or affected or from public corporations as provided in title 19 of this article. The fiscal year shall start on the first day of July.

2. On or before the first day of July each year the department shall prepare and file for each existing or proposed district having outstanding indebtedness or for which the borrowing of money has been authorized, an itemized statement of the amounts that must be collected on the tax roll to be prepared that year to meet the fiscal obligations of the district for the following fiscal year, including retirement of outstanding or contemplated evidences of indebtedness, interest thereon, repayments to the drainage fund and all other costs of whatever name or nature. Such statement shall set forth separately each project or parts of a project or other items in such manner as to facilitate the preparation of the tax rolls as herein provided. The total of each such item shall further be subdivided to show the amount thereof to be paid by each county, town, city or village and the amount to be levied on the individual properties. This last amount shall be further subdivided to show the total amount to be levied and collected in each county, town, city or village, all as previously determined by the department.

3. Such statement shall be approved as to the various amounts by the Comptroller. Certified copies of each statement shall be filed with the Comptroller, with the clerk of the county legislative body, or such other similar official as shall have been designated by the county legislative body, the clerk of each town and the clerk of each city or village affected thereby.

4. The amount shown on each statement to be due from any county, town, city or village shall be by such municipality assessed, levied and collected in the same manner as provided by law with reference to general taxes and paid to the treasurer of the county, who shall forthwith forward the same to the Comptroller to be paid by him into the

drainage improvement district fund applicable to such district or proposed district or into the drainage fund. That portion of each such item which is to be levied on the individual properties in any town or city shall be handled as follows. The appropriate board of assessors shall ascertain from the maps filed and apportionment of cost filed or recorded, the various parcels liable for any part of such item and shall enter in appropriate columns in the annual assessment roll before the delivery thereof to the county legislative body the number of each such parcel, the name of the owner as far as the same can be ascertained by the assessors and the figure to be used in determining the amount to be borne by each parcel, be it area, enhancements, modified enhancements, assessed valuation or percentage, all as shown by the above-mentioned maps or statements. Should a parcel have been subdivided, each division shall be so entered separately and the area, enhancement or other figures shall be subdivided accordingly by the assessors.

5. The county legislative body shall each year, at the time the annual tax levy is made, levy upon each separate parcel so shown on the assessment rolls an amount which shall bear the same relation to the total to be collected as shown by the annual statement as the area, enhancement or similar figure assigned to that parcel bears to the total of all such areas, enhancements or similar figures. Should the board of supervisors discover errors in the work of the assessors, they hereby are specifically empowered to correct the same so that the full amount shown by the annual statement of the department shall be assessed upon the properties liable therefor and it shall be the duty of the assessors to aid the county legislative body in making such corrections.

6. The amount so levied shall be collected and shall be a like lien as general taxes until the amount thereof is paid to the county treasurer, superior in force and effect to all other liens except unpaid general taxes, provided, however, that the collection of such tax shall be enforced only by sale of the land or property assessed. On or before the first day of June in each year the county treasurer shall pay the amount so to be raised in his county, as shown by the annual statement of the department of the previous year, to the Comptroller who shall pay the same into the drainage improvement district fund or into the drainage

fund as the case may be. The tax collectors and county treasurers collecting and paying such taxes to the Comptroller shall be governed by and have all the powers specified in the Real Property Tax Law, which formerly were specified in articles 4 and 7 of the Tax Law for the collection of taxes and sale of property by county treasurers for unpaid taxes and redemption of lands.

§ 15-1957. Drainage fund.

1. The Comptroller shall designate a depository or depositories for receiving all moneys provided for the repair or enlargement of the ditches or channels specified in section 15-1945. The fund thus created shall be known as "the drainage fund." Before any such deposit shall be received by any such depository, such depository shall execute and file with the Comptroller a bond in such penal sum, with such sureties and upon such conditions as shall be approved by the Comptroller.

2. The department is hereby authorized and empowered to enlarge and repair such ditches or channels in accordance with the procedure prescribed by that section and to pay the costs thereof from the drainage fund herein created. All moneys received pursuant to section 15-1945 shall be deposited by the comptroller to the credit of such drainage fund. At the time of any such deposit, the department shall send to the Comptroller an original duplicate of the deposit slip, together with a statement of the amount and by whom paid. The moneys of the drainage fund shall be paid out by the Comptroller on the order of the department or the authorized officer thereof.

3. The drainage fund may also be used to defray the costs of surveys, determination of enhancements, apportionment of costs or similar matters in a district or for maintenance of ditches and minor repairs thereto in a district in lieu of raising the necessary funds pursuant to the Local Finance Law, provided, however, that no such proceeding or project shall cost more than five thousand dollars. Any moneys so advanced from this fund shall be repaid to it by the Comptroller as soon as they are collected and paid to him by the county treasurer.

§ 15-1959. Corrections and revisions of assessments, determinations of drainage enhancements and apportionment of costs.

1. In the event that obvious errors or discrepancies should be discovered in any assessment, determination of drainage enhancements or general or special apportionments of cost, the department may correct the same by filing corrected copies of the statement of such assessment, determination or apportionments and following the procedure specified in title 19 of this article.

2. Should such corrections be made, the county legislative body is empowered to levy additional sums on or to give credit to certain parcels to the end that the amount collected from each parcel shall be what it should have been had an error not been made. The county legislative body is also empowered to apply to the department for an adjustment of assessments among the various parts into which an original parcel may have subdivided.

3. The department shall file and record its findings in such cases as amendments to the original or corrected assessments, and shall give notice to the parties affected, but need hold no hearing thereon unless such hearing be demanded by a party affected within ten days after notice is given.

4. None of the above proceedings shall be held to reopen a determination of enhancements or an apportionment of cost, except as to the particular matter involved. Should the department at any time find that a former assessment, determination or apportionment appears with the lapse of time or in the light of new knowledge and experience to have become inequitable, it may so declare by written order and proceed to review the whole matter by following the full procedure laid down in whichever one of the following sections is appropriate: 15-1919, 15-1925, 15-1937 or 15-1939.

§ 15-1961. Drainage district with federal aid.

1. In the event that any agency of the government of the United States shall be willing to perform, direct or finance any work for the drainage and reclamation of any swamp, bog, pond, meadow or other low or wet lands in the state in such manner that the greater part of the cost of such work shall be paid by such government, the department shall have power to form a drainage improvement district including the lands so to be drained and improved by following the procedure set forth in sections 15-1963 to 15-1967 inclusive, hereinafter referred to as the federal aid sections, in lieu of the procedure specified in the preceding sections of title 19 of this article.

2. It is the intent of these federal aid sections to facilitate the carrying out of such projects by permitting changes in the normal sequence of doing the various acts specified in the preceding sections, but, except as specifically authorized, not to permit changes in the manner of doing each act or in the conditions on which such act is based.

§ 15-1963. Formation of district with federal aid.

1. The department may proceed of its own motion to form such district and to authorize the proposed work as though petitions therefor had been filed as provided in sections 15-1911 and 15-1913 or 15-1931. It may negotiate with the federal government, investigate the proposed district, study such plans of and reports on the proposed improvement as it may find to be available and shall prepare a written report thereon describing the proposed district, the proposed work, the fixation of the district boundaries, giving estimates of the cost of the various parts of the work which may be a charge against the state or the property owners in the district and including a determination of enhancements and an apportionment of costs of such a project. Such report shall be filed and notice of such filing and of a hearing thereon given as provided in sections 15-0903, 15-1913 and 15-1931.

2. After the final hearing the department shall determine whether it is to the public interest to form the district and to proceed with the work and, in general terms, what lands will be benefited thereby. These matters shall be embodied in a written order, which shall, if the action is favorable, form the district, authorize entry into agreements with agencies of the federal government and the doing of whatever is needful to carry out the project, all as elsewhere specified in title 19 of this article. Certified copies of the determination and order shall be filed and notice of such filing given. Thereupon such determination may be reviewed as provided by section 15-0905, except that the proceedings for such review must be initiated not later than ten days after such filings; otherwise such determination shall be considered final and conclusive and in due course it shall be recorded. The district shall be held to have been formed on the date of such final order, but such formation shall not be effective until such order shall have been recorded.

§ 15-1965. Construction project.

As soon as the formation of the district becomes effective, the department shall have full power to enter into agreements with the proper officials of the federal government or of other agencies of the state, to acquire or appropriate lands and rights in lands, including sites for camps and appurtenant facilities, access roads, borrow pits, quarries, spoil banks and all other necessary and proper matters, to incur contractual obligations, to purchase supplies and materials, to employ the necessary personnel and generally to do whatever is necessary to carry out the proposed project or projects.

§ 15-1967. Changes in project.

After such district is formed and the original federal project authorized, major changes in such project, additional federal projects or changes in district boundaries necessitated by such federal projects may be authorized or made by following the pertinent portions of the

procedure in sections 15-1963 and 15-1965.

§ 15-1969. Continuation of district.

Except for such projects as may be carried out by the federal government, any district formed under the provisions of section 15-1963 shall thereafter continue as a drainage improvement district, as though formed under the provisions of section 15-1915.

§ 15-1971. Transfer of property and discontinuance of district.

Whenever a drainage improvement district created pursuant to this article and lying wholly within a county small watershed protection district established pursuant to article 5-D of the County Law has no outstanding debts, liabilities and obligations, the department as the governing body of such drainage improvement district, if it determines after public hearing that the public interest would be served thereby, is hereby authorized to convey, upon such terms and conditions and for such consideration as it may deem adequate, if any, all or any part of the real estate or an easement or easements therein, or other property of such drainage improvement district to such county small watershed protection district. Whenever all of the real property and other property is conveyed as authorized herein, such drainage improvement district and the drainage improvement association within such district shall immediately cease to exist, and any and all functions, powers and duties previously possessed, performed and exercised by either of them shall be terminated.

§ 15-1973. Drainage section association; definitions.

The following words and phrases, unless otherwise specified, are defined as follows:

1. A "drainage section" shall mean an area, of drainable acreage, as

described in articles of association which have been filed and recorded as authorized by section 15-1975.

2. "Drainable acreage" shall mean that part of an owner's swamp, bog, pond, meadow or other low or wet agricultural lands, which will be drained by a drainage system as authorized by this title 19 to increase its productivity or otherwise render it more available for agricultural purposes, or in order to benefit the public health, safety and welfare.

3. "Aggregate drainable acreage" shall mean the total drainable acreage owned by all owners who execute articles of association authorized by this title 19.

4. "Owner" shall mean a person other than a municipal or public corporation, who or which is the owner in fee of drainable acreage and who or which executes the articles of association.

§ 15-1975. Drainage section association; creation.

Three or more owners of drainable acreage may form a drainage section association by executing and recording articles of association as hereinafter provided.

§ 15-1977. Articles of association; recording and filing.

1. The articles of association shall be signed by all owners as listed therein and shall be acknowledged in the form now or hereafter required for the recording of a deed of real property. If there be more than one owner of a separate parcel of drainable acreage, the articles of association shall be signed and acknowledged by each owner thereof. The articles of association shall set forth:

a. The name and address of each owner.

b. The name of the proposed association, such as

the.....Drainage Section Association.

c. The designation of two of the owners to act as temporary president and temporary secretary until the first annual meeting of the association.

d. The location and amount of drainable acreage as determined and owned by each owner and a brief description of the parcel or parcels if there be more than one, of drainable acreage owned by each.

e. The facts showing the necessity for the proposed drainage.

f. A description of the proposed drainage works which as far as practicable may include bearings and distances locating the proposed alignment of drains, profiles, proposed new drains and a typical section.

g. The names and addresses, so far as can be ascertained, of persons who are not parties to the articles of association regarding whose lands it will be necessary to obtain a right, pursuant to section 15-1983, to construct, maintain and keep in repair drainage works in order to effectuate the drainage proposed by the articles of association.

h. A map, attached to the articles of association, which generally shall show the drainable acreage of each owner and the lands of others on which it will be necessary to construct, maintain and keep in repair such drainage works referred to in paragraph g of this subdivision. The map shall show generally also the type and location of the proposed drainage works.

i. A mutual agreement by the owners to proceed with the project, to construct it, to maintain it and keep it clean and in repair; to pay all costs and expenses, including legal, engineering, filing and recording fees, all debts of the association and any damages which may be assessed for the acquisition of a right or easement to construct or maintain drainage works upon the lands of a person not a party to the articles of association. Such costs, expenses, fees, debts and damages shall be

assessed against each owner in the proportion the drainable acreage owned by him bears to the aggregate drained acreage, or in some other proportion mutually agreed upon and specified in the articles of association. The agreement shall further provide that if any such apportionment is not paid within the time prescribed by the by-laws, the association may institute an action in its own name to recover the same.

j. The articles of association shall provide that they, and the agreement set forth therein, shall be binding upon the heirs, devisees, assignees and grantees of each owner and shall constitute covenants running with the land of each.

2. The articles of association shall be filed and recorded in the office of the county clerk of the county or counties in which the drainage section is located, with a notice appended thereto to the county clerk or clerks to enter the same in the index of grantors of real property under the names of all signers of the articles of association and the name of the association. The names of all such signers shall be alphabetically and legibly listed in such notice. A certified copy of the articles of association, as so filed and recorded, forthwith shall be filed in the office of the department.

§ 15-1979. First annual meeting; members; officers; by-laws.

1. Upon filing and recording, the articles of association shall be deemed to be in effect and the drainage section association created thereby shall have the power and authority and shall assume the liabilities conferred and imposed by title 19 of this article. The temporary secretary shall notify all members by mail of the time, not more than ten days after such filing and recording, and of the place of the first annual meeting of the association, at which time permanent officers shall be elected for the coming year.

2. The original membership of the association shall consist of the signers of the articles of association. Membership shall cease when a member dies or when he divests himself of the entire drainable acreage

owned by him. Grantees, devisees and heirs of the fee of a member's entire drainable acreage shall be members and entitled to all the rights of membership, and they shall be bound by the articles of association. Grantees, devisees and heirs of the fee of a part of a member's drainable acreage shall be members, shall be entitled to all the rights of membership, shall be bound by the articles of association and shall be liable in the proportion that such granted, devised or inherited part bears to the total of the drainable acreage of the member from whom they have taken title.

3. The officers of the association shall be members thereof and shall consist of a president, vice-president, and secretary-treasurer. If an officer's membership in the association shall terminate, the association shall call a special meeting to elect his successor for the remainder of the term for which he was elected. The term of office of all officers shall be one year.

4. The association shall adopt at the first annual meeting by-laws, not inconsistent with law or with the articles of association. The by-laws shall fix the time and place of future annual meetings and regular meetings of the association and shall provide for the calling and holding of special meetings; shall provide the number of members, not less than one-third, to constitute a quorum at its meetings; shall provide the method of conduct of elections of its officers at annual meetings; shall provide the form of notice, in writing, to be given to all members of the amount of assessment due to pay the debts of the association, and to pay all costs, expenses, fees and damages as provided in the articles of association; and may provide for the imposition and collection of annual dues and for any other matter necessary to carry out the conduct of the affairs of the association.

§ 15-1981. Powers of association; limitations; voluntary dissolution.

1. The association shall have:

a. Power to construct, maintain and keep in repair the drainage

project described in the articles of association;

b. Power to sue and be sued and to enter into contracts to carry out its purposes;

c. Power to make application, pursuant to section 15-1983, to acquire the right to construct, maintain and keep in repair, on the lands of others, that part of the drainage project as so described in the articles of association; and

d. No power to issue bonds or other evidences of indebtedness.

2. All actions of the association shall be taken by a majority vote, except as hereinafter provided, of those members present at a duly called meeting at which a quorum is present. Each member shall have but one vote regardless of the number of parcels of drainable acreage owned by him and included within the drainage section. If there be more than one owner of a parcel or parcels of drainable acreage, such owners shall be entitled collectively to but one vote.

3. No drainage section association shall be formed in an area within a presently existing drainage improvement district. The formation of such an association shall not prevent the inclusion of the aggregate drained acreage within a drainage improvement district hereafter created, in which event the association shall be deemed to be dissolved, except for the purpose of meeting and paying its existing liabilities for debts, costs, expenses and fees.

4. A voluntary petition to dissolve the association may be made to the Supreme Court upon petition of the president of the association when authorized to do so by the affirmative votes of three-fourths of the members present at a special meeting called for that sole purpose and at which a quorum is present. Ten days' notice, in writing of the time and place of the presentation of such a petition shall be given to all members and to non-members, if any, upon whose lands drainage works shall have been constructed in accordance with the articles of association. Public notice of the presentation of the petition shall

also be given by a notice stating the time and place of such presentation, published once in two consecutive weeks prior to such time in a paper published in the county in which the articles of association have been recorded. The court, after hearing all interested persons, may grant an order dissolving the association, upon such terms and conditions as in its discretion are merited. The court shall not grant such order in the absence of proof that the association has no outstanding indebtedness. An order dissolving the association shall be recorded in the office of the county clerk in which the articles of association have been recorded and shall direct the county clerk to index it under the name of the association in the index of grantors of real property.

§ 15-1983. Drainage of agricultural lands; procedure.

1. Any person or persons owning any swamp, bog, pond, meadow or other low or wet agricultural lands within this state, or a drainage section association organized pursuant to sections 15-1973 to 15-1981, who or which shall desire to drain the same in order to increase their productivity or otherwise render them more available for agricultural purposes and who shall deem it necessary, in order thereto, that a drain or drains, ditch or ditches, dike or dikes, seepage basin or basins for the free passage or disposal of water should be constructed, reconstructed, enlarged, cleaned or maintained on lands belonging to others, may acquire an easement or right to effect such purpose pursuant to the provisions of the eminent domain procedure law, or in lieu thereof, may present a petition duly verified to the department setting forth the following facts:

- a. The name and residence of the petitioner or petitioners.
- b. A map or description showing the approximate location and area of the property which is to be drained.
- c. A map or description which will show the location of such drain, ditches, dikes and basins and the area of the lands and properties to be

occupied thereby.

d. The names and places of residence of the owners of the property to be so occupied; if an infant, the name and place of residence of the person with whom he resides; if a person adjudged incompetent by reason of mental illness or other cause, the name and place of residence of his committee or trustee, if he has one, otherwise, the name and place of residence of the person with whom he resides; if a conservatee, the name and place of residence of his conservator, if he has one, otherwise the name and place of residence of the person with whom he resides; if a non-resident, having an agent or attorney residing in the state, authorized to contract for the sale of the property, the name and place of residence of such agent or attorney. If the name or place of residence of any owner cannot after diligent inquiry be ascertained, it may be so stated with a specific statement of the extent of the inquiry which has been made.

e. A statement that the petitioner has been unable to agree with the owner or owners of the property for the damages to be paid for such occupation.

f. A statement that it is the intention of the petitioner, in good faith, to complete such drains, ditches, dikes and basins, for which purpose the property is so occupied.

g. A request that the department determine the necessity for such drainage and for occupying such lands and property and ascertain the compensation to be made to the owner or owners and that the petitioner be permitted, upon making such compensation, to construct, reconstruct, enlarge or clean such watercourses or drains, ditches, dikes and basins, and maintain the same across the lands specified.

2. In addition, the petition shall be accompanied by an undertaking, satisfactory to the department as to amount and sureties, that applicants will pay the expenses of the proceedings and determination as hereinafter provided.

3. A person who seeks to acquire an easement or right, to effect the purpose set forth in subdivision above, pursuant to the provisions of the eminent domain procedure law, and who is unable to provide a specific description of the property to be acquired and its location by metes and bounds, with reasonable certainty, may prior to the presentation of a petition to a special term of the Supreme Court, apply for an order permitting such person to enter upon the property sought to be acquired, for the purpose of viewing, surveying, measuring and otherwise examining such property, in order to describe such property in the petition. Application for such an order shall be made to a special term of the Supreme Court, held in the judicial district in which the property is located. The court shall if the facts so warrant, grant the application upon such terms and conditions as it may deem advisable. The court may also require the applicant to post bond to indemnify the owner of the property for any damage caused in the making of the survey.

4. Upon receipt of such petition, the department shall take such steps as it shall deem proper to ascertain if the relief sought can be accomplished in the manner described in such petition and other facts pertinent to the case and to this end may make such surveys or other investigations as may be in its judgment necessary in the premises.

5. Notice of a hearing shall be given as follows:

a. The department shall appoint a time and place when and where it will hold a hearing for the purpose of determining the necessity for such drainage and for occupying such lands and properties and assess the damages and benefits resulting therefrom. The department shall deliver to the petitioner copies of the petition, to which shall be attached a notice of the time and place appointed for a hearing, addressed to the owner of each parcel to be occupied.

b. The petitioner upon receipt of such copies and notice shall, on the same day, or the next day thereafter, excluding Sundays and holidays, cause such copy and notice to be served upon the persons to whom it is addressed. A copy of such notice and petition shall be served on the owner of each parcel or to any one of several owners of a parcel in case

there be more than one. In case the owner is an infant such copy and notice shall be served upon his general guardian, if he has one; if not, on the person with whom he resides. If a person adjudged incompetent by reason of age, drunkenness, mental illness or other cause, service shall be made upon his committee or trustee, if he has one; if not, on the person with whom he resides. If a non-resident, having an agent or attorney residing in this state, authorized to contract for the sale of the real property described in the petition, service upon such agent or attorney will be sufficient service upon the owner.

c. Depositing a copy and notice in the post office properly inclosed in an envelope addressed to the owner, guardian, committee, trustee, agent or attorney, respectively, at his post office address, and paying the postage thereon shall be deemed proper service. Notice of such hearing may be given by publishing the same once a week for two successive weeks, immediately prior thereto in two newspapers in the county or counties in which the lands and properties affected are located, provided personal service cannot be made. Such service shall be made at least fifteen days prior to the date of the hearing.

6. Assessment of damages shall be as follows:

a. The department shall view the premises affected and at the time and place appointed shall hear all parties interested and such witnesses as they may produce. Such hearing may be adjourned at the discretion of the department.

b. At the close of such hearing, if the department shall determine that the occupying of the lands and properties specified is necessary for the drainage of the lands of the petitioner, it shall assess the damages to the person or persons owning the same and fix the compensation to be made therefor. In fixing the amount of compensation for lands or property to be taken, the department shall make such allowance or deduction on account of any benefits which the owners may derive from the proposed work as the department shall determine to be just and equitable in the premises.

c. A copy of such determination, duly certified by the department, shall be filed by the department in the clerk's office of the county or counties in which such lands and properties are located. A copy of such determination shall be served by the department by mail on each petitioner and on each owner of each parcel or on any one of several owners of a parcel in case there be more than one, together with a notice of the date and place of filing such certified copy in the county clerk's office.

7. Review shall be as follows:

a. If the petitioner or petitioners feel aggrieved by the decision of the department, he or they may review the same as provided in section 15-0905. Unless such proceeding for review shall have been instituted within sixty days after filing of the decision in the county clerk's office, the decision of the department shall be deemed final. If the final decision shall be adverse to the applicant, no other application to the department for the construction of the same works shall be made within one year.

b. If the owner or owners of the property to be occupied feel aggrieved by the decision of the department only to the extent that it determines the necessity for the occupation of the lands and properties of such owner or owners, he or they may review the same as provided for in section 15-0905. Unless such proceeding for review shall have been instituted within sixty days after the filing of the decision in the county clerk's office, the decision of the department shall be deemed final. If such owner or owners feel aggrieved by the assessment of damages made by the decision of the department he or they may apply, pursuant to the applicable provisions of the eminent domain procedure law to ascertain the compensation to be made to the owner or owners for the property to be taken. Upon the granting of such an order the proceeding shall continue for the ascertainment of compensation as provided by the eminent domain procedure law as if acquisition proceedings had been instituted by the petitioners in the first instance. Such an application shall save to such owner or owners the right to review the determination of necessity for the drainage works

made by the department on any appeal taken to the Appellate Division by petitioners or owners pursuant to the provisions of the eminent domain procedure law.

8. If after the expiration of sixty days proceedings have not been instituted to review the decision of the department as provided in subdivision 7 above, the petitioner or petitioners shall pay the damages assessed by the department and may thereafter enter upon such lands or properties for the purpose of constructing, reconstructing, enlarging, cleaning or maintaining such drains, ditches, dikes and basins. Deposit of the money to the credit of the owner or owners, pursuant to the direction of the department, shall be deemed a payment within the provisions of this section.

TITLE 21

RIVER REGULATION BY STORAGE RESERVOIRS

Section 15-2101. Definitions and construction.

15-2103. Creation of river regulating districts.

15-2105. Organization of the boards of river regulating districts.

15-2107. General duties.

15-2109. General powers.

15-2111. Acquisition of real estate.

15-2113. Discontinuance or relocation, or both, of highways, roads and streets.

15-2115. Taxation of real estate.

15-2117. Cemeteries.

15-2119. Procedure for construction of reservoirs.

15-2121. Apportionment of cost.

15-2123. Assessments; how levied and collected.

15-2125. Operation and maintenance charges.

15-2127. Error in names.

15-2129. Financing.

15-2131. Reports.

15-2133. Operation of reservoirs.

15-2135. Hearings; hearing officers; determinations.

15-2137. Hudson River-Black River Regulating District; old boards abolished; new board created.

15-2139. Hudson River Regulating District and Black River Regulating District: transfer of functions; pending actions and proceedings; interpretation of documents; existing rights and remedies.

15-2141. Hudson River Regulating District and Black River Regulating District: funds of the board.

§ 15-2101. Definitions and construction.

The following words and phrases when used in title 21 are defined as follows:

1. "Real estate," when used without words of limitation, includes all uplands, lands under water, the waters of any lake, pond or stream, all water and riparian rights or privileges, all water powers, water plants, and all dams, races, sluiceways and machinery connected therewith, and any and all easements and incorporeal hereditaments, and every estate, interest and right, legal or equitable, in land or water, including terms for years, and liens, legal or equitable, on real estate, as above defined, in way of judgment, mortgage or otherwise, and all real estate as above defined acquired or used for railroad, highway, or other public purposes.

2. "Regulating reservoir" means a basin for impounding water, formed or enlarged by a dam, constructed or maintained for the purpose of regulating the flow of a stream or river and shall be construed to include the dams and dikes or other structures by means of which the water is or is to be impounded, the gate houses, including controlling gates, sluices, screens, racks and other accessories thereto; spillways, fishways, log or ice chutes, or barriers and all accessories thereto; all bridges or roadways over or appurtenant to the dams and dikes; all other structures, devices, or appliances connected with or appurtenant to any of the structures hereinbefore enumerated, in such manner that they cannot be removed without injury to such structures or without

impairing the usefulness thereof for the purposes for which they are intended; the lands under the water impounded, or to be impounded, by the dam or dams, and such lands surrounding or adjacent to the dam, or the water impounded or to be impounded thereby, and such other real estate and appliances, including roadways and telephone lines, as shall be necessary for the purposes of the construction, maintenance, or operation of a regulating reservoir, as above defined, also including such land surrounding such reservoir as may be necessary to preserve and protect such reservoir from unsanitary conditions, and from any encroachment affecting its use for the purpose of regulating the flow of the stream or river for the regulation of which it may be constructed. Such term is not intended to include a reservoir created by a dam constructed or maintained for power purposes, but is intended to include a reservoir at or by reason of which there may be, as an incident to the construction, maintenance and operation of such regulating reservoir, the possibility of the utilization of a portion of the water stored thereby for power purposes, without in any way interfering with the primary purpose of a reservoir constructed under the provisions of title 21 of this article.

3. "Benefit or benefits" shall be interpreted to include benefits to real estate, public or private, to municipal water supply, to navigation, to agriculture and to industrial and general welfare by reason of the maintenance and operation of a regulating reservoir, whether such benefit shall inure to a person, a public corporation or the state. In the event that any regulating reservoir operates to relieve the state of any obligation by reason of diversion of the water of any river for canal purposes, the state, to the extent that the maintenance and operation of such reservoir may accomplish such relief, shall be deemed to have received benefit therefrom.

4. "Board" shall mean the river regulating board of a district.

5. "Preliminary expenses" shall be construed to mean expenditures made or incurred by the state on account of the services or expenses of its officers or employees in making studies, investigations, surveys, plans, specifications and estimates; in negotiating, drafting, and letting

contracts; in supervising and directing the construction of works and structures, as authorized or required by title 21 of this article; and the expenses of procuring searches, or abstracts of title of real estate for the purpose of carrying out the provisions of title 21 of this article.

6. "Regulation" means only such regulation as can be had through the construction, maintenance and operation of regulating reservoirs, excepting as otherwise expressly provided in title 21 of this article.

7. "Average flow" means that result in terms of cubic feet of water per second derived by the division of the total number of cubic feet of water flowed by any stream or river, at the location thereon where the measurement is taken, in one year, or for an average of years, by the number of seconds in a year.

8. "Average normal flow" means that result in terms of cubic feet of water per second derived by the division of the total number of cubic feet of water flowed by any stream or river, at the location thereon where the measurement thereof is taken, on those days in a year during which such flow did not exceed the average flow, by the number of seconds in the total number of such days.

9. "Cost of construction" shall be construed to include in addition to the cost of a regulating reservoir, all preliminary expenses, all expenses of organization of the district, engineering fees, costs of surveys, plans, advertising, salaries, compensation and expenses of the board, together with all legal and other expenses, incidental to the construction of such reservoirs up to time of the completion thereof.

10. "Cost of maintenance and operation" shall be construed to include all such expenses for repairs and upkeep of the regulating reservoir, all such expenses necessary to the proper operation of such reservoir for the purposes for which it was constructed and all such part of the compensation and expenses of the board, its officers and employees after the completion of such regulating reservoir as are in the judgment of the board and the department properly chargeable thereto.

11. "High flow line" means the line which will be made around a reservoir by the water therein when it is at the level of the crest of the reservoir spillway.

12. "Low flow line" means the line made by the water of a reservoir when it is at the lowest level which, consistent with the regulation of the flow of the river and the maintenance of sanitary conditions, the board with the approval of the department shall fix and determine.

13. "Unsanitary condition or conditions" means such condition or conditions as are a menace to the public health.

14. The general provisions and definitions appearing in section 15-1903 shall, where appropriate, be applicable to the functions and duties of the department or board, as the case may be, under title 21.

§ 15-2103. Creation of river regulating districts.

1. Bodies corporate, which shall consist of and be known as river regulating districts, may be created pursuant to title 21 of this article to construct, maintain and operate reservoirs within such districts, subject to the provisions of this article for the purpose of regulating the flow of streams, when required by the public welfare, including public health and safety. Such river regulating districts are declared to be public corporations and shall have perpetual existence and the power to acquire, and hold such real estate and other property as may be necessary, to sue and be sued, to incur contract liabilities, to exercise the right of eminent domain and of assessment and taxation and to do all acts and exercise all powers authorized by and subject to the provisions of this article. Such powers shall be exercised by and in the name of the board of the district.

1-a. Notwithstanding any other provision of law, for purposes of applying for and/or receiving any federal moneys or deriving any type of benefit or advantage pursuant to federal law, rule or regulation river

regulating districts are hereby deemed to be municipal corporations within the meaning of subdivision two of section sixty-six of the general construction law.

2. Petitions may be filed as follows:

a. Any person or public corporation may present to the department a petition for the organization of a river regulating district pursuant to the provisions of title 21 of this article. Any such petitioner shall be a resident or owner of real estate within the proposed district, or if a public corporation, one whose boundaries lie wholly or partly within such district.

b. The petition shall set forth:

(1) The proposed name of the district, as the River Regulating District.

(2) The necessity for the organization of such district, the purposes to be accomplished thereby and the benefits to inure from the exercise of its powers.

(3) A general description of the territory included in the proposed district. Such description need not be given by metes and bounds, or by political subdivisions, but it shall be sufficient to state that the territory to be included in the proposed district constitutes the watershed of the particular river in reference to which the petition is filed stating generally the extent of such watershed. In the event that the district sought to be organized does not include the whole watershed of the particular river, but only the watershed of a tributary of the river, then, the petition should generally set forth the extent of such watershed, the reason why the watershed of the tributary should be organized as a separate river regulating district, and the relation of the regulation of the flow of such tributary to and effect upon the flow of the river to which it is tributary.

(4) The extent of the regulation possible through the construction and operation of reservoirs.

(5) Whether state or private lands, or both, will be required, and in general the extent thereof, and all such facts as would show or tend to show the public necessity for the regulation of the flow of the river.

3. Hearings shall be held as follows:

a. Immediately upon the receipt of such petition, the department shall cause notice by publication pursuant to subdivision one of section 15-1903 to be given of the pendency of the petition, and of the time and place of a hearing thereon, and may appoint times and places for further hearings if deemed by it to be desirable.

b. Hearings shall be conducted in accordance with the procedure set forth in section 15-1903 of this article. If after such a hearing or hearings, it should appear that the purposes of title 21 of this article would be best served by the creation of the river regulating district sought in the petition, the department shall thereupon so decide and declare. It shall then prepare and file a map of such district with a certificate of its determination creating such district and showing the name, extent and purpose of the district, with the Secretary of State and the county clerk of each county wholly or partly within the district, and notice of such decision shall be given in the manner set forth in section 15-0903.

4. Review is available according to the following provisions:

a. The decision of the department may be reviewed in accordance with the provisions of section 15-0905. Upon failure so to review within the time prescribed or if the action of the department is sustained or modified on such review, the district shall thereupon become a river regulating district of the State of New York and a public corporation with all the rights and powers granted by title 21 of this article. No such review shall be had excepting at the instance of the Attorney General of the state unless prior to the application for the review the party making application shall file a bond or undertaking in a sum to be fixed by the Supreme Court or a justice thereof with good and sufficient sureties to be approved by the court or a justice thereof agreeing to pay all costs and expenses caused by such review as determined by the court in the proceeding in the event of failure to set aside or modify the determination and order of the department creating such district.

b. After such a river regulating district shall have been created as a public corporation hereunder, the certificate creating the same shall be final and binding upon all the public corporations and real estate within the district, and shall finally and conclusively establish the regular creation and organization of such district.

c. The organization of the district shall not be directly or collaterally questioned in any suit, action or proceeding except as herein expressly provided.

5. Copies of the certificate certified by the department shall be recorded in the office of the Secretary of the State and in the office of the county clerk of each county partly or wholly within the district and in the event of a review any order or judgment of the court thereupon shall be likewise recorded. The county clerks and the Secretary of the State shall receive for filing and recording such copies and all papers to be filed and recorded by them under the provisions of title 21 of this article. They shall also receive such fees as are, or hereafter may be, provided by law for like services in similar cases and all above mentioned fees shall be a part of the preliminary expenses.

§ 15-2105. Organization of the boards of river regulating districts.

1. Within thirty days after the incorporation of a river regulating district as hereinbefore provided, the Governor shall appoint three persons, two at least of whom shall be resident freeholders within the district, as a board to be known as the Board of River Regulating District; one for a term of three years, one for a term of four years, and one for a term of five years. At the expiration of their respective terms of office, appointments shall be made for terms of five years. The Governor shall fill any vacancy on the board within thirty days after it occurs.

2. The members of the board including the chairperson shall not

receive a salary or other compensation but shall receive all necessary expenses incurred in the performance of their duties. Expenses for any member shall be approved by the board before being paid.

3. Each member of such board, before entering upon his duties, shall take and subscribe the constitutional oath of office, which oath shall be filed in the office of the Secretary of State. Upon taking the oath, the board shall choose one of its number president, and shall select some suitable person or persons to act as secretary and treasurer, who may or may not be a member of the board. It shall adopt a seal and shall keep in well bound books a record of all its meetings and proceedings, certificates, contracts, surety bonds, and corporate acts, which shall be open to the inspection of the department, the members thereof and all owners of real estate in the district and all other interested parties.

4. A majority of such board shall constitute a quorum, and a concurrence of a majority in any matter shall be sufficient, for its determination, except as otherwise provided by the Local Finance Law.

5. The secretary shall keep and be the custodian of the records of the board, and of its corporate seal, and shall assist the board in such particulars as it may direct in the performance of its duties. He shall attest under the corporate seal of the district all certified copies of the office records and files of the district that may be required of him by the provisions of title 21 of this article or by any person ordering the same and paying the reasonable cost of transcription. Any portion of the records so certified and attested shall prima facie import verity. The secretary shall also serve as treasurer of the district unless a separate treasurer is selected by the board.

6. The board may employ such attorneys, engineers, agents, assistants and employees as may be needful, and fix their compensation, including the compensation of its secretary and treasurer.

7. The Governor may remove a member of such board for inefficiency, neglect of duty or misconduct in office, giving to him a copy of the charges against him and an opportunity of being publicly heard in person

or by counsel in his own defense upon not less than ten day's notice. If such member shall be removed the Governor shall file in the office of the Secretary of State a complete statement of all charges made against such member and his findings thereon, together with a complete record of the proceedings.

§ 15-2107. General duties.

1. Upon its organization the board may prepare a plan for the regulation of the flow of the river or rivers in its district. Such plan shall show the available and feasible reservoir sites on such river or rivers, whether any reservoir now existing can be and should be enlarged and to what extent, the approximate number of acres of land flowed or to be flowed by each reservoir, whether any of such land is owned by the state and if any, how many acres, the number of acres of private land required, together with the estimated value of the land, and how many acres, if any, of such land are lands of the state within the forest preserve. Such acreage shall include such quantity of land surrounding the reservoir to be created or enlarged as would in the judgment of the board be required for the protection, maintenance and operation of such reservoir. The plan shall be accompanied by such maps, profiles and other data and descriptions as may be necessary to set forth properly the location and character of the work and of the property to be taken or damaged, and by estimates of cost of each such reservoir. In case maps, plans and specifications for any such reservoir at or near the site thereof, are on file in the office of the department, and in case any records in any other department of the state government would be an aid in the preparation of such plans, these shall be available to the board for such purpose.

2. Upon the completion of such plan if the board approves of such plan it shall certify it to the department for its approval, and the department within forty days thereafter may approve the same, or modify it and approve it as so modified. As so approved by the department it shall be known as the "official plan" for the regulation of the flow of the river or rivers of the district. Copies thereof shall be filed in

the offices of the board, the department, and of the county clerk of each county wholly or partly within the district. Such plan in like manner may be altered from time to time provided such alteration shall not affect any assessment already made.

§ 15-2109. General powers.

1. The board shall have power to make all necessary rules and regulations which shall be effective when approved by the department.

2. The board and its authorized agents may enter upon any lands as in its judgment may be necessary for the purpose of making surveys and examinations to accomplish any purpose authorized by title 21 of this article, being liable only for actual damage done.

3. The board on behalf of such district shall have and may exercise all of the powers enumerated in subdivision 1 of section 15-2103 and in addition thereto all such other powers as are necessary and proper to carry into execution the powers expressly granted to it, including power to make such channel improvements as may be necessary to prevent damage to downstream properties by the waters released from reservoirs. The board shall have charge of the operation of all reservoirs now in existence, or hereafter constructed for the regulation of the flow of the river and its tributaries of the district which it represents, not including, however, any reservoirs which are or may be maintained primarily to provide water for the canal system of the state. No reservoirs for the regulation of the flow of streams or for any other purpose except for municipal water supply shall be hereafter constructed in Hamilton or Herkimer counties on the south branch of the Moose River by any river regulating board.

4. The board shall have the right to establish and maintain stream gauges and rain gauges, and may make such surveys and examinations of rainfall, stream flow and flood conditions, and of other scientific and engineering subjects as may be necessary and proper for the purposes of the district and shall preserve a record thereof.

5. The board, on behalf of such district, subject to the limitations of title 21 of this article, shall have a dominant right of eminent domain over the right of eminent domain of public corporations, except cities. In exercise of this right, due care shall be taken to do no unnecessary damage to other public utilities, and in case of failure to agree upon the mode and terms of interference, not to interfere with their operation and usefulness beyond the actual necessities of the case, due regard being paid to the other public interests involved.

6. The board on behalf of such district shall have power to consent to the transfer of jurisdiction over lands under its jurisdiction to any state department or a bureau, division or agency thereof, or to any state agency, upon such terms and conditions and under such regulations and restrictions as said board shall deem just and proper, providing, however, that the use of such lands will not interfere with the purposes for which they were acquired.

7. The board of the Hudson river-Black river regulating district shall have the power to contract to sell water, upon such terms and conditions as it deems advisable to any or all of the counties of Albany, Columbia, Essex, Fulton, Green, Hamilton, Rensselaer, Saratoga, Schenectady, Warren or Washington, which counties are contained within such district.

§ 15-2111. Acquisition of real estate.

1. The board on behalf of such district shall, subject to the limitations herein contained, have the right to condemn for the use of the district any real estate which is determined to be necessary for the purpose of carrying out any of the provisions of title 21 of this article. It may acquire title to such real estate by agreement with the owner thereof and upon payment therefor of the amount of compensation to be paid such owner.

2. Lands of the state outside of the forest preserve, not used by canals of the state, may be used for the purposes of title 21 of this

article. Not exceeding three per centum of the lands of the state, not owned or hereafter acquired, constituting the forest preserve as now fixed by law, may be used for the construction and maintenance of reservoirs for the purpose of title 21 of this article.

3. If any real estate belonging to any county, city, town, village or school district is required for the purposes of title 21 of this article, the county legislative body for such county, the mayor and common council or governing body for such city, the town board for such town, the village board for such village, the trustees or board of education of any school district for such district, or any persons, body or bodies, having a like power, acting for such public corporation may grant or surrender such real estate for such compensation as may be agreed upon by such official representatives and the board. The compensation agreed upon as thus provided shall be paid to the fiscal officer of the public corporation or the person or persons from whom such real estate is acquired.

4. Title to any such real estate owned by any infant or incompetent person may be acquired on behalf of the board in the same manner as provided by law with respect to the sale, mortgage or lease of real property of such infant or incompetent person upon such terms as the Supreme Court or the County Court of the county in which such real estate is situated may provide, and for such purpose jurisdiction is hereby conferred upon such courts.

5. If the board cannot agree with the owners upon the compensation and damages to be paid for the real estate so taken, it shall thereupon serve upon such owners a notice as hereinafter provided that the real estate described therein has been acquired by the board for the purposes of title 21 of this article, and shall proceed to acquire title thereto under the provisions of the eminent domain procedure law.

6. If any real property, owned by a corporation having by law the power to exercise the right of eminent domain, is taken under the eminent domain procedure law, the board shall have no right to enter upon and take possession of any such real estate until the owner thereof

shall have been paid or tendered the amount due under the final order and judgment in such proceedings with interest.

7. If any such payments are made directly by the board, the amount so paid shall be refunded to the board out of the general funds of the district as provided in subdivision 7 of section 15-2119.

8. Title to all real estate acquired pursuant to the provisions of title 21 of this article except where this expressly provides otherwise, shall be taken in the name of the State of New York, and when so taken shall be deemed to be taken for a public use.

9. All real estate acquired or taken pursuant to the provisions of title 21 of this article is hereby dedicated to the use and purposes for which it is so taken, and the right, title and interest acquired by the state therein is so acquired subject to such use and purposes.

§ 15-2113. Discontinuance or relocation, or both, of highways, roads and streets.

1. If the board shall deem it necessary to discontinue a public highway, road or street, or a part thereof, because of its interference with the proper location of a reservoir for which preliminary plans shall have been adopted as provided in title 21 of this article, it may discontinue it; and if the board shall determine that the public interest so requires, it may relocate such highway, road or street, or the part discontinued, along a course wholly or partly within or without the high flow line of such reservoir, and acquire, with funds of the board applicable to the expense of such reservoir, in the manner provided in title 21 of this article for the acquisition of real estate, the necessary rights of way or easements for such relocated part, or in lieu of such a relocation may establish new highways to connect with then existing highways, roads or streets, to afford a substantial equivalent, for purposes of highway traffic, of such a relocation. The determination of the board to relocate or establish any such highway, road or street, shall be by resolution, setting forth a description of

the course of such highway, road or street, a certified copy of which shall be filed in the office of the clerk of each town and village containing any part of the relocated or new highway, road or street. If the highway, or part thereof, so established or relocated shall be a state or county highway, the resolution shall not be effective until approved by the state Commissioner of Transportation and his written approval appended thereto. From the time of the filing of such copy or copies of the resolution, the relocated or connecting highway shall be deemed duly laid out.

2. After having acquired the necessary rights of way or easements therefor, the board, with its funds, shall construct such relocated or connecting highway, road or street, or part thereof. If the highway, or part thereof, which is discontinued, be a state or county highway, or part thereof, the construction of the relocated or connecting highway shall be in accordance with plans approved by the state Commissioner of Transportation. If the highway, or part thereof, which is discontinued, be a county road, or part thereof, the construction of the relocated or connecting highway shall be in accordance with plans approved by the county superintendent of highways. In the case of any other highway, road or street, the board shall construct the same so as to make it conform in kind and quality generally to the discontinued highways, roads and streets.

3. The control and maintenance of the relocated or connecting highway, street or road, after its completion, shall vest in the local authorities of the city, town or village, in which it or any part thereof is situated, and for such purpose it shall be deemed a highway, road or street of the city, town or village, except that if the highway or road which was discontinued, or the part thereof discontinued, was a state or county highway, or county road, the control and maintenance of the relocated or connecting highway or road shall vest in the state or county authorities having charge of the discontinued highway or road, and for such purpose it shall be deemed a state or county highway, or county road, as the case may be.

§ 15-2115. Taxation of real estate.

Lands owned by the state and acquired pursuant to the provisions of title 21 of this article, exclusive of the improvements erected thereon by the regulating districts, shall be assessed and taxed in the same manner as state lands subject to taxation pursuant to title 2 of article 5 of the Real Property Tax Law, provided, however, that the aggregate assessed valuations of such lands in any town shall not be reduced below the aggregate assessed valuations thereof with the improvements thereon at the time of their acquisition by the regulating districts, and provided further that in case of a general increase in assessments in any town the assessed valuations of the lands and improvements at the time of their acquisition by the regulating districts shall be deemed to have been increased proportionately with the increase of other real property in such tax district.

§ 15-2117. Cemeteries.

1. Whenever for the purposes of title 21 of this article it shall be necessary to use any portion of any lands or premises now occupied by graves, burial places, cemeteries, or other places of interment of human remains, the board may acquire the same in the same manner as other real estate may be acquired by it. Provided, however, that if lands or premises so occupied and sought to be acquired are not within a cemetery under the actual control and management of a then existing religious or cemetery corporation, and proceedings shall have been instituted by the board for their acquisition under the eminent domain procedure law, the court, if satisfied at any stage of the proceedings, that the public interests will be prejudiced by delay, may, by order, direct that the board may enter immediately on such lands and premises, and, after the provisions of subdivisions 4 through 8 of this section and sections 304 and 404 of the eminent domain procedure law have been complied with, may devote the same to the public use specified in the petition, upon deposit with the court of a sum to be fixed by the court; but no such order shall be made except upon notice of the application therefor served and posted as hereinafter provided.

2. Such notice shall be served as follows: If any of the owners or their places of residence are unknown, notice addressed, generally, to all owners of and persons interested in the lands used for graves, burial places, cemetery purposes or places of interment within a certain lot, tract or parcel of land, to be described with sufficient certainty to identify it, shall be published in the time and manner prescribed by subdivisions 4 through 8 with respect to the notice therein provided for. Owners, if any, whose names and places of residence are known and who reside within the state, shall be served with such notice personally or by leaving the notice at the abode of the owner to be served, with a person of suitable age and discretion residing therein. Owners, if any, whose names and places of residence are known and who reside without the state, shall be served with such notice by mail, the notice to be deposited in a post office in the state, addressed to the owner to be served, and inclosed in a securely sealed postpaid wrapper. The notice also shall be posted conspicuously in ten places in each town in which the lands are located, at least twenty days before the time of making the application. If the notice be published, the time for making the application shall be not less than eight days nor more than sixteen days after the last publication, and in any case personal service, if any, or service by leaving at the owner's abode, shall be made at least eight days, and service by mail, if any, at least thirty days, before the time of making the application. If, in the condemnation proceeding, an attorney has been appointed by the court to represent defendants served with the original notice otherwise than personally, under the eminent domain procedure law, the notice also shall be served on him, at least eight days before the time of making the application.

3. The notice shall specify the relief sought and the time and place of making the application. The papers or proofs submitted to the court on the application shall include due proofs of the service and posting of the notice and proof, by affidavit, that the persons, if any, served personally or by leaving at their abodes or by mail constitute all of the owners of and persons interested in the lands so occupied whose names and places of residence are known, or, if none were so served, that all of the owners are unknown, and if certain owners were known but

not their places of residence, and therefore were not served, personally or by mail, that fact and the names of such owners shall be stated. Such affidavit also shall set forth the extent of the inquiry to ascertain the names and places of residence of the owners. The provisions of the eminent domain procedure law, as to matter subsequent to the deposit of such moneys shall apply hereto, except that the general fund of the district shall be applicable to the payment of any deficiency judgment rendered pursuant to such section.

4. The board having so acquired title, or the right of immediate entry, shall cause to be published in two newspapers in the county where such burial place or places or graves are situated, which shall in its judgment be best calculated to notify the persons or parties interested or entitled to such notice, which notice shall describe the location of such burial place, cemetery or grave in such manner as to sufficiently identify the same. Such publication shall be made once in each week in each of the newspapers for the space of four weeks, and such notice shall also contain a statement to the effect that any person or persons legally entitled to direct as to the disposition of any such remains may remove the same to any other cemetery or burial place within sixty days after the last publication of such notice, if they so elect, but without expense to the board therefor. From and after the period of sixty days from the last date of publication, the board shall advertise in the state paper and a newspaper published in the county or counties in which the cemetery or cemeteries are situated for bids for the removal of such remains by contract, and their proper reinterment as hereinafter provided.

5. All removals and transportation of such human remains shall be done in accordance with the provisions of the Public Health Law and the local rules or ordinances of any town, city or village wherein such cemetery, burial ground or graves shall be located or wherein any of such remains may be reinterred. The board may acquire such other lands as it deems necessary within the county or in an adjoining county where such burial place or places or graves are now located for the purpose of properly reintering such removed remains, which lands shall be acquired in the same manner as provided by title 21 of this article for the acquisition

of other lands, title to be taken in the name of the particular river regulating district, but lands shall not be acquired within the corporate limits of a village or city except within the bounds of an existing cemetery unless by consent of the board of trustees of the village or common council of the city or other authorities within such village or city occupying similar positions as trustees or aldermen respectively.

6. The lands so acquired shall be suitable and properly fenced or inclosed, and in such manner as to permit of proper ingress and egress thereto before the final completion and payment for such work, and the expense therefor shall be included within the estimate and contract for such removal. All the bodies removed by such contractor, or by order of the board shall, when distinguishable, be incased each in a separate box or coffin, and each monument, headstone, footstone, slab, board or other designation or distinguishing mark shall be properly removed and reset at the grave of each body at the time of such reinterment. Members of the same family shall be interred in contiguous graves.

7. Whenever any person or persons legally entitled to direct as to the disposition of any remains now interred in such cemeteries, burying place or graves shall request the board, in writing, to reinter such remains in any other cemetery or burial plot, within the same county where such cemetery, burial place or graves sought to be removed are located or in an adjoining county, the board shall cause such remains to be interred where requested within the same county or in an adjoining county, and shall carefully and properly remove such remains to such burial plot and properly reinter the same, but no payment shall be made for a grave or graves or burial plot for such reinterment other than that acquired by the board as hereinbefore provided. Whenever any person or persons legally entitled to direct as to the disposition of any human remains exhumed or to be exhumed from any cemetery, burial place or graves as herein provided, desire to remove the same for reinterment to any burial plot or cemetery not within the same county from which such remains were exhumed or in an adjoining county as herein provided, such person or persons so entitled to designate such other burial place or plot shall be permitted to remove such exhumed remains from such county,

subject to the written consent of the board and the provisions of the Public Health Law, and the local rules or ordinances of any town, city or village wherein such cemetery, burial ground or graves shall be located, or wherein such human remains may be reinterred, but no portion of the expense of such transportation or burial in another county other than an adjoining county shall be borne by the board. The board shall pay all expenses connected with such removal, out of the general fund of the district in the same manner as other payments are made.

8. Whenever any lands acquired by the board for the purposes of reinterment of human remains as herein provided, and all the remains so interred have been exhumed from a cemetery, burial place or grave belonging to a corporation organized under the Religious Corporations Law, the Membership Corporations Law, the Not-For-Profit Corporation Law, or by special act, or belonging to a town or board of trustees elected pursuant to the provisions of the Town Law, or to a village or city, the board shall by a proper resolution, after completion and acceptance thereof and final payment for all work performed as provided in this section, execute and deliver in the name of the district, and without expense to the grantee therefor, to the trustees or other governing body of such corporation, by whatsoever name or title they may hold office, or to the board of trustees of a town burial ground, or to a duly incorporated cemetery association, and to their successors in office, a quitclaim deed covering the lands so acquired, together with all structures erected thereon; and where such lands were so acquired for the purposes of reinterment of human remains exhumed from a public or private cemetery, burial place or grave which shall have been used by the inhabitants of any town in this state as a cemetery or burial ground for the space of fourteen years and not having a board of trustees pursuant to the provisions of the Town Law, the board shall by proper resolution as provided by title 21 of this article, after completion and acceptance thereof, and final payment for all work as by this section provided, execute and deliver in the name of the board, and without expense to the grantee therefor, a quitclaim deed or other proper release to such town wherein such lands so acquired as provided by this section may be situated, and such cemetery or burial place shall from and after the execution and delivery thereof be deemed to be vested in

such town, and shall be subject in the same manner as other corporate property of towns, to the government and direction of the electors in town meeting, excepting, however, that where such lands so acquired for the purposes set forth in this section are situate within the corporate limits of a village or city, such quitclaim deed or release herein provided for shall be executed and delivered to such village or city and thereafter be and become the property of such village or city and subject to the laws governing such village or city, and further excepting, however, that the board, subject to the approval of the town board, or city or village authorities herein referred to, shall have the right to convey such lands so acquired, together with all structures erected thereon, to a duly incorporated cemetery association. From and after the date of the execution and delivery by the board, as by this section provided, of the quitclaim deed or release, the board shall be deemed to be divested of all right and title to such lands so quit-claimed or released and shall not thereafter be liable for the care, custody, maintenance and control thereof. This section does not limit any existing rights of burial, or removal of remains under other provisions of law applicable thereto.

§ 15-2119. Procedure for construction of reservoirs.

1. Preliminary plans, specifications, maps, statements and estimates are required as follows:

a. If the board shall determine as a part of the official plan or before the official plan has been prepared that the public interest or welfare requires that a reservoir should be constructed for the regulation of the flow of a river or rivers, stream or streams of the district, it shall cause to be prepared preliminary plans and specifications of such reservoir with estimates of the total cost thereof together with a survey of the lands upon which the same is to be constructed, giving the location thereof, and of all lands to be taken, flowed or damaged, with a description by survey or otherwise, showing the amount of lands belonging to the state and to persons or public corporations and the amount of lands of the state in the forest preserve

affected thereby.

b. The board shall also cause a map to be made, showing all such lands, the number of acres in each separate tract, the names of the owners and occupants thereof, so far as the board can ascertain the same. Such maps shall also show the high flow lines of the proposed reservoir.

c. The board shall also prepare a statement of the amount of water power, if any, which consistent with the proper regulation of the flow of the river or stream may be developed at or by reason of such reservoir by the withdrawal of water for power purposes directly therefrom with an estimate of the value thereof. The board shall also prepare a statement showing generally the public corporations and locality of lands to be benefited by the improvement and how and whether the state will be benefited thereby and the public necessity for the improvement.

d. In the event that any of the real estate required for such reservoir shall belong to the state, the value thereof shall be determined in the estimates, as hereinbefore provided, and in the event that such land is outside the forest preserve and the state is chargeable with any proportion of the expenses, such value shall be deducted from the amount to be paid by it, and shall be chargeable as a part of the expenses of the improvement.

e. When the board shall have completed such preliminary plans, maps, specifications, estimates and statements, it shall certify the same with its approval thereof to the department, which shall have power after hearing the board, to modify such maps, plans, specifications, estimates and statements, or any of them, and within forty days after the receipt thereof shall approve the same as certified to or modified by it, and shall certify the same as approved by it to the board. The board shall thereupon cause the preliminary plans, maps, specifications, estimates and statements so approved to be filed in the office of the county clerk of each county having lands within such district, and in the office of the department.

2. Upon the completion and filing of such preliminary plans, maps, specifications, estimates and statements, as aforesaid, the board shall forthwith give notice of such filing as provided in subdivision 1 of section 15-0903, and shall hold a hearing thereon in the manner set forth in section 15-0903.

3. Upon the completion of such hearing the board shall determine whether the public welfare requires that such proposed improvement should be proceeded with, and what, if any, modification should be made in such plans, maps, specifications, estimates and statements. If the board shall determine that such maps and plans, specifications, estimates and statements should be modified in any respect, it shall certify its proposed modifications to the department, which after hearing, the board shall determine what, if any, modifications should be made therein, and as modified by them shall approve the same and certify the same with their approval to the board, which modified plans, maps, specifications, statements and estimates shall be filed by it as hereinbefore provided for the filing of the original thereof. If the board shall finally determine that the proposed reservoir shall be made, it shall thereupon make a final order directing the same to be made, and shall cause such final order or certified copies thereof to be filed and recorded in the office of the county clerk of each county in which any lands within such district are located, and in the office of the department, and forthwith give notice by publication of the making and filing of such final order.

4. Any person or public corporation affected by the determination of the board may review such final determination in the manner provided by article seventy-eight of the civil practice law and rules. Unless application shall be made for such review within sixty days after the filing of the final order, as herein provided, the plans, maps, specifications, statements and estimates shall be the established and final plans, maps, specifications, statements and estimates of such reservoir. In the event that upon such review there shall be any modification by the court of the final order, maps, plans, specifications, statements and estimates, the court shall direct the

modification thereof by order, and the board shall cause such order to be filed and recorded in each place where the final order was filed and recorded. No review of the final determination of the board shall be had unless at the time of the application for review the person or public corporation seeking the review shall give an undertaking approved by the supreme court or a justice thereof, as to form, amount, and sufficiency or sureties that in the event of failure to modify the final determination, he or it will pay to the board all such costs and expenses as are incurred by it on account of the review proceedings, as shall be determined by the court.

5. The board shall have power to make such changes in the final maps, plans and order as the nature of the work may require, provided that the board shall give notice by publication pursuant to subdivision 1 section 15-0903, and shall give a hearing thereon as in the first instance and the same proceedings shall be had as provided by subdivisions 3 and 4 of this section.

6. In the event that in any such plans, estimates and statements, a charge is made against the state for any share of the expenses of the proposed reservoir, not including therein such preliminary expenses as may have been necessary or expenses consisting only of assessments against the state on account of benefits from the improvement, no such reservoir shall be made under title 21 of this article pursuant to any such final order until the Legislature shall make appropriation to pay the state's share of such expenses. The sum so appropriated shall be paid into the general fund of the river regulating district for which it is appropriated.

7. When any such final order shall have been made, and the Legislature shall have made appropriation for any share of the expense payable by the state, if any, the board shall proceed as herein provided to the acquisition of such real estate as may be necessary for the construction, maintenance and operation of such reservoir. When proceedings are taken under the eminent domain procedure law, the board shall file in the Comptroller's office a certified copy of the final order provided for in the eminent domain procedure law, and a certified

copy of the judgment therein rendered pursuant to the eminent domain procedure law, together with the certificate of the Attorney General that no appeal from such final order and judgment has been made, or will be taken by the state, or if an appeal has been taken, a certified copy of the final judgment of the appellate court. Payments of the amount due upon such final order and judgment with interest from the date of the judgment until thirty days after the entry of such final order and judgment, and payments for real estate taken by agreement, shall be made out of the general fund of the district.

8. Construction work shall be undertaken in accordance with the following provisions:

a. After any such final order shall have been made and filed as hereinbefore provided, the board may proceed to construct the work according to the plans and specifications, by publishing a notice stating the time when and the place where such bids or proposals will be received, once a week for three weeks in one newspaper published in the city of New York and in one newspaper in each county wholly or partly within the district, if such papers there be, and in such other newspapers as the board shall deem advisable.

b. The advertisement shall be limited to a brief description of the work proposed to be let with an announcement stating where the maps, plans and specifications are on exhibition and the terms and conditions on which bids will be received and such other matters as may be necessary to carry out the provisions of title 21 of this article. In such notice the board shall reserve the right to reject any or all bids and again advertise for further bids.

c. The proposals received pursuant to such advertisements shall be publicly opened and read at the time and place designated. Every proposal must be accompanied by a deposit in the form of a certified check upon some national or state bank or trust company within the state in good credit and payable to the board for five per cent of the amount of the proposal. In case the proposer to whom such contract shall be awarded shall fail or refuse to enter into such contract within the time

fixed by the board, such deposit shall be forfeited to the board and paid by it into and become a part of its general fund. In case the contract be made such deposit shall be returned to the contractor.

d. Before entering into any such contract a bond with sufficient sureties to be approved by the board shall be required, conditioned that the contractor will perform all work within the time prescribed in and in accordance with the plans and specifications, and will pay to the state, the regulating district and the board all damages, costs and expenses suffered or incurred by any or all of them by reason of the neglect or default of such contractor or his employees or any subcontractor or his employees in the performance of such contract or in doing such work thereunder.

e. Such contract may provide for partial payments to be made from time to time upon the certificate of the engineer in charge of the work after due inspection thereof for an amount not exceeding ninety per cent of the contract price for the work actually done as shown by the certificate. Such certificate must state the amount of the work performed and its total value, at the price fixed by such contract, but in all cases not less than ten per cent of the estimate thus certified must be retained until the contract is completed and approved by the engineer in charge of the work and by the department.

f. The board may divide the work into several parts and let separate contracts therefor. If the estimated cost of any part of such work does not exceed ten thousand dollars, the board may by resolution proceed to do such part of such work by its own forces or otherwise. All such contracts before being entered into shall be approved by the department.

g. Subject to the authority of the department to dispose of merchantable timber and salable wood on state land, no reservoir shall be constructed until provision shall have been made by the board for the clearing from the reservoir site of all timber and all timber growth on lands to be flowed, such timber and timber growth to be removed by the board by contract or otherwise, with the approval of the department. The board shall not permit to remain upon a reservoir site above the low

flow line of the reservoir any stump higher than twelve inches above the bed of the reservoir adjacent thereto.

h. All merchantable timber and salable wood on state land to be flowed shall be sold by the department in such manner as it shall deem best for the interests of the state, but in no event for a sum less than its fair market value, provided, however, that the department may in its discretion sell any such merchantable timber or salable wood at public auction after due advertisement. The proceeds of any sale or disposition less the expenses thereof and the reasonable cost of inspecting, scaling, lumbering, cutting and piling, if any, incurred by the department, shall be paid into the general fund of the state. The department may designate the trees or kinds of trees to be considered merchantable timber or salable wood.

i. In preparation of the reservoir site the board shall do such work as may be necessary to prevent stagnant pools above the low flow line thereof.

§ 15-2121. Apportionment of cost.

1. If proceedings to review the final order of the board determining that such proposed reservoir shall be made have not been instituted within sixty days from the date of the filing of the same, or upon the filing of a modification thereof as directed by order of the court, the board shall, as soon thereafter as practicable, prepare an estimate of the total cost of such reservoir, including interest on certificates of indebtedness issued prior to the effective date of the Local Finance Law, or on notes, to the maturity thereof and compensation for real estate and all damages suffered by reason thereof and all expenses necessarily incurred or to be incurred in connection therewith, and make a complete and verified statement thereof.

2. The board shall then apportion such cost, less the amount which may be chargeable to the state, among the public corporations and parcels of real estate benefited, in proportion to the amount of benefit which will

inure to each such public corporation and parcel of real estate by reason of such reservoir. Such apportionment shall be made in writing and shall show the name of each public corporation and a brief description of each parcel of real estate benefited; the name of the owner, or owners, of each such parcel of real estate, so far as can be ascertained; the proportion of such cost less the amount which may be chargeable to the state to be borne by each, expressed in decimals; and the amount to be paid by each such public corporation or the owner or owners of each such parcel of real estate.

3. Such amount shall be determined by multiplying the total cost less the amount which may be chargeable to the state by the decimal representing the proportion thereof to be borne by each public corporation or parcel of real estate.

4. The board, or a majority of the members thereof, before making such apportionment shall view the premises and public corporations benefited. Such apportionment shall be approved by the board and certified to the department for its approval. Upon the approval thereof by the department, the board shall cause a copy thereof to be served upon the chairman or other presiding officer of the county legislative body of each county, the mayor of each city, the supervisor of each town, and the mayor of each village, named in the apportionment, or if service cannot be had upon such chairman, mayor, or supervisor, then upon a member of the county legislative body of the county, an alderman of the city or member of the governing board thereof, a member of the town board of the town, or a trustee of the village, and to be filed in the office of the county clerk of each county in which any public corporation or real property thereby affected is located. After such service and filing of such apportionment and determination, notice shall be given by the board, of publication of a time and place where the board will meet to hear any public corporation or person aggrieved by the same. The affidavit of the person serving or publishing such notice shall be evidence of such service or publication.

5. The board shall meet at the time and place specified and hear all persons and public corporations interested in or aggrieved by such

apportionment and may approve of or modify the same. If such apportionment and determination be modified by the board it shall not become effective until approved by the department and a copy thereof served and filed in the same manner as upon the completion of the same in the first instance. Any public corporation or any person deeming it or himself aggrieved may upon notice to the board review the determination of the board in the same manner as a review is had of the determination of a board of assessors in making an assessment. Such apportionments as so modified and as further modified by any final judgment or order made in proceedings to review the same as herein provided shall be final and conclusive.

6. The amount of the total cost and expense of such reservoir and the maintenance and operation thereof including the amount of a reasonable return to the state as herein provided for, which each such public corporation and each such parcel of real estate is to pay and bear shall be based upon the proportion of cost as determined in the apportionment. If the total cost of such reservoir shall exceed the estimate made and apportioned as hereinbefore provided, the amount of such excess cost, less the amount which may be chargeable to the state, shall be apportioned among the public corporations and parcels of real estate benefited, by an additional apportionment to be made in the same manner and by the same procedure as the original apportionment, and shall be levied, assessed and collected in the manner provided in section 15-2123 hereof. Such apportionment and determination, when finally made, also shall be deemed to fix and determine the apportionment and the basis of apportionment of all subsequent expenses to be incurred in the maintenance and operation of such reservoir, including the amount of a reasonable return to the state, if any, as provided for in title 21 of this article.

7. If powers be developed after such apportionment has been made or if for any other reason any public corporation or any parcel of real estate becomes liable equitably for such subsequent expenses, a subsequent apportionment may be made in the same manner and subject to the same review as the original apportionment. Provided, however, that before any such apportionment of costs or any assessment is made by the board,

public corporations or owners of property liable for the same may execute and deliver to the board a consent, executed and acknowledged in like manner as a deed, by which they acknowledge that they are the public corporations and owners of property benefited by the improvement and consent to bear the cost thereof, less any sum previously appropriated by the state therefor, together with charges provided for in section 15-2125 of title 21 of this article, and to have the same assessed against them or their property as in this article provided. Such consent may also provide, as a condition of its acceptance by the board, for the basis on which the assessment for the improvement shall be made upon the parties consenting.

8. The board may accept or reject such consent. If it accepts the same it must be by resolution providing for the levy of the entire assessment upon the public corporations and property of the parties filing such consent, on the basis of benefits received, if any, determined by the terms of the consent, or if no basis of assessment be fixed by the consent, on the basis of the benefits shared by such parties in the manner provided in title 21 of this article. If such consent be accepted by the board, a certified copy thereof shall be filed by the board in the office of the county clerk of each county in which any public corporation or real property affected by the assessment is located. Such a consent, when executed by a public corporation, must be authorized by the governing body thereof.

§ 15-2123. Assessments; how levied and collected.

1. After the apportionment of cost has been made and filed in accordance with the provisions of section 15-2121 hereof, the board shall prepare a statement showing the name of each public corporation and a description of each parcel of real estate benefited by such reservoir and the amount to be borne by each as determined in the apportionment. The board shall also determine and state whether the amounts shall be paid in one sum or in annual installments, in such amounts as the board shall annually determine to be necessary.

2. A copy of such statement duly verified under the seal of the district shall be filed with the clerk of each county, town, village or city affected or containing any real estate which is benefited. The clerk of every such county, city, town or village shall make and deliver to the county legislative body of such county, the common council of such city, the board of trustees of such village, and the assessors of such town, city or village a copy of such statement.

3. The county legislative body of every such county shall levy and assess upon such county and upon each town specified in such statement the amount of such cost and expense which in such statement is certified to be the proportion thereof which should be borne by such county or such town as a whole, and the common council or other governing body of each city and the board of trustees of every such village shall in like manner levy and assess upon such city and village respectively the amount of such cost and expense which in such statement is certified to be the proportion thereof which should be borne by such city and village respectively. The assessors of each town or city, containing individual real estate upon which a proportion of such cost is assessed, shall enter on a separate page of their assessment roll a statement of the total amount to be paid by such individual real estate, a description of each parcel and of the property rights defined as real estate herein and the amount chargeable thereto, as contained in the statement filed. The county legislative body of each county wherein such property or land is situate shall levy and assess against each such parcel and each such property right defined as real estate herein the amount specified in the statement, and shall by their warrant direct the collection thereof in the same manner and by the same procedure as general taxes are collected; and in case it is determined that the amount is to be paid in annual installments, the county legislative body or the assessors of the city, town or village, as the case may be, shall annually assess the annual installment to be paid by such county, city, town or village or person in the manner provided by this section until the whole amount shall be paid.

4. Upon the assessment of the cost as provided in this section, the amounts apportioned and assessed shall be paid and remain charges

against the several public corporations and liens upon the several properties charged therewith, until paid or otherwise removed, superior in force and effect to all other liens except unpaid general taxes. All moneys collected under and by virtue of the provisions of this section shall be paid to the county treasurer of the county benefited or the county in which the town, city, village or real estate is located who shall pay the same on or before the first day of June in each year to the Comptroller of the state, who shall deposit the same in depository banks to the credit of the several funds of such district as herein provided. In event that it has been determined that the cost of the improvement shall be paid in installments, interest for one year at a rate not higher than the rate of interest secured by the obligations to which the assessments are applicable, and not more than sufficient to pay the same, shall be added to the amount of each installment, on the cost of the improvement less the installment or installments previously levied or assessed, and be collected in the manner provided for the collection of the principal of the assessment. In the case of default in payment of assessments or any installment thereof levied as herein provided, the same penalties shall be collected as are provided in the case of failure to pay general taxes within the time prescribed by law, and when collected shall be deemed a part of the assessment.

5. If the assessment, together with the amount appropriated by the state, be insufficient to pay the obligations issued on account of such improvement, the board shall make a new assessment or assessments, as the case may be, to make up the deficiency, and the owner and holder of any obligations issued under title 21 of this article may by appropriate remedy compel the assessment of such deficiency.

6. Notwithstanding the provisions of subdivision four of this section, all moneys required to be collected under and by virtue of the provisions of this section may be paid directly to the river regulating district responsible for levying the assessment, provided the payment is made prior to the thirty-first day of October of the year in which the assessment is levied. Any direct payments received by the river regulating district shall be forwarded by the district to the state comptroller, who shall deposit the same in depository banks to the

credit of the several funds of such district as herein provided. Upon receipt of any such direct payments, the river regulating district board shall notify the appropriate county treasurer to whom such payments would have been made under subdivision four of this section had not direct payment been made to the river regulating district. All moneys required to be collected and not paid directly to the river regulating district by the thirty-first day of October of the year in which the assessment is levied shall be payable to the county treasurer as provided under subdivision four of this section and shall be subject to a service fee of one percent of the total amount assessed which shall be added to the amount to be collected and which shall be in addition to any penalties which may be imposed in the case of failure to pay general taxes within the time prescribed by law and when collected, such penalties shall be deemed a part of the assessment. All service fees collected by county treasurers pursuant to this subdivision shall be retained by the county treasurer and deposited in the general fund of the county, provided the moneys collected under the annual assessment installment are paid to the comptroller of the state within thirty days of their receipt by such county treasurer. Otherwise, the county treasurer shall pay over the entire service fee collected to the comptroller of the state for deposit to the credit of the several funds of the river regulating district in the same manner as moneys collected under the annual installments of the assessments provided for herein.

§ 15-2125. Operation and maintenance charges.

1. The board shall make an estimate of an amount sufficient to pay the expense of the maintenance and operation of the works erected hereunder, including interest on temporary certificates of indebtedness issued prior to the effective date of the Local Finance Law. If lands in the forest preserve have been used, such estimate shall include in addition a reasonable return to the state upon the value of the rights and property of the state used and the services of the state rendered. A reasonable return to the state upon the value of the rights and property of the state used shall mean six per cent upon the value of the lands flowed, exclusive of merchantable timber and salable wood removed

therefrom for which the state shall have been paid as provided by subdivision 8 of section 15-2119 hereof. The value of the services of the state rendered shall be construed to mean the actual cost thereof.

2. Any amount so estimated shall be the estimated amount required for such purposes each year, and when fixed and determined as herein provided shall be the amount thereof for a period of three years. The amount shall be readjustable at the end of any three-year term. The amount less any part thereof to be paid by the state shall be the amount to be annually collected for such purposes, and shall be apportioned upon the public corporations and real estate benefited according to the benefits derived therefrom respectively, and shall be levied, assessed and collected in the same manner as the cost and expenses of the reservoir are herein provided to be levied, assessed and collected.

3. Such estimates and determinations as from time to time fixed and determined by the board may upon application of any party affected thereby be reviewed in the manner provided by article seventy-eight of the Civil Practice Law and Rules by the Supreme Court of the judicial district in which the reservoir is located. Upon the hearing on such application for review, the court shall take the testimony and other proofs of the parties and may make an order affirming, vacating or modifying any such estimate and determination.

§ 15-2127. Error in names.

No error in the names of the owners of real estate, or in the descriptions thereof, shall invalidate such apportionment or the levying of assessments or taxes based thereon if sufficient description is given to identify such real estate, and the owners thereof.

§ 15-2129. Financing.

1. After the cost of any improvement made or to be made under title 21 of this article has been apportioned among the public corporations and

parcels of real estate benefited as herein provided and after such apportionment has been assessed upon such public corporations and parcels of real estate, the board may finance the cost of any such improvement pursuant to the Local Finance Law. Any bonds issued for such purposes shall not be construed in any event as bonds or indebtedness of the state, and the state shall not be obligated to pay the principal or interest therefor. Such bonds shall be lawful investments for trustees and savings banks of the state and for any of the funds of the state which by law may be invested.

2. The board shall annually include in the installment of the assessment to be collected in that year a sum sufficient to provide for the payment of the principal of and interest on obligations issued for such purposes and maturing in that year.

3. The proceeds of the sale of obligations issued for the purposes of title 21 of this article, together with all other revenues of the board from whatever source derived, shall be deposited in such national or state bank or banks or trust company or trust companies at Albany or within the regulating district as are approved by the Comptroller and the board, subject, however, to the provisions of section 165.00 of the Local Finance Law. Before any such deposit is made the Comptroller shall require from any such bank or trust company security for repayment of the same to such board or to the Comptroller upon demand for the money so deposited in the manner provided in section 106 of the State Finance Law. All moneys received by the board under the provisions of title 21 of this article, except from assessments levied to pay the cost of construction, shall constitute a fund to be known as the "general fund" of the district.

4. All moneys received from assessments levied to pay the cost of construction, together with such part of any surplus in the "general fund" as shall be determined by the board over and above the requirements for the construction, maintenance and operation of the reservoir, including the amount raised for a reasonable return to the state, shall constitute a separate fund, to be known as the "debt service fund," the moneys in which shall be applied to the payment of

principal of and interest on obligations issued for the purposes of title 21 of this article, except when the total cost of construction is paid without the issuance of obligations, in which case the moneys applicable thereto shall be paid into the "general fund." Any installment or installments of the assessment which shall become payable before any obligations have been issued, shall be paid by the Comptroller into the "general fund" and applied to the payment of the cost of construction. The Comptroller is authorized and directed to pay from the "debt service fund" the principal of and interest on obligations issued for the purposes of title 21 of this article.

5. All moneys in said "debt service fund" shall be applied by the Comptroller to the payment of the principal of and interest on such obligations, except as aforesaid, and to the purchase of the same in the open market when possible and while awaiting such purchase such excess shall be invested or kept at interest in the same manner as sinking funds of the state of like nature are invested. If any moneys remain in the "debt service fund" after all outstanding obligations have been paid up and redeemed, such moneys shall be paid into the "general fund" and may be used to pay the expenses of maintenance and operation and other expenses.

6. The board may invest and reinvest any moneys of the "general fund" which are not required to be deposited in accordance with the provisions of section 165.00 of the Local Finance Law. Any such investment shall be made only in obligations of the federal government and the State of New York, and in certificates of deposit of banks or trust companies or in bank or trust accounts of banks in this state, secured by obligations of the United States of America or of the state of New York of a market value equal at all times to the amount of the deposit and with the approval of the Comptroller. The board may sell and dispose of any securities purchased for investment pursuant to this paragraph at any time with the consent of the Comptroller, and the proceeds thereof shall be paid to the Comptroller and deposited in the "general fund."

7. Any obligations purchased for investment pursuant to this section shall be delivered by the seller to the Comptroller who shall be the

custodian thereof until the same are sold or otherwise disposed of. The Comptroller also shall collect the income of such investments and deposit such income in the "general fund." Except that certificates of deposit purchased for the Black river regulating district shall be retained in the office of the said Black river regulating district at Watertown, New York and a statement shall be filed with the Comptroller listing such certificate or certificates, the amount thereof, the interest due and payable thereon, the maturity date thereof, the issuer of such certificate and such other information as shall be required by the Comptroller.

8. All payments from the "general fund" of the district shall be made by requisition of the board signed by the board or by the officer or officers thereof authorized by it so to do and audited and countersigned by the Comptroller.

9. The board shall keep in suitable books a complete record of its financial transactions, and the books shall be audited from time to time by the Comptroller.

§ 15-2131. Reports.

1. The board of any river regulating district created hereunder shall annually, as of such date as the department may provide, submit to it a written report, which shall contain:

a. An exhibit of the personnel of the board, and all of the employees and persons connected with the board;

b. A financial statement, showing fully and clearly the finances of the district, the amounts and dates of maturity of all bonds, notes and certificates of indebtedness, the amounts of money received, and from what sources, and amounts of money paid and purposes for which same were paid;

c. A statement of any petitions received by the board and the action

taken thereon;

d. A descriptive statement of the work done during the previous year;
and

e. A statement of the condition of reservoirs and the results secured
by the operation thereof in each case.

2. In addition to the matters outlined above the board shall report to
the department such other matters as it shall deem proper or the
department shall require.

§ 15-2133. Operation of reservoirs.

1. The board shall not permit the water in any reservoir constructed
under the provisions of title 21 of this article to rise above the high
flow line thereof, except during floods or other emergencies, and if
during floods or other emergencies the water shall rise above such high
flow line the board shall immediately open the outlet gates in such
reservoir and take such other action as may be necessary to lower the
water to the high flow line of such reservoir with the least practicable
delay. The board shall keep an accurate and, so far as practicable,
continuous record of the height of water in each reservoir and shall
install and maintain at suitable places such gauges or instruments as
may be necessary therefor.

2. Except for absolutely necessary inspection or repairs, no reservoir
shall at any time be drawn off below the low flow line, or to such
extent as to expose isolated pools which may cause unsanitary
conditions, unless due provision is made for draining such pools into
the lowest water level of such reservoir. It shall be unlawful for any
officer or person in charge of any reservoir to neglect the provisions
of this section.

3. It shall be unlawful for any person to open or close or cause to be
opened or closed a gate or gates in any dam constructed pursuant to the

provisions of this title without the consent of the board or for any person to interfere in any way with the operation of, or injure a regulating reservoir.

4. When the flow of a river at any water power plant thereon falls below the average normal flow thereof, the then natural flow of the river at a reservoir dam thereon shall not be restricted without the consent of the owner of such power plant.

5. No regulating reservoir shall be constructed pursuant to the provisions of title 21 of this article of a capacity greater than is required to maintain the average flow.

6. The expense of maintenance and operation of any existing reservoirs shall be paid as now provided by law until such reservoirs are taken over by the board pursuant to the provisions of title 21 of this article, and thereafter such expense shall be paid as herein provided for the maintenance and operation of reservoirs constructed pursuant to title 21 of this article.

§ 15-2135. Hearings; hearing officers; determinations.

Whenever the department is empowered under the terms of title 21 of this article to make a determination it may hear testimony and take proofs material for its information and may appoint a hearing officer by a written appointment, for that purpose. Every hearing officer so appointed shall be authorized to take such testimony and hear such proofs as may be material to the inquiry and report the proofs and testimony so taken, with his opinion as to the facts established thereby, to the department. The department may make such determination from the proofs and testimony taken before it or before such hearing officer or from any other data which shall be satisfactory to it, and the expenses of taking such testimony or proofs shall be deemed a part of the expense of the improvement to which it relates.

§ 15-2137. Hudson River-Black River Regulating District; old boards abolished; new board created.

1. The Hudson River Regulating District and the Black River Regulating District created pursuant to this article are hereby consolidated into a single district, to include the areas of both such districts, and to be known as the Hudson River-Black River Regulating District.

2. Except as hereinafter provided, the board of the Hudson River Regulating District and the board of the Black River Regulating District are hereby abolished, and all of the jurisdiction, functions, powers, duties and obligations possessed or exercised by, or for which commitments have been made by, such boards, including lands or property acquired, moneys of the boards, and actions taken or determinations made by such boards, are hereby transferred to, assigned to and devolved upon the Hudson River-Black River Regulating District and its board.

3. Notwithstanding any provision of titles 21, 23 and 25 of this article, a board of the Hudson River-Black River Regulating District is hereby created to consist of seven members to be appointed by the governor not less than three of whom shall be residents of the territory comprising the Black River area and not less than three of whom shall be residents of the territory comprising the Hudson River area. The governor shall appoint one member for a term ending September 1, 1960, one for a term ending September 1, 1961, one for a term ending September 1, 1962, one for a term ending September 1, 1963, and one for a term ending September 1, 1964, and thereafter, on the expiration of their respective terms of office, appointments shall be made for terms of five years. The governor shall appoint two additional board members, each of whom shall serve for a term of five years from the effective date of his or her appointment; provided, however, that the board members first appointed on or after the effective date of the chapter of the laws of two thousand five which amended this subdivision shall serve an initial term of two years from the effective date of such appointment. The governor shall fill any vacancy on such board within thirty days after it occurs for the remainder of the term of office.

§ 15-2139. Hudson River Regulating District and Black River Regulating District: transfer of functions; pending actions and proceedings; interpretation of documents; existing rights and remedies.

1. Except as hereinafter provided, the contracts, books, maps, plans, papers, records and property of whatever description within the jurisdiction or under the control of the Hudson River Regulating District or the Black River Regulating District, including moneys appropriated and available to such districts, pertaining to or used in connection with the exercise or performance of the functions, powers and duties hereby transferred and assigned, shall be delivered to the secretary of the board of the Hudson River-Black River Regulating District, who is hereby authorized to take possession thereof.

2. For the purposes of succession, the functions, powers and duties transferred, assigned to, and devolving upon the Hudson River-Black River Regulating District shall be deemed to constitute a continuation of such functions, powers and duties exercised by the Hudson River Regulating District and the Black River Regulating District, and the acts, orders, rules, regulations and determinations of such districts shall have, and continue with, the same force and effect as though done by or made by the Hudson River-Black River Regulating District.

3. Any business or matter heretofore undertaken or commenced by or before the Hudson River Regulating District or the Black River Regulating District, or any action or proceeding heretofore brought by or against such districts, pertaining to or connected with the functions, powers and duties hereby transferred and assigned to the Hudson River-Black River Regulating District may be conducted, completed, prosecuted and defended by and in the name of the Hudson River-Black River Regulating District. In all such actions and proceedings the Hudson River-Black River Regulating District, upon application to the court, may be substituted as a party.

4. When the Hudson River Regulating District or the Black River

Regulating District is referred to or designated in any law, contract or document, such reference or designation shall be deemed to refer to and include the Hudson River-Black River Regulating District so far as such law, contract or document pertains to matters which are within its jurisdiction by reason of such transfer and assignment of functions, powers and duties.

5. No existing right or remedy of any character shall be lost, or affected by reason of the provisions of sections 15-2137, 15-2139 and 15-2141.

§ 15-2141. Hudson River Regulating District and Black River Regulating District: funds of the board.

1. Notwithstanding the consolidation of the Hudson River Regulating District and the Black River Regulating District into a single district, effectuated by this title, or any other provision of title 21 of this article, moneys constituting the respective "general fund" or "debt service fund" or other fund or funds of either the Hudson River Regulating Board or District or the Black River Regulating Board or District, shall remain and be kept separate and apart and shall be applied for the cost of maintenance and operation in the area of the appropriate district and to pay the debts and obligations of the appropriate board or district, on whose account such moneys were received.

2. Notwithstanding any provision of sections 15-2137 and 15-2139 or any other provision of title 21 of this article, all moneys hereafter received by the Hudson River-Black River Regulating District and its board, as consolidated, by reason of assessments or from the sale of obligations issued or from other source, all for the purposes of the respective areas heretofore comprising the Hudson River Regulating District or the Black River Regulating District, shall be kept separate and apart and shall constitute "general funds" and "debt service funds" and other fund or funds with the same force and effect as funds heretofore constituted by the Hudson River Regulating Board or District

and by the Black River Regulating Board or District and shall be applied solely for the cost of maintenance and operation in the respective areas from which the moneys were received and to pay the debts and obligations accrued or as they become due in the areas where the debts and obligations were incurred, provided, however, that the expenses of the board, as consolidated by this part, and of its officers and employees shall be paid from the appropriate "general funds" in the same proportion as moneys are annually collected from the respective areas. The provisions of section 15-2129, in so far as the same are applicable and not inconsistent herewith, shall apply as they relate to the "general fund", "debt service fund", and to the fund or funds of the district.

TITLE 23

RIVER IMPROVEMENT

Section 15-2301. Legislative purpose.

15-2303. River improvement districts.

15-2305. River improvement associations.

15-2307. Construction contracts.

15-2309. Entry upon lands, structures and waters; acquisition of property.

15-2311. Financing of river improvements; assessment and collection of cost; correction and revision of assessments.

15-2313. Operation, maintenance, repair and extension of river improvements.

15-2315. Unlawful interference with improvement works.

15-2317. Construction of reservoir on state-owned lands in a forest preserve.

15-2319. Payment by the state of part of cost of river improvement.

15-2321. River improvement district with federal aid.

§ 15-2301. Legislative purpose.

The purpose of title 23 of this article is to provide a method by which a project may be undertaken to improve the channel, construct dikes or regulate the flow of a river for the protection of life, property and the public health or welfare from damage by floods, such work in general to be done at the expense of the owners of the properties and of the political subdivisions of the state benefited thereby.

§ 15-2303. River improvement districts.

1. Bodies corporate which shall consist of and be known as river improvement districts may be created as herein provided to carry out the purposes of title 23 of this article on some particular stream or part thereof. Such river improvement districts are declared to be public corporations and shall have perpetual existence and the power to acquire, hold or sell such real estate or other property as may be necessary, to sue and to be sued, to incur contract liabilities, to exercise the right of eminent domain and of assessment and taxation and to do all acts and exercise all powers necessary to accomplish the purposes of title 23 of this article. Such powers shall be exercised by and in the name of the district. The governing body of the district shall be the department, unless such district be combined with a river regulating district as provided below. Any watershed of the state or any integral part of such watershed may be created into a river improvement district pursuant to the provisions of title 23 of this article. The debts, liabilities and obligations incurred by a river improvement district shall in no event be construed as debts, liabilities or obligations of the State of New York, and neither the department nor any member thereof in his individual capacity shall be liable therefor. Any river improvement districts heretofore formed under the provisions of this chapter are hereby declared to be bodies corporate and all the provisions of this section shall be applicable to such river improvement districts. The general provisions and definitions appearing in sections 15-1903 and 15-2101 are also applicable to title 23.

2. Any county, city, town or village, or any person or persons owning

lands situated on, bordering on or near any river or watercourse may present to the department a petition, duly verified, praying for the formation of a river improvement district. The petition shall set forth the facts as to the effects on life, health, welfare and property of the present flow of the stream and may state the method whereby the petitioners believe that the conditions complained of can be remedied or bettered. The department may by rule prescribe the form and nature of the contents of such petition. On receipt of such petition the department shall cause the matter to be investigated. The department may make tentative determinations as to remedial measures, what properties would be benefited, the cost of the work and the division of such costs between public corporations and private owners; or it may find that the relief sought is impracticable or not of sufficient importance to warrant state interference.

3. Notice of a hearing shall be given as follows:

a. The department shall set forth the material in subdivision 2 above in a report which shall be filed and notice of such filing, together with the notice of a public hearing thereon, shall be given. If the report is favorable, the notice shall also state that the department contemplates the making of a survey and of an assessment of the costs of the project, the costs of which survey and assessment will be assessed on the properties and public corporations surveyed or assessed as beneficiaries.

b. Whenever the department is required to give notice of a hearing or of any act performed or contemplated, it shall be given in accordance with the provisions of subdivision 1 of section 15-0903.

4. At the hearing the department shall hear testimony and arguments with regard to the proposed project. Thereafter the department shall determine whether the public health, safety or welfare require the formation of the district and shall make a final order with regard thereto. Such an order forming a district shall describe the boundaries thereof and state the name of the district and shall include orders to make surveys, studies, estimates and assessments. The final order shall

be filed and notice of such filing given.

5. The department may proceed to make such surveys of the lands in the proposed district and the boundaries thereof and of the river and its tributaries and such other areas as may be necessary. For the carrying out of the purposes of this title 23 the department and its authorized agents may enter upon any such land as in its judgment may be necessary, the district being liable only for actual damage done thereby. The amount of such damages may be agreed upon between the department and the owner or occupant of such lands or if they cannot agree the amount of such damages shall be ascertained and determined by proper court action.

6. After the completion of the surveys the department shall prepare maps of the proposed district showing the boundaries thereof, the boundaries and area of each public corporation in so far as it lies within the district, the boundaries of each parcel of land in the district which is to be directly assessed, together with the name of the owner thereof as far as the same may be ascertained. Where a parcel is intersected by the boundary of a public corporation, the area in such parcel in each such public corporation shall be separately given. The boundaries shall include all properties benefited, and may include properties not benefited if necessary to make the district a continuous area with reasonably simple boundaries. Such maps shall also show as far as may be necessary the topography, and the natural and artificial features of the lands within the district or elsewhere. The department shall also show on such maps and other plans the location and general structural details of such works as may be required for the proposed improvement. The department shall also prepare a general description of the proposed works and an estimate of the cost of constructing such works.

7. The department shall also determine the amount of benefit which will accrue to each parcel of land in the district and shall apportion the cost of such work among such parcels in proportion to the benefit which each will derive therefrom. If the department finds that any public corporation will be benefited in its corporate capacity, it shall state what proportion of the total cost of the works or of the various

parts thereof shall be borne by such public corporation and only the remaining portion of the work shall be assessed on the individual owners. The department shall prepare a statement of its assessment and apportionment. Certified copies of such maps, plans, estimates and other papers and of the assessment and apportionment shall be filed and notice of such filing and of the time and place for the hearing thereof shall be given.

8. Thereafter the department shall proceed to hold the hearing and to consider the testimony and arguments presented thereat. If it shall appear that additional areas should be included in the district and that additional surveys are necessary, the department shall so determine and may proceed to make such surveys in the same manner as is provided for the original surveys. Upon completion of such hearings the department shall determine whether or not it is to the public interest to grant the petition, form the district and carry out the project, whether all properties which will be benefited by the proposed works are included in the district and whether the assessment and apportionment is just and equitable, and it shall make a final order with regard thereto. Certified copies of such final order shall be filed and notice of such filing given. After the expiration of the time for review of such an order, if no review is had, or after the review is completed, the department shall cause the same to be recorded. The district shall be held to have been formed on the date of such final order but such formation shall not be effective until such order as made or as modified on review shall have been recorded.

9. Any determination, apportionment, decision, order, maps or plans which the provisions of this title require to be filed and notice of such filing to be given, except in the case where a hearing is to be held may be reviewed by any interested party as provided in section 15-0905.

10. Wherever it is required in title 23 of this article that copies of maps and documents be filed, certified copies thereof shall be filed in the offices of the clerks of each county, town, city or incorporated village, any part of which is included in the district or proposed

district. Wherever it is required in title 23 of this article that any document be recorded, the department shall cause a certified copy thereof to be sent to the clerk of each county, any part of which is included in the district or proposed district, and such clerk shall thereupon record such document.

11. The department may change the boundaries of a district, consolidate two or more districts or subdivide an existing district into two or more districts, the procedure for which shall be the same as is provided for herein for the formation of a district, in so far as the same is applicable.

12. Apportionment of costs shall be as follows:

a. Whenever it is practicable so to do, the department shall include in the cost of any survey made, or construction, maintenance or repair work carried out under provisions of title 23 of this article the cost of all proceedings, hearings, notifications, filings, recordings, engineering, legal and all other services and expenses which lawfully may be incurred, including the cost of acquisition of lands and rights-of-way, suits and prosecutions.

b. To pay the expenses of the surveys, preparation of maps, plans and estimates, the making of the assessment, the holding of the required hearings and other matters required by the provisions of this section, the department may make funds available therefor. The assessment of such costs shall be divided between public corporations and private persons in the manner set forth in the district assessment; the remaining amount shall be assessed on all the properties in the proposed district as shown by the maps filed in proportion to the assessed valuation of such properties. In the event that any such property is cut by the district boundary, the department shall request the local assessors to divide the assessment between the portion within and that without the district and it shall be the duty of such assessors to make such division.

13. At any time after the formation of a district petition may be made to the department for additional construction or for major changes in

the project already adopted or the department, of its own motion, may suggest such changes or additions. The procedure shall be that specified in this section as far as it is applicable. The same procedure may also be followed in order to authorize the raising of additional funds for a project already adopted, should it be found that sufficient funds were not originally authorized.

§ 15-2305. River improvement associations.

There shall be in each river improvement district an association to be known by the name of the district, as.....River Improvement Association. It shall be the object of this association to represent the interests of its members before the department and elsewhere and to serve as a channel of communication between the members thereof and the department. Each public corporation and each owner of land within the district and each lessee of such land shall be a member of and shall have an equal vote in the association. Such association may be formed voluntarily as soon as the department has filed its first description of the boundaries of the district. As soon as practicable after recording the final order creating the district the association, if already formed, shall call a meeting of the members of the association and perfect a permanent organization. If no association has been formed the department shall call a meeting for the purpose of forming such an association and a representative of the department shall preside thereat until a temporary chairman is elected. Such association shall adopt by-laws for the transaction of its business. The association shall choose from among its members a president, secretary and executive committee and such other officers and committees as the by-laws may provide. It shall be the duty of the secretary to keep a list of the members and their addresses and to furnish the department with a list of such members on request. The association may require the payment of annual dues or contributions to the association treasury, the amount of such contribution and the manner of collecting the same to be decided by the association. The annual meeting of the association shall be held during the month of February in each year, at which meeting the officers shall be elected and the association shall determine what further work,

if any, it desires during the ensuing year. Immediately after the close of the annual meeting the secretary of the association shall submit to the department a list of names and addresses of the officers for the year and a petition setting forth the desires of the association.

§ 15-2307. Construction contracts.

1. In general all construction work shall be done by contract, but in the event that the estimated cost of such work, or of a specified portion thereof, shall not exceed the sum of ten thousand dollars, the department may, on the recommendation of the Commissioner of Transportation, authorize the Commissioner of Transportation to do such work or part of such work by day's work under his direction. The department may prepare contracts, plans and specifications for doing such work and furnishing the necessary materials. The work may be divided into several parts and a separate contract let for each. Each contract shall contain a provision that no extra or unspecified work shall be certified for payment unless such work is done pursuant to written order of the department. The form of such contract shall be approved by the Attorney General. Contracts shall be executed in triplicate by the department on behalf of the district.

2. Bids or proposals for any such work shall be called for by publishing a notice thereof once a week for two successive weeks in a newspaper published in each county affected by the proposed works which the department shall select and in such other papers as the department shall direct. The advertisements shall be limited to a brief description of the work proposed to be let with an announcement stating where the maps, plans and specifications are on exhibition, of the terms and conditions under which bids will be received, the time and place when the same will be opened and such other matters as may be necessary to carry out the provisions of title 23 of this article. The department is authorized to furnish copies of such contract plans and specifications to prospective bidders at a price which it shall find to be reasonable and to pay the funds so received into the river improvement district fund. Every bid or proposal must be in writing and be accompanied by a

money deposit in the form of a draft or certified check upon some national or state bank or trust company within the state in good credit and payable at sight to the department for five per cent of the total amount of the proposal. In case the proposer to whom such contract shall be awarded shall fail or refuse to enter into such contract within the time fixed by the department, such deposit shall be forfeited to the department and paid by it into the river improvement district fund; otherwise such deposits shall be returned. The proposals received pursuant to the advertisement shall be publicly opened and read at the time and place designated. The department may reject any and all bids and re-advertise and award the contract in the manner herein provided whenever in its judgment the interests of the district will be enhanced thereby.

3. No contract, the total of which exceeds by more than ten per cent the gross cost of the work as estimated by the department shall be awarded. The contract shall be entered into with the person, firm or corporation who shall offer to do and perform the same at the lowest price and who will give adequate security for the faithful and complete performance of the contract. Such security shall be approved as to character and sufficiency by the department and as to form by the Attorney General and shall be at least ten per cent of the amount of the estimated cost of the work according to the contract price. If, in the judgment of the department, the work upon any contract is not being performed according to the contract, or for the best interests of the district, it shall have power to suspend or stop the work under such contract while it is in progress and it shall thereupon become the duty of the department to complete the same in such manner as will accord with the contract specifications and be for the best interests of the district, or the contract may be cancelled and re-advertised and relet in the same manner above prescribed and any excess in the cost of completing the contract beyond the price for which the same was originally awarded shall be chargeable to and paid by the contractor failing to perform the work.

4. Partial payment for work actually done may be provided for in the contract and paid in the manner hereinbefore provided to an amount not

to exceed ninety per cent of the contract price. The payments due on account of any such contracts, or for necessary expense or work in connection therewith, shall be paid from the river improvement district fund as hereinbefore provided.

§ 15-2309. Entry upon lands, structures and waters; acquisition of property.

The department, its members, officers, employees and agents may enter upon any land, structures and waters necessary for the purposes of title 23 of this article and may determine what rights in and to such property are to be acquired therein. If the owner of any property to be taken, or on or over which an easement is to be taken, for such improvement shall agree with the department upon the sum to be paid therefor, or for the right to use and occupy the same, or for any damages sustained, such sum shall be paid as hereinafter provided as part of the necessary expense incurred for the purpose of such improvement. If the department cannot agree with the owners upon the compensation and damages to be paid for the property or easement to be so taken the department shall proceed to acquire title thereto under the provisions of the eminent domain procedure law. All real property acquired by a river improvement district shall be exempt from taxation.

§ 15-2311. Financing of river improvements; assessment and collection of cost; correction and revision of assessments.

1. After a river improvement project has been duly authorized and the determination of benefits and the apportionment of cost thereof duly recorded, the department may finance such improvement pursuant to the Local Finance Law. If obligations are issued, they shall not be construed in any event as obligations of the state, and neither the state, the department, nor any member thereof personally shall be obligated to pay the principal or interest therefor. Such obligations shall be lawful investments for savings banks, trust companies, executors and trustees and for any of the funds of the state which by

law may be invested. The proceeds thereof shall be deposited in a national or state bank or trust company either in Albany or in one of the counties in which such improvement is made, to be approved by the Comptroller. Before any such deposit is made, the Comptroller shall require from the depository security for the repayment of the same to the department upon demand of the moneys so deposited in the manner provided in section 106 of the State Finance Law. Moneys received under the provisions of title 23 of this article shall constitute a fund to be known as the "river improvement district fund," and the portion thereof applicable to each improvement shall be separately kept by the Comptroller and the same are hereby pledged to the payment of the cost and expenses of such improvement and the Comptroller is authorized and directed to pay therefrom the costs and expenses of such improvement upon the order of the department or the authorized officer thereof.

2. The department shall, on or before September 1 following the issuing of any obligations and annually thereafter, prepare a statement of the amount to be raised during the ensuing year, in order to retire the obligations maturing during such year, together with the interest thereon and the estimated cost of maintenance of such improvement for the ensuing calendar year. Such statement shall be approved by the Comptroller; it shall show the amount of the proportional share thereof to be paid by each county, town, city or village respectively as determined by the department, and such county, town, city or village shall cause the same to be assessed, levied and collected in the same manner as provided by law with reference to general taxes, and paid to treasurer of the county, who shall forthwith forward the same to the Comptroller to be by him paid into the river improvement district fund applicable to such improvement; it shall also show the amount of the proportional share thereof to be paid by the lands and properties collectively in such improvement district within each county during such year, to be assessed, levied and collected as hereinafter provided. Copies of this statement shall be transmitted on or before September 1 to the Comptroller, the clerk of the county legislative body, or such other similar official as shall have been designated by the county legislative body, the clerk of each town, the mayor of each city and the mayor of each village affected by such improvement.

3. The assessors of each town and city included in such improvement district are hereby required to enter in a separate column in the annual assessment roll of such town or city before the delivery thereof to the county legislative body the description by number corresponding with the number thereof on said survey, map and descriptions so filed in the county clerk's office, each parcel of land and each designation or description of property within the county in such improvement district, together with the name of the then owner or owners thereof as far as the same can be ascertained by the assessors, and set opposite such number and description of each separate parcel or property, in the column of the roll for the total assessed valuation of property, the amount of benefit by reason of such improvement received by such parcel or property as stated and specified in the determination of the department as modified by the court if so modified, and recorded in the office of the clerk of the county.

4. The county legislative body shall each year at the time the annual tax levy is made levy upon each separate parcel and property in the county within such improvement district appearing upon the assessment rolls of the towns and cities included therein as herein provided, such portion of the amount to be paid by all of the property in the county within such improvement district appearing by the statement of the department and the Comptroller made to the board as in title 23 of this article provided as the amount so assessed against such parcel or property on the rolls for benefit accruing thereto bears to the aggregate amount so assessed on the rolls against all of such lands and properties, and the taxes so levied shall be collected in the same manner as general taxes are levied and collected, and shall be like liens as general taxes until the amount thereof is paid to the county treasurer of the county, superior in force and effect to all other liens except unpaid general taxes; provided, however, that the collection of such tax shall only be enforced by a sale of the land or property assessed.

5. On or before the first day of June in each year the county treasurer shall pay the amount so to be raised in his county, as shown

by the statement of the department and Comptroller of the previous year, to the Comptroller, who shall pay the same into the river improvement district fund. The tax collectors and county treasurers collecting and paying such taxes to the Comptroller shall be governed by and have all the powers specified in the Real Property Tax Law, which formerly were specified in articles 4 and 7 of the Tax Law for the collection of taxes and sales of property by county treasurers for unpaid taxes and redemption of lands.

6. In the event that obvious errors or discrepancies should be discovered in any assessment of benefits or apportionment of cost made under the provisions of title 23 of this article, the department may correct the same by filing corrected copies of the statement of such assessment and apportionment and following the procedure specified above. Should such correction be made the county legislative body are empowered to levy additional sums on or to give credit to certain parcels to the end that the amount collected from each parcel shall be what it should have been had an error not been made. Such county legislative body is also empowered to apply to the department for an adjustment of assessments among the various parts into which an original parcel may be subdivided. The department shall file and record its findings in such cases as amendments to the original or corrected assessment, and shall give notice to the parties affected, but need hold no hearing thereon unless such hearing be demanded within ten days after notice is given by a party affected. None of the above proceedings shall be held to reopen the determination of an assessment or apportionment, or both, except as to the particular matter involved. Should the department at any time find that a former assessment or apportionment appears with the lapse of time or in the light of new knowledge and experience to have become inequitable it may so declare by written order and proceed to review the whole matter by following the full procedure laid down in section 15-2303.

§ 15-2313. Operation, maintenance, repair and extension of river improvements.

1. The care, operation and maintenance of any works of the river improvement district shall be subject to the control and supervision of the department. It shall be the duty of the department to maintain any works constructed by it in serviceable condition. To that end the department is authorized to hire employees, purchase or rent land, buildings, tools or machinery, to let work by contract or to carry out projects by day labor. The procedure to be followed for the authorization, financing and assessment of the cost of such work or purchases shall be that specified in section 15-2303 except that proceedings may be initiated by the department of its own motion. In cases where a permanent maintenance or operating force is necessary, the department may annually prepare a maintenance budget which shall be treated as a repair project under subdivision 2 below.

2. Major repairs, alterations, extensions and improvements in any river improvement district may be made by the department on petition therefor and after procedure thereon similar to that specified in section 15-2303 hereof, for original construction. If additional surveys are required, they may be authorized and paid for as provided in section 15-2303 hereof, except that the cost of surveys and other expenses may be included in the cost of the improvement and assessed on the properties benefited in accordance with the benefits to be derived from such improvements. Except where the department shall otherwise determine, the cost of improvements and repairs on works already built under the provisions of title 23 of this article, shall be assessed in the same manner as the original cost was assessed, but the department may make a new assessment by following the procedure above specified. Any such project for repairs, alterations, extensions and improvements may be initiated by the department.

§ 15-2315. Unlawful interference with improvement works.

It shall be unlawful for any person to damage, alter, change or interfere with any works constructed under the provisions of title 23 or to open or close, or cause to be opened or closed, a gate or gates in any dam or dike or a gate in any head race or obstruct any channel

constructed under title 23 so far as the same relates to such improvements, without the consent of the department. After the improvement of any channel or watercourse has been authorized it shall be unlawful for any person or public authority to construct any dam or other structure on the bed of such stream or any bridge across it until the department has found that such construction or bridge will not unduly affect the projected or completed improvement.

§ 15-2317. Construction of reservoir on state-owned lands in a forest preserve.

If as a part of any project for the improvement of a district it is necessary to construct a reservoir on any part of the forest preserve, the department must, before making the final order, cause such lands to be accurately surveyed and the boundaries of the lands needed and the high flow line of the reservoir to be accurately fixed and thereafter, after due notice, to hold a public hearing as to whether such lands are required for such public use and, if so required, as to what will be a reasonable return to the state upon the value of the rights and property of the state so used and the services of the state as to such lands if such improvement is made. If it be determined that such lands are so required, such determination must be incorporated in the final order with a statement of the boundaries, the high flow line, the acreage and the amounts to be paid to the state for the lands and services. Such payments to the state and the cost of building such portions of the reservoir as are on state forest preserve lands shall be apportioned like other costs and expenses on the municipalities, other public corporations and properties benefited to the extent of the benefits received. If additional land is required it shall be acquired or taken in the name of the state and the entire reservoir shall be the property of the state, although paid for by the district and dedicated for the purposes for which constructed. Such reservoir shall always be operated by the department or other state authority for the benefit of the district. The reasonable return to the state shall be fixed for terms not exceeding ten years and may be changed at the beginning of any new term. The high flow line of a reservoir as referred to in title 23 of

this article is hereby defined as the level of the water in the reservoir when the greatest flood reasonably to be expected is passing over the spillway of the dam with all outlet gates closed. Before any such state lands are flooded, the timber shall be removed therefrom and the construction thereof shall be approved by the Commissioner of Health as not creating or tending to create any unsanitary condition.

§ 15-2319. Payment by the state of part of cost of river improvement.

Should the department find that the state of New York properly should bear a part of the cost of any river improvement, it is hereby authorized to so recommend to the Legislature and it may not proceed further with the project until the Legislature has made the necessary provisions for the payment of such costs or unless the project be so modified as to eliminate state contributions to the cost thereof. Except under the above circumstances the state shall be liable for no costs in connection with any such improvement except that the salaries and general expenses of the members of the department not specifically assigned to the particular project are not to be assessed upon the district.

§ 15-2321. River improvement district with federal aid.

1. In the event that any agency of the government of the United States shall be willing to perform, direct or finance any work for the improvement of a river, as specified in title 23 of this article, in such manner that the greater part of the cost of such work shall be paid by such government, the department shall have power to form a river improvement district covering the areas to be benefited by such work by following the procedure set forth in this section, in lieu of the procedure specified in the preceding sections of title 23 of this article.

2. The department may proceed of its own motion to form such district and to authorize the proposed work as though a petition therefor had

been filed as provided in section 15-2303. It may negotiate with the federal government, investigate the proposed district and prepare a written report thereon, describing the proposed district and the proposed works, and giving estimates of the cost of the various parts of the work which may be a charge against the proposed district. Such report shall be filed and notice of such filing and of a hearing thereon given as provided in section 15-2303, except that the period of notice provided for in section 15-2303 shall be halved. After the final hearing the department shall determine whether it is in the public interest to form the district and to proceed with the work and in general terms, what public corporations and lands will be benefited thereby. These matters shall be embodied in a written order, which shall, if the action is favorable, contain orders to make surveys, assessments, enter into agreements with agencies of the federal government, acquire lands and rights in lands and all other matters which may be needful for the carrying out of the proposed project. Such written order shall state whether it is planned to issue obligations pursuant to the Local Finance Law. Certified copies of the determination and order shall be filed and notice of such filing given. Such determination and order may be reviewed pursuant to section 15-0905, but application for review must be made within ten days after such filing. If no review is had, the department shall cause the same to be recorded. The district shall be held to have been formed on the date of such final order, but such formation shall not be effective until such order, as made or as modified on review, shall have been recorded.

3. As soon as the formation of the district becomes effective, the department shall have full power to enter into agreements with the proper officials of the federal government or of other agencies of the state, to acquire or to appropriate lands and rights in lands, including sites for camps and appurtenant facilities, access roads, borrow pits, quarries, spoil banks and all necessary and proper matters, to incur contractual obligations, to employ the necessary personnel and generally to do whatever is necessary to carry out the proposed project or projects.

4. After such district is formed and the original federal project

authorized, major changes in such project, additional federal projects, changes in district boundaries necessitated by such federal projects or the raising of required additional funds for the work may be authorized by following the pertinent portions of the procedure in section 15-2303 above.

5. Except for such projects as may be carried out by the federal government, any district formed under the provisions of subdivision 2 above shall thereafter continue as a river improvement district, as though formed under the provisions of section 15-2303.

TITLE 25

JOINT RIVER REGULATING, RIVER IMPROVEMENT AND DRAINAGE IMPROVEMENT DISTRICTS

Section 15-2501. Formation of joint districts.

15-2503. Finances.

15-2505. Powers of the department.

§ 15-2501. Formation of joint districts.

1. A river regulating district formed and established under the provisions of title 21 of this article may be given extended powers and duties by the formation by the department of a river improvement or drainage improvement district, or both, which districts shall have the same boundaries as the river regulating district, shall be joined with it as one body corporate and subject to the general supervision of the department and shall be administered by the board of the river regulating district. If this is done, the board shall thenceforth exercise the powers of the department as set forth in title 19 and title 23 of this article, except those under sections 15-1945 and 15-1957 and as otherwise provided below. Whenever the department is empowered to set up districts under title 19 and title 23 of this article, the board may, by the same procedure, set up river or drainage improvement sub-districts which shall not be separate bodies corporate but shall be financial and assessment entities and each of which shall have an

association. Any function which title 19 and title 23 specify to be performed by the Department of Transportation or the Commissioner thereof shall be performed by the board through its engineering forces, and legal matters may be handled by counsel to the board. Whenever the statute requires the board to file in final form orders, statements, schedules, reports, plans, or other papers, to give notice of such filing and, after review, if any, to record or file the same such papers may not be filed except with the consent and approval of the department. All contract plans and specifications must similarly receive such approval to make them valid. All contracts must be so approved before they are signed and all acts authorizing the borrowing of money, making of assessments, or statements of the amounts which must be collected with annual taxes, must be approved by the department before they are submitted to the Comptroller. In proper cases, any such district may be assessed as an entity for benefits derived from the operation of another sub-district or the construction of a regulating reservoir.

2. Proceedings for the formation of a joint district shall be as nearly as may be those set forth in title 19 or title 23 as the case may be. They shall be initiated by a written petition filed with the department. On receipt thereof the department shall make such investigation as it deems necessary, shall set the time and place for a hearing thereon and shall give notice of the same by publication pursuant to the provisions of subdivision 1 of section 15-0903. At the hearing, the department will hear the applicants and the board, and such objectors as have filed written objections. After the hearing the department shall approve, modify and approve or reject the application according to what it finds to be the best interest of the people of the state. The action of the department shall be in the form of a signed written order, copies of which shall be filed in the offices of the clerk of each county, town, city or village, any part of which lies within the proposed district. Notice of such filing shall be given by publication and the acts of the department may be reviewed provided such review is initiated within sixty days of the date of the order. If not reviewed or if confirmed by the courts reviewing the matter, the order shall be recorded in the offices of the clerks of the various counties; thereupon the order shall become final and the joint district shall be

deemed to have been formed on the date of the order. Certified copies of such order shall be served on the board and shall be its authority to act for the new district.

§ 15-2503. Finances.

The financial affairs of each sub-district shall be handled as a unit and in accordance with the provisions of title 25 of this article which apply thereto. Compensation of the members of the board, salaries of regular employees of the regulating district, together with expenses and general operating costs shall be allocated by the board on a time basis among the sub-districts and paid from district funds. Such payments shall not operate to change the status of any member, officer or employee, nor shall they result in an increment in the rate of payment made to them, computed on an annual basis. Preliminary costs incurred in the formation of a sub-district shall be reimbursed from sub-district funds if the sub-district is formed; otherwise they shall be a charge against the signers of the petition. Funds raised under the provisions of title 21 of this article cannot be used in connection with any river or drainage improvement district or sub-district.

§ 15-2505. Powers of the department.

Nothing in title 25 of this article shall be held to curtail the powers of the department as to river or drainage work within a river regulating district prior to the time that such district is charged with the powers and duties above set forth as to river or drainage work or both, nor in any event shall the powers of the department under sections 15-1945 and 15-1957 be curtailed or changed. Should the department at any time form or have formed a river or drainage improvement district in a basin now or subsequently formed into a river regulating district, which district is later given the extended powers herein provided, such river or drainage improvement district shall become a sub-district administered by the board. In such cases, all outstanding indebtedness and financial liabilities of the district shall remain undisturbed and

not in anywise altered by the transfer and shall be met by the board.

TITLE 27

WILD, SCENIC AND RECREATIONAL RIVERS SYSTEM

Section 15-2701. Statement of policy and legislative findings.

15-2703. Definitions.

15-2705. Jurisdiction of the commissioner and the Adirondack park agency.

15-2707. Classes of river areas includable in system, criteria; management objectives.

15-2709. Administration of the system.

15-2711. Establishing boundaries.

15-2713. Initial designations.

15-2714. Additional designations.

15-2715. Designation of additions to the system.

15-2717. Cooperation with the federal government.

15-2719. Cooperation clause.

15-2721. Conflict with other laws.

15-2723. Penalties and enforcement.

§ 15-2701. Statement of policy and legislative findings.

1. The legislature hereby finds that many rivers of the state, with their immediate environs, possess outstanding natural, scenic, historic, ecological and recreational values.

2. Improvident development and use of these rivers and their immediate environs will deprive present and future generations of the benefit and enjoyment of these unique and valuable resources.

3. It is hereby declared to be the policy of this state that certain selected rivers of the state which, with their immediate environs, possess the aforementioned characteristics, shall be preserved in free-flowing condition and that they and their immediate environs shall be protected for the benefit and enjoyment of present and future

generations.

4. The purpose of this act is to implement this policy by instituting a state wild, scenic and recreational rivers system, by designating the initial components of that system and by prescribing the methods by which and standards according to which additional components may be added to the system from time to time.

§ 15-2703. Definitions.

Except as otherwise required by the context, the following terms when used in this act shall be construed as follows:

1. "Agency" means the Adirondack park agency as created by chapter seven hundred and six of the laws of nineteen hundred seventy-one, and whose functions, powers and duties are provided for in article twenty-seven of the executive law.

2. "Commissioner" means the commissioner of environmental conservation, his successors in office and any agency which may succeed to the duties of such office.

3. "Development" means any activity which materially affects the existing condition, use or appearance of any land, structure or improvement including the actual or effective division or proposed division of land into lots, parcels or sites whether contiguous or not, for the purpose of sale, lease, license or any form of separate ownership or occupancy as part of a common scheme or plan, (including any grading, road construction, installation of utilities or other improvements or any other development preparatory or incidental to any such division) by any person or by any other person controlled by, under common control with or controlling such person or by any group of persons acting in concert as part of a common scheme or plan but shall not include the division of any land resulting from bona fide devise, inheritance, gift or the lease of land for hunting and fishing.

4. "Forest Management" means forestry practices, including harvesting of a forest woodland or plantation, the construction, alteration or maintenance of wood roads, skidways, landings and fences and related research and educational activities.

5. "Free flowing" means existing or flowing in natural condition without impoundment, diversion, straightening, riprapping, or other modification of the waterway, except for stream improvement structures for fisheries management purposes expressly authorized in section 15-2709 of this chapter.

6. "Improvement" means any change in or addition to land, including but not limited to grading, filling, excavating or adding banks, fences, dikes, ditches, pipelines, poles, electrical conduits, roads, streets, curbs, gutters, sidewalks, driveways, parking lots or spaces.

7. "Motor vehicle" means a device for transporting personnel or material, incorporating a motor or an engine of any type for propulsion and with wheels, tracks, skids, skis, air cushion or other contrivance for traveling on, or adjacent to land and water or through water.

8. "Person" means any individual, corporation, partnership, joint venture, association, organization, government or any agency or political subdivision thereof, or any other entity.

9. "River" means a flowing body of water or a section, portion or tributary thereof, including rivers, streams, creeks, runs, kills, rills, branches, or lakes. "River area" means the term river and the land area in its immediate environs as established by the commissioner or the agency, but not exceeding a width of one-half mile from each bank thereof.

10. "Road" means any highway, hard-surfaced road, improved or dirt road.

11. "Stream improvement structures for fishery management purposes" means structures and improvements, including but not limited to, fish

barrier dams, fish passage structures, minor diking, cribbing, bank stabilization and stream deflectors and other structures or improvements designed solely for fishery management purposes which do not materially alter the natural character of the waterway.

12. "Structure" means any object constructed, installed or parked on land to facilitate land use, such as buildings, mobile homes, sheds, signs, tanks, outdoor lighting and any fixtures, additions and alterations thereto and trailers, travel trailers, campers, or tents constructed, installed, or parked on land for other than a temporary period or for a purpose other than transient occupancy and any fixtures, additions or alterations thereto.

13. "System" means the rivers designated as wild, scenic and recreational rivers in this part.

§ 15-2705. Jurisdiction of the commissioner and the Adirondack park agency.

Notwithstanding provisions of any other general or special law, the functions, powers and duties encompassed by this section shall be vested in the Adirondack park agency as to any privately owned part of a river area within the Adirondack park as defined by law which may become part of the system; however, the commissioner shall have exclusive jurisdiction over all other river areas in the state and of all parts of river areas owned by the state located within the Adirondack park which may become part of the system. This section shall not be construed to divest the commissioner from the exercise of functions, powers and duties which have not been delegated by law to the agency. If the commissioner or the agency shall conduct any studies, proceedings or activities under this section or otherwise which affect or may affect river areas, any part of which are within the Adirondack park, they shall consult and cooperate to carry out the purposes of this title.

§ 15-2707. Classes of river areas includable in system, criteria;

management objectives.

1. The following types of river areas are eligible for inclusion in the system. All state agencies are hereby directed to pursue policies with respect to their respective activities, functions, powers and duties which are designated to enhance the conditions of designated rivers in accordance with the criteria set forth for such rivers in this section.

2. All rivers in the system shall be relatively free of pollution and the water quality thereof of a standard sufficiently high to meet the primary management purposes enumerated herein.

a. Wild river. Those rivers or sections of rivers that are free of diversions and impoundments, inaccessible to the general public except by water, foot or horse trail, and with river areas primitive and undeveloped in nature and with development, if any, limited to forest management and foot bridges.

(1) The minimum length of any one section shall be five miles.

(2) In general, the minimum distance from the river shore to a public highway or a private road open to the public for motor vehicle use, shall be one-half mile except where a physical barrier exists which effectively screens the sight and sound of motor vehicles.

(3) Management of wild river areas shall be directed at perpetuating them in a wild condition as defined herein.

b. Scenic river. Those rivers, or sections of rivers, that are free of diversions or impoundments except for log dams, with limited road access and with river areas largely primitive and largely undeveloped or which are partially or predominantly used for agriculture, forest management and other dispersed human activities which do not substantially interfere with public use and enjoyment of the rivers and their shores.

(1) There shall be no minimum length of any one section.

(2) Management of scenic river areas shall be directed at preserving and restoring the natural scenic qualities of such rivers.

c. Recreational river. Those rivers, or sections of rivers, that are

readily accessible by road or railroad, that may have development in their river area and that may have undergone some impoundment or diversion in the past.

(1) There shall be no minimum length of any one section.

(2) Management shall be directed at preserving and restoring the natural scenic and recreational qualities of such river areas.

d. Exceptions. Limited existing exceptions to the criteria for all three classes of rivers will not automatically exclude rivers from designation. Rather, the river area shall be examined as a whole with its overall worthiness for inclusion being the deciding factor.

§ 15-2709. Administration of the system.

1. The wild, scenic and recreational rivers system shall be administered in accordance with their respective jurisdictions by the commissioner or the agency according to policies and criteria set forth in this title upon establishment of the boundaries of each river area in accordance with section 15-2711 of this chapter. The commissioner or agency shall make and enforce regulations necessary for the management, protection, and enhancement of and control of land use and development in the wild, scenic and recreational river areas. No regulations shall be promulgated unless a publicized public hearing is held in the environmental conservation region encompassing the affected area by the commissioner or agency. In such administration, primary emphasis shall be given to protecting ecological, recreational, aesthetic, botanical, scenic, geological, fish and wildlife, historical, cultural, archeological and scientific features of the area. In connection with such administration, the commissioner or the agency may provide for the preparation and implementation of management plans for individual river areas or significant portions thereof.

2. After inclusion of any river in the wild, scenic and recreational rivers system, no dam or other structure or improvement impeding the natural flow thereof shall be constructed on such river except as expressly authorized in paragraphs b and c of this subdivision.

Notwithstanding anything herein contained to the contrary, existing land uses within the respective classified river areas may continue, but may not be altered or expanded except as permitted by the respective classifications, unless the commissioner or agency orders the discontinuance of such existing land use. In the event any land use is so directed to be discontinued, adequate compensation therefor shall be paid by the state of New York either by agreement with the real property owner, or in accordance with condemnation proceedings thereon. The following land uses shall be allowed or prohibited within the exterior boundaries of designated river areas depending on the classification of such areas:

a. In wild river areas, no new structures or improvements, no development of any kind and no access by motor vehicles shall be permitted other than forest management pursuant to forest management standards duly promulgated by regulations.

b. In scenic river areas, the continuation of present agricultural practices, the propagation of crops, forest management pursuant to forest management standards duly promulgated by regulations, limited dispersed or cluster residential developments and stream improvement structures for fishery management purposes shall be permitted. There shall be no mining, excavation, or construction of roads, except private roads necessary for residential, agricultural or forest management purposes, and with the further exception that public access through new road construction may be allowed, provided that there is no other such access within two land miles in either direction.

c. In recreational river areas, the lands may be developed for the full range of agricultural uses, forest management pursuant to forest management standards duly promulgated by regulations, stream improvement structures for fishery management purposes, and may include small communities as well as dispersed or cluster residential developments and public recreational areas. In addition, these river areas may be readily accessible by roads or railroads on one or both banks of the river, and may also have several bridge crossing and numerous river access points.

3. In addition to the provisions of article 70 of this chapter and rules and regulations adopted thereunder, the rules and regulations adopted by the department pursuant to this title to implement its processing of permit applications, modifications, suspensions and revocations shall govern permit administration by the department under this title.

§ 15-2711. Establishing boundaries.

The commissioner shall, within one year after a river has been included in the state wild, scenic and recreational rivers system, establish detailed boundaries of the river area associated with that river, except that in the case of river areas within the Adirondack park said boundaries shall be mutually agreed upon by the commissioner and the agency. Said boundaries shall not exceed a width of one-half mile from each bank thereof.

§ 15-2713. Initial designations.

The following rivers which are located within the boundaries of the Adirondack park, as now defined by law, are to be initially included in this system being classified by the above-stated criteria:

1. Wild rivers

a. Cedar river--Approximately seven miles from the southwest boundary of lot 82, township 17, Totten and Crossfield's Purchase to the Hamilton county line.

b. Cold river--Approximately fourteen miles from the Duck Hole to the confluence with the Raquette river and the entire three-mile length of Ouluska Pass brook.

c. Hudson river--Approximately ten and one-half miles from the confluence of the Cedar river to the confluence with Boreas river.

d. Indian river--Approximately thirteen miles from Brook Trout lake to the confluence with the south branch of the Moose river.

e. Opalescent river--Approximately eleven miles from Flowed Lands to the confluence with the Hudson river.

f. East branch of the Sacandaga river--Approximately eleven and one-half miles from Botheration pond to a point one-half mile above the confluence with Cook brook.

g. West branch of the Sacandaga river--Approximately seven miles from the confluence of the Piseco lake outlet to the confluence with Dugway creek.

h. West Canada creek--Approximately eight miles from Mud lake to the Old Mitchell dam site.

2. Scenic rivers

a. Ampersand brook--Approximately eight miles from Ampersand pond to the confluence with the Raquette river.

b. Ausable river--Approximately nine miles from Marcy swamp to St. Hubert's.

c. Boreas river--Approximately eleven and one-half miles from Cheney pond to the confluence with the Hudson river.

d. Bouquet river--Approximately six miles of the North Fork from the headwaters on Dial mountain to the bridge on route 73. Approximately five and one-half miles of the South Fork from the headwaters to the bridge on route 73.

e. Cedar river--Approximately five miles from the Hamilton County line to the confluence with the Hudson river.

f. Hudson river--Approximately nine miles from the hamlet of Newcomb to the confluence with the Cedar river and approximately four miles from the confluence with the Boreas river to a point one mile north of the hamlet of North river.

g. South branch of the Moose river--Approximately eighteen miles from the east boundary of the state land immediately west of Little Moose lake to the west boundary of state land near Rock Dam and approximately six and one-half miles from the east boundary of state land just north of Woodhull mountain downstream to the state land boundary near the confluence with the middle branch of the Moose river.

3. Recreational rivers

a. West branch of Ausable river--Approximately five miles from the state boundary along the River road east of Big Cherry Patch pond downstream to the state boundary immediately west of High Falls.

§ 15-2714. Additional designations.

In addition to the rivers designated in section 15-2713 of this chapter, the following rivers are included in the system, being classified by the criteria stated in section 15-2707:

1. Wild rivers

a. Cedar river - Approximately seven and three-tenths miles from the outlet of Cedar lakes to a point where a road crosses the river approximately one and one-half miles upstream of Cedar river flow.

b. Kunjamuk river - Approximately eight miles from the outlet of South pond to a fish barrier dam near the southwest boundary of lot 9, township 31, Gorton Tract.

c. Main branch of the Oswegatchie river - Approximately eighteen and one-half miles from the Partlow Mill dam to the southernmost boundary

between private and state land at Inlet.

d. Middle branch of the Oswegatchie river - Approximately fourteen and one-half miles from the north boundary of lot 27, Watson's East Triangle to a point one mile downstream of the confluence with Wolf creek.

e. Piseco outlet - Approximately four and one-fifth miles from a point one-half mile east of the route 10 bridge crossing to the confluence with the West Branch of the Sacandaga river.

f. West branch of the Sacandaga river - Approximately nine miles from the source near Silver lake mountain to the Silver lake wilderness boundary near route 10 and approximately two and seven-tenths miles from the confluence with Cow creek to the confluence with Piseco outlet.

g. South branch of West Canada creek - Approximately five and nine-tenths miles from the headwaters near T-Lake falls to a footbridge crossing located approximately one mile upstream of the Floe.

2. Scenic rivers

a. Black river - Approximately seven and eight-tenths miles from the point where Farr road crosses the river to the point where the river intersects the Adirondack park boundary.

b. Bog river - Approximately seven and three-tenths miles from the dam below Hitchins pond to Big Tupper lake.

c. Blue Mountain stream - Approximately nine miles from the outlet of Clear pond to the confluence with Pleasant lake stream.

d. Carmens river - Approximately two and one-quarter miles from its headwaters at the north boundary of Cathedral Pines Park (formerly Camp Wilderness), Suffolk county, southerly to its intersection with the southern boundary of Camp Sobaco (Girl Scout Camp).

e. Carmens river--Approximately two and one-half miles from Yaphank

avenue, Suffolk county, southerly to the Concrete Wing dam in Southhaven park.

f. Carmens river--Approximately two and one-half miles from the south side of Sunrise highway, Suffolk county, southerly to the mouth of the river (a line between Long Point and Sandy Point) at its confluence with Great South Bay.

g. Cedar river - Approximately ten miles from a point where a road crosses the river one and one-half miles upstream of Cedar river flow to a point where a southerly extension of the northeast state land boundary of lot 96, township 33, Totten and Crossfield's Purchase, would intersect the river.

h. Deer river - Approximately six and two-tenths miles from the outlet of Deer river flow to a point where the river intersects the Adirondack park boundary.

i. East Canada creek - Approximately twenty and nine-tenths miles from Powley Place to a point at which the creek intersects the Adirondack park boundary near Sprite creek at the southwest corner of lot 45, town of Oppenheim, Lott and Low's Patent.

i-1. The Genesee river within Letchworth State Park.

j. Middle branch of the Grasse river - Approximately fourteen and one-half miles from the confluence of Blue Mountain stream and Pleasant lake stream to the confluence of the South Branch of the Grasse river.

k. North branch of the Grasse river - Approximately twenty-five and four-tenths miles from the outlet of Church pond to a point where the North Branch intersects the Adirondack park boundary.

l. South Branch of the Grasse river - Approximately thirty-five and two-tenths miles from the outlet of Center pond to the confluence with the outlet of Allen pond, and approximately three and seven-tenths miles from the most southerly point where the South Branch of the Grasse river

intersects the Adirondack park boundary, north to the confluence with the Middle Branch of the Grasse river.

m. Independence river - Approximately twenty-six miles from the outlet of Little Independence pond to the point where the Sperryville bridge crosses the river.

n. Jordan river - Approximately eighteen miles from the outlet of Marsh pond to Carry Falls reservoir.

o. Kunjamuk river - Approximately ten and four-tenths miles from a fish barrier dam near the southwest boundary of lot 9, township 31, Gorton Tract, to the confluence with the Sacandaga river.

p. Long Pond outlet - Approximately sixteen miles from the outlet of Long pond to the confluence with the West Branch of the St. Regis river.

q. Marion river - Approximately five miles from the outlet of Utowana lake to Raquette lake.

r. Main branch of the Moose river - Approximately fifteen and four-fifths miles from the confluence of the South and Middle Branches of the Moose river to a point where the Main Branch intersects the Adirondack park boundary.

s. South branch of the Moose river - Approximately fourteen and two-fifths miles from the west boundary of state land near Rock dam to the east boundary of state land north of Woodhull mountain.

s-1. North Branch of the Moose river -- Approximately six miles from the outlet of Big Moose lake to the confluence with the outlet of Goose Pond.

s-2. Nissequogue river - Approximately one and four-tenths miles from the dam at the outlet of New Mill Pond to the pedestrian bridge south of Route 25/25A including its tributaries and ponds identified as P288 Phillips Millpond, P289 Willow Pond, P290 Upper Vail Pond, P291 Webster

Pond, and P291a Lower Vail Pond on a certain map titled "Official Classifications - Surface Waters of Western Suffolk County," published by the water resources council and prepared by the New York state department of health.

t. Middle branch of the Oswegatchie river - Approximately nine miles from the outlet of Walker lake to the north boundary of lot 27, Watson's East Triangle and approximately fourteen and two-fifths miles from a point one mile downstream of the confluence with Wolf Creek to a point where the Middle Branch intersects the Adirondack park boundary at the southeast boundary of lot 993, township of Diana, Macomb's Purchase, great tract 4.

u. West branch of the Oswegatchie river - Approximately seven miles from the outlet of Buck pond to a point approximately one mile upstream of Round pond at the point where a foot and snowmobile bridge crosses the West Branch.

v. Otter brook - Approximately ten miles from the outlet of Lost pond to the confluence with the South Branch of the Moose river.

w. Raquette river - Approximately twenty miles from the outlet of Long lake to the confluence with a small stream from the northeast, located approximately one mile downstream from Trombley Landing, and approximately thirteen and eight-tenths miles from the confluence with Dead creek to a point where the river intersects the north boundary of lot 1, township 5, Tannery Lot near Carry Falls reservoir.

x. Red river - Approximately nine and seven-tenths miles from the headwaters of the river to the confluence with the South Branch of the Moose river.

y. Rock river - Approximately six and nine-tenths miles from the O'Neil flow road crossing to the confluence with the Cedar river.

z. Round lake outlet - Approximately two and seven-tenths miles from the outlet of Round lake to the confluence with the Bog river.

aa. East branch of the St. Regis river - Approximately fourteen and one-half miles from a point where route 30 crosses the East Branch near Meacham lake, to a point one-half mile upstream from Everton falls.

bb. Main branch of the St. Regis river - Approximately fifteen and five-tenths miles from a point where a private road to Bay pond crosses the Main Branch in lot 16, township 17, Macomb's Purchase, great tract 1, to the confluence with Balsam brook.

cc. West branch of the St. Regis river - Approximately thirty-five miles from the outlet of Little Fish pond to a point one-half mile downstream from the confluence with Fenner Meadow brook.

dd. West Canada creek - Approximately seventeen miles from a point where the creek intersects the state land boundary approximately two miles upstream of the Old Mitchell Dam site, to the route 8 bridge crossing near Nobleboro.

ee. West Stony creek - Approximately seven and seven-tenths miles from the Tannery road crossing to the confluence with Hatch brook.

ff. Peconic river - Approximately ten and one-half miles from the western boundary of the Red Maple swamp to the Long Island railroad bridge between Connecticut and Edwards Avenue and approximately three miles from Middle Country Road (State Route 25) to the confluence with the previously described segment of the Peconic including tributaries T112-5, T112-6 and T112-7.

3. Recreational rivers

a. East branch of the Ausable river - Approximately twenty-eight and three-tenths miles from St. Huberts to the confluence with the West Branch.

b. Main branch of the Ausable river - Approximately twenty-two miles from the confluence of the East and West Branches of the Ausable river

to Lake Champlain.

c. West branch of the Ausable river - Approximately twenty-nine and one-half miles from the headwaters of the West Branch near Heart lake to the confluence with the East Branch.

d. Black river - Approximately six and three-fifths miles from the outlet of North lake to a point where Farr road crosses the river.

e. Bouquet river - Approximately forty-seven and seven-tenths miles from the confluence with the North Fork of the Bouquet river to Lake Champlain.

f. Carmens river - Approximately two miles from its intersection with the southern boundary of Camp Sobaco (Girl Scout Camp), southerly to Yaphank Avenue, Suffolk county. However, the rules and regulations applicable to recreational rivers as set forth in title twenty-seven of this law shall not apply to any lands or structures included in the proposed Yaphank historic district. This exclusion shall take effect only upon the creation of said Yaphank historic district.

g. Carmens river - Approximately one mile southerly from the Concrete Wing dam in Southaven park, Suffolk county, to Sunrise highway.

h. Cedar river - Approximately eleven miles from a point at which a southerly extension of the northeast state land boundary parallel to the southwest boundary of lot 96, township 33, Totten and Crossfield's Purchase would intersect the river to the southwest boundary of lot 82, township 17, Totten and Crossfield's Purchase.

i. Connetquot river - Approximately five and three-fourths miles from Johnson Avenue, Suffolk county, south to the Sunrise highway.

j. South branch of the Grasse river - Approximately five and one-fifth miles from the confluence with the outlet of Allen pond to the most southerly point where the South Branch intersects the Adirondack park boundary.

k. Hudson river - Approximately twelve and seven-tenths miles from the confluence with the Opalescent river to a point where route 28N crosses the Hudson river at Newcomb and approximately forty-five and nine-tenths miles from a point one mile north of North river to the confluence with the Sacandaga river.

l. Independence river - Approximately one-half mile from a point where the Sperryville bridge crosses the river to a point where the river intersects the Adirondack park boundary.

m. Indian river - Approximately eight and three-tenths miles from the outlet of Indian lake to the confluence with the Hudson river.

m-1. Middle Branch of the Moose river -- Approximately thirteen and four-tenths miles from the confluence with the North Branch of the Moose river to the confluence with the South Branch of the Moose river.

m-2. North Branch of the Moose river -- Approximately thirteen miles from the confluence with the outlet of Goose Pond to the confluence with the Middle Branch of the Moose river.

n. Main branch of the Oswegatchie river - Approximately two and three-tenths miles from the southernmost boundary between private and state land at Inlet to Wanakena.

o. West branch of the Oswegatchie river - Approximately six and one-tenth miles from a point approximately one mile upstream of Round pond at the point where a foot and snowmobile bridge crosses the West Branch to a point where the river intersects the Adirondack park boundary.

p. Raquette river - Approximately twenty-two miles from the outlet of Raquette lake to the outlet of Long lake and approximately seventeen miles from the confluence of the Raquette river and a small stream from the northeast, at a point approximately one mile downstream from Trombley landing to the confluence with Dead creek.

q. Rock river - Approximately one and one-fifth miles from the outlet of lake Durant to the O'Neil flow road crossing.

r. East branch of the St. Regis river - Approximately six and one-tenth miles from a point one-half mile upstream of Everton falls to the confluence with the Main Branch of the St. Regis river.

s. Main branch of the St. Regis river - Approximately seven miles from the St. Regis Church to a point where a private road to Bay pond crosses the Main Branch in lot 16, township 17, Macomb's Purchase, great tract 1, and approximately eighteen miles from the confluence with Balsam brook to a point at which the river intersects the Adirondack park boundary.

t. West branch of the St. Regis river - Approximately five and one-half miles from a point one-half mile downstream of the confluence with Fenner Meadow brook to a point where the West Branch intersects the Adirondack park boundary.

u. East branch of the Sacandaga river - Approximately fourteen miles from a point approximately one-half mile above Cook brook to the confluence with the Main Branch of the Sacandaga river.

v. Main branch of the Sacandaga river - Approximately thirty-one miles from the outlet of Lake Pleasant to the inlet of Great Sacandaga lake.

w. West branch of the Sacandaga river - Approximately ten and three-fifths miles from the Silver lake wilderness boundary near the most upstream route 10 bridge crossing to the confluence with Cow creek and approximately seven and two-tenths miles from the confluence of Dugway creek to the confluence with the Main Branch of the Sacandaga river.

x. Salmon river - Approximately twelve and three-tenths miles from the outlet of Elbow ponds to the point where the river intersects the Adirondack park boundary.

y. Main branch of the Saranac river - Approximately sixty and two-fifths miles from the outlet of Upper Saranac lake to the point where the river intersects the Adirondack park boundary.

z. Schroon river - Approximately sixty-six and seven-tenths miles from the outlet of the former Dead Water pond to the confluence with the Hudson river.

aa. West Canada creek - Approximately eleven miles from the route 8 bridge crossing near Nobleboro to the Harvey road bridge crossing.

bb. South branch of West Canada creek - Approximately nine and seven-tenths miles from the footbridge crossing one mile upstream of The Floe to the confluence with the Main Branch of West Canada creek.

cc. West Stony creek - Approximately six miles from the Persch road crossing to the Tannery road crossing and approximately two and seven-tenths miles from the confluence with Hatch brook to the confluence with the Main Branch of the Sacandaga river.

dd. Ramapo river -- Approximately three and one-half miles from the Orange county line to the site of an abandoned power dam in the hamlet of Ramapo.

ee. Nissequogue river - Approximately one and four-tenths miles from state route 347 to the dam at the outlet of New Mill Pond including its tributaries identified as P292-1 to Brooksite Drive and two unnamed tributaries P292-2 and P292-3, and approximately five miles from the pedestrian walkway and dam at the outlet of Phillips Millpond to its confluence with Long Island sound including its tributaries and ponds connected therewith, specifically described as T-62 on a certain map entitled "Official Classifications-Surface Waters of Western Suffolk County", prepared by the New York state department of health and published by the water resources council.

ff. Shawangunk Kill river - From the border of Ulster and Orange

counties to its confluence with the Wallkill river.

gg. Peconic river - Approximately five and one-half miles from the Long Island railroad bridge between Connecticut and Edwards Avenue to Grangabel Park dam in Riverhead and approximately two miles of the Little River (tributary T112-1) from and including Wildwood Lake to its confluence with the Peconic.

hh. Fall Creek from the southern boundary of Cayuga Lake to the west face of the foot bridge running across Fall Creek, which foot bridge is located between Thurston Avenue on the west and Beebe Lake on the east. The boundaries of the river corridor shall be defined as follows:

DESCRIPTION OF NORTHERN BOUNDARY OF FALL CREEK RIVER CORRIDOR

Beginning at a point at the intersection of the high water mark of Cayuga Lake, on the southerly boundary of Cayuga Lake, and the northerly boundary of Fall Creek, said point being in the northerly boundary of Stewart Park; running thence northeasterly along the northerly boundary of Stewart Park to its intersection with the westerly boundary of the Lehigh Valley Railroad right-of-way; running thence in a southerly direction along the westerly edge of the Lehigh Valley Railroad right-of-way approximately 3,450 feet to a point located 50 feet northerly along said railroad from the north bank of Fall Creek; running thence in a southeasterly direction parallel with and 50 feet northerly from the north bank of Fall Creek crossing Cayuga Street to a point on the easterly boundary of Cayuga Street, located approximately 20 feet northerly from the north bank of Fall Creek, said point being the intersection of the easterly boundary of Cayuga Street with the extended line of a chain link fence on Ithaca School District property running approximately parallel with Fall Creek; running thence in a southeasterly direction along the extended line of the chain link fence and continuing along said chain link fence, approximately parallel to Fall Creek to the end of the chain link fence; continuing thence in a southeasterly direction along the extended line of said chain link fence approximately 5 feet to the south line of a sidewalk which runs through Ithaca School District property approximately parallel with Fall Creek; continuing thence along the south line of said sidewalk to the

intersection of the south line of said sidewalk with the westerly boundary of Lake Street; running thence perpendicular to Lake Street approximately 50 feet to the east boundary of Lake Street; running thence in a northwesterly direction along the east line of Lake Street approximately 75 feet to a point of the northwest corner of City Tax Parcel 12-1-1; running thence in an easterly direction along the northerly boundary of tax parcel 12-1-1 approximately 250 feet to the northeast corner of Tax Parcel 12-1-1; continuing thence on the same course along a line shown on Tax Maps Numbers 12 and 11 as a match line and along the northerly boundary line of Tax Parcel 6-2-1 approximately 600 feet to the northwest corner of Tax Parcel 11-1-1, said point being located approximately 12.5 feet westerly from the westerly boundary of Stewart Avenue; running thence easterly approximately 12.5 feet along the north boundary of Tax Parcel 11-1-1 to the westerly boundary of Stewart Avenue; running thence in a southeasterly direction along the southwesterly boundary of Stewart Avenue approximately 464 feet to the southeasterly corner of Tax Parcel 11-1-2; running thence in an easterly direction perpendicular to and across Stewart Avenue to a point in the easterly line of Stewart Avenue approximately 25 feet northerly of the northerly boundary of the Stewart Avenue bridge; running thence northerly and easterly along the easterly boundary of Stewart Avenue and southerly boundary of Fall Creek Drive as it curves to a point located approximately 145 feet southerly along Fall Creek Drive from the intersection of the east boundary of Fall Creek Drive and the south boundary of Thurston Avenue, said point being located at the intersection of the easterly boundary of Fall Creek Drive and a line extended westerly being a line 10 feet southerly from the southerly boundary of the tennis courts located southeasterly from the intersection of Thurston Avenue and Fall Creek Drive; running thence easterly along said extended line and 10 feet southerly from the southerly boundary of said tennis courts to the intersection of said line extended easterly and the northeasterly boundary of an asphalt path which runs southwesterly from Prudence Risley Hall to Thurston Avenue; running thence in a southeasterly direction along the northerly boundary of said asphalt path to the intersection of said asphalt path with the westerly boundary of Thurston Avenue; running thence southerly along the westerly boundary of Thurston Avenue to a point located 25 feet

northerly from the north edge of the gorge; running thence easterly parallel with and 25 feet northerly from the north edge of the gorge to its intersection with the line of the west face as extended northerly of the foot bridge over the gorge; running thence southerly to and along the west face of said foot bridge to a point in the center line of Fall Creek.

DESCRIPTION OF SOUTHERN BOUNDARY OF FALL CREEK RIVER CORRIDOR

Beginning at a point at the intersection of the high water mark at the south end of Cayuga Lake with the east bank of Cayuga Inlet; running thence southerly along the east bank of Cayuga Inlet approximately 1,050 feet to a point marking the intersection of the east bank of the Cayuga Inlet with the southwest corner of Tax Parcel 2-2-1; running thence easterly along the south boundary of Tax Parcel 2-2-1 approximately 600 feet to a point marked by a 2-inch square iron pin, said point being located approximately 100 feet southwesterly from the west bank of Fall Creek; running thence southeasterly approximately 1,290 feet to a point at the east side of the golf course access gate; running thence easterly approximately 80 feet to the eastern edge of Pier Road; running thence southeasterly along the east edge of Pier Road approximately 950 feet to the north edge of a gravel access road which runs to the Lehigh Valley Railroad right-of-way; running thence southeasterly along the north edge of said gravel access road to the westerly right-of-way of the Lehigh Valley Railroad; running thence northwesterly along said right-of-way to a point located approximately 50 feet southerly from the south bank of Fall Creek; running thence southeasterly parallel with and 50 feet southerly from the south bank of Fall Creek to the west edge of Woodland Place, being also the easterly right-of-way line of New York State Route 13; running thence southwesterly along the east right-of-way line of New York State Route 13 and the west side of Woodland Place to a point in the north boundary of Tax Parcel 13-1-5; running thence northeasterly and southeasterly along the south line of Woodland Place, being also the north lines of Tax Parcel Nos. 13-1-5, 13-1-6, and 13-1-7 215.6 feet to the west boundary of North Cayuga Street; continuing thence along the same course across Cayuga Street to a point being the northwesterly corner of Tax Parcel No. 5-2-1; running thence southeasterly along the northeasterly boundaries of Tax Parcel Nos. 5-2-1, 5-2-6, 5-2-7, 5-2-8,

5-2-9 and 5-2-10 a distance approximately 480 feet to the easterly corner of Tax Parcel No. 5-2-10, said point being the intersection of the north boundary of East York Street and the west boundary of North Tioga Street; running thence northerly along the west boundary of North Tioga Street to the bank of Fall Creek; running thence southeasterly along the bank of Fall Creek to the northwest corner of Tax Parcel No. 12-2-1; running thence southeasterly along the northerly boundary of Tax Parcel Nos. 12-2-1 and 12-2-2 360 feet to the northeast corner of Tax Parcel No. 12-2-2; running thence easterly along the northerly boundary of Tax Parcel No. 12-2-13 45.5 feet to the northeast corner of Tax Parcel No. 12-2-13; running thence southerly approximately 25 feet along the easterly boundary of Tax Parcel No. 12-2-13 to the northwest corner of Tax Parcel No. 12-2-12; running thence easterly along the northerly boundary of Tax Parcel No. 12-2-12 35.33 feet to a point; running thence southerly approximately 12.5 feet; and running thence easterly along the north boundary of Tax Parcel No. 12-2-12 approximately 40 feet to a point; continuing thence along the northerly boundaries of Tax Parcel Nos. 12-2-11, 12-2-10, 12-2-9, 12-2-8, 12-2-7, 12-2-6, 12-2-5 and 12-2-4 approximately 328.6 feet to the westerly boundary of Lake Street at the southwest corner of the Lake Street bridge over Fall Creek; continuing thence across Lake Street along the south edge of the Lake Street bridge over Fall Creek to a point in the easterly boundary of Lake Street; running thence southerly along the east boundary of Lake Street 401 feet to a point marking the intersection of the east boundary of Lake Street and the southerly boundary of Lincoln Street extended; continuing thence easterly along the southerly boundary of Lincoln Street extended 180 feet to a point marking the southeast corner of Lincoln Street extended; continuing thence on the same course approximately 75 feet to a point in the east boundary of Tax Parcel No. 12-7-4; running thence northerly along the east boundary of Tax Parcel No. 12-7-4 approximately 69 feet to a point; running thence easterly along the northerly boundary of Tax Parcel No. 11-3-1 100 feet to a point at the southerly boundary of Old Penstock; running thence easterly along the southerly boundary of said Old Penstock a chord distance of approximately 362.5 feet to a point; in the westerly boundary of Tax Parcel No. 11-3-3; running thence southerly along the westerly boundary of Tax Parcel No. 11-3-3 approximately 68 feet to a point marking the northwesterly corner of Willard Way; running

thence southeasterly and southerly along the northerly and easterly boundaries of Willard Way to the southwesterly corner of Tax Parcel No. 11-3-3 said point also being the northwesterly corner of Tax Parcel No. 11-3-6; running thence easterly along the southerly boundary of Tax Parcel No. 11-3-3 110 feet to a point in the northwesterly boundary of Stewart Avenue; running thence northerly and easterly along the westerly and northerly boundary of Stewart Avenue approximately 298 feet to a point located approximately 35 feet southerly from the Stewart Avenue bridge; running thence in an easterly direction across Stewart Avenue to a point marking the southerly boundary of the Cayuga Trail; running thence easterly along the southerly boundary of the Cayuga Trail to the northwesterly boundary of University Avenue; running thence northerly and easterly along the westerly and northerly boundaries of University Avenue to the intersection of the north line of University Avenue and the west line of Thurston Avenue; continuing thence easterly along the north line of University Avenue as it becomes the north line of Forest Home Drive and along the north line of Forest Home Drive approximately 600 feet to the intersection of the north line of Forest Home Drive with the line of the west face of the foot bridge over Fall Creek Gorge as extended southerly; running thence northerly along said extended line and the west face of the said foot bridge to the center of Fall Creek.

Such boundaries shall constitute the final boundaries and shall not be subject to amendment, alteration or modification by any action or determination by the commissioner or the department.

Responsibility for the administration of the area designated herein shall be delegated to the city of Ithaca pursuant to the appropriate regulations.

The designation of Fall Creek shall not, solely by operation of this article, be construed so as to restrict or prohibit utility or similar facilities support related-systems or facilities support-related activities of the land grant institution known as Cornell University conducted in furtherance of its educational purposes, which are located upstream of the designated area of Fall Creek. Such activities shall include, but not be limited to, the operation of Cornell University's

chilled water plant, water filtration plant and intakes for such plants and for its hydroelectric plant and the necessary dredging of intake areas, storm water drains, utility lines, and foot bridges, which may otherwise be permitted but for such designation.

§ 15-2715. Designation of additions to the system.

1. The commissioner or agency shall study and from time to time submit to the governor and to the legislature proposals for the addition to the state wild, scenic and recreational rivers system of river areas which, in their judgment, fall within one or more of the descriptive classes set out in this title. Each proposal shall specify the class or classes of the proposed addition and shall be accompanied by a detailed report on the factors which, in the judgment of the commissioner or agency, make the area a worthy addition to the system. The report shall show the area included within the proposal; the characteristics which make the area a worthy addition to the system; the current status of land ownership and use in the area; the anticipated acquisitions of land and scenic or other easements in the area; the potential uses of the land and water; and the cost of acquisitions of land and scenic or other easements and improvements proposed. The commissioner or agency shall send the report to the legislative authority of each county, town, and municipal corporation, any part of which is within the area, and to the commissioner of transportation, commissioner of agriculture and markets, commissioner of health, and commissioner of commerce. Thereafter, each proposal shall be submitted to the governor and the legislature for adoption or modification. This section is not intended to preclude or discourage studies and proposals by other agencies or by citizen groups working independently or with the commissioner or the agency, provided that such studies and proposals shall be conducted and made in accordance with the criteria and procedures set forth in this subdivision and shall be submitted to the agency or the commissioner as appropriate for comment prior to submission of any proposal to the governor or the legislature. The commissioner and the agency shall provide technical assistance to and cooperate with any such agencies and citizen groups.

2. Not later than three years after the effective date upon which each of the following rivers shall have been designated for study by inclusion in this subdivision, the agency, after consultation and cooperation with the commissioner with respect to rivers within the Adirondack park, or the commissioner with respect to rivers elsewhere, is hereby directed to consider and make proposals to the legislature for the addition of each such river to the state wild, scenic and recreational rivers system :

a. The Batten Kill river from the Vermont state line to the dam at Greenwich.

b. The Delaware river from Port Jervis to the junction of the East and West Branches of the Delaware river, and the East Branch of the Delaware river upstream to the Downsville dam, and the West Branch of the Delaware river upstream to the Cannonsville dam.

c. The Genesee river from the Pennsylvania state line to Letchworth State Park.

d. The Susquehanna river from Otsego lake to Bainbridge at the Route 206 crossing.

g. Bouquet river--Approximately twenty-four miles of the North Branch from Trout pond to the confluence with the Main Branch.

h. The Branch--Approximately sixteen miles from Elk lake to the confluence with the Schroon river.

i. East Stoney creek--Approximately eighteen miles from Harrisburg lake to Great Sacandaga lake.

j. Grasse river--Approximately twenty-five miles of the Main Branch from the confluence with the South Branch to the village of Canton.

l. Osgood river--Approximately fourteen miles from Jones pond to

Meacham lake.

m. Oswegatchie river--Approximately eleven miles of the Main Branch from the Cranberry lake outlet to River road.

n. Pleasant Lake stream--Approximately seven miles from Pleasant lake to the confluence with the Middle Branch of the Grasse river.

o. Saranac river--Approximately seventeen miles of the North Branch from Mud pond to the confluence with the Main Branch.

§ 15-2717. Cooperation with the federal government.

Nothing in this title shall preclude a section of the state wild, scenic and recreational rivers system from becoming a part of the national wild and scenic rivers system. The commissioner and the agency are directed to encourage and assist any federal studies for inclusion of New York State rivers in the national wild and scenic rivers system.

§ 15-2719. Cooperation clause.

The commissioner and agency shall cooperate with each other and coordinate their activities with respect to their respective jurisdictions over the designated rivers within the Adirondack park to ensure compliance for the general criteria and management objectives set forth in this part.

§ 15-2721. Conflict with other laws.

Any section of the state wild, scenic and recreational rivers system that is or shall become a part of the Forest Preserve, the Adirondack or Catskill Parks or any other state park, wildlife refuge, or similar area shall be subject to the provisions of this title, and the laws and constitutional provisions under which the other areas may be

administered, and in the case of conflict between the provisions of those laws and constitutional provisions and the provisions of this title, the more restrictive provisions shall apply.

§ 15-2723. Penalties and enforcement.

Any person who violates any provision of this title or any regulation or order issued pursuant to this act by the commissioner or the agency may be compelled to comply with or obey the same by injunction, mandamus or other appropriate remedy. In addition, any such person shall pay a civil penalty of not less than one hundred dollars or more than one thousand dollars for each day of such violation. The commissioner or the agency as the case may be, is authorized to commence a civil action to recover such civil penalties or other appropriate relief.

TITLE 29

WATER RESOURCES MANAGEMENT STRATEGY

Section 15-2901. Water resources planning council; organization.

15-2903. Water resources planning council; quorum, bylaws.

15-2905. Statewide inventory of existing significant deficiencies in water supply systems.

15-2907. Water resources management strategy; development purpose.

15-2909. Water resources management strategy; hearings.

15-2911. Water resources management strategy; approval.

15-2913. Water resources management strategy; revision.

§ 15-2901. Water resources planning council; organization.

There is hereby established within the department of environmental conservation a water resources planning council. It shall consist of fifteen members, including the commissioners of agriculture and markets, economic development, environmental conservation, health, transportation, the chair of the public service commission, president of

the New York state energy research and development authority, secretary of state and seven members to be appointed by the governor including at least one member who shall have expertise in the science of water resources planning and at least one member selected from a list proposed by public interest or environmental citizens organizations. These seven members shall serve terms of four years each. Two of the members shall be appointed upon the recommendation of the majority leader of the senate and two of the members shall be appointed upon the recommendation of the speaker of the assembly. The governor shall select a chair from among the members. Meetings of the council shall be called by the chair. Members shall receive reimbursement for expenses.

§ 15-2903. Water resources planning council; quorum, bylaws.

A majority of the members of the council shall constitute a quorum for the transaction of any business or the exercise of any power of the council. The commissioners of agriculture and markets, commerce, energy, environmental conservation, health, transportation, the chairman of the public service commission and secretary of state may, by official authority filed in their respective agencies, and with the water resources planning council, designate a deputy or other officer to exercise his powers and perform his duties, including the right to vote, on the council. The council may also establish for itself bylaws for the conduct of its affairs.

§ 15-2905. Statewide inventory of existing significant deficiencies in water supply systems.

The commissioner, in consultation with the commissioner of health and utilizing information requested from the responsible local officials as well as relevant information developed through titles eleven and thirteen of this article, shall cause to be prepared an inventory of existing significant deficiencies in water supply availability throughout the state, including specific needs for improvement, rehabilitation and establishment of water supply, distribution and

transmission facilities. Such inventory shall also identify those water supply systems affected or threatened by intrusions of hazardous materials or wastes and the nature of remediation required. Such inventory shall be completed and transmitted to the governor, legislature and the council by July first, nineteen hundred eighty-five.

The commissioner in consultation with the secretary of state, shall also cause to be prepared a review and summary of existing statutory and constitutional provisions relating to the provision and financing of water supply facilities by local governments, including such provision and financing through inter-local cooperation. Such review and summary shall also identify any existing statutory and constitutional constraints against the effective and efficient provision of sound financing, on a revenue or general obligation basis, of such facilities. Such review and summary shall be completed and transmitted to the governor, legislature and the council by January first, nineteen hundred eighty-six. At such time and based upon the above inventory and review and summary, the commissioner shall also cause to be prepared a compilation of those instances in which correction of existing significant deficiencies appears to be beyond the reasonable financial capabilities of the affected communities.

§ 15-2907. Water resources management strategy; development purpose.

Not later than January first, nineteen hundred eighty-seven, the department of environmental conservation, with the participation of the department of health and whenever possible, regional planning and development boards, shall develop and submit a complete statewide water resources management strategy to the water resources planning council for its review and adoption. This strategy shall be composed of substate water resources management strategies which recognize the natural boundaries of the water resource basins, watersheds, and aquifers and existing significant deficiencies of water supply, and which organize these in the most practical and manageable manner. Each substate management strategy shall analyze the present and future demographic, natural resource, economic development, water quality, and conservation

requirements of public and private water systems and develop regional management strategies to meet the water resources requirements of residential, agricultural, industrial and commercial users as well as assure the highest possible quality and quantity of these resources.

Strategies shall analyze the efficiency and capacity of existing water supply sources and facilities and shall contain recommendations for appropriate modifications, restoration, and expansion or development of new sources or facilities. Such strategies shall also include evaluations and recommendations as to the feasibility of including hydroelectric energy generation facilities as part of the modifications, restoration, and expansion or development of new or existing resources or facilities. The strategy shall also contain recommendations regarding implementation of these strategies by the department of health, the department of environmental conservation, other appropriate state agencies, local governments and special districts. In addition, the departments shall submit to the council substate water resources management strategies as soon as such strategies are developed. The departments shall also report regularly to the council on the development of the strategies and receive the council's recommendations and directions. Such substate strategies shall also be available for public inspection as soon as such strategies are developed.

§ 15-2909. Water resources management strategy; hearings.

Upon receipt of the statewide water resources management strategy from the department of environmental conservation, the council shall promptly publish once a week for three consecutive weeks in newspapers of general circulation notice of public hearings thereon. Public hearings shall be conducted in each of the substate areas represented in the statewide strategy, and shall be in accordance with regulations adopted by the department, subject to modification by the council. Such regulations shall, at a minimum, require a hearing on the record with sworn witnesses and shall afford interested parties a reasonable opportunity to sponsor witnesses and to question witnesses sponsored by others, including department staff, consistent with the need to conclude the

hearings expeditiously so that a state water resources management strategy can be adopted in a timely manner. The hearings shall not be considered part of an adjudicatory proceeding, as defined in subdivision three of section one hundred two of the state administrative procedure act, or as part of a rule-making proceeding held under subdivision one of section two hundred two of such act.

§ 15-2911. Water resources management strategy; approval.

The water resources planning council shall, as expeditiously as practicable following the conclusion of its hearings, but in no case later than January first, nineteen hundred eighty-eight, determine, based on the record, whether the statewide water resources management strategy should be approved with modifications or disapproved, and shall state in writing the reasons for its determination. If the council has determined approval of the strategy, it shall be adopted by the departments of health and environmental conservation and other appropriate state agencies in the form determined by the council. If the council has determined disapproval of the strategy, the department of environmental conservation, in conjunction with the department of health, shall modify the strategy in accordance with the determination issued by the council and resubmit the strategy to the council for its action.

§ 15-2913. Water resources management strategy; revision.

From time to time and at least once every two years, the department of environmental conservation, with the participation of the department of health and whenever possible, regional planning and development boards, shall review the strategy and shall either (a) prepare any amendments necessary to update the strategy, or (b) issue a determination that no amendments are necessary and the reasons supporting the determination. Any interested person may seek such a review upon written application to the department of environmental conservation for an amendment to the statewide water resources management strategy. Any statement issued by

the departments that no amendments are necessary shall be submitted to the council for approval, modification or disapproval. Amendments shall be adopted in the same manner as the strategy itself.

TITLE 31

GROUNDWATER PROTECTION AND REMEDIATION PROGRAM

Section 15-3101. Short title.

15-3103. Legislative findings and intent.

15-3105. Purpose.

15-3107. Groundwater information management.

15-3109. Groundwater remediation strategy.

15-3111. Rules and regulations.

§ 15-3101. Short title.

This title shall be known and may be cited as the "groundwater protection act".

§ 15-3103. Legislative findings and intent.

The legislature hereby finds and declares that:

1. The waters of the state are one of its most essential natural resources.

2. Adequate supplies of good quality groundwater are critical to the health and welfare of the residents of the state and to their economic well-being. Groundwater contamination exists at levels which exceed applicable standards, criteria and guidance values at many sites around the state, including inactive hazardous waste disposal sites, brownfield sites, and sites contaminated by the discharge of petroleum. The levels and types of contaminants, the extent of contamination, and the present and potential impacts on public health and the environment vary widely from site to site, but cumulatively could endanger the integrity of the

water resources of New York state.

3. Due to the complexity of groundwater contamination problems, the restoration of groundwater to its classified use may not currently be feasible at some sites.

4. It is the intent of the legislature that groundwater be protected for its classified use, the highest of which is drinking water.

§ 15-3105. Purpose.

It is the intent of the legislature that the department develop a strategy to address contaminated groundwater and implement a program to remediate and manage groundwater resources in a manner that will ensure long-term sustainability.

§ 15-3107. Groundwater information management.

Information collected pursuant to this section shall be incorporated into the geographic information system maintained by the department to track remedial programs, pursuant to section 3-0315 of this chapter.

§ 15-3109. Groundwater remediation strategy.

No later than three years after the effective date of this title, the department, in consultation with the department of health, shall develop and publish a strategy to address the long-term remediation of groundwater contamination, including strategies to protect groundwater from future degradation from contaminated sites.

1. Such strategy shall govern all programs within the department responsible for groundwater protection and remediation. Such strategy shall include, but not be limited to:

(a) Recognition that both short- and long-term remediation strategies

may be necessary to address groundwater contamination.

(b) Identification of the long-term groundwater remedial activities that are required to be taken by the state pursuant to title fourteen of article twenty-seven of this chapter for sites which the department has determined pose a significant threat, or which can be initiated by the state pursuant to other provisions of this chapter to address groundwater contamination.

(c) Establishment of criteria for the prioritization of long-term groundwater remediation activities to be performed by the department. Such criteria shall include, but not be limited to:

(i) the current or reasonably anticipated future use of contaminated groundwater as drinking water;

(ii) the current or reasonably anticipated future use of a groundwater aquifer into which contaminated groundwater is flowing as drinking water;

(iii) the current or reasonably anticipated future use of contaminated groundwater for non-potable purposes including but not limited to recreational uses, institutional uses and agricultural or non-agricultural irrigation;

(iv) community needs;

(v) feasibility of remediation; and

(vi) protection of natural resources and minimizing the impairment of the resource.

Notwithstanding subparagraphs (i) through (vi) of this paragraph, while the current use of groundwater as drinking water may be considered, the absence of such use shall not exclude the need for remediation.

2. A public comment period of at least one hundred twenty days shall be held on the initial draft strategy. Such strategy shall be updated regularly based on progress made and the availability of new remedial technologies, scientific information, and field data. Each updated draft strategy shall be released to the public, and will require a public comment period of at least sixty days.

3. The department is responsible pursuant to title fourteen of article

twenty-seven of this chapter for the remediation of off-site groundwater contamination emanating from sites being remediated by a volunteer, which sites have been determined to be a significant threat. Within six months of the determination of significant threat at a site being remediated by the volunteer the department shall bring an enforcement action against any parties known or suspected to be responsible for contamination at or emanating from the site which is the subject of such agreement. If such action cannot be brought, or does not result in the initiation of a remedial program by such party or parties at such site, the department shall use best efforts to begin a remedial program to perform the remediation of off-site contamination at such site within one year of the completion of such enforcement action or the completion of the volunteer's remedial program, whichever is later.

§ 15-3111. Rules and regulations.

The commissioner shall promulgate rules and regulations necessary and appropriate to carry out the purposes of this title.

TITLE 33

SOURCE WATER PROTECTION PROJECTS

Section 15-3301. Definitions.

15-3303. Land acquisition projects for source water protection.

15-3305. Approval and execution of projects.

§ 15-3301. Definitions.

As used in this title the following terms shall mean:

1. "Land acquisition projects" means open space acquisition projects undertaken with willing sellers including, but not limited to, the purchase of conservation easements, undertaken by a municipality, a not-for-profit corporation, or purchase of conservation easements by a soil and water conservation district.

2. "Municipality" means the same as such term as defined in section 56-0101 of this chapter.

3. "Not-for-profit corporation" means a corporation formed pursuant to the not-for-profit corporation law and qualified for tax-exempt status under the federal internal revenue code.

4. "Soil and water conservation district" means the same as such term as defined in section three of the soil and water conservation districts law.

5. "State assistance payment" means payment of the state share of the cost of projects authorized by this title to preserve, enhance, restore and improve the quality of the state's environment.

§ 15-3303. Land acquisition projects for source water protection.

1. The commissioner is authorized to provide state assistance to municipalities, not-for-profit corporations and soil and water conservation districts to undertake land acquisition projects for source water protection, in cooperation with willing sellers. Land acquisition projects for source water protection shall support, expand or enhance drinking water quality protection, including but not limited to aquifers, watersheds, reservoirs, lakes, rivers and streams.

2. a. Any buffer encumbered by a conservation easement acquired pursuant to this section that encumbers lands used in agricultural production as defined in section three hundred one of the agriculture and markets law in a county designated state certified agricultural district created under section three hundred three of the agriculture and markets law may allow agricultural activity that qualifies such lands, provided such activity on such lands does not impair drinking water and complies with an agricultural environmental management program plan developed by the state soil and water conservation committee, in partnership with the department.

b. Notwithstanding any limitations provided herein on lands acquired pursuant to this title a license or easement may be granted by the owner of such property to a public utility for a public purpose.

3. In evaluating land acquisition projects for source water protection pursuant to this section, the department shall give priority to projects which protect or recharge drinking water sources and watersheds including riparian buffers and wetlands.

4. a. No state assistance may be provided pursuant to this section to fund any land acquisition project which is undertaken by eminent domain unless such process is undertaken with a willing seller.

b. The department shall not provide funding pursuant to this title for any land acquisition project for source water protection by a not-for-profit corporation, if any town, village or city within which such a project is located, by resolution, within ninety days of notification by such corporation of its interest in acquiring such projects, objects to such acquisition.

5. Consistent with section eleven-b of the soil and water conservation districts law, the soil and water conservation committee in consultation with the commissioner of agriculture and markets is authorized to provide state assistance payments to county soil and water conservation districts, within amounts appropriated, for land acquisition projects for source water protection projects to support, expand or enhance drinking water quality protection, including but not limited to aquifers, watersheds, reservoirs, lakes, rivers and streams. Such committee shall give priority to projects which establish buffers from waters which serves as or are tributaries to drinking water supplies for such projects using state assistance pursuant to this section.

6. Real property acquired, developed, improved, restored or rehabilitated by or through a municipality, county soil and water conservation district or not-for-profit corporation with funds made available pursuant to this title shall not be sold, leased, exchanged,

donated or otherwise disposed of or used for other than the public purposes of this title without the express authority of an act of the legislature, which shall provide for the substitution of other lands of equal environmental value and fair market value and reasonably equivalent usefulness and location to those to be discontinued, sold or disposed of, and such other requirements as shall be approved by the commissioner.

7. If the state acquires a real property interest in land purchased by a municipality or not-for-profit with funds made available pursuant to this title, the state shall pay the fair market value of such interest less the amount of funding provided by the state pursuant to this section.

8. To the fullest extent practicable, it is the policy of the state to promote an equitable regional distribution of funds, consistent with the purpose of this section.

§ 15-3305. Approval and execution of projects.

1. Land acquisition projects for source water protection may be undertaken pursuant to the provisions of this article and other applicable provisions of law only with the approval of the commissioner.

2. The commissioner shall review such project application and may approve, disapprove or recommend modifications thereto consistent with applicable law, criteria, standards or rules and regulations relative to such projects. In reviewing applications for projects pursuant to this section, the commissioner shall give due consideration to:

a. the project's contribution to the protection of drinking water supplies;

b. the presence of a water plan, including a source water assessment/protection plan or other similar plan which identifies measures to reduce threats to drinking water sources and priorities for

land acquisition projects; and,

c. financial need or hardship.

3. All land acquisition projects shall be undertaken in the state of New York. The total amount of the state assistance payments toward the cost of any such project shall be set forth in any request for proposal issued to solicit projects and will in no event exceed seventy-five percent of the cost.

For the purpose of determining the amount of the state assistance payments, the cost of the project shall not be more than the amount set forth in the application for state assistance payments approved by the commissioner. The state assistance payments toward the cost of a project shall be paid on audit and warrant of the state comptroller on a certificate of availability of the director of the budget.

4. a. The commissioner and a municipality may enter into a contract for the undertaking by the municipality of a source water protection project. Such project shall be recommended to the commissioner by the governing body of the municipality and, when approved by the commissioner, may be undertaken by the municipality pursuant to this title and any other applicable provision of law.

b. The commissioner and a not-for-profit corporation may enter into a contract for the undertaking by the not-for-profit corporation of a source water protection project. Such a project shall be recommended to the commissioner by the governing body of a not-for-profit corporation which demonstrates to the satisfaction of the commissioner that it is capable of operating and maintaining such property for the benefit of drinking water and/or water quality protection. Upon approval by the commissioner, such project may be undertaken pursuant to the provisions of this title and any other applicable provision of law.

5. No monies shall be expended for source water protection land acquisition projects except pursuant to an appropriation therefor.

ARTICLE 16
FLOOD CONTROL

- Section 16-0101. State participation in federal flood control program.
- 16-0103. Receipt of funds by comptroller.
- 16-0105. Appropriation for flood control purposes.
- 16-0107. Acquirement of property for flood control.
- 16-0109. Projects authorized.
- 16-0111. Powers and duties of commissioner.
- 16-0113. Municipalities bearing cost.
- 16-0115. Municipal participation in federal program; raising and disbursement of funds; local cooperation agreements.
- 16-0117. Use of lands acquired for other purposes for flood control; transfer by commissioner; dual purpose use.
- 16-0119. Disbursements.

§ 16-0101. State participation in federal flood control program.

It is hereby declared that the state deems it advisable to participate in a federal program of flood control in the state of New York in the manner hereinafter described.

§ 16-0103. Receipt of funds by comptroller.

The comptroller is hereby authorized to receive from the federal government any moneys which the federal government shall offer to the state of New York for reimbursement for expenditures or otherwise in connection with any federal flood control project in the state of New York. The comptroller is authorized, upon receipt of any allotment of moneys from the federal government for reimbursement of expenditures or otherwise in connection with a flood control project to deposit such moneys to the credit of the general fund.

§ 16-0105. Appropriation for flood control purposes.

The legislature may appropriate from any money in the state treasury not otherwise appropriated for payment by the state for the costs of the state's participation in federal flood control projects and for engineering connected with these projects including personal services and expenses. The money appropriated shall be available for the cost of relocation and reconstruction of state highways, including structures; for channel improvements; for check dams; for quarries, gravel pits, spoil banks and borrow pits; for access roads; for camp sites; for relocation of buildings, structures and facilities; for relocation of the properties, structures, service lines and connections incident thereto of public service utilities, both publicly and privately owned; for relocation of railroad rights-of-way, facilities and structures; for rights of way and for other related purposes contemplated by and incidental to said flood control projects. The moneys appropriated shall also be available for payment by the state for the relocation and reconstruction of streets, sidewalks, public grounds, parks, cemeteries, water supply systems, sewer systems and lighting systems of municipal corporations, county roads and town highways, including structures and including rights of way.

§ 16-0107. Acquirement of property for flood control.

1. The commissioner of environmental conservation, for the people of the state of New York, shall acquire any property or interest therein, necessary for purposes connected with the flood control projects. Such property or interest therein shall be for rights-of-way, channel improvements, reservoirs, dams, quarries, gravel pits, borrow pits, spoil banks, camp sites, relocation of buildings and facilities, relocation of the facilities of public service utilities, relocation of streets, sidewalks, public grounds, parks, cemeteries, water supply systems, sewer systems and lighting systems of municipal corporations; relocation of county roads and town highways; and for other purposes connected with the flood control projects. The term "property" as used in this section shall be deemed to mean and include "real property" as such term is defined in section one hundred three of the eminent domain

procedure law. The manner of acquisition, including method of obtaining possession, shall be governed by the provisions of the eminent domain procedure law.

2. The commissioner of environmental conservation shall cause to be prepared an accurate acquisition map of any property which he may deem necessary for purposes connected with the flood control projects or of any property in and to which he may deem the acquisition or exercise of an easement, interest or right to be necessary for such purposes, indicating and describing in each case the particular easement, interest or right. On the approval of such map by the commissioner he shall acquire such property, easements, interests or rights pursuant to the provisions of the eminent domain procedure law.

3. If the commissioner shall determine, prior to the filing of such copy of the acquisition map in the office of the county clerk, that changes, alterations or modifications of such map should be made, he or she shall, subject to the provisions of article two of the eminent domain procedure law, if applicable, direct the preparation of an amended map, either by preparing a new map or by making changes on the original tracing of such map, with a notation indicating such changes. On the approval of such amended map by the commissioner, it shall be filed in the main office of the department in the same manner as the original map was filed and the amended map shall thereupon in all respects and for all purposes supersede the map previously filed.

4. If the commissioner shall determine, prior to the filing of such copy of the map in the office of the county clerk as provided in section four hundred two of the eminent domain procedure law, that such map should be withdrawn, he or she shall file a certificate of withdrawal in the offices of the department and department of law. Upon the filing of such certificate of withdrawal, the map to which it refers shall be cancelled and all rights thereunder shall cease and determine.

5. The commissioner shall deliver to the attorney general a copy of such acquisition map, whereupon it shall be the duty of the attorney general to advise and certify to the commissioner the names of the

owners of the property, easements, interests or rights described in the said acquisition map, including the owners of any right, title or interest therein, pursuant to the requirements of section four hundred three of the eminent domain procedure law.

6. If, at or after the vesting of title to such property in the people of the state of New York in the manner provided for in this section, the commissioner shall deem it necessary to cause the removal of an owner or other occupant from such property, he may cause such owner or other occupant to be removed therefrom by proceeding in accordance with section four hundred five of the eminent domain procedure law. The proceedings shall be brought in the name of the commissioner as agent of the state. If any person proceeded against shall contest the petition by an answer, the attorney general shall be notified, and he thereafter shall represent the petitioner in the proceedings. No execution shall issue for costs, if any, awarded against the state or the commissioner but they shall be part of the costs of the acquisition and be paid in like manner. Proceedings may be brought separately against one or more of the owners or other occupants of a property, or one proceeding may be brought against all or several of the owners or other occupants of any or all property within the territorial jurisdiction of the same justice or judge; and judgment shall be granted for immediate removal of persons defaulting in appearance or in answering, or withdrawing their answers, if any, without awaiting the trial or decision of issues raised by contestants, if any.

7. Upon making any agreement provided for in section three hundred four of the eminent domain procedure law, the commissioner of environmental conservation shall deliver to the comptroller such agreement and a certificate stating the amount due such owner or owners thereunder on account of such appropriation of his or their property and the amount so fixed shall be paid out of the state treasury from moneys appropriated for purposes connected with the flood control projects, but not until there shall have been filed with the comptroller a certificate of the attorney general showing the person or persons claiming the amount so agreed upon to be legally entitled thereto.

8. Application for reimbursement as provided in section seven hundred two of the eminent domain procedure law, shall be made to the commissioner upon forms prescribed by him and shall be accompanied by such information and evidence as the commissioner may require. Upon approval of such application, the commissioner shall deliver a copy thereof to the comptroller together with a certificate stating the amount due thereof, and the amount so fixed shall be paid out of the state treasury after audit by the comptroller from monies appropriated for the acquisition of property under this section.

9. a. The commissioner with the approval of the director of the budget, shall establish and may from time to time amend rules and regulations authorizing the payment of the following expenses and losses incurred by the displaced owners or occupants of a property acquired pursuant to this section as a result of such acquisition:

(1) actual reasonable and necessary moving expenses; and

(2) actual direct losses of tangible personal property as a result of moving or discontinuing a business or farm operation on such property, but not exceeding an amount equal to the reasonable expenses that would have been required to relocate such property, as determined by the commissioner; and

(3) actual reasonable and necessary expenses in searching for a replacement to the business or farm operation on such property; and

(4) actual and reasonable expenses necessary to reestablish a displaced farm operation, non-profit organization, or small business from such property at its new site but not to exceed the maximum amount provided for in the regulations.

b. Such regulations may provide in hardship cases for the advance payment of any such expenses and losses. For the purposes of making payment of such expenses and losses only, such regulations shall provide that the term "business" includes any lawful activity conducted primarily for assisting in the purchase, sale, resale, manufacture, processing or marketing of products, commodities, personal property or services by the erection and maintenance of an outdoor advertising display or displays, whether or not such display or displays are located

on the premises on which any of the above activities are conducted. Such rules and regulations may further define the terms used in this subdivision. Such regulations may also provide for payments to utilities for the relocation of their facilities under such circumstances and in such amounts as the commissioner may determine.

c. Any person eligible for the payments authorized by paragraph a of this subdivision, who is displaced from their residential property may, in lieu of such payments, elect to accept an expense and dislocation allowance, determined in accordance with a schedule prepared by the commissioner and made a part of such rules and regulations.

d. Any person eligible for the payments authorized by paragraph a of this subdivision, who is displaced from their business or farm operation and who is eligible under criteria established by the department may, in lieu of such payments, elect to accept a fixed relocation payment, except that such payment shall be not less than the minimum nor more than the maximum amount provided for in the regulations. However, a person whose sole business at the property so acquired is the rental of such property to others shall not qualify for payment under this paragraph.

e. Application for payment under this subdivision shall be made to the commissioner upon forms prescribed by the commissioner and shall be accompanied by such information and evidence as the commissioner may require. Upon approval of such application, the commissioner shall deliver a copy thereof to the comptroller together with a certificate stating the amount due thereunder, and the amount so fixed shall be paid out of the state treasury after audit by the comptroller from moneys appropriated for the acquisition of property under this section. No payment shall be made under this subdivision for any cost, expense, difference or other amount for which payment was previously made.

f. The regulations necessary to implement this subdivision shall be consistent with the applicable provisions of section thirty of the highway law, as the same may from time to time be amended, and regulations issued thereunder.

10. The commissioner pursuant to section three hundred five of the eminent domain procedure law, may make agreements on such terms, conditions and consideration as he deems beneficial to the state with respect to any property heretofore or hereafter acquired, whereby such property may be used and occupied by the former owner, tenant or by any other party from a date specified in said agreement, until such time as the state requires and obtains actual physical possession. The agreements for the use and occupancy of such property may be managed, supervised and enforced (1) by the staff, forces and equipment of the department of environmental conservation; or (2) by the commissioner of environmental conservation contracting for the management, supervision and enforcement thereof with any person, firm or corporation; or (3) by a combination of such methods.

The use and occupancy of such property under the provisions of this section and the right of the state or its duly authorized agent to recover possession thereof shall not be subject to the emergency housing rent control law.

Expenses which are determined by the commissioner to have been incurred in connection with the use and occupancy of such property may be paid out of the state treasury after audit by the comptroller from moneys appropriated for the duly authorized project for which the property was acquired. However, such expenses incurred under a contract for management and supervision of such property may be paid out of the gross revenue therefrom. All moneys received by the commissioner for such use or occupancy shall be paid into the treasury of the state to the credit of the capital construction fund.

11. a. Authorization is hereby given to the commissioner to make supplemental relocation payments, separately computed and stated, to displaced owners and tenants of residential property acquired pursuant to this section who are entitled thereto, as determined by the commissioner. The commissioner with the approval of the director of the budget, may establish and from time to time amend rules and regulations providing for such supplemental relocation payments. Such rules and

regulations may further define the terms used in this subdivision.

b. In the case of residential property acquired pursuant to this section, which is improved by a dwelling actually owned and occupied by the displaced owner for not less than one hundred eighty days immediately prior to initiation of negotiations for the acquisition of such property, such supplemental relocation payment to such owner shall not exceed the maximum amount provided for in the regulations. Such payment shall include the following elements:

(1) the amount, if any, which, when added to the acquisition payment equals the average price, established by the commissioner, required to obtain a comparable replacement dwelling for such displaced owner, but in no event shall such payment exceed the difference between acquisition payment and the actual purchase price of the replacement dwelling; and

(2) the amount which will compensate such displaced owner for any increased interest costs required to pay for financing the acquisition of the comparable replacement dwelling. Such amount shall be paid only if the dwelling on the property acquired pursuant to this section was encumbered by a bona fide mortgage which was a valid lien on such dwelling for not less than one hundred eighty days prior to the initiation of negotiations for the acquisition of such property. Any such compensating interest payment made pursuant to this provision shall, notwithstanding the provisions of section twenty-six-b of the general construction law, be in lieu of and in full satisfaction of the requirements of such section; and

(3) an amount which will compensate such displaced owner for reasonable expenses incurred for evidence of title, recording fees and other closing costs incident to the purchase of the comparable replacement dwelling, but not including prepaid expenses.

c. Any supplemental relocation payment made pursuant to paragraph b of this subdivision shall be made only to a displaced owner who purchases and occupies a comparable replacement dwelling within one year subsequent to the date on which such owner is required to move from the dwelling on the property acquired pursuant to this section or the date on which such owner receives from the state final payment for such acquired dwelling, whichever occurs later. The commissioner may extend

such period for good cause; provided however, that any payment shall be based on the costs of relocating the displaced person to a comparable replacement dwelling within one year of such extended date. The regulations may provide that advance payment of such payments may be made in hardship cases.

d. In the case of residential property acquired pursuant to this section from which an owner or tenant, not otherwise eligible to receive a supplemental relocation payment pursuant to the provisions of paragraph b of this subdivision, is displaced from any dwelling thereon which has been actually and lawfully occupied by such owner or tenant for not less than ninety days immediately prior to (1) the initiation of negotiations for the acquisition of such property or (2) such other event as regulations may prescribe when the displacement is not a direct result of such acquisition, such supplemental relocation payment to such owner or tenant shall not exceed the maximum amount provided for in the regulations. Such payment shall be the amount which is necessary to enable such owner or tenant to lease or rent for a period not to exceed the maximum time specified in the regulations, a comparable replacement dwelling but such amount shall not exceed the maximum amount specified in the regulations. Such payments may be made in periodic installments as determined by the commissioner. Any person eligible for a supplemental relocation payment under this paragraph may elect to use such payment for the down payment, including reasonable incidental expenses incurred by such person on the purchase of, a comparable replacement dwelling, except such payment shall not exceed the maximum amount provided for in the regulations.

e. Application for payment under this subdivision shall be made to the commissioner upon forms prescribed by the commissioner and shall be accompanied by such information and evidence as the commissioner may require. Upon approval of such application, the commissioner shall deliver a copy thereof to the comptroller, together with a certificate stating the amount due thereunder, and the amount so fixed shall be paid out of the state treasury after audit by the comptroller from moneys appropriated for the acquisition of property under this section. No payment shall be made under this subdivision for any cost, expense,

difference or other amount for which payment was previously made.

f. The regulations necessary to implement this subdivision shall be consistent with the applicable requirements of section thirty of the highway law, as the same may from time to time be amended, and regulations issued thereunder.

12. Any owner may present to the court of claims, pursuant to section five hundred three of the eminent domain procedure law, a claim for the value of such property appropriated and for legal damages, as provided by law for the filing of claims with the court of claims. Awards and judgments of the court of claims shall be paid in the same manner as awards and judgments of that court for the acquisition of lands generally and shall be paid out of the state treasury from moneys appropriated for purposes connected with the flood control projects.

13. Permits for use of flood control lands. No person shall construct any improvement, excavate, deposit material or operate a motorcycle, motor-driven cycle, snowmobile or motor vehicle except lawn maintenance equipment upon lands acquired or burdened by a flood control easement pursuant hereto without a permit. Permits will be issued by the commissioner where the proposed activity will not interfere with or endanger the flood control works, or impede the maintenance or operation of such works. The commissioner may adopt such rules and regulations as he may deem necessary to protect flood control works from damage which may interfere with their proper and safe operation, or impede their maintenance. Failure to comply with the provisions of this section or with rules and regulations promulgated pursuant hereto shall be a violation.

14. The commissioner notwithstanding any other provisions of this act or any other law, may acquire by grant or purchase any property which he deems necessary, in order to carry out the projects herein authorized.

Payment therefor, if any, shall be made in the manner prescribed in this section for the payment of adjusted claims, provided, however, that no interest in real property shall be so acquired unless the title

thereto shall be approved by the attorney general.

15. The expense of such acquisitions including the cost of making surveys, and preparing maps of property to be acquired, serving notices, making appraisals and agreements and of searches ordered and examinations and readings of title made by the attorney general, and expenses incurred by the commissioner or attorney general in proceedings for removal of owners and occupants, shall be deemed part of the cost of such flood control projects.

16. Notwithstanding the provisions of any general, special or local law, the commissioner, his officers or agents, and the officers, agents or contractor of the United States when engaged on flood control projects, may enter upon property for the purposes of making surveys, test pits, test borings, or other investigations and also for the purposes of temporary occupancy during construction. Any claim for damage caused by such work or on account of such temporary occupancy, not exceeding five thousand dollars, may be adjusted by agreement by the commissioner without acquiring such property. Upon making any such adjustment and agreement the commissioner shall deliver to the comptroller such agreement and a certificate stating the amount due such owner for damage caused by such work, or on account of such temporary occupancy, and the amount so fixed shall be paid out of the state treasury from moneys appropriated for purposes connected with the flood control projects.

17. The commissioner (a) May determine whether any property taken for any of the purposes connected with flood control projects pursuant to this section may be leased, sold or exchanged on terms beneficial to the state, and in all cases of such determination subject to compliance with section four hundred six of the eminent domain procedure law, he may, lease, sell or exchange such property; in order to carry any such lease, sale or exchange into effect, the commissioner is hereby authorized to execute and deliver, in the name of the people of the state, a quit claim or lease of such property.

(b) May also convey to the United States for flood control purposes all right, title and interest of the state in and to any property

heretofore or hereafter so taken for any of such purposes for which reimbursement by the United States is made in accordance with section two of the federal flood control act of nineteen hundred thirty-eight being public law, numbered seven hundred and sixty-one, seventy-fifth congress, and including improvements made thereon for such purposes. Such conveyance shall be by deed or instrument of quit claim, executed by the commissioner in the name of the people of the state, delivered to the federal authority having jurisdiction. This paragraph shall not prevent reservations, if any, in such a conveyance, agreed to by such commissioner and federal authority, to protect leases or easement, if any, theretofore lawfully made or created by such commissioner. Whenever the United States, acting by and through said federal authority having jurisdiction, shall cause to be filed in the office of the secretary of state of this state, a duplicate original of the deed or instrument of conveyance to the United States of any such property for the purposes herein specified, such jurisdiction as may be required for flood control purposes is thereupon ceded to the United States over the property described in said deed or instrument of conveyance, during the time that the United States shall be or remain the owner thereof and shall use such property for flood control purposes.

(c) Is hereby authorized to agree with the United States as to the value of the property appropriated and for legal damages caused by any such appropriation thereof, as and for reimbursement by the United States, and the commissioner is authorized to convey such property to the United States, in the manner herein provided, specifying in such conveyance that the consideration stated therein is the agreed value of such property and legal damages, and is in full reimbursement thereof by the United States.

18. The attorney general is hereby authorized and empowered to certify to the United States of America or a department, agency or authority thereof having jurisdiction therein, the right, title or interest vested in the people of the state of New York in and to property acquired for the purpose of this act for which reimbursement is to be made by the United States of America to the people of the state of New York.

19. If the commissioner shall determine subsequent to the acquisition of a temporary easement right in property and subsequent to the filing of a description and map of such property in the office of the county clerk, as aforesaid, that the purposes for which such easement right was acquired have been accomplished and that the use and occupancy of said property for flood control purposes are no longer necessary, and that, therefore, the term of such easement should be further limited, or if the appropriation of such easement was for an indefinite period, that such period should be fixed and determined, or that the period of such easement has by its terms expired, the commissioner shall make a certificate that the use and occupancy of such property for flood control purposes are no longer necessary, that the property in which such easement right was acquired is surrendered back to the affected owner of said property and that such easement right is thereupon terminated, released and extinguished. The commissioner shall cause a copy of such certificate to be filed in the main office of the department. Upon the filing of such certificate in the office of the department all rights acquired by the state in such property shall cease and determine. The commissioner shall cause a copy of such certificate together with notice of the filing thereof in the main office of the department to be mailed to the owner of the property affected, as certified by the attorney general, if the place of residence of such owner is known or can be ascertained by a reasonable effort. A further copy of such certificate and notice of filing shall be filed in the office of the recording officer of each county wherein the property affected is situated. On the filing of such certificate and notice with such officer it shall be the duty of such officer to record same in the books used for recording deeds in the office of such officer.

§ 16-0109. Projects authorized.

The projects herein authorized consist in general of all projects for flood control lying wholly or partially within the state of New York which have been or may be approved by the federal government and for which federal funds shall be made available.

§ 16-0111. Powers and duties of commissioner.

The commissioner is hereby authorized and directed for and in behalf of the state to carry out the state's participation in a federal program of flood control, to sign all necessary agreements, and to do and perform all necessary acts in connection therewith to consummate the intent and purpose running with the approval by the federal government of flood control projects in New York state and the allotment of moneys for such projects, if, as and when made by the federal government. He is authorized and empowered, notwithstanding any other law of this state, to carry out the provisions of this act and to perform and do such other and further acts not hereby specifically provided in this act as may be necessary to carry out the projects herein authorized and so as to conform with the act and rules, regulations and requirements of the federal government made to govern the expenditures. Work may be carried out by contract or by department forces or by a combination of these two methods. However, if the commissioner deems it to be in the interest of the public, he may agree with a municipal corporation affected by such work, to have its contractor or its forces and equipment perform such work, upon such terms as the commissioner may deem advantageous to the state. The commissioner shall exercise his powers and duties with respect to the said flood control projects in a manner that will comply with any act of congress applicable thereto and any rules and regulations made and promulgated by virtue thereof.

§ 16-0113. Municipalities bearing cost.

The commissioner together with the benefiting municipality or municipalities as specified in a local cooperation agreement shall carry out the relocation and reconstruction of streets, sidewalks, public grounds, parks, cemeteries, water supply systems, sewer systems and lighting systems, county roads and town highways, and any other structures or facilities made necessary by the construction of federal flood control projects. The total cost of such relocation and reconstruction for a flood control project shall be apportioned between

the state and the benefiting municipality or municipalities pursuant to the provisions of subdivision three of section 16-0115 of this article. The commissioner of transportation shall approve any such relocation and reconstruction on property under his jurisdiction.

§ 16-0115. Municipal participation in federal program; raising and disbursement of funds; local cooperation agreements.

1. Prior to the commencement of any federal flood protection project, the governing body of any benefiting municipality or municipalities must execute a local cooperation agreement which will specify the cost to be borne by the municipality. The moneys so required shall be paid by such benefiting municipality or municipalities and shall be raised by tax or pursuant to the local finance law, or in accordance with any local charter or law, as the case may be. All such funds shall be paid by such benefiting municipality or municipalities in a manner specified in a local cooperation agreement.

2. The non-federal share of any costs related to development of any flood control project required by the federal government shall be borne by the state except for construction costs which shall be shared in accordance with the percentages specified in paragraphs (a) and (b) of subdivision three of this section.

3. The assignment of responsibility for all required non-federal items of cooperation shall be specified in the local cooperation agreement as follows:

(a) the state shall bear fifty percent of those costs required by the federal government including lands, easements, rights-of-way, relocations, and cash contributions if any.

(b) the benefiting municipality or municipalities shall bear fifty percent of those costs required by the federal government including lands, easements, rights-of-way, relocations, and cash contributions if any.

(c) the costs of all lands, easements, rights-of-way and relocations borne by the state or a benefiting municipality or municipalities shall

be a credit against the respective shares of the state and the benefiting municipality or municipalities.

(d) the operation and maintenance of the project, once constructed, shall be the responsibility of the benefiting municipality or municipalities in accordance with the guidance and direction of the state and under the controlling principle that flood control is the primary purpose.

(e) replacement of project facilities shall be the responsibility of the state provided that replacement is not due to deferred maintenance.

4. Notwithstanding any other provisions of this section, for any flood control project for which a local cooperation agreement was developed or a letter of intent was furnished to the federal government before January first, nineteen hundred eighty-seven, the state of New York shall not pay less than the total costs of all lands, easements, rights-of-way, bridges and relocations, with the exception of lands owned by the benefiting municipality or municipalities and the relocation of facilities owned by the benefiting municipality or municipalities.

5. Any local cooperation agreement may include such additional terms and conditions as the commissioner may determine to be necessary.

§ 16-0117. Use of lands acquired for other purposes for flood control; transfer by commissioner; dual purpose use.

Notwithstanding any other provisions of this act or any other law, the commissioner is authorized to use either exclusively for, or in conjunction with, flood control purposes any property under his jurisdiction acquired for other public purposes. Transfer of such use shall be effected by an official order of the commissioner to be filed in the offices of the department and of the department of state, accompanied by a description and map of such property. When the use is to be exclusively for flood control purposes then upon such filing of the description, map and official order of transfer of use, the property shall be used and maintained for flood control purposes and be governed

as though the said property was acquired pursuant to the provisions of this article for flood control purposes. When dual use is to be made of such property for flood control purposes and other public purposes by the state, the official order of transfer shall so certify, and upon such filing of the description, map and official order of transfer, the property shall be used and maintained for such dual purposes, and is, in the discretion of the commissioner, to be governed either by this article or the act under which jurisdiction was acquired by the commissioner or both. When grade crossing elimination property is involved, the official order of transfer shall also be approved by the commissioner of transportation.

§ 16-0119. Disbursements.

The moneys hereby appropriated shall be payable by the commissioner of taxation and finance on the audit and warrant of the comptroller on vouchers approved by the commissioner.

TITLE 1

GENERAL PROVISIONS AND PUBLIC POLICY

Section 17-0101. Declaration of policy.

17-0103. Statement of purpose.

17-0105. Definitions applicable to portions of this article.

§ 17-0101. Declaration of policy.

It is declared to be the public policy of the state of New York to maintain reasonable standards of purity of the waters of the state consistent with public health and public enjoyment thereof, the propagation and protection of fish and wild life, including birds, mammals and other terrestrial and aquatic life, and the industrial development of the state, and to that end require the use of all known available and reasonable methods to prevent and control the pollution of the waters of the state of New York.

§ 17-0103. Statement of purpose.

It is the purpose of this article to safeguard the waters of the state from pollution by preventing any new pollution and abating pollution existing when the predecessor of this chapter was enacted, under a program consistent with the declaration of policy stated in section 17-0101.

§ 17-0105. Definitions applicable to portions of this article.

When used in titles 1 to 11, inclusive, and titles 14 and 19 of this article:

1. "Person" or "persons" means any individual, public or private corporation, political subdivision, government agency, municipality,

industry, co-partnership, association, firm, trust, estate or any other legal entity whatsoever.

2. "Waters" or "waters of the state" shall be construed to include lakes, bays, sounds, ponds, impounding reservoirs, springs, wells, rivers, streams, creeks, estuaries, marshes, inlets, canals, the Atlantic ocean within the territorial limits of the state of New York and all other bodies of surface or underground water, natural or artificial, inland or coastal, fresh or salt, public or private (except those private waters which do not combine or effect a junction with natural surface or underground waters), which are wholly or partially within or bordering the state or within its jurisdiction.

3. "Marine district" shall include the waters of the Atlantic ocean within three nautical miles from the coast line and all other tidal waters within the state, except the Hudson river northerly of the south end of Manhattan Island.

4. "Sewage" means the water-carried human or animal wastes from residences, buildings, industrial establishments or other places, together with such ground water infiltration and surface water as may be present. The admixture with sewage as above defined of industrial wastes or other wastes as hereafter defined, shall also be considered "sewage" within the meaning of this article.

5. "Industrial waste" means any liquid, gaseous, solid or waste substance or a combination thereof resulting from any process of industry, manufacturing, trade, or business or from the development or recovery of any natural resources, which may cause or might reasonably be expected to cause pollution of the waters of the state in contravention of the standards adopted as provided herein.

6. "Other wastes" means garbage, refuse, decayed wood, sawdust, shavings, bark, sand, lime, cinders, ashes, offal, oil, tar, dyestuffs, acids, chemicals, ballast and all other discarded matter not sewage or industrial waste which may cause or might reasonably be expected to cause pollution of the waters of the state in contravention of the

standards adopted as provided herein.

7. "Standard" or "Standards" means such measure of purity or quality for any waters in relation to their reasonable and necessary use as may be established by the department pursuant to section 17-0301.

8. "Sewer system" or "sewerage system" means pipe lines or conduits, pumping stations, and force mains, and all other constructions, devices, and appliances appurtenant thereto, used for conducting sewage, industrial waste or other wastes to a point of ultimate disposal.

9. "Treatment works" means any plant, disposal field, lagoon, pumping station, constructed drainage ditch or surface water intercepting ditch, incinerator, area devoted to sanitary land fills, or other works not specifically mentioned herein, installed for the purpose of treating, neutralizing, stabilizing or disposing of sewage, industrial waste or other wastes.

10. "Disposal system" means a system for disposing of sewage, industrial waste or other wastes, and including sewer systems and treatment works.

11. "Outlet" means the terminus of a sewer system, or the point of emergence of any water-borne sewage, industrial waste or other wastes or the effluent therefrom, into the waters of the state.

12. "Shellfish" includes oysters, scallops, clams, mussels and other aquatic mollusks, and lobsters, shrimp, crawfish, crabs and other aquatic crustaceans.

13. "State Pollutant Discharge Elimination System" or "SPDES" means the system established pursuant hereto for issuance of permits authorizing discharges to the waters of the state.

14. "National Pollutant Discharge Elimination System" or "NPDES" means the national system for the issuance of permits under the Federal Water Pollution Control Act.

15. "Effluent standard and/or limitation" means any restriction on quantities, quality, rates and concentrations of chemical, physical, biological, and other constituents of effluents which are discharged into or allowed to run from an outlet or point source into waters of the state promulgated by the federal government.

16. "Point source" means any discernible, confined and discrete conveyance, including but not limited to any pipe, ditch, channel, tunnel, conduit, well, discrete fissure, container, rolling stock, concentrated animal feeding operation, vessel or other floating craft, or landfill leachate collection system from which pollutants are or may be discharged. This term does not include agricultural stormwater discharges and return flows from irrigated agriculture.

17. "Pollutant" means dredged spoil, solid waste, incinerator residue, sewage, garbage, sewage sludge, munitions, chemical wastes, biological materials, radioactive materials, heat, wrecked or discarded equipment, rock, sand and industrial, municipal, and agricultural waste discharged into water; and ballast which may cause or might reasonably be expected to cause pollution of the waters of the state in contravention of the standards adopted as provided herein.

18. "Schedule of compliance" means a schedule of remedial measures including an enforceable sequence of actions or operations leading to compliance with an effluent limitation, other limitation, prohibition, or standard.

19. "Toxic pollutant" means those pollutants, or combination of pollutants, including disease-causing agents which after discharge and upon exposure, ingestion, inhalation or assimilation into any organism, either directly from the environment or indirectly through food chains, will, on the basis of information available to the department, cause death, disease, behavioral abnormalities, cancer, genetic mutations, physiological malfunctions, including malfunctions in reproduction, or physical deformations, in such organisms or their offspring.

20. "New source" means any source, the construction of which is commenced after the publication of a standard or performance applicable to such source under the provisions of the Act, provided such standard is thereafter promulgated and adopted.

21. "Standard of performance" means a standard for the control of the discharge of pollutants which reflects the greatest degree of effluent reduction which the federal government determines to be achievable through application of the best available demonstrated control technology, processes, operating methods, or other alternatives, including, where practicable, a standard permitting no discharge of pollutants.

22. "Toxic and pretreatment effluent standard" means standards adopted by the federal government pursuant to section 307 of the Act.

23. "Tanker" means any watercraft of more than three hundred gross tons and having a fully loaded draft of seven feet or more used to carry any liquid cargo, including petroleum, oil or water.

TITLE 3

JURISDICTION OF THE DEPARTMENT;

AUTHORITY; POWERS AND DUTIES

Section 17-0301. Classification of waters and adoption of standards.

17-0303. General powers and duties applicable to portions of this article.

17-0305. Establishment of a program to monitor water quality by private citizens under the direction of the department.

§ 17-0301. Classification of waters and adoption of standards.

1. It is recognized that, due to variable factors, no single standard of quality and purity of the waters is applicable to all waters of the state or to different segments of the same waters.

2. In order to attain the objectives of this article, the department after proper study, and after conducting public hearing upon due notice, shall group the designated waters of the state into classes. Such classification shall be made in accordance with considerations of best usage in the interest of the public and with regard to the considerations mentioned in subdivision 3 hereof.

3. In adopting the classification of waters and the standards of purity and quality above mentioned, the department shall give consideration to:

a. The size, depth, surface area covered, volume, direction and rate of flow, stream gradient and temperature of the water;

b. The character of the district bordering said waters and its peculiar suitability for the particular uses, and with a view to conserving the value of the same and encouraging the most appropriate use of lands bordering said waters, for residential, agricultural, industrial or recreational purposes;

c. The uses which have been made, are being made or may be made, of said waters for transportation, domestic and industrial consumption, bathing, fishing and fish culture, fire prevention, the disposal of sewage, industrial waste and other wastes, or other uses within this state, and, at the discretion of the department, any such uses in another state on interstate waters flowing through or originating in this state;

d. The extent of present defilement or fouling of said waters which has already occurred or resulted from past discharges therein.

4. The department, after proper study, and after conducting public hearings upon due notice, shall adopt and assign standards of quality and purity for each such classification necessary for the public use or benefit contemplated by such classification. Such standards shall prescribe what qualities and properties of water shall indicate a

polluted condition of the waters of the state which is actually or potentially deleterious, harmful, detrimental or injurious to the public health, safety or welfare, to terrestrial or aquatic life or the growth and propagation thereof, or to the use of such waters for domestic, commercial, industrial, agricultural, recreational or other reasonable purposes, with respect to the various classes established pursuant to subdivision 2 hereof.

5. In establishing such standards, consideration shall be given to the following factors: a. The extent, if any, to which floating solids may be permitted in the water;

b. The extent to which suspended solids, colloids or a combination of solids with other substances suspended in water, may be permitted;

c. Organisms of the coliform group or any other organisms from wastes of animal or human origin shall not exceed the following prescribed standards for usage of the classified waters of the state:

(1) Sources of water supply for drinking, culinary or food processing purposes which, if subjected to approved disinfection treatment, with additional treatment if necessary to remove naturally present impurities, meet or will meet New York State Health Department drinking water standards and any other usages: For such sources the monthly median coliform value for one hundred ml of sample shall not exceed fifty from a minimum of five examinations and provided that not more than twenty percent of the samples shall exceed a coliform value of two hundred forty for one hundred ml of sample.

(2) Sources of water supply for drinking, culinary or food processing purposes which, if subjected to approved treatment equal to coagulation, sedimentation, filtration and disinfection, with additional treatment if necessary to reduce naturally present impurities, will meet New York State Department of Health drinking water standards; bathing, fishing, boating, and any other usages: For such sources the monthly median coliform value for one hundred ml of sample shall not exceed five thousand from a minimum of five examinations and provided that not more than twenty percent of the samples shall exceed a coliform value of twenty thousand for one hundred ml of sample.

(3) Sources of water for bathing, fishing, boating, and any other usages except shellfishing for market purposes in tidal salt waters: For such sources the monthly median coliform value for one hundred ml of sample shall not exceed two thousand four hundred from a minimum of five examinations and provided that not more than twenty percent of the samples shall exceed a coliform value of five thousand for one hundred ml of sample and provided further that surface waters receiving treated sewage discharges which pass through residential communities where there is a potential exposure of population to the surface waters shall be protected by the requirement that all effluents from sewage treatment plants shall be adequately disinfected prior to discharge into the surface waters in order that the monthly median coliform value for one hundred ml of sample shall not exceed two thousand four hundred from a minimum of five examinations and provided that not more than twenty percent of the samples shall exceed a coliform value of five thousand for one hundred ml of sample.

(4) Sources of water for shellfishing for market purposes and any other usages of tidal salt waters: Median MPN not to exceed seventy coliform organisms per one hundred milliliter sample in a series of four or more samples collected during any thirty-day period in the waters of a shellfishing area, and not exceeding in more than ten percent of the samples collected during the period an MPN of two hundred thirty coliform organisms per one hundred milliliters for a five-tube, or an MPN of three hundred thirty per one hundred milliliters for a three-tube decimal dilution test in those areas most probably exposed to fecal contamination during the most unfavorable hydrographic conditions.

(5) All samples shall be collected, analyzed, and reported in a manner satisfactory to the commissioner.

(6) When the above prescribed standards are exceeded the commissioner shall make an investigation to determine the source or sources of pollution. When it shall appear to the commissioner after investigation, that there has been a violation of any of the provisions of titles 1 to 11, inclusive, and title 19 of this article he shall take further proceedings as provided in section 17-0905.

(7) The department may adopt and assign more restrictive standards for the best usages of the waters of the state.

d. The extent of the oxygen demand which may be permitted in the receiving waters;

e. Such other physical, chemical or biological properties necessary for the attainment of the objectives of this article, as set forth in section 17-0101.

6. The adoption, alteration or modification of the standards of quality and purity, above prescribed, shall be made by the department only after public hearing on due notice.

7. The "Rules and Classifications and Standards of Quality and Purity for Waters of New York State," hitherto adopted by the former New York water pollution control board by order made and entered October 23, 1950 effective October 25, 1950, as duly amended in the manner provided by law, are hereby approved and adopted as the general system and plan of the classification of the waters of the state and the standards of quality and purity thereof applicable to such general classification of the waters and are hereby deemed established and adopted by the department.

8. All classifications and standards of quality and purity hitherto assigned, by the former New York Water Pollution Control Board, or by the former Water Resources Commission by order, duly and respectively made and entered, to designated and specified waters of the state, are hereby approved and adopted as the classification and standards of quality and purity for such specified waters so respectively hitherto classified and are hereby deemed established, adopted and so assigned by the department.

9. The "Rules and Classifications and Standards of Quality and Purity for Waters of New York State," so hitherto adopted by the former Water Pollution Control Board and by the former Water Resources Commission and hereinabove readopted may from time to time be altered or modified by the department after public hearing thereon. Any classification of the specified waters of the state, so hitherto assigned by the former Water Pollution Control Board or by the former Water Resources Commission and

hereinabove readopted may from time to time be altered or modified by the department after public hearing thereon.

10. Notices of public hearing for the consideration, adoption, modification, alteration and/or amendment of the general classification-standards system or of the classification of waters and the standards of purity and quality thereof shall:

a. Be published at least twice in a newspaper regularly published or circulated in the county or counties bordering or through which the waters sought to be classified, or for which standards are sought to be adopted, flow, the first date of publication of which shall be at least thirty days before the date fixed for such hearing, and

b. Be mailed at least thirty days before such hearing to the chief executive of each municipal corporation bordering or through which said waters, for which standards are sought to be adopted, flow, and to such other persons as the department has reason to believe may be affected by the proposed standards.

11. The fact that an application for the modification or alteration of classifications and standards of quality and purity has been made pursuant to this section shall not of itself constitute a sufficient ground for an injunction against, or a stay of, any proceeding or order authorized by this article.

12. In all hearings in connection with the modification or alteration of classifications and standards of quality and purity heretofore assigned by the former Water Pollution Control Board or the former Water Resources Commission or hereafter assigned by the department by order, duly and respectively made and entered, to designated and specified waters of the state, except as provided in paragraphs a and b of subdivision 10 of this section, the administrative procedures to be followed shall be governed by article two of the state administrative procedure act.

13. The department shall not require the expense of any public hearing

initiated by petition of any person or public corporation in connection with the adoption, modification or alteration of classification of waters or standards of purity and quality thereof to be paid by such person or public corporation.

14. The classification of waters and standards of quality and purity thereof, upon adoption, shall, before becoming effective, be filed with the Secretary of State for publication in the "Official Compilation of Codes, Rules and Regulations of the state of New York" published pursuant to section 102 of the Executive Law.

§ 17-0303. General powers and duties applicable to portions of this article.

1. The provisions of this section shall apply only to titles 1 to 11, inclusive, and title 19 of this article.

2. The department shall have administrative jurisdiction to abate and prevent the pollution of waters of the state in the manner herein provided in accordance with the classification of waters adopted by the department pursuant to section 17-0301 and in accordance with standards, criteria, limitations, rules and regulations and permit conditions adopted, promulgated or applied by the department pursuant to title 8 hereof.

3. The department, acting through the commissioner may, from time to time, adopt, amend, or cancel administrative rules and regulations governing the procedure to be followed with respect to hearing, filing of reports, the issuance of permits, and all other matters relating to procedure, and generally, may make such administrative rules and regulations, and do and perform any and all acts, not inconsistent with the provisions of this article listed in subdivision 1 of this section, as may be necessary or proper to carry into effect such provisions of this article listed in subdivision 1 of this section, and may make, amend and repeal rules and regulations for the storage of liquids likely to pollute the waters of the state including, but not limited to,

standards for the construction, installation, maintenance, protection and diking of tanks used to store any such liquids and their associated structures, piping, valves, fittings, fixtures and outlets, in conjunction with the promulgation of which, the commissioner shall consider codes and practices of industries concerned with the handling and storage of such liquids and the time required for persons engaged in such industries to conform with such rules and regulations. Such rules and regulations, before becoming effective, shall be filed with the secretary of state for publication in the "Official Compilation of Codes, Rules and Regulations of the State of New York" published pursuant to section 120 of the Executive Law.

4. The commissioner is hereby authorized to:

a. Hold public hearings, receive pertinent and relevant proof from any party in interest who appears at such hearing, compel the attendance of witnesses, make findings of fact and determinations, and assess such penalties therefor as are hereinafter prescribed, all with respect to the violations of the provisions of this article listed in subdivision 1 of this section, or the orders issued by the commissioner;

b. Make, modify or cancel orders requiring the discontinuance of the discharge of sewage, industrial waste or other wastes into any waters of the state in accordance with the provisions of this article listed in subdivision 1 of this section, and specifying the conditions and time within which such discontinuance must be accomplished.

c. Institute or cause to be instituted in a court of competent jurisdiction proceedings to compel compliance with the provisions of this article listed in subdivision 1 of this section or the determinations and orders of the commissioner;

d. Issue or deny permits, under such conditions as may be prescribed for the prevention and abatement of pollution, for the discharge of sewage, industrial waste or other wastes, or for the installation or operation of disposal systems or parts thereof;

e. Continue any permit heretofore or hereafter issued under the provisions of this article listed in subdivision 1 of this section, or under the authority of laws previously enacted and thereafter repealed, whenever, after hearing thereon, the commissioner determines that such continuation is necessary or desirable to prevent or abate pollution of any waters of the state;

f. Revoke or modify any construction, operating or discharge permit heretofore or hereafter issued under the provisions of this article listed in subdivision 1 of this section, or under the authority of laws previously enacted and thereafter repealed, whenever, after hearing thereon, the commissioner determines that such revocation or modification is necessary or desirable to prevent or abate pollution of any waters of the state provided, however, that the hearing required under this paragraph may be waived in writing by the applicant or permittees;

g. Conduct such investigations as may be deemed advisable and necessary to carry out the intents and purposes of the provisions of this article listed in subdivision 1 of this section;

h. Settle or compromise, with the approval of the attorney general, any action or cause of action for the recovery of a penalty under the provisions of this article listed in subdivision 1 of this section as he may deem advantageous to the state;

i. Perform such other and further acts as may be necessary, proper or desirable, to carry out effectively the duties and responsibilities prescribed in the provisions of this article listed in subdivision 1 of this section.

5. It shall be the duty and responsibility of the department to:

a. Encourage voluntary cooperation by all persons in preventing and abating pollution of the waters of the state;

b. Encourage the formulation and execution of plans by cooperative

groups or associations of municipalities, industries, and other users of the waters who, severally or jointly, are or may be the source of pollution in the same waters, for the prevention and abatement of pollution;

c. Cooperate with the appropriate agencies of the United States or other states, or any interstate agencies in respect to pollution control matters, or for the formulation for submission to the legislature of interstate pollution control compacts or agreements;

d. Conduct or cause to be conducted studies and research, and provide services by itself or in cooperation with federal, interstate, state or municipal agencies, with respect to pollution abatement or control problems, disposal systems, and treatment of sewage, industrial waste and other wastes, which shall include but not be limited to (1) advances in effectiveness and economies in waste water treatment and plant design and operation, (2) feasible and economical means for providing sewers and sewage treatment works for small communities, (3) economical means for future incorporation of separate sewer service units into area-wide systems, (4) studies of selected problems, such as industrial wastes and changing sewage characteristics, (5) development of a data processing system for periodic determination of the status of water pollution control throughout the state, (6) provision of advisory services for municipal officials in relation to sewage problems, including information material concerning planning, construction and operation, financial assistance programs and methods of defraying the costs of sewers and sewage treatment plants, and (7) assimilative capacities of streams, lakes and other waters of the state;

e. Prepare and develop a general comprehensive plan for the abatement of existing pollution and the prevention of new pollution, by the installation, use, and operation of practical and available systems, methods and means for controlling pollution, recognizing different requirements for separate waters and for different segments of the same waters;

f. Require to be submitted to it, and to consider for approval, plans

for disposal systems or any part thereof, and to inspect the construction thereof for compliance with the approved plans;

g. Serve as an agency of the state for the receipt of moneys from the federal government, or other public or private agencies, and to expend the same, after appropriation therefor, for the purpose of pollution control, studies or research.

h. Establish a water quality surveillance network with sufficient stations and sampling schedule to meet the needs of the state, including ground water and surface water, both fresh and salt, and publish the results of such water quality surveillance network periodically;

i. Develop a public education and promotion program to aid and assist public officials in publicizing needs and securing support for pollution control action;

j. Prepare an annual report on the status of the water pollution control program, covering all phases of the program;

l. Promulgate rules, regulations and standards, subject to the requirements of subdivision 3 of section 17-0303, providing for the testing and measuring of sewage, industrial waste or other wastes, at their outlet or point source into waters of the state, and further providing for the maintaining of a permanent record of the resulting data, and periodically reporting such record to the commissioner, subject to the restriction set forth in subdivision 6 of section 17-0303.

6. The commissioner, or his authorized representative, shall have the right to enter at all reasonable times in or upon any property, public or private, for the purpose of inspecting and investigating conditions relating to pollution, or the possible pollution of any waters of the state, which inspection or examination does not involve confidential information relating to secret processes or economics of operation.

7. The commissioner, or his authorized representative may examine any

records or memoranda pertaining to the operation of a disposal system or treatment works which examination does not involve confidential information relating to secret processes or to economics of operation.

8. The commissioner, or his or her authorized representative, shall disclose to the public the date, location and source of a petroleum spill, including, but not limited to, information pertaining to the cleanup of such spill and the presence of methyl tertiary butyl ether (MTBE). In the event of such spill, the department shall post such information on its website within a reasonable period of time, including additional related information as soon thereafter as it becomes available.

§ 17-0305. Establishment of a program to monitor water quality by private citizens under the direction of the department.

1. The commissioner shall establish a program which shall be known as the "citizens statewide lake assessment program". The purpose of this program is to establish a network of volunteers belonging to lake associations throughout the state to monitor the condition of their respective lakes under the guidance and direction of the department. The volunteers, designated by the commission, will sample the assigned lakes on a weekly basis between May and September. Water quality information will be obtained by measuring water transparency and taking samples for water chemistry. Samples shall be processed by the volunteers and forwarded to a contract chemistry laboratory for analysis.

2. The commissioner shall establish and fill a new permanent position of program coordinator for the monitoring program within the division of water.

3. The commissioner shall establish a training program for the purpose of providing the volunteers with the skills necessary to accomplish their monitoring tasks. Quality control checks will be carried out on a regular basis by the program coordinator, and through the lake

classification and inventory survey.

4. The commissioner will provide the volunteers with all of the equipment and materials necessary to accomplish the monitoring.

5. Chemistry parameters shall include, but are not limited to, tests for total phosphorus, nitrate, color and chlorophyll. Additional survey data shall include, but not be limited to, aquatic vegetation surveys, angler surveys and questionnaires/surveys for water users concerning problems, issues and use impairment.

6. The program coordinator shall prepare an annual report which will include a summary of the information collected on the monitored waters during the previous season. This information shall be distributed to the program participants and other interested parties.

TITLE 5

PROHIBITIONS

Section 17-0501. General prohibition against pollution.

17-0503. Prohibition against pollution of waters of marine district.

17-0505. Prohibition against certain acts without permit.

17-0507. Prohibition against modification of wastes discharged through existing outlet or point source without permit.

17-0509. Minimum treatment required.

17-0511. Restrictions on discharge of sewage, industrial waste or other wastes.

§ 17-0501. General prohibition against pollution.

1. It shall be unlawful for any person, directly or indirectly, to throw, drain, run or otherwise discharge into such waters organic or inorganic matter that shall cause or contribute to a condition in contravention of the standards adopted by the department pursuant to

section 17-0301.

§ 17-0503. Prohibition against pollution of waters of marine district.

1. Sewage, industrial waste or other wastes, or any substance injurious to edible fish and shellfish, or the culture or propagation thereof, or which shall in any manner affect the flavor, color, odor or sanitary condition of such fish or shellfish so as to injuriously affect the sale thereof, or which shall cause any injury to the public and private shell fisheries of this state shall not be placed or allowed to run into the waters of the state in the marine district nor into any waters of Long Island, tributary to the marine district.

2. Garbage, cinders, ashes, oils, sludge or refuse of any kind shall not be thrown, dumped or permitted to run into the waters of the marine district.

§ 17-0505. Prohibition against certain acts without permit.

The making or use of an outlet or point source discharging into the waters of the state, and the operation or construction of disposal systems, without a valid SPDES permit as provided by section 17-0701 or title 8 hereof are prohibited.

§ 17-0507. Prohibition against modification of wastes discharged through existing outlet or point source without permit.

Increasing or altering the content of the wastes discharged through an outlet or a point source into the waters of the state by a change in volume or physical, chemical or biological characteristics without a SPDES permit so to do as provided by section 17-0701 or title 8 hereof, or standards, criteria, limitations, rules or regulations promulgated or applied pursuant thereto, is prohibited.

§ 17-0509. Minimum treatment required.

1. As used in this section, the term "effective secondary treatment" shall mean the removal of substantially all floating and settleable solids and the removal of at least eighty-five percent of suspended solids and at least eighty-five percent of five day biochemical oxygen demand, or such other standard as may be adopted pursuant to the Act.

2. The minimum degree of treatment required for the discharge of sanitary sewage into the surface waters of the state shall be effective secondary treatment, provided, however, that additional treatment may be required consistent with the standards established for specific waters by the department pursuant to section 17-0301 or with standards, criteria, limitations, rules or regulations promulgated or applied pursuant to title 8 hereof.

§ 17-0511. Restrictions on discharge of sewage, industrial waste or other wastes.

The use of existing or new outlets or point sources, which discharge sewage, industrial waste or other wastes into waters of this state is prohibited unless such use is in compliance with all standards, criteria, limitations, rules and regulations promulgated or applied by the department pursuant to this article.

TITLE 7

PERMITS AND CERTIFICATES

Section 17-0701. Permit for outlet, point source and for disposal system required.

17-0703. Issuance, denial, and revocation of permits.

17-0705. Certificates of compliance for purposes of the Real Property Tax Law.

17-0707. Certificates of compliance for purposes of the Tax Law.

§ 17-0701. Permit for outlet, point source and for disposal system required.

1. It shall be unlawful for any person, until a written SPDES permit therefor has been granted by the commissioner, or by his designated representative, and unless such permit remains in full force and effect, to:

a. Make or cause to make or use any outlet or point source for the discharge of sewage, industrial waste or other wastes or the effluent therefrom, into the waters of this state, or

b. Construct or operate and use a disposal system for the discharge of sewage, industrial waste, or other wastes or the effluent therefrom, into the waters of the state, or make any change in, addition to or an extension of any existing disposal system or part thereof which would materially alter the volume of, or the method or effect of treating or disposing of the sewage, industrial waste or other wastes, or

c. Increase or alter the content of the wastes discharged through an outlet or point source into the waters of the state by a change in volume or physical, chemical or biological characteristics.

2. Notwithstanding any other provision of this article, for the purposes of this title, the following definitions shall be applicable:

a. "Industrial waste" means any liquid, gaseous, solid or waste substance or a combination thereof resulting from any process of industry, manufacturing, trade, or business or from the development or recovery of any natural resources, which may cause or might reasonably be expected to cause pollution of the waters of the state.

b. "Other wastes" means garbage, refuse, decayed wood, sawdust, shavings, bark, sand, lime, cinders, ashes, offal, oil, tar, dye-stuffs, acids, chemicals, ballast and all other discarded matter not sewage or industrial waste which may cause or might reasonably be expected to

cause pollution of the waters of the state.

3. No permit prescribed by subdivision 1 of this section shall be issued by the commissioner or by his designated representative until the requirements of title 8 of this article and the regulations promulgated thereunder have been satisfied.

4. a. A person, corporation, public authority or public benefit corporation hereafter intending to construct a nuclear steam-electric generating facility shall file an environmental feasibility report, in a form prescribed by the commissioner, with the department concurrently with the filing of the preliminary safety analysis report required to be filed with the United States atomic energy commission for a nuclear power plant.

b. No person, corporation, public authority, or public benefit corporation shall construct or operate any new steam-electric generating facility or increase the capacity of any existing steam-electric generating facility without a permit issued in accordance with the provisions of this subdivision allowing thermal discharge from such facility to the waters of the state. A public hearing may be conducted by the department prior to the issuance of any such permit.

5. A SPDES permit shall be issued to the applicant upon such conditions as the commissioner may direct:

a. if the commissioner finds on the basis of the submitted plans or application that the discharge from the outlet or point source or modified disposal system will not be in contravention of the standards, criteria, limitations, rules and regulations adopted or applied by the department; or

b. in case no classification has been made of the receiving waters at said outlet or point source or into which such proposed discharge is to be made, if the commissioner finds that such proposed discharge will not be injurious to public health and public enjoyment thereof, the propagation and protection of fish and wild life, the industrial

development of the state and will not contravene standards, criteria, limitations, rules and regulations adopted or applied pursuant to title 8 hereof.

6. The permit prescribed by subdivision 1 of this section and title 8 hereof shall not be required for the construction and use of a new or modified disposal system, point source or outlet when such disposal system, point source or outlet is designed to discharge or discharges sewage effluent without the admixture of industrial wastes or other wastes to the ground waters of the state when such discharge consists of a flow of less than one thousand gallons per day. Nothing contained in this subdivision shall be construed to permit the making or use of an outlet or point source discharging an effluent to the waters of the state in contravention of any standards adopted by the former Water Pollution Control Board or the former Water Resources Commission and continued by this article or adopted by the department or standards, criteria, limitations, rules or regulations promulgated or applied pursuant to title 8 hereof, or discharging an effluent in such a manner as to expose sewage on the ground surface, impair the quality of waters of the state used for drinking purposes or otherwise create a nuisance or menace to health. A county, city, town or village may adopt and enforce additional local laws, ordinances and regulations or enforce existing local laws, ordinances and regulations relating to discharges of sewage herein referred to, including local laws, ordinances and regulations requiring a permit for disposal systems, point sources or outlets for such discharges, provided that such local laws, ordinances and regulations are not inconsistent with the provisions of this chapter or the sanitary code.

7. The commissioner may delegate to qualified personnel of county and city health departments his duties of review and approval of plans and issuance of permits required in subdivisions 1, 3 and 4 of this section, subject to such conditions as he may establish.

9. In the case of a major steam electric generating facility, as defined in section one hundred forty of the public service law, for the construction or operation of which a certificate is required under

article eight of such law, an applicant shall apply for and obtain such certificate in lieu of filing plans and reports and obtaining a permit under this section. Any reference in this article to a permit under this section shall, in the case of such major steam electric generating facility, be deemed for all purposes to refer to such certificate, provided that nothing herein shall limit the authority of the departments of health and environmental conservation to monitor the environmental and health impacts resulting from the operation of such major steam electric generating facility and to enforce applicable provisions of the public health and environmental conservation laws and the terms and conditions of the certificate governing the environmental and health impacts resulting from such operation.

§ 17-0703. Issuance, denial, and revocation of permits.

1. The permit provided in section 17-0701 and title 8 hereof shall be issued by the commissioner or by his designated representative, pursuant to regulations of the department adopted in accordance with subdivision 3 of section 17-0303 and title 8 hereof.

2. Public hearings, on due notice, shall be conducted by the commissioner or by his designated representative in connection with the issuance of any order or determination denying, revoking, continuing or modifying a permit as provided by section 17-0701 paragraph f of subdivision 4 of section 17-0303 and title 8 hereof, unless the applicant or permittee waives said hearing in writing and no request for a public hearing has been received from any interested party.

§ 17-0705. Certificates of compliance for purposes of the Real Property Tax Law.

1. For the purposes of section 477 of the Real Property Tax Law, the commissioner or his designated representative is hereby authorized to issue certificates of compliance concerning industrial waste treatment facilities, and industrial waste treatment controlled process facilities

as defined in such law. No such certificate shall be issued unless the facility to which it is applicable is in compliance with applicable provisions of titles 1 to 11, inclusive, and title 19 of article 17, article 19, and title 1 of article 27 of this chapter; of the Public Health Law; of the state sanitary code and of regulations, permits or orders issued pursuant thereto.

2. In the case of facilities which have not been completed prior to the close of a taxable status date with respect to which an exemption may be claimed under the Real Property Tax Law, a temporary certificate of compliance may be issued if the commissioner or his representative is satisfied, on the basis of the construction which has taken place, that such facilities, when completed, will be in compliance with the provisions of titles 1 to 11, inclusive, and title 19 of article 17, article 19, and title 1 of article 27 of this chapter; of the Public Health Law; of the state sanitary code, and regulations, permits or orders issued pursuant thereto. Such a temporary certificate shall apply only to taxes levied as of the taxable status date with respect to which such a certificate is issued.

§ 17-0707. Certificates of compliance for purposes of the Tax Law.

1. For the purposes of sections 208, 210, 606 and 612 of the Tax Law, the commissioner or his designated representative is hereby authorized to issue certificates of compliance concerning industrial waste treatment facilities and industrial waste treatment controlled process facilities as defined in such law. No such certificate shall be issued unless the facility to which it is applicable is in compliance with applicable provisions of titles 1 to 11, inclusive, and title 19 of article 17, article 19, and title 1 of article 27 of this chapter; of the Public Health Law; of the state sanitary code and of regulations, permits or orders issued pursuant thereto.

2. In the case of facilities which have not been completed prior to the close of a taxable year for which a deduction may be claimed under the Tax Law, a temporary certificate of compliance may be issued if the

commissioner or his representative is satisfied, on the basis of the construction which has taken place, that such facilities will be in compliance with the provisions of titles 1 to 11, inclusive, and title 19 of article 17, article 19, and title one of article 27 of this chapter; of the Public Health Law of the state sanitary code, and regulations, permits or orders issued pursuant thereto. Such a temporary certificate shall apply only to expenditures made in the taxable year with respect to which such a certificate is issued.

TITLE 8

STATE POLLUTANT DISCHARGE ELIMINATION SYSTEM

- Section 17-0801. Purpose.
- 17-0803. SPDES permits; application.
- 17-0804. Rules and regulations.
- 17-0805. Notice and public participation; access to information.
- 17-0807. Prohibited discharges.
- 17-0808. Municipal and industrial stormwater discharges.
- 17-0809. Effluent limitations.
- 17-0810. Stormwater management design manual modification.
- 17-0811. Application of effluent standards and limitations; water quality standards; other requirements.
- 17-0813. Compliance schedules.
- 17-0815. SPDES permits; additional terms and conditions.
- 17-0815-a. Discharge point signs.
- 17-0816. Coordination with AEM program.
- 17-0817. SPDES permits; duration and reissuance.
- 17-0819. Applications, reports, notices; provisions to insure verity.
- 17-0821. Fees.
- 17-0823. Power plant siting.
- 17-0825. Discharges of industrial waste to publicly owned treatment works.
- 17-0826. Notification of discharges affecting groundwaters.
- 17-0826-a. Mandatory sewage release reporting and notification by publicly owned treatment works and operators of

publicly owned sewer systems.

- 17-0827. Conflicts of interest.
- 17-0828. Discharges affecting groundwaters.
- 17-0829. Inspection and entry.
- 17-0831. Environmental monitors for tankers.

§ 17-0801. Purpose.

To create a state pollutant discharge elimination system (SPDES) to insure that the State of New York shall possess adequate authority to issue permits regulating the discharge of pollutants from new or existing outlets or point sources into the waters of the state, upon condition that such discharges will conform to and meet all applicable requirements of the Federal Water Pollution Control Act, as amended (33 U.S.C. 1251, et seq.) hereinafter referred to as the "Act", and rules, regulations, guidelines, criteria, standards and limitations adopted pursuant thereto relating to effluent limitations, water quality related effluent limitations, new source performance standards, toxic and pretreatment effluent limitations, ocean discharge criteria, and monitoring, and to participate in the national pollutant discharge elimination system (NPDES) created by the Act.

§ 17-0803. SPDES permits; application.

Except as provided by subdivision five of section 17-0701 of this article, it shall be unlawful to discharge pollutants to the waters of the state from any outlet or point source without a SPDES permit issued pursuant hereto or in a manner other than as prescribed by such permit. The department shall, by rule and regulation, require that every applicant for a permit to discharge pollutants into the waters of the state shall file such information at such times and in such form as the department may reasonably require to execute the provisions of this article. Rules and regulations adopted hereunder may provide that in lieu of issuance of such permit the department may accept as compliance herewith a permit duly issued by the federal government or an agency

thereof pursuant to the provisions of the Act.

§ 17-0804. Rules and regulations.

The rules and regulations adopted by the department to implement this title and the provisions of article 70 of this chapter and rules and regulations thereunder shall govern permit applications, renewals, modifications, suspensions and revocations under this title.

§ 17-0805. Notice and public participation; access to information.

1. a. Public notice of a complete application for a SPDES permit, including: (i) all renewals of SPDES permits issued in lieu of NPDES permits; (ii) other permit renewals, except renewals of permits for projects defined as minor in article 70 of this chapter; and (iii) modifications involving substantive changes in permit requirements or authorized activities, except modification of permits for projects defined as minor under article 70 of this chapter, shall be circulated in a manner designed to inform interested and potentially interested persons and any other state, the waters of which may be affected, of such application. Such notice shall include, where appropriate, the following: (i) the applicant's name and address; (ii) a brief description of the project or proposed project and its location; (iii) a list of all department permits directly related to the project for which application has been made; (iv) the name and classification of the water body to which discharges are being made or are to be made; (v) the volume and type of the discharge authorized or to be authorized; (vi) the permit's priority ranking score; (vii) the name and telephone number of the department and the lead agency contact persons for the project; (viii) a statement that copies of the permit application, the existing or draft permit, the fact sheet, the priority ranking fact sheet, worksheet and a description of the SPDES permit priority ranking system are available upon request; and (ix) a statement that written comments or requests for a public hearing on the permit application, draft environmental impact statement or the permit's priority ranking score

may be filed by a time and at a place specified.

b. The department shall provide a period of not less than thirty days following the date of the public notice pursuant to paragraph a of this subdivision during which time interested persons may submit their written views with respect to the application and the priority ranking of the permit. The period for comment may be extended at the discretion of the department. All written comments submitted during such thirty day or extended period shall be retained by the department and considered in the formulation of the final determination on the application and the priority ranking of the permit. The department may, in its discretion, provide an opportunity for the applicant or any interested agency, person or group of persons to request or petition for a public hearing with respect to such application or the priority ranking of the permit. Such request or petition shall be made during the public notice and comment period. The department shall promulgate rules and regulations with respect to notice, procedures and conduct of public hearings in accordance with due process of law for administrative proceedings and the provisions of the Act.

2. Notwithstanding any other provision of law, any effluent data, any SPDES permit, permit application including a permit renewal application, priority ranking fact sheet or request for permit modification, suspension or revocation shall be available to the public for inspection and copying. This includes information submitted on the forms themselves and any attachments used to supply information required by the forms.

3. Except insofar as trade secrets would be disclosed, the following information shall be available to the public for inspection and copying;

(a) any public comments, testimony or other documentation concerning a permit application, including a permit renewal application, priority ranking fact sheet or request for permit modification, suspension or revocation; and

(b) any information obtained pursuant to any monitoring, records, reporting or sampling requirements or as a result of sampling or other investigatory activities of the department.

4. The department shall identify and hold confidential any information, except effluent data, SPDES permits, permit applications, including permit renewal applications priority ranking fact sheets or requests for permit modification, suspension or revocation, including information submitted on the forms themselves and any attachments used to supply information required by the forms, shown by any person to be information which, if made public, would divulge methods or processes entitled to protection as trade secrets of such person.

§ 17-0807. Prohibited discharges.

The following discharges into the waters of the state are hereby prohibited.

1. the discharge of any radiological, chemical or biological warfare agent or high-level radioactive waste, as such terms are defined by the Act or pursuant thereto.

2. any discharge which would substantially impair anchorage and navigation, as determined by the Secretary of the Army.

3. any discharge to which the federal government has objected pursuant to any right to object provided by the Act.

4. any discharge not permitted by the provisions of this article, rules and regulations adopted or applicable pursuant hereto, the Act, or provisions of a permit issued hereunder.

§ 17-0808. Municipal and industrial stormwater discharges.

1. Prior to October first, nineteen hundred ninety-two, no permit shall be required for discharges composed entirely of stormwater, except as provided in subdivision two of this section.

2. Subdivision one of this section shall not apply with respect to the

following stormwater discharges:

- a. A discharge with respect to which a permit has been issued under this title prior to the effective date of this section;
- b. A discharge associated with industrial activities directly related to manufacturing, processing, or raw materials storage areas at an industrial plant;
- c. A discharge from a municipal separate storm sewer system serving a population of one hundred thousand or more; or
- d. A discharge which the commissioner determines contributes to a violation of water quality standards adopted pursuant to section 17-0301 of this article or is a significant contributor of pollutants to the waters of the state.

3. Permits for discharges from municipal storm sewers:

- a. May be issued on a system or jurisdiction-wide basis, pursuant to paragraph (a) of subdivision seven of section 70-0117 of this chapter;
- b. Shall include a requirement which regulates non-stormwater discharges into the storm sewers; and
- c. Shall require controls to reduce the discharge of pollutants to the maximum extent practicable, including management practices, control techniques and system design and engineering methods, and such other provisions as the commissioner determines appropriate for the control of such pollutants.

4. The commissioner shall promulgate regulations setting forth the requirements for permit applications for stormwater discharges and the deadlines for the receipt of applications.

§ 17-0809. Effluent limitations.

1. SPDES permits issued pursuant hereto shall contain applicable effluent limitations as required by the Act and as may be promulgated by the department.

2. Notwithstanding any other provision of this article, any point source the construction of which is commenced after the date of enactment of the Act and which is so constructed as to meet all applicable standards of performance shall not be subject to any more stringent standard of performance during a ten-year period beginning on the date of completion of such construction or during the period of depreciation or amortization of such facility for the purposes of section 167 or 169 (or both) of the Internal Revenue Code of 1986, whichever period ends first.

3. Notwithstanding any other provision of this article, when effluent limitations are established they must be at least as stringent as the effluent limitations previously required unless the commissioner determines, through regulation, that an exception is warranted as provided in section 303(d) and 402(o) of the Federal Water Pollution Control Act (33 U.S.C. sections 1313(d) and 1342(o)) as amended by the Water Quality Act of 1987; provided, however, no such exceptions may be determined to be warranted in special groundwater protection areas designated pursuant to article fifty-five of this chapter or in Nassau or Suffolk counties where such discharges will impact marine waters within ten years or less. In such areas, the best available technology, that is economically feasible and cost effective based on an analysis that considers direct and avoided economic and environmental costs, shall be applied with special emphasis on reducing nitrogen pollution.

§ 17-0810. Stormwater management design manual modification.

On or before one year following the effective date of this section, the department shall modify the New York State Stormwater Management Design Manual to include the following provisions:

1. Require signage prohibiting swimming and wading, warning of possible contamination or pollution of the stormwater retention pond, and a description with the depth of the stormwater retention pond;
2. Define a reasonable slope past the aquatic bench to limit the immediate drop off to the deeper end of the stormwater retention pond;
3. Require aquatic vegetation be established in the aquatic and safety benches before the stormwater retention pond is rendered in-service;
4. Ensure maintenance plans include a requirement for examining the status of safety features by the maintenance authority in their routine maintenance schedule of stormwater retention ponds; and
5. Any other provisions the department deems essential to further promote safety in and around stormwater retention ponds.

§ 17-0811. Application of effluent standards and limitations; water quality standards; other requirements.

SPDES permits issued pursuant hereto shall include provisions requiring compliance with the following, where applicable;

1. effluent limitation.
2. standards of performance for new sources.
3. toxic and pretreatment effluent standards.
4. ocean discharge criteria adopted by the federal government.
5. any further limitations necessary to insure compliance with water quality standards adopted pursuant to state law.

§ 17-0813. Compliance schedules.

SPDES permits issued pursuant hereto may contain compliance schedules. Such compliance schedules shall require that the permittee within the shortest reasonable time consistent with the requirements of the Act conform to and meet;

1. applicable effluent limitations.
2. any further limitations necessary to insure compliance with water quality standards adopted pursuant to state law.
3. standards of performance for new sources.
4. ocean discharge criteria adopted by the federal government pursuant to the Act.
5. toxic and pretreatment effluent standards.

§ 17-0815. SPDES permits; additional terms and conditions.

SPDES permits shall include the following provisions, terms, requirements and conditions;

1. that all discharges authorized by the permit shall be consistent with the provisions, terms, requirements and conditions of such permit.
2. that facility expansions, production increases or process modifications by the permittee which result in new or increased discharges of pollutants into the waters of the state shall be reported by the permittee by submission of a new SPDES application.
3. that the discharge of any pollutant not identified and authorized by such permit or the discharge of any pollutant more frequently than or at a level in excess of that permitted by such permit shall constitute a violation of the terms of the permit.

4. that, where the permit is for a publicly owned treatment works, notice shall be given the department of any new introduction into such works of pollutants or substantial changes in volume or character of pollutants.

5. that for discharges from publicly owned treatment works appropriate measures will be established by the permittee to insure compliance by industrial users with any system of user charges and recovery of construction costs required under the provisions of the Act.

6. that such permit may be modified, suspended or revoked where the department finds.

a. a violation of any term of the permit;

b. that the permit was obtained by misrepresentation or failure to disclose fully all relevant facts; or

c. a change in conditions or the existence of a condition which requires either a temporary or permanent reduction or elimination of the authorized discharge.

7. such other terms, provisions, requirements or conditions as may be necessary to meet the requirements of the Act.

8. recording, reporting, monitoring, and sampling requirements applicable under the Act.

§ 17-0815-a. Discharge point signs.

1. Any person possessing a SPDES permit which allows the discharge of waste water into the surface waters of the state shall post a sign as provided for in subdivision two of this section at all discharge points to surface waters, except for those sites where the discharge is composed exclusively of storm water runoff.

2. (a) All SPDES permit holders for discharges to surface waters shall erect or post a conspicuous and legible sign of not less than eighteen inches by twenty-four inches bearing the following statement:

"N.Y.S. Permitted Discharge Point Permit No. (here insert permit number). For information on this discharge you can contact:"

The sign shall also contain the following information: The SPDES permit number as issued by the department; the name and telephone number of the permit holder which shall be the business office repository of the permit holder as required by this title; and the name, address and telephone number of the regional department office in which the discharging facility is located.

(b) The permit holder shall provide for public review at the business office repository of the permit holder or at the off-premises location of its choice (such location shall be the village, town, city or county clerk's office, local library or such other location as the department and permit holder shall agree upon) all the Discharge Monitoring Reports (DMR) prepared by the permit holder to demonstrate compliance with the SPDES permit conditions. A copy of each DMR shall be placed on file at such location at the same time it is sent to the department. This information shall be kept on file for the period of the effective dates of the SPDES permit.

(c) The permit holder shall be in compliance with this title by providing, at its option, on or off premises inspection of documents pursuant to paragraphs (a) and (b) of this subdivision and providing the address or location where the required information is available for public review upon an inquiry.

3. The department shall, pursuant to the terms and conditions of the permits issued pursuant to this title, establish the actual appearance and location of the sign on the property of the permit holder in as close proximity to the point of discharge into the surface waters as is reasonably possible while ensuring the maximum visibility from the surface water and shore.

4. It shall be the responsibility of the permit holder to periodically and reasonably maintain the sign to ensure that it is still legible,

visible and factually correct. A good faith documented effort by permit holder to maintain such sign will be an affirmative defense for its absence.

5. The department may in its discretion waive all or part of the requirements of this section if it determines that: (a) such sign cannot be reasonably maintained; (b) such sign would be inconsistent with the provisions of another statute; (c) such sign could not be so located as to provide a public purpose; (d) the nature of the discharge is temporary and of a relatively short duration; (e) the permit has been issued under the terms and conditions of a general permit as authorized by this title; or (f) the discharge is not a major, significant discharge.

§ 17-0816. Coordination with AEM program.

To the extent practical and consistent with the purposes of this title and title seven of this article, SPDES permits for farm operations participating in the agricultural environmental management (AEM) program as set forth in article eleven-A of the agriculture and markets law shall incorporate as part of the SPDES permit terms and conditions any AEM plan prepared for the permit applicant.

§ 17-0817. SPDES permits; duration and reissuance.

1. SPDES permits issued in lieu of national pollutant discharge elimination system permits shall be valid for a fixed term not to exceed five years. All other SPDES permits issued pursuant to this chapter shall be valid for a term not to exceed ten years.

2. All SPDES permits may be administratively renewed in accordance with article seventy of this chapter.

3. The department shall review at least once every five years all existing permits for conformance with new federal treatment technology,

new state water quality classifications and water quality standards.

4. The department shall develop a priority ranking system of SPDES permits. The ranking system shall prioritize permits for full technical review and, when necessary, modification. For purposes of this subdivision, full technical review shall mean the complete evaluation of all elements of the permit associated with the ranking system's priority ranking factors, together with substantive issues identified in comments submitted during the public comment period, and the verification of the accuracy and appropriateness of all other information contained in the permit. Any permits reviewed pursuant to this subdivision shall require compliance with current effluent standards and limitations and water quality standards.

5. Any interested party may request at any time that a permit be modified, suspended or revoked on the grounds that newly discovered, material information has been discovered; that a material change in environmental conditions has occurred; that relevant technology or applicable law or regulations have changed since the issuance of the existing permit; or on other grounds established by the department by regulation. All such requests shall be in writing and contain facts or reasons supporting the request. If the department determines that the request is not justified, it shall send the party a brief written response giving the reasons for the decision. A copy of such request and the department's response shall be sent to the permittee. If the department determines that the request is justified, it shall take action pursuant to article seventy of this chapter.

6. Within eight months after the effective date of this section the department shall hold at least three public hearings to solicit public comments on the SPDES permit priority ranking system, including the permit priority ranking factors and the weighing and scoring system. All comments submitted during the hearing process and associated comment period shall be considered by the department in the review, and modification if appropriate, of the SPDES permit priority ranking system. Thereafter, whenever the department reviews the SPDES permit priority ranking system for possible modification, the department shall

formally solicit and provide for the involvement of the public in such review. The department shall annually publish in the environmental notice bulletin any changes in the priority ranking list, and solicit and provide for the involvement of the public in a review of the priority ranking list.

§ 17-0819. Applications, reports, notices; provisions to insure verity.

All applications, reports, notices or notifications required or authorized to be made or filed by this title or by rules or regulations promulgated pursuant hereto or by the provisions or conditions of any permit issued pursuant to this title or title three of this article by or on behalf of a permittee, applicant for a permit or person in control of an outlet into the water of the state or point source shall be verified or sworn to in respect to all statements of fact therein or shall bear a form notice as provided in section 210.45 of the penal law to the effect that false statements made therein are punishable.

§ 17-0821. Fees.

The department is hereby authorized to establish a schedule of reasonable fees, such schedule taking into consideration the volume of the discharge and treatment costs, for application for issuance of SPDES permits to compensate the department for its expenses hereunder, giving due recognition to the amount of federal assistance available; provided, however, that the department shall not charge a publicly owned drinking water treatment plant the rates charged industrial facilities, but shall consider such plants to be municipal facilities for the purposes of the imposition of fees pursuant to section 72-0602 of this chapter.

§ 17-0823. Power plant siting.

In the case of a major steam electric generating facility, as defined in section one hundred forty of the public service law, for the

construction or operation of which a certificate is required under the former article eight of the public service law, or a major electric generating facility as defined in section one hundred sixty of the public service law, for the construction or operation of which a certificate is required under article ten of the public service law, such certificate shall be deemed a permit under this section if issued by the state board on electric generation siting and the environment pursuant to federally delegated or approved environmental permit authority. Nothing herein shall limit the authority of the department of health and the department to monitor the environmental and health impacts resulting from the operation of such major steam electric generating facility or major electric generating facility and to enforce applicable provisions of the public health law and this article and the terms and conditions of the certificate governing the environmental and health impacts resulting from such operation. In such case all powers, duties, obligations and privileges conferred upon the department by this article shall devolve upon the New York state board on electric generation siting and the environment. In considering the granting of permits, such board shall apply the provisions of this article and the Act.

§ 17-0825. Discharges of industrial waste to publicly owned treatment works.

Persons discharging industrial waste to a publicly owned treatment works shall comply with toxic effluent standards and pretreatment standards and to monitoring, reporting, recording, sampling and entry requirements provided by the Act or adopted pursuant thereto.

§ 17-0826. Notification of discharges affecting groundwaters.

Whenever a provision of this title is violated by a facility operating under or pursuant to a SPDES permit and located within an area designated pursuant to any federal or state statute as a sole source aquifer, all public water purveyors with a service area or portion

thereof located within a three mile radius of the violating facility shall be notified by the department of such violation if the department determines that the violation could have a significant impact on the water resources of the area. The department's notices pursuant to this section shall be made within fourteen days of the official notice of noncompliance of the SPDES permit to the violating facility.

For the purposes of this section "public water purveyor" shall mean any person, partnership, public or private corporation, municipality, or public authority which sells water derived from a sole source aquifer to at least five service connections or at least twenty-five individuals.

§ 17-0826-a. Mandatory sewage release reporting and notification by publicly owned treatment works and operators of publicly owned sewer systems.

1. Publicly owned treatment works or the operator of a publicly owned sewer system shall immediately, but in no case later than two hours after discovery, report discharges of untreated or partially treated sewage, including combined sewer overflows, except partially treated sewage discharged directly from a publicly owned treatment works that is in compliance with a department approved plan or permit, to the department and the local health department, or if there is none, the New York state health department. Such report shall, at a minimum, include, to the extent knowable with existing systems and models:

- (a) the volume and treated state of the discharge;
- (b) the date and time of the discharge;
- (c) the expected duration of the discharge;
- (d) a brief description of the steps being taken to contain the discharge except for wet weather combined sewer overflow discharges;
- (e) the location of the discharge, with the maximum level of specificity possible; and
- (f) the reason for the discharge.

2. In addition to subdivision one of this section, as soon as possible, but no later than four hours from discovery of the discharge,

the publicly owned treatment works or the operator of a publicly owned sewer system shall notify the local health department or if there is none, the New York state health department, the chief elected official or their authorized designee of the municipality in which the discharge occurred and the chief elected official or their authorized designee of any adjoining municipality that may be affected. The same notification shall also be provided within the same timeframe to the general public, pursuant to regulations to be promulgated under subdivision four of this section through appropriate electronic media, including, but not limited to, electronic mail or voice communication as determined by the department.

3. The department, in consultation with the department of health, shall post reported information on its website expeditiously and shall prepare a report on publicly owned treatment works and sewer system discharges annually. The report shall, at a minimum, include: the total number of discharges, details of such discharges including the volume and treated state of the discharge, and the duration and location of each discharge; as well as any remedial responses taken to mitigate impacts and avoid further discharges.

4. The department shall promulgate rules and regulations that are necessary for the implementation of this section. Such regulations as are necessary for the implementation of the public notification requirements of subdivision two of this section shall provide only for public notification of discharges that may present a threat to public health, considering the potential for exposure and other relevant factors. Such regulations may also include preconditions for notification of any discharge that is not subject to a permit issued under this title and does not present a threat to public health, considering the potential for exposure and other relevant factors.

§ 17-0827. Conflicts of interest.

The commissioner of the department or his designee responsible for issuance of SPDES permits hereunder, is hereby prohibited from

receiving, or during two years prior to approval of an application for a permit from having received, a significant portion of his income directly or indirectly from permit holders or applicants for a permit. For the purposes of this section (a) "significant portion of his income" shall mean ten percent of gross personal income for a calendar year, except that it shall mean fifty percent of gross personal income for a calendar year if the recipient is over sixty years of age and is receiving such portion pursuant to retirement, pension, or similar arrangement; (b) "income" includes retirement benefits, consultant fees, and stock dividends; and (c) income is not received "directly or indirectly from permit holders or applicants for a permit" where it is derived from mutual-fund payments, or from other diversified investments over which the recipient does not know the identity of the primary sources of income.

§ 17-0828. Discharges affecting groundwaters.

In addition to any other requirements imposed by this title, any person seeking a SPDES permit or a renewal hereunder, within an area designated pursuant to any federal or state statute as a sole source aquifer, shall include as a part of the required information, the name and address of all public water purveyors with a service area or portion thereof located within a three mile radius of the applicant's facility. The names of all public water purveyors identified in the SPDES permit application or renewal shall be included in the project description as set forth when announced in the environmental notice bulletin.

For the purposes of this section "public water purveyor" shall mean any person, partnership, public or private corporation, municipality, or public authority which sells water derived from a sole source aquifer to at least five service connections or at least twenty-five individuals.

§ 17-0829. Inspection and entry.

(a) To carry out the purposes of this Act or any rule, regulation, order, or permit, issued thereunder, the department or its authorized

representative, upon presentation of his credentials:

(1) shall have a right of entry to, upon, or through any premises in which any effluent source is located or in which any records are required to be maintained;

(2) may at reasonable times have access to and copy any records required to be maintained;

(3) may inspect any monitoring equipment or method which is required; and

(4) may have access to and sample any discharges or pollutants to waters or to publicly owned treatment works resulting directly or indirectly from activities or operations of the owner or operator of the premises in which the effluent source is located.

(b) For the purposes of this section the term "effluent source" shall mean:

(1) a point source of the discharge of pollutants or

(2) a source of introduction of pollutants into publicly owned treatment works by an industrial user.

§ 17-0831. Environmental monitors for tankers.

1. At the discretion of the commissioner, a tanker withdrawing or transporting water where such withdrawal or transport was authorized pursuant to a permit issued under section 15-1506 of this chapter shall be accompanied by an environmental monitor authorized by the department.

2. It shall be the duty of such environmental monitor to inspect and monitor the compliance of such tankers with all federal, state and local requirements for operations and ballasting.

3. Nothing in this section shall prohibit the department from entering into a memorandum of understanding with the board of commissioners of pilots, created by article six of the navigation law, to allow licensed pilots to perform the functions of environmental monitors.

4. The department is authorized to set environmental monitoring fees to recover all costs associated with such monitors. Every tanker

withdrawing or transporting water where such withdrawal or transport was authorized pursuant to a permit issued under section 15-1506 of this chapter shall be subject to such fees.

TITLE 9 PROCEDURE

Section 17-0901. Hearings.

17-0903. Notices; service of process.

17-0905. Proceedings before the commissioner.

17-0907. Hearings for persons aggrieved.

17-0909. Review by courts.

§ 17-0901. Hearings.

1. Public hearings shall be conducted by the commissioner, or his duly designated representative or representatives prior to issuance of an order directing any person to discontinue discharge of sewage, industrial waste or other wastes which contravene the standards established for any waters of the state or standards, criteria, limitations, rules or regulations promulgated or applied pursuant to title 8 hereof.

2. The hearings herein provided may be conducted by the commissioner, or by the duly designated hearing officer or officers, at any time and place.

3. A record, or summary thereof, of the proceedings of said hearings shall be made and filed with the department. If requested to do so by any party concerned with said hearing, the full stenographic notes of the testimony presented at said hearing shall be taken and filed. The stenographer shall, upon the payment of his fees allowed by law therefor, furnish a certified transcript of the whole or any part of his notes to any party to the action requiring the same.

4. In any such hearing, the hearing officer or any member of the

hearing panel, may administer oaths, examine witnesses, and issue, in the name of the department, notices of hearings and subpoenas requiring the attendance and testimony of witnesses and the production of evidence relevant to any matter involved in any such hearing. A designation of a person or persons by the commissioner to perform the functions herein authorized shall be in writing and filed in the department.

5. In case of contumacy or refusal to obey a notice of hearing or subpoena issued under this section, the supreme court shall have jurisdiction, upon application of the commissioner or his duly designated representative, to issue an order requiring such person to appear and testify or produce evidence, as the case may require, and any failure to obey such order of the court may be punished by said court as a contempt thereof.

§ 17-0903. Notices; service of process.

1. Notices of all public hearings held pursuant to this title shall specify the time, date and place of hearing.

2. Service of all processes, except subpoenas, shall be made in the same manner as a summons in a civil action or by registered or certified mail with a return receipt requested, addressed to the individual served in person or in a representative capacity as hereinafter provided at his last known residence, office or place of business. Such service shall be made upon a municipality by serving the chief executive or counsel thereof, upon a sewer district, authority, commission or private corporation by serving an officer thereof, or upon an unincorporated association or partnership or other company of persons, which has a president or treasurer, by serving either of such officers.

3. Subpoenas shall be served upon the witnesses personally, together with such fees therefor as may be provided by law.

§ 17-0905. Proceedings before the commissioner.

1. The commissioner may, on his own motion, investigate or make inquiry, in a manner to be determined by him, as to the condition of any of the waters of the state and as to any alleged act of pollution or omission or failure to comply with any provisions of titles 1 to 11, inclusive, or title 19 of this article.

2. Whenever it shall appear to the commissioner, after investigation, that there has been a violation of any of the provisions of titles 1 to 11, inclusive, or title 19 of this article, he shall give written notice to the alleged violator or violators setting forth any thing or act done or omitted to be done or claimed to be in violation of any such provisions, and requiring that the matters complained of be corrected, or that the alleged violator appear in person or by attorney before the commissioner or his duly designated representative, at the time and place in said notice specified, and answer the charges complained of.

3. Whenever it shall appear to the commissioner, after investigation, that industrial or other wastes turned or allowed to run into a sewer or sewage disposal system, the content of which ultimately is discharged into the waters of the state, is a cause or contributes to the pollution of the said waters, he shall also notify the person or persons allowed to be responsible for the discharge of the industrial or other wastes into the sewer or sewage disposal system of any alleged violations on his or their part and shall notify him or them to appear at said hearing and answer the charges made against him or them.

4. At least twenty days' notice of such hearing shall be given.

5. Upon the return day of such notice the person so notified shall file with the commissioner a statement setting forth the position of the person so notified, the answer, if any, to the charges made against him, the methods, practices and procedures, if any, which are being taken to prevent polluting discharges into the waters of the state or the sewer or sewage disposal system which ultimately empties into said waters, and any other defenses or information pertinent to the case. Pertinent and relevant testimony of witnesses shall be received in support of or

opposition to said statement.

6. The burden of proof with respect to violations of or liability imposed by titles 1 to 11, inclusive, and title 19 of this article shall, except as otherwise provided in section 71-1941, be upon the department.

7. After due consideration of the written and oral statements, and testimony and arguments filed pursuant to subdivision 5 above, or on default in appearance on said return day, the commissioner may issue and enter such final order or make such final determination as he deems appropriate under the circumstances, and shall notify such person or persons thereof in writing, personally, or by registered mail.

§ 17-0907. Hearings for persons aggrieved.

1. This section shall apply only to titles 1 to 11, inclusive, and title 19 of this article.

2. The commissioner shall grant a hearing to any person not previously heard in connection with the making of a determination, or order, who within twenty days after service upon him of a copy of a notice, order or determination of the commissioner, may file a petition with the department alleging that the said order or determination is or are contrary to fact and injurious to him, and that said order or determination cause him damage by the invasion of or interference with a private right or privilege, particularly appertaining to him. At such hearing the petitioner may appear in person or by attorney, present witnesses, submit evidence and be given full opportunity to be heard. Following such hearing, the commissioner shall make his determination, which, unless an appeal is taken therefrom, shall be final and conclusive.

§ 17-0909. Review by courts.

1. The provisions of this section shall apply only to titles 1 to 11, inclusive, and title 19 of this article.

2. All orders or determinations of the commissioner or the department shall be subject to review as provided in article 78 of the Civil Practice Law and Rules. Application for such review must be made within sixty days after service in person or by mail of a copy of the determination, or decision upon the attorney of record of the applicant and of each person who has filed a notice of appearance, or to the applicant in person directly if not represented by an attorney.

3. Where a review as provided by article 78 of the Civil Practice Law and Rules is not maintainable, either because the person aggrieved was not a party to the original proceedings, or for any other reason, an order or determination of the former water pollution control board, the former water resources commission, the department or the commissioner may nevertheless be reviewed as hereinafter provided:

a. Application for relief shall be made by special proceeding. The petition shall be verified and shall set forth that the classification of waters, standards of quality and purity thereof, or the finding, determination, decision or order sought to be reviewed is illegal, in whole or in part, and specify the grounds of the illegality; it may be accompanied by affidavits and other written proof, and shall demand the relief to which the petitioner supposes himself entitled, in the alternative or otherwise. Such petition may be made by any person or persons jointly or severally aggrieved by a denial or revocation of a permit or by any decision of the former Water Pollution Control Board, the former Water Resources Commission, the department, or the commissioner or any act of the executive secretary or other agent or person acting in the name of such board, commission, department, or the commissioner whether or not such petitioner is or was a party to the proceedings sought to be reviewed.

b. A proceeding brought under the provisions of this subdivision must be instituted by service of the petition and notices of application for relief, within four months after publication as herein provided of the

classification of waters or the standards of purity and quality of waters, or after the finding, determination, decision or order sought to be reviewed becomes final and binding upon the petitioner or the person whom he represents, either in law or in fact; or with the court's permission within two years, where the petitioner or the person whom he represents, at the time such determination became final and binding upon him, was under the age of twenty-one years, or mentally ill, or imprisoned on a criminal charge or sentenced for a term of less than life.

c. In all other respects the procedure prescribed in subdivision 2 shall be applicable to a review provided by this subdivision.

TITLE 10

CONTROL OF THE BULK STORAGE OF PETROLEUM

Section 17-1001. Legislative findings and declarations.

17-1003. Definitions.

17-1005. Leak detection.

17-1007. Corrective actions.

17-1009. Registration.

17-1011. Access to records and facilities.

17-1013. State petroleum bulk storage advisory council.

17-1015. State petroleum bulk storage standards.

17-1016. Reduction of air pollution from petroleum bulk storage facilities.

17-1017. Preemption of local law.

§ 17-1001. Legislative findings and declarations.

The legislature finds and declares that the lands and waters of New York state constitute an irreplaceable resource upon which is founded the well-being of public health, economic vitality and the state's environment; that these resources may be contaminated by spills and leaks of petroleum from active and abandoned petroleum bulk storage facilities; that once contaminated the quality of these resources cannot

be completely restored to their original state; and that contamination of these resources must be prevented through improved safeguards in storage and handling.

The legislature declares these spills and leaks to be a threat to the public welfare of the state and hereby exercises the power of the state to prevent these spills and leaks from occurring through the establishment of a state petroleum bulk storage code for new and substantially modified facilities.

§ 17-1003. Definitions.

As used in this title:

1. "Facility" means a single property or contiguous or adjacent properties used for a common purpose which are owned or operated by the same person on or in which are located:

a. one or more stationary tanks which are used singularly or in combination for the storage or containment of more than one thousand one hundred gallons of petroleum; or

b. any tank whose capacity is greater than one hundred ten gallons that is used for the storage or containment of petroleum, the volume of which is ten percent or more beneath the surface of the ground.

This term shall not include:

(1) facilities licensed under article twelve of the navigation law;

(2) facilities regulated under the federal natural gas act;

(3) a heating oil tank used for on premises consumption at the same site which is not interconnected to any other heating oil tank and is used to store or contain less than one thousand one hundred gallons of petroleum unless such tank is located on a site that otherwise meets the definition of facility given in this subdivision;

(4) tanks eleven hundred gallons or less used to store motor fuel (gasoline or diesel products) for non-commercial purposes (not for

resale) at a farm or residence, unless such tank or tanks are located on a site that otherwise meets the definition of facility given in this subdivision;

(5) tanks used to store or contain asphalt, however, tanks used to store or contain asphaltic emulsions are included; or

(6) tanks which have been permanently closed in accordance with regulations promulgated pursuant to section 17-1005 of this title.

2. "Substantially modified facility" means the reconditioning or replacement of an existing tank or installation of a new tank at a facility.

3. "Operator" means any person who leases, operates, controls or supervises a facility.

4. "Owner" means any person who has legal or equitable title to a facility.

5. "Petroleum" means:

a. crude oil and any fraction thereof;

b. any mixture containing crude oil or any fraction thereof; and

c. synthetic forms of lubricating oil, dielectric oils, insulating oils, hydraulic oils and cutting oils.

Such term shall not include:

(1) hazardous waste defined pursuant to section 27-0903 of this chapter;

(2) substances meeting the definition of hazardous substance pursuant to section 40-0105 of this chapter;

(3) animal or vegetable oils that do not contain crude oil or fractions thereof; or

(4) substances that are gases at standard temperature and pressure.

6. "Electronic monitoring system" means an electronic leak detection

system, approved by the department, containing a warning system capable of operating on a continuous basis to detect petroleum prior to its reaching ground or surface waters.

7. "Tank" means a stationary device designed to store petroleum, which is constructed of non-earthen materials that provide structural support. The term "tank" includes all associated pipes, lines, fixtures and other ancillary equipment. The term "tank" does not include septic tank; surface impoundment, pit, pond or lagoon; storm-water or wastewater collection system; flow-through process tank; or liquid trap or associated gathering lines directly related to oil or gas production and gathering operations.

8. "Spill" or "leak" means any escape of petroleum from the ordinary containers employed in the normal course of storage, transfer, processing or use.

§ 17-1005. Leak detection.

1. a. The department shall promulgate rules and regulations to provide for the early detection of leaks or potential leaks by owners and operators.

b. Such rules and regulations shall provide for daily measurements and inventory records for petroleum in each facility using a gauge, gauge stick or automatic gauging system as well as product receipt and disbursement records. The department may exempt facilities which are not engaged in the resale of petroleum from the requirements of this paragraph.

2. a. The department shall establish minimum standards and schedules for testing and inspection of those portions of facilities which are over ten years old. Such schedules shall be based on such factors as inventory methods and electronic monitoring systems; facility age, condition and construction type; soil conditions, location of facility relative to water supplies and other environmental factors.

b. The department shall establish, by rule and regulation, criteria whereby facilities are properly closed and thereby released from testing and inspection requirements. The department may require the owner to provide financial assurances to ensure that the facility is properly closed. Any decision by the department with respect to requiring such financial assurances and the methods or instruments which are to be used shall be accompanied by a finding regarding the public interest and shall set forth the reasons therefor.

§ 17-1007. Corrective actions.

1. Any operator shall within forty-eight hours notify the facility owner and the department, and if the facility is located within any county, or city of a population of one million or more which filed with the department a written declaration under subdivision two of section 17-1017 of this title which is approved by the commissioner in written findings the operator shall also notify such county or city of a population of one million or more, of any abnormal loss or gain detected through daily inventory which cannot be explained by inaccurate record keeping, temperature variations, or other causes not related to leakage. For the purposes of this subdivision, "abnormal loss or gain" shall mean a loss or gain of three-quarters of one percent or greater of the total volume of petroleum handled over a period of ten days.

2. Where a leak or spill of petroleum is suspected or appears probable, the department may order the owner to inspect that tank or tanks or associated equipment suspected to be leaking and to test for tightness and structural soundness or may prohibit delivery pursuant to subdivision four of this section. If the owner fails within ten days to conduct such tests as required under this subdivision, the department may conduct such tests for tightness or structural soundness. The reasonable expenses of conducting such tests incurred by the department shall be paid by the owner.

3. It shall be unlawful to continue operation of any leaking tank or

associated equipment of a facility. The contents of such tank or equipment shall be promptly removed.

4. The department may prohibit deliveries of petroleum to any tank (i) that is leaking or (ii) where a leak appears probable. If the source of the leak or a probable leak cannot be determined, the department may prohibit deliveries to any tank or tanks that may be the probable source of a leak until such time as the source has been identified, at which time the prohibition on delivery will apply to the leaking tank or tanks. In addition, the department may prohibit deliveries of petroleum to any tank that is in violation of any requirement prescribed by regulation pursuant to this title related to:

a. installing required equipment for spill prevention, overfill protection, leak detection, corrosion protection or secondary containment;

b. performing leak detection or inspections of tank systems;

c. properly operating or maintaining leak detection; or

d. properly operating or maintaining spill, overfill or corrosion protection equipment.

(i) The department shall attach a tag to the tank or tanks to identify those tanks to which delivery is prohibited and provide a written notice to the owner and operator specifying the reasons for the prohibition of delivery. The department may consider not prohibiting deliveries of petroleum for up to one hundred eighty days after a determination is made that the facility or tank meets the conditions in this subdivision if such prohibition would jeopardize the availability of, or access to, fuel in any rural and remote areas unless the department has determined that the condition at the facility endangers public health, safety or the environment.

(ii) As promptly as possible thereafter, not to exceed fifteen days, the commissioner shall provide the owner or operator an opportunity to be heard and to present proof that such condition or activity does not violate the provisions of this section or of the rules or regulations

adopted pursuant to this title. The commissioner shall adopt rules and regulations describing the procedure to be followed in the prohibition of petroleum deliveries. In adopting such rules and regulations the department shall allow for the owner or operator at any time to submit information to the department to demonstrate that the owner or operator is in compliance with the requirements or has corrected the violation that prompted the department to prohibit deliveries of petroleum and to allow the tank or tanks to be, as promptly as possible, brought back into operation, not to exceed two business days from the department's determination that a tank is in compliance. The department shall use its best efforts to timely determine compliance. The commissioner shall draft such rules and regulations and submit them to the state petroleum bulk storage advisory council for comments within six months of the effective date of this subparagraph.

(iii) Unless otherwise authorized by the department, no person shall tamper with or remove, or cause the tampering with or removal of, a tag attached to any tank under the provisions of this subdivision.

(iv) No person shall deliver, cause the delivery of, deposit, or accept petroleum to any tank or tanks to which a tag is affixed pursuant to this subdivision.

§ 17-1009. Registration.

1. The department shall consult with the state petroleum bulk storage advisory council to compile a list of facilities within the state. Within thirty days of the promulgation of rules and regulations in accordance with section 17-1005, section 17-1007, and this section of this title, the department shall make available, upon request, a copy of such rules and regulations.

2. All owners shall register the facility with the department. In cases where there are multiple tank owners at a facility, the owners of the tanks may designate one of the tank owners to be an authorized representative to register the tanks. The department is authorized to assess a fee according to a schedule based on the size and type of facility, not to exceed five hundred dollars per facility. Such fee

shall be paid at the time of registration or registration renewal. Registration shall be renewed every five years or whenever ownership of a facility is transferred, whichever occurs first. The owner shall notify the department when the authorized representative or operator of the facility changes. In addition to such registration requirements and pursuant to leak detection requirements set forth in section 17-1005 of this title, notwithstanding any other provision of law, rule or regulation, the department shall duly notify the facility owner of the requirement for such owner to perform the required tightness test on a petroleum bulk storage tank no less than forty-five days prior to the date of the test expiration on the tank. All fees collected pursuant to this subdivision shall be deposited in the New York environmental protection and spill compensation fund established pursuant to section one hundred seventy-nine of the navigation law. The owner must submit, with each application for registration or registration renewal, a five-year fee as follows:

Combined Storage Capacity at Facility	5-Year Fee
Greater than 110 gallons to 1,100 gallons	\$0 per facility
Greater than 1,100 gallons to less than 2,000 gallons	\$100 per facility
Greater than 2,000 gallons to less than 5,000 gallons	\$300 per facility
5,000 gallons to less than 400,000 gallons	\$500 per facility

3. The owner shall, within thirty days prior to reconditioning or replacement of an existing tank or installation of a new tank at a facility, notify the department in writing of such reconditioning, replacement or installation.

4. Owners who become newly subject to registration requirements of this section must, within one year of becoming subject to this section, register the facility and complete any modifications to tanks at the facility to be in compliance with the regulations promulgated pursuant to this title.

§ 17-1011. Access to records and facilities.

1. Every owner or operator shall, upon reasonable notice of the commissioner or his designee, permit a duly designated officer or employee of the department at all reasonable times to have access to and to copy all books, papers, documents and records relating to the daily measurement and inventory of petroleum stored at a facility.

2. Any duly designated officer or employee of the department may, at reasonable times and upon reasonable notice of the commissioner or a designee, enter and inspect any facility, provided that such officer or employee shall be accompanied by the owner or operator or their designee.

§ 17-1013. State petroleum bulk storage advisory council.

1. There is hereby created within the department the "state petroleum bulk storage advisory council" hereinafter referred to as the "council". Such council shall consist of seven members, at least one of whom shall be a representative of operators other than owners in the state, at least one of whom shall be a representative of owners in the state, at least one of whom shall be a representative of municipal corporations, and at least two of whom shall be representatives of organizations whose prime function is the protection of natural resources and enhancement of the environmental quality of the state. The members of the council shall be appointed by the commissioner within three months of the effective date of this title. Each member shall be, by professional training or experience and attainment, qualified to analyze and interpret matters pertaining to bulk storage of petroleum.

2. One member shall be elected chairman of the advisory council by a majority vote of the members of such council.

3. The members of the council shall serve without compensation for their services as members of the council, except that each of them may be allowed the necessary and actual expenses which he shall incur in the

performance of his duties under this section.

4. The council shall have the power, duty and responsibility to:

a. Serve as a working forum for the exchange of views, concerns, ideas, information and recommendations relating to the bulk storage of petroleum.

b. Advise the department on the proposal, preparation and revision of the rules and regulations necessary to carry out the provisions of this title.

c. Request and receive from the department at each meeting of the council any portions of the rules and regulations then available for review, whether in final or draft form, and any supporting documents or other pertinent data.

d. Before promulgation of the rules and regulations required by this title, the commissioner shall first submit such rules and regulations to the council for review. The council shall, within sixty days of such submission, recommend in writing to the commissioner any suggested modifications to such rules and regulations.

5. The recording of council proceedings shall be performed by personnel of the department.

§ 17-1015. State petroleum bulk storage standards.

1. The department shall, pursuant to section 17-0303 of this article, promulgate rules and regulations establishing standards for existing and new petroleum bulk storage facilities which shall include, but not be limited to, design, equipment requirements, construction, installation and maintenance. In proposing, preparing and compiling such rules and regulations, the department shall include consideration of the future physical climate risk due to sea level rise, and/or storm surges and/or flooding, based on available data predicting the likelihood of future

extreme weather events, including hazard risk analysis data if applicable. The department shall consult with the state petroleum bulk storage code advisory council in proposing, preparing and compiling such rules and regulations. In addition, the department shall consult with the state fire prevention and building code council to assure that such rules and regulations are consistent with the uniform fire prevention and building code.

2. The department shall establish rules and regulations allowing variances from such standards provided that it can be demonstrated to the department that an alternate design, practice or method of storage provides environmental protection equal to or greater than the requirements of such standard.

3. The department shall promulgate rules and regulations establishing training requirements for operators of petroleum bulk storage facilities. The department shall specify training requirements for:

a. persons having primary responsibility for on-site operation and maintenance of storage tank systems;

b. persons having daily on-site responsibility for the operation and maintenance of storage tank systems; and

c. daily, on-site employees having primary responsibility for addressing emergencies presented by a spill or release from a storage tank system.

§ 17-1016. Reduction of air pollution from petroleum bulk storage facilities.

1. Definitions. For purposes of this section, the terms below shall have the following meanings:

a. "Shell color" shall mean any coating on the sides or shell of a tank, which reduces volatile emissions.

b. "Roof color" shall mean any coating on the roof of a tank, which reduces volatile emissions.

c. "Tank" shall have the meaning set forth in section 17-1003 of this title except that for purposes of this section "tank" means an above-ground tank, unless the department determines the tank to be otherwise sufficiently protected against volatilization in a manner no less protective than subdivision two of this section, and does not include associated pipes, lines, fixtures or other ancillary equipment.

2. Tank coloring. a. No person shall own or operate a facility containing a tank that does not meet the color requirements of this subdivision. Such color requirements shall apply to every tank at a facility regardless of whether the tank is in active use for storage.

b. A tank shall have a shell color and roof color of either white or beige/cream, or which limits volatile emissions to the same or to a greater extent as a shell color and roof color of white or beige/cream, as determined by the department.

§ 17-1017. Preemption of local law.

1. Except as provided in subdivision two of this section, any local law or ordinance which is inconsistent with any provision of this title or any rule and regulation promulgated hereunder shall be preempted.

2. a. Any local law or ordinance of any county, or of any city of a population of one million or more, which is inconsistent with the provisions of this title or any rules or regulations promulgated hereunder shall not be preempted if such local law or ordinance provides environmental protection equal to or greater than the provisions of this title or any rules or regulations promulgated hereunder, and such county or city files with the department a written declaration of its intent to administer and enforce such local law or ordinance which is approved by the commissioner in written findings which set forth the terms of such

approval.

b. When any county, or city of a population of one million or more, files with the department a written declaration of its intent to administer and enforce such local law or ordinance which is approved by the commissioner in written findings which set forth the terms of such approval, the department shall continue to administer and enforce any provision of this title with respect to any public authority created under the public authorities law and the public authority shall notify in writing any such county, or city of a population of one million or more when the public authority registers or reregisters a facility with the department.

TITLE 11

SCOPE AND CONSTRUCTION; OTHER REMEDIES

Section 17-1101. Existing rights and remedies preserved.

17-1103. Persons other than the state acquire no actionable rights.

17-1105. Conflicting laws.

17-1107. Other Environmental Conservation Laws to remain in effect.

§ 17-1101. Existing rights and remedies preserved.

It is the purpose of titles 1 to 11, inclusive, and title 19 of this article to provide additional and cumulative remedies to abate the pollution of the waters of the state and nothing herein contained shall abridge or alter rights of action or remedies now or hereafter existing, nor shall any such provisions or any act done by virtue of such provisions, be construed as estopping the state, persons or municipalities, as riparian owners or otherwise, in the exercise of their rights to suppress nuisances or to abate any pollution now or hereafter existing.

§ 17-1103. Persons other than the state acquire no actionable rights.

The bases for proceedings or actions resulting from the violations of the prohibitions contained in titles 1 to 11, inclusive, and title 19 of this article inure solely to and are for the benefit of the people generally of the state of New York, and it is not intended to in any way create new, or enlarge existing rights of riparian owners or others. A determination by the department or the commissioner that pollution exists or that violations of any such prohibitions have occurred or are occurring, whether or not a proceeding or action may be brought by the state, shall create by reason thereof no presumptions of law or findings of fact inuring to or for the benefit of persons other than the state.

§ 17-1105. Conflicting laws.

Titles 1 to 11, inclusive, and title 19 of this article shall not be construed as repealing any of the laws relating to the pollution of the waters of the state not herein expressly repealed, but shall be held and construed as ancillary to and supplementing the same and in addition to the laws now in force, except as the same may be in direct conflict herewith.

§ 17-1107. Other Environmental Conservation Laws to remain in effect.

Nothing contained in titles 1 to 11, inclusive, and title 19 of this article shall be construed as amending or repealing sections 11-0503 or 13-0345 and any parts of said sections inconsistent with the provisions of titles 1 to 11, inclusive, and title 19 of this article or with any rule, regulation, order or determination authorized by titles 1 to 11, inclusive, and title 19 of this article shall be held to be effective.

TITLE 13

**APPROVAL OF MARINE TOILET POLLUTION
CONTROL DEVICES AND ESTABLISHING**

EFFLUENT STANDARDS THEREFOR

Section 17-1301. Approval of marine toilet pollution control devices and establishing effluent standards therefor.

§ 17-1301. Approval of marine toilet pollution control devices and establishing effluent standards therefor.

The department shall have all the functions, powers, obligations and duties, regarding approval of marine toilet pollution control devices and establishing effluent standards therefor, provided for in section 33-c of the Navigation Law.

TITLE 14

NONPOINT SOURCE WATER POLLUTION CONTROL

Section 17-1401. Purpose.

17-1403. Definitions.

17-1405. Inventory.

17-1407. Priority nonpoint source pollution.

17-1409. State assistance for non-agricultural nonpoint source abatement and control projects.

17-1411. Regulations.

§ 17-1401. Purpose.

It is the purpose of this title to safeguard the waters of the state from nonpoint source pollution by controlling and abating new and existing sources of nonpoint source pollution.

§ 17-1403. Definitions.

As used in this title:

1. "Best management practices" means methods, measures or practices

determined to be the most practical and effective in preventing or reducing the impact of pollutants generated by nonpoint sources to a level compatible with water quality standards established pursuant to section 17-0301 of this article. Best management practices include, but are not limited to, structural and nonstructural controls and operations and maintenance procedures. Best management practices can be applied before, during or after pollution producing activities to reduce or eliminate the introduction of pollutants into receiving waters.

2. "Municipal corporation" means a county, city, town or village or an entity designated to act on behalf of such.

3. "Nonpoint source" means any source of water pollution or pollutants which is not a discrete conveyance or point source permitted pursuant to title seven or eight of this article.

4. "Nonpoint source abatement and control program" means a program of activities and projects for the abatement and reduction of nonpoint source pollution through the implementation of best management practices.

5. "District" means a county soil and water conservation district created pursuant to section five of the soil and water conservation districts law.

§ 17-1405. Inventory.

1. Within eighteen months of the effective date of this title the commissioner, in cooperation with the state soil and water conservation committee, shall prepare a report which:

a. identifies those water bodies within the state which, without additional action to control nonpoint sources of pollution, cannot reasonably be expected to attain and maintain applicable water quality standards; and

b. identifies categories or subcategories of nonpoint sources or particular nonpoint sources which add significant amounts of pollution to each water body identified above.

2. The report prepared pursuant to this section shall be revised by the commissioner in cooperation with the state soil and water conservation committee at least every five years.

§ 17-1407. Priority nonpoint source pollution.

From the inventory developed pursuant to section 17-1405 of this title the commissioner, after consultation with the state soil and water conservation committee, shall develop a prioritized list of water bodies, management of which will reduce and control nonpoint source pollution and improve water quality. In developing such list, consideration shall be given to the existing water quality of the water body, the best usage of the water body pursuant to section 17-0301 of this article and its potential for improvement.

§ 17-1409. State assistance for non-agricultural nonpoint source abatement and control projects.

1. Subject to the availability of funds appropriated therefor, a matching grant program is established to fund the costs of implementing nonpoint source abatement and control projects that meet the following criteria:

a. the project must consist of activities and projects which will significantly reduce, abate or control nonpoint source pollution originating from non-agricultural activities;

b. the project must be proposed for implementation by a municipal corporation, or by a district at the formal request of such corporation;

c. the project must be located within a water body identified by the

commissioner, pursuant to section 17-1407 of this title;

d. the project must propose to implement best management practices which meet the criteria promulgated pursuant to section 17-1411 of this title; and

e. the municipal corporation must have funds available to pay for its share of the eligible project costs.

1-a. Subject to the availability of funds appropriated therefore, a matching grant program is established to fund the cost of comprehensive watershed based water quality management designed to address the reduction and control of nonpoint source pollution and the improvement of water quality in a water body or water bodies identified on the prioritized list developed pursuant to section 17-1407 of this title.

2. Applications for matching grants shall contain the following information:

a. the name and location of the water body and the nonpoint source problem to be addressed;

b. for projects described in subdivision one of this section, an identification of the best management practice to be implemented;

c. a cost estimate for the proposed project;

d. the source of funds available to pay for the non-state share of the eligible costs;

e. information sufficient to demonstrate that the criteria set forth in subdivision one of this section have been met; and

f. such other information as may be required by the commissioner through regulations.

3. In awarding grants pursuant to this section, the commissioner shall

give preference to those projects located or designed to address water quality concerns for in the highest priority water bodies identified pursuant to section 17-1407 of this title.

4. Eligible costs that may be funded pursuant to this section are architectural and engineering services, plans and specifications, consultant and legal services and other direct expenses related to comprehensive watershed based water quality management and project implementation.

5. Matching grants awarded pursuant to this section shall be up to seventy-five percent of the eligible costs for any specified project.

6. Notwithstanding any other provision of law to the contrary, storm water discharges of a municipality permitted pursuant to title seven or eight of this article shall be treated as a non-agricultural nonpoint source for the purpose of qualifying for funding pursuant to this section.

§ 17-1411. Regulations.

The commissioner may promulgate regulations necessary to effectuate the purposes of section 17-1409 of this title including, but not limited to, regulations setting forth criteria for submission and processing of grant applications, components of best management practices and state standards necessary to control nonpoint source pollution.

TITLE 15

REALTY SUBDIVISIONS: SEWERAGE SERVICE

Section 17-1501. Definitions.

17-1503. Local regulations.

17-1505. Plans required to be filed and approved.

17-1507. Filing fees to accompany plans.

17-1509. Cooperation with the Department of Health.

17-1511. Duty of county clerk or register in respect to filing

of plans and map.

17-1513. Remedy for purchaser of one parcel of unapproved realty subdivision.

17-1515. Regulation by commissioner.

§ 17-1501. Definitions.

1. As used in sections 17-1501 to 17-1505, inclusive, and sections 17-1509 and 17-1511, the word "subdivision" shall mean any tract of land which is divided into five or more parcels, after the effective date of this act, along any existing or proposed street(s), highway(s), easement(s) or right(s)-of-way for sale or for rent as residential lots or residential building plots, and in the county of Suffolk also as business, commercial or industrial lots or building plots, regardless of whether the lots or plots to be sold or offered for sale, or leased for any period of time, are described by metes and bounds or by reference to a map or survey of the property or by any other method of description and regardless of whether the lots or plots are contiguous. A tract of land shall constitute a subdivision upon the sale, rental or offer for sale or lease of the fifth residential lot or residential building plot therefrom within any consecutive three year period, and at this time the provisions of section 17-1505 of this chapter shall apply to all such parcels thereof, including the first four parcels, regardless of whether said parcels have been sold, rented or offered for sale or lease singly or collectively.

2. The word "tract" shall mean any body of land, including contiguous parcels of land, under one ownership or under common control of any group of persons acting in concert as part of a common scheme or plan.

3. "Residential lot" or "residential building plot" shall mean any parcel of land of five acres or less, any point on the boundary line of which is less than one-half mile from any point on the boundary line of another such lot in the same tract, unless any such lot may not legally be used for residential purposes. Without limiting the generality of the foregoing, the term "residential" shall include temporary, seasonal and

permanent residential use.

4. For the purposes of this title sewage shall be defined as any substance, solid or liquid that contains any of the waste products or excrementitious or other wastes or washings from the bodies of human beings or animals.

§ 17-1503. Local regulations.

1. Any city or county which has established or establishes a city, county or part-county department of health may adopt regulations for the control of such developments. Regulations adopted by a county or city board of health may include, but not be limited to, establishment of such requirements as it may deem necessary to guarantee the installation of such sewage facilities in accordance with the plans heretofore or hereinafter approved by the county or city department of health or any approved revision or revisions thereof.

2. Nothing contained in sections 17-1501 to 17-1505, inclusive, and sections 17-1511 and 17-1513, shall be construed to delegate the general powers of the department nor to impair nor to deprive the department of its powers and functions as now provided by law.

§ 17-1505. Plans required to be filed and approved.

1. No subdivision or portion thereof shall be sold, offered for sale, leased or rented by any corporation, company or person, and no permanent building shall be erected thereon, until a plan or map of such subdivision shall be filed with and approved by the department or city, county or part-county department of health having jurisdiction and such plan or map thereafter filed in the office of the clerk of the county in which such subdivision is located.

2. Such plan or map shall show methods for obtaining and furnishing adequate and satisfactory sewerage facilities to said subdivision.

3. The installation of such facilities shall be in accordance with the plans or any revision or revisions thereof approved by the department or city, county or part-county department of health having jurisdiction.

4. The rules and regulations adopted by the department to implement this title and the provisions of article 70 of this chapter and rules and regulations adopted thereunder shall govern department processing of approval applications and modifications under this title.

§ 17-1507. Filing fees to accompany plans.

1. At the time of submitting a plan for approval as required by this title, a filing fee computed at the rate of one dollar and seventy-five cents per lot shall be paid to the department or to the city, county or part-county health district wherein such plans are filed, and where the approval sought is from the department, such additional fee as may be specified in article 70 of this chapter shall also be paid.

2. The department, or the city, county or part-county health district, shall not review or approve any such subdivision map submitted for approval after this section takes effect until such fee, as herein provided, has been received by it.

3. If any plan submitted to the department, or to a city, county or part-county health district, cannot be approved, such plan shall be returned to the person who submitted the plan with a summary of the reasons for disapproval.

§ 17-1509. Cooperation with the Department of Health.

Notwithstanding any other provision of this title the Commissioner of Environmental Conservation is empowered to make administrative arrangements with the Commissioner of Health for joint or cooperative administration of this title and title II of Article 11 of the Public

Health Law, such that only one plan must be filed and only one fee totalling three dollars and fifty cents per lot must be paid, except that where department approval is sought in connection with a particular plan or map, such additional fee as may be specified in article 70 of this chapter shall also be paid.

§ 17-1511. Duty of county clerk or register in respect to filing of plans and map.

The county clerk or register shall not file nor record nor accept for filing or recording any map or plat showing a subdivision of land in any town, village or city having a population of less than one million unless there is endorsed thereon or annexed thereto a certificate of the department or city, county or part-county department of health having jurisdiction approving the sewerage systems proposed or installed for such subdivision and consenting to the filing of such map or plat.

§ 17-1513. Remedy for purchaser of one parcel of unapproved realty subdivision.

1. The owner of a parcel of land acquired as one parcel for residential purposes may apply to the department or local health department having jurisdiction for a certificate approving the sewage facilities for said parcel as adequate and satisfactory. The application shall include the description of the parcel as specified in the instrument, by which owner acquired title.

2. The proper department shall entertain said application and issue said certificate providing the sewage facilities will not, in the opinion of such department, result in the contravention of standards adopted for and assigned to the receiving waters pursuant to this chapter, or be injurious to public health for the public enjoyment of said waters, the propagation and protection of fish and wild life or the industrial development of the state or result in the exposure of sewage on the ground surface or impair the quality of the ground water for

drinking purposes or otherwise create a nuisance, or menace or potential menace to health.

3. The certificate approving the sewage facilities for said parcel shall contain the name of the owner-applicant and the description of the property set forth in the application. The owner shall append the certificate of approval to a verified petition directed to the county clerk of the county wherein the property is located, praying that the petition and certificate of approval annexed be recorded and indexed against the owner-petitioner.

4. The county clerk upon receiving the petition with annexed certificate of approval, and upon tender of the lawful recording fees, shall record the same in his office and index it against the owner-petitioner. The recording of the petition with annexed certificate of approval shall be deemed compliance with section 17-1505, for the parcel described.

5. a. This section shall apply only to a single residential lot which was acquired without having complied with the provisions of former section 89 of the Public Health Law or section 17-1505 of this title but was:

1. acquired by the owner-applicant prior to January first, nineteen hundred seventy-one; or

2. acquired by the owner-applicant through devise or intestate succession; or

3. not at the time of acquisition of title by the owner-applicant, a part of a subdivision, as such term is defined in section 17-1501 of this title.

b. In addition, this section shall apply to a single residential lot which the appropriate department deems proper for approval because of hardship or other special circumstances established to its satisfaction by the owner-applicant.

§ 17-1515. Regulation by commissioner.

The commissioner may from time to time establish by rule or regulation standards for subdivisions necessary to effect the purposes of this title and not inconsistent with regulations of a city, county or part-county department of health having jurisdiction, now or hereafter adopted pursuant to law. In the event of and to the extent of such inconsistency, the standards established by the commissioner shall be deemed inapplicable.

TITLE 17

DISCHARGE OF SEWAGE INTO WATERS

Section 17-1701. Definition of sewage; discharge of sewage and other matter into certain waters prohibited.

17-1703. Contamination of salt wells.

17-1704. Discharge of sewage and other offensive matter from new or renovated wastewater disposal systems to the surface waters of the Owasco lake watershed extending from the city dam on the outlet to the existing Moravia village outfall sewer on the inlet are prohibited.

17-1705. Discharge of sewage into Wallkill Creek prohibited.

17-1707. Discharge of sewage into the Susquehanna near Binghamton prohibited.

17-1709. Discharge of sewage and other offensive matter into Lake George and Skaneateles lake prohibited.

17-1710. Deposit of garbage or other refuse on or in waters of the Owasco lake watershed extending from the city dam on the outlet to the existing Moravia village outfall sewer on the inlet is prohibited.

17-1711. Deposit of garbage or other refuse on or in waters of Lake George and Skaneateles lake and their tributaries prohibited.

17-1713. Discharge of sewage and other offensive matter into

- Brant Lake, Loon Lake, Friends Lake and Schroon Lake prohibited.
- 17-1715. Discharge of sewage and other offensive matter into Oneida Lake prohibited.
 - 17-1717. Order to discontinue pollution of waters.
 - 17-1719. Actions by municipalities to prevent discharge of sewage into waters.
 - 17-1721. Reports of municipal authorities to local boards of health.
 - 17-1723. Reports of proprietors of industrial establishments.
 - 17-1725. Permission to discharge sewage.
 - 17-1727. Permission to discharge refuse or waste matter from industrial establishments.
 - 17-1729. Permits for conduit or discharge pipes.
 - 17-1731. Revocation or modification of permits.
 - 17-1733. Record of permits; inspection of local boards of health.
 - 17-1735. Violations; service of notice; actions.
 - 17-1737. Legal construction and limitations; riparian owners.
 - 17-1739. Repeal of provisions.
 - 17-1741. Sewerage; construction; villages.
 - 17-1743. Reporting of spills of liquids stored in bulk.
 - 17-1745. Sewage from vessels.

*** § 17-1701. Definition of sewage; discharge of sewage and other matter into certain waters prohibited.**

1. For the purposes of this title sewage shall be defined as any substance, solid or liquid that contains any of the waste products or excrementitious or other wastes or washings from the bodies of human beings or animals.

2. No person, corporation or municipality, shall place or cause to be placed, or discharged or cause to be discharged into any of the waters of this state, in quantities injurious to the public health, or in violation of standards, criteria, limitations, rules or regulations

promulgated or applied pursuant hereto, any sewage, garbage, offal, or any decomposable or putrescible matter of any kind or the effluent from any sewage disposal plant, or any substance, chemical or otherwise, or any refuse or waste matter, either solid or liquid, from any sewer or drainage system or from any shop, factory, mill or industrial establishment; unless express permission to do so shall have been first given in writing by the commissioner as provided in this article, except as hereinafter provided.

3. This section shall not prevent the discharge of sewage from any public sewer system owned and maintained by a municipality until an order prohibiting same shall be made as hereinafter provided, or the discharge of refuse or waste matter from any shop, factory, mill or industrial establishment, if such sewer system was in operation and was discharging sewage, or such shop, factory, mill or industrial establishment was in operation and discharging refuse or waste matter, into any of the waters of this state on or prior to May 7, 1903, and such municipality or the proprietor of such shop, factory, mill or industrial establishment secured exemption from this section by filing a report with the commissioner in accordance with law, nor to any extension or modification of such shop, factory, mill or industrial establishment, or reconstruction thereof, provided the refuse or waste matter discharged therefrom is not materially changed or increased; but this exception shall not permit any increase in the discharge of such sewage, or in the discharge of refuse or waste matter from any shop, factory, mill or industrial establishment, nor shall it permit the discharge of sewage from a sewer system which shall be extended, modified or reconstructed subsequent to said date.

* NB Expired September 1, 1973

§ 17-1703. Contamination of salt wells.

It shall be unlawful for any person to wilfully place, introduce or cause to flow or enter into any spring, brook or body of water, which is used in the manufacture of salt, or into any salt well, or salt mine, or into any cavity or reservoir beneath the surface of the earth from which

salt or brine is taken or used in the manufacture of salt, any impure or deleterious substance or thing whatsoever, which is liable to pollute the waters thereof, or the brine or salt taken or manufactured therefrom, provided that this act shall not interfere with any existing system of drainage or sewerage.

§ 17-1704. Discharge of sewage and other offensive matter from new or renovated wastewater disposal systems to the surface waters of the Owasco lake watershed extending from the city dam on the outlet to the existing Moravia village outfall sewer on the inlet are prohibited.

1. No person or corporation shall cause or permit the fall, flow or discharge into the surface waters of the Owasco lake watershed extending from the city dam on the outlet to the existing Moravia village outfall sewer on the inlet, of any sewage matter, or other foul, noxious or deleterious, solid or liquid matter or effluent from any wastewater disposal system located therein except for those operating under a duly authorized permit from the state or county health departments and except for run-off from accepted agricultural practices.

2. Existing permitted surface water outlets shall be eliminated by January 1, 1991. In the event of change of ownership or major alteration or renovations to existing wastewater disposal systems, the existing wastewater outlets shall be eliminated and be replaced by an approved sub-surface disposal system.

3. The Cayuga county board of health shall examine any alleged offense of this section within its jurisdiction and cause the same to be abated by injunction or otherwise if found to exist.

*** § 17-1705. Discharge of sewage into Wallkill Creek prohibited.**

No person or corporation shall permit the discharge or escape of any sewage, or other matter deleterious to public health, or destructive to

fish, or throw or cast any dead animal, carrion or offal, or other putrid or offensive matter into the waters of the Wallkill creek, in the counties of Ulster and Orange.

* NB Expired September 1, 1973

*** § 17-1707. Discharge of sewage into the Susquehanna near Binghamton prohibited.**

1. No person or corporation shall cause to fall, flow or discharge into the Susquehanna river or any of its tributaries, between the Rock Bottom dam in such river at the city of Binghamton, and a point one mile east of the bridge that crosses such river at Conklin, any sewage matter, or other foul, noxious or deleterious, solid or liquid matter, or any matter that may be declared such by the board of health of any municipality adjacent to such river within such limit.

The board of health of any such municipality shall examine into any alleged offense against this section and cause the same to be abated, if found to exist.

* NB Expired September 1, 1973

§ 17-1709. Discharge of sewage and other offensive matter into Lake George and Skaneateles lake prohibited.

1. No person or corporation shall cause or permit the fall, flow or discharge into Lake George or Skaneateles lake or any of their tributaries, of any sewage matter, or other foul, noxious or deleterious, solid or liquid matter or effluent from any sewage disposal plant, or any matter that may be declared such by the board of health of any municipality adjacent to such lakes where any such fall, flow or discharge shall occur.

2. The board of health of any such municipality shall examine into any alleged offense against this section within its jurisdiction and cause the same to be abated, by injunction or otherwise, if found to exist.

3. The discharge of sewage or treated sewage effluent into the drainage basin of Lake George is hereby prohibited except as follows:

(a) Subsurface sewage disposal facilities with a design capacity of one thousand gallons per day or less are permitted to discharge within the basin provided said facilities are designed, constructed, operated and maintained in accordance with all applicable laws, regulations and permits issued pursuant thereto.

(b) Subsurface sewage disposal facilities with a design capacity of greater than one thousand gallons per day are permitted to discharge within the basin provided that such facilities:

(i) discharge treated sewage effluent to land or groundwater;

(ii) are designed to meet best technology available;

(iii) are in compliance with a valid state pollutant discharge elimination system (SPDES) permit;

(iv) are designed to meet existing needs only; and

(v) are designed, operated and maintained in accordance with applicable laws and regulations.

(c) The commissioner shall prepare a technical manual describing the best technologies available for sewage disposal facilities within the Lake George basin, which shall include, but not be limited to, specifications for the design, construction, maintenance and monitoring of such facilities and performance standards for nutrient removal. The commissioner shall complete the manual within eighteen months of the effective date of this subdivision and shall notice completion of the manual in the state register and the environmental notice bulletin.

§ 17-1710. Deposit of garbage or other refuse on or in waters of the Owasco lake watershed extending from the city dam on the outlet to the existing Moravia village outfall sewer on the inlet is prohibited.

No person or corporation shall deposit, dump, throw, abandon, discard, or place, or cause to be deposited, dumped, thrown, abandoned, discarded or placed upon or in the waters of the Owasco lake watershed extending from the city dam on the outlet to the existing Moravia village outfall

sewer on the inlet, or upon the frozen surface thereof, any garbage, rubbish, refuse, trash, litter, debris, abandoned properties, waste material or any nauseous or offensive matter.

§ 17-1711. Deposit of garbage or other refuse on or in waters of Lake George and Skaneateles lake and their tributaries prohibited.

No person shall deposit, dump, throw, abandon, discard or place, or cause to be deposited, dumped, thrown, abandoned, discarded or placed upon or in the waters of Lake George or Skaneateles lake, or any of their tributaries, or upon the frozen surfaces thereof, any garbage, rubbish, refuse, trash, litter, debris, abandoned properties, waste material or any nauseous or offensive matter.

*** § 17-1713. Discharge of sewage and other offensive matter into Brant Lake, Loon Lake, Friends Lake and Schroon Lake prohibited.**

1. No person or corporation shall cause or permit the fall, flow or discharge into Brant lake, Loon lake or Friends lake in the county of Warren or Schroon lake located partly in the county of Essex and partly in the county of Warren or any of their tributaries, of any sewage matter, or other foul, noxious or deleterious, solid or liquid matter, or effluent from any sewage disposal plant, or any matter that may be declared such by the board of health of any municipality adjacent to any such lake where any such fall, flow or discharge shall occur.

2. The board of health of any such municipality shall examine into any alleged offense against this section within its jurisdiction and cause the same to be abated, by injunction or otherwise, if found to exist.

3. The prohibition of the discharge of sewage effluent into Schroon lake as hereinbefore in this section provided shall not apply to the treated effluent from a sewage or waste treatment plant which has been,

or may be constructed, maintained and operated in accordance with plans approved and a permit issued by the former Water Pollution Control Board. Such permit shall prohibit the discharge of sewage effluent into Schroon lake or any of its tributaries in any quantities which will adversely affect said waters or which will render said waters unsuitable for any purpose recognized under the classification of said waters by the former Water Pollution Control Board.

* NB Expired September 1, 1973

*** § 17-1715. Discharge of sewage and other offensive matter into Oneida Lake prohibited.**

1. No person or corporation shall cause or permit the fall, flow or discharge into Oneida lake or any of its tributaries of any sewage matter, or other foul, noxious or deleterious, solid or liquid matter, or effluent from any sewage disposal plant, or any matter that may be declared such by the board of health of any municipality adjacent to such lake where any such fall, flow or discharge shall occur.

2. It shall be the duty of the board of health of any municipality where any such fall, flow or discharge shall occur to cause the same to be abated; provided that any person aggrieved by any such fall, flow or discharge may also cause such abatement, by injunction or other appropriate action or proceeding.

3. The prohibition of the discharge of sewage effluent as hereinbefore in this section provided shall not apply to the treated effluent from a sewage or waste treatment plant which has been, or may be, constructed, maintained and operated in accordance with plans approved and a permit issued by the former Water Pollution Control Board. Such permit shall prohibit the discharge of sewage effluent into Oneida lake or any of its tributaries in any quantities which will adversely affect said waters or which will render said waters unsuitable for any purpose recognized under the classification of said waters by the former Water Pollution Control Board.

* NB Expired September 1, 1973

*** § 17-1717. Order to discontinue pollution of waters.**

1. Whenever the commissioner shall determine upon investigation that sewage from any city, village, town, building, steamboat or other vessel, or property, or any garbage, offal or any decomposable or putrescible matter of any kind is being discharged into any of the waters of the state, which shall include all streams and springs and all bodies of surface and ground water, whether natural or artificial, within or upon the boundaries of the state, and when, in the opinion of the commissioner, such discharge is polluting such waters in a manner injurious to or so as to create a menace to health, or so as to create a public nuisance, he may order the municipality, corporation or person so discharging sewage, refuse or other matter, to show cause before him why such discharge should not be discontinued.

2. A notice shall be served on the municipality, corporation or person so discharging sewage, refuse or other matter, directing such municipality, corporation or person to show cause before the commissioner on a date specified in such notice why an order should not be made directing the discontinuance of such discharge. Such notice shall specify the time when and place where a public hearing will be held by the commissioner and notice of such hearing shall be published at least twice in a newspaper of the city, village, town or county where such discharge occurs, and shall be served personally or by mail at least fifteen days before said hearing and in the case of a municipality or a corporation such service shall be upon an officer thereof.

3. The commissioner shall take evidence in regard to said matter and he may issue an order to the municipality, corporation or person responsible for such discharge, directing that within a specified period of time thereafter such discharge be discontinued, and such proper method of treatment or disposal of such sewage, refuse or waste matter be installed as shall be approved by the department.

4. Such order shall not be valid until approved by the Governor and

the Attorney General, and when so approved it shall be the duty of the Attorney General to enforce such order.

5. Such means or method for the treatment or disposal of sewage, refuse or other matter must be executed, completed and put in operation within the time fixed in the order.

6. The commissioner shall have authority to require from the officials and persons responsible for the execution of such orders satisfactory evidence at specified times of proper progress in the execution of such orders, and may stipulate and require that certain definite progress shall be made at certain definite times prior to the final date fixed in the order.

7. This section shall not apply to refuse or waste matter from any shop, factory, mill or industrial establishment not containing sewage.

* NB Expired September 1, 1973

*** § 17-1719. Actions by municipalities to prevent discharge of sewage into waters.**

1. Any incorporated city or village in the state of New York, which has made such provision for the disposal of its sewage as not to pollute or contaminate therewith any river, stream, lake or other body of water, may have and maintain an action in the supreme court to prevent the discharge of any sewage or substance deleterious to health, or which shall injure the potable qualities of the water in any river, stream, lake or other body of water, from which such incorporated city or village shall take or receive its water supply, provided, that such river, stream, lake or other body of water is wholly, or in part, within the boundaries of the county in which such plaintiff is located.

2. Whenever action shall be brought under the provisions of this section, it shall be the duty of the supreme court upon proof of the existence of facts justifying the bringing and maintenance of such action under the provisions of this section to render a judgment in

which shall be incorporated a mandatory injunction requiring the person, body, board, corporation, municipality, village, county or town, being a defendant to said action which directly or indirectly, or by its servants, agents or officers shall discharge or dispose of its sewage, or any other substance deleterious to health or which shall injure the potable qualities of the water in such ways as that the same shall enter into any river, stream, lake or other body of water, from which such plaintiff shall take or receive its water supply, within such reasonable time as may be prescribed by the court, to take such action as shall prevent such discharge or the disposal of such sewage or other substance into such waters, or the pollution thereof, with such further directions in the premises as may be proper and desirable to effect such purpose, provided that such river, stream, lake or other body of water is wholly, or in part, within the boundaries of the county in which such plaintiff is located.

3. No such action shall be brought as provided for in this section until the department has examined and determined whether the sewage does pollute or contaminate the river, stream, lake or other body of water into which said sewage is discharged.

4. The expense of such examination by the department shall be a charge upon and paid by the municipality in whose interests and on whose behalf such examination is made.

5. In case the department shall find upon examination that the discharge of said sewage does pollute or contaminate said waters or any of them in such manner as to be a menace or danger to the health of those using said waters the plans for the removal or disposal of the sewage ordered to be prepared by the court as provided in this section shall be submitted to the department for its approval.

* NB Expired September 1, 1973

*** § 17-1721. Reports of municipal authorities to local boards of health.**

1. The report of the public authorities having by law charge of the

sewer system of every municipality in the state, from which sewer system sewage was being discharged into any of the waters of the state on May 7, 1903, transmitted by the board of health of the municipality within which any sewer outlet of the said sewer system is located to the commissioner and filed by him in his office, shall constitute the evidence of exemption from the prohibition of section 17-1701.

2. No sewer system shall be exempt from the prohibition of said section against the discharge of sewage into the waters of the state for which a satisfactory report shall not have been filed in the office of the commissioner in accordance with chapter 468 of the laws of 1903.

* NB Expired September 1, 1973

*** § 17-1723. Reports of proprietors of industrial establishments.**

1. The report of the proprietor of every shop, factory, mill and industrial establishment in the state, from which refuse or waste matter was being discharged into any of the waters of the state on May 7, 1903, filed in the office of the commissioner shall constitute the evidence of exemption of the shop, factory, mill or industrial establishment from the prohibition of section 17-1701.

2. No shop, factory, mill or industrial establishment shall be exempt from the prohibition of said section against the discharge of refuse or waste matter into the waters of the state, for which a report shall not have been made in accordance with chapter 468 of the laws of 1903.

* NB Expired September 1, 1973

*** § 17-1725. Permission to discharge sewage.**

1. Upon application duly made to the commissioner by the public authorities having by law the charge of the sewer system of any municipality, the commissioner shall have power to consider the case of a sewer system otherwise prohibited by section 17-1701 from discharging sewage into any of the waters of the state, and whenever in his opinion

the general interests of the public health would not be endangered thereby he may issue a permit for the discharge of sewage from any such sewer system into any of the waters of the state, and may stipulate in the permit, modification, regulations and conditions on which such discharge may be permitted.

2. Such application must be made in a form required by the commissioner. The plans for the construction of any sewer system or sewage disposal plant for the extension, reconstruction or modification of sewers, sewer systems or sewage disposal plants the permit for the discharge from which is requested from the commissioner as provided in this section shall be submitted to and approved by the department before such permit becomes effective.

3. Such permit before being operative shall be recorded in the county clerk's office of the county wherein the outlet of the said sewer system is located, and a copy of the permit shall be transmitted by the commissioner to the board of health of the municipality wherein the outlet of said sewer system is located.

* NB Expired September 1, 1973

*** § 17-1727. Permission to discharge refuse or waste matter from industrial establishments.**

1. Upon application duly made to the commissioner by the proprietor, lessee or tenant of any shop, factory, mill or industrial establishment from which the discharge of refuse or waste matter into any of the waters of the state is otherwise prohibited by section 17-1701, the commissioner shall have power to consider the case of the said shop, factory, mill or industrial establishment, and whenever the public health and purity of the waters shall warrant it, he shall issue a permit for the discharge of refuse or waste matter from such shop, factory, mill or industrial establishment into any of the waters of the state, and may stipulate in the permit such modification, regulations and conditions as the public health may require.

2. Such permit before being operative shall be recorded in the county clerk's office of the county where such shop, factory, mill or industrial establishment is located and a copy of such permit shall be transmitted by the commissioner to the board of health of the municipality wherein the outlet discharging refuse or waste matter from such shop, factory, mill or industrial establishment shall be located.

* NB Expired September 1, 1973

*** § 17-1729. Permits for conduit or discharge pipes.**

1. Before any conduit or discharge pipe, or other means of discharging or casting any refuse or waste matter from any shop, factory, mill or industrial establishment not constructed or in process of construction on May 7, 1903, shall be put in or constructed for the purposes of discharging any refuse or waste matter therefrom into any waters in this state, a statement of the purpose for which the same is to be used shall be submitted to the commissioner. If the same is not detrimental to the public health he shall issue a permit therefore to the applicant.

2. Before such permit becomes effective the plan or plans for any such conduit or discharge pipe or other means of discharging or casting any refuse or waste matter shall be submitted to and approved by the department.

3. No such conduit, discharge pipe or other means of discharging or casting any refuse or waste matter from any such shop, factory, mill or establishment into any of the waters of this state shall be put in or constructed before such permit is granted.

* NB Expired September 1, 1973

*** 17-1731. Revocation or modification of permits.**

1. Every permit for the discharge of sewage from a sewer system or for the discharge of refuse or waste matter from a shop, factory, mill or industrial establishment, shall when necessary to conserve the public

health, be revocable or subject to modification or change by the commissioner on due notice after an investigation and hearing and an opportunity for all interested therein to be heard thereon being served on the public authorities of the municipality owning and maintaining the sewer system, or on the proprietor, lessee or tenant of the shop, factory, mill or industrial establishment.

2. Plans for any such modification shall be submitted to and approved by the department.

3. The length of the time after receipt of the notice within which the discharge of sewage or of refuse or waste matter shall be discontinued may be stated in the permit, but in no case shall it exceed two years in the case of a sewer system, or one year in the case of a shop, factory, mill or industrial establishment, and if the length of time is not specified in the permit, it shall be one year in the case of a sewer system, and six months in the case of a shop, factory, mill or industrial establishment.

4. On the expiration of the period of time prescribed after the service of a notice of revocation, modification or change from the commissioner, the right to discharge sewage or refuse or waste matter into any of the waters of the state shall cease and terminate and the prohibition of section 17-1701 against such discharge shall be in full force as though no permit had been granted, but a new permit may thereafter again be granted as hereinbefore provided.

* NB Expired September 1, 1973

*** § 17-1733. Record of permits; inspection of local boards of health.**

1. Each local board of health shall preserve in its office and on a form prescribed by the commissioner, a permanent record of the following:

a. Each permit issued by the commissioner granting the right to discharge sewage or refuse or waste matter into any of the waters of the

state within the municipality;

b. Each revocation of a permit; and

c. Each report received by the local board of health concerning each sewer system and each shop, factory, mill or industrial establishment which on May 7, 1903, was discharging sewage or refuse or waste matter into any of the waters of the state within the municipality.

2. Each local board of health shall make and maintain such inspection as will, at all times, enable it to determine whether section 17-1701 is being complied with in respect to the discharge of sewage, refuse or waste matter or other materials prohibited by said section, into any of the waters of the state within that municipality.

3. For the purpose of such inspection every member of such local board of health, or its health officer, or any person duly authorized by it, shall have the right to make all necessary examinations of any premises, building, shop, factory, mill, industrial establishment, process or sewer system.

* NB Expired September 1, 1973

*** § 17-1735. Violations; service of notice; actions.**

1. The board of health of each municipality shall promptly ascertain every violation of, or noncompliance with, any of the provisions of section 17-1701 or of the permits for the discharge of sewage or refuse or waste material into any of the waters of the state herein provided, which may occur within that municipality, or the commissioner may ascertain such violations or noncompliance.

2. The local board of health shall on the discovery of every violation of or noncompliance with any of the provisions of said section or of any permit duly issued, report the same in writing to the commissioner.

3. Upon receipt of such report from a local board of health the

commissioner shall investigate the matter immediately and shall hold a hearing and give the person or persons charged with such violation or noncompliance an opportunity to present evidence on his or their behalf, and shall ascertain whether a violation or noncompliance exists.

* NB Expired September 1, 1973

*** § 17-1737. Legal construction and limitations; riparian owners.**

Nothing in titles 15 and 17 of this article shall be construed to diminish or otherwise to modify the common law rights of riparian owners in the quality of waters of streams covered by such rights, nor in the case of actions brought against the pollution of waters to limit their remedy to indemnities.

* NB Expired September 1, 1973

§ 17-1739. Repeal of provisions.

The provisions of sections 17-1701, 17-1705, 17-1707, 17-1713 to 17-1737, inclusive, and 71-1925, shall remain in force and effect only until September 1, 1973.

§ 17-1741. Sewerage; construction; villages.

1. Whenever any local board of health in any incorporated village shall deem the sewers of such village insufficient to properly and safely sewer such village, and protect the public health, it shall certify such fact in writing, stating and recommending what additions or alterations should in the judgment of such board of health be made, with its reasons therefor, to the commissioner for his approval.

2. If such recommendations shall be approved by the commissioner, and the plans therefor be approved by the department, it shall be the duty of the board of trustees or other board or officials of such village having jurisdiction of the construction of sewers therein, whether

sufficient funds shall be on hand for such purpose or not, to forthwith make such additions to or alterations in the sewers of such village and execute such recommendations.

3. The expenses of such additions to, or alterations to the sewerage of such village shall be paid for wholly by said village in the same manner as other village expenses are paid or by an assessment of the whole amount against the property benefited, or partly by the village and partly by an assessment against the property benefited, as the board of trustees of such village shall by resolution determine.

4. If the board of trustees shall determine that such expenses shall be paid partly by the village and partly by an assessment against the property benefited, as authorized by this section, it shall in the resolution making such determination fix the proportion of such expense to be borne by each, and the proportion thereof to be raised by an assessment against the property benefited shall be assessed and collected in the same manner provided by the Village Law for the assessment and collection of sewer assessments.

5. Said village is hereby authorized to raise such sum as may be necessary for the payment of the expenses incurred, which are a village charge, if any, as herein provided, in addition to the amount such village is now authorized to raise by law for corporation purposes, and such board shall have the right to acquire such lands, right of way, or other easements, by gift, or purchase, or in case the same cannot be acquired by purchase may acquire the same by condemnation in the manner provided by law.

§ 17-1743. Reporting of spills of liquids stored in bulk.

Any person who is the owner of or in actual or constructive possession or control of more than one thousand one hundred gallons, in bulk, of any liquid, including petroleum, which, if released, discharged or spilled would or would be likely to pollute the lands or waters of the state including the groundwaters thereof shall, as soon as he has

knowledge of the release, discharge or spill of any part of such liquid in his possession or control onto the lands or into the waters of the state including the groundwaters thereof immediately notify the department. Within forty-eight hours of receipt of notification made pursuant to this section of a spill of a hazardous substance or acutely hazardous substance listed pursuant to article thirty-seven of this chapter of a quantity that may threaten the health or safety of the public or environment, the department shall notify the chief executive officer in the village, town, and city in which the spill occurred, and any adjoining city or town or village that the department deems appropriate. In addition, the department shall provide notification of such spill to the general public through local news outlets, newspaper or any other media available to the department. Notification received pursuant to this section or information obtained by the exploitation of such notification shall not be used against any such person in any criminal case, except a prosecution for perjury or for giving a false statement.

§ 17-1745. Sewage from vessels.

1. Definitions. (a) "Dump station" means any facility designed to receive sewage from any portable toilet carried on any vessel.

(b) "Marine holding tank" means any container aboard any vessel that is designed and used for the purpose of collecting and storing treated or untreated sewage from marine toilets.

(c) "Marine toilet" means any toilet on or within any vessel, except those that have been permanently sealed and made inoperative.

(d) "Commercial marina" means any installation that is owned by any party other than the state or any of its political subdivisions and which provides services to the public for more than twenty vessels for a fee.

(e) "Private marina" means any installation that is owned by any party other than the state or any of its political subdivisions and which serves more than twenty vessels or transient slips for a fee.

(f) "Public marina" means any installation that is owned by the state or any of its political subdivisions and which serves more than twenty

vessels with or without charge, but shall not include quick launches or launching ramps intended for trailered vessels.

(g) "Pumpout facility" means any device, portable or permanent, capable of removing sewage from a marine holding tank.

(h) "Sewage" means all human body wastes and gray water.

(i) "Vessel" shall have the same meaning as in subdivision six of section two of the navigation law.

(j) "Gray water" shall have the same meaning as in subdivision twenty-nine of section two of the navigation law.

2. Notice of pumpout facilities and dump stations required. Every commercial marina, public marina and private marina shall post a sign of not less than eighteen inches by twenty-four inches in a conspicuous location clearly stating the location of a pumpout facility and dump station located at such marina or if no pumpout facility or dump station is located at such marina stating the location of and distance to the nearest pumpout facility and dump station.

3. The commissioner shall promulgate rules and regulations to establish and maintain the Hudson River as a "no discharge zone" pursuant to the federal clean water act and associated programs administered by the federal environmental protection agency.

4. Pumpout facilities and dump stations required on the Hudson River. The commissioner shall require that marinas located on the navigable waters of the Hudson River shall provide pumpout facilities and dump stations for the transfer and disposal of sewage and gray water from marine holding tanks and portable toilets in accordance with the requirements contained in subdivision three of this section.

(a) The commissioner shall authorize a grant from funds made available in accordance with the clean vessel act of 1992 for the purchase and installation of pumpout facilities and dump stations at public marinas in accordance with the New York state clean vessel act plan.

(b) The commissioner shall authorize a grant from funds made available in accordance with the clean vessel act of 1992 for the purchase and installation of a pumpout facility and dump station at a commercial marina, provided the owner or operator of such commercial marina agrees

to maintain the pumpout facility and dump station at no charge to the state and provides pumpout and dump station services to the public at a charge to be established by the commissioner in accordance with federal guidelines as required by the clean water act.

(c) Nothing in this subdivision shall restrict the use of any public funding source for the purchase and installation of a pumpout facility and dump station at any public or commercial marina.

5. Public information and registry. (a) The commissioner, in consultation with the department of motor vehicles, the department of state, and the office of parks, recreation and historic preservation, shall cause to be prepared periodic and timely informational material for distribution regarding the environmental purposes of utilizing pumpout facilities and dump stations including the location thereof on the navigable waters of the Hudson River, the importance of proper maintenance of vessel sanitation equipment, and information regarding fines and penalties for the illegal discharge of sewage and litter from vessels. The department of motor vehicles and the office of parks, recreation and historic preservation shall assist in the distribution of such informational material in the course of ordinary business.

(b) The commissioner, in consultation with the department of motor vehicles, the department of state, and the office of parks, recreation and historic preservation, shall create a registry and maintain records, updated annually, of all public, private and commercial marinas that identify which marinas have pumpout facilities and dump stations. The commissioner shall, upon written request, provide such information to any interested party.

6. Penalties. Failure to comply with the provisions of this section shall result in fines of two hundred fifty dollars per day for each violation.

TITLE 19

STATE AID: COLLECTION, TREATMENT, AND DISPOSAL OF SEWAGE

Section 17-1901. Comprehensive studies and reports: definitions; state aid; powers and duties of the commissioner; powers of

the municipalities.

17-1903. Contracts for construction of sewage treatment works.

17-1905. Operation and maintenance of sewage treatment works.

17-1907. Contracts for construction of sewer systems.

17-1909. Water pollution control revolving fund agreements.

§ 17-1901. Comprehensive studies and reports: definitions; state aid; powers and duties of the commissioner; powers of the municipalities.

1. As used in this section:

a. "Comprehensive study and report" means an engineering study for the development of economical projects for the present and future collection, treatment and disposal of sewage for one or more municipalities or any portion thereof. Such study shall contain such information as may be determined by the commissioner, including, but not limited to, the determination of the economical service area or administrative area for sewage works projects; cost estimates covering construction, engineering, legal and other services, land acquisition, and contingencies; proposed method of financing; preparation of estimates of first costs and total annual costs for the construction, and operation and maintenance of the recommended facilities; basic data such as general plan for sewage treatment plant site, flow, size and capacity of proposed units, and location, size or capacity of main trunk sewers, subtrunks, pumping stations, force mains, and outfalls; basic information so that sewage works and sewerage systems may be enlarged economically to serve future areas and population; and development of major alternative solutions. Such study shall not provide for minor sewer extensions or for sewer plans for small subdivisions or small areas, and shall not include the preparation of detail design and engineering drawings, specifications, and contract documents.

b. "Municipality" means county, city, town or village, or any designated agency thereof.

c. "Governing body" means in a county, the county legislative body; in a city, the board of aldermen, a common council, commission or other body vested by its charter or other law with jurisdiction to enact ordinances or local laws, except that in a city having a population of one million or more, if there be a board of estimate, the term "governing body" shall mean such board of estimate; in a town, the town board; and, in a village, the board of trustees.

d. "Agency" means the department, bureau, commission, board, division, agency, public benefit corporation, or committee of any municipality or municipalities, designated by the governing body of such municipality, or by the governing body of each participating municipality in the case of a joint undertaking, to conduct and develop comprehensive studies and reports.

2. The commissioner may, in the name of the state, make or contract to make, within appropriations therefor, a state grant, for payment during any of the ten successive fiscal years of the state beginning with its fiscal year commencing April 1, 1972, to any municipality, or to two or more municipalities jointly, to cover the entire cost, as determined and approved by the commissioner, of the preparation or updating of a comprehensive study and report for the present and future collection, treatment, and disposal of sewage in such municipality or municipalities.

3. In administering and enforcing the provisions of this section, the commissioner shall:

a. Make an estimate of the funds or appropriations for inclusion annually in the executive budget;

b. Receive applications for state aid in such form and containing such information as he may require;

c. Qualify municipalities for state aid and advise them of such qualifications;

d. Approve the area and scope of any comprehensive study prior to its execution;

e. Approve the person or firm selected by the municipality to perform necessary consulting services for the comprehensive study and reports;

f. Approve the report prior to final payment;

g. Execute contracts for the services of consulting engineers necessary for such study jointly with the municipality or municipalities requesting state aid therefor;

h. Approve the amount of compensation to be paid for such engineering services and the method of determining such compensation, provided, however, that such compensation shall not be computed on a per diem or percentage of estimated costs basis;

i. Approve vouchers for payment of state aid grants;

j. Perform such other and further acts and promulgate such rules and regulations, pursuant to subdivision 2 of section 17-0303, as may be necessary, proper or desirable to carry out effectively the provisions of this section.

4. Any municipality, or municipalities acting jointly, may:

a. Apply to and contract with the commissioner for state aid pursuant to this section;

b. Select, subject to the commissioner's approval, the person or firm to perform necessary consulting engineering services for a comprehensive study and report, and enter into contracts for such services, provided, however, that the commissioner shall also be a party to any such contract;

c. Expend money received from the state pursuant to this section only for purposes consistent with this section.

§ 17-1903. Contracts for construction of sewage treatment works.

1. As used in this section:

a. "Sewage treatment works" means a facility for the purpose of treating, neutralizing or stabilizing sewage, including treatment or disposal plants, the necessary intercepting, outfall and outlet sewers, pumping stations integral to such plants or sewers, equipment and furnishings thereof and their appurtenances.

b. "Construction" means the erection, building, acquisition, alteration, reconstruction, improvement or extension of sewage treatment works; the inspection and supervision thereof; and the engineering, architectural, legal, fiscal and economic investigations and studies, surveys, designs, plans, working drawings, specifications, procedures, and other actions necessary thereto.

c. "Eligible project" means a project for the construction of sewage treatment works, (1) for which a permit has been issued pursuant to section 17-0701 of this article, (2) which is, in the judgment of the commissioner, in accord with applicable comprehensive studies and reports made pursuant to section 17-1901, if any, (3) which is, in the judgment of the commissioner, eligible for federal pollution abatement assistance, whether or not federal funds are then available therefor, (4) which conforms with applicable rules and regulations of the commissioner, (5) which is, in the judgment of the commissioner, necessary for the accomplishment of the state water pollution control program, and (6) either (a) the erection, building, acquisition, alteration, reconstruction, improvement or extension of which is commenced or is to be commenced between the date on which this act becomes a law and March 31, 1972, or (b) any portion of the erection, building, acquisition, alteration, reconstruction, improvement or extension of which is undertaken between the date on which this act becomes a law and March 31, 1972.

d. "Municipality" means any county, city, town, village, district corporation, county or town improvement district, or sewer authority now existing in a city, the New York State Environmental Facilities Corporation acting pursuant to subdivision three of section twelve hundred eighty-five of the public authorities law, or any two or more of the foregoing which are acting jointly in connection with an eligible project.

e. "Federal pollution abatement assistance" means funds available to a municipality, either directly or through allocation by the state, from the federal government as grants for construction of sewage treatment works, pursuant to section 6 of the Federal Water Pollution Control Act as enacted by section 1 of the Federal Water Pollution Control Act amendments of 1956 and acts amendatory thereto.

f. "Federal assistance" means funds available, other than by loan, from the federal government to a municipality, either directly or through allocation by the state, for construction of sewage treatment works or which are used for such construction, pursuant to the Federal Water Pollution Control Act and acts amendatory thereto or pursuant to any other federal law or program.

2. For the purpose of discharging the state responsibility with respect to the protection and promotion of the health of the inhabitants of the state by the provision of sewage treatment works, the commissioner, in the name of the state, may enter into contracts with municipalities having power to construct, operate and maintain sewage treatment works, and any such municipality may enter into a contract with the commissioner, concerning eligible projects. Any such contract may include such provisions as may be agreed upon by the parties thereto, and shall include, in substance, the following provisions:

a. An estimate of the reasonable cost of the project as determined by the commissioner.

b. An agreement by the commissioner to pay to the municipality, during the progress of construction of each phase of the project (said phases

to be construction of interceptors, substructure, superstructure, outfalls or other similar major components of a project), subject to final computation and determination of the state grant upon completion of the entire project reflecting the actual eligible cost thereof, a portion of the cost of the project representing the part of the non-municipal share of the cost of the project that is not paid by the federal government, determined in the following manner:

(1) An amount equal to thirty per cent of the actual cost of the project, or an amount equal to thirty per cent of the estimated reasonable cost of the project, whichever is lower, provided, however, that the state payment under this subparagraph shall be reduced by the amount of any federal assistance received or to be received by the municipality which is in excess of sixty per cent of the cost of the project, together with,

(2) If necessary to limit the municipal share of the cost of the project to forty per cent, an additional amount which when added to the amount of federal assistance, if any, received or to be received by the municipality, equals thirty per cent of the actual cost of the project, or equals thirty per cent of the estimated reasonable cost of the project, whichever is lower.

c. An agreement by the municipality

(1) To proceed expeditiously with, and complete, the project in accordance with plans approved pursuant to section 17-0701;

(2) To commence operation of the sewage treatment works on completion of the project, and not to discontinue operation or dispose of the sewage treatment works without the approval of the commissioner;

(3) to operate and maintain the sewage treatment works in accordance with applicable provisions of this article, the state sanitary code and rules and regulations of the commissioner;

(4) to apply for and make reasonable efforts to secure federal assistance for the project;

(5) to secure the approval of the commissioner before applying for federal pollution abatement assistance, in order to maximize the amounts of such assistance received or to be received for all projects in New York state, including amounts for reimbursement of payments made by the state pursuant to subparagraph (2) of paragraph b of this subdivision;

and

(6) to provide for the payment of the municipality's share of the cost of the project.

d. A provision that, in the event that federal assistance which was not included in the calculation of the state payment pursuant to paragraph b of this subdivision becomes available to the municipality, the amount of the state payment shall be recalculated with the inclusion of such additional federal assistance and the municipality shall either (1) pay to the state the amount by which the state payment actually made exceeds the state payment determined by the recalculation or, (2) if such additional federal assistance has not been received by the municipality, authorize the state to receive and retain such amount from the federal government.

3. The commissioner may adopt rules and regulations pursuant to subdivision 2 of section 17-0303 governing the making and enforcing of contracts pursuant to this section.

4. All contracts entered into pursuant to this section shall be subject to approval by the state comptroller, and by the attorney general as to form. All payments by the state pursuant to such contracts shall be made after audit by and upon the warrant of the comptroller on vouchers approved by the commissioner.

5. The commissioner shall prepare and file with the department an annual report on the scope and results of construction undertaken pursuant to this section.

6. In connection with each contract concerning an eligible project the commissioner shall keep adequate records of the amount of the payment by the state pursuant to subparagraph (2) of paragraph b of subdivision 2 of this section, and of the amount of federal assistance received by the municipality. Such records shall be retained by the commissioner and shall establish the basis for application for federal reimbursement of such payments made by the state. The commissioner is hereby authorized to make such applications in appropriate cases.

7. In the event that a project is an eligible project by reason of clause (b) of subparagraph (6) of paragraph c of subdivision 1 of this section rather than by reason of clause (a) of such subparagraph, then the estimated reasonable cost of the project determined pursuant to paragraph a of subdivision 2 of this section and the actual cost of the project for the purpose of subparagraphs (1) and (2) of paragraph b of such subdivision shall be calculated only with respect to that portion of the erection, building, acquisition, alteration, reconstruction, improvement or extension of the sewage treatment works which is undertaken after the date on which this act becomes a law.

8. The commissioner may advance funds to a municipality in accordance with the following provisions:

a. Prior to entering into a contract authorized by subdivision 2 of this section, the commissioner may advance funds to a municipality, in an amount up to five per cent of the estimated reasonable cost of an eligible project as determined by the commissioner, for the purpose of assisting the municipality in defraying expenses of an eligible project incurred in advance of construction. This advance shall be payable, upon the warrant of the comptroller on a voucher approved by the commissioner, after formal acceptance by the municipality of the federal pollution abatement assistance offered pursuant to the provisions of the Federal Water Pollution Control Act and amendments thereto or at the discretion of the commissioner after state submission of the project to the federal government and in the absence of a federal offer.

b. The amount of the advance shall be deducted from the amount of the state payment to be made to the municipality, pursuant to the agreement of the commissioner with the municipality, when construction of the entire project is one-half completed.

c. The municipality shall initiate construction of the project within the time specified in the approved project which, in any event, shall not be later than two years after the date of such advance of funds. If construction is not initiated within such time, the amount of the

advance shall be repaid to the state. Whenever such municipality shall fail to make any such repayment to the state, upon request of the commissioner, the state comptroller shall cause to be withheld from state-collected, locally-shared taxes or state aid, whichever he shall determine and to which such municipality would otherwise be entitled, a sum sufficient to reimburse the state for the amount due and owing the state.

9. To the extent that funds available pursuant to chapter 176 of the laws of 1965 (Pure Waters Bond Act) are not needed to finance the state share of projects, the construction of which was undertaken prior to April 1, 1972, the commissioner is authorized to provide assistance to municipalities for the construction of "water quality improvement projects" as defined in section 51-0303 of this chapter. The use of funds as authorized by this subdivision will be governed by the provisions of titles 1 and 3 of article 51 of this chapter, provided however, that subdivisions 1 through 8 of this section will continue to apply to projects construction of which was undertaken prior to April 1, 1972.

§ 17-1905. Operation and maintenance of sewage treatment works.

1. As used in this section:

a. "Operation and maintenance" means and includes all direct costs for labor, direct supervision, vehicles, vessels, supplies, materials, fuel, lubricants, power, and similar costs, the direct costs charged against labor such as retirement, social security, and insurance, and such other charges as real property and school taxes and special assessments and ad valorem levies on sewage treatment works located outside of the corporate limits of the municipality, insurance premiums on sewage treatment plant structures, and equipment. It shall not include any administrative, legislative or overhead costs other than as outlined above, costs of indirect supervision or costs of any capital improvements.

b. "Sewage treatment works" means and includes the structures, equipment, vehicles, vessels, and appurtenances of local government used exclusively for the treatment of sewage and for the disposal of sludge resulting from sewage treatment. Sewage treatment works shall also include outlet sewers, overflow structures on sewer systems, diversion chambers on intercepting sewers, and pumping stations which have replaced a sewage treatment plant or plants. Such treatment works shall not include any other sewers, nor any properties used in whole or in part for the administration of sewage treatment works unless such properties are on the site of, and an integral part of, the sewage treatment plant.

c. "Qualifications for state assistance to municipalities" means and includes submission by the municipality of (1) audited costs of sewage treatment plant operation, (2) standard reports with respect to such plant performance and effect on receiving waters, (3) evidence that the sewage treatment plant is under the supervision of an operator qualified pursuant to section f of chapter 11 of the State Sanitary Code, (4) evidence that the sewage from the tributary area reaches such sewage treatment plant for processing, within practical limitations, (5) evidence that such sewage treatment plant is and has been constructed in substantial compliance with the plans approved by and on file with the commissioner or with approved amendments thereto. The burden of proof to establish qualifications for state assistance rests with the municipality.

d. "Municipality" means a county, city, town, village or district corporation, or a county or town on behalf of a special improvement district, which operates and maintains sewage treatment works, or a city on behalf of a sewer authority now existing in such city which operates and maintains sewage treatment works, or any of the foregoing in cases in which the sewage treatment works is operated and maintained by the New York State Environmental Facilities Corporation pursuant to subdivision 1 of section 1285 of the Public Authorities Law, or the New York state pure waters authority acting pursuant to subdivision 3 of section 1285 of the Public Authorities Law.

2. The commissioner shall apportion and approve for payment state assistance to each municipality which, by itself or in cooperation with one or more other municipalities or other governments, operates and maintains or is responsible for the payment of expenses for operation and maintenance of sewage treatment works during all or part of a fiscal year of such municipality, in accordance with qualifications for state assistance applicable to the operation and maintenance of such works. Where a special or improvement district or a sewer authority operates and maintains sewage treatment works, state assistance paid to a county, city or town on behalf of such district or authority shall be credited by such county, city or town to such district or authority. Such state assistance, when apportioned among the municipalities applying, shall be for not more than one-third of the amount approved by the commissioner as having been duly expended by the municipality for such operation and maintenance during each of the two successive fiscal years of the municipality beginning with its fiscal year commencing on or after June 1, 1974 and for one-fourth of such amount expended by the municipality during each of the following five successive fiscal years of the municipality beginning with its fiscal year commencing on or after June 1, 1976, for thirty-three and one-third percent of such amount expended by the municipality for its fiscal year commencing between June 1, 1981 and May 31, 1982, for one-third of such amount expended by the municipality for its fiscal year commencing between June 1, 1982 and May 31, 1983, for one-third of such amount expended by the municipality for its fiscal year commencing between June 1, 1983 and May 31, 1984, for one-third of such amount expended by the municipality for its fiscal year commencing between June 1, 1984 and May 31, 1985, for one-third of such amount expended by the municipality for its fiscal year commencing between June 1, 1985 and May 31, 1986, for one-third of such amount expended by the municipality for its fiscal year commencing between June 1, 1986 and May 31, 1987, for one-third of such amount expended by the municipality for its fiscal year commencing between June 1, 1987 and May 31, 1988 and for one-third of such amount expended by the municipality for its fiscal year commencing between June 1, 1988 and May 31, 1989. Provided further, however, if the amount appropriated by the legislature to meet the requirements of this section is insufficient to make the full payments required herein, the amounts to be paid to municipalities

pursuant to this section shall be proportionately reduced. Such state assistance shall be paid on account of such expenditures after the termination of the fiscal year of the municipality and after the commissioner shall have determined, in accordance with this section;

a. The total of such expenditures properly attributable to operation and maintenance, and

b. That such operation and maintenance complied with the applicable qualifications for state assistance.

All payments of such state assistance shall be made after audit by and upon warrant of the comptroller on vouchers approved by the commissioner.

3. A municipality applying for state assistance pursuant to this section shall submit to the commissioner within sixty days after the termination of a fiscal year of the municipality an application in such form and containing such information as the commissioner shall require in order to effectuate the purposes of this section and to perform his functions, powers and duties thereunder.

4. In administering and enforcing the provisions of this section the commissioner shall:

a. Annually furnish an estimate to the director of the budget of the amount required to be included in the executive budget for state assistance payable under this section and for such purpose shall have power to require municipalities to file advance estimates of the amounts of state assistance estimated to be payable to them under this section during the next fiscal year of the state.

b. Deny state assistance to any municipality which fails to operate and maintain its sewage treatment works in accordance with qualifications for state assistance applicable to such works.

c. Make an annual inspection of operating conditions and results, including the collection of necessary flow and analytical data and

sampling, at each sewage treatment plant for the maintenance and operation of which state assistance is granted pursuant to this section.

d. Promulgate such rules and regulations pursuant to subdivision 3 of section 17-0303 as may be necessary, proper or desirable to carry out effectively the provisions of this section, including, but not limited to, standards of operating efficiency for sewage treatment works, based on the best usage of the receiving waters, type of treatment provided, and available dilution.

e. On or before May first, nineteen hundred seventy-five, the commissioner shall present to the governor and the legislature a study of the system of state assistance payable under this section. The study shall describe the effect the provision of this state assistance has had on the quality and efficiency of the treatment of sewage by municipalities. It shall also evaluate the effect that would be achieved by changing the type and level of assistance provided. In evaluating these alternatives, it shall consider among other possible courses, the possibilities of providing aid in relation to the level of removal of pollutants achieved, and of providing aid for certain items not now included in approvable operating costs such as repairs and rehabilitation of facilities, and of providing more or less state assistance for the various types of expenses. It shall also evaluate such other aspects of the program as shall be necessary to provide a clear picture of the current effectiveness of the program, how it may be improved, what the annual costs of such improvements may be and whether such current or proposed expenditures do in fact provide a commensurate value to the state. Such study shall contain the commissioner's recommendations for the continuation, elimination or modification of the system of state assistance payable under this section.

§ 17-1907. Contracts for construction of sewer systems.

1. As used in this section:

a. "Construction" means and includes the building, installation, or

extension of a sewer system; the inspection and supervision thereof; the engineering, legal, fiscal and economic investigations; studies, surveys, designs, plans, contract drawings, specifications, procedures; and other actions necessary thereto.

b. "Sewer system" means and includes pipe lines or conduits, pumping stations, force mains, and all other constructions, devices, and appliances appurtenant thereto, used for conducting sewage (the water-carried human, animal or other treatable wastes from residences, buildings, industrial and commercial establishments or other places) to a point of connection to the sewage treatment works as defined in section 17-1903.

c. "Sewer connection" means and includes a point of connection between a building, residence or other structure and a public sewer.

d. "Residence" means and includes a building or structure which is occupied principally as the home of one or more persons; provided, however, that such building or structure contain not more than two dwelling units.

e. "Municipality" means and includes any county, town, village, district corporation, county or town improvement district, or any two or more of the foregoing which are acting jointly in connection with an eligible project. For purposes of this section only, an Indian reservation located partly or wholly within New York State shall be construed as a "municipality".

f. "Local governing body" means and includes (1) in a county, the county legislative body (2) in a town, the town board; (3) in a village, the board of trustees; (4) in a district corporation or an improvement district, the governing board; (5) in an Indian reservation, the proper tribal officials.

g. "Federal assistance" means and includes funds available, other than by loan, from the federal government to a municipality, either directly or through allocation by the state, for construction of a sewer system

or which are used for such construction, pursuant to any other federal law or program.

i. "Project" means the construction of the whole or connected portion of a sewage collection system. Where the construction of a sewage collection system is phased over a period of years, each phase may be considered as a project.

j. "Eligible project" means a project which in the judgment of the commissioner meets all of the following requirements:

(1) It is in accord with applicable comprehensive studies and reports made pursuant to section 17-1901 of this article;

(2) It conforms with applicable rules and regulations of the commissioner and, in his opinion, reflects a reasonable effort to develop maximum economy in planning, design and construction, with an acceptable ratio between costs and benefits;

(3) It is necessary for the accomplishment of the state water pollution control program;

(4) It is under construction in the period between April 1, 1965 and March 31, 1977;

(5) No portion of the project aided herein is eligible to receive assistance pursuant to section 17-1903;

(6) It serves inhabited residences in existence prior to the effective date of this law;

(7) It serves the public by providing for the collection of sewage (house connections and pipes collecting exclusively industrial, commercial and other nonresidential waste are ineligible);

(8) The project or major part thereof is, at the time of construction, located in: (a) a town which has a total population of seventeen thousand or less persons, or (b) a town outside of village area which has a population density per square mile of less than one hundred persons.

k. "Capital cost" means the actual cost of construction of an eligible project, not to include the cost of securing financing or interest on funds borrowed to finance such construction, and representing that part of the cost of the eligible project that is not paid by the federal

government.

l. "Annual debt service" means such amounts as shall be required to be paid annually to amortize obligations (both principal and interest) issued in order to finance the capital cost of an eligible project; provided, however, that for the purposes of state aid, such annual debt service shall be computed on a debt amortization schedule of not less than thirty years nor more than forty years, as the commissioner shall determine, and shall not include any other debt service (whether principal or interest) on obligations of or on behalf of a municipality, other capital costs, or expenditures for the purpose as to which state reimbursement is claimed under any provision of law other than this section. Where the eligible portion of the sewage collection system serves non-residential users as well as residences, the amount of annual debt service to be used in computing state aid shall be reduced as determined by the commissioner, to compensate for the benefits received by the nonresidential users from such system.

m. "State aid" means financial support made available to a municipality by way of state participation in annual debt service, through contracts entered into between the commissioner and the municipality, upon such terms and conditions as the commissioner shall deem appropriate, which shall be based on the number of residences served by the eligible project and computed as follows:

(1) The amount of annual debt service, as defined above, minus the municipality's share of the expense for construction of the sewage collection system.

(2) The municipality's share shall be the product of the number of residential sewer connections served by the project multiplied by an adjusted rate. The adjusted rate shall be determined by applying a valuation correction from the sum of one hundred twenty-five dollars.

(3) Valuation correction shall consist of minus one dollar for each one thousand dollars or part thereof that the project area per capita full value is less than the average per capita full value for the state excluding all cities. For projects wholly located within a village or town the project area per capita full value shall be the per capita full value for the village, or for the town outside of village area,

respectively. For other projects, per capita full value shall be per capita full value of the town or village within which the major portion of the project is located. Per capita full value shall mean the full value of such municipality or area divided by the population thereof.

The amount of such state aid shall be recomputed each year, on the basis of data reported by the local governing body as accepted by the commissioner. State aid shall commence in the state fiscal year beginning April 1, 1971. No state-aid payments shall be made on the basis of any portion of the debt service of eligible projects which was due and payable prior to April 1, 1971.

2. For the purpose of meeting the state responsibility as provided herein, with respect to the protection and promotion of the health of the inhabitants of the state by the provision of sewer systems, the commissioner, in the name of the state, may enter into contracts with municipalities having power to construct, operate and maintain sewer systems, and any such municipality may enter into a contract with the commissioner concerning eligible projects. Any such contract may include such provisions as may be agreed upon by the parties thereto, and shall include, in substance, the following provisions:

a. The cost of the eligible project as determined by the commissioner.

b. The method by which the eligible project shall be financed.

c. An agreement between the commissioner and the municipality to provide state aid to the municipality each year, during the progress of construction or following completion of construction as may be agreed upon by the parties.

d. An agreement by the municipality

(1) To proceed expeditiously with, and complete, the project in accordance with plans approved pursuant to section 17-0701 of this article;

(2) To commence operation of the sewer system on completion of the project, and not to discontinue operation of the sewer system without

the approval of the commissioner,

(3) To operate and maintain the sewer system in accordance with applicable provisions of this article, the state sanitary code and rules and regulations of the commissioner,

(4) To apply for and make reasonable efforts to secure federal assistance for the project,

(5) To secure the approval of the commissioner before applying for federal assistance, in order to maximize the amounts of such assistance received or to be received for all projects in New York state,

(6) To provide for the payment of the municipality's share of the cost of the project,

(7) To execute a contract or agreement with the owner of the sewage treatment plant, if other than the municipality itself, to accept sewage from the sewage collection system aided under this section, and

(8) To promulgate a municipal sewage use ordinance acceptable to the commissioner.

e. A provision that, in the event that federal assistance which was not included in the calculation of the capital cost becomes available to the municipality, the amount of the state payment shall be recalculated by deducting the amount of such federal assistance from the eligible capital cost, and adjustment shall be made either (1) by the municipality paying to the state the amount by which the state payments actually made exceed the state payments determined by the recalculation or, (2) by deducting the excess paid from subsequent payments to be made by the state.

3. The commissioner may adopt rules and regulations pursuant to subdivision 3 of section 17-0303 of this article governing the making and enforcing of contracts pursuant to this section.

4. All contracts entered into pursuant to this section shall be subject to approval by the state comptroller, and by the attorney general as to form. All payments by the state pursuant to such contracts shall be made after audit by and upon the warrant of the comptroller on vouchers approved by the commissioner.

5. In connection with each contract concerning an eligible project the commissioner shall keep adequate records of the amount of the payment by the state pursuant to subparagraph c of subdivision two of this section, and of the amount of federal assistance received by the municipality.

§ 17-1909. Water pollution control revolving fund agreements.

1. As used in this section:

a. "Allocation" means the amount of moneys allocated to reduce a municipality's or group of municipalities' total financing costs for one or more eligible projects.

b. "Construction" means the erection, building, acquisition, alteration, reconstruction, improvement, enlargement or extension of an eligible project; the inspection and supervision thereof; and the engineering, architectural, legal, fiscal, and economic investigations and studies, surveys, designs, plans, working drawings, specifications, procedures, and other actions necessary thereto.

c. "Corporation" means the New York state environmental facilities corporation, continued pursuant to section twelve hundred eighty-two of the public authorities law, or any successor thereto.

d. "Eligible project" means a project for construction of a facility which would be eligible for financing under the Federal Water Pollution Control Act:

(i) for which all required federal and state permits have been issued; and

(ii) which the commissioner has determined:

(a) is in accord with applicable comprehensive studies and reports made pursuant to sections 17-0303 and 17-1901 of this article; and

(b) is necessary for the accomplishment of the state water pollution control program formulated pursuant to sections 17-0303 and 17-1901 of this article; and

(c) represents a reasonable effort to develop economic viability in

planning, design and construction; and

(d) is a project for which financial assistance is available from the fund; and

(e) conforms with applicable rules and regulations of the department, including a demonstration that design and construction consider future physical climate risk due to sea level rise, and/or storm surges and/or flooding, based on available data predicting the likelihood of future extreme weather events, including hazard risk analysis data if applicable; and

(f) includes consideration of county-wide or regional wastewater planning.

e. "Financial assistance to a municipality" has the same meaning as set forth in subdivision four of section twelve hundred eighty-five-j of the public authorities law.

f. "Fund" means the water pollution control revolving fund established under section twelve hundred eighty-five-j of the public authorities law.

g. "Intended use plan" means the plan prepared pursuant to subdivision two of this section, identifying the intended uses of the amounts available in the fund, including but not limited to: (i) a list of those projects for construction of publicly owned treatment works on the priority list developed pursuant to subdivision two of this section; (ii) a list of projects developed pursuant to subdivision two of this section anticipated to be financed by the fund through the water pollution control linked deposit program; (iii) a description of the short and long term goals and objectives of the fund; (iv) information on the activities to be supported, including a description of project categories, discharge requirements under the Federal Water Pollution Control Act, terms of financial assistance, and eligible borrowers pursuant to the water pollution control linked deposit program served; (v) the criteria and method established for the distribution of funds; and (vi) the amount of moneys from the fund, not to exceed ten million dollars annually, to be made available for linked loans under the water pollution control linked deposit program during the period covered by

such intended use plan.

h. "Municipality" means any county, city, town, village, district corporation, county or town improvement district, school district, Indian reservation wholly within New York state, any public benefit corporation or public authority established pursuant to the laws of New York or any agency of New York state which is empowered to construct and operate an eligible project, or any two or more of the foregoing which are acting jointly in connection with an eligible project.

i. "Project financing agreement" means an agreement between the corporation and one or more municipalities meeting the requirements of subdivision four of this section.

2. The commissioner is required to establish and maintain a list of potentially eligible projects and shall establish, pursuant to rules and regulations, a process for listing potentially eligible projects identified by municipalities and eligible borrowers pursuant to article sixteen of the state finance law and a priority ranking system for the purpose of providing financial assistance to municipalities and eligible borrowers for such projects under this section. In establishing such system, the commissioner shall take into account:

a. The environmental significance of such potentially eligible projects which shall include, but need not be limited to, an assessment of (i) public health and safety; (ii) protection of environmental resources; (iii) population affected; (iv) attainment of state water quality goals and standards; (v) compliance with state and federal law, rules and regulations; and (vi) the extent to which such projects reflect county-wide or regional wastewater planning;

b. A municipality's inability as determined by the corporation to pay for such potentially eligible project prior to receipt of such financial assistance;

c. The regional distribution of environmentally significant projects;

d. For agricultural projects funded through the water pollution control linked deposit program, in consultation with the commissioner of agriculture and markets, the extent to which the project will reduce, abate, control, or prevent non-point source pollution originating from agricultural sources and/or propose to implement best management practices, as identified in section three of the soil and water conservation districts law; and

e. For residential and small business on-site wastewater treatment system projects funded through the water pollution control linked deposit program, in consultation with the department of state, the extent to which the project will prevent an increase in nutrients in water bodies or the extent to which the project will enhance source water or watershed protection.

3. a. The corporation is authorized to promulgate regulations, developed in consultation with the commissioner and the director of the division of the budget, for the purpose of carrying out its responsibilities under this section, including establishing criteria and standards for determining the amount of financial assistance to a municipality for an eligible project. To the extent financial assistance to a municipality for an eligible project is provided as a loan from the proceeds of bonds or notes of the corporation, the amount of an allocation applicable to the portion of such eligible project financed with such loan shall be, subject to such maximum financial limitations as may otherwise be necessary and prescribed by the commissioner and the director of the division of the budget, thirty-three and one-third percent of the principal amount of such loan outstanding at any time for such eligible project, to the extent reasonably practicable, and subject to such deviation as may be necessary, in connection with the administration and investment of moneys in the fund, unless allocations in differing amounts are necessary to preclude a determination by the commissioner or the corporation pursuant to paragraph e of subdivision eight of this section or unless an allocation in a differing amount is required for an innovative technology demonstration project; provided, however, that in the case of any municipality which has, during the period commencing on June first, nineteen hundred ninety-two and ending

on September thirtieth, two thousand twenty-seven, (i) submitted an application for financial assistance in the form of such a loan for an eligible project, which application has been accepted by the corporation, (ii) closed on such loan, and (iii) commenced construction of such eligible project, the allocation applicable to the portion of such project financed with such loan shall be, subject to maximum financial limitations as may otherwise be necessary and prescribed by the commissioner and the director of the division of the budget, fifty percent of the principal balance outstanding on such loan at any time for such eligible project, to the extent reasonably practicable, and subject to such deviation as may be necessary, in connection with the administration and investment of moneys in the fund, unless allocations in differing amounts are necessary to preclude a determination by the commissioner or the corporation pursuant to paragraph e of subdivision eight of this section or unless an allocation in a differing amount is required for an innovative technology demonstration project.

b. The corporation may enter into a project financing agreement with up to three municipalities which provides for up to one hundred percent subsidy of the interest on the amount of principal not to exceed three million dollars for the construction of innovative technology demonstration projects which shall be waste water treatment facilities which utilize innovative technology approved by the commissioner as defined in regulations promulgated by the United States environmental protection agency in accordance with the Federal Water Pollution Control Act. The commissioner shall prepare criteria for selection of eligible projects pursuant to this paragraph including, but not limited to, the use of innovative technology which has been proven reasonably effective on at least a demonstration model basis.

c. The department is authorized to promulgate regulations, developed in consultation with the director of the division of the budget, for the purpose of carrying out its responsibilities under this section.

4. The corporation may enter into project financing agreements with municipalities providing for the construction and financing of eligible projects. The corporation shall prepare each project financing

agreement, which shall include but is not limited to the following provisions:

- a. A description of the eligible project;
- b. An estimate of the reasonable cost of the eligible project and a projected cash flow schedule for meeting that cost;
- c. A schedule for construction of the eligible project;
- d. A right of the corporation to approve all contracts for services and construction funded pursuant to a project financing agreement, and to inspect and review the construction of eligible projects;
- e. Notwithstanding the provisions of any other law, general, special or local, inconsistent with this section, a right of the corporation to invest proceeds of the corporation's bonds or notes, including proceeds of bonds or notes of the municipality, as provided in subdivision four of section twelve hundred eighty-four and subdivision six of section twelve hundred eighty-five-j of the public authorities law.

Such right shall include the right to invest such monies together with any other monies held by the corporation pursuant to the provisions of section twelve hundred eighty-five-j of the public authorities law;
- f. Remedies in the event of a municipality's failure to comply with the terms of a project financing agreement;
- g. An agreement by the corporation to:
 - (i) lend to the municipality for the construction of an eligible project a specified amount from the proceeds of the corporation's bonds or notes, not to exceed the estimated reasonable cost of construction of the eligible project established in the project financing agreement or any loan agreement, subject to the ability of the corporation to provide such financing, including but not limited to the approval of the corporation's board and any other approvals required by state or federal law;

(ii) use all reasonable efforts to issue its bonds or notes in an amount sufficient to finance the estimated reasonable cost of the eligible project, including but not limited to costs of issuance, credit support fees, if any, trustees fees, interest during construction, and such reserve funds, if any, as may be necessary to secure such bonds or notes;

(iii) in the alternative, provide financial assistance to the municipality for the construction of an eligible project in a specified amount from the proceeds of any federal capitalization grant, award, assistance, or any state moneys appropriated to or otherwise transferred into the fund, not to exceed the estimated reasonable cost of construction of the eligible project established in the project financing agreement or any loan agreement, as determined by the corporation or as directed by the commissioner pursuant to subdivision eight of this section or subdivision four of section twelve hundred eighty-five-j of the public authorities law;

(iv) make reimbursements for the administrative and management costs of the department and the corporation in accordance with subdivisions five and seven of section twelve hundred eighty-five-j of the public authorities law;

(v) provide to the municipality, for any loan made from the proceeds of the corporation's bonds or notes, an interest rate subsidy allocation for the eligible project in accordance with section twelve hundred eighty-five-j of the public authorities law and this section;

(vi) administer any federal rebate requirement in connection with obligations of the corporation and of any municipality issued in accordance with a project financing or loan agreement;

h. An agreement by the municipality to:

(i) proceed expeditiously with and complete the eligible project in accordance with plans approved pursuant to titles seven and eight of this article;

(ii) commence operation of the eligible project on completion of the project, and not discontinue operation of or dispose of the eligible project as long as a loan to the municipality for such project remains outstanding, without approval of the commissioner; provided, however, that the commissioner shall not approve disposition of the eligible

project without the concurrent approvals, as appropriate, of the corporation and the state comptroller. None of the foregoing shall limit the commissioner's authority to terminate or impose conditions upon the operation of an eligible project pursuant to the provisions of this chapter and any implementing regulations thereto;

(iii) operate and maintain the eligible project in accordance with applicable requirements of federal and state law;

(iv) establish and maintain project accounts in accordance with the project financing agreement and generally accepted government accounting standards;

(v) establish a dedicated source of revenue (which may include a general obligation of the municipality) providing for:

(a) operation and maintenance costs of the eligible project and equipment renewal and replacement; and

(b) loan repayment regardless of whether the eligible project is in operation;

(vi) permit any reviews or audits and provide assistance determined to be reasonable and necessary by the department or the corporation;

(vii) retain public ownership of the eligible project; and

(viii) notwithstanding the provisions of any other law, general, special or local, inconsistent with this section, delegate to the corporation the authority to invest proceeds of bonds or notes issued by the corporation or the municipality on behalf of the municipality.

i. An agreement by the corporation to certify, subject to the availability of funds, payment upon submission of a satisfactory request for disbursement of loan proceeds by a municipality, of an amount equivalent to actual construction costs incurred on or before the date of submission of the request for disbursement of loan proceeds, plus any projected construction costs which will be incurred within ninety days from the date of submission of the request for disbursement of loan proceeds, less any funds already advanced;

j. An agreement in regard to financial assistance provided pursuant to paragraph (b) of subdivision four of section twelve hundred eighty-five-j of the public authorities law, to waive programmatic requirements other than those mandated by federal law and subparagraph

(i) of paragraph d of subdivision one of this section, provided that the project was in compliance with the goals and requirements of the Federal Water Pollution Control Act, prior to July first, nineteen hundred eighty-eight, or was subject to an administrative or judicial order requiring compliance with the goals and requirements of the Federal Water Pollution Control Act prior to September thirtieth, nineteen hundred eighty-nine; and

k. Such other agreements or covenants as may be required in connection with the issuance by the corporation of its bonds or notes.

5. For the purpose of implementing the program set forth in this section and section twelve hundred eighty-five-j of the public authorities law, and ensuring compliance with the requirements of Title VI of the Federal Water Pollution Control Act, the corporation shall ensure compliance with each project financing agreement by:

a. retaining the right to inspect and review work on each eligible project in progress and upon completion, and determining whether such work was undertaken and completed in compliance with all relevant plans and the terms of such project financing agreement;

b. retaining the right to certify or refuse to certify advances and payments to a municipality pursuant to a project financing agreement or any loan agreement executed subsequent thereto to finance an eligible project;

c. retaining the right to certify or refuse to certify advances and payments to a municipality pursuant to a project financing agreement and any loan agreement executed subsequent thereto to finance an eligible project based upon the determinations of any review or audit;

d. establishing remedies if work on an eligible project has not been completed in accordance with all relevant plans and the terms of such project financing agreement due to factors within the municipality's control; and

e. requiring a municipality to maintain project accounts with respect to any eligible project.

Nothing herein shall be construed to affect or diminish the general authority of the department to inspect and review the work on any project financed pursuant to this section, or to inspect the records relating to such project, for the purpose of determining compliance with any other provisions of this chapter.

6. In the event the work completed pursuant to a project financing agreement or loan agreement is deemed not in compliance with such agreements, the corporation shall expeditiously notify the municipality of such non-compliance and indicate the reasons for such determination.

7. For the purpose of implementing the program set forth in this section and section twelve hundred eighty-five-j of the public authorities law, and ensuring compliance with the requirements of Title VI of the Federal Water Pollution Control Act, the department shall:

a. Enter into any agreement between the state of New York and the administrator of the United States environmental protection agency and take all other actions necessary to comply with the requirements of Title VI of the Federal Water Pollution Control Act and state law, including but not limited to:

(i) determining a reasonable schedule for financing and construction of eligible projects;

(ii) directing the establishment of systems of records or accounts and subaccounts within the water pollution control revolving fund as the department deems necessary or desirable, and approving or disapproving the establishment of such record systems or accounts and subaccounts as the corporation requests for the operation of the water pollution control revolving loan fund;

(iii) determining the accounts or subaccounts within the water pollution control revolving fund which will be used as a source of funding for each eligible project subject to the limitations of subdivision six of this section; and

(iv) approving each project for qualification as an eligible project.

b. Arrange in consultation with the corporation for independently conducted reviews and audits on at least an annual basis necessary to carry out the objectives of the fund.

c. Submit a copy of the draft intended use plan to the governor, the director of the division of the budget, the chairman of the senate finance committee and the chairman of the assembly ways and means committee on or before October thirty-first, nineteen hundred eighty-nine and annually on or before such date thereafter and submit a copy of the final intended use plan to such persons upon its approval by the administrator of the United States environmental protection agency.

8. The corporation may or, if so directed by the commissioner, the corporation shall provide financial assistance to municipalities as a loan pursuant to paragraph (a) of subdivision four of section twelve hundred eighty-five-j of the public authorities law from any available moneys in the fund other than the proceeds of the corporation's bonds or notes or moneys needed to comply with subdivision five of section twelve hundred eighty-five-j of the public authorities law if and to the extent any of the following conditions are met:

a. The corporation determines that it is unable to, or that it is impracticable to, finance all or a portion of the costs of an eligible project from the proceeds of bonds or notes that are special obligations of the corporation; or

b. The total cost of the eligible project and related segments does not exceed four million dollars where such project and related segments service a municipality with a population of three thousand five hundred or less; or

c. The commissioner or the corporation determines that failure to do so would jeopardize the receipt or maintenance of federal capitalization grant moneys, awards or assistance; or

d. A determination is made by the corporation that the issuance of and

use of the proceeds of the corporation's bonds to provide financial assistance to municipalities would cause the loss of the tax-exempt status of any bonds or other obligations of New York state, all or a portion of the proceeds of which are appropriated or otherwise transferred into the fund; or

e. Federal capitalization grants are provided in the form of a letter of credit or draws under capitalization grant agreements and the commissioner or the corporation determines, consistent with the purposes of the fund, that providing financial assistance from the proceeds of corporation bonds or notes would delay receipt of moneys from the federal government under the Federal Water Pollution Control Act.

The interest rate charged on any loan made by the corporation pursuant to this subdivision shall be no more than two-thirds of the market rate of interest otherwise applicable thereto, provided, however, that in the case of any municipality which has, during the period commencing on June first, nineteen hundred ninety-two and ending on September thirtieth, two thousand twenty-seven, (i) submitted an application for financial assistance in the form of a loan from the corporation pursuant to this subdivision, for an eligible project, which application has been accepted by the corporation, (ii) closed on such loan, and (iii) commenced construction of such eligible project, the interest rate charged on such loan shall be no more than one-half of the market rate otherwise applicable thereto.

9. The contracts for the construction of eligible projects constructed and financed pursuant to a project financing agreement shall be subject to the requirements and provisions of article 15-A of the executive law and, for such purposes, any such contract shall be considered a "state contract" and the department shall be the "contracting agency" for each such contract.

10. Notwithstanding the provisions of any other law, general, special or local, the following determinations shall be made by the corporation in its sole and absolute discretion:

(a) In connection with any application for financial assistance from

the fund in the form of a loan from the proceeds of bonds or notes of the corporation, the determination as to whether the municipality receiving such loan has qualified for an allocation of fifty percent of the principal amount of such loan outstanding at any time, pursuant to subdivision three of this section; and

(b) In connection with any application for financial assistance from the fund in the form of a loan from the corporation pursuant to subdivision eight of this section, where the municipality receiving such loan is not qualified for an interest rate of zero percent, the determination as to whether such municipality has qualified for an interest rate of one-half of the market rate otherwise applicable thereto, pursuant to subdivision eight of this section.

TITLE 21

NUTRIENT RUNOFF

Section 17-2101. Definitions.

17-2103. Sale or use of phosphorus fertilizer restricted.

17-2105. Local fertilizer regulation.

§ 17-2101. Definitions.

As used in this title:

1. "Compost" means the biologically stable humus-like material derived from composting or the aerobic, thermophilic decomposition of organic matter.

2. "Fertilizer" means the same as "specialty fertilizer" as defined in section one hundred forty-three of the agriculture and markets law.

3. "Lawn" or "non-agricultural turf" means any non-crop land area that is covered by any grass species. Lawn or non-agricultural turf does not mean flower or vegetable gardens, pasture, hayland, trees, shrubs, turf grown on turf farms, or any form of agricultural production.

4. "Phosphorus fertilizer" means fertilizer in which the available phosphate (P2O5) content is greater than 0.67 percent by weight, excluding compost.

§ 17-2103. Sale or use of phosphorus fertilizer restricted.

1. No person shall apply or authorize any person by way of service contract or other arrangement to apply in this state any phosphorus fertilizer on lawn or non-agricultural turf, except when:

(a) A soil test indicates that additional phosphorus is needed for growth of that lawn or non-agricultural turf; or

(b) The phosphorus fertilizer is used for newly established lawn or non-agricultural turf during the first growing season.

2. Any retailer selling or offering for sale phosphorus fertilizer for use on lawn or non-agricultural turf shall comply with the retail sale requirements in section one hundred forty-six-g of the agriculture and markets law related to display of phosphorus fertilizer and the posting of educational signs.

3. No person shall apply fertilizer to:

(a) lawn or non-agricultural turf between December first and April first, annually;

(b) any impervious surface including parking lots, roadways, and sidewalks. If such application occurs, the fertilizer must be immediately contained and either legally applied to lawn or non-agricultural turf or placed in an appropriate container; or

(c) any lawn or non-agricultural turf on any real property within twenty feet of any surface water, except that this restriction shall not apply where a continuous natural vegetative buffer, at least ten feet wide, separates an area of lawn or non-agricultural turf and surface water, and except that, where a spreader guard, deflector shield or drop spreader is used to apply fertilizer, such application may not occur within three feet of any surface water. This paragraph shall not apply to an application of fertilizer for newly established lawn or non-agricultural turf during the first growing season.

4. Nothing in this title shall impair or supersede the authority of the commissioner of agriculture and markets pursuant to articles ten and twenty-five-AA of the agriculture and markets law.

§ 17-2105. Local fertilizer regulation.

A local government may enact more stringent standards for the application of fertilizer for lawn and non-agricultural turf than established in this title, provided, however, that any local government that enacts such standards after January 1, 2011 must demonstrate to the department prior to enactment that additional or more stringent standards are necessary to address local water quality conditions.

ARTICLE 19

AIR POLLUTION CONTROL

Title 1. Short title; declarations of policy and purpose; definitions
3. Powers and duties
5. Procedure
7. Scope and construction
9. State acid deposition control act
11. Vehicle global warming index labels

TITLE 1

**SHORT TITLE; DECLARATIONS OF POLICY AND PURPOSE;
DEFINITIONS**

Section 19-0101. Short title.
19-0103. Declaration of policy.
19-0105. Declaration of purpose.
19-0107. Definitions.

§ 19-0101. Short title.

This article shall be known as the "Air Pollution Control Act".

§ 19-0103. Declaration of policy.

It is declared to be the policy of the state of New York to maintain a reasonable degree of purity of the air resources of the state, which shall be consistent with the public health and welfare and the public enjoyment thereof, the industrial development of the state, the propagation and protection of flora and fauna, and the protection of physical property and other resources, and to that end to require the use of all available practical and reasonable methods to prevent and control air pollution in the state of New York. It is further declared that this can be done most effectively by focusing on goals to be achieved by a maximum of cooperation among all parties concerned and that codes, rules and regulations established under the provisions of this article should be clearly premised upon scientific knowledge of causes as well as of effects.

§ 19-0105. Declaration of purpose.

It is the purpose of this article to safeguard the air resources of the state from pollution by: (1) controlling or abating air pollution which shall exist when this article shall be enacted and (2) preventing new air pollution, under a program which shall be consistent with the declaration of policy above stated and in accordance with the provisions of this article.

§ 19-0107. Definitions.

When used in this article:

1. "Person" means any individual, public or private corporation, political subdivision, agency, board, department or bureau of the state, municipality, partnership, association, firm, trust, estate or any other

legal entity whatsoever which is recognized by law as the subject of rights and duties.

2. "Air contaminant" means a dust, fume, gas, mist, odor, smoke, vapor, pollen, noise or any combination thereof.

3. "Air pollution" means the presence in the outdoor atmosphere of one or more air contaminants in quantities, of characteristics and of a duration which are injurious to human, plant or animal life or to property or which unreasonably interfere with the comfortable enjoyment of life and property throughout the state or throughout such areas of the state as shall be affected thereby; excluding however all conditions subject to the requirements of the Labor Law and Industrial Code.

4. "Air contamination" means the presence in the outdoor atmosphere of one or more air contaminants which contribute or which are likely to contribute to a condition of air pollution.

5. "Air contamination source" means any source at, from or by reason of which there is emitted into the atmosphere any air contaminant, regardless of who the person may be who owns or operates the building, premises or other property in, at or on which such source is located or the facility, equipment or other property by which the emission is caused or from which the emission comes. Without limiting the generality of the foregoing, this term includes all types of commercial and industrial plants and works, heating and power plants and stations, shops and stores; buildings and other structures of all types, including single and multiple family residences, apartment houses, office buildings, public buildings, hotels, restaurants, schools, hospitals, churches, and other institutional buildings; automobiles, trucks, tractors, buses and other motor vehicles (hereinafter called "motor vehicles"); garages; vending and service locations and stations; railroad locomotives; ships, boats and other waterborne craft; aircraft; portable fuel-burning equipment; incinerators of all types, indoor and outdoor; and refuse dumps and piles.

6. "Air cleaning installation" means any method, process or equipment

which removes, reduces or renders less noxious air contaminants discharged into the atmosphere.

7. "Area of the state" means any county, city, town, village, or other geographical area of the state as may be designated by the department.

8. "The Act" means the Federal Clean Air Act, 42 U.S.C. Section 7401 et seq., as amended by Public Law 101-549, November fifteenth, nineteen hundred ninety.

9. "Administrator" means the administrator of the United States environmental protection agency.

10. "Affected source" or "affected unit" shall have the meaning given to it in the regulations promulgated under Title IV of the Act.

11. "Clean alternative fuels" means fuels, for use in motor vehicles which meet the requirements of section 7511a(c)(4) of the Act.

12. "Clean fuel vehicle" means a vehicle in a class or category of vehicles which has been certified to meet, for any model year, the clean fuel vehicle standards for clean fuel vehicles specified in this article pursuant to section 7583 of the Act.

13. "Covered fleet" means ten or more motor vehicles which are owned or operated by a single person in an area designated as being a severe ozone non-attainment area by the administrator pursuant to Title I of the Act. In determining the number of motor vehicles owned or operated by a single person for the purposes of this article, all motor vehicles owned or operated, leased or otherwise controlled by such person, by any person who controls such person, by any person controlled by such person, and by any person under common control with such person shall be treated as owned by such person. The term "covered fleet" shall not include motor vehicles held for lease or rental to the general public, motor vehicles held for sale by motor vehicle dealers including demonstration vehicles, motor vehicles used for motor vehicle manufacturer product evaluations or tests, law enforcement and other

emergency vehicles, or non-road vehicles including farm and construction vehicles.

14. "Covered fleet vehicle" means only a motor vehicle which is (i) in a covered fleet which is centrally fueled or is capable of being centrally fueled and (ii) in a vehicle class for which standards are applicable under this article.

15. "Emission offset" or "offset" means emission reductions or emission reduction credits which are required to be obtained by an air contamination source in order to obtain approval for a permit to construct a new air contamination source, or modify an existing air contamination source, in a non-attainment area pursuant to Title I of the Act.

16. "Emission reduction" or "emission reduction credit" means the actual decrease in emissions of a regulated air contaminant in tons per year. Emission reductions may be created by, but not limited to, product, process, pollution control or housekeeping changes that:

- a. reduce emissions beyond that which is required by the Act;
- b. are real and actually occur;
- c. are quantifiable;
- d. are enforceable by the commissioner or the administrator; and
- e. are assured for the life of a corresponding increase.

17. "Fugitive emissions" means those emissions of regulated air contaminants which could not reasonably pass through a stack, chimney, vent or other functionally-equivalent openings.

18. "Operating permit" means a permit issued pursuant to section 19-0311 of this article.

19. "Major air contamination source" or "major stationary source" means any stationary source or any group of stationary sources located within a contiguous area and under common control and belonging to a single major industrial grouping that:

a. emits or has the potential to emit one hundred tons per year of any regulated air contaminant; or

b. emits or has the potential to emit ten tons per year of any air contaminant or twenty-five tons per year of any combination of air contaminants listed under section 7412(b) of the Act, including fugitive emissions of such contaminants, or lesser quantities as the administrator may establish pursuant to the Act; or

c. emits or has the potential to emit twenty-five tons per year of volatile organic compounds or oxides of nitrogen, including fugitive emissions of such contaminants if located in an area designated a "severe non-attainment area" pursuant to section 7511 of the Act; or

d. emits or has the potential to emit fifty tons per year of volatile organic compounds or one hundred tons of oxides of nitrogen if located in an ozone transport region pursuant to section 7511(c) of the Act.

Fugitive emissions from a stationary source must be considered in determining whether such stationary source is a major stationary source for permit requirements if the source belongs to one of the categories of stationary sources identified by the administrator in regulation pursuant to section 7602(j) of the Act.

20. "Major industrial grouping" means all activities belonging to the same major group identified in the Standard Industrial Classification Manual (1987) published by the United States department of commerce.

21. "Potential to emit" means the maximum capacity of a stationary source to emit any regulated air contaminant under its physical and operational design. Any physical or operational limitation on the capacity of such source to emit a regulated air contaminant, including

air pollution control equipment and restrictions on hours of operation or on the type or amount of material combusted, stored, or processed, shall be treated as part of its design if the limitation is enforceable by the commissioner and the administrator of the United States environmental protection agency provided, however, that physical or operational limitations enforceable by the commissioner shall be treated as part of a source's design, if the commissioner is given such authorization by the administrator.

22. "Regulated air contaminant" means the following:

a. oxides of nitrogen;

b. volatile organic compounds;

c. sulfur dioxide;

d. particulate;

e. carbon monoxide;

f. any class I or II substance subject to a standard promulgated pursuant to section 7671 of the Act;

g. any other air contaminant for which a national ambient air quality standard has been promulgated; or

h. any air contaminant that is regulated under section 7411 or 7412 (b) and (c) of the Act and which the commissioner has listed in regulation. The department may use emergency rulemaking pursuant to subdivision six of section two hundred two of the state administrative procedure act if necessary, in order to timely list such air contaminants.

23. "State implementation plan" or "SIP" means documents prepared by the department, and submitted to the administrator for approval, which identify actions and programs to be undertaken by the state and its

subdivisions to implement the Act.

24. "Stationary source" means any building, structure, facility or installation that emits or may emit any regulated air contaminant.

TITLE 3

POWERS AND DUTIES

- Section 19-0301. Powers and duties.
- 19-0302. Permits and certificates.
- 19-0303. Codes, rules and regulations.
- 19-0304. Burning of hazardous wastes.
- 19-0305. Commissioner; enforcement power.
- 19-0306. Municipal solid and regulated medical waste incineration facilities.
- 19-0306-a. Personal watercraft emissions regulations.
- 19-0306-b. Zero-emissions cars and trucks.
- 19-0307. Certificates of compliance for purposes of the Real Property Tax Law.
- 19-0309. Certificates of compliance for purposes of the Tax Law.
- 19-0311. Operating permit program for sources subject to federal Clean Air Act.
- 19-0312. Power plant emissions and performance standards.
- 19-0313. Small business stationary source technical and environmental compliance assistance program.
- 19-0315. Small business stationary source compliance advisory panel.
- 19-0317. Air program evaluation.
- 19-0319. Centrally fueled fleet program.
- 19-0320. Emissions inspections of heavy duty vehicles.
- 19-0321. Permits to construct and operate certain municipally sponsored major facilities.
- 19-0323. Use of ultra low sulfur diesel fuel and best available technology by the state.
- 19-0325. Sulfur reduction requirements.
- 19-0327. Bioheating fuel requirements.

- 19-0328. Ozone non-attainment fee programs.
- 19-0329. Certain fuel oil; prohibited.
- 19-0331. Moratorium on air permit issuance and renewal.

§ 19-0301. Powers and duties.

1. Consistent with the policy of the state as it is declared in section 19-0103, the department shall have power to:

a. Formulate, adopt and promulgate, amend and repeal codes and rules and regulations for preventing, controlling or prohibiting air pollution in such areas of the state as shall or may be affected by air pollution and to include in any such codes, rules or regulations a general provision for controlling air contamination including but not limited to a requirement that permits to construct and certificates to operate be obtained from the department, provided, however, that in exercising the provisions of this subdivision the department shall conform with the provisions of section 19-0303.

b. Include in any such codes and rules and regulations provisions establishing areas of the state and prescribing for such areas (1) the degree of air pollution or air contamination that may be permitted therein, (2) the extent to which air contaminants may be emitted to the air by any air contamination source, (3) standards for the composition of fuels offered for sale or use of fuels or energy sources in any type or class of air contamination source where the department finds that air contaminants from such type or class or source will probably otherwise be discharged in contravention of applicable emission standards or air quality standards, and (4) requirements and standards for the approval of plans or specifications for air cleaning installations.

c. Promulgate standards for crankcase ventilating systems and air contaminant emission control systems, in accordance with the Vehicle and Traffic Law.

d. Hold public hearings, conduct investigations, compel the attendance

of witnesses, receive such pertinent and relevant proof and do such other things as it may deem to be necessary, proper or desirable in order that it may effectively discharge its code, rule and regulation making duties and responsibilities under this article.

e. Except as otherwise required by the Act or regulations promulgated pursuant thereto by the administrator, formulate, adopt, and promulgate, amend and repeal codes, rules and regulations establishing an operating permit program in accordance with section 19-0311 of this title.

f. Delegate to the department of agriculture and markets the authority to test fuels for conformance with applicable standards and to enforce against violations of such standards.

2. It shall be the duty and responsibility of the department to:

a. Prepare and develop a general comprehensive plan for the control or abatement of existing air pollution and for the control or prevention of any new air pollution recognizing varying requirements for different areas of the state.

b. Encourage voluntary cooperation by all persons in controlling air pollution and air contamination, including but not limited to, educating the public about the health and environmental impacts of idling vehicles, such as air pollution from vehicle emissions, environmental impacts of carbon dioxide emissions and health risks associated with exposure to vehicle emissions. Such education shall, at a minimum, include developing and distributing educational materials and posting such information on the department's website.

c. Encourage the formulation and execution of plans by cooperative groups or associations of counties, cities, towns and villages, industries and others who severally or jointly are or may be the source of air pollution, for the prevention and abatement of pollution.

d. Cooperate with the appropriate agencies of the United States or other states or any interstate agencies or international agencies with

respect to the control of air pollution and air contamination, or for the formulation for the submission to the legislature of interstate air pollution control compacts or agreements.

e. Promulgate standards for the use of fuel or fuel additives for use in motor vehicles or motor vehicle engines, taking due recognition of federal standards and requirements.

3. a. The department is prohibited from adopting any rule, regulation or standard which would require the use or sale of any type of reformulated gasoline other than the federal reformulated gasoline that is certified by the administrator pursuant to section 7545(k) of the Act for sale and use in states other than California; provided, however, that nothing in this subdivision shall be deemed to limit the authority of the department to adopt a rule, regulation or standard for:

(1) fuel oxygen content or fuel volatility; or

(2) the composition of fuels necessary to implement section 7586 of the Act; or

(3) the composition of fuels necessary to implement section 7507 of the Act if such fuel standard is adopted and implemented regionally pursuant to agreement with any three states sharing a boundary with New York; or

(4) the composition of fuels if the commissioner finds that no other measures would bring about timely attainment or maintenance of a national primary or secondary ambient air quality standard for which New York state must file a state implementation plan pursuant to the Act, or that other existing and technically possible measures are unreasonably costly or impracticable and the commissioner has included such measure in the implementation plan pursuant to section 7410 of the Act.

b. No provision of this subdivision shall be deemed to authorize the use of methyl tertiary butyl ether as an oxygenate in any motor fuel imported into, or sold or offered for sale in this state.

4. Any final order or determination or other final action by the commissioner and the validity or reasonableness of any code, rule or regulation promulgated by the department pursuant to this article shall

be subject to review as provided in article seventy-eight of the civil practice law and rules; provided however, the department may establish by regulation a ninety day statute of limitations for review of final permit actions by the commissioner pursuant to section 19-0311 of this title, if required to maintain compliance with the Act.

5. The department shall certify emission reduction credits and establish an emission reduction credit registry. Such registry shall identify emission reduction credits, that are certified by, or used in, New York state. Prior to certifying credits, the department shall publish notice and provide the opportunity for public comment, pursuant to article seventy of this chapter, on the proposed modification of a source's permit to reflect that emission reductions will be certified as emission reduction credits. The department shall provide information regarding the availability of such certified emission reduction credits to any person upon request. The department shall, to the extent consistent with any rules or guidance related to emission offset requirements published by the administrator, adopt rules and regulations to provide for the use of mobile source emission reduction credits as a means of satisfying emission offset requirements pursuant to section 7503(c) of the Act. Such rules and regulations shall include provision for cooperating with the commissioner of motor vehicles pursuant to paragraph one of subdivision (d) of section 301 of the vehicle and traffic law.

§ 19-0302. Permits and certificates.

1. The rules and regulations adopted by the department to implement this article and the provisions of article 70 of this chapter and rules and regulations adopted thereunder and the provisions of the state administrative procedure act shall govern permit and certificate applications, renewals, modifications, suspensions and revocations under this article unless otherwise provided for in this article.

2. No permit issued pursuant to this article shall include performance, emission or control standards more stringent than any

established by the Act or by the United States environmental protection agency unless such standards are authorized by rules or regulations.

§ 19-0303. Codes, rules and regulations.

1. A code, rule or regulation or any amendment or repeal thereof shall not be adopted until after a public hearing within the area of the state concerned. Notice of such hearing shall be given at least sixty days prior to the scheduled date of the hearing by public advertisement of the date, time, place and purpose of such hearing. At such hearing, opportunity to be heard by the department with respect to the subject thereof shall be given to the public. A code, rule or regulation or an amendment or repeal thereof shall not become effective until thirty days after certified copies thereof shall have been filed with the secretary of state. Any person heard at such hearing shall be given written notice of the action of the department with respect to the subject thereof.

2. The code, rule and/or regulation or any amendment thereof which shall be adopted by the department may differ in its terms and provisions as between particular types and conditions of air pollution or of air contamination; as between particular air contamination sources; and as between particular areas of the state.

3. In exercising the power conferred upon it by section 19-0301 to formulate, adopt and promulgate, and to amend and repeal, codes and rules and regulations for preventing, controlling or prohibiting air pollution, the department shall give due recognition to the fact that the quantity or characteristics of air contaminants or the duration of their presence in the atmosphere, which may cause air pollution in one area of the state, may cause less air pollution or not cause any air pollution in another area of the state, and it shall take into consideration in this connection such factors, among others found by it to be proper and just, as existing physical conditions, zoning classifications, topography and prevailing wind directions and velocities and also the fact that a code, rule or regulation and the degree of conformance therewith which may be proper as to an essentially

residential area of the state may not be proper as to a highly developed industrial area of the state.

4. In adopting any code, rule or regulation which contains a requirement that is more stringent than the Act or regulations issued pursuant to the Act by the United States environmental protection agency, the commissioner shall, in addition to the provisions of section two hundred two-a of the state administrative procedure act, include in the regulatory impact statement:

(a) a detailed explanation of the reason or reasons that justify exceeding federal minimum requirements, including:

(i) satisfying any requirement of the Act as it relates to New York state, including any requirement for demonstrating attainment or maintenance of ambient air quality standards or meeting reasonable further progress pursuant to Title I of the Act;

(ii) preventing an assessment or imposition of sanctions, or the imposition of a federal implementation plan, pursuant to the Act;

(iii) complying with a final decree of a court; or

(iv) protecting public health or the environment;

(b) an evaluation of the cost-effectiveness of the proposed code, rule or regulation, in comparison with the cost-effectiveness of reasonably available alternatives; and

(c) a review of the reasonably available alternative measures considered by the commissioner and an explanation of the reasons for rejecting such alternatives.

5. The state, through its representatives on the interstate transport commission established pursuant to section 7506a of the Act, shall provide for public review of proposed recommendations for additional control measures and attainment strategies. Such public review will be effected by the governor's designee causing a notice of such proposed recommendations to be published in the Environmental Notice Bulletin. Such public review may be conducted concurrently with any public review required pursuant to the Act.

§ 19-0304. Burning of hazardous wastes.

1. Any person applying for a permit to burn hazardous waste pursuant to the department's rules and regulations shall be subject to the requirements of this section.

For the purposes of this section, all burning of hazardous wastes shall be subject to the provisions of this section, including combustion for the recovery of the thermal value of such wastes.

As used in this section, the term "hazardous waste" shall have the same meaning as provided in subdivision three of section 27-0901 of this chapter except that it shall not include wastes classified as hazardous wastes solely because they are ignitable.

2. Prior to the issuance of such permit the commissioner may require the applicant to submit a trial burn plan. The trial burn plan shall include but need not be limited to those items among the following which the commissioner determines to be necessary:

a. An analysis of the waste or mixture of wastes to be burned;

b. An engineering description of the incinerator, process, or combustion installation for which the permit is being sought;

c. A test protocol, including but not limited to the following for each waste type:

(1) identification of waste type,

(2) waste feed rate,

(3) combustion air rate,

(4) combustion chamber temperature,

(5) gas residence time in combustion chamber,

(6) identification of actual and if used, surrogate principal organic hazardous constituents (hereinafter referred to as "POHC") selected from the list in appendix VIII of Part 261 of Title 40 code of Federal Regulations,

(7) feed rate of actual POHC and if used, surrogate POHC,

(8) type and feed rate of auxiliary fuel,

- (9) anticipated identification and flow rate of fuel products,
- (10) estimated combustion efficiency and POHC destruction and removal efficiency,
- (11) methods of waste sampling and analysis,
- (12) methods of stack sampling and analysis;

d. Procedures for rapidly stopping waste feed, shutting down the incinerator, process, or combustion installation, and controlling the emissions in the event of an equipment malfunction;

e. Such other information as the commissioner reasonably finds necessary to determine whether approval of the trial burn plan will ensure compliance with applicable performance standards.

3. The commissioner shall approve a trial burn plan if he finds that:

a. The trial burn will not present an imminent hazard to human health or the environment;

b. The trial burn is likely to determine whether the incinerator, process or combustion installation meet applicable performance standards.

If the trial burn plan is not approved by the commissioner, he shall state in writing the reasons for such disapproval to the applicant. If the trial burn plan is approved by the commissioner, the owner/operator shall only be required to perform a trial burn in accordance with the approved trial burn plan. Notwithstanding the foregoing limitation, the department may require a modification of the trial burn plan pursuant to a written finding by the commissioner that such a modification is required to protect the public health or the environment. Stack tests shall be performed according to procedures established by the commissioner to determine waste destruction and removal efficiency. The commissioner may conduct tests to insure that trace levels of toxic air contaminants are within acceptable limits.

4. After any approved trial burn, the applicant shall submit to the

commissioner a certification that the trial burn has been carried out in accordance with the trial burn plan. This report shall be made within sixty days of the trial burn. In addition, after each approved trial burn, the applicant must furnish such information and data as required by the commissioner pursuant to the approved trial burn plan.

5. The commissioner must either approve or disapprove the application for an activity that includes the burning of hazardous wastes. If the commissioner approves such application, the permit must specify the operating conditions which must be met in burning such wastes. Such permit must also specify the waste types described in the approved trial burn plan. If it is necessary for the permittee to seek a modification of the permit deemed significant by the department with respect to the burning of hazardous waste or wastes, the commissioner may require a new trial burn plan for the department's review.

6. If the commissioner disapproves such application he must notify the applicant in writing of the reasons for such disapproval.

7. At a minimum, the owner or operator must continuously monitor the combustion temperature, waste feed rate and combustion air rate when burning hazardous wastes or use another system, subject to the approval of the commissioner which provides at least equal assurance of on line efficiency.

The commissioner shall require the owner or operator to periodically inspect the incinerator, process, or combustion installation and associated equipment to ensure that combustion efficiency is maintained. The owner or operator must also inspect the alarm system and emergency shut down controls at least every month, or as required by the commissioner.

8. The commissioner, authorized officers or employees of the department may enter any facility with an incinerator, process, or combustion installation at any reasonable time, after proper notification and identification, to conduct an inspection of the installation and any records maintained pursuant to the permit.

9. The commissioner may accept a previously conducted stack test in lieu of a trial burn plan and associated stack tests required under this section.

§ 19-0305. Commissioner; enforcement power.

1. The commissioner is hereby authorized to enforce the codes, rules and regulations of the department established in accordance with this article.

2. In addition to the powers otherwise granted under this article, and in accordance with the policies of department, the commissioner shall have power to:

a. Enter and inspect any property, premise or place and stop, detain and inspect any motor vehicle for the purpose of investigating either an actual or suspected source of air pollution or air contamination or for the purpose of ascertaining compliance or noncompliance with any code, rule or regulation which may be promulgated under this article. Any information relating to secret processes, or methods of manufacture, or production obtained in the course of the inspection or investigation shall be kept confidential, provided that the quantity and physical and chemical characteristics of actual and allowable air contaminant emissions shall be considered public information. If samples of air or air contaminants are taken for analysis during any inspection made on the premises of a person who is suspected of causing air pollution or air contamination or during the inspection of a motor vehicle, a duplicate of the analytical report shall be furnished promptly to such person or the owner of such motor vehicle.

b. Conduct or cause to be conducted studies and research with respect to air pollution control, abatement or prevention.

c. Conduct and supervise programs of air pollution control education including the preparation and distribution of information relating to

air pollution control.

d. Determine by means of field studies and sampling the degree of air pollution in New York state.

e. Provide advisory technical consultation services to local communities.

f. Develop and conduct demonstration programs in cooperation with local communities.

g. Promote the establishment of local laboratory facilities including essential instrumentation.

h. Provide facilities and staff for training personnel of local communities in the principles of air sanitation.

i. Serve as the agent of the state for the receipt of monies from the federal government or other public or private agencies and to expend such monies after appropriation thereof for the purpose of air pollution control studies or research.

j. Consider for approval or disapproval applications for permits and certificates including plans or specifications for air contamination sources and air cleaning installations or any part thereof submitted consistent with the rules of the department, and inspect the installation for compliance with the plans or specifications; provided that in the case of a major steam electric generating facility, as defined in former section one hundred forty of the public service law, for which a certificate is required pursuant to the former article eight of the public service law, or a major electric generating facility as defined in section one hundred sixty of the public service law, for which a certificate is required pursuant to article ten of the public service law, such approval functions may be performed by the state board on electric generation siting and the environment, as defined in the public service law, pursuant to federally delegated or approved environmental permitting authority, and such inspection functions shall

be performed by the department. Nothing herein shall limit the authority of the department of health and the department to monitor the environmental and health impacts resulting from the operation of such major steam electric generating facility and to enforce applicable provisions of the public health law and this chapter and the terms and conditions of the certificate governing the environmental and health impacts resulting from such operation.

k. Approve types of crankcase ventilating systems and air contaminant emission control systems pursuant to standards promulgated by the department, in accordance with the Vehicle and Traffic Law.

l. Do such other things as he may deem necessary, proper or desirable in order that he may enforce codes, rules or regulations which have been promulgated under this article.

§ 19-0306. Municipal solid and regulated medical waste incineration facilities.

1. Definitions. When used in this section:

a. "Municipal solid waste incineration facility" means a facility that is owned, operated, or utilized by, or under contract with, a municipality or political subdivision and which utilizes high temperature thermal destruction technologies, including combustion for the recovery of thermal value or for the disposal of municipal solid waste.

b. "Solid waste" means any materials or substances discarded or rejected as being spent, useless, worthless, or in excess to the owner at the time of such discharge or rejection, except sewage and other highly diluted water carried materials or substances and those in gaseous form.

c. "Regulated medical waste incineration facility" means an incinerator which is operated or utilized for the disposal or treatment

of regulated medical waste, as defined in title 15 of article 27 of this chapter and which may utilize high temperature thermal destruction technologies, including combustion for the recovery of thermal value.

2. Within thirty days of the effective date of this section and pursuant to the state administrative procedure act, the commissioner shall, in consultation with the commissioner of health, propose final draft operating requirements for emissions of air contaminants from municipal solid waste incineration facilities. Such operating requirements shall be effective and shall apply to municipal solid waste incineration facilities for which a permit to construct has been issued and final engineering drawings have been accepted by the commissioner after one hundred twenty days after such operating requirements have been formally promulgated. Such operating requirements shall govern the operation and management of such facilities with respect to air contamination, and shall include but not be limited to provisions for:

a. Maintenance of a minimum incineration temperature and the means and location at which such temperature shall be measured;

b. Residence or exposure time for incineration;

c. Appropriate levels of control for acid gas, sulfur dioxide, oxides of nitrogen, and hydrochloric acid with regard to the following:

(i) the level of protection provided the public health and environment;

(ii) the likely or potential reductions of acid gas emissions from a separate, nearby source of such emissions as a result of a proposed facility becoming operational;

(iii) the likely economic impact of such controls due to associated capital and operating costs, and in relation to alternative solid waste management options, including landfilling; and

(iv) the appropriateness of reduced or modified levels of such controls for smaller facilities;

d. Combustion efficiency;

e. Monitoring of emissions for toxic air contaminants, or surrogates thereof where appropriate, to determine compliance with permit emission limits twice within the first eighteen months of operation and once each within the next two eighteen month intervals and subsequently at the discretion of the commissioner, and following any detection of permit violations in a manner to be determined by the commissioner;

f. Continuous monitoring for oxygen, carbon monoxide, carbon dioxide, opacity and temperature;

g. Sampling and testing of the combined ash and dust residue at least annually to determine appropriate disposition or disposal based on relative toxicity; provided, however, that separate testing of ash and dust shall be required if they are not mixed prior to disposal.

3. The department shall undertake further investigation of appropriate cooling methods for achieving the condensation and collection of air contaminants and of the necessity for, and appropriate means of, regulating fine particulates. Upon such investigation, the commissioner shall issue a report on his findings and may promulgate appropriate regulations.

4. The department shall, in promulgating any new or revised rule or regulation, accompany such rule making with an environmental impact statement or a written assessment stating the extent to or means by which such rule or regulation will prevent, control or prohibit air pollution.

5. Operating requirements established pursuant to this section for municipal incineration facilities shall be embodied in rules and regulations of the department promulgated in accordance with the state administrative procedure act.

6. On or before the effective date of this subdivision, the commissioner shall, in consultation with the commissioner of health, promulgate proposed operating requirements for the emission of air contaminants from regulated medical waste incineration facilities. Such

operating requirements shall, where appropriate, be consistent with the provisions of this section provided, however, that the commissioner shall require such facilities to employ the best available control technologies. Such operating requirements shall be effective and shall apply to all regulated medical waste incineration facilities, for which an operating permit has been issued, ninety days after such operating requirements have been formally promulgated pursuant to the state administrative procedure act provided, however, that where regulated medical waste incineration facilities are owned by health care facilities licensed pursuant to article twenty-eight of the public health law and in operation by permit of the department on or before September first, nineteen hundred eighty-seven, then such standards shall become effective as to such facilities on January first, nineteen hundred ninety-two.

7. Each person who operates a facility for the incineration of regulated medical waste shall report to the commissioner on the volume and sources of regulated medical waste that it incinerated on-site during the six months next following the effective date of this subdivision. Such report shall be the same as or similar to the report required to be filed with the administrator. The commissioner is authorized to require reports pursuant to this subdivision at least annually thereafter.

§ 19-0306-a. Personal watercraft emissions regulations.

1. Pursuant to The Federal Clean Air Act, 42 U.S.C. section 7543 (e)(2)(b) as amended by Public Law 101-549, November fifteenth, nineteen hundred ninety, within one year from the effective date of this section, the commissioner shall adopt regulations which are consistent with the California air emissions reduction and labeling regulations for new spark ignition marine engines for use in personal watercraft. Such regulations shall apply to every new personal watercraft that is manufactured for sale or offered for sale in New York. The commissioner shall review and revise such regulations annually in order to retain their consistency with the California air emissions and labeling

regulations for spark ignition marine engines.

2. For purposes of this section, the term "personal watercraft" shall have the same meaning as in subdivision thirty of section two of the navigation law.

§ 19-0306-b. Zero-emissions cars and trucks.

1. It shall be a goal of the state that one hundred percent of new passenger cars and trucks offered for sale or lease, or sold, or leased, for registration in the state shall be zero-emissions by two thousand thirty-five. It shall be a further goal of the state that one hundred percent of medium-duty and heavy-duty vehicles offered for sale or lease, or sold, or leased, for registration in the state be zero-emissions by two thousand forty-five for all operations where feasible. It shall be further a goal of the state to transition to one hundred percent zero-emissions from new off-road vehicles and equipment purchased beginning in two thousand thirty-five, where feasible.

2. The department, to the extent consistent with federal law, shall develop and propose:

a. Passenger vehicle and truck regulations requiring increasing volumes of new zero-emissions vehicles offered for sale or lease, or sold, or leased, for registration in the state towards the target of one hundred percent of in-state sales by two thousand thirty-five.

b. Medium-duty and heavy-duty vehicle regulations requiring increasing volumes of new zero-emissions trucks and buses offered for sale or lease, or sold, or leased, for registration and operated in the state towards the target of one hundred percent of the fleet transitioning to zero-emissions vehicles by two thousand forty-five everywhere feasible.

c. Strategies, in coordination with other state agencies, other states and the federal environmental protection agency, to achieve one hundred percent zero-emissions from new off-road vehicles and equipment

operations in the state by two thousand thirty-five. In implementing the provisions of this paragraph, the department shall act consistently with safety, technological feasibility and cost-effectiveness.

3. The New York state energy research and development authority, in consultation with the department, the department of economic development, the public service commission, the department of transportation, the department of motor vehicles, and other state agencies, local agencies and other interested parties, shall develop a zero-emissions vehicle market development strategy by January thirty-first, two thousand twenty-three, and an update every three years thereafter, that:

a. Ensures coordinated and expeditious implementation of the system of policies, programs and regulations necessary to achieve the goals and orders established by this section.

b. Outlines state agencies' actions to support new and used zero-emissions vehicle markets for broad accessibility for all residents of this state.

4. The department, the New York state energy research and development authority, the public service commission and other state agencies, shall use existing authorities to accelerate deployment of affordable powering options for zero-emissions vehicles, in ways that serve all communities and particularly low-income and disadvantaged communities, consistent with state and federal law.

5. The department, the New York state energy research and development authority, the department of motor vehicles and the department of transportation, in consultation with the other state agencies, shall on or before July fifteenth, two thousand twenty-three, identify near term actions and investment strategies to improve sustainable transportation, freight and transit options, including where feasible:

a. Supporting bicycle and pedestrian options, particularly in low-income and disadvantaged communities in the state, by incorporating

safe and accessible infrastructure into projects where appropriate.

b. Supporting light, medium, and heavy-duty zero-emissions vehicles and infrastructure as part of larger transportation projects, where appropriate.

§ 19-0307. Certificates of compliance for purposes of the Real Property Tax Law.

1. For the purposes of section 481 of the Real Property Tax Law, the commissioner or his designated representative is hereby authorized to issue certificates of compliance concerning air pollution control facilities and air pollution controlled process facilities as defined in such law. No such certificate shall be issued unless the facility to which it is applicable is in compliance with applicable provisions of titles 1 to 11, inclusive, and title 19 of article 17, article 19, and title 1 of article 27 of this chapter; of the Public Health Law; of the state sanitary code and of codes, rules, regulations, permits or orders issued pursuant thereto.

2. In the case of facilities which have not been completed prior to the close of a taxable status date with respect to which an exemption may be claimed under the Real Property Tax Law, a temporary certificate of compliance may be issued if the commissioner or his representative is satisfied, on the basis of the construction which has taken place, that such facilities, when completed, will be in compliance with the provisions of titles 1 to 11, inclusive, and title 19 of article 17, article 19, and title 1 of article 27 of this chapter; of the Public Health Law, of the state sanitary code, and codes, rules, regulations, permits or orders issued pursuant thereto. Such a temporary certificate shall apply only to taxes levied as of the taxable status date with respect to which such a certificate is issued.

3. The certificate of compliance may be revoked by the commissioner, after providing an opportunity to be heard, upon a determination that the facility to which it was applicable either is not, or has not been,

in compliance with applicable provisions of this chapter, the state sanitary code or codes, rules, regulations, permits or orders issued pursuant thereto. Upon revocation, the commissioner shall notify the commissioner of taxation and finance and the assessor of the appropriate county, city, town or village.

§ 19-0309. Certificates of compliance for purposes of the Tax Law.

1. For the purposes of sections 208, 210, 606 and 612 of the Tax Law, the commissioner or his designated representative is hereby authorized to issue certificates of compliance concerning air pollution control facilities and air pollution controlled process facilities as defined in such law. No such certificate shall be issued unless the facility to which it is applicable is in compliance with applicable provisions of titles 1 to 11, inclusive, and title 19 of article 17, article 19, and title 1 of article 27 of this chapter; of the Public Health Law; of the state sanitary code and of codes, rules, regulations, permits or orders issued pursuant thereto.

2. In the case of facilities which have not been completed prior to the close of a taxable year for which a deduction may be claimed under the Tax Law, a temporary certificate of compliance may be issued if the commissioner or his representative is satisfied, on the basis of the construction which has taken place, that such facilities, when completed, will be in compliance with the provisions of titles 1 to 11, inclusive, and title 19 of article 17, article 19, and title 1 of article 27 of this chapter; of the Public Health Law; of the state sanitary code, and codes, rules, regulations, permits or orders issued pursuant thereto. Such a temporary certificate shall apply only to expenditures made in the taxable year with respect to which such a certificate is issued.

3. The certificate of compliance may be revoked by the commissioner, after providing an opportunity to be heard, upon a determination that the facility to which it was applicable either is not, or has not been, in compliance with applicable provisions of this chapter, the state

sanitary code or codes, rules, regulations, permits or orders issued pursuant thereto. Upon revocation, the commissioner shall notify the State Tax Commission.

§ 19-0311. Operating permit program for sources subject to federal Clean Air Act.

1. The department shall establish an operating permit program for sources subject to Title V of the Act. Upon approval of such program by the administrator, the following sources of regulated air contaminants, hereinafter referred to as "sources", shall obtain an operating permit pursuant to this section:

a. major stationary sources;

b. any source, including an area source, subject to a standard, limitation or other requirement under section 7412 of the Act, except that a source is not required to obtain an operating permit pursuant to this section solely because it is subject to regulation under section 7412(r) of the Act;

c. sources subject to a standard, limitation or other requirement under section 7411 of the Act;

d. affected sources pursuant to Title IV of the Act; and

e. any source in a source category designated by the commissioner in regulation, which shall be the same as the list of sources promulgated by the administrator pursuant to the Act.

2. In implementing this section, the department shall:

a. review and revise, as necessary to be consistent with the Act and other applicable federal and state laws, existing regulations to provide for adequate, streamlined and reasonable procedures for processing permit applications, for public notice and participation, including

offering an opportunity for public comment and hearing, and for expeditious review of permit actions, including applications, renewals and revisions;

b. notwithstanding the provisions of paragraph i of this subdivision, establish regulations for a phased schedule for acting on complete permit applications. Such schedule shall ensure that at least one-third of such permits shall be acted upon by the department annually over a period of three years after the administrator approves the operating permit program;

c. promulgate regulations, consistent with the Act and other applicable federal and state laws, for expeditiously determining whether an application for a permit is complete. Such regulations shall specify that, in order to be deemed complete, an application shall include:

(i) source identification information;

(ii) a description of the source's processes and products by Standard Industrial Classification Code, including any associated with alternate scenarios identified by the source;

(iii) an identification and description of emissions and emission points, including rates of such emissions in sufficient detail to establish the basis for the fees and applicability of requirements of the Act;

(iv) an identification of pollution control activities and compliance monitoring devices or activities;

(v) any limitations on operations or any work practice standards;

(vi) any calculations on which the information provided to the department is based;

(vii) citation and description of all applicable requirements in state and federal law;

(viii) a description of or reference to any applicable test method for determining compliance with applicable requirements;

(ix) information determined necessary by the department to define alternative operating scenarios identified by the permit applicant;

(x) compliance plans;

(xi) schedules of compliance;

(xii) schedules for submission of certified progress reports;

- (xiii) a compliance certification;
- (xiv) completed forms as required under Title IV of the Act;
- (xv) certification by a responsible official that the information submitted is true, accurate and complete; and
- (xvi) any other information required by the Act or other applicable federal or state laws and implementing regulations. Provided, however, that applications for permit revisions need contain such information only to the extent required by the Act or regulations promulgated thereunder.

d. determine, consistent with subdivision 3 of section 70-0117 of this chapter, whether an application is complete within sixty days of receipt, provided that if the department does not make such determination within sixty days, the application is deemed complete. If the department deems the application to be incomplete, the department must, consistent with subdivision 1 of section 70-0109 of this chapter, provide a written explanation of any deficiencies found in the application;

e. provide for issuance, after notice and opportunity for public comment, of a general permit covering numerous similar sources for purposes of complying with Title V of the Act or this article. Such regulations shall ensure that the general permit complies with all requirements applicable under the Act and this chapter and identified criteria by which sources may qualify for such general permit. Notwithstanding subdivision five of this section, the source shall be subject to enforcement action for operation without a permit if the source is determined not to qualify for the conditions and terms of the general permit. Such regulations shall require that any source proposing to operate pursuant to a general permit shall request such permit in writing, and the department shall respond to such request in writing within sixty days;

f. provide that a single permit will be issued for each source, except upon request of a source. In no case shall the determination of whether a source is subject to the requirement to obtain an operating permit pursuant to this section be affected by the application for or issuance

of more than one operating permit for that source. In no case shall a source which has been issued multiple permits be allowed to make minor modifications which, in the aggregate, would be a significant modification if the source had been issued a single permit, unless such source complies with all of the requirements for a significant modification;

g. provide for issuance of a single permit authorizing emissions from similar operations at multiple temporary locations, provided that such permit shall not be issued unless it includes conditions that will ensure compliance with the requirements of this chapter and the Act at all authorized locations and unless it requires the owner or operator to notify the department in advance of each change in location;

h. establish provisions for notifying each state which is within fifty miles of a source that has submitted an application for an operating permit. Such notifications shall be consistent with section 7661d of the Act and Article 70 of this chapter and the state administrative procedure act;

i. take final action on a permit application within eighteen months after the date of receipt of a complete application. Notwithstanding any other provision of law, in the event the department fails to act on a complete permit application or a complete permit renewal application within eighteen months, such failure shall be treated as a final agency action solely for the purpose of judicial review; and

j. require revisions to a permit to incorporate applicable requirements under the Act or state law if the remaining permit term is three years or more. If the permit term is three years or more or if the permit has been extended pursuant to paragraph b of subdivision five of this section, such revision shall be completed not later than eighteen months after promulgation of the applicable requirement.

k. provide an exemption from regulation with respect to volatile organic compounds for any bakery facility which (i) derives at least fifty percent of its revenues from retail sales on premises, or (ii)

utilizes only batch ovens in its baking process. A "batch oven" shall be defined as a non-conveyor belt oven operating on a single baking cycle in which a determinate amount of product is cooked at one baking.

3. Operating permits issued pursuant to this section shall include the following conditions:

a. emissions limitations or standards including standards established by the Act and this article, and references to the origin of and authority for each term and condition;

b. provisions for a fixed permit term, not to exceed five years, unless a shorter term is requested by the source or the department determines a shorter term is appropriate, except if a different term is required to comply with the Act;

c. provisions for detailed monitoring, recordkeeping and reporting, including requirements that records be kept for five years, and that monitoring records be submitted to the department at least every six months, provided, however, that, unless required by the Act, continuous emissions monitoring need not be required if alternative methods are available that provide sufficiently reliable and timely information for determining compliance;

d. A prohibition on emissions in excess of any allowances held by an affected source under Title IV of the Act;

e. terms and conditions, if requested by the source, for the trading of emissions increases and decreases within a facility, to the extent applicable requirements provide for such trading;

f. provisions for alternative operating scenarios where a source identifies such scenarios in its permit application for department approval, and where such scenarios are approved by the department;

g. provisions for emergencies beyond the control of the source; notwithstanding section 71-2109 of this chapter, an "emergency" shall

mean any situation arising from sudden and reasonably unforeseeable events beyond the control of the source, which situation requires immediate corrective action to restore normal operation and which causes the source to exceed a technology-based emission limitation under the permit, due to unavoidable increases in emissions attributable to the emergency. An emergency shall not include noncompliance to the extent caused by improperly designed equipment, lack of preventative maintenance, careless or improper operation, or operator error;

h. identification of the terms of the permit that are federally enforceable;

i. provisions for inspection, entry, monitoring, compliance certification and reporting to assure compliance with the permit terms and conditions;

j. unless inconsistent with the Act, provisions for confidentiality of proprietary information pursuant to subdivision two of section eighty-seven of the public officers law, and regulations promulgated thereunder;

k. provisions to allow an existing source to voluntarily make early reduction(s) in hazardous air pollutants, pursuant to section 7412(I) (5) of the Act, and provisions to establish emissions standards for hazardous air pollutants on a case-by-case basis pursuant to section 7412(d), (g) and (j) of the Act in the event the administrator fails to meet the deadlines established pursuant to section 7412(e) of the Act for the promulgation of such standards applicable to a source or source category;

l. provisions that no existing source that has installed best available control technology (as defined in section 7479(3) of the Act), or technology required to meet a lowest achievable emission rate (as defined in section 7501 of the Act), prior to the promulgation of a standard applicable to such source under section 7412(d) and (j) for the same pollutant (or stream of pollutants) shall be required to comply with such standard under this section until the date five years after

the date on which such installation or reduction has been achieved, as determined by the department;

m. provision for a severability clause to ensure the continued validity of the various permit conditions in the event of a challenge to any portion of a permit;

n. provisions to allow that, for any performance or emission standard or other requirement established for a source prior to the issuance of an operating permit, such permit may contain a compliance schedule requiring the source to achieve compliance as soon as practicable but not later than the time required by the Act or this article or regulations promulgated thereunder;

o. provisions requiring compliance with all conditions of the permit, and requiring that noncompliance be grounds for enforcement action; for permit termination, revocation and reissuance, or revision; or for denial of a permit renewal application;

p. provisions allowing for changes within a source without requiring a permit revision provided that such changes are not modifications under Title I of the Act and the changes do not exceed the emissions allowable under the permit; provided, however, that the source must provide the department with written notification at least seven days in advance of the proposed changes;

q. provisions specifying the conditions under which the permit may be reopened and revised prior to the expiration, as prescribed by regulation, and providing that reopenings shall not be initiated before a notice of such intent is provided to the source by the department at least thirty days in advance of the date that the permit is to be reopened, except that the department may provide a shorter time period in the case of an emergency; and

r. other conditions necessary to assure compliance with the Act and other applicable federal and state laws and implementing regulations.

4. a. The department shall provide adequate, streamlined, and reasonable procedures for expeditiously processing applications for minor permit modifications, as defined in regulations. Minor modifications may include those that:

(i) do not violate any applicable requirement of this article or the Act;

(ii) do not involve significant changes to existing monitoring, reporting, or recordkeeping requirements in the permit;

(iii) do not require or change a case-by-case determination of an emission limitation or standard, or a source specific determination for temporary sources of ambient impacts, or a visibility or increment analysis;

(iv) do not seek to establish or change a permit term or condition for which there is no corresponding underlying applicable requirement and that the source has assumed to avoid an applicable requirement to which the source would otherwise be subject to, including but not limited to federally enforceable emissions caps assumed to avoid classification as a modification under any provision of Title I or emissions limitations approved pursuant to section 7412(i)(5) of the Act; or

(v) do not constitute a modification under Title I of the Act.

b. Upon application by a source for a minor permit modification, the department shall determine whether such application is complete within fifteen days after receipt of such application and whether such proposed modification is minor within twenty-five days after receipt of such application. The department may require public notice of such application and the department's determination of whether the modification is minor. If such modification is deemed minor, the source may proceed with the modification. The department shall approve or deny a minor permit modification within ninety days of the receipt of an application under this subdivision or fifteen days after the end of the administrator's forty-five day review period pursuant to section 7661d(b)(1) of the Act, whichever is later, unless such modification is treated as a new application. The provisions of subdivision five of this section are not applicable to minor modifications until the source receives the final approval from the department.

5. a. The department shall include in a permit issued pursuant to this section a provision stating that compliance with the conditions of the permit shall be deemed compliance with the applicable requirements of the Act as of the date of permit issuance, provided that:

(i) such applicable requirements are specifically identified in the permit; or

(ii) the department, in acting on the permit application or revision, determines in writing that other requirements specifically identified are not applicable to the source, and the permit includes the determination or a concise summary thereof. Provided further that nothing herein shall preclude the department from revising or revoking the permit pursuant to article seventy of this chapter or from exercising its summary abatement authority under sections 71-0301 or 71-1719 of this chapter.

b. Consistent with section four hundred one of the state administrative procedure act, the terms and conditions of a permit are automatically continued pending final determination by the department on a request for renewal or initial application for an operating permit, provided a permittee has made a timely and complete application and paid the fees pursuant to section 72-0303 of this chapter.

§ 19-0312. Power plant emissions and performance standards.

1. Definitions. As used in this section:

a. "Mercury" means elemental, oxidized, and particle-bound mercury in source emissions.

b. "Major electric generating facility" means any electricity generating facility with a nameplate capacity of twenty-five thousand kilowatts or more.

2. Any major electric generating facility shall demonstrate compliance with all applicable emission requirements established by the department for the purpose of complying with all state and federal air quality

requirements, including requirements for Sulfur Dioxide, Nitrogen Oxides, Mercury, Carbon Dioxide and particulate matter of less than 2.5 microns. Such facility must also comply with other applicable department air quality requirements relating to offsetting of emissions.

3. No later than twelve months after the effective date of this section, the commissioner shall promulgate rules and regulations targeting reductions in emissions of carbon dioxide that would apply to major electric generating facilities that commenced construction after the effective date of the regulations.

§ 19-0313. Small business stationary source technical and environmental compliance assistance program.

1. The commissioner is hereby authorized and directed to establish, develop and implement a small business stationary source technical and environmental compliance assistance program for those categories of sources of air contamination identified in section 7661f(c) of the Act or any other category of source the commissioner deems appropriate. The commissioner, after consultation with the administrator of the United States environmental protection agency, the administrator of the United States small business administration, the small business stationary source compliance advisory panel and the small business stationary source ombudsman created pursuant to section one hundred thirty-seven of the economic development law, and after providing notice and opportunity for public hearing, may exclude from the program any category or subcategory of sources identified in section 7661f(c) of the Act that the commissioner determines to have sufficient technical and financial capabilities to meet the requirements of the Act without such assistance. The department may designate eligibility for assistance based on whether the stationary source has sufficient technical and financial capabilities to comply with federal and state law without such assistance. Such program shall include:

a. the development, collection and coordination of information concerning compliance methods and technologies for stationary sources of

air pollution, and programs to encourage lawful cooperation among such sources and other persons to further comply with the provisions of this article;

b. adequate mechanisms for assisting small business stationary sources with pollution prevention and accidental release detection and prevention, including providing information concerning alternative technologies, process changes and products and methods of operation that help reduce air pollution;

c. the provision of assistance for small business stationary sources in: (i) determining applicable requirements of the Act and this article and rules and regulations promulgated pursuant thereto; and (ii) submitting complete permit applications consistent with the provisions of section 19-0311 of this title, and receiving permits issued by the department in a timely and efficient manner;

d. adequate mechanisms to assure that small business stationary sources receive notice of their rights under the Act and this article and rules and regulations promulgated pursuant thereto in such a manner and form as to assure reasonably adequate time for such sources to evaluate compliance methods and any relevant or applicable proposed or final regulation or standard or state implementation plan revision issued pursuant to the Act;

e. adequate mechanisms for informing small business stationary sources of their obligations under this article and the Act, including establishing mechanisms for referring these sources to qualified auditors, or at the department's option upon the request of the small business stationary source, for providing audits of the operations of such sources to determine compliance with the Act and this article and rules and regulations promulgated pursuant thereto;

f. procedures for consideration of, and response to, requests from small business stationary sources for technical and environmental compliance assistance including, but not limited to: (i) assistance in the modification of any work practice and the identification of

affordable alternative technologies or technological improvements to achieve compliance with or to establish compliance procedures pursuant to the Act or this article and rules and regulations promulgated pursuant thereto; (ii) the establishment of a schedule of milestones for implementing such work practice or method of compliance preceding any applicable compliance date, based on the technology and financial capability of such small business stationary source; and (iii) on-site consultations, if requested by a small business stationary source, regarding achievement of compliance. No modification may be recommended unless it is in compliance with the applicable requirements of the Act, including applicable requirements of the state implementation plan. Where applicable requirements are set forth in federal or state regulations, only those modifications authorized in such regulations may be made;

g. procedures for soliciting input from and exchanging information with the small business stationary source ombudsman created pursuant to section one hundred thirty-seven of the economic development law, regarding compliance requirements for small business stationary sources;

h. adequate mechanisms for the collection and dissemination of information to small business stationary sources, including: (i) the development of small business stationary source guidance manuals indicating the categories of small businesses subject to the requirements of this article and the Act, specific compliance requirements and options, a schedule of compliance deadlines and other pertinent information; and (ii) the establishment of a toll-free telephone number dedicated to answering questions involving small business stationary source compliance;

i. procedures for assuring the confidentiality of information received from small business stationary sources;

j. the identification of individuals and firms with a distinctive competence in areas related to business compliance with environmental laws, rules and regulations, and a demonstrated ability to serve small businesses, for the purpose of referring small business stationary

sources with identified needs to consultants with relevant expertise;
and

k. the provision of information on state-sponsored programs offering financial or technical assistance and on funding available from private lenders to stationary sources and aid such sources in applying for financial assistance or funding.

2. In developing the small business stationary source technical and environmental compliance assistance program the department may contract with either the environmental facilities corporation or any other person the commissioner deems appropriate to carry out any or all of the provisions of this section.

3. In developing and implementing the small business stationary source technical and environmental compliance assistance program as required pursuant to subdivision one of this section, the department shall consult with the small business stationary source compliance advisory panel as created pursuant to section 19-0315 of this title and the small business stationary source ombudsman as created pursuant to section one hundred thirty-seven of the economic development law.

4. The provisions of article six of the public officers law shall not apply to records containing information supplied by small business stationary sources to the environmental facilities corporation pursuant to this section.

§ 19-0315. Small business stationary source compliance advisory panel.

1. There is hereby established a small business stationary source compliance advisory panel which shall have the responsibility to:

a. provide guidance to the department on the development of the small business stationary source technical and environmental compliance assistance program;

b. render advisory opinions concerning the effectiveness of the small business stationary source technical and environmental compliance assistance program, including the adequacy of funding available to the program, difficulties encountered, and degree and severity of enforcement;

c. make periodic reports to the commissioner and the administrator of the United States environmental protection agency concerning the compliance of the small business stationary source technical and environmental compliance assistance program with the requirements of the federal paperwork reduction act, 42 U.S.C. § 3501 et seq.; the regulatory flexibility act, 42 U.S.C. § 601 et seq.; and the equal access to justice act, 5 U.S.C. § 504;

d. review information for small business stationary sources to assure that such information is understandable by the layperson;

e. review and advise the department on the development of rules and regulations, the state implementation plan as it affects small business stationary sources, and other programs affecting small business stationary sources implemented by the department pursuant to the Act; and

f. make recommendations for the development of programs to further assist small business stationary sources, including technical and financial assistance programs.

2. The small business stationary source compliance advisory panel shall consist of nine members who shall be appointed no later than November fifteenth, nineteen hundred ninety-three. The panel shall consist of:

a. two persons, who are not owners or representatives of owners of small business stationary sources, selected by the governor to represent the general public;

b. six persons who are owners or who represent owners of small

business stationary sources, two selected by the president pro tem of the senate, two selected by the speaker of the assembly, one selected by the minority leader of the senate and one selected by the minority leader of the assembly; and

c. one person selected by the commissioner to represent the department.

3. The panel shall meet at least quarterly and shall designate one of its members, other than the commissioner's representative, to serve as chairperson. Members of the panel shall serve for terms of three years from the date of their appointment, except that the members appointed by the commissioner shall serve at the pleasure of the commissioner. Members shall serve without compensation, except that they shall be allowed their actual and necessary expenses incurred in the performance of their duties pursuant to this section.

4. The department or its designee shall serve as the secretariat for the panel for development and dissemination of reports and advisory opinions.

§ 19-0317. Air program evaluation.

Within eighteen months after the effective date of this section, and biennially thereafter, the department shall, in coordination with the department of economic development, prepare and submit to the governor and the legislature a report evaluating the programs proposed or adopted to implement the Act. The evaluation shall include:

1. an identification of the specific measures taken to implement the Act, and progress made toward meeting emission reductions required by the Act;

2. recommendations on any additional measures which must be taken if the state is not meeting emission reductions required by the Act;

3. an evaluation of the resources available to implement the programs required by the Act and whether those resources are sufficient;

4. an analysis of the costs of measures taken to implement the Act, including costs imposed directly and indirectly on mobile sources, stationary sources, consumers and businesses. The analysis shall also identify the benefits of compliance with the Act;

5. an analysis of the adequacy of measures taken to assist small business stationary sources in complying with the Act;

6. an identification and status of any non-compliance notifications received from the United States environmental protection agency;

7. a summary of any significant new regulations or guidance prepared by the United States environmental protection agency; and

8. an identification of any regulation or guidance expected from the United States environmental protection agency necessary for the state to implement provisions of the Act, and the effect of any past due rule or guidance on the state's compliance efforts.

§ 19-0319. Centrally fueled fleet program.

1. The department shall develop a centrally fueled fleet program for light duty and heavy duty vehicles, as specified in subdivision (b) of section 7586 of the Act, unless the department has adopted a substitute program or programs for the centrally fueled fleet program, provided that the substitute program meets the criteria set forth in section 7511a(c)(4)(B) of the Act for administrator approval of such program.

2. Such centrally fueled fleet program shall be developed in consultation with fleet operators, vehicle manufacturers, fuel producers and distributors, and other interested parties taking into account operational range, specialty uses, vehicle and fuel availability, costs, safety, resale value of vehicles and equipment and other relevant

factors.

3. Such centrally fueled fleet program shall contain provisions requiring that at least a specified percentage of all new covered fleet vehicles in model year nineteen hundred ninety-eight and thereafter purchased by each covered fleet operator shall be clean fuel vehicles and shall use clean alternative fuels when operating in the covered areas. For the applicable model years (MY) and vehicle types the specified percentages shall be no less than the percentages specified in the following table:

CLEAN FUEL VEHICLE PHASE-IN REQUIREMENTS FOR FLEETS

Vehicle Type

	MY1998	MY1999	MY2000
Light-duty trucks up to 6000 lbs.			
GVWR & light-duty vehicles	30%	50%	70%
Heavy-duty trucks above			
8,500 lbs. GVWR	50%	50%	50%

4. Such centrally fueled fleet program shall also provide that the choice of clean fueled vehicles and clean alternative fuels shall be made by the covered fleet operator subject to the requirements of this section.

5. Such centrally fueled fleet program shall require fuel providers to make clean alternative fuel available to covered fleet operators at locations at which covered fleets are centrally fueled.

§ 19-0320. Emissions inspections of heavy duty vehicles.

1. When used in this section:

a. "Heavy duty vehicle" means any vehicle powered by diesel fuel and having a gross vehicle weight of greater than eight thousand five hundred pounds, except that those vehicles defined in sections one hundred one, subparagraph two of paragraph E and subparagraph (a) of paragraph F of subdivision seven of section four hundred one of the

vehicle and traffic law, and vehicles specified in subdivision thirteen of section four hundred one of the vehicle and traffic law, and farm type tractors and all terrain type vehicles used exclusively for agricultural or mowing purposes, or for snow plowing, other than for hire, farm equipment, including self-propelled machines used exclusively in growing, harvesting or handling farm produce, and self-propelled caterpillar or crawler-type equipment while being operated on the contract site, and timber harvesting equipment such as harvesters, wood chippers, forwarders, log skidders, and other processing equipment used exclusively off highway for timber harvesting and logging purposes, shall not be deemed heavy duty vehicles for purposes of this section.

b. "Roadside program" means a roadside examination program conducted pursuant to the heavy duty vehicle emissions reduction act for the inspection of emissions and emission control equipment, at any public or quasi-public location as designated by the commissioner of transportation with the concurrence of the department and, where appropriate, the New York state thruway authority.

c. "Annual inspection program" means a program in which heavy duty vehicles registered or required to be registered in counties in the state designated as being in serious, severe or extreme non-attainment of the National Ambient Air Quality Standard for ozone pursuant to the 1990 amendments of the federal Clean Air Act (42 U.S.C. 7511) are annually inspected in accordance with this article.

2. The department, jointly with the departments of motor vehicles and transportation, shall develop a program for the inspection of emissions from heavy duty vehicles. Such inspection program shall consist of an annual inspection program and a roadside program. The annual inspection program developed in accordance with this section shall be limited to heavy duty vehicles registered or required to be registered in counties in the state designated as being in serious, severe or extreme non-attainment of the National Ambient Air Quality Standard for ozone pursuant to the 1990 amendments of the federal Clean Air Act (42 U.S.C. 7511). Under no circumstances shall such program require heavy duty vehicles to meet emission standards more stringent than the new vehicle

emission standards to which such vehicles were certified pursuant to the federal Clean Air Act. The department shall, with the department of transportation and, where appropriate, the New York state thruway authority, jointly develop criteria for roadside program site selection and procedures for the control of traffic and operation of such sites.

3. The department, jointly with the departments of motor vehicles and transportation, shall adopt rules and regulations establishing test standards, method, and equipment for the period of effectiveness of this section. The department shall adopt such rules and regulations and implement such program by June first, nineteen hundred ninety-nine. The department shall consider establishing a hardship waiver based on an evaluation of fleet size and cost of effective repair, and shall consider exempting from the roadside inspection vehicles that successfully pass an annual inspection as approved by the commissioner.

4. Notwithstanding the provisions of title twenty-one of article seventy-one of this chapter, operation of a heavy duty vehicle which, when tested, exceeds emission levels set forth in regulations promulgated pursuant to this section shall be a violation, and the following penalties shall apply to any violation found as a result of roadside emissions inspections:

- a. First violation: \$ 700.00
- Second and subsequent violations: \$1300.00.

b. The penalties set forth in paragraph a of this subdivision shall be reduced to one hundred fifty dollars for the first violation and five hundred dollars for the second and subsequent violations by the court or administrative tribunal before which the summons or appearance ticket is returnable if the violation set forth in the summons or appearance ticket is corrected not later than thirty days after the issuance of the summons or appearance ticket and proof of such correction, as defined in paragraph c of this subdivision, is submitted to the court or administrative tribunal. The penalties described in this section shall not apply to vehicles defined by section one hundred forty-two of the vehicle and traffic law or owned by a county, town, city, or village for

a first violation provided the vehicle is repaired within thirty days of ticket issuance.

c. Acceptable proof of repair or adjustment shall be submitted to the court or administrative tribunal on or before the return date of the summons or appearance ticket in a form and manner prescribed by regulations adopted pursuant to this section.

5. Notwithstanding the provisions of title twenty-one of article seventy-one of this chapter, operation of any heavy duty vehicle registered or required to be registered in this state without a certificate of inspection resulting from an annual inspection as required by regulations adopted pursuant to this section shall be a violation, and the following violation structure shall apply to such violations:

- a. First violation: \$ 700.00
- Second and subsequent violations: \$1300.00.

b. The penalties defined in paragraph a of this subdivision shall be reduced to three hundred fifty dollars for the first violation and seven hundred fifty dollars for second and subsequent violations, provided that the vehicle in question bears a certificate which was valid within the last thirty days. The penalties described in this section shall not apply to vehicles defined by section one hundred forty-two or owned by a county, town, city, or village of the vehicle and traffic law for a first violation provided the vehicle is repaired within thirty days of ticket issuance.

6. Vehicles found in violation of applicable emission standards implemented pursuant to this program shall not be subject to impoundment or otherwise prevented from engaging in commerce as a result of this program.

6-a. Notwithstanding the provisions of this section, no penalty shall be imposed pursuant to this section where the operator of such vehicle has been convicted of the same violation arising from the same incident

pursuant to section three hundred one-b of the vehicle and traffic law.

7. The department shall, to the extent practicable, coordinate with appropriate agencies in the states in the northeast ozone transport region and which have proposed or adopted heavy duty emission inspection programs to promote regional consistency in such programs.

§ 19-0321. Permits to construct and operate certain municipally sponsored major facilities.

1. For the purposes of this section only:

a. "Major facility" means an air contamination source which directly emits, or has the potential to emit, twenty-five tons per year of either oxides of nitrogen or volatile organic compounds.

b. "Municipally sponsored facility" means a facility for which a city with a population of one million or more or a political subdivision or agency thereof was an applicant or co-applicant as of November fifteenth, nineteen hundred ninety-two.

c. "Emission offset" means an emission reduction credit, as established by the commissioner, required to be obtained from a severe nonattainment area by an air contamination source prior to the issuance of a permit to construct, at a ratio of 1.3 tons of reductions for each ton of new emissions of oxides of nitrogen and volatile organic compounds; provided that the emission offset requirement for oxides of nitrogen may be met by oxides of nitrogen or an equivalent number of tons of volatile organic compounds.

2. The provisions of this section shall apply only to permits to construct and operate issued on or after November fifteenth, nineteen hundred ninety-two for a municipally sponsored major facility located in a city with a population of more than one million for which the permit application was deemed complete by the department before November fifteenth, nineteen hundred ninety-two.

3. No permit to construct shall be issued or shall be valid for a new or modified major facility until after the applicant has obtained emission offsets for such facility. For purposes of this section, in addition to any other available emission offsets, emission reductions from the following sources shall be eligible as emission offsets:

a. emission reductions that result from the closure or modification of any solid waste incineration facilities within such city which were operating in nineteen hundred ninety-one; and

b. emission reductions that result from the cessation of operation, removal or sealing of any refuse burning equipment in such city pursuant to any local law which took effect in nineteen hundred ninety-three.

Provided, that the commissioner shall have authority to establish the amount of credit attributed to any emission reduction used to create an emission offset to satisfy the requirements of this section.

4. Prior to the operation of a facility which as been issued a permit to which subdivision three of this section applies, such city shall conduct a base-line health study on a statistically representative sample of residents within the areas most affected by the facility. No later than one hundred eighty days after the commencement of operation of such facility, the city shall, in conjunction with the department, conduct stack tests of the facility and assess the health risks from expose to such emissions; such stack tests shall be performed in accordance with the department's rules and the results of such assessment shall be delivered to the department within thirty days after completion of the health risk assessment report for appropriate action. After operation of such facility is commenced, such city shall implement a follow-up health study that monitors on a regular basis the health impacts from such facility with an emphasis on at-risk populations. Such study and monitoring shall be conducted in consultation with an advisory committee appointed by the commissioner of health which shall include representatives of the parties to the permit proceeding for such facility. Such study and monitoring shall be designed to avoid

duplication of efforts otherwise required by permit or by law.

5. Notwithstanding the provisions of subdivision two of this section, any action deemed to have a significant impact on the environment pursuant to article eight of this chapter, if such action involves a municipally sponsored facility within a three-mile radius of a permitted facility for which emission offsets were required pursuant to this section, shall require an environmental impact statement which shall include an analysis of the cumulative air impacts of such action in conjunction with other actions involving facilities that have been constructed or are planned within such three-mile radius.

§ 19-0323. Use of ultra low sulfur diesel fuel and best available technology by the state.

1. As used in this section, the terms:

a. "Ultra low sulfur diesel fuel" means diesel fuel having sulfur content of 0.0015 per cent of sulfur or less.

b. "Heavy duty vehicle" or "vehicle" means any on and off-road vehicle powered by diesel fuel and having a gross vehicle weight of greater than 8,500 pounds, except that those vehicles defined in section 101 of the vehicle and traffic law, paragraph 2 of schedule E and paragraph (a) of schedule F of subdivision 7 of section 401 of such law, and vehicles specified in subdivision 13 of section 401 of such law, and farm type tractors and all terrain type vehicles used exclusively for agricultural or mowing purposes, or for snow plowing, other than for hire, farm equipment, including self-propelled machines used exclusively in growing, harvesting or handling farm produce, and self-propelled caterpillar or crawler-type equipment while being operated on the contract site, and timber harvesting equipment such as harvesters, wood chippers, forwarders, log skidders, and other processing equipment used exclusively off highway for timber harvesting and logging purposes, shall not be deemed heavy duty vehicles for purposes of this section. This term shall not include vehicles that are specially equipped for

emergency response by the department, office of emergency management, sheriff's office of the department of finance, police department or fire department.

c. "Best available retrofit technology" means technology, verified by the United States environmental protection agency for reducing the emission of pollutants that achieves reductions in particulate matter emissions at the highest classification level for diesel emission control strategies that is applicable to the particular engine and application. Such technology shall also, at a reasonable cost, achieve the greatest reduction in emissions of nitrogen oxides at such particulate matter reduction level and shall in no event result in a net increase in the emissions of either particulate matter or nitrogen oxides.

d. "Reasonable cost" means that such technology does not cost greater than 30 percent more than other technology applicable to the particular engine and application that falls within the same classification level for diesel emission control strategies, as set forth in paragraph c of this subdivision, when considering the cost of the strategies, themselves, and the cost of installation.

2. Any diesel powered heavy duty vehicle that is owned by, operated by or on behalf of, or leased by a state agency and state and regional public authority shall be powered by ultra low sulfur diesel fuel.

3. Any diesel powered heavy duty vehicle that is owned by, operated by or on behalf of, or leased by a state agency and state and regional public authority with more than half of its governing body appointed by the governor shall utilize the best available retrofit technology for reducing the emission of pollutants. The commissioner shall promulgate regulations for the implementation of this subdivision specifying that all vehicles covered by this subdivision shall have best available retrofit technology on or before December 31, 2019.

This subdivision shall not apply to any vehicle subject to a lease or public works contract entered into or renewed prior to the effective

date of this section.

4. In addition to other provisions for regulations in this section, the commissioner shall promulgate regulations as necessary and appropriate to carry out the provisions of this act including but not limited to provision for waivers upon written finding by the commissioner that (a) best available retrofit technology for reducing the emissions of pollutants as required by subdivision 3 of this section is not available for a particular vehicle or class of vehicles and (b) that ultra low sulfur diesel fuel is not available.

5. In addition to any waiver which may be issued pursuant to subdivision four of this section, the department shall issue a waiver to a state agency, a state or regional public authority, or a person operating any diesel-powered heavy duty vehicle on behalf of a state agency, state or regional public authority, upon a request in a form acceptable to the department for a waiver from the provisions of subdivision three of this section for a vehicle engine provided that such vehicle engine will cease to be used in the state on or before December thirty-first, two thousand twenty. Any waiver issued pursuant to this subdivision shall expire when a state agency, a state or regional public authority, or a person operating any diesel-powered heavy duty vehicle on behalf of a state agency, state or regional public authority ceases to use the engine in the state but not later than December thirty-first, two thousand twenty.

6. This section shall not apply where federal law or funding precludes the state from imposing the requirements of this section.

7. On or before January 1, 2008 and every year thereafter, the commissioner shall report to the governor and legislature on the use of ultra low sulfur diesel fuel. On or before January 1, 2020 and every year thereafter, the commissioner shall include in the report to the governor and legislature the use of the best available retrofit technology as required under this section. The information contained in this report shall include, but not be limited to, for each state agency and public authority covered by this section: (a) the total number of

diesel fuel-powered motor vehicles owned or operated by such agency and authority; (b) the number of such motor vehicles that were powered by ultra low sulfur diesel fuel; (c) the total number of diesel fuel-powered motor vehicles owned or operated by such agency and authority having a gross vehicle weight rating of more than 8,500 pounds; (d) the number of such motor vehicles that utilized the best available retrofit technology, including a breakdown by motor vehicle model, engine year and the type of technology used for each vehicle; (e) the number of such motor vehicles that are equipped with an engine certified to the applicable 2007 United States environmental protection agency standard for particulate matter as set forth in section 86.007-11 of title 40 of the code of federal regulations or to any subsequent United States environmental protection agency standard for particulate matter that is at least as stringent; and (f) all waivers, findings, and renewals of such findings, which, for each waiver, shall include, but not be limited to, the quantity of diesel fuel needed to power diesel fuel-powered motor vehicles owned or operated by such agency and authority; specific information concerning the availability of ultra low sulfur diesel fuel.

8. The department shall, to the extent practicable, coordinate with regions which have proposed or adopted heavy duty emission inspection programs to promote regional consistency in such programs.

§ 19-0325. Sulfur reduction requirements.

(1) On or after July first, two thousand twelve, all number two heating oil sold for use in residential, commercial, or industrial heating within the state shall not have a sulfur content greater than fifteen parts per million.

(2) The governor may, by issuing an executive order, temporarily suspend the applicability of this section at any time based on the governor's determination, after consulting with the New York energy research and development authority, that meeting the requirement of subdivision one of this section is not feasible due to lack of adequate supply of the required fuel.

§ 19-0327. Bioheating fuel requirements.

(1) Definitions. For the purpose of this section, the following terms shall have the following meanings:

(a) "Biodiesel" shall mean a fuel, designated B100, that meets the requirements of the ASTM international specification D6751.

(b) "Renewable Hydrocarbon Diesel" shall mean a North American-produced fuel derived from vegetable oils, animal fats, and other renewable feedstocks that meet the requirements of ASTM international specification D975. Renewable hydrocarbon shall not include any fuel from co-processed biomass with a feedstock that is not biomass.

(c) "Bioheating fuel" shall mean a fuel comprised of biodiesel blended with petroleum heating oil that meets the requirements of the ASTM international specification D396, a fuel comprised of domestically-produced renewable hydrocarbon diesel with petroleum heating oil that meets the specifications of ASTM international specification D975, or other specifications as determined by the commissioner.

(d) "Heating oil" shall mean petroleum oil refined for the purpose of use as fuel for combustion in a space and/or water heating system that meets the requirements of the ATSM international specification D396 or other specifications as determined by the commissioner.

(e) "Feedstock" shall mean soybean oil, oil from annual cover crops, algal oil, biogenic waste oils, fats or greases, or non-food grade corn oil, provided that the commissioner may, by rules and regulations, modify the definition of feedstock based on the vegetable oils, animal fats or cellulosic biomass listed in table 1 of 40 C.F.R. § 80.1426.

(2) On and after July first, two thousand eighteen, all heating oil sold for use in any building within the counties of Nassau, Suffolk and Westchester shall be bioheating fuel that contains at least five percent biodiesel.

(3) On or after July first, two thousand twenty-two, all heating oil sold for use in any building within the state shall be bioheating fuel that contains at least five percent biodiesel.

(4) On or after July first, two thousand twenty-five, all heating oil sold for use in any building within the state shall be bioheating fuel

that contains at least ten percent biodiesel.

(5) On or after July first, two thousand thirty, all heating oil sold for use in any building within the state shall be bioheating fuel that contains at least twenty percent biodiesel.

(6) The minimum content requirements of this section shall not apply to kerosene.

(7) The governor may, by issuing an executive order, temporarily suspend the applicability of this section at any time based on the governor's determination, after consulting with the New York state energy research and development authority and the department, that meeting the requirement of subdivision two of this section is not feasible due to lack of adequate supply of biodiesel or that meeting the requirement would result in financial hardship to consumers.

(8) The requirements of this section shall not: (a) prohibit the sale and use of bioheating fuel with the same or any greater percentage of biodiesel blended with heating oil, or the sale and use of one hundred percent biodiesel, for space and/or water heating purposes in the state; and (b) preempt any laws of the city of New York with respect to mandated percentage levels of biodiesel blends with heating oil provided that such laws require the same or greater percentage of biodiesel blended with heating oil as required by this section.

(9) No bioheating fuel shall be sold to a customer that would void the manufacturer's warranty for that burner or boiler type unless the bioheat provider warranties in writing to the customer that the use of such bioheating fuel will be covered to the extent and time limits of the warranty then covering such burner or boiler.

§ 19-0328. Ozone non-attainment fee programs.

1. The department may implement new or revise existing regulatory or permitting fee programs only to the extent necessary to comply with section 7511d of the Act related to the non-attainment of national ambient air quality standards.

2. Fees imposed pursuant to subdivision one of this section shall be calculated in the manner set forth in the Act.

3. The department shall further establish by rule or rules additional procedures to the extent necessary for assessment of and collection of such fees that shall ensure sufficient notice, fee amounts and compliance information are given to affected parties.

4. Moneys received pursuant to this section shall be deposited in the air quality improvement fund as established in section ninety-nine-rr of the state finance law.

§ 19-0329. Certain fuel oil; prohibited.

1. On and after July first, two thousand twenty-three, no fuel oil, grade number six, as classified by ASTM International D396-15c, shall be used for the purpose of providing heat for any building or facility in the state.

2. Nothing in this section shall prevent a municipality from adopting a law, code, ordinance or regulation which is more stringent than the requirements of this section.

§ 19-0331. Moratorium on air permit issuance and renewal.

1. For the period commencing on the effective date of this section and ending two years after such date, the department, after consultation with the department of public service, shall not approve a new application for or issue a new permit pursuant to this article, or article seventy of this chapter, for an electric generating facility that utilizes a carbon-based fuel and that provides, in whole or in part, behind-the-meter electric energy consumed or utilized by cryptocurrency mining operations that use proof-of-work authentication methods to validate blockchain transactions.

2. For the period commencing on the effective date of this section and ending two years after such date, the department shall not approve an

application to renew an existing permit or issue a renewal permit pursuant to this article for an electric generating facility that utilizes a carbon-based fuel and that provides, in whole or in part, behind-the-meter electric energy consumed or utilized by a cryptocurrency mining operation that uses proof-of-work authentication methods to validate blockchain transactions if the renewal application seeks to increase or will allow or result in an increase in the amount of electric energy consumed or utilized by a cryptocurrency mining operation that uses proof-of-work authentication methods to validate blockchain transactions.

TITLE 5 PROCEDURE

Section 19-0501. Notice of hearing; service of process.

19-0503. Complaints; investigation.

19-0505. Notice of violation and public hearing.

19-0507. Conduct of hearing.

19-0509. Order or determination; burdens of proof.

19-0511. Review by the courts.

§ 19-0501. Notice of hearing; service of process.

1. Notices of every public hearing held pursuant to the provisions of this article shall specify the time, date, place and purpose of the hearing.

2. Service of all processes of the commissioner pursuant to the provisions of this article, except subpoenas, shall be made in the same manner as a summons in a civil action or by registered mail upon any person to whom it is addressed, upon the mayor or counsel of a municipality or upon an officer of a district, authority, commission, private corporation or company, as the case may be.

3. Subpoenas issued pursuant to the provisions of this article shall be served upon a prospective witness personally and at the same time he

shall be paid such fees therefor as may be provided by law.

§ 19-0503. Complaints; investigation.

In case any written complaint shall be filed with the commissioner and he shall have cause to believe, or in case the commissioner himself shall have cause to believe, that any person is violating any code, rule or regulation, which was promulgated by the department pursuant to this article, the commissioner shall cause a prompt investigation thereof to be made.

§ 19-0505. Notice of violation and public hearing.

Whenever it shall appear to the commissioner that there has been a violation of any code, rule or regulation of the department promulgated pursuant to this article, the commissioner shall cause to have issued and served upon the alleged violator a written notice, which shall specify the provision of the code, rule or regulation of which such person is said to be in violation, a statement of the manner in, and of the extent to which, such person is said to violate it, and the order which the commissioner proposes to issue, and shall require such person to answer the charges of such complaint at a public hearing before the commissioner at a time not less than fifteen days after the date of notice. The commissioner may modify the proposed order following the hearing or upon the consent of the alleged violator. The alleged violator may, at any time, waive such right to a public hearing.

§ 19-0507. Conduct of hearing.

1. The respondent to such complaint may file a written answer thereto at least three days prior to the hearing and may appear at such hearing in person or by representative, with or without counsel, and may submit testimony, or may do both.

2. The hearing may be held before the commissioner or a representative designated by the commissioner.

3. The commissioner or his delegate shall have power to subpoena and compel the attendance of witnesses and the production for examination of any book or paper relating to the matter under investigation. The commissioner or his delegate at the request of any respondent to a complaint made pursuant to this article shall subpoena and compel the attendance of such witnesses and shall require the production for examination of any such book or paper relating to the matter under investigation as the respondent may reasonably designate.

4. In the case of contumacy or refusal to obey a subpoena, the supreme court shall have jurisdiction upon the application of the commissioner or his delegate to issue an order requiring such person to appear and testify or produce evidence as the case may require. Any failure to obey such an order may be judged by the court as contempt thereof.

5. The testimony taken at the hearing before the commissioner or his delegate shall be under oath and recorded, stenographically or otherwise.

§ 19-0509. Order or determination; burdens of proof.

1. After due consideration of the written and oral statements, the testimony and arguments that shall be submitted under the provisions of section 19-0507 or, upon default in appearance of the respondent on the return day which shall be specified in the notice given as provided in section 19-0505 the commissioner may issue and enter such final order, or make such final determination as he shall deem appropriate under the circumstances, and he shall notify the respondent thereof in writing by registered mail.

2. Any such order may require immediate cessation of any activity in contravention of such codes, rules and regulations.

3. In connection with determining the appropriate remedy, the commissioner shall consider evidence received at such hearing relating to the adequacy and practicability of various means of complying with such codes, rules and regulations and the financial ability of the respondent so to comply. If the commissioner finds that immediate compliance would be impossible or impracticable either because no adequate or practical means of compliance is known or because of financial inability, his order shall establish the reasonable time or times within which the required steps, both intermediate and final, are to be taken. The burden of proving impossibility, impracticability or financial inability shall be upon the person claiming the same.

4. As to all other issues in proceedings before the commissioner or his designee with respect to any alleged violation of any code, rule or regulation which shall have been promulgated by the department pursuant to this article, the burden of proof shall be upon the commissioner.

§ 19-0511. Review by the courts.

1. Any final order or determination or other final action by the commissioner and the validity or reasonableness of any code, rule or regulation promulgated by the department pursuant to this article shall be subject to review as provided in article 78 of the Civil Practice Law and Rules.

2. When a review in accordance with article 78 of the Civil Practice Law and Rules is not maintainable, either because the person aggrieved was not a party to the original proceedings in which the order or determination or other action which is sought to be reviewed was made or taken, or for any other reason, the order or determination of the commissioner and the validity or reasonableness of any code, rule or regulation of the department promulgated pursuant to this article may nevertheless be reviewed as hereinafter provided:

a. Application for relief from any code, rule or regulation of the department or from any determination or order or other action which

shall have been made or taken by the commissioner or by any person acting in the name of the department or commissioner shall be made by special proceeding. The petition shall be verified and shall set forth the code, rule or regulation or the determination or order or other action of the department or commissioner or the part thereof which the petitioner shall claim to be unreasonable or prejudicial to him and shall specify the grounds therefor. Such petition may be accompanied by affidavits or other written proof and shall demand the relief to which the petitioner alleges he is entitled, in the alternative or otherwise. Such petition may be made by any one or more persons jointly or severally who shall be aggrieved by any such code, rule or regulation or any such determination, order or act whether or not such petitioner is or was a party to the proceeding in which such code, rule or regulation was adopted by the department or in which such determination or order or action was made or taken by the commissioner.

b. A proceeding brought under the provisions of this subdivision must be instituted by service of the petition and notices of application for relief within two months after the action of the department or commissioner which is sought to be reviewed shall become final and binding upon the petitioner or the person whom he represents either in law or in fact; or, with the permission of the supreme court granted within two years in case the petitioner or the person whom he represented at the time such action became final and binding upon the petitioner or such person was under the age of twenty-one years, or mentally ill, or imprisoned on a criminal charge, or had been sentenced for a term of less than life.

c. In all other respects the procedure prescribed in subdivision 1 of this section shall be applicable to a review provided for in this subdivision.

TITLE 7

SCOPE AND CONSTRUCTION

Section 19-0701. Application of article.

19-0703. Existing rights and remedies.

19-0705. Persons other than the state shall not acquire actionable rights.

19-0707. Conflicting laws.

19-0709. Local laws, ordinances and regulations.

19-0711. Separability clause.

§ 19-0701. Application of article.

The provisions of this article shall apply to all areas of the state.

§ 19-0703. Existing rights and remedies.

It is the purpose of this article to provide additional and cumulative remedies to prevent and abate air pollution and air contamination. Nothing in this article contained shall abridge or alter rights of action or remedies now or hereafter existing, nor shall any provision of this article or anything done by virtue of this article be construed as estopping individuals, counties, cities, towns or villages or the state from the exercise of their respective rights to suppress nuisances or to prevent or abate air pollution or air contamination.

§ 19-0705. Persons other than the state shall not acquire actionable rights.

The basis for proceedings or other actions that shall result from violations of any code, rule or regulation which shall be promulgated by the department pursuant to this article shall inure solely to and shall be for the benefit of the people of the state generally and it is not intended to create in any way new or enlarged rights or to enlarge existing rights. A determination by the commissioner that air pollution or air contamination exists or that any code, rule or regulation has been disregarded or violated, whether or not a proceeding or action may be brought by the state, shall not create by reason thereof any presumption of law or finding of fact which shall inure to or be for the

benefit of any person other than the state.

§ 19-0707. Conflicting laws.

This article shall not be construed as repealing any of the laws relating to air pollution or air contamination which are not by this article expressly repealed, but it shall be held and construed to be as ancillary to and supplementing the laws now in force, excepting as they may be in direct conflict with this article.

§ 19-0709. Local laws, ordinances and regulations.

Any local laws, ordinances or regulations of any governing body of a county, city, town or village which are not inconsistent with this article or with any code, rule or regulation which shall be promulgated pursuant to this article shall not be superseded by it, and nothing in this article or in any code, rule or regulation which shall be promulgated pursuant to this article shall preclude the right of any governing body of a county, city, town or village to adopt local laws, ordinances or regulations which are not inconsistent with this article or with any code, rule or regulation which shall be promulgated pursuant to this article provided, however, that the exercise of such right by a county shall relate only to the area thereof outside any city, village or area of any town outside the village or villages therein during such time as such city, village or town has local laws, ordinances or regulations consistent with this article or with any code, rule or regulation which shall be promulgated pursuant to this article. Any local laws, ordinances or regulations of a county, city, town or village which comply with at least the minimum applicable requirements set forth in any code, rule or regulation promulgated pursuant to this article shall be deemed consistent with this article or with any such code, rule or regulation.

§ 19-0711. Separability clause.

If any clause, sentence, paragraph, section or part of this article shall be adjudged by any court of competent jurisdiction to be invalid, the judgment shall not affect, impair or invalidate the remainder of this article but shall be confined in its operation to the clause, sentence, paragraph, section or part of this article that shall be directly involved in the controversy in which such judgment shall have been rendered.

TITLE 9

STATE ACID DEPOSITION CONTROL ACT

Section 19-0901. Short title.

19-0903. Definitions.

19-0905. Applicability.

19-0907. Sulfur deposition control program.

19-0909. Interim control target.

19-0911. Final control target.

19-0913. Nitrogen deposition control program.

19-0915. Emission offsets or credits.

19-0919. General powers.

19-0921. Enforcement.

19-0923. Severability.

§ 19-0901. Short title.

This title may be cited as the "State Acid Deposition Control Act".

§ 19-0903. Definitions.

As used in this title:

1. "Acid deposition" means the wet or dry deposition from the atmosphere of chemical compounds, usually in the form of rain or snow, having the potential to form an aqueous compound with a pH level lower

than the level considered normal under natural conditions, or lower than 5.6, whichever is less.

2. "Acid deposition precursor" means sulfur dioxide or oxides of nitrogen.

3. "Best available control technology" means an emission limitation or equipment standard based on the maximum degree of reduction which the department determines is achievable on a case-by-case basis taking into account energy, economic, environmental and health impacts and other costs related to the source.

4. "Coal" means bituminous coal, anthracite coal or lignite.

5. "Conversion or modification" means any construction, reconstruction, addition to or alteration of any facility or stationary source or other physical changes to allow burning of coal as a boiler fuel.

6. "Emission" means the release of acid deposition precursors into the atmosphere from any facility or stationary source.

7. "Environmental threshold value" means a deposition rate, expressed in kilograms of sulfate per hectare per year, at which no significant damaging chemical or biological effects of acid deposition have been reported, and above which there is high probability that such effects would occur.

8. "Final control target" means a limitation, expressed in terms of fuel sulfur content or equivalent emissions reductions, that will reduce the New York state share of total measured or estimated wet sulfate deposition in sensitive receptor areas by the percentage derived according to the following formula:

New York's contribution to
total measured or esti-
mated wet sulfate deposition,

X

(Total measured or estimated
wet sulfate deposition) minus
(Environmental threshold value)

expressed as a percentage

Total measured or estimated
wet sulfate deposition

9. "Fossil fuel" means coal, petroleum products and fuel gases.

10. "Interim control target" means a limitation, expressed in terms of fuel sulfur content, that achieves a level of sulfur deposition reduction that is approximately forty per centum of the final control target.

11. "Least emissions dispatch" means the utilization of the cleanest facility or other stationary source on a priority basis so that less clean facilities or stationary sources are operated at full capacity only when need arises.

12. "Major steam electric generating facility" or "facility" means a steam electric generating facility with a generating capacity of fifty thousand kilowatts or more which burns fossil fuel.

13. "New emission source" means any new facility or stationary source that will emit acid deposition precursors in excess of one hundred tons per year, and is granted a permit to construct pursuant to section 19-0305 of this article after January first, nineteen hundred eighty-seven.

14. "New source performance standard" means a standard developed by the department which sets limitations for emissions of acid deposition precursors from new facilities and new stationary sources.

15. "Sensitive receptor areas" means regions of the state, encompassing geographically significant land areas not wholly contained within any county, that the department determines to be susceptible to the impacts of acid deposition based upon:

a. geological information identifying areas incapable of adequately neutralizing acid deposition;

b. the presence of plant or animal species that are particularly sensitive to acid deposition;

c. existing acid deposition reports and data prepared by agencies of the state or of the federal government; or

d. such other information that the department determines to be indicative of acid sensitivity.

16. "Special limitation" means a special fuel use limitation for a specific facility, stationary source, or specified area of the state promulgated by the department in rules and regulations that permits the sale, offering for sale, purchase and use of oil or coal with a sulfur content in excess of established sulfur limits, when acceptable diffusion analyses have demonstrated to the department's satisfaction that such use would not contribute to the contravention of any applicable federal ambient air quality standard nor significantly increase acid deposition at sensitive receptor areas.

17. "Stationary source" means any source other than major steam electric generating facilities that emits acid deposition precursors in excess of one hundred tons per year.

§ 19-0905. Applicability.

The provisions of this title shall apply to:

1. All major steam electric generating facilities in the state; and
2. All stationary sources in the state.

§ 19-0907. Sulfur deposition control program.

1. No later than January first, nineteen hundred eighty-five, the

department shall:

a. Identify and publish a preliminary list of the sensitive receptor areas of the state with respect to sulfate deposition.

b. Measure or estimate wet and dry sulfate deposition at each of these sensitive receptor areas, including:

(i) total sulfate deposition from all sources; and

(ii) total sulfate deposition from instate sources; and

(iii) the ratio of total sulfate deposition from instate sources to total sulfate deposition from all sources.

c. Identify and publish a preliminary list of environmental threshold values for each sensitive receptor area.

d. Identify and publish a preliminary list or inventory of all facilities and stationary sources in the state which emit sulfur dioxide.

e. Prepare such supporting documentation as the department considers appropriate.

2. a. Before publishing any preliminary list or report pursuant to subdivision one of this section, the department shall conduct a review of all appropriate existing acid deposition reports and data as prepared by the department, other agencies of the state, agencies of other states, agencies of the federal government or agencies of foreign governments. The department shall further review appropriate acid deposition reports, data, documents, studies, surveys or analyses as currently exist in the scientific literature.

b. The department shall set forth in writing its presuppositions and assumptions, mathematical modeling techniques, sampling methodologies, and analytical protocols, based upon existing scientific knowledge, that are utilized to derive the preliminary lists and reports required by this section.

3. Based on the activities listed in subdivisions one and two of this section, the department shall formulate a preliminary final control target for each sensitive receptor area, and shall develop a strategy identifying any emissions reductions for the various facilities and stationary sources in the state that will be required to meet the deposition control targets. These targets and strategies, together with the lists, reports and supporting documentation described in this section, and together with an analysis of the economic impact of the implementation of such targets and strategies, shall constitute a preliminary sulfur deposition control program.

4. a. No later than March first, nineteen hundred eighty-five, the department shall conduct public hearings in at least three geographic locations of the state for the purpose of soliciting information and comments from the public on the preliminary sulfur deposition control program. Any such public hearings shall comply with the notice provisions and other procedures in title three and title five of this article.

b. No later than May first, nineteen hundred eighty-five, and after due consideration of the hearing record, independent scientific review, if any, and the considerations listed in section 19-0303 of this article, the department shall publish the sulfur deposition control program, hereinafter referred to as the "program". In addition to publishing the program, the department shall submit copies of such program to the governor, the temporary president of the senate, the speaker of the assembly, the chairman of the senate standing committee on environmental conservation and recreation, and the chairman of the assembly standing committee on environmental conservation.

c. The program shall be subject to review pursuant to the procedures in title five of this article.

5. The department shall promulgate such rules and regulations as are necessary to effectuate the provisions of this section.

6. The department shall publish all preliminary and final lists,

reports, targets and programs required by this section in the state register and in the environmental notice bulletin.

§ 19-0909. Interim control target.

1. a. In the absence of a controlling federal statute or program which the commissioner determines is consistent with the purpose and intent of this title, the department shall promulgate, no later than January first, nineteen hundred eighty-six, an interim control target for the control of sulfate deposition at each sensitive receptor area where the environmental threshold value is exceeded, and rules and regulations necessary to implement such targets.

b. Any such interim control target promulgated pursuant to this section shall take effect on January first, nineteen hundred eighty-eight, and all facilities and stationary sources shall be in compliance with the interim control target by such date.

c. In connection with the promulgation of an interim control target, the department shall prepare an analysis of the economic impact of the implementation of such target.

2. The department shall not require or prohibit any particular control technique to achieve any such interim control target, but shall allow the use of any or all reasonable sulfur dioxide emission control techniques, including but not limited to:

a. The substitution of lower sulfur content fossil fuels.

b. One or more combinations of blending various sulfur content fossil fuels.

c. The precombustion cleaning of coal.

d. The conversion or modification of an existing boiler to a boiler capable of burning a lower-sulfur content coal.

e. The use of best available control technology at the time of construction, reconstruction or substantial addition to or alteration of a facility or stationary source.

f. The installation of flue gas desulfurization equipment.

g. The installation of fluidized bed boilers.

h. For persons operating multiple boilers, the coordinated operation of these boilers to minimize the discharge of sulfur dioxide from them.

i. The use of least emissions dispatch.

j. The decommissioning of a facility or stationary source.

k. The purchasing of electricity or steam from another person, so as to lessen the operation of a facility or stationary source, provided such purchase does not contribute to a net increase in acid deposition in sensitive receptor areas.

l. The implementation of energy conservation measures to lessen the amount of operation of a facility or stationary source.

§ 19-0911. Final control target.

1. a. In the absence of a controlling federal statute or program which the commissioner determines is consistent with the purpose and intent of this title, the department shall formulate, no later than January first, nineteen hundred ninety-one, a final control target to bring about reductions in the state's contribution to the total sulfate deposition at each sensitive receptor area.

b. As part of such determination, the commissioner shall provide a written analysis of any actions taken or being contemplated by states that border on or are to the east of the Mississippi river or by the

Canadian provinces of Ontario or Quebec and the potential or estimated effect of any such action on acid deposition in sensitive receptor areas.

c. Any such final control target formulated pursuant to this subdivision shall be submitted, in the form of legislative recommendations, to the governor and the legislature.

2. The department shall not adopt or implement the final control target until such time as further specific statutory authorization shall have been enacted, except that any such final control target shall permit the use of all reasonable sulfur dioxide emission control techniques as identified in subdivision two of section 19-0909 of this title.

§ 19-0913. Nitrogen deposition control program.

In the absence of a controlling federal statute or program which the commissioner determines is consistent with the purpose and intent of this title, the department shall promulgate, no later than January first, nineteen hundred eighty-seven, rules and regulations for the control of emissions of oxides of nitrogen from any new facility or new stationary source. Such rules and regulations shall provide for the use of new source performance standards at the time such facility or stationary source is constructed.

§ 19-0915. Emission offsets or credits.

For the purposes of determining the attainment of, or compliance with, the emission controls or reductions required by this article, or any rules or regulations promulgated thereunder, the department shall allow offsets of greater emissions of acid deposition precursors from a facility or stationary source against lower emissions from the same or another facility or stationary source within the state. Any such offsets or credits shall be adjusted to reflect the proximity of the subject

facility or stationary source to sensitive receptor areas.

§ 19-0919. General powers.

1. Nothing in this title shall be construed to require or prohibit the department from:

a. extending compliance schedules, issuing variances or relaxing performance standards at any specific facility or stationary source, so long as such extension, issuance or relaxation does not result in:

(i) violation of any primary federal ambient air quality standard or any state ambient air quality standard; or

(ii) failure to make reasonable further progress in a non-attainment area pursuant to the federal clean air act; or

(iii) failure to attain the interim control target pursuant to section 19-0909 of this title; or

(iv) failure to attain the final control target pursuant to section 19-0911 of this title; or

(v) violation of the nitrogen control program pursuant to section 19-0913 of this title; or

(vi) creation of a public or private nuisance.

b. Continuing any special limitations until January first, nineteen hundred ninety-six or reauthorize any special limitation which has expired after the effective date of this title and prior to January first, nineteen hundred eighty-six.

c. Allowing any conversion or modification of a facility or stationary source to burn coal as a boiler fuel.

2. Nothing in this title shall be construed to establish a statewide cap or limitation on acid deposition precursors such that new sources would be excluded for the state.

§ 19-0921. Enforcement.

1. The commissioner may use the powers granted under title three of this article to determine attainment of, or compliance with, the emission controls and reductions required by this article.

2. The commissioner may request the advice and assistance of other agencies of the state, including but not limited to the commissioners of health, commerce, energy, and parks, recreation and historic preservation, and the chairmen of the public service commission and the Adirondack park agency. The commissioner may further request submission of studies conducted or reports published by such agencies that may aid the commissioner in the enforcement of the provisions of this title.

3. The commissioner shall make a written report to the legislature upon his finding that a Federal law has been enacted that will result in at least a fifty percent reduction in the emissions of SO₂, as defined in section sixty-six-k of the public service law, by electric generating sources pursuant to title four of the Federal Clean Air Act after full implementation.

§ 19-0923. Severability.

The provisions of this title shall be severable, and if any clause, sentence, paragraph, subdivision or part of this title shall be adjudged by any court of competent jurisdiction to be invalid, such judgment shall not effect, impair or invalidate the remainder thereof, but shall be confined in its operation to the clause, sentence, paragraph, subdivision or part thereof directly involved in the controversy in which such judgment shall have been rendered.

TITLE 11

VEHICLE GLOBAL WARMING INDEX LABELS

Section 19-1101. Definitions.

19-1103. Vehicle global warming index labels.

19-1105. Regulations.

§ 19-1101. Definitions.

For purposes of this article, the following terms shall have the following meanings:

1. "motor vehicle" shall mean a passenger vehicle, light-duty truck with a gross vehicle weight of eighty-five hundred pounds or less, or any other vehicle determined by the commissioner to be a vehicle whose primary use is noncommercial personal transportation and which is manufactured for the model year two thousand ten or subsequent model year; and

2. "motor vehicle global warming gases" or "global warming gases" shall mean carbon dioxide, methane, nitrous oxide, hydrofluorocarbons, perfluorocarbons, and sulfur hexafluoride.

§ 19-1103. Vehicle global warming index labels.

1. No model year two thousand ten or subsequent model year motor vehicle shall be sold in this state unless there is securely and conspicuously affixed in a clearly visible location, a label on which the manufacturer shall endorse clearly, distinctly, and legibly true and correct entries disclosing information concerning the emissions of global warming gases.

2. Unless alternative labeling is approved by the commissioner pursuant to section 19-1105 of this title, the label required by subdivision one of this section shall include:

a. a global warming index that contains quantitative information presented in a continuous, easy-to-read scale, unless the commissioner determines, after public hearing, that an alternative graphical representation will more effectively convey the information to consumers, and that compares the emissions of global warming gases from

the vehicle with the average projected emissions of global warming gases from all vehicles of the same model year. For reference purposes, the index shall also identify the emissions of global warming gases from the vehicle model of that same model year that has the lowest emissions of global warming gases; and

b. the use of at least one color ink, as determined by the commissioner, in addition to black.

3. In order to ensure that the label is useful and informative to consumers, the commissioner shall, in designing the label and to the extent feasible within its existing resources:

a. seek input from the commissioner of motor vehicles, automotive consumers, graphic design professionals, and persons with expertise in environmental labeling; and

b. consider other relevant label formats consistent with paragraph a of subdivision two of this section.

4. The index included in the label pursuant to paragraph a of subdivision two of this section shall be updated as determined necessary by the commissioner to ensure that the differences in emissions among vehicles are readily apparent to the consumer.

5. Such label and index included in such label shall, to the largest extent possible, be consistent with labels and information required by other states. A label that complies with the requirements of the California vehicle labeling program shall be deemed to meet the requirements of this title. An automobile manufacturer may apply to the commissioner for approval of an alternative to the labeling requirement that is at least as effective in providing presale notification of the vehicle's emissions of global warming gases as is the labeling required by this title.

6. Nothing in this section shall be construed as prohibiting a purchaser from removing the label required by this section, after such

purchaser has taken possession of the vehicle.

§ 19-1105. Regulations.

The commissioner is hereby authorized and directed to promulgate rules and/or regulations specifying labeling requirements necessary for the implementation of this title provided, however, that any such rules and/or regulations may allow for the use of labels adopted by the state of California that generally meet the requirements of this title.

TITLE 1

NEW ENGLAND INTERSTATE WATER POLLUTION CONTROL COMPACT

- Section
- 21-0101. New England Interstate Water Pollution Control Compact.
 - 21-0103. Membership on commission.
 - 21-0105. Budget.
 - 21-0107. State contribution.
 - 21-0109. Examination of accounts.
 - 21-0111. Inconsistent provisions.
 - 21-0113. Appraisal.
 - 21-0115. Additional powers.

§ 21-0101. New England Interstate Water Pollution Control Compact.

The New England Interstate Water Pollution Control Compact as first entered into pursuant to chapter 764 of the laws of 1949, and as reenacted by chapter 475 of the laws of 1961, is hereby continued. The compact is as follows:

NEW ENGLAND INTERSTATE WATER POLLUTION CONTROL COMPACT

Whereas, the growth of population and the development of the territory of the New England states has resulted in serious pollution of certain interstate streams, ponds and lakes, and of tidal waters ebbing and flowing past the boundaries of two or more states; and

Whereas, such pollution constitutes a menace to the health, welfare and economic prosperity of the people living in such areas; and

Whereas, the abatement of existing pollution and the control of future pollution in the interstate waters of the New England area are of prime importance to the people and can best be accomplished through the co-operation of the New England states in the establishment of an interstate agency to work with the states in the field of pollution abatement;

Now, therefore, the states of Connecticut, Maine, Massachusetts, New Hampshire, Rhode Island and Vermont do agree and are bound as follows:

ARTICLE I

It is agreed between the signatory states that the provisions of this compact shall apply to streams, ponds and lakes which are contiguous to two or more signatory states or which flow through two or more signatory states or which have a tributary contiguous to two or more signatory states or flowing through two or more signatory states, and also shall apply to tidal waters ebbing and flowing past the boundaries of two states.

ARTICLE II

There is hereby created the New England Interstate Water Pollution Control Commission (hereinafter referred to as the commission) which shall be a body corporate and politic, having the powers, duties and jurisdiction herein enumerated and such other and additional powers as shall be conferred upon it by the act or acts of a signatory state concurred in by the others.

ARTICLE III

The commission shall consist of five commissioners, from each signatory state, each of whom shall be a resident voter of the state from which he is appointed. The commissioners shall be chosen in the manner and for the terms provided by law of the state from which they shall be appointed. For each state there shall be on the commission a member representing the state health department, a member representing the state water pollution control board (if such exists), and except where a state in its enabling legislation decides that the best interests of the state will be otherwise served, a member representing municipal interests, a member representing industrial interests, and a member representing an agency acting for fisheries or conservation.

ARTICLE IV

The commission shall annually elect from its members a chairman and vice chairman and shall appoint and at its pleasure remove or discharge such officers. It may appoint and employ a secretary who shall be a professional engineer versed in water pollution and may employ such stenographic or clerical employees as shall be necessary, and at its pleasure remove or discharge such employees. It shall adopt a seal and suitable by-laws and shall promulgate rules and regulations for its management and control. It may maintain an office for the transaction of its business and may meet at any time or place within the signatory states. Meetings shall be held at least twice each year. A majority of the members shall constitute a quorum for the transaction of business but no action of the commission imposing any obligation on any signatory state or on any municipal agency or subdivision thereof or on any person, firm or corporation therein shall be binding unless a majority

of the members from such signatory state shall have voted in favor thereof. Where meetings are planned to discuss matters relevant to problems of water pollution control affecting only certain of the signatory states, the commission may vote to authorize special meetings of the commissioners of the states especially concerned. The commission shall keep accurate accounts of all receipts and disbursements and shall make an annual report to the governor, the temporary president of the senate, the speaker of the assembly, the chairpersons of the senate finance and assembly ways and means committees, and the chairpersons of the senate and assembly environmental conservation committees setting forth in detail the operations and transactions conducted by it pursuant to this compact, and shall make recommendations for any legislative action deemed by it advisable, including amendments to the statutes of the signatory states which may be necessary to carry out the intent and purpose of this compact. The commission shall not incur any obligations for salaries, office, administrative, traveling or other expenses prior to the allotment of funds by the signatory state adequate to meet the same; nor shall the commission pledge the credit of any signatory states. Each signatory state reserves the right to provide hereafter by law for the examination and audit of the accounts of the commission. The commission shall appoint a treasurer who may be a member of the commission, and disbursements by the commission shall be valid only when authorized by the commission and when vouchers therefor have been signed by the secretary and countersigned by the treasurer. The secretary shall be custodian of the records of the commission with authority to attest to and certify such records or copies thereof.

ARTICLE V

It is recognized, owing to such variable factors as location, size, character and flow and the many varied uses of the waters subject to the terms of this compact, that no single standard of sewage and waste treatment and no single standard of quality of receiving waters is practical and that the degree of treatment of sewage and industrial wastes should take into account the classification of the receiving waters according to present and proposed highest use, such as for drinking water supply, industrial and agricultural uses, bathing and other recreational purposes, maintenance and propagation of fish life,

shellfish culture, navigation and disposal of wastes.

The commission shall establish reasonable physical, chemical and bacteriological standards of water quality satisfactory for various classifications of use. It is agreed that each of the signatory states through appropriate agencies will prepare a classification of its interstate waters in entirety or by portions according to present and proposed highest use and for this purpose technical experts employed by state departments of health and state water pollution control agencies are authorized to confer on questions relating to classification of interstate waters affecting two or more states. Each signatory state agrees to submit its classification of its interstate waters to the commission for approval. It is agreed that after such approval all signatory states through their appropriate state health departments and water pollution control agencies will work to establish programs of treatment of sewage and industrial wastes which will meet standards established by the commission for classified waters. The commission may from time to time make such changes in definitions of classifications and in standards as may be required by changed conditions or as may be necessary for uniformity.

ARTICLE VI

Each of the signatory states pledges to provide for the abatement of existing pollution and for the control of future pollution of interstate inland and tidal waters as described in Article I, and to put and maintain the waters thereof in a satisfactory condition consistent with the highest classified use of each body of water.

ARTICLE VII

Nothing in this compact shall be construed to repeal or prevent the enactment of any legislation or prevent the enforcement of any requirement by any signatory state imposing any additional condition or restriction to further lessen the pollution of waters within its jurisdiction. Nothing herein contained shall affect or abate any action now pending brought by any governmental board or body created by or existing under any of the signatory states.

ARTICLE VIII

The signatory states agree to appropriate for the salaries, office, administrative, travel and other expenses such sum or sums as shall be recommended by the commission. The commonwealth of Massachusetts obligates itself only to the extent of sixty-five hundred dollars in any one year, the state of Connecticut only to the extent of three thousand dollars in any one year, the state of Rhode Island only to the extent of fifteen hundred dollars in any one year, and the states of New Hampshire, Maine, and Vermont each only to the extent of one thousand dollars in any one year.

ARTICLE IX

Should any part of this compact be held to be contrary to the constitution of any signatory state or of the United States, all other parts thereof shall continue to be in full force and effect.

ARTICLE X

The commission is authorized to discuss with appropriate state agencies in New York state questions of pollution of waters which flow into the New England area from New York state or vice versa and to further the establishment of agreements on pollution abatement to promote the interests of the New York and New England areas.

Whenever the commission by majority vote of the members of each signatory state shall have given its approval and the state of New York shall have taken the necessary action to do so, the state of New York shall be a party to this compact for the purpose of controlling and abating the pollution of waterways common to New York and the New England states signatory to this compact but excluding the waters under the jurisdiction of the Interstate Sanitation Commission (New York, New Jersey, and Connecticut).

ARTICLE XI

This compact shall become effective immediately upon the adoption of the compact by any two contiguous states of New England but only insofar as applies to those states upon approval by Federal law. Thereafter upon ratification by other contiguous states, it shall also become effective

as to those states.

§ 21-0103. Membership on commission.

The state shall be represented on the New England Interstate Water Pollution Control Commission by five commissioners to be appointed by the Governor. One shall be the Commissioner of Environmental Conservation, one shall be an officer of the Department of Environmental Conservation and the others shall be such persons as the Governor shall determine will serve the best interests of the state. The commissioners shall serve during the pleasure of the Governor. They shall have all the powers and duties enjoined by the compact; shall serve without compensation, but shall be reimbursed for their expenses actually and necessarily incurred by them in the performance of their duties. The traveling expenses of the commissioners in attending meetings of the commission shall be paid on the audit and warrant of the Comptroller upon vouchers approved by the Department of Environmental Conservation from funds appropriated to the Department of Environmental Conservation for such purposes. The Commissioner of Environmental Conservation and the officer of the Department of Environmental Conservation may designate, from time to time, a deputy or other subordinate in his department to attend and participate in any meeting of or hearing by or other proceeding of the commission, with authority to vote as a representative of or substitute for said commissioner or officer of the Department of Environmental Conservation.

§ 21-0105. Budget.

The New England Interstate Water Pollution Control Commission shall submit annually, in accordance with the laws and practice of this state, to the Commissioner of Environmental Conservation for study and consideration by such commissioner, an estimate of moneys required to administer, manage and support the commission during the ensuing fiscal year. Such estimate shall include any request for appropriation of funds by New York and shall be accompanied by a tabulation of similar requests

which the commission expects to make to each other member state and the formula or factors upon which such respective requests are based. The Commissioner of Environmental Conservation shall include a suitable item or items of estimated expenditures in the budget estimates of his department.

§ 21-0107. State contribution.

The state agrees to contribute to the commission such annual amount as may be required for its several purposes under the terms of such compact, within appropriations therefor.

§ 21-0109. Examination of accounts.

The state Comptroller is hereby authorized and empowered from time to time to examine the accounts and books of the commission, including its receipts, disbursements and such other items referring to its financial standing as such Comptroller may deem proper and to report the results of such examination to the Governor.

§ 21-0111. Inconsistent provisions.

No provision of the Public Health Law and no provision of the Environmental Conservation Law, if such provision of the Environmental Conservation Law was derived from a provision of the Public Health Law, which is inconsistent with the provisions of the New England Interstate Water Pollution Control Compact shall be applicable to the New England Interstate Water Pollution Control Commission or to any matter governed by the New England Interstate Water Pollution Control Compact.

§ 21-0113. Appraisal.

On August 15, 1964, and at intervals of four years thereafter, the

Commissioner of Environmental Conservation shall evaluate the role of the New England Interstate Water Pollution Control Commission with respect to the interstate waters of concern to New York, and to which the compact applies, and shall report to the commission thereon. The Commissioner of Environmental Conservation shall transmit a copy of such report to the Governor. The Commissioner of Environmental Conservation may make such additional reports to the New England Interstate Water Pollution Control Commission and the Governor as he deems appropriate.

§ 21-0115. Additional powers.

1. The state reaffirms its support of the cooperative approach to the abatement and control of water pollution as embodied in the New England Interstate Water Pollution Control Compact. In view of the increases in population concentrations, the growing need of industry and agriculture for water of reasonable quality and the quality requirements of water based recreation and other uses, the New England Interstate Water Pollution Control Commission shall develop and maintain its programs, including research on water quality problems at such levels as may be appropriate including, to the extent necessary, levels above those originally provided when the state first enacted the compact.

2. In addition to the minimal personnel authorizations contained in article IV of the New England Interstate Water Pollution Control Compact, the commission may employ such engineering, technical and other professional, secretarial and clerical personnel as the proper administration and functioning of the commission may require.

3. a. This state hereby concurs in the conferring of any powers or duties on the New England Interstate Water Pollution Control Commission by other states in addition to those conferred by provision of the New England Interstate Water Pollution Control Compact. This concurrence is pursuant to article II of said compact.

b. The concurrence is subject to the following limitations:

(1) Unless this state specifically confers a power or duty on the

commission, other than one conferred by the compact itself, no financial or other burden or duties shall be placed upon this state, or any agency, officer or subdivision thereof, by reason of the conferring or exercise of the power or duty. At any time, the Governor, Attorney General, or the State Comptroller shall have the power to make inquiry of the commission and to examine its books and records in order to ascertain the state of compliance with this act.

(2) The rights, privileges and responsibilities of the state with respect to the New England Interstate Water Pollution Control Compact and the commission established thereby shall not be limited or impaired.

(3) The commission shall include in its reports to the Governor a full account of any additional powers or duties exercised or performed by it.

§ 21-0117. Water quality network.

1. The New England Interstate Water Pollution Control Commission, in cooperation with the state and such other states signatory to the New England Interstate Water Pollution Control Compact as may participate, shall establish and maintain a water quality sampling and testing network. The network shall, to the fullest extent practicable, rely upon the sampling and testing programs of the state and other participating states and upon information available from agencies of the federal government, and shall not duplicate any of their activities. However, if the sampling and testing programs of the state and other states and the information available from agencies of the federal government are insufficient to provide the commission with records of water quality adequate for its needs, the commission may supplement the sampling and testing otherwise available to it.

2. Sampling pursuant to this section shall be at points at or near the places where waters cross a boundary of the state and the samples shall be tested in order to determine their quality. The sampling and testing provided for herein shall be scheduled by the commission or in accordance with its requests and shall include such factors or elements as the commission shall request. Any sampling and testing done by the Department of Environmental Conservation as part of the activities of

the commission's network shall be reported fully and promptly by the department to the commission together with the results thereof.

3. a. If the commission ascertains that particular waters at or near a boundary of the state do not comply with the standards of the commission made pursuant to article V of the New England Interstate Water Pollution Control Compact, or are not otherwise of a quality complying with state law, the commission shall inform the Department of Environmental Conservation and the water pollution control agency of any other state concerned and shall afford such agencies an opportunity to verify, explain, supplement or correct the information in the possession of the commission and, if the facts warrant, to take or secure the taking of any necessary remedial action.

b. If such remedial action is not taken or secured in timely fashion, the commission may hold a public hearing on due notice, as provided in its rules and regulations, in order to ascertain all the relevant facts and circumstances. Following public hearing, the commission may issue an order directed to the source or sources of waste discharge causing or contributing to the deteriorated water quality. Such order or orders may require reduction or cessation of waste discharges or the improvement of their quality. An order shall not be valid unless supported by substantial evidence adduced at the public hearing. Such order shall prescribe the date or dates by which discharges of waste are to be reduced, discontinued or treated, and may contain timetables or schedules for specific steps to be taken in order to comply therewith. An order made pursuant to this section may be enforced in any court of competent jurisdiction. Proceedings shall be only on the record made before the commission.

4. Unless otherwise conferred by law, the commission shall not have power to issue permits or licenses in connection with the discharge or treatment of wastes, or pass upon plans or specifications for particular waste treatment or collection equipment or facilities.

OHIO RIVER VALLEY WATER SANITATION COMPACT

Section 21-0301. Ohio River Valley Sanitation Compact.

21-0303. Joinder by Virginia.

21-0305. Commissioners; cooperation by departments and officers.

21-0307. Jurisdiction of court; powers of Attorney-General and
other law enforcement officers.

21-0309. Powers to be additional.

21-0311. Financial examination; recommendations.

21-0313. Budget.

21-0315. Inconsistent provisions.

21-0317. Evaluation.

§ 21-0301. Ohio River Valley Water Sanitation Compact.

The Ohio River Valley Water Sanitation Compact, as first enacted by chapter 776 of the laws of 1939, and as reenacted by chapter 472 of the laws of 1961, is hereby continued. The compact is as follows:

OHIO RIVER VALLEY WATER SANITATION COMPACT

Whereas a substantial part of the territory of each of the signatory states is situated within the drainage basin of the Ohio river; and

Whereas the rapid increase in the population of the various metropolitan areas situated within the Ohio drainage basin, and the growth in industrial activity within that area, have resulted in recent years in an increasingly serious pollution of the waters and streams within the said drainage basin, constituting a grave menace to the health, welfare, and recreational facilities of the people living in such basin, and occasioning great economic loss; and

Whereas the control of future pollution and the abatement of existing pollution in the waters of said basin are of prime importance to the people thereof, and can best be accomplished through the cooperation of the states situated therein, by and through a joint or common agency;

Now, therefore, the states of Illinois, Indiana, Kentucky, New York,

Ohio, Pennsylvania, Tennessee and West Virginia do hereby covenant and agree as follows:

ARTICLE I

Each of the signatory states pledges to each of the other signatory states faithful cooperation in the control of future pollution in and abatement of existing pollution from the rivers, streams and waters in the Ohio river basin which flow through, into, or border upon any of such signatory states, and in order to effect such object, agrees to enact any necessary legislation to enable each such state to place and maintain the waters of said basin in a satisfactory sanitary condition, available for safe and satisfactory use as public and industrial water supplies after reasonable treatment, suitable for recreational usage, capable of maintaining fish and other aquatic life, free from unsightly or malodorous nuisances due to floating solids or sludge deposits, and adaptable to such other uses as may be legitimate.

ARTICLE II

The signatory states hereby create a district to be known as the "Ohio river valley water sanitation district," hereinafter called the district, which shall embrace all territory within the signatory states the water in which flows ultimately into the Ohio river, or its tributaries.

ARTICLE III

The signatory states hereby create the "Ohio river valley water sanitation commission," hereinafter called the commission, which shall be a body corporate, with the powers and duties set forth herein, and such additional powers as may be conferred upon it by subsequent action of the respective legislatures of the signatory states or by act or acts of the congress of the United States.

ARTICLE IV

The commission shall consist of three commissioners from each state, each of whom shall be a citizen of the state from which he is appointed, and three commissioners representing the United States government. The commissioners from each state shall be chosen in the manner and for the

terms provided by the laws of the state from which they shall be appointed, and any commissioner may be removed or suspended from office as provided by the law of the state from which he shall be appointed. The commissioners representing the United States shall be appointed by the president of the United States, or in such other manner as may be provided by congress. The commissioners shall serve without compensation, but shall be paid their actual expenses incurred in and incident to the performance of their duties; but nothing herein shall prevent the appointment of an officer or employee of any state or of the United States government.

ARTICLE V

The commission shall elect from its number a chairman and vice-chairman, and shall appoint, and at its pleasure remove or discharge, such officers and legal, clerical, expert and other assistants as may be required to carry the provisions of this compact into effect, and shall fix and determine their duties, qualifications and compensation. It shall adopt a seal and suitable by-laws, and shall adopt and promulgate rules and regulations for its management and control. It may establish and maintain one or more offices within the district for the transaction of its business, and may meet at any time or place. One or more commissioners from a majority of the member states shall constitute a quorum for the transaction of business.

The commission shall submit to the governor of each state, at such time as he may request, a budget of its estimated expenditures for such period as may be required by the laws of such state for presentation to the legislature thereof.

The commission shall keep accurate books of account, showing in full its receipts and disbursements, and said books of account shall be open at any reasonable time to the inspection of such representatives of the respective signatory states as may be duly constituted for that purpose.

On or before the first day of December of each year, the commission shall submit to the respective governors of the signatory states a full and complete report of its activities for the preceding year.

The commission shall not incur any obligations of any kind prior to the making of appropriations adequate to meet the same; nor shall the commission pledge the credit of any of the signatory states, except by and with the authority of the legislature thereof.

ARTICLE VI

It is recognized by the signatory states that no single standard for the treatment of sewage or industrial wastes is applicable in all parts of the district due to such variable factors as size, flow, location, character, self-purification, and usage of waters within the district. The guiding principle of this compact shall be that pollution by sewage or industrial wastes originating within a signatory state shall not injuriously affect the various uses of the interstate waters as hereinbefore defined.

All sewage from municipalities or other political subdivisions, public or private institutions, or corporations, discharged or permitted to flow into these portions of the Ohio river and its tributary waters which form boundaries between, or are contiguous to, two or more signatory states, or which flow from one signatory state into another signatory state, shall be so treated, within a time reasonable for the construction of the necessary works, as to provide for substantially complete removal of settleable solids, and the removal of not less than forty-five per centum of the total suspended solids; provided that, in order to protect the public health or to preserve the waters for other legitimate purposes, including those specified in article one, in specific instances such higher degree of treatment shall be used as may be determined to be necessary by the commission after investigation, due notice and hearing.

All industrial wastes discharged or permitted to flow into the aforesaid waters shall be modified or treated, within a time reasonable for the construction of the necessary works, in order to protect the public health or to preserve the waters for other legitimate purposes, including those specified in article one, to such degree as may be determined to be necessary by the commission after investigation, due

notice and hearing.

All sewage or industrial wastes discharged or permitted to flow into tributaries of the aforesaid waters situated wholly within one state shall be treated to that extent, if any, which may be necessary to maintain such waters in a sanitary and satisfactory condition at least equal to the condition of the waters of the interstate stream immediately above the confluence.

The commission is hereby authorized to adopt, prescribe and promulgate rules, regulations and standards for administering and enforcing the provisions of this article.

ARTICLE VII

Nothing in this compact shall be construed to limit the powers of any signatory state, or to repeal or prevent the enactment of any legislation or the enforcement of any requirement by any signatory state, imposing additional conditions and restrictions to further lessen or prevent the pollution of waters within its jurisdiction.

ARTICLE VIII

The commission shall conduct a survey of the territory included within the district, shall study the pollution problems of the district, and shall make a comprehensive report for the prevention or reduction of stream pollution therein. In preparing such report, the commission shall confer with any national or regional planning body which may be established, and any department of the federal government authorized to deal with matters relating to the pollution problems of the district. The commission shall draft and recommend to the governors of the various signatory states uniform legislation dealing with the pollution of rivers, streams and waters and other pollution problems within the district. The commission shall consult with and advise the various states, communities, municipalities, corporations, persons, or other entities with regard to particular problems connected with the pollution of waters, particularly with regard to the construction of plants for the disposal of sewage, industrial and other waste. The commission shall, more than one month prior to any regular meeting of the

legislature of any state which is a party thereto, present to the governor of the state its recommendations relating to enactments to be made by any legislature in furthering the intents and purposes of this compact.

ARTICLE IX

The commission may from time to time, after investigation and after a hearing, issue an order or orders upon any municipality, corporation, person, or other entity discharging sewage or industrial waste into the Ohio river or any other river, stream or water, any part of which constitutes any part of the boundary line between any two or more of the signatory states, or into any stream any part of which flows from any portion of one signatory state through any portion of another signatory state. Any such order or orders may prescribe the date on or before which such discharge shall be wholly or partially discontinued, modified or treated or otherwise disposed of. The commission shall give reasonable notice of the time and place of the hearing to the municipality, corporation or other entity against which such order is proposed. No such order shall go into effect unless and until it receives the assent of at least a majority of the commissioners from each of not less than a majority of the signatory states; and no such order upon a municipality, corporation, person or entity in any state shall go into effect unless and until it receives the assent of not less than a majority of the commissioners from such state.

It shall be the duty of the municipality, corporation, person or other entity to comply with any such order issued against it or him by the commission, and any court of general jurisdiction or any United States district court in any of the signatory states shall have the jurisdiction, by mandamus, injunction, specific performance or other form of remedy, to enforce any such order against any municipality, corporation or other entity domiciled or located within such state or whose discharge of the waste takes place within or adjoining such state, or against any employee, department or subdivision of such municipality, corporation, person or other entity; provided, however, such court may review the order and affirm, reverse or modify the same upon any of the grounds customarily applicable in proceedings for court review of

administrative decisions. The commission or, at its request, the attorney-general or other law enforcing official, shall have power to institute in such court any action for the enforcement of such order.

ARTICLE X

The signatory states agree to appropriate for the salaries, office and other administrative expenses, their proper proportion of the annual budget as determined by the commission and approved by the governors of the signatory states, one-half of such amount to be prorated among the several states in proportion to their population within the district at the last preceding federal census, the other half to be prorated in proportion to their land area within the district.

ARTICLE XI

This compact shall become effective upon ratification by the legislatures of a majority of the states located within the district and upon approval by the congress of the United States; and shall become effective as to any additional states signing thereafter at the time of such signing.

In witness whereof, the various signatory states have executed this compact through their respective compact commissioners.

§ 21-0303. Joinder by Virginia.

The state of New York hereby consents that the state of Virginia may become a party to and a signatory state of the compact described in the preceding section as fully as though such state had been expressly named therein.

§ 21-0305. Commissioners; cooperation by departments and officers.

1. In pursuance of article four of said compact, there shall be three members (hereinafter called commissioners) of the Ohio River Valley Water Sanitation Commission (hereinafter called commission) from the

state of New York. The Governor, by and with the advice and consent of the senate, shall appoint two persons as two of such commissioners, each of whom shall be a resident and citizen of the state of New York. The terms of such commissioners shall continue to be for six years. Each commissioner shall hold office until his successor shall be appointed and qualified. Vacancies occurring in the office of any such commissioner for any reason or cause shall be filled by appointment by the Governor, by and with the advice and consent of the senate, for the unexpired term. The third commissioner from the state of New York shall be the Commissioner of Environmental Conservation of the state of New York ex officio, and the term of any such ex officio commissioner shall terminate at the time he ceases to hold said office of Commissioner of Environmental Conservation, and his successor as a commissioner shall be his successor as said Commissioner of Environmental Conservation. With the exception of the issuance of any order under the provisions of article nine of the compact, said ex officio commissioner may delegate, from time to time, to any deputy or other subordinate in his department or office the power to be present and participate, including voting, as his representative or substitute at any meeting of, or hearing by, or other proceeding of the commission. The commissioners serving on the effective date of this article shall continue in office until the expiration of their terms, or until their successors have qualified, or until otherwise ceasing to be commissioners pursuant to law.

2. Any commissioner may be removed from office by the Governor upon charges and after a hearing, but opportunity to be heard shall be given.

3. There is hereby granted to the commission and the commissioners thereof all the powers provided for in the said compact and all the powers necessary or incidental to the carrying out of said compact in every particular. All officers of the state of New York are hereby authorized and directed to do all things falling within their respective provinces and jurisdiction necessary or incidental to the carrying out of said compact in every particular; it being hereby declared to be the policy of the state of New York to perform and carry out the said compact and to accomplish the purposes thereof. All officers, bureaus, departments and persons of and in the state government or administration

of the state of New York are hereby authorized and directed at convenient times and upon request of the said commission to furnish the said commission with information and data possessed by them or any of them and to aid said commission by loan of personnel or other means lying within their legal powers respectively.

§ 21-0307. Jurisdiction of court; powers of Attorney-General and other law enforcement officers.

The supreme court of the state of New York is hereby granted the jurisdiction specified in article nine of said compact, and the Attorney-General and any other law enforcement officer of the state of New York is hereby granted the power to institute any action for the enforcement of the orders of the commission as specified in article nine of the compact.

§ 21-0309. Powers to be additional.

Any powers herein granted to the commission shall be regarded as in aid of and supplemental to and in no case a limitation upon any other powers vested in said commission by other laws of the state of New York or by any other jurisdiction, or by the terms of said compact.

§ 21-0311. Financial examination; recommendations.

1. The commission shall keep accurate accounts of all receipts and disbursements and shall report to the Governor and the legislature of the state of New York, on or before the tenth day of January in each year, setting forth in detail the transactions conducted by it during the preceding calendar year and shall make recommendations for any legislative action deemed by it advisable including amendments to the statutes of the state of New York which may be necessary to carry out the intent and purposes of the compact between the signatory states.

The Comptroller of the state of New York is hereby authorized and empowered from time to time to examine the accounts and books of the commission including its receipts, disbursements and such other items referring to its financial standing as such Comptroller may deem proper and to report the results of such examination to the Governor of such state.

§ 21-0313. Budget.

1. The commission shall submit annually, in accordance with the laws and practice of this state to the Governor, for study and consideration by him, an estimate of moneys required to administer, manage and support the commission. Such estimate shall include any request for appropriation of funds by New York state and shall be accompanied by a tabulation of similar requests which the commission expects to make to each other member state and the formula or factors upon which such respective requests are based.

2. The Commissioner of Environmental Conservation shall be afforded an opportunity to comment on any budget request by the commission, and the commission shall be furnished with a copy of any such comments.

§ 21-0315. Inconsistent provisions.

No provision of the Public Health Law and no provision of the Environmental Conservation Law, if such provision of the Environmental Conservation Law was derived from a provision of the Public Health Law, which is inconsistent with the provisions of the Ohio River Valley Water Sanitation Compact shall be applicable to the commission or to any matter governed by the Ohio River Valley Water Sanitation Compact.

§ 21-0317. Evaluation.

On August 15, 1964, and at intervals of four years thereafter, the
