president of the senate, one of whom must reside in the countryside and two voting members shall be appointed by the speaker of the assembly, one of whom must reside in the countryside. One voting member shall be appointed by the minority leader of the senate and one voting member shall be appointed by the minority leader of the assembly. Such appointed legislative representatives may designate a duly authorized representative to attend council meetings and to act in their place. The following seven members shall be ex officio members: the commissioner, the commissioner of parks, recreation and historic preservation, the secretary of state and the commissioners of general services, transportation, agriculture and markets and economic development or their designated representatives who, to the extent practicable, shall be residents of the Hudson valley. All persons responsible for appointing members of the council shall be mindful of the importance of assuring adequate representation on the council of the interests of various municipal entities, conservationists, business owners and operators, persons engaged in agricultural pursuits, minorities and educators. Notwithstanding the foregoing provisions of this subdivision, in the event that there is no vacancy in the membership of the council and there is no member of the council who is a member of an organized sporting association, club or society, the membership of the council shall be increased to twenty-eight voting members. The twenty-eighth voting member shall be a representative of the organized sporting community and shall be selected from the population of the Hudson river valley by a vote of the council. In the event of a vacancy occurring in the office of any member, such vacancy shall be filled in the same manner as the original appointment. The members of the council shall serve without compensation, except that members shall be allowed their necessary and actual expenses incurred in the performance of their duties under this article. Any person other than an ex officio member who serves as a member of the council, shall not serve as a member of the conservancy.

2. The council shall meet at least once every two months and shall encourage attendance at such meetings of representatives from local governments in the greenway and other interested parties. Copies of the minutes of each meeting with the date of the next scheduled meeting

shall be made available to interested parties at their request.

3. Every state agency and public corporation having jurisdiction of land or water within the greenway or of programs relating to the purposes and goals of this article shall, to the fullest extent practicable, offer full cooperation and assistance to the council in carrying out the provisions of this article.

4. Every local agency with programs relating to the greenway may offer assistance to the council in carrying out the provisions of this article.

§ 44-0107. Powers and duties of the council.

The council shall have the power:

1. To make by-laws for the management and regulation of its affairs.
2. To make and execute contracts and all other instruments necessary or convenient for the exercise of its powers and functions under this article.
3. To appoint an executive officer, officers, agents and employees, and prescribe their duties and qualifications and fix their compensation.
4. To utilize, to the extent feasible, the staff and facilities of existing state agencies, pursuant to an allocation to be made by the state division of the budget.
5. To contract for professional and technical assistance and advice.
6. To contract for and to accept assistance, including but not limited to gifts, grants, or loans of funds or personal property from the federal government or any agency or instrumentality thereof, or from any agency or instrumentality of the state, or from any other public or

private source and to comply, subject to the provisions of this article, with the terms and conditions thereof. Notwithstanding the provision of section eleven of the state finance law, the council may accept gifts, grants, devises and bequests, whether conditional or unconditional providing that any gifts, grants, devises and bequests be consistent with greenway criteria.

7. To conduct scientific, environmental, economic, tourism and cultural studies within the valley that are germane to the greenway criteria.

8. To annually review and update the recommendations of the governor's council on the Hudson river valley and prepare objectives to advance each of the five greenway criteria: natural and cultural resources protection, regional planning, economic development including agriculture and urban redevelopment, public access and heritage education.

9. To review and comment as an interested agency during the environmental review process pursuant to article eight of this chapter on proposed actions within the greenway, and upon the filing of a draft environmental impact statement for any such action to require the lead agency to conduct a hearing under article eight of this chapter.

10. To review and comment on capital and long range plans of state agencies as they affect the criteria, objectives and plans of the greenway.

11. To review and comment on actions pursuant to section seventy-five of the public lands law within the greenway for their consistency with the public's right and interest in land under water for the purposes of navigation and commerce, fishing, bathing, natural resource conservation, recreation and access to the waters and lands underwater of the state.

12. To review and comment upon the annual work plan submitted by the conservancy.

13. To jointly designate and develop in agreement with the conservancy model greenway projects to demonstrate the implementation of greenway planning and make contracts for assistance to municipalities and nonprofit entities within the greenway therefor.

14. To designate multi-county planning districts or subregions based on environmental, economic and social factors linking counties, cities, towns and villages and the recommendations of municipal officials from such counties and their political subdivisions for the purpose of development of the greenway compact, provided that the areas of Bronx and New York counties designated pursuant to section 44-0109 of this article shall be deemed to be a multi-county planning district and region and shall not be linked with any other county, city, town or village in a multi-county planning district or region.

15. To make recommendations on expanding the geographical area of the greenway to include Washington county and the remainder of Saratoga county.

16. To encourage individuals, corporations, associations and public entities to protect and preserve the unique resources of the greenway and make grants to municipalities and nonprofit entities within the greenway therefor.

17. To make available or to cause to make available dispute resolution services for conflicts over land use regulation between units of government and/or between interests including development, conservation and neighborhood interests upon request of all parties in dispute.

18. To organize and meet with a committee of county planners within the greenway regarding regional projects and the provision of planning services.

19. To prepare an annual report on the conduct of its activities which shall include a recommended budget for the next year to be sent to the governor and the legislature.

20. To exercise and perform such other powers and duties as shall have been or may be from time to time conferred by law.

21. To utilize the staff and facilities of existing local agencies to the extent that local agencies make them available.

22. To take any actions necessary to carry out the functions, powers and duties imposed by this article.

23. To purchase the maximum insurance coverage practicable and affordable from revenues in the fund, to be effective upon the adoption by a community of a regional plan, from any duly authorized insurer in this state, against any liability of any participating community or its agents that may result from its acquisition of land, consistent with its regional plan, or the adoption or implementation of any land use control including, but not limited to, a zoning law or ordinance; provided, however, such insurance shall not apply to any such claim that results from the intentional wrongdoing, recklessness, gross negligence or an unlawful discriminatory practice as provided in subdivisions two, two-a, three-b, four, paragraphs (a) and (b) of subdivision five and subdivisions six, seven, fourteen and eighteen of section two hundred ninety-six of the executive law and 42 U.S.C. § § 1981, 1983 by such community or its agents. Except with respect to New York city, the council shall purchase such insurance and begin coverage upon the adoption by a community of a regional plan, and maintain such insurance for all participating communities. Nothing herein shall require the council to purchase or provide coverage for New York city.

§ 44-0109. Designation.

The Hudson river valley greenway is hereby designated to include the counties, including all cities, towns and villages therein, of Westchester, Rockland, Orange, Putnam, Dutchess, Ulster, Columbia, Greene, Albany, Rensselaer, Saratoga and Washington; provided the greenway shall not include any area of Greene county within the Catskill

park as defined in subdivision two of section 9-0101 of this chapter. In addition, in the city of New York the greenway shall include the areas of Bronx and New York counties that are both adjacent to the Hudson River and included as of the effective date of this section within the boundaries of such city's waterfront revitalization program prepared pursuant to article forty-two of the executive law. For purposes of the powers and duties of the council and conservancy regarding the Hudson river valley, such powers and duties shall be limited to the geographic area of the greenway as designated in this section.

§ 44-0111. Greenway heritage conservancy for the Hudson river valley.

1. It is hereby found, determined and declared that the reestablishment of the greenway heritage conservancy for the Hudson river valley and the carrying out of its corporate purposes is in all respects for the benefit of the people of the state of New York, for the preservation and enhancement of the natural and historic resources of the Hudson river valley and in furtherance of their welfare and prosperity, and is a public purpose, in that the conservancy will be performing an essential governmental function in the exercise of the powers conferred upon it by this title and the conservancy shall not be required to pay taxes or assessments upon any of the real property interests or rights acquired by it or under its jurisdiction or control, or upon its activities in the operation and maintenance of such property interests or rights or use of any moneys, revenues or other income received by the conservancy. All contributions of real or personal property interests or rights made to the conservancy whether by gift, devise or bequest shall to the extent deductible for federal income tax purposes, be deductible for purposes of the tax law to the extent provided therein.

2. The heritage task force for the Hudson river valley is hereby reestablished in the executive department to be the greenway heritage conservancy for the Hudson river valley a body corporate and politic constituting a public benefit corporation and to consist of seventeen voting members and nine non-voting members. All voting members shall

reside within the greenway and may designate representatives to act in their stead. The governor shall appoint three voting members, one of whom shall also be the chairperson. Two voting members shall be appointed by the temporary president of the senate; two voting members shall be appointed by the speaker of the assembly; one voting member shall be appointed by the minority leader of the senate; one voting member shall be appointed by the minority leader of the assembly and eight voting members shall be appointed by the council. A member of the council may not be appointed to be a voting member of the conservancy. The commissioner and the commissioners of the state departments of transportation, agriculture and markets and economic development and the offices of parks, recreation and historic preservation and general services, the secretary of state, the chairman of the state senate committee on environmental conservation and the chairman of the state assembly committee on environmental conservation, or such members' designated representatives, shall be nonvoting, ex-officio members of the conservancy. The term of office of voting members commencing as of the effective date of this section shall be four years except that five of the first voting members appointed pursuant to this section shall have a two-year term and that another five of the first voting members appointed pursuant to this section shall have a three-year term. Each member appointed to such task force by the commissioner before enactment of this section, shall continue in office until a quorum of voting members has been appointed. In the event of a vacancy occurring in the office of any member, such vacancy shall be filled for the balance of the unexpired term, if applicable, in the same manner as the original appointment.

3. The conservancy shall actively seek qualified candidates for membership and shall recommend such candidates to the governor.

§ 44-0113. Powers and duties of the conservancy.

The conservancy shall have the power:

1. To sue on causes of action consistent with the purposes and its

responsibilities under this article and with respect to contracts to which it is a party, but not for general enforcement of state or local environmental or planning laws, provided that the right to sue, other than with respect to contracts, to which it is a party, shall be limited to causes of action arising within the boundaries of the greenway; and to be sued.

2. To make and execute contracts and all other instruments necessary or convenient for the exercise of its powers and functions under this article.

3. To establish and maintain such facilities as may be necessary for the transacting of its business.

4. To appoint an executive officer, officers, agents, employees, and prescribe their duties and qualifications and fix their compensation.

5. To utilize, to the extent feasible the staff and facilities of existing state agencies.

6. To hold hearings in the exercise of its powers, functions and duties provided for by this article.

7. To contract for professional and technical assistance and advice.

8. To contract for and to accept assistance, including but not limited to gifts, grants or loans of funds or of property from the federal government or any agency or instrumentality thereof, or from any agency or instrumentality of the state, or from any other public or private source and to comply, subject to the provisions of this article, with the terms and conditions thereof, subject to the applicable general policies of the director of the budget.

9. To encourage individuals, corporations, associations, organizations and public agencies to preserve and enhance the natural scenic beauty and heritage of the Hudson river valley and the lands, water, exemplary natural communities, aesthetic and cultural resources of the Hudson

river valley, as well as manage and conserve the fish, wildlife and endangered plant and animal species, and to increase public access to the waters of the Hudson river.

10. To acquire, in the name of the state, interests or rights in real property including title by gift or devise anywhere within the greenway, or by purchase solely for the purposes of a riverside park or development of the greenway trail, or by easement for the conservation, management and preservation of open space characterized by natural scenic beauty, heritage, natural resource values or conditions enhancing regional qualities of the Hudson river valley provided, however, that notwithstanding any other provision of law, transfers of such interests or rights in real property may be made to municipalities or not-for-profit corporations which contract to hold such property for the beneficial enjoyment of the people of the state and in no event shall such land be sold by any such municipality or not-for-profit corporation except for purposes consistent with the beneficial enjoyment of the people of the state. Additionally, notwithstanding this or any other provision of law, neither the state, nor any of its instrumentalities, may transfer, to the conservancy, any interests or rights in real property upon which the state is making property tax payments or payments in lieu of taxes, unless provision is made for the continuance of such payments by the conservancy from monies available in the fund.

11. To continue the existing subsidiary nonprofit corporation and create committees and appoint members thereto to assist and advise the conservancy in carrying out its functions, powers and duties and in coordinating the activities of the conservancy with state and local agencies functioning within the Hudson river valley.

12. To intervene in proceedings before state agencies including the department on matters affecting the Hudson river valley.

13. To encourage and assist in the creation of special local improvement districts consistent with the purposes of this article.

14. To identify land and water areas in the Hudson river valley that

are suited for designation as scenic areas under the provisions of article forty-nine of this chapter and for subsequent development of resource management plans.

15. To provide technical assistance to county and local officials, landowners and interested organizations with regard to resource protection, conservation and management of renewable natural resources and preservation methods and techniques, including but not limited to: natural resource inventories, scenic and conservation easements, deed restrictions, local land trust, innovative zoning techniques, establishment of urban cultural parks, historic preservation methods and viewshed analysis.

16. To encourage and assist state, county and local governments with the implementation of procedures for identifying and designating critical areas under the state environmental quality review act, and to provide similar support for utilization of scenic impact project review guidelines.

17. To help to advance, guide and coordinate on a priority basis the acquisition of land and water areas possessed of scenic, natural, historical, recreational or cultural significance, for the purpose of preserving or enhancing such areas; and to do so in cooperation with appropriate public and private agencies.

18. To initiate the preparation of comprehensive and systematic inventories and studies of the natural, scenic, historic, cultural and recreational resources of the Hudson river valley.

19. To provide local governments and the private sector with improved liaison, interpretation and focus relative to a variety of state and federal programs which bear on the Hudson river valley and its shorelands, including coastal management; basin level B study; wild, scenic and recreational rivers; urban cultural parks; fisheries management; estuarine sanctuaries; areas of national concern; historic preservation; tourism and outdoor recreation; and grants-in-aid.

20. To help develop and implement a comprehensive program and plan at the state, county and local levels for resource preservation, renewable natural resource management and enhancement in scenic highway corridors.

21. To annually prepare a work plan of intended projects and activities of the conservancy and present such plan to the council for its review and comment and report periodically to the governor, the legislature and the council on the conduct of its activities, but not less than once a year, and to provide a copy of each report to appropriate public and private entities within the Hudson river valley which request a copy of the report.

22. To exercise and perform such other powers and duties as shall have been or may be from time to time conveyed or imposed by law.

23. To encourage individuals, corporations, associations and public entities to protect and preserve unique resources of the greenway and make grants to municipalities and non-profit entities within the greenway therefor.

24. To whenever in the opinion of the conservancy it would be in the public interest, after prior approval of the director of the budget, request the temporary assignment and transfer of certain employees of any board, commission, agency or department of the state or its political subdivisions, and said board, commission, agency or department, if in its opinion such transfer will not interfere with the performance of its duties and functions may make such assignment and transfer of said employees to the conservancy. Such assignment and transfer or extension thereof shall not in any way affect the civil service status, continuity of service, retirement plan status, right to compensation, grade or compensation or other rights or privileges of any employee so transferred.

25. To submit title to all interests or rights in real property proposed to be acquired by the conservancy for examination and approval by the attorney general of the state who shall also furnish any and all necessary legal services and advice required to assist the conservancy

in accomplishing its corporate purposes.

26. When funds are available, and with the approval of the governor, enter into an agreement with a municipality or district within which real property interests or rights have been acquired by the conservancy providing for the payment of moneys in lieu of anticipated tax revenues whenever the conservancy shall determine that undue hardship justifying such financial relief has been created by such acquisition.

27. To enforce that no officer, member or employee of the conservancy shall receive or may be lawfully entitled to receive any pecuniary profit from the operation thereof except, to the extent available from the fund, for expenses actually and necessarily incurred, including reasonable compensation to employees for services in effecting one or more of the purposes set forth herein.

28. To continue to provide certain programmatic contractual services to the department as has heretofore been the practice.

29. To jointly designate and develop model greenway projects in agreement with the council to demonstrate the implementation of greenway planning and make grants for assistance to municipalities and non-profit entities within the greenway therefor.

30. To promote the greenway as a single, tourism destination site in conjunction with the designation and development of the greenway trail.

31. To assist in the preservation of farmlands within the greenway for continued agricultural use.

32. To take any actions necessary to carry out the functions, powers and duties imposed by this article.

33. Notwithstanding any other section of law the conservancy shall not have the power of eminent domain or to acquire property by eminent domain.

34. Notwithstanding any other section of law, the conservancy may exercise its powers within the county of New York only for the purposes of designating, developing, or causing to be developed a trail pursuant to section 44-0121 of this article. For the purposes of this subdivision, "trail" means a linear corridor or pathway, walkway or bikeway used solely for public transportation and recreation. The council or the conservancy shall not develop, construct or caused to be developed or constructed any landfill, pier or structure over water located west of the existing bulkhead or shoreline; nor shall the council or the conservancy develop, construct or cause to be developed or constructed any commercial or residential uses on any trail developed pursuant to this subdivision.

§ 44-0115. State agency reports and consistency.

1. The council in carrying out its functions and responsibilities under this article, shall consult with, cooperate with, and, to the maximum extent practicable, coordinate its activities with other interested state agencies.

2. The following officers of state agencies with program responsibilities that affect aspects of the greenway criteria shall prepare and submit to the council a program statement which shall detail actions in the areas of planning, development, use, assistance and regulation that can support and assist or would conflict with the establishment and management of the greenway including the compact and development of the trail:

a. commissioner of the office of parks, recreation and historic preservation regarding the state historic preservation program, the state urban cultural park program, state parks within the greenway, outdoor recreation and trail planning;

b. commissioner of economic development regarding the state tourism program including the identification of potential tourism destination areas within the greenway and recommendations for a system of

interactive information outlets throughout the greenway and the impact of greenway criteria on economic development activities;

c. commissioner of environmental conservation regarding the management of natural resources including plants, fish and wildlife and natural communities and protecting environmental quality;

d. commissioner of transportation regarding access and transportation;

e. secretary of state regarding the coastal zone management program and other planning programs administered by the department of state;

f. commissioner of the office of general services regarding the stewardship and disposition of state property; and

g. the commissioner of agriculture and markets regarding the contribution of agricultural activities and programs to greenway criteria.

Each such officer shall annually review such statements and submit revisions and updates to the council as appropriate.

3. After the compact is in effect, any state agency conducting, funding or approving activities directly affecting greenway resources shall, to the fullest extent practicable, consult with, cooperate with, and coordinate its activities with the council and the appropriate participating community. Any such state agency shall conduct or support such activities in a manner which is, to the maximum extent practicable, consistent with the compact in addition to requirements of other laws, including those of article forty-two of the executive law. The compact shall be incorporated as part of the reviews of actions pursuant to the state environmental quality review act as provided in article eight of this chapter and the New York state historic preservation act of 1980. For purposes of section 8-0113 of this chapter, the commissioner shall incorporate consideration of the greenway in rules and regulations adopted pursuant to such section. The council shall review and comment in writing upon the statement and effects on the greenway program, made

pursuant to section 8-0109 of this chapter and section 14.09 of the parks, recreation and historic preservation law.

4. Nothing in this article shall preempt the authority and responsibilities of the department pursuant to article eleven of this chapter.

§ 44-0117. Hudson river valley geographic information systems.

The conservancy shall continue, update and maintain the Hudson river valley geographic information system and make available information therefrom to counties, cities, towns and villages within the greenway. The conservancy may charge a fee for such information to cover the cost of providing the information.

§ 44-0119. Greenway compact.

1. The council shall guide and support a cooperative planning process to establish a voluntary regional compact among the counties, cities, towns and villages of the greenway to further the recommended criteria of natural and cultural resource protection, conservation and management of renewable natural resources, regional planning, economic development, public access and heritage education.

2. Initially, the council shall offer technical assistance from the conservancy and state agencies to the riverside communities in attaining the goal of establishing and having maximum effective implementation of local planning and zoning through natural and cultural resources inventories, the adoption of a comprehensive zoning ordinance or local law, master plan, site plan and subdivision plat review consistent with the greenway criteria. The council shall also encourage the use of cluster zoning, historic preservation ordinances, transfer of development rights, conservation easements, designation of critical environmental areas and other zoning techniques where appropriate to attain local planning and environmental objectives and participation in

the coastal management program and the state urban cultural park program. The council and the conservancy may each, consistent with their respective responsibilities as provided in this article, enter into contracts not to exceed fifty percent of project cost with riverside communities and in consultation with appropriate state agencies for purposes of administering grants pursuant to this subdivision including, but not limited to, grants to conduct natural and cultural resources inventories, prepare or update a master plan, a zoning ordinance, a transfer of development rights ordinance, a local government waterfront revitalization program, an urban cultural park feasibility study or management plan or a tourism development feasibility study or plan. Any community which receives a grant pursuant to this subdivision may, at the discretion of the council or the conservancy, contribute its fifty percent of the project cost in the form of an in kind or other non-monetary contribution.

3. Not later than four years after the effective date of this article, the council shall convene meetings of the chief elected officials of counties, cities, towns and villages or their designated representatives for each of the subregional districts designated by the council. Such officials in each district shall organize to prepare, or cause to be prepared within twenty-four months, a comprehensive regional plan for their district to be submitted to the council. The conservancy shall offer technical assistance in preparation of such plans and amendments thereof. Within funds available therefor, the council shall grant funds to meet the cost of each regional plan and amendments thereof. Each such regional plan shall address the gateway criteria and the objectives adopted by the council by provisions including, but not limited to, identifying developments of regional impact and areas of regional concern including, but not limited to identifying necessary public facilities and infrastructure consistent with such criteria and objectives and providing for the voluntary adoption by action of a local legislative body and implementation of relevant provisions by each participating county, city, town and village. The council shall review each regional plan for its consistency with the gateway criteria and objectives and to assure that the regional plans conform to establish an overall gateway compact. Upon finding such consistency and conformance,

the council shall approve the regional plan and, upon approving all the regional plans, shall produce an overall greenway plan to be known as the compact. If the local officials in any district fail to produce a regional plan for their district or submit such plan which the council cannot approve, the council may prepare or cause to be prepared a district plan which cities, towns and villages in such district may voluntarily adopt by local law to become participating communities. The council's actions shall not be inconsistent with the requirements of article forty-two of the executive law in approving any regional plan.

4. Upon approval by the council of a regional plan, each county, city, town or village within the district for which the plan was prepared and which adopted the plan by its local legislative body shall become a participating community in the greenway compact by adopting the regional plan as provided in such plan.

4-a. Notwithstanding any other provision of this article, the mayor of the city of New York may submit those portions of such city's waterfront revitalization program, prepared pursuant to article forty-two of the executive law and adopted through the process for the adoption and amendment of plans contained in the charter of such city, as such program applies to areas within the greenway, as the regional plan for the region comprised of the areas of Bronx and New York counties designated pursuant to section 44-0109 of this article. The mayor of such city may submit amendments to such regional plan adopted through the process for the adoption and amendment of plans contained in the charter of such city. Any such plan or amendment thereof submitted pursuant to this subdivision shall be deemed to have been approved pursuant to this section and, upon submission of such plan, the areas of the city of New York designated pursuant to section 44-0109 of this article and which are also included within such plan shall be deemed to be a participating community and, unless otherwise specified, the mayor of such city shall exercise the authority granted to such participating community. Solely for purposes of subdivision five of this section the plan submitted by the city of New York pursuant to this section and any amendments thereto shall not be deemed a generic environmental impact statement or regional plan.

4-b. Nothing contained in this article shall be deemed to affect, impair or supersede the provisions of any city charter, local law, rule or other local requirements and procedures heretofore or hereafter adopted, including, but not limited to, any such provisions relating to the zoning and use of land.

5. A regional plan prepared consistent with the procedures of section 8-0109 of this chapter relating to the preparation and contents of an environmental impact statement shall be considered a generic environmental impact statement. Actions proposed in conformance with the conditions and thresholds established in such regional plan will require no further compliance with article eight of this chapter.

6. Notwithstanding any other provision of law, any state agency may provide in implementing a ranking system for allocating funds for infrastructure, land acquisition or park assistance projects a preference not to exceed the equivalent of an advantage of five percent for such projects which are identified in a regional plan approved pursuant to this section.

* 7. For each such participating community there shall be indemnity from the state in the event of legal actions brought against the community or its agents that may result from the community's acquisition of land consistent with its regional plan or the adoption or implementation of any land use control including, but not limited to, a zoning law or ordinance. Such indemnity shall not apply to the counties of New York and Bronx for such legal actions brought as a result of New York City's adoption of a regional plan or amendments thereto pursuant to subdivision four-a of this section. Such indemnity shall apply to the extent that any such claim exceeds the insurance coverage obtained by the council pursuant to subdivision twenty-three of section 44-0107 of this article; provided, however, such indemnity shall not apply to any such claim that results from intentional wrongdoing, recklessness, gross negligence or an unlawful discriminatory practice as provided in subdivisions two, two-a, three-b, four, paragraphs (a) and (b) of subdivision five and subdivisions six, seven, fourteen and eighteen of section two hundred ninety-six of the executive law and 42 U.S.C. § 8

1981, 1983 by such community or its agents. In any claim against a participating community of unlawful discriminatory practice, the attorney general shall not represent the defendant or defendants; provided, however, that if the plaintiff is not the prevailing party, the defendant or defendants shall be reimbursed by the state for all reasonable attorneys' fees and litigation expenses incurred in the defense of the action.

* NB Repealed December 31, 2027

8. Pursuant to a chapter of the laws of New York to be enacted, authority shall be granted for a community to utilize other innovative zoning techniques in carrying out the compact.

9. In addition to any other funds available from the state, participating communities and nonprofit entities designated by such communities shall be eligible for capital, program and planning matching grants from the council and the conservancy including, but not limited to grants for municipal historic preservation projects to acquire, restore or rehabilitate property listed on the state or national registers of historic places or for educational programs related to such historic places, municipal park projects for the acquisition, development or improvement of recreational facilities or the acquisition of land for open space conservation and management of renewable natural resources and natural resource protection including the preservation of endangered species and their natural communities, waterfront revitalization projects to acquire land for public access to the Hudson river or to protect river resources or to clear waterfront sites for public or private water dependent uses or to develop, improve or rehabilitate water dependent or waterfront facilities including wharfs and piers, consistent with a local waterfront revitalization program, urban cultural park projects for planning, program, acquisition or development consistent with the purposes of article thirty-five of the parks, recreation and historic preservation law, tourism marketing projects, development and commercial revitalization and community development programs and projects, natural resources inventories, agriculture preservation projects and public and private infrastructure improvement related to the development of the greenway trail, from money

appropriated from the Hudson river valley greenway fund. The state share of the cost of such projects shall not exceed fifty percent of the total project cost. Such grants shall be made by the council and the conservancy consistent with their respective responsibilities as provided in this article. The council and conservancy shall enter into contracts with participating communities and in consultation with appropriate state agencies for the purpose of administering these grants.

10. The council and conservancy shall create a committee comprised of three members from each who shall establish a procedure by which other grants not delineated herein, which are consistent with the greenway criteria, shall be made.

11. Notwithstanding any other provision of law, participating communities shall be eligible to take part in and receive grants and loans from the urban development corporation's urban and community development program and regional economic development program.

12. The council may, after holding a public hearing in the appropriate district, withdraw its approval of a regional plan where it finds that there has been a significant failure to implement such plan by a majority of the participating counties, cities, towns and villages within the district. When approval has been withdrawn from a regional plan, the communities therein may not have the benefits of participating communities pursuant to subdivisions five through nine of this section. The council shall report such withdrawal of approval to the governor and the legislature stating the reasons for such action consistent with subdivisions one through six of this section.

13. The council may promulgate rules and regulations providing for maintaining and updating the compact.

§ 44-0121. Greenway trail.

1. The conservancy shall designate and develop or cause to be

developed a trail or pathway system consistent with the greenway criteria connecting the city of New York from the southernmost boundary of the area designated as the greenway to the Erie canal lock two park in the town of Waterford, Saratoga county to be known as the Hudson river valley greenway trail. To the fullest extent practicable, the trail shall:

a. be located with direct physical or, if not physical, visual access to the Hudson river;

b. be planned for both sides of the Hudson river;

c. have segments that can be restricted to non-motorized use;

d. utilize existing heritage trails, bikeways, scenic highways, railroad rights of way and esplanades and make connections with other trails including trails along tributaries of the Hudson river;

e. highlight and link existing parks, urban cultural parks and historic sites;

f. provide for interpretive signage and opportunities to experience the unique natural and cultural heritage of the valley;

g. reflect the natural and cultural diversity;

h. involve state and local agencies and private organizations in the planning, development and maintenance of the trail of the greenway;

i. use the services of local school districts and the youth conservation corps to participate in trail development and maintenance;

j. have segment management plans prepared for each segment of the trail to assure uniform maintenance and upkeep; and

k. have connections to pathways that highlight the character and resources of the countryside communities.

2. The greenway trail to the extent practicable shall be completed on or before June first, two thousand five; provided that the conservancy shall submit a plan for the trail to the governor and legislature within twenty-four months of the effective date of this section and shall to the extent practicable dedicate and open significant sections of the trail on or before June first, two thousand. Planning for the trail shall commence with the council and the conservancy sponsoring a Hudson river valley greenway trail symposium to prepare a plan of action for the planning and development of the trail. Representatives of local governments in the greenway, interested nonprofit organizations, representatives of the state and federal government, planners and landscape architects along with any other interested parties shall be invited to participate in the symposium.

3. The department and the office of parks, recreation and historic preservation, the department of transportation and the office of general services are hereby authorized and directed to support and assist in the planning and development of the trail.

ARTICLE 45

STATE NATURE AND HISTORICAL PRESERVE TRUST

Section 45-0101. Declaration of findings and purpose.

45-0103. Short title.

45-0105. Definitions.

45-0107. State nature and historical preserve trust;
continuation.

45-0111. Functions, powers and duties.

45-0113. Acquisition and dedication of real property.

45-0115. Disposition of real property.

45-0117. Jurisdiction and administration.

§ 45-0101. Declaration of findings and purpose.

The overwhelming approval by the people of section 4 of article XIV of

the Constitution, clearly demonstrates the public awareness and desire to preserve the great natural resources and heritage of the state.

Accordingly, the legislature now finds it necessary to provide for a state nature and historical preserve to assure the protection of lands, outside of forest preserve counties, of special natural beauty, wilderness character or geological, ecological, or historical significance so that present and future generations may share their ecological, educational and recreational value.

Lands dedicated to the preserve shall include only those lands in state ownership in need of the highest level of protection. The dedication of ecologically significant lands to the preserve is intended for unique and irreplaceable state-owned lands that are relatively undisturbed and not presently being actively managed through modern forest management practices, including old-growth forests.

§ 45-0103. Short title.

This article may be cited as the "State Nature and Historical Preserve Act".

§ 45-0105. Definitions.

As used or referred to in this article unless a different meaning clearly appears from the context:

1. The term "trust" shall mean the state nature and historical preserve trust continued by section 45-0107 of this article.

2. The term "trustee" shall mean the commissioner of environmental conservation.

3. The term "real property" shall mean lands and waters, including improvements thereon, structures, and hereditaments, title to which may

be in fee simple absolute or any lesser interest, including but not limited to, easements, rights of way, uses, leases, licenses and every estate, interest or right, legal or equitable.

4. The term "preserve" shall mean the state nature and historical preserve, as referred to in section 4 of article XIV of the State Constitution.

5. The term "lands of ecological significance" shall mean state-owned lands and waters that harbor plants, animals or ecological communities that are rare in New York state or exemplary occurrences of more common ecological communities. For the purposes of this article, the term "exemplary occurrences of an ecological community" means a representative, high quality example of a given ecological community type, characterized by a distinctive assemblage of interacting plant and animal populations, including old-growth forests.

6. The term "old-growth forest" shall mean a parcel of at least ten acres which includes all of the following: an abundance of late successional tree species, at least one hundred eighty to two hundred years of age in a contiguous forested landscape that has evolved and reproduced itself naturally, with the capacity for self perpetuation, arranged in a stratified forest structure consisting of multiple growth layers throughout the canopy and forest floor, featuring canopy gaps formed by natural disturbances creating an uneven canopy and a conspicuous absence of multiple stemmed trees and coppices. Typically, old-growth forest sites also are characterized by an irregular forest floor containing an abundance of coarse woody materials which are often covered by mosses and lichens, show limited signs of human disturbance since European settlement, have distinct soil horizons that include definite organic, mineral, alluvial accumulation, and unconsolidated layers, and have an understory that displays well developed and diverse surface herbaceous layers.

§ 45-0107. State nature and historical preserve trust; continuation.

There is hereby continued in the department the state nature and historical preserve trust.

§ 45-0111. Functions, powers and duties.

The trustee shall have the duty of assisting the legislature and the governor in implementing the policy of the state as set forth in section 4 of article XIV of the State Constitution, and in order to carry out such purposes he shall have the following functions, powers and duties:

1. To recommend to the Governor and legislature real property to be included in the preserve. In making such recommendations, the trustee shall first find that such real property qualifies for inclusion in the preserve because of its natural beauty, wilderness character, it contains old-growth forest, or is of other geological, ecological or historical significance. Such recommendation shall include, where appropriate, the estimated value or cost of the real property, justification for its inclusion in the preserve, and provision for management, care, custody and control of the real property. When the trustee identifies a parcel of state land which may be an old-growth forest, the trustee shall evaluate the parcel, and if it meets the criteria of an old-growth forest, recommend the parcel be included in the preserve. When the trustee recommends property be placed in the preserve to protect old-growth forest, such recommendation shall include provisions that the old-growth forest be protected with minimum management or disturbance that only considers passive recreational opportunities with no construction of public amenities. In those provisions, the protection of the old-growth forest from invasive species and diseases may be considered. Such real property may include, but not be limited to real property presently owned in the name of the state, unconditional or conditional grants, gifts and bequests to the state of real property, and real property recommended by the trustee for acquisition.

2. To prepare and submit an annual report to the Governor and the legislature on or before February first on the activities of the trust.

3. To undertake research and studies related to activities of the trust.

4. To maintain a current inventory of all real property which has been dedicated to the preserve.

5. To request any state agency to render assistance in carrying out the purposes of this article. Any state agency is authorized to render such assistance to the trustee.

6. To make such rules and regulations as the trustee may determine necessary for the purposes of properly carrying out his functions, powers and duties, and to do all things necessary or convenient for carrying out the foregoing functions.

§ 45-0113. Acquisition and dedication of real property.

1. For the purposes of this article, the department may, when authorized by an act of the legislature, and when funds are available therefor, acquire in the name of the people of the state of New York fee title or any lesser interest in real property by any method of acquisition, including, but not limited to, appropriation, condemnation, purchase, conditional or unconditional gift, bequest or devise, in accordance with any powers of the department to acquire real property.

2. Only real property owned by the state or real property acquired under this article or sections 51-0705, 52-0701 or 52-0901, or articles fifty-four and fifty-six of this chapter, or real property dedicated to the Albany Pine Bush preserve pursuant to article forty-six of this chapter may be dedicated for the purposes of this article. Such dedication may be effected only by law.

§ 45-0115. Disposition of real property.

Real property dedicated to the preserve shall not be taken or otherwise disposed of except by law enacted by two successive regular sessions of the legislature.

§ 45-0117. Jurisdiction and administration.

1. The department is hereby authorized to manage and exercise custody and control over lands dedicated pursuant to this article or to contract with any city, county, town or village, or any combination thereof, or any state agency or the Albany Pine Bush commission established under article forty-six of this chapter for the management, custody and control of such real property subject to such conditions as may be approved by the director of the budget.

2. The lands dedicated to the preserve are enumerated as follows:

a. Skenoh Island in the town of Canandaigua, county of Ontario more fully described in chapter three hundred fifty-two of the laws of nineteen hundred seventy-five.

b. Showy Lady Slipper parcel in the town of New Hudson, county of Allegany more fully described in chapter one hundred thirty-three of the laws of nineteen hundred seventy-seven.

c. Parrish Gully in the town of Italy, county of Yates more fully described in chapter one hundred thirty-three of the laws of nineteen hundred seventy-seven.

d. Clark Gully in the towns of Middlesex and Italy, county of Yates more fully described in chapter one hundred thirty-three of the laws of nineteen hundred seventy-seven.

e. Cicero Swamp in the town of Cicero, county of Onondaga more fully described in chapter one hundred thirty-three of the laws of nineteen hundred seventy-seven.

f. Labrador Hollow in the town of Fabius, county of Onondaga and the town of Truxton, county of Cortland more fully described in chapter three hundred thirty-six of the laws of nineteen hundred eighty-six.

g. Reinstein Woods in the town of Cheektowaga, county of Erie more fully described in chapter five hundred twenty-two of the laws of nineteen hundred eighty-nine.

h. Bog Brook in the town of Southeast and Patterson, county of Putnam more fully described in chapter five hundred twenty-two of the laws of nineteen hundred eighty-nine.

i. The Oak Brush Plain State Preserve in the towns of Babylon and Huntington, county of Suffolk more fully described in chapter six hundred thirty-five of the laws of nineteen hundred eighty-seven.

j. The David A. Sarnoff Pine Barrens in the town of Southampton, county of Suffolk more fully described in chapter two hundred forty-nine of the laws of nineteen hundred ninety-three.

k. The Rocky Point Natural Resources Management Area in the town of Brookhaven, county of Suffolk more fully described in chapter two hundred forty-nine of the laws of nineteen hundred ninety-three.

l. State lands dedicated to the Albany Pine Bush preserve pursuant to article forty-six of this chapter.

m. The Camillus forest unique area in the town of Camillus, county of Onondaga more fully described in chapter four hundred sixty-three of the laws of two thousand five.

n. The Zoar Valley Unique Area in the Towns of Otto and Persia, county of Cattaraugus and the town of Collins, county of Erie more fully described in the chapter of the laws of two thousand seven which added this paragraph.

3. Lands dedicated to the preserve are declared to be put to their

highest, best and most important use and are to be held for one or more of the following purposes:

a. As natural areas for maintaining plants, animals and natural communities, including preservation of old-growth forests dedicated to the preserve specifically for that purpose;

b. As reservoirs of natural materials and ecological processes that contribute to the state's biological diversity;

c. As field laboratories for scientific research and education in the natural sciences, including the fields of biology, conservation, ecology, geology, natural history and paleontology; and

d. As places of natural and historical interest and beauty which provide the public with passive recreational opportunities including, where appropriate, fishing, hunting and trapping, or commercial fishing opportunities that are compatible with protecting the ecological significance, historic features and natural character of the area.

4. The department, or the city, county, town, village or state agency exercising control over the site pursuant to subdivision one of this section, shall develop a written stewardship plan for each site dedicated to the preserve. Such plan shall include a description of stewardship activities required to monitor, protect, enhance and where appropriate actively manage the ecological, scenic, wilderness, geological or historic resources that merited dedication of the site to the preserve. Such plan shall also provide for passive recreational uses, including, where appropriate, fishing, hunting and trapping, or commercial fishing opportunities that are compatible with protecting the ecological significance, historic features and natural character of the site.

5. Nothing in this article shall be construed to diminish an existing property right held by any person who owns any interest in any real property that is located adjacent to any real property dedicated to the preserve.

ARTICLE 46

ALBANY PINE BUSH PRESERVE COMMISSION

Section 46-0101. Legislative declaration and intent.

46-0103. Definitions.

46-0105. Albany Pine Bush preserve commission.

46-0107. Albany Pine Bush preserve.

46-0109. Powers and duties of the commission.

46-0111. Management plan.

46-0113. Appropriations by municipalities.

46-0115. Cooperation of state agencies.

§ 46-0101. Legislative declaration and intent.

The pitch pine-scrub oak barrens or pine barrens in the city of Albany and towns of Guilderland and Colonie and known as the "Albany Pine Bush" or "Pine Bush" is a landscape of rare and endangered natural communities and species identified by the New York natural heritage program. Its location at the center of a major urban area makes it especially valuable as an open space resource and, if properly managed, as a passive recreation area and educational laboratory.

Both state, municipal and private actions have been taken to protect the remaining Albany Pine Bush. Because of the fragile qualities of the Pine Bush and its dependence on periodic fires, effective, coordinated management of the remaining Albany Pine Bush is essential.

The legislature hereby declares it to be in the public interest to protect and manage the Albany Pine Bush by establishing an Albany Pine Bush preserve consisting of dedicated public and dedicated private land and a commission made up of representatives of state and local governments and private citizens to manage the preserve for purposes of its protection and controlled and appropriate recreation and education purposes.

§ 46-0103. Definitions.

As used in this article:

1. "Albany Pine Bush preserve" or "preserve" shall mean lands in the city of Albany and towns of Guilderland and Colonie in the county of Albany characterized by the growth of pitch pine and scrub oak, pine barrens, vernal ponds and/or the presence of sand dunes which are dedicated for protection and beneficial public use pursuant to section 46-0107 of this article. Land which lacks such physical or vegetative characteristics may be dedicated pursuant to section 46-0107 of this article as a protective or buffer zone for other dedicated lands, or otherwise supports the management of the preserve.

2. "Albany Pine Bush preserve commission" or "commission" shall mean the Albany Pine Bush preserve commission created pursuant to section 46-0105 of this article.

§ 46-0105. Albany Pine Bush preserve commission.

1. The Albany Pine Bush preserve commission is hereby established in the department to be a body corporate and public and to consist of eleven voting members who shall be as follows: the commissioner, the commissioner of the state office of parks, recreation and historic preservation, the mayor of the city of Albany, the town supervisors of the towns of Colonie and Guilderland, the chief executive officer of the county of Albany, the state director of the New York field office of the nature conservancy and four members to be appointed by the governor with the advice and consent of the Senate. The four appointed private citizen members of the commission shall be by training, education, experience or attainment qualified to analyze or interpret or support matters relevant to the protection, maintenance and/or management of the Albany Pine Bush. Each of the seven ex-officio members may designate a representative to attend, in his or her place, meetings of the commission and to act in his or her behalf. The Governor shall

designate the chairman. The term of office of the four private citizen members shall be four years. In the event of a vacancy occurring other than by the expiration of a member's term, such vacancy shall be filled for the balance of the unexpired term in the same manner as the original appointment. A majority of the members of the commission shall constitute a quorum.

2. The members of the commission shall receive no compensation for their services, but shall be reimbursed for their expenses actually and necessarily incurred in the performance of their duties hereunder. Members and staff of the commission shall be considered state employees for the purposes of sections seventeen and nineteen of the public officers law.

§ 46-0107. Albany Pine Bush preserve.

The commissioner shall maintain a record of the boundaries of the lands which have been dedicated to the Albany Pine Bush preserve in text and depicted on a map.

1. Land owned by the state may be dedicated to be part of the preserve only by action by the commissioner, the commissioner of the state office of parks, recreation and historic preservation or the commissioner of the state office of general services, provided that state land dedicated hereunder may also be dedicated to be part of the state nature and historical preserve pursuant to article forty-five of this chapter.

2. Land owned by a local government may be dedicated to be part of the preserve only by action of its local legislative body.

3. Land owned by private persons or organizations may be dedicated to be part of the preserve only through the voluntary execution of a conservation easement pursuant to article forty-nine of this chapter, and the acceptance of such instrument by the commission; provided, however, that the commission shall not have the power or authority, without the consent of the landowner, to require as a condition of or a

prerequisite for obtaining any permit, license or other authorization to conduct any activity within or adjacent to the preserve, that any lands be dedicated to the preserve.

4. Every proposed dedication shall be reviewed and approved by the commission.

5. The commission shall have no authority to control or manage any private land unless such land has been dedicated pursuant to this section or the owner thereof has executed a voluntary written agreement with the commission authorizing the specific management actions which may be taken by the commission.

6. Land owned by the commission shall be dedicated to be part of the preserve upon acquisition by the commission.

§ 46-0109. Powers and duties of the commission.

The commission shall have the power:

1. To sue and be sued.

2. To make by-laws for the management and regulation of its affairs.

3. To make and execute contracts and all other instruments necessary or convenient for the exercise of its powers and functions under this article.

4. To appoint an executive officer, officers, agents and employees, and prescribe their duties and qualifications and fix their compensation.

5. To utilize, to the extent feasible, the staff and facilities of existing state and local agencies, pursuant to an allocation to be made by the state division of the budget or the chief executive officer of the local government as applicable.

6. To contract for professional and technical assistance and advice.

7. To contract for and to accept assistance, including but not limited to gifts, grants, easements or loans of funds or real property or personal property from the federal government or any agency or instrumentality thereof, or from any agency or instrumentality of the state, or from any other public or private source and to comply, subject to the provisions of this article, with the terms and conditions thereof, subject to the approval of the division of the budget. Notwithstanding the provision of section eleven of the state finance law, the commission may accept gifts, grants, devises and bequests, whether conditional or unconditional, with the approval of the director of the budget.

8. To conduct scientific and environmental studies.

9. Notwithstanding the provisions of section 9-1105 of this chapter or any other provision of law, to take, or cause to be taken, necessary and appropriate fire management actions to protect the flora and fauna of the preserve provided that:

(i) such actions have been approved in writing by the commissioner and are pursuant to a written plan for the conduct of the requested burn, which plan shall include provisions for limiting the area to be burned and restricting the burn to that area, as well as emergency suppression procedures; and

(ii) no burning shall be conducted until the chief or other official in charge of the fire department or company within whose territorial jurisdiction the proposed burn is located has been given the opportunity to review and comment on the written plan and the fire department or company dispatcher has been notified of the actual date and time and estimated duration of such action; and

(iii) no burning shall be prescribed within seventy-five feet of privately owned land within or adjacent to the preserve which has not been dedicated to the preserve, except upon the approval of such adjacent landowner.

10. To construct, or cause to have constructed, necessary facilities including paths and trails, an environmental education center and related parking areas on no more than five percent of the preserve.

11. To conduct environmental education programs.

12. To facilitate and provide passive recreational activities including hiking, nature study and photography.

13. To control access and use of the preserve as is necessary and appropriate to maintain the ecological community of the preserve including establishment of an admission control system by permit on either a group or individual.

14. To review and approve proposed dedications to the preserve and recommend additions to the preserve.

15. To advise and assist state agencies, municipalities and private property owners whose land adjoins the preserve on land use and management techniques that are compatible with the land management needs of the preserve.

16. To encourage individuals, corporations, associations and public entities to protect and preserve the unique resources of the preserve.

17. To prepare an annual report on the conduct of its activities which shall include a recommended budget for the next year.

18. To exercise and perform such other powers and duties as shall have been or may be from time to time conferred by law.

19. To acquire real property as may be necessary for the purposes and functions of the commission. Such real property may be acquired in the name of the commission by purchase, exchange, gift, devise, bequest, or by other legal means.

§ 46-0111. Management plan.

1. The commission shall prepare or cause to be prepared within thirty months of the effective date of this section a management plan for the preserve; provided that elements of the management plan may be prepared and submitted for approval before the entire plan is completed. Such plan shall cover management of all dedicated lands. At least one public hearing on the draft management plan, or element thereof separately submitted for approval or amendment thereto shall be held. The local legislative bodies of the city of Albany and the towns of Guilderland and Colonie, the county of Albany, the commissioner, the commissioner of the state office of parks, recreation and historic preservation and the state director of the nature conservancy may review the management plan, elements thereof separately submitted for approval and amendments thereto.

2. The management plan shall be the fundamental document defining the protection and beneficial public use goals for the preserve and the means and techniques for their attainment. The management plan shall include, but need not be limited to:

a. A survey or inventory of the following, together with the establishment of management priorities therefor:

- (i) natural plant and wildlife resources;
- (ii) historic resources;
- (iii) erosion control needs and stream protection;
- (iv) trails, trail development and use; and
- (v) other recreational uses.

b. A fire management plan.

c. A plan for the enforcement of laws pertaining to public use activities, which shall be implemented by rules and regulations for the administration and use of lands dedicated to the preserve which are promulgated by the commissioner.

d. An education program including publications and guided activities.

e. A financial plan for implementation of the management plan recommendations.

3. Not less than once every five years the commission shall review the management plan, and shall include as part of such review a public hearing. The commission shall propose amendments to the management plan as they are deemed to be necessary and appropriate.

§ 46-0113. Appropriations by municipalities.

To effectuate the purposes of this article, the local legislative bodies of the county of Albany, city of Albany and towns of Colonie and Guilderland may appropriate and pay over to the commission moneys to be expended by the commission to carry out its functions thereunder.

§ 46-0115. Cooperation of state agencies.

To effectuate the purposes of this article, the commission may request from any department, board, bureau, commission or other agency of the state, and the same are authorized to provide, such cooperation and assistance, services and data as will enable the commission properly to carry out its functions thereunder.

ARTICLE 47

COUNTY AND REGIONAL ENVIRONMENTAL MANAGEMENT COUNCILS

Section 47-0101. Short title.

47-0103. Declaration of policy.

47-0105. Establishment of county environmental management councils; members and officers.

47-0107. Powers of council.

47-0109. Appropriation of council.

47-0111. Assistance of department of environmental conservation.

47-0113. Regional environmental management councils.

47-0115. Reimbursement.

47-0117. Annual report.

§ 47-0101. Short title.

This article shall be known as the local environmental protection act.

§ 47-0103. Declaration of policy.

The legislature hereby finds and declares that the management and conservation of our environment is essential to the health and wellbeing of the people of the state. Local county or regional understanding of the importance of all aspects of the environment is necessary for the most balanced use of natural resources. Local participation in planning of activities which influence the ecological balance of the locality and therefore the state is important. It is in the best interest of the citizens of the state to have environmental management councils which shall be responsible for reviewing and advising local and state government, and where resources within the county are influenced, the federal government, on present and proposed methods of using, protecting and conserving the environment for the benefit of all the people.

§ 47-0105. Establishment of county environmental management councils; members and officers.

1. The county governing body of any county may establish a county environmental management council. Such council may be constituted within the organized structure of county government so as to provide for effective coordination among all agencies of the county for the purposes of this article. The council shall consist of one member of each city, town, and village conservation advisory council within the county. Additional members as the county appointing authority may provide, shall be appointed to serve at the pleasure of the county appointing authority, for a term not to exceed two years. The presiding officer or

chairman shall be appointed by the county appointing authority from among the members of the council. In addition, the county appointing authority may appoint members of the county governing body and the heads of those county departments whose work particularly affects or is particularly affected by environmental considerations, as ex officio members of the council. For the purposes of this article, the term county appointing authority shall mean the body or officer of a county authorized by law to make appointments.

2. The county appointing authority is hereby authorized notwithstanding any inconsistent provision of law to appoint up to four members to the council who are between the ages of sixteen and twenty-one.

3. Nothing contained in this article shall be deemed to prohibit the establishment of a county environmental agency pursuant to other provisions of law.

§ 47-0107. Powers of council.

1. The council may advise on all matters affecting the preservation, conservation and ecologically suitable use of the natural resources of the county.

2. The council shall review the state of the county environment as a whole, and shall prepare and submit an annual report of its findings to the county's governing body. This report also shall include an account of the council's activities and accomplishments which shall be based on accurate records of its meetings and other works.

3. The council in cooperation with the county planning agency and other appropriate agencies, shall prepare a plan for the protection of the county's environment and the management of its natural resources, and shall transmit it to the county governing body as soon as practicable after the effective date of the establishment of the council. In addition, each such council shall obtain from the department

of environmental conservation a copy of the state environmental plan. To the extent practicable, the preparation, content and subsequent revision, if any, of the county environmental plan shall be coordinated with the state environmental plan and a copy of said county plan and any subsequent revision shall be filed with the state commissioner of environmental conservation.

4. It shall investigate and recommend to the county governing body ecologically sound methods of planning the use of the county's resources.

5. The council shall keep an index of all open areas within the county, with the plan of obtaining information pertinent to sound ecological utilization of such areas including land owned by any municipality within the county. It shall keep an index of all open marsh lands, swamps, and all other wet lands in a like manner, and may recommend a program for their ecologically suitable utilization.

5-a. The council shall develop and maintain an inventory of natural resources within the county and such other environmental information as may be appropriate. Said inventory shall include wetlands and open spaces and may include, but not be limited to, factors relating to geology, soils, slope, water resources, vegetation, wildlife habitat, unique natural areas, and scenic, historic, and archaeological sites.

6. The council may cooperate with and assist such other governmental or non-governmental boards or organizations in the preparation of plans or reports or the review of proposals or applications as the county may direct.

7. The council may also conduct research into the land area of the county and may seek to coordinate the activities of unofficial bodies organized for similar purposes. It may advertise, prepare, print and distribute books, maps, charts, and pamphlets if in its judgment it deems them necessary for its work.

8. In those counties in which a county executive officer exercises

supervisory and managerial responsibility for agencies in the executive branch of county government, pursuant to charter or local law, the council shall submit the reports described in subdivisions 2 and 3 to both the county governing body and said executive officer.

9. When authorized by resolution of the county governing body, a council may accept by gift, grant, bequest, or otherwise, money or other personal property in the name of the county, for use in furtherance of the provisions of this article. A county governing body may accept by gift, conditional or unconditional grant, devise or otherwise, real property in fee, or any lesser interest including conveyance with limitations or reversions, for the purposes of this article.

In addition, upon the written recommendation of the council, the county governing body may acquire by purchase in fee or any lesser interest, through negotiation or by condemnation, such real or personal property as may be needed to fulfill the purpose of this article.

§ 47-0109. Appropriation of council.

The county may provide for compensation to be paid to the members of the council and may make such appropriations as it may see fit for expenses incurred by the council including appointment of such clerks and other employees as may be necessary for the conduct of the council's official business.

§ 47-0111. Assistance of department of environmental conservation.

To assist a council in carrying out its functions, powers and duties the department of environmental conservation may upon request:

1. Prepare reports outlining objectives, priorities and proposed relationships of the council to the local governing body;
2. Prepare descriptions of work to be undertaken, advantageous

techniques to be used and suggested roles of council members;

3. Provide research on conservation facts and procedures;

4. Provide, on a consulting basis, technical and research assistance as may be required to assist the council in carrying out its work and to enable the council to offer recommendations to the local governing body; and

5. Describe particular areas of natural resources within the territorial limits of the council which require particular attention.

§ 47-0113. Regional environmental management councils.

1. If in the opinion of the governing bodies of two or more counties, the protection and management of the environment of the area could be effectively or efficiently provided by a regional council these counties may enter into agreement to establish a regional environmental management council for the several counties agreeing to the consolidation.

2. The membership of the regional councils shall be made up of members of county environmental councils or individuals eligible to be members of county environmental councils. Members shall be appointed by the several county governing bodies to assure fair representation, but in no case shall there be more than twenty official members of the regional council other than ex officio members.

3. The regional council shall supercede and replace the individual county councils and shall exercise all those powers otherwise accruing to the county councils.

4. The county governing bodies of the several counties agreeing to the formation of such a council may appropriate such funds as they see fit for the work of the regional council including the compensation of members, the retention of staff and other assistance, the preparation

and printing of reports, maps, books, charts, and pamphlets and the cost of other items related to their work.

§ 47-0115. Reimbursement.

Up to one-half of the expenditures during the state fiscal year of any county or regional environmental management council established pursuant to this article shall be reimbursed to the counties out of funds appropriated by the state to the Department of Environmental Conservation for this purpose. Provided, however, that any county environmental agency established pursuant to a provision of law other than this article shall be entitled to such reimbursement if the commissioner of the department of environmental conservation finds that the powers, duties, and reporting lines for the major reports of such council are substantially the same as those provided in section 47-0107 of this article, and that the membership structure thereof either complies with the provisions of subdivision one of section 47-0105 of this article or that such membership structure is designed to encourage local participation and coordination in the planning of activities to influence the ecological balance of the locality. Necessary and appropriate rules and regulations for administration of the local assistance purposes of this act may be promulgated by the commissioner.

§ 47-0117. Annual report.

The commissioner shall submit an annual report to the governor and the legislature describing the operation of the local assistance program established by this article. The annual report shall include a description of activities conducted by each county and regional environmental management council and the activities conducted by the department in performing said activities pursuant to section 47-0115 of this article.

ENVIRONMENTAL JUSTICE

Section 48-0101. Declaration of policy.

48-0103. Definitions.

48-0105. Permanent environmental justice advisory group.

48-0107. Powers and duties.

48-0109. Agency responsibilities.

48-0111. Environmental justice interagency coordinating council.

48-0113. Separability.

§ 48-0101. Declaration of policy.

1. It is hereby declared to be the policy of this state that all people, regardless of race, color, religion, national origin or income, have a right to fair treatment and meaningful involvement in the development, implementation and enforcement of laws, regulations and policies that affect the quality of the environment.

2. It shall further be the policy of the state that no group of people, including a racial, ethnic or socioeconomic group, should be disproportionately exposed to pollution or bear a disproportionate share of the negative environmental consequences resulting from industrial, municipal or commercial operations, or the execution of federal, state or local programs and policies.

3. It shall further be the policy of the state that no group of people, including a racial, ethnic or socioeconomic group, should suffer from inequitable allocation of public resources or financial assistance for environmental protection and stewardship, including environmental remediation, pollution prevention, open space acquisition and/or other protection and stewardship activities.

4. It shall further be the policy of the state that opportunities for citizen involvement in the development of laws, regulations and policies that affect the quality of the environment be as reflective of the diversity of interests and perspective found within the affected community as possible, including those of racial, ethnic and

socioeconomic groups; that such opportunities be provided as early as possible in the decision making process; that such opportunities provide full, timely and accessible disclosure of public records and sharing of information by the government agency or agencies involved, including the provision of technical data and the assumptions upon which any analyses are based; and that such opportunities allow all people, regardless of race, color, religion, national origin or income, the opportunity to have their views heard and considered, including opportunities for two-way dialogue.

§ 48-0103. Definitions.

As used in this article:

1. "Advisory group" means the permanent environmental justice advisory group established by section 48-0105 of this article.

2. "Agency" means any state department, agency, board, bureau, commission, division, office, council, or any public authority or public benefit corporation.

3. "Environmental justice" means the fair treatment and meaningful involvement of all people regardless of race, color, religion, national origin or income with respect to the development, implementation and enforcement of laws, regulations and policies affecting the quality of the environment.

4. "Fair treatment" means that no group of people, including a racial, ethnic or socioeconomic group, should be disproportionately exposed to pollution or bear a disproportionate share of the negative environmental consequences resulting from execution of federal, state and local programs and policies, and further means that no such group of people should suffer from inequitable allocation of public resources or financial assistance for environmental protection and stewardship, including environmental remediation, pollution prevention, open space acquisition and other protection and stewardship activities.

5. "Meaningful involvement" means the provision of opportunities for citizen participation in decision making that are as reflective of the diversity of interests and perspective found within the affected community as possible, including those of racial, ethnic and socioeconomic groups; that are provided as early as possible in the decision making process; that provide full, timely and accessible disclosure of public records and sharing of information by the government agency or agencies involved, including the provision of technical data and the assumptions upon which any analyses are based; and that allow all people, regardless of race, color, religion, national origin or income, the opportunity to have their views heard and considered, including opportunities for two-way dialogue.

§ 48-0105. Permanent environmental justice advisory group.

1. The permanent environmental justice advisory group is hereby established in the department to consist of sixteen members, as follows:

(a) Five members shall be representatives of community-based organizations that advise or assist minority and low-income communities on environmental matters; and

(b) Four members shall be representatives of businesses that hold state-issued permits or otherwise operate subject to this chapter.

(c) One of the members appointed pursuant to each of paragraphs (a) and (b) of this subdivision shall be appointed by the temporary president of the senate, and one of the members appointed pursuant to each of paragraphs (a) and (b) of this subdivision shall be appointed by the speaker of the assembly. One member shall be appointed by the minority leader of the senate and one member shall be appointed by the minority leader of the assembly. The remaining members shall be representatives of state or national organizations promoting environmental conservation, researchers, educators and members of the general public. The other members appointed pursuant to this subdivision shall be appointed by the governor. The replacement of any member shall be in accordance with the provisions contained in this section for appointment of members.

2. (a) Each member of the advisory group shall serve for a term of four years or until his or her successor is appointed. A member appointed to fill a vacancy shall serve the remainder of the term of the member he or she is appointed to succeed. The members of the advisory group shall receive no compensation for their services but shall be reimbursed for their expenses actually and necessarily incurred in the performance of their duties hereunder.

(b) The advisory group shall select a chair from among the members. The advisory group shall meet as frequently as necessary, but not less than three times per year. Such meetings shall be held at such locations as the advisory group may determine. All such meetings shall be subject to the open meetings law. At least one meeting annually shall be held jointly with the environmental justice interagency coordinating council established pursuant to section 48-0111 of this article.

§ 48-0107. Powers and duties.

The advisory group shall have the power and duty to:

1. adopt a model environmental justice policy applicable generally to state agencies that engage in activities or operations that may have a significant effect on the environment, including but not limited to through the adoption of rules and regulations, issuance of permits, acquisition or maintenance of property, or approval, funding or undertaking of projects. Such policy shall be adopted not later than one year after the effective date of this article. The advisory group shall develop the model policy in consultation with representatives of minority and low-income communities, regulated parties, the environmental justice interagency coordinating council and other state agencies and the public and shall hold a public hearing thereon in each judicial department. Notice of such hearings and notice of the adoption of the model policy shall be published in the state register;

2. make recommendations to the governor, legislature and state agencies on measures to improve such policies;

3. provide comments on any proposed rule, regulation or policy of a state or federal agency related to environmental justice;
4. conduct public hearings with respect to any matter within the scope of its functions, powers and duties; and
5. adopt, amend and repeal by-laws governing its organization and operation.

§ 48-0109. Agency responsibilities.

1. Each state agency that engages in activities or operations that have a significant effect on the environment, including but not limited to through the adoption of rules and regulations, issuance of permits, acquisition or maintenance of property, or approval, funding or undertaking of projects, shall be guided in its decision making on such activities or operations by an environmental justice policy. Each such agency shall adopt rules and regulations setting forth its environmental justice policy not later than two years after the adoption of a model environmental justice policy pursuant to section 48-0107 of this article.

2. Each state agency subject to the requirements of subdivision one of this section shall:

(a) appoint a staff member of the agency to serve as environmental justice coordinator, to provide information to the public on the policies, activities and operations of the agency related to environmental justice and to act as liaison to the environmental justice advisory group;

(b) notify the advisory group of the appointment of an environmental justice coordinator; and

(c) develop an environmental justice training plan which includes the provision of workshops and written materials to appropriate staff regarding environmental justice and implementation of the agency's environmental justice policy.

§ 48-0111. Environmental justice interagency coordinating council.

1. There is hereby established an environmental justice interagency coordinating council which shall have the power and duty to:

(a) coordinate the activities of agencies required to adopt an environmental justice policy pursuant to section 48-0109 of this article in development and implementation of such policies; and

(b) serve as a clearinghouse for state agencies and the public for information on environmental justice policies, environmental justice coordinators in state agencies and related activities of state agencies, and maintain information services, including but not limited to an Internet site and a toll-free telephone number, to inform the public on environmental justice.

2. The environmental justice coordinating council shall include the commissioner; the commissioner of the department of economic development; the commissioner of the department of transportation; the president of the environmental facilities corporation; the president of the New York State energy research and development authority; the chairman of the public service commission; the chairman of the power authority of the State of New York; or their designees; and every staff member chosen by an agency to serve as environmental justice coordinator pursuant to section 48-0109 of this article. The council shall consult with the permanent environmental justice advisory group; representatives of minority and low-income communities, including community-based organizations that advise or assist minority and low-income communities on environmental matters; representatives of businesses that hold state-issued permits or otherwise operate subject to this chapter; representatives of local governments; representatives of local, state, or national organizations promoting environmental conservation; researchers and educators; and any other parties the council deems appropriate.

3. The coordinating council shall meet at least bi-annually and shall designate one of its members to serve as chairperson and one of its

members to serve as secretary for the development and dissemination of minutes and reports. All such meetings shall be subject to the open meetings law. At least one meeting annually shall be held jointly with the permanent environmental justice advisory group established pursuant to section 48-0105 of this article. Each member shall be entitled to designate in writing a representative to attend meetings in his or her place and to vote or otherwise act on his or her behalf in his or her absence.

§ 48-0113. Separability.

If any clause, sentence, paragraph, section or part of this article shall be adjudged by any court of competent jurisdiction to be invalid, the judgment shall not affect, impair or invalidate the remainder thereof, but shall be confined in its operation to the clause, sentence, paragraph, section or part thereof directly involved in the controversy in which the judgment shall have been rendered.

ARTICLE 49

PROTECTION OF NATURAL AND MAN-MADE BEAUTY

Title 1. Natural and man made beauty

2. State Land Acquisition
3. Conservation easements
5. State geological trail

TITLE 1

NATURAL AND MAN MADE BEAUTY

Section 49-0101. Legislative findings.

49-0103. General functions, powers and duties of the department.

49-0105. Functions, powers and duties of other departments and agencies.

49-0107. Assistance of other agencies.

49-0109. Reports.

49-0111. Grants or gifts.

49-0113. Thirty by thirty conservation goal.

§ 49-0101. Legislative findings.

The legislature hereby finds and declares that:

The state enjoys an abundance of natural and man-made beauty which greatly enriches the lives of the people of this state. The preservation, enhancement and promotion of this beauty will contribute significantly to the enjoyment of the people who live and work in the state, as well as the millions of visitors who come to the state each year. Further efforts by state government are needed to coordinate and promote programs contributing to the natural and man-made beauty, and to provide advice and assistance to local governments.

§ 49-0103. General functions, powers and duties of the department.

The department shall have the power and it shall be its duty to:

1. Develop, after consultation with local governments and interested persons, groups and institutions, policies and programs to preserve and enhance the natural and man-made beauty of the state, and encourage, facilitate and assist in the coordination of the activities of the various state agencies in furtherance of such policies and programs.

2. Advise, encourage and assist local governments in the development and coordination of policies, programs and activities, and in the full utilization of powers vested in local governments by the Constitution and laws of the state, to preserve and enhance the natural and man-made beauty of the state.

3. Conduct and coordinate studies, surveys and inventories of the vast natural and man-made resources contributing to the beauty of the state by virtue of their scenic, aesthetic, or cultural values.

4. Designate scenic sites, areas, and highways in the state and develop programs for their preservation and enhancement, including but not limited to programs to discourage littering, defacement, and blighting of such scenic sites, areas and highways.

5. Promote the application of aesthetic considerations in the location, design, construction and maintenance of state lands, projects and buildings.

6. Serve as a clearing house for information relating to the preservation and enhancement of natural and man-made beauty.

§ 49-0105. Functions, powers and duties of other departments and agencies.

Nothing contained in this article shall be deemed to derogate or detract in any way from the functions, powers and duties prescribed by law of any other department or agency of the state nor to interrupt or preclude the direct relationships of any such department or agency with public corporations and districts for the carrying out of such functions, powers and duties.

§ 49-0107. Assistance of other agencies.

To effectuate the purposes of this article, the department may request and receive from any other department, division, board, bureau, commission or other agency of the state or any political subdivision thereof or any public authority such assistance, information and data as will enable the department properly to carry out its powers and duties hereunder.

§ 49-0109. Reports.

The department shall from time to time report to the Governor, and

shall make an annual report to the governor and the legislature, not later than May first, concerning the work of the department pursuant to this article, in the preceding calendar year.

§ 49-0111. Grants or gifts.

The department, with the approval of the Governor, may accept as agent of the state any gift, devise or bequest, whether conditional or unconditional (notwithstanding the provisions of section 11 of the State Finance Law), and including federal grants, for any of the purposes of this article. Any moneys so received may be expended by the department to effectuate any purpose of this article, subject to the same limitations as to approval of expenditures and audit as are prescribed for state moneys appropriated for the purposes of this article.

*** § 49-0113. Thirty by thirty conservation goal.**

1. It shall be the goal of the state to support and contribute to national efforts to conserve at least thirty percent of United States lands and inland waters and at least thirty percent of United States ocean areas by the year two thousand thirty.

2. The department in consultation with the commissioner of the office of parks, recreation and historic preservation, shall develop strategies and a methodology to achieve the goal, including but not limited to:

- (a) coordination with the state land acquisition plan;
- (b) prioritizing protections for water sources and sole source aquifers, including wetlands protections;
- (c) protections and restoration projects for preserving and increasing biodiversity, including habitat restoration, with a focus on habitats of endangered and threatened species including resilient and connected lands and corridors providing means for wildlife migration and habitation;
- (d) expanding access to nature and nature's benefits and equitable outdoor access in communities in every region;

(e) consideration of a broad range of landscapes including urban, suburban and rural natural areas, wetlands, forests, and watersheds;

(f) consideration of the state's economic sustainability, including preservation of food security and consultation with the department of agriculture and markets on issues related to farmland preservation of working lands;

(g) increasing climate resilience, including reducing risk from extreme weather events including cooling urban landscapes and natural solutions to prevent erosion and flooding;

(h) collaboration with federal and state research institutions to utilize innovative scientific observation technology to better understand the state's conservation needs and biodiversity and threats thereto;

(i) implementing actions in a manner that includes consideration of the urgency of meeting the goal while still preserving public input and involvement;

(j) collaboration with tribal partners to incorporate tribal expertise and traditional ecological knowledge to better understand the state's conservation needs and biodiversity and threats thereto; and

(k) participating in regional, national, and international efforts to advance biodiversity protection, including preventing extinctions.

3. Conservation measures shall be undertaken in ways that serve all communities, including low-income, disadvantaged and vulnerable communities, including by ensuring meaningful opportunities for public input and involvement.

4. The department shall post the draft strategies and methodology developed to meet the goal no later than July first, two thousand twenty-four and hold at least one public hearing thereon. The department shall post the final goal strategies and methodology on its website.

5. The department shall maintain and, at least annually, update its website to provide information with regard to the implementation and status of the goal.

* NB Repealed January 1, 2031

TITLE 2
STATE LAND ACQUISITION

Section 49-0201. Definitions.

49-0203. State land acquisition policy.

49-0205. Comprehensive inventory of lands having statewide or regional significance.

49-0207. State land acquisition plan.

49-0209. Regional advisory committees.

49-0211. State land acquisition advisory council.

49-0213. Annual report.

49-0215. Annual budget request.

§ 49-0201. Definitions.

As used in this title, the following terms shall include and mean:

1. "Office" shall mean the state office of parks, recreation and historic preservation.

2. "Commissioners" shall mean the state commissioner of environmental conservation and the state commissioner of parks, recreation and historic preservation.

§ 49-0203. State land acquisition policy.

1. The purpose of the land acquisition program of the department and the office is to provide for the conservation, protection, and preservation of open space, natural, historic and cultural resources and the enhancement of recreational opportunities.

2. The department and the office shall first consider in each acquisition whether acquisition of conservation easement or other less than full fee title interests would fulfill the purposes for which the particular acquisition is sought. If it is determined that a

conservation easement or other interest would fulfill such purposes, the department or the office will use its best efforts to acquire such easement or interest, where practicable.

3. The department and the office shall consider future physical climate risk due to sea level rise, and/or storm surges and/or flooding, based on available data predicting the likelihood of future extreme weather events, including hazard risk analysis data if applicable.

4. It is the policy of the state, acting through the department and the office, to pursue acquisitions through voluntary agreement to the maximum extent practicable to achieve the purposes of this article. Accordingly, the process of eminent domain shall only be used when reasonable efforts to obtain a voluntary agreement have been exhausted. Notwithstanding any provision of law to the contrary, the department and the office shall tender to the owner of any lands proposed for acquisition by eminent domain an offer to purchase such lands for the value thereof as determined by the department or the office in accordance with section three hundred three of the eminent domain procedure law. Such offer must have been made for at least ninety days before the department or office makes a finding pursuant to article two of the eminent domain procedure law to acquire the land by eminent domain; however, such ninety day period shall not be required in those cases in which the respective commissioner has made a written determination that there is a significant risk of immediate and irreversible environmental degradation. In the event that the department or office undertakes the process of eminent domain and prior to the public hearing required by section two hundred one of the eminent domain procedure law, the respective commissioner shall give notice of such undertaking to the state land acquisition advisory council, created pursuant to section 49-0211 of this title. The foregoing provisions of this paragraph shall not apply to lands acquired pursuant to article sixteen or title thirteen of article twenty-seven of this chapter or lands with respect to which the owner has consented to the use of eminent domain or where the use of eminent domain is required to quiet title.

The commissioners shall also provide the state land acquisition advisory council with the determinations and findings required by section two hundred four of the eminent domain procedure law.

§ 49-0205. Comprehensive inventory of lands having statewide or regional significance.

1. In order to help provide a basis for a strategy for the preservation of land resources in the state and the preparation of the state land acquisition plan, the department and the office shall prepare a comprehensive inventory of protected and unprotected resources having statewide or regional environmental, historic, cultural or recreational significance. Such inventory shall include the following:

a. open space, forest land and park land owned by federal, state and local governmental entities including lands containing old-growth forest dedicated to the state nature and historical preserve pursuant to article forty-five of this chapter;

b. forest land in private ownership under the terms of section four hundred eighty-a of the real property tax law;

c. wetlands protected by articles twenty-four and twenty-five of this chapter;

d. agricultural areas, including agricultural districts created pursuant to article twenty-five-AA of the agriculture and markets law as recommended by the commissioner of agriculture and markets;

e. water resources, including wild, scenic and recreational rivers, streams and aquifer recharge areas protected by article fifteen of this chapter;

f. marine and other coastal resources, including coastal erosion hazard areas protected by article thirty-four of this chapter;

g. open space lands, forest lands and park lands dedicated by other than governmental entities to ecological, wildlife management, forest management or recreational purposes; and

h. lands which possess statewide or regional significance for historic, cultural, ecological, open space, outdoor recreation, resource protection or wildlife management purposes, including the purpose of restoring extirpated species, and preserving old-growth forests.

2. Such inventory, in such segments and such form as may be readily available at any given time, shall be available to the regional land acquisition advisory committees and other members of the public.

*** § 49-0207. State land acquisition plan.**

1. The department and the office shall prepare a state land acquisition plan to guide selection of projects for state acquisition taking into account regional advisory committee priorities and the department's and office's assessment of need for land acquisition projects. Such plan shall also take into account the goal of the state to facilitate the conservation of at least thirty percent of land in New York state by the year two thousand thirty pursuant to section 49-0113 of this article. Such plan shall include an identification of:

a. lands, by region and category, for which acquisition is of a high priority in order to carry out the purposes of this title;

b. lands, by region, having statewide or regional environmental, historic, cultural or recreational significance that are threatened with diminishment of resource value;

c. the department's and office's priorities of categories of land, by region, for future acquisition; and

d. lands, by region, having statewide or regional environmental, historic, cultural or recreational significance which should be

considered for state acquisition, but which do not qualify for acquisition under present law.

2. Such plan shall include consideration of the inventory prepared pursuant to section 49-0205 of this title and shall identify those areas within the state which are not adequately protected in such categories.

3. In preparing such plan, the department and office shall:

a. conduct one or more public hearings in each of the department's administrative regions.

b. consult with:

(i) the regional advisory committees;

(ii) officials of departments and agencies of the state having duties and responsibilities concerning the protection of open space and natural, environmental, historic, cultural or recreational resources;

(iii) officials and representatives of local governments in the state; and

(iv) persons, organizations and groups interested in the protection of open space and natural, environmental, historic, cultural or recreational resources of the state.

c. request and receive from any department, division, board, bureau, commission or any other agency of the state or any political subdivision thereof or any public authority such assistance and data as may be necessary to enable the department and office to carry out its responsibilities under this section.

4. The department and office shall prepare a draft plan and shall propose, no later than January thirty-first, nineteen hundred ninety-one, a schedule of public hearings thereon.

5. On or before January thirty-first, nineteen hundred ninety-two and every three years thereafter, the department and office shall submit the plan to the governor, the majority leader of the senate and the speaker of the assembly. Upon approval by the governor such plan shall become a

guide for the implementation of the acquisition programs of the department and office.

* NB Effective until January 1, 2031

* § 49-0207. State land acquisition plan.

1. The department and the office shall prepare a state land acquisition plan to guide selection of projects for state acquisition taking into account regional advisory committee priorities and the department's and office's assessment of need for land acquisition projects. Such plan shall include an identification of:

a. lands, by region and category, for which acquisition is of a high priority in order to carry out the purposes of this title;

b. lands, by region, having statewide or regional environmental, historic, cultural or recreational significance that are threatened with diminishment of resource value;

c. the department's and office's priorities of categories of land, by region, for future acquisition; and

d. lands, by region, having statewide or regional environmental, historic, cultural or recreational significance which should be considered for state acquisition, but which do not qualify for acquisition under present law.

2. Such plan shall include consideration of the inventory prepared pursuant to section 49-0205 of this title and shall identify those areas within the state which are not adequately protected in such categories.

3. In preparing such plan, the department and office shall:

a. conduct one or more public hearings in each of the department's administrative regions.

b. consult with:

(i) the regional advisory committees;

(ii) officials of departments and agencies of the state having duties and responsibilities concerning the protection of open space and natural, environmental, historic, cultural or recreational resources;

(iii) officials and representatives of local governments in the state; and

(iv) persons, organizations and groups interested in the protection of open space and natural, environmental, historic, cultural or recreational resources of the state.

c. request and receive from any department, division, board, bureau, commission or any other agency of the state or any political subdivision thereof or any public authority such assistance and data as may be necessary to enable the department and office to carry out its responsibilities under this section.

4. The department and office shall prepare a draft plan and shall propose, no later than January thirty-first, nineteen hundred ninety-one, a schedule of public hearings thereon.

5. On or before January thirty-first, nineteen hundred ninety-two and every three years thereafter, the department and office shall submit the plan to the governor, the majority leader of the senate and the speaker of the assembly. Upon approval by the governor such plan shall become a guide for the implementation of the acquisition programs of the department and office.

* NB Effective January 1, 2031

§ 49-0209. Regional advisory committees.

1. There are hereby established regional advisory committees in each of the department's regions to provide the department and office with advice and recommendations from the public on the implementation of the land acquisition programs of the department and office and in order to provide the public with information regarding the activities of the department and office pursuant to this title.

2. Each regional committee shall:

- a. recommend policies and priorities for protection of lands in the region potentially eligible for state acquisition;
- b. recommend to the department and office specific studies or assessments which would assist in the development of land acquisition policies and priorities for the region;
- c. establish working liaison relationships with neighboring regional advisory committees where such liaison will further overall land acquisition objectives;
- d. develop guidelines for use in identifying priorities of land acquisition and recommending specific parcels for possible acquisition. Such guidelines may include:
 - (i) the priority ranking of properties for the region;
 - (ii) the degree to which an acquisition will help to meet a regional or statewide need;
 - (iii) the future costs and benefits which may be associated with the project;
 - (iv) the economic impact on adjacent parcels, the community or region and the local governments therein; and
 - (v) the ecological value of the project taking into account the type, variety and relative scarcity of the resources therein.
- e. advise the commissioners and the state land acquisition advisory council annually with respect to plans and priorities for their respective region, and communicate at such other times as may be needed to fulfill its responsibilities.
- f. review the state land acquisition plan prepared by the department and office pursuant to section 49-0207 of this title at least biennially and make recommendations regarding such plan as it affects the region.
- g. review any community preservation project plans developed pursuant to section six-s of the general municipal law.

3. Regional advisory committee members shall be knowledgeable of, and concerned with, the land preservation, conservation, historic, cultural, recreation and acquisition goals of this chapter. No employee of the department or office shall serve on a regional committee. At any time that a member of a regional committee has or may have a direct or indirect financial interest in or resulting from the acquisition or decision not to acquire an interest in land pursuant to this title, such member shall not participate in any discussion or deliberation of the committee concerning such acquisition.

4. A regional advisory committee shall consist of at least thirteen, and not more than twenty-three members. Each county outside the city of New York or the city of New York in the case of a county contained within the city of New York shall appoint members to its region's advisory committee in a manner designed to provide equal representation for all counties within a region on such committee, provided that the total number of local government appointees to a regional advisory committee shall not exceed one-half of the committee's membership. The commissioners shall appoint to each regional advisory committee additional members equal to one more than the total number of members eligible for appointment by local government. Each member of a regional advisory committee shall be a resident of that region, provided however, the commissioners may appoint to each regional advisory committee up to two members who are not residents of that region. Each regional committee shall meet as it may deem necessary to carry out its responsibilities.

5. Regional committees may request and shall receive from the department and the office such assistance and data as may be determined reasonable for the proper execution of their responsibilities.

6. Regional committees shall be established no later than September first, nineteen hundred ninety, and shall make initial recommendations no later than December first, nineteen hundred ninety, to the commissioners and the state land acquisition advisory council and shall report at least biennially thereafter.

§ 49-0211. State land acquisition advisory council.

1. The council shall consist of seven members: the commissioner of environmental conservation and the commissioner of parks, recreation and historic preservation, and the following officials or their designees: the governor, the majority leader of the senate, the speaker of the assembly, the minority leader of the senate and the minority leader of the assembly. The governor shall appoint the chair. Persons serving as a member of the council pursuant to designation shall serve at the pleasure of the designating authority, without compensation, but shall be entitled to receive reimbursement of reasonable expenses necessarily incurred in the performance of their duties pursuant to the provisions of this title.

2. The provisions of section seventy-four of the public officers law shall be applicable to the members of the council in connection with their duties under this article. At any time that a member of the council has or may have a direct or indirect financial interest in or resulting from the proposed acquisition or decision not to acquire land or an interest in land, such member shall not participate in any discussion or deliberation of the council concerning such land or interest.

3. The advisory council shall:

a. advise and make recommendations to the commissioners regarding acquisition goals and priorities to ensure a balance of statewide and regional interests in acquisition;

b. have an opportunity to review and make recommendations regarding specific parcels proposed by the commissioners for acquisition prior to the approval by the department or the office of any parcel for acquisition; and

c. review the annual reporting of the regional advisory committees,

any community preservation project plans developed pursuant to section six-s of the general municipal law, the department and the office, and the state land acquisition plan.

4. Notwithstanding the provisions of article six of the public officers law, no records of the advisory council shall be available for public inspection. Notwithstanding the provisions of article seven of the public officers law, no meeting or proceeding of the advisory council shall be open to the public. All proceedings of the advisory council shall be confidential. Members of the advisory council may participate in a meeting by means of a conference telephone or similar communications equipment and may exchange information by mail.

5. In carrying out its responsibilities pursuant to this article, the council shall take into account the regional and state land acquisition priorities and policies.

§ 49-0213. Annual report.

No later than January thirty-first, nineteen hundred ninety-one, and on an annual basis thereafter, the commissioners shall report on the department's and the office's land acquisition activities, including:

1. lands acquired, whether in fee title or by easement, funds obligated and disbursed and acreage obtained over the past year and cumulatively since the effective date of this title;
2. a description of the state's land acquisition plans and priorities for the coming year; and
3. the recommendations of the regional advisory committees.

§ 49-0215. Annual budget request.

The commissioners' annual budget request for land acquisition

reappropriations shall include an itemization of contracts obligated from such appropriations as of the date of such submission.

TITLE 3

CONSERVATION EASEMENTS

Section 49-0301. Declaration of policy and statement of purpose.

49-0303. Definitions.

49-0305. Conservation easements; certain common law rules not applicable.

49-0307. Procedures for modifying or extinguishing conservation easement.

49-0309. Scope of this title.

49-0311. Severability.

§ 49-0301. Declaration of policy and statement of purpose.

The legislature hereby finds and declares that in order to implement the state policy of conserving, preserving and protecting its environmental assets and natural and man-made resources, the preservation of open spaces, the preservation, development and improvement of agricultural and forest lands, the preservation of areas which are significant because of their scenic or natural beauty or wetland, shoreline, geological or ecological, including old-growth forest, character, and the preservation of areas which are significant because of their historical, archaeological, architectural or cultural amenities, is fundamental to the maintenance, enhancement and improvement of recreational opportunities, tourism, community attractiveness, balanced economic growth and the quality of life in all areas of the state.

§ 49-0303. Definitions.

When used in this title:

1. "Conservation easement" means an easement, covenant, restriction or other interest in real property, created under and subject to the provisions of this title which limits or restricts development, management or use of such real property for the purpose of preserving or maintaining the scenic, open, historic, archaeological, architectural, or natural condition, character, significance or amenities of the real property in a manner consistent with the public policy and purpose set forth in section 49-0301 of this title, provided that no such easement shall be acquired or held by the state which is subject to the provisions of article fourteen of the constitution.

2. "Not-for-profit conservation organization" means a not-for-profit corporation organized inter alia for the conservation or preservation of real property and which has the power to acquire interests in real property. Such organization must have qualified as exempt for federal tax purposes pursuant to Section 501 (c)(3) of the internal revenue code or any similar successor statutory provision.

3. "Public body" means the state or a municipal corporation as that term is defined in section two of the general municipal law or the United States of America acting by and through the department of the interior. Such term shall further include the Palisades interstate park commission; the Central Pine Barrens joint planning and policy commission; and a soil and water conservation district as that term is defined in section three of the soil and water conservation districts law.

4. "Third party enforcement right" means a right which may be granted in a conservation easement which empowers a public body or a not-for-profit conservation organization which is not a holder of the easement to enforce any of the terms of the easement.

§ 49-0305. Conservation easements; certain common law rules not applicable.

1. A conservation easement may be created or conveyed only by an

instrument which complies with the requirements of section 5-703 of the general obligations law and which is subscribed by the grantee. It shall be of perpetual duration unless otherwise provided in such instrument.

2. A conservation easement shall be modified or extinguished only pursuant to the provisions of section 49-0307 of this title. Any such modification or extinguishment shall be set forth in an instrument which complies with the requirements of section 5-703 of the general obligations law or in an instrument filed in a manner prescribed for recording a conveyance of real property pursuant to section two hundred ninety-one of the real property law.

3. (a) A conservation easement shall be held only by a public body or not-for-profit conservation organization, except that the state shall not be authorized or empowered to acquire or hold any conservation easement which is subject to the provisions of article fourteen of the constitution.

(b) Any conservation easement created pursuant to this title shall not limit, restrict or modify the right to construct, operate or continue the use of any facility, or impede any activity, duly authorized under the applicable provisions of the federal natural gas act (15 U.S.C. §§ 717-717 w).

4. A conservation easement shall be duly recorded and indexed as such in the office of the recording officer for the county or counties where the land is situate in the manner prescribed by article nine of the real property law. The easement shall describe the property encumbered by the easement by adequate legal description or by reference to a recorded map showing its boundaries and bearing the seal and signature of a licensed land surveyor, or if the easement encumbers the entire property described in a deed of record, the easement may incorporate by reference the description in such deed, otherwise it shall refer to the liber and page of the deed or deeds of the record owner or owners of the real property burdened by the conservation easement. An instrument for the purpose of creating, conveying, modifying or terminating a conservation easement shall not be effective unless recorded. A person causing any such document to be so recorded shall forthwith forward a copy thereof

to the department, which shall maintain a file of conservation easements.

5. A conservation easement may be enforced in law or equity by its grantor, its holder or by a public body or any not-for-profit conservation organization designated in the easement as having a third party enforcement right, and is enforceable against the owner of the burdened property. Enforcement shall not be defeated because of any subsequent adverse possession, laches, estoppel or waiver. No general law of the state which operates to defeat the enforcement of any interest in real property shall operate to defeat the enforcement of any conservation easement unless such general law expressly states the intent to defeat the enforcement of such easement or provides for the exercise of the power of eminent domain. It is not a defense in any action to enforce a conservation easement that:

- (a) It is not appurtenant to an interest in real property;
- (b) It can be or has been assigned to another holder;
- (c) It is not of a character that has been recognized traditionally at common law;
- (d) It imposes a negative burden;
- (e) It imposes affirmative obligations upon the owner of any interest in the burdened property, or upon the holder;
- (f) The benefit does not touch or concern real property; or
- (g) There is no privity of estate or of contract.

6. The holder of a conservation easement, its agents, employees, or other representatives may enter and inspect the property burdened by a conservation easement in a reasonable manner and at reasonable times to assure compliance with the restriction.

7. The department shall promulgate regulations establishing standards for conservation easements which shall specify but not be limited to:

- (a) the minimum term for a conservation easement as is necessary and appropriate to achieve the policy and purpose of this title, except that such standards shall not preclude taxpayers who own or convey conservation easements from qualifying for benefits under federal or state tax laws when such benefits would otherwise be available by virtue

of such ownership or conveyance; and

(b) standards and procedures which require each conservation easement held by a public body to include terms under which the easement shall be modified where the commissioner has found after a non-adjudicatory public hearing at which the public shall be given opportunity to be heard, that such easement is inconsistent with any other interest in land required for the local gathering, transmission or distribution of gas, electricity, water, telephone or cable television services and that no reasonable alternative exists for the local gathering, transmission or distribution of such service. Notice of any such hearing shall be given to the public pursuant to thirty days published notice in the state register, the environmental notice bulletin and in a newspaper having general circulation in the county where the real property burdened by the easement is situated and individual notice shall be given in writing to any person who may be entitled to enforce such easement pursuant to the provisions of subdivision five of this section at such address as such person shall file with the commissioner.

8. Where a conservation easement is modified pursuant to subdivision seven of this section, or pursuant to any regulations promulgated thereunder, such easement shall be modified only to the minimum extent necessary to accommodate the local gathering, transmission or distribution of gas, electricity, water, telephone or cable television service.

9. Written notice shall be provided to the director of the budget and notice published in the state register and the environmental notice bulletin at least thirty days prior to the acquisition, or entry into a contract for the acquisition, on behalf of the state of any conservation easement.

§ 49-0307. Procedures for modifying or extinguishing conservation easement.

1. A conservation easement held by a not-for-profit conservation organization may only be modified or extinguished:

- (a) as provided in the instrument creating the easement; or
- (b) in a proceeding pursuant to section nineteen hundred fifty-one of the real property actions and proceedings law; or
- (c) upon the exercise of the power of eminent domain.

2. A conservation easement held by a public body outside the Adirondack park or Catskill park, as defined in section 9-0101 of this chapter, may only be modified or extinguished:

- (a) as provided in the instrument creating the easement; or
- (b) in a proceeding pursuant to section nineteen hundred fifty-one of the real property actions and proceedings law; or
- (c) upon the exercise of the power of eminent domain; or

* (d) where land subject to a conservation easement or an interest in such land is required for a major utility transmission facility which has received a certificate of environmental compatibility and public need pursuant to article seven of the public service law or a major electric transmission facility which has received a siting permit pursuant to article VIII of the public service law, upon the filing of such certificate or permit in a manner prescribed for recording a conveyance of real property pursuant to section two hundred ninety-one of the real property law or any other applicable provision of law.

* NB Effective until December 31, 2040

* (d) where land subject to a conservation easement or an interest in such land is required for a major utility transmission facility which has received a certificate of environmental compatibility and public need pursuant to article seven of the public service law or is required for a major steam electric generating facility which has received a certificate of environmental compatibility and public need pursuant to article eight of the public service law, upon the filing of such certificate in a manner prescribed for recording a conveyance of real property pursuant to section two hundred ninety-one of the real property law or any other applicable provision of law.

* NB Effective December 31, 2040

3. A conservation easement held by a public body inside the Adirondack park or the Catskill park, as defined in section 9-0101 of this chapter, may be modified or extinguished:

(a) as provided in the instrument creating the easement; or
(b) upon the exercise of the power of eminent domain; or
(c) unless such easement is held by the state, in a proceeding pursuant to section nineteen hundred fifty-one of the real property actions and proceedings law; or

(d) where such easement is held by the state, upon a determination by the commissioner, after a non-adjudicatory public hearing, at which the public shall be given opportunity to be heard, that the easement can no longer substantially accomplish its original purposes or any of the purposes set forth in section 49-0301 of this title. Notice of any such hearing shall be given to the public pursuant to thirty days published notice in the state register, the environmental notice bulletin and in a newspaper having general circulation in the county where the real property burdened by the easement is situated and individual notice shall be given in writing to any person who may be entitled to enforce such easement pursuant to subdivision five of section 49-0305 of this title at such address as such person shall file with the commissioner; or

* (e) where land subject to a conservation easement or an interest in such land is required for a major utility transmission facility which has received a certificate of environmental compatibility and public need pursuant to article seven of the public service law, a major electric transmission facility which has received a siting permit pursuant to article VIII of the public service law, or a major electric generating facility or repowering project which has received a certificate of environmental compatibility and public need pursuant to article ten of the public service law, upon the filing of such certificate or permit in a manner prescribed for recording a conveyance of real property pursuant to section two hundred ninety-one of the real property law or any other applicable provision of law, provided that such certificate or permit contains a finding that the public interest in the conservation and protection of the natural resources, open spaces and scenic beauty of the Adirondack or Catskill parks has been considered.

* NB Effective until December 31, 2040

* (e) where land subject to a conservation easement or an interest in such land is required for a major utility transmission facility which

has received a certificate of environmental compatibility and public need pursuant to article seven of the public service law or is required for a major steam electric generating facility which has received a certificate of environmental compatibility and public need pursuant to the former article eight of the public service law, or a major electric generating facility or repowering project which has received a certificate of environmental compatibility and public need pursuant to article ten of the public service law, upon the filing of such certificate in a manner prescribed for recording a conveyance of real property pursuant to section two hundred ninety-one of the real property law or any other applicable provision of law, provided that such certificate contains a finding that the public interest in the conservation and protection of the natural resources, open spaces and scenic beauty of the Adirondack or Catskill parks has been considered.

* NB Effective December 31, 2040

4. Where a conservation easement is modified or extinguished pursuant to paragraph (d) of subdivision two or paragraph (e) of subdivision three of this section, such easement shall be modified or extinguished only to the minimum extent necessary to accommodate the facility which is the subject of the certificate of environmental compatibility and public need.

5. Nothing in this section shall be construed to preclude the extinguishment or modification of a conservation easement pursuant to the applicable provisions of the federal natural gas act (15 U.S.C. §§ 717-717 w).

§ 49-0309. Scope of this title.

This title shall not affect any interests or rights in real property which are not conservation easements, and shall not affect the rights of owners to convey any interests in real property which they could now create under existing law without reference to the terms of this title. Nothing in this title shall diminish the powers granted by any other law to acquire interests or rights in real property by purchase, gift,

eminent domain or otherwise and to use the same for public purposes. Nothing in this title shall be construed to alter the authority otherwise available to any public body to acquire conservation easements for the purposes of section 49-0301 of this title by eminent domain.

§ 49-0311. Severability.

The provisions of this title shall be severable, and if any clause, sentence, paragraph, subdivision or part of this title shall be adjudged by any court of competent jurisdiction to be invalid, such judgment shall not affect, impair or invalidate the remainder thereof, but shall be confined in its operation to the clause, sentence, paragraph, subdivision or part thereof directly involved in the controversy in which such judgment shall have been rendered; provided that if a conservation easement created pursuant to this title is determined by any court of competent jurisdiction to be land or water or an interest in land or water subject to the provisions of article fourteen of the constitution then the authority of the state to hold or acquire such easement and the conveyance to the state of such easement shall be void ab initio.

TITLE 5

STATE GEOLOGICAL TRAIL

Section 49-0501. Designation of geoparks and other sites.

49-0503. Establishment of state geological trail.

49-0505. State geological planning and advisory council.

§ 49-0501. Designation of geoparks and other sites.

1. For the purposes of this title, a "geopark" is an area or territory of the state encompassing one or more sites of scientific importance, for not only geological reasons but also by virtue of their archaeological, ecological and cultural value.

2. The commissioner shall study and may designate areas, territories and sites within the state which constitute geoparks and other sites which have geological significance. Such geoparks and sites may include, but not be limited to:

a. Cayuga heights, along state route thirty-four in the county of Tompkins;

b. Cascadilla creek, along University avenue in the city of Ithaca, county of Tompkins;

c. Ithaca Falls park Fall creek, along Lincoln street in the city of Ithaca, county of Tompkins;

d. Taughannock Falls state park, in the county of Tompkins;

e. Niagara river gorge and Power Plant Haul road, in the county of Niagara;

f. Whirlpool state park, in the county of Niagara;

g. the mouth of Eighteen Mile creek at Lake Erie, in the county of Erie;

h. Buffalo creek at Bullisi road, in the county of Erie;

i. Fall brook along state route sixty-three, in the town of Geneseo, county of Livingston;

j. LeRoy quarry, in the town of LeRoy, county of Genesee;

k. the Potsdam sandstone at Ausable chasm, in the county of Clinton;

l. Ausable falls, in the county of Clinton;

m. Whiteface mountain, in the county of Essex;

- n. the Chattermarks on Bear mountain, in the county of Rockland;
- o. the erratic and groves in Central park, in the county of New York;
- p. the glacial channel in Central park, in the county of New York;
- q. the burrows in sandstone in Watkins Glen, in the county of Schuyler;
- r. the upper devonian shale, siltstone and sandstone in Watkins Glen gorge, in the county of Schuyler;
- s. Watkins Glen state park, in the county of Schuyler;
- t. Letchworth state park, in the county of Wyoming;
- u. Penn Dixie fossil park and nature preserve, in the county of Erie;
- v. Lafarge quarry, in the county of Ulster;
- w. Seneca stone quarry, in the county of Seneca;
- x. Taughannock park road in Taughannock Falls state park, in the county of Tompkins;
- y. State route four and twenty-two, in the town of Whitehall, county of Washington;
- z. Rondaxe road on Bald mountain, in the town of Webb, county of Herkimer;
- aa. Cannan road, in the towns of East Martinsburg and Knox, county of Lewis;
- bb. Barnet garnet mine, in the county of Warren;
- cc. John Boyd Thacher state park, in the county of Albany;

- dd. the Petrified Sea Gardens, in the county of Saratoga;
- ee. Lester park, in the county of Saratoga;
- ff. Saratoga Springs state park, in the county of Saratoga;
- gg. Skytop Lane quarry, in the county of Delaware;
- hh. Sidney Mountain quarry, in the county of Delaware;
- ii. Sidney Mountain Bluestone quarry, in the county of Delaware;
- jj. Sidney Center outcrops, in the county of Delaware;
- kk. Sheetz quarry, in the county of Delaware;
- ll. Pine Hill road, in the county of Delaware;
- mm. Chimney Bluffs state park, in the county of Wayne;
- nn. Wiscory Falls, in the county of Allegany;
- oo. White creek, in the county of Allegany;
- pp. Sixtown creek, in the county of Allegany;
- qq. Rushford Dam park, in the county of Allegany;
- rr. Caneadea Gorge overlook, in the county of Allegany;
- ss. Buttermilk Falls state park, in the county of Cayuga;
- tt. Chittenango Falls state park, in the county of Madison;
- uu. Cohoes Falls, in the county of Saratoga;

vv. Clarksville cave, in the county of Albany;

ww. Joralemon town park, in the county of Albany;

xx. Normanskill gorge, in the county of Albany;

yy. Barton garnet mine, in the county of Warren;

zz. Kimberlite dike, in the county of Onondaga;

aaa. Howes Cave quarry, in the county of Schoharie;

bbb. Howe Caverns, in the county of Schoharie;

ccc. Kaaterskill Falls, in the county of Greene;

ddd. Knox cave, in the county of Albany;

eee. Manorkill Falls, in the county of Schoharie;

fff. McFail's Cave nature preserve, in the county of Schoharie;

ggg. Montauk Point, in the county of Suffolk;

hhh. Montour Falls, in the county of Schuyler;

iii. Niagara Falls state park, in the county of Niagara;

jjj. Onesquethaw Cave, in the county of Albany;

kkk. Stark's Knob, in the county of Saratoga;

lll. Cairo Fossil Forest, in the county of Greene;

mmm. Gilboa Fossil Forest, in the county of Schoharie; and

nnn. Herkimer Diamond Mines, in the county of Herkimer.

3. For each area, territory and site designated pursuant to subdivision two of this section, the commissioner, in cooperation with the commissioners of transportation and economic development, may:

a. establish a management plan designed to foster socio-economic development that is sustainable;

b. establish methods for conserving and enhancing its geological heritage; and

c. establish best practices for conservation.

§ 49-0503. Establishment of state geological trail.

1. The commissioner, in cooperation with the commissioners of transportation and economic development, shall establish a state geological trail to include the areas, territories and sites designated by the commissioner pursuant to subdivision two of section 49-0501 of this title. The purpose of such trail shall be to identify and promote such areas, territories and sites to the public, and promote the economic, scientific, cultural and conservation aspects thereof.

2. To the greatest extent practicable, the state geological trail shall include areas and sites across the state going east and west, and north and south throughout the entire state. Consideration shall be given to having the designated portions of the state geological trail intersect at the city of Albany, in recognition of its importance in the geology of the state. In designating the state geological trail consideration shall also be given to scientific and/or scenic importance relating to geological, and related cultural, ecological and archeological features.

3. In developing and approving such trail, the commissioner shall ensure that proposed trail routes do not conflict with existing scenic byways designated pursuant to section three hundred forty-nine-dd of the

highway law or wine trails designated pursuant to section three hundred forty-three-k of the highway law, and ensure that the trail route is designed and laid out so that it is relatively simple and easy to follow for users and contains few branches or laterals that dead end.

§ 49-0505. State geological planning and advisory council.

1. For the purposes of this title, "advisory council" means the state geological planning and advisory council established pursuant to this section.

2. There shall be established within the department the state geological planning and advisory council. The advisory council shall be composed of ten members as follows:

a. the commissioner, or his or her designee who is an officer or employee of the department;

b. the commissioner of economic development, or his or her designee who is an officer or employee of the department of economic development;

c. the commissioner of parks, recreation and historic preservation, or his or her designee who is an officer or employee of the office of parks, recreation and historic preservation;

d. the commissioner of transportation, or his or her designee who is an officer or employee of the department of transportation;

e. two members appointed by the governor, of whom:

(1) one shall have been or is engaged in trail planning and/or management, and

(2) one shall teach geology or be a geology professional;

f. two members appointed by the temporary president of the senate, having expertise in the field of ecology, conservation or trail planning; and

g. two members appointed by the speaker of the assembly, having expertise in the field of ecology, conservation or trail planning.

3. The members of the advisory council appointed pursuant to paragraphs e, f and g of subdivision two of this section shall serve terms of four years. Vacancies in the membership of the advisory council shall be filled in the manner provided for original appointments.

4. The commissioner, or his or her designee, shall be the chair of the advisory council. The advisory council shall meet not less than three times each calendar year, and more frequently at the call of the chair.

5. The advisory council may establish:

a. criteria for signage on the state geological trail, including means of providing information about geological features associated with each particular portion of such trail. Provided, however, that all such signage shall comply with the New York state manual and specifications for a uniform system of traffic control devices as such manual and specifications may be amended from time to time, certified by a licensed professional engineer who specializes in traffic operations. For the purposes of this section, the term "New York state manual and specifications for a uniform system of traffic control devices" shall mean the national manual of uniform traffic control devices promulgated by the federal highway administration pursuant to subpart (f) of part 655 of title 23 of the code of federal regulations and the New York state supplement adopted by the commissioner of transportation pursuant to section sixteen hundred eighty of the vehicle and traffic law; and

b. state geological trail publications, guidelines for interpretive programs and themes relating to portions of the state geological trail, and an internet website providing directional information on educational institutions that have programs relating to the geological and conservation aspects of the portions of the state geological trail.

ARTICLE 51

IMPLEMENTATION OF ENVIRONMENTAL QUALITY BOND ACT OF 1972

- Title
1. General provisions
 3. Water quality improvement projects
 5. Air quality improvement projects
 7. Land preservation and improvement projects
 9. Solid waste recovery and management
 11. Park lands preservation projects

TITLE 1

GENERAL PROVISIONS

- Section 51-0101. Definitions.
- 51-0103. Allocation of moneys.
- 51-0105. State assistance application procedure.
- 51-0107. Powers and duties of the commissioner.
- 51-0109. Powers and duties of a municipality.

§ 51-0101. Definitions.

As used in this article the following terms shall mean and include:

1. "Commissioner" shall mean the commissioner of environmental conservation except that within and for the purposes of title eleven of this article, the commissioner of parks and recreation.

2. "Department" shall mean the department of environmental conservation.

3. "Federal assistance" except for federal public works act funds granted for New York city's Betts avenue incinerator and Hamilton avenue transfer station and as otherwise defined in this article, shall mean funds available, other than by loan, from the federal government to a municipality, either directly or through allocation by the state for construction or program purposes pursuant to any federal law or program.

4. "Governing body" shall mean

a. in the case of a town, a town board;

b. in the case of a county outside of the city of New York, the county board of supervisors or other elective governing body;

c. in the case of a city or village, the local legislative body thereof, as the term is defined in the municipal home rule law;

d. in the case of a public benefit corporation, the board of directors, members or trustees thereof;

e. in the case of a school district, the board of education thereof;

f. in the case of a supervisory district, the board of cooperative educational services thereof.

5. "Lands" shall mean lands, improvements and structures thereon or rights, franchises, and interests therein, lands under water and riparian rights, and shall also mean any and all interests in lands less than full title, including without limitations, easements, permanent or temporary, rights of way, uses, leases, licenses, and any other estate, interests or right in lands, legal or equitable.

6. "Municipality," except as otherwise defined within this article, shall mean a city, county, town, village, public benefit corporation or school district or an improvement district within a city, county, town or village, or any combination thereof.

7. "Office" shall mean the office of parks and recreation.

§ 51-0103. Allocation of moneys.

The moneys received by the state from the sale of bonds pursuant to the environmental quality bond act of nineteen hundred seventy-two shall

be expended pursuant to appropriations, in the following amounts and (a) for deposit in the water pollution control revolving fund established by section twelve hundred eighty-five-j of the public authorities law, or (b) as specifically provided for in titles 3, 5, 7, 9 and 11 of this article:

1. For preserving, enhancing, restoring and improving the quality of water as set forth in title 3 of this article or in section twelve hundred eighty-five-j of the public authorities law and section 17-1909 of this chapter, six hundred fifty million dollars (\$650,000,000); and

2. For preserving, enhancing, restoring and improving the quality of air as set forth in title 5 of this article, one hundred fifty million dollars (\$150,000,000); and

3. For preserving, enhancing, restoring and improving the quality of land as set forth in titles 7, 9 and 11 of this article, three hundred fifty million dollars (\$350,000,000).

§ 51-0105. State assistance application procedure.

1. A municipality upon the recommendation of its governing body may submit an application for state assistance toward the cost of any project which is eligible for state assistance pursuant to this article to the commissioner in such form and containing such information as he may require.

2. The commissioner shall review such project application and may approve, disapprove or recommend modifications thereto consistent with applicable law, criteria, standards or rules and regulations relative to such projects.

3. Upon approval of a project application, a municipality may enter into a contract as further provided within this article with the commissioner for payment of state assistance to be received pursuant to this article.

§ 51-0107. Powers and duties of the commissioner.

In administering the provisions of this article, the commissioner:

1. shall make an itemized estimate of funds or appropriations required annually for inclusion in the executive budget.
2. may in the name of the state as further provided within this article contract to make, within the limitations of appropriations available therefor, a state grant for payment to a municipality representing the state share of the cost of a project approved and to be undertaken pursuant to this article. Such contracts shall be subject to approval by the state comptroller and as to form by the attorney general.
3. shall approve vouchers for the payment of local assistance pursuant to an approved contract. All such payments shall be paid on the audit and warrant of the state comptroller.
4. may perform such other and further acts and promulgate such rules and regulations as may be necessary, proper or desirable to carry out the provisions of this article.

§ 51-0109. Powers and duties of a municipality.

A municipality shall have the power and authority to:

1. undertake and carry out any project for which state assistance is received or to be received pursuant to this article and maintain and operate such project.
2. expend money received from the state pursuant to this article for costs incurred in conjunction with the approved project.

3. perform such other and further acts as may be necessary, proper or desirable to carry out a project or obligation, duty or function related thereto.

TITLE 3

WATER QUALITY IMPROVEMENT PROJECTS

Section 51-0303. Definitions.

51-0305. Contracts for water quality improvement projects.

§ 51-0303. Definitions.

As used in this title, the following terms shall mean and include:

2. "Construction". The erection, building, acquisition, alteration, reconstruction, improvement or extension of sewage treatment works; the inspection and supervision thereof; and the engineering, architectural, legal, fiscal and economic investigations and studies, surveys, designs, plans, working drawings, specifications, procedures, and other actions necessary thereto;

3. "Eligible project". A water quality improvement project for the construction of sewage treatment works,

a. for which a permit has been issued by the department,

b. which is, in the judgment of the commissioner, in accord with applicable comprehensive studies and reports,

c. which is approved for federal pollution abatement assistance,

d. which conforms with applicable law, rules and regulations, and

e. which is, in the judgment of the commissioner, necessary for the accomplishment of the state water pollution control program;

4. "Federal pollution abatement assistance". Funds available to a municipality, either directly or through allocation by the state, from the federal government as grants for construction of sewage treatment works, pursuant to the federal water pollution control act and acts amendatory thereto;

5. "Municipality". A city, county, town, village, the New York state environmental facilities corporation, a sewer authority within a city, or an improvement district or district corporation within a city, county, town or village, or Indian tribes residing within New York state, or any combination thereof;

6. "Project cost". The actual cost or estimated reasonable cost, whichever is lower, of construction of an eligible project;

7. "Water quality improvement project". A sewage treatment works for the purpose of treating, neutralizing or stabilizing sewage, including treatment or disposal plants, the necessary intercepting, outfall and outlet sewers, pumping stations integral to such plants or sewers, equipment and furnishings thereof and their appurtenances.

§ 51-0305. Contracts for water quality improvement projects.

1. The commissioner, in the name of the state, may enter into contracts with municipalities having power to construct, operate and maintain sewage treatment works, and any such municipality may enter into a contract with the commissioner concerning eligible projects. Any such contract may include such provisions as may be agreed upon by the parties thereto, and shall include, in substance, the following provisions:

a. Current estimate of the reasonable cost of the project as determined by the commissioner at the time of execution of the contract. The commissioner shall not be precluded by section two hundred twenty of this title from determining a reasonable cost for any project enumerated in such section different from the estimated cost of such section.

b. An agreement by the commissioner to pay to the municipality, during the progress of construction subject to final computation and determination of the total state grant upon completion of the entire project reflecting the project cost, a portion of the non-federal share of the cost of any project, phase or portion thereof approved for a federal treatment works construction grant, determined by the following formulae:

(i) for any project which has received a Federal Clean Water Act section 202(a)(1) grant in an amount which is that per centum of the cost of construction authorized for federal fiscal years beginning July first, nineteen hundred seventy-one and ending September thirtieth, nineteen hundred eighty-four, inclusive, an amount that is one-half of the non-federal share of the cost of the eligible project, not to exceed thirty percent thereof;

(ii) for any project which has received a grant pursuant to Federal Clean Water Act section 202(a)(1) or section 201 as amended in nineteen hundred eighty-one, which is that reduced per centum of the costs of construction authorized for federal fiscal years beginning on and after October first, nineteen hundred eighty-four, an amount that is two-thirds of the non-federal share of the eligible cost of the project, not to exceed thirty percent thereof;

(iii) for any project or portion of a project which has received a federal grant for utilization of innovative or alternative treatment processes and techniques pursuant to the provisions of section 202(a)(2) of the Federal Clean Water Act, thirty percent of the cost of the innovative or alternative portion of the eligible project, provided that the local share of the innovative or alternative portion will be a minimum of seven and one-half percent.

c. An agreement by the municipality

1. to proceed expeditiously with, and complete, the project in accordance with plans approved by the department,

2. to commence operation of the sewage treatment works on completion of the project, and not to discontinue operation or dispose of the

sewage treatment works without the approval of the commissioner,

3. to operate and maintain the sewage treatment works in accordance with applicable provisions of law, the state sanitary code or rules and regulations of the commissioner,

4. to provide for the payment of the municipality's share of the cost of the project.

d. A provision that, in the event that federal pollution abatement assistance which was not included in the calculation of the state payment pursuant to paragraph b of this subdivision becomes available to the municipality, the amount of the state payment shall be recalculated with the inclusion of such additional federal assistance and the municipality shall either:

1. pay to the state the amount by which the state payment actually made exceeds the state payment determined by the recalculation or

2. if such additional federal pollution abatement assistance has not been received by the municipality, authorize the state to receive and retain an amount from the federal government equal to the amount to which it would be entitled under subparagraph 1 hereof.

2. In connection with each contract, the commissioner shall keep adequate records of the amount of the payment by the state pursuant to paragraph b of subdivision one of this section of the amount of federal assistance received by the municipality. Such records shall be retained by the commissioner and shall establish the basis for recalculation of the state payment as required by paragraph d of subdivision one of this section.

TITLE 5

AIR QUALITY IMPROVEMENT PROJECTS

Section 51-0501. Allocation of moneys.

51-0503. Definitions.

51-0505. Approval of projects.

51-0507. Contracts for municipal air quality improvement projects.

§ 51-0501. Allocation of moneys.

The moneys received by the state from the sale of bonds pursuant to the environmental quality bond act of nineteen hundred seventy-two shall be expended in the following amounts pursuant to appropriation therefor:

1. For state air quality improvement projects, fifty million dollars (\$50,000,000) for upgrading state facilities including the Pilgrim, Kings Park, Middletown, Hudson River, Harlem Valley, St. Lawrence, Utica, Marcy, Binghamton, Rochester and Gowanda State Hospitals; Green Haven, Wallkill, Auburn and Attica Correctional Facilities; the Wassaic, Craig and West Seneca State Schools; State University units at Binghamton and Buffalo; the Hudson Training School for Girls; Syracuse Psychiatric Hospital; and the Albion State Institution.

2. For municipal air quality improvement projects, one hundred million dollars (\$100,000,000).

§ 51-0503. Definitions.

As used in this title, the following terms shall include and mean:

1. "Air quality improvement project." a. The upgrading of an existing incinerator, furnace or boiler and appurtenances thereto owned and operated by the state or a municipality, or

b. The establishment of a solid waste recovery and management project, as defined in subdivision two of section 51-0903 of this article, which directly enables permanent closure of an incinerator that is operating in a manner not in compliance with applicable air pollution control regulations and which project in all other respects qualifies for state

assistance pursuant to title nine of this article.

2. "Cost." The cost of upgrading including the cost of all systems, facilities, machinery and equipment, engineering and architectural services, plans and specifications, consultant and legal services, and other direct expenses incident to such upgrading less any federal assistance received or to be received.

3. "Municipality." A city, county, town, village or school district or an improvement district within a city, county, town or village, or any combination thereof.

4. "Upgrading." Construction, reconstruction, renovation, or other process or activity necessary to insure that an existing incinerator or furnace or boiler meets air quality emission standards promulgated by the commissioner.

§ 51-0505. Approval of projects.

1. Air quality improvement projects shall be undertaken pursuant to this title only with the approval of the commissioner, and in the case of municipal projects, pursuant to an approved contract for state assistance.

2. In reviewing projects, the commissioner shall give due consideration to:

a. the urgency of the need for upgrading to meet ambient air quality standards;

b. the age and condition of the incinerator, furnace or boiler;

c. the economic feasibility of upgrading;

d. expected increased efficiency;

e. expected life of any public facility associated with the incinerator, furnace, or boiler;

f. the reduction in air contaminants required to bring the incinerator, furnace, or boiler emissions into compliance with the applicable air quality standards.

g. in the case of a project defined in paragraph b of subdivision one of section 51-0503 of this title, the matters required to be taken into account under sections 51-0905 and 51-0907 of this article.

3. The state share of the cost of a municipal air quality improvement project shall not exceed fifty (50) percent of the cost thereof.

§ 51-0507. Contracts for municipal air quality improvement projects.

1. The commissioner, in the name of the state, may enter into contracts with municipalities to undertake air quality improvement projects, and any such municipality may enter into a contract with the commissioner. Any such contract may include such provisions as may be agreed upon by the parties thereto, and shall include, in substance, the following provisions:

a. An estimate of the reasonable cost of the project as determined by the commissioner;

b. An agreement by the commissioner to pay to the municipality, during the progress of construction or following completion of construction as may be agreed upon by the parties, an amount, not to exceed 50 percent of the cost of the project;

c. An agreement by the municipality

(1) to proceed expeditiously with, and complete, the project as approved by the commissioner,

(2) to operate and maintain the upgraded incinerator, furnace, or boiler in accordance with applicable law and rules and regulations, and,

in the case of a project defined in paragraph b of subdivision one of section 51-0503 of this title, the agreement shall include the provisions contemplated by paragraph c of subdivision one of section 51-0907 of this article,

(3) to apply for and make reasonable efforts to secure federal assistance, if any, for the project,

(4) to secure the approval of the commissioner before applying for such federal assistance, in order to maximize the amounts of such assistance received or to be received for all projects in New York state,

(5) to provide for the payment of the municipality's share of the cost of the project;

d. A provision that, in the event that federal assistance which was not included in the calculation of the state payment becomes available to the municipality, the amount of the state payment shall be recalculated with the inclusion of such federal assistance and the municipality shall pay to the state the amount by which the state payment actually made exceeds the state payment determined by the recalculation.

2. In connection with each contract, the commissioner shall keep adequate records of the amount of the payment by the state and of the amount of federal assistance, if any, received by the municipality. Such records shall be retained by the commissioner and shall establish the basis for recalculation of the state payment as required herein.

TITLE 7

LAND PRESERVATION AND IMPROVEMENT PROJECTS

Section 51-0701. Allocation of moneys.

51-0703. Definitions.

51-0705. Approval and execution of state projects.

51-0709. Approval of municipal wetlands restoration projects.

51-0711. Contracts for municipal wetlands restoration projects.

51-0713. Restriction of alienation of wetlands.

§ 51-0701. Allocation of moneys.

The moneys received by the state from the sale of bonds sold pursuant to the environmental quality bond act of nineteen hundred seventy-two shall be expended pursuant to appropriations therefor in accordance with the following allocations, supplemented by such federal assistance as may be available:

1. For forest preserve projects, fifty-nine million dollars (\$59,000,000) of which fifteen million dollars (\$15,000,000) is allocated for land acquisition in the Catskill Park and forty-four million dollars (\$44,000,000) is allocated for land acquisition in the Adirondack Park.

2. Wetland preservation and restoration projects, twenty-seven million dollars (\$27,000,000) of which four million dollars (\$4,000,000) is allocated for wetlands restoration projects; eighteen million dollars (\$18,000,000) is allocated for the acquisition of five thousand (5,000) acres of tidal wetlands; and five million dollars (\$5,000,000) is allocated for the acquisition of fifty thousand (50,000) acres of freshwater wetlands.

3. For unique area preservation projects, ten million dollars (\$10,000,000) of which four million five hundred thousand dollars (\$4,500,000) is allocated for projects in the Hudson Valley-Metropolitan New York-Long Island area; three million dollars (\$3,000,000) is allocated for projects in the Central New York area; and two million five hundred thousand dollars (\$2,500,000), is allocated for projects in the Western New York area. Unique area preservation projects outside forest preserve counties shall be undertaken only upon the recommendation of the state nature and historical preserve trust and shall be recommended by the commissioner for inclusion in the state nature and historical preserve.

4. For stream rights acquisition projects, three million dollars (\$3,000,000).

5. For public access to state land projects, eight million dollars (\$8,000,000) to provide access to presently inaccessible state lands such as the High Tor Area, Erwin Area, Capital District Area, Pharsalia Area, Cicero Swamp, Perch River Area, and Tug Hill Area wildlife management lands and reforestation areas in Clinton, St. Lawrence, Lewis, Washington, Jefferson, Oneida, Cattaraugus, Steuben, Schuyler, Allegany, Chautauqua, Schoharie, Broome, Delaware, Tioga, Tompkins and Cortland Counties.

§ 51-0703. Definitions.

As used in this title, the following terms shall mean and include:

1. "Forest Preserve Project." A state project to acquire lands as additions to the forest preserve within the Adirondack and Catskill Parks.

2. "Wetlands Preservation Project." A state project to preserve through acquisition biologically productive and vulnerable wetlands because of their unique and irreplaceable values.

3. "Wetlands Restoration Project." A state or municipal project to renovate dikes, levies, ditches, berms and other water level regulation works; to establish vegetation, plants, and shrubs, or such other necessary or desirable work to achieve optimum productivity of wetlands.

4. "Unique Area Preservation Project." A state project to acquire lands of special natural beauty, wilderness character, geological, ecological or historical significance for the state nature and historical preserve and similar lands within a forest preserve county outside the Adirondack and Catskill Parks.

5. "Stream Rights Acquisition Project." A state project to acquire fishing rights on quality streams.

6. "Public Access to State Lands Project." A state project to provide access to otherwise inaccessible reforestation, game management or multiple use lands through land acquisition and development of unpaved trails.

7. "Wetlands." Land and lands under water which may be permanently, temporarily or intermittently covered with fresh or salt-water and commonly referred to as flood basins or flats, meadows, marshes, shrub swamps, wooded swamps, swamps or bogs.

8. "Cost." The cost of an approved project shall include engineering and architectural services, plans and specifications, consultant and legal services, and other direct expenses incident to such project less any federal assistance received or to be received.

9. "Municipality." A city, county, town or village, or improvement district within a city, county, town or village or any combination thereof.

§ 51-0705. Approval and execution of state projects.

1. State forest preserve, stream rights acquisition, wetlands preservation or restoration, unique area preservation, and public access to state lands projects shall be undertaken pursuant to this title only with the approval of the commissioner.

2. Such projects as have been approved by the commissioner shall be executed by the department in the manner provided for by applicable law.

§ 51-0709. Approval of municipal wetlands restoration projects.

1. A municipal wetlands restoration project shall be undertaken pursuant to this title only with the approval of the commissioner, and pursuant to an approved contract for state assistance.

2. In reviewing applications for municipal wetland restoration projects, the commissioner shall give due consideration to:

- a. the urgency of need to restore such wetlands;
- b. the potential ecological value of such wetlands;
- c. the potential value of such wetlands for flood and storm water control and pollution and sediment filtering;
- d. the level of biological productivity which will be achieved by restoration thereof.

§ 51-0711. Contracts for municipal wetlands restoration projects.

1. The commissioner, in the name of the state, may enter into contracts with municipalities owning wetlands, and any such municipality may enter into a contract with the commissioner. Any such contract may include such provisions as may be agreed upon by the parties thereto, and shall include, in substance, the following provisions:

a. An estimate of the reasonable cost of the project as determined by the commissioner.

b. An agreement by the commissioner to pay to the municipality, during the progress of restoration or following completion of restoration as may be agreed upon by the parties, an amount equal to the actual cost of restoration or the estimated reasonable cost whichever is the lesser.

c. An agreement by the municipality

(1) to dedicate in perpetuity the wetlands to be restored to assure their preservation.

(2) to proceed expeditiously with, and complete, the project as approved by the department.

(3) to thereafter maintain the wetlands in the condition to which they have been restored.

(4) to apply for and make reasonable efforts to secure federal assistance for the project.

(5) to secure the approval of the commissioner before applying for federal assistance, in order to maximize the amounts of such assistance received or to be received for all projects in New York state.

d. A provision that, in the event that federal assistance which was not included in the calculation of the state payment pursuant to paragraph b of this subdivision becomes available to the municipality, the amount of the state payment shall be recalculated with the inclusion of such additional federal assistance and the municipality shall pay to the state the amount by which the state payment actually made exceeds the state payment determined by the recalculation.

2. In connection with each contract, the commissioner shall keep adequate records of the amount of the payment by the state pursuant to paragraph b of subdivision one of this section and of the amount of federal assistance received by the municipality. Such records shall be retained by the commissioner and shall establish the basis for recalculation of the state payment.

§ 51-0713. Restriction of alienation of wetlands.

Any wetlands acquired or restored in part or in whole with state moneys pursuant to this title shall not be sold, leased or otherwise disposed of or used for any purpose inconsistent with the character or value of such wetlands.

No structure shall be placed thereon except water level regulation works necessary to preserve, restore or maintain the biological productivity thereof.

TITLE 9

SOLID WASTE RECOVERY AND MANAGEMENT

Section 51-0901. Allocation of moneys.

51-0903. Definitions.

51-0905. Approval of municipal solid waste management projects.

51-0907. Contracts for municipal solid waste management projects.

§ 51-0901. Allocation of moneys.

Of the moneys received by the state from the sale of bonds pursuant to the environmental quality bond act of nineteen hundred seventy-two, one hundred seventy-five million dollars (\$175,000,000) shall be expended pursuant to appropriations thereof, for municipal solid waste management projects, including at least five million dollars (\$5,000,000) of this amount which shall be earmarked for resource recovery equipment, source separation equipment, or both, for the implementation of small scale, low-technology approaches to resource recovery, including source separation programs, recycling centers, composting projects and other solid waste recovery and management projects with a design capacity of less than one hundred tons per day.

§ 51-0903. Definitions.

As used in this title, the following terms shall mean and include:

1. "Solid Waste." All materials or substances discarded or rejected as being spent, useless, worthless or in excess to the owners at the time of such discard or rejection, including but not limited to garbage, refuse, industrial and commercial waste, sludges from air or water pollution control facilities or water supply treatment facilities, rubbish, ashes, contained gaseous materials, incinerator residue, demolition and construction debris and offal but not including sewage and other highly diluted water carried materials or substances and those in gaseous form.

2. "Solid Waste Recovery and Management Project." Resource recovery equipment, source separation equipment, disposal equipment or any

combination thereof required by a solid waste recovery and management system.

3. "Solid Waste Recovery and Management System." A municipal program to provide environmentally sound recovery or disposal of collected solid waste through facilities planned, designed, assembled and constructed to assure environmental protection and to maximize the potential for resource recovery.

4. "Resource Recovery Equipment." Structures, machinery, or devices, singly or in combination, designed, constructed and required to separate, process, modify, convert, treat, or prepare collected solid waste so that component materials or substances or recoverable resources may be used as a raw material or for their productive purposes.

5. "Disposal Equipment." Structures, machinery or devices at a disposal site necessary to efficient and environmentally-sound land disposal of solid wastes, including but not limited to machinery or devices designed to move earth during burial of wastes or to increase the density of wastes buried or to be buried. "Disposal Equipment" shall also mean facilities, except vehicles, in which collected solid waste is temporarily stored and concentrated prior to transport to a disposal site.

6. "Municipality." A city, county, town, village, public benefit corporation having power granted otherwise than under this article to construct, operate and maintain solid waste management projects, or an improvement district within a city, county, town or village, or any combination thereof.

7. "Cost." The cost of resource recovery equipment, source separation equipment or disposal equipment including interest prior to and during construction, engineering and architectural surveys, plans and specifications, and consultants and legal services and other direct expenses incident to a solid waste management project, exclusive of land acquisition, and expenses incident thereto, less any federal assistance received or to be received.

8. "Source separation equipment" shall mean:

(a) Add-ons or trailers designed to modify collection vehicles to allow sorting and separation of collected wastes held for the purpose of recycling or collection vehicles whose function and design are exclusively for such purpose;

(b) Containers for the source separation and temporary storage of recyclable wastes by residents or business prior to collection;

(c) Bins, sheds or other facilities for the temporary storage of materials prior to transport for the purposes of recycling.

§ 51-0905. Approval of municipal solid waste management projects.

1. Municipal solid waste recovery and management projects shall be undertaken pursuant to this title only with the approval of the commissioner, and pursuant to an approved contract or contracts for state assistance.

2. In reviewing applications for solid waste recovery and management projects, the commissioner shall give due consideration to:

a. the adequacy of the municipality's solid waste recovery and management system and its relationship to the needs or plans of other area municipalities;

b. the suitability and feasibility of the project in relation to the solid waste recovery and management system and the area to be served;

c. the proportion of solid waste for which resource recovery is contemplated;

d. implementation of the system or components thereof and their expected terms of usefulness, singly or in combination;

e. present and projected population, land use, and rates and composition of solid waste generation;

f. potential or contemplated markets for recovered resources;

g. potential or contemplated opportunities for direct relationships with other public facilities, such as for processing residual materials from existing incinerators or treating sludge from a sewage treatment plant;

h. intergovernmental arrangements integral to the project;

i. non-governmental arrangements integral to the project;

j. the urgency of the project, in relationship to all solid waste management project needs in the state;

k. environmental soundness, including assurance that the project will meet all applicable law, criteria, rules or regulations.

3. The state share of the cost of a municipal solid waste management project shall not exceed fifty percent of the cost of resource recovery equipment and source separation equipment and twenty-five percent of the cost of disposal equipment. The commissioner may not otherwise limit the state's share of the cost of small scale, low technology approaches to resource recovery.

4. The commissioner shall annually review the status of projects which have been the subject of appropriations in furtherance of this title to determine whether sufficient progress has been made to warrant continuance of such appropriations. In making such determination, the commissioner shall take into account whether and to what extent progress has been made in accomplishing a project feasibility study, preparation and distribution of a request for proposals, the award of a design contract, the award of a construction contract, the commencement of construction, the profferment of bonds by the municipality, or other factors reasonably indicative of progress upon the project. Primary consideration shall be given to the reallocation of funds to meet the requirements of section 51-0901 of this title relative to small scale,

low-technology approaches. The commissioner shall annually submit his determination made hereunder, reflecting reallocations as appropriate, to the governor in a form and at a time sufficient to be taken into account by the governor and legislature in fulfilling their budgetary responsibilities.

§ 51-0907. Contracts for municipal solid waste management projects.

1. The commissioner, in the name of the state, may enter into contracts with municipalities which may include such provisions as may be agreed upon by the parties thereto, and shall include, in substance, the following provisions:

a. An estimate of the reasonable cost of the project as determined by the commissioner.

b. An agreement by the commissioner to pay to the municipality, during the progress of construction or following completion of construction as may be agreed upon by the parties, an amount, not to exceed fifty percent of the cost of resource recovery equipment and source separation equipment, and twenty-five percent of the cost of disposal equipment.

c. An agreement by the municipality:

(1) to proceed expeditiously with, and complete, the project as approved by the commissioner;

(2) to commence operation of the project upon its completion and not to dispose of the project or any portion thereof or change its use without the approval of the commissioner;

(3) to operate and maintain the solid waste management project in accordance with applicable law and rules and regulations of the commissioner;

(4) to apply for and make reasonable efforts to secure federal assistance for the project;

(5) to secure the approval of the commissioner before applying for federal assistance, in order to maximize the amounts of such assistance received or to be received for all projects in New York state;

(6) to provide for the payment of the municipality's share of the cost of the project.

d. A provision that, in the event that federal assistance which was not included in the calculation of the state payment becomes available to the municipality, the amount of the state payment shall be recalculated with the inclusion of such federal assistance and the municipality shall pay to the state the amount by which the state payment actually made exceeds the state payment determined by the recalculation.

2. In connection with each contract, the commissioner shall keep adequate records of the amount of the payment by the state and of the amount of federal assistance, if any, received by the municipality. Such records shall be retained by the commissioner and shall establish the basis for recalculation of the state payment as required herein.

TITLE 11

PARK LANDS PRESERVATION PROJECTS

Section 51-1101. Allocation of moneys.

51-1103. Definitions.

51-1105. Approval and execution of projects.

§ 51-1101. Allocation of moneys.

The moneys received by the state from the sale of bonds sold pursuant to the environmental quality bond act of nineteen hundred seventy-two shall be expended in the following amounts pursuant to appropriations therefor:

1. For metropolitan park projects, forty million dollars
(\$40,000,000);

2. For open space preservation projects, fifteen million dollars
(\$15,000,000);

3. For waterway projects, nine million dollars (\$9,000,000);
4. For trailway projects, four million dollars (\$4,000,000).

§ 51-1103. Definitions.

As used in this title, the following terms shall mean and include:

1. "Metropolitan Park Project." A state project to provide new and expanded public recreational opportunities in or near an urban population center to relieve serious overcrowding and prevent further deterioration of urban recreation systems through land acquisition.
2. "Open Space Preservation Project." A state project to acquire rapidly disappearing open or natural lands in or near urban or suburban areas necessary to serve the recreation needs thereof.
3. "Waterway Project." A state project to acquire selected lands on major rivers, lakes, and coastal waters to provide public access to protect the right of public use of such waters.
4. "Trailway Project." A state project to acquire lands and to develop recreation trails thereon necessary to close gaps in the statewide interconnecting trails network before irreversible development occurs.

§ 51-1105. Approval and execution of projects.

1. Metropolitan park, open space preservation, waterway, and trailway projects shall be undertaken pursuant to this title only with the approval of the commissioner.
2. Such projects as have been approved by the commissioner shall be executed by the office in the manner provided by applicable law.

ARTICLE 52

IMPLEMENTATION OF ENVIRONMENTAL QUALITY BOND ACT OF 1986

Title 1. General provisions.

3. Hazardous waste site remediation projects.

7. Land acquisition, preservation and improvement projects.

9. Historic preservation, municipal park and urban cultural parks projects.

TITLE 1

GENERAL PROVISIONS

Section 52-0101. Definitions.

52-0103. Allocation of moneys.

52-0105. State assistance application procedure for title three of this article.

52-0107. Powers and duties of the commissioner for title three of this article.

52-0109. Powers and duties of a municipality.

52-0111. Equal employment opportunity program.

52-0113. Minority and women-owned business enterprise program.

§ 52-0101. Definitions.

As used in this article the following terms shall mean and include:

1. "Commissioner" means the commissioner of environmental conservation except that within and for the purposes of title nine of this article, the term shall mean the commissioner of parks, recreation and historic preservation.

2. "Cost" means the cost of an approved project, which shall include engineering and architectural services, plans and specifications, consultant and legal services, and other direct expenses incident to such project less any federal assistance received or to be received and any other assistance from responsible parties or otherwise.

3. "Department" means the department of environmental conservation.

4. "Environmentally sensitive lands project" means a state project to preserve aquifer recharge areas, areas of exceptional scenic beauty or exceptional forest character, open space, pine barrens, public access, trailways, unique character, wetlands, and wildlife habitat, as defined below:

(a) "Aquifer recharge area" means the location at which water can enter an aquifer directly or indirectly.

(b) "Exceptional forest character" means forest possessed of such attributes as maturity of growth, scientific harvesting potential, aesthetic appeal or recreational opportunity.

(c) "Exceptional scenic beauty" means land forms, water bodies, geologic formations and vegetation which possess significant scenic qualities or significantly contribute to scenic values.

(d) "Open space" means open or natural land in or near urban or suburban areas necessary to serve the scenic or recreation needs thereof.

(e) "Pine barrens" means a natural community of such biota as pitch pine, jack pine, and scrub oak which may be found associated with a variety of natural resources.

(f) "Public access" means access to lands for public use, including stream rights and waterways.

(g) "Trailways" means recreational trails developed under guidelines established for the development of a statewide trails system.

(h) "Unique character" means lands of special natural beauty, wilderness character, geological, ecological or historical significance suitable for the state nature and historic preserve and similar lands within a forest preserve county outside the Adirondack and Catskill parks.

(i) "Wetlands" means freshwater wetlands as defined in article twenty-four of this chapter and tidal wetlands as defined in article twenty-five of this chapter.

(j) "Wildlife habitat" means specific areas essential for the conservation of threatened and endangered species which require special management considerations or protection for maintenance of such species.

5. "Federal assistance" shall mean funds available, other than by loan, from the federal government, either directly or through allocation by the state for construction or program purposes pursuant to any federal law or program.

6. "Forest preserve project" means a state project to acquire land as additions to the forest preserve or to acquire conservation easements created pursuant to title three of article forty-nine of this chapter within the Adirondack and Catskill parks.

7 "Governing body" means

- (a) in the case of a town, a town board;
- (b) in the case of a county outside of the city of New York, the county board of supervisors or other elective governing body;
- (c) in the case of a city or village, the local legislative body thereof, as the term is defined in the municipal home rule law;
- (d) in the case of a public benefit corporation, the board of directors, members or trustees thereof;
- (e) in the case of a school district, the board of education thereof;
- (f) in the case of a supervisory district, the board of cooperative educational services thereof.

8. "Hazardous waste" shall have the definition set forth in title nine of article twenty-seven of this chapter.

9. "Hazardous waste site remediation project" means the same as the term "inactive hazardous waste disposal site remedial program" as defined in subdivision three of section 27-1301 of this chapter.

10. "Historic preservation project" means:

(a) State historic preservation projects. A state project undertaken by the office of parks, recreation and historic preservation to improve, restore or rehabilitate state historic properties listed on the state or national registers of historic places to protect the historic, cultural or architectural significance thereof.

(b) Municipal historic preservation project. A project undertaken by a

municipality to improve, restore or rehabilitate municipal property listed on the state or national registers of historic places to protect the historic, cultural or architectural significance thereof.

(c) Not-for-profit historic preservation projects. A project undertaken by a not-for-profit corporation for the acquisition, improvement, restoration or rehabilitation of property listed on the state or national registers of historic places to protect the historic, cultural or architectural significance thereof.

11. "Landfill" means a disposal facility or part of one at which solid waste, or its residue after treatment, is intentionally placed in or on land, at which solid waste will remain after closure, and which is not a landspreading facility, a surface impoundment, or an injection well.

12. "Lands" mean lands, improvements and structures thereon or rights, franchises, and interests therein, lands under water and riparian rights, and shall also mean any and all interests in lands less than full title, including without limitations, easements, permanent or temporary, rights of way, uses, leases, licenses, and any other estate, interests or rights in lands, legal or equitable.

13. "Municipal landfill closure project" means activities undertaken to close, including by reclamation, a landfill owned or operated by a municipality to achieve compliance with regulations promulgated by the department.

14. "Municipal park project" means a project including an urban cultural park undertaken by a municipality for the acquisition, development or improvement of outdoor or indoor recreation facilities, including, but not limited to site acquisition, improvement, construction, reconstruction and improvement of structures, roads and parking facilities.

15. "Municipality", except as otherwise defined within this article, means a city, county, town, village, public benefit corporation or school district or an improvement district within a city, county, town or village, or Indian tribe residing within New York state, or any

combination thereof.

16. "Not-for-profit corporation" means a corporation formed pursuant to the not-for-profit corporation law and qualified for tax-exempt status under section 501(c)(3) of the federal internal revenue code.

17. "Office" means the office of parks, recreation and historic preservation.

18. "Solid waste" shall have the definition set forth for such term in title seven of article twenty-seven of this chapter.

19. "Urban cultural park" shall have the definition set forth for such term in title G of article thirty-one of the parks, recreation and historic preservation law.

§ 52-0103. Allocation of moneys.

The moneys received by the state from the sale of bonds pursuant to the environmental quality bond act of nineteen hundred eighty-six shall be expended in the following amounts pursuant to appropriations and as specifically provided for in titles three, seven and nine of this article, and title five of article fifty-four of this chapter:

1. For remediation of hazardous waste sites, as set forth in title three of this article and for the closure of municipal landfills, as set forth in title five of article fifty-four of this chapter, one billion two hundred million dollars of which: (i) up to one hundred million dollars shall be made available for state assistance payments toward the cost of the closure of municipal landfills, as set forth in title five of article fifty-four of this chapter; and (ii) up to one hundred thousand dollars shall be made available for the study of hazardous substance waste disposal sites, as defined in section 27-1316 of this chapter; and

2. For acquisition, preservation and improvement of lands, for

historic preservation, and for municipal parks, as set forth in titles seven and nine of this article chapter, two hundred fifty million dollars.

§ 52-0105. State assistance application procedure for title three of this article.

1. A municipality upon the recommendation of its governing body may submit an application for state assistance toward the cost of a project which is eligible for state assistance pursuant to title three of this article to the commissioner in such form and containing such information as he may require.

2. The commissioner shall review such project application and may approve, disapprove or recommend modifications thereto consistent with applicable law, criteria, standards or rules and regulations relative to such projects.

3. Upon approval of a project application, a municipality shall enter into a contract as further provided within this article with the commissioner for payment of state assistance to be received pursuant to this article.

4. For purposes of this section, "state assistance" shall mean a grant pursuant to title three of this article.

§ 52-0107. Powers and duties of the commissioner for title three of this article.

In administering the provisions of title three of this article, the commissioner:

1. shall make an itemized estimate of funds or appropriations by project required annually for inclusion in the executive budget.

2. may, in the name of the state, as further provided within this article, contract to make, within the limitations of appropriations available therefor, a state assistance payment to a municipality representing the state share of the cost of a project approved and to be undertaken pursuant to title three of this article. Such contracts shall be subject to approval by the state comptroller and, as to form, by the attorney general.

3. may, in the name of the state, as further provided within this article, enter into contracts, within the limitations of appropriations available therefor, with public benefit corporations and private contractors for services contemplated by this article to be funded hereunder.

4. shall approve vouchers for the payment of assistance pursuant to an approved contract. All such payments shall be paid on the audit and warrant of the state comptroller.

5. may perform such other and further acts as may be necessary, proper or desirable to carry out the provisions of this article.

§ 52-0109. Powers and duties of a municipality.

A municipality shall have the power and authority to:

1. undertake and carry out any project for which state assistance in the form of a grant is received or is to be received pursuant to this article and maintain and operate such project.

2. expend money received from the state pursuant to this article for costs incurred in conjunction with the approved project.

3. perform such other and further acts as may be necessary, proper or desirable to carry out a project or obligation, duty or function related thereto.

§ 52-0111. Equal employment opportunity program.

1. All contracts for design, construction, services and materials pursuant to this article of whatever nature and all documents soliciting bids or proposals therefor shall contain or make reference to the following provisions:

a. The contractor will not discriminate against employees or applicants for employment because of race, creed, color, national origin, sex, age, disability, or marital status, and will undertake or continue existing programs of affirmative action to ensure that minority group persons and women are afforded equal opportunity without discrimination. Such programs shall include, but not be limited to, recruitment, employment, job assignment, promotion, upgrading, demotion, transfer, layoff, termination, rates of pay or other forms of compensation, and selections for training or retraining, including apprenticeship and on-the-job training.

b. At the request of the department or the office, the contractor shall request each employment agency, labor union, or authorized representative of workers with which it has a collective bargaining or other agreement or understanding and which is involved in the performance of the contract with the agency to furnish a written statement that such employment agency, labor union or representative shall not discriminate because of race, creed, color, national origin, sex, age, disability or marital status and that such union or representative will cooperate in the implementation of the contractor's obligations hereunder.

c. The contractor will state, in all solicitations or advertisements for employees placed by or on behalf of the contractor in the performance of the contract with the agency, that all qualified applicants will be afforded equal employment opportunity without discrimination because of race, creed, color, national origin, sex, age, disability or marital status.

d. The contractor will include the provisions of paragraphs a through c of this subdivision in every subcontract or purchase order in such a manner that such provisions will be binding upon each subcontractor or vendor as to its work in connection with the contract with the agency.

2. The department and the office shall establish procedures and guidelines to ensure that contractors and subcontractors undertake programs of affirmative action and equal employment opportunity as required by this section. Such procedures may require after notice in a bid solicitation, the submission of an affirmative action program prior to the award of any contract, or at any time thereafter, and may require the submission of compliance reports relating to the operation and implementation of any affirmative action program adopted hereunder. The department or the office may take appropriate action including contractual sanctions for non-compliance to effectuate the provisions of this section and shall be responsible for monitoring compliance with this article.

§ 52-0113. Minority and women-owned business enterprise program.

1. a. In the performance of projects pursuant to this article minority and women-owned business enterprises shall be given the opportunity for meaningful participation. The department or the office shall establish measures and procedures to secure meaningful participation and identify those contracts and items of work for which minority and women-owned business enterprises may best bid to actively and affirmatively promote and assist their participation in the projects, so as to facilitate the award of a fair share of contracts to such enterprises; provided, however, that nothing in this article shall be construed to limit the ability of the department or office to assure that qualified minority and women-owned business enterprises may participate in the program. For purposes hereof, minority business enterprise shall mean any business enterprise which is at least fifty-one per centum owned by, or in the case of a publicly owned business, at least fifty-one per centum of the stock of which is owned by citizens or permanent resident noncitizens who are Black, Hispanic, Asian or American Indian, Pacific Islander or

Alaskan natives and such ownership interest is real, substantial and continuing and have the authority to independently control the day to day business decisions of the entity for at least one year; and women-owned business enterprise shall mean any business enterprise which is at least fifty-one per centum owned by, or in the case of a publicly owned business, at least fifty-one per centum of the stock of which is owned by citizens or permanent resident noncitizens who are women, and such ownership interest is real, substantial and continuing and have the authority to independently control the day to day business decisions of the entity for at least one year.

The provisions of this paragraph shall not be construed to limit the ability of any minority or women-owned business enterprise to bid on any contract.

b. In the implementation of this section, the department or the office shall consider compliance by any contractor with the requirements of any federal, state, or local law concerning minority and women-owned business enterprises, which may effectuate the requirements of this section. If the department or the office determines that by virtue of the imposition of the requirements of any such law, in respect to capital project contracts, the provisions thereof duplicate or conflict with such law, the department may waive the applicability of this section to the extent of such duplication or conflict.

c. Nothing in this section shall be deemed to require that overall state and federal requirements for participation of minority and women-owned business enterprises in programs authorized under this article be applied without regard to local circumstances to all projects or in all communities.

2. In order to implement the requirements and objectives of this section, the department and the office shall establish procedures to monitor the contractors' compliance with provisions hereof, provide assistance in obtaining competing qualified minority and women-owned business enterprises to perform contracts proposed to be awarded, and take other appropriate measures to improve the access of minority and

women-owned business enterprises to these contracts.

TITLE 3

HAZARDOUS WASTE SITE REMEDIATION PROJECTS

Section 52-0301. Projects; authorization and approval.

52-0303. Contracts with municipalities.

§ 52-0301. Projects; authorization and approval.

The commissioner is authorized to directly develop and implement, and to cause and to approve development and implementation by municipalities or by other parties, of hazardous waste site remediation projects consistent with title thirteen of article twenty-seven of this chapter and section ninety-seven-b of the state finance law.

§ 52-0303. Contracts with municipalities.

With respect to a project which the commissioner has determined pursuant to paragraph g of subdivision five of section 27-1313 of this chapter to be eligible for funding, funding by the state shall be up to an amount of seventy-five percent of the eligible cost and the commissioner and the municipality shall enter into a contract which, in addition to such other terms and conditions that the commissioner may deem to be appropriate, provides as follows:

1. The current estimate of the cost of the project as determined by the commissioner at the time of execution of the agreement.
2. An agreement by the commissioner to periodically reimburse the municipality for costs incurred during the progress of the project. Such payments shall be subject to final computation and determination of the total state share of the eligible costs of the entire project.
3. An agreement by the municipality to proceed expeditiously with and

complete the project in accordance with plans approved for payment of the municipality's share of the project cost.

4. A provision that in the event that any federal payments and responsible party payments become available which were not included in the calculation of the state share pursuant to subdivision two of this section, the amount of the state share shall be recalculated accordingly and the municipality shall pay to the state for deposit in the design and construction account of the hazardous waste remedial fund established under section ninety-seven-b of the state finance law the amount by which the state payment actually made exceeds the recalculated state share.

5. For purposes of this section, the term "eligible cost" means the non-federal share of the approved project cost less amounts collected from responsible parties as contemplated by title thirteen of article twenty-seven of this chapter.

TITLE 7

LAND ACQUISITION, PRESERVATION AND IMPROVEMENT PROJECTS

Section 52-0701. Approval and execution of state projects.

§ 52-0701. Approval and execution of state projects.

1. State environmentally sensitive land projects and forest preserve projects shall be undertaken pursuant to the provisions of this article only with the approval of the commissioner.

2. The commissioner shall make an itemized estimate of funds or appropriations required annually for inclusion in the executive budget.

3. The commissioner shall, after hearings and prior to the approval of any environmentally sensitive land projects and forest preserve projects, promulgate rules and regulations which shall include but need not be limited to: eligibility requirements, departmental ranking and

review processes, project approval guidelines and criteria, and funding distribution for forest preserve projects and for each type of environmentally sensitive lands project as defined in subdivision four of section 52-0101 of this article.

4. Real property acquired with monies provided through this title shall not be sold or disposed of, or used for any purpose inconsistent with the natural resource value for which it was acquired, without the express authority of the legislature. Prior to the implementation of any sale, disposal, or change of use authorized by the legislature, the agency authorized to sell, dispose of or change the use of any such lands shall first provide substitute lands of equal fair market value, equivalent natural resource value and similarly suitable location as approved by the commissioner.

TITLE 9

HISTORIC PRESERVATION, MUNICIPAL PARK AND URBAN CULTURAL PARKS PROJECTS

Section 52-0901. Approval and execution of projects.

52-0903. Municipal regulations; limitations.

52-0905. Contracts.

52-0907. Restriction on alienation.

52-0909. Powers and duties of the commissioner.

52-0911. Compliance with the law.

§ 52-0901. Approval and execution of projects.

1. State historic preservation projects. State historic preservation projects may be undertaken pursuant to the provisions of this article only with the approval of the commissioner.

2. Municipal historic preservation projects. The commissioner and a municipality may enter into a contract for the undertaking by the municipality of a municipal historic preservation project. Municipal historic preservation projects shall be recommended to the commissioner by the governing body of the municipality and when approved by the

commissioner, may be undertaken by the municipality pursuant to this title and any other applicable provision of law. The state share of the cost of a municipal preservation project in no event shall exceed fifty percent of the cost, less any federal assistance received or to be received for the project. To assure the availability of funds for as wide a range of projects as possible, the commissioner may, in his discretion, limit the dollar amount that may be made available for any project. For the purpose of determining the amount of the state share, the cost of the project shall not be more than the amount set forth in the application for a state share made by a municipality and approved by the commissioner. The state share of the cost of a project shall be paid on audit and warrant of the state comptroller on a certificate of availability of the director of the budget.

3. Not-for-profit historic preservation projects. The commissioner and a not-for-profit corporation may enter into a contract for the undertaking by the not-for-profit corporation of a not-for-profit historic preservation project. A not-for-profit historic preservation project shall be recommended to the commissioner by the governing body of a not-for-profit corporation which demonstrates to the satisfaction of the commissioner that it is capable of operating and maintaining such property for the benefit of the public. Upon approval by the commissioner, such project may be undertaken pursuant to the provisions of this title and any other applicable provision of law. The state share of the cost of a not-for-profit historic preservation project shall in no event exceed fifty percent of the cost, less any state assistance from any source other than pursuant to this title and less any federal assistance, received or to be received for such project. To assure the availability of funds for as wide a range of projects as possible, the commissioner may, in his discretion, limit the dollar amount that may be made available for any project. For the purpose of determining the amount of the state share, the cost of the project shall not be more than the amount set forth in the application for a state share made by a not-for-profit corporation and approved by the commissioner. The state share of the costs of a project shall be paid on audit and warrant of the state comptroller on certificate of availability of the director of the budget.

4. Municipal park projects. The commissioner and a municipality may enter into a contract for the undertaking by the municipality of a municipal park project. Municipal park projects shall be recommended to the commissioner by the governing body of the municipality, and when approved by the commissioner, may be undertaken by the municipality pursuant to this title and any other applicable provisions of law. The state share of the cost of a municipal park project in no event shall exceed fifty percent of the approved project cost, less any federal assistance received or to be received for the project. To assure the availability of funds for as wide a range of projects as possible, the commissioner may, in his discretion, limit the dollar amount that may be made available for any project. For the purpose of determining the amount of the state share, the cost of the project shall not be more than the amount set forth in the application for a state share made by a municipality and approved by the commissioner. The state share of the cost of a project shall be paid on audit and warrant of the state comptroller on certificate of availability of the director of the budget.

5. Urban cultural park projects. a. State urban cultural park system projects including state environmental, cultural or recreational facilities and sites within state designated urban cultural parks and interpretive/visitor center facilities in each such park as such projects are identified in a management plan prepared pursuant to section 35.05 of the parks, recreation and historic preservation law shall be undertaken pursuant to the provisions of this article only with the approval of the commissioner and the director of the budget. The state share of interpretive/visitor center facility projects shall be one hundred percent of the cost and such projects shall be subject to an agreement by the local urban cultural park management entity to operate such facility.

b. Local urban cultural park resource projects. The commissioner and a municipality, public corporation or not-for-profit corporation may enter into a contract subject to the approval of the director of the budget for the undertaking by the municipality, public corporation or

not-for-profit corporation of a local urban cultural park project including parkwide and district projects identified in a management plan prepared pursuant to section 35.05 of the parks, recreation and historic preservation law. To assure the availability of funds for as wide a range of projects as possible, the commissioner may, in his discretion, limit the dollar amount that may be made available for any project. For the purpose of determining the amount of the state share, the cost of the project shall not be more than the amount set forth in the application for a state share made by the municipality, public corporation or not-for-profit corporation and approved by the commissioner. The state share of the cost of a project shall be paid on audit and warrant of the state comptroller on certificate of availability of the director of the budget.

§ 52-0903. Municipal regulations; limitations.

A municipality which acquires, develops, improves, restores or rehabilitates property with funds made available pursuant to this title may establish reasonable rules and regulations by local law or otherwise to assure the proper administration and development thereof, provided that no such rule or regulation which restricts the use of such lands or facilities by non-residents of the municipality shall be effective without the express approval of the commissioner.

§ 52-0905. Contracts.

The commissioner shall impose such contractual requirements and conditions upon any municipality and any not-for-profit corporation which receive funds pursuant to this title as may be necessary and appropriate to assure that a public benefit shall accrue from the use of public funds by such municipality and not-for-profit corporation. Such conditions may include, but shall not be limited to limitations on the right of the municipality or not-for-profit corporation to demolish or convey such property, provisions for public access where appropriate, the granting of facade easements to the state, a requirement that all

plans for restoration, rehabilitation, improvement, demolition or other physical change must be subject to the commissioner's approval, and such other conditions which shall assure the preservation and protection of the project.

§ 52-0907. Restriction on alienation.

Real property acquired, developed, improved, restored or rehabilitated by a municipality pursuant to subdivision four of section 52-0901 of this title with funds made available pursuant to this title shall not be sold or disposed of or used for other than public park purposes without the express authority of an act of the legislature, which shall provide for the substitution of other lands of equal fair market value and reasonably equivalent usefulness and location to those to be discontinued, sold or disposed of, and such other requirements as shall be approved by the commissioner.

§ 52-0909. Powers and duties of the commissioner.

1. In administering the provisions of this title, the commissioner:

(a) shall make an itemized estimate of funds or appropriations by project required annually for inclusion in the executive budget.

(b) may in the name of the state as further provided within this article contract to make, within the limitations of appropriations available therefor, a state grant for payment to a municipality or not-for-profit corporation representing the state share of the costs of a project approved and to be undertaken pursuant to this article. Such contracts shall be subject to approval by the state comptroller and as to form by the attorney general.

(c) may in the name of the state as further provided within this title enter into contracts with public benefit corporations and private contractors for services contemplated by this article to be funded hereunder.

(d) shall approve vouchers for the payment of assistance pursuant to an approved contract. All such payments shall be paid on the audit and

warrant of the state comptroller.

(e) shall promulgate, after hearings and prior to the receipt of application and/or approval of projects, rules and regulations which shall include but need not be limited to: eligibility requirements, application procedures, office ranking and review processes, project approval guidelines and criteria, and funding distribution for municipal park projects and for each type of historic preservation project.

(f) may perform such other and further acts as may be necessary, proper or desirable to carry out the provisions of this title.

2. All actions taken by the commissioner pursuant to this title shall be consistent with provisions of the federal internal revenue code necessary for the preservation of tax exempt status of bonds issued under the authority granted by the environmental quality bond act of nineteen hundred eighty-six.

§ 52-0911. Compliance with the law.

Every applicant for funds to be made available pursuant to this title shall comply with all applicable state, federal and local laws.

ARTICLE 53

TREE CONSERVATION AND URBAN FORESTRY

Title 1. Tree conservation.

3. Urban forestry programs.

TITLE 1

TREE CONSERVATION

Section 53-0101. Legislative purpose.

53-0103. General functions of the department.

53-0105. Reports.

53-0107. Grants or gifts.

§ 53-0101. Legislative purpose.

There is a direct relationship between the planting of trees, shrubs and associated vegetation in sufficient number in populated areas and the health, safety, and welfare of communities. Trees and such vegetation abate noise, provide welcome shade to people, preserve the balance of oxygen in the air by removing carbon dioxide and fostering air quality, and add color and verdure to human construction. They also stabilize the soil and control water pollution by preventing soil erosion and flooding, yield advantageous microclimatic effects, and provide a natural habitat for wildlife. The destructive and indiscriminate removal of trees and related vegetation causes increased municipal costs for proper drainage control, impairs the benefits of occupancy of existing residential properties and impairs the stability and value of both improved and unimproved real property in the area of destruction, and adversely affects the health, safety, and general welfare of the inhabitants of the state. In the interests of a greener and more livable state, it is determined by the legislature that an affirmative program to encourage the conservation and planting of trees, shrubs and other vegetation is necessary in the public interest in order that coming generations will continue to enjoy and benefit by our care in a green New York.

§ 53-0103. General functions of the department.

The department may:

1. Act in an advisory capacity to state agencies in matters relating to neighborhood improvement and to advise such agencies in regard to developing organized tree and other planting programs to promote urban neighborhood improvement and to enhance and conserve existing tree and green space resources particularly where state action results in a substantial destruction of trees or related vegetation.

2. Advise, encourage and assist local governments in the development and coordination of policies, programs and activities, and in the full

utilization of powers vested in local governments by the constitution and laws of the state, to organize such tree and other planting programs, to promote urban neighborhood improvement and to promote tree and green space protection and maintenance.

3. Act as a clearinghouse for information on urban neighborhood improvement programs and organized tree and other planting programs in accordance with this article.

4. Prepare and circulate model ordinances, relating to trees, appropriate to be used in implementation of section ninety-six-b of the general municipal law or other applicable municipal authority, including but not limited to ordinances or local laws for designation by municipalities of historic or specimen trees, stands and groves, or old-growth forests, and to provide for the recognition and protection thereof.

5. Take such other steps as are necessary to carry out the purpose of this article, including the appointment of advisory committees, boards and task forces.

§ 53-0105. Reports.

The department shall from time to time report to the governor, and shall make an annual report to the governor and the legislature, not later than May first, concerning the effectiveness of this article in carrying out the legislative purpose pursuant to this article, in the preceding calendar year.

§ 53-0107. Grants or gifts.

The department, with the approval of the governor, may accept as agent of the state any gift, devise or bequest, whether conditional or unconditional (notwithstanding the provisions of section eleven of the state finance law), and including federal grants, for any of the

purposes of this article. Any moneys so received may be expended by the department to effectuate any purpose of this article, subject to the same limitations as to approval of expenditures and audit as are prescribed for state moneys appropriated for the purposes of this article.

TITLE 3

URBAN FORESTRY PROGRAMS

Section 53-0301. Legislative purpose.

53-0303. Definitions.

53-0305. Designation of commissioner.

53-0307. Funding of department; municipal authorization for local urban forestry and arboriculture programs.

§ 53-0301. Legislative purpose.

The legislature finds and declares that:

1. It is the purpose of this title to promote a comprehensive urban forestry program to assure positive benefit from urban trees planned and managed with adequate recognition of the physical, biotic and social surroundings in which they are encouraged to grow and provide their benefits.

2. Trees can serve as a vital link between man in the urban setting and his environment, if properly planned and managed.

3. Trees and shrubs can improve the quality of urban environments by helping to prevent erosion, by providing shade, modifying extremes of temperature and humidity, helping to reduce noise and air pollution, and enhancing the aesthetic quality of life. Also, vegetation in urban green space can contribute to urban water shed management and provide habitats for desirable urban wildlife.

4. Growing conditions in urban areas for trees and associated plants

are frequent and recurrent problems because of highway and street widening, sidewalk reconstruction, air pollution, modified drainage, erosion, soil fertility depletion, insects and disease, mechanical hazards and other adverse influences resulting from concentrated use of land. On the other hand, many mature urban areas have large tracts of open space on which more urban vegetation could be grown.

5. Improved and expanded urban tree programs for planting and maintenance of trees and associated vegetation in urban areas would help make urban areas more pleasant and healthful places to live, work and visit; and

6. Trees are an important economic asset and resource to urban areas by increasing land values and by modifying extremes of temperature, humidity and winds and thereby have an important role in reducing the amount of energy consumed in heating and cooling many urban buildings and homes.

§ 53-0303. Definitions.

As used in this title:

1. "Urban forestry" means the planning, establishment, protection and other management of trees and other vegetation in urban areas for present and potential contribution to the physiological, sociological, and economic well-being of urban society. An important component of urban forestry is "arboriculture" which more specifically includes the planting, growing, maintenance and protection of trees and shrubs, individually and in small groups.

2. "Urban forestry plan" means a comprehensive plan for the selection, establishment, maintenance and management of existing and future trees and associated vegetation in an urban area, which plan shall, to the maximum extent possible, present an analysis of physical, biotic, and social conditions of present and potential sites for vegetation, and of improvement needs, opportunities and planned projects within an urban

area.

3. "Urban areas" means cities, villages or towns with a population density of greater than one thousand persons per square mile.

4. "Contributed funds" means money donated by residents of an urban area and others to an urban area for urban forestry or arboriculture within that urban area.

5. "Public funds" means money appropriated by a non-federal government entity for urban forestry or arboriculture within that urban area.

6. "Vacant public land" means any land owned by a state agency, public authority, public benefit corporation or municipal corporation that is not used, is unoccupied or idle; including rights-of-ways but excluding land subject to use restrictions under law.

7. "Municipal forester" means a municipal official appointed by the chief executive officer of a municipal corporation to act as a liaison with the department and the public for the purposes set forth in this article.

§ 53-0305. Designation of commissioner.

For the purposes of this title, the commissioner is designated as the appropriate state official to coordinate federal funding of urban forestry and arboriculture programs and by regulation may provide for the submission and approval of urban forestry and arboriculture plans. The department will also provide technical assistance to urban areas for urban forestry and arboriculture, and encourage the participation of municipal foresters, private agencies, organizations, firms, and individuals to furnish urban forestry and arboricultural services in order to carry out the purposes of this title. The commissioner may take steps necessary to facilitate the cooperation of private agencies and organizations with municipalities for the purposes of this article, including long-term contracts with private parties for the use of vacant

public lands in or around urban areas, subject to other requirements of state law and the jurisdiction of other public agencies with respect thereto, for purposes of urban forestry and arboriculture under this article, and to provide trees and shrubs for planting in accordance with an approved urban forestry or arboricultural plan. This program shall be administered in cooperation with the Cornell cooperative extension and the soil and water conservation districts to avoid duplication between these agencies and the department.

§ 53-0307. Funding of department; municipal authorization for local urban forestry and arboriculture programs.

In the absence of federal legislation funding the department's participation under section 53-0305, no duty is imposed on the department hereunder. Federal funding, however, is not a prerequisite to local implementation of municipal urban forestry or arboriculture programs, as herein provided; and any municipality may implement a local urban forestry or arboriculture program within its jurisdiction under the authority of this title and chapter. All charges and expenses incurred under this section by a town shall be a charge upon the taxable property of that part of the town outside any incorporated village.

ARTICLE 54

ENVIRONMENTAL PROTECTION ACT

- Title
1. General provisions
 3. Open space land conservation projects
 5. Non-hazardous municipal landfill closure projects and municipal landfill gas management projects
 7. Municipal waste reduction or recycling projects
 9. Park, recreation and historic preservation projects
 11. Local waterfront revitalization plans and coastal rehabilitation projects
 13. Long Island central pine barrens area and south shore estuary reserve planning
 15. Climate smart community projects

TITLE 1
GENERAL PROVISIONS

Section 54-0101. Definitions.

54-0103. Powers and duties of the commissioner or secretary.

54-0105. Powers and duties of a municipality.

54-0107. Other powers not affected.

54-0109. Fiscal reporting.

§ 54-0101. Definitions.

As used in this article, unless otherwise specified within any title of this article, the following terms shall mean and include:

1. "Commissioner" means the commissioner of environmental conservation; except that within and for the purposes of the projects undertaken by the office pursuant to title nine of this article, the term shall mean the commissioner of the office of parks, recreation and historic preservation.

2. "Cost" means the cost of an approved project, which shall include engineering and architectural services, plans and specifications, consultant and legal services, and other direct expenses incident to such project less any federal assistance received or to be received and any other assistance from other parties.

3. "Department" means the department of environmental conservation.

4. "Facility" means any structure or site improvement including paths, trails, roads, bridges, ramps and buildings.

5. "Federal assistance" means funds available, other than by loan, from the federal government, either directly or through allocation by the state for construction or program purposes pursuant to any federal law or program.

6. "Governing body" means:

a. in the case of a county outside of the city of New York, the county board of supervisors or other elective governing body;

b. in the case of a city or village, the local legislative body thereof, as the term is defined in the municipal home rule law;

c. in the case of a town, the town board;

d. in the case of a public benefit corporation, the board of directors, members or trustees thereof;

e. in the case of a public authority, the governing board of directors, members, or trustees thereof;

f. in the case of a not-for-profit corporation, the board of directors thereof or such other body designated in the certificate of incorporation to manage the corporation; and

g. in the case of an Indian tribe or nation, any governing body recognized by the United States or the state of New York.

7. "Municipality" means a local public authority or public benefit corporation, a county, city, town, village, or Indian tribe or nation residing within New York state, or any combination thereof. For the purposes of title 5 and title 9 of this article, municipality shall also include state agencies, state public authorities and state public benefit corporations. For the purposes of title 7 and title 9 of this article, the term municipality shall also include a school district and a supervisory district.

8. "Not-for-profit corporation" means a corporation formed pursuant to the not-for-profit corporation law and qualified for tax-exempt status under the federal internal revenue code.

9. "Office" means the office of parks, recreation and historic preservation.

10. "Solid waste" shall have the definition set forth in title 5 of article 27 of this chapter but shall not include hazardous waste as defined in title 9 of article 27 of this chapter.

11. "State assistance payment" means the payment of monies by the state for projects authorized by the environmental protection fund, to preserve, enhance, restore and improve the quality of the state's environment.

12. "Secretary" means the secretary of state.

§ 54-0103. Powers and duties of the commissioner or secretary.

In administering the provisions of this article the respective commissioner or the secretary:

1. shall make an itemized estimate of funds or appropriations requested annually for inclusion in the executive budget;

2. may, in the name of the state, as further provided within this article, contract to make, within the limitations of appropriations available therefor, state assistance payments to a municipality toward the cost of a project approved and to be undertaken pursuant to this article, or to a not-for-profit corporation toward the costs of a project approved and to be undertaken pursuant to titles three and nine of this article. Such contracts shall include provisions to maximize awareness for the public that a source of funding for such project is the New York state environmental protection fund. Such provisions shall not require any expenditure of funds beyond that which the municipality may decide if it communicates to the public regarding the project. Such contracts shall be subject to approval by the state comptroller and, as to form, by the attorney general;

3. may, in the name of the state, enter into contracts, within the limitations of appropriations available therefor, with not-for-profit corporations, public benefit corporations, and private contractors for services contemplated by this article to be funded hereunder. Such contracts shall include provisions to maximize awareness for the public that a source of funding for such services is the New York state environmental protection fund. Such provisions shall not require any expenditure of funds beyond that which the not-for-profit corporations, public benefit corporations, and private contractors may decide if it communicates to the public regarding the project. Such contracts shall be subject to approval by the state comptroller and, as to form, by the attorney general;

4. shall approve vouchers for the payments pursuant to an approved contract. All such payments shall be paid on the audit and warrant of the state comptroller; and

5. may perform such other and further acts as may be necessary, proper or desirable to carry out the provisions of this article.

§ 54-0105. Powers and duties of a municipality.

A municipality shall have the power and authority to:

1. Undertake and carry out any project for which state assistance payments pursuant to contract are received or are to be received pursuant to this article and maintain and operate such project;

2. Expend money received from the state pursuant to this article for costs incurred in conjunction with the approved project; and

3. Perform such other and further acts as may be necessary, proper or desirable to carry out a project or obligation, duty or function related thereto.

§ 54-0107. Other powers not affected.

Nothing in this article shall be construed to limit or restrict any powers of the commissioner or any other agency pursuant to any other provision of law.

§ 54-0109. Fiscal reporting.

1. No later than fifteen days after the end of each fiscal year quarter, the department shall report to the director of the budget, the chairperson of the senate finance committee, the chairperson of the assembly ways and means committee and the public on the status of each project receiving state assistance payments pursuant to this article. Each state agency, department, public authority or public benefit corporation administering any project or program pursuant to this article shall assist the department in the preparation of the report and shall provide information as required by the department. Such report shall include as applicable for each category, subcategory and project:

- (a) total appropriations;
- (b) total project costs;
- (c) total commitments;
- (d) total outstanding encumbrances;
- (e) total year to date disbursements;
- (f) total life to date disbursements; and
- (g) total remaining uncommitted balance.

2. Such report shall also contain the percentage and amount of funding directed to facilitate disabled access to department and office of parks, recreation and historic preservation owned or managed facilities.

TITLE 3

OPEN SPACE LAND CONSERVATION PROJECTS

Section 54-0301. Definitions.

54-0303. Open space land conservation projects.

§ 54-0301. Definitions.

For purposes of this title, "open space land conservation projects" shall mean acquisition projects including the purchase of conservation easements undertaken by the commissioner and/or the commissioner of the office of parks, recreation and historic preservation listed in the state open space land acquisition plan prepared pursuant to title 2 of article 49 of this chapter.

§ 54-0303. Open space land conservation projects.

1. The commissioner and the commissioner of the office of parks, recreation and historic preservation are authorized to undertake open space land conservation projects.

2. a. The commissioner of the office of parks, recreation and historic preservation may enter into an agreement for the maintenance and operation of open space land conservation projects in urban areas or metropolitan park projects by a municipality, or a not-for-profit corporation or unincorporated association which demonstrates to the commissioner's satisfaction that the future physical climate risk due to sea level rise, and/or storm surges and/or flooding, based on available data predicting the likelihood of future extreme weather events, including hazard risk analysis data if applicable, has been considered and the municipality, not-for-profit corporation or unincorporated association is financially or otherwise capable of operating and maintaining the project for the benefit of the public and of maximizing public access to such project. Any such agreement shall contain such provisions as shall be necessary to ensure that its operation and maintenance are consistent with and in furtherance of this article and shall be subject to the approval of the director of the budget, the comptroller and, as to form, the attorney general.

b. The commissioner, pursuant to appropriation therefor and in order to further the purposes of article forty-six of this chapter, may make

available to the Albany Pine Bush preserve commission, established by article forty-six of this chapter, moneys for the operation of such commission, including the management of lands under the jurisdiction of such commission in accordance with a management plan prepared as specified in section 46-0111 of this chapter.

3. The cost of an open space land conservation project shall include the cost of preparation of a management plan for the preservation and beneficial enjoyment of the land acquired except where such considerations have already been undertaken as part of an existing plan applicable to the newly acquired land.

4. To the fullest extent practicable, it is the policy of the state to promote an equitable regional distribution of open space land conservation funds, consistent with the purpose of this title, taking into account regional differences in real property values, ecological resources and recreational opportunities.

5. No project, which was not listed on the state land acquisition plan as of the effective date of this title, shall be proposed for acquisition by the state under this title, pursuant to the state land acquisition plan, if any town, village or city within which such a project is located, by resolution, within ninety days of notification by the state of its interest in acquiring such project, objects to such acquisition. Such objection shall be transmitted to the commissioner through the regional land acquisition advisory committee and shall prevent the state from undertaking such acquisition.

6. No monies shall be expended for acquisition by eminent domain of any open space land conservation project except in accordance with the state land acquisition policy set forth in section 49-0203 of this chapter.

7. No monies shall be expended for open space land conservation projects except pursuant to an appropriation therefor.

TITLE 5

NON-HAZARDOUS MUNICIPAL LANDFILL CLOSURE PROJECTS AND MUNICIPAL LANDFILL GAS MANAGEMENT PROJECTS

Section 54-0501. Definitions.

- 54-0503. Eligibility to receive state assistance payments for municipal landfill closure projects.
- 54-0504. Eligibility to receive state assistance payments for municipal landfill gas management projects.
- 54-0505. Criteria for municipal landfill closure projects.
- 54-0506. Criteria for municipal landfill gas management projects.
- 54-0507. State assistance application procedure.
- 54-0509. Contracts for state assistance payments for municipal landfill closure projects and municipal landfill gas management projects.
- 54-0511. Loans for municipal landfill closure projects and municipal landfill gas management projects.
- 54-0513. Powers and duties of the commissioner.
- 54-0515. Powers and duties of a municipality.

§ 54-0501. Definitions.

As used in this title the following terms shall mean and include:

1. "Landfill" means a disposal facility or part of one at which solid waste, or its residue after treatment, is intentionally placed in or on land, and at which solid waste will remain after closure and which is not a land spreading facility, a surface impoundment, or an injection well.

2. "Municipal landfill closure project" means activities undertaken to close, including by reclamation, a landfill owned or operated by a municipality to achieve compliance with regulations promulgated by the department, or activities undertaken to implement a landfill gas management system.

3. "Cost" means the capital cost of a municipal landfill closure project or a municipal landfill gas management project, including engineering and architectural services, plans and specifications, consultant and legal services, and other direct capital expenses incident to such project, less any federal or other assistance for such project received or to be received.

4. "Landfill gas management system" means an active system for the control, capture, and management of gas created within and emitted from a solid waste landfill.

5. "Municipal landfill gas management project" means activities undertaken to implement a landfill gas management system at an active landfill which is owned or operated by a municipality.

§ 54-0503. Eligibility to receive state assistance payments for municipal landfill closure projects.

Any municipality which is the owner or operator of a landfill may apply for state assistance payments toward the cost of a municipal landfill closure project upon showing that the following criteria, in addition to applicable rules and regulations, have been met:

1. The landfill site has not been classified pursuant to subparagraph one or two of paragraph b of subdivision four of section 27-1305 of this chapter. Sites which have been removed from the registry may apply for state assistance payments.

2. The municipality has an obligation to close the landfill by a specific date pursuant to an administrative order, court order or permit which requires the municipality to cease acceptance of waste at the site within eighteen months of the date the application for state assistance payment is approved.

3. A closure investigation report which complies with the requirements of applicable regulations of the department, including a demonstration

that future physical climate risk due to sea level rise, and/or storm surges and/or flooding, based on available data predicting the likelihood of future extreme weather events, including hazard risk analysis data if applicable, has been considered, shall have been submitted.

4. The municipality has agreed, upon project approval, to waive any right to state assistance for closure of the site under section 27-1313 of this chapter.

§ 54-0504. Eligibility to receive state assistance payments for municipal landfill gas management projects.

Any municipality which is the owner or operator of a landfill may apply for state assistance payments toward the cost of a municipal landfill gas management project. Any application for a municipal landfill gas management project must comply with all applicable rules and regulations promulgated by the department.

§ 54-0505. Criteria for municipal landfill closure projects.

1. State assistance payments shall be approved only for closure projects that include plans for closure, post-closure and construction in accordance with the department's solid waste management regulations applicable to new projects which were in effect six months prior to the date of submittal of the final application.

2. Municipal landfill closure project costs incurred prior to April first, nineteen hundred ninety-three shall not be eligible for state assistance payments funded pursuant to this article.

3. Prior to processing applications for state assistance payments for projects pursuant to this section, the commissioner shall promulgate, in consultation with the director of the budget, rules and regulations which shall include criteria for determining eligible expenditures and

procedures governing the commitment and disbursement of funds appropriated in accordance with this section. The commissioner also shall promulgate rules and regulations which shall include application procedures, review processes, and project approval guidelines and criteria.

§ 54-0506. Criteria for municipal landfill gas management projects.

Municipal landfill gas management project costs incurred prior to April first, nineteen hundred ninety-three shall not be eligible for state assistance payments funded pursuant to this article.

§ 54-0507. State assistance application procedure.

1. A municipality, upon the approval of its governing body, may submit an application to the commissioner, in such form and containing such information as the commissioner may require, for state assistance payments toward the cost of a project which is within the state of New York and which is eligible for state assistance pursuant to this title.

2. The commissioner shall review such project application and may approve, disapprove or recommend modifications thereto consistent with applicable law, criteria, standards or rules and regulations relative to such projects. In reviewing applications for projects pursuant to this section, the commissioner shall give due consideration to:

a. the urgency of need to provide state assistance payments for the project in relation to the provision of monies for other project needs in the state known at the time such application is made;

b. any adverse environmental impact resulting from the municipal landfill, including effects on groundwater; and

c. the ability of the municipality to pay for the costs of closure.

3. No monies shall be expended for non-hazardous municipal landfill closure projects or municipal landfill gas management projects except pursuant to an appropriation therefor.

§ 54-0509. Contracts for state assistance payments for municipal landfill closure projects and municipal landfill gas management projects.

After approval of the application, the commissioner and the municipality shall enter into a contract for state assistance payments toward the cost of such project which shall include the following provisions:

1. A current estimate of the cost of the project as determined by the commissioner at the time of the execution of the contract.

2. An agreement by the commissioner to make state assistance payments toward the cost of the project by periodically reimbursing the municipality for costs incurred during the progress of the project. For a municipal landfill closure project, which does not include a landfill gas management system, such reimbursement shall be a maximum of either fifty percent of the cost, or ninety percent of the cost for a municipality with a population smaller than thirty-five hundred as determined by the current federal decennial census, or two million dollars, whichever is less. For a landfill gas management system, which is part of a municipal landfill closure project, reimbursement shall be a maximum of either fifty percent of the cost, or ninety percent of the cost for a municipality with a population smaller than thirty-five hundred as determined by the current federal decennial census, or two million dollars, whichever is less. For a municipal landfill gas management project, reimbursement shall be a maximum of either fifty percent of the cost, or ninety percent of the cost for a municipality with a population smaller than thirty-five hundred as determined by the current federal decennial census, or two million dollars, whichever is less. Project costs are subject to final computation and determination by the commissioner upon completion of the project, and shall not exceed

the maximum cost set forth in the contract. For purposes of this subdivision, the approved project cost shall be reduced by the amount of any specific state assistance payments for municipal landfill closure or municipal landfill gas management project purposes received by the municipality from any source; provided, however, that non-specific state assistance payments, such as amounts paid pursuant to section fifty-four of the state finance law, shall not be included in such cost reduction.

3. An agreement by the municipality to proceed expeditiously with the project and to complete the project in accordance with plans and reports approved by the department and with the conditions of applicable permits, administrative orders or judicial orders.

§ 54-0511. Loans for municipal landfill closure projects and municipal landfill gas management projects.

1. A municipality eligible for a state assistance payment pursuant to subdivision two of section 54-0509 of this title and which has a population smaller than thirty-five hundred as determined by the current federal decennial census is also eligible for a loan to a maximum of the unfunded portion of such project.

2. Loans pursuant to this title shall be without interest and for a term not to exceed twenty years.

3. Loan repayments under this title shall be deposited to the credit of the environmental protection fund pursuant to subdivision two of section ninety-two-s of the state finance law.

4. A municipality obtaining a loan under subdivision one of this section shall enter into a contract with the commissioner. That contract shall contain the following provisions:

a. the loan shall be repaid in appropriate equal installments. There shall be a one percent per month surcharge for each month of delinquent payment added to any such installment tendered more than sixty days

after the due date.

b. in the event a municipality shall fail to make any payment due to the state pursuant to this title, the commissioner shall certify to the comptroller and notify the chairman of the assembly ways and means committee, the chairman of the senate finance committee, the director of the division of the budget and the governing body of the municipality that such municipality has failed to make such payment. Such certificate shall be in the form as may be determined by the commissioner provided such certificate shall specify the exact amount of principal and surcharge required to satisfy such municipality's unpaid obligation. The comptroller, upon receipt of such certificate from the commissioner, shall withhold from such municipality any state aid payable to it to the extent necessary to meet the certified amount of principal and surcharge due the commissioner and shall immediately pay over to the environmental protection fund the amount so withheld.

§ 54-0513. Powers and duties of the commissioner.

In administering the provisions of this title the commissioner:

1. shall make an itemized estimate of funds or appropriations requested annually for inclusion in the executive budget;
2. may, in the name of the state, as further provided within this article, contract to make, within the limitations of appropriations available therefor, state assistance payments and loans toward the costs of an approved project. Such contracts shall be subject to approval by the state comptroller and, as to form, by the attorney general;
3. shall approve vouchers for the payments pursuant to an approved contract. All such payments shall be paid on the audit and warrant of the state comptroller; and
4. may perform such other and further acts as may be necessary, proper or desirable to carry out the provisions of this article.

§ 54-0515. Powers and duties of a municipality.

A municipality shall have the power and authority to:

1. Undertake and carry out any project for which state assistance payments and loans pursuant to contract are received or are to be received pursuant to this article and maintain and operate such project;
2. Expend money received from the state pursuant to this article for costs incurred in conjunction with the approved project; and
3. Perform such other and further acts as may be necessary, proper or desirable to carry out a project or obligation, duty or function related thereto.

TITLE 7

MUNICIPAL WASTE REDUCTION OR RECYCLING PROJECTS

Section 54-0701. Definitions.

- 54-0703. Approval of state assistance payments for municipal recycling or waste reduction projects.
- 54-0705. Rules and regulations.
- 54-0707. State assistance application procedure.
- 54-0709. Contracts for state assistance payments for waste reduction or municipal recycling projects.

§ 54-0701. Definitions.

As used in this title the following terms shall mean and include:

1. "Cost" means the capital cost of a municipal recycling project including engineering and architectural services, surveys, plans and specifications; consultant and legal services; lands acquired pursuant to the conditions set forth in section 54-0709 of this title, and other

direct capital expenses incident to such a project, less any federal assistance or other assistance received or to be received. "Cost" shall also include the capital, planning and promotional costs associated with waste reduction projects, the costs related to household hazardous waste collection and disposal programs, and the costs related to planning, educational and promotional activities associated with a recyclables recovery program. "Cost" shall also include beverage container assistance program grants to municipalities and not-for-profit organizations pursuant to section 27-1018 of this chapter. Provided, however, "cost" shall exclude any cost incurred prior to April first, nineteen hundred ninety-three, and shall further exclude costs related to planning, educational and promotional activities associated with a recyclables recovery program incurred prior to April first, two thousand.

2. "Recyclables recovery equipment" means structures, machinery or devices, singly or in combination, designed, constructed and required primarily to separate, process, modify, convert, treat, or prepare collected solid waste, which is included as part of a recyclables recovery program so that component materials or substances or recoverable resources may be used as a raw material for new products or for useful purposes other than for energy recovery, and for the collection and preparation for disposal of household hazardous waste.

3. "Recyclables recovery program" means a program undertaken by a municipality consistent with requirements of section one hundred twenty-aa of the general municipal law to provide for the environmentally sound recovery of recyclables, primarily involving the collection, aggregation and processing of recyclable materials for their use as raw materials for new products or for other useful purposes other than for energy recovery, through facilities planned, designed and constructed to ensure environmental protection and to maximize the potential for recyclables recovery. A recyclables recovery program also shall mean planning, educational and promotional activities to increase public awareness of and participation in recycling. Such program shall have been approved by the commissioner and undertaken consistent with any local solid waste management plan pursuant to section 27-0107 of

this chapter.

4. "Recycling project" means recyclables recovery equipment, source separation equipment, a recyclables recovery program or any combination thereof required by a recyclables recovery program and the reimbursement to municipalities and not-for-profit corporations, as such terms are defined in section 54-0101 of this article, for the cost of a redemption center as defined in section 27-1003 of this chapter.

5. "Source separation equipment" means municipally-owned:

a. Add-ons or trailers designed to modify collection vehicles to allow sorting and separation of collected wastes held for the purpose of recycling;

b. Containers for the source separation and temporary storage of recyclable wastes by commercial, industrial and institutional generators, and for the source separation and temporary storage of recyclable wastes by single family and multiple family dwellings prior to collection;

c. Bins, sheds or other facilities for the temporary storage of materials prior to transport for the purposes of recycling; and

d. Collection vehicles specifically designed to hold and transport source separated recyclables.

6. "Waste reduction projects" means projects undertaken to reduce the volume or toxicity of material entering the municipal solid waste stream, by reducing the volume or toxicity of such material at the point of generation. Waste reduction projects shall include planning and educational or promotional activities to increase public awareness of methods to prevent the generation of waste including the reuse of certain materials, substitution of non-toxic household products, and the promotion of backyard composting.

7. "Household hazardous waste" shall mean solid waste emanating from

households (including single and multiple residences, hotels and motels, bunkhouses, ranger stations, crew quarters, campgrounds, picnic grounds and day-use recreation areas) which but for their point of generation, would be a hazardous waste under title 9 of article 27 of this chapter or a "pesticide" as defined in article 33 of this chapter.

§ 54-0703. Approval of state assistance payments for municipal recycling or waste reduction projects.

1. State assistance payments toward the cost of municipal recycling or waste reduction projects shall be made pursuant to this title with the approval of the commissioner pursuant to an approved contract or contracts.

2. In reviewing applications for state assistance payments for municipal recycling or waste reduction projects, the commissioner shall give due consideration to:

a. the adequacy of the municipality's waste reduction or recycling program and its relationship to the needs and plans of other municipalities; provided, however, that such adequacy shall be determined in part by the efforts undertaken to date by the municipality to implement a mandatory source separation law or ordinance required pursuant to section one hundred twenty-aa of the general municipal law;

b. the suitability and feasibility of the project in relation to the recycling program and the area to be served;

c. the proportion of solid waste for which waste reduction or recyclables recovery is contemplated and the extent to which the project is consistent with the statewide solid waste reduction and recycling goals established under the state solid waste management plan, pursuant to section 27-0103 of this chapter;

d. the potential for coordination and consolidation of solid waste management practices among municipalities within specified areas,

regions or planning units;

e. the implementation of the system or components thereof and their expected terms of usefulness, singly or in combination;

f. the present and projected population, land use, and rates and composition of solid waste generation;

g. the potential or contemplated markets for recovered recyclables and the extent to which the full avoided costs of proper collection, transportation and disposal of source separated recyclables are, or are projected to be, greater than the cost of collection, transportation and sale of said recyclables less the amount received from the sale of said recyclables;

h. the intergovernmental arrangements integral to the project;

i. the non-governmental arrangements integral to the project;

j. the urgency of the project, in relationship to all recyclables recovery program needs in the state; and

k. the environmental soundness of the project, including assurance that the project will meet all applicable laws, criteria, and rules and regulations.

3. State assistance payments toward the cost of a waste reduction or municipal recycling project shall not exceed fifty percent of the cost, and in the aggregate such payments shall in no event exceed two million dollars. Such costs are subject to final computation and determination by the commissioner upon completion of the project, and shall not exceed the maximum eligible cost set forth in the contract.

§ 54-0705. Rules and regulations.

Prior to processing applications for state assistance payments toward

the cost of municipal waste reduction or recycling projects, the commissioner shall promulgate, in consultation with the director of the budget and the commissioner of economic development, rules and regulations which shall include criteria for determining eligible expenditures and procedures for governing the commitment and disbursement of funds appropriated in accordance with this title. The commissioner, in consultation with the commissioner of economic development, shall also promulgate rules and regulations which shall include application procedures, review processes, and project approval guidelines and criteria.

§ 54-0707. State assistance application procedure.

1. A municipality, upon the approval of its governing body, may submit an application to the commissioner, in such form and containing such information as the commissioner may require, for state assistance payments toward the cost of a project which is within the state of New York and which is eligible for state assistance pursuant to this title.

2. The commissioner shall review such project application and may approve, disapprove or recommend modifications thereto consistent with applicable law, criteria, standards or rules and regulations relative to such projects.

3. Upon approval of a project application, a municipality shall enter into a contract, as further provided within this article, with the commissioner for state assistance payments toward the cost of such project to be received pursuant to this article.

4. No monies shall be expended for municipal waste reduction or recycling projects except pursuant to an appropriation therefor.

§ 54-0709. Contracts for state assistance payments for waste reduction or municipal recycling projects.

1. The commissioner may, in the name of the state, enter into contracts with municipalities to provide state assistance payments toward the cost of waste reduction or municipal recycling projects. Such contracts shall include the following provisions:

a. an estimate of the costs of the project as determined by the commissioner;

b. an agreement by the commissioner to make state assistance payments toward the cost of the project by periodically reimbursing the municipality, during the progress of project development or following completion of the project as may be agreed upon by the parties, in an amount not to exceed the amounts established elsewhere in this title; and

c. an agreement by the municipality:

(i) to proceed expeditiously with and complete the project as approved by the commissioner;

(ii) to operate and maintain the waste reduction or municipal recycling project in accordance with applicable law and rules and regulations;

(iii) to provide for the payment of the municipality's share of the cost of the project;

(iv) to continue, upon evaluation of its effectiveness, operation of the project and not to dispose of the project or any portion thereof or change its use without the approval of the commissioner;

(v) to assume the full cost of any continued operation of the project;

(vi) to repay within one year of notification by the commissioner, any state assistance payments made toward the cost of the project or an equitable portion of such monies declared appropriate by the commissioner, if the municipality:

(A) fails to complete the project as approved;

(B) fails to continue operation of the project;

(C) disposes of the project, or any portion thereof, without the prior written approval of the commissioner; or

(D) changes the use of the project, or any portion thereof, without the prior written approval of the commissioner.

No repayment, however, shall be required where the commissioner determines that such failure, disposition or change of use was immediately necessary to protect public health and safety;

(vii) to apply for and make reasonable efforts to secure federal assistance for the project; and

(viii) to not sell, lease or otherwise dispose of or use lands acquired under this title for any purpose inconsistent with the project under which such land is acquired.

2. In connection with each contract, the commissioner shall keep adequate records of the amount of the payment by the state and of the amount of federal assistance, if any, received by the municipality. Such records shall be retained by the commissioner and shall establish the basis for recalculation of the state payment as required herein.

TITLE 9

PARK, RECREATION AND HISTORIC PRESERVATION PROJECTS

Section 54-0901. Definitions.

54-0903. Approval and execution of projects.

54-0905. Municipal regulations; limitations.

54-0907. Contracts.

54-0909. Restriction on alienation.

54-0911. Rules and regulations.

§ 54-0901. Definitions.

As used in this title the following terms shall mean and include:

1. "Municipal park project" means a project undertaken by a municipality or a not-for-profit corporation for the planning, structural assessment, acquisition, development or improvement of recreational facilities including construction of structures, roads and parking facilities.

2. "Historic preservation project" means a project undertaken by a

municipality or a not-for-profit corporation to acquire, improve, restore or rehabilitate property listed on the state or national registers of historic places to protect the historic, cultural or architectural significance thereof or a project for planning or structural assessments for such properties. "Historic preservation project" shall also mean a project undertaken by the office to improve, restore or rehabilitate state historic properties listed on the state or national registers of historic places to protect the historical, cultural or architectural significance thereof or a project for planning relating to or structural assessments of such properties.

3. "Heritage area project" means a project undertaken by or through a municipality, public benefit corporation or a not-for-profit corporation for the planning, structural assessment, acquisition and development of sites and facilities identified in a management plan prepared and/or approved by the commissioner in accordance with the provisions of section 35.05 of the parks, recreation and historic preservation law.

4. "Costs" means the cost of an approved project, which shall include engineering and architectural services, plans and specifications, consultant and legal services, and other direct expenses incident to such project.

§ 54-0903. Approval and execution of projects.

1. State historic preservation projects may be undertaken pursuant to the provisions of this article and other applicable provisions of law only with the approval of the commissioner.

2. All historic preservation projects, municipal park projects and heritage area projects shall be undertaken in the state of New York. Except for state projects undertaken by the office at state historic properties, the total amount of the state assistance payments toward the cost of any such project shall in no event exceed fifty percent of the cost, provided however, that in the case of a project located in an area which, according to the most recent census data available, has a poverty

rate of at least ten percent for the year to which the data relates, state assistance payments toward the cost of any such project shall in no event exceed seventy-five percent of the cost. For the purpose of determining the amount of the state assistance payments, the cost of the project shall not be more than the amount set forth in the application for state assistance payments approved by the commissioner. The state assistance payments toward the cost of a project shall be paid on audit and warrant of the state comptroller on a certificate of availability of the director of the budget.

3. a. The commissioner and a municipality may enter into a contract for the undertaking by the municipality of an historic preservation project. Such historic preservation projects shall be recommended to the commissioner by the governing body of the municipality and, when approved by the commissioner, may be undertaken by the municipality pursuant to this title and any other applicable provision of law.

b. The commissioner and a not-for-profit corporation may enter into a contract for the undertaking by the not-for-profit corporation of an historic preservation project. Such an historic preservation project shall be recommended to the commissioner by the governing body of a not-for-profit corporation which demonstrates to the satisfaction of the commissioner that it is capable of operating and maintaining such property for the benefit of the public. Upon approval by the commissioner, such project may be undertaken pursuant to the provisions of this title and any other applicable provision of law.

4. a. The commissioner and a municipality may enter into a contract for the undertaking by the municipality of a municipal park project. Municipal park projects shall be recommended to the commissioner by the governing body of the municipality, and when approved by the commissioner, may be undertaken by the municipality pursuant to this title and any other applicable provisions of law. The office shall assess existing parks and recreational opportunities in the municipalities where the municipal park project is located and shall give preference to projects which are in or primarily serve areas where demographic and other relevant data for such areas demonstrate that the

areas are densely populated and have sustained physical deterioration, decay, neglect or disinvestment, or where a substantial proportion of the residential population is of low income or is otherwise disadvantaged and is underserved with respect to the existing recreational opportunities in the area.

b. The commissioner and a not-for-profit corporation may enter into a contract for the undertaking by the not-for-profit corporation of a municipal park project. Such a contract shall be contingent upon the approval of the governing body of each municipality in which the project is located. Such a project shall be recommended to the commissioner by the governing body of a not-for-profit corporation which demonstrates to the satisfaction of the commissioner that it is capable of operating and maintaining such project for the benefit of the public. Upon approval by the commissioner, such project may be undertaken pursuant to the provisions of this title and any other applicable provision of law. The office shall assess existing parks and recreational opportunities in the municipalities where the municipal park project is located and shall give preference to projects which are in or primarily serve areas where demographic and other relevant data for such areas demonstrate that the areas are densely populated and have sustained physical deterioration, decay, neglect or disinvestment, or where a substantial proportion of the residential population is of low income or is otherwise disadvantaged and is underserved with respect to the existing recreational opportunities in the area.

5. The commissioner and a municipality, public benefit corporation or not-for-profit corporation may enter into a contract, subject to the approval of the director of the budget, for the undertaking by or through the municipality, public benefit corporation or not-for-profit corporation of a local heritage area or urban cultural park project including parkwide and district projects identified in a management plan prepared pursuant to section 35.05 of the parks, recreation and historic preservation law. Such projects shall be subject to an agreement by the local heritage area or urban cultural park management entity to operate or cause to be operated any public facility resulting from such project.

6. No monies shall be expended for park, recreation and historic preservation projects except pursuant to an appropriation therefor.

§ 54-0905. Municipal regulations; limitations.

A municipality which acquires, develops, improves, restores or rehabilitates property with funds made available pursuant to this title may establish reasonable rules and regulations by local law or otherwise to assure the proper administration and development thereof, provided that no such rule or regulation which restricts the use of such lands or facilities by non-residents of the municipality shall be effective without the approval of the commissioner.

§ 54-0907. Contracts.

1. The commissioner shall impose such contractual requirements and conditions upon any municipality and any not-for-profit corporation which receive state assistance payments pursuant to this title as may be necessary and appropriate to ensure that a public benefit shall accrue from the use of public funds by such municipality or not-for-profit corporation. Such conditions shall include limitations on the right of the municipality or not-for-profit corporation to demolish or convey such property, provisions for public access or use where appropriate, the granting of facade easements to the state, a requirement that all plans for restoration, rehabilitation, improvement, demolition or other physical change must be subject to the commissioner's approval, and such other conditions which shall assure the preservation and protection of the project.

2. Any not-for-profit corporation which receives state assistance payments pursuant to this title for the acquisition of land for outdoor recreation or conservation purposes shall execute a contract with the commissioner which shall include the following:

a. An agreement to make and keep the lands accessible to the public

unless the commissioner determines that public accessibility would be detrimental to the lands or any natural resources associated therewith;

b. An agreement not to sell, lease, exchange or donate the lands except to the state, a local government unit or another qualifying tax exempt non-profit organization for recreation and conservation purposes approved by the commissioner; and

c. An agreement to execute and convey to the state at no charge a conservation easement, pursuant to title three of article forty-nine of this chapter, over the lands to be acquired with state assistance payments.

§ 54-0909. Restriction on alienation.

1. Real property acquired, developed, improved, restored or rehabilitated by or through a municipality pursuant to paragraph a of subdivision four of section 54-0903 of this title or undertaken by or on behalf of the city of New York with funds made available pursuant to this title shall not be sold, leased, exchanged, donated or otherwise disposed of or used for other than public park purposes without the express authority of an act of the legislature, which shall provide for the substitution of other lands of equal environmental value and fair market value and reasonably equivalent usefulness and location to those to be discontinued, sold or disposed of, and such other requirements as shall be approved by the commissioner.

2. Real property acquired by a not-for-profit organization with funds made available pursuant to paragraph b of subdivision four of section 54-0903 of this title shall not be used in violation of an agreement entered into pursuant to the provisions of paragraph b of subdivision two of section 54-0907 of this title, or sold, leased, exchanged, donated or otherwise disposed of without the express authority of an act of the legislature.

§ 54-0911. Rules and regulations.

The commissioner shall adopt, prior to the acceptance of applications for municipal park, historic preservation and urban cultural park projects, rules and regulations which shall include eligibility requirements, application procedures, office ranking and review processes, project approval guidelines and criteria, and funding distribution necessary for all state assistance payment programs established pursuant to section 54-0903 of this title.

TITLE 11

LOCAL WATERFRONT REVITALIZATION PLANS AND COASTAL REHABILITATION PROJECTS

Section 54-1101. Local waterfront revitalization programs.

54-1103. Coastal rehabilitation projects.

54-1105. State assistance payments for coastal rehabilitation projects.

54-1107. State assistance application procedure and standards.

54-1109. Contracts for state assistance payments for coastal rehabilitation.

54-1111. State projects.

§ 54-1101. Local waterfront revitalization programs.

1. The secretary is authorized to provide on a competitive basis, within amounts appropriated, state assistance payments and/or technical assistance as defined in section nine hundred seventeen of the executive law, to municipalities toward the development of any local waterfront revitalization program, pursuant to article forty-two of the executive law including planning projects to mitigate future physical climate risks and updates to existing local waterfront revitalization program plans to mitigate future physical climate risks. Eligible costs include planning, studies, preparation of local laws, and construction projects.

2. State assistance payments and/or technical assistance, as defined

in section nine hundred seventeen of the executive law, shall not exceed seventy-five percent of the cost of the program provided, however, in environmental justice communities, such assistance payments and/or technical assistance shall not exceed eighty-five percent of the cost of the program. For the purpose of determining the amount of state assistance payments, costs shall not be more than the amount set forth in the application for state assistance payments approved by the secretary. The state assistance payments shall be paid on audit and warrant of the state comptroller on a certificate of availability of the director of the budget.

3. The secretary shall have the power to approve vouchers for payments pursuant to an approved contract.

4. No moneys shall be expended as authorized by this section except pursuant to an appropriation therefor.

5. The secretary shall impose such contractual requirements and conditions upon any municipality which receives state assistance payments pursuant to this article as may be necessary and appropriate to ensure that a public benefit shall accrue from the use of such funds by the municipality including but not limited to, a demonstration that future physical climate risk due to sea level rise, and/or storm surges and/or flooding, based on available data predicting the likelihood of future extreme weather events, including hazard risk analysis data if applicable, has been considered.

§ 54-1103. Coastal rehabilitation projects.

As used in this title, "coastal rehabilitation project" shall mean those projects which serve a public purpose for beach nourishment necessary to maintain the natural functions of beach areas, maintenance of the natural passage of sand along coastal areas, emergency breach closures and similar activities undertaken by the state, a municipality, or a not-for-profit corporation which demonstrates to the commissioner's satisfaction that it is financially and otherwise capable of operating

and maintaining the project, for the restoration and rehabilitation of coastal areas diminished, damaged or destroyed by natural forces.

§ 54-1105. State assistance payments for coastal rehabilitation projects.

1. The commissioner is authorized to provide on a competitive basis, within amounts appropriated, state assistance payments to a municipality or a not-for-profit corporation toward the cost of any coastal rehabilitation project approved by the commissioner provided that the commissioner determines that future physical climate risk due to sea level rise, and/or storm surges and/or flooding, based on available data predicting the likelihood of future extreme weather events, including hazard risk analysis data if applicable, has been considered.

2. The commissioner and a municipality or not-for-profit corporation may enter into a contract for the undertaking of a coastal rehabilitation project. Such project shall be recommended to the commissioner by the governing body of the municipality or not-for-profit corporation as that term is defined pursuant to subdivision six of section 54-0101, and when approved by the commissioner, undertaken by the municipality or not-for-profit corporation pursuant to this article and any other applicable provisions of law.

3. State assistance payments shall not exceed fifty percent of the project cost or two million dollars, whichever is less. Such costs are subject to final computation and determination by the commissioner upon completion of the project, and shall not exceed the maximum eligible cost set forth in the contract.

4. Prior to processing applications for state assistance payments toward the cost of coastal rehabilitation projects, the commissioner shall promulgate rules and regulations which shall include criteria for determining eligible expenditures and procedures for governing the commitment and disbursement of funds appropriated in accordance with this title. The commissioner shall also promulgate rules and regulations

which shall include application procedures, review processes, and project approval guidelines and criteria consistent with section 54-1107.

§ 54-1107. State assistance application procedure and standards.

In the case of coastal rehabilitation projects, a municipality or not-for-profit corporation, upon the approval of its governing body, may submit an application to the commissioner, in such form and containing such information as the commissioner may require, for state assistance payments toward the cost of a project which is within the state of New York and which is eligible for state assistance pursuant to this title. The commissioner shall review such project application and may approve, disapprove or recommend modifications thereto consistent with applicable law, criteria, standards or rules and regulations relative to such projects. Such criteria and standards shall include, but not be limited to: the consistency of the project with the Coastal Erosion Hazard Areas Act, article 34 of this chapter, notwithstanding paragraph d of subdivision three of section 34-0108 of this chapter; the official coastal policies of the state pursuant to article 42 of the executive law; the extent of natural damages to the coastal area and the suitability and feasibility of the project in relation to maintaining natural resource features and functions; the importance of the coastal area to recreational resources, fish and wildlife resources, and/or endangered or threatened species habitat; and the public benefits provided by the project.

Upon approval of a project application, a municipality or not-for-profit corporation shall enter into a contract, as further provided within this article, with the commissioner for state assistance payments toward the cost of such project to be received pursuant to this article.

§ 54-1109. Contracts for state assistance payments for coastal rehabilitation.

1. The commissioner may, in the name of the state, enter into contracts with municipalities or not-for-profit corporations, to provide state assistance payments toward the cost of coastal rehabilitation projects which shall include the following provisions:

a. an estimate of the costs of the project as determined by the commissioner;

b. an agreement by the commissioner to make state assistance payments toward the cost of the project by periodically reimbursing the municipality or not-for-profit corporation during the progress of project development or following completion of the project as may be agreed upon by the parties, in an amount not to exceed the amounts established elsewhere in this title; and

c. an agreement by the municipality or not-for-profit corporation:

(i) to proceed expeditiously with and complete the project as approved by the commissioner;

(ii) to undertake and maintain the coastal rehabilitation project in accordance with applicable law and rules and regulations;

(iii) to provide for the payment of the municipality's or not-for-profit corporation's share of the cost of the project;

(iv) to assume the full cost of any additional elements or continued operation of the project;

(v) to repay within one year of notification by the commissioner, any state assistance payments made toward the cost of the project or an equitable portion of such monies declared appropriate by the commissioner, if the municipality or not-for-profit corporation fails to complete the project as approved. No repayment, however, shall be required where the commissioner determines that such failure, disposition or change of use was immediately necessary to protect public health and safety;

(vi) to apply for and make reasonable efforts to secure federal assistance for the project; and

(vii) to not sell, lease, or otherwise dispose of or use lands rehabilitated under this title for any purpose inconsistent with the

project for a period of seven years from the commissioner's approval of the project.

2. In connection with each contract, the commissioner shall keep adequate records of the amount of the payment by the state and of the amount of federal assistance, if any, received by the municipality or not-for-profit corporation. Such records shall be retained by the commissioner and shall establish the basis for recalculation of the state payment as required herein.

§ 54-1111. State projects.

The commissioner is authorized, within amounts appropriated, to directly undertake a coastal rehabilitation project pursuant to this title in accordance with section 1 of chapter 535 of the laws of 1945, as amended, or as specifically appropriated, on state lands or state lands underwater.

TITLE 13

LONG ISLAND CENTRAL PINE BARRENS AREA AND SOUTH SHORE ESTUARY RESERVE PLANNING

Section 54-1301. Long Island central pine barrens area planning.

54-1303. Long Island south shore estuary reserve planning.

§ 54-1301. Long Island central pine barrens area planning.

In order to further the purposes of article 57 of this chapter, the commissioner shall provide, within amounts appropriated from the environmental protection fund, state assistance payments for the preparation of the comprehensive central pine barrens land use plan pursuant to section 57-0121 of this chapter. State assistance payments may be made to the central pine barrens joint planning and policy commission established in article 57 of this chapter for all eligible costs incurred after April first, nineteen hundred ninety-three. No

monies shall be expended for Long Island central pine barrens area planning except pursuant to an appropriation therefor.

§ 54-1303. Long Island south shore estuary reserve planning.

In order to further the purposes of article forty-six of the executive law, the commissioner shall provide, within amounts appropriated from the environmental protection fund, state assistance payments for the preparation of the comprehensive management plan for the Long Island south shore estuary reserve as provided for in section nine hundred sixty-six of the executive law. State assistance payments may be made to the Long Island south shore estuary reserve council established by section nine hundred sixty-four of the executive law for all eligible costs incurred after April first, nineteen hundred ninety-four. No moneys shall be expended for Long Island south shore estuary reserve management planning except pursuant to an appropriation therefor.

TITLE 15

CLIMATE SMART COMMUNITY PROJECTS

Section 54-1501. Definition.

54-1503. Climate smart community projects.

54-1505. Eligibility to receive state assistance payments for climate smart community projects.

54-1507. Criteria for climate smart community projects.

54-1509. State assistance application procedure.

54-1511. State assistance payments for climate smart community projects.

54-1513. Climate change mitigation easements.

54-1515. Contracts for state assistance payments for climate smart community projects.

54-1517. Powers and duties of the commissioner.

54-1519. Powers and duties of a municipality.

54-1521. Clean vehicle projects.

54-1523. Climate adaptation and mitigation projects.

54-1525. Restriction on alienation.

§ 54-1501. Definition.

For purposes of this title, "climate smart community projects" shall mean adaptation and mitigation projects, including flood mitigation and coastal and riparian resiliency, greenhouse gas reductions outside the power sector and climate change adaptation planning, and clean vehicle projects.

§ 54-1503. Climate smart community projects.

The commissioner, pursuant to appropriation therefor, is authorized to undertake climate smart community projects.

§ 54-1505. Eligibility to receive state assistance payments for climate smart community projects.

Any municipality may apply for state assistance payments toward the cost of a climate smart community project. Any application must comply with all applicable rules and regulations determined by the department.

§ 54-1507. Criteria for climate smart community projects.

Costs incurred prior to April first, two thousand sixteen, shall not be eligible for state assistance payments funded pursuant to this title. Projects must demonstrate an ability to identify, mitigate and/or adapt to climate change vulnerability and risk or demonstrate potential to reduce greenhouse gas emissions outside the power sector.

§ 54-1509. State assistance application procedure.

1. A municipality, upon the approval of its governing body, may submit

an application to the commissioner, in such form and containing such information as the commissioner may require, for state assistance payments toward the cost of a project which is within the state of New York and which is eligible for state assistance pursuant to this title.

2. The commissioner shall review such project application and may approve, disapprove or recommend modifications thereto consistent with applicable law, criteria, standards or rules and regulations relative to such projects. In reviewing applications for projects pursuant to this section, the commissioner shall give due consideration to:

a. the urgency of need to provide state assistance payments for the project in relation to the provision of monies for other project needs in the state known at the time such application is made;

b. the project's contribution to the state's climate goals; and

c. the ability of the municipality to pay for the costs of the climate smart community project.

§ 54-1511. State assistance payments for climate smart community projects.

1. Unless otherwise specified by law, the commissioner is authorized to provide on a competitive basis, within amounts appropriated, state assistance payments to a municipality toward the cost of any climate smart community project approved by the commissioner provided that the commissioner determines that future physical climate risk due to sea level rise, and/or storm surges and/or flooding, based on available data predicting the likelihood of future extreme weather events, including hazard risk analysis data if applicable, has been considered, except that such determination shall not apply to rebates for eligible purchases pursuant to section 54-1521 of this title.

2. The commissioner and a municipality may enter into a contract for the undertaking of a climate smart community project. Such project shall

be recommended to the commissioner by the governing body of the municipality, and when approved by the commissioner, undertaken by the municipality pursuant to this article and any other applicable provisions of law.

3. State assistance payments shall not exceed fifty percent of the project cost or two million dollars, whichever is less, provided however if a municipality meets criteria established by the department relating to either financial hardship or disadvantaged communities pursuant to section 75-0101 of this chapter, the commissioner may authorize state assistance payments of up to eighty percent of the project cost or two million dollars, whichever is less. Such costs are subject to final computation and determination by the commissioner upon completion of the project, and shall not exceed the maximum eligible cost set forth in the contract. A determination of financial hardship shall be based on criteria that clearly indicates that the municipality is experiencing significant and widespread financial distress, with primary consideration given to whether a municipality has a median household income at or below eighty percent of the state median household income.

4. The commissioner shall promulgate rules and regulations which shall include criteria for determining eligible expenditures and procedures for governing the commitment and disbursement of funds appropriated in accordance with this title. The commissioner shall also promulgate rules and regulations which shall include application procedures, review processes, and project approval guidelines and criteria.

§ 54-1513. Climate change mitigation easements.

A municipality which develops, improves, restores or rehabilitates real property that is not owned by the municipality pursuant to this title with funds made available pursuant to this title shall obtain a climate change mitigation easement from the owner of the real property. Climate change mitigation easements shall be enforced as conservation easements are enforced in section 49-0305 of this chapter.

§ 54-1515. Contracts for state assistance payments for climate smart community projects.

1. After approval of the application, the commissioner may, in the name of the state, enter into contracts with municipalities, to provide state assistance payments toward the cost of climate smart community projects, which shall include the following provisions:

a. an estimate of the costs of the project as determined by the commissioner;

b. an agreement by the commissioner to make state assistance payments toward the cost of the project by periodically reimbursing the municipality during the progress of project development or following completion of the project as may be agreed upon by the parties, in an amount not to exceed the amounts established elsewhere in this title; and

c. an agreement by the municipality:

(i) to proceed expeditiously with and complete the project as approved by the commissioner;

(ii) to undertake and maintain the climate smart community project in accordance with applicable law and rules and regulations;

(iii) to provide for the payment of the municipality's share of the cost of the project;

(iv) to assume the full cost of any additional elements or continued operation of the project;

(v) to repay within one year of notification by the commissioner, any state assistance payments made toward the cost of the project or an equitable portion of such monies declared appropriate by the commissioner, if the municipality fails to complete the project as approved. No repayment, however, shall be required where the commission determines that such failure, disposition or change of use was immediately necessary to protect public health and safety; and

(vi) to apply for and make reasonable efforts to secure federal assistance for the project.

2. In connection with each contract, the commissioner shall keep adequate records of the amount of the payment by the state, if any, received by the municipality. Such records shall be retained by the commissioner and shall establish the basis for recalculation of the state payment as required herein.

3. The commissioner shall impose such contractual requirements and conditions upon any municipality which receives state assistance payments pursuant to this title as may be necessary and appropriate to ensure that a public benefit shall accrue from the use of public funds by such municipality. Such conditions shall include limitations on the right of the municipality to demolish or convey such property, provisions for public access or use where appropriate, a requirement that all plans for restoration, rehabilitation, improvement, demolition or other physical change must be subject to the commissioner's approval, and such other conditions which shall assure the preservation and protection of the project.

§ 54-1517. Powers and duties of the commissioner.

In administering the provisions of this title the commissioner:

1. shall make an itemized estimate of funds or appropriations requested annually for inclusion in the executive budget;

2. may, in the name of the state, as further provided within this article, contract to make, within the limitations of appropriation available therefor, state assistance payments toward the costs of an approved project. Such contracts shall be subject to approval by the state comptroller and, as to form, by the attorney general;

3. shall approve vouchers for the payments pursuant to an approved contract. All such payments shall be paid on the audit and warrant of the state comptroller; and

4. may perform such other and further acts as may be necessary, proper or desirable to carry out the provisions of this article.

§ 54-1519. Powers and duties of a municipality.

A municipality shall have the power and authority to:

1. undertake and carry out any project for which state assistance payments pursuant to contract are received or are to be received pursuant to this article and maintain and operate such project;

2. expend money received from the state pursuant to this article for costs incurred in conjunction with the approved project; and

3. perform such other and further acts as may be necessary, proper or desirable to carry out a project or obligation, duty or function related thereto.

§ 54-1521. Clean vehicle projects.

1. As used in this section, the following terms shall have the following meanings:

a. "eligible infrastructure project" shall mean any facility (not including a building and its structural components) that is publicly available and used primarily for the public charging and/or fueling of eligible vehicles as defined in this section, including but not limited to fast chargers, that has received required federal, state and local permits and authorizations, and complies with applicable zoning ordinances.

b. "eligible purchase" shall mean the purchase by a municipality to own or lease for a period of not less than thirty-six months of an eligible vehicle placed into service on or after April first, two thousand sixteen at a dealer located within New York.

c. "eligible vehicle" means and includes a new motor vehicle that:

- (i) has four wheels;
- (ii) was manufactured for use primarily on public streets, roads and highways;
- (iii) the powertrain of which has not been modified from the original manufacturer's specifications;
- (iv) has a maximum speed capability of at least fifty-five miles per hour; and
- (v) is propelled at least in part by an electric motor and associated power electronics which provide acceleration torque to the drive wheels sometime during normal vehicle operation, and that draws electricity from a hydrogen fuel cell or from a battery that:
 - (A) has a capacity of not less than four kilowatt hours; and
 - (B) is capable of being recharged from an external source of electricity.

2. a. Until April 1, 2029, the commissioner, in consultation with the New York state energy research and development authority, is authorized to issue rebates until the annual allocation is exhausted to municipalities toward the cost of any eligible infrastructure projects which support the development of clean vehicles.

b. The department, in consultation with the New York state energy research and development authority, shall determine the amount of the rebate for eligible infrastructure projects, provided that an applicant for such eligible infrastructure project rebate may receive a maximum rebate of two hundred fifty thousand dollars per facility, provided however that infrastructure projects that will maximize access by multiple public users who might otherwise not have access may receive a maximum of three hundred thousand dollars per facility.

3. a. Until April 1, 2029, the commissioner, in consultation with the New York state energy research and development authority, is authorized to issue rebates until the annual allocation is exhausted to municipalities toward the cost of eligible purchases of clean vehicles.

b. The department, in consultation with the New York state energy research and development authority, shall determine the amount of the rebate taking into consideration the electric range of the vehicle, provided that a rebate of an eligible purchase shall be not less than two thousand five hundred dollars per vehicle and not more than thirty thousand dollars per vehicle.

4. The department, in consultation with the New York state energy research and development authority, shall promulgate rules to implement and administer this title including rules relating to the forms required to claim a rebate, the required documentation for establishing eligibility for a rebate, procedures and guidelines for claiming a rebate, and the collection of economic impact data from applicants and any other requirements the department and New York state energy research and development authority deem necessary. The department shall determine and publish on its website on an ongoing basis the amount of available funding for rebates remaining in each fiscal year.

5. No later than April first, two thousand eighteen and annually thereafter, the department shall issue a report to the temporary president of the senate and the speaker of the assembly detailing the status of its program to encourage the deployment of clean vehicles. Such report shall include:

a. the amount of funding dedicated by the department for the program in the preceding year;

b. the number of eligible purchases and eligible infrastructure projects for which a rebate was awarded;

c. the amount and geographic distribution of rebates; and

d. any other information the department deems necessary.

§ 54-1523. Climate adaptation and mitigation projects.

1. The commissioner is authorized to provide on a competitive basis, within amounts appropriated, state assistance payments to a municipality toward the cost of any climate adaptation or mitigation projects. Such projects shall include:

a. the construction of natural resiliency measures, conservation or restoration of riparian areas and tidal marsh migration areas;

b. nature-based solutions such as wetland protections, including mapping and restoration of freshwater wetlands, to address physical climate risk due to sea level rise, and/or storm surges and/or flooding, based on available data predicting the likelihood of future extreme weather events, including hazard risk analysis data if applicable;

c. relocation or retrofit of facilities to address physical climate risk due to sea level rise, and/or storm surges and/or flooding based on available data predicting the likelihood of future extreme weather events, including hazard risk analysis data if applicable;

d. flood risk reduction;

e. greenhouse gas emission reductions outside the power sector;

f. enabling communities to become certified under the climate smart communities program, including by developing natural resources inventories, right sizing of municipal fleets and developing climate adaptation strategies;

g. climate change adaptation planning and supporting studies, including but not limited to vulnerability assessment and risk analysis of municipal drinking water, wastewater, and transportation infrastructure;

h. to establish and implement easily-replicated renewable energy projects, including solar arrays, heat pumps and wind turbines in public low-income housing in suburban, urban and rural areas; and

i. land acquisition, including but not limited to flood mitigation and coastal riparian resiliency; provided, however, no monies shall be expended for acquisition by eminent domain.

2. To the fullest extent practicable, it is the policy of the state to promote an equitable regional distribution of climate adaptation and mitigation projects, consistent with the purpose of this title, taking into account regional differences in climate change risks, socioeconomic conditions and ecological resources.

§ 54-1525. Restriction on alienation.

Real property acquired, developed, improved, restored or rehabilitated by a municipality pursuant to paragraph (i) of subdivision one of section 54-1523 of this title with funds made available pursuant to this title shall not be sold or disposed of or used for other than public purposes without the express authority of an act of the legislature, which shall provide for the substitution of other lands of equal environmental and fair market value and reasonably equivalent usefulness and location to those to be discontinued, sold or disposed of, and such other requirements as shall be approved by the commissioner.

ARTICLE 55

SOLE SOURCE AQUIFER PROTECTION

Section 55-0101. Declaration of policy.

55-0103. Legislative findings.

55-0105. Purpose.

55-0107. Definitions.

55-0109. Special groundwater protection areas; nomination.

55-0111. Special groundwater protection areas; designation.

55-0113. Special groundwater protection areas; Long Island designation.

55-0115. Comprehensive management plan; contents.

55-0117. Comprehensive management plan; approval.

55-0119. Local land use regulation within a special groundwater

protection area.

§ 55-0101. Declaration of policy.

It is declared to be the public policy of this state to provide funds for the preparation and implementation of groundwater watershed protection plans in order to maintain existing water quality in special groundwater protection areas within federally designated sole source aquifer areas contained within counties having a population of one million or more and to further the implementation of nonpoint source controls for the protection of the potable supply underlying the entire recharge area.

§ 55-0103. Legislative findings.

The legislature finds that:

1. The scientific evidence of groundwater contamination is mounting;
2. Such contamination, once it occurs, is often irreversible;
3. Within this area subject to sole source aquifer designation, due to their particular rate of recharge and associated hydrogeological conditions, certain groundwater recharge watershed areas are particularly critical for the maintenance of large volumes of high quality groundwater for long periods of time;
4. In the face of mounting cases of groundwater contamination from toxic organic compounds, nutrients, salts and other pollutants, the state needs a program for the designation, protection and management of special groundwater protection areas;
5. It is desirable to maintain natural vegetative and hydrogeologic conditions in special groundwater protection areas;

6. Prevention of the contamination of high quality groundwater and the protection of special groundwater protection areas costs substantially less than measures to mitigate harm following contamination; and

7. There is a demonstrated need to protect, preserve and enhance the land and water resources of special groundwater protection areas through a new program which combines the capabilities and resources of the local, state and federal governments and the private sector.

8. Some of the nonpoint source control strategies developed for the special groundwater protection areas can be used to minimize further contamination in developed deep aquifer recharge areas.

§ 55-0105. Purpose.

It is the purpose of this article to:

1. Establish procedures for the designation of special groundwater protection areas within designated sole source aquifer areas contained within counties having a population of one million or more;

2. Acknowledge the variations in hydrogeology, water quality, and land uses within designated areas, and the existence of certain areas which are of vital importance in maintaining water quality in the designated sole source aquifer area;

3. Assure that such vital areas within designated sole source aquifer areas are protected and managed in such a way as to maintain or improve existing water quality;

4. Establish procedures for the development and implementation of a site-specific comprehensive management plan for each designated special groundwater protection area;

5. Initiate the implementation of a portion of the state groundwater management program using the Long Island sole source aquifer region as a

model for future state-wide application; and

6. Establish guidelines for federal-state cooperation in the planning, funding and implementation of special groundwater protection area plans.

§ 55-0107. Definitions.

Unless the context otherwise requires, the definitions in this section shall govern the construction of the following terms as used in this article:

1. "Plan" shall mean the comprehensive management plan established pursuant to section 55-0115 of this article.

2. "Recharge" shall mean the downward movement of water to the water table through the soil overlying an aquifer.

3. "Special groundwater protection area" shall mean recharge watershed area within a designated sole source area contained within counties having a population of one million or more which is particularly important for the maintenance of large volumes of high quality groundwater for long periods of time.

4. "Watershed" shall mean an area where water drains into a specific basin or reservoir, or, for groundwater, a region where water is abundantly recharged to the subsurface groundwater reservoir.

§ 55-0109. Special groundwater protection areas; nomination.

1. Any municipality or person may nominate a special groundwater protection area within a federally designated sole source aquifer contained within counties having a population of one million or more.

2. Such a nomination petition shall be sent to the commissioner and shall include the following information:

(a) whether the special groundwater protection area is a recharge zone for groundwater with a present or future water supply potential;

(b) whether the special groundwater protection area is largely undeveloped with tracts of natural vegetation, or natural geological conditions;

(c) whether the groundwater which is recharged through the special groundwater protection area is of high quality;

(d) whether the hydrogeologic conditions are such that development could lead to degradation of water quality;

(e) whether portions of the groundwater within the sole source aquifer area are already contaminated with toxic organics, nutrients, salts or other pollutants so as to warrant special protection for areas which recharge high quality groundwater;

(f) whether maintenance of existing high quality in the groundwater recharged through the special groundwater protection area would have significant economic, social, ecological, recreational or aesthetic benefits for the sole source aquifer area; and

(g) whether degradation of such groundwater would have significant economic, social, ecological, recreational and aesthetic costs for the area.

3. The nomination petition shall also identify:

(a) the preliminary boundaries of the special groundwater protection area or areas;

(b) a brief outline of the plan of work;

(c) a tentative membership list for any advisory committees; and

(d) a reasonable budget request for the project.

§ 55-0111. Special groundwater protection areas; designation.

1. The commissioner shall review all petitions of nomination for special groundwater protection areas. If a petition complies with all the requirements of section 55-0109 of this article, the commissioner shall certify such compliance and approve the petition. The commissioner shall determine within thirty days of receipt of the petition, the completeness of the petition and respond to the petitioner

of his findings. The commissioner shall have ninety days from the date of receipt to certify in writing to the petitioner that a petition has been approved, approved with modifications, or disapproved. If a petition is disapproved, the commissioner shall include in the notification to the petitioner the reasons for disapproval and allow the petitioner to resubmit the petition. Any petition resubmission shall reinitiate the review process. If the commissioner does not respond to the petitioner within the time prescribed, the petition shall be considered to be approved.

2. Once a petition has been officially approved, the designated planning entity shall be eligible for such funds to develop the plan and comply with all the requirements of this article for a period not to exceed three years.

§ 55-0113. Special groundwater protection areas; Long Island designation.

1. Nine areas shall be designated for the purposes of this article as special groundwater protection areas. They are identified as follows:

(a) the North Hills area of the town of North Hempstead, Nassau county;

(b) the area of the Northeastern villages of the town of Oyster Bay, Nassau county;

(c) the Woodbury road-West Pulaski road area, town of Huntington, Suffolk county;

(d) the West Hills area of the town of Huntington, Suffolk county;

(e) the Oak Brush Plains of the towns of Babylon and Huntington, Suffolk county;

(f) the Setauket Pine Barrens, town of Brookhaven, Suffolk county;

(g) the Central Pine Barrens of the towns of Brookhaven, Riverhead and Southampton, Suffolk county;

(h) the South Fork Morainal Forest of the towns of Southampton and East Hampton, Suffolk county; and

(i) the Hither Hills area of the town of East Hampton, Suffolk county.

2. Such areas identified for Long Island in this section shall be addressed concurrently as a single planning project in order to insure consistency and uniformity in the development of a management plan that recognizes the regional importance of the special groundwater protection areas.

3. The preliminary boundaries of the special groundwater protection areas designated in subdivision one of this section shall be those identified in the state groundwater management plan except for said areas designated in paragraphs (a) and (b) of subdivision one of this section which shall be the same as those areas adopted by the Nassau County Board of Health pursuant to article ten of the Nassau County Public Health Ordinance on December twelfth, nineteen hundred eighty-four. Final boundaries shall be determined on the basis of information developed in accordance with the requirements of section 55-0115 of this article.

4. Other areas not identified in this section can be petitioned for according to the guidelines set forth in section 55-0109 of this article.

5. The Long Island regional planning board is designated as the planning entity for the nine special groundwater protection areas herein identified on Long Island, and is authorized to carry out the planning work specified in this article.

6. An advisory group to be known as the "special groundwater protection area advisory council" shall be established. The voting membership shall consist of representatives of the following organizations: one member from the Nassau county department of health; one member from the Nassau county department of public works; one member from the Nassau county planning commission; two members from the Suffolk county department of health services; one member from the New York state department of environmental conservation; one member from the New York state department of health; two members from the New York state legislative commission on water resource needs of Long Island; two members from conservation organizations having property or other

interests in one or more of the special groundwater protection areas; and a member from each town which contains part or all of a special groundwater protection area. The special groundwater protection area advisory council shall serve as an advisory group to the Long Island regional planning board and shall assist in the development, review, and implementation of the management plan.

7. The Long Island regional planning board shall submit an outline of the plan of work designed to complete the requirements of sections 55-0115 and 55-0117 of this article, acceptable to the commissioner and a budget request, therefor.

8. No municipality located within a special groundwater protection area designated in paragraph (a) of subdivision one of this section shall use public funds to acquire land within such special groundwater protection area being used as a recreational facility or open space at the time of proposed acquisition unless such land is being offered for sale or a change of use for such land is proposed by the owner thereof.

§ 55-0115. Comprehensive management plan; contents.

The designated planning entity shall prepare the plan for the special groundwater protection area. The plan shall be designed to ensure the non-degradation of the high quality of groundwater recharged within the special groundwater protection area. Where local plans already exist which effectuate the goals of this article, such local plans shall be evaluated and incorporated as is appropriate into the work of the planning entity. Such plan shall include but not be limited to:

1. A determination of the quality of the existing groundwater recharged through said special groundwater protection area, the natural recharge capabilities of the special groundwater protection area watershed and the dependence of any natural ecosystems in the special groundwater protection area on the water quality and natural recharge capabilities of said area;

2. An identification of all known existing and potential point and non-point sources of groundwater degradation;

3. Development of specific watershed rules and regulations pursuant to section eleven hundred of the public health law, which are designed to accomplish the purposes of this article;

4. A map showing the detailed boundary of the special groundwater protection area or areas as well as a precise written description of such boundaries;

5. A resource assessment which determines the amount and type of human development and activity which the ecosystem can sustain while still maintaining existing ground and surface water quality and protecting unique ecological features;

6. The identification and proposal of limits on federal, state and local government financially assisted activities and projects which, directly or indirectly, may contribute, in any way whatsoever, to any degradation of such groundwater or any loss of natural surface and subsurface infiltration or purification capability of the special groundwater protection area watershed;

7. Development of a comprehensive statement of land use management as it pertains to the maintenance and enhancement of groundwater quality and quantity;

8. Proposal of limits on land uses that might have an adverse impact on water quality and/or recharge capabilities in the special groundwater protection area;

9. Consideration and proposal of specific techniques, including, but not limited to: clustering, large lot zoning, purchase, exchange or donation of conservation easements or development rights, and other innovative measures sufficient to achieve the objectives of this section;

10. Designation of specific areas within special groundwater protection areas suitable and appropriate for public acquisition; and

11. A program for local governmental implementation of the comprehensive management plan described in this subdivision in a manner that will insure the continued, uniform, consistent protection of this area in accord with the purposes of this article.

§ 55-0117. Comprehensive management plan; approval.

1. The planning entity shall:

(a) consult with appropriate officials of any local, state or federal agency which has jurisdiction over lands and waters within the area;

(b) consult with the officials of any municipality which has jurisdiction over lands and waters within areas designated or proposed as special groundwater protection areas;

(c) consult with interested professional, scientific and citizens' organizations;

(d) consult with citizen's advisory committees;

(e) transmit any draft and final plan to all affected municipalities for review and comment; and

(f) conduct public hearings at places within the area, and at such other places as may be appropriate, for the purpose of providing interested persons with an opportunity to express their views with respect to matters covered by the plan.

2. The plan shall be submitted to the commissioner. The plan shall be accompanied by a transmittal letter in which the planning entity certifies that:

(a) the plan when implemented will achieve its stated water quality objectives and protect the ecological values of the special groundwater protection area which are significant for maintenance of water quality;

(b) the plan requires the exercise of land use and zoning responsibilities to the greatest extent practicable to regulate the use of land and water resources in a manner consistent with the purposes of this article;

(c) the planning entity has afforded adequate opportunity, including public hearings, for public governmental involvement in the preparation and review of the plan, and whether such review and comment thereon were considered in the plan; and

(d) the extent to which adequate assurances have been received from appropriate local officials that the recommended implementation program identified in the plan will be initiated within a reasonable time after the date of approval of the plan and such program will insure effective implementation of the local aspects of the plan.

3. The commissioner shall review the plan and within ninety days certify that the plan conforms with all applicable state laws, official rules and regulations, state water resource management plans, and where submitted, the nominating petition as defined in section 55-0109 of this article. As part of the review and certification process, the commissioner shall also certify the boundaries.

4. If the commissioner finds that the plan is still not in compliance with applicable state law, official rules and regulations, and state water resource management plans, after a second review, he shall withhold approval of all outstanding planning entity claims for reimbursement pending satisfactory revision of the plan.

5. Upon certification of the plan and the boundaries, the identified area or areas are officially adopted by the commissioner as special groundwater protection areas.

6. Upon adoption of the boundaries by the planning entity, the special groundwater protection areas shall be designated as critical environmental areas as defined by regulations pursuant to section 8-0113 of this chapter and an environmental impact statement shall be prepared pursuant to section 8-0109 of this chapter for any action found to have a significant impact upon such areas. Such statement shall meet the requirements of the most detailed environmental impact statement required by section 8-0109 of this chapter or by any rule or regulation promulgated pursuant to such section. Upon certification of the plan by the commissioner, such statement shall include a detailed statement of

the effects of any proposed action on, and its consistency with, the comprehensive management plan of the special groundwater protection area program, as implemented by the commissioner pursuant to this article.

§ 55-0119. Local land use regulation within a special groundwater protection area.

Any land use regulation enacted by any town or village located within a special groundwater protection area which includes a definition of "open space" must consider the impact of such definition on the water quality and/or recharge capabilities of the area. Any such definition of "open space" may also consider other purposes of open space, including, but not limited to, protection of habitat, farmland, forest, air quality, view shed protection and recreation. Provided however, that any definition of open space that allows for or includes recreational uses, must provide clear guidance as to which recreational uses, improvements or facilities serve the purpose of protecting water quality and/or recharge capabilities. "Land use regulation" shall mean an ordinance or local law enacted by a municipality with responsibility for zoning and includes any zoning, subdivision, special use permit or site plan regulation or any other regulation which prescribes the appropriate use of property, or scale, location and intensity of development.

ARTICLE 56

IMPLEMENTATION OF THE CLEAN WATER/CLEAN AIR BOND ACT OF 1996

- Title 1. General provisions
2. Safe drinking water projects
 3. Clean water projects
 4. Solid waste projects
 5. Environmental restoration projects
 6. Air quality projects

TITLE 1

GENERAL PROVISIONS

Section 56-0101. Definitions.

56-0103. Allocation of moneys.

56-0105. Powers and duties.

56-0107. Powers and duties of a municipality.

56-0109. Sale of bonds; certain limitations.

56-0111. Consistency with federal tax law.

56-0113. Compliance with other law.

§ 56-0101. Definitions. As used in this article the following terms shall mean and include:

1. "Aquatic habitat restoration project" means the planning, design, construction, management, maintenance, reconstruction, revitalization, or rejuvenation activities intended to improve waters of the state of ecological significance or any part thereof, including, but not limited to ponds, bogs, wetlands, bays, sounds, streams, rivers, or lakes and shorelines thereof, to support a spawning, nursery, wintering, migratory, nesting, breeding, feeding, or foraging environment for fish and wildlife and other biota.

2. "Clean water project" means a project undertaken pursuant to title 3 of this article but shall not include navigational dredging projects.

3. "Combined or separate sewer overflow abatement" means the planning, design, construction of, or improvement to, a system that prevents, eliminates, or partially eliminates raw untreated sewage from entering the receiving water as the result of a precipitation event, including but not limited to temporary storage tanks, pumping stations related thereto, sewer pipe, and pilot or demonstration technologies.

4. "Cost" means the cost of an approved project, which shall include appraisal, surveying, engineering and architectural services, plans and specifications, consultant and legal services, construction and other direct expenses incident to such project less any federal or state funds, other than those provided pursuant to this article, for such project received or to be received.

5. "Drinking water infrastructure project" or "water supply project" means the planning, design, construction, improvement, or acquisition of facilities, equipment, sites, or buildings for the supply, control, treatment, distribution, and transport of drinking water and the testing and monitoring to ensure the integrity and quality of such water intended to improve drinking water facilities including achievement of compliance with the federal safe drinking water act or other applicable federal law and state drinking water quality goals and standards taking into consideration the water resources management strategy prepared pursuant to title twenty-nine of article fifteen of this chapter.

6. "Environmental compliance assistance project" means the planning, design, construction, improvement, maintenance, or acquisition of facilities, production processes, equipment, buildings or water or wastewater infrastructure for compliance with environmental laws and regulations or other pollution avoidance activities.

7. "Environmental restoration project" means a project to investigate or to remediate contamination pursuant to title five of this article.

8. "Federal assistance" means funds available, other than by loan, from the federal government, either directly or through allocation by the state for construction or program purposes pursuant to any federal law or program.

9. "Governing body" means:

(a) in the case of a county outside of the city of New York, the county board of supervisors or other elective governing body;

(b) in the case of a city or village, the local legislative body thereof, as the term is defined in the municipal home rule law;

(c) in the case of a town, the town board;

(d) in the case of a school district, the board of education thereof;

(e) in the case of a supervisory district, the board of cooperative educational services thereof;

(f) in the case of a public benefit corporation, the board of directors, members or trustees thereof;

(g) in the case of a public authority, the governing board of directors, members, or trustees thereof;

(h) in the case of a not-for-profit corporation, the board of directors thereof or such other body designated in the certificate of incorporation to manage the corporation; and

(i) in the case of an Indian tribe, any governing body recognized by the United States or the state of New York.

10. "Air quality project" means a project undertaken pursuant to title six of this article.

11. "Hazardous substances" mean substances found on the list of substances hazardous to the public health, safety or the environment promulgated pursuant to article 37 of this chapter and petroleum, as that term is defined in subdivision fifteen of section one hundred seventy-two of the navigation law.

12. "Heritage area project" means a project undertaken by or through a municipality, public benefit corporation or a not-for-profit corporation identified in a management plan prepared and approved by the commissioner of the office of parks, recreation and historic preservation in accordance with the provisions of section 35.05 of the parks, recreation and historic preservation law.

13. "Historic preservation project" means a project undertaken by a municipality or a not-for-profit corporation to acquire, improve, restore or rehabilitate property listed on the state or national registers of historic places, including, but not limited to, projects at zoos, botanical gardens, and aquaria, to protect the historic, cultural, archeological, or architectural significance thereof, or undertaken by the office of parks, recreation and historic preservation to improve, restore or rehabilitate state historic properties listed on the state or national registers of historic places to protect the historical, cultural or architectural significance thereof.

14. "Marine holding tank" means any container aboard any vessel, as defined in section two of the navigation law, that is designed and used

for the purpose of collecting and storing treated or untreated sewage from marine toilets.

15. "Municipality" means a local public authority or public benefit corporation, a county, city, town, village, school district, supervisory district, district corporation, improvement district within a county, city, town or village, or Indian nation or tribe recognized by the state or the United States with a reservation wholly or partly within the boundaries of New York state, or any combination thereof. In the case of aquatic habitat restoration projects, the term municipality shall include the state.

16. "Not-for-profit corporation" means a corporation formed pursuant to the not-for-profit corporation law and qualified for tax-exempt status under the federal internal revenue code.

17. "Office" means the office of parks, recreation and historic preservation.

18. "Open space land conservation project" means acquisition projects undertaken with willing sellers including, but not limited to, the purchase of conservation easements, undertaken by the commissioner, the commissioner of the office of parks, recreation and historic preservation or by municipalities pursuant to article twenty-five-AAA of the agriculture and markets law.

19. "Park project" means a project undertaken by a municipality, state agency, public benefit corporation, public authority, or not-for-profit corporation for the acquisition, development or improvement of parks, preserves, beaches, shorefronts, recreational sites and facilities including construction of structures, roads and parking facilities.

20. "Pollution prevention project" means the planning, design, construction, improvement, maintenance or acquisition of facilities, production processes, equipment or buildings owned or operated by municipalities for the reduction, avoidance, or elimination of the use of toxic or hazardous substances or the generation of such substances or

pollutants so as to reduce risks to public health or the environment, including changes in production processes or raw materials; such projects shall not include incineration, transfer from one medium of release or discharge to another media, off-site or out-of-production recycling, end-of-pipe treatment or pollution control.

21. "Responsible party" means a party responsible under applicable principles of statutory or common law liability to remediate the contamination located at, or emanating from, real property subject to an environmental restoration project.

22. "Safe drinking water project" means a project undertaken pursuant to title 2 of this article.

23. "Small business" means any business which is resident in this state, independently owned and operated, not dominant in its field, and employs not more than one hundred individuals.

24. "Solid waste project" means a project undertaken pursuant to title 4 of this article.

25. "Solid waste" shall have the definition set forth in title 5 of article 27 of this chapter but shall not include hazardous waste as defined in title 9 of article 27 of this chapter.

26. "State assistance payment" means payment of the state share of the cost of projects authorized by this act to preserve, enhance, restore and improve the quality of the state's environment.

27. "Stormwater collecting system" means systems of conduits and all other constructions, devices, and appliances appurtenant thereto, designed and used to collect and carry stormwater and surface water, street wash, and other wash and drainage waters to a point source for discharge.

28. "Vessel pumpout station" means a project for the planning, design, acquisition or construction of a permanent or portable device capable of

removing human sewage from a marine holding tank.

29. "Wastewater treatment improvement project" means the planning, design, construction, acquisition, enlargement, extension, or alteration of a sewage treatment plant to treat, neutralize, stabilize, eliminate or partially eliminate sewage or reduce pollutants in treatment plant effluent or to create mechanisms to transport wastewater to a treatment plant, including permanent or pilot demonstration wastewater treatment, outfall and dispersal apparatus, pumping stations integral to such plants or sewers, sewer pipes, combined sewer overflow abatement, stormwater collecting systems, vessel pumpout stations, or equipment or furnishings thereof.

30. "Waterbodies" means waters or waters of the state as defined in section 17-0105 of this chapter except private waters which do not provide public access.

31. "Water quality improvement project" means:

(a) wastewater treatment improvement projects;

(b) non-point source abatement and control program projects developed pursuant to section eleven-b of the soil and water conservation districts law, title 14 of article 17 of this chapter, section 1455b of the federal coastal zone management act, or article forty-two of the executive law;

(c) aquatic habitat restoration projects; and

(d) pollution prevention projects.

32. "Contamination" or "contaminated" shall have the same meaning as provided in section 27-1405 of this chapter.

§ 56-0103. Allocation of moneys.

The moneys received by the state from the sale of bonds pursuant to the Clean Water/Clean Air Bond Act of 1996 shall be disbursed in the following amounts pursuant to appropriations as specifically provided for in titles 2, 3, 4, 5, and 6 of this article:

1. For creation of a state safe drinking water program as set forth in title 2 of this article, three hundred fifty-five million dollars (\$355,000,000).

2. For preserving, enhancing, restoring and improving the quality of water as set forth in title 3 of this article, seven hundred ninety million dollars (\$790,000,000).

3. For solid waste projects as set forth in title 4 of this article, one hundred seventy-five million dollars (\$175,000,000).

4. For restoring and improving contaminated areas and returning them to productive use as set forth in title 5 of this article, two hundred million dollars (\$200,000,000).

5. For preserving, enhancing, restoring and maintaining the quality of the air as set forth in title 6 of this article, two hundred thirty million dollars (\$230,000,000).

§ 56-0105. Powers and duties.

In administering the provisions of this article the respective commissioner or the secretary of state:

1. shall make an itemized estimate of funds or appropriations requested annually for inclusion in the executive budget;

2. shall, in the name of the state, as further provided within this article, contract to make, within the limitations of appropriations available therefor, state assistance payments toward the cost of a project approved, and to be undertaken pursuant to this article;

3. shall approve vouchers for the payments pursuant to an approved contract; and

4. may perform such other and further acts as may be necessary, proper or desirable to carry out the provisions of this article.

5. Shall give a priority and preference to a project in any brownfield opportunity area designated pursuant to section nine hundred seventy-r of the general municipal law.

§ 56-0107. Powers and duties of a municipality.

A municipality shall have the power and authority to:

1. Undertake and carry out any project for which state assistance payments pursuant to contract are received or are to be received pursuant to this article and maintain and operate such project;

2. Expend money received from the state pursuant to this article for costs incurred in conjunction with the approved project; and

3. Perform such other and further acts as may be necessary, proper or desirable to carry out a project or obligation, duty or function related thereto.

§ 56-0109. Sale of bonds; certain limitations.

Notwithstanding any other section of law, no money received by the state from the sale of bonds pursuant to the Clean Water/Clean Air Bond Act of 1996 shall be used to fund any project committed to by the state in any agreement with New York city regarding the New York city watershed.

§ 56-0111. Consistency with federal tax law.

All actions taken pursuant to this article shall be reviewed for consistency with provisions of the federal internal revenue code and

regulations thereunder, in accordance with procedures established in connection with the issuance of any tax exempt bonds pursuant to this article, to preserve the tax exempt status of such bonds.

§ 56-0113. Compliance with other law.

Every recipient of funds to be made available pursuant to this article shall comply with all applicable state, federal and local laws.

TITLE 2

SAFE DRINKING WATER PROJECTS

Section 56-0201. Safe drinking water projects.

§ 56-0201. Safe drinking water projects.

Of the moneys received by the state from the sale of bonds pursuant to the Clean Water/Clean Air Bond Act of 1996, three hundred fifty-five million dollars (\$355,000,000) shall be used for the capitalization of a drinking water revolving fund administered by the environmental facilities corporation pursuant to section one thousand two hundred eighty-five-m of the public authorities law and by the department of health pursuant to title four of article eleven of the public health law to finance drinking water infrastructure projects pursuant to the provisions of paragraph a of subdivision three of section one thousand two hundred eighty-five-m of the public authorities law, including financing of the state match for federal capitalization grants for the drinking water revolving fund.

TITLE 3

CLEAN WATER PROJECTS

Section 56-0301. Allocation of moneys.

56-0303. Management programs, plans and projects.

56-0305. Application procedure.

56-0307. Open space land conservation projects.

56-0309. Park, historic preservation and heritage area projects.

56-0311. Dam safety projects.

§ 56-0301. Allocation of moneys.

Of the moneys received by the state from the sale of bonds pursuant to the Clean Water/Clean Air Bond Act of 1996, five hundred ten million dollars (\$510,000,000) shall be available for disbursements for state assistance payments to municipalities or county soil and water conservation districts for water quality improvement projects in accordance with section 56-0303 and for dam safety projects pursuant to section 56-0311 of this article. One hundred fifty million dollars (\$150,000,000) shall be available for disbursements for projects developed pursuant to section 56-0307, fifty million dollars shall be available for municipal park projects, and historic preservation, and heritage area projects developed pursuant to section 56-0309 of this article and fifty million dollars shall be available for state park projects. Thirty million dollars (\$30,000,000) shall be available for environmental compliance assistance projects to enhance water quality.

§ 56-0303. Management programs, plans and projects.

1. Of the moneys received by the state from the sale of bonds pursuant to the Clean Water/Clean Air Bond Act of 1996, five hundred twenty-five million dollars (\$525,000,000) shall be allocated to water quality improvement projects identified as follows:

(a) Twenty-five million dollars (\$25,000,000) shall be available for state assistance payments to municipalities for the cost of water quality improvement projects intended to implement the Hudson River estuary plan as set forth in section 11-0306 of this chapter.

(b) Two hundred million dollars (\$200,000,000) shall be available for state assistance payments to municipalities for the cost of water quality improvement projects intended to implement the Long Island Sound comprehensive conservation and management plan developed pursuant to

section 320 of the federal clean water act.

(c) Fifteen million dollars (\$15,000,000) shall be available for state assistance payments to municipalities for the cost of water quality improvement projects intended to implement the Lake Champlain management plan developed pursuant to the federal Lake Champlain special designation act of 1990.

(d) Seventy-five million dollars (\$75,000,000) shall be available for state assistance payments to municipalities for the cost of water quality improvement projects intended to implement the Onondaga Lake plan developed pursuant to the consent order issued by the United States District Court for the Northern District of New York agreed to among Onondaga County, the state of New York, and the Atlantic States Legal Foundation, Inc. Provided, however, that such municipality shall adhere to the construction timetable set forth in said plan and shall provide the department with periodic updates as to the progress of said construction and the prospect of any pilot or demonstration technologies set forth in said plan. The commissioner shall have discretion not to make any disbursement until these conditions have been met to his or her satisfaction and upon the approval of the state comptroller.

(e) Twenty-five million dollars (\$25,000,000) shall be available for state assistance payments to municipalities for the cost of water quality improvement projects intended to implement the New York/New Jersey harbor comprehensive conservation and management plan, developed pursuant to section 320 of the federal clean water act.

(f) Twenty-five million dollars (\$25,000,000) shall be available for state assistance payments to municipalities for the cost of water quality improvement projects intended to implement the department's great lakes program developed in accordance with the federal great lakes critical programs act of 1990 and the great lakes water quality agreement of 1987, as amended, between the governments of Canada and the United States of America.

(g) Twenty-five million dollars (\$25,000,000) shall be available for state assistance payments to municipalities for the cost of water quality improvement projects for the finger lakes and their tributaries which are approved by the secretary of state pursuant to article forty-two of the executive law or by the commissioner.

(h) For state assistance payments for the cost of water quality

improvement projects intended for any waters of the state for projects to support a study of groundwater quality in Long Island or open space land conservation projects which have been (a) approved by the commissioner, (b) identified in plans in accordance with section 1455b of the federal coastal zone management act or article forty-two of the executive law and approved by the secretary of state, or (c) developed in accordance with title eleven-b of article two of the soil and water conservation districts law and approved by the state soil and water conservation committee and commissioner of agriculture and markets.

(i) Twenty-five million dollars (\$25,000,000) shall be available for the expenses of projects at facilities owned by the state of New York which enhance the quality of the waters of the state by remedying environmental deficiencies or complying with environmental laws and regulations.

(j) Fifty million dollars (\$50,000,000) shall be available to municipalities for wastewater treatment improvement projects and the cost of municipal flood control projects in villages, towns, and cities with a population of seventy-five thousand or less.

(k) Thirty million dollars (\$30,000,000) shall be available for state assistance payments to municipalities for the cost of water quality improvement projects intended to implement the comprehensive conservation management plan for the peconic estuary developed pursuant to section 320 of the federal clean water act and for the comprehensive management plan for the south shore estuary reserve plan developed pursuant to article forty-six of the executive law.

(l) Thirty million dollars (\$30,000,000) shall be available for state assistance payments through the environmental facilities corporation to villages, towns, and cities with a population of less than one million, for environmental compliance assistance projects for businesses which enhance the quality of the waters of the state through compliance with environmental laws and regulations, or to remedy or prevent environmental deficiencies.

(1) The president of the environmental facilities corporation is authorized to provide state assistance payments to villages, towns, and cities with a population less than one million, for implementation of environmental compliance assistance projects which enhance the quality of the waters of the state.

(2) A village, town, and city with a population of less than one million may submit an application to the president, in such form and manner as the president may require, for state assistance payments toward the cost of environmental compliance assistance projects.

(3) Upon receipt of a request for state assistance application, the president shall review and, within ninety days from the receipt of a complete application, may approve, disapprove, or recommend modifications thereto consistent with applicable law criteria, standards, or rules and regulations relative to such projects.

(m) Notwithstanding any provision of law to the contrary, amounts allocated in paragraphs (a), (b), (c), (d), (e), (f) and (g) of this subdivision may be interchanged between such paragraphs and may be interchanged to amounts allocated in paragraph (h) of this subdivision.

2. At least three wastewater treatment improvement projects funded pursuant to this title shall be projects designed to refine innovative technologies for use in the physical environment of New York state and serve as a catalyst for technology transfer. Such technologies may include, but shall not be limited to, technologies that reduce the amount and toxicity of sewage sludge and effluent; increase reliability and cost efficiency; reduce energy consumption; or achieve more reliable pathogen destruction.

§ 56-0305. Application procedure.

1. Any municipality or soil and water conservation district may make an application for such state assistance payment, in a manner, form, and time frame and containing such information as the respective commissioner, the president of the environmental facilities corporation or the secretary of state may require. Subject to the provisions of section thirty-two of the chapter of the laws of 1996 which added this section, the respective commissioner, the president of the environmental facilities corporation or the secretary of state shall review such application and may approve, disapprove, or recommend modifications thereto consistent with applicable law, criteria, standards, or rules and regulations relative to such projects.

2. In reviewing such applications for eligibility, the respective commissioner, the president of the environmental facilities corporation or the secretary of state shall give due consideration to:

(a) the suitability and feasibility of the project in relation to the goals of the applicable program or plan;

(b) the priority of the project in relationship to other projects proposed under the same program or plan. Highest priority shall be granted to projects which will provide the greatest reduction in pollutants or most significant habitat improvement. For water quality improvement projects which have been developed with the assistance of, or by any other state agencies, the respective commissioner, the president of the environmental facilities corporation or secretary of state shall be consulted with when determining the priority of the project;

(c) the availability of matching funds on the part of the municipality or the soil and water conservation district to finance the municipality's or soil and water conservation district's share of the project cost. In submitting the application, the municipality or soil and water conservation district shall submit proof to the satisfaction of the respective commissioner, the president of the environmental facilities corporation or secretary of state of the availability of such matching funds; and

(d) the urgency of the need to provide state assistance payments for the project in relation to the availability of other funding sources and the municipality's or soil and water conservation district's ability to finance such project based on the availability of other moneys including federal funds.

3. Upon approval of an application for such assistance payment, the respective commissioner, the president of the environmental facilities corporation or the secretary of state and the municipality or soil and water conservation district shall enter into a contract for such payment toward the cost of the approved project which shall include the following provisions:

(a) A current estimate of the cost of the project as determined by the respective commissioner, the president of the environmental facilities

corporation or the secretary of state at the time of the execution of the contract and a specific timetable for progress and completion of the project;

(b) An agreement by the respective commissioner, the president of the environmental facilities corporation or secretary of state to make state assistance payments toward the cost of the project by periodically reimbursing the municipality or soil and water conservation district for costs incurred during the progress of the project to the maximum agreed upon state share. Such costs are subject to final computation and determination by the respective commissioner, the president of the environmental facilities corporation or secretary of state upon completion of the project; and

(c) An agreement by the municipality or soil and water conservation district to proceed expeditiously with the project and to complete the project in accordance with the timetable set out in the contract as so approved by the respective department or authority and with the conditions of applicable permits, administrative orders, or judicial orders. A finding by the respective commissioner, the president of the environmental facilities corporation or secretary of state that the municipality or soil and water conservation district has not met the conditions of the contract in good faith shall constitute a material breach of the contract.

§ 56-0307. Open space land conservation projects.

1. The commissioner and the commissioner of the office of parks, recreation and historic preservation are authorized to undertake open space land conservation projects, in cooperation with willing sellers. In undertaking projects, the respective commissioner shall give consideration to the plan prepared pursuant to section 49-0207 of this chapter. Projects shall develop, expand or enhance water quality protection or public access to water bodies, including but not limited to coastlines, aquifers, watersheds, lakes, rivers and streams.

2. Projects which are not identified in the state land acquisition plan prepared pursuant to section 49-0207 of this chapter shall not be

proposed for acquisition by the state under this section if any town, village, or city within which such project is located notifies the state of its objection to such acquisition. Such objection shall be transmitted by resolution within ninety days of the notification by the state of its interest in such acquisition to the commissioner of the office of parks, recreation and historic preservation and shall effectively prevent the state from undertaking such acquisition.

3. The commissioner or the commissioner of the office of parks, recreation and historic preservation may enter into an agreement for the maintenance and operation of open space land conservation projects outside the Adirondack or Catskill Parks undertaken pursuant to this section by a municipality, a not-for-profit corporation, or unincorporated association which demonstrates to the commissioner's satisfaction that it is financially or otherwise capable of operating and maintaining the project for the benefit of the public and of maximizing public access to such project. Any such agreement shall contain such provisions as shall be necessary to ensure that its operation and maintenance are consistent with, and in furtherance of, this article and shall be subject to the approval of the director of the budget, the comptroller and, as to form, the attorney general.

4. The cost of an open space land conservation project shall include the cost of preparation of a management plan for the preservation and beneficial enjoyment of the land acquired pursuant to this section except where such considerations have already been undertaken as part of any existing plan applicable to the newly acquired land.

5. The commissioner of agriculture and markets is authorized to provide state assistance payments to county agricultural and farmland protection boards, or to municipalities provided the proposed project is endorsed for funding by the agricultural and farmland protection board for the county in which the municipality is located, for implementation of projects identified in agricultural protection plans pursuant to the program as set forth in article twenty-five-AAA of the agriculture and markets law.

§ 56-0309. Park, historic preservation and heritage area projects.

1. For purposes of this section "commissioner" means the commissioner of the office of parks, recreation and historic preservation.

2. Park projects and historic preservation projects may be undertaken by the office pursuant to the provisions of this article and other applicable provisions of law pursuant to the approval of the commissioner.

3. All historic preservation projects, park projects and heritage area projects shall be undertaken in the state of New York. Except for projects undertaken by the state, the total amount of the state assistance payments toward the cost of any such project shall not exceed fifty percent of the cost. For the purpose of determining the amount of the state assistance payments, the cost of the project shall not be more than the amount set forth in the application for state assistance payments approved by the commissioner. Park and heritage area projects shall develop, expand, or enhance public access to water bodies, promote water based recreation, or enhance the natural, cultural, or historic aspects of water bodies.

4. The commissioner and a municipality may enter into a contract for the undertaking by the municipality of an historic preservation project. Such historic preservation projects shall be recommended to the commissioner by the governing body of the municipality and, when approved by the commissioner, may be undertaken by the municipality pursuant to this title and any other applicable provision of law.

5. The commissioner and a not-for-profit corporation may enter into a contract for the undertaking by the not-for-profit corporation of an historic preservation project. Such a historic preservation project shall be recommended to the commissioner by the governing body of a not-for-profit corporation which demonstrates to the satisfaction of the commissioner that it is capable of operating and maintaining such property for the benefit of the public. Upon approval by the

commissioner, such project may be undertaken pursuant to the provisions of this title and any other applicable provision of law.

6. The commissioner and a municipality may enter into a contract for the undertaking by the municipality of a park project. Such park projects shall be recommended to the commissioner by the governing body of the municipality, and when approved by the commissioner, may be undertaken by the municipality pursuant to this title and any other applicable provisions of law. The office shall also assess existing parks and recreational opportunities in the municipalities where the park project is located and shall give preference to projects which are in or primarily serve areas where demographic and other relevant data for such areas demonstrate that the areas are densely populated and have sustained physical deterioration, decay, neglect or disinvestment, or where a substantial proportion of the residential population is of low income or is otherwise disadvantaged and is underserved with respect to the existing recreational opportunities in the area.

7. The commissioner and a not-for-profit corporation may enter into a contract for the undertaking by the not-for-profit corporation of a park project on behalf of a municipality. Such a contract shall be contingent upon the approval of the governing body of each municipality in which the project is located. Such a project shall be recommended to the commissioner by the governing body of a not-for-profit corporation which demonstrates to the satisfaction of the commissioner that it is capable of operating and maintaining such project for the benefit of the public. Upon approval by the commissioner, such project may be undertaken pursuant to the provisions of this title and any other applicable provision of law. The office shall assess existing parks and recreational opportunities in the municipalities where the park project is located and shall give preference to projects which are in or primarily serve areas where demographic and other relevant data for such areas demonstrate that the areas are densely populated and have sustained physical deterioration, decay, neglect or disinvestment, or where a substantial proportion of the residential population is of low income or is otherwise disadvantaged and is underserved with respect to the existing recreational opportunities in the area.

8. The commissioner and a municipality, public benefit corporation or not-for-profit corporation may enter into a contract, subject to the approval of the director of the budget, for the undertaking by or through the municipality, public benefit corporation or not-for-profit corporation of a heritage area project including parkwide and district projects identified in a management plan prepared pursuant to section 35.05 of the parks, recreation and historic preservation law. Such projects shall be subject to an agreement by the heritage area management entity to operate or cause to be operated any public facility resulting from such project.

9. A municipality which acquires, develops, improves, restores or rehabilitates property with funds made available pursuant to this title may establish reasonable rules and regulations by local law or otherwise to assure the proper administration and development thereof, provided that no such rule or regulation which restricts the use of such lands or facilities by non-residents of the municipality shall be effective without the approval of the commissioner.

10. The commissioner shall impose such contractual requirements and conditions upon any municipality and any not-for-profit corporation which receive state assistance payments pursuant to this title as may be necessary and appropriate to ensure that a public benefit shall accrue from the use of public funds by such municipality or not-for-profit corporation. Such conditions shall include limitations on the right of the municipality or not-for-profit corporation to demolish or convey such property, provisions for public access or use where appropriate, the granting of facade easements to the state, a requirement that all plans for restoration, rehabilitation, improvement, demolition or other physical change must be subject to the commissioner's approval, and such other conditions which shall assure the preservation and protection of the project.

11. Any not-for-profit corporation which receives state assistance payments pursuant to this section for the acquisition of land for outdoor recreation or conservation purposes shall execute a contract

with the commissioner which shall include the following:

(a) An agreement to make and keep the lands accessible to the public unless the not-for-profit corporation can demonstrate to the commissioner's satisfaction that public accessibility would be detrimental to the lands or any natural resources associated therewith;

(b) An agreement not to sell, lease, exchange or donate the lands except to the state, a local government unit or another qualifying tax exempt non-profit organization for recreation and conservation purposes consistent with this title and approved by the commissioner; and

(c) An agreement to execute and convey to the state at no charge a conservation easement, pursuant to title three of article forty-nine of this chapter, over the lands to be acquired with state assistance payments.

12. Real property acquired, developed, improved, restored or rehabilitated by or through a municipality for park projects undertaken pursuant to this section with funds made available pursuant to this section shall not be sold, leased, exchanged, donated or otherwise disposed of or used for other than public park purposes without the express authority of an act of the legislature, which shall provide for the substitution of other lands of equal environmental value and fair market value and reasonably equivalent usefulness and location to those to be discontinued, sold or disposed of, and such other requirements as shall be approved by the commissioner.

13. Real property acquired by a not-for-profit organization with funds made available pursuant to this section for park projects undertaken pursuant to this section shall not be used in violation of an agreement entered into pursuant to this section, or sold, leased, exchanged, donated or otherwise disposed of without the express authority of an act of the legislature.

14. The commissioner shall adopt, prior to the acceptance of applications for park, historic preservation and heritage area projects, rules and regulations which shall include eligibility requirements, application procedures, office ranking and review processes, project approval guidelines and criteria, and funding distribution necessary for

all state assistance payment programs established pursuant to this title.

15. Notwithstanding any other provision of law, no state assistance payment under this article may be applied, with respect to any project located within the area of New York county bounded by (a) the northern boundary of Fifty-ninth street and Fifty-ninth street extended; (b) the United States pierhead line; (c) the northern boundary of the area known as Battery Park City; and (d) eight hundred feet inland easterly from the United States bulkhead line:

(i) for, other than for recreational use or access inland of the existing bulkhead line, any roads, bridges, ramps or parking facilities or sewers or water mains;

(ii) for any site improvement, including sewers, or water mains, to support residential, industrial or commercial development;

(iii) to excavate, place fill or plantings in, or place any piling, platform or structure, including a floating structure, in the Hudson river; or

(iv) to plan, evaluate or study any project involving such excavation or placement as described in subparagraph (iii) of this paragraph; and provided further that no contract, or subcontract, with a public benefit corporation, public authority, or any other person or entity, or municipality other than the city of New York shall be entered into for any state assistance payments under this article with respect to any project, or portion thereof, located in the area described in this subdivision without the affirmative approval of the community board or boards wherein the project, or portion thereof, will be located.

16. Notwithstanding the provisions of this section, moneys received from the sale of bonds pursuant to the Clean Water/Clean Air Bond Act of 1996, and available for disbursements for projects developed pursuant to this section, shall also be available for state assistance payments to municipalities and not-for-profit corporations for the capital cost of projects described in subdivision nine of section 44-0119 of this chapter and subject to the review delineated in subdivision ten of section 44-0119 of this chapter. Such monies shall be subject to appropriation.

§ 56-0311. Dam safety projects.

Of the moneys received by the state from the sale of the bonds pursuant to the Clean Water/Clean Air Bond Act of 1996, fifteen million dollars shall be used for state assistance payments to municipalities for the cost of dam safety projects which have been approved by the commissioner.

TITLE 4

SOLID WASTE PROJECTS

Section 56-0401. Allocation of moneys.

56-0403. Municipal landfill projects.

56-0405. Municipal recycling projects.

56-0407. Fresh Kills landfill closure project.

§ 56-0401. Allocation of moneys.

Of the moneys received by the state from the sale of bonds pursuant to the Clean Water/Clean Air Bond Act of 1996 to be used for solid waste projects, fifty million dollars (\$50,000,000) shall be available for disbursements for municipal landfill projects, excluding any landfill closure project in the city of New York; fifty million dollars (\$50,000,000) shall be available for disbursements for municipal recycling projects, of which twenty-five million dollars (\$25,000,000) shall be available for municipal recycling projects in the city of New York; and seventy-five million dollars (\$75,000,000) shall be available for disbursements for the closure of Fresh Kills Landfill in the city of New York.

§ 56-0403. Municipal landfill projects.

1. As used in this title the following terms mean and include:

(a) "Landfill" means a disposal facility or part of one at which solid waste, or its residue after treatment, is intentionally placed in or on land, and at which solid waste will remain after closure and which is not a land spreading facility, a surface impoundment, or an injection well.

(b) "Municipal landfill closure project" means activities undertaken to close, including by reclamation, a landfill owned or operated by a municipality to achieve compliance with regulations promulgated by the department, or activities undertaken to implement a landfill gas management system project.

(c) "Landfill gas management system" means a system for the control, capture, and management of gas created within and emitted from a solid waste landfill.

(d) "Adirondack landfill project" means a project undertaken by the state and a municipality or municipalities, where such project has the effect of eliminating the potential for the disposal of waste originating outside the Adirondack park at a municipal solid waste landfill located within the Adirondack park.

2. A municipality, upon the approval of its governing body, may submit an application to the commissioner, in such form and containing such information as the commissioner may require, for state assistance payments toward the cost of a municipal landfill closure project incurred after April first, nineteen hundred ninety-three or Adirondack landfill project which is within the state of New York and which is eligible for state assistance pursuant to this title.

3. The commissioner shall review such project application and may approve, disapprove or recommend modifications thereto consistent with applicable law, criteria, standards or rules and regulations relative to such projects. In reviewing applications for projects pursuant to this section, the commissioner shall give due consideration to:

(a) the urgency of need to provide state assistance payments for the project in relation to the provision of monies for other project needs in the state known at the time such application is made;

(b) any adverse environmental impact resulting from the municipal landfill, including effects on groundwater; and

(c) the ability of the municipality to pay for the costs of the project.

4. After approval of an application, the commissioner and the municipality shall enter into a contract for state assistance payments toward the cost of such project which shall include the following provisions:

(a) A current estimate of the cost of the project as determined by the commissioner at the time of the execution of the contract.

(b) An agreement by the commissioner to make state assistance payments toward the cost of the project by periodically reimbursing the municipality for costs incurred during the progress of the project to a maximum of either fifty percent of the cost, or ninety percent of the cost for a municipality with a population smaller than thirty-five hundred as determined by the current federal decennial census, or two million dollars, whichever is less. The commissioner may consider landfill gas management projects separately from landfill closure projects. Such costs are subject to final computation and determination by the commissioner upon completion of the project. For purposes of this subdivision, the approved project cost shall be reduced by the amount of any specific state assistance payments for landfill closure purposes received by the municipality from any source; provided, however, that non-specific state assistance payments such as amounts paid pursuant to section fifty-four of the state finance law, shall not be included in such cost reduction.

(c) An agreement by the municipality to proceed expeditiously with the project and to complete the project in accordance with plans and reports approved by the department and with the conditions of applicable permits, administrative orders or judicial orders.

5. In administering the provisions of this title the commissioner:

(a) shall make an itemized estimate of funds or appropriations requested annually for inclusion in the executive budget;

(b) may, in the name of the state, as further provided within this article, contract to make, within the limitations of appropriations available therefor, state assistance payments toward the costs of an approved project. Such contracts shall be subject to approval by the

state comptroller and, as to form, by the attorney general;

(c) shall approve vouchers for the payments pursuant to an approved contract. All such payments shall be paid on the audit and warrant of the state comptroller; and

(d) may perform such other and further acts as may be necessary, proper or desirable to carry out the provisions of this article.

6. A municipality shall have the power and authority to:

(a) undertake and carry out any project for which state assistance payments and loans pursuant to contract are received or are to be received pursuant to this article and maintain and operate such project;

(b) expend money received from the state pursuant to this article for costs incurred in conjunction with an approved project; and

(c) perform such other and further acts as may be necessary, proper or desirable to carry out a project or obligation, duty or function related thereto.

7. Any municipal solid waste landfill or portion thereof that has closed or is in the process of closing that is required by federal or state law or regulation to install a landfill gas management system shall be eligible for state assistance for such landfill gas management system project pursuant to this section.

8. Notwithstanding paragraph (b) of subdivision four of this section, the commissioner, the commissioners of the Adirondack park agency, and such other state agencies as may be appropriate, may enter into an agreement with a municipality or municipalities for an Adirondack landfill project, the capital costs of which shall be eligible for state assistance payments pursuant to this section. Such project may be part of a locally created, region wide solution to the solid waste problems within the adirondack park.

§ 56-0405. Municipal recycling projects.

1. As used in this section the following terms mean:

(a) "Recyclables recovery equipment" means structures, machinery or

devices, singly or in combination, designed, constructed and required primarily to separate, process, modify, convert, treat, or prepare collected solid waste, including household hazardous waste, which is included as part of a recyclables recovery program so that component materials or substances or recoverable resources may be used as a raw material for new products or for useful purposes other than for energy recovery.

(b) "Recyclables recovery program" means a program undertaken by a municipality consistent with requirements of section one hundred twenty-aa of the general municipal law to provide for the environmentally sound recovery of recyclables, primarily involving the collection, aggregation and processing of recyclable materials for their use as raw materials for new products or for other useful purposes other than for energy recovery, through facilities planned, designed and constructed to ensure environmental protection and to maximize the potential for recyclables recovery. Such program shall have been approved by the commissioner and undertaken consistent with any local solid waste management plan pursuant to section 27-0107 of this chapter.

(c) "Recycling project" means recyclables recovery equipment, source separation equipment, a recyclables recovery program or any combination thereof required by a recyclables recovery program.

(d) "Source separation equipment" means municipally owned:

(i) add-ons or trailers designed to modify collection vehicles to allow sorting and separation of collected wastes held for the purpose of recycling;

(ii) containers for the source separation and temporary storage of recyclable wastes by commercial, industrial and institutional generators, and for the source separation and temporary storage of recyclable materials by single family and multiple family dwellings prior to collection;

(iii) bins, sheds or other facilities for the temporary storage of materials prior to transport for the purposes of recycling; and

(iv) collection vehicles specifically designed to hold and transport source-separated recyclables.

2. State assistance payments toward the cost of municipal recycling projects shall be made pursuant to this title with the approval of the

commissioner.

3. In reviewing applications for state assistance payments for municipal recycling projects, the commissioner shall give due consideration to:

(a) the adequacy of the municipality's recycling program and its relationship to the needs and plans of other municipalities; provided, however, that such adequacy shall be determined in part by the efforts undertaken to date by the municipality to implement a mandatory source separation law or ordinance required pursuant to section one hundred twenty-aa of the general municipal law;

(b) the suitability and feasibility of the project in relation to the recycling program and the area to be served;

(c) the proportion of solid waste for which recyclables recovery is contemplated and the extent to which the project is consistent with the statewide solid waste recycling goals established under the state solid waste management plan, pursuant to section 27-0103 of this chapter;

(d) the potential for coordination and consolidation of solid waste management practices among municipalities within specified areas, regions or planning units;

(e) the implementation of the system or components thereof and their expected terms of usefulness, singly or in combination;

(f) the present and projected population, land use, and rates and composition of solid waste generation;

(g) the potential or contemplated markets for recovered recyclables and the extent to which the full avoided costs of proper collection, transportation and disposal of source separated recyclables are, or are projected to be, greater than the cost of collection, transportation and sale of said recyclables less the amount received from the sale of said recyclables;

(h) the intergovernmental arrangements integral to the project;

(i) the non-governmental arrangements integral to the project;

(j) the urgency of the project, in relationship to all recyclables recovery program needs in the state; and

(k) the environmental soundness of the project, including assurance that the project will meet all applicable laws, criteria, and rules and regulations.

4. A municipality, upon the approval of its governing body, may submit an application to the commissioner, in such form and containing such information as the commissioner may require, for state assistance payments toward the cost of municipal recycling projects incurred after April first, nineteen hundred ninety-three which is within the state of New York and which is eligible for state assistance pursuant to this title. The commissioner shall review such project application and may approve, disapprove or recommend modifications thereto consistent with applicable law, criteria, standards or rules and regulations relative to such projects. Upon approval of a project application, a municipality shall enter into a contract, as further provided within this article, with the commissioner for state assistance payments toward the cost of such project to be received pursuant to this article.

5. The commissioner may, in the name of the state, enter into contracts with municipalities to provide state assistance payments toward the cost of municipal recycling projects which shall include the following provisions:

- (a) an estimate of the costs of the project as determined by the commissioner;

- (b) an agreement by the commissioner to make state assistance payments toward the cost of the project by periodically reimbursing the municipality, during the progress of project development or following completion of the project as may be agreed upon by the parties, in an amount not to exceed the amounts established elsewhere in this title; and

- (c) an agreement by the municipality:

- (i) to proceed expeditiously with and complete the project as approved by the commissioner;

- (ii) to operate and maintain the municipal recycling project in accordance with applicable laws and rules and regulations;

- (iii) to provide for the payment of the municipality's share of the cost of the project;

- (iv) to continue, upon evaluation of its effectiveness, operation of the project and not to dispose of the project or any portion thereof or change its use without the approval of the commissioner;

(v) to assume the full cost of any continued operation of the project and to assume the full cost of any continued operation for a period no less than three years;

(vi) to repay within one year of notification by the commissioner, any state assistance payments made toward the cost of the project or an equitable portion of such moneys declared appropriate by the commissioner, if the municipality:

(A) fails to complete the project as approved;

(B) fails to continue operation of the project;

(C) disposes of the project, or any portion thereof, without the prior written approval of the respective commissioner; or

(D) changes the use of the project, or any portion thereof, without the prior written approval of the commissioner. No repayment, however, shall be required where the commissioner determines that such failure, disposition or change of use was immediately necessary to protect public health and safety;

(vii) to apply for and make reasonable efforts to secure federal assistance for the project; and

(viii) to not sell, lease or otherwise dispose of or use lands acquired under this title for any purpose inconsistent with the project under which such land is acquired.

In connection with each contract, the commissioner shall keep adequate records of the amount of the payment by the state and of the amount of federal assistance, if any, received by the municipality. Such records shall be retained by the commissioner and shall establish the basis for recalculation of the state payment as required herein.

§ 56-0407. Fresh Kills landfill closure project.

1. The commissioner, in the name of the state, may enter into a contract with the city of New York for state assistance payments for the Fresh Kills landfill closure project.

2. After approval of an application, the commissioner and the municipality shall enter into a contract for state assistance payments

toward the cost of such project which shall include the following provisions:

(a) A current estimate of the cost of the project as determined by the commissioner at the time of the execution of the contract.

(b) An agreement by the commissioner to make state assistance payments toward the cost of the project by periodically reimbursing the municipality for costs incurred during the progress of the project. Such costs are subject to final computation and determination by the commissioner upon completion of the project. For purposes of this subdivision, the approved project cost shall be reduced by the amount of any specific state assistance payments for landfill closure purposes received by the municipality from any source; provided, however, that non-specific state assistance payments, such as amounts paid pursuant to section fifty-four of the state finance law, shall not be included in such cost reduction.

(c) An agreement by the municipality to proceed expeditiously with the project and to complete the project in accordance with plans and reports approved by the department and with the conditions of applicable permits, administrative orders or judicial orders.

TITLE 5

ENVIRONMENTAL RESTORATION PROJECTS

Section 56-0501. Allocation of moneys.

56-0502. Definitions.

56-0503. Environmental restoration projects; state assistance.

56-0505. Environmental restoration projects; criteria.

56-0507. Recovery of state assistance.

56-0508. Foreclosure of a tax lien.

56-0509. Liability limitation.

56-0511. Change of use.

56-0513. Permit waivers.

56-0515. Access to sites.

§ 56-0501. Allocation of moneys.

1. Of the moneys received by the state from the sale of bonds pursuant to the Clean Water/Clean Air Bond Act of 1996, two hundred million dollars (\$200,000,000) shall be available for disbursements for environmental restoration projects.

2. Beginning in state fiscal year two thousand fifteen--two thousand sixteen, environmental restoration projects may be funded using the proceeds of bonds issued pursuant to section twelve hundred eighty-five-q of the public authorities law provided that funding for such projects shall conform to the limitations provided in subdivision one of such section.

§ 56-0502. Definitions.

1. "Community based organization" shall mean a not-for-profit corporation, exempt from taxation under section 501(c)(3) of the internal revenue code whose stated mission is promoting reuse of brownfield sites within a specified geographic area in which the community based organization is located, which has twenty-five percent or more of its board of directors residing in the community in such area; and represents a community with a demonstrated financial need.

"Community based organization" shall not include any not-for-profit corporation that has caused or contributed to the release or threatened release of contamination from or onto the brownfield site, or any not-for-profit corporation that generated, transported, or disposed of, or that arranged for, or caused, the generation, transportation, or disposal of contamination from or onto the brownfield site. This definition shall not apply if more than twenty-five percent of the members, officers or directors of the not-for-profit corporation are or were employed by or receiving compensation from any person responsible for a site under title thirteen of article twenty-seven of this chapter or article twelve of the navigation law or under applicable principles of statutory or common law liability.

1-a. "Contamination" or "contaminated" shall have the same meaning as provided in section 27-1405 of this chapter.

2. "Cost", for purposes of this title, shall have the same meaning as provided in subdivision four of section 56-0101 of this article, except that such term shall not include the requirement to reduce the cost of an approved project in accordance with any federal or state funds for the project received or to be received by the municipality.

3. "Environmental restoration investigation project" shall mean a project, undertaken in accordance with the requirements of this title, to investigate contamination located in, on, or emanating from real property held in title by a municipality.

4. "Environmental restoration remediation project" shall mean a project, undertaken in accordance with the requirements of this title, to remediate contamination located in, on, or emanating from real property held in title by a municipality.

5. "Municipality", for purposes of this title, shall have the same meaning as provided in subdivision fifteen of section 56-0101 of this article, except that such term shall not refer to a municipality that generated, transported, or disposed of, arranged for, or that caused the generation, transportation, or disposal of contamination located at real property proposed to be investigated or to be remediated under an environmental restoration project. For purposes of this title, the term municipality includes a municipality acting in partnership with a community based organization.

6. "State assistance", for purposes of this title, shall mean in the case of a contract authorized by subdivision one of section 56-0503 of this title, payments made to a municipality to reimburse the municipality for the state share of the costs incurred by the municipality to undertake an environmental restoration project or in the case of a written agreement authorized by subdivision three of section 56-0503 of this title, costs incurred by the state to undertake an environmental restoration project but not reimbursed by a municipality.

§ 56-0503. Environmental restoration projects; state assistance.

1. The commissioner may enter into a contract with a municipality to provide state assistance to such municipality to undertake an environmental restoration project. The amount of state assistance payment for such project shall be up to an amount of:

(a) ninety percent of the eligible costs of such project, subject to the provisions set forth in paragraph (b) of this subdivision;

(b) one hundred percent of the eligible costs of any remediation directed by the department to be undertaken outside the boundaries of the real property that is subject to an environmental restoration project approved by the department.

2. In addition to such other terms and conditions that the commissioner may deem to be appropriate, a contract authorized by subdivision one of this section shall provide as follows:

(a) An estimate of the cost of such project as determined by the commissioner at the time of such contract's execution;

(b) An agreement by the commissioner to periodically reimburse the municipality for eligible costs incurred during the progress of such project. Such payments shall be subject to final computation and determination of the total state assistance share of the eligible costs of the entire environmental restoration project;

(c) A provision that the municipality shall assist in identifying a responsible party by searching local records, including property tax rolls, or document reviews, and if, in accordance with the required departmental approval of any settlement with a responsible party, any responsible party payments become available to the municipality, before, during or after the completion of an environmental restoration project, which were not included when the state share was calculated pursuant to this section, the state assistance share shall be recalculated, and the municipality shall pay to the state, for deposit into the environmental restoration project account of the hazardous waste remedial fund established under section ninety-seven-b of the state finance law, the difference between the original state assistance payment and the recalculated state share. Recalculation of the state share shall be done each time a payment from a responsible party is received by the

municipality;

(d) A provision that if any monies received from the disposition of the real property subject to an environmental restoration project exceed the municipality's cost of such property, including taxes owed to the municipality upon acquisition, and the municipality's cost of the environmental restoration project, the amount of such excess necessary to reimburse the state of New York for the state assistance provided to the municipality under this title shall be paid to the state of New York for deposit into the environmental restoration project account of the hazardous waste remedial fund established under section ninety-seven-b of the state finance law;

(e) An agreement by the municipality to proceed expeditiously with and complete such project in accordance with plans approved for payment of the municipality's share of such project's cost;

(f) An agreement by the municipality that it shall prepare and implement a public participation plan for environmental restoration projects undertaken pursuant to this title. The requirements of the plan shall be governed by decision of the municipality to proceed with remediation of the property under this title. However, in all cases, implementation of the plan shall be completed as part of the project. In those cases where the municipality does not intend to proceed with remediation of the property, the plan shall provide timely and accessible disclosure of the results of the investigation to the interested public. The plan shall provide for adequate public notice of the availability of the investigation results; an opportunity for submission of written comments; and a filing of a notice of the results of the investigation as authorized by subdivision three of section three hundred sixteen-b of the real property law. Where the municipality intends to proceed with remediation of the property under this title, the plan shall provide opportunities for early, inclusive participation prior to the selection of a preferred course of action, facilitate communication, including dialogue among the municipality, the department, and the interested public, and provide timely and accessible disclosure of information. At a minimum, the design of the plan shall take into account the scope and scale of the proposed environmental restoration remediation project, local interest, and other relevant factors. The plan shall also provide for: adequate public notice of the

availability of a draft remedial plan; a forty-five day period for submission of written comments; a public meeting on such plan if substantive issues are raised by members of the affected community; and technical assistance if so requested by members of the affected community. Provided, however, that the requirements of this subdivision shall not apply to interim remedial measures undertaken as part of an environmental restoration project to address emergency site conditions. In such instance, the department or such persons implementing the interim remedial measure or making the request shall conduct public participation activities as the department deems necessary and appropriate under such circumstances.

(g) An agreement by the municipality that it shall put into place any engineering and/or institutional controls (including environmental easements pursuant to title thirty-six of article seventy-one of this chapter) that the department may deem necessary to allow the contemplated use to proceed, that such engineering and/or institutional controls shall be binding on such municipality, any successor in title, and any lessees and that any successors in title and any lessees cannot challenge state enforcement of such controls;

(h) In the event that such engineering controls and/or institutional controls are necessary, the municipality shall develop a plan consistent with the requirements set forth in section 27-1415 of this chapter. Such plan shall be approved by the department. Failure to implement the plan or maintain such controls shall constitute a violation of such contract and shall terminate for the duration of such failure the protection afforded under subdivision one of section 56-0509 of this title;

(i) In the event that an easement is required, such municipality shall cause such easement to be recorded and indexed in accordance with the requirements set forth in title thirty-six of article seventy-one of this chapter; and

(j) A provision that exempts a municipality and any successor in title from the requirement to obtain any state or local permit or other authorization for any activity needed to implement a project to investigate or remediate contamination pursuant to this title; provided that the activity is conducted in a manner which satisfies all substantive technical requirements applicable to like activity conducted pursuant to a permit.

3. The department may undertake an environmental restoration project on behalf of a municipality upon request. If the department undertakes the project on behalf of the municipality, the state shall enter into a written agreement with the municipality and the agreement shall require the municipality to periodically provide its share to the state for costs incurred during the progress of such project. The municipality's share shall be the same as would be required under subdivision one of this section. The agreement shall include all provisions specified in subdivision two of this section as appropriate.

§ 56-0505. Environmental restoration projects; criteria.

1. The department shall determine the eligibility of an environmental restoration project for state assistance under this title based upon the following criteria:

(a) the benefit to the environment realized by the expeditious remediation of the property proposed to be subject to such project;

(b) the economic benefit to the state by the expeditious remediation of the property proposed to be subject to such project;

(c) the potential opportunity of the property proposed to be subject to such project to be used for public recreational purposes;

(d) real property in a designated brownfield opportunity area pursuant to section nine hundred seventy-r of the general municipal law; and

(e) the opportunity for other funding sources to be available for the remediation of such property, including, but not limited to, enforcement actions against responsible parties (other than the municipality to which state assistance was provided under this title; or a successor in title, lender, or lessee who was not otherwise a responsible party prior to such municipality taking title to the property), state assistance payments pursuant to title thirteen of article twenty-seven of this chapter, and the existence of private parties willing to remediate such property using private funding sources. Highest priority shall be granted to projects for which other such funding sources are not available.

2. The department shall not enter into a contract with a municipality pursuant to section 56-0503 of this title for an environmental restoration project for any site listed in the registry of inactive hazardous waste sites under section 27-1305 of this chapter and given a classification as described in subparagraph one or two of paragraph b of subdivision two of such section 27-1305.

3. The remediation objective of an environmental restoration remediation project shall meet the same standard for protection of public health and the environment that applies to remedial actions undertaken pursuant to section 27-1313 of this chapter.

4. After completion of such project, the municipality may use the property for public purposes or may dispose of it. If the municipality shall dispose of such property by sale to a responsible party, such party shall pay to such municipality, in addition to such other consideration, an amount of money constituting the amount of state assistance provided under this title plus accrued interest and transaction costs and the municipality shall deposit that money into the environmental restoration project account of the hazardous waste remedial fund established under section ninety-seven-b of the state finance law.

5. In the event that an environmental restoration project's remediation objective shall not have been attained to the department's satisfaction at the time of the municipality's disposition of such property, such municipality shall be liable to ensure that such objective is attained within the time called for in the state assistance contract.

§ 56-0507. Recovery of state assistance.

1. A municipality receiving state assistance under this title undertakes an environmental restoration project as agent of the state with respect to the incurrence of eligible costs.

2. The state shall make all reasonable efforts to recover the full amount of any state assistance provided under this title through litigation brought under this section or other statute or under the common law, or through cooperative agreements, with responsible parties (other than the municipality to which state assistance was provided under this title; or a successor in title, lender, or lessee who was not otherwise a responsible party prior to the municipality's taking title to such property).

3. Any and all monies recovered or reimbursed pursuant to this section shall be deposited into the environmental restoration project account of the hazardous waste remedial fund established under section ninety-seven-b of the state finance law.

§ 56-0508. Foreclosure of a tax lien.

Notwithstanding any general, special or local law or ordinance to the contrary:

1. upon the commencement of a proceeding to foreclose a tax lien, the taxing district bringing the proceeding or any taxing district other than the one foreclosing the tax lien, having any right, title, or interest in, or lien upon, any parcel described in the petition of foreclosure may upon twenty days notice to all parties having any right, title, or interest in, or lien upon such parcel, move, at a special term in the court in which the foreclosure proceeding was brought, for an order granting such taxing district the temporary incidents of ownership of such parcel for the sole purpose of entering the parcel and conducting an environmental restoration investigation project upon such parcel.

2. unless prior to the return date of the motion brought pursuant to this section the parcel has been redeemed by a party having the right of redemption, the court shall enter an order granting such relief to such taxing district, or, if more than one taxing district applies for such right, to the taxing district which the court determines has the

greatest public interest, but, where possible and proper, preferences for such relief should be accorded first to cities and villages, second to towns, and third to counties. Such order shall be granted upon such terms and conditions as the court shall deem just and proper to permit the environmental investigation to go on unhindered as well as to protect the interests of all other parties having a right, title, or interest in such parcel. Such order shall act as a stay to the foreclosure action on such parcel until the environmental restoration investigation project has been completed and the final investigation report filed with the court pursuant to subdivision four of this section or such other time as the court may deem proper, and particularly upon a finding by the court that the investigation has not been carried out in an expeditious manner.

3. such temporary incidents of ownership by such taxing district shall also qualify it as being the owner of such property to be eligible for funding from the state of New York for such environmental restoration investigation project under this article or for such funding from any source pursuant to any other state, federal, or local law, but such incidents of ownership shall not be sufficient to qualify it as the owner of such property for the purposes of holding it wholly or partially liable for any damages, past, present, or future from any release of any hazardous material, substance, or contaminant into the air, ground, or water, unless such release was caused by such taxing district.

4. within thirty days of the completion of the environmental restoration investigation project and the receipt by the taxing jurisdiction of the final report of such investigation, such taxing jurisdiction shall file such report with the court on notice to the court and all other parties of record, and the stay of the foreclosure shall be lifted (unless lifted earlier by a prior court order), and all incidents of temporary ownership of the taxing jurisdiction that was awarded such taxing district, except any right for the environmental restoration investigation project to be funded, shall cease to exist, and nothing in this subdivision shall preclude the taxing jurisdiction that conducted the environmental restoration investigation project or

the taxing jurisdiction that commenced the foreclosure action, if it is a different taxing jurisdiction than the taxing jurisdiction which conducted the investigation, from withdrawing the parcel from foreclosure pursuant to section eleven hundred thirty-eight of the real property tax law.

5. all costs associated with any environmental restoration investigation project conducted pursuant to the authority of this section shall be added to the taxes owed to, and the tax lien of, the taxing district that undertook the environmental restoration investigation project pursuant to this section.

§ 56-0509. Liability limitation.

1. (a) Notwithstanding any other provision of law and except as provided in subdivision two of this section and in paragraph (h) of subdivision two of section 56-0503 of this title, the following shall not be liable to the state upon any statutory or common law cause of action, or to any person upon any statutory cause of action arising out of the presence of any contamination in or on property at any time before the effective date of a contract entered into pursuant to this title or written agreement pursuant to subdivision three of section 56-0503 of this title:

(i) a municipality receiving state assistance under this title to undertake, or under written agreement pursuant to subdivision three of section 56-0503 of this title for the state to undertake an environmental restoration project and complying with the terms and conditions of the contract or written agreement pursuant to subdivision three of section 56-0503 of this title providing such assistance; and

(ii) a successor in title to the real property subject to an environmental restoration project; any lessee of such property; and any person that provides financing to such party relative to the remediation, restoration, or redevelopment of such property; provided that such successor in title, lessee, or lender did not generate, arrange for, transport, or dispose, and did not cause the generation, arrangement for, transportation, or disposal of any contamination

located at such property, and did not own such property.

(b) Notwithstanding any other provision of this title, any person seeking the benefit of this subdivision shall bear the burden of proving that a cause of action, or any part thereof, is attributable solely to contamination present in or on such parcel before the effective date of such contract.

2. Subdivisions one and three of this section shall not apply to relieve any municipality, successor in title, lessee, or lender from liability arising from:

(a) failing to implement such project to the department's satisfaction or failing to comply with the terms and conditions of the contract;

(b) fraudulently demonstrating that the cleanup levels identified in or to be identified in accordance with such project were reached;

(c) causing the release or threat of release at the property subject to such project of any contamination after the effective date of such contract; or

(d) changing such property's use from the intended use as identified in the contract pursuant to section 56-0503 of this title to a use requiring a lower level of residual contamination unless the additional remedial activities are undertaken which shall meet the same standard for protection of public health and the environment that applies to remedial actions undertaken pursuant to 27-1313 of this chapter so that such use can be implemented with sufficient protection of public health and the environment.

3. The state shall indemnify and save harmless any municipality, successor in title, lessee, or lender identified in paragraph (a) of subdivision one of this section in the amount of any judgment or settlement, obtained against such municipality, successor in title, lessee, or lender in any court for any common law cause of action arising out of the presence of any contamination in or on property at anytime before the effective date of a contract entered into pursuant to this title. Such municipality, successor in title, lessee, or lender shall be entitled to representation by the attorney general, unless the attorney general determines, or a court of competent jurisdiction determines, that such representation would constitute a conflict of

interest, in which case the attorney general shall certify to the comptroller that such party is entitled to private counsel of its choice, and reasonable attorneys' fees and expenses shall be reimbursed by the state. Any settlement of such an action shall be subject to the approval of the attorney general as to form and amount, and this subdivision shall not apply to any settlement of any such action which has not received such approval.

4. A municipality receiving state assistance and any successor in title shall implement a department-approved environmental sampling program and, in the event that conditions on such property are not sufficiently protective of human health for its current use due to environmental conditions related to the property subject to such project that were unknown to the department as of the effective date of such contract or due to information received in whole or in part after the department's approval of such project's final engineering report and certification, take such emergency measures that are necessary to maintain sufficient protection of human health for such property's current use until such conditions are addressed; and the department shall take such measures as it may determine are necessary to return such property to a condition sufficiently protective of human health using monies from the environmental restoration project account of the hazardous waste remedial fund established under section ninety-seven-b of the state finance law.

5. In addition to any other powers the department may have, including, but not limited to, the powers set forth in section 56-0515 of this title, the department shall have the authority to periodically inspect property to ensure that the use of the property complies with the terms and conditions of the contract and any engineering and/or institutional controls placed on the property.

§ 56-0511. Change of use.

1. At least sixty days before the start of physical alteration or construction constituting a change of use at a property investigated or

remediated under an environmental restoration project, or at least sixty days before a change of use at such a property not involving any physical alteration or construction, as the case may be, the person or entity proposing to make a change of use shall provide written notification to the department and the clerks of the county and other municipalities in which such property is located.

2. No person shall engage in any activity at a property investigated or remediated under an environmental restoration project that is not consistent with restrictions placed upon the use of the property, or that will, or that reasonably is anticipated to: prevent or interfere significantly with a proposed, ongoing, or completed project; or expose the public health or the environment to a significantly increased threat of harm or damage from such property. If the commissioner determines that a proposed change of use is prohibited pursuant to this section, he or she shall, within forty-five days after receipt of the complete notice required by this section, provide the person giving such notice with a written determination that such change of use will not be authorized, together with the reasons for such determination.

3. For the purposes of this section:

(i) "change of use" means the transfer of title to all or part of property subject to an environmental restoration project, the erection of any structure on such property, and the creation of a park or other public or private recreational facility on such property, or any activity that is likely to disrupt or expose contamination or to increase direct human exposure; or any other conduct that will or may tend to significantly interfere with an ongoing or completed environmental restoration project.

(ii) "complete notice" means a notice that adequately apprises the department of the contemplated physical alteration of the property and how such alteration may affect the property's proposed, ongoing, or completed project, or of the proposed new owner's ability to implement the engineering and institutional controls associated with the property.

§ 56-0513. Permit waivers.

1. The department shall be exempt from the requirement to obtain any state or local permit or other authorization for any activity needed to implement a project to investigate or remediate contamination pursuant to this title; provided that the activity is conducted in a manner which satisfies all substantive technical requirements applicable to like activity conducted pursuant to a permit.

2. The department, by and through the commissioner, shall be authorized to exempt any agent, consultant, or contractor of the department from the requirement to obtain any state or local permit or other authorization for any activity needed to implement a project to investigate or remediate contamination pursuant to this title; provided that the activity is conducted in a manner which satisfies all substantive technical requirements applicable to like activity conducted pursuant to a permit.

§ 56-0515. Access to sites.

The department, by and through the commissioner, shall be authorized to:

1. Require that any person permit a duly designated officer or employee of the department or of a municipal corporation, or any agent, consultant, or contractor of the department or of a municipal corporation, so authorized in writing by the commissioner, to enter upon any property which has or may have a contamination on such property, and/or areas near such property, for the following purposes:

(a) To inspect and take samples of such contaminate and/or environmental media, utilizing such sampling methods as may be necessary or appropriate, including without limitation soil borings and monitoring wells; provided that no sampling methods involving the substantial disturbance of the ground surface of such property may be utilized until after a minimum of ten days' written notice thereof shall have been provided to the owner and operator and occupant of such property, if identifiable by reasonable efforts, unless the commissioner makes a

written determination that such notice will not allow the protection of the public health or the environment, in which case two days' written notice shall be sufficient;

(b) To implement the cleanup, removal, remediation, or restoration of contamination and/or environmental media; provided that no such work may be undertaken until after a minimum of ten days' written notice thereof shall have been provided to the owner and operator and occupant of such property, if identifiable by reasonable efforts, unless the commissioner makes a written determination that such notice will not allow the protection of the public health or the environment, in which case two days' written notice shall be sufficient.

2. (a) Require that any person furnish to the department, in a form and manner as prescribed by the department, information relating to the current and past contamination generation, treatment, storage, disposal, and/or transportation activities of such person or any other person now or formerly under the control of such person; in the event such person cannot comply therewith, in whole or in part, such person shall furnish to the department information describing all efforts made by such person to comply therewith; any information so furnished to the department shall be considered a "written instrument" as defined in subdivision three of section 175.00 of the penal law;

(b) Require that any person permit a duly designated officer or employee of the department at all reasonable times to have access to and to copy all books, papers, documents, and records relating to the current and past contamination generation, treatment, storage, disposal, and/or transportation activities of such person or any person now or formerly under the control of such person;

(c) Require, by subpoena issued in the name of the department, the production of books, papers, documents, and other records, and the rendition of testimony by deposition under oath of any person relating to the current and past contamination generation, treatment, storage, disposal, and/or transportation activities of such person or any person now or formerly under the control of such person; such subpoenas and depositions shall be regulated by the civil practice law and rules; the commissioner may invoke the powers of the supreme court of the state of New York to compel compliance therewith.

TITLE 6

AIR QUALITY PROJECTS

Section 56-0601. Allocation of monies.

56-0603. State clean-fueled vehicle projects.

56-0605. Clean-fueled buses projects.

56-0607. Other air quality projects.

56-0609. Clean air for schools projects.

56-0611. Environmental compliance projects.

§ 56-0601. Allocation of monies.

Of the monies received by the state from the sale of bonds pursuant to the Clean Water/Clean Air Bond Act of 1996, two hundred thirty million dollars (\$230,000,000), of which five million dollars (\$5,000,000) shall be available for diesel-fueled school bus retrofit equipment projects, shall be used to fund air quality projects as set forth in this title.

§ 56-0603. State clean-fueled vehicle projects.

1. The office of general services is authorized, consistent with the strategy developed pursuant to subdivision three of section two hundred one-a of the executive law, to conduct a project to acquire clean-fueled vehicles and to develop and acquire the associated infrastructure including depot construction.

2. For the purposes of this section, the term "clean-fueled vehicle" shall mean any motor vehicle as defined in section one hundred twenty-five of the vehicle and traffic law, that uses electricity, including electricity generated from solar energy, either stored or generated on-board, as its primary motive force, or that is fueled by compressed natural gas, propane, methanol, hydrogen or ethanol.

§ 56-0605. Clean-fueled buses projects.

1. The New York state energy research and development authority in cooperation with the department of transportation is authorized to make state assistance payments to "clean-fueled buses projects".

2. For the purposes of this section, the term "clean-fueled bus" shall mean any motor vehicle having a seating capacity of fifteen or more passengers in addition to the driver and used for the transportation of persons on public highways, that is fueled by compressed natural gas, propane, methanol, hydrogen, biodiesel or ethanol, or uses electricity, including electricity generated from solar energy, either stored or generated on-board, as its primary motive force. For the purposes of this section, the term "diesel-fueled school bus retrofit equipment" shall mean equipment and/or technologies, including, but not limited to, particulate traps or filters and catalytic converters that reduce emissions of particulate matter, hydrocarbons, oxides of nitrogen, carbon monoxide, or toxic air pollutants.

3. Any municipality, state agency or department, state public authority, or school district upon the approval of its governing body, may submit an application to the authority, in such a form and containing such information as the authority may require, for state assistance payments toward the cost of acquisition of clean-fueled buses, purchase and installation of diesel-fueled school bus retrofit equipment on diesel-fueled school buses and for installation of infrastructure, including depot construction directly associated with such acquisitions. The authority shall suballocate to the department such funds as are necessary for the development of a single facility to evaluate heavy duty vehicle emissions.

4. The authority shall review such application, and may approve, disapprove or recommend modifications thereto consistent with applicable law, criteria, standards or rules and regulations relative to such application. Reasons for disapproval shall be provided to the applicant in writing.

5. After approval of the application, the authority and the municipality, state agency or department, state public authority, or school district shall enter into a contract for state assistance payments towards the cost of such project which shall include the following provisions:

(a) A current estimate of the cost of the project as determined by the authority at the time of the execution of the contract;

(b) An agreement by the authority to make state assistance payments towards the cost of the project; and

(c) An agreement by the municipality, state agency or department, state public authority, or school district to proceed expeditiously with the project and to complete the project in accordance with plans approved by the authority and provide reports as required by the authority.

§ 56-0607. Other air quality projects.

Of monies received by the state from the sale of bonds pursuant to the Clean Water/Clean Air Bond Act of 1996, up to twenty million dollars (\$20,000,000) shall be available for disbursements for air quality projects pursuant to this section.

The commissioner is authorized in consultation with other state agencies as may be necessary, to make state assistance payments or to enter into contracts in the name of the state for projects that will enhance the quality of the state's environment and the state's air quality.

§ 56-0609. Clean air for schools projects.

1. Of the monies received by the state from the sale of bonds pursuant to the Clean Water/Clean Air Bond Act of 1996, one hundred twenty-five million dollars (\$125,000,000) shall be available for disbursements for clean air for schools projects.

The power authority is authorized to undertake clean air for schools projects for elementary, middle and secondary schools. The power authority may undertake such projects in cooperation with local gas and electric corporations and/or energy service companies.

For the purposes of this section, "clean air for schools projects" shall mean projects to improve air quality by schools including, but not limited to, projects that replace coal-fired furnaces and heating systems with furnaces and systems fired by oil or gas.

2. Any school district may make an application to the power authority for state assistance payments from funds made available under this article toward the costs of clean air for schools projects.

a. The power authority shall review such applications and may approve, deny, or recommend modifications thereto, consistent with applicable law and consistent with criteria, standards, or rules and regulations, as the power authority may establish, relative to such projects. In the event that an application is denied, the power authority shall provide, in writing, reasons for the denial to the applicant.

b. In reviewing such applications, the power authority shall give due consideration to the following criteria:

(i) the extent to which the project provides the greatest improvement in air quality both within the school and in the surrounding neighborhood;

(ii) the age of the system being replaced; and

(iii) the potential for energy cost savings from efficiency improvements.

c. Upon approval of an application, the power authority may enter into a contract with the school district to undertake a clean air for schools project.

3. Notwithstanding any provision of law to the contrary, the comptroller is authorized and directed to release monies constituting state assistance payments, in amounts set forth in a schedule approved

by the director of the budget, to the power authority for the purposes authorized by this section. Any monies constituting state assistance payments made available to the power authority for the purposes specified by this section shall not be subject to the requirements of section one thousand thirteen of the public authorities law.

§ 56-0611. Environmental compliance projects.

Of moneys made available under this title thirty million dollars (\$30,000,000) shall be made available for state assistance payments through the environmental facilities corporation to villages, towns, and cities with a population of less than one million, for small business environmental compliance assistance projects which enhance the quality of the air of the state through compliance with environmental laws and regulations, or by remedy or prevention of environmental deficiencies.

1. The president of the environmental facilities corporation is authorized to provide state assistance payments to villages, towns, and cities with a population of less than one million, for implementation of small business environmental compliance assistance projects which enhance the quality of the air of the state.

2. A village, town, and city with a population of less than one million may submit an application to the president, in such form and manner as the president may require, for state assistance payments toward the cost of environmental compliance assistance projects.

3. Upon receipt of a request for a state assistance application, the president shall review the request and, within ninety days from the receipt of a complete application, may approve, disapprove, or recommend modifications thereto consistent with applicable law criteria, standards, or rules and regulations relative to such projects.

ARTICLE 57

LONG ISLAND PINE BARRENS MARITIME RESERVE ACT

- Title 1. Long Island Pine Barrens Maritime Reserve Act.
2. Peconic Bay Region Watershed Protection Act.

TITLE 1
**LONG ISLAND PINE BARRENS MARITIME
RESERVE ACT**

- Section 57-0101. Short title.
- 57-0103. Legislative declaration.
- 57-0105. Legislative findings and intent.
- 57-0107. Definitions.
- 57-0109. Establishment of Long Island Pine Barrens maritime reserve; core preservation area and compatible growth area.
- 57-0111. Long Island Pine Barrens maritime reserve council.
- 57-0113. Duties of the council.
- 57-0115. Comprehensive management plan.
- 57-0117. Dedications to the Long Island Pine Barrens preserve; legislative protection.
- 57-0119. Central Pine Barrens joint planning and policy commission.
- 57-0121. Central Pine Barrens comprehensive land use plan; interim regulations.
- 57-0123. Implementation of the Central Pine Barrens comprehensive land use plan.
- 57-0125. Addition of towns.
- 57-0127. Cooperation of state and municipal agencies.
- 57-0129. Acceptance of monies.
- 57-0131. Limitations on regulation of hunting, fishing and recreation activities; nonregulation of federal conservation activities.
- 57-0133. Affect on other laws.
- 57-0135. Judicial review.
- 57-0136. Penalties and enforcement.
- 57-0137. Severability.

§ 57-0101. Short title.

This title shall be known and may be cited as the "Long Island Pine Barrens maritime reserve act".

§ 57-0103. Legislative declaration.

The legislature hereby declares it to be in the public interest to protect and manage the Pine Barrens-Peconic Bay system, in the county of Suffolk, by establishing a Long Island Pine Barrens maritime reserve. It is further in the public interest to establish a council made up of representatives of state and local governments and private citizens to prepare a comprehensive management plan and make recommendations to preserve, protect and enhance the natural, recreational, economic and educational values of the region, which the state and local governments may adopt. In addition, it is further in the public interest to establish a commission made up of a governor's appointee, the county executive of Suffolk county and the supervisors of the towns of Brookhaven, Riverhead and Southampton to prepare, oversee and participate in the implementation of a comprehensive land use plan for the Central Pine Barrens area to guide development therein in a manner suitable to the needs for preservation of the core preservation area and compatible growth and development in the compatible growth area.

§ 57-0105. Legislative findings and intent.

The legislature hereby finds that eastern Long Island contains a maritime region of statewide importance known as the Pine Barrens-Peconic Bay system.

The legislature finds that within the Pine Barrens-Peconic Bay system the federal, state, county and local governments own and manage significant properties in the form of parks, preserves, historic sites and protected open space, where there is an interdependent and reciprocal relationship between human activities and natural processes,

and where fishing, agriculture and tourism have been the dominant industries for more than three hundred fifty years.

The legislature also finds that within the Pine Barrens-Peconic Bay system natural processes have created unique landforms such as Robin's Island, Shelter Island, Gardiners' Island, Fisher's Island, Long Island's North and South Forks, and numerous wetlands, bluffs and beaches.

The legislature finds that the Long Island Pine Barrens, an area encompassing over one hundred thousand acres in the county of Suffolk, is of critical importance to the state because it overlies the largest source of pure groundwater in New York. The Pine Barrens are interconnected to the Peconic Bay system by the Peconic River, the longest groundwater river in New York, and the ecologic and hydrologic integrity of this system should be protected in a comprehensive plan adopted by the state and individual local governments.

The legislature also finds that the Pine Barrens-Peconic Bay system contains one of the greatest concentrations and diversities of endangered, threatened and special concern species of plants and animals to be found in the state, and that protection of their habitats is in the best interest of the people of New York.

The legislature further finds that the Pine Barrens-Peconic Bay system contains many other unique natural, agricultural, historical, cultural and recreational resources that are mutually supportive and ultimately dependent upon maintenance of the hydrologic and ecologic integrity of this region.

Therefore, the legislature finds that the purpose of this title is to allow the state and local governments to protect, preserve and properly manage the unique natural resources of the Pine Barrens-Peconic Bay system and to encourage coordination of existing programs and studies affecting land and water resources in the region and to protect the value of the existing public and private investment that has already been made to acquire land in the region.

The legislature further finds that a portion of the system known as the Central Pine Barrens area requires the preparation and implementation of a state supported regional comprehensive land use plan that will provide for the preservation of the core preservation area, protection of the Central Pine Barrens area and for the designation of compatible growth areas to accommodate appropriate patterns of development and regional growth with recognition of the rights of private land owners and the purpose of preservation of the core area.

The legislature recognizes that the provisions of this title may restrict the beneficial use of some lands currently in private ownership. These restrictions are deemed to be necessary and desirable to protect and preserve the hydrologic and ecologic integrity of the Central Pine Barrens area as well as the public's health and welfare for future generations. The legislature intends that a comprehensive regional land use plan be implemented whereby private landowners whose property is located within the Central Pine Barrens area are afforded an opportunity to receive benefits from the plan such as transferable development rights, conservation easements, rights and values transfers, purchase of development rights and/or fee acquisition with monetary compensation.

§ 57-0107. Definitions.

As used in this title, the following terms shall mean and include:

1. "Council" shall mean the Long Island Pine Barrens maritime reserve council created by section 57-0111 of this title.

2. "Long Island Pine Barrens maritime reserve" shall mean the reserve created pursuant to section 57-0109 of this title.

3. "Long Island Pine Barrens preserve" or "preserve" shall mean lands within the Long Island Pine Barrens Maritime reserve that are critical to the protection of the hydrologic and ecologic integrity of the region

including land characterized by the growth of pitch pine, dwarf pine and/or scrub oak pine barrens which are dedicated for protection and beneficial public use pursuant to section 57-0117 of this title. Lands which are not deemed critical may be dedicated pursuant to section 57-0117 of this title as a protective or buffer zone for other dedicated lands, or to otherwise support the management of the preserve.

4. "Peconic Bay system" shall mean the series of interconnected bodies of surface waters, including Flanders Bay, Great Peconic Bay, Little Peconic Bay, Noyack Bay, Shelter Island Sound, Southold Bay, Northwest Harbor, Orient Harbor, Gardiners Bay, Napeague Bay, Fort Pond Bay, the western portion of Block Island Sound, other semi-enclosed bays and harbors contiguous thereto, and all of the tidal creeks and freshwater streams that discharge into these interconnected basins.

5. "Plan" shall mean the comprehensive management plan created pursuant to section 57-0115 of this title.

6. "Reserve" shall mean a region in which there is a combination of publicly and privately owned lands and land uses, within a defined area where there are traditional cultural patterns including agriculture, finfishing, shellfishing and tourism, which due to their pattern and configuration, and because of the need for sustained productivity could best be protected and managed through the development of a comprehensive management plan around a preserve of protected, publicly owned lands and/or privately owned land dedicated for such purposes.

7. "Land use plan" shall mean the comprehensive Central Pine Barrens land use plan pursuant to section 57-0121 of this title, including the generic environmental impact statement thereon.

8. "Commission" shall mean the Central Pine Barrens Joint Planning and Policy Commission established pursuant to section 57-0119 of this title.

9. "Advisory committee" shall mean the Central Pine Barrens advisory committee to the commission established pursuant to subdivision nine of section 57-0119 of this title.

* 10. "Central Pine Barrens area" shall mean the contiguous area as described and bounded as follows:

Beginning at a point where the southerly side of Route 25A intersects the easterly side of Miller Place Road; thence southward along the easterly boundary of Miller Place Road to Helme Avenue; thence southward along the easterly boundary of Helme Avenue to Miller Place-Middle Island Road; thence southward along the easterly boundary of Miller Place-Middle Island Road to Whiskey Road; thence westward along the southerly boundary of Whiskey Road to Mount Sinai-Coram Road; thence southward along the easterly boundary of Mount Sinai-Coram Road to Middle Country Road (Route 25); thence westward along the southerly boundary of Route 25 to Patchogue-Mount Sinai Road (County Route 83); thence southward along the easterly boundary of County Route 83 to Bicycle Path Drive; thence southeastward along the easterly side of Bicycle Path Drive to Mt. McKinley Avenue; thence southward along the easterly boundary of Mt. McKinley Avenue to Granny Road; thence northeastward along the northerly boundary of Granny Road to Port Jefferson-Patchogue Road (Route 112); thence southward along the easterly boundary of Route 112 to Horse Block Road (County Route 16); thence eastward along the northerly boundary of County Route 16 to Maine Avenue; thence northward along the westerly boundary of Maine Avenue to Fire Avenue; thence eastward along the northerly boundary of Fire Avenue to John Roe Smith Avenue; thence southward along the easterly boundary of John Roe Smith Avenue to Jeff Street; thence eastward along the northerly boundary of Jeff Street to Hagerman Avenue; thence southward along the easterly boundary of Hagerman Avenue to the Long Island Expressway (Route 495); thence eastward along the northerly boundary of Route 495 to the westerly side of Yaphank Avenue (County Road 21); thence southward along the westerly side of Yaphank Avenue to the south side of the Long Island Expressway (Route 495); thence eastward along the southerly side of the Long Island Expressway (Route 495) to the easterly side of Yaphank Avenue; thence southward along the easterly side of Yaphank Avenue, crossing Sunrise Highway (Route 27) to the south side of Montauk Highway (County Road 80); thence southwestward along the south side of Montauk Highway (County Road 80) to South Country Road; thence southward along the easterly side of South Country Road to

Fireplace Neck Road; thence southward along the easterly side of Fireplace Neck Road to Beaver Dam Road; thence eastward along the northerly side of Beaver Dam Road to the westerly boundary of the Carmans River and the lands owned by the United States known as Wertheim National Wildlife Refuge (the "Refuge"); thence generally westerly and southerly to the waters of Bellport Bay; thence generally easterly across the Bay and northerly along the easterly boundary of the Refuge, including all lands currently part of the Refuge and any lands which may become part of the Refuge in the future, to the east side of the southern terminus of Smith Road; thence northward along the easterly side of Smith Road to the southwesterly corner of the property identified as District 200, Section 974.50, Block 1, Lot 11; thence eastward, northward and westward in a counter-clockwise direction along the southern, eastern and northern boundaries of that property to the easterly side of Smith Road; thence northward along the east side of Smith Road to Merrick Road; thence northeasterly along the northerly side of Merrick Road to the easterly side of Surrey Circle and the southwest corner of the property identified as District 200, Section 880, Block 3, Lot 58.1; running thence easterly along the southerly side of said lot to the west side of William Floyd Parkway (County Road 46); thence northerly along the westerly side of William Floyd Parkway (County Road 46), crossing Route 27, to the Long Island Railroad (LIRR); thence eastward along the northerly boundary of the Long Island Rail Road tracks 7,500 feet; thence southward 500 feet; thence eastward 525 feet to the intersection of North Street and Manor-Yaphank Road; thence southward along the easterly boundary of Manor-Yaphank Road to Moriches-Middle Island Road; thence eastward along the northerly boundary of Moriches-Middle Island Road to a point due north of the easterly boundary of Cranford Boulevard; thence southward across Moriches-Middle Island Road and along the easterly boundary of Cranford Boulevard to the south-western corner of the property identified as District 200, Section 645, Block 3, Lot 29.1; thence southeastward along the southerly boundary of said property to its intersection with property identified as District 200, Section 712, Block 9, Lot 1; thence generally southward along the westerly boundary of said property to its intersection with the northerly side of the eastward extension of Grove Drive, known as Grove Street; thence southward crossing Grove Street to

its south side; thence westward along the southerly boundary of the Grove Street road extension to the northwestern corner of the property identified as District 200, Section 749, Block 3, Lot 41.1; and comprised of parcels owned by the county of Suffolk and the town of Brookhaven; thence southward to the southwestern corner of property identified as District 200, Section 749, Block 3, Lot 43; thence eastward along the southerly boundary of said property to the west side of Lambert Avenue; thence crossing Lambert Avenue to its easterly side; thence southward along the easterly boundary of Lambert Avenue to the northerly boundary of the Sunrise Highway Service Road; thence northeastward along the northerly boundary of the Sunrise Highway Service Road to Barnes Road; thence northward along the westerly boundary of Barnes Road to the northeastern corner of property identified as District 200, Section 750, Block 3, Lot 40.2; thence westward along the northerly boundary of said property to the property identified as District 200, Section 713, Block 1, Lot 2; thence westward along the northerly boundary of property identified as District 200, Section 713, Block 1, Lot 2 and District 200, Section 713, Block 1, Lot 1; thence northward along the westerly side of Weeks Avenue to the northeastern corner of property identified as District 200, Section 713, Block 3, Lot 1; thence westward along the northerly boundary of said property to Michigan Avenue; thence northward along the easterly boundary of Michigan Ave to Moriches-Middle Island Road; thence across Moriches-Middle Island Road to its north side; thence eastward along the northerly boundary of Moriches-Middle Island Road to Sunrise Highway (Route 27); thence eastward along the northerly boundary of Route 27 to an old railroad grade (unpaved); thence southeastward along the northerly boundary of the old railroad grade (unpaved) to Old County Road (Route 71); thence eastward along the northerly boundary of Route 71 to the Long Island Rail Road tracks; thence eastward along the northerly boundary of the Long Island Rail Road tracks to Montauk Highway; thence eastward along the northerly boundary of Montauk Highway to Route 24; thence northward along the westerly boundary of Route 24 to Sunrise Highway (Route 27); thence eastward along the northerly boundary of Route 27 to Squiretown Road; thence northward along the westerly boundary of Squiretown Road to Upper Red Creek Road; thence westward along the southern boundary of Upper Red Creek to Lower Red Creek Road;

thence southward along the easterly boundary of Lower Red Creek Road to Hubbard County Park; thence westward along the northern boundary of Hubbard County Park to Riverhead-Hampton Bays Road (Route 24); thence westward along the southerly boundary of Route 24 to Peconic Avenue; thence northward along the westerly boundary of Peconic Avenue to the Riverhead-Southampton border; thence westward along the Riverhead-Southampton border and the Riverhead-Brookhaven border to the Forge Road Bridge; thence northward along the westerly boundary of the Forge Road Bridge to Forge Road; thence northwestward along the westerly boundary of Forge Road to the railroad tracks; thence northward along the westerly boundary of Forge Road (unpaved) to the intersection of Route 25 and River Road; thence westward along the southerly boundary of River Road to Edwards Avenue; thence northward along the westerly boundary of Edwards Avenue 3,800 feet; thence westward 4,400 feet to an unnamed, unpaved road; thence northward along the westerly boundary of the unnamed, unpaved road 150 feet; thence westward and northwestward along the eastern boundary of the United States Navy/Grumman Aerospace Corporation property (as of 1982) up to its intersection with Middle Country Road (Route 25); thence westward along the southerly boundary of Route 25 to the intersection of Route 25 and 25A; thence northeastward, westward, and southwestward along the eastern and northern boundary of the United States Navy/Grumman Aerospace Corporation (as of 1982) and located immediately east of Route 25A, to its intersection with Route 25A; thence westward along the southerly boundary of Route 25A to a point due south of the southeast corner of the parcel identified as District 200, Section 128, Block 1, lot 3.1; thence northward across Route 25A to its northerly side at the southeast corner of parcel identified as District 200, Section 128, Block 1, Lot 3.1; thence northward along the easterly side of the property identified as District 200, Section 128, Block 1, lot 3.1 to its intersection with the southerly boundary of District 200, Section 128, Block 1, Lot 1; thence eastward, northward and westward along the southerly, easterly and northerly sides of the parcel identified as District 200, section 128, Block 1, lot 1 to the southeast corner of the parcel identified as District 200, Section 82, Block 1, Lot 5.2; thence northward along the east side of this parcel to its intersection with the south side of North Country Road; thence northward crossing North Country Road to its

northerly side; thence eastward along the northerly side of North Country Road to the Brookhaven Town-Riverhead Town line; thence in a generally northwestward direction along said town line to a point in Wading River Creek with the coordinates 40.96225 latitude and -72.863633 longitude; thence westward a distance of approximately 90 feet to the easterly side of LILCO Road; thence southward along LILCO Road to its intersection with the north side of North Country Road; thence westward along the north side of North Country Road to the southeast corner of the parcel identified as District 200, Section 39, Block 1, Lot 2; thence in a northward and westward direction along the easterly and northerly sides of said parcel to its northwest corner; thence northward along the westerly boundary of the parcel identified as District 200, Section 83, Block 1, Lot 1.4 to its northwest corner; and the southerly shoreline of Long Island Sound thence westward along the northerly side of the parcel identified as District 200, Section 39, Block 1, Lot 1.2 and the southerly extent of Long Island Sound to the northwest corner of the property identified as District 200, Section 39, Block 1, Lot 1.2; thence southward along the westerly boundary of said property to North Country Road; thence southward crossing North Country Road to its southerly side; thence west along the southerly boundary of North Country Road to the northwestern corner of property identified as District 200, Section 82, Block 1, Lot 1.1; thence south along the westerly boundary of said property and the westerly boundary of the property identified as District 200, Section 82, Block 1, Lot 1.2 to the northwest corner of property identified as District 200, Section 82, Block 1, Lot 5.1; thence southward along the westerly boundary of said property and along the easterly boundary of property identified as District 200, Section 81, Block 1, Lot 14.8 and along the easterly boundary of property identified as District 200, Section 105, Block 3, Lot 1 to the northeast corner of the property identified as District 200, Section 105, Block 3, Lot 5; thence southward along the easterly boundary of said property to the north side of Route 25A; thence southward crossing Route 25A to its south side; thence westward along the southerly boundary of Route 25A to the point or place of beginning, and excluding three distinct areas described as follows: The first area defined as beginning at a point where the westerly side of William Floyd Parkway (County Road 46) meets northerly side of the Long Island

Railroad (LIRR); thence westward along the northerly side of the LIRR to Moriches-Middle Island Road; thence generally northwestward along the northerly side of Moriches-Middle Island Road to the southerly side of Long Island Expressway (Route 495); thence eastward along the southerly side of the Long Island Expressway (Route 495) to the westerly side of William Floyd Parkway (County Road 46); thence southward along the westerly side of William Floyd Parkway (County Road 46) and containing the subdivision known as RB Industrial Park, to the point or place of beginning and the second area defined as the property described as District 200, Section 39, Block 1, Lot 1.1 and the third area defined as all parcels of real property identified as follows:

district 200, section 749, block 6, lot 24;

district 200, section 749, block 6, lot 25;

district 200, section 750, block 2, lot 27.1;

district 200, section 749, block 6, lot 14;

district 200, section 713, block 1, lot 2;

district 200, section 750, block 2, lot 38;

district 200, section 750, block 2, lot 39;

district 200, section 749, block 6, lot 26;

district 200, section 749, block 6, lot 22;

district 200, section 713, block 3, lot 2.3;

district 200, section 713, block 3, lot 2.1;

district 200, section 786, block 3, lot 13;

district 200, section 786, block 3, lot 14.2;

district 200, section 750, block 2, lot 8;

district 200, section 749, block 6, lot 13;

district 200, section 749, block 6, lot 20.2;

district 200, section 786, block 3, lot 7;

district 200, section 749, block 6, lot 23.1;

district 200, section 749, block 6, lot 20.1;

district 200, section 674, block 1, lot 39;

district 200, section 749, block 3, lot 15;

district 200, section 712, block 9, lot 1;

district 200, section 674, block 1, lot 38;

district 200, section 750, block 3, lot 40.1;

district 200, section 749, block 6, lot 21;

district 200, section 674, block 1, lot 35;

district 200, section 786, block 3, lot 1.1;

district 200, section 749, block 3, lot 43;

district 200, section 750, block 3, lot 19.1;

district 200, section 750, block 3, lot 19.2;

district 200, section 750, block 3, lot 19.3;

district 200, section 750, block 3, lot 19.4;
district 200, section 750, block 3, lot 19.5;
district 200, section 750, block 3, lot 19.6;
district 200, section 750, block 3, lot 19.7;
district 200, section 750, block 2, lot 7.1;
district 200, section 750, block 2, lot 7.2;
district 200, section 750, block 2, lot 37;
district 200, section 713, block 1, lot 1;
district 200, section 786, block 3, lot 3;
district 200, section 786, block 3, lot 4;
district 200, section 786, block 3, lot 6;
district 200, section 786, block 3, lot 1.2;
district 200, section 786, block 3, lot 8;
district 200, section 750, block 3, lot 25.1;
district 200, section 750, block 3, lot 26.1;
district 200, section 750, block 3, lot 39.1;
district 200, section 750, block 3, lot 6.1;
district 200, section 750, block 2, lot 24;
district 200, section 750, block 2, lot 35;

district 200, section 750, block 2, lot 36.1;

district 200, section 750, block 3, lot 42.1;

district 200, section 750, block 3, lot 5.1;

district 200, section 749, block 7, lot 15;

district 200, section 749, block 7, lot 16;

district 200, section 786, block 3, lot 9;

district 200, section 750, block 3, lot 37.1;

district 200, section 749, block 6, lot 10;

district 200, section 749, block 6, lot 7;

district 200, section 786, block 3, lot 14.1;

district 200, section 749, block 6, lot 23.2;

district 200, section 749, block 6, lot 11;

district 200, section 749, block 6, lot 5;

district 200, section 750, block 2, lot 21.1;

district 200, section 750, block 3, lot 35.1;

district 200, section 750, block 3, lot 35.2;

district 200, section 749, block 6, lot 9;

district 200, section 749, block 7, lot 18.1;

district 200, section 750, block 2, lot 20;

district 200, section 750, block 2, lot 22.1;

district 200, section 750, block 2, lot 25.2;

district 200, section 750, block 2, lot 25.1;

district 200, section 750, block 2, lot 33;

district 200, section 750, block 3, lot 40.2;

district 200, section 750, block 2, lot 23.1;

district 200, section 750, block 2, lot 34;

district 200, section 750, block 3, lot 41.1;

district 200, section 750, block 2, lot 18;

district 200, section 749, block 7, lot 14;

district 200, section 749, block 7, lot 43;

district 200, section 749, block 6, lot 4.4;

district 200, section 749, block 6, lot 12.3.

* NB Effective until ... (see 58/2018 Pt. CC § 5 for expiration provisions)

* 10. "Central Pine Barrens area" shall mean the contiguous area as described and bounded as follows:

Beginning at a point where the southerly side of Route 25A intersects the easterly side of Miller Place Road; thence southward along the easterly boundary of Miller Place Road to Helme Avenue; thence southward along the easterly boundary of Helme Avenue to Miller Place-Middle Island Road; thence southward along the easterly boundary of Miller

Place-Middle Island Road to Whiskey Road; thence westward along the southerly boundary of Whiskey Road to Mount Sinai-Coram Road; thence southward along the easterly boundary of Mount Sinai-Coram Road to Middle Country Road (Route 25); thence westward along the southerly boundary of Route 25 to Patchogue-Mount Sinai Road (County Route 83); thence southward along the easterly boundary of County Route 83 to Bicycle Path Drive; thence southeastward along the easterly side of Bicycle Path Drive to Mt. McKinley Avenue; thence southward along the easterly boundary of Mt. McKinley Avenue to Granny Road; thence northeastward along the northerly boundary of Granny Road to Port Jefferson-Patchogue Road (Route 112); thence southward along the easterly boundary of Route 112 to Horse Block Road (County Route 16); thence eastward along the northerly boundary of County Route 16 to Maine Avenue; thence northward along the westerly boundary of Maine Avenue to Fire Avenue; thence eastward along the northerly boundary of Fire Avenue to John Roe Smith Avenue; thence southward along the easterly boundary of John Roe Smith Avenue to Jeff Street; thence eastward along the northerly boundary of Jeff Street to Hagerman Avenue; thence southward along the easterly boundary of Hagerman Avenue to the Long Island Expressway (Route 495); thence eastward along the northerly boundary of Route 495 to the westerly side of Yaphank Avenue (County Road 21); thence southward along the westerly side of Yaphank Avenue to the south side of the Long Island Expressway (Route 495); thence eastward along the southerly side of the Long Island Expressway (Route 495) to the easterly side of Yaphank Avenue; thence southward along the easterly side of Yaphank Avenue, crossing Sunrise Highway (Route 27) to the south side of Montauk Highway (County Road 80); thence southwestward along the south side of Montauk Highway (County Road 80) to South Country Road; thence southward along the easterly side of South Country Road to Fireplace Neck Road; thence southward along the easterly side of Fireplace Neck Road to Beaver Dam Road; thence eastward along the northerly side of Beaver Dam Road to the westerly boundary of the Carmans River and the lands owned by the United States known as Wertheim National Wildlife Refuge (the "Refuge"); thence generally westerly and southerly to the waters of Bellport Bay; thence generally easterly across the Bay and northerly along the easterly boundary of the Refuge, including all lands currently part of the Refuge and any lands which may

become part of the Refuge in the future, to the east side of the southern terminus of Smith Road; thence northward along the easterly side of Smith Road to the southwesterly corner of the property identified as District 200, Section 974.50, Block 1, Lot 11; thence eastward, northward and westward in a counter-clockwise direction along the southern, eastern and northern boundaries of that property to the easterly side of Smith Road; thence northward along the east side of Smith Road to Merrick Road; thence northeasterly along the northerly side of Merrick Road to the easterly side of Surrey Circle and the southwest corner of the property identified as District 200, Section 880, Block 3, Lot 58.1; running thence easterly along the southerly side of said lot to the west side of William Floyd Parkway (County Road 46); thence northerly along the westerly side of William Floyd Parkway (County Road 46), crossing Route 27, to the Long Island Railroad (LIRR); thence eastward along the northerly boundary of the Long Island Rail Road tracks 7,500 feet; thence southward 500 feet; thence eastward 525 feet to the intersection of North Street and Manor-Yaphank Road; thence southward along the easterly boundary of Manor-Yaphank Road to Moriches-Middle Island Road; thence eastward along the northerly boundary of Moriches-Middle Island Road to Sunrise Highway (Route 27); thence eastward along the northerly boundary of Route 27 to an old railroad grade (unpaved); thence southeastward along the northerly boundary of the old railroad grade (unpaved) to Old County Road (Route 71); thence eastward along the northerly boundary of Route 71 to the Long Island Rail Road tracks; thence eastward along the northerly boundary of the Long Island Rail Road tracks to Montauk Highway; thence eastward along the northerly boundary of Montauk Highway to Route 24; thence northward along the westerly boundary of Route 24 to Sunrise Highway (Route 27); thence eastward along the northerly boundary of Route 27 to Squiretown Road; thence northward along the westerly boundary of Squiretown Road to Upper Red Creek Road; thence westward along the southern boundary of Upper Red Creek to Lower Red Creek Road; thence southward along the easterly boundary of Lower Red Creek Road to Hubbard County Park; thence westward along the northern boundary of Hubbard County Park to Riverhead-Hampton Bays Road (Route 24); thence westward along the southerly boundary of Route 24 to Peconic Avenue; thence northward along the westerly boundary of Peconic Avenue to the

Riverhead-Southampton border; thence westward along the Riverhead-Southampton border and the Riverhead-Brookhaven border to the Forge Road Bridge; thence northward along the westerly boundary of the Forge Road Bridge to Forge Road; thence northwestward along the westerly boundary of Forge Road to the railroad tracks; thence northward along the westerly boundary of Forge Road (unpaved) to the intersection of Route 25 and River Road; thence westward along the southerly boundary of River Road to Edwards Avenue; thence northward along the westerly boundary of Edwards Avenue 3,800 feet; thence westward 4,400 feet to an unnamed, unpaved road; thence northward along the westerly boundary of the unnamed, unpaved road 150 feet; thence westward and northwestward along the eastern boundary of the United States Navy/Grumman Aerospace Corporation property (as of 1982) up to its intersection with Middle Country Road (Route 25); thence westward along the southerly boundary of Route 25 to the intersection of Route 25 and 25A; thence northeastward, westward, and southwestward along the eastern and northern boundary of the United States Navy/Grumman Aerospace Corporation (as of 1982) and located immediately east of Route 25A, to its intersection with Route 25A; thence westward along the southerly boundary of Route 25A to the point or place of beginning, and excluding one distinct area described as follows: The area defined as beginning at a point where the westerly side of William Floyd Parkway (County Road 46) meets northerly side of the Long Island Railroad (LIRR); thence westward along the northerly side of the LIRR to Moriches-Middle Island Road; thence generally northwestward along the northerly side of Moriches-Middle Island Road to the southerly side of Long Island Expressway (Route 495); thence eastward along the southerly side of the Long Island Expressway (Route 495) to the westerly side of William Floyd Parkway (County Road 46); thence southward along the westerly side of William Floyd Parkway (County Road 46) and containing the subdivision known as RB Industrial Park, to the point or place of beginning.

* NB Effective ... (see 58/2018 Pt. CC § 5 for expiration provisions)

* 11. "Core preservation area" shall mean the core preservation area of the Central Pine Barrens area which comprise the largest intact areas of undeveloped pine barrens as described and bounded as follows:

Beginning at a point where the northwestern corner of the New York

State Rocky Point Natural Resource Management Area (the "NYS Rocky Point Land") intersects the southerly side of NYS Route 25A; thence generally southward and eastward along the generally westerly and southerly boundaries of the NYS Rocky Point Land (including the Currans Road Pond State Wildlife Management Area, all adjacent or contiguous undeveloped Town of Brookhaven parks, preserves, open space areas, or reserved areas, and the crossings of the undeveloped Suffolk County property known as the Port Jefferson - Westhampton road right of way, Whiskey Road, County Route 21, and Currans Road), and including those properties identified as District 200, Section 346, Block 1, Lots 3 and 4, to the point where the NYS Rocky Point Land meets the northerly side of NYS Route 25 (Middle Country Road); thence eastward along the northerly boundary of NYS Route 25 to the southeastern corner of that property west of Woodlots Road which is identified as District 200, Section 349, Block 2, Lot 1.3; thence northward along the easterly boundary of that property to the Suffolk County Pine Trail Nature Preserve; thence eastward and southeastward along the southerly boundary of the Suffolk County Pine Trail Nature Preserve where the Preserve is adjacent to developed parcels or parcels in agricultural or horticultural use, or along a line parallel to, and 100 (one hundred) feet south of, the Preserve where the Preserve is adjacent to parcels which are undeveloped as of June 1, 1993, to County Route 46; thence southward along the easterly boundary of County Route 46 to NYS Route 25; thence eastward along the southerly boundary of NYS Route 25 to the Suffolk County Pine Trail Nature Preserve; thence southward along the westerly boundary of the Suffolk County Pine Trail Nature Preserve where the Preserve is adjacent to developed parcels, or along a line parallel to, and 100 (one hundred) feet west of, the Preserve where the Preserve is adjacent to parcels which are undeveloped as of June 1, 1993, to the northern boundary of the United States land known as Brookhaven National Laboratory; thence generally westward along the northerly boundary of Brookhaven National Laboratory to County Route 46 (William Floyd Parkway); thence generally northwestward on a straight line to the intersection of Sally Lane and Pond Lane; thence westward along the southerly side of Pond Lane to Ruth Lane; thence northward along the westerly side of Ruth Lane to NYS Route 25; thence westward along the northerly side of NYS Route 25 to the southeast corner of the NYS Middle

Island State Game Farm and Environmental Education Center; thence northward, westward, and southward along the easterly, northerly, and westerly boundaries of the NYS Middle Island State Game Farm and Environmental Education Center to NYS Route 25; thence westward along the southerly side of NYS Route 25, excluding all parcels abutting that road which are developed as of June 1, 1993, to Giant Oak Road; thence southward along the easterly side of Giant Oak Road to Medford Road; thence southwestward along the southeasterly side of Medford Road crossing to the west side of Smith Road; thence southerly along the westerly side of Smith Road to the southeast corner of District 200, Section 406, Block 1, Lot 6; thence westward and northward along the southerly and westerly sides of said parcel to the southerly side of the developed lands known as Strathmore Ridge; thence westward, northward and eastward along the southerly, westerly and northerly sides of the developed lands known as Strathmore Ridge to the westerly side of Smith Road; thence northerly along the westerly side of Smith Road to the southerly side of NYS Route 25; thence westerly along the southerly side of NYS Route 25, to the northwestern corner of that property which is identified as District 200, Section 406, Block 1, Lot 4.3; thence southerly along the westerly boundary of that property and continuing southward along the westerly sides of the properties identified as District 200, Section 406, Block 1, Lot 4.6; District 200, Section 406, Block 1, Lot 4.4 and District 200, Section 504, Block 1, Lot 2 to the southerly side of Longwood Road; thence eastward along the southerly side of Longwood Road to the northwest corner of the property identified as District 200, Section 504, Block 1, Lot 7.2; thence southward and westward along the generally westerly boundary of that parcel to the eastern end of Rugby Lane (also known as Rugby Avenue or Rugby Road), a paper street shown on Suffolk County tax maps District 200, Sections 500, 502, and 503; thence westward along the northerly boundary of Rugby Lane, across County Route 21, to the westerly boundary of County Route 21 (Yaphank - Middle Island Road); thence southward along the westerly boundary of County Route 21 to the northeastern corner of the parcel identified as District 200, Section 529, Block 1, Lot 28, and which is coterminous with the southerly boundaries of the parcels located on the south side of Rustic Lane; thence westward along the northerly boundary of that parcel to the southwest corner of the parcel identified as

District 200, Section 528, Block 5, Lot 2; thence northward along a portion of the easterly boundary of the Carmans River, which comprises the easterly boundary of the parcel identified as District 200, Section 528, Block 5, Lot 1, to its intersection with the southern boundary of the Suffolk County Nature Preserve parcel identified as District 200, Section 500, Block 1, Lot 1.4; thence eastward along the southern boundary of that parcel to the southeast corner of that parcel; thence northward along the easterly boundary of that Suffolk County Nature Preserve parcel to the southeast corner of the Suffolk County Nature Preserve parcel identified as District 200, Section 500, Block 1, Lot 3.1, thence generally northward along the easterly boundary of that parcel to the north side of East Bartlett Road; thence easterly along the north side of East Bartlett Road to the east side of County Road 21; thence southerly along the east side of County Road 21 to the southwest corner of District 200, Section 501, Block 1, Lot 2.1; thence easterly and northerly along the southern and eastern sides of that property and northward along the easterly side of District 0200, 50100, Block 0100, Lot 002002 and across to the north side of Longwood Road; thence westerly along the north side of Longwood Road to the southeast corner of District 200, Section 482, Block 1, Lot 3.1; thence northward and eastward along the easterly and southerly boundaries of that parcel to the northwest corner of the parcel identified as District 200, Section 483, Block 2, Lot 1.4; thence eastward along the southerly property boundary of the parcel identified as District 200, Section 482, Block 1, Lot 4 to the southeast corner of that parcel; thence northward along the easterly boundary of that parcel to the northeast corner of that parcel; thence eastward and northward along the southerly and easterly boundaries of the parcel identified as District 200, Section 456, Block 2, Lot 4 to the northeast corner of that parcel; thence generally northerly and westerly along the easterly and northerly boundary of Prosser Pines County Nature Preserve to County Road 21; thence westward (directly across County Route 21) along the southerly boundary of the property identified as District 200, Section 434, Block 1, Lot 12.1, to the southwest corner of the property identified as District 200, Section 434, Block 1, Lot 14.3, adjacent to the eastern side of Cathedral Pines County Park; thence northward along the eastern boundary of Cathedral Pines County Park to the southeast corner of the property identified as

District 200, Section 402, Block 1, Lot 23.1, thence continuing northward along the easterly boundary of that property to the southerly side of Lafayette Road; thence westward along the southerly side of Lafayette Road to the eastern boundary of the property identified as District 200, Section 402, Block 1, Lot 24.7; thence generally in a counter-clockwise direction along the easterly, northerly, westerly and northerly boundaries of that property to the easterly boundary of the parcel identified as District 200, Section 402, Block 1, Lot 19.2; thence northerly along the easterly side of said lot to the southeast corner of the property identified as District 200, Section 402, Block 1, Lot 20, thence westward and northward along the southerly and westerly sides of that property to the southerly side of NYS Route 25; thence westward along the southerly boundary of NYS Route 25 to the northwestern corner of the parcel identified as District 200, Section 402, Block 1, Lot 16.4; thence generally southward along the westerly boundary of that parcel to the northerly boundary of the parcel identified as District 200, Section 454, Block 1, Lot 9.1; thence westward along the northerly boundary of that parcel to East Bartlett Road; thence southward along the easterly boundary of East Bartlett Road to its intersection with Ashton Road; thence westward to the northeastern corner of the old filed map shown on District 200, Section 499; thence westward and southward along the northerly and westerly boundaries of the old filed map shown on Suffolk County tax maps District 200, Sections 498, 499, and 527 to Hillcrest Road; thence eastward along the southerly boundary of Hillcrest Road to Ashton Road; thence southward along the easterly side of Ashton Road to Granny Road; thence eastward along the southerly side of Granny Road to the northwesterly corner of District 200, Section 547, Block 1, Lot 18.1; thence generally southward, westward, southward, eastward and northward in a counter-clockwise direction along the western, northern, southern and eastern boundaries of said parcel to the southeast corner of the parcel identified as District 200, Section 548, Block 1, Lot 3; thence northward along the easterly boundary of that parcel to its northeast corner; thence generally northward, northeastward and eastward along the westerly, northwesterly and northerly sides of German Boulevard to its intersection with the northeasterly side of Lakeview Boulevard; thence southeastward along the northeasterly side of Lakeview Boulevard to the

westerly boundary of the parcel identified as District 200, Section 611, Block 1, Lot 5; thence northward along the westerly boundary of that parcel to its northwest corner; thence southward along the westerly boundary of the parcel identified as District 200, Section 579, Block 3, Lot 1, comprising part of the western bank of the Carmans River also known as Upper Lake, to the northerly side of Mill Road, also known as County Route 101; thence eastward along the northerly side of Mill Road to the northeast corner of the parcel identified as District 200, Section 579, Block 3, Lot 19; thence westerly along the northerly boundary of that parcel to the eastern boundary of the parcel identified as District 200, Section 579, Block 3, Lot 1; thence northward along the easterly side of that parcel, comprising part of the eastern bank of the Carmans River also known as Upper Lake, to the southwest corner of the parcel identified as District 200, Section 548, Block 2, Lot 5.1; thence eastward along the southern boundary of that parcel to its southeast corner; thence eastward across County Route 21 to its easterly side; thence northward along the easterly boundary of County Route 21 to the southwest corner of the Suffolk County Nature Preserve parcel known as Warbler Woods and identified as District 200, Section 551, Block 1, Lot 4; thence generally eastward along the southerly boundary of the Warbler Woods parcel and then southward along the westerly boundary of an extension of that parcel's southerly boundary to the southeast corner of the southern terminus of Harold Road; thence generally westward, southward and westward in a counter-clockwise direction along the northerly, westerly, northerly and westerly boundaries of the Suffolk County Nature Preserve parcel known as Fox Lair, and identified as District 200, Section 580, Block 3, Lot 24.2, to the northwest corner of the parcel Suffolk County Water Authority parcel identified as District 200, Section 580, Block 3, Lot 24.6; thence southward, eastward and southward along the westerly boundary and southerly boundaries of that Suffolk County Water Authority parcel to Main Street; thence eastward along the north side of Main Street to the southeast corner of said Suffolk County Water Authority parcel to its southeast corner; thence northward along the easterly boundary of that parcel to the southwest property boundary of the Suffolk County Nature Preserve parcel known as Fox Lair and identified as District 200, Section 580, Block 3, Lot 24.2, thence generally eastward, southward, eastward, northward and eastward

along the southerly boundaries of said parcel and eastward along the southerly boundary of the Suffolk County Nature Preserve parcel identified as District 200, Section 583, Block 1, Lot 4.1, to the west side of the unimproved north-south oriented road known variously as Smith Road, Longwood Road and Private Road; thence southward along the westerly boundary of Smith Road to the north side of the Long Island Expressway; thence westward along the northerly boundary of the Long Island Expressway to the south side of Main Street in Yaphank; thence westward along the southerly boundary of Main Street in Yaphank to the westernmost extent along Main Street of the Southaven County Park boundary; thence westward across County Road 21 to the western boundary of the County Road 21 right-of-way; thence southward along the western boundary of the County Road 21 right-of-way to the northerly side of the parcel identified as District 200, Section 611, Block 3, Lot 16, comprising the northerly bank of the Carmans River known as Lower Lake; thence westward along the northerly side of that property to the southwest corner of the parcel identified as District 200, Section 612, Block 4, Lot 1; thence northward along the westerly boundary of that parcel to the southerly side of County Route 21 known as Main Street; thence westward along the southerly side of County Route 21 known as Main Street to the northeast corner of the parcel identified as District 200, Section 612, Block 2, Lot 12; thence southward along the easterly boundary of that parcel to the southeast corner of the parcel identified as District 200, Section 612, Block 2, Lot 11; thence westward and northwestward along the northerly and northeasterly boundaries of the Town of Brookhaven parcel identified as District 200, Section 611, Block 3, Lot 9 to the south side of Mill Road, also known as County Road 101; thence generally westward and southward along the southerly side of Mill Road and continuing southward along the eastern side of Patchogue-Yaphank Road, also known as County Road 101, to the southerly side of Gerard Road; thence eastward along the southerly side of Gerard Road to its westerly boundary known as the map of Grand Heights, filed in the offices of the Suffolk County clerk; thence southward along the westerly map line of the filed map known as Grand Heights to the north side of the Long Island Expressway NYS Route 495; thence easterly along the northerly side of the Long Island Expressway NYS Route 495 to the westerly side of County Route 21 known as Yaphank Avenue; thence

southward along the westerly side of Yaphank Avenue to the south side of the Long Island Expressway; thence eastward along the south side of the Long Island Expressway to the westerly boundary of Southaven County Park, thence generally southward along the westerly boundary of Southaven County Park to the northeast corner of the lands of Suffolk County identified as District 200, Section 665, Block 2, Lot 1; thence generally southward along the easterly boundary of said lot, crossing the LIRR and Park Street and continuing southward along the westerly boundary of Davenport Avenue as shown on the old filed map known as Bellhaven Terrace; thence southward and eastward along the westerly and southerly boundaries of the parcel identified as District 200, Section 744, Block 1, Lot 10 to the westerly boundary of the parcel identified as District 200, Section 781, Block 1, Lot 3.1; thence continuing southerly along the westerly boundary of that parcel to the easterly boundary of Gerard Road; thence southward along the easterly boundary of Gerard Road to Victory Avenue; thence eastward along the northerly boundary of Victory Avenue to a point where the west bank of the Carmans River passes under Victory Avenue and Route 27; thence south under Route 27 to the southerly side of Montauk Highway also known as County Road 80; thence westward along the southerly side of Montauk Highway County Road 80, including lands owned by the United States known as Wertheim National Wildlife Refuge (the "Refuge"), to the eastern side of Old Stump Road; thence southward along the easterly side of Old Stump Road to the northerly side of Beaver Dam Road; thence eastward along the northerly side of Beaver Dam Road to the lands owned by the United States known as Wertheim National Wildlife Refuge (the "Refuge"), including the Carmans River; thence generally westerly and southerly to the waters of Bellport Bay; thence generally easterly across the Bay and northerly along the easterly boundary of the Refuge, including all lands currently part of the Refuge and any lands which may become part of the Refuge in the future to the east side of the southern terminus of Smith Road; thence northward along the easterly side of Smith Road to the southwesterly corner of the property identified as District 200, Section 974.50, Block 1, Lot 11; thence eastward, northward and westward in a counter-clockwise direction along the southern, eastern and northern boundaries of that property to the easterly side of Smith Road; thence northward along the easterly side of Smith Road to the northerly side of

Montauk Highway County Road 80; thence northeasterly to the southwesterly corner of the property identified as District 200, Section 849, Block 2, Lot 2; thence eastward along the northerly boundary of Montauk Highway to the southeasterly corner of the property identified as District 200, Section 850, Block 3, Lot 8; thence northward to the northeasterly corner of that parcel, including all lands owned by the United States known as Wertheim National Wildlife Refuge (the "Refuge") at any time between June 1, 1993 and the present, and any lands which may become part of the Refuge in the future; thence northwestward across Sunrise Highway (NYS Route 27) to the southwesterly corner of the property identified as District 200, Section 850, Block 2, Lot 1; thence northward along the westerly boundary of that parcel across to the northerly boundary of Victory Avenue; thence westward along the northerly boundary of Victory Avenue to the westerly boundary of River Road; thence northward along the westerly boundary of River Road to the north side of the Long Island Rail Road right-of-way; thence easterly along the northerly side of the Long Island Rail Road right-of-way to the north side of Moriches-Middle Island Road; thence generally northward and westward along the northerly side of Moriches-Middle Island Road to the northerly side of the Long Island Expressway; thence westward along the northerly boundary of the Long Island Expressway to the southeasterly corner of the Longwood Greenbelt property (the property identified as District 200, Section 583, Block 2, Lot 1.1); thence northward along the easterly boundary of the Longwood Greenbelt property to its northeast corner; thence eastward to the southwesterly corner of the property known as District 200, Section 552, Block 1, Lot 8; thence generally northeastward along the easterly boundary of the property identified as District 200, Section 552, Block 1, Lot 1.7 to the northeasterly corner of that parcel; thence eastward along the southerly boundaries of the parcels identified as District 200, Section 504, Block 1, Lot 8, and District 200, Section 504, Block 1, Lot 11, to the westerly boundary of the William Floyd Parkway (County Route 46); thence northward along the westerly side of County Route 46 to a point 2000 (two thousand) feet south of the southern bank of the Peconic River crossing of County Route 46; thence generally southeastward along a line parallel to, and 2000 (two thousand) feet generally south or southwest of, and parallel to, the southernmost bank of the Peconic River to a

point where the Peconic River crosses the unpaved, unnamed, north-south firebreak and patrol road on the eastern half of the Brookhaven National Laboratory property; thence southward and southwestward along the easterly and southeasterly boundaries of the unpaved, unnamed, north-south firebreak and patrol road starting on the eastern half of the Brookhaven National Laboratory property to the Brookhaven National Laboratory road known as Brookhaven Avenue; thence due westward along a straight line to the Brookhaven National Laboratory road known as Princeton Avenue; thence westward along the southerly boundary of Princeton Avenue to the unnamed Laboratory road which diverts southwest in the vicinity of the Laboratory gate house; thence southwestward along the southerly side of the unnamed Laboratory road just described to County Route 46; thence southward along the easterly side of County Route 46 to NYS Route 495; thence eastward along the northerly boundary of NYS Route 495 to County Route 111; thence southeastward along the northerly boundary of County Route 111 to NYS Route 27 (Sunrise Highway); thence generally southward across NYS Route 27 to the westernmost extent along NYS Route 27 of the undeveloped portion (as of June 1, 1993) of the parcel assemblage comprised of those parcels identified as District 200, Section 594, Block 2, Lot 4 and District 900, Section 325, Block 1, Lot 41.2; thence southward along the westerly boundary of the undeveloped portion (as of June 1, 1993) of that parcel assemblage to County Route 71 (Old Country Road); thence eastward along the northerly boundary of County Route 71 to the southeastern corner of the Suffolk County Nature Preserve lands which run from NYS Route 27 south to County Route 111 and which adjoin the easterly side of the preceding assemblage; thence northward along the easterly boundary of that Suffolk County Nature Preserve assemblage (crossing the County Route 111 right of way) to NYS Route 27; thence eastward along the southerly boundary of NYS Route 27 to the westerly end of 19th Street as shown in the old filed map contained within the tax map identified as District 900, Section 276, Block 2; thence southward along the westerly boundary of that old filed map (shown in District 900, Sections 276, 302, 303, 327, and 328), and coterminous with the westerly side of those parcels along the westerly side of Oishei Road, to County Route 71; thence eastward along the northerly boundary of County Route 71 to the southeasterly corner of the parcel identified as District 900, Section

328, Block 2, Lot 19; thence northward along the easterly boundary of that old filed map surrounding Oishei Road, and coterminous with the easterly side of those parcels along the easterly side of Oishei Road, to a point along that line due west of the northwesterly corner of the parcel containing the Suffolk County facilities identified as District 900, Section 331, Block 1, Lot 1; thence due eastward along a straight line to the northwesterly corner of that parcel; thence eastward along the northerly boundary of that parcel to its northeasterly corner shown in District 900, Section 307; thence due eastward along a straight line to Summit Boulevard; thence southward along the westerly side of Summit Boulevard to County Route 71; thence eastward along the northerly side of County Route 71, excluding all parcels abutting that road which are developed as of June 1, 1993, to the Long Island Rail Road tracks; thence eastward along the northerly boundary of the Long Island Rail Road tracks to County Route 31 (Old Riverhead Road); thence northward along the westerly boundary of County Route 31 to that point opposite the point along the easterly side of County Route 31 (north of the Stewart Avenue intersection) at which the undeveloped portion (as of June 1, 1993) of the Suffolk County Airport (Gabreski Airport) occurs; thence generally northward, eastward and southward around the westerly, northerly and easterly boundaries of the undeveloped portion (as of June 1, 1993) of the airport property (excluding from the Core Preservation Area those portions of the airport property which are occupied by the runways, their associated maintenance areas, and those areas identified for future use in the Suffolk County Airport Master Plan approved by the County Legislature) to the Long Island Rail Road tracks (including in the Core Preservation Area those portions of the airport property which are adjacent to the Quogue Wildlife Refuge's westerly boundary and which are in their natural state); thence eastward along the northerly boundary of the Long Island Rail Road tracks to the southeasterly corner of the Town of Southampton parcel identified as District 902, Section 1, Block 1, Lot 22.1; thence generally northward and eastward along the easterly border of that parcel and the Town of Southampton parcels to the immediate north identified as District 900, Section 313, Block 1, Lot 42.1 and District 900, Section 287, Block 1, Lot 1.55 to County Route 104; thence northward along the westerly boundary of County Route 104 to a point 1000 (one thousand) feet southward of NYS Route 27;

thence eastward along a line parallel to, and 1000 (one thousand) feet south of, NYS Route 27, to the westerly boundary of the parcel identified as District 900, Section 252, Block 1, Lot 1; thence southward along the westerly boundary of that parcel to the Long Island Rail Road tracks; thence eastward along the northerly boundary of the Long Island Rail Road tracks to Montauk Highway; thence eastward along the northerly boundary of Montauk Highway to that point where the boundary of Sears-Bellows County Park heads northward along the eastern side of the Munns Pond portion; thence northward along the easterly boundary of Sears-Bellows County Park, to NYS Route 27; thence eastward along the northerly boundary of NYS Route 27 to NYS Route 24 (Riverhead - Hampton Bays Road); thence generally northwestward and westward along the southwesterly boundary of NYS Route 24 to the easternmost extent along NYS Route 24 of the Suffolk County Parkland known as Flanders or Hubbard County Park; thence generally northward, westward, and southward along the easterly, northerly, and westerly boundaries of Flanders or Hubbard County Park, including all adjacent or contiguous undeveloped Town of Southampton parks, preserves, open space areas, or reserved areas, to NYS Route 24; thence westward along the southerly boundary of NYS Route 24 to Pleasure Drive; thence southward along the easterly boundary of Pleasure Drive a distance of 2000 (two thousand) feet, excluding all parcels abutting that road which are developed as of June 1, 1993; thence generally westward along a straight line to the southernmost extent of the NYS David Sarnoff Preserve along the westerly boundaries of the parcels on the westerly side of Brookhaven Avenue; thence generally northward and westward along the easterly and northerly boundary of the NYS David Sarnoff Pine Barrens Preserve, crossing County Routes 105 and 104, to County Route 63 (Riverhead-Moriches Road); thence generally westward and northward along the northerly boundary of the Suffolk County Cranberry Bog County Nature Preserve to County Route 51; thence southwesterly along the westerly side of County Route 51 to the boundary of the Cranberry Bog County Nature Preserve; thence westward and northward along the northeasterly boundary of Cranberry Bog County Nature Preserve to County Route 94 (also known as NYS Route 24, or Nugent Drive); thence eastward along the northerly side of County Route 94 to the County Route 94A bridge; thence northward along the westerly side of the County Route 94A bridge to the Riverhead-Southampton border;

thence westward along the Riverhead-Southampton border, and the Riverhead-Brookhaven Border, to the Forge Road Bridge; thence northward along the westerly boundary of the Forge Road Bridge to Forge Road; thence northwestward along the westerly boundary of Forge Road to the Long Island Rail Road tracks; thence northward along the westerly boundary of Forge Road (unpaved) to the intersection of NYS Route 25 and River Road; thence westward along the southerly boundary of River Road to Edwards Avenue; thence westward along the southerly boundary of River Road (Grumman Boulevard or Swan Pond Road) to the southeast corner of that parcel containing Conoe (or Canoe) Lake and identified as District 600, Section 137, Block 1, Lot 1; thence northward, westward, and southward along the borders of that parcel containing Conoe (or Canoe) Lake to River Road (Grumman Boulevard); thence westward along the northerly boundary of Grumman Boulevard to the southeasternmost corner of the undeveloped portion (as of June 1, 1993) of the United States Navy/Grumman Corporation property located on the north side of Grumman Boulevard and adjacent to the Grumman entrance known as the South Gate; thence due north along the easternmost edge of that undeveloped portion (as of June 1, 1993) of the United States Navy/Grumman Corporation property to NYS Route 25; thence along a straight line to the northerly side of NYS Route 25 to a point occupied by the southeasternmost corner of the parcel assemblage comprised of District 600, Section 75, Block 3, Lot 10.1, and District 600, Section 96, Block 1, Lot 14, and otherwise known as Camp Wauwepex; thence northward, westward, and generally southward along the easterly, northerly, and generally westerly boundaries of the Camp Wauwepex assemblage to NYS Route 25; thence westward along the northerly side of NYS Route 25 to Montauk Trail; thence northeastward along the northwesterly side of Montauk Trail to Panamoka Trail; thence northward along the westerly side of Panamoka Trail, excluding all parcels abutting that road which are developed as of June 1, 1993, to Matinecock Trail; thence westward along the southerly side of Matinecock Trail to the easterly boundary of Brookhaven State Park; thence generally northward along the easterly boundary of Brookhaven State Park, including all adjacent or contiguous undeveloped Town of Brookhaven parks, preserves, open space areas, or reserved areas, to its intersection with NYS Route 25A; thence eastward along the southerly boundary of Route 25A to a point due south of the

southeast corner of the parcel identified as District 200, Section 128, Block 1, Lot 3.1; thence northward across Route 25A to its northerly side at the southeast corner of parcel identified as District 200, Section 128, Block 1, Lot 3.1; thence northward along the easterly side of the property identified as District 200, Section 128, Block 1, Lot 3.1 to its intersection with the southerly boundary of District 200, Section 128, Block 1, Lot 1; thence eastward, northward and westward along the southerly, easterly and northerly sides of the parcel identified as District 200, Section 128, Block 1, Lot 1 to the southeast corner of the parcel identified as District 200, Section 82, Block 1, Lot 5.2; thence northward along the east side of this parcel to its intersection with the south side of North Country Road; thence northward crossing North Country road to its northerly side; thence eastward along the northerly side of North Country Road to the Brookhaven Town-Riverhead Town line; thence in a generally northwestward direction along said town line to a point in Wading River Creek with the coordinates 40.96225 latitude and -72.863633 longitude; thence westward a distance of approximately 90 feet to the easterly side of LILCO Road; thence southward along LILCO Road to its intersection with the north side of North Country Road; thence westward along the north side of North Country Road to the southeast corner of the parcel identified as District 200, Section 39, Block 1, Lot 2; thence in a northward and westward direction along the easterly and northerly sides of said parcel to its northwest corner; thence northward along the westerly boundary of the parcel identified as District 200, Section 83, Block 1, Lot 1.4 to its northwest corner and the shoreline of Long Island Sound; thence westward along the northerly side of the parcel identified as district 200, section 39, Block 1, lot 1.2 and the southerly extent of the Long Island Sound to the northwest corner of the property identified as District 200, Section 39, Block 1, Lot 1.2; thence southward along the westerly boundary of said property to North Country Road; thence southward crossing North Country Road to its southerly side; thence west along the southerly boundary of North Country Road to the northwestern corner of the property identified as District 200, Section 82, Block 1, Lot 1.1; thence south along the westerly boundary of said property and the westerly boundary of the property identified as District 200, Section 82, Block 1, Lot 1.2 to the northwest corner of property

identified as District 200, Section 82, Block 1, Lot 5.1; thence southward along the westerly boundary of said property and along the easterly boundary of property identified as District 200, Section 81, Block 1, Lot 14.8 and along the easterly boundary of property identified as District 200, Section 105, Block 3, Lot 1 to the northeast corner of property identified as District 200, Section 105, Block 3, Lot 5; thence southward along the easterly boundary of said property to the north side of Route 25A; thence eastward along the north side of Route 25A to a point directly north of the northeast corner of the Shoreham-Wading River school district property, identified as District 200, Section 243, Block 1, Lot 3; thence southward, crossing Route 25A to its southerly boundary and the northeast corner of the Shoreham-Wading river school district property, identified as District 200, Section 243, Block 1, Lot 3; thence southward and westward, along the easterly and southerly boundaries of the aforesaid parcel to its southwest corner; thence southward along the easterly boundary of the Shoreham-Wading River school district property identified as District 200, Section 243, Block 1, Lot 1.10 to its southeast corner; thence westward, northward, eastward, southward, eastward, northward, westward, northward, westward and northward in a clockwise fashion along the southerly and westerly boundaries of the aforesaid Shoreham-Wading River school district property to NYS Route 25A; thence westward along the southerly side of NYS Route 25A to County Route 46; thence southward along the easterly side of County Route 46 to its intersection with the Suffolk County Pine Trail Nature Preserve; thence westward along the northerly boundary of the Suffolk County Pine Trail Nature Preserve where the Preserve is adjacent to developed parcels or parcels in agricultural or horticultural use, or along a line parallel to, and 100 (one hundred) feet north of, the Preserve where the Preserve is adjacent to parcels which are undeveloped as of June 1, 1993, to the southeastern corner of the parcel west of Woodlots Road and identified as District 200, Section 291, Block 1, Lot 14.1; thence northward and westward along the easterly and northerly boundaries of that parcel to Whiskey Road; thence westward along the southerly side of Whiskey Road to Wading River Hollow Road; thence northward along the westerly side of Wading River Hollow Road to the boundary of the NYS Rocky Point Land; thence generally northward along the easterly boundary of the NYS Rocky Point Land, including all

adjacent or contiguous undeveloped Town of Brookhaven parks, preserves, open space areas, or reserved areas, to NYS Route 25A; thence westward along the southerly side of NYS Route 25A, excluding those parcels abutting that road which are developed as of June 1, 1993, and those lands identified for the reroute of Route 25A by the NYS Department of Transportation, to the northeastern corner of the parcel identified as District 200, Section 102, Block 3, Lot 1.4; thence southward along the westerly boundary of that parcel to the parcel identified as District 200, Section 102, Block 3, Lot 1.6; thence generally westward and southward along the westerly boundaries of that parcel and the adjoining southerly parcel identified as District 200, Section 102, Block 3, Lot 1.5 to the boundary of the NYS Rocky Point Land; thence westward along the northerly boundary of the NYS Rocky Point Land to County Route 21; thence generally westward along a straight line across County Route 21 to the northernmost extent along County Route 21 of the NYS Rocky Point Land; thence generally westward along the generally northerly boundary of the NYS Rocky Point Land to the point or place of beginning, and excluding the area defined as beginning at a point where the southerly boundary of NYS Route 25 meets the easterly side of the Suffolk County Pine Trail Nature Preserve; thence southeastward along the easterly side of the Suffolk County Pine Trail Nature Preserve where the Preserve is adjacent to developed parcels, or along a line parallel to, and 100 (one hundred) feet east of, the Preserve where the Preserve is adjacent to parcels which are undeveloped as of June 1, 1993, to the Long Island Lighting Company high voltage transmission lines; thence northward along the westerly side of the Long Island Lighting Company high voltage transmission lines to NYS Route 25; thence westward along the southerly side of NYS Route 25 to the point or place of beginning; and excluding four distinct areas described as follows: Area One is the area defined as beginning at a point where the southerly boundary of NYS Route 25 meets the easterly side of the Suffolk County Pine Trail Nature Preserve; thence southeastward along the easterly side of the Suffolk County Pine Trail Nature Preserve where the Preserve is adjacent to developed parcels, or along a line parallel to, and 100 (one hundred) feet east of, the Preserve where the Preserve is adjacent to parcels which are undeveloped as of June 1, 1993, to the Long Island Lighting Company high voltage transmission lines; thence northward along the

westerly side of the Long Island Lighting Company high voltage transmission lines to NYS Route 25; thence westward along the southerly side of NYS Route 25 to the point or place of beginning; Area Two is the area defined as beginning at the northwest corner of the parcel identified as District 200, Section 552, Block 1, Lot 3; thence eastward, southwestward and generally northward along the northerly, southeasterly and westerly boundaries of that parcel, containing the sewage treatment facility known as the Dorade facility, to the point of beginning; Area three is defined as the parcel identified as district 200, section 82, block 1, lot 3; Area four is defined as the property identified as district 200, section 39, block 1, lot 1.1;

and including in the core preservation area only the municipally owned lands and the property identified as District 200, Section 750, Block 3, Lot 44; within the area beginning at a point on the southeasterly corner of the intersection of Moriches-Middle Island Road and Cranford Boulevard and thence southward along the easterly boundary of Cranford Boulevard to the southwestern corner of property identified as District 200, Section 645, Block 3, Lot 29.1; thence southeastward along the southerly boundary of said property to its intersection with property identified as District 200, Section 712, Block 9, Lot 1; thence generally southward along the westerly boundary of said property to its intersection with the northerly side of the eastward extension of Grove Drive, known as Grove Street; thence southward crossing Grove Street to its south side; thence westward along the southerly boundary of the Grove Street road extension to the northwestern corner of the property identified as District 200, Section 749, Block 3, Lot 41.1 and comprised of parcels owned by the county of Suffolk and the town of Brookhaven; thence southward to the southwestern corner of property identified as District 200, Section 749, Block 3, Lot 43; thence eastward along the southerly boundary of said property to the west side of Lambert Avenue; thence crossing Lambert Avenue to its easterly side; thence southward along the easterly boundary of Lambert Avenue to the northerly boundary of the Sunrise Highway Service Road; thence northeastward along the northerly boundary of the Sunrise Highway Service Road to Barnes Road; thence northward along the westerly boundary of Barnes Road to the northeastern corner of the property identified as District 200, Section

750, Block 3, Lot 40.2; thence westward along the northerly boundary of property identified as District 200, Section 713, Block 1, Lot 2; thence westward along the northerly boundary of property identified as District 200, Section 713, Block 1, Lot 1; thence northward along the westerly side of Weeks Avenue to the northeastern corner of property identified as District 200, Section 713, Block 3, Lot 1; thence westward along the northerly boundary of said property to Michigan Avenue; thence northward along the easterly boundary of Michigan Avenue to Moriches-Middle Island Road; thence westward along the southerly boundary of Moriches-Middle Island Road to the point of beginning.

* NB Effective until ... (see 58/2018 Pt. CC § 5 for expiration provisions)

* 11. "Core preservation area" shall mean the core preservation area of the Central Pine Barrens area which comprise the largest intact areas of undeveloped pine barrens as described and bounded as follows:

Beginning at a point where the northwestern corner of the New York State Rocky Point Natural Resource Management Area (the "NYS Rocky Point Land") intersects the southerly side of NYS Route 25A; thence generally southward and eastward along the generally westerly and southerly boundaries of the NYS Rocky Point Land (including the Currans Road Pond State Wildlife Management Area, all adjacent or contiguous undeveloped Town of Brookhaven parks, preserves, open space areas, or reserved areas, and the crossings of the undeveloped Suffolk County property known as the Port Jefferson - Westhampton road right of way, Whiskey Road, County Route 21, and Currans Road), and including those properties identified as District 200, Section 346, Block 1, Lots 3 and 4, to the point where the NYS Rocky Point Land meets the northerly side of NYS Route 25 (Middle Country Road); thence eastward along the northerly boundary of NYS Route 25 to the southeastern corner of that property west of Woodlots Road which is identified as District 200, Section 349, Block 2, Lot 1.3; thence northward along the easterly boundary of that property to the Suffolk County Pine Trail Nature Preserve; thence eastward and southeastward along the southerly boundary of the Suffolk County Pine Trail Nature Preserve where the Preserve is adjacent to developed parcels or parcels in agricultural or horticultural use, or along a line parallel to, and 100 (one hundred) feet south of, the

Preserve where the Preserve is adjacent to parcels which are undeveloped as of June 1, 1993, to County Route 46; thence southward along the easterly boundary of County Route 46 to NYS Route 25; thence eastward along the southerly boundary of NYS Route 25 to the Suffolk County Pine Trail Nature Preserve; thence southward along the westerly boundary of the Suffolk County Pine Trail Nature Preserve where the Preserve is adjacent to developed parcels, or along a line parallel to, and 100 (one hundred) feet west of, the Preserve where the Preserve is adjacent to parcels which are undeveloped as of June 1, 1993, to the northern boundary of the United States land known as Brookhaven National Laboratory; thence generally westward along the northerly boundary of Brookhaven National Laboratory to County Route 46 (William Floyd Parkway); thence generally northwestward on a straight line to the intersection of Sally Lane and Pond Lane; thence westward along the southerly side of Pond Lane to Ruth Lane; thence northward along the westerly side of Ruth Lane to NYS Route 25; thence westward along the northerly side of NYS Route 25 to the southeast corner of the NYS Middle Island State Game Farm and Environmental Education Center; thence northward, westward, and southward along the easterly, northerly, and westerly boundaries of the NYS Middle Island State Game Farm and Environmental Education Center to NYS Route 25; thence westward along the southerly side of NYS Route 25, excluding all parcels abutting that road which are developed as of June 1, 1993, to Giant Oak Road; thence southward along the easterly side of Giant Oak Road to Medford Road; thence southwestward along the southeasterly side of Medford Road crossing to the west side of Smith Road; thence southerly along the westerly side of Smith Road to the southeast corner of District 200, Section 406, Block 1, Lot 6; thence westward and northward along the southerly and westerly sides of said parcel to the southerly side of the developed lands known as Strathmore Ridge; thence westward, northward and eastward along the southerly, westerly and northerly sides of the developed lands known as Strathmore Ridge to the westerly side of Smith Road; thence northerly along the westerly side of Smith Road to the southerly side of NYS Route 25; thence westerly along the southerly side of NYS Route 25, to the northwestern corner of that property which is identified as District 200, Section 406, Block 1, Lot 4.3; thence southerly along the westerly boundary of that property and continuing

southward along the westerly sides of the properties identified as District 200, Section 406, Block 1, Lot 4.6; District 200, Section 406, Block 1, Lot 4.4 and District 200, Section 504, Block 1, Lot 2 to the southerly side of Longwood Road; thence eastward along the southerly side of Longwood Road to the northwest corner of the property identified as District 200, Section 504, Block 1, Lot 7.2; thence southward and westward along the generally westerly boundary of that parcel to the eastern end of Rugby Lane (also known as Rugby Avenue or Rugby Road), a paper street shown on Suffolk County tax maps District 200, Sections 500, 502, and 503; thence westward along the northerly boundary of Rugby Lane, across County Route 21, to the westerly boundary of County Route 21 (Yaphank - Middle Island Road); thence southward along the westerly boundary of County Route 21 to the northeastern corner of the parcel identified as District 200, Section 529, Block 1, Lot 28, and which is coterminous with the southerly boundaries of the parcels located on the south side of Rustic Lane; thence westward along the northerly boundary of that parcel to the southwest corner of the parcel identified as District 200, Section 528, Block 5, Lot 2; thence northward along a portion of the easterly boundary of the Carmans River, which comprises the easterly boundary of the parcel identified as District 200, Section 528, Block 5, Lot 1, to its intersection with the southern boundary of the Suffolk County Nature Preserve parcel identified as District 200, Section 500, Block 1, Lot 1.4; thence eastward along the southern boundary of that parcel to the southeast corner of that parcel; thence northward along the easterly boundary of that Suffolk County Nature Preserve parcel to the southeast corner of the Suffolk County Nature Preserve parcel identified as District 200, Section 500, Block 1, Lot 3.1, thence generally northward along the easterly boundary of that parcel to the north side of East Bartlett Road; thence easterly along the north side of East Bartlett Road to the east side of County Road 21; thence southerly along the east side of County Road 21 to the southwest corner of District 200, Section 501, Block 1, Lot 2.1; thence easterly and northerly along the southern and eastern sides of that property and northward along the easterly side of District 0200, 50100, Block 0100, Lot 002002 and across to the north side of Longwood Road; thence westerly along the north side of Longwood Road to the southeast corner of District 200, Section 482, Block 1, Lot 3.1; thence northward and

eastward along the easterly and southerly boundaries of that parcel to the northwest corner of the parcel identified as District 200, Section 483, Block 2, Lot 1.4; thence eastward along the southerly property boundary of the parcel identified as District 200, Section 482, Block 1, Lot 4 to the southeast corner of that parcel; thence northward along the easterly boundary of that parcel to the northeast corner of that parcel; thence eastward and northward along the southerly and easterly boundaries of the parcel identified as District 200, Section 456, Block 2, Lot 4 to the northeast corner of that parcel; thence generally northerly and westerly along the easterly and northerly boundary of Prosser Pines County Nature Preserve to County Road 21; thence westward (directly across County Route 21) along the southerly boundary of the property identified as District 200, Section 434, Block 1, Lot 12.1, to the southwest corner of the property identified as District 200, Section 434, Block 1, Lot 14.3, adjacent to the eastern side of Cathedral Pines County Park; thence northward along the eastern boundary of Cathedral Pines County Park to the southeast corner of the property identified as District 200, Section 402, Block 1, Lot 23.1, thence continuing northward along the easterly boundary of that property to the southerly side of Lafayette Road; thence westward along the southerly side of Lafayette Road to the eastern boundary of the property identified as District 200, Section 402, Block 1, Lot 24.7; thence generally in a counter-clockwise direction along the easterly, northerly, westerly and northerly boundaries of that property to the easterly boundary of the parcel identified as District 200, Section 402, Block 1, Lot 19.2; thence northerly along the easterly side of said lot to the southeast corner of the property identified as District 200, Section 402, Block 1, Lot 20, thence westward and northward along the southerly and westerly sides of that property to the southerly side of NYS Route 25; thence westward along the southerly boundary of NYS Route 25 to the northwestern corner of the parcel identified as District 200, Section 402, Block 1, Lot 16.4; thence generally southward along the westerly boundary of that parcel to the northerly boundary of the parcel identified as District 200, Section 454, Block 1, Lot 9.1; thence westward along the northerly boundary of that parcel to East Bartlett Road; thence southward along the easterly boundary of East Bartlett Road to its intersection with Ashton Road; thence westward to the

northeastern corner of the old filed map shown on District 200, Section 499; thence westward and southward along the northerly and westerly boundaries of the old filed map shown on Suffolk County tax maps District 200, Sections 498, 499, and 527 to Hillcrest Road; thence eastward along the southerly boundary of Hillcrest Road to Ashton Road; thence southward along the easterly side of Ashton Road to Granny Road; thence eastward along the southerly side of Granny Road to the northwesterly corner of District 200, Section 547, Block 1, Lot 18.1; thence generally southward, westward, southward, eastward and northward in a counter-clockwise direction along the western, northern, southern and eastern boundaries of said parcel to the southeast corner of the parcel identified as District 200, Section 548, Block 1, Lot 3; thence northward along the easterly boundary of that parcel to its northeast corner; thence generally northward, northeastward and eastward along the westerly, northwesterly and northerly sides of German Boulevard to its intersection with the northeasterly side of Lakeview Boulevard; thence southeastward along the northeasterly side of Lakeview Boulevard to the westerly boundary of the parcel identified as District 200, Section 611, Block 1, Lot 5; thence northward along the westerly boundary of that parcel to its northwest corner; thence southward along the westerly boundary of the parcel identified as District 200, Section 579, Block 3, Lot 1, comprising part of the western bank of the Carmans River also known as Upper Lake, to the northerly side of Mill Road, also known as County Route 101; thence eastward along the northerly side of Mill Road to the northeast corner of the parcel identified as District 200, Section 579, Block 3, Lot 19; thence westerly along the northerly boundary of that parcel to the eastern boundary of the parcel identified as District 200, Section 579, Block 3, Lot 1; thence northward along the easterly side of that parcel, comprising part of the eastern bank of the Carmans River also known as Upper Lake, to the southwest corner of the parcel identified as District 200, Section 548, Block 2, Lot 5.1; thence eastward along the southern boundary of that parcel to its southeast corner; thence eastward across County Route 21 to its easterly side; thence northward along the easterly boundary of County Route 21 to the southwest corner of the Suffolk County Nature Preserve parcel known as Warbler Woods and identified as District 200, Section 551, Block 1, Lot 4; thence generally eastward along the southerly boundary of the Warbler

Woods parcel and then southward along the westerly boundary of an extension of that parcel's southerly boundary to the southeast corner of the southern terminus of Harold Road; thence generally westward, southward and westward in a counter-clockwise direction along the northerly, westerly, northerly and westerly boundaries of the Suffolk County Nature Preserve parcel known as Fox Lair, and identified as District 200, Section 580, Block 3, Lot 24.2, to the northwest corner of the parcel Suffolk County Water Authority parcel identified as District 200, Section 580, Block 3, Lot 24.6; thence southward, eastward and southward along the westerly boundary and southerly boundaries of that Suffolk County Water Authority parcel to Main Street; thence eastward along the north side of Main Street to the southeast corner of said Suffolk County Water Authority parcel to its southeast corner; thence northward along the easterly boundary of that parcel to the southwest property boundary of the Suffolk County Nature Preserve parcel known as Fox Lair and identified as District 200, Section 580, Block 3, Lot 24.2, thence generally eastward, southward, eastward, northward and eastward along the southerly boundaries of said parcel and eastward along the southerly boundary of the Suffolk County Nature Preserve parcel identified as District 200, Section 583, Block 1, Lot 4.1, to the west side of the unimproved north-south oriented road known variously as Smith Road, Longwood Road and Private Road; thence southward along the westerly boundary of Smith Road to the north side of the Long Island Expressway; thence westward along the northerly boundary of the Long Island Expressway to the south side of Main Street in Yaphank; thence westward along the southerly boundary of Main Street in Yaphank to the westernmost extent along Main Street of the Southaven County Park boundary; thence westward across County Road 21 to the western boundary of the County Road 21 right-of-way; thence southward along the western boundary of the County Road 21 right-of-way to the northerly side of the parcel identified as District 200, Section 611, Block 3, Lot 16, comprising the northerly bank of the Carmans River known as Lower Lake; thence westward along the northerly side of that property to the southwest corner of the parcel identified as District 200, Section 612, Block 4, Lot 1; thence northward along the westerly boundary of that parcel to the southerly side of County Route 21 known as Main Street; thence westward along the southerly side of County Route 21 known as

Main Street to the northeast corner of the parcel identified as District 200, Section 612, Block 2, Lot 12; thence southward along the easterly boundary of that parcel to the southeast corner of the parcel identified as District 200, Section 612, Block 2, Lot 11; thence westward and northwestward along the northerly and northeasterly boundaries of the Town of Brookhaven parcel identified as District 200, Section 611, Block 3, Lot 9 to the south side of Mill Road, also known as County Road 101; thence generally westward and southward along the southerly side of Mill Road and continuing southward along the eastern side of Patchogue-Yaphank Road, also known as County Road 101, to the southerly side of Gerard Road; thence eastward along the southerly side of Gerard Road to its westerly boundary known as the map of Grand Heights, filed in the offices of the Suffolk County clerk; thence southward along the westerly map line of the filed map known as Grand Heights to the north side of the Long Island Expressway NYS Route 495; thence easterly along the northerly side of the Long Island Expressway NYS Route 495 to the westerly side of County Route 21 known as Yaphank Avenue; thence southward along the westerly side of Yaphank Avenue to the south side of the Long Island Expressway; thence eastward along the south side of the Long Island Expressway to the westerly boundary of Southaven County Park, thence generally southward along the westerly boundary of Southaven County Park to the northeast corner of the lands of Suffolk County identified as District 200, Section 665, Block 2, Lot 1; thence generally southward along the easterly boundary of said lot, crossing the LIRR and Park Street and continuing southward along the westerly boundary of Davenport Avenue as shown on the old filed map known as Bellhaven Terrace; thence southward and eastward along the westerly and southerly boundaries of the parcel identified as District 200, Section 744, Block 1, Lot 10 to the westerly boundary of the parcel identified as District 200, Section 781, Block 1, Lot 3.1; thence continuing southerly along the westerly boundary of that parcel to the easterly boundary of Gerard Road; thence southward along the easterly boundary of Gerard Road to Victory Avenue; thence eastward along the northerly boundary of Victory Avenue to a point where the west bank of the Carmans River passes under Victory Avenue and Route 27; thence south under Route 27 to the southerly side of Montauk Highway also known as County Road 80; thence westward along the southerly side of Montauk Highway County

Road 80, including lands owned by the United States known as Wertheim National Wildlife Refuge (the "Refuge"), to the eastern side of Old Stump Road; thence southward along the easterly side of Old Stump Road to the northerly side of Beaver Dam Road; thence eastward along the northerly side of Beaver Dam Road to the lands owned by the United States known as Wertheim National Wildlife Refuge (the "Refuge"), including the Carmans River; thence generally westerly and southerly to the waters of Bellport Bay; thence generally easterly across the Bay and northerly along the easterly boundary of the Refuge, including all lands currently part of the Refuge and any lands which may become part of the Refuge in the future to the east side of the southern terminus of Smith Road; thence northward along the easterly side of Smith Road to the southwesterly corner of the property identified as District 200, Section 974.50, Block 1, Lot 11; thence eastward, northward and westward in a counter-clockwise direction along the southern, eastern and northern boundaries of that property to the easterly side of Smith Road; thence northward along the easterly side of Smith Road to the northerly side of Montauk Highway County Road 80; thence northeasterly to the southwesterly corner of the property identified as District 200, Section 849, Block 2, Lot 2; thence eastward along the northerly boundary of Montauk Highway to the southeasterly corner of the property identified as District 200, Section 850, Block 3, Lot 8; thence northward to the northeasterly corner of that parcel, including all lands owned by the United States known as Wertheim National Wildlife Refuge (the "Refuge") at any time between June 1, 1993 and the present, and any lands which may become part of the Refuge in the future; thence northwestward across Sunrise Highway (NYS Route 27) to the southwesterly corner of the property identified as District 200, Section 850, Block 2, Lot 1; thence northward along the westerly boundary of that parcel across to the northerly boundary of Victory Avenue; thence westward along the northerly boundary of Victory Avenue to the westerly boundary of River Road; thence northward along the westerly boundary of River Road to the north side of the Long Island Rail Road right-of-way; thence easterly along the northerly side of the Long Island Rail Road right-of-way to the north side of Moriches-Middle Island Road; thence generally northward and westward along the northerly side of Moriches-Middle Island Road to the northerly side of the Long Island Expressway; thence

westward along the northerly boundary of the Long Island Expressway to the southeasterly corner of the Longwood Greenbelt property (the property identified as District 200, Section 583, Block 2, Lot 1.1); thence northward along the easterly boundary of the Longwood Greenbelt property to its northeast corner; thence eastward to the southwesterly corner of the property known as District 200, Section 552, Block 1, Lot 8; thence generally northeastward along the easterly boundary of the property identified as District 200, Section 552, Block 1, Lot 1.7 to the northeasterly corner of that parcel; thence eastward along the southerly boundaries of the parcels identified as District 200, Section 504, Block 1, Lot 8, and District 200, Section 504, Block 1, Lot 11, to the westerly boundary of the William Floyd Parkway (County Route 46); thence northward along the westerly side of County Route 46 to a point 2000 (two thousand) feet south of the southern bank of the Peconic River crossing of County Route 46; thence generally southeastward along a line parallel to, and 2000 (two thousand) feet generally south or southwest of, and parallel to, the southernmost bank of the Peconic River to a point where the Peconic River crosses the unpaved, unnamed, north-south firebreak and patrol road on the eastern half of the Brookhaven National Laboratory property; thence southward and southwestward along the easterly and southeasterly boundaries of the unpaved, unnamed, north-south firebreak and patrol road starting on the eastern half of the Brookhaven National Laboratory property to the Brookhaven National Laboratory road known as Brookhaven Avenue; thence due westward along a straight line to the Brookhaven National Laboratory road known as Princeton Avenue; thence westward along the southerly boundary of Princeton Avenue to the unnamed Laboratory road which diverts southwest in the vicinity of the Laboratory gate house; thence southwestward along the southerly side of the unnamed Laboratory road just described to County Route 46; thence southward along the easterly side of County Route 46 to NYS Route 495; thence eastward along the northerly boundary of NYS Route 495 to County Route 111; thence southeastward along the northerly boundary of County Route 111 to NYS Route 27 (Sunrise Highway); thence generally southward across NYS Route 27 to the westernmost extent along NYS Route 27 of the undeveloped portion (as of June 1, 1993) of the parcel assemblage comprised of those parcels identified as District 200, Section 594, Block 2, Lot 4 and District

900, Section 325, Block 1, Lot 41.2; thence southward along the westerly boundary of the undeveloped portion (as of June 1, 1993) of that parcel assemblage to County Route 71 (Old Country Road); thence eastward along the northerly boundary of County Route 71 to the southeastern corner of the Suffolk County Nature Preserve lands which run from NYS Route 27 south to County Route 111 and which adjoin the easterly side of the preceding assemblage; thence northward along the easterly boundary of that Suffolk County Nature Preserve assemblage (crossing the County Route 111 right of way) to NYS Route 27; thence eastward along the southerly boundary of NYS Route 27 to the westerly end of 19th Street as shown in the old filed map contained within the tax map identified as District 900, Section 276, Block 2; thence southward along the westerly boundary of that old filed map (shown in District 900, Sections 276, 302, 303, 327, and 328), and coterminous with the westerly side of those parcels along the westerly side of Oishei Road, to County Route 71; thence eastward along the northerly boundary of County Route 71 to the southeasterly corner of the parcel identified as District 900, Section 328, Block 2, Lot 19; thence northward along the easterly boundary of that old filed map surrounding Oishei Road, and coterminous with the easterly side of those parcels along the easterly side of Oishei Road, to a point along that line due west of the northwesterly corner of the parcel containing the Suffolk County facilities identified as District 900, Section 331, Block 1, Lot 1; thence due eastward along a straight line to the northwesterly corner of that parcel; thence eastward along the northerly boundary of that parcel to its northeasterly corner shown in District 900, Section 307; thence due eastward along a straight line to Summit Boulevard; thence southward along the westerly side of Summit Boulevard to County Route 71; thence eastward along the northerly side of County Route 71, excluding all parcels abutting that road which are developed as of June 1, 1993, to the Long Island Rail Road tracks; thence eastward along the northerly boundary of the Long Island Rail Road tracks to County Route 31 (Old Riverhead Road); thence northward along the westerly boundary of County Route 31 to that point opposite the point along the easterly side of County Route 31 (north of the Stewart Avenue intersection) at which the undeveloped portion (as of June 1, 1993) of the Suffolk County Airport (Gabreski Airport) occurs; thence generally northward, eastward and southward around the westerly,

northerly and easterly boundaries of the undeveloped portion (as of June 1, 1993) of the airport property (excluding from the Core Preservation Area those portions of the airport property which are occupied by the runways, their associated maintenance areas, and those areas identified for future use in the Suffolk County Airport Master Plan approved by the County Legislature) to the Long Island Rail Road tracks (including in the Core Preservation Area those portions of the airport property which are adjacent to the Quogue Wildlife Refuge's westerly boundary and which are in their natural state); thence eastward along the northerly boundary of the Long Island Rail Road tracks to the southeasterly corner of the Town of Southampton parcel identified as District 902, Section 1, Block 1, Lot 22.1; thence generally northward and eastward along the easterly border of that parcel and the Town of Southampton parcels to the immediate north identified as District 900, Section 313, Block 1, Lot 42.1 and District 900, Section 287, Block 1, Lot 1.55 to County Route 104; thence northward along the westerly boundary of County Route 104 to a point 1000 (one thousand) feet southward of NYS Route 27; thence eastward along a line parallel to, and 1000 (one thousand) feet south of, NYS Route 27, to the westerly boundary of the parcel identified as District 900, Section 252, Block 1, Lot 1; thence southward along the westerly boundary of that parcel to the Long Island Rail Road tracks; thence eastward along the northerly boundary of the Long Island Rail Road tracks to Montauk Highway; thence eastward along the northerly boundary of Montauk Highway to that point where the boundary of Sears-Bellows County Park heads northward along the eastern side of the Munns Pond portion; thence northward along the easterly boundary of Sears-Bellows County Park, to NYS Route 27; thence eastward along the northerly boundary of NYS Route 27 to NYS Route 24 (Riverhead - Hampton Bays Road); thence generally northwestward and westward along the southwesterly boundary of NYS Route 24 to the easternmost extent along NYS Route 24 of the Suffolk County Parkland known as Flanders or Hubbard County Park; thence generally northward, westward, and southward along the easterly, northerly, and westerly boundaries of Flanders or Hubbard County Park, including all adjacent or contiguous undeveloped Town of Southampton parks, preserves, open space areas, or reserved areas, to NYS Route 24; thence westward along the southerly boundary of NYS Route 24 to Pleasure Drive; thence southward along the easterly

boundary of Pleasure Drive a distance of 2000 (two thousand) feet, excluding all parcels abutting that road which are developed as of June 1, 1993; thence generally westward along a straight line to the southernmost extent of the NYS David Sarnoff Preserve along the westerly boundaries of the parcels on the westerly side of Brookhaven Avenue; thence generally northward and westward along the easterly and northerly boundary of the NYS David Sarnoff Pine Barrens Preserve, crossing County Routes 105 and 104, to County Route 63 (Riverhead-Moriches Road); thence generally westward and northward along the northerly boundary of the Suffolk County Cranberry Bog County Nature Preserve to County Route 51; thence southwesterly along the westerly side of County Route 51 to the boundary of the Cranberry Bog County Nature Preserve; thence westward and northward along the northeasterly boundary of Cranberry Bog County Nature Preserve to County Route 94 (also known as NYS Route 24, or Nugent Drive); thence eastward along the northerly side of County Route 94 to the County Route 94A bridge; thence northward along the westerly side of the County Route 94A bridge to the Riverhead-Southampton border; thence westward along the Riverhead-Southampton border, and the Riverhead-Brookhaven Border, to the Forge Road Bridge; thence northward along the westerly boundary of the Forge Road Bridge to Forge Road; thence northwestward along the westerly boundary of Forge Road to the Long Island Rail Road tracks; thence northward along the westerly boundary of Forge Road (unpaved) to the intersection of NYS Route 25 and River Road; thence westward along the southerly boundary of River Road to Edwards Avenue; thence westward along the southerly boundary of River Road (Grumman Boulevard or Swan Pond Road) to the southeast corner of that parcel containing Conoe (or Canoe) Lake and identified as District 600, Section 137, Block 1, Lot 1; thence northward, westward, and southward along the borders of that parcel containing Conoe (or Canoe) Lake to River Road (Grumman Boulevard); thence westward along the northerly boundary of Grumman Boulevard to the southeasternmost corner of the undeveloped portion (as of June 1, 1993) of the United States Navy/Grumman Corporation property located on the north side of Grumman Boulevard and adjacent to the Grumman entrance known as the South Gate; thence due north along the easternmost edge of that undeveloped portion (as of June 1, 1993) of the United States Navy/Grumman Corporation property to NYS Route 25; thence along a straight line to the northerly

side of NYS Route 25 to a point occupied by the southeasternmost corner of the parcel assemblage comprised of District 600, Section 75, Block 3, Lot 10.1, and District 600, Section 96, Block 1, Lot 14, and otherwise known as Camp Wauwepex; thence northward, westward, and generally southward along the easterly, northerly, and generally westerly boundaries of the Camp Wauwepex assemblage to NYS Route 25; thence westward along the northerly side of NYS Route 25 to Montauk Trail; thence northeastward along the northwesterly side of Montauk Trail to Panamoka Trail; thence northward along the westerly side of Panamoka Trail, excluding all parcels abutting that road which are developed as of June 1, 1993, to Matinecock Trail; thence westward along the southerly side of Matinecock Trail to the easterly boundary of Brookhaven State Park; thence generally northward along the easterly boundary of Brookhaven State Park, including all adjacent or contiguous undeveloped Town of Brookhaven parks, preserves, open space areas, or reserved areas, to its intersection with NYS Route 25A; thence westward along the southerly side of NYS Route 25A to the northeast corner of the Shoreham-Wading River school district property; thence southward, westward, and northward along the easterly, southerly, and westerly boundaries of the Shoreham-Wading River school district property to NYS Route 25A; thence westward along the southerly side of NYS Route 25A to County Route 46; thence southward along the easterly side of County Route 46 to its intersection with the Suffolk County Pine Trail Nature Preserve; thence westward along the northerly boundary of the Suffolk County Pine Trail Nature Preserve where the Preserve is adjacent to developed parcels or parcels in agricultural or horticultural use, or along a line parallel to, and 100 (one hundred) feet north of, the Preserve where the Preserve is adjacent to parcels which are undeveloped as of June 1, 1993, to the southeastern corner of the parcel west of Woodlots Road and identified as District 200, Section 291, Block 1, Lot 14.1; thence northward and westward along the easterly and northerly boundaries of that parcel to Whiskey Road; thence westward along the southerly side of Whiskey Road to Wading River Hollow Road; thence northward along the westerly side of Wading River Hollow Road to the boundary of the NYS Rocky Point Land; thence generally northward along the easterly boundary of the NYS Rocky Point Land, including all adjacent or contiguous undeveloped Town of Brookhaven parks, preserves,

open space areas, or reserved areas, to NYS Route 25A; thence westward along the southerly side of NYS Route 25A, excluding those parcels abutting that road which are developed as of June 1, 1993, and those lands identified for the reroute of Route 25A by the NYS Department of Transportation, to the northeastern corner of the parcel identified as District 200, Section 102, Block 3, Lot 1.4; thence southward along the westerly boundary of that parcel to the parcel identified as District 200, Section 102, Block 3, Lot 1.6; thence generally westward and southward along the westerly boundaries of that parcel and the adjoining southerly parcel identified as District 200, Section 102, Block 3, Lot 1.5 to the boundary of the NYS Rocky Point Land; thence westward along the northerly boundary of the NYS Rocky Point Land to County Route 21; thence generally westward along a straight line across County Route 21 to the northernmost extent along County Route 21 of the NYS Rocky Point Land; thence generally westward along the generally northerly boundary of the NYS Rocky Point Land to the point or place of beginning, and excluding the area defined as beginning at a point where the southerly boundary of NYS Route 25 meets the easterly side of the Suffolk County Pine Trail Nature Preserve; thence southeastward along the easterly side of the Suffolk County Pine Trail Nature Preserve where the Preserve is adjacent to developed parcels, or along a line parallel to, and 100 (one hundred) feet east of, the Preserve where the Preserve is adjacent to parcels which are undeveloped as of June 1, 1993, to the Long Island Lighting Company high voltage transmission lines; thence northward along the westerly side of the Long Island Lighting Company high voltage transmission lines to NYS Route 25; thence westward along the southerly side of NYS Route 25 to the point or place of beginning; and excluding two distinct areas described as follows: Area One is the area defined as beginning at a point where the southerly boundary of NYS Route 25 meets the easterly side of the Suffolk County Pine Trail Nature Preserve; thence southeastward along the easterly side of the Suffolk County Pine Trail Nature Preserve where the Preserve is adjacent to developed parcels, or along a line parallel to, and 100 (one hundred) feet east of, the Preserve where the Preserve is adjacent to parcels which are undeveloped as of June 1, 1993, to the Long Island Lighting Company high voltage transmission lines; thence northward along the westerly side of the Long Island Lighting Company high voltage

transmission lines to NYS Route 25; thence westward along the southerly side of NYS Route 25 to the point or place of beginning; Area Two is the area defined as beginning at the northwest corner of the parcel identified as District 200, Section 552, Block 1, Lot 3; thence eastward, southwestward and generally northward along the northerly, southeasterly and westerly boundaries of that parcel, containing the sewage treatment facility known as the Dorade facility, to the point of beginning.

* NB Effective ... (see 58/2018 Pt. CC § 5 for expiration provisions)

12. "Compatible growth area" shall mean the compatible growth area which comprises that area within the central pine barrens, but outside the core preservation area as defined.

13. "Development" shall mean the performance of any building activity or mining operation, the making of any material change in the use or intensity of use of any structure or land and the creation or termination of rights of access or riparian rights. Without limitation, the following activities or uses shall be taken for the purposes of this title to involve development as defined in this subdivision:

(a) a change in type of use of a structure or land or, if the ordinance or rule divides uses into classes, a change from one class of use designated in an ordinance or rule to a use in another class so designated;

(b) a material increase in the intensity of use of land or environmental impacts as a result thereof;

(c) commencement of mining, excavation or material alteration of grade or vegetation on a parcel of land excluding environmental restoration activities;

(d) material alteration of a shore, bank or flood plain of a river, stream, lake, pond, or artificial body of water;

(e) re-establishment of a use which has been abandoned for one year;

(f) departure from the normal use for which development permission has been granted, or material failure to comply with the conditions of an ordinance, rule or order granting the development permission under which the development was commenced or is continued.

The following operations or uses do not constitute development for the purposes of this title:

(i) public improvements undertaken for the health, safety or welfare of the public. Such public improvements shall be consistent with the goals and objectives of this title, and shall include, but not be limited to, maintenance of an existing road or railroad track;

(ii) work by any utility not involving substantial engineering redesign for the purpose of inspection, maintenance or renewal on established utility rights-of-way or the likes, and any work pertaining to water supply for the residents of Suffolk county;

(iii) work for the maintenance, renewal, replacement, reconstruction, improvement, or alteration of any existing structure or additions to an existing residence or residential property owned by an association formed for the common interest in real property;

(iv) the use of any structure or land devoted to dwelling uses for any purposes customarily incidental and otherwise lawful;

(v) the use of any land for the purpose of agriculture or horticulture;

(vi) work by a utility performed for the purpose of public health, safety, or welfare and consistent with the goals and objectives of this title;

(vii) existing or expanded recreational use consistent with the purposes of this title including scouting activities, the maintenance or expansion of facilities associated with or necessary for such scouting activities including, but not limited to, the addition, modification, expansion or replacement of structures necessary for such activities and such clearing as may be reasonably required for the maintenance or expansion of scouting activities;

(viii) a change in use of land or structure from a use within a class specified in an ordinance or rule to another use in the same class;

(ix) residential development on any subdivision, residential clustered development, land division or site plan which has received preliminary or final approval on or before June first, nineteen hundred ninety-three, providing the lots to be built upon conform to the lot area requirements of the current zoning, are subject to the three year exemption contained in section two hundred sixty-five-a of the town law, or are subject to an exemption from an upzoning adopted by a town board;

(x) in the core preservation area, construction of one single family home and customary accessory uses thereto on those parcels identified in the comprehensive land use plan adopted by the commission in June of nineteen hundred ninety-five and as amended on February twenty-first, two thousand one;

(xi) in the compatible growth area, construction of single family homes and customary accessory uses thereto on any lot held on June 1, 1993 in ownership singly and separately from adjacent lots;

(xii) in the compatible growth area, continuation of existing non-conforming uses, and activities permitted by special permit or special exception, including renewals of said special permits or exceptions;

(xiii) in the compatible growth area, land divisions or subdivisions in the compatible growth area consisting of five or fewer residential lots which conform to the lot area requirement of the existing zoning for the subject parcel;

(xiv) in the compatible growth area, renovations, reconstructions, additions or extensions to existing commercial or industrial uses providing the addition or extension conforms to the uses permitted in the zoning district in which said parcel is located and which does not increase existing square footage by more than twenty-five percent; or

(xv) in the core preservation area, the state or public corporation projects on parcels identified in the comprehensive land use plan adopted by the commission in June of nineteen hundred ninety-five, as amended on February twenty-first, two thousand one and October twentieth, two thousand four.

Development as designated in an ordinance, rule, or development permit includes all other development customarily associated with it unless otherwise specified.

14. "Agriculture" or "horticulture" shall mean any production of plants or animals useful to man, including but not limited to: forage or sod crops; grains and feed crops; dairy animals and dairy products; poultry and poultry products; livestock, including beef cattle, sheep, swine, horses, ponies, mules or goats, and including the breeding and grazing of any or all of such animals; bees and apiary products; fur

animals; trees and forest products; fruits of all kinds including wineries; vegetables; nursery, floral, ornamental and greenhouse products and farmstands for selling products raised or produced on site and other associated structures required for their production.

§ 57-0109. Establishment of Long Island Pine Barrens maritime reserve; core preservation area and compatible growth area.

1. The region encompassing and distinguished by the Peconic Bay system, lands which gather and transmit precipitation as either groundwater or runoff into the Peconic Bay system, lands characterized by the growth of pitch pine, dwarf pine and/or scrub oak pine barrens including lands currently under the review and jurisdiction of the Suffolk county Pine Barrens review commission and lands used in traditional patterns for agriculture, finfishing, shellfishing and tourism and made up of all lands and waters located in the towns of Riverhead, Southold, Shelter Island, Southampton and East Hampton and the portion of the town of Brookhaven east of a north south line defined by extending County Road 83 to the northern most and southern most extension to their respective water boundaries of Brookhaven town and the town's incorporated villages is hereby established and designated to be the Long Island Pine Barrens Maritime reserve.

2. Within the reserve and within forty-five days of the effective date of this subdivision, the commission shall file with the secretary of state the maps of the Central Pine Barrens area classifying and depicting the core preservation area as defined, which comprises the largest essentially intact areas of undeveloped pine barrens ecology, and the compatible growth area where appropriate patterns of development and regional growth shall be permitted and shall file a certified copy thereof with the county clerk of Suffolk county and the clerk of each town or village whose boundaries are included within the Central Pine Barrens area. Notice of the filing and availability of such map shall be published at least twice in the paper of general circulation in the county of Suffolk. An affected property owner may petition the commission for precise delineation or adjustment of boundary as it

applies to the affected property. The commission shall have discretionary powers to modify the boundaries of the core preservation area by up to three hundred feet as circumstances warrant after notification to the affected property owner or owners, except no boundary defined by a state or county highway or navigable waterway shall be modified to extend beyond such highway or waterway.

§ 57-0111. Long Island Pine Barrens maritime reserve council.

1. There is hereby established, within the department, a Long Island Pine Barrens maritime reserve council to help local governments and the state coordinate the efforts of all municipal, county, state and federal agencies involved in the management of the preserve and to oversee and prepare a comprehensive intergovernmental management plan for the Long Island Pine Barrens maritime reserve that the state and local governments may adopt.

2. The council shall be composed of seventeen voting members. The governor shall appoint three members. The county executive of the county of Suffolk, with the advice and consent of the county legislature, shall appoint four members. The town supervisors of the towns of Riverhead, Southold, Shelter Island, Southampton, East Hampton and Brookhaven shall each appoint one member. The commissioner or his or her designee, the commissioner of parks, recreation and historic preservation or his or her designee, the secretary of state or his or her designee for purposes of matters related to coastal resources and the commissioner of economic development or his or her designee for purposes of tourism shall serve as ex-officio members. All members, except ex-officio members shall be residents of the county of Suffolk and shall have demonstrated expertise in the functional areas to be addressed by the commission. All initial appointments shall be made within sixty days of the effective date of this title.

3. Members of the council shall serve for a term of two years or thereafter until a successor is appointed. A chairperson shall be designated by the governor. The council shall elect a vice-chairperson

and such other officers as it may determine are necessary for the conduct of its duties.

4. Ten members of the council shall constitute a quorum.

5. The members of the council shall serve without compensation.

§ 57-0113. Duties of the council.

The council shall have the following powers and duties:

1. to conduct scientific and environmental studies;

2. to review and approve proposed dedications of lands to the Long Island Pine Barrens maritime preserve and recommend additional dedications to such maritime preserve;

3. to utilize to the extent feasible, the staff and facilities of state agencies, subject to the approval of the director of the budget, and local agencies to carry out the provisions of this title;

4. to hold public hearings;

5. to contract within amounts appropriated for or otherwise available for professional and technical assistance or advice;

6. to meet not less than once every two months and to encourage the attendance at such meetings of representatives of local governments and interested parties affected by the deliberations of the council;

7. to send copies of the minutes of each meeting to each town and village within the Long Island Pine Barrens maritime reserve, the members of the assembly and senators representing such area and any other interested party upon request;

8. to encourage individuals, corporations, associations and public

entities to protect and preserve the unique resources of the reserve including the preserve; and

9. to contract for and to accept assistance, including but not limited to gifts, easements or loans of funds or real property or personal property from the federal government or any agency or instrumentality thereof, or from any agency or instrumentality of the state, or from any other public or private source and to comply, subject to the provisions of this title, with the terms and conditions thereof, subject to the approval of the division of the budget. Notwithstanding the provisions of section eleven of the state finance law, the commission may accept gifts, grants, devises and bequests, whether conditional or unconditional, with the approval of the director of the budget.

§ 57-0115. Comprehensive management plan.

1. The council shall, after holding public hearings, prepare and adopt a comprehensive management plan for the Long Island Pine Barrens maritime reserve, which the state and local governments may adopt. Such plan shall include, but not be limited to:

a. a statement of the public values of the area, including their educational, ecological and hydrological values, together with the general goals and policies which will best protect and enhance such values;

b. a map of the area, delineating the boundaries of the Long Island Pine Barrens maritime reserve;

c. a brief and general historical overview regarding the lands of the Long Island Pine Barrens maritime reserve;

d. an inventory of all public lands and lands available for public use within the Long Island Pine Barrens maritime reserve specifying use, facilities for public use, and the management agency with jurisdiction over the property;

e. management guidelines for the preservation, recreational and educational use of resources of the Long Island Pine Barrens maritime reserve;

f. management guidelines for protecting and supporting indigenous economic activities like agriculture, fishing, recreation and tourism;

g. a plan for protection and management for dedicated land in the Long Island Pine Barrens preserve including:

(1) A survey or inventory of the following, together with the establishment of management priorities therefor:

- (i) natural plant and wildlife resources;
- (ii) historic resources;
- (iii) erosion control needs and stream protection;
- (iv) trails, trail development and use; and
- (v) other recreational uses.

(2) Recommendations for the enforcement of laws pertaining to public use activities, which can be implemented by rules and regulations for the administration and use of lands dedicated to the preserve.

(3) Recommendations for acquisition of open space suitable for dedication in the preserve.

(4) Recommendations for institutional arrangements to coordinate management of dedicated land held by separate owners;

h. a local participation plan, which describes how local citizens, officials and members of the tourism, agricultural and fishing industries will participate in the planning and implementation of the management program and which contains a statement identifying support for such program by the participating local governments; and

i. a financial statement estimating the necessary costs and potential funding sources to carry out recommendations in the study over a five year period and the benefits therefrom.

2. A draft plan shall be prepared and made available to the public and the local governments within the Long Island Pine Barrens maritime

reserve prior to adopting the plan. The council shall hold public hearings at different locations within the Long Island Pine Barrens maritime reserve. There shall be two public hearings on the draft plan and there shall also be a public hearing on the completed plan before the plan is submitted to the commissioner.

§ 57-0117. Dedications to the Long Island Pine Barrens preserve; legislative protection.

1. The commissioner shall maintain a record of the boundaries of the lands which have been dedicated to the Long Island Pine Barrens preserve in text and depicted on a map.

2. Land owned by the state within the Long Island Pine Barrens maritime reserve may be dedicated to be part of the Long Island Pine Barrens preserve by the action of the commissioner or the commissioner of parks, recreation and historic preservation, or by action of the legislature.

3. Land owned by a local government within the Long Island Pine Barrens maritime reserve may be dedicated to the Long Island Pine Barrens preserve by the action of its local legislative body.

4. Land owned by private individuals within the Long Island Pine Barrens maritime reserve may be dedicated to be part of the Long Island Pine Barrens preserve by the execution of a conservation easement.

5. Land in the core preservation area which come in the public domain shall be deemed to be dedicated to the Long Island Pine Barrens Preserve.

6. Except for the core preservation area which shall be deemed to be dedicated to the preserve, the council shall review and must approve each dedication of land to the preserve.

7. No publicly owned real property, dedicated to the Long Island Pine

Barrens preserve, shall be alienated except by law enacted by two successive regular sessions of the legislature, but easements for public water supply purposes may be maintained consistent with local ordinances.

8. The council shall have no authority to manage any private land unless such land has been voluntarily dedicated pursuant to this title or the owner has executed a voluntary written agreement with the council authorizing the specific management actions taken.

9. Nothing contained in this title shall affect any previous dedication of state land to the State Nature and Historic preserve. Any state land dedicated to the Long Island Pine Barrens preserve may also be dedicated to the State Nature and Historic preserve.

§ 57-0119. Central Pine Barrens joint planning and policy commission.

1. It is hereby found, determined and declared that the Long Island Central Pine Barrens area is a major resource area of statewide significance where the hydrological and ecological integrity is endangered; that a public entity representative of town, county and state government is necessary and appropriate to plan, manage and oversee land use within the Central Pine Barrens area of Long Island Pine Barrens Maritime reserve in the public interest for present and future generations; and that the Central Pine Barrens joint planning and policy commission created by this section and its purposes are in all respects for the benefit of the people of the state of New York and are a public purpose.

2. There is hereby established, the Central Pine Barrens joint planning and policy commission to consist of five voting members: one member appointed by the governor who will serve at the pleasure of the governor and four ex officio members who are the county executive of Suffolk county, the supervisor of the town of Brookhaven, the supervisor of the town of Riverhead and the supervisor of the town of Southampton. Each ex officio member may appoint a designated representative, by

official authority filed with the commission, to exercise his or her powers and perform his or her duties, including the right to vote, on the commission. The commission shall elect one of its members as chairperson. Four members shall constitute a quorum for the transaction of any business or the exercise of any power or function of the commission. An affirmative vote of three or more members shall be required to pass a resolution or otherwise exercise any functions or powers of the commission, except the adoption of the plan which requires a unanimous vote of the commission.

3. The commission shall hold its initial meeting within thirty days of enactment of this section, following public notice by the county executive.

4. Every state agency and public corporation having jurisdiction of land or water within the Central Pine Barrens area or of programs relating to the purposes and goals of this title shall, to the fullest extent practicable, offer full cooperation and assistance to the commission in carrying out the provisions of this title.

5. Every local or regional agency with activities relating to the Central Pine Barrens area may offer assistance to the commission in carrying out the provisions of this title.

6. The commission shall have the power:

(a) To prepare, adopt, enforce and ensure implementation of the comprehensive land use plan, with the advice of the advisory committee;

(b) To sue and be sued;

(c) To make and execute contracts and all other instruments necessary or convenient for the exercise of its powers and functions under this title;

(d) To establish and maintain such facilities as may be necessary for the transacting of its business;

(e) To appoint an executive officer, officers, agents, employees, and prescribe their duties and qualifications and fix their compensation;

(f) To utilize to the extent feasible the staff and facilities of existing state and county agencies, pursuant to an agreement to be made

by the state or by the county of Suffolk;

(g) To hold hearings in the exercise of its powers, functions and duties provided for by this title;

(h) To contract for professional and technical assistance and advice;

(i) To contract for and to accept any assistance, including but not limited to gifts, grants or loans of funds or of property from the federal government or any agency or instrumentality thereof, or from any agency or instrumentality of the state, or from any other public or private source and to comply, subject to the provisions of this title, with the terms and conditions thereof;

(j) To establish regulations, values, and standards which may include a system of bonuses and incentives in order to purchase, sell, hold and trade development rights as defined in paragraph a of subdivision one of section two hundred sixty-one-a of the town law; such transfers may cross municipal and special district boundaries;

(k) To adopt, amend and repeal, after public hearing (except in the case of rules and regulations that relate to the organization or internal management of the agency), such rules and regulations, consistent with this title, as it deems necessary to administer this title, and to do any and all things necessary or appropriate to carry out the purposes and policies of this title and exercise powers granted by law;

(k-1) To purchase the maximum insurance, practicable and affordable from revenues in the Pine Barrens fund pursuant to section ninety-seven-o of the state finance law, from any duly authorized insurer in this state, against any liability subject to indemnity pursuant to subdivision six of section 57-0123 of this chapter;

(k-2) To acquire, hold lands and interest in land, and utilize the power of eminent domain within available funds in the Pine Barrens fund pursuant to section ninety-seven-o of the state finance law or made available by local, county, or state government;

(l) To provide scientific and technical assistance or to make grants to municipalities, towns and the county for revisions of local master plans, or the relevant ordinances designed to bring such plans and ordinances into conformance with the comprehensive land use plan prepared and adopted by the commission. The commission may make such grants from any funds which may be appropriated or otherwise made

available to it for such purpose;

(m) To establish and maintain an education and outreach program relating to the commission's work;

(n) To convene conferences, seminars, meetings, technical sessions on its own or in coordination with federal, state, county, town or private organizations as deemed necessary relative to its responsibilities;

(o) To report periodically to the governor and the legislature on the conduct of its activities not less than once a year, furnishing a copy of each such report to the legislative bodies of Suffolk county and the towns and villages in whole or in part within the Central Pine Barrens area;

(p) To assist local, county and state government in prioritization and negotiation with private landowners whose property is restricted by the land use plan, to evaluate the impact of any restrictions and develop a package of benefits; and

(q) To have and exercise such other incidental and usual powers as are necessary and appropriate to carry out its duties.

7. The commission shall within six months of the first meeting of the commission:

(a) Inventory all private parcels within the core preservation area.

(b) Upon completion of the inventory, notify property owners and assign and calculate the development yield for each property located in the core preservation area. Development yield may be calculated in accordance with such factors as area, floor area, floor area ratios, density, height limitations or other criteria that will effectively quantify a value for establishing development rights in a reasonable and uniform manner that will carry out the objectives of this title.

8. The commission shall within twelve months of the first meeting of the commission:

(a) Identify receiving districts within and without the Central Pine Barrens sufficient to receive and transfer of rights and values of the core preservation area and for the continuation of an adequate program of development rights or development values.

(b) Consider the fiscal impact of the established transfer of development rights and values system.

9. There is hereby created a Central Pine Barrens advisory committee to actively assist and advise the commission in the preparation, adoption and implementation of the Central Pine Barrens comprehensive land use plan. The committee shall consist of not more than twenty-eight members which shall include representatives of environmental groups, economic development and real estate interests, farmers, water suppliers, civic groups, planners, biologists, water quality scientists and recreational interests. The members of the committee shall serve without compensation. The initial members of the advisory committee shall include a representative of the Long Island Association, Long Island Builders Institute, Association For A Better Long Island, Long Island Board of Realtors, Long Island Farm Bureau, Suffolk County Water Authority, SUNY at Stony Brook, Regional Plan Association, Long Island Pine Barrens Society, Group For The South Fork, The Nature Conservancy, North Fork Environmental Council, Open Space Council, Long Island Greenbelt Trail Conference, Environmental Defense Fund, Eastern Suffolk Board of Realtors, Southampton Alliance, South Fork Promotion Committee or their successors and interests, a member from the Long Island regional planning board, two members from the New York state legislative commission on water resource needs of Long Island and a civic representative from each of the towns of Southampton, Brookhaven and Riverhead designated by the supervisor thereof. The committee may be expanded as necessary to incorporate other interests in the development and preservation of the Central Pine Barrens preserve. Each member shall serve at the pleasure of the entity which designated it. The committee by a majority vote shall elect a chairperson. The commission shall meet periodically with the advisory committee, make available working draft and other documents, and shall provide services to the advisory committee as are necessary and appropriate to carry out its functions under this title.

§ 57-0121. Central Pine Barrens comprehensive land use plan; interim regulations.

1. As soon as practicable and within twelve months of the effective

date of this section, the commission shall, after consultation with the advisory committee, prepare or cause to be prepared a draft comprehensive land use plan and generic environmental impact statement thereon which shall be part of the plan for the Central Pine Barrens area. The land use plan shall be designed to preserve the Pine Barrens ecology and to ensure the high quality of groundwater within the Central Pine Barrens area and to balance the public and private interests in development and in protection of the Pine Barrens ecology consistent with the objectives of the land use plan. Where local plans exist, the commission shall evaluate and incorporate such plans as is appropriate in the land use plan.

2. The land use plan for the Central Pine Barrens area shall be designed to:

(a) protect, preserve and enhance the functional integrity of the Pine Barrens ecosystem and the significant natural resources, including plant and animal populations and communities, thereof;

(b) protect the quality of surface water and groundwater;

(c) discourage piecemeal and scattered development;

(d) promote active and passive recreational and environmental educational uses that are consistent with the land use plan; and

(e) accommodate development, in a manner consistent with the long term integrity of the Pine Barrens ecosystem and to ensure that the pattern of development is compact, efficient and orderly.

3. The land use plan with respect to the core preservation area shall be designed to protect and preserve the ecologic and hydrologic functions of the Pine Barrens by:

(a) preserving the Pine Barrens area in their natural state thereby insuring the continuation of Pine Barrens environments which contain the unique and significant ecologic, hydrogeologic and other resources representative of such environments;

(b) promoting compatible agricultural, horticultural and open space recreational uses within the framework of maintaining a Pine Barrens environment and minimizing the impact of such activities thereon;

(c) prohibiting or redirecting new construction or development;

(d) accommodating specific Pine Barrens management practices, such as

prescribed burning, necessary to maintain the special ecology of the preservation area;

(e) protecting and preserving the quality of surface and groundwaters; and

(f) coordinating and providing for the acquisition of private land interests as appropriate and consistent with available funds.

4. The land use plan with respect to the compatible growth areas shall be designed to:

(a) preserve and maintain the essential character of the existing Pine Barrens environment, including plant and animal species indigenous thereto and habitats therefor;

(b) protect the quality of surface and groundwaters;

(c) discourage piecemeal and scattered development;

(d) encourage appropriate patterns of compatible residential, commercial, agricultural, and industrial development in order to accommodate regional growth influences in an orderly way while protecting the Pine Barrens environment from the individual and cumulative adverse impacts thereof;

(e) accommodate a portion of development redirected from the preservation area. Such development may be redirected across municipal boundaries; and

(f) allow appropriate growth consistent with the natural resource goals pursuant to this title.

5. Preparation of the land use plan shall be based on the following planning studies and reports:

(a) Previously undertaken and current groundwater and ecological studies pertaining to the reserve, generally, and the Central Pine Barrens area, specifically;

(b) General planning studies of the reserve, generally, and the Central Pine Barrens area, specifically, including but not limited to:

(i) population and population distribution;

(ii) amount, type, intensity, and general location of commerce, industry and agricultural production;

(iii) amount, type, quality, and general location of housing;

(iv) general location and extent of existing or currently planned

major transportation, utility, and community facilities;

(v) amount, general location, and interrelationship of different categories of land use;

(vi) areas, sites, or structures of historical, archaeological, architectural, or scenic significance;

(vii) natural resources, including air, water, open spaces, forests, soils, rivers, wetlands and other waters, shorelines, fisheries, wildlife, vegetation, threatened species, and minerals; and

(viii) any other matter found to be important to preservation and future development.

(c) Scientific research prepared for other hydrological or ecological areas analogous to the reserve, generally, and the Central Pine Barrens area specifically. Such studies and reports may include, but are not limited to those undertaken by the New Jersey Pinelands commission or Cape Code commission.

(d) Public improvement studies including but not limited to the area or subareas within the Central Pine Barrens area or outside such area having an aggregation of sites with development potential to facilitate application of transfer of development rights that could create the need for new public improvements and/or public improvement expansions;

(e) Advisory committee recommendations or reports.

6. The land use plan shall provide for, address and include but not be limited to the following:

(a) Statements of objectives, policies and standards as they pertain to the purposes of this title and the land use plan.

(b) A map depicting the core preservation area.

(c) A map depicting compatible growth areas in the Central Pine Barrens area where orderly and environmentally compatible development can be encouraged and to which development potential within the preserve may be transferred.

(d) A phased public improvement element for providing the public facilities necessary for carrying out the goals for the core preservation and compatible growth areas.

(e) Identification and mapping of critical resource areas within the Central Pine Barrens area which are of regional or statewide significance. Such areas shall include fragile lands, significant

shorelands of rivers, lakes, and streams; freshwater wetlands; significant wildlife habitats; unique scenic or historic features; and rare or valuable ecosystems and geological formations which are of regional or statewide significance.

(f) Identification of sending districts in core preservation and compatible growth areas and receiving districts in compatible growth areas and outside the Central Pine Barrens area for the purpose of providing for the transfer of development rights and values to further the preservation and development goals of the land use plan and methodologies and standards for procedural equity and appropriate values in establishing rights and values consistent with the provisions of section two hundred sixty-one-a of the town law.

(g) Identification of land suitable for agricultural use and necessary and appropriate strategies to protect land capable of agricultural production.

(h) Development criteria and performance standards.

(i) An intergovernmental coordination and consistency component establishing the ways in which state and local programs and policies may best be coordinated to promote the goals and implement the policies of the land use plan.

(j) A financial component analyzing the public and private costs of developing and implementing the land use plan which shall include:

(i) detailed costs including those for infrastructure improvements, acquisition of fee simple or other interests in lands for preservation or recreation purposes, compensation guarantees, general administrative costs and any anticipated extraordinary or continuing costs; and

(ii) the source of revenue for covering such costs, including, but not limited to, grants, donations and loans from local, state and federal departments and agencies and from the private sector.

(k) A program for state, county and local governmental implementation of the comprehensive land use plan and the various elements thereof in a manner that will insure the continued, uniform, and consistent protection of the Pine Barrens ecosystem and development objectives including:

(i) minimum standards for the adoption, as required in this title, of municipal and county plans, codes and ordinances concerning the development and use of land including, but not limited to, standards for

minimum lot sizes, site clearance and wetland setbacks, appropriate population and densities and regulated or prohibited uses for specific portions of the Pine Barrens area and procedures for determining hardship consistent with the purposes and provisions of this title;

(ii) guidelines and standards for review of projects of regional significance which because of scale of intensity of use or location are likely to impede implementation of the land use plan; and

(iii) guidelines for consistency with the land use plan by state, county and local agencies.

(l) Professional staffing requirements necessary to carry out the land use plan.

(m) Land protection mechanisms, including, but not limited to, acquisition, conservation easements, rights and values transfers, purchase of development rights, donations and clustering, planned unit development, land trusts, exchanges between privately and publicly owned lands, or other zoning activities consistent with the provisions of this title.

(n) Provisions for use of best management practices, in all natural resource-dependent commercial and industrial activities, including agriculture, horticulture and related activities.

(o) Provisions for restoration of natural and cultural resources where such resources have been damaged, lost, or otherwise impaired. Such work shall address restoration of Pine Barrens habitats, stream and shore revitalization, historic structures, traditional industries demonstration programs, and strengthening of community character which will be consistent with the provisions of the comprehensive management plan pursuant to section 57-0115 of this title.

(p) Provisions for cumulative impact analyses, both environmental and economic, for the effects of development, preservation, financial policies and related factors upon the Central Pine Barrens area, its private and public open space, its residents and constituents, school and other special districts, and other pertinent aspects or demographic sectors.

(q) Recommendations for further legislation at the state, county, and local levels as may be necessary to fully implement the provisions of this title.

(r) Provisions for management and stewardship of natural and cultural

resources which shall include coordination by owners of public lands which will be consistent with the provisions of the comprehensive management plan pursuant to section 57-0115 of this title.

(s) Provisions for appropriate and relevant scientific research relating to the species, ecological communities and processes, natural landscape features, and surface and groundwater resources of the Central Pine Barrens necessary to ensure and enhance the long-term management of the preserve. Such research may be addressed in a cooperative effort with the state university of New York at Stony Brook through its biological research station, established by the department of ecology and evolution.

(t) Provisions for fire management for controlled, prescribed burning, and responses to unanticipated fires. This shall include coordination among the department and local fire departments.

(u) Description of developments of regional significance.

The land use plan shall also, as funds permit, provide for a follow-up plan to be undertaken by the commission for a partnership infrastructure and sustainable development plan for the reserve. Based on the land use plan and the comprehensive management plan, such follow up plan shall be designed to (i) coordinate the activities of all governmental entities in the provision of infrastructure necessary to support orderly development in the compatible growth areas and support of sustainable development in the reserve outside of the preserve; and (ii) coordinate and focus investment in sustainable development efforts.

7. Notwithstanding any provision contrary to any other provisions of article eight of this chapter, the commission shall be the lead agency for the generic environmental impact statement which is part of the land use plan. Such generic environmental impact statement shall be prepared in accordance with the provisions of article eight of this chapter.

8. In order to effectuate the purposes and provisions of this title, no person, public corporation or the state shall undertake or otherwise engage in development within the Central Pine Barrens area prior to approval and implementation of the land use plan except as provided by this section. No amendments to the existing town or village zoning laws,

ordinances or regulations affecting development within the Central Pine Barrens area shall take effect prior to the approval of the land use plan as provided in this chapter except that a town may as part of a zoning ordinance adopted pursuant to article sixteen of the town law or by local law pursuant to other enabling law, provide for a planned unit development or planned development district ordinance for a development for which the designated lead agency, on or before June first, nineteen hundred ninety-three, accepted a draft environmental impact statement or draft generic environmental impact statement under article eight of this chapter. The provisions of this section shall not apply to development in the compatible growth area for which:

(a) the designated lead agency, on or before June first, nineteen hundred ninety-three, accepted a draft environmental impact statement or draft generic environmental impact statement or issued a conditioned negative declaration or a negative declaration under article eight of this chapter, or

(b) all required municipal and state permits and approvals were issued on or before June first, nineteen hundred ninety-three (except that a building permit need not have been issued by said date), or

(c) The designated lead agency, after June first, nineteen hundred ninety-three and prior to ninety days immediately following adoption of this section or as extended at the discretion of the commission in its interim rules and regulations adopted pursuant to section nine herein, issues on an active application a conditioned negative declaration or a negative declaration under article eight of this chapter and which does conform to the use and lot area requirements of the zoning in effect in the relevant municipality on June first, nineteen hundred ninety-three, and does not necessitate a use variance. Notwithstanding the foregoing, in the event a commissioner within thirty days of receiving notice of said issuance requests review of the action by the full commission, the development shall be subject to the interim rules and regulations and reviewed as provided for in section nine herein.

In the event that an event referred to herein (acceptance of a draft environmental impact statement or draft generic environmental impact statement; issuance of a conditioned negative declaration or negative declaration; or issuance of a required permit or approval) is annulled

or vacated by a court of competent jurisdiction and such judicial action has not been reversed by a superior court, then, for purposes of this section, such event shall be deemed not to have taken place.

Notwithstanding any other provision of law, any development which includes land within the core preservation area for which the designated lead agency, on or before June first, nineteen hundred ninety-three, accepted a draft environmental impact statement or draft generic environmental impact statement shall not require a supplemental draft or generic environmental impact statement under article eight of this chapter solely because such development includes land within the core preservation area.

9. Within three months of the effective date of this section, the commission shall publish interim goals and standards for development and for hardship before the land use plan is implemented in compatible growth areas identified in the map. The commission may vary the procedures and time periods for compliance with article eight of this chapter as necessary and appropriate to comply with the three month deadline of this subdivision. Upon such publication, development may proceed in such compatible growth areas subject to existing laws, regulations and approval procedures and subject to the review and approval of the commission. Any person, the state or a public corporation applying for development in such compatible growth areas who has received all necessary local and state approvals may petition the commission for approval of the development. Within thirty days of an application being received, the commission shall provide the applicant and any other interested party an opportunity to be heard. Notice of such hearing shall be published in a newspaper having a general circulation in the Central Pine Barrens area, and notice of such hearing shall also be given by registered mail to the chief administrative officer of each town and village within whose boundary any proposed development is located. If the proposed development is consistent with the commission's interim goals and standards, the commission shall approve the development and may include conditions for approval. If the applicant seeks an exemption based upon a demonstration of hardship, the commission may approve development in the compatible growth area upon

the finding that such interim goals and standards caused an unnecessary hardship. In making such finding the commission shall consider the criteria for a use variance pursuant to section two hundred sixty-seven-b of the town law. The commission must make a decision within one hundred twenty days of receipt of a complete application. If the commission fails to make a decision within one hundred twenty days, the development shall be deemed to be approved by the commission, unless extended by mutual agreement of the applicant and commission.

10. Any person, the state or a public corporation upon a showing of hardship caused by the provisions of subdivision eight of this section on development in the core preservation area, may apply to the commission for a permit exempting such applicant from such subdivision eight in connection with any proposed development in the core preservation area. Such application for an exemption pursuant to the demonstration of hardship within the core preservation area shall be approved only if the person satisfies the following conditions and extraordinary hardship or compelling public need is determined to have been established under the following standards or for development by the state or a public corporation or proposed for land owned by the state or a public corporation compelling public need is determined to have been established under the following standards:

(a) The particular physical surroundings, shape or topographical conditions of the specific property involved would result in an extraordinary hardship, as distinguished from a mere inconvenience, if the provisions of this act are literally enforced. A person shall be deemed to have established the existence of extraordinary hardship only if he or she demonstrates, based on specific facts, that the subject property does not have any beneficial use if used for its present use or developed as authorized by the provisions of this title, and that this inability to have a beneficial use results from unique circumstances peculiar to the subject property which:

(i) Do not apply to or affect other property in the immediate vicinity;

(ii) Relate to or arise out of the characteristics of the subject property rather than the personal situation of the applicant; or

(iii) Are not the result of any action or inaction by the applicant or

the owner or his or her predecessors in title including any transfer of contiguous lands which were in common ownership on or after June 1, 1993.

(b) A person, the state or a public corporation shall be deemed to have established compelling public need if the applicant demonstrates, based on specific facts, one of the following:

(i) The proposed development will serve an essential health or safety need of the municipalities in the Central Pine Barrens such that the public health and safety require the requested waiver, that the public benefits from the proposed use are of a character that overrides the importance of the protection of the core preservation area as established in this title, that the proposed use is required to serve existing needs of the residents, and that no feasible alternatives exist outside the core preservation area to meet the established public need and that no better alternatives exist within the county; or

(ii) The proposed development constitutes an adaptive reuse of an historic resource designated by the commission and said reuse is the minimum relief necessary to ensure the integrity and continued protection of the designated historic resource and further that the designated historic resource's integrity and continued protection cannot be maintained without the granting of a permit.

(c) An application for a permit in the core preservation area shall be approved only if it is determined that the following additional standards also are met:

(i) The granting of the permit will not be materially detrimental or injurious to other property or improvements in the area in which the subject property is located, increase the danger of fire, endanger public safety or result in substantial impairment of the resources of the core preservation area;

(ii) The waiver will not be inconsistent with the purposes, objectives or the general spirit and intent of this title; or

(iii) The waiver is the minimum relief necessary to relieve the extraordinary hardship, which may include the granting of a residential development right to other lands in the compatible growth area that may be transferred or clustered to those lands to satisfy the compelling public need.

Any waiver or exemption granted under the provisions of this part shall only be considered an exemption or waiver of the particular standard of this title which the commission waived. It shall not constitute an approval of the entire development proposal. Nor shall it constitute a waiver from any requirements contained within any local, county or state law or ordinance.

Within thirty days of the application being received, the commission shall provide the applicant and any other interested party an opportunity to be heard. Notice of any public hearing conducted in connection with an application for such a permit shall be published in a newspaper of general circulation in the Central Pine Barrens area. If the proposed development is not contrary to the policy or any provision of this title and meets the standards of extraordinary hardship or public need herein, and the commission so finds, it may issue a permit allowing the development or such development subject to appropriate conditions or modifications to occur, provided that permission may be revoked by the commission if its terms are violated, and provided further that any such hardship permit issued by the commission shall be in addition to, and not in lieu of, such permit or permits as may be required by any state agency or municipality within whose boundary such development is located. The time within which the commission must decide a core preservation area hardship application for which a negative declaration has been made by the commission pursuant to article eight of this chapter is one hundred twenty days from receipt of such application. The time within which the commission must decide a core preservation area hardship application for which a positive declaration has been made by the commission pursuant to article eight of this chapter is sixty days from issuance of a findings statement by the commission pursuant to article eight of this chapter. If the commission fails to make a decision within the aforesaid time periods, the development shall be deemed to be approved by the commission, unless extended by mutual agreement of the applicant and commission.

11. In preparation of the land use plan, the commission shall:

(a) consult with appropriate officials of any regional, state or federal agency which has jurisdiction over lands and waters within the

Central Pine Barrens area;

(b) consult with the officials of any municipality which has jurisdiction over lands and waters within the Central Pine Barrens area;

(c) consult with interested professional, scientific and citizens' organizations; and

(d) consult with citizens' committees.

12. Following consultation with the advisory committee and within the twelve month period established therefor, the commission shall publish the draft land use plan. Within three months of such publication, the commission shall hold public informational meetings in the towns of Brookhaven, Riverhead and Southampton and at least one public hearing within the Central Pine Barrens area. During this period the commission shall receive and review comments on the draft land use plan-generic environmental impact statement from state and local governments and the public and within three months, the commission shall recommend a revised comprehensive land use plan pursuant to this title to the respective town boards of such towns for their ratification and adoption. Within two months of the commission recommending the plan to the respective town boards, the town boards shall perform a comprehensive review of the plan and shall provide final comments to the commission. The commission at its discretion may modify the plan as requested by the town representatives. After modifying the plan as necessary, the commission shall prepare a draft supplemental generic environmental impact statement and a final generic environmental impact statement, and the towns and commission shall adopt the necessary statement of findings pursuant to article eight of this chapter. Ratification and adoption of the plan by the town boards of Brookhaven, Riverhead, and Southampton shall represent commitment to implementation of the provisions contained therein. Upon ratification and adoption by such three towns, the commission itself will formally adopt the plan-generic environmental impact statement and its provisions shall be in full force. Adoption by the commission shall only be upon the signature of the governor, county executive of Suffolk county, supervisor of the town of Brookhaven, supervisor of the town of Riverhead and supervisor of the town of Southampton.

13. Not less than once every five years after the land use plan has become effective, the commission shall review and, if appropriate, make amendments to the land use plan and update the generic impact statement. Within each such period, the commission shall hold a public hearing and shall receive comments on the effectiveness of implementation of the land use plan. Not less than thirty days before voting on an amendment to the land use plan, the commission shall publish notice thereof in a newspaper of general circulation in the Central Pine Barrens area.

§ 57-0123. Implementation of the Central Pine Barrens comprehensive land use plan.

1. Within three months after the land use plan has been adopted by the commission, each town board and village board with jurisdiction within the Central Pine Barrens area shall adopt and amend as necessary land use and zoning regulations, by local law or ordinance, rule or regulation to conform their land use regulations to the land use plan. Such action shall not be subject to the provisions of article eight of this chapter if it is in conformance with the conditions and thresholds of the land use plan. At least thirty days before adoption thereof, the town or village board shall submit the proposed regulations to the commission for its review and approval. Within ten days of receipt of such proposed regulations, the commission shall review and approve such proposed regulations, or if it does not approve them, return them with comments on what needs to be done to make them approvable. For each jurisdiction, the land use plan shall be deemed to be implemented upon adoption by the town or village board of approved land use regulations. The interim regulation provisions of subdivisions eight, nine, and ten of section 57-0121 of this title shall remain in effect for each town or village until it has adopted approved land use regulations to conform to the adopted comprehensive management plan. Within villages that were incorporated on or before June 30, 1993, whose land use and zoning regulations are approved by the commission consistent with the land use plan pursuant to section 57-0121 of this title, development which conforms to such land use and zoning regulations and does not have significant adverse impacts on the goals of the land use plan shall not

be subject to review by the commission. After town or village land use regulations have been approved and upon a finding that a town or village has changed such regulations in a manner substantially inconsistent with the land use plan or has administered its approved land use regulations in a manner substantially inconsistent with the land use plan, the commission shall withdraw approval of such land use regulations and the provisions of subdivisions eight, nine and ten of section 57-0121 of this title shall be reinstituted. Such withdrawal of approval shall be made not before fourteen days after the commission holds a public hearing in the affected town or village on the proposed withdrawal. Notice of such hearing shall be published in a newspaper having general circulation in the Central Pine Barrens area and notice of such hearing shall also be given by registered mail to the affected supervisor or mayor.

2. (a) The commission shall have jurisdiction to review and approve all proposed development in critical resource areas and developments of regional significance as identified in the land use plan and proposed developments found by the commission after petition by a commissioner to have significant adverse impact on the land use plan. Any commissioner may petition the commission to assert review jurisdiction over a proposed development outside of a critical resource area or which is other than a project of regional significance which has a significant adverse impact on the goals of the land use plan. If the commissioner by majority vote asserts jurisdiction, such project or action shall be subject to review by the commission. For the purposes of review and identification of projects coming under the jurisdiction of the commission by virtue of critical resource area or area of regional impact or at the request of any commission member, the commission shall designate the responsible planning entity or staff for the purposes of advising the commission with respect to such applications or projects. To the fullest extent possible, the commission shall consolidate and coordinate its review with the appropriate local government. A person, the state or a public corporation proposing development in a critical resource area or development of regional significance shall apply to the commission for approval of the development. Applications shall be made to the commission on forms and in such manner as the land use plan and

commission shall designate.

(b) The commission must make a decision within one hundred twenty days of the receipt of a complete application. If the commission fails to make a decision within one hundred twenty days, the development shall be deemed to be approved by the commission, unless extended by mutual agreement of the applicant and the commission. The commission must make a decision within one hundred twenty days of asserting jurisdiction over a project that is before the commission based on the petition by a commissioner. If the commission fails to make a decision within one hundred twenty days of the date of asserting jurisdiction, the development shall be deemed to be approved by the commission, unless extended by mutual agreement of the applicant and the commission.

3. (a) Subsequent to the adoption of the land use plan, the provisions of any other law, ordinance, rule or regulation to the contrary notwithstanding, no application for development within the Central Pine Barrens area shall be approved by any municipality or county or agency thereof or the commission, and no state approval, certificate, license, consent, permit, or financial assistance for the construction of any structure or the disturbance of any land within such area shall be granted, unless such approval or grant conforms to the provisions of such land use plan; provided, however, that the commission by majority vote is hereby authorized to waive strict compliance with such plan or with any element or standard contained therein, for an application for development of any person, upon finding that such waiver is necessary to alleviate hardship for proposed development in the core preservation area according to the conditions and finding of extraordinary hardship or compelling public need pursuant to subdivision ten of section 57-0121 of this title, or for an application for development by the state or public corporation or proposed for land owned by the state or public corporation finding that such waiver is necessary to alleviate hardship for proposed development in the core preservation area according to the conditions and finding of compelling public need pursuant to subdivision ten of section 57-0121 of this title, and every application is consistent with the purposes and provisions of this article and would not result in substantial impairment of the resources of the Central Pine Barrens area.

(b) The commission by majority vote is also authorized to waive strict compliance with such plan or with any element or standard contained therein, upon finding that such waiver is necessary to alleviate hardship for development proposed by any person, the state or a public corporation in the compatible growth area according to the conditions and findings of hardship pursuant to subdivision nine of section 57-0121 of this title, is consistent with the purposes and provisions of this title and would not result in substantial impairment of the resources of the Central Pine Barrens area.

(c) The commission must make a decision within the time periods established pursuant to subdivision ten of section 57-0121 of this title. If the commission fails to make a decision within the aforesaid time periods, the development shall be deemed to be approved by the commission, unless extended by mutual agreement of the applicant and the commission. The aforesaid time period and the processing and review of an application shall be suspended by the commission with notice to the applicant where a proceeding pursuant to section 57-0136 of this title is pending against the applicant with respect to the property at issue or otherwise arising out of the ownership or use of such property.

4. Notwithstanding any inconsistent provisions in article eight of this chapter and within towns and villages with approved land use regulations, actions wholly within the Central Pine Barrens area in conformance with the conditions and thresholds of the land use plan and the generic environmental impact statement thereof shall require no further environmental impact statement with respect to impacts addressed in such generic environmental impact statement. Further project-specific compliance with article eight of this chapter may be required. Upon ratification by the towns and adoption of the land use plan by the commission, the consistency provisions of article fifty-five are no longer required.

5. Notwithstanding any other provision of law, any state agency may provide in implementing a ranking system for allocating funds for infrastructure, land acquisition, farmland preservation or park assistance projects a preference not to exceed the equivalent of an advantage of five percent for such projects which are identified in a

land use plan.

6. For the county of Suffolk, and each town or village implementing regulations wholly within the Central Pine Barrens area approved by the commission, there may be defense by and shall be indemnity from the state in the event of legal actions or proceedings brought against any such municipalities or their agents, servants, officials or employees that may result from the municipal acquisition of land consistent with the land use plan or comprehensive management plan or the adoption or implementation of any land use control including, but not limited to, the provisions of a zoning law, ordinance, or regulation consistent with this title or required by the minimum standards and criteria of the land use plan. Indemnity shall not apply to any such claim in which a final court determination results in a finding of intentional wrongdoing, recklessness, or an unlawful discriminatory practice including the finding that the land use control was intended to exclude a particular group or individual, or gross negligence on the part of such municipality or its agents, servants, officials, or employees. Actions or proceedings brought under subdivisions two, two-a, three-b, four, paragraphs (a) and (b) of subdivision five and subdivisions six, seven, fourteen, and eighteen of section two hundred ninety-six of the executive law and 42 U.S.C. 55 1981, 1983, 1988 shall be indemnified by the state only so far as the grievance alleged in such action or proceeding was the result of an act consistent with this title or the plan.

(a) Such indemnity shall apply only to the extent that any such claim exceeds any insurance coverage obtained by the commission from revenues in the Pine Barrens fund.

(b) Such indemnity shall be conditioned upon (i) delivery by the governing body or its agent against whom the legal action or proceeding was commenced to the attorney general or an assistant attorney general at an office of the department of law in the state the original or a copy of any summons, complaint, process, notice, demand or pleading within fifteen days after such document is served upon such governing body or its agent, and (ii) the full cooperation of the governing body or its agents against whom the action or proceeding was commenced in the defense of such action or proceeding and in defense of any action or

proceeding against the state based upon the same act or omission, and in the prosecution of any appeal.

(c) There shall be no indemnity in the event of a settlement between or among the parties to such legal action or proceeding in those instances in which the attorney general is not providing the defense for the governing body or its agents, unless such settlement is approved by the commission with the concurrence of the attorney general.

7. Notwithstanding any other provision of law to the contrary and in addition to any existing authority therefor, a town or village in implementing regulations approved by the commission and acting in furtherance of the land use plan may enter into an agreement to condition a zoning amendment.

§ 57-0125. Addition of towns.

1. The legislature finds that in order to facilitate regional planning for Long Island, local governments within the reserve but located outside of the Central Pine Barrens area may similarly benefit from the planning effort undertaken by the commission. Therefore, after the completion, ratification, and adoption of the comprehensive land use plan and upon application to the commission, the towns of East Hampton, Shelter Island, and Southold may elect, by duly adopted resolution of their town boards, to join the commission or establish a similar planning effort for those areas outside the Central Pine Barrens area and within the reserve that warrant and would benefit from such regional efforts consistent with the goals and objectives of this title.

2. All benefits and obligations which accrue to municipalities which participate with the commission shall be afforded to the municipalities of the South and North Fork which elect to voluntarily participate in this process, subject to the obligations of this title. Such benefits may include funding for the development and implementation of regional plans. The provisions of this title with respect to the interim provisions shall not apply. To the extent feasible, towns electing to develop and implement such regional plans consistent with this title,

shall utilize the commission and its supportive structure.

3. Upon completion, ratification, and adoption of the comprehensive land use plan, and an expressed interest on the part of the towns of East Hampton, Shelter Island, or Southold, the commission shall establish criteria for participating in this process. Such criteria may not include the imposition of a moratorium or restriction of development as a requirement for participation.

§ 57-0127. Cooperation of state and municipal agencies.

The council may request and shall be provided with such cooperation, assistance, services and data, from any department, agency, advisory board, task force, commission, bureau or any other agency having jurisdiction over land or water within the Long Island Pine Barrens maritime reserve, as are necessary to carry out the council's function pursuant to this title. The council shall coordinate its actions with the region 1 regional advisory committee, established by section 49-0209 of this chapter. Every state agency is authorized to provide, within amounts appropriated therefor and subject to the approval of the director of the budget, such assistance and services as the council may request.

§ 57-0129. Acceptance of monies.

The council may accept any grant or appropriation from federal, state and municipal sources and any gift for use to carry out the provisions of this title. Such monies shall be expended by the council to carry out the provisions of this title, except that such expenditures shall not exceed the grants, appropriations and gifts received by the council.

§ 57-0131. Limitations on regulation of hunting, fishing and recreation activities; nonregulation of federal conservation activities.

Nothing in this title shall be interpreted to authorize the regulation of hunting, shellfishing, fishing, trapping, possession of wildlife or other recreational activities in the Long Island Pine Barrens maritime reserve, except as otherwise provided by law. This title shall not apply to any action undertaken by any federal agency or federal department in fulfillment of its obligations or duties pursuant to any federal law, federal regulation, federal agency policy, or federal management activity relating to wildlife, game or nongame species management, habitat protection, or migratory species protection.

§ 57-0133. Affect on other laws.

Except as otherwise provided in the provisions of this title, this title shall not affect:

1. the police powers, local planning powers, zoning powers or authority to regulate land uses by villages and towns within the Long Island Pine Barrens maritime reserve; or
2. the police power of the state to regulate any activity carried upon any lands, in the Long Island Pine Barrens maritime reserve; or
3. the authority of any state or public agency in the management of any state or public lands in the Long Island Pine Barrens maritime reserve.

§ 57-0135. Judicial review.

Any person aggrieved by a final determination by any governing body acting under this title, may within thirty days from the date of such determination seek judicial review pursuant to article seventy-eight of the civil practice law and rules in the supreme court. The commission shall be a party to any such proceeding. In the event that the court finds that the determination of such governing body constitutes the

equivalent of taking without just compensation, the commission may set aside the determination of such governing body, or if the land so regulated otherwise meets the goals and objectives of this title and if the commission or the governing body has sufficient funds therefor, the commission or the governing body may acquire such land or interest in lands as have been taken, proceeding under the power of eminent domain. All issues in any proceeding under the power of eminent domain shall have preference over all other civil actions or proceedings.

§ 57-0136. Penalties and enforcement.

1. Violations. (a) All of the rights and remedies provided for in this section are in addition to all of the rights and remedies available to the villages and towns located within the "Central Pine Barrens Area" as specifically defined in subdivision ten of section 57-0107 of this title. All of the rights and remedies provided for in this section are in addition to all of the rights and remedies available to the attorney general as provided for in state law.

(b) With respect to any land use conduct within the Central Pine Barrens Area that violates any provision of an applicable village or town law, the responsibility for enforcement of such violation shall lie with the applicable village or town in the first instance as provided for in the laws of the respective town or village. The applicable village or town shall provide written notice to the commission of all such enforcement efforts. In the event the applicable village or town does not commence an enforcement action within sixty days from the receipt of a written notice to the applicable village or town of any land use conduct within the Central Pine Barrens Area that may violate any provision of an applicable village or town law, the commission, or the attorney general at the request of the commission or upon his or her own initiative, may institute enforcement action for such violation as set forth in subdivisions two, three and four of this section.

(c) With regard to any violation of this title, the land use plan adopted by the commission, any regulation promulgated by the commission, or any order, determination or permit condition issued by the commission, there shall be independent jurisdiction among the village or

town in which such violation occurred or is occurring to investigate and prosecute such violation as set forth in subdivisions two, three and four of this section. The commission or the attorney general at the request of the commission or upon the attorney general's own initiative shall also have independent jurisdiction to investigate and prosecute such violation as set forth in subdivisions two, three and four of this section.

The party initiating such a prosecution shall consult with the other governmental entities named in this section before initiating such an action, except in a case involving a threat of irreparable harm or imminent violation or repeated violations of this title, the land use plan adopted by the commission, any regulation promulgated by the commission, or any order, determination or permit condition issued by the commission.

(d) With regard to any land use conduct within the Central Pine Barrens Area that is a violation of the applicable village or town law in addition to being a violation of the specific requirements of this title, the land use plan adopted by the commission, or the terms or conditions of any order, permit or determination issued by the commission, the commission, or the attorney general at the request of the village or town, may jointly institute with the village and town an enforcement action as set forth in subdivisions two, three and four of this section. In such event, any penalties or fines collected shall be deposited with the applicable village or town to be maintained in a segregated account to be used exclusively for the acquisition of real property or transferable development rights interests or capital projects associated with enhancement and/or restoration of the natural resources and ecosystems located within the Central Pine Barrens Area.

2. Civil penalties. (a) For a violation that takes place in the "core preservation area" as defined in subdivision eleven of section 57-0107 of this title, any person who violates any provision of this title, the land use plan adopted by the commission, any regulation promulgated by the commission, or the terms or conditions of any order, permit, or determination issued by the commission pursuant to this title shall be liable for a civil penalty of not more than twenty-five thousand dollars

for each violation and an additional civil penalty of not more than one thousand dollars for each day that such violation continues.

(b) For a violation that takes place in the "compatible growth area" as defined in subdivision twelve of section 57-0107 of this title, any person who violates any provision of this title, the land use plan adopted by the commission, any regulation promulgated by the commission, or the terms or conditions of any order, permit, or determination issued by the commission pursuant to this title shall be liable for a civil penalty of not more than ten thousand dollars for each violation and an additional civil penalty of not more than one thousand dollars for each day that such violation continues.

3. Criminal penalties. (a) For a violation that takes place in the "core preservation area" as defined in subdivision eleven of section 57-0107 of this title, any person who willfully or intentionally violates any provision of this title, the land use plan adopted by the commission, any regulation promulgated by the commission, or the terms or conditions of any order, permit, or determination issued by the commission pursuant to this title shall be guilty of a misdemeanor punishable by a fine of not more than twenty-five thousand dollars for each violation and an additional fine of not more than one thousand dollars for each day that such violation continues.

(b) For a violation that takes place in the "compatible growth area" as defined in subdivision twelve of section 57-0107 of this title, any person who willfully or intentionally violates any provision of this title, the land use plan adopted by the commission, any regulation promulgated by the commission, or the terms or conditions of any order, permit, or determination issued by the commission pursuant to this title shall be guilty of a misdemeanor punishable by a fine of not more than ten thousand dollars for each violation and an additional fine of not more than one thousand dollars for each day that such violation continues.

4. Additional remedies. (a) Alternatively, or in addition to an action seeking civil penalties or criminal fines or imprisonment as provided by subdivisions two and three of this section, the commission, the Suffolk county district attorney or the attorney general may institute any

appropriate action or proceeding to prevent, restrain, enjoin, correct, or abate any violation of, or to enforce, any provision of this title, the land use plan adopted by the commission, any regulation promulgated by the commission, or the terms or conditions of any order, permit, or determination issued by the commission pursuant to this title. The court in which the action or proceeding is brought may order the person responsible for the violation to take such affirmative measures as are necessary to correct or remediate the violation. Such an action or proceeding may also seek restitution for any such violation.

(b) In addition to the penalties set forth in subdivisions two and three of this section, a police officer or peace officer may immediately impound any all-terrain vehicle, as defined in section twenty-two hundred eighty-one of the vehicle and traffic law, provided that such seizure is conducted pursuant to section five hundred eleven-b of the vehicle and traffic law. A five hundred dollar surcharge may be added to any such impoundment.

§ 57-0137. Severability.

The provisions of this title shall be severable and if any portion thereof or the applicability thereof to any person or circumstances shall be held invalid, the remainder of this title and the application thereof shall not be affected thereby.

TITLE 2

PECONIC BAY REGION WATERSHED PROTECTION ACT

Section 57-0201. Short title.

57-0203. Definitions.

57-0205. Plan contents.

57-0207. Plan adoption.

57-0209. Plan implementation.

57-0211. State funding.

57-0213. Defense, attorneys' fees, court costs.

§ 57-0201. Short title.

This title shall be known and may be cited as the "Peconic Bay region watershed protection act".

§ 57-0203. Definitions.

1. "Study area" shall mean those lands within the Long Island Pine Barrens maritime reserve designated by a town for study in order to protect groundwater and surface watersheds within the Peconic estuary watershed.

2. "Protection area" shall mean those lands identified by a town for preservation and protection in perpetuity after completion of a comprehensive plan amendment and generic environmental impact statement in order to protect groundwater and surface watersheds.

3. "Town" shall mean the towns of East Hampton, Riverhead, Shelter Island, Southampton, and Southold in the county of Suffolk.

4. "Development" shall mean the performance of any building activity or mining operation, the making of any material change in the use or intensity of use of any structure or land and the creation or termination of rights of access or riparian rights. Without limitation, the following activities or uses shall be taken for the purposes of this title to involve development as defined in this subdivision:

(a) a change in type of use of a structure or land or, if a zoning ordinance divides uses into classes, a change from one class of use designated in a zoning ordinance to a use in another class so designated;

(b) a material increase in the intensity of use of land or environmental impacts as a result thereof;

(c) commencement of mining, excavation, or material alteration of grade or vegetation on a parcel of land excluding environmental restoration activities;

(d) material alteration of a shore, bank, or flood plain of a river,

stream, lake, pond, or artificial body of water;

(e) re-establishment of a use which has been abandoned for one year; and

(f) departure from the normal use for which development permission has been granted, or material failure to comply with the conditions of an ordinance, rule or order granting the development permission under which the development was commenced or is continued.

The following operations or uses do not constitute development for the purposes of this title:

(i) public improvements undertaken for the health, safety, or welfare of the public. Such public improvements shall be consistent with the goals and objectives of this title, and shall include, but not be limited to, maintenance of an existing road or railroad track;

(ii) work by any utility not involving substantial engineering redesign for the purpose of inspection, maintenance or renewal on established utility rights-of-way or the likes, and any work pertaining to water supply for the residents of Suffolk county;

(iii) work for the maintenance, renewal, replacement, reconstruction, improvement, or alteration of any existing structure or additions to an existing residence or residential property owned by an association formed for the common interest in real property;

(iv) the use of any structure or land devoted to dwelling uses for any purposes customarily incidental and otherwise lawful;

(v) the use of land for the purpose of agriculture or horticulture;

(vi) work by a utility performed for the purpose of public health, safety, or welfare and consistent with the goals and objectives of this title;

(vii) existing or expanded recreational use consistent with the purposes of this title including scouting activities, the maintenance or expansion of facilities associated with or necessary for such scouting activities including, but not limited to, the addition, modification, expansion, or replacement of structures necessary for such activities and such clearing as may be reasonably required for the maintenance or expansion of scouting activities; and

(viii) a change in use of land or structure from a use within a class specified in a zoning ordinance to another use in the same class.

Development as designated in an ordinance, rule, or development permit includes all other development customarily associated with it unless otherwise specified.

5. "Plan" shall mean a comprehensive management plan prepared by a town to protect groundwater and surface watersheds.

6. "Peconic estuary watershed" shall mean the area located on the eastern end of Long Island, New York, and bordered by Long Island's north and south forks. The major river discharging freshwater into the estuary is the Peconic River. The eastern end of the Peconic estuary watershed is an imaginary line through Block Island Sound between Plum Island and Montauk Point, beyond which lies the open sea. The western boundary is at the headwaters of the Peconic River, just west of the William Floyd Parkway. The Peconic estuary watershed also includes those land areas that contribute groundwater and stormwater runoff to the river and estuary.

§ 57-0205. Plan contents.

1. Protection areas. The plan shall provide for protection areas within the study area that are designed to protect and preserve watershed functions in the Peconic Bay watershed by:

- (a) preserving lands in their natural state;
- (b) promoting compatible agricultural, horticultural, and open space recreational uses;
- (c) prohibiting development or redirecting development outside the protection areas;
- (d) accommodating necessary management practices;
- (e) protecting the quality of surface waters and groundwaters; and
- (f) coordinating and providing for the acquisition of private lands interests as appropriate and consistent with available funds.

2. Permit provisions for development. (a) Any person, upon a showing of extraordinary hardship or compelling public need caused by the

provisions of subdivision one of this section, may apply to the town board for a permit exempting such person from the development prohibition provided for in subdivision one of this section. Such application for a permit shall be approved if the applicant satisfies the standards for either extraordinary hardship or compelling public need. In the case where a governmental entity is the applicant a permit may be granted only upon a showing of compelling public need.

(b) Extraordinary hardship shall be deemed to have been met if the applicant has established, based upon specific facts, that the subject property does not have any beneficial use if used for its present use or developed as permitted by the provisions of subdivision one of this section and that this inability to have a beneficial use results from unique circumstances peculiar to the subject property which: (i) do not apply to or affect other property in the immediate vicinity; (ii) relate to or arise out of characteristics of the subject property, rather than the personal situation of the applicant; or (iii) do not arise out of the action or inaction of the applicant.

(c) Compelling public need shall be deemed to have been met if:

(i) the proposed development will serve an essential health or safety need of the town;

(ii) the public benefits from the proposed development would override the preservation of the protection area;

(iii) that the proposed use is required to serve the existing needs of the residents; and

(iv) no feasible alternatives exist outside the protection area to meet the established public need.

(d) A permit for development in the protection area shall also meet the following additional standards:

(i) the granting of the permit will not be materially detrimental or injurious to other property or improvements in the protection area in which the property is located or endanger public safety or result in the substantial impairment of the resources of the protected area;

(ii) the permit will not be inconsistent with the purposes, objectives, or general spirit and intent of this title; and

(iii) the permit is the minimum relief necessary.

(e) The town board shall make a decision on such application within sixty days of the receipt of a complete application for a permit.

§ 57-0207. Plan adoption.

1. After completion of a draft plan consistent with the requirements of section 57-0205 of this title, the town board shall hold a public hearing on said draft plan upon not less than ten days notice to the public. Notice shall be provided in the same manner as for the adoption of a local law.

2. The town board shall receive and review all comments on the draft plan before final adoption.

3. The town board shall adopt the final plan by resolution.

§ 57-0209. Plan implementation.

1. Implementation of the final plan shall be accomplished by a local law which amends the zoning and other codes of the town to conform to the recommendations of the plan.

2. Where the town seeks the benefits from the state of defense, attorneys' fees, court costs and state funding as provided by sections 57-0211 and 57-0213 of this title, the plan and local law shall be submitted to the commissioner.

3. Where the commissioner certifies by resolution that the plan and local law are in compliance with this title, then the benefits of sections 57-0211 and 57-0213 of this title shall accrue to the town.

4. The commissioner shall render a decision upon certification within ninety days of submission by the town.

5. The town, from time to time, but not less than once every five years after the plan has been adopted, shall cause the plan to be reviewed, and if appropriate, amended. Where the plan is amended, the

procedures for adoption, implementation, and certification shall be the same as for its original adoption, implementation and certification.

§ 57-0211. State funding.

Projects which implement the plan, including the acquisition of interests in real property for the purpose of protecting open spaces or open areas where such properties are part of the state open space plan, shall be eligible for state funding under the environmental protection fund, pursuant to article fifty-four of this chapter, where such projects meet the existing eligibility requirements of such article, subject to available appropriation. No funding shall be provided unless the commissioner determines that a town is in compliance with all the provisions of this title.

§ 57-0213. Defense, attorneys' fees, court costs.

1. For each town adopting a local law implementing regulations in the protection areas consistent with this title, there shall be a defense by the state against any damages, losses, costs, or expenses of any kind or nature incurred or suffered by such town or its agents, servants, officials or employees, in the event of legal actions or proceedings brought against the town or its agents, servants, officials, or employees that may result from the municipal acquisition of land or the adoption or implementation of a local law consistent with this title.

2. The state shall pay reasonable attorneys' fees and court costs incurred by each town in connection with such legal actions or proceedings, including any appeal.

3. Such defense shall be conditioned upon:

(a) delivery by the town board or its agent, servant, official or employee against whom the legal action or proceeding was commenced to the attorney general or an assistant attorney general at an office of the department of law in the state, the original or a copy of any

summons, complaint, process, notice, demand, or pleading within thirty days after such document is served upon the town board or such other party; and

(b) the full cooperation of the town board or such other party against whom the action or proceeding was commenced in the defense of such action or proceeding and in defense of any action or proceeding against the state based upon the same act or omission, and in the prosecution of any appeal.

ARTICLE 58

IMPLEMENTATION OF THE "CLEAN WATER, CLEAN AIR, AND GREEN JOBS ENVIRONMENTAL BOND ACT OF 2022 "

Title 1. General Provisions.

3. Restoration and flood risk reduction.

5. Open space land conservation and recreation.

7. Climate change mitigation.

9. Water quality improvement and resilient infrastructure.

11. Environmental justice and reporting.

13. Labor standards.

TITLE 1

GENERAL PROVISIONS

Section 58-0101. Definitions.

58-0103. Allocation of moneys.

58-0105. Powers and duties.

58-0107. Powers and duties of a municipality.

58-0109. Consistency with federal tax laws.

58-0111. Compliance with other law.

§ 58-0101. Definitions.

As used in this article the following terms shall mean and include:

1. "Bonds" shall mean general obligation bonds issued pursuant to the

"clean water, clean air, and green jobs environmental bond act of 2022 " in accordance with article VII of the New York state constitution and article five of the state finance law.

2. "Cost" means the expense of an approved project, which shall include but not be limited to appraisal, surveying, planning, engineering and architectural services, plans and specifications, consultant and legal services, site preparation, demolition, construction and other direct expenses incident to such project.

3. "Department" shall mean the department of environmental conservation.

4. "Disadvantaged communities" shall mean a community that is identified pursuant to section 75-0111 of this chapter.

5. "Endangered or threatened species project" means a project to restore, recover, or reintroduce an endangered, threatened, or species of special concern pursuant to a recovery plan or restoration plan prepared and adopted by the department, including but not limited to the state's wildlife action plan.

6. "Flood risk reduction project" means projects that use nature-based solutions where possible to reduce erosion or flooding, and projects which mitigate or adapt to flood conditions.

7. "Green buildings project" means (i) installing, upgrading, or modifying a renewable energy source at a state-owned building or for the purpose of converting or connecting a state-owned building or a public school building, or portion thereof, to a renewable energy source; (ii) reducing energy use or improving energy efficiency or occupant health at a state-owned building or a public school building; (iii) installing a green roof at a state-owned building or a public school building; (iv) installation of renewable heating and cooling systems at a state-owned building or a public school building; or (v) emission reduction projects.

8. "Municipality" means a local public authority or public benefit corporation, a county, city, town, village, school district, supervisory district, district corporation, improvement district within a county, city, town or village, or Indian nation or tribe recognized by the state or the United States with a reservation wholly or partly within the boundaries of New York state, or any combination thereof.

9. "Nature-based solution" means projects that are supported or inspired by nature or natural processes and functions and that may also offer environmental, economic, and social benefits, while increasing resilience. Nature-based solutions include both green and natural infrastructure.

10. "Open space land conservation project" means purchase of fee title or conservation easements for the purpose of protecting lands or waters and/or providing recreational opportunities for the public that (i) possess ecological, habitat, recreational or scenic values; (ii) protect the quality of a drinking water supply; (iii) provide flood control or flood mitigation values; (iv) constitute a floodplain; (v) provide or have the potential to provide important habitat connectivity; (vi) provide open space for the use and enjoyment of the public; or (vii) provide community gardens in urban areas.

11. "Recreational infrastructure project" means the development or improvement of state and municipal parks, campgrounds, nature centers, fish hatcheries, and infrastructure associated with open space land conservation projects.

12. "State assistance payment" means payment of the state share of the cost of projects authorized by this article to preserve, enhance, restore and improve the quality of the state's environment.

13. "State entity" means any state department, division, agency, office, public authority, or public benefit corporation.

14. "Water quality improvement project" for the purposes of this title, means projects designed to improve the quality of drinking and

surface waters.

15. "Wetland and stream restoration project" means activities designed to restore freshwater and tidal wetlands, and streams of the state, for the purpose of enhancing habitat, increasing connectivity, improving water quality, and flood risk reduction.

§ 58-0103. Allocation of moneys.

The moneys received by the state from the sale of bonds pursuant to the environmental bond act of 2022 shall be disbursed in the following amounts pursuant to appropriations as specifically provided for in titles three, five, seven, and nine of this article:

1. Not less than one billion one hundred million dollars (\$1,100,000,000) for restoration and flood risk reduction as set forth in title three of this article.

2. Up to six hundred fifty million dollars (\$650,000,000) for open space land conservation and recreation as set forth in title five of this article.

3. Up to one billion five hundred million dollars (\$1,500,000,000) for climate change mitigation as set forth in title seven of this article.

4. Not less than six hundred fifty million dollars (\$650,000,000) for water quality improvement and resilient infrastructure as set forth in title nine of this article.

§ 58-0105. Powers and duties.

In implementing the provisions of this article the department is hereby authorized to:

1. Administer funds generated pursuant to the "clean water, clean air,

and green jobs environmental bond act of 2022 ".

2. In the name of the state, as further provided within this article, contract to make, within the limitations of appropriations available therefor, state assistance payments toward the cost of a project approved, and to be undertaken pursuant to this article.

3. Approve vouchers for the payments pursuant to an approved contract.

4. Enter into contracts with any person, firm, corporation, not-for-profit corporation, agency or other entity, private or governmental, for the purpose of effectuating the provisions of this article.

5. Promulgate such rules and regulations and to develop such forms and procedures necessary to effectuate the provisions of this article, including but not limited to requirements for the form, content, and submission of applications by municipalities for state financial assistance.

6. Delegate to, or cooperate with, any other state entity in the administration of this article.

7. Perform such other and further acts as may be necessary, proper or desirable to carry out the provisions of this article.

§ 58-0107. Powers and duties of a municipality.

A municipality shall have the power and authority to:

1. Undertake and carry out any project for which state assistance payments pursuant to contract are received or are to be received pursuant to this article and maintain and operate such project.

2. Expend money received from the state pursuant to this article for costs incurred in conjunction with the approved project.

3. Apply for and receive moneys from the state for the purpose of accomplishing projects undertaken or to be undertaken pursuant to this article.

4. Perform such other and further acts as may be necessary, proper or desirable to carry out a project or obligation, duty or function related thereto.

§ 58-0109. Consistency with federal tax law.

All actions undertaken pursuant to this article shall be reviewed for consistency with provisions of the federal internal revenue code and regulations thereunder, in accordance with procedures established in connection with the issuance of any tax exempt bonds pursuant to this article, to preserve the tax exempt status of such bonds.

§ 58-0111. Compliance with other law.

Every recipient of funds to be made available pursuant to this article shall comply with all applicable state, federal and local laws.

TITLE 3

RESTORATION AND FLOOD RISK REDUCTION

Section 58-0301. Allocation of moneys.

58-0303. Programs, plans and projects.

§ 58-0301. Allocation of moneys.

Of the moneys received by the state from the sale of bonds pursuant to the environmental bond act of 2022, not less than one billion one hundred million dollars (\$1,100,000,000) shall be available for disbursements for restoration and flood risk reduction projects

developed pursuant to section 58-0303 of this title. Not more than two hundred fifty million dollars (\$250,000,000) of this amount shall be available for projects pursuant to subdivision two of section 58-0303 of this title and not less than one hundred million dollars (\$100,000,000) each shall be available for coastal rehabilitation and shoreline restoration projects and projects which address inland flooding, pursuant to paragraph a of subdivision one of section 58-0303 of this title.

§ 58-0303. Programs, plans and projects.

1. Eligible restoration and flood risk reduction projects include, but are not limited to costs associated with:

a. (1) projects identified in state and regional management and restoration programs and plans including but not limited to the Great Lakes Action Agenda, Mohawk River Basin Action Agenda, Ocean Action Plan, Hudson River Estuary Action Agenda, Long Island Sound Comprehensive Conservation and Management Plan, South Shore Estuary Reserve Comprehensive Management Plan, Peconic Estuary Comprehensive Conservation and Management Plan, Delaware Action Plan, Susquehanna Action Plan, forest management framework for New York City and New York/New Jersey Harbor Estuary Plan;

(2) local waterfront revitalization plans prepared pursuant to article forty-two of the executive law; and

(3) coastal rehabilitation and shoreline restoration projects, including nature-based solutions;

b. flood risk reduction projects including but not limited to: acquisition of real property; moving, lifting or raising of existing flood-prone infrastructure or structures; relocation, repair, or raising of flood-prone or repeatedly flooded roadways; and projects to remove, alter, or right-size dams, bridges, and culverts, but shall not include routine construction or maintenance undertaken by the state and municipalities which does not provide flood risk reduction benefits; and

c. restoration projects including but not limited to: floodplain, wetland and stream restoration projects; forest conservation; endangered and threatened species projects; and habitat restoration projects, including acquisition of fee title and easements, intended to improve the lands and waters of the state of ecological significance or any part thereof, including, but not limited to forests, ponds, bogs, wetlands, bays, sounds, streams, rivers, or lakes and shorelines thereof, to support a spawning, nursery, wintering, migratory, nesting, breeding, feeding, or foraging environment for fish and wildlife and other biota.

2. The commissioner and the commissioner of the division of housing and community renewal are authorized pursuant to paragraph b of subdivision one of this section to purchase private real property identified as at-risk to flooding, from willing sellers. The commissioner of the division of housing and community renewal shall be authorized to transfer to any state agency or public authority any real property in order to carry out the purposes of this article. In connection therewith, the housing trust fund corporation shall be authorized to create a subsidiary corporation to carry out the program authorized under this subdivision. Such subsidiary corporation shall have all the privileges, immunities, tax exemption and other exemptions of the agency to the extent the same are not inconsistent with this section.

a. The commissioner and the commissioner of the division of housing and community renewal or any other department or state agency that has received funds suballocated pursuant to this section may enter into agreements with municipalities, and not-for-profit corporations for the purpose of implementing a program pursuant to this section.

b. The department and the division of housing and community renewal shall prioritize projects in communities based on past flood risk or those that participate in the federal emergency management agency's (FEMA) community rating system.

c. Any state agency or authority, municipality, or not-for-profit corporation purchasing private real property may expend costs associated

with:

- (1) the acquisition of real property, based upon the pre-flood fair market value of the subject property;
- (2) the demolition and removal of structures and/or infrastructure on the property; and
- (3) the restoration of natural resources to facilitate beneficial open space, flood mitigation, and/or shoreline stabilization.

d. Notwithstanding any provision of law to the contrary, any structure which is located on real property purchased pursuant to this program shall be demolished or removed, provided that it does not serve a use or purpose consistent with paragraph f of this subdivision.

e. Notwithstanding any provision of law to the contrary, real property purchased with funding pursuant to this program shall be property of the state, municipality, or a not-for-profit corporation.

f. Notwithstanding any provision of law to the contrary, real property purchased with funding pursuant to this program shall be restored and maintained in perpetuity in a manner that, aims to increase ecosystem function, provide additional flood damage mitigation for surrounding properties, protect wildlife habitat, and wherever practicable and safe, allow for passive and/or recreational community use. Municipal flood mitigation plans, resilience, waterfront revitalization plans or hazard mitigation plans, when applicable, shall be consulted to identify the appropriate restoration and end-use of the property.

g. All or a portion of the appropriation in this section may be provided to the department or the division of housing and community renewal or suballocated to any other department, state agency or state authority.

h. Private real property identified as at-risk to flooding should generally be limited to those: (1) identified as being within the one hundred-year floodplain on the most recent FEMA flood insurance maps; (2) flooded structures that would qualify for buyout under criteria generally applicable to FEMA post-emergency acquisitions; (3) structures

identified in a state, federal, local or regional technical study as suitable for the location of a flood risk management or abatement project in areas immediately proximate to inland or coastal waterways; or (4) structures located in coastal or riparian areas that have been determined by a state, federal, local or regional technical study to significantly exacerbate flooding in other locations.

3. The department, the office of parks, recreation, and historic preservation and the department of state are authorized to provide state assistance payments or grants to municipalities and not-for-profit corporations and undertake projects pursuant to paragraph a of subdivision one of this section.

4. The department and the office of parks, recreation, and historic preservation are authorized to provide state assistance payments or grants to municipalities and not-for-profit corporations and undertake projects pursuant to paragraph b of subdivision one of this section. Culvert and bridge projects shall be in compliance with the department's stream crossing guidelines and best management practices, and engineered for structural integrity and appropriate hydraulic capacity including, where available, projects flows based on flood modeling that incorporates climate change projections and shall not include routine construction or maintenance undertaken by the state or municipalities.

5. The department and the office of parks, recreation, and historic preservation are authorized to provide state assistance payments or grants to municipalities and not-for-profit corporations and undertake projects pursuant to paragraph c of subdivision one of this section.

6. Provided that for the purposes of selecting projects for funding under paragraphs b and c of subdivision one of this section, the relevant agencies shall develop eligibility guidelines and post information on the department's website in the environmental notice bulletin providing for a thirty-day public comment period and upon adoption post such eligibility guidelines on the relevant agency's website.

TITLE 5

OPEN SPACE LAND CONSERVATION AND RECREATION

Section 58-0501. Allocation of moneys.

58-0503. Programs, plans and projects.

§ 58-0501. Allocation of moneys.

Of the moneys received by the state from the sale of bonds pursuant to the environmental bond act of 2022 to be used for open space land conservation and recreation projects, up to six hundred fifty million dollars (\$650,000,000) shall be available for programs, plans, and projects developed pursuant to section 58-0503 of this title, however, not more than seventy-five million dollars (\$75,000,000) shall be made available for the creation of a fish hatchery, or the improvement, expansion, repair or maintenance of existing fish hatcheries, not less than three hundred million dollars (\$300,000,000) shall be made available for open space land conservation projects pursuant to paragraph a of subdivision one of section 58-0503 of this title and not less than one hundred fifty million dollars (\$150,000,000) shall be made available for farmland protection pursuant to paragraph b of subdivision one of section 58-0503 of this title.

§ 58-0503. Programs, plans and projects.

1. Eligible open space working lands conservation and recreation projects include, but are not limited to:

- a. costs associated with open space land conservation projects;
- b. costs associated with purchasing conservation easements to protect farmland pursuant to article twenty-five-aaa of the agriculture and markets law; and
- c. costs associated with recreational infrastructure projects.

2. The department or the office of parks, recreation and historic preservation are authorized to undertake open space land conservation projects, in cooperation with willing sellers pursuant to subdivision one of this section and may enter into an agreement for purchase of real property or conservation easements on real property by a municipality or a not-for-profit corporation. Any such agreement shall contain such provisions as shall be necessary to ensure that the purchase is consistent with, and in furtherance of, this title and shall be subject to the approval of the comptroller and, as to form, the attorney general. In undertaking such projects, such commissioners shall consider the state land acquisition plan prepared pursuant to section 49-0207 of this chapter. Further, the department or the office of parks, recreation and historic preservation are authorized to provide state assistance payments to municipalities for eligible projects consistent with paragraphs a and c of subdivision one of this section.

3. The cost of an open space land conservation project shall include the cost of preparing a management plan for the preservation and beneficial public enjoyment of the land acquired pursuant to this section except where such a management plan already exists for the acquired land.

4. The department and the department of agriculture and markets are authorized to provide, pursuant to paragraph b of subdivision one of this section, farmland preservation implementation grants to county agricultural and farmland protection boards pursuant to article twenty-five-aaa of the agriculture and markets law, or to municipalities, soil and water conservation districts or not-for-profit corporations for implementation of projects.

5. The department is authorized to expend moneys to purchase equipment, devices, and other necessary materials and to acquire fee title or conservation easements in lands for monitoring, restoration, recovery, or reintroduction projects for species listed as endangered or threatened or listed as a species of special concern pursuant to section 11-0535 of this chapter.

6. The department or the office of parks, recreation and historic preservation are authorized to expend moneys for the planning, design, and construction of projects to develop and improve parks, campgrounds, nature centers, fish hatcheries, and other recreational facilities.

7. The commissioner and a not-for-profit corporation may enter into a contract for the undertaking by the not-for-profit corporation of an open space land acquisition project.

8. Real property acquired, developed, improved, restored or rehabilitated by or through a municipality pursuant to paragraph a of subdivision one of this section or undertaken by or on behalf of a municipality with funds made available pursuant to this title shall not be sold, leased, exchanged, donated or otherwise disposed of or used for other than public park purposes without the express authority of an act of the legislature, which shall provide for the substitution of other lands of equal environmental value and fair market value and reasonably equivalent usefulness and location to those to be discontinued, sold or disposed of, and such other requirements as shall be approved by the commissioner.

9. Provided that for the purposes of selecting projects for funding under paragraphs a and b of subdivision one of this section, the relevant agencies shall develop eligibility guidelines and post information on the department's website in the environmental notice bulletin providing for a thirty day public comment period and upon adoption post such eligibility guidelines on the relevant agency's website.

TITLE 7

CLIMATE CHANGE MITIGATION

Section 58-0701. Allocation of moneys.

58-0703. Programs, plans and projects.

§ 58-0701. Allocation of moneys.

Of the moneys received by the state from the sale of bonds pursuant to the environmental bond act of 2022, up to one billion five hundred million dollars (\$1,500,000,000) shall be made available for disbursements for climate change mitigation projects developed pursuant to section 58-0703 of this title. Not less than four hundred million dollars (\$400,000,000) of this amount shall be available for green buildings projects, not less than one hundred million dollars (\$100,000,000) for climate adaptation and mitigation projects pursuant to paragraph c of subdivision one of section 58-0703 of this title, not less than two hundred million dollars (\$200,000,000) shall be available for disbursement to reduce or eliminate water pollution or air pollution affecting disadvantaged communities pursuant to paragraphs f and g of subdivision one of section 58-0703 of this title, and not less than five hundred million dollars (\$500,000,000) for costs associated with the purchase of or conversion to zero emission school buses and supporting infrastructure as set forth in paragraph h of subdivision one of section 58-0703 of this title.

§ 58-0703. Programs, plans and projects.

1. Eligible climate change mitigation projects include, but are not limited to:

a. costs associated with green building projects, projects that increase energy efficiency or the use or siting of renewable energy on state-owned buildings or properties including buildings owned by the state university of the state of New York, city university of the state of New York, community colleges, and public schools;

b. costs associated with projects that utilize natural and working lands to sequester carbon and mitigate methane emissions from agricultural sources, such as manure storage through cover and methane reduction technologies;

c. costs associated with implementing climate adaptation and mitigation projects pursuant to section 54-1523 of this chapter;

d. costs associated with urban forestry projects such as forest and habitat restoration, for purchase and planting of street trees and for projects to expand the existing tree canopy and bolster community health;

e. costs associated with projects that reduce urban heat island effect, such as installation of green roofs, open space protection, community gardens, cool pavement projects, projects that create or upgrade community cooling centers, and the installation of reflective roofs where installation of green roofs is not possible;

f. costs associated with projects to reduce or eliminate air pollution from stationary or mobile sources of air pollution affecting disadvantaged communities;

g. costs associated with projects which would reduce or eliminate water pollution, whether from point or non-point discharges, affecting disadvantaged communities; and

h. costs associated with the purchase or conversion to zero emission school buses, including costs associated with the supporting infrastructure.

2. The department, the department of agriculture and markets, the office of parks, recreation and historic preservation, the New York state energy research and development authority and the office of general services are authorized to provide state assistance payments or grants to municipalities and not-for-profit corporations or undertake projects pursuant to this section.

3. Provided that for the purposes of selecting projects for funding under this section, the relevant agencies shall develop eligibility guidelines and post information on the department's website in the environmental notice bulletin providing for a thirty-day public comment

period and upon adoption post such eligibility guidelines on the relevant agency's website.

TITLE 9

WATER QUALITY IMPROVEMENT AND RESILIENT INFRASTRUCTURE

Section 58-0901. Allocation of moneys.

58-0903. Programs, plans and projects.

§ 58-0901. Allocation of moneys.

Of the moneys received by the state from the sale of bonds pursuant to the environmental bond act of 2022 for disbursements for state assistance for water quality improvement projects as defined by title one of this article, not less than six hundred fifty million dollars (\$650,000,000) shall be available for water quality improvement projects developed pursuant to section 58-0903 of this title. Not less than two hundred million dollars (\$200,000,000) of this amount shall be available for wastewater infrastructure projects undertaken pursuant to the New York state water infrastructure improvement act of 2017 pursuant to paragraph e of subdivision one of section 58-0903 of this title, and not less than two hundred fifty million dollars (\$250,000,000) shall be available for municipal stormwater projects pursuant to paragraph a of subdivision one of section 58-0903 of this title.

§ 58-0903. Programs, plans and projects.

1. Eligible water quality improvement project costs include, but are not limited to:

a. costs associated with grants to municipalities for projects that reduce or control storm water runoff, using green infrastructure where practicable;

b. costs associated with projects that reduce agricultural nutrient

runoff and promote soil health such as projects which implement comprehensive nutrient management plans, other agricultural nutrient management projects, and non-point source abatement and control programs including projects developed pursuant to sections eleven-a and eleven-b of the soil and water conservation districts;

c. costs associated with projects that address harmful algal blooms such as abatement projects and projects focused on addressing nutrient reduction in freshwater and marine waters, wastewater infrastructure systems that treat nitrogen and phosphorus, and lake treatment systems;

d. costs associated with wastewater infrastructure projects including but not limited to extending or establishing sewer lines to replace failing septic systems or cesspools and projects as provided by section twelve hundred eighty-five-u of the public authorities law;

e. costs associated with projects to reduce, avoid or eliminate point and non-point source discharges to water including projects authorized by the New York state water improvement infrastructure act of 2017 and section twelve hundred eighty-five-s of the public authorities law;

f. costs associated with the establishment of riparian buffers to provide distance between farm fields and streams or abate erosion during high flow events; and

g. costs associated with lead service line replacement pursuant to section eleven hundred fourteen of the public health law.

2. The department and the New York state environmental facilities corporation are authorized to provide state assistance payments or grants to municipalities for projects authorized pursuant to paragraphs a, b, and d of subdivision one of this section.

3. The department of agriculture and markets shall be authorized to make state assistance payments to soil and water conservation districts for the cost of implementing agricultural environmental management plans, including purchase of equipment for measuring and monitoring soil

health and soil conditions.

4. The department is authorized to make grants available to not-for-profits and academic institutions for paragraphs b, c, and f of subdivision one of this section, and make state assistance payments to municipalities and undertake projects pursuant to this section.

5. Provided that for the purposes of selecting projects for funding of this section, the relevant agencies shall develop eligibility guidelines and post information on the department's website in the environmental notice bulletin providing for a thirty-day public comment period and upon adoption post such eligibility guidelines on the relevant agency's website.

TITLE 11

ENVIRONMENTAL JUSTICE AND REPORTING

Section 58-1101. Benefits of funds.

58-1103. Reporting.

§ 58-1101. Benefits of funds.

The department shall make every effort practicable to achieve a goal that forty percent of the funds pursuant to this article benefit disadvantaged communities; however, disadvantaged communities shall receive no less than thirty-five percent of the benefit of the funds pursuant to this article.

§ 58-1103. Reporting.

1. No later than sixty days following the end of each fiscal year, each department, agency, public benefit corporation, and public authority receiving an allocation or allocations of appropriation financed from the clean water, clean air, and green jobs environmental bond act of 2022 shall submit to the commissioner in a manner and form

prescribed by the department, the following information as of March thirty-first of such fiscal year, within each category listed in this title: the total appropriation; total commitments; year-to-date disbursements; remaining uncommitted balances; and a description of each project.

2. No later than one hundred twenty days following the end of each fiscal year, the department shall submit to the governor, the temporary president of the senate, and the speaker of the assembly a report that includes the information received. A copy of the report shall be posted on the department's website.

TITLE 13 LABOR STANDARDS

Section 58-1301. Labor standards.

§ 58-1301. Labor standards.

1. Projects funded pursuant to this article shall require compliance with prevailing wage requirements pursuant to section two hundred twenty of the labor law.

2. Any state entity or municipality receiving at least twenty-five million dollars (\$25,000,000) from funds allocated pursuant to this article for a project costing greater than fifty million dollars (\$50,000,000) shall require use of apprenticeship agreements as defined by article twenty-three of the labor law.

3. (a) Any state entity or municipality receiving at least twenty-five million dollars (\$25,000,000) from funds allocated pursuant to this article for a project which involves the construction, reconstruction, alteration, maintenance, moving, demolition, excavation, development or other improvement of any building, structure or land, shall be subject to section two hundred twenty-two of the labor law.

(b) Any privately owned project receiving funds allocated pursuant to

this title which utilizes a project labor agreement on such project shall not be subject to article eight of the labor law.

4. If determined applicable, a municipality or state entity may require that the private owner of a project, or a third party acting on the owner's behalf, enter into a labor peace agreement with at least one bona fide labor organization either: (a) where such bona fide labor organization is actively representing non-construction employees; or (b) upon notice by a bona fide labor organization that is attempting to represent non-construction employees. For purposes of this section "labor peace agreement" means an agreement between an entity and labor organization that, at a minimum, protects the state's proprietary interests by prohibiting labor organizations and members from engaging in picketing, work stoppages, boycotts, and any other economic interference.

5.(a) Any municipality or state entity, or a third party acting on behalf and for the benefit of the municipality or state entity, in each contract for construction, reconstruction, alteration, repair, improvement or maintenance of a project receiving funds under this article that is a public work, shall ensure that such contract contains a provision that the structural iron and structural steel used or supplied in the performance of the contract or any subcontract thereto and that is permanently incorporated into the public work, shall be produced or made in whole or substantial part in the United States, its territories or possessions. In the case of a structural iron or structural steel product, all manufacturing must take place in the United States, from the initial melting stage through the application of coatings, except metallurgical processes involving the refinement of steel additives. For the purposes of this subdivision, "permanently incorporated" shall mean an iron or steel product that is required to remain in place at the end of the project contract, in a fixed location, affixed to the public work to which it was incorporated. Iron and steel products that are capable of being moved from one location to another are not permanently incorporated into a public work.

(b) The provisions of paragraph (a) of this subdivision shall not apply if the head of the department, agency, or municipal entity

constructing the public work, in his or her sole discretion, determines that the provisions would not be in the public interest, would result in unreasonable costs, or that obtaining such steel or iron in the United States would increase the cost of the contract by an unreasonable amount, or such iron or steel, including without limitation structural iron and structural steel, cannot be produced or made in the United States in sufficient and reasonably available quantities and of satisfactory quality.

ARTICLE 70

UNIFORM PROCEDURES

Section 70-0101. Purpose.

70-0103. Legislative findings and declarations.

70-0105. Definitions.

70-0107. Rules and regulations; applicability.

70-0109. Time periods for department action on permit applications.

70-0111. Minor projects.

70-0113. Confidentiality.

70-0115. Permit modifications, suspensions, revocations, renewals, reissuances and recertifications.

70-0116. Emergency authorization.

70-0117. Special provisions.

70-0118. Disproportionate impacts on disadvantaged communities.

70-0119. Public hearings.

70-0121. Severability.

§ 70-0101. Purpose.

It is the purpose of this article to establish uniform review procedures for major regulatory programs of the department and to establish time periods for department action on permits under such programs.

§ 70-0103. Legislative findings and declarations.

The legislature finds and declares that:

1. It is the intent of the legislature to assure the fair, expeditious and thorough administrative review of regulatory permits.
2. It is the intent of the legislature that, to the extent feasible and appropriate, statutory and regulatory procedures shall be made uniform and inconsistencies and redundancies shall be eliminated.
3. It is the intent of the legislature to establish reasonable time periods for administrative agency action on permits.
4. It is the intent of the legislature to encourage public participation in government review and decision-making processes and to promote public understanding of all government activities.
5. It is the intent of the legislature that, to the maximum extent feasible, a comprehensive project review approach shall replace separate and individual permit application reviews.

§ 70-0105. Definitions.

Unless the context otherwise requires, the definitions in this section shall govern the construction of the following terms as used in this article:

1. "Environmental notice bulletin" shall mean the publication of the department published pursuant to section 3-0306 of this chapter.
2. "Complete application" shall mean an application for a permit which is in an approved form and is determined by the department to be complete for the purpose of commencing review of the application but which may need to be supplemented during the course of review as to matters contained in the application in order to enable the department

to make the findings and determinations required by law. A complete application shall include such draft impact statement as may be required pursuant to article eight of this chapter.

3. "Minor project" shall mean a proposed project which by its nature and with respect to its location will not have a significant impact on the environment and will not exceed criteria established in rules and regulations adopted by the department pursuant to subdivision one of section 70-0107 of this article.

4. "Permit" shall mean any permit, certificate, license or other form of department approval, modification, suspension, revocation, renewal, reissuance or recertification issued in connection with any regulatory program referred to in subdivision three of section 70-0107 of this article as further specified by rule and regulation.

5. "Project" shall mean any activity that requires one or more department permits.

6. "Emergency" shall mean a natural or an accidental human-made event which presents an immediate threat to life, health, property, or natural resources.

§ 70-0107. Rules and regulations; applicability.

1. The department, after public hearing, shall adopt rules and regulations to assure the efficient and expeditious administration of this article. Such rules and regulations shall include but not be limited to provisions regarding notice, review, public participation and public hearings.

2. Notwithstanding any inconsistent provisions of this chapter or any rule or regulation of the department, the procedures provided in this article and in rules and regulations adopted by the department pursuant to subdivision one of this section shall govern the review by the department of applications for permits for proposed projects and

modifications, suspensions, revocations, renewals, reissuances and recertifications of permits under the regulatory programs of the department specified in subdivision three of this section. Such procedures shall also apply to any government entity to which the commissioner has delegated powers to administer such programs pursuant to section 3-0301 of this chapter, to the extent specified in such delegation.

3. The following regulatory programs of this chapter shall be subject to the procedures provided in this article:

- (a) protection of waters (title five of article fifteen);
- (b) water supply and water transport (title fifteen of article fifteen);
- (c) wild, scenic and recreational rivers system (title twenty-seven of article fifteen), except for that part of article twenty-four administered by the Adirondack park agency, which shall be subject to the procedures provided in section eight hundred nine of the executive law;
- (d) certifications under section 401 of the federal water pollution control act amendments of 1972 (public law 92-500) pursuant to article three of this chapter;
- (e) state pollutant discharge elimination system (title eight of article seventeen);
- (f) realty subdivisions: sewerage service (title fifteen of article seventeen);
- (g) air pollution control (article nineteen);
- (h) liquefied natural and petroleum gas (title seventeen of article twenty-three);
- (i) mined land reclamation (title twenty-seven of article twenty-three);
- (j) freshwater wetlands (article twenty-four), except for that part of article twenty-four administered by the Adirondack park agency, which shall be subject to the procedures provided in section eight hundred nine of the executive law;
- (k) tidal wetlands (article twenty-five);
- (l) collection, treatment and disposal of refuse and other solid waste (article twenty-seven); and

(m) coastal erosion hazard areas (article thirty-four).

§ 70-0109. Time periods for department action on permit applications.

1. (a) On or before fifteen calendar days after the receipt of an application for a permit which has been filed in a manner and in a form prescribed by the department, the department shall mail written notice to the applicant of its determination whether or not the application is complete.

(b) If the department fails to mail written notice to an applicant of its determination whether or not an application is complete within such fifteen calendar day period, the application shall be deemed complete.

(c) If the department determines the application is not complete, the notice shall include a concise statement of the respects in which the application is incomplete.

(d) The resubmission of the application or the submission of such additional information shall commence a new fifteen calendar day period for department review of the additional information for purposes of determining completeness.

(e) If the department determines the application is complete, the notice shall so state.

2. (a) Immediately upon determining that an application is complete, the department shall cause a notice of application to be published in the next available environmental notice bulletin which shall be not later than ten calendar days after the date of such determination and not less than once during the fifteen calendar day period following such determination in a newspaper having general circulation in the area in which the project is proposed to be located, and shall provide notice to the chief executive officer of each municipality in which the proposed project is located, and may direct the applicant to provide such reasonable notice and opportunity for comment to the public as the department deems appropriate. Newspaper publications shall be provided by the applicant.

(b) The time period for public comment on a permit application shall be stated in the notice of application.

3. (a) Within the time periods specified in subparagraphs (i) and (ii) of this subdivision and subject to the provisions of subdivisions four, five and six of this section, the department shall make a decision on an application for a permit by mailing the applicant a permit, a permit with conditions or a statement that the permit applied for has been denied.

(i) In the case of an application for a permit for which no public hearing has been held, such decision shall be mailed on or before ninety calendar days after the department mails written notice to the applicant that the application is complete or on or before ninety calendar days after the application is deemed complete pursuant to the provisions of this article.

(ii) In the case of an application for a permit for which a public hearing has been held, the department shall mail its decision to the applicant and to all parties to the hearing on or before sixty calendar days after receipt by the department of a complete record, as that term is defined in paragraphs (a) through (e) of subdivision one of section three hundred two of the state administrative procedure act.

(b) If the department fails to mail a decision on an application for a permit within the time periods specified, the applicant may cause notice of such failure to be made to the department by means of certified mail return receipt requested addressed to the commissioner. If, within five working days after the receipt of such notice, the department fails to mail a decision, the application shall be deemed approved and a permit deemed granted subject to any standard terms or conditions applicable to such a permit. However, no permit shall be deemed approved where such permit is issued in lieu of a federal permit pursuant to an authorization granted to the state pursuant to either Public Law 94-580, the "Federal Resource Conservation and Recovery Act of 1976", or Title V of Public Law 101-549, the "Clean Air Act", and where the issuance of a permit in such a manner is contrary to such authorization.

4. The time periods for a department decision on an application for a permit as specified in subdivision three of this section shall be suspended pending receipt by the department of any final environmental impact statement and any explicit findings related to a proposed project

as may be required pursuant to article eight (environmental quality review) of this chapter when the department is not the lead agency as that term is used in rules and regulations adopted by the department pursuant to section 8-0113 of said article.

5. The department shall make no decision and no permit shall be deemed granted until the applicant has paid all applicable fees and costs.

6. Any time period specified in this article may be waived and extended for good cause by written request by the applicant with the consent of the department, or by the written request of the commissioner or his designee with the consent of the applicant.

§ 70-0111. Minor projects.

(a) On or before fifteen calendar days after the receipt of an application for a permit for a minor project, the department shall mail written notice to the applicant of its determination whether or not the application is complete. If the department fails to mail written notice to an applicant of its determination whether or not an application is complete within such fifteen calendar day period, the application shall be deemed complete.

(b) Within forty-five calendar days after the department mails written notice to the applicant that an application for a permit for a minor project is complete or within forty-five calendar days after the application is deemed complete pursuant to the provisions of this article and subject to the provisions of subdivisions four, five, and six of section 70-0109, the department shall make a decision on the application by mailing the applicant a permit, a permit with conditions or a statement that the permit applied for has been denied.

(c) If the department fails to make a decision on an application for a permit for a minor project within such forty-five calendar day period, then the provisions of paragraph (b) of subdivision three of section 70-0109 shall apply.

(d) The department may provide, by rule and regulation pursuant to section 70-0107 of this article, for the issuance of general permits covering minor projects. Such general permits may be issued following

such events as natural disasters or acts of God which lead numbers of individuals to seek to undertake similar types of minor projects that are of a remedial nature. Such permits may be issued only upon a written statement of necessity by the commissioner justifying the issuance of such general permit and may be issued only for a specified duration of time.

§ 70-0113. Confidentiality.

The provisions of section eighty-eight of article six of the public officers law shall apply to information confidentially disclosed by applicants to the department, except as otherwise provided in this chapter.

§ 70-0115. Permit modifications, suspensions, revocations, renewals, reissuances and recertifications.

1. Upon the provision of notice stating the grounds for its action and giving an opportunity for hearing to the permit holder, the department may modify, suspend or revoke a permit.

2. A permit holder may make written request to the department for the renewal, reissuance, recertification or modification of an existing permit. Such a request shall be accompanied by sufficient information supporting the request for the departmental action sought.

(a) In the case of a request (i) which does not involve a material change in permit conditions, then applicable law, environmental conditions or technology since the date of issuance of the existing permit, or (ii) for which an opportunity for public comment or hearing or both is not required by applicable law, the department shall on or before fifteen calendar days after the receipt of a request mail a written determination to the permit holder of its decision on the request. If the decision is to deny the request, the permit holder shall be afforded an opportunity for hearing and notice of such decision shall be given by the department in the next available issue of the

environmental notice bulletin.

(b) In the case of a request which may involve a material change as described in paragraph (a) of this subdivision, or for which an opportunity for public comment or hearing or both is required by applicable law, the department shall on or before fifteen calendar days after the receipt of a request mail a written determination to the permit holder that the request shall be treated as an application for a new permit.

(c) In the case of a request for the renewal, reissuance, recertification or modification of an existing state pollutant discharge elimination system permit issued in lieu of a national pollutant discharge elimination system permit the request shall be treated as an application for a new permit. Any other request may be treated as an application for a new permit.

(d) In the case of a request for the renewal, reissuance, recertification or modification of an existing permit issued pursuant to article nineteen of this chapter, the request may be treated as an application for a new permit.

If, pursuant to paragraph (a) or (b) of this subdivision, the department fails to mail a written determination to the permit holder within such fifteen calendar day period, then the provisions of paragraph (b) of subdivision three of section 70-0109 of this chapter shall apply.

§ 70-0116. Emergency authorization.

1. The department may waive the procedural requirements of this article to issue an emergency authorization for an action which is immediately necessary to respond to an emergency.

2. Emergency authorization may be given only if the department makes a finding of emergency. Such emergency authorization may be issued for a term not to exceed thirty days. It may be renewed for one term not to exceed thirty days. On or before sixty days from the department's original approval, the action must be concluded or the authorized party

must file with the department a complete application for a permit and be subject to all the procedural requirements of this article.

3. The department must be notified prior to the commencement of the action. If circumstances warrant immediate action by a state or local government agency such that prior notice to the department is not possible, then the department must be notified by that agency within twenty-four hours after commencement of the action. In any event, the department must respond by either granting or denying emergency authorization within two business days of its receipt of such notice.

4. Actions taken pursuant to a grant of emergency authorization must be carried out in a manner that will cause the least change, modification or adverse impact to life, health, property or natural resources. The department may attach conditions to its emergency authorizations and shall enforce them in order to assure compliance with this and other regulatory standards that would apply to such actions absent an emergency.

5. The department may require plans or any other information it deems necessary to review the proposed action to determine whether emergency authorization is warranted and whether the proposed action is consistent with regulatory standards.

6. The department shall issue an order summarily suspending an action taken before the grant of an emergency authorization if the department finds that no emergency exists or the department shall issue an order suspending an emergency authorization if the department finds that the action is no longer immediately necessary to protect life, health, property or natural resources. Such action shall be ceased immediately upon receipt of such order by the authorized party.

7. (a) Violations will be enforced pursuant to article seventy-one of this chapter.

(b) A person who violates any provision of this section or any term or condition of an emergency authorization shall also be required to perform restoration, mitigation, or elimination of environmental damage,

which is necessary as a direct result of that action. In the event that such person fails to undertake such work, the department or its agent may enter upon the lands and waters where the action took place and perform restoration or other activities which may be necessary to mitigate or eliminate environmental damage caused by such action. Should the department undertake such work, or cause it to be undertaken, the full cost for it shall be charged to and become the responsibility of the person who conducted the action.

8. The provisions of this section and the regulations promulgated hereunder shall apply notwithstanding any inconsistent provision of law.

§ 70-0117. Special provisions.

1. (a) An applicant may submit simultaneously all applications for permits associated with a proposed project in order to facilitate a comprehensive project review.

(b) Except for good cause shown by the applicant, the department may require an applicant to submit simultaneously any or all applications for permits associated with a proposed project when, in the department's judgment, it is necessary to facilitate a comprehensive review of the project.

2. At any time during the review of an application for a permit or a request by a permit holder for the renewal, reissuance, recertification or modification of an existing permit, the department may request additional information from the applicant or permit holder with regard to any matter contained in the application or request when such additional information is necessary for the department to make any findings or determinations required by law. Such a request shall not extend any time period for department action contained in this article. Failure by the applicant or permit holder to provide such information may be grounds for denial by the department of the application or request.

3. Where there is a requirement pursuant to federal law for a

tentative determination or draft permit to be prepared prior to public notice or hearing, the time within which the department shall make its determination whether or not the application is complete shall be extended by forty-five calendar days. This subdivision shall not apply to applications for state pollutant discharge elimination system permits for the discharge of sewage (as defined in section 17-0105 of this chapter) only.

4. In conjunction with one or more applications for permits, the department may, on request of an applicant undertake a conceptual review of a proposed project evaluating the general approvability or nonapprovability of a proposed project, including all proposed phases or segments thereof, subject to the development and submission of more detailed plans and information and such additional applications for permits in the future as may be necessary. The department shall, in rules and regulations, establish criteria and guidelines for the conceptual review of proposed projects. The department shall establish, in rules and regulations adopted pursuant to section 70-0107 of this chapter, procedures governing the conceptual review of proposed projects.

5. (a) Under the state pollutant discharge elimination system program (article seventeen of this chapter), the department may issue a general permit, upon application or on its own initiative, to cover ballast discharges from vessels, including tankers, while moored in port which (i) are within a stated geographical area, (ii) involve the same or substantially similar type of operations, (iii) discharge the same types of pollutants, (iv) require the same effluent limitations or operating conditions, (v) require the same or similar monitoring, and (vi) which will result in minimal adverse cumulative impacts.

(b) General permits can only be issued if the department determines such discharges, by virtue of their nature and location, are more appropriately controlled under a general permit than under individual permits.

(c) Any general permit issued under this subdivision shall set forth the conditions which shall apply to any discharge authorized by such general permit.

(d) The department may require any person authorized by a general permit to apply for and obtain an individual permit and the department shall adopt rules and regulations specifying circumstances under which an individual permit may be required.

(e) General permits shall be governed by the procedures set forth in this article for the review of major projects and shall be subject to the provisions of article seventy-two of this chapter.

6. (a) Under the state pollutant discharge elimination system program (article seventeen of this chapter), the department may issue a general permit, upon application or on its own initiative, to cover a category of point sources of one or more discharges within a stated geographical area which (i) involve the same or substantially similar types of operations, (ii) discharge the same types of pollutants, (iii) require the same effluent limitations or operating conditions, (iv) require the same or similar monitoring, and (v) which will result in minimal adverse cumulative impacts.

(b) General permits can only be issued for the following categories of discharges, if, by virtue of their nature and location, the department determines such discharges are more appropriately controlled under a general permit than under individual permits:

(i) separate storm sewers or stormwater conveyance systems; or

(ii) less than ten thousand gallons per day of sewage effluent without the admixture of industrial waste or other wastes; or

(iii) thermal discharges of less than one million gallons per day.

(c) Any general permit issued under this subdivision shall set forth the conditions which shall apply to any discharge authorized by such general permit.

(d) The department may require any person authorized by a general permit to apply for and obtain an individual permit and the department shall adopt rules and regulations specifying circumstances under which an individual permit may be required.

(e) General permits shall be governed by the procedures set forth in this article for the issuance of major permits.

7. Notwithstanding any other provision of law, the department shall not charge any application fee or any other fee for any activity

undertaken pursuant to an adopt-a-park, shoreline, roadway or lake program pursuant to section two hundred seventy-seven of the general municipal law.

8. (a) All persons required to obtain a permit from the department pursuant to section 24-0701 of this chapter shall submit to the department an application fee in an amount not to exceed the following:

(i) one hundred dollars per application for a modification to any existing permit issued pursuant to section 24-0701 of this chapter;

(ii) three hundred dollars per application for one new single family dwelling and customary appurtenances thereto;

(iii) five hundred dollars per application for multiple new single family dwellings, or a new multiple family dwelling and customary appurtenances thereto;

(iv) one thousand dollars per application for new commercial or industrial structures or improvements;

(v) one hundred dollars per application for a permit for any other project as defined in this article.

(b) All persons required to obtain a permit from the department pursuant to section 25-0402 of this chapter shall submit to the department an application fee in an amount not to exceed the following:

(i) three hundred dollars per application for a permit for a minor project as defined in this article or modification to any existing permit issued pursuant to section 25-0402 of this chapter;

(ii) two thousand dollars per application for subdivision of land or new commercial or industrial structures or improvements;

(iii) one thousand dollars per application for a permit for a project as defined in this article.

(c) Fees collected pursuant to paragraph (a) of this subdivision shall be deposited to the credit of the conservation fund. Fees collected pursuant to paragraph (b) of this subdivision shall be deposited to the credit of the marine resources account of the conservation fund.

(d) Application fees required pursuant to this subdivision will not be required for any state department.

9. Applicants for major projects. Applicants for major projects for the regulatory programs of paragraphs (a), (f), (h), (i), (j), (k) and

(m) of subdivision 3 of section 70-0107 of this article shall be required to demonstrate that future physical climate risk due to sea level rise, and/or storm surges and/or flooding, based on available data predicting the likelihood of future extreme weather events, including hazard risk analysis data if applicable, has been considered.

§ 70-0118. Disproportionate impacts on disadvantaged communities.

1. For the purposes of this section:

(a) "Disadvantaged communities" shall have the same meaning as subdivision five of section 75-0101 of this chapter.

(b) "Applicable permit" shall mean a permit, excluding a general permit, applied for pursuant to:

(i) title fifteen of article fifteen of this chapter for a facility withdrawing and using over twenty million gallons per day of water for cooling purposes;

(ii) article seventeen of this chapter;

(iii) article nineteen of this chapter;

(iv) title seventeen of article twenty-three of this chapter; or

(v) title three, title seven, title nine or title eleven of article twenty-seven of this chapter.

2. (a) When a new project subject to an applicable permit may cause or contribute more than a de minimis amount of pollution to any disproportionate pollution burden on a disadvantaged community, the department shall require the applicant to prepare or cause to be prepared an existing burden report.

(b) In the case of an application for renewal or modification of an applicable permit not subject to the provisions of paragraph (a) of this subdivision which may cause or contribute more than a de minimis amount of pollution to any disproportionate pollution burden on a disadvantaged community the department shall require the applicant to prepare or cause to be prepared an existing burden report; provided, however that the department may elect not to require such existing burden report if the permit would serve an essential environmental, health, or safety need of the disadvantaged community for which there is no reasonable

alternative.

(c) Notwithstanding the requirements of paragraphs (a) or (b) of this subdivision, no existing burden report shall be required for an application for a renewal of a permit if an existing burden report has been prepared with respect to such permit within the previous ten years.

3. (a) When considering an application for an applicable permit, the department shall consider the existing burden report, if any, and an administrative record that includes, but is not limited to, comments received from the public in the disadvantaged community.

(b) The department shall not issue an applicable permit for a new project if it determines that the project will cause or contribute more than a de minimis amount of pollution to a disproportionate pollution burden on the disadvantaged community.

(c) In the case of an application for a modification of an applicable permit, the department shall not issue an applicable permit if it determines that the issuance of the permit would significantly increase the existing disproportionate pollution burden on the disadvantaged community.

(d) In the case of an application for renewal of an applicable permit, the department shall not issue an applicable permit if it determines that the project would significantly increase the existing disproportionate pollution burden on the disadvantaged community.

4. The department shall require actions to implement any appropriate operational changes which would reduce the pollution burden on the disadvantaged community as a condition of an applicable permit, only if such actions are reasonable and practicable, as determined by the department.

5. The department, in consultation with the department of health, shall develop the scope of the existing burden report and may adapt such requirements based on whether a permit application is for a new project, modification, or a renewal of a permit. The department shall provide for at least a thirty-day public comment period prior to finalizing the scope of the report. The report shall provide for an assessment of the following information:

(a) relevant baseline data on existing burdens, including from relevant criteria used to designate the particular disadvantaged communities pursuant to subdivision one of section 75-0111 of this chapter;

(b) the environmental or public health stressors already borne by the disadvantaged community as a result of existing conditions located in or affecting the disadvantaged community;

(c) the potential or projected contribution of the proposed action to existing pollution burdens in the community; and

(d) existing and potential benefits of the project to the community including increased housing supply, or alleviation of existing pollution burdens that may be provided by the project, including operational changes to the project that would reduce the pollution burden on the disadvantaged community.

§ 70-0119. Public hearings.

1. After evaluating an application for a permit and any comments of department staff, other state agencies or units of government or members of the public, the department shall, on or before sixty calendar days after it mails notice to the applicant that the application is complete or on or before sixty days after the application is deemed complete pursuant to the provisions of this article, determine whether or not to conduct a public hearing on the application and mail written notice to the applicant of a determination to conduct a public hearing. Such determination shall be based on whether the evaluation or comments raise substantive and significant issues relating to any findings or determinations the department is required to make pursuant to this chapter, including the reasonable likelihood that a permit applied for will be denied or can be granted only with major modifications to the project because the project as proposed may not meet statutory or regulatory criteria or standards; provided, however, where any comments received from members of the public or otherwise raise substantive and significant issues relating to the application and resolution of any such issue may result in denial of the permit or the imposition of significant conditions thereon, the department shall hold a public

hearing on the application.

2. If a public hearing is to be held, it shall commence on or before ninety calendar days after the department mails written notice to the applicant that the application is complete or on or before ninety calendar days after the application is deemed complete pursuant to the provisions of this article. Reasonable notice of the hearing shall be given to the applicant and to persons who have made written request to participate in it and notice to the public shall be given by publication of a notice of hearing in the environmental notice bulletin, in a newspaper as otherwise required by law, and in such other manner as the department may direct, if any.

3. The department may require an applicant to pay the cost of renting a hearing room and of preparing a transcript associated with a public hearing conducted pursuant to this article. Prior to commencing a public hearing pursuant to this article, the department may require an applicant to post a bond or other suitable undertaking to assure payment of such costs.

4. When an applicant has submitted applications for one or more permits associated with a project and more than one public hearing is required, including public hearings pursuant to article eight of this chapter, said public hearings shall be consolidated into a single public hearing at the request of the applicant wherever practicable. Public hearings associated with a project shall also be consolidated or held jointly with one or more other state or local agencies, whenever practicable.

5. Public hearings pursuant to this article shall be conducted as provided in rules and regulations adopted by the department pursuant to section 70-0107 and as provided in the state administrative procedure act.

§ 70-0121. Severability.

The provisions of this article shall be severable, and if any clause, sentence, paragraph, subdivision or part of this article shall be adjudged by any court of competent jurisdiction to be invalid, such judgment shall not affect, impair or invalidate the remainder, but shall be confined in its operation to the clause, sentence, paragraph, subdivision or part thereof directly involved in the controversy in which such judgment shall have been rendered.

TITLE 1

EFFECT OF THE PENAL LAW AND CRIMINAL PROCEDURE LAW

Section 71-0101. Effect of the Penal Law and Criminal Procedure Law.

§ 71-0101. Effect of the Penal Law and Criminal Procedure Law.

Notwithstanding any provision of this chapter, the provisions of the Penal Law and of the Criminal Procedure Law control over the provisions of this chapter to the same extent they controlled over the provisions of law from which this chapter is derived, on the date immediately preceding the effective date of this chapter.

For the purpose of section 80.10 of the penal law all fines contained within this chapter, and not already so designated, shall be deemed special corporate fines.

TITLE 2

GENERAL LAW ENFORCEMENT PROVISIONS

Section 71-0201. General law enforcement authority.

71-0202. Enforcement; designated employees to have certain powers.

71-0203. Uniform appearance ticket and simplified information.

71-0205. Verification or affirmation of accusatory instruments.

71-0207. Pleas by mail.

71-0209. Convictions; bail forfeitures; failure to appear.

71-0211. Disposition of fees and penalties.

71-0213. Mandatory surcharge.

§ 71-0201. General law enforcement authority.

Every police officer and any employee of the department as may be designated by the commissioner, shall enforce the provisions of this chapter, and the rules, and regulations and orders enacted or promulgated thereunder. Such officers shall be authorized to issue an appearance ticket or, in lieu thereof, a uniform appearance ticket or, in lieu thereof, a uniform appearance ticket and simplified information as provided in section 71-0203, for any violation of this chapter or rule, regulation or order adopted thereunder. Law enforcement officers of the Fish and Wildlife Service of the United States Department of the Interior or the National Marine Fisheries Service of the United States Department of Commerce may enforce the provisions of articles 11 and 13 of this chapter and shall be authorized to issue an appearance ticket or, in lieu thereof, a uniform appearance ticket and simplified information as provided in section 71-0203, for any violation of article 11, article 13 or rule, regulation or order adopted pursuant to such article.

§ 71-0202. Enforcement; designated employees to have certain powers.

Such employees as may be designated by the commissioner shall be authorized to issue uniform appearance tickets, simplified traffic informations, simplified parks informations, simplified environmental conservation informations, and uniform navigation summons and/or complaint, when acting pursuant to their special duties.

§ 71-0203. Uniform appearance ticket and simplified information.

1. The commissioner shall prescribe the form of an appearance ticket and simplified information for all cases involving a violation of any provision of this chapter or of any rule, regulation or order adopted or

promulgated thereunder, or of any class or category of such cases, and to establish procedures for proper administrative controls over the disposition thereof.

2. The chief executive officer of each local police force including county, town, city and village police departments, sheriffs and the superintendent of state police shall prepare or cause to be prepared such records and reports as may be prescribed hereunder.

3. The commissioner shall have the power to adopt such rules and regulations as may be deemed necessary to accomplish the purposes and enforce the provisions of this section including requirements for reporting by trial courts having jurisdiction over such offenses.

4. Any person who disposes of any uniform appearance ticket and simplified information in any other manner than that prescribed by law, rule or regulation shall be guilty of a class B misdemeanor.

5. The provisions of this section shall not apply to any offense for which a uniform summons and complaint is prescribed by the commissioner of motor vehicles pursuant to section two hundred seven of the vehicle and traffic law or by the commissioner of parks and recreation pursuant to article twenty-seven of the parks and recreation law.

§ 71-0205. Verification or affirmation of accusatory instruments.

1. When an appearance ticket as authorized under section 71-0203 has been served by an officer described in section 71-0201, any supervisor of such enforcement officer to whom the service of the appearance ticket is reported is hereby authorized to administer to such enforcement officer all necessary oaths in connection with the execution of the accusatory instrument to be presented in court by such enforcement officer in the prosecution of the offense involved.

2. A simplified information need not be verified if it is affirmed by the issuing officer, under penalty of perjury.

§ 71-0207. Pleas by mail.

A defendant charged with a violation of any provision of this chapter or rule, regulation or order promulgated or adopted thereunder may himself plead guilty to the charge in open court. He may also submit to the magistrate having jurisdiction, in person, by duly authorized agent, or by registered mail, a statement (a) that he waives arraignment in open court and the aid of counsel, (b) that he pleads guilty to the offense as charged, (c) that he elects and requests that the charge be disposed of and the fine or penalty fixed by the court, (d) of any explanation that he desires to make concerning the offense charged, and (e) that he makes all statements under penalty of perjury. Thereupon the magistrate may proceed as though the defendant had been convicted upon a plea of guilty in open court, provided however, that any imposition of fine or penalty hereunder shall be deemed tentative until such fine or penalty shall have been paid and discharged in full. If upon receipt of the aforesaid statement the magistrate shall deny the same, he shall thereupon notify the defendant of this fact, and that he is required to appear before the said magistrate at a stated time and place to answer the charge which shall thereafter be disposed of pursuant to the applicable provisions of law.

§ 71-0209. Convictions; bail forfeitures; failure to appear.

1. The trial court or clerk thereof shall certify to the commissioner the facts of any case involving a violation of any provision of this chapter, or of any rule, regulation or order adopted pursuant thereto,
 (a) within five days of the date of conviction of such violation;
 (b) within five days of a forfeiture of bail in such case; or
 (c) within ninety days of a failure of the defendant to appear on the initial date of appearance, or any adjourned date for appearance or trial.

2. The commissioner may, by regulation, provide for the form and

content of such certification and limit the violations for which certifications shall be required. Such certifications shall be presumptive evidence of the facts therein contained and may, in the discretion of the commissioner, be recorded in the records of the department. In the event a conviction which has been so recorded is subsequently reversed, the commissioner, upon receiving due notice thereof, shall record such fact in such records.

3. Upon the conviction of any person of a violation for which a certification must be made to the commissioner, pursuant to this section, the court or clerk shall also enter such conviction on any license or certificate issued by the department if such entry is required by the regulations of the commissioner.

§ 71-0211. Disposition of fees and penalties.

1. Notwithstanding any other provisions of law to the contrary, all fines and penalties collected pursuant to title nineteen of this article, except amounts required to be paid into the conservation fund pursuant to subdivision two of section 71-1929 of such title; title twenty-one of this article; title twenty-seven of this article, except amounts required to be paid into the hazardous waste remedial fund pursuant to subdivision two of section 71-2725 of such title; and title forty-one of this article shall be paid into the general fund to the credit of the state purposes account.

2. Unless otherwise provided in this chapter, not later than the tenth day of each month, all fines, penalties and forfeitures collected for violations of this chapter or rules, regulations, local laws or ordinances adopted thereunder under judgment of any town or village court, shall be paid over by such court to the comptroller of the state, with a statement accompanying the same, setting forth the action or proceeding in which such moneys were collected, the name and residence of the defendant, the nature of the offense, and the fines and penalty imposed. The comptroller shall pay these funds into the general fund of the state.

All fines and penalties collected for violations of this chapter by courts operating pursuant to section thirty-nine of the judiciary law shall be paid to the state commissioner of taxation and finance on a monthly basis no later than ten days after the last day of each month. All such fines and penalties shall be the property of the state.

§ 71-0213. Mandatory surcharge.

1. Whenever proceedings result in a conviction for an offense under this chapter there shall be levied, in addition to any sentence required or permitted by law, the following mandatory surcharges: (a) in the amount of twenty-five dollars for violations of sportfishing regulations set forth in 6 NYCRR 10; (b) in the amount of seventy-five dollars for all other offenses under this chapter provided, however, that convictions for offenses under articles seventeen, nineteen or twenty-seven of this chapter shall be subject to a mandatory surcharge equal to the greater of seventy-five dollars or six percent of any penalty or fine imposed. The mandatory surcharge shall be paid to the clerk of the court who shall remit such mandatory surcharge to the state comptroller provided, however, that in cases where the conviction was rendered by a town or a village justice court, the clerk of such court shall pay twenty-five dollars of such surcharge to the chief fiscal officer of the town or village in the case of surcharges resulting from paragraph (b) of this subdivision and ten dollars in the case of surcharges resulting from paragraph (a) of this subdivision and shall pay the remaining amounts of such mandatory surcharges to the state comptroller in the same manner as provided in section 71-0211 of this article. The comptroller shall pay such monies into the state treasury to the credit of the general fund.

2. Any person who has paid a mandatory surcharge under the authority of this section which is ultimately determined not to be required by this section shall be entitled to a refund of such mandatory surcharge upon application to the state comptroller. The state comptroller shall require such proof as is necessary to determine whether a refund is

required by law.

TITLE 3
SUMMARY ABATEMENT

Section 71-0301. Summary abatement.

§ 71-0301. Summary abatement.

Notwithstanding any inconsistent provisions of law, whenever the commissioner finds, after investigation, that any person is causing, engaging in or maintaining a condition or activity which, in his judgment, presents an imminent danger to the health or welfare of the people of the state or results in or is likely to result in irreversible or irreparable damage to natural resources, and relates to the prevention and abatement powers of the commissioner and it therefore appears to be prejudicial to the interests of the people of the state to delay action until an opportunity for a hearing can be provided, the commissioner may, without prior hearing, order such person by notice, in writing wherever practicable or in such other form as in the commissioner's judgment will reasonably notify such person whose practices are intended to be proscribed, to discontinue, abate or alleviate such condition or activity, and thereupon such person shall immediately discontinue, abate or alleviate such condition or activity. As promptly as possible thereafter, not to exceed fifteen days, the commissioner shall provide the person an opportunity to be heard and to present proof that such condition or activity does not violate the provisions of this section. The commissioner shall adopt any other appropriate rules and regulations prescribing the procedure to be followed in the issuance of such orders. Any person who violates any of the provisions of, or who fails to perform any duty imposed by this section, or any rule, regulation or order promulgated by the commissioner hereunder, shall be liable to a civil penalty of not more than twenty-five hundred dollars for each such violation and an additional penalty of not more than five hundred dollars for each day during which such violation continues, and, in addition thereto, such

person may be enjoined from continuing such violation. Penalties and injunctive relief provided herein shall be recoverable in an action brought by the attorney general at the request and in the name of the commissioner.

TITLE 4

DELEGATION OF ENFORCEMENT

Section 71-0401. Delegation of civil enforcement authority.

71-0403. Delegation of criminal enforcement authority.

§ 71-0401. Delegation of civil enforcement authority.

Whenever the attorney general is authorized under this chapter to initiate or prosecute a civil action or proceeding on behalf of the department, such authority may in the discretion of the attorney general be delegated to the department, to initiate or prosecute any such action or proceeding.

§ 71-0403. Delegation of criminal enforcement authority.

Whenever the attorney general is authorized under this chapter to prosecute a criminal proceeding on behalf of the department, such authority may in the discretion of the attorney general be delegated to the department, to initiate or conduct any such prosecution. Provided, however, that in any event the district attorney of the county in which the violation occurs may initiate or conduct any such prosecution.

TITLE 5

ENFORCEMENT OF PROVISIONS DERIVED FROM FORMER CONSERVATION LAW

Section 71-0501. Applicability of this title.

71-0503. Investigation by department.

71-0505. Suits and prosecution.

- 71-0507. Actions for penalties generally.
- 71-0509. Costs in actions by the people.
- 71-0511. Judgments; how enforced.
- 71-0513. Jurisdiction of courts in criminal cases.
- 71-0517. Witnesses not excused from testifying.
- 71-0519. Compromise of civil penalty.
- 71-0521. Certificate by court or justice.
- 71-0523. Power of the department to settle or compromise an action.
- 71-0525. Powers of designated departmental officers and employees and members of the state police.

§ 71-0501. Applicability of this title.

This title shall apply to sections 3-0109 through 3-0115 inclusive and sections 3-0305 and 3-0307 of article 3; articles 9, 11, 13 and 15; titles 7, 9, 11 and 13 of article 21; articles 23 and 24; and articles 43, 45 and 47 of this chapter.

§ 71-0503. Investigation by department.

1. Any investigation, inquiry or hearing which the department has power to undertake or to hold may be undertaken or held by or before the commissioner, the deputy commissioner or the head of a division, or before any other officer or employee of the department designated for such purpose by written order of the commissioner, filed in the office of the department. All investigations, inquiries, hearings and decisions of the commissioner, the deputy commissioner or the head of a division, shall be and be deemed to be the investigations, inquiries, hearings and decisions of the department, and every order or decision made by the commissioner, and every order or decision made by the deputy commissioner or a head of division and approved and confirmed by the commissioner and ordered filed in the office of the department, shall be and be deemed to be the order or decision of the department.

2. The commissioner, deputy commissioner, a head of a division, or an officer or employee of the department duly designated by the commissioner, shall have the power to administer oaths in any proceedings which the department is required or authorized by law to conduct.

3. The department shall have power to subpoena and require the attendance in this state of witnesses and the production by them of books and papers pertinent to the investigations and inquiries which it is authorized to make under any provision of this chapter listed in section 71-0501 or under titles 5 through 15 inclusive and title 33 of this article and to examine them and such public records as it shall require in relation thereto, and for the purpose of such examinations the department shall possess all the powers conferred by the Legislative Law upon a committee of the Legislature or by the Civil Practice Law and Rules upon a board or committee, and may invoke the power of any court of record in the state to compel the attendance and testifying of witnesses and the production by them of books and papers as aforesaid. A subpoena issued under this section shall be regulated by the Civil Practice Law and Rules.

4. In any investigation or inquiry by or upon any hearing before the department, the commissioner, his deputy or any other officer conducting the investigation, inquiry or hearing may confer immunity in accordance with the provisions of section 50.20 of the Criminal Procedure Law.

§ 71-0505. Suits and prosecution.

1. The commissioner shall have the power to bring actions suits or proceedings as in his judgment may be necessary or proper to perform any of the powers, functions or duties imposed upon him or upon the department or any division thereof by any of the provisions of this chapter listed in section 71-0501 or under titles 5 through 15 inclusive and title 33 of this article or to prevent the violation by any person, public or private, of any of the provisions thereof; and shall have the power to defend such actions, suits or proceedings as may arise through

the performance of any of the powers, duties or functions imposed upon him or upon the department or any division thereof.

2. It shall be the duty of the Attorney General, when requested by the department, to appoint an Assistant Attorney General, and such assistants as may be necessary and assign them to the department. Such Assistant Attorney General and assistants shall receive salaries, to be fixed by the Attorney General within the appropriation therefor. It shall be the duty of such assistant, in the name of the Attorney General, to conduct all prosecutions for penalties imposed by the provisions of this chapter listed in section 71-0501 or under titles 5 through 15 inclusive and title 33 of this article and to bring all actions, suits and proceedings, which the department shall be authorized to institute and maintain, and to defend all actions, suits and proceedings brought against the department, its officers or employees of or on account of any act or any thing done by the said department, its officers or employees when such act or thing was, in the opinion of the Attorney General, done in the discharge of any official duty or in reasonable exercise of authority.

3. No action, suit or proceeding in which the title to lands of the state in forest preserve counties shall be involved shall be withdrawn or discontinued, nor shall judgment therein against the state be entered on consent except on special permission of the court and after application made in open court, on which application all the terms and conditions of the settlement shall be fully stated in writing and the reasons therefor set forth at length.

§ 71-0507. Actions for penalties generally.

1. Actions for penalties for violation of any provisions of this chapter listed in section 71-0501 or under titles 5 through 15 inclusive and title 33 of this article, except as otherwise expressly provided,

a. Shall be in the name of the "People of the State of New York";

b. Must be brought on order of the department; and

c. May be compromised, settled and discontinued as provided in sections 71-0505 and 71-0519 and subdivision 11 of section 11-0505.

2. Such actions, if in justices' courts, may be brought in any town of the county in which the penalty is incurred, or, if the defendant resides in another county, in any town of the county in which the defendant resides.

3. Moneys received by a town justice or a village justice in any action for a penalty brought under the provisions of this chapter listed in section 71-0501 of titles 5 through 15 inclusive and title 33 or upon the settlement or compromise thereof, or a fine for a violation of the provisions of this chapter listed in section 71-0501 and titles 5 through 15 inclusive and title 33 of this article shall be paid to the State Comptroller as provided in section 27 of the Town Law and section 4-410 of the village law. From the moneys so received, the State Comptroller shall pay all lawful fees for services rendered in such actions when instituted by order of the department or upon information of a conservation officer, regional and assistant regional conservation officer, special game protector, district ranger, forest ranger, or member of the state police. The balance of such moneys arising from penalties under articles 11 or 13 or title 9 of this article or upon the settlement or compromise thereof or from fines for violations of any of the provisions of articles 11 or 13 or title 9 of this article after the payment of lawful fees shall be credited by the Comptroller to the conservation fund. The Comptroller shall adjust and settle his account with the conservation fund in the manner provided by section 99-a of the State Finance Law. The balance of all other such moneys after payment of lawful fees shall be credited by the Comptroller to the general fund.

4. All moneys received by any other person or court in an action for a penalty brought under the provisions of this chapter listed in section 71-0501 and titles 5 through 15 inclusive and title 33 of this article or upon the settlement or compromise thereof, or a fine for a violation of the provisions of this chapter listed in section 71-0501 and titles 5

through 15 inclusive and title 33 of this article, shall be paid by such person or court to the department within thirty days after receipt thereof. The department shall pay the expenses of collection and the lawful fees of magistrates and constables for services performed in criminal actions brought upon information of a conservation officer, regional and assistant regional conservation officer, special game protector, district ranger, forest ranger, or member of the state police. Such moneys derived from fines or penalties for violations of articles 11 or 13 or title 9 of this article or from the settlement or compromise thereof shall be paid by the department to the Commissioner of Taxation and Finance and credited to the conservation fund. All other moneys so received by the department shall be paid to the Commissioner of Taxation and Finance and credited to the general fund.

§ 71-0509. Costs in actions by the people.

In case of recovery of any amount in an action brought for a penalty under the provisions of this chapter listed in section 71-0501 or under titles 5 through 15 inclusive and title 33, of this article or any action authorized by such law as amended, in any court of record the people shall be entitled to recover full costs, of course, and at the rates as provided for civil actions.

§ 71-0511. Judgments; how enforced.

Judgments recovered under the provisions of this chapter listed in section 71-0501 or under titles 5 through 15 inclusive and title 33 of this article may be enforced by contempt.

§ 71-0513. Jurisdiction of courts in criminal cases.

1. Except as provided in subdivision 2 of this section, County Courts, and subject to the power of removal provided in the Criminal Procedure Law, district courts, the New York City criminal court, town courts and

village courts shall have, in the first instance, concurrent jurisdiction of offenses committed under the provisions of this chapter listed in section 71-0501 or under titles 5 through 15 inclusive and title 33 of this article, provided, however, that an action before a town court shall be brought in the town in which the offense was committed or an adjoining town, and that an action before a County Court shall be brought in the county in which the offense was committed. A warrant shall be returnable before the local criminal court issuing the same.

2. This section does not apply to offenses committed under articles 11 and 13 or title 9 of this article.

§ 71-0517. Witnesses not excused from testifying.

No person shall be excused from testifying or producing any books, papers or other documents in any civil or criminal action or proceeding taken or had under the provisions of this chapter listed in section 71-0501 or under titles 5 through 15 inclusive and title 33 of this article, upon the ground that his testimony might tend to convict him of a crime, or subject him to a penalty or forfeiture. But no person shall be prosecuted, punished or subjected to any penalty or forfeiture for or on account of any act, transaction, matter or thing concerning which he shall, under oath, have testified or produced documentary evidence, and no testimony so given or produced shall be received against him upon any criminal investigation or proceeding; provided, however, that no person so testifying shall be exempt from prosecution or punishment for any perjury committed by him in his testimony. Nothing herein contained is intended to give, or shall be construed as in any manner giving, unto any corporation, immunity of any kind.

§ 71-0519. Compromise of civil penalty.

1. A person who has violated any of the provisions of this chapter listed in section 71-0501 or under titles 5 through 15 inclusive and

title 33 of this article, and who desires to compromise and settle his civil liability therefor, may appear with any conservation officer, regional and assistant regional conservation officer, special game protector, district ranger, forest ranger, or member of the state police, before a court or justice having jurisdiction in civil actions, and thereupon such person may, upon the consent of the representative of the department appearing, compromise and settle his liability for civil penalties, for an amount agreed upon between said court or justice, the representative of the department and the person who committed such violation.

2. The agreed amount shall not be less than ten dollars nor more than the amount for which such person would be liable in a civil action for penalties; provided that any person who has violated the provisions of this chapter listed in section 71-0501 or under titles 5 through 13 inclusive and titles 27 and 33 of this article, involving the taking of a deer with the aid of an artificial light, or has illegally taken a deer prior to the first day of the open season or after the last day of the open season in the county in which taken, or has otherwise illegally taken a deer, and who desires to compromise and settle his civil liability therefor, may, in the manner herein provided, compromise and settle his liability for civil penalties under the provisions of this chapter listed in section 71-0501 or under titles 5 through 13 inclusive and titles 27 and 33 of this article, in an amount not less than one hundred dollars nor more than the amount for which such person would be liable in a civil action for penalties.

3. If such compromise be made, such person shall forthwith subscribe his name to a statement setting forth concisely the facts constituting such violation, the amount agreed upon, and that a judgment may be entered against him for that sum. Upon said statement being sworn to before and filed with said court or justice, he shall forthwith enter in his civil docket a record of the proceedings and amount of the judgment.

4. Said court or justice shall upon the entry of such judgment be entitled to a fee of two dollars and fifty cents to be paid by the person who committed such violation, provided, however, that if the

justice is a justice of a town or village, such fee shall be the property of the town or village of which he is an officer, and shall be paid by said justices to the State Comptroller in the same manner as other fees received by such justice.

5. A judgment entered as provided herein may be enforced by an execution against the property of the defendant, but no body execution shall issue thereon. Such judgment shall be a bar to a criminal action for the same violation, if satisfied within thirty days from the date of the entry thereof.

6. Whenever a person who desires to compromise and settle his civil liability pursuant to the provisions of this section is an infant over the age of fourteen years, upon his appearance for such purpose, the court or justice before whom such appearance is made, may, upon the application of such person appoint a person to appear as his guardian for the purpose of compromising and settling his said civil liability. The written consent of the person so appointed must be filed with the court or justice before his appointment.

§ 71-0521. Certificate by court or justice.

The court or justice, other than a town justice or a village police justice, before whom any person shall be tried or before whom a compromise of the civil penalties for a violation of any provision of this chapter listed in section 71-0501 or under titles 5 through 15 inclusive and title 33 of this article, shall have been made, or the clerk of the court, if there be a clerk, shall, at the termination of such trial or proceeding, forthwith mail or deliver to the department at Albany, or to its representative at such trial or proceeding, a certified statement of the disposition of the case or proceeding, giving the date thereof, the name of the defendant, the name of the person upon whose information the action or proceeding was instituted, the date and place of the violation, the name of each witness sworn in support of the charges, and the costs of the court or fees of the justice, and the fees of the constable, if any. Provided, however, that a town justice or a

village police justice before whom any person shall be tried or before whom a compromise of the civil penalties for a violation of any provision of this chapter listed in section 71-0501 or under titles 5 through 15 inclusive and title 33 of this article, shall have been made shall forthwith mail or deliver to the department at Albany or to its representative in attendance at such trial or proceeding such certified statement, and within the first ten days of the month following the termination of such trial or proceeding deliver to the State Comptroller at Albany a statement in such form as the Comptroller may require. The Comptroller upon receipt of such statement shall, as provided in section 71-0507, audit the bills of the justice of the peace and the constable for fees in such trial or proceeding and shall pay to the persons entitled thereto the amounts allowed by such audit and shall charge same to the conservation fund.

§ 71-0523. Power of the department to settle or compromise an action.

The department shall empowered to settle or compromise in its discretion any action or cause of action to recover a penalty under the provisions of this chapter listed in section 71-0501 or under titles 5 through 15 inclusive and title 33 of this article, as it may deem advantageous to the state.

§ 71-0525. Powers of designated departmental officers and employees and members of the state police.

1. All police officers, such employees as may be designated by the commissioner, and all peace officers, when acting pursuant to their special duties, shall enforce the provisions of this chapter listed in section 71-0501 or under titles 5 through 15 inclusive and title 33 of this article, or of judgments obtained for violation thereof, and shall have, particularly, the following powers:

a. To execute all warrants and search warrants issued for violation of articles 11 and 13 and titles 9 of this article and to serve subpoenas

issued for examination, investigation or trial of offenses against any of its provisions;

b. To search without search warrant any boat or vehicle of any kind, any box, locker, basket, creel, crate, game bag, package or any container of any nature and the contents of any building other than a dwelling whenever they have cause to believe that any provision of this article or of any law for the protection of fish, shellfish, crustacea, wildlife, game or protected insects has been or is being violated, and to use such force as may be necessary for the purpose of examination and search;

c. To search any dwelling and its contents, provided they have a search warrant to do so;

d. To arrest without warrant any person committing in their presence a misdemeanor under this chapter listed in section 71-0501 or under titles 5 through 15 inclusive and title 33 of this article and to take such person immediately before a magistrate having jurisdiction for trial.

2. A peace officer, acting pursuant to his special duties or a police officer shall have the same powers as environmental conservation officers and state police under the fish and wildlife law, except the power to search without a warrant.

TITLE 7

ENFORCEMENT OF ARTICLE 9

Section 71-0701. Applicability of title.

71-0703. Penalties.

71-0705. Enforcement.

71-0707. Resisting or obstructing departmental agent or employee.

71-0709. Injury to state lands.

71-0711. Injury to municipal or private lands.

71-0712. Timber theft and trespass education-training.

71-0713. Recovery for damages from fires.

71-0715. Rules of evidence applicable to forest fire cases.

§ 71-0701. Applicability of title.

In addition to the provisions of sections 71-0101 and 71-0301, and titles 5 and 40 of this article, the provisions of this title shall be applicable to the enforcement of article 9 of this chapter.

§ 71-0703. Penalties.

In order to secure the enforcement of the several sections of article 9 the following fines and civil penalties are provided:

1. Except as otherwise provided in subdivision 4, 5, 6 or 7 of this section, any person who violates any provision of article 9 or the rules, regulations or orders promulgated pursuant thereto or the terms of any permit issued thereunder, or who fails to perform any duty imposed by any provision thereof shall be guilty of a violation, and, upon conviction, shall be punished by a fine of not more than two hundred fifty dollars, or by imprisonment for not more than fifteen days, or by both such fine and imprisonment, and in addition thereto shall be liable to a civil penalty of not less than ten nor more than one hundred dollars.

2. The violation of any of the provisions of the following sections shall subject the person guilty thereof to the following civil penalties in addition to the liability prescribed in subdivision 1 of this section:

- a. Section 9-1113 of this chapter, two dollars per tree;
- b. Subdivision 3 of section 9-1105 of this chapter, twenty-five dollars per day;
- c. Subdivision 4 of section 9-1105 of this chapter, and subdivision 1

of section 9-1117 of this chapter, ten dollars per mile per day;

d. Section 9-1115 of this chapter, ten dollars per mile;

e. Subdivision 2 of section 9-1117 of this chapter, one hundred dollars per each offense; and

f. Section 9-1119 of this chapter, one hundred dollars per day per locomotive.

With respect to the penalty for violation of subdivision 4 of section 9-1105 of this chapter, the owner and every person engaged in such cutting shall be liable therefor; however, the liability for penalty shall not arise until the expiration of twenty days after service, personally or by mail upon the alleged violator at his last known place of residence of a written notice of failure to comply with the requirements of subdivision 4 of section 9-1105 of this chapter.

3. Any person who molests, injures, removes, destroys or withholds supplies or other material maintained for forest fire protection purposes shall be guilty of a violation and shall be punishable and liable to a civil penalty as provided in subdivision 1 of this section.

4. Any person who sets fire wilfully in violation of subdivision 1 of section 9-1105 of this chapter shall be guilty of a felony.

5. In addition to any prosecution as provided under article one hundred fifty-five of the penal law, any person who violates subdivision 1 of section 9-0303 or section 9-1501 of this chapter except where the lawful exercise of an easement or right of way on land not owned by the state is involved shall be guilty of a class A misdemeanor. Upon conviction, such person shall be sentenced to a fine and/or imprisonment as provided in the penal law.

6. (a) In addition to any other penalty provided by law, any person who violates subdivision 1 of section 9-0303 of this chapter shall be liable to a civil penalty of two hundred fifty dollars per tree or

treble damages, based on the stumpage value of such tree or both. Where the order or decision finds that the defendant established by clear and convincing evidence, that when such defendant committed the violation, he or she had cause to believe that the land was his or her own, or that he or she had an easement or right of way across such land which permitted such action, damages shall be awarded on the basis of the stumpage value of such tree or trees in the market as if they were privately owned. Notwithstanding the foregoing, this section shall not be construed to authorize the cutting of timber or removal of trees where such action would otherwise be violative of any provision of the state constitution or law.

(b) In addition to any other penalty provided by law, a person who violates section 9-1501 of this chapter shall be liable for a civil penalty of two hundred fifty dollars per tree or treble damages or both, based on the stumpage value of such tree or trees. Where the order or decision finds that the defendant established by clear and convincing evidence, that when such defendant committed the violation, he or she had cause to believe that the land was his or her own or that he or she had an easement or right of way across such land which permitted such action, damages shall be awarded on the basis of the stumpage value of such tree or trees. Notwithstanding the foregoing, this section shall not be construed to authorize the cutting of timber or removal of trees where such action would otherwise be violative of any provision of the state constitution or law.

(c) For purposes of this subdivision, "stumpage value" shall mean the current fair market value of a tree as it stands prior to the time of sale, cutting, or removal. Stumpage value shall be determined by one or more of the following methods: the sale price of the tree in an arm's-length sale, a review of solicited bids, the stumpage price report prepared by the department of environmental conservation, comparison with like sales on trees on state or private lands, or other appropriate means to assure that a fair market value is established within an acceptable range based on the appropriate geographic area.

7. In addition to the penalties otherwise provided, any person who violates any of the provisions of subdivision 1 of section 9-0303 or section 9-1501 of this chapter may be ordered by the commissioner or the

court to make reparations for any permanent and substantial damage caused to the land or the improvements thereon as a result of such violation. Such reparations shall be of such kind, nature and extent as will reasonably restore the lands affected by the violation to their condition immediately before the violation and may be made by physical restoration of such lands and/or by the assessment of a monetary payment to make such restoration.

8. Any person who violates any provision of any proclamation issued by the governor pursuant to the provisions of section 9-1101 of this chapter shall be guilty of a violation and shall be punishable and liable to a civil penalty as provided in subdivision 1 of this section.

9. a. Any person who transports, sells, imports or introduces invasive species, in violation of the regulations promulgated pursuant to section 9-1709 of this chapter shall be subject to the following:

For any first violation in lieu of a penalty there may be issued a written warning by the department and there may also be issued education materials at the discretion of the department regarding requirements related to invasive species. Such person shall, however, for any subsequent violation thereafter be subject to a fine of no less than two hundred fifty dollars.

b. Any nursery grower licensed pursuant to article fourteen of the agriculture and markets law, any person who owns or operates a public vessel as such term is defined in paragraph (a) of subdivision six of section two of the navigation law, or any person who owns or operates a commercial fishing vessel who transports, sells, imports or introduces invasive species in violation of the regulations promulgated pursuant to section 9-1709 of this chapter, shall be subject to a fine of not less than six hundred dollars upon the first penalty. Upon the second penalty such person shall be subject to a fine of not less than two thousand dollars. Upon a subsequent penalty and after a hearing or opportunity to be heard upon due notice the following penalties may apply: (i) such nursery grower may be subject to the revocation procedures of section one hundred sixty-three-c of the agriculture and markets law (ii) such

person's vessel registration may be suspended or (iii) such person's fishing permit may be revoked by the department.

10. Any person who violates section 9-1710 of this chapter shall be guilty of a violation and shall be punishable and liable to a civil penalty as provided in subdivision one of this section, provided, however, that for any first violation in lieu of a penalty there shall be issued a written warning by the department and there shall also be issued education materials at the discretion of the department regarding requirements related to invasive species. Such person shall be subject to a fine of up to one hundred fifty dollars for a second offense, up to two hundred fifty dollars for a third offense, and no less than two hundred fifty dollars nor more than one thousand dollars for a fourth or subsequent offense.

§ 71-0705. Enforcement.

1. All police officers and peace officers, when acting pursuant to their special duties, shall have the power to arrest without warrant any person committing an offense under the provisions of article 9 and may take such persons immediately before a magistrate having jurisdiction for trial, and exercise such other powers of peace officers as may be necessary for the enforcement of the provisions of article 9. No employees, police officers or peace officers shall compromise or settle any violation of article 9 without the order of the department.

2. In lieu of arrests, such persons designated pursuant hereto may issue appearance tickets as provided for in article one hundred fifty of the criminal procedure law to persons committing an offense other than a felony under the provisions of this article.

§ 71-0707. Resisting or obstructing departmental agent or employee.

Any person who resists or obstructs an authorized agent or employee of the department while he is engaged in carrying out any provision of

section 9-0305 shall be guilty of a violation which shall be punishable by a fine not exceeding one hundred dollars and by an additional fine of not exceeding twenty-five dollars for each additional day of such resistance or obstruction.

§ 71-0709. Injury to state lands.

Any person who intentionally or negligently causes a fire which burns on or over state lands shall be liable to the state for treble damages and, in addition, to a civil penalty of ten dollars for every tree killed or destroyed by such fire. Damages to state lands and timber shall be ascertained and determined at the same rate of value as if such property were privately owned.

§ 71-0711. Injury to municipal or private lands.

Any person who causes a fire which burns on or over lands belonging to another person or to a municipality shall be liable to the party injured (a) for actual damages in case of fire negligently caused or (b) for the higher of actual damages or damages at the rate of five dollars for each tree killed or destroyed in case of fire wilfully caused.

§ 71-0712. Timber theft and trespass education-training.

Within such funds as may be specifically appropriated therefor, the commissioner is hereby authorized to seek the cooperation and assistance of the attorney general's office and the office of court administration to develop and provide educational-training programs for municipal justice courts, district attorneys and law enforcement agencies in relation to the control and prosecution of timber theft and trespass.

§ 71-0713. Recovery for damages from fires.

The state, a municipality or any person may sue for and recover damages under section 71-0709 and 71-0711, notwithstanding the distance from the place where the fire was set or started and notwithstanding the same may have burned over and across several separate, intervening and distinct tracts, parcels or ownerships of land.

§ 71-0715. Rules of evidence applicable to forest fire cases.

1. Prima facie cause on railroad right of way. The fact that a fire originates upon the right of way of a railroad shall be prima facie evidence that the fire was caused by the negligence of the railroad company.

2. Prima facie cause in clearing lands. Whenever a fire has been set for the purpose specified in subdivision 5 of section 9-1105 in any of the fire towns it shall be prima facie evidence that the fire was started by the owner or occupant of the land.

TITLE 9

**ENFORCEMENT OF ARTICLES 11 AND 13--THE FISH AND
WILDLIFE LAW**

Section 71-0901. Applicability of title.

71-0903. Accessories guilty as principals.

71-0905. Penal Law, Criminal Procedure Law and other laws not affected.

71-0907. Powers and duties of enforcement officers.

71-0909. Forfeitures.

71-0911. Search warrants; when issued.

71-0913. Reciprocal enforcement of violations in boundary waters.

71-0915. Abatement of nuisances.

71-0917. Presumptions from possession.

71-0919. Punishment of violations of Fish and Wildlife Law.

71-0921. Misdemeanors.

71-0923. Violations.

71-0924. Illegal commercialization of fish, shellfish,
crustaceans, and wildlife.
71-0925. Civil penalties.
71-0927. Mandatory license revocation.

§ 71-0901. Applicability of title.

In addition to the provisions of sections 71-0101, 71-0301 and title 5 of this article the provisions of this title shall be applicable to the enforcement of articles 11 and 13 of this chapter. This title shall also apply to enforcement undertaken pursuant to the functions, powers, duties and obligations of the Department of Environmental Conservation provided for in section 41-0105.

§ 71-0903. Accessories guilty as principals.

1. A person who counsels or aids in a violation of any provision of the Fish and Wildlife Law or a regulation or order of the department pursuant to the Fish and Wildlife Law, or knowingly shares in any of the proceeds of such a violation by receiving or possessing fish, game, wildlife, shellfish, crustacea or protected insects is guilty of the violation which he counsels or aids, or the proceeds of which he knowingly shares.

2. In any case where possession, transportation, buying or selling of fish, game, wildlife, shellfish, crustacea or insects is unlawful solely because the taking thereof was unlawful, such possession, transportation, buying or selling by a person other than a person guilty of the unlawful taking shall be punishable only if done with knowledge that the taking was unlawful.

§ 71-0905. Penal Law, Criminal Procedure Law and other laws not affected.

1. No provision or language of the Fish and Wildlife Law shall be construed as amending, repealing, superseding or limiting any provision of the Penal Law, Criminal Procedure Law or other law, except to the extent that such provision or language is expressly stated to be applicable notwithstanding such law, or notwithstanding any other law. Except to such extent, any provisions of the Fish and Wildlife Law inconsistent with the provisions of any other law shall be deemed to be effective for the purposes of the Fish and Wildlife Law only.

§ 71-0907. Powers and duties of enforcement officers.

1. All officers and employees, designated by the commissioner, and all peace officers, when acting pursuant to their special duties and all police officers, shall enforce all laws of the state relating to fish, wildlife, shellfish, crustacea, protected insects and game. Such officers may include conservation officers, regional and assistant regional conservation officers, special game protectors, inspectors of the office of parks and recreation, bay constables, and forest rangers.

2. All police officers, and all peace officers, when acting pursuant to their special duties, and all officers and employees of the department, as may be designated by the commissioner, shall enforce the provisions of title 21 of article 11 of the Fish and Wildlife Law, and the provisions of article 71 applicable thereto, except that the department and its enforcement officers are not obligated to enforce the provisions of section 11-2113 prohibiting trespass upon lands privately owned, other than licensed game preserves and shooting preserves, unless the trespass committed consists of (a) hunting, fishing or trapping or disturbing wildlife; or (b) cutting, pulling or digging of trees; or (c) the removal of trees.

3. The officers named in subdivision 1 shall enforce the provisions of this chapter listed in section 71-0501 or under titles 5 through 15 inclusive and title 33 of this article or of judgments obtained for violation thereof, and shall have, particularly, the powers stated in subdivision 4. Peace officers shall have the same powers as conservation

officers, and state police under the Fish and Wildlife Law, except the power to search without warrant.

4. Officers named in subdivision 1 shall have power:

a. To execute all warrants and search warrants issued for violation of the Fish and Wildlife Law and to serve subpoenas issued for examination, investigation or trial of offenses against any of its provisions;

b. To search without search warrant any boat or vehicle of any kind, any box, locker, basket, creel, crate, game bag, package or any container of any nature and the contents of any building other than a dwelling whenever they have cause to believe that any provision of this article or of any law for the protection of fish, shellfish, crustacea, wildlife, game or protected insects has been or is being violated, and to use such force as may be necessary for the purpose of examination and search;

c. To search any dwelling and its contents, provided they have a search warrant to do so;

d. To arrest without warrant any person committing in their presence a misdemeanor under the provisions of this chapter listed in section 71-0501 or under titles 5 through 15 inclusive and title 33 of this article and to take such person immediately before a magistrate having jurisdiction for trial;

e. To seize as evidence without warrant any fish, shellfish, crustacea, wildlife, game, or parts thereof, protected insects or plumage as defined in section 11-1729, whenever they have cause to believe it is possessed or transported in violation of law, or it bears evidence of illegal taking, or it is possessed or transported under circumstances making the possession or transportation presumptive evidence of illegal taking;

f. To seize as evidence without warrant

(1) Any net, trap or other device constituting a nuisance as defined

in section 71-0915;

(2) Any net, trap or device other than a boat, a vehicle, or aircraft or a firearm when they have cause to believe that its possession or use is in violation of any provision of the Fish and Wildlife Law or regulation pursuant thereto;

(3) Any firearm, when they have cause to believe that it has been used in a violation of the Fish and Wildlife Law constituting a misdemeanor involving the illegal taking or attempting to take wild deer;

(4) Any rakes, tongs, dredges, or device other than a boat or vehicle used, or in possession for purpose of use, for the taking of shellfish in violation of subdivisions 1 or 2 of section 13-0309. For the purposes of this paragraph "device" includes a bird, dog, or other animal used in or as an aid in taking fish or wildlife, any jack light, spot light or other artificial light other than a headlight attached in proper position to a motor vehicle, any hunting appliance or apparatus and any fishing or netting gear or tackle. This paragraph does not limit any power of seizure pursuant to warrant.

(5) Any boat or vehicle, when they have probable cause to believe it has been used for the taking of shellfish in violation of subdivision 2 or 3 of section 13-0309 of this chapter by a person possessing, at the time of such use, commercial shellfish harvesting gear or shellfish in excess of two pecks. For the purposes of this subparagraph "commercial shellfish harvesting gear" shall mean rakes, tongs, dredges and other devices commonly used to harvest shellfish for commercial purposes.

5. To retain custody of and provide for the safekeeping of any thing seized as provided in paragraph e or f of subdivision 4 of this section, or deposit it for safekeeping with any police officer, as he deems appropriate, subject to regulations of the department, or of the Superintendent of State Police in the case of a member of the state police, and subject to order of any court having jurisdiction, until determination of any prosecution, civil or criminal, arising from the violation or alleged violation with respect to which they are evidence.

6. No officer named in subdivision 1 shall compromise or settle out of court any civil liability for any violation of the Fish and Wildlife Law.

7. No person shall fail or refuse to comply with any lawful order or directive of any conservation officer or other person duly empowered to enforce all laws of the state relating to fish, wildlife, shellfish, crustacea, protected insects and game.

8. Notwithstanding section 13-0334 of this chapter to the contrary, a. where a commercial fishing vessel, lawfully operating under the fishing permits of another state: (1) encounters or is forecasted to encounter unsafe weather conditions defined as high winds thirty-five knots or greater or waves ten feet or higher or ice or other adverse condition that make the continuation of the voyage unsafe and poses a risk to life and property, or (2) experiences a mechanical problem, that makes the continuation of the voyage unsafe and poses a risk to life and property including compromised hull integrity or pump failures or (3) experiences a significant medical emergency which requires immediate medical attention necessary to protect the health of any person on board, or (4) experiences loss of essential gear such as support systems that renders the vessel unable to remain at sea said commercial fishing vessel may dock at a New York port. A sinking vessel or a vessel leaking oil or fuel may be otherwise directed when the safety of persons is maintained and the vessel poses a significant threat to the waters of New York. The commercial fishing vessel may be required by the department to independently verify the reason for the unscheduled dockage with a mechanic deemed qualified by New York state, the National Weather Service or a medical professional, as appropriate. b. The fishing vessel shall immediately notify the department and the permitting state as soon as the danger is known and communication signals allow. The commercial fishing vessel shall provide the department with: (1) details on the vessel including the vessel captain's name; (2) identity of the permitting state; (3) the nature of the problem; (4) identity of the intended docking location, estimated time of arrival, and quantities and types of fish on board and, (5) a call back phone number or other method of contact. c. The commercial fishing vessel shall not offload cargo without the express authorization of and supervision by department personnel. Authorization to offload fish may be granted where the fish on board the vessel will become unmarketable due to the duration of the

unscheduled dockage. Authorization may be limited according to the willingness of the permitting state to accept the fish under that state's fish allocation.

§ 71-0909. Forfeitures.

1. If the defendant in any prosecution, civil or criminal, for a violation involving the taking of deer with the aid of an artificial light, is held liable or found guilty, or shall effect a civil settlement of any action or cause of action in favor of the state arising out of such violation, the defendant's interest in all things seized as provided in paragraph f of subdivision 4 of section 71-0907 in connection with such violation shall be declared confiscated by and forfeit to the state. Unless a claim of ownership by some other person is made to the department within thirty days after the date of seizure and is established by order of a court or to the satisfaction of the department, all such things shall be disposed of as the department shall direct.

2. If the defendant in any prosecution, civil or criminal, for a violation involving the illegal taking, possession, or transportation of any fish, shellfish, crustacea, wildlife, game or protected insects, is held liable or found guilty, the ownership and right of possession thereof shall be deemed vested or revested in the state for all purposes, notwithstanding any claim of the defendant or of any other person to private ownership lawfully acquired prior to the act or possession constituting such violation, unless such claim shall be established or the operation of this subdivision shall be stayed by order of a court having jurisdiction of the prosecution or an appeal therefrom, or of the subject matter of the claim, before judgment in such prosecution is rendered. If any such claim is asserted by or on behalf of any person in the course of any such prosecution, the court in which the proceedings are had may make such order, or may stay the judgment for such time as he deems proper to permit determination of the claim or application for a stay of the operation of this subdivision.

3. If the defendant is held liable or found guilty in any prosecution, civil or criminal, for a violation involving: a. the illegal use of a net or other device, other than a boat, vehicle, aircraft or firearm, the use of which is prohibited under any and all circumstances for taking the species for which it was used in the violation involved, or is so prohibited except in accordance with a permit issued by the department or; b. possession of nets in any case where such possession is prohibited by section 11-1517 or subdivision 16 of section 13-0343, or if the defendant shall effect a civil settlement of any action or cause of action in favor of the state arising out of such violation, the defendant's interest in the device shall be forfeited to the state. Unless a claim of ownership of such device shall be made to the department by some other person within thirty days thereafter, and shall be established by order of a court or to the satisfaction of the department, such device shall be disposed of as the department shall direct.

4. If the defendant is held liable or found guilty in any prosecution, civil or criminal, of the taking of shellfish in violation of subdivisions 1 or 2 of section 13-0309 or if the defendant shall effect a civil compromise of any action or cause of action in favor of the state arising out of such violation, the defendant's interest in any and all rakes, tongs, dredges or devices other than a boat or vehicle, used for the purpose of taking shellfish in violation of such provisions shall be forfeited to the state. Unless a claim of ownership of such device shall be made to the department by some other person within thirty days thereafter, and shall be established by order of a court or to the satisfaction of the department, such device shall be disposed of as the department shall direct.

4-a. In addition to any other penalties imposed by this chapter, the violation of subdivision 2 or 3 of section 13-0309 of this chapter shall be punishable by forfeiture of any boat or vehicle employed in the violation of such subdivisions.

5. a. For the purposes of this section, a claim of ownership shall mean any lawful interest, including a part interest or security

interest.

b. A claim of ownership shall not prevent vesting or revesting of ownership and right of possession in the state pursuant to subdivision 2 of this section unless the person establishing it either establishes a right of ownership exclusive of any interest in the defendant or shall purchase or redeem from the state any interest of the defendant by payment to the state of the value thereof together with the reasonable expenses of safekeeping of such property between the time of seizure and such redemption. Establishment of a claim of ownership shall not in any event prevent such revesting in the state if the state shall establish that the illegal possession or transportation of which the defendant is held liable or found guilty was expressly or impliedly permitted by the person establishing the claim of ownership.

c. Establishment of a claim of ownership consisting of a part ownership or a security interest shall not entitle the person establishing it to delivery of property as to which the interest of the defendant is declared confiscated or forfeit as provided in subdivision 1 of this section or is forfeited as provided in subdivisions 3 and 4 of this section unless the person establishing it shall redeem any interest of the defendant by payment to the state of the value thereof together with the reasonable expenses of safekeeping of such property between the time of seizure and such redemption. Establishment of a claim of ownership shall not in any event entitle the person establishing it to delivery of the property if the state shall establish that the illegal use or possession of such property, in the manner or for the purposes or in the circumstances making such use or possession illegal, was expressly or impliedly permitted by the person establishing such claim of ownership.

d. Where a person establishing a claim of ownership is required to purchase or redeem any interest of the defendant in a civil or criminal prosecution in order to be entitled to delivery of property in which such claim of ownership is established, such interest of the defendant must be so purchased or redeemed not less than ten days after the price of purchase or redemption shall have been fixed by order of the court or

agreed between the person whose claim is so established and the department. The department shall have power to enter into such agreement on behalf of the state. If a person establishing a claim of ownership shall fail to purchase or redeem the interest of the defendant within the time provided in this subdivision, or such longer time as may be provided by order of the court or agreement of the department, he shall be deemed to have abandoned his claim of ownership, and the property may be disposed of as if no such claim had been asserted.

e. All moneys received in payment of the price of redemption or purchase of the defendant's interest shall be deposited in the conservation fund provided by section 83 of the State Finance Law.

6. A person asserting a claim of ownership as provided in this section shall have the burden of proof.

7. In any action or proceeding in which any person asserts a claim of ownership with respect to property in which the interest of the defendant is declared confiscated and forfeited as provided in subdivision 1 of this section or is forfeited as provided in subdivision 3 of this section, the testimony of such person, or of the defendant in the civil or criminal prosecution, or of both, shall not be deemed sufficient to establish his claim unless corroborated by documentary evidence or by testimony of some other person not interested in the event.

§ 71-0911. Search warrants; when issued.

Whenever it appears probable that fish, wildlife or game, shellfish, crustacea, protected insect, or parts thereof taken or possessed contrary to the Fish and Wildlife Law are concealed, or that a net possessed contrary thereto is concealed, any local criminal court having criminal jurisdiction shall issue a search warrant for the discovery thereof in accordance with the practice provided in article 690 of the Criminal Procedure Law, as far as it is applicable.

§ 71-0913. Reciprocal enforcement of violations in boundary waters.

If and when the state of Vermont, or the state of New Jersey, or the state of Pennsylvania, or the state of Connecticut, or the state of Rhode Island, as the case may be, shall enact a similar law for the arrest and punishment of violations of the conservation law or fish laws of such state or of the provisions listed in section 71-0501 or under titles 5 through 15 inclusive and title 33 of this article, committed or attempted by any person fishing in any waters or parts thereof lying between such state and the state of New York, any conservation officer or other person, who is authorized to make arrests for violations of the conservation or fish laws of such state or of the provisions listed in section 71-0501 or under titles 5 through 15 inclusive and title 33 of this article, shall have power and authority to make arrests on any part of such waters between such state and the State of New York, or the shores thereof, and to take the person so arrested for trial to the state in which the violation was committed and there to prosecute him according to the laws of such state.

§ 71-0915. Abatement of nuisances.

1. The following are declared to be nuisances which may be abated as provided in this section:

a. Any trap, snare or net, set or used without permit from the Department for taking a wild bird;

b. Any trap set or used in violation of section 11-1101;

c. Any net, bait-line, set line, eel weir or pot, tip-up, baitfish trap, or other device for taking fish or crustacea, and any device for taking insects, set or used in violation of any law or regulation under which use of the device is prohibited, or its use is prohibited at the time or place, or in the manner or circumstances in which it is used, except where the violation consists only in the fact that the device was

set or used without first obtaining a license and, under laws and regulations in effect at the time the device is set or used, such license is issuable upon application therefor and payment of the fee, if any, applicable thereto.

2. Nuisances defined in paragraph a of subdivision 1 may be abated summarily by any person. Nuisances defined in paragraph a, b or c of subdivision 1 may be abated by any conservation officer.

3. Upon abatement of such nuisance, the conservation officer shall take into custody the net or device so used in any case where the person guilty of the violation is not present or cannot be identified at the time the nuisance is abated. If the net or device is thereafter forfeited as provided in section 71-0909, or, not being so forfeited, shall remain unclaimed by the owner for thirty days, it shall be disposed of as the department shall direct.

4. In any case where the person guilty of the violation is arrested or served with a summons at the time of the abatement of the nuisance, the conservation officer may seize the net or other device as evidence.

5. Upon abatement of any nuisance defined in this section, any fish, crustacea, wildlife or protected insect trapped, confined, hooked or caught shall be:

a. Released, permitted to escape, or returned to the water or other habitat; or

b. Destroyed; or

c. Seized as evidence; or

d. Taken into custody for future disposition pursuant to section 11-0519, as may be appropriate to the circumstances, the kind of animal involved and its condition.

6. Action taken by an enforcement officer as provided in this section

or pursuant to this section and section 11-0519 shall not subject him or the state to liability, even though it is subsequently determined that the trap, net or other device involved was not in violation of law, if it is established that the enforcement officer had reasonable grounds to believe that it constituted a nuisance as provided in this section.

§ 71-0917. Presumptions from possession.

1. Possession of any fish, shell-fish, crustacea or game, or parts thereof, at a time when there is no open season anywhere in the state for the species possessed, shall be presumptive evidence that it was taken unlawfully.

2. Possession of any fish, shell-fish, crustacea, wildlife or protected insect shall be presumptive evidence that it was taken by the possessor.

§ 71-0919. Punishment of violations of Fish and Wildlife Law.

1. Any person who violates any provision of the Fish and Wildlife Law or any lawful order, rule or regulation of the department promulgated pursuant thereto or the terms of any permit issued thereunder, and any person, including a public officer, who fails to perform any duty thereby imposed on him:

a. In the case of offenses specified in section 71-0921 of this chapter, is guilty of a misdemeanor, punishable as provided in that section, and

b. In the case of any other offense, is guilty of a violation, punishable as provided in section 71-0923 of this chapter, and

c. In addition thereto is liable in either case to the penalties provided in the schedule set forth in section 71-0925 or provided elsewhere in this chapter; and

d. In the cases provided in sections 11-0719 and 11-2115, is liable to revocation of licenses to hunt, fish or trap or for bowhunting privilege or muzzle-loading privilege, disqualification for such licenses and/or for bowhunting privilege or muzzle-loading privilege and denial of the ability to obtain any hunting, fishing or trapping license and bowhunting privilege and muzzle-loading privilege, as provided in those sections; and

e. In the case of violations for which such forfeiture or revocation is provided, is subject to revocation or forfeiture of other licenses issued pursuant to the Fish and Wildlife Law; and

f. In the cases provided in section 71-0909, is liable to forfeiture and confiscation of property involved in such violations, as provided in that section.

g. In the case of having a license privilege revoked or suspended by a participating state in the Interstate Wildlife Violator Compact enacted under title twenty-five of article eleven of this chapter, the violation and subsequent revocation or suspension in the participating state shall constitute the basis for revocation or suspension in this state for the same privileges and period of time.

§ 71-0921. Misdemeanors.

The following acts are misdemeanors, punishable as herein provided, when they are done in violation of the section or subdivision thereof specified, or if no section is specified, in violation of any section of the Fish and Wildlife Law:

1. (a) The illegal taking of big game prior to the first day of the open season or after the last day of the open season in the county or part thereof where taken, or the taking of big game with aid of an artificial light. Each such misdemeanor for a violation of this paragraph shall be punishable by imprisonment for not more than one year

or by a fine of not less than five hundred dollars nor more than three thousand dollars, or by both such imprisonment and fine.

(b) Any illegal taking of a deer, other than a taking described in paragraph (a) of this subdivision, such misdemeanor shall be punishable by imprisonment for not more than one year or by a fine of not less than two hundred fifty dollars nor more than two thousand dollars, or by both such imprisonment and fine.

2. The illegal taking of a bear less than one year old or the taking of a bear by a means or method not permitted by this chapter. Such misdemeanor shall be punishable by imprisonment for not more than one year or by a fine of not more than two thousand dollars, or by both such imprisonment and fine. The sale of bear gallbladder/bile in violation of paragraph b of subdivision nine of section 11-0917 of this chapter shall be punishable by a fine of five thousand dollars per violation.

3. Possession, use or discharge of a firearm in violation of subdivision 1, 2, 4, 5, or 6 of section 11-0931 of this chapter. Each such misdemeanor shall be punishable by imprisonment for not more than three months or by a fine of not less than two hundred dollars nor more than one thousand dollars, or by both such imprisonment and fine.

4. a. Violations of:

(1) subdivision one of section 13-0309 of this chapter involving the taking of shellfish from uncertified shellfish lands, or the possession, transportation, sale or trafficking in shellfish so taken;

(2) subdivision two of section 13-0309 of this chapter involving the taking of shellfish between sunset and sunrise;

(3) subdivision ten of section 13-0309 of this chapter involving the possession of a stick dredge after one prior conviction under such subdivision for such activity;

(4) subdivision one of section 13-0311 of this chapter involving the taking of shellfish without the required digger's permit;

(5) subdivision seven of section 13-0311 of this chapter involving the taking of shellfish while one's digger's permit is suspended or revoked;

(6) subdivision one of section 13-0315 of this chapter involving the processing, transportation, shipment or sale of shellfish without the

required shipper's or processor's permit;

(7) regulations promulgated by the department pursuant to section 13-0319 of this chapter involving the failure to tag or seal shellfish or the falsifying of any information required on any tag or seal required by said regulations;

(8) subdivision five of section 13-0325 of this chapter, regarding the taking of undersized clams, where the taking involves more than twenty-four percentum of clams of less than legal size;

(9) regulations promulgated by the department pursuant to section 13-0327 of this chapter, regarding the taking of undersized scallops, where the taking involves more than twenty-four percentum of scallops of less than legal size; and

(10) section 13-0344 of this chapter involving the dumping of objects into the water after being signaled by a police officer or peace officer to stop for inspection.

b. Each such misdemeanor identified in paragraph a of this subdivision shall be punishable as follows:

(1) For a first conviction for any of the violations listed in paragraph a of this subdivision, by imprisonment for not more than sixty days, a fine of not less than two hundred fifty dollars nor more than one thousand dollars plus, if applicable, an amount equal to the market value of the shellfish involved in the violation, or by both such imprisonment and fine.

(2) For a second conviction for any of the violations listed in paragraph a of this subdivision, by imprisonment for not more than ninety days, a fine of not less than five hundred dollars nor more than twenty-five hundred dollars plus, if applicable, an amount equal to three times the market value of the shellfish involved in the violation, or by both such imprisonment and fine.

(3) For a third or subsequent conviction for any of the violations listed in paragraph a of this subdivision, by imprisonment for not more than one hundred eighty days, a fine of not less than one thousand dollars nor more than ten thousand dollars plus, if applicable, an amount equal to three times the market value of the shellfish involved in the violation, or by both such imprisonment and fine.

(4) Provided, further, that all equipment or conveyances used to

harvest, transport or traffic in such illegal shellfish may be forfeited for any third or subsequent conviction of the above violations, in addition to such penalties or imprisonment. Such forfeiture shall be in addition to any forfeiture authorized by section 71-0909 of this article.

5. a. Violations of:

(1) subdivision three of section 13-0309 of this chapter involving the illegal use of dredges, scrapes or other devices operated by power or by boats propelled by motor or other mechanical means for the purpose of taking shellfish;

(2) subdivision eight of section 13-0309 of this chapter involving the operation, use or placing, for whatever purpose, of dredges, rakes, tongs or other devices for the taking of shellfish in uncertified shellfish lands after a prior conviction under such subdivision for such activity;

(3) subdivision nine of section 13-0309 of this chapter involving the altering, damaging, mutilating, moving or carrying away of buoys or markers used to designate the uncertified waters of the state;

(4) subdivision five of section 13-0325 of this chapter regarding the taking of undersized clams, where the taking involves between ten and twenty-four percentum of clams of less than legal size; and

(5) regulations promulgated by the department pursuant to section 13-0327 of this chapter, regarding the taking of undersized scallops, where the taking involves between ten and twenty-four percentum of scallops of less than legal size.

b. Each such misdemeanor identified in paragraph a of this subdivision shall be punishable as follows:

(1) For a first conviction of any of the violations listed in paragraph a of this subdivision, by imprisonment for not more than thirty days, a fine of not less than two hundred fifty dollars nor more than five hundred dollars plus, if applicable, an amount equal to the market value of the shellfish involved in the violation, or by both such imprisonment and fine.

(2) For a second conviction for any of the violations listed in paragraph a of this subdivision, by imprisonment not to exceed sixty

days, a fine of not less than five hundred dollars nor more than one thousand dollars plus, if applicable, an amount equal to the market value of the shellfish involved in the violation, or by both such imprisonment and fine.

(3) For a third or subsequent conviction for any of the violations listed in paragraph a of this subdivision, by imprisonment for not more than one hundred eighty days, a fine of not less than one thousand dollars nor more than five thousand dollars plus, if applicable, an amount equal to the market value of the shellfish involved in the violation, or by both such imprisonment and fine.

6. Violations of paragraph b of subdivision 3 or subdivision 5 or 12 of section 13-0329 of this chapter. Each such misdemeanor shall be punishable by imprisonment for not more than one year or by a fine of not less than five hundred dollars nor more than two thousand dollars, or by both such imprisonment and fine.

7. Violations of subdivision 7 or 11 of section 13-0329 of this chapter. Each such misdemeanor shall be punishable by imprisonment for not more than ninety days or by a fine of not less than five hundred dollars nor more than one thousand dollars, or by both such imprisonment and fine.

8. Making a false statement in applying for a license, privilege or permit under the Fish and Wildlife Law, or for a certificate in lieu of a lost license or privilege or a duplicate hunting license tag under title 7 of article 11 of this chapter. Each such misdemeanor shall be punishable by imprisonment for not more than three months, or by a fine of not more than two hundred dollars, or by both such imprisonment and fine. In addition, the department may immediately revoke the license, privilege, permit or certificate for which application was made for the remainder of its effective term.

9. Failure to give the department the prompt notification required under subdivision 10 of section 13-0301 of this chapter, when the specified buoys or markers are destroyed. Each such misdemeanor shall be punishable by imprisonment for not more than one year or by a fine of

not more than one thousand dollars, or by both such imprisonment and fine.

10. Violation of subdivision 10 of section 11-0901 involving the illegal taking of a moose. Each such misdemeanor shall be punishable by imprisonment for not more than one year or by a fine of not more than two thousand dollars, or by both such imprisonment and fine.

10-a. Violations of subdivision fourteen of section 11-0901 of this chapter involving unlawful contests, competitions, tournaments and derbys to take wildlife. Each such violation shall be punishable by a fine of not less than five hundred dollars nor more than two thousand dollars.

11. Any person who violates the provisions of section 11-0537 of this chapter, in the case of a first violation, shall be guilty of a class B misdemeanor and, upon conviction thereof, shall be punished by a fine not to exceed five thousand dollars or by imprisonment not to exceed ninety days, or both; provided that in the case of a second or subsequent violation such person shall be guilty of a class A misdemeanor and, upon conviction thereof, shall be punished by a fine not to exceed ten thousand dollars or imprisonment not to exceed one year, or both; provided, further, that the commission of each taking or other act prohibited by section 11-0537 of this chapter with respect to a bald or golden eagle shall constitute a separate violation of this section; provided, further, that one-half of any such fine, but not to exceed two thousand five hundred dollars, shall be paid to the person or persons giving information which leads to conviction.

12. Any violation of section 13-0344 of this chapter is punishable by imprisonment for not more than thirty days, or by a fine of not less than two hundred fifty dollars nor more than one thousand dollars, or by both such fine and imprisonment.

13. Violations of subdivision one or two of section 11-1904 of this chapter. Each such misdemeanor shall be punishable by a fine of not more than two thousand five hundred dollars, or by imprisonment for not more

than one year, or by both such fine and imprisonment; except that where the person convicted of violating such subdivision has gained money or property through the commission of the violation, in lieu of the two thousand five hundred dollar maximum fine provided for herein, the court may impose a fine in accordance with the provisions of subdivision five of section 80.05 of the penal law.

14. Violation of subparagraph one, two or four of paragraph b of subdivision one of section 11-0719 of this chapter involving the revocation and suspension of hunting, trapping, or fishing licenses. Each such misdemeanor shall be punishable by imprisonment for not more than ninety days, or by a fine of not less than five hundred dollars nor more than one thousand dollars, or by both such imprisonment and fine.

§ 71-0923. Violations.

1. Any offense specified in section 71-0919 of this article, unless made a misdemeanor by section 71-0921 of this article or another provision of such chapter, shall be a violation, punishable, except as otherwise provided in this section, by imprisonment for not more than fifteen days, or by a fine of not more than two hundred fifty dollars, or by both such fine and imprisonment.

2. A violation of subdivision 1 of section 11-0705 of this chapter shall be punishable as follows:

a. As provided in subdivision 1 of this section, if the violation consisted of a refusal to exhibit a license on demand of any environmental conservation officer or other person;

b. By forfeiture of the license and by a fine of not more than twenty-five dollars if the violation was committed while exercising the privileges of a special antlerless deer license and consisted of failure of the offender to have on his person a license held by him entitling him to exercise those privileges.

3. A violation of subdivision 2 of section 11-0705 of this chapter shall be punishable by forfeiture of licenses and tags issued pursuant to this chapter which authorizes the holder to hunt wildlife and by a fine of not more than twenty-five dollars.

4. When a license or license tag is forfeited as provided in this section, the licensee shall surrender it to any environmental conservation officer, special game protector or any other person authorized by the department to receive it. Such forfeiture does not prevent the procurement of another license.

5. A violation of subdivision one of section 11-0923 is punishable by imprisonment for not more than ten days, or by a fine of not less than two hundred dollars, or by both such fine and imprisonment.

6. A first conviction for a violation of subdivision eight of section 13-0309 of this chapter, involving devices for taking shellfish in uncertified lands, or a violation of subdivision ten of section 13-0309 of this chapter, involving possession of a stick dredge, shall be punishable as a violation under this section.

8. Any violation of sections 13-0329, 13-0330, 13-0331, 13-0333, 13-0334, 13-0335, subdivision one of section 13-0337, 13-0338, 13-0339, 13-0339-a, 13-0340, 13-0340-a through 13-0340-g, 13-0341, 13-0342, 13-0343, 13-0347, and 13-0349 of this chapter, or of any regulation adopted pursuant to the foregoing sections, shall be punishable by imprisonment of not more than fifteen days or by a fine of the greater of two hundred fifty dollars or:

a. for violations involving one to five fish, shellfish or crustaceans, twenty-five dollars for each fish, shellfish or crustacean taken or possessed in violation of the above sections;

b. for violations involving six to twenty-five fish, shellfish or crustaceans, fifty dollars for each fish, shellfish or crustacean taken or possessed in violation of the above sections;

c. for violations involving more than twenty-five fish, shellfish or crustaceans, one hundred dollars for each fish, shellfish or crustacean taken or possessed in violation of the above sections; or by both such fine and imprisonment.

For purposes of determining the applicable fine pursuant to this subdivision, the number of fish, crustaceans or shellfish shall be the aggregate number involved in the violation, regardless of species.

9. A violation of section 11-0110 of this chapter is punishable by imprisonment for not more than ten days, or by a fine of not more than two hundred fifty dollars, or by both such fine and imprisonment.

10. A violation of subdivision twelve of section 11-1101 of this chapter is punishable by imprisonment of not more than ten days, or by a fine of not more than one hundred dollars, or by both such fine and imprisonment.

11. A violation of subdivision eight of section 11-0505 of this chapter shall be punishable by a fine of not more than fifty dollars.

12. A violation of section 11-1906 of this chapter shall be punishable by a fine of not more than two thousand five hundred dollars.

§ 71-0924. Illegal commercialization of fish, shellfish, crustaceans, and wildlife.

Notwithstanding any other provision of this chapter, when a violation involves the sale, trade or barter of fish, shellfish, crustaceans, wildlife, or parts thereof, the sale, trade or barter of which is prohibited by the fish and wildlife law, the following additional penalties shall be imposed:

1. where the value of fish, shellfish, crustaceans, wildlife, or parts thereof, is two hundred fifty dollars or less, the offense shall be a violation punishable by a fine of five hundred dollars and/or not more

than fifteen days of imprisonment;

2. where the value of fish, shellfish, crustaceans, wildlife, or parts thereof, is more than two hundred fifty dollars but does not exceed one thousand five hundred dollars, the offense shall be a misdemeanor punishable by a fine of five thousand dollars and/or not more than one year of imprisonment;

3. where the value of fish, shellfish, crustaceans, wildlife, or parts thereof, exceeds one thousand five hundred dollars, the offense shall constitute a class E felony under the provisions of the penal law; and

4. where the value of ivory articles, as defined in section 11-0535-a of this chapter, exceeds twenty-five thousand dollars, the offense shall constitute a class D felony under the provisions of the penal law.

5. For the purposes of this section the value of fish, shellfish, crustaceans and wildlife shall be the fair market value of or actual price paid for such resource, whichever is greater. For purposes of this section, "sale" shall include the acts of selling, trading or bartering and all related acts, such as the act of offering for sale, trade or barter, and shall also include the illegal possession of fish, shellfish, wildlife or crustacea with intent to sell. It shall be presumptive evidence of possession with intent to sell when such fish, shellfish, wildlife or crustacea is possessed in quantities exceeding the allowable recreational quantities, or is possessed in a retail or wholesale outlet commonly used for the buying or selling of such fish, shellfish, wildlife or crustacea, provided, however, that nothing in this subdivision shall preclude the admission of other evidence which may serve to independently prove a defendant's intent to sell.

§ 71-0925. Civil penalties.

The penalties referred to in section 71-0919, to which a person is liable upon violation of provisions of the Fish and Wildlife Law or any order, rule or regulation of the department, shall be:

1. Unless another penalty is specifically provided for in this subdivision or elsewhere in the Fish and Wildlife Law, two hundred dollars and an additional penalty of one hundred dollars for each fish, bird or animal or part thereof, other than shellfish or crustacea, involved in the violation; an additional penalty of one hundred dollars for each bushel of shellfish or each crustacean, including lobster, or part thereof, plus an amount equal to the market value or actual price paid, whichever is greater, of the shellfish or crustacea involved in the violation;

2. Except as provided in subdivision 3 or another provision of the Fish and Wildlife Law, if the violation relates to deer, bear, elk, except captive bred and raised North American elk (*Cervus elaphus*), moose, caribou, antelope, wild turkey, lynx, beaver, or a part thereof, two hundred dollars, and an additional penalty of two hundred dollars for each such animal or part thereof involved in the violation;

3. (a) If the violation involves the illegal taking of a deer prior to the first day of the open season or after the last day of the open season in the county or part of a county in which taken, or the taking of deer with aid of an artificial light, not less than five hundred dollars and not more than one thousand dollars for the first deer taken and a further penalty of not less than five hundred dollars and not more than one thousand dollars for each succeeding deer taken; provided, however, that any person having been held liable for a violation pursuant to this paragraph in the preceding five years shall be subject to a fine of not less than seven hundred fifty dollars and not more than two thousand dollars for the first deer taken and a further penalty of not less than seven hundred fifty dollars and not more than two thousand dollars for each succeeding deer taken;

(b) If the violation involves any illegal taking of a wild deer, other than a taking described in paragraph (a) of this subdivision, five hundred dollars for the first deer taken and a further penalty of five hundred dollars for each succeeding deer taken;

4. If the violation was an act prohibited by section 11-1321 or by

subdivision 2 of section 11-0503, or by subdivision 2 of section 11-0505, or section 13-0345, five hundred dollars, and an additional penalty of ten dollars for each fish taken, killed or possessed in violation thereof;

5. If the violation was any act prohibited by subdivision 1 of section 11-0503, not less than five hundred dollars nor more than one thousand dollars for each offense and an additional penalty of ten dollars for each fish killed in violation thereof;

6. If the violation was a violation of paragraph b of subdivision 4 of section 11-0321, a violation of subdivision 1 of section 11-2113, or a violation of section 11-2115, not less than twenty-five dollars nor more than one hundred dollars; and in addition, as determined by the court, to either actual damages or the sum of ten dollars for each sign injured, defaced or removed in violation of section 11-2113, which shall be payable to the person sustaining the damage, injury, defacement or removal of such sign, and costs of suit, all of which may be recovered in the same action;

7. If the violation was a violation of sections 13-0329, 13-0330, 13-0331, 13-0333, 13-0334, 13-0335, subdivision one of section 13-0337, 13-0338, 13-0339, 13-0339-a, 13-0340, 13-0340-a through 13-0340-g, 13-0341, 13-0342, 13-0343, 13-0347, and 13-0349 of this chapter, or of any regulation adopted pursuant to the foregoing sections, the greater of two hundred fifty dollars or:

a. for violations involving one to five fish, shellfish or crustaceans, twenty-five dollars for each fish, shellfish or crustacean taken or possessed in violation of the above sections;

b. for violations involving six to twenty-five fish, shellfish or crustaceans, fifty dollars for each fish, shellfish or crustacean taken or possessed in violation of the above sections;

c. for violations involving more than twenty-five fish, shellfish or crustaceans, one hundred dollars for each fish, shellfish or crustacean

taken or possessed in violation of the above sections.

For purposes of determining the applicable fine pursuant to this subdivision, the number of fish, crustaceans or shellfish shall be the aggregate number involved in the violation, regardless of species;

7-a. If the violation was a violation of subdivision 1 or 2 of section 13-0309, or section 13-0323 or 13-0327, or section 13-0344, not less than two hundred fifty dollars nor more than one thousand dollars for each offense;

7-b. If the violation was a violation of subdivision one or two of section 13-0325 of this chapter there shall be a minimum penalty of twenty-five dollars and a maximum of two hundred fifty dollars per container or bushel involved in the violation.

7-c. If the violation was a violation of subdivision 4 or 5 of section 13-0333, not less than two thousand five hundred dollars nor more than ten thousand dollars for each offense;

8. If a violation of subdivisions 1 or 2 of section 13-0309 occurs during the time when a permit or license to take shellfish has been suspended or revoked pursuant to the provisions of subdivision 3 of section 13-0311 or subparagraph (3) of paragraph b of subdivision 1 of section 11-0719, not less than five hundred dollars nor more than fifteen hundred dollars for each offense, and in addition the forfeiture to the state of the tongs, rakes, dredges or devices other than boats used by or in connection with such illegal taking;

9. If the violation was a failure by any public officer to perform any duty imposed by the Fish and Wildlife Law or by any rule or regulation of the department, one hundred dollars;

10. If the violation was an act prohibited by section 11-2117, one hundred dollars, one-half of which shall be payable to the owner or occupant of the damaged property, in addition to the actual damages, if any, recoverable by the person sustaining the damage;

11. If the violation involved the illegal taking or possessing of muskrats taken from a registered muskrat marsh covered by a permit under section 11-1109, when the violation is committed by the registrant holding the permit or other person designated in writing to trap on the marsh of such registrant, while the permit is in force, not less than one hundred dollars nor more than five hundred dollars;

12. If the violation was a violation of section 11-1731; relating to bird plumage for fish-fly tying, five hundred dollars.

13. If the violation was an act prohibited by subdivision two of section 11-0535 or by section 11-0536 of this chapter, or by any lawful rule or regulation of the department promulgated pursuant thereto, not more than four thousand dollars, and an additional penalty of not more than seven hundred dollars for each fish, shellfish, crustacea, wildlife or part thereof involved in the violation. If the violation was an act prohibited by any regulation of the department promulgated pursuant to subdivision three of section 11-0535 of this chapter, then such penalty shall be not more than two thousand dollars, and an additional penalty of not more than four hundred dollars for each fish, shellfish, crustacea, wildlife or part thereof involved in the violation.

14. If the violation was a violation of subdivision ten of section 11-0901 involving the illegal taking of a moose, two thousand dollars.

15. If the violation was a first or second violation of section 11-0514 of this chapter, a fine of up to five hundred dollars for each animal for each act of importation, possession, introduction, sale, offer for sale, distribution, transportation or otherwise marketing or trading. For a third or subsequent separate violation of section 11-0514 of this chapter, the greater of a. a fine of one thousand dollars for each animal for each act of importation, breeding, possession, introduction, sale, offer for sale, distribution, transportation or otherwise marketing or trading or b. an amount equal to three times (1) the financial security provided by customers for the opportunity to take the animal or (2) the value of a boar for meat

production or as breeding stock.

16. If the violation was an act prohibited by section 11-0535-a of this chapter, not more than three thousand dollars or not more than two times the value of the article involved, whichever is greater. If the violation is a second or subsequent violation of such section 11-0535-a, not more than six thousand dollars or not more than three times the value of the article involved, whichever is greater.

17. If the violation was an act prohibited by section 11-0535-b of this chapter, not more than one thousand dollars or not more than two times the value of the article involved, whichever is greater. If the violation is a second or subsequent violation of such section 11-0535-b, not more than two thousand dollars or not more than three times the value of the article involved, whichever is greater.

§ 71-0927. Mandatory license revocation.

1. Anyone convicted of violating the prohibition against harvesting, taking, possessing or transporting shellfish under facts and circumstances meeting the criteria for imposition of sanctions pursuant to subdivision 3 of section 71-0924; or anyone convicted two or more times within five years of violating the prohibition against harvesting, taking, possessing or transporting shellfish under facts and circumstances meeting the criteria for imposition of sanctions pursuant to subdivision 2 of section 71-0924, or of violating subdivision 1 or 2, paragraph e or f of subdivision 3, subdivision 6, 8, 9, 10, 11, or 13 of section 13-0309, section 13-0317, subdivision 2 of section 13-0323, section 13-0325, subdivision 3 or 5 of section 13-0327, or section 13-0344 of this chapter shall have his license to take and land shellfish revoked and shall not be relicensed for a minimum of five years thereafter, in addition to any other sanction imposed pursuant to this article.

1-a. Anyone convicted two or more times within five years of violating subdivision 4, 5 or 7 of section 13-0333 of this chapter shall have his

license to take and land menhaden revoked and shall not be relicensed for a minimum of five years thereafter, in addition to any other sanction imposed pursuant to this article.

2. Anyone convicted of unlawfully harvesting, taking, possessing or transporting any marine fish, shellfish or crustacea under facts and circumstances meeting the criteria for imposition of sanctions pursuant to subdivision 3 of section 71-0924; or anyone convicted two or more times within five years of unlawfully harvesting, taking, possessing or transporting any marine fish, shellfish or crustacea under facts and circumstances meeting the criteria for imposition of sanctions pursuant to subdivision 2 of section 71-0924, or of violating subdivision 1, paragraph c of subdivision 2, subdivision 5, 6, 7 or 9 of section 13-0329, or section 13-0344 of this chapter shall have his license to take and land lobsters revoked and shall not be relicensed for a minimum of five years thereafter, in addition to any other sanction imposed pursuant to this article.

3. Any person convicted of violating the prohibition against harvesting, taking, possessing or transporting any marine food fish under facts and circumstances meeting the criteria for imposition of sanctions pursuant to subdivision 3 of section 71-0924; or any person convicted two or more times within five years of violating the prohibition against harvesting, taking, possessing or transporting any marine food fish under facts and circumstances meeting the criteria for imposition of sanctions pursuant to subdivision 2 of section 71-0924, or of violating section 13-0344 of this chapter, shall have his license to take and land marine food fish revoked and shall not be licensed for a minimum of five years thereafter, in addition to any other sanctions imposed pursuant to this article.

4. The provisions of this section shall be in addition to the ability of the department to suspend licenses pursuant to section 13-0309, 13-0311 or 13-0329 of this chapter or any other provision of law. Revocations pursuant to this section shall be automatic upon the second conviction and shall not require any hearing for the revocation.

5. For the purposes of this section, convictions shall only include convictions for violations of this chapter and shall not include convictions for violation of department regulations promulgated pursuant to this chapter. Conviction shall also not include an admission of guilt through stipulation or a consent order or a compromise of civil penalty under section 71-0519 of this article.

6. Any person who has had his license revoked pursuant to subdivision 1 or 2 of this section may, more than sixty days subsequent to such revocation, apply to the commissioner for a reinstatement of such license. The commissioner may reinstate such revoked license for such period as determined by the commissioner and upon such conditions deemed appropriate and necessary to protect the public health and natural resources of the state, including, but not limited to the posting of bond.

TITLE 11

ENFORCEMENT OF ARTICLE 15

Section 71-1101. Applicability of title.

71-1103. Power to sue.

71-1105. Enforcement of subdivision 4 of section 15-0313.

71-1107. Punishment for violations of title 5 of article 15.

71-1109. Enforcement of subdivisions 1 and 4 of section 15-0507.

71-1111. Enforcement of subdivision 3 of section 15-0511.

71-1112. Enforcement of title eight of article fifteen.

71-1113. Enforcement of sections 15-1505 and 15-1506.

71-1115. Enforcement of section 15-1525.

71-1117. Enforcement of section 15-1745.

71-1121. Enforcement of subdivision 2 of section 15-1947.

71-1123. Enforcement of section 15-2133.

71-1125. Enforcement of section 15-2315.

71-1127. Violations; civil liability.

71-1129. Emergencies excepted.

71-1131. Violations; criminal liability.

§ 71-1101. Applicability of title.

In addition to the provisions of sections 71-0101 and 71-0301 and title 5 of this article, the provisions of this title shall be applicable to the enforcement of article 15.

§ 71-1103. Power to sue.

The department may bring actions, suits or proceedings as in its judgment may be necessary and proper to enable it to perform any of the duties imposed upon it by the provisions of article 15 except section 15-1713 thereof as amended or to prevent the violation by any person or public corporation of any of the provisions thereof; and may defend such actions, suits or proceedings as may arise through the performance of any duties or functions imposed upon it by the provisions of article 15 except section 15-1713 thereof, as amended.

§ 71-1105. Enforcement of subdivision 4 of section 15-0313.

Any violation of subdivision 4 of section 15-0313 shall be a violation, punishable by a fine of not more than one thousand eight hundred dollars, and in addition thereto, by a civil penalty of not more than one thousand eight hundred dollars.

§ 71-1107. Punishment for violations of title 5 of article 15.

1. A violation of section 15-0501, 15-0503 or 15-0505, shall constitute a misdemeanor, punishable by a fine of not to exceed ten thousand dollars, or by imprisonment not to exceed one year or by both such fine and imprisonment and, in addition thereto, by a civil penalty of not more than five thousand dollars.

2. A subcontractor, employee or agent of such person or public corporation, or of a state department who knowingly and intentionally

acts, or a prime contractor of such person, public corporation or state department who acts with or without an intention to violate the provisions of title 5 of article 15, in disregard of specifications provided in a construction contract protecting against stream damage, shall be guilty of a violation punishable by a fine of not less than twenty-five dollars, nor more than two hundred fifty dollars, or by imprisonment for not more than fifteen days, or by both such fine and imprisonment, and, in addition, thereto, by a civil penalty of not more than five thousand dollars.

§ 71-1109. Enforcement of subdivisions 1 and 4 of section 15-0507.

1. Any owner violating subdivision 1 of section 15-0507 or any regulations promulgated pursuant thereto may be liable for a penalty not to exceed five hundred dollars for each and every offense; every violation of such subdivision shall be a separate and distinct offense; and in case of a continuing violation, every day's continuance thereof shall be deemed a separate and distinct offense.

2. Any owner violating subdivision 4 of section 15-0507 may be liable for a penalty not to exceed five thousand dollars for each and every offense; every violation of an order referred to in such subdivision shall be a separate and distinct offense; and in case of a continuing violation, every day's continuance thereof shall be deemed a separate and distinct offense.

§ 71-1111. Enforcement of subdivision 3 of section 15-0511.

Any person or local public corporation violating subdivision 3 of section 15-0511 may be liable for a penalty not to exceed five thousand dollars for each and every offense; every violation of an order referred to in such subdivision shall be a separate and distinct offense; and in case of a continuing violation, every day's continuance thereof shall be deemed a separate and distinct offense.

§ 71-1112. Enforcement of title eight of article fifteen.

1. The attorney general, on his own initiative or at the request of the commissioner, or the corporation counsel, at the request of the city of New York shall bring an action to restrain or enjoin any violation of any provision of title eight of article fifteen of this chapter or any provision of any rule or regulation promulgated pursuant to such title. The commissioner shall furnish the attorney general or the corporation counsel with such material, evidentiary matter or proof as may be requested by either of them in connection with such action.

2. Notwithstanding the provisions of any other law, the venue of any action commenced or proceeding brought pursuant to this section may be in the county of Albany.

§ 71-1113. Enforcement of sections 15-1505 and 15-1506.

1. The department shall enforce the provisions of sections 15-1505 and 15-1506 of this chapter and the Supreme Court by injunction may upon application of the department prevent any unauthorized diversion or transportation.

2. Any person who violates the provisions of section 15-1506 of this chapter or the rules, regulations, orders or determinations of the commissioner promulgated thereto or the terms of any permit issued thereunder, shall be liable for a civil penalty not less than twenty-five hundred dollars nor more than ten thousand dollars per day of such violation.

§ 71-1115. Enforcement of section 15-1525.

Any person violating the provisions of section 15-1525 shall be guilty of a violation punishable by a fine of not more than one thousand dollars, and in addition thereto, shall be liable for a civil penalty of

not more than fifteen hundred dollars.

§ 71-1117. Enforcement of section 15-1745.

1. Any person or public corporation violating subdivision 1 of section 15-1745, shall be guilty of a violation punishable by a fine of not more than five thousand dollars.

2. In addition, the department may, in an action instituted by it in any court of competent jurisdiction, recover from any such person or public corporation the sum of one hundred fifty dollars per day for each day that such person or public corporation continues to take, draw, divert or make use of any part or portion of such waters.

3. The department may bring actions through the Attorney General to enjoin violations of section 15-1745.

4. The prima facie evidence provision in subdivision 2 of section 15-1745 shall apply in all proceedings, criminal or civil, under this section 71-1117.

§ 71-1121. Enforcement of subdivision 2 of section 15-1947.

Violation of subdivision 2 of section 15-1947 shall constitute a violation, punishable by a fine of not more than one thousand dollars, and in addition thereto, a civil penalty of not more than fifteen hundred dollars.

§ 71-1123. Enforcement of section 15-2133.

1. Any neglect of the provisions of section 15-2133 by any officer or person in charge of any reservoir shall be a violation punishable by a fine of not more than one thousand dollars, and in addition thereto, by a civil penalty of not more than fifteen hundred dollars.

2. Any person violating the provisions of subdivision 3 of section 15-2133 shall be guilty of a violation punishable by a fine of not more than one thousand dollars, and in addition thereto, shall be liable for a civil penalty of not more than fifteen hundred dollars.

§ 71-1125. Enforcement of section 15-2315.

Any person who violates the provisions of the first sentence of section 15-2315 shall be guilty of a violation punishable by a fine of not more than one thousand dollars, and in addition thereto, shall be liable for a civil penalty of not more than fifteen hundred dollars.

§ 71-1127. Violations; civil liability.

1. Any person who violates any of the provisions of, or who fails to perform any duty imposed by article 15 except section 15-1713, or who violates or who fails to comply with any rule, regulation, determination or order of the department heretofore or hereafter promulgated pursuant to article 15 except section 15-1713, or any condition of a permit issued pursuant to article 15 of this chapter, or any determination or order of the former water resources commission or the department heretofore promulgated pursuant to former article 5 of the Conservation Law, shall be liable for a civil penalty of not more than two thousand five hundred dollars for such violation and an additional civil penalty of not more than five hundred dollars for each day during which such violation continues, and, in addition thereto, such person may be enjoined from continuing such violation as otherwise provided in article 15 except section 15-1713.

2. The penalties provided by subdivision 1 of this section shall be recoverable in an action instituted in the name of the department by the Attorney General upon the request of the department.

3. An action or cause of action for the recovery of a penalty under

article 15 or sections 71-1103 through 71-1129 inclusive may be settled or compromised in an amount to be approved by the department either before or after proceedings are brought to recover such penalties and prior to the entry for judgment therefor.

§ 71-1129. Emergencies excepted.

The civil liabilities imposed upon persons violating the provisions of article 15, except section 15-1713, shall not be construed to include any violation which was caused by an act of God, war, strike, riot or other catastrophe as to which negligence or willful misconduct on the part of such person was not the proximate cause.

§ 71-1131. Violations; criminal liability.

Except as otherwise specifically provided, any person who violates any of the provisions of article 15 of this chapter, or any rule, regulation or order promulgated pursuant thereto, or the terms of any permit issued thereunder shall be guilty of a violation punishable by a fine of not more than five hundred dollars.

TITLE 12

ENFORCEMENT OF ARTICLE 22

Section 71-1201. Applicability of title.

71-1203. Penalties.

71-1205. Enforcement.

71-1207. Rights of aggrieved individuals.

§ 71-1201. Applicability of title.

The provisions of this title shall be applicable to the enforcement of article twenty-two of this chapter.

§ 71-1203. Penalties.

Any person who violates the provisions of article twenty-two of this chapter shall be subject to a civil penalty not to exceed ten thousand dollars for each day during which such violation occurred; provided, however, that the total penalty to be imposed shall not exceed one million dollars.

§ 71-1205. Enforcement.

1. The attorney general shall, at the request of the commissioner, or may, on his own initiative, seek equitable relief to restrain any violation or threatened violation of article twenty-two of this chapter.

2. The attorney general shall, at the request of the commissioner, or may, on his own initiative, commence a civil action to recover damages, including punitive damages, for any willful, reckless or negligent violation of the provisions of such article suffered by reason of a violation thereof. The costs including but not limited to filing fees and costs for expert witnesses incurred by the attorney general in prosecuting any such action shall be assessed against any person who violates such provisions.

§ 71-1207. Rights of aggrieved individuals.

The provisions of this title shall not affect, impair or in any manner restrict or limit the rights of any person seeking damages arising out of a violation of article twenty-two of this chapter.

TITLE 13

ENFORCEMENT OF ARTICLE 23

Section 71-1301. Applicability of this title.

71-1303. Subpoenas, testimony and enforcement thereof.

71-1305. Offenses.
71-1307. Sanctions.
71-1309. Aiders and abettors.
71-1311. Injunction against violations.

§ 71-1301. Applicability of this title.

In addition to the provisions of sections 71-0101 and 71-0301 of this article, the provisions of this title shall be applicable to the enforcement of article 23 of this chapter except as otherwise provided in article 23 of this chapter.

§ 71-1303. Subpoenas, testimony and enforcement thereof.

1. To aid in the administration of article 23, the commissioner or any person designated by him may issue subpoenas in his name requiring the attendance and giving of testimony by witnesses and the production of books, papers and other evidence for any hearing, proceeding or investigation conducted or to be conducted by or before the department. Service of such a subpoena, enforcement of obedience thereto, and punishment for disobedience thereof shall be had as and in the manner provided by the civil practice law and rules relating to enforcement of any subpoena issued by a board or committee except that in the case of hearings, proceedings or investigations before or conducted by the department neither the holder of a permit or lease issued pursuant to article 23, nor an employee of such permit holder or lessee, nor an officer or stockholder in a permittee or lessee corporation, when required to attend as a witness, shall be entitled to any subpoena fee or mileage. Any member of the department or any person who may be designated hereunder by the department to hold hearings may administer oaths to witnesses. The department also may provide for the taking of depositions of witnesses for the purpose of any such hearing. In such case such officer, employee or other person may administer oaths to the witnesses whose depositions are to be taken. Each deposition shall be reduced to writing and subscribed by the deponent.

2. The provisions of this section shall apply only to the administration of article 23.

§ 71-1305. Offenses.

It shall be unlawful for any person to:

1. Waste oil or gas.

2. Violate any of the provisions of or fail to perform any duty imposed by article 23 of this chapter or any rule or regulation promulgated thereunder or any order or condition of any permit of the department made pursuant thereto.

3. Abandon a mine without the approval of the department before all affected land has been reclaimed. A mine shall be considered as abandoned when mining and reclamation activities shall cease on land affected by mining without prior notification to the department or without describing such cessation in a mined land use plan approved by the department.

4. Commence operations for the drilling or redrilling of a well for oil or gas or solution mining, or an intake well, or for the storage of oil or gas without first obtaining a permit from the department as.

5. Abandon any oil, gas or solution mining well, or an intake well, or a well for the storage of oil or gas without first obtaining a permit from the department.

6. Store gas underground in any manner, unless the storage operator has received such right by grant, lease or other agreement or is operating in compliance with section 23-1301 of this chapter and is authorized to maintain condemnation proceedings pursuant to section 23-1303 of this chapter.

§ 71-1307. Sanctions.

1. Administrative sanctions. Any person who violates any provision of article 23 of this chapter or commits any offense described in section 71-1305 of this title shall be liable to the people of the state for a civil penalty not to exceed eight thousand dollars and an additional penalty of two thousand dollars for each day during which such violation continues, to be assessed by the commissioner after a hearing or opportunity to be heard. The commissioner, acting by the attorney general, may bring suit for collection of such assessed civil penalty in any court of competent jurisdiction. Such civil penalty may be released or compromised by the commissioner before the matter has been referred to the attorney general; and where such matter has been referred to the attorney general, any such penalty may be released or compromised and any action commenced to recover the same may be settled and discontinued by the attorney general with the consent of the commissioner. In addition, the commissioner shall have the power, following a hearing conducted pursuant to rules and regulations adopted by the department, to direct the violator to cease the violation and reclaim and repair the affected site to a condition acceptable to the commissioner, to the extent possible within a reasonable time and under the direction and supervision of the commissioner. Any such order of the commissioner shall be enforceable in any action brought by the commissioner in any court of competent jurisdiction. Any civil penalty or order issued by the commissioner under this subdivision shall be reviewable in a proceeding under article seventy-eight of the civil practice law and rules.

2. Civil sanctions. In lieu of seeking administrative sanctions, the commissioner may refer any violation described in subdivision 1 of this section to the attorney general who shall be empowered to bring a civil suit to seek any of the sanctions described in subdivision 1 of this section. Any such sanctions imposed may be released or compromised or the action may be settled and discontinued by the attorney general with the consent of the commissioner.

3. Criminal sanctions. Any person who, having any of the culpable mental states defined in sections 15.05 and 20.20 of the penal law, violates any provision of article 23 of this chapter or commits any offense described in section 71-1305 of this title shall be guilty of a misdemeanor and, upon conviction thereof, shall be punished by a fine not to exceed one thousand dollars for each day during which such violation continues or by imprisonment for a term of not more than one year, or by both such fine and imprisonment. If the conviction is for a subsequent offense committed after a first conviction of such person under this subdivision, punishment shall be by a fine not to exceed eight thousand dollars for each day during which such violation continues or by imprisonment for a term of not more than one year, or by both such fine and imprisonment.

4. This section shall not affect the rights of any other person seeking damages arising out of a violation.

5. All fines collected pursuant to this section shall be paid into the environmental protection fund established pursuant to section ninety-two-s of the state finance law.

§ 71-1309. Aiders and abettors.

Any person knowingly aiding or abetting any other person in the violation of any provision of article 23, or any rule, regulation, or order of the department made pursuant thereto shall be subject to the same punishment and penalty as that prescribed by this title for the violation by such other person.

§ 71-1311. Injunction against violations.

1. Whenever it appears that any person is violating or threatening to violate any provision of article 23 of this chapter or is committing any offense described in section 71-1305 of this title, the department, acting by the Attorney General, may bring suit against such person in

any court of competent jurisdiction to restrain such person from continuing such violation or from carrying out the threat of violation. In any such suit, the court shall have jurisdiction to grant to the department without bond or other undertaking, such prohibitory or mandatory injunctions as the facts may warrant, including temporary restraining orders and preliminary injunctions.

2. If the department, acting by the Attorney General, shall fail to bring suit to enjoin a violation or threatened violation of any provision of article 23, or any rule, regulation, or order of the department made pursuant hereto, within ten days after receipt of written request to do so by any person who is or will be adversely affected by such violation, the person making such request may bring suit in his own behalf to restrain such violation or threatened violation in any court in which the department might have brought suit. The department shall be made a party in such suit in addition to the person violating or threatening to violate a provision of article 23, or a rule, regulation, or order of the department, and the action shall proceed and injunctive relief may be granted to the department without bond, or other undertaking in the same manner as if suit had been brought by the department.

TITLE 15

ENFORCEMENT OF TITLE 25 OF ARTICLE 27

Section 71-1501. Applicability of this title.

71-1503. Enforcement of title 25 of article 27.

§ 71-1501. Applicability of this title.

In addition to the provisions of sections 71-0101 and 71-0301 of this article, the provisions of this title shall apply to the enforcement of title 25 of article 27 of this chapter.

§ 71-1503. Enforcement of title 25 of article 27.

For any first violation by any person who violates any of the provisions of, or who fails to perform any duty imposed by title 25 of article 27 or any regulation promulgated by the commissioner pursuant to such title 25, in lieu of a penalty, there may be issued a written warning by the department and there may also be issued educational materials at the discretion of the department regarding the requirements of title 25 of article 27. Such person shall, however, for any subsequent violation thereafter, be liable to a civil penalty of not more than twenty-five hundred dollars for each such violation and an additional penalty of not more than five hundred dollars for each day during which such violation continues and, in addition thereto, such person may be enjoined from continuing such violation. Penalties and injunctive relief provided pursuant to this title may also be recoverable in an action brought by the attorney general at the request of the commissioner.

TITLE 17

ENFORCEMENT OF PROVISIONS DERIVED FROM PUBLIC HEALTH LAW

Section 71-1701. Applicability of this title.

71-1703. Legal presumptions; evidence.

71-1705. Rules and regulations of the department; evidence.

71-1707. Violations of health laws or regulations; penalties.

71-1709. Formal hearings; notice and procedure.

71-1711. Willful violation of health laws.

71-1713. Obstructing health officer in performance of his duty.

71-1715. Enforcement: against officers.

71-1717. Examination and inspection of public works.

71-1719. Summary action.

71-1721. Commissioner's enforcement power and duty.

71-1723. Issuance of subpoenas; compelling the attendance and testimony of witnesses.

71-1725. Assessment of Penalties.

§ 71-1701. Applicability of this title.

This title shall be applicable to the enforcement of titles 1 through 11 and titles 15 through 19 of article 17; article 19; and titles 1 and 33 of article 27.

§ 71-1703. Legal presumptions; evidence.

1. The actions, proceedings, authority, and orders of the department in enforcing the provisions of this chapter listed in section 71-1701, and of titles 17 through 21 inclusive of this article applying them to specific cases shall at all times be regraded as in their nature judicial, and shall be treated as prima facie just and legal.

2. The written reports of state and local health officers, inspectors, investigators, nurses and other representatives of state and local health officers on questions of fact pertaining to, concerning or arising under and in connection with complaints, alleged violations, investigations, proceedings, actions, authority and orders, related to the enforcement of this chapter, the sanitary code or any local health regulation shall be presumptive evidence of the facts so stated therein, and shall be received as such in all courts and places. The persons making such reports shall be exempt from personal liability for the statements therein made, if they have acted in good faith.

§ 71-1705. Rules and regulations of the department; evidence.

The rules and regulations of the department promulgated pursuant to the provisions of this chapter listed in section 71-1701, and of titles 17 through 21 inclusive of this article, or the statutes from which they were derived, may be read in evidence from the official compilation of codes, rules and regulations of the state of New York, or supplement thereto. To entitle any copy of the said rules and regulations, other than those in the official compilation or supplement thereto, to be read in evidence there shall be contained in the same book or pamphlet a

printed certificate of the Secretary of State that such copy is a correct transcript of the text of the said rules and regulations as published in the official compilation or supplement thereto. For such a certificate the secretary of state shall collect such a fee as he shall deem just and reasonable.

§ 71-1707. Violations of health laws or regulations; penalties.

1. Any person who violates, disobeys or disregards any term or provision of this chapter listed in section 71-1701, or of titles 17 through 21 inclusive of this article or of any lawful notice, order or regulation pursuant thereto for which a civil penalty is not otherwise expressly prescribed by law, shall be liable to the people of the state for a civil penalty of not to exceed one thousand dollars for every such violation.

2. The penalty provided for in subdivision one of this section may be recovered by an action brought by the commissioner in any court of competent jurisdiction.

3. Nothing in this section contained shall be construed to alter or repeal any existing provision of law declaring such violations or any of them to be misdemeanors or felonies or prescribing the penalty therefor.

4. Such civil penalty may be released or compromised by the commissioner before the matter has been referred to the Attorney General, and where such matter has been referred to the Attorney General, any such penalty may be released or compromised and any action commenced to recover the same may be settled and discontinued by the Attorney General with the consent of the commissioner.

§ 71-1709. Formal hearings; notice and procedure.

1. The commissioner, or any person designated by him for this purpose, may issue subpoenas and administer oaths in connection with any hearing

or investigation under or pursuant to the provisions of this chapter listed in sections 71-1701 and 71-2503, and of titles 17 through 21 inclusive and title 43 of this article, and it shall be the duty of the commissioner and any persons designated by him for such purpose to issue subpoenas at the request of and upon behalf of the respondent.

2. The commissioner and those designated by him shall not be bound by the laws of evidence in the conduct of hearing proceedings, but the determination shall be founded upon sufficient legal evidence to sustain it.

3. Notice of hearing shall be served at least fifteen days prior to the date of the hearing, provided that, whenever because of danger to the public health it appears prejudicial to the interests of the people of the state to delay action for fifteen days, the commissioner may serve the respondent with an order requiring certain action or the cessation of certain activities immediately or within a specified period of less than fifteen days and the commissioner shall provide an opportunity to be heard within fifteen days after the date the order is served.

4. Service of notice of hearing or order shall be made by personal service or by registered or certified mail. Where service, whether by personal service or by registered or certified mail, is made upon an infant, incompetent, partnership, corporation, governmental subdivision, board or commission, it shall be made upon the person or persons designated to receive personal service by article 3 of the Civil Practice Law and Rules.

5. The Attorney General may prefer charges, attend hearings, present the facts, and take any and all proceedings in connection therewith.

6. At a hearing, the respondent may appear personally, shall have the right of counsel, and may cross-examine witnesses against him and produce evidence and witnesses in his behalf.

7. Following a hearing, the commissioner may make appropriate

determinations and issue an order in accordance therewith.

8. The commissioner may adopt, amend and repeal administrative rules and regulations governing the procedures to be followed with respect to hearings, such rules to be consistent with the policy and purpose of the provisions of this chapter listed in section 71-1701, and of titles 17 through 21 inclusive and title 43 of this article and the effective and fair enforcement of their provisions.

9. The provisions of this section shall be applicable to all hearings held pursuant to the provisions of this chapter listed in section 71-1701, and of titles 17 through 21 inclusive and title 43 of this article, except where other provisions of such articles, titles, sections and subdivisions applicable thereto are inconsistent therewith, in which event such other provisions shall apply.

§ 71-1711. Willful violation of health laws.

1. A person who willfully violates or refuses or omits to comply with any lawful order or regulation prescribed by any local board of health or local health officer, is guilty of a misdemeanor; except, however, that where such order or regulation applies to a tenant with respect to his own dwelling unit or to an owner occupied one or two family dwelling, such person is guilty of an offense for the first violation punishable by a fine not to exceed fifty dollars and for a second or subsequent violation is guilty of a misdemeanor punishable by a fine not to exceed five hundred dollars or by imprisonment not to exceed six months or by both such fine and imprisonment.

2. A person who willfully violates any provision of this chapter listed in section 71-1701, or of titles 17 through 21 inclusive of this article, or any regulation lawfully made or established by any public officer or board under authority of such provisions, the punishment for violating which is not otherwise prescribed by such provisions or any other law, is punishable by imprisonment not exceeding one year, or by a fine not exceeding two thousand dollars or by both.

§ 71-1713. Obstructing health officer in performance of his duty.

A person who wilfully opposes or obstructs a health officer or physician charged with enforcement of the health laws, in performing any legal duty, is guilty of a misdemeanor.

§ 71-1715. Enforcement: against officers.

The performance of any duty or the doing of any act enjoined, prescribed or required by the provisions of this chapter listed in section 71-1701, or by titles 17 through 21 inclusive of this article, may be enforced by a proceeding pursuant to article 78 of the Civil Practice Law and Rules at the instance of the department or of a local board of health, or of any citizen of full age resident of the municipality where the duty should be performed or the act done.

§ 71-1717. Examination and inspection of public works.

For purposes of enforcing the provisions of this chapter listed in section 71-1701, and of titles 17 through 21 inclusive of this article, all persons having the control, charge or custody of any public structure, work or ground, or of any plan, description, outline, drawing or chart thereof or relating thereto, made, kept or controlled by or under any public authority, shall permit and facilitate the examination, inspection and copying thereof by the commissioner, or by any person authorized by him to make such examination or inspection of such copies.

§ 71-1719. Summary action.

Whenever the commissioner, after investigation, is of the opinion that any person is causing, engaging in or maintaining a condition or activity which in his opinion constitutes danger to the health of the

people, and that it therefore appears to be prejudicial to the interest of the people to delay action for fifteen days until an opportunity for a hearing can be provided in accordance with the provisions of section 71-1709, the commissioner shall order the person, including any state agency or political subdivision having jurisdiction, by written notice to discontinue such dangerous condition or activity or take certain action immediately or within a specified period of less than fifteen days. As promptly as possible thereafter, within not to exceed fifteen days, the commissioner shall provide the person an opportunity to be heard and to present any proof that such condition or activity does not constitute a danger to the health of the people. This section shall apply only to enforcement of the provisions of this chapter listed in section 71-1701, and of titles 17 through 21 inclusive of this article.

§ 17-1721. Commissioner's enforcement power and duty.

The commissioner shall have the power and the duty to enforce this title and the provisions of this chapter listed in section 71-1701.

§ 71-1723. Issuance of subpoenas; compelling the attendance and testimony of witnesses.

The commissioner may issue subpoenas, compel the attendance of witnesses and compel them to testify in any matter or proceeding before him, brought under this title or the provisions of this chapter listed in section 71-1701. In any such matter or proceeding the commissioner may also require a witness to attend and give testimony in a county where he resides or has a place of business without the payment of any fees.

§ 71-1725. Assessment of Penalties.

The commissioner may assess any penalty prescribed for a violation of or a failure to comply with any provision contained in this title or

listed in section 71-1701, or any lawful notice, order or regulation prescribed by the commissioner under any such provision, one thousand dollars for every such violation or failure, which penalty may be assessed after a hearing or an opportunity to be heard.

TITLE 19

ENFORCEMENT OF TITLES 1 THROUGH 11 AND 15 THROUGH 21 INCLUSIVE OF ARTICLE 17 AND SPILLS OF BULK LIQUIDS

Section 71-1901. Applicability of this title.

71-1903. Enforcement of section 17-1703.

71-1905. Enforcement of section 17-1705.

71-1907. Enforcement of section 17-1707.

71-1909. Enforcement of section 17-1709.

71-1911. Enforcement of section 17-1711.

71-1913. Enforcement of section 17-1713.

71-1915. Enforcement of section 17-1715.

71-1917. Approval and enforcement of orders issued under section 17-1717.

71-1919. Actions by municipalities to prevent discharge of sewage into waters.

71-1921. Enforcement of section 17-1729.

71-1923. Enforcement of section 17-1735.

71-1925. Penalties.

71-1927. Enforcement of titles 1 through 11 inclusive and title 19 of article 17.

71-1929. Violations; civil liability.

71-1931. Injunctions.

71-1932. Definitions.

71-1933. Violations; criminal liability.

71-1935. Emergencies excepted.

71-1937. Jurisdiction of courts in criminal cases.

71-1939. Local enforcement.

71-1941. Penalties and liability for spills of bulk liquids.

71-1943. Enforcement of section 17-1743.

71-1945. Enforcement of title 21 of article 17.

§ 71-1901. Applicability of this title.

In addition to the provisions of section 71-0101 and 71-0301 and title 17 of this article, the provisions of this title shall be applicable to the enforcement of titles 1 through 11 and 15 through 19 inclusive of article 17.

§ 71-1903. Enforcement of section 17-1703.

A violation of the provisions of section 17-1703 shall be a misdemeanor.

§ 71-1905. Enforcement of section 17-1705.

Any person violating any provision of section 17-1705 shall forfeit to the county where the violation occurred the sum of fifty dollars for every such violation.

§ 71-1907. Enforcement of section 17-1707.

1. Every person violating any provision of section 17-1707 shall forfeit to the municipality having a local board of health where the violation occurs the sum of twenty-five dollars for the first day when the violation takes place, and the sum of ten dollars for every subsequent day that such violation is repeated or continued.

2. The board of health of any such municipality shall examine into any alleged offense against section 17-1707 and cause the same to be abated, if found to exist.

§ 71-1909. Enforcement of section 17-1709.

1. Any board of health named in subdivision 1 of section 17-1709 shall examine into any alleged offense against section 17-1709 within its jurisdiction and cause the same to be abated, by injunction or otherwise, if found to exist.

2. Any person violating any provision of section 17-1709 shall be guilty of a misdemeanor, and punishable by a fine of not more than seven hundred fifty dollars or by imprisonment for not more than one year or by both such fine and imprisonment.

§ 71-1911. Enforcement of section 17-1711.

Any person violating any provision of section 17-1711 shall be guilty of an offense, and punishable by a fine of not more than seventy-five dollars.

§ 71-1913. Enforcement of section 17-1713.

1. Any board of health named in subdivision 1 of section 17-1713 shall examine into any alleged offense against section 17-1713 within its jurisdiction and cause the same to be abated, by injunction or otherwise, if found to exist.

2. Any person violating any provision of section 17-1713 shall be guilty of a misdemeanor, and punishable by a fine of not more than five hundred dollars or by imprisonment for not more than one year or by both such fine and imprisonment.

§ 71-1915. Enforcement of section 17-1715.

1. Any person violating any provision of section 17-1715 shall be guilty of a misdemeanor, and punishable by a fine of not more than five hundred dollars or by imprisonment for not more than one year or by both such fine and imprisonment.

2. It shall be the duty of the board of health of any municipality where any violation of section 17-1715 shall occur to cause the same to be abated; provided that any person aggrieved by any such fall, flow or discharge may also cause such abatement, by injunction or other appropriate action or proceeding.

§ 71-1917. Approval and enforcement of orders issued under section 17-1717.

An order issued under section 17-1717 shall not be valid until approved by the Governor and the Attorney General, and when so approved it shall be the duty of the Attorney General to enforce such order.

§ 71-1919. Actions by municipalities to prevent discharge of sewage into waters.

1. Any incorporated city or village in the state of New York, which has made such provision for the disposal of its sewage as not to pollute or contaminate therewith any river, stream, lake or other body of water, may have and maintain an action in the Supreme Court to prevent the discharge of any sewage or substance deleterious to health, or which shall injure the potable qualities of the water in any river, stream, lake or other body of water, from which such incorporated city or village shall take or receive its water supply, provided, that such river, stream, lake or other body of water is wholly, or in part, within the boundaries of the county in which such plaintiff is located.

2. Whenever action shall be brought under the provisions of this section, it shall be the duty of the Supreme Court upon proof of the existence of facts justifying the bringing and maintenance of such action under the provisions of this section to render a judgment in which shall be incorporated a mandatory injunction requiring the person, body, board, corporation, municipality, village, county or town, being a defendant to said action which directly or indirectly, or by its

servants, agents or officers shall discharge or dispose of its sewage, or any other substance deleterious to health or which shall injure the potable qualities of the water in such wise as that the same shall enter into any river, stream, lake or other body of water, from which such plaintiff shall take or receive its water supply, within such reasonable time as may be prescribed by the court, to take such action as shall prevent such discharge or the disposal of such sewage or other substance into such waters, or the pollution thereof, with such further directions in the premises as may be proper and desirable to effect such purpose, provided that such river, stream, lake or other body of water is wholly, or in part, within the boundaries of the county in which such plaintiff is located.

§ 71-1921. Enforcement of section 17-1729.

1. Any person putting in or constructing or maintaining a conduit, discharge pipe or other means of discharging or casting any refuse or waste matter in violation of section 17-1729 shall forfeit to the people of the state five dollars a day for each day the same is used or maintained for such purpose, to be collected in an action brought by the commissioner.

2. The commissioner may maintain an action in the name of the people to restrain a violation of section 17-1729.

§ 71-1923. Enforcement of section 17-1735.

Upon receipt of a report from a local board of health under subdivision 2 of section 17-1735 the commissioner shall investigate the matter immediately and shall hold a hearing and give the person or persons charged with such violation or noncompliance an opportunity to present evidence on his or their behalf, and upon ascertaining that a violation or noncompliance exists, he may bring an action in the name of the people of the state in a court of record against the person or persons responsible for the violation or noncompliance for the recovery

of the penalties incurred and for an injunction against the continuation of the violation or noncompliance.

*** § 71-1925. Penalties.**

1. The penalty for the discharge of sewage from any public sewer system into any of the waters of the state without a duly issued permit for which a permit is required by title 17 of article 17 shall be five hundred dollars, and a further penalty of fifty dollars per day for each day the violation is continued.

2. The penalty for the discharge of sewage from any public sewer system into any of the waters of the state without filing a report for which a report is required to be filed with the board of health of the municipality shall be fifty dollars.

3. The penalty for the discharge of refuse or waste matter from any shop, factory, mill or industrial establishment for which a permit is required by title 17 of article 17 without such permit shall be one hundred dollars and ten dollars per day for each day the violation is continued.

4. The penalty for the discharge of refuse or waste matter from any shop, mill, factory or industrial establishment, without filing a report where a report is required by title 17 of article 17 to be filed shall be twenty-five dollars and five dollars per day for each day the violation is continued.

5. The penalty for discharging into any of the waters of the state any other matter prohibited by section 17-1701 besides that specified above, shall be twenty-five dollars and five dollars per day for each day the violation is continued.

* NB Expired September 1, 1973

§ 71-1927. Enforcement of titles 1 through 11 inclusive and title 19 of

article 17.

The commissioner is hereby authorized to:

1. Institute or cause to be instituted in a court of competent jurisdiction proceedings to compel compliance with the provisions of titles 1 through 11 inclusive and title 19 of article 17 or the determinations and orders of the commissioner.

2. Settle or compromise, with the approval of the Attorney General, any action or cause of action for the recovery of a penalty under titles 1 through 11 inclusive and title 19 of article 17 as he may deem advantageous to the state.

§ 71-1929. Violations; civil liability.

1. A person who violates any of the provisions of, or who fails to perform any duty imposed by titles 1 through 11 inclusive and title 19 of article 17, or the rules, regulations, orders or determinations of the commissioner promulgated thereto or the terms of any permit issued thereunder, shall be liable to a penalty of not to exceed thirty-seven thousand five hundred dollars per day for each violation, and, in addition thereto, such person may be enjoined from continuing such violation as hereinafter provided. Violation of a permit condition shall constitute grounds for revocation of such permit, which revocation may be accomplished either as provided in paragraph f of subdivision 4 of section 17-0303 or by order of judgment of the supreme court as an alternate or additional civil penalty in an action brought pursuant to subdivision 3 of this section.

2. Any penalties for violations of titles 1 through 11 inclusive and title 19 of article 17 resulting in the killing of fish or shellfish, shall be credited to the conservation fund established by section 83 of the State Finance Law and shall be available for the uses and purposes of such fund.

3. The penalties provided by subdivisions one and two shall be recoverable in an action brought by the Attorney General.

4. An action or cause of action for the recovery of a penalty under this title may be settled or compromised by the Attorney General after proceedings are brought to recover such penalties and prior to the entry for judgment therefor.

§ 71-1931. Injunctions.

It shall be the duty of the Attorney General upon the request of the commissioner to bring an action for an injunction against any person violating any of the provisions of titles 1 through 11 inclusive and title 19 of article 17 or violating any rule or regulation promulgated pursuant thereto, or any order or determination of the commissioner or a condition of any certificate or permit issued by the department; provided, however, that the department or the commissioner shall furnish the Attorney General with such material, evidentiary matter or proof as may be requested by the Attorney General for the prosecution of such an action. In any action for an injunction brought pursuant hereto any finding of the commissioner or hearing officer or panel appointed and designated by the commissioner shall be prima facie evidence of the fact or facts found therein.

§ 71-1932. Definitions.

As used in section 71-1933 of this title, the following terms shall have the following meanings:

1. "Hazardous substance" means any substance which:

a. is identified or listed as a hazardous waste or acute hazardous waste in regulations promulgated pursuant to section 27-0903 of this chapter and all amendments thereto, regardless of whether at the time of release the substance was actually a waste; or

b. appears on the list of substances hazardous or acutely hazardous to public health, safety or the environment promulgated pursuant to paragraphs (a) and (b) of subdivision one of section 37-0103 of this chapter and all amendments thereto.

2. "Organization" means a legal entity, other than a government, established or organized for any purpose, including, a corporation, company, association, firm, partnership, joint stock company, foundation, institution, trust, society, union or any other association of persons.

3. "Person" means an individual, public or private corporation, responsible corporate officer, political subdivision, government agency, department or bureau of the state or federal government, municipality, industry, co-partnership, association, firm, trust, estate or any other legal entity whatsoever.

4. "Pollutant" means dredged spoil, solid waste, incinerator residue, sewage, garbage, sewage sludge, munitions, chemical wastes, biological materials, radioactive materials, heat, wrecked or discarded equipment, rock, sand and industrial, municipal and agricultural waste.

5. "Serious bodily injury" means "serious physical injury" as defined in subdivision ten of section ten of the penal law.

6. "Sewer system" means pipe lines or conduits, pumping stations, and force mains, and all other constructions, devices, and appliances appurtenant thereto, used for conducting sewage, industrial waste or other wastes to a point of ultimate disposal.

7. "Treatment works" means any plant, disposal field, lagoon, pumping station, constructed drainage ditch or surface water intercepting ditch, incinerator, area devoted to sanitary landfills, or other work not specifically mentioned herein, installed for the purpose of treating, neutralizing, stabilizing, or disposing of sewage, industrial wastes or other wastes.

§ 71-1933. Violations; criminal liability.

1. Any person who, having any of the culpable mental states defined in section 15.05 of the penal law, shall violate any of the provisions of titles 1 through 5, 9 through 11 and 19 of article 17 or the rules, regulations, orders or determinations of the commissioner promulgated thereto, or the terms of any permit issued thereunder, shall be guilty of a misdemeanor and, upon conviction thereof, shall be punished by a fine of not less than three thousand seven hundred fifty dollars nor more than thirty-seven thousand five hundred dollars per day of violation or by imprisonment for a term of not more than one year, or by both such fine and imprisonment. If the conviction is for an offense committed after a first conviction of such person under this subdivision, punishment shall be by a fine of not more than seventy-five thousand dollars per day of violation, or by imprisonment for not more than two years, or by both.

2. No prosecution under this section shall be instituted until after final disposition of an appeal or review, if any, provided by section 17-0909 or its predecessor, section 1244 of the Public Health Law.

3. Any person who with criminal negligence, as defined in section 15.05 of the penal law,

a. violates

i. any provision of title 7 or 8 of article 17 of this chapter, or

ii. the rules or regulations promulgated thereunder, or

iii. any term of any permit issued thereunder, or

iv. any requirement imposed in a pretreatment program approved pursuant to section 402(a)(3) or 402(b)(8) of the Federal Water Pollution Control Act (33 USC § 1342(a)(3) or § 1342(b)(8)) or approved

pursuant to title 7 or 8 of article 17 of this chapter, or

v. any final administrative orders issued pursuant to this article where an opportunity for a hearing is provided, or

b. introduces into a sewer system or publicly owned treatment works any pollutant or hazardous substance

i. when such person knew that such introduction was likely to cause personal injury or property damage, except if that introduction was in compliance with all applicable federal, state or local requirements or permits, or

ii. which causes the treatment works to violate any term of any permit issued under title 7 or 8 of article 17 of this chapter or the rules or regulations promulgated thereunder except if that introduction was in compliance with all applicable federal, state or local requirements or permits; shall be guilty of a class A misdemeanor.

4. Any person who knowingly, as defined in section 15.05 of the penal law,

a. violates

i. any provision of title 7 or 8 of article 17 of this chapter, or

ii. the rules or regulations promulgated thereunder, or

iii. any term of any permit issued thereunder, or

iv. any requirement imposed in a pretreatment program approved pursuant to section 402(a)(3) or 402(b)(8) of the Federal Water Pollution Control Act (33 USC § 1342(a)(3) or § 1342(b)(8)) or approved pursuant to title 7 or 8 of article 17 of this chapter, or

v. any final administrative orders issued pursuant to this article where an opportunity for a hearing was provided, or

b. introduces into a sewer system or publicly owned treatment works any pollutant or hazardous substance

i. when such person knew that such introduction was likely to cause personal injury, except if that introduction was in compliance with all applicable federal, state or local requirements or permits, or

ii. which causes the treatment works to violate any term of any permit issued under title 7 or 8 of article 17 of this chapter or the rules or regulations promulgated thereunder except if that introduction was in compliance with all applicable federal, state or local requirements or permits; shall be guilty of a class E felony.

5. Any person who intentionally, as defined in section 15.05 of the penal law,

a. violates

i. any provision of title 7 or 8 of article 17 of this chapter, or

ii. the rules or regulations promulgated thereunder, or

iii. any term of any permit issued thereunder, or

iv. any final administrative orders issued pursuant to this article where an opportunity for a hearing was provided, and

b. knows at that time that he thereby places another person who is not a participant in the crime in imminent danger of death or serious bodily injury shall be guilty of a class C felony.

c. for the purpose of paragraphs a and b of this subdivision:

in determining whether a defendant who is an individual knew that his conduct placed another person in imminent danger of death or serious bodily injury

(a) the person is responsible only for actual awareness or actual belief that he possessed; and

(b) knowledge possessed by a person other than the defendant but not by the defendant himself may not be attributed to the defendant.

6. For purposes of subdivisions three, four and five of this section, a single operational upset which leads to simultaneous violations of more than one pollutant parameter shall be treated as a single violation.

7. Any person who, with intent to deceive, makes any false material statement, representation, or certification in any application, record, report, plan or other document filed or required to be maintained pursuant to title 7 or 8 of article 17 of this chapter or who intentionally falsifies, tampers with, or renders inaccurate any monitoring device or method required to be maintained pursuant to title 7 or 8 or article 17 of this chapter shall be guilty of a class E felony.

8. a. When a person is convicted of a crime under the provisions of this section, the sentence of the court shall be as follows:

i. A fine, as set forth in paragraph b of this subdivision;

ii. A sentence of imprisonment, as set forth in paragraph c of this subdivision; or

iii. Any combination of such fine or imprisonment.

b. Fines. A sentence to pay a fine shall be a sentence to pay an amount fixed by the court, not exceeding:

i. \$750,000 for a class C felony committed by an organization as defined in section 71-1932 of this title;

ii. \$375,000 for a class C felony;

iii. \$75,000 per day of continuing violation for a class E felony defined under subdivision four of this section but in no event less than \$7,500; and \$15,000 for a class E felony defined under subdivision seven of this section;

iv. \$37,500 per day of continuing violation for a class A misdemeanor but in no event less than \$3,750.

c. Imprisonment. A sentence of imprisonment shall be a sentence of imprisonment authorized by article seventy of the penal law.

9. All prosecutions under this section shall be instituted by the department or the commissioner and shall be conducted by the Attorney General in the name of the people of the state of New York.

10. In the prosecution of any criminal proceeding under this section by the Attorney General and, in any proceeding before a grand jury in connection therewith, the Attorney General shall exercise all the powers and perform all the duties which the District Attorney would otherwise be authorized or required to exercise or perform, and in such a proceeding the District Attorney shall exercise such powers and perform such duties as are requested of him by the Attorney General.

§ 71-1935. Emergencies excepted.

The civil and criminal liabilities imposed by sections 71-1929 and 71-1933 of this title upon persons violating the provisions of titles 1 through 11 inclusive and title 19 of article 17 and by sections 71-1929 and 71-1933 of this title shall not be construed to include any violation which was caused by an act of God, war, strike, riot or other catastrophe as to which negligence or willful misconduct on the part of such person was not the proximate cause.

§ 71-1937. Jurisdiction of courts in criminal cases.

County courts shall have, in the first instance, jurisdiction of felonies committed under titles 1 through 11 inclusive and title 19 of article 17 and sections 71-1929 through 71-1939 of this article. Subject to the power of removal provided in the Criminal Procedure Law, police courts shall have, in the first instance, concurrent jurisdiction of misdemeanors committed under titles 1 through 11 inclusive and title 19 of article 17 and sections 71-1929 through 71-1939 of this article. An action before a justice of the peace shall be brought in the town in which the offense was committed or an adjoining town and an action before a county court shall be brought in the county in which the offense was committed. A warrant shall be returnable before the magistrate or county judge issuing the same.

§ 71-1939. Local enforcement.

1. The health commissioner of any county or part-county health district or city is hereby authorized and empowered to bring an action in any court of competent jurisdiction for the recovery of any penalty provided in section 71-1929 for any violation of the provisions of titles 1 through 11 inclusive and title 19 of article 17 and sections 71-1929 through 71-1939 of this article occurring in the district or city in which such health commissioner has jurisdiction,

a. from a source described in subdivision 5 of section 17-0701, or

b. resulting from a failure to comply with the terms of a permit issued by such county or city pursuant to subdivision 6 of section 17-0701. Such health commissioner may, in his discretion, compromise any penalty sued for in such action at any stage thereof before judgment.

2. Any penalty collected pursuant to this section shall be paid to the district or city, except that any penalty for a violation resulting in the killing of fish or shellfish shall be credited to the conservation fund established by section 83 of the State Finance Law, and shall be available for the uses and purposes of such fund.

3. a. The health commissioner of any county which has been approved by the commissioner pursuant to section 17-1017 of this chapter to administer and enforce a local law or ordinance related to the provisions of title ten of article seventeen of this chapter is hereby authorized and empowered to bring an action in any court of competent jurisdiction for the recovery of any penalty provided in section 71-1929 of this title for any violation of title ten of article seventeen of this chapter occurring in the county in which the county health commissioner has jurisdiction.

b. All fines and penalties collected pursuant to this subdivision shall be paid to the district or county, provided, however, that one-quarter of such fines and penalties received shall be paid to the general fund to the credit of the state purposes account.

4. Within three days after bringing any action authorized by this section said health commissioner shall by registered mail serve upon the Attorney General and the commissioner a copy of the summons and complaint, if any, in such action, with a statement as to the date or dates of service thereof upon the defendant or defendants, or, if a complaint has not been served with the summons, a statement of the particulars of the violation or violations upon which such action was based. The Attorney General is hereby authorized to intervene in any such action in order to protect the interests of the state.

§ 71-1941. Penalties and liability for spills of bulk liquids.

1. Except where the owner of or a person in actual or constructive possession or control of more than one thousand one hundred gallons, in bulk, of any liquid including petroleum which, if released, would or would be likely to pollute the lands or waters of the state including the groundwaters thereof can prove that the entry or presence of any part of such liquid onto such lands or into or in such waters causing or contributing to a condition therein in contravention of the standards adopted or deemed adopted by the water pollution control board or any of

its legal successors was caused solely by (A) an act of God, (B) an act of war, (C) negligence on the part of the United States or New York State Government or (D) an act or omission of a third party without regard to whether any such act or omission was or was not negligent, or any combination of the foregoing clauses, such owner or person shall be liable for a penalty of not more than three thousand seven hundred fifty dollars for an initial incident resulting in or contributing to such a contravention and for an additional penalty not to exceed seven hundred fifty dollars for each day during which such contravention or contribution thereto continues, and in addition shall be liable to the people of the state of New York for the actual costs incurred by or on behalf of the people of the state for the removal or neutralization of such liquid and for any and all reasonable measures taken or attempted to reduce, limit or diminish the extent or effect of such contravention.

2. Such penalty or reimbursement or both due the people of the state by reason of the liability provided in subdivision one of this section may be assessed by the commissioner by order after a hearing or hearings noticed and conducted and reviewable as provided in title nine of article seventeen, or opportunity to be heard, or be recovered in an action or actions brought by the attorney general.

3. In assessing the amount of any such penalty the commissioner or court shall consider:

a. The type, extent and amount of damage which resulted from such incident.

b. The degree of care taken by or on behalf of the party charged to prevent the occurrence of the incident.

c. The efforts made by or on behalf of the party charged to reduce or mitigate the damage which resulted from the incident.

§ 71-1943. Enforcement of section 17-1743.

Any person who fails to so notify the department of such release, discharge or spill into the waters of the state as described in section 17-1743 of this chapter shall, upon conviction, be fined not more than three thousand seven hundred fifty dollars or imprisoned for not more than one year, or both.

§ 71-1945. Enforcement of title 21 of article 17.

1. Except as otherwise provided in this section, any person who violates any provision of title 21 of article 17 of this chapter or any rule, regulation or order issued thereunder shall be liable to the people of the state for a civil penalty not to exceed five hundred dollars for a first violation, and not to exceed one thousand dollars for each subsequent violation, to be assessed by the commissioner after a hearing or opportunity to be heard.

2. Any owner or owner's agent, or occupant of a household who violates any provision of title 21 of article 17 of this chapter or any rule, regulation or order issued thereunder shall, for a first violation be issued a written warning and be provided educational materials. Upon a second violation, the owner or owner's agent, or occupant of a household shall be liable to the people of the state for a civil penalty not to exceed one hundred dollars, and for any subsequent violations shall be liable to the people of the state for a civil penalty not to exceed two hundred fifty dollars. No owner or owner's agent of a household shall be held liable for any violation by an occupant. Such penalties may be assessed by the commissioner after a hearing or opportunity to be heard.

TITLE 21

ENFORCEMENT OF ARTICLE 19 AND AIR POLLUTION EMERGENCY

RULES AND REGULATIONS

Section 71-2101. Applicability of this title.

71-2103. Violations; civil liability.

71-2105. Criminal liability for violations.

71-2107. Injunctions.

71-2109. Emergencies excepted.

71-2111. Enforcement of air pollution emergency rules and regulations.

71-2113. Violations of section 19-0304 of article 19 of this chapter.

71-2115. Penalty assessment criteria.

§ 71-2101. Applicability of this title.

In addition to the provisions of section 71-0101 and 71-0301 and title 17 of this article, the provisions of this title shall be applicable to the enforcement of article 19.

§ 71-2103. Violations; civil liability.

1. Except as provided in section 71-2113, any person who violates any provision of article nineteen or any code, rule or regulation which was promulgated pursuant thereto; or any order except an order directing such person to pay a penalty by a specified date issued by the commissioner pursuant thereto, shall be liable, in the case of a first violation, for a penalty not less than five hundred dollars nor more than eighteen thousand dollars for said violation and an additional penalty of not to exceed fifteen thousand dollars for each day during which such violation continues. In the case of a second or any further violation, the liability shall be for a penalty not to exceed twenty-six thousand dollars for said violation and an additional penalty not to exceed twenty-two thousand five hundred dollars for each day during which such violation continues. In addition thereto, such person may be enjoined from continuing such violation as hereinafter provided.

2. The penalty provided for in subdivision 1 of this section shall be recoverable in an action brought by the Attorney General.

3. An action or cause of action for the recovery of a penalty under article 19 may be settled or compromised by the Attorney General after

proceedings are brought to recover such penalties prior to the entry of judgment therefor.

4. Any fines collected for violations of section 19-0320 of this chapter shall be deposited in the clean air fund, to the credit of the mobile source account, in accordance with the provisions of section ninety-seven-00 of the state finance law.

§ 71-2105. Criminal liability for violations.

1. Except as provided in section 71-2113, any person who shall wilfully violate any of the provisions of article 19 or any code, rule or regulation promulgated pursuant thereto or any final determination or order of the commissioner made pursuant to article 19 shall be guilty of a misdemeanor, and, upon conviction thereof, shall be punished by a fine, in the case of a first conviction, of not less than five hundred dollars nor more than eighteen thousand dollars or by imprisonment for a term of not more than one year, or by both such fine and imprisonment, for each separate violation. If the conviction is for an offense committed after the first conviction of such person under this subdivision, such person shall be punished by a fine not to exceed twenty-six thousand dollars, or by imprisonment, or by both such fine and imprisonment. Each day on which such violation occurs shall constitute a separate violation.

2. No prosecution under this section shall be instituted until after final disposition of an appeal or review, if any, provided by section 19-0511.

3. All prosecutions under this section shall be instituted by the commissioner and shall be conducted by the Attorney General in the name of the people of the state of New York.

4. In the prosecution of any criminal proceeding under this section by the Attorney General and, in any proceeding before a grand jury in connection therewith, the Attorney General shall exercise all the powers

and perform all the duties which the District Attorney would otherwise be authorized or required to exercise or perform, and in such a proceeding the District Attorney shall exercise such powers and perform such duties as are requested of him by the Attorney General.

§ 71-2107. Injunctions.

It shall be the duty of the attorney general upon the request of the commissioner to bring an action for an injunction against any person violating a provision of article nineteen; any code, rule or regulation promulgated pursuant thereto; or any order of the commissioner issued pursuant thereto; provided, however, that the commissioner shall furnish the attorney general with such material, evidentiary matter, or proof as may be requested by the attorney general for the prosecution of such action. In any action for injunction brought pursuant to this title, any finding of the commissioner shall be prima facie evidence of the fact or facts found therein.

§ 71-2109. Emergencies excepted.

The civil liabilities which shall be imposed pursuant to the provisions of this title upon persons violating the provisions of any code, rule or regulation shall not be so construed as to include any violation which was caused by an act of God, war, strike, riot, catastrophe or other condition as to which negligence or willful misconduct on the part of such person was not the proximate cause.

§ 71-2111. Enforcement of air pollution emergency rules and regulations.

Any person who violates any of the provisions of any regulation promulgated by the commissioner under authority of paragraph y of subdivision one of section 3-0301 shall be liable for a civil penalty of not more than twenty-five hundred dollars for each such violation and an additional penalty of not more than five hundred dollars for each day

during which such violation continues, and, in addition thereto, such persons may be enjoined from continuing such violation. Penalties and injunctive relief provided herein shall be recoverable in an action brought by the attorney general at the request and in the name of the commissioner.

§ 71-2113. Violations of section 19-0304 of article 19 of this chapter.

1. Civil and administrative sanctions. Any person who violates any of the provisions of, or who fails to perform any duty imposed by section 19-0304 of this chapter, or any rule or regulation promulgated pursuant thereto, or any term or condition of any certificate or permit issued pursuant thereto, or any final determination or order of the commissioner made pursuant to article 19 of this chapter concerning a violation of section 19-0304 of this chapter shall be liable in the case of a first violation, for a civil penalty not to exceed thirty-seven thousand five hundred dollars and an additional penalty of not more than thirty-seven thousand five hundred dollars for each day during which such violation continues, to be assessed by the commissioner after an opportunity to be heard pursuant to the provisions of section 71-1709 of this article, or by the court in any action or proceeding pursuant to section 71-2107 of this title, and, in addition thereto, such person may by similar process be enjoined from continuing such violation and any permit or certificate issued to such person may be revoked or suspended or a pending renewal application denied. In the case of a second and any further violation, the liability shall be for a civil penalty not to exceed seventy-five thousand dollars for each such violation and an additional penalty not to exceed seventy-five thousand dollars for each day during which such violation continues.

2. Criminal sanctions. Any person who, having any of the culpable mental states defined in section 15.05 of the penal law, shall violate any of the provisions of or who fails to perform any duty imposed by section 19-0304 of this chapter, or any rules and regulations promulgated pursuant thereto, or any term or condition of any certificate or permit issued pursuant thereto, or any final

determination or order of the commissioner made pursuant to article 19 of this chapter concerning a violation of section 19-0304 of this chapter shall be guilty of a misdemeanor and, upon conviction thereof, shall for a first conviction be punished by a fine not to exceed thirty-seven thousand five hundred dollars per day of violation or by imprisonment for a term of not more than one year, or both such fine and imprisonment. If the conviction is for an offense committed after a first conviction of such person under this subdivision, punishment shall be by a fine not to exceed seventy-five thousand dollars per day of violation, or by imprisonment for not more than two years or by both such fine and imprisonment.

§ 71-2115. Penalty assessment criteria.

In determining the amount of any fine, penalty or sentence imposed pursuant to this title, the commissioner or the court shall take into consideration any evidence introduced by a party regarding the economic impact of a penalty on a business, the compliance history of a violator, good faith efforts of a violator to comply, any economic benefit obtained from noncompliance, the amount of risk or damage to public health or the environment caused by a violator, whether the violation was procedural in nature, or such other factors as justice may require.

TITLE 22

ENFORCEMENT OF TITLE 23 OF ARTICLE 23

Section 71-2201. Enforcement of title 23 of article 23 of this chapter.

§ 71-2201. Enforcement of title 23 of article 23 of this chapter.

Administrative and civil sanctions. 1. Any person who violates any of the provisions of, or who fails to perform any duty imposed by title 23 of article 23 except the duty to accept used oil pursuant to section 23-2307 or any person subject to section 23-2308 or any rule or regulation promulgated pursuant thereto, or any term or condition of any

certificate or permit issued pursuant thereto, or any final determination or order of the commissioner made pursuant to this section shall be liable for a civil penalty not to exceed one thousand dollars for each such violation and an additional penalty of not more than five hundred dollars for each day during which such violation continues, to be assessed by the commissioner after a hearing or opportunity to be heard pursuant to the provisions of section 71-1709 of this chapter, and, in addition thereto, such person may by similar process be enjoined from continuing such violation and any permit or certificate issued to such person may be revoked or suspended or a pending renewal application denied.

2. Any person who refuses to accept used oil as required pursuant to subdivision two of section 23-2307 shall be liable for a civil penalty not to exceed one hundred dollars.

3. Any person who violates any provision of section 23-2308 of this chapter shall be subject to a civil penalty not to exceed two hundred fifty dollars for each violation.

4. Notwithstanding any other provision of law, any person who shall violate the provisions of paragraph (c) of subdivision one of section 23-2307 or paragraph (d) of subdivision two of section 23-2307 of this chapter shall be liable for a civil penalty of not more than five hundred dollars, and an additional civil penalty of not more than five hundred dollars for each day during which such violation continues, not to exceed ten thousand dollars.

TITLE 23

ENFORCEMENT OF ARTICLE 24

Section 71-2301. Applicability of title.

71-2303. Violation; penalties.

71-2305. Enforcement.

71-2307. Abatement of pollution.

§ 71-2301. Applicability of title.

In addition to the provisions of sections 71-0101, 71-0301 and title five of this article, the provisions of this title shall be applicable to the enforcement of article twenty-four of this chapter.

§ 71-2303. Violation; penalties.

1. Civil sanctions. a. Any person who violates, disobeys or disregards any provision of article twenty-four, including title five and section 24-0507 thereof or any rule or regulation, local law or ordinance, permit or order issued pursuant thereto, shall be liable to the people of the state for a civil penalty of not to exceed eleven thousand dollars for every such violation, to be assessed, after a hearing or opportunity to be heard upon due notice and with the rights to specification of the charges and representation by counsel at such hearing, by the commissioner or local government or in an action initiated by the attorney general pursuant to section 71-2305 of this title or on the attorney general's own initiative. Each violation shall be a separate and distinct violation and, in the case of a continuing violation, each day's continuance thereof shall be deemed a separate and distinct violation. Such penalty assessed by the commissioner or local government may be recovered in an action brought by the attorney general at the request and in the name of the commissioner or local government in any court of competent jurisdiction. Such civil penalty may be released or compromised by the commissioner or local government before the matter has been referred to the attorney general; and where such matter has been referred to the attorney general, any such penalty may be released or compromised and any action commenced to recover the same may be settled and discontinued by the attorney general with the consent of the commissioner or local government. In addition, the commissioner or local government shall have power, following a hearing held in conformance with the procedures set forth in section 71-1709 of this article, to direct the violator to cease violating the act and to restore the affected freshwater wetland to its condition prior to the violation, insofar as that is possible within a reasonable time and

under the supervision of the commissioner or local government. Any such order of the commissioner or local government shall be enforceable in an action brought by the attorney general at the request and in the name of the commissioner or local government in any court of competent jurisdiction. Any civil penalty or order issued by the commissioner or local government pursuant to this subdivision shall be reviewable in a proceeding pursuant to article seventy-eight of the civil practice law and rules.

b. Upon determining that significant damage to the functions and benefits of a freshwater wetland is occurring or is imminent as a result of any violation of article twenty-four of this chapter, including but not limited to (i) activity taking place requiring a permit under article twenty-four of this chapter but for which no permit has been granted or (ii) failure on the part of a permittee to adhere to permit conditions, the commissioner or local government shall have power to direct the violator to cease and desist from violating the act. In such cases the violator shall be provided an opportunity to be heard within ten days of receipt of the notice to cease and desist.

2. Criminal sanctions. Any person who violates any provision of article twenty-four of this chapter, including any rule or regulation, local law or ordinance, permit or order issued pursuant thereto, shall, in addition, for the first offense, be guilty of a violation punishable by a fine of not less than two thousand nor more than five thousand dollars; for a second and each subsequent offense he shall be guilty of a misdemeanor punishable by a fine of not less than four thousand nor more than ten thousand dollars or a term of imprisonment of not less than fifteen days nor more than six months or both. In addition to these punishments, any offender may be punishable by being ordered by the court to restore the affected freshwater wetland or adjacent area to its condition prior to the offense, insofar as that is possible. The court shall specify a reasonable time for the completion of such restoration, which shall be effected under the supervision of the commissioner or local government. Each offense shall be a separate and distinct offense and, in the case of a continuing offense, each day's continuance thereof shall be deemed a separate and distinct offense.

3. All fines collected pursuant to this section shall be paid into the environmental protection fund established pursuant to section ninety-two-s of the state finance law.

§ 71-2305. Enforcement.

1. The attorney general, upon their own initiative or upon complaint of the commissioner or local government, shall prosecute persons alleged to have violated article twenty-four of this chapter.

2. The commissioner or local government shall have the right to seek equitable relief to restrain any violation or threatened violation of any provisions of article twenty-four.

3. In exercising its authority pursuant to title eight of article twenty-four of this chapter, the Adirondack park agency shall have authority to exercise the powers of the commissioner to enforce article twenty-four set forth in this title; provided, however, that nothing herein contained shall empower the agency to exercise the powers granted the commissioner by section 71-0525 of this article.

§ 71-2307. Abatement of pollution.

Where any freshwater wetlands have been damaged or endangered by pollution or are subject to pollution, the commissioner shall take all appropriate action to abate the pollution. The commissioner may restrict or order cessation of solid waste disposal, deep well disposal, or liquid waste disposal where such is polluting a given freshwater wetland.

TITLE 25

ENFORCEMENT OF ARTICLE 25

Section 71-2501. Applicability of this title.

71-2503. Violation; penalties.

71-2505. Enforcement.

71-2507. Pollution of tidal wetlands.

§ 71-2501. Applicability of this title.

The provisions of this title shall be applicable to the enforcement of article twenty-five.

§ 71-2503. Violation; penalties.

1. Administrative sanctions.

a. Any person who violates, disobeys or disregards any provision of article twenty-five shall be liable to the people of the state for a civil penalty of not to exceed ten thousand dollars for every such violation, to be assessed, after a hearing or opportunity to be heard, by the commissioner. Each violation shall be a separate and distinct violation and, in the case of a continuing violation, each day's continuance thereof shall be deemed a separate and distinct violation. The penalty may be recovered in an action brought by the commissioner in any court of competent jurisdiction. Such civil penalty may be released or compromised by the commissioner before the matter has been referred to the attorney general; and where such matter has been referred to the attorney general, any such penalty may be released or compromised and any action commenced to recover the same may be settled and discontinued by the attorney general with the consent of the commissioner.

b. Upon determining that significant damage to the functions and benefits of tidal wetlands is occurring or is imminent as a result of any violation of article twenty-five, including but not limited to (i) activity taking place requiring a permit under article twenty-five but for which no permit has been granted or (ii) failure on the part of a permittee to adhere to permit conditions, the commissioner shall have power to direct the violator to cease and desist from violating the act.

In such cases the violator shall be provided an opportunity to be heard within ten days of receipt of the notice to cease and desist.

c. Following a hearing held pursuant to section 71-1709 of this article, the commissioner shall have power to direct the violator to cease and desist from violating the act and to restore the affected tidal wetland or area immediately adjacent thereto to its condition prior to the violation, insofar as that is possible within a reasonable time and under the supervision of the commissioner. Any order of the commissioner shall be enforceable in an action brought by the commissioner in any court of competent jurisdiction. Any civil penalty or order issued by the commissioner under this subdivision shall be reviewable in a proceeding under article seventy-eight of the civil practice law and rules.

2. Criminal sanctions. Any person who violates any provision of article twenty-five shall, in addition, for the first offense, be guilty of a violation punishable by a fine of not less than five hundred nor more than five thousand dollars; for a second and each subsequent offense such person shall be guilty of a misdemeanor punishable by a fine of not less than one thousand nor more than ten thousand dollars or a term of imprisonment of not less than fifteen days nor more than six months or both. In addition to or instead of these punishments, any offender shall be punishable by being ordered by the court to restore the affected tidal wetland or area immediately adjacent thereto to its condition prior to the offense, insofar as that is possible. The court shall specify a reasonable time for the completion of the restoration, which shall be effected under the supervision of the commissioner. Each offense shall be a separate and distinct offense and, in the case of a continuing offense, each day's continuance thereof shall be deemed a separate and distinct offense.

3. The proceeds of any penalty or fine assessed under this section shall be deposited to the credit of the marine resources account of the conservation fund.

§ 71-2505. Enforcement.

The attorney general, on his own initiative or at the request of the commissioner, shall prosecute persons who violate article twenty-five. In addition the attorney general, on his own initiative or at the request of the commissioner, shall have the right to recover a civil penalty of up to ten thousand dollars for every violation of any provision of such article, and to seek equitable relief to restrain any violation or threatened violation of such article and to require the restoration of any affected tidal wetland or area immediately adjacent thereto to its condition prior to the violation, insofar as that is possible, within a reasonable time and under the supervision of the commissioner. In the case of a continuing violation, each day's continuance thereof shall be deemed a separate and distinct violation.

§ 71-2507. Pollution of tidal wetlands.

Where any tidal wetlands are subject to pollution, the commissioner and attorney general shall take all appropriate action to abate the pollution. In addition, the commissioner may restrict or order cessation of solid waste disposal, deep well disposal, or liquid waste disposal where such is polluting a given area of tidal wetland. Where pesticides, chemical products, or fertilizer residues are the polluting agents, the commissioner shall confer with other appropriate public officials to limit the use of such substances at their source; after appropriate consultations, the commissioner may make such rules and regulations as he deems necessary under section 3-0301 of the environmental conservation law.

TITLE 27

ENFORCEMENT OF ARTICLE 27 AND ARTICLE 71

Section 71-2701. Applicability of title.

71-2702. Definitions.

71-2703. Violations of title 3 or 7 of article 27 of this chapter.

- 71-2705. Violations of titles 9, 11 and 13 of article 27 of this chapter.
- 71-2706. Enforcement of section 27-1311.
- 71-2707. Unlawful possession of hazardous wastes in the second degree.
- 71-2709. Unlawful possession of hazardous wastes in the first degree.
- 71-2710. Endangering public health, safety or the environment in the fifth degree.
- 71-2711. Endangering public health, safety or the environment in the fourth degree.
- 71-2712. Endangering public health, safety or the environment in the third degree.
- 71-2713. Endangering public health, safety or the environment in the second degree.
- 71-2714. Endangering public health, safety or the environment in the first degree.
- 71-2715. Unlawful dealing in hazardous wastes in the second degree.
- 71-2717. Unlawful dealing in hazardous wastes in the first degree.
- 71-2719. Presumptions.
- 71-2720. Exemption.
- 71-2721. Enforcement of Article 27 and this title.
- 71-2722. Enforcement of section 27-1701 of this chapter.
- 71-2723. Procedure for determining the amount of the cost of disposing of wastes or of restoring an area to its original state following a defendant's conviction under sections 27-0914, 71-2707, 71-2709, 71-2710, 71-2711, 71-2712, 71-2713, 71-2714, 71-2715 and 71-2717 of this chapter.
- 71-2724. Enforcement of title 21 of article 27.
- 71-2725. Disposition of penalties and fines.
- 71-2726. Payment of rewards for aid in apprehension and conviction of persons guilty of felony or misdemeanor.
- 71-2727. Enforcement of articles 27 and 71 of this chapter.

71-2728. Enforcement of title 27 of article 27 of this chapter.
71-2729. Enforcement of title 26 of article 27 of this chapter.
71-2730. Enforcement of title 30 of article 27 of this chapter.

§ 71-2701. Applicability of title.

In addition to the provisions of sections 71-0101 and 71-0301 of this article, the provisions of this title shall be applicable to the enforcement of article 27 and to this title.

§ 71-2702. Definitions.

As used in section 27-0914 of this chapter, and this title, the following terms shall have the following meanings:

1. "Hazardous wastes" means:

(a) Those wastes identified or listed in regulations promulgated pursuant to section 27-0903 of this chapter and all amendments thereto;

(b) Acute hazardous wastes and;

(c) Waste oils, including but not limited to, used engine lubricating oil, fuel oil, motor oil, gear oil, cutting oil, transmission fluid, hydraulic fluid, dielectric fluid, oil storage tank residue, animal oil, and vegetable oil, which have been contaminated by physical or chemical impurities, through use or accident, and have not been subsequently rerefinned, and which fail one or more of the characteristic tests listed in regulations promulgated pursuant to section 27-0903 of this chapter and all amendments thereto or which contain any waste identified or listed in regulations promulgated pursuant to section 27-0903 of this chapter and all amendments thereto.

2. "Acute hazardous wastes" means those wastes identified or listed as "acute hazardous wastes" in regulations promulgated pursuant to section 27-0903 of this chapter and all amendments thereto.

3. "Authorization" means the possession, where required, of a valid

license, permit or certificate issued by an agency of the state of New York or the federal government or an order issued by the commissioner or the administrator of the federal environmental protection agency under applicable statutes, rules or regulations regarding the possession or release of hazardous or acutely hazardous wastes or substances hazardous or acutely hazardous to public health, safety or the environment or otherwise engaging in conduct which is exempt under applicable statutes, rules or regulations from the requirements of possessing such a license, permit, certificate or order.

4. "Site of generation" means premises where hazardous wastes are produced, used, or stored pursuant to authorization or registration under the federal solid waste disposal act or under article twenty-seven of this chapter, and all contiguous property owned or leased by the owner or lessor of said premises, including contiguous property which may be otherwise divided by a public or private right-of-way, provided the entrance and exit between the properties is at a crossroads intersection, and access is by crossing as opposed to going along the right-of-way, and non-contiguous property owned or leased by the owner or lessor of said premises, but connected by a right-of-way which he controls and to which the public does not have access.

5. "Disposal" means the discharge, deposit, injection, dumping, spilling, leaking or placing of any substance so that such substance or any related constituent thereof may enter the environment, or the abandonment of any substance. Disposal also means the thermal destruction of waste or hazardous waste and the burning of such wastes as fuel for the purpose of recovering useable energy.

6. "Primary water supply" means a body of surface water, fresh or saline or water in a saturated zone or stratum beneath the surface of land or water, best usage of which includes being used for drinking, culinary or food processing, including potable mineral waters, and so classified in regulations promulgated pursuant to section 15-0313 or 17-0301 of this chapter, as amended.

7. "Water" includes lakes, bays, ponds, rivers, streams, and other

waters as further defined in subdivision two of section 17-0105 of this chapter.

8. "Pound" means an avoirdupois pound.

9. "Gallon" means a unit of liquid capacity equal to two hundred thirty-one cubic inches or four quarts.

10. "Substance hazardous to public health, safety or the environment" means any substance which:

(a) is identified or listed as a hazardous waste in regulations promulgated pursuant to section 27-0903 of this chapter and all amendments thereto, regardless of whether at the time of release the substance was actually a waste; or

(b) appears on the list in regulations promulgated pursuant to paragraph (a) of subdivision one of section 37-0103 of this chapter and all amendments thereto.

11. "Substance acutely hazardous to public health, safety or the environment" means any substance which:

(a) is listed as an acute hazardous waste in regulations promulgated pursuant to section 27-0903 of this chapter and all amendments thereto, regardless of whether at the time of release the substance was actually a waste; or

(b) appears on the list in regulations promulgated pursuant to paragraph (b) of subdivision one of section 37-0103 of this chapter and all amendments thereto.

12. "Environment" means any water, water vapor, any land including land surface or subsurface, air, fish, wildlife, biota, and all other natural resources.

13. "Release" means any pumping, pouring, emitting, emptying, or leaching, directly or indirectly, of a substance so that the substance or any related constituent thereof, or any degradation product of such a substance or of a related constituent thereof, may enter the environment, or the disposal of any substance.

14. "Abandonment" means the intentional relinquishment or forsaking of all possession or control of any substance. In any prosecution under this title, it is an affirmative defense to an allegation of abandonment that the defendant surrendered possession or control of such substance to another party who knowingly and voluntarily consented to assume such possession or control.

15. For the purposes of section 27-3101 of this chapter and subdivision five of section 71-2712, subdivisions seven, eight and nine of section 71-2713 and subdivision three of section 71-2714 of this title:

(a) "construction and demolition debris" shall mean waste resulting from construction, remodeling, repair and demolition of structures, buildings and roads, including but not limited to excavated material. Construction and demolition debris shall not include, even if generated from construction, remodeling, repair and demolition activities, municipal solid waste and such other materials that may be listed for exclusion from this definition pursuant to regulations promulgated by the department.

(b) "excavated material" means excess soil, rock, fill, or other material excavated during construction or maintenance activities. "Fill" shall include soil or other granular, compactible material that is authorized for use pursuant to regulations promulgated by the department.

§ 71-2703. Violations of title 3 or 7 of article 27 of this chapter.

1. Civil and administrative sanctions. a. Any person who violates any of the provisions of, or who fails to perform any duty imposed by title 3 or 7 of article 27 of this chapter or any rule or regulation promulgated pursuant thereto, or any term or condition of any certificate or permit issued pursuant thereto, or any final determination or order of the commissioner made pursuant to this title shall be liable for a civil penalty not to exceed seven thousand five hundred dollars for each such violation and an additional penalty of not

more than one thousand five hundred dollars for each day during which such violation continues, to be assessed by the commissioner after an opportunity to be heard pursuant to the provisions of section 71-1709 of this article, or by the court in any action or proceeding pursuant to section 71-2727 of this title, and, in addition thereto, such person may by similar process be enjoined from continuing such violation and any permit or certificate issued to such person may be revoked or suspended or a pending renewal application denied.

b. i. Any person who violates any of the provisions of, or who fails to perform any duty imposed by, title 3 or 7 of article 27 of this chapter, or any rule or regulation promulgated pursuant thereto, or any term or condition of any certificate or permit issued pursuant thereto and thereby causes the release of solid waste into the environment, shall be liable for a civil penalty not to exceed eleven thousand two hundred fifty dollars for each such violation and an additional penalty of not more than eleven thousand two hundred fifty dollars for each day during which such violation continues, to be assessed by the commissioner after an opportunity to be heard pursuant to the provisions of section 71-1709 of this article, or by the court in any action or proceeding pursuant to section 71-2727 of this title, and, in addition thereto, such person may by similar process be enjoined from continuing such violation and any permit or certificate issued to such person may be revoked or suspended or a pending renewal application denied.

ii. Any person who violates any of the provisions of, or who fails to perform any duty imposed by, title 3 or 7 of article 27 of this chapter, or any rule or regulation promulgated pursuant thereto, or any term or condition of any certificate or permit issued pursuant thereto and thereby causes the release of more than ten cubic yards of solid waste into the environment, shall be liable for a civil penalty not to exceed twenty-two thousand five hundred dollars for each such violation and an additional penalty of not more than twenty-two thousand five hundred dollars for each day during which such violation continues, to be assessed by the commissioner after an opportunity to be heard pursuant to the provisions of section 71-1709 of this article, or by the court in any action or proceeding pursuant to section 71-2727 of this title, and,

in addition thereto, such person may by similar process be enjoined from continuing such violation and any permit or certificate issued to such person may be revoked or suspended or a pending renewal application denied.

c. The court in any action or proceeding pursuant to section 71-2727 of this chapter may exercise all powers exercisable by the commissioner.

2. Criminal sanctions. a. Any person who, having any of the culpable mental states defined in section 15.05 of the penal law, shall violate any of the provisions of or who fails to perform any duty imposed by title 3 or 7 of article 27 of this chapter, or any rules and regulations promulgated pursuant thereto, or any final determination or order of the commissioner made pursuant to this title shall be guilty of a violation and, upon conviction thereof, shall be punished by a fine of not less than one thousand five hundred dollars nor more than fifteen thousand dollars per day of violation or by imprisonment for not more than fifteen days or by both such fine and imprisonment.

b. i. Any person who shall violate paragraph a of this subdivision and thereby causes or attempts to cause the release of more than ten cubic yards of solid waste into the environment shall be guilty of a class B misdemeanor and, upon conviction thereof, shall be punished by a fine of not less than three thousand seven hundred fifty dollars per day nor more than twenty-two thousand five hundred dollars per day of violation, or by imprisonment for a term in accordance with the penal law, or by both such fine and imprisonment.

ii. Any person who shall violate paragraph a of this subdivision and thereby causes or attempts to cause the release of more than ten cubic yards of solid waste into the environment, after having been convicted of a violation of this subdivision within the preceding five years, shall be guilty of a class A misdemeanor and, upon conviction thereof, shall be punished by a fine of not less than three thousand seven hundred fifty dollars per day nor more than thirty-seven thousand five hundred dollars per day of violation, or by imprisonment for a term in accordance with the penal law, or by both such fine and imprisonment.

c. i. Any person who shall violate paragraph a of this subdivision and thereby causes or attempts to cause the release of more than seventy cubic yards of solid waste into the environment shall be guilty of a class A misdemeanor and, upon conviction thereof, shall be punished by a fine of not less than three thousand seven hundred fifty dollars per day nor more than thirty-seven thousand five hundred dollars per day of violation, or by imprisonment for a term in accordance with the penal law, or by both such fine and imprisonment.

ii. Any person who shall violate paragraph a of this subdivision and thereby causes or attempts to cause the release of more than seventy cubic yards of solid waste into the environment, after having been convicted of a violation of this subdivision within the preceding five years, shall be guilty of a class E felony and, upon conviction thereof, shall be punished by a fine of not less than seven thousand five hundred dollars per day nor more than seventy-five thousand dollars per day of violation, or by imprisonment for a term in accordance with the penal law, or by both such fine and imprisonment.

3. Additional sanctions. Any person who violates any of the provisions of, or who fails to perform any duty imposed by title 7 of article 27, with regard to the construction and operation of facilities for the disposal of construction and demolition debris or any rule or regulation promulgated pursuant thereto, or any term or condition of any certificate or permit issued pursuant thereto or any final determination or order of the commissioner made pursuant to this title shall be liable for a civil penalty not to exceed fifteen thousand dollars and each day of such deposition shall constitute a separate violation and said civil penalty is in addition to any other fines or penalties which may be applied pursuant to this title.

4. Definition. As used in this section, the following term shall have the following meaning "release" means any pumping, pouring, emitting, emptying, discharge, deposit, injection, dumping, spilling or placing of a substance.

5. Penalty assessment criteria. In determining the amount of any fine, penalty or sentence imposed pursuant to this section, the commissioner or the court shall take into consideration any evidence introduced by a party regarding the economic impact of a penalty on a business, the compliance history of a violator, good faith efforts of a violator to comply, any economic benefit obtained from noncompliance, the amount of risk or damage to public health or the environment caused by a violator, whether the violation was procedural in nature, or such other factors as justice may require.

§ 71-2705. Violations of titles 9, 11 and 13 of article 27 of this chapter.

1. Civil and administrative sanctions. Any person who violates any of the provisions of, or who fails to perform any duty imposed by titles 9, 11 and 13 of article 27 or any rule or regulation promulgated pursuant thereto, or any term or condition of any certificate or permit issued pursuant thereto, or any final determination or order of the commissioner made pursuant to this title shall be liable in the case of a first violation, for a civil penalty not to exceed sixty-five thousand dollars and an additional penalty of not more than sixty-five thousand dollars for each day during which such violation continues, to be assessed by the commissioner after an opportunity to be heard pursuant to the provisions of section 71-1709 of this article, or by the court in any action or proceeding pursuant to section 71-2727 of this title, and, in addition thereto, such person may by similar process be enjoined from continuing such violation and any permit or certificate issued to such person may be revoked or suspended or a pending renewal application denied. In the case of a second and any further violation, the liability shall be for a civil penalty not to exceed one hundred twenty-five thousand dollars for each such violation and an additional penalty not to exceed one hundred twenty-five thousand dollars for each day during which such violation continues.

2. Criminal sanctions. Any person who, having any of the culpable mental states defined in section 15.05 of the penal law, shall violate

any of the provisions of or who fails to perform any duty imposed by titles 9, 11 and 13 of article 27 or any rules and regulations promulgated pursuant thereto, or any term or condition of any certificate or permit issued pursuant thereto, or any final determination or order of the commissioner made pursuant to this title shall be guilty of a misdemeanor and, upon conviction thereof, shall for a first conviction be punished by a fine not to exceed sixty-five thousand dollars per day of violation or by imprisonment for a term of not more than one year, or both such fine and imprisonment. If the conviction is for an offense committed after a first conviction of such person under this subdivision, punishment shall be by a fine not to exceed one hundred twenty-five thousand dollars per day of violation, or by imprisonment for not more than two years or by both such fine and imprisonment.

§ 71-2706. Enforcement of section 27-1311.

Any person not subject to subdivision four of section seventy-four of the public officers law, who knowingly and willfully discloses confidential information which is entitled to protection under article six of the public officers law and section 27-1311 of this chapter shall be guilty of a misdemeanor.

§ 71-2707. Unlawful possession of hazardous wastes in the second degree.

No person shall:

1. Knowingly possess more than one hundred gallons or one thousand pounds, whichever is less, of an aggregate weight or volume of hazardous wastes at a place other than the site of generation; or

2. Recklessly possess more than two hundred gallons or two thousand pounds, whichever is less, of an aggregate weight or volume of hazardous wastes at a place other than the site of generation.

Unlawful possession of hazardous wastes in the second degree is a class E felony.

§ 71-2709. Unlawful possession of hazardous wastes in the first degree.

No person shall:

1. Knowingly possess acute hazardous wastes at a place other than the site of generation; or

2. Knowingly possess more than fifteen hundred gallons or fifteen thousand pounds, whichever is less, of an aggregate weight or volume of hazardous wastes at a place other than the site of generation; or

3. Recklessly possess more than twenty-five hundred gallons or twenty-five thousand pounds, whichever is less, of an aggregate weight or volume of hazardous wastes at a place other than the site of generation.

Unlawful possession of hazardous waste in the first degree is a class D felony.

§ 71-2710. Endangering public health, safety or the environment in the fifth degree.

A person is guilty of endangering public health, safety or the environment in the fifth degree when with criminal negligence he engages in conduct which causes the release of more than five gallons or fifty pounds, whichever is less, of an aggregate weight or volume of a substance hazardous to public health, safety or the environment.

Endangering public health, safety or the environment in the fifth degree is a class B misdemeanor.

§ 71-2711. Endangering public health, safety or the environment in the fourth degree.

A person is guilty of endangering public health, safety or the environment in the fourth degree when:

1. With criminal negligence, he engages in conduct which causes the release of a substance acutely hazardous to public health, safety or the environment; or

2. With criminal negligence, he engages in conduct which causes the release of more than one hundred gallons or one thousand pounds, whichever is less, of an aggregate weight or volume of a substance hazardous to public health, safety or the environment; or

3. He knowingly or recklessly engages in conduct which causes the release of a substance hazardous to public health, safety or the environment.

Endangering public health, safety or the environment in the fourth degree is a class A misdemeanor.

§ 71-2712. Endangering public health, safety or the environment in the third degree.

A person is guilty of endangering public health, safety or the environment in the third degree when:

1. He recklessly engages in conduct which causes the release of a substance acutely hazardous to public health, safety or the environment; or

2. He recklessly engages in conduct which causes the release of more than two hundred gallons or two thousand pounds, whichever is less, of an aggregate weight or volume of a substance hazardous to public health, safety or the environment; or

3. He recklessly engages in conduct which causes the release of more than one hundred gallons or one thousand pounds, whichever is less, of an aggregate weight or volume of a substance hazardous to public health, safety or the environment and such release creates a substantial risk of physical injury to any person who is not a participant in the crime; or

4. He or she knowingly engages in conduct which causes the release of more than one hundred gallons or one thousand pounds, whichever is less, of an aggregate weight or volume of a substance hazardous to public health, safety or the environment; or

5. With intent to dispose of construction and demolition debris, he or she intentionally engages in conduct that causes the unlawful disposal or release of either ten cubic yards or more, or twenty thousand pounds or more, of construction and demolition debris, as defined in section 71-2702 of this title.

Endangering public health, safety or the environment in the third degree is a class E felony.

§ 71-2713. Endangering public health, safety or the environment in the second degree.

A person is guilty of endangering public health, safety or the environment in the second degree when:

1. He knowingly engages in conduct which causes the release of a substance hazardous to public health, safety or the environment and such release causes physical injury to any person who is not a participant in the crime; or

2. He knowingly engages in conduct which causes the release of a substance acutely hazardous to public health, safety or the environment or the release of a substance which at the time of the conduct he knows

to meet any of the criteria set forth in paragraph (b) of subdivision one of section 37-0103 of this chapter; or

3. He knowingly engages in conduct which causes the release of more than one thousand five hundred gallons or fifteen thousand pounds, whichever is less, of an aggregate weight or volume of a substance hazardous to public health, safety or the environment; or

4. He recklessly engages in conduct which causes the release of a substance acutely hazardous to public health, safety or the environment and such release causes physical injury to any person who is not a participant in the crime; or

5. He knowingly engages in conduct which causes the release of more than one hundred gallons or one thousand pounds, whichever is less, of an aggregate weight or volume of a substance hazardous to public health, safety or the environment and such substance enters water; or

6. He or she knowingly or recklessly engages in conduct which causes the release of a substance hazardous to public health, safety or the environment and such substance enters a primary water supply; or

7. With intent to dispose of construction and demolition debris, he or she intentionally engages in conduct that causes the unlawful disposal or release of either seventy cubic yards or more, or one hundred forty thousand pounds or more, of construction and demolition debris, as defined in section 71-2702 of this title; or

8. With intent to dispose of a hazardous substance on the property of another he or she intentionally engages in conduct that causes the unlawful disposal or release of a hazardous substance; or

9. He or she recklessly disposes of any acutely hazardous substance on any property.

Endangering public health, safety or the environment in the second degree is a class D felony.

§ 71-2714. Endangering public health, safety or the environment in the first degree.

A person is guilty of endangering public health, safety or the environment in the first degree when:

1. He intentionally engages in conduct which causes the release of a substance acutely hazardous to public health, safety or the environment or the release of a substance which at the time of the conduct he knows to meet any of the criteria set forth in paragraph (b) of subdivision one of section 37-0103 of this chapter when he is aware that such conduct creates a substantial risk of serious physical injury to any person who is not a participant in the crime; or

2. He or she knowingly engages in conduct which causes the release of a substance acutely hazardous to public health, safety or the environment or the release of a substance which at the time of the conduct he or she knows to meet any of the criteria set forth in paragraph (b) of subdivision one of section 37-0103 of this chapter and such release causes physical injury to any person who is not a participant in the crime;

3. With intent to dispose of an acutely hazardous substance, he or she intentionally engages in conduct that causes the unlawful disposal or release of an acutely hazardous substance on any property.

Endangering public health, safety or the environment in the first degree is a class C felony.

§ 71-2715. Unlawful dealing in hazardous wastes in the second degree.

No person shall:

1. With intent that another person possess or dispose of hazardous

wastes without authorization, solicit, request, command, importune or otherwise attempt to cause such other person to engage in such conduct; or

2. Believing it probable that he is rendering aid to a person who intends to possess or dispose of hazardous wastes without authorization, engage in conduct which provides such person with the means or opportunity for the commission thereof and which in fact aids such person to commit such act.

Unlawful dealing in hazardous waste in the second degree is a class A misdemeanor.

§ 71-2717. Unlawful dealing in hazardous wastes in the first degree.

No person shall:

1. Remove, assist in the removal, or make available for removal, more than one hundred gallons or one thousand pounds, whichever is less, of an aggregate weight or volume of hazardous wastes intending that such wastes are to be possessed or disposed of by a person who does not have authorization; or

2. Solicit, agree to receive or receive a benefit for possession or disposal of hazardous wastes intending that the possession or disposal is to be done without authorization; or

3. Offer, agree to confer, confer upon another or authorize or direct anyone to offer, agree to confer or confer upon another a benefit for possession or disposal of hazardous wastes intending that the person who is to perform such possession or disposal does not have authorization.

Unlawful dealing in hazardous waste in the first degree is a class E felony.

§ 71-2719. Presumptions.

1. Possession of fifteen hundred gallons or fifteen thousand pounds, whichever is less, of an aggregate weight or volume of hazardous wastes or substances hazardous to public health, safety or the environment, shall be presumptive evidence of knowledge on the part of the person in possession that the material is a hazardous waste or a substance hazardous to public health, safety or the environment; and

2. Possession of five gallons or fifty pounds, whichever is less, of an aggregate weight or volume of acute hazardous wastes or substances acutely hazardous to public health, safety or the environment shall be presumptive evidence of knowledge on the part of the person in possession that the material is an acute hazardous waste or a substance acutely hazardous to public health, safety or the environment.

§ 71-2720. Exemption.

1. For activities requiring a New York state or federal license, permit or certificate or which are subject to an order of the commissioner or the administrator of the federal environmental protection agency, the provisions of sections 71-2707 through 71-2714 of this chapter shall not apply to persons who possess and whose conduct is subject to and in compliance with such a valid license, permit, certificate or order or to persons whose conduct has been granted interim status pursuant to the federal solid waste disposal act as amended by the resource conservation and recovery act of 1976 (42 U.S.C. sec. 6901 et seq.) or pursuant to article 27 of this chapter or the rules and regulations promulgated thereunder.

2. In addition, no person who meets the requirements for an exemption from a New York state or federal license, permit, certificate or order shall be deemed in violation of sections 71-2707 through 71-2714 for engaging in conduct which would otherwise require such a license, permit, certificate or order.

3. No officer or employee of a municipal corporation shall be deemed in violation of sections 71-2707 through 71-2714 of this chapter if the possession or release was caused by such officer or employee pursuant to the reasonable exercise of his or her official powers, duties or functions on behalf of such corporation.

§ 71-2721. Enforcement of Article 27 and this title.

1. When a person is convicted of a crime under the provisions of this title, the sentence of the court shall be as follows:

(a) A fine, as set forth in subdivision two of this section;

(b) Following a hearing in accordance with the procedures set forth in section 71-2723 of this chapter, payment of the cost of legally disposing of the hazardous waste unlawfully possessed and restoring to its original state the area where substances were released unlawfully in violation of sections 27-0914, 71-2710, 71-2711, 71-2712, 71-2713 and 71-2714 of this chapter;

(c) Any other sentence authorized by law, including imprisonment; or

(d) Any combination of such fine, payment of the cost of disposal and restoration, and any other sentence authorized by law, including imprisonment.

2. Fines. A sentence to pay a fine shall be a sentence to pay an amount fixed by the court, not exceeding the higher of:

(a) Three hundred thousand dollars for a class C felony;

(b) Two hundred twenty-five thousand dollars for a class D felony;

(c) One hundred fifty thousand dollars for a class E felony;

(d) Thirty-seven thousand five hundred dollars for a class A misdemeanor;

(e) Fifteen thousand dollars for a class B misdemeanor; or

(f) Double the amount of the defendant's gain from the commission of the crime.

§ 71-2722. Enforcement of section 27-1701 of this chapter.

Administrative and civil sanctions. 1. Any person who knowingly or intentionally violates any of the provisions or fails to perform any duty imposed by section 27-1701 of this chapter, except the duty to accept a lead-acid battery pursuant to subdivision four of such section, shall be liable for a civil penalty not to exceed seventy-five dollars for each violation, provided that such civil penalty shall be in addition to any other penalties authorized under other state or local laws governing the illegal disposal of lead-acid batteries.

2. Any retailer or distributor who refuses to accept a lead-acid battery as required pursuant to subdivision four of section 27-1701 of this chapter shall be liable for a civil penalty not to exceed seven hundred fifty dollars.

3. Penalties under this section shall be assessed by the commissioner after a hearing or opportunity to be heard pursuant to the provisions of section 71-1709 of this article, and, in addition thereto, any person found to have violated the provisions of section 27-1701 of this chapter may by similar process be enjoined from continuing such violation. For the purposes of this section, disposal of each lead-acid battery except as authorized pursuant to subdivision three of section 27-1701 of this chapter shall constitute a separate violation.

4. In the city of New York, the provisions of title seventeen of article twenty-seven of this chapter shall be enforceable by an agency or agencies designated for such purpose by the mayor of such city, and notice of violation shall be returnable to the environmental control board of such city which shall have the power to impose civil penalties as provided in subdivisions one and two of this section. Outside the city of New York, the provisions of such title seventeen shall be enforceable by a local agency or agencies duly designated by the commissioner.

5. All civil penalties and fines collected for any violation of such title seventeen shall be paid over to the commissioner for deposit in the general fund; provided however, that all civil penalties collected for any violation of such title seventeen which have been imposed by the

environmental control board of the city of New York, or a local adjudicatory body pursuant to subdivision four of this section, shall be paid into an environmental fund of such city or locality.

§ 71-2723. Procedure for determining the amount of the cost of disposing of wastes or of restoring an area to its original state following a defendant's conviction under sections 27-0914, 71-2707, 71-2709, 71-2710, 71-2711, 71-2712, 71-2713, 71-2714, 71-2715 and 71-2717 of this chapter.

1. Order directing a hearing. In any case where the court is of the opinion that the sentence should consist of or include the amount of the cost of legally disposing of a hazardous waste when such waste is unlawfully possessed or restoring to its original state the area where a substance was unlawfully released in violation of sections 27-0914, 71-2710, 71-2711, 71-2712, 71-2713 and 71-2714 of this chapter, the court shall order a hearing to determine the amount of the cost of such disposal or restoration. For the purposes of this section, the "original state of the area" shall mean the reasonably ascertainable condition of the property immediately prior to the unlawful disposal or if impracticable to determine such condition, then it shall be the reasonable environmentally sound condition of the property. The order must be filed with the clerk of the court and must specify a date for the hearing not less than ten days after the filing of the order.

2. Notice of hearing. Upon receipt of the order, the clerk of the court must send a notice of the hearing to the defendant, his counsel and the people. Such notice must specify the time and place of the hearing and the fact that the purpose thereof is to determine the amount of the cost of legally disposing of a hazardous waste when such waste is unlawfully possessed or restoring to its original state the area where a substance was released unlawfully in violation of sections 27-0914, 71-2710, 71-2711, 71-2712, 71-2713 and 71-2714 of this chapter.

3. Hearing. When the defendant appears for the hearing the court must ask him whether he wishes to make any statement or offer any evidence

with respect to the amount of the cost of legally disposing of the hazardous waste when such waste is unlawfully possessed or restoring to its original state the area where a substance was released unlawfully in violation of sections 27-0914, 71-2710, 71-2711, 71-2712, 71-2713 and 71-2714 of this chapter.

4. Burden and standard of proof; evidence. At any hearing held pursuant to this section the burden of proof rests upon the people. For the purpose of any hearing held pursuant to this section, a finding:

(a) as to the amount of the cost of legally disposing of the hazardous waste when such waste is unlawfully possessed;

(b) as to the amount of the cost of legally restoring to its original state the area where the substance was released unlawfully in violation of sections 27-0914, 71-2710, 71-2711, 71-2712, 71-2713 and 71-2714 of this chapter must be based upon a preponderance of the evidence. The defendant shall be permitted to rebut any evidence offered by the people.

5. Conclusion of hearing. At any time during the pendency of a hearing pursuant to this section the court may, in its discretion, terminate the hearing without making any finding, provided the court states on the record its reasons for the termination. In all other cases the court shall enter its findings and judgment upon the record at the conclusion of the hearing.

6. Judgment. (a) The judgment may require the defendant to pay an amount for the disposal of hazardous wastes or the restoration of the property or to perform duties of disposal or restoration or to perform both.

(b) When the court orders the defendant to pay an amount for the disposal of hazardous wastes or the restoration of the property, the provisions of article four hundred twenty of the criminal procedure law shall govern the collection of the amount which shall be paid to the commissioner for deposit to the credit of the hazardous waste remedial fund established by section ninety-seven-b of the state finance law.

(c) Where the court orders the defendant to perform duties of the disposal of hazardous wastes or the restoration to the property the

court may authorize the department to supervise and report to it on the conduct of such duties; provided, however, that, section eight of the court of claims act or any other provision of law to the contrary notwithstanding, the state shall be immune from liability and action with respect to any act or omission done in the exercise of the department's authority as so conferred by the court; and provided further that this subdivision shall not limit any liability which may otherwise exist for unlawful, willful or malicious acts or omissions on the part of the state, state agencies, or their officers, employees or agents.

(d) In order to most likely assure the disposal of the hazardous wastes or the restoration of the property, where there are two or more defendants the court may apportion the costs or assign the performance duties of disposal or restoration, or both, between or among the defendants as the interests of justice may appear to the court.

§ 71-2724. Enforcement of title 21 of article 27.

1. Any person who knowingly or intentionally violates any provision of or fails to perform any duty pursuant to title twenty-one of article twenty-seven of this chapter, except subdivision one of section 27-2105 of this chapter, shall upon the first finding of such a violation be liable for a civil penalty not to exceed one hundred dollars. Any person convicted of a second or subsequent violation shall be liable for a civil penalty not to exceed five hundred dollars for each violation.

2. Any person who knowingly or intentionally violates or fails to perform any duty imposed by subdivision one of section 27-2105 of this chapter shall upon the first finding of such a violation be provided with educational materials describing the requirements for mercury disposal and the effects of improper mercury disposal, and be warned that future violations shall result in the imposition of a fine. Any person convicted of a second violation shall be liable for a civil penalty not to exceed fifty dollars. Any person convicted of a third violation shall be liable for a civil penalty not to exceed seventy-five dollars. Any person convicted of a fourth or subsequent violation shall

be liable for a civil penalty not to exceed one hundred dollars for each violation.

3. Penalties under this section shall be assessed by the commissioner after a hearing or opportunity to be heard pursuant to the provisions of section 71-1709 of this article, and, in addition thereto, any person found to have violated title twenty-one of article twenty-seven of this chapter may by similar process be enjoined from continuing such violation.

4. All civil penalties and fines collected for any violation of title twenty-one of article twenty-seven of this chapter shall be paid over to the commissioner for deposit in the environmental protection fund established by section ninety-two-s of the state finance law.

§ 71-2725. Disposition of penalties and fines.

1. a. All penalties and fines accumulated prior to April first, nineteen hundred eighty-eight, pursuant to sections 71-2705, 71-2721 and 71-2723 of this title shall be paid over to the commissioner for deposit to the credit of the hazardous waste remedial fund established by section ninety-seven-b of the state finance law.

b. All penalties and fines collected pursuant to sections 71-2705, 71-2721 and 71-2723 of this title shall be paid into the general fund to the credit of the state purposes account.

2. All moneys collected in any action brought on behalf of the state for damage resulting from improper or unlawful dissemination or disposal of hazardous wastes shall be paid over to the commissioner for deposit to the credit of the hazardous waste remedial fund established by section ninety-seven-b of the state finance law.

§ 71-2726. Payment of rewards for aid in apprehension and conviction of persons guilty of felony or misdemeanor.

The commissioner is authorized to offer and pay rewards of not more than twenty-five thousand dollars for information which leads to the detection, arrest and conviction of a person guilty of felony or misdemeanor pursuant to the provisions of this title; provided, however, that no police officer, as that term is defined under subdivision thirty-four of section 1.20 of the criminal procedure law, peace officer, as that term is defined in section 2.10 of the criminal procedure law, or any other authorized law enforcement officer or official shall be entitled, directly or indirectly, to collect or receive any such reward or part thereof.

§ 71-2727. Enforcement of articles 27 and 71 of this chapter.

1. The commissioner, after investigation, notice and an opportunity to be heard, may issue, modify and revoke orders prohibiting violations of any of the provisions of article 27 or 71 or of any rule or regulation promulgated pursuant thereto and requiring the taking of such remedial measures as may be necessary or appropriate.

2. The attorney general, on his own initiative, or at the request of the commissioner, may initiate any appropriate action or proceeding to enforce any provision of article 27 or 71 or any rule or regulation promulgated pursuant thereto and any order issued or penalty assessed pursuant to this title.

3. a. The commissioner, after investigation, notice and an opportunity to be heard, may issue, modify and revoke orders requiring corrective action, including corrective action beyond the facility boundary where necessary to protect human health and the environment, for all releases of hazardous waste or constituents from any solid waste management unit at any treatment, storage or disposal facility which is either permitted or seeking a permit under title 7 or 9 of article 27 of this chapter, regardless of the time at which waste was placed in such unit.

b. Whenever on the basis of any information the commissioner

determines that there is or has been a release of hazardous waste or constituents into the environment from a facility which has or has had interim status according to regulations adopted pursuant to title 7 or 9 of article 27 of this chapter but which has not received a final status permit pursuant to such regulations, the commissioner may issue an order requiring corrective action or such other response measures as he deems necessary to protect human health or the environment.

§ 71-2728. Enforcement of title 27 of article 27 of this chapter.

1. Any person who knowingly or intentionally violates any provision of or fails to perform any duty imposed pursuant to title 27 of article 27 of this chapter shall upon the first finding of such a violation be provided with a warning that future violations shall result in the imposition of a fine. Any person convicted of a second violation shall be liable for a civil penalty not to exceed one hundred dollars. Any person convicted of a third or subsequent violation shall be liable for a civil penalty not to exceed five hundred dollars.

2. Penalties under this section shall be assessed by the commissioner after a hearing or opportunity to be heard pursuant to the provisions of section 71-1709 of this article and, in addition thereto, any person found to have violated title 27 of article 27 of this chapter may by similar process be enjoined from continuing such violation.

3. All civil penalties and fines collected for any violation of title 27 of article 27 of this chapter shall be paid over to the commissioner for deposit in the environmental protection fund established by section ninety-two-s of the state finance law.

§ 71-2729. Enforcement of title 26 of article 27 of this chapter.

1. a. Any consumer, as defined in title twenty-six of article twenty-seven of this chapter, who violates any provision of, or fails to perform any duty imposed by, section 27-2611 of this chapter, shall be

liable for a civil penalty not to exceed one hundred dollars for each violation.

b. Any person, except a consumer, manufacturer, or an owner or operator of an electronic waste collection site, electronic waste consolidation facility, or electronic waste recycling facility as these terms are defined in title twenty-six of article twenty-seven of this chapter, who violates any provision, or fails to perform any duty imposed by section 27-2611 of this chapter, shall be liable for a civil penalty not to exceed two hundred fifty dollars for each violation.

c. Any manufacturer, or any person operating an electronic waste collection site, an electronic waste consolidation facility, or an electronic waste recycling facility as those terms are defined in title twenty-six of article twenty-seven of this chapter, who:

i. fails to submit any report, registration, fee, or surcharge to the department as required by title twenty-six of article twenty-seven of this chapter shall be liable for a civil penalty not to exceed one thousand dollars for each day such report, registration, fee, or surcharge is not submitted; and

ii. violates any other provision of title twenty-six of article twenty-seven of this chapter or fails to perform any duty imposed by such title, except for subdivision four of section 27-2603 of this chapter, shall be liable for a civil penalty for each violation not to exceed one thousand dollars for the first violation, two thousand five hundred dollars for the second violation and five thousand dollars for the third and subsequent violations of this title within a twelve-month period.

d. Any retailer, as defined by section 27-2601 of this chapter, who violates any provision of title twenty-six of article twenty-seven of this chapter or fails to perform any duty imposed by such title, shall be liable for a civil penalty for each violation not to exceed two hundred fifty dollars for the first violation, five hundred dollars for the second violation and one thousand dollars for the third and

subsequent violations of this title in a twelve-month period.

e. Civil penalties under this section shall be assessed by the commissioner after a hearing or opportunity to be heard pursuant to the provisions of section 71-1709 of this article, or by the court in any action or proceeding pursuant to this section, and, in addition thereto, such person may by similar process be enjoined from continuing such violation.

2. All penalties collected pursuant to this section shall be paid over to the commissioner for deposit to the environmental protection fund established pursuant to section ninety-two-s of the state finance law.

§ 71-2730. Enforcement of title 30 of article 27 of this chapter.

1. Any person who shall violate section 27-3003 of this chapter shall be liable to the state of New York for a civil penalty of not more than two hundred fifty dollars for the first violation, not more than five hundred dollars for the second violation in the same calendar year, and not more than one thousand dollars for the third and each subsequent violation in the same calendar year. A hearing or opportunity to be heard shall be provided prior to the assessment of any civil penalty.

2. (a) The department, the department of agriculture and markets, the department of health, and the attorney general are hereby authorized to enforce the provisions of section 27-3003 of this chapter.

(b) The provisions of section 27-3003 of this chapter may also be enforced by a county and the local legislative body thereof may adopt local laws, ordinances or regulations consistent with this title providing for the enforcement of such provisions. Provided that a violation of this title may not be enforced by both the state and a county, and provided further that any county that has filed a written declaration pursuant to subdivision two of section 27-3007 of this title shall not enforce the provisions of this title.

3. Any fines that are collected by the state during proceedings by the

state to enforce the provisions of section 27-3003 of this chapter shall be paid into the environmental protection fund established pursuant to section ninety-two-s of the finance law.

* 4. Any fines that are collected by a county during proceedings by the county to enforce the provisions of section 27-3003 of this title within the county shall be retained by the county.

* NB Repealed January 1, 2030

TITLE 28

ENFORCEMENT OF ARTICLE 30

Section 71-2801. Applicability of title.

71-2803. Penalties.

71-2805. Attorney general enforcement.

§ 71-2801. Applicability of title.

In addition to the provisions of sections 71-0101 and 71-0301 of this article, the provisions of this title shall be applicable to the enforcement of article 30 of this chapter and to this title.

§ 71-2803. Penalties.

Any person who violates section 30-0103 of this chapter shall be liable for a civil penalty not to exceed thirty-seven thousand five hundred dollars for the first day of the violation, not to exceed seventy-five thousand dollars for the second day of the violation, and not to exceed one hundred fifty thousand dollars per violation thereafter. For purposes of this section, each day in which a violation occurs shall be considered a separate violation.

§ 71-2805. Attorney general enforcement.

The penalties provided by section 71-2803 of this title shall be

recoverable in an action brought by the attorney general.

TITLE 29 - ENFORCEMENT OF ARTICLE 33

Section 71-2901. Applicability of this title.

71-2903. Investigations.

71-2905. Immunity of witnesses.

71-2907. Sanctions.

71-2909. Aiders and abettors.

71-2911. Injunction against violations.

71-2913. Act of officer or agent deemed act of principal.

71-2915. Disposal of fines and moneys recovered.

§ 71-2901. Applicability of this title.

This title shall apply to the enforcement of article 33 of this chapter.

§ 71-2903. Investigations.

1. The commissioner, or any officer of the department when authorized by the commissioner, may investigate and report as to all matters within or pertaining to the powers and jurisdiction of the department for the purpose of carrying into effect the provisions of article 33 of this chapter or this title and the rules of the department made pursuant thereto.

2. To aid in the administration of article 33, the commissioner or any person designated by him may issue subpoenas in his name requiring the attendance and giving of testimony by witnesses and the production of books, papers and other evidence for any hearing, proceeding or investigation conducted or to be conducted by or before the department. Service of such a subpoena, enforcement of obedience thereto, and punishment for disobedience thereof shall be had as and in the manner provided by the civil practice law and rules relating to enforcement of

any subpoena issued by a board or committee except that in the case of hearings, proceedings, or investigations before or conducted by the department neither any person certified to apply pesticides nor the holder of a business registration issued pursuant to article 33, nor an employee of such registration holder or, nor an officer or stockholder in a registered corporation, when required to attend as a witness, shall be entitled to any subpoena fee or mileage. Any member of the department or any person who may be designated hereunder by the department to hold hearings may administer oaths to witnesses. The department also may provide for the taking of depositions of witnesses for the purpose of any such hearing. In such case, such officer, employee or other person may administer oaths to the witnesses whose depositions are to be taken. Each deposition shall be reduced to writing and subscribed by the deponent.

§ 71-2905. Immunity of witnesses.

In any investigation, hearing or inquiry, conducted pursuant to article 33 of this chapter or this title or the rules of the department made pursuant thereto, the commissioner, or his deputy or other officer presiding at such investigation, hearing or inquiry, may confer immunity in accordance with the provisions of section 50.20 of the criminal procedure law.

§ 71-2907. Sanctions.

1. Administrative sanctions. Except as otherwise provided in this subdivision, any person who violates any provision of article 33 of this chapter or any rule, regulation or order issued thereunder or commits any offense described in section 33-1301 of this chapter shall be liable to the people of the state for a civil penalty not to exceed five thousand dollars for a first violation, and not to exceed ten thousand dollars for a subsequent offense, to be assessed by the commissioner after a hearing or opportunity to be heard. Notwithstanding any provision of law to the contrary, an owner or owner's agent of a

multiple dwelling or owner, owner's agent or a person in a position of authority for all other types of premises, as such terms are defined in paragraph d of subdivision five of section 33-0905 of this chapter, who violates any provision of a local law adopted pursuant to subdivision one of section 33-1004 of this chapter relating to paragraph b of such subdivision, and a person, who violates any provision of a local law adopted pursuant to subdivision one of section 33-1004 of this chapter relating to paragraph c of such subdivision, and a person who violates the provisions of subdivision three of section three hundred ninety-c of the social services law shall, for a first such violation, in lieu of a penalty, be issued a written warning and shall also be issued educational materials pursuant to subdivision two of section 33-1005 of this chapter. Such person shall, however, for a second violation, be liable to the people of the state for a civil penalty not to exceed one hundred dollars, and not to exceed two hundred fifty dollars for any subsequent violation, such penalties to be assessed by the commissioner after a hearing or opportunity to be heard.

Notwithstanding any provision of law to the contrary, any person who violates the provisions of a local law adopted pursuant to subdivision one of section 33-1004 of this chapter relating to paragraph a of such subdivision, shall be issued a warning for the first violation and shall be provided seven days to correct such violation; and shall be liable to the people of the state for a civil penalty not to exceed one hundred dollars for a second violation, and not to exceed two hundred fifty dollars for a subsequent violation, to be assessed by the commissioner after a hearing or opportunity to be heard. The commissioner, acting by the attorney general, may bring suit for collection of such assessed civil penalty in any court of competent jurisdiction. Such civil penalty may be released or compromised by the commissioner before the matter has been referred to the attorney general; and where such matter has been referred to the attorney general, any such penalty may be released or compromised and any action commenced to recover the same may be settled and discontinued by the attorney general with the consent of the commissioner. Any civil penalty assessed by the commissioner under this subdivision shall be reviewable in a proceeding under article 78 of the civil practice law and rules.

2. Civil sanctions. In lieu of seeking administrative sanctions, the commissioner may refer any violation described in subdivision 1 of this section to the attorney general who shall be empowered to bring a civil suit to seek any of the sanctions described in subdivision 1 of this section. Any such sanctions imposed may be released or compromised or the action may be settled and discontinued by the attorney general with the consent of the commissioner.

3. Criminal sanctions. Any person who, having the culpable mental states defined in subdivision one or two of section 15.05 or in section 20.20 of the penal law, violates any provision of article 33 of this chapter or any rule, regulation thereunder or commits any offense described in section 33-1301 of this chapter, except an offense relating to the application of a general use pesticide shall be guilty of a misdemeanor and, upon conviction thereof, shall be punished by a fine not to exceed five thousand dollars for each day during which such violation continues or by imprisonment for a term of not more than one year, or by both such fine and imprisonment. If the conviction is for a subsequent offense committed after a first conviction of such person under this subdivision, punishment shall be by a fine not to exceed ten thousand dollars for each day during which such violation continues or by imprisonment for a term of not more than one year, or by both such fine and imprisonment. When a violation consists of the manufacture or production of any prohibited article, each day during which or any part of which such manufacture or production is carried on or continued, shall be deemed a separate violation. Any person who violates any provision of article 33 of this chapter or any rule or regulation thereunder or commits any offense described in section 33-1301 of this chapter relating to the use of a general use pesticide shall be guilty of a violation and, upon conviction thereof, shall be punished by a fine not to exceed twenty-five hundred dollars. If the conviction is for a subsequent offense committed after the first such conviction of such person under this subdivision, punishment shall be by a fine not to exceed five thousand dollars. Prosecution hereunder may be conducted by either the attorney general or the district attorney consistent with section 71-0403 of this article. With respect to violations of section

33-1004 of this chapter, penalties imposed pursuant to this subdivision may be assessed only against a person providing a commercial lawn application.

4. When a violation consists of the sale, or the offering or exposing for sale or exchange of any prohibited article or substance, the sale of each one of several packages shall constitute a separate violation, and each day on which any such article or substance is offered or exposed for sale or exchange shall constitute a separate violation. When the use of any such article or substance is prohibited, each day during which or any part of which such article or substance is so used or furnished for use, shall constitute a separate violation, and the furnishing of the same for use to each person to whom the same may be furnished shall constitute a separate violation. When the storage of any article is prohibited beyond a certain period, each day during which or any part of which any article is so stored beyond the period provided for by article 33 of this chapter or this title shall constitute a separate violation.

5. This section shall not affect the rights of any other person seeking damages arising out of a violation.

§ 71-2909. Aiders and abettors.

Any person knowingly aiding or abetting any other person in the violation of any provision of article 33 of this chapter or any rule, regulation, or order of the department made pursuant thereto shall be subject to the same punishment and penalty as that prescribed by this title for the violation by such other person.

§ 71-2911. Injunction against violations.

Whenever it appears that any person is violating or threatening to violate any provision of article 33 of this chapter or any rule, regulation or order issued thereunder or is committing any offense described in section 33-1301 of this chapter, the department, acting by

the attorney general, may bring suit against such person in any court of competent jurisdiction to restrain such person from continuing such violation or from carrying out the threat of violation. In any such suit, the court shall have jurisdiction to grant to the department without bond or other undertaking, such prohibitory or mandatory injunctions as the facts may warrant, including temporary restraining orders or preliminary injunctions.

§ 71-2913. Act of officer or agent deemed act of principal.

In construing and enforcing the provisions of article 33 of this chapter or this title relating to penalties, the act of a director, officer, agent or other person acting for or employed by a person, association or corporation subject to the provisions of article 33 of this chapter or this title and acting within the scope of his employment, shall be deemed the act of such person, association or corporation.

§ 71-2915. Disposal of fines and moneys recovered.

Except as otherwise provided in article 33 of this chapter or this title, all moneys recovered, either as fines, penalties, forfeitures or otherwise, for the violation of any of the provisions of article 33 of this chapter or this title, or of the rules of the department, and all bail forfeited by persons charged with such violations, shall be the property of the state. Moneys so recovered by town justices shall be paid to the state comptroller in accordance with the provisions of section 27 of the town law and moneys so recovered by village justices to the state comptroller in accordance with the provisions of section 4-410 of the village law. The same disposal shall be made of all moneys recovered upon any bond given by any officer by virtue of the provisions of article 33 of this chapter or this title. The comptroller shall deposit all such moneys into the general fund to the credit of the state purposes account.

TITLE 31

ENFORCEMENT OF ARTICLE 35

Section 71-3101. Applicability of this title.

71-3103. Enforcement of article 35.

§ 71-3101. Applicability of this title.

In addition to the provisions of sections 71-0101 and 71-0301 the provisions of this title shall apply to the enforcement of article 35 of this chapter.

§ 71-3103. Enforcement of article 35.

Any person who violates any of the provisions of, or who fails to perform any duties imposed by article 35 or any regulation promulgated by the commissioner thereunder, shall be liable to a civil penalty of not more than twenty-five hundred dollars for each such violation and an additional penalty of not more than five hundred dollars for each day during which such violation continues, and, in addition thereto, such person may be enjoined from continuing such violation. Penalties and injunctive relief provided herein shall be recoverable in an action brought by the Attorney General at the request and in the name of the commissioner.

TITLE 33

ENFORCEMENT OF ARTICLE 43

Section 71-3301. Applicability of this title.

71-3303. Civil and administrative sanctions.

71-3305. Administrative procedures.

71-3307. Criminal sanctions.

§ 71-3301. Applicability of this title.

This title shall apply to the enforcement of article forty-three of this chapter. In addition to the provisions contained herein, the provisions of sections 71-0101 and 71-0301 and titles two and five of this article shall apply to enforcement of article forty-three of this chapter; provided, however, whenever such sections reference the department or commissioner, such references shall be deemed to be references to the Lake George park commission for the purposes of this article.

§ 71-3303. Civil and administrative sanctions.

1. Any person who violates any provision of, or fails to perform any duty imposed by article forty-three of this chapter or any rule or regulation promulgated pursuant thereto, or any term or condition of any certificate or permit issued pursuant thereto, or any final determination or order of the Lake George park commission made pursuant to article forty-three of this chapter shall be liable for a civil penalty not to exceed five hundred dollars for each such violation and an additional penalty of five hundred dollars for each day during which such violation continues, to be assessed by the Lake George park commission after an opportunity to be heard, or by the court in any action or proceeding initiated by the attorney general in the name of the Lake George park commission. In addition thereto, such person may, by similar process, be enjoined from continuing such violation, and any permit or certificate issued to such person may be revoked or suspended, or a pending renewal application denied based upon such violation.

2. Such civil penalty may be released or compromised by the Lake George park commission before the matter has been referred to the attorney general; and, where such matter has been referred to the attorney general, any such penalty may be released or compromised and any action commenced to recover the same may be settled and discontinued by the attorney general with the consent of the Lake George park commission.

§ 71-3305. Administrative procedures.

1. In any proceeding initiated by the Lake George park commission pursuant to this title, the commission or any person designated by the commission for this purpose, may issue subpoenas and administer oaths in connection with any hearing or investigation under or pursuant to the provisions of this chapter, and it shall be the duty of the Lake George park commission and any persons designated by it for such purpose to issue such subpoenas at the request of and on behalf of any respondent.

2. The Lake George park commission and those persons designated by it shall not be bound by the laws of evidence in the conduct of hearing proceedings, but the determination shall be founded upon sufficient legal evidence to sustain it.

3. All proceedings where the administrative penalties sought by the Lake George park commission exceeds five thousand dollars, shall be referred to the commissioner for processing in accordance with the procedures specified in section 71-1709 of this chapter, except that, following the processing of such proceedings, the Lake George park commission shall make appropriate determinations and issue an order in accordance therewith in lieu of such action by the commissioner. All proceedings where the administrative penalties sought are less than or equal to five thousand dollars, may either be referred to the commissioner as provided herein, or the Lake George park commission may appoint a hearing officer who must be an attorney admitted to practice law in the state of New York, who shall preside over such hearing and report to the Lake George park commission regarding the hearing. The commission shall establish by rules and regulations regarding qualifications of such hearing officers and appointment procedures, including per diem fees not to exceed two hundred fifty dollars.

§ 71-3307. Criminal sanctions.

Any person who, having any of the culpable mental states defined in

section 15.05 of the penal law, shall violate any of the provisions of or who fails to perform any duty imposed by article forty-three of this chapter or any rules or regulations promulgated thereto, or any final determination or order of the Lake George park commission shall be guilty of a violation, and, upon conviction thereof, shall be punished by a fine not to exceed five hundred dollars for each violation and five hundred dollars for each day such violation shall continue.

TITLE 35

MISCELLANEOUS ENFORCEMENT PROVISIONS

Section 71-3501. Putting noisome or unwholesome substances or maintaining noisome business on or near highway.

71-3503. Throwing gas tar or refuse into public waters.

§ 71-3501. Putting noisome or unwholesome substances or maintaining noisome business on or near highway.

A person, who deposits, leaves or keeps, on or near a highway or route of public travel, either on the land or on the water, any noisome or unwholesome substance, or establishes, maintains or carries on, upon or near a public highway or route of public travel, either on the land or on the water, any business, trade or manufacture which is noisome or detrimental to public health, is guilty of a misdemeanor, punishable by a fine of not less than one hundred dollars, or by imprisonment not less than three nor more than six months, or both.

§ 71-3503. Throwing gas tar or refuse into public waters.

A person, who throws or deposits gas tar, or the refuse of a gas house or gas factory, or offal, refuse, or any other noxious, offensive, or poisonous substance into any public waters, or into any sewer or stream running or entering into such public waters, is guilty of a misdemeanor.

TITLE 36

ENVIRONMENTAL EASEMENTS

Section 71-3601. Declaration of policy and statement of purpose.

71-3603. Definitions.

71-3605. Environmental easements; certain common law rules not applicable.

71-3607. Coordination with local governments.

71-3609. Scope of this title.

71-3611. Severability.

§ 71-3601. Declaration of policy and statement of purpose.

The legislature hereby finds and declares that contaminated site remedial programs are an important and necessary component of the state's policy of restoring and revitalizing real property located throughout New York state. The legislature further finds that when an environmental remediation project leaves residual contamination at levels that have been determined to be safe for a specific use, but not all uses, or includes engineered structures that must be maintained or protected against damage to be effective, it is necessary to provide an effective and enforceable means of ensuring the performance of maintenance, monitoring or operation requirements, and of ensuring the potential restriction of future uses of the land, including restrictions on drilling for or pumping groundwater for as long as any residual contamination remains hazardous. The legislature declares, therefore, that it is in the public interest to create environmental easements because such easements are necessary for the protection of human health and the environment and to achieve the requirements for remediation established at contaminated sites.

§ 71-3603. Definitions.

When used in this title:

1. "Affected local government" shall mean every municipality in which

land subject to an environmental easement is located.

2. "Environmental easement" shall mean an interest in real property, created under and subject to the provisions of this title which contains a use restriction and/or a prohibition on the use of land in a manner inconsistent with engineering controls; provided that no such easement shall be acquired or held by the state which is subject to the provisions of article fourteen of the constitution.

§ 71-3605. Environmental easements; certain common law rules not applicable.

1. An environmental easement shall be granted by the title owners of the relevant real estate only by an instrument, that complies with the requirements of section 5-703 of the general obligations law.

2. The title owners shall furnish to the department abstracts of title and other documents sufficient to enable the department to determine that the easements shall be enforceable. An environmental easement shall be in a form prescribed by the department. An environmental easement shall describe the property encumbered by the easement by adequate legal description or by reference to a recorded map showing its boundaries and bearing the seal and signature of a licensed land surveyor or, if the easement encumbers the entire property described in a deed of record, the easement may incorporate by reference the description in such deed, otherwise it shall refer to the liber and page of the deed or deeds of the record owner or owners of the real property burdened by the environmental easement. An environmental easement shall:

- (a) name the state, acting through the department, as grantee;
- (b) contain a complete description of any use restrictions and/or engineering control to which the real property is subject;
- (c) run with the land, binding the owner of the land and the owner's successors and assigns;
- (d) include an acknowledgment by the commissioner of acceptance of the easement by the department; and
- (e) include an agreement to incorporate, either in full or by

reference, the environmental easement in any leases, licenses, or other instruments granting a right to use the property that may be affected by such easement.

3. Until such time as the environmental easement is extinguished, the property deed and all subsequent instruments of conveyance relating to the subject property shall state in at least fifteen-point bold-faced type: "This property is subject to an environmental easement held by the New York state department of environmental conservation pursuant to title 36 of article 71 of the environmental conservation law."

4. An environmental easement granted pursuant to this title shall be enforceable in perpetuity. After the recording of the easement, each instrument transferring an interest in the area affected by the easement shall include a specific reference to the recorded easement.

5. An environmental easement granted pursuant to this section may be extinguished or amended only by a release or amendment of the easement executed by the commissioner and filed with the office of the recording officer for the county or counties where the land is situated in the manner prescribed by article nine of the real property law.

6. For any person who intentionally violates an environmental easement the department may revoke the certificate of completion provided by section 27-1419 of this chapter as to the relevant real estate.

7. An environmental easement shall be held only by the state, except that the state shall not be authorized or empowered to acquire or hold any environmental easement which is subject to the provisions of article fourteen of the constitution.

8. An environmental easement shall be duly recorded and indexed as such in the office of the recording officer for the county or counties where the land is situate in the manner prescribed by article nine of the real property law. The property deed and all subsequent instruments of conveyance relating to the property encumbered by the easement shall reference, by book and page number, the environmental easement. Such

deed and instrument shall also specify that the eligible property is subject to the restrictions contained in such easement. An instrument for the purpose of creating, conveying, modifying, or terminating an environmental easement shall not be effective unless recorded.

9. The department shall include a copy of each environmental easement in the database created pursuant to section 27-1415 of this chapter and make such database readily searchable.

10. An environmental easement may be enforced in law or equity by its grantor, by the state, or any affected local government as defined in section 71-3603 of this title. Such easement is enforceable against the owner of the burdened property, any lessees, and any person using the land. Enforcement shall not be defeated because of any subsequent adverse possession, laches, estoppel, reversion or waiver. No general law of the state which operates to defeat the enforcement of any interest in real property shall operate to defeat the enforcement of any environmental easement unless such general law expressly states the intent to defeat the enforcement of such easement or provides for the exercise of the power of eminent domain. It is not a defense in any action to enforce an environmental easement that:

- (a) it is not appurtenant to an interest in real property;
- (b) it is not of a character that has been recognized traditionally at common law;
- (c) it imposes a negative burden;
- (d) it imposes affirmative obligations upon the owner of any interest in the burdened property;
- (e) the benefit does not touch or concern real property;
- (f) there is no privity of estate or of contract; or
- (g) it imposes an unreasonable restraint on alienation.

11. Agents, employees, or other representatives of the state may enter and inspect the property burdened by an environmental easement in a reasonable manner and at reasonable times to assure compliance with the restriction.

12. The department may promulgate regulations establishing standards

and procedures for environmental easements.

§ 71-3607. Coordination with local governments.

1. Whenever the department is granted an environmental easement, it shall provide each affected local government with a copy of such easement and shall also provide a copy of any documents modifying or terminating such environmental easement.

2. Whenever an affected local government receives an application for a building permit or any other application affecting land use or development of land that is subject to an environmental easement and that may relate to or impact such easement, the affected local government shall notify the department and refer such application to the department. The department shall evaluate whether the application is consistent with the environmental easement and shall notify the affected local government of its determination in a timely fashion, considering the time frame for the local government's review of the application. The affected local government shall not approve the application until it receives approval from the department.

§ 71-3609. Scope of this title.

This title shall not affect any interests or rights in real property which are not environmental easements, and shall not affect the rights of owners to convey any interests in real property which they could now create under existing law without reference to the terms of this title. Nothing in this title shall diminish the powers granted by any other law to acquire interests or rights in real property by purchase, gift, eminent domain, or otherwise and to use the same for public purposes.

§ 71-3611. Severability.

The provisions of this title shall be severable, and if any clause,

sentence, paragraph, subdivision, or part of this title shall be adjudged by any court of competent jurisdiction to be invalid, such judgment shall not affect, impair or invalidate the remainder thereof, but shall be confined in its operation to the clause, sentence, paragraph, subdivision, or part thereof directly involved in the controversy in which such judgment shall have been rendered; provided that if an environmental easement created pursuant to this title is determined by any court of competent jurisdiction to be land or water or an interest in land or water subject to the provisions of article fourteen of the constitution, then the authority of the state to hold or acquire such easement and the conveyance to the state of such easement shall be void ab initio.

TITLE 37

ENFORCEMENT OF ARTICLE 37

Section 71-3701. Applicability of this title.

71-3703. Enforcement of article 37.

71-3705. Enforcement of section 37-0115.

§ 71-3701. Applicability of this title.

In addition to the provisions of sections 71-0101 and 71-0301 of this article, the provisions of this title shall apply to the enforcement of article 37 of this chapter.

§ 71-3703. Enforcement of article 37.

1. Any person who violates any of the provisions of, or who fails to perform any duty imposed by section 37-0107 or any rule or regulation promulgated pursuant hereto, shall be liable for a civil penalty not to exceed two thousand five hundred dollars for each such violation and an additional penalty of not more than five hundred dollars for each day during which such violation continues, and, in addition thereto, such person may be enjoined from continuing such violation.

2. Any person who violates any of the provisions of, or who fails to perform any duty imposed by section 37-0505 or any rule or regulation promulgated pursuant hereto, shall be liable for a civil penalty not to exceed one thousand dollars for each day during which such violation continues, and in addition thereto, such person may be enjoined from continuing such violation. Such person shall for a second violation be liable to the people of the state for a civil penalty not to exceed two thousand five hundred dollars for each day during which such violation continues.

3. Any person who violates any of the provisions of, or who fails to perform any duty imposed by section 37-0705 or any rule or regulation promulgated pursuant hereto, shall be liable for a civil penalty not to exceed one thousand dollars for each day during which such violation continues, and in addition thereto, such person may be enjoined from continuing such violation. Such person shall for a second violation be liable to the people of the state for a civil penalty not to exceed two thousand five hundred dollars for each day during which such violation continues.

4. Any person who violates any of the provisions of, or who fails to perform any duty imposed by section 37-0117 or any rule or regulation promulgated pursuant hereto, shall be liable for a civil penalty not to exceed one thousand dollars for each day during which such violation continues, and in addition thereto, such person may be enjoined from continuing such violation. Such person shall for a second violation be liable to the people of the state for a civil penalty not to exceed two thousand five hundred dollars for each day during which such violation continues.

5. Any person who violates any of the provisions of or who fails to perform any duty imposed by sections 37-1003 and 37-1007 of this chapter or any rule or regulation promulgated pursuant hereto, shall be liable for a civil penalty not to exceed one thousand dollars for each day during which such violation continues, and in addition thereto, such person may be enjoined from continuing such violation. Such person shall

for a second violation be liable to the people of the state for a civil penalty not to exceed two thousand five hundred dollars for each day during which such violation continues.

6. Any person who violates any of the provisions of, or who fails to perform any duty imposed by section 37-0121 of this chapter or any rule or regulation promulgated pursuant hereto, shall be liable for a civil penalty not to exceed one thousand dollars for each day during which such violation continues, and in addition thereto, such person may be enjoined from continuing such violation. Such person shall for a second violation be liable to the people of the state for a civil penalty not to exceed two thousand five hundred dollars for each day during which such violation continues.

7. Any person who violates any of the provisions of, or who fails to perform any duty imposed by section 37-1101 of this chapter or any rule or regulation promulgated pursuant hereto, shall be liable for a civil penalty not to exceed one thousand dollars for each day during which such violation continues, and in addition thereto, such person may be enjoined from continuing such violation. Such person shall for a second violation be liable to the people of the state for a civil penalty not to exceed two thousand five hundred dollars for each day during which such violation continues.

§ 71-3705. Enforcement of section 37-0115.

1. Any person who violates any provision of or fails to perform any duty imposed by section 37-0115 of this chapter shall upon the first finding of such a violation be liable for a civil penalty not to exceed five hundred dollars for each violation. Any person convicted of a second or subsequent violation shall be liable for a civil penalty not to exceed twenty-five hundred dollars for each violation.

2. All civil penalties and fines collected for any violation of section 37-0115 of this chapter shall be paid over to the commissioner for deposit in the environmental protection fund established by section

ninety-two-s of the state finance law.

TITLE 38

ENFORCEMENT OF ARTICLE 38

Section 71-3801. Applicability of this title.

71-3803. Enforcement of article thirty-eight.

§ 71-3801. Applicability of this title.

In addition to the provisions of section 71-0101 and 71-0301 of this chapter, the provisions of this title shall apply to the enforcement of article thirty-eight of this chapter.

§ 71-3803. Enforcement of article thirty-eight.

Any person who violates any of the provisions of, or who fails to perform any duty imposed by article thirty-eight or any regulation promulgated by the commissioner thereunder, shall be liable to a civil penalty of not more than twenty-five hundred dollars for each such violation and an additional penalty of not more than five hundred dollars for each day during which such violation continues, and, in addition thereto, such person may be enjoined from continuing such violation. Penalties and injunctive relief provided herein shall be recoverable in an action brought by the attorney general acting alone or at the request of the commissioner.

TITLE 39

ENFORCEMENT OF ARTICLE 39

Section 71-3901. Applicability of this title.

71-3903. Violations; penalties.

71-3905. Enforcement.

71-3907. Warrants; seizure.

§ 71-3901. Applicability of this title.

The provisions of this title shall be applicable to the enforcement of article thirty-nine.

§ 71-3903. Violations; penalties.

1. Administrative sanctions. Any person who violates, disobeys or disregards any provision of article thirty-nine shall be liable to the people of the state for a civil penalty of not to exceed three thousand dollars for every such violation, to be assessed by the commissioner after a hearing or opportunity to be heard. The penalty may be recovered in an action brought by the commissioner in any court of competent jurisdiction. Such civil penalty may be released or comprised by the commissioner before the matter has been referred to the attorney general; and where such matter has been referred to the attorney general, any such penalty may be released or comprised and any action commenced to recover the same may be settled and discontinued by the attorney general with the consent of the commissioner. In addition, the commissioner shall have power, following a hearing, to direct the violator to cease his violation of article thirty-nine and, where appropriate, to recall any sewage system cleaners or additives sold or distributed in violation of said article. Any such order of the commissioner shall be enforceable in an action brought by the commissioner in any court of competent jurisdiction. Any civil penalty or order issued by the commissioner under this subdivision shall be reviewable in a proceeding under article seventy-eight of the civil practice law and rules commenced within thirty days of such penalty or order.

2. Criminal sanctions. Any person who knowingly violates any provision of section 39-0105 of this chapter shall, in addition to the sanctions provided in subdivision one of this section, for the first offense, be guilty of a violation punishable by a fine of not less than five hundred nor more than one thousand dollars; for a second and each subsequent

offense he shall be guilty of a misdemeanor punishable by a fine of not less than one thousand nor more than three thousand dollars or a term of imprisonment of not more than six months or both. In addition to or instead of these sanctions, any offender shall be punishable by being ordered by the court to recall any sewage system cleaners or additives sold or distributed in violation of article thirty-nine. The court shall specify a reasonable time for the completion of the recall. Each offense shall be a separate and distinct offense and, in the case of a continuing offense, each day's continuance thereof shall be deemed a separate and distinct offense.

§ 71-3905. Enforcement.

The attorney general or a district attorney, at the request of the attorney general or the commissioner, may prosecute persons who violate article thirty-nine. In addition the attorney general, on his own initiative or at the request of the commissioner, shall have the right to recover a civil penalty of not to exceed three thousand dollars for every violation of any provision of said article, and to seek equitable relief to restrain any violation or threatened violation of such article and to require the recall of any sewage system cleaners or additives sold or distributed in violation of said article.

§ 71-3907. Warrants; seizure.

Any police officer shall have authority to execute any warrant to search for and seize any sewage system cleaners or additives sold, distributed or offered or exposed for sale in violation of article thirty-nine. Such cleaners or additives shall be held pending proceedings in any court of competent jurisdiction, and upon conviction or upon the entry of a judgment restraining the sale, distribution or offer or exposure for sale of said cleaners or additives on the ground that said items were sold, distributed or exposed or offered for sale in violation of article thirty-nine, the seized items shall be forfeited and, upon forfeiture, destroyed under the supervision of the

commissioner. Where property has been seized pursuant to the provisions of this article from a person who was not convicted of an offense or subject to a restraining order, a notice of the institution of a forfeiture proceeding shall be served on that person, and the person shall be allowed to appear and shall be given an opportunity to be heard at the forfeiture proceeding.

TITLE 40

OTHER GENERAL PROVISIONS

Section 71-4001. General criminal penalty.

71-4003. General civil penalty.

§ 71-4001. General criminal penalty.

Except as otherwise specifically provided elsewhere in this chapter or in the penal law, (a) a person who violates any provision of this chapter, or any rule, regulation or order promulgated pursuant thereto, or the terms or conditions of any permit issued thereunder, shall be guilty of a violation; (b) each day on which such violation occurs shall constitute a separate violation; and (c) for each such violation the person shall be subject upon conviction to imprisonment for not more than fifteen days or to a fine of not more than nine hundred dollars, or to both such imprisonment and such fine.

§ 71-4003. General civil penalty.

Except as otherwise specifically provided elsewhere in this chapter, a person who violates any provision of this chapter, or any rule, regulation or order promulgated pursuant thereto, or the terms or conditions of any permit issued thereunder, shall be liable to a civil penalty of not more than one thousand dollars, and an additional civil penalty of not more than one thousand dollars for each day during which each such violation continues. Any civil penalty provided for by this chapter may be assessed following a hearing or opportunity to be heard.

TITLE 41

ENFORCEMENT OF ARTICLE 72

Section 71-4101. Applicability of this title.

71-4103. Enforcement of article seventy-two.

§ 71-4101. Applicability of this title.

The provisions of this title shall be applicable to the enforcement of article seventy-two.

§ 71-4103. Enforcement of article seventy-two.

Any person who violates any of the provisions of article seventy-two of this chapter or the regulations promulgated thereunder shall be liable for a civil penalty of up to one thousand dollars in addition to any amount assessed as a penalty pursuant to subdivision five of section 72-0201 of this chapter, except that any person who fails to pay fees required pursuant to section 72-0303 of this chapter shall be subject to penalty provisions pursuant to subdivision twelve of section 72-0201 of this chapter.

TITLE 43

ENFORCEMENT OF ARTICLE 40

Section 71-4301. Applicability of title.

71-4303. Violations of article forty of this chapter.

71-4305. Enforcement of article forty of this chapter.

§ 71-4301. Applicability of title.

The provisions of this title shall apply to the enforcement of article forty of this chapter.

§ 71-4303. Violations of article forty of this chapter.

1. Civil and administrative sanctions. Any person who violates any of the provisions of, or who fails to perform any duty imposed by, article forty of this chapter or any rule or regulation promulgated thereunder, or any terms or conditions of any certificate or permit issued pursuant thereto, or any final determination or order of the commissioner made pursuant to this title, shall be liable in the case of a civil penalty not to exceed twenty-five thousand dollars and an additional penalty of not more than twenty-five thousand dollars for each day during which such violation continues, to be assessed by the commissioner after an opportunity to be heard pursuant to the provisions of section 71-1709 of this article or by a court in any action or proceeding pursuant to this title, and, in addition thereto such person may by similar process be enjoined from continuing such violation. In addition, upon the provision of notice stating the grounds for its action and giving an opportunity for hearing, the commissioner may revoke, suspend or deny a certificate or a renewal of a certificate issued pursuant to article forty of this chapter. In the case of a second violation, the liability shall be for a civil penalty not to exceed fifty thousand dollars for such violation and an additional penalty not to exceed fifty thousand dollars for each day during which such violation continues.

2. Criminal sanctions. Any person who, having any of the culpable mental states defined in section 15.05 of the penal law, shall violate any of the provisions of or who fails to perform any duty imposed by article forty of this chapter or any rules or regulations promulgated pursuant thereto, or any term or condition of any certificate or permit issued pursuant thereto, or any final determination or order of the commissioner made pursuant to this title shall be guilty of a misdemeanor and, upon conviction thereof, shall for a first conviction be punished by a fine not to exceed twenty-five thousand dollars per day of violation or by imprisonment for a term of not more than one year, or by both such fine and imprisonment. If the conviction is for an offense committed after a first conviction of such person under this

subdivision, punishment shall be by a fine not to exceed fifty thousand dollars per day of violation, or by imprisonment for not more than two years or by both such fine and imprisonment.

§ 71-4305. Enforcement of article forty of this chapter.

1. The commissioner, after investigation, notice and an opportunity to be heard, may issue, modify and revoke orders prohibiting violations of any of the provisions of article forty or of any rule or regulation promulgated pursuant thereto and requiring the taking of such remedial measures as may be necessary or appropriate.

2. The attorney general, on his own initiative after consultation with the commissioner or at the request of the commissioner, may initiate any appropriate action or proceeding to enforce any provision of article forty of this chapter or any rule or regulation promulgated pursuant thereto or any order issued or penalty assessed pursuant to this title.

TITLE 44

ENFORCEMENT OF TITLE 15 of ARTICLE 27

Section 71-4400. Applicability of title.

71-4401. Definitions.

71-4402. Violations of title 15 of article 27 of this chapter.

71-4403. Unlawful possession of regulated medical waste in the second degree.

71-4404. Unlawful possession of regulated medical waste in the first degree.

71-4405. Unlawful release of regulated medical waste in the fourth degree.

71-4406. Unlawful release of regulated medical waste in the third degree.

71-4407. Unlawful release of regulated medical waste in the second degree

71-4408. Unlawful release of regulated medical waste in the first degree.

- 71-4409. Unlawful dealing in regulated medical waste.
- 71-4410. Affirmative defense.
- 71-4411. Enforcement of title 15 of article 27.
- 71-4412. Disposition of penalties and fines.

§ 71-4400. Applicability of title.

The provisions of this title shall be applicable to the enforcement of title 15 of article 27 of this chapter.

§ 71-4401. Definitions.

As used in this title, the following terms shall have the following meanings:

1. "Regulated medical waste" means regulated medical waste as defined in title 15 of article 27 of this chapter.
2. "Pound" means an avoirdupois pound.
3. "Gallon" means a unit of liquid capacity equal to two hundred thirty-one cubic inches or four quarts.
4. "Environment" means any water, water vapor, any land including land surface or subsurface, air, fish, wildlife, biota, and all other natural resources.
5. "Release" means any pumping, pouring, emitting, emptying, or leaching, directly or indirectly, of a substance so that the substance or any related constituent thereof, or any degradation product of such a substance or of a related constituent thereof, may enter the environment, or the disposal of any substance.
6. "Disposal" means the discharge, deposit, injection, dumping, spilling, leaking or placing of any substance so that such substance or

any related constituent thereof may enter the environment, or the abandonment of any substance.

7. "Abandonment" means the intentional relinquishment or forsaking of all possession or control of any substance. In any prosecution under this title, it is an affirmative defense to an allegation of abandonment that the defendant surrendered possession or control of such substance to another party who knowingly and voluntarily consented to assume such possession or control.

8. "Intentionally, knowingly, recklessly and criminal negligence" shall have the same meanings as defined in section 15.05 of the penal law.

9. "Criminal transaction" shall have the same meaning as defined in section 40.10 of the criminal procedure law.

§ 71-4402. Violations of title 15 of article 27 of this chapter.

1. Civil and administrative sanctions.

Any person who violates any of the provisions of, or who fails to perform any duty imposed by title 15 of article 27 of this chapter, or any rule or regulation promulgated pursuant thereto, or any term or condition of any certificate or permit issued pursuant thereto, or any final determination or order of the commissioner made pursuant to this title shall be liable in the case of a first violation, for a civil penalty not to exceed twenty-five thousand dollars and an additional penalty of not more than twenty-five thousand dollars for each day during which such violation continues, to be assessed by the commissioner after an opportunity to be heard pursuant to the provisions of section 71-1709 of this chapter, or by the court in any action or proceeding pursuant to section 71-2727 of this chapter, and, in addition thereto, such persons may by similar process be enjoined from continuing such violation and any permit or certificate issued to such person may be revoked or suspended or a pending renewal application denied. In the

case of a second and any further violation, the liability shall be for a civil penalty not to exceed fifty thousand dollars for each such violation and an additional penalty not to exceed fifty thousand dollars for each day during which such violation continues.

2. Criminal sanctions.

a. Any person who violates any of the provisions of or who fails to perform any duty imposed by title 15 of article 27 of this chapter or any rules and regulations promulgated pursuant thereto, or any term or condition of any certificate or permit issued pursuant thereto, or any final determination or order of the commissioner made pursuant to this title shall be guilty of a violation and, upon conviction thereof, shall be punished by a fine not to exceed five thousand dollars per day of violation, or by imprisonment for a term of not more than fifteen days, or by both such fine and imprisonment.

b. Any person who, intentionally, knowingly, or recklessly shall violate any of the provisions of or who fails to perform any duty imposed by title 15 of article 27 of this chapter or any rules and regulations promulgated pursuant thereto, or any term or condition of any certificate or permit issued pursuant thereto, or any final determination or order of the commissioner made pursuant to this title shall be guilty of a class B misdemeanor and, upon conviction thereof, shall for a first conviction be punished by a fine not to exceed fifteen thousand dollars per day of violation or by imprisonment for a term of not more than ninety days, or both such fine and imprisonment. If the conviction is for an offense committed after a first conviction of such person under this paragraph, within the preceding five years, such person shall be guilty of a class A misdemeanor and upon conviction, punishment shall be by a fine not to exceed fifty thousand dollars per day of violation, or by imprisonment for not more than one year or by both such fine and imprisonment.

§ 71-4403. Unlawful possession of regulated medical waste in the second degree.

No person shall:

1. Knowingly and intentionally possess more than twenty gallons or two hundred pounds, whichever is less, of an aggregate weight or volume of regulated medical waste at a place other than the facility at which such waste was generated; or

2. Recklessly possess more than forty gallons or four hundred pounds, whichever is less, of an aggregate weight or volume of regulated medical waste at a place other than the facility at which such waste was generated.

3. The provisions of this section shall not apply to any person for acts undertaken in compliance with the provisions of titles 3 and 15 of article 27 of this chapter or the rules, regulations, permits or orders promulgated pursuant thereto.

Unlawful possession of regulated medical waste in the second degree is a class A misdemeanor.

§ 71-4404. Unlawful possession of regulated medical waste in the first degree.

No person shall:

1. Knowingly and intentionally possess more than three hundred gallons or three thousand pounds, whichever is less, of an aggregate weight or volume of regulated medical waste at a place other than the facility at which such waste was generated; or

2. Recklessly possess more than five hundred gallons or five thousand pounds, whichever is less, of an aggregate weight or volume of regulated medical waste at a place other than the facility at which such waste was generated.

3. The provisions of this section shall not apply to any person for acts undertaken in compliance with the provisions of titles 3 and 15 of article 27 of this chapter or the rules, regulations, permits or orders promulgated pursuant thereto.

Unlawful possession of regulated medical waste in the first degree is a class E felony.

§ 71-4405. Unlawful release of regulated medical waste in the fourth degree.

A person is guilty of unlawful release of regulated medical waste in the fourth degree when such person with criminal negligence, engages in conduct which causes the release to the environment of regulated medical waste.

Unlawful release of regulated medical waste in the fourth degree is a class B misdemeanor.

§ 71-4406. Unlawful release of regulated medical waste in the third degree.

A person is guilty of unlawful release of regulated medical waste in the third degree when such person:

1. Recklessly engages in conduct which causes the release to the environment of regulated medical waste; or

2. Knowingly engages in conduct which causes the release to the environment of regulated medical waste.

Unlawful release of regulated medical waste in the third degree is a class A misdemeanor.

§ 71-4407. Unlawful release of regulated medical waste in the second degree.

A person is guilty of unlawful release of regulated medical waste in the second degree when such person:

1. Knowingly or recklessly engages in conduct which causes the release to the environment of regulated medical waste which includes any quantity of regulated medical waste which is capable at the time of transport, or at any time thereafter, of causing disease, or physical injury; or

2. Knowingly or recklessly engages in conduct constituting a single criminal transaction which causes the release to the environment of more than five hundred gallons or five thousand pounds, whichever is less, of regulated medical waste.

Unlawful release of regulated medical waste in the second degree is a class E felony.

§ 71-4408. Unlawful release of regulated medical waste in the first degree.

A person is guilty of unlawful release of regulated medical waste in the first degree when such person:

1. Knowingly engages in conduct which causes the release to the environment of regulated medical waste, which includes any quantity of regulated medical waste which is capable at the time of transport, or at any time thereafter, of causing serious physical injury or death to any person who is not a participant in the crime; or

2. Knowingly engages in conduct constituting a single criminal transaction which causes the release to the environment of more than one thousand gallons or ten thousand pounds, whichever is less, of an aggregate weight or volume of regulated medical waste.

Unlawful release of regulated medical waste in the first degree is a class D felony.

§ 71-4409. Unlawful dealing in regulated medical waste.

No person shall, with intent to cause an unlawful release of regulated medical waste as defined in section 71-4407 or 71-4408 of this article:

1. transfer, transport, repackage or convey such waste to another person, thereby causing such other person to possess, store, transport or dispose of such waste in violation of section 27-1505, 27-1507 or 27-1509 of this chapter; or

2. receive or agree to receive a benefit in exchange for possessing, storing, transporting or disposing of regulated medical waste in violation of section 27-1505, 27-1507 or 27-1509 of this chapter; or

3. confer or offer or agree to confer a benefit upon another person to induce them to possess, store, transport or dispose of regulated medical waste in violation of section 27-1505, 27-1507 or 27-1509 of this chapter.

Unlawful dealing in regulated medical waste is a class E felony.

§ 71-4410. Affirmative defense.

In any prosecution or proceeding pursuant to title 15 of article 27 it is an affirmative defense that the articles being discarded have been treated in accordance with subdivision one of section 27-1505.

§ 71-4411. Enforcement of title 15 of article 27.

1. When a person is convicted of a crime under the provisions of this

title, the sentence of the court shall be as follows:

(a) A fine, as set forth in subdivision two of this section, or in paragraph b of subdivision two of section 71-4402 of this title for the misdemeanor set forth therein;

(b) Following a hearing in accordance with the procedures set forth in section 71-2723 of this article, payment of the cost of restoring to its original state the area where regulated medical waste was released unlawfully in violation of the provisions of this article, provided, however, that references to "hazardous waste" shall be deemed to mean "regulated medical waste" for the purpose of such hearing and such determination;

(c) Any other sentence authorized by law, including imprisonment; or

(d) Any combination of such fine, payment of the cost of restoration, and any other sentence authorized by law, including imprisonment.

2. Fines. A sentence to pay a fine shall be a sentence to pay any amount fixed by the court, not exceeding the higher of:

(a) one hundred fifty thousand dollars for a class D felony;

(b) one hundred thousand dollars for a class E felony;

(c) fifty thousand dollars for a class A misdemeanor;

(d) fifteen thousand dollars for a class B misdemeanor; or

(e) double the amount of the defendant's gain from the commission of the crime.

§ 71-4412. Disposition of penalties and fines.

1. Notwithstanding any provision of law to the contrary, all penalties and fines collected pursuant to section 71-4411 of this title shall be paid over to the commissioner for deposit into the general fund to the credit of the state purposes account.

2. All moneys collected in any action brought on behalf of the state for damage resulting from improper or unlawful disposal of regulated medical waste shall be paid over to the commissioner for deposit to the credit of the environmental enforcement account.

DECLARATION OF POLICY; DEFINITIONS

- Section 72-0101. Declaration of policy.
- 72-0103. Definitions.

§ 72-0101. Declaration of policy.

The legislature of the state of New York hereby declares that comprehensive environmental regulatory management programs are essential to protect New York state's environmental resources and the public's health and welfare. It further declares that those regulated entities which use or have an impact on the state's environmental resources should bear the costs of the regulatory provisions which permit the use of these resources in a manner consistent with the environmental, economic and social needs of the state. The legislature further declares that regulatory fees are an appropriate mechanism to pay a portion of the costs of the department's regulatory functions and programs and a portion of the costs to fund the cleanup of inactive hazardous waste disposal sites and that such fees should be borne by the state's regulated entities in order to further strengthen the state's capabilities to achieve its environmental quality objectives. The legislature further declares that the department's regulatory programs and corresponding costs vary according to certain relevant technical

criteria which shall be considered in determining adjustments to fees as provided in this chapter.

§ 72-0103. Definitions.

When used in this article:

"State environmental regulatory program" means any of the regulatory or permit programs for which fees are assessed under this article.

TITLE 2

ANNUAL PROGRAM COSTS AND FEES

Section 72-0201. Fees and penalties.

72-0202. Collection of annual program fees.

72-0203. Annual report.

§ 72-0201. Fees and penalties.

1. a. Notwithstanding any general or special law to the contrary, all persons who require a permit or approval pursuant to a state environmental regulatory program, or who are subject to regulation under a state environmental regulatory program shall submit a fee as authorized under this article annually to the department, on such forms and at such times as specified by the department.

b. Notwithstanding any general or special law to the contrary, one-half of all monies collected by the department pursuant to section 72-0502 of this article shall be deposited in the hazardous waste remedial fund, created pursuant to section ninety-seven-b of the state finance law.

c. Notwithstanding any general or special law to the contrary, all monies collected by the department pursuant to subdivision twelve of this section and section 72-0303 of this article shall be deposited in the operating permit program account of the clean air fund created

pursuant to section ninety-seven-00 of the state finance law.

d. Notwithstanding any general or special law to the contrary, all monies collected by the department pursuant to title ten of this article shall be deposited in the mined land reclamation program account created pursuant to section 72-1011 of this article.

e. Notwithstanding any general or special law to the contrary, all monies collected by the department pursuant to section 72-0402 of this article shall be deposited as follows: (i) fifteen percent in the environmental protection fund established by section ninety-two-s of the state finance law not to exceed two million one hundred thousand dollars; and (ii) seventy-one percent in the industry fee transfer account of the hazardous waste remedial fund established by subdivision one of section ninety-seven-b of the state finance law.

2. All persons subject to regulation under a state environmental regulatory program including those persons holding existing permits, certificates or approvals under such programs shall be liable for fees authorized by this article on and after April first, nineteen hundred eighty-three.

3. Liability for fees authorized by this chapter for persons receiving new permits, certificates or approvals shall equal the annual fee established pursuant to this title and prorated from the date of issuance.

4. Payment of fees shall be due within thirty days of billing by the department.

5. If the amount of the fee is not paid within forty-five days of the last date prescribed under subdivision four of this section, a penalty shall be imposed on such deficiency. The amount of such penalty shall not exceed five percent of such deficiency per month and the total penalty shall not exceed twenty-five percent of the deficiency.

Notice of the determination of a penalty, and notice of the right to

appeal such determination shall be given to the person liable for the payment of the fee and any penalty due. The penalty as determined pursuant to this subdivision shall be finally and irrevocably assessed unless a hearing is requested by certified mail to the commissioner within thirty days after receiving notice of the determination of a penalty, or unless the commissioner on his own motion shall redetermine such penalty. After such hearing the commissioner shall give notice of final determination to the person against whom the fee and penalty is assessed. No such penalty as defined in this subdivision shall be assessed until after the expiration of the period in which a hearing may be requested, or after the issuance of a final determination following a hearing, whichever comes later.

6. In addition to any penalty that may be assessed pursuant to subdivision five of this section, there shall be collected interest upon the unpaid amount at the underpayment rate set by the commissioner of taxation and finance pursuant to section one thousand ninety-six of the tax law, minus four percentage points. Such interest shall accrue thirty days from the date prescribed for fee payment until payment is actually made to the department.

7. In the event that a person fails to pay any fee as finally determined, such determination to be final when all administrative and judicial appeals thereof, if any, have been completed, the department may suspend, until the fee is paid, the permit, certificate or approval for the activity which is subject to that fee.

8. The commissioner shall promulgate regulations necessary to effectuate the purposes of this article. Such regulations may also include provisions regarding hearings to resolve disputed fee and penalty determinations.

9. a. In the event a penalty or interest is collected pursuant to subdivision five or six of this section for fees due under section 72-0402, or section 72-0502 of this article, one-half of the penalty or interest shall be deposited by the department in the industry fee transfer account of the hazardous waste remedial fund.

b. In the event a penalty or interest is collected pursuant to subdivision five or six of this section for fees due under section 72-0403 of this article, such penalty or interest shall be deposited in the industry fee transfer account of the hazardous waste remedial fund established by subdivision one of section ninety-seven-b of the state finance law.

10. No portion of the fees collected pursuant to this article shall be used for any purpose if such use, under federal law, would preclude the collection of such a fee.

11. a. All fees collected pursuant to this article shall be paid into the environmental conservation special revenue fund to the credit of the environmental regulatory account, unless herein provided otherwise.

b. Moneys of such account shall include interest earnings on any account balances and shall be available for appropriation and allocation for the purposes of carrying out the provisions of this chapter.

c. The moneys of the account shall be paid out on the audit and warrant of the comptroller on vouchers certified or approved by the commissioner or his duly designated representative.

d. Notwithstanding the provisions of any general or special law, no moneys shall be available from the account until a certificate of allocation and a schedule of amounts to be available therefor shall have been issued by the director of the budget, and a copy of such certificate filed with the comptroller. Such certificate may be amended from time to time by the director of the budget and a copy of each such amendment shall be filed with the comptroller.

e. Any reference to the environmental enforcement account in any special or general law shall be deemed to be a reference to the environmental regulatory account.

12. Notwithstanding any other provision of this section, any person

who fails to pay fees required pursuant to section 72-0303 of this article shall pay a penalty of fifty per centum of the unpaid fee amount, plus interest on the unpaid fee amount computed in accordance with section 6621(a)(2) of the United States internal revenue code of 1986 (Public Law 99-514, 26 U.S.C. section 1 et seq.) from the date the fee was required to be paid.

§ 72-0202. Collection of annual program fees.

1. Bills issued for the air quality control, hazardous waste, and state pollutant discharge elimination system annual program fees due for the state fiscal year beginning April first, nineteen hundred eighty-five shall cover the period April first, nineteen hundred eighty-five through December thirty-first, nineteen hundred eighty-five. The fee for the period April first, nineteen hundred eighty-five through December thirty-first, nineteen hundred eighty-five shall be equal to three-quarters of the amount calculated in the manner prescribed by sections 72-0302, 72-0402 and 72-0602 of this article.

2. Air quality control, hazardous waste, and state pollutant discharge elimination system program fees for periods beginning after December thirty-first, nineteen hundred eighty-five shall be calculated based upon the calendar year.

3. Waste transporter program fees shall be calculated based upon the permit year.

§ 72-0203. Annual report.

Notwithstanding any other provision of law, the department shall submit, no later than January fifteenth in each year, a report to the governor, the chairmen of the senate finance committee and assembly ways and means committee, consisting of a summary and analysis of all moneys paid pursuant to this article and all penalties, fines and other sums collected or received pursuant to titles nineteen, twenty-one and

twenty-seven of article seventy-one of this chapter. The report shall also include data relating to the moneys paid pursuant to this article to the costs of regulation by permit category as defined in this article.

TITLE 3

AIR QUALITY CONTROL PROGRAM FEE

Section 72-0301. Definitions.

72-0302. State air quality control fees.

72-0303. Operating permit program fees.

§ 72-0301. Definitions.

When used in this title:

1. The "Act" shall mean the Clean Air Act, 42 U.S.C. §7401 et seq., as amended by P.L. 101-549, November 15, 1990.

2. "Actual emissions" means the emissions which were emitted to the ambient air, and shall include fugitive emissions if such emissions are considered in determining whether a source is a major air contamination source.

3. "Air contamination source" means all sources required to obtain a permit, certificate or approval pursuant to article nineteen of this chapter.

4. "Combustion installation" means one or more furnace, device, engine or turbine in which fossil fuel or wood is burned with air or oxygen and the air contaminant emissions include only those products resulting from:

a. combustion of the fuel;

b. additives or impurities in the fuel; and

c. material introduced for the purpose of altering air contaminant emissions.

A combustion installation may consist of:

(1) a single furnace exclusively connected to an air cleaning device or stack; or

(2) two or more furnaces connected to a common air cleaning device or stack.

5. "Emission point" means any conduit, chimney, duct, vent, flue, stack or other functionally equivalent opening through which regulated air contaminants are emitted to the ambient air.

6. "Fugitive emissions" means those emissions of a regulated air contaminant that could not reasonably pass through an emission point.

7. "Gasoline dispensing site" means any site where gasoline is dispensed into portable containers used to fuel any motor from any stationary storage container or containers and that is required to obtain a permit pursuant to article nineteen of this chapter.

8. "Incinerator" means any structure or furnace in which combustion takes place and type 0, 1, 2, 3 or 4 refuse, as classified in Table 1 of 6 NYCRR Appendix 2, is used as a fuel, alone or in conjunction with fossil fuel.

9. "Major air contamination source" shall have the meaning set forth in subdivision 19 of section 19-0107 of this chapter.

10. "Permitted emission" means those emissions of a regulated air contaminant which are authorized by permit to be emitted.

11. "Person" means an individual, trust, firm, joint stock company, corporation (including a government corporation), partnership, association, state, federal government and any agency thereof, municipality, commission, political subdivision of a state or any

interstate body.

12. "Potential to emit" means the maximum capacity of a stationary source to emit any regulated air contaminant under its physical and operational design. Any physical or operational limitation on the capacity of such source to emit a regulated air contaminant, including air pollution control equipment and restrictions on the hours of operation or on the type or amount of material combusted, stored or processed, shall be treated as part of its design if the limitation is enforceable by the commissioner and the administrator of the United States environmental protection agency provided, however, that physical or operational limitations enforceable by the commissioner shall be treated as part of a source's design, if the commissioner is given such authorization by the administrator.

13. "Process air contamination source" means:

a. any industrial, commercial, agricultural or other activity, operation, manufacture or treatment (except incineration of type 0, 1, 2, 3 and 4 refuse, as classified in Table 1 of 6 NYCRR Appendix 2, open burning and operation of combustion installations) in which chemical, biological or physical properties of the material or materials are changed, and which emits air contaminants to the outdoor atmosphere; or

b. any system which removes air contamination from any industrial, commercial, agricultural or other activity, operation, manufacture or treatment (except incineration of type 0, 1, 2, 3 and 4 refuse, as classified in Table 1 of 6 NYCRR Appendix 2, open burning and operation of combustion installations) and transports them from their point of generation to the outdoor atmosphere.

14. "Regulated air contaminant" shall have the meaning set forth in subdivision twenty-two of section 19-0107 of this chapter.

15. "Severe ozone nonattainment area" means that part of the state designated pursuant to section 7407 of the Act as not meeting the national ambient air quality standard for ozone, as classified under

section 7511 of the Act.

16. "State air quality control program" means those activities of the department as specified in titles three and five of article nineteen of this chapter relating to air pollution and air contamination and any related enforcement activities.

§ 72-0302. State air quality control fees.

1. All persons, except those required to pay a fee under section 72-0303 of this title, who are required to obtain a permit, registration or approval pursuant to the state air quality control program and the rules and regulations adopted by the department hereunder shall submit to the department a per emission point fee in an amount established as follows:

a. \$11,000.00 for a stationary combustion installation having a maximum operating heat input equal to or greater than fifty million British thermal units per hour as stated on the most recent application for a permit or registration to operate and which emits or has the potential to emit equal to or greater than any one of the following:

- (i) one hundred tons per year of oxides of nitrogen, or if located in a severe ozone nonattainment area, twenty-five tons per year; or
- (ii) one hundred tons per year of sulfur dioxide; or
- (iii) one hundred tons per year of particulates.

b. \$2,000.00 for all stationary combustion installations which are not included under paragraph a of this subdivision and which have a maximum operating heat input greater than fifty million British thermal units per hour as stated on the most recent application for a permit or registration to operate.

c. \$100.00 for a stationary combustion installation having a maximum operating heat input less than fifty million British thermal units per hour as stated on the most recent application for a permit or registration to operate.

d. \$2,000.00 for a process air contamination source for an annual emission rate equal to or greater than twenty-five tons per year of any one of the following: sulfur dioxide, nitrogen dioxide, total particulates, carbon monoxide, total volatile organic compounds and other specific air contaminants. The annual emission rate shall be the actual annual emission rate as stated on the most recent application for a permit or registration to operate. In the event that hours of operation have not been specified on the application then maximum possible hours of operation (8760 hours) will be used to calculate actual annual emissions.

e. \$160.00 for a process air contamination source, except a gasoline dispensing site, for an annual emission rate less than twenty-five tons per year of any one of the following: sulfur dioxide, nitrogen dioxide, total particulates, carbon monoxide, total volatile organic compounds and other specific air contaminants. The annual emission rate shall be the actual annual emission rate as applied for on the most recent application for a permit or registration to operate. In the event that hours of operation have not been specified on the application then maximum possible hours of operation (8760 hours) will be used to calculate actual annual emissions.

f. \$2,000.00 for an incinerator capable of charging two thousand pounds of refuse per hour or greater. The charging capacity will be established in accordance with the application for the most recent permit or registration to operate the incinerator source and will be calculated on an emission point basis.

g. \$160.00 for an incinerator with a maximum design charge rate of less than two thousand pounds of refuse per hour. The charging capacity will be established in accordance with the application for the most recent permit or registration to operate the incinerator source and will be calculated on an emission point basis.

Provided, however, that where a city or county is delegated the authority to administer the state air quality control program, or any

portion thereof, pursuant to paragraph p of subdivision two of section 3-0301 of this chapter and such city or county collects a fee in connection with the issuance of a permit, registration or approval pursuant to the state air quality control program, no additional liability for fees under this section shall accrue for the particular combustion installation, incinerator or process air contamination source that is subject to the delegation.

§ 72-0303. Operating permit program fees.

* 1. Commencing January first, two thousand fifteen and every year thereafter, all sources of regulated air contaminants identified pursuant to subdivision one of section 19-0311 of this chapter shall submit to the department an annual base fee of two thousand five hundred dollars. This base fee shall be in addition to the fees listed below. Commencing January first, nineteen hundred ninety-four and every year thereafter all sources of regulated air contaminants identified pursuant to subdivision one of section 19-0311 of this chapter shall submit to the department an annual fee not to exceed the per ton fees described below. The per ton fee is assessed on each ton of emissions up to seven thousand tons annually of each regulated air contaminant as follows: sixty dollars per ton for facilities with total emissions less than one thousand tons annually; seventy dollars per ton for facilities with total emissions of one thousand or more but less than two thousand tons annually; eighty dollars per ton for facilities with total emissions of two thousand or more but less than five thousand tons annually; and ninety dollars per ton for facilities with total emissions of five thousand or more tons annually. Such fee shall be sufficient to support an appropriation approved by the legislature for the direct and indirect costs associated with the operating permit program established in section 19-0311 of this chapter. Such fee shall be established by the department and shall be calculated by dividing the amount of the current year appropriation from the operating permit program account of the clean air fund by the total tons of emissions of regulated air contaminants that are subject to the operating permit program fees from sources subject to the operating permit program pursuant to section 19-0311 of this chapter up to seven thousand tons annually of each

regulated air contaminant from each source; provided that, in making such calculation, the department shall adjust their calculation to account for any deficit or surplus in the operating permit program account of the clean air fund established pursuant to section ninety-seven-00 of the state finance law; any loan repayment from the mobile source account of the clean air fund established pursuant to section ninety-seven-00 of the state finance law; and the rate of collection by the department of the bills issued for the fee for the prior year.

Notwithstanding the provisions of the state administrative procedure act, such calculation and fee shall be established as a rule by publication in the Environmental Notice Bulletin no later than thirty days after the budget bills making appropriations for the support of government are enacted or July first, whichever is later, of the year such fee will be effective. In no event shall the fee established herein be any greater than the maximum fee identified pursuant to this section.

* NB Effective until January 1, 2027

* 1. Commencing January first, two thousand twenty-seven and every year thereafter, all sources of regulated air contaminants identified pursuant to subdivision one of section 19-0311 of this chapter shall submit to the department an annual base fee of eight thousand five hundred dollars per facility. This base fee shall be in addition to the fees listed below. Commencing January first, two thousand twenty-seven and every year thereafter, all sources of regulated air contaminants identified pursuant to subdivision one of section 19-0311 of this chapter shall submit to the department an annual fee not to exceed the per ton fees described below. The per ton fee is assessed on each ton of emissions of each regulated air contaminant as follows: two hundred dollars per ton for facilities with total emissions less than one thousand tons annually; two hundred twenty-five dollars per ton for facilities with total emissions of one thousand or more but less than two thousand tons annually; two hundred fifty dollars per ton for facilities with total emissions of two thousand or more but less than five thousand tons annually; and three hundred dollars per ton for facilities with total emissions of five thousand or more tons annually. Such fees shall be sufficient to support an appropriation approved by

the legislature for the direct and indirect costs associated with the operating permit program established in section 19-0311 of this chapter. Such fees shall be established by the department and shall be calculated by dividing the amount of the current year appropriation from the operating permit program account of the clean air fund by the total tons of emissions of regulated air contaminants, including hazardous air pollutants, that are subject to the operating permit program fees from sources subject to the operating permit program pursuant to section 19-0311 of this chapter; provided that, in making such calculation, the department shall adjust their calculation to account for any deficit or surplus in the operating permit program account of the clean air fund established pursuant to section ninety-seven-00 of the state finance law and the rate of collection by the department of the bills issued for the fees for the prior year.

Notwithstanding the provisions of the state administrative procedure act, such calculation and fees shall be established as a rule by publication in the Environmental Notice Bulletin no later than thirty days after the budget bills making appropriations for the support of government are enacted or July first, whichever is later, of the year such fees will be effective. In no event shall the fees established herein be any greater than the maximum fee identified pursuant to this section.

- * NB Effective January 1, 2027

- * 2. Bills issued for the fee shall be based on actual emissions for the prior calendar year, as demonstrated to the department's satisfaction, or in the absence of such demonstration, on permitted emissions, or, where there is no permit, on potential to emit. Persons required to submit an emissions statement to the department shall use such statement to demonstrate actual emissions under this section.

- * NB Effective until January 1, 2027

- * 2. Bills issued for the fees established by subdivision one of this section shall be based on actual emissions for the prior calendar year, as demonstrated to the department's satisfaction, or in the absence of such demonstration, on permitted emissions, or, where there is no permit, on potential to emit. Persons required to submit an emissions statement to the department shall use such statement to demonstrate

actual emissions under this section.

* NB Effective January 1, 2027

3. Effective January first, nineteen hundred ninety-seven through December thirty-first, nineteen hundred ninety-eight, and notwithstanding the requirements of the state administrative procedure act, the cap of twenty-five dollars per ton shall increase by the percentage, if any, by which the consumer price index exceeds the consumer price index for the calendar year nineteen hundred eighty-nine.

a. The consumer price index for any calendar year is the average of the consumer price index for all urban consumers published by the United States department of labor, as of the close of the twelve-month period ending on August thirty-first of each calendar year.

b. The revision of the consumer price index for the calendar year nineteen hundred eighty-nine shall be used in the event the department of labor revises its method of determining the consumer price index.

4. The fees established pursuant to this section shall not be assessed on emissions of carbon monoxide or any class I or II substance subject to a standard promulgated pursuant to section 7671 of the Act.

5. Any regulated air contaminant subject to the fees imposed pursuant to this section which qualifies as both a volatile organic compound and a hazardous air pollutant regulated pursuant to section 7412 of the Act shall not be counted under both categories for the purpose of assessing fees.

6. On or before April first, nineteen hundred ninety-four, and biennially thereafter, the department of audit and control shall prepare and submit to the governor and the legislature an audit on the fiscal status of the operating permit program created pursuant to section 19-0311 of this chapter. Such audit shall include:

a. an assessment of the actual direct and indirect costs of the operating permit program incurred, and the revenues received from fees

imposed pursuant to this section and penalties imposed pursuant to subdivision twelve of section 72-0201 of this article during the previous fiscal year;

b. an estimate of the direct and indirect costs of the operating permit program that will be incurred, and the revenues estimated to be received from fees imposed pursuant to this section and penalties imposed pursuant to subdivision twelve of section 72-0201 of this article during the current fiscal year; and

c. an estimate of any balance in the account that will be available at the end of the current fiscal year.

7. The department may reduce the fee charged for categories of stationary sources, taking into account the financial resources of such sources, consistent with the provisions of section 7661f(f) of the Act.

8. If a city or county shall be delegated the authority to administer the operating permit program established pursuant to section 19-0311 of this chapter it may collect the fees established pursuant to this section and no additional liability for fees under this section shall accrue for any such source.

9. No later than September thirtieth, nineteen hundred ninety-four and before September thirtieth of each subsequent year, the department shall report to the governor, the legislature and the department of audit and control on: (i) the actual direct and indirect costs of the operating permit program incurred, and the revenues received pursuant to fees imposed by this section, during the previous fiscal year; (ii) the estimated direct and indirect costs of the operating permit program that will be incurred, and the anticipated revenues received or anticipated to be received pursuant to fees imposed by this section, during the current fiscal year; (iii) an estimate of the direct and indirect costs of the operating permit program that will be incurred, and the tonnages of pollutants anticipated to be subject to the fees imposed by this section, during the subsequent fiscal year; (iv) an estimate of any balance in the operating permit program account of the clean air fund

that will be available at the end of the current fiscal year; (v) a recommendation regarding adjustments to the fees imposed under this section necessary to assure that the operating permit program account has adequate funds to finance the direct and indirect cost of the operating permit program during future fiscal years; and (vi) the number of operating permit applications upon which the department has taken final action in the previous fiscal year, the average review time per permit, the number of person hours spent per permit, and the number of completed permit applications which are pending final action. Reports and accountings required to be filed with the administrator of the United States environmental protection agency may serve to satisfy this requirement.

TITLE 4

HAZARDOUS WASTE PROGRAM FEE

Section 72-0401. Definitions.

72-0402. Hazardous waste program fees.

§ 72-0401. Definitions.

When used in this title:

1. "Characteristic hazardous waste" means a waste which satisfies the characteristics promulgated by the commissioner pursuant to title nine of article twenty-seven of this chapter and is not listed hazardous waste as defined in subdivision ten of this section.

2. "Disposal" means the abandonment, discharge, deposit, injection, dumping, spilling, leaking or placing of any substance so that such substance or any related constituent thereof may enter the environment. Disposal also means the thermal destruction of waste or hazardous waste and the burning of such wastes as fuel for the purpose of recovering useable energy.

3. "Facility operator" means the person who is responsible for the

operation of a treatment, storage or disposal facility as defined in subdivision sixteen of this section.

4. "Facility owner" means the person who owns a facility or part of a facility.

5. "Generator" means any person, by site, whose act or process produces hazardous waste or whose act first causes a hazardous waste to become subject to regulation.

6. "Hazardous waste" means a waste identified or listed as hazardous pursuant to title nine of article twenty-seven of this chapter.

7. "Hazardous waste generation" means the act or process of producing hazardous waste.

8. "Incinerator" means an enclosed device using controlled flame combustion, the primary purpose of which is to thermally break down solid, liquid, or gaseous combustible hazardous wastes, producing residue that contains little or no combustible materials.

9. "Landfill" means a disposal facility or part of a facility where solid waste, including hazardous waste, is placed in or on land, and which is not a land treatment facility, a surface impoundment, or an injection well.

10. "Listed hazardous waste" means a waste which appears on the list promulgated by the commissioner pursuant to title nine of article twenty-seven of this chapter.

11. "Person" means an individual, trust, firm, joint stock company, corporation (including a government corporation), partnership, association, state, federal government and any agency thereof, municipality, commission, political subdivision of a state, or any interstate body.

12. "State hazardous waste program" means those activities of the

department as specified in titles three, seven, nine, and eleven of article twenty-seven of this chapter related to hazardous waste and any related enforcement activities.

13. "Storage" means the containment of hazardous waste, either on a temporary basis or for a period of years, in such a manner as not to constitute disposal of such hazardous waste.

14. "Surface impoundment" or "impoundment" means a facility or part of a facility which is a natural topographical depression, man-made excavation, or diked area formed primarily of earthen materials (although it may be lined with man-made materials), which is designed to hold an accumulation of solid waste in semi-solid or liquid form, and which is not an injection well.

15. "Treatment" means any method, technique, or process, including neutralization, designed to change the physical, chemical or biological character or composition of any hazardous waste so as to neutralize such waste or as to render such waste nonhazardous, safer for transport, amenable for recovery, amenable for storage, or reduced in volume.

16. "Treatment, storage or disposal facility" or "facility" means all contiguous land and structures, other appurtenances and improvements on the land, used for treating, storage or disposing of hazardous waste. A facility may consist of several treatment, storage or disposal operational units. For purposes of this title, a facility subject to regulation under section 307(b) of the Clean Water Act shall not be assessed a separate fee for the pre-treatment of hazardous wastes.

17. "Environment" means any water, water vapor, any land including land surface or subsurface, air, fish, wildlife, biota and all other natural resources.

19. "Wastewater" means liquid waste that contains:

a. a minimum of ninety-five percent water by weight, and

b. a maximum of one percent by weight of total organic carbon, and

c. a maximum of one percent by weight of total suspended solids (i.e., total filterable solids).

§ 72-0402. Hazardous waste program fees.

1. a. For the period beginning January 1, 2010, all generators of equal to or greater than fifteen tons per year of hazardous waste shall submit annually to the department a fee in the amount of one hundred thirty dollars per ton of hazardous waste generated not to exceed \$300,000, except not to exceed \$400,000 for those with greater than 4,000 tons generated and less than or equal to 10,000 tons generated, and not to exceed \$800,000 for those with greater than 10,000 tons generated.

b. \$3,000 for generators of equal to or greater than fifteen tons per year of hazardous wastewater, payable in addition to fees for hazardous wastes, other than wastewater, as required by paragraph a of this subdivision.

c. \$6,000 for generators of equal to or greater than fifteen thousand tons per year of hazardous wastewater, payable in addition to the fees for hazardous wastes, other than wastewater, as required by this subdivision.

d. No fee shall be payable for waste resulting from services which are provided:

(i) under a contract with the department, or with the department's written approval and in compliance with department regulations, or pursuant to an order of the department, the United States environmental protection agency or a court of competent jurisdiction, related to the cleanup or remediation of a hazardous materials or hazardous waste spill, discharge, or surficial cleanup, pursuant to this chapter; or

(ii) under a contract for, or with the department's approval and in compliance with department regulations for, the cleanup and removal of a

petroleum spill or discharge, pursuant to subdivision seven of section one hundred seventy-six of the navigation law; or

(iii) under the order of a court, the department or the department of health, or the United States environmental protection agency related to an inactive hazardous waste disposal site pursuant to section 27-1313 of this chapter, section thirteen hundred eighty-nine-b of the public health law, or the Comprehensive Environmental Response, Compensation and Liability Act (42 U.S.C. 9601 et seq.); or

(iv) voluntarily and without expectation of monetary compensation in accordance with subdivision one of section 27-1321 of this chapter; or

(v) under permit or order requiring corrective action pursuant to title nine of article twenty-seven of this chapter, title twenty-seven of article seventy-one of this chapter or the Resource Conservation and Recovery Act (42 U.S.C. 6901 et seq.); or

(vi) under a brownfield site cleanup agreement with the department pursuant to section 27-1409 of this chapter or under a written agreement with a municipality which has entered into a memorandum of agreement with the department related to the remediation of brownfield sites as of August fifth, two thousand ten; or

(vii) under an environmental restoration project state assistance contract with the department pursuant to section 56-0503 of this chapter.

e. Notwithstanding any other provision of this section, no fee shall be payable for the generation of universal wastes. For purposes of this paragraph, "universal wastes" shall mean those defined and listed in regulations promulgated pursuant to this title, provided that such wastes are regulated consistent with rules adopted by the administrator pursuant to RCRA for the management of universal wastes.

f. In any case where a generator either (i) recycles more than ninety percent of the total tons of hazardous waste or more than ninety percent of the total tons of hazardous wastewater which it generated during that calendar year, as certified to the commissioner, or (ii) recycles more than four thousand tons of hazardous waste or more than four thousand tons of hazardous wastewater which it generated in that calendar year, as certified to the commissioner, the fee imposed pursuant to this

section shall be calculated and imposed based upon the net amount of hazardous waste or the net amount of hazardous wastewater generated that is not recycled in that calendar year, rather than upon the gross amounts of hazardous waste and hazardous wastewater generated in such calendar year.

2. All facility operators required to obtain a permit or certificate for the treatment, storage or disposal of hazardous waste pursuant to title nine of article twenty-seven of this chapter shall submit annually to the department a fee in an amount to be determined for all methods of hazardous waste treatment, storage or disposal as follows:

a. \$12,000 for each facility that receives less than or equal to one thousand tons per year of hazardous waste; and

b. \$30,000 for each facility that receives greater than one thousand tons per year of hazardous waste.

In addition, the fee determined pursuant to this section shall include:

(i) \$100,000 for each facility when the gross receipts tax is below 3.3 million dollars per year; \$200,000 for each facility when the gross receipts tax is between 3.3 million dollars per year and 4.4 million dollars per year; and \$300,000 for each facility when the gross receipts tax exceeds 4.4 million dollars per year for which a permit pursuant to title nine of article twenty-seven of this chapter is required to operate one or more landfills to receive hazardous waste at such facility, except that such fee shall be \$100,000 if such facility is used by the facility operator or owner for the disposal of hazardous waste generated solely by such facility operator or owner; and

(ii) \$10,000 for each incinerator as defined in section 72-0401 of this title which is and each unit which burns listed hazardous waste for energy recovery located at the facility operator's hazardous waste treatment, storage or disposal facility; and

(iii) \$10,000 for each unit which burns listed hazardous waste for energy recovery at the facility operator's hazardous waste treatment, storage or disposal facility; and

(iv) \$24,000 for each facility which provides for the treatment, storage or disposal of hazardous waste in one or more surface impoundments.

3. All facility operators required to obtain a permit, certificate or approval for the post-closure care period pursuant to title nine of article twenty-seven of this chapter shall submit annually to the department a fee in the amount of \$3,000 for each such closed hazardous waste management facility.

4. Bills issued for annual hazardous waste program fees shall be based upon actual hazardous waste generated for the prior calendar year, as demonstrated to the department's satisfaction. During the first year of implementation of this subdivision, bills will be based on the average quantity of hazardous waste generated for the previous three calendar years.

TITLE 5

WASTE TRANSPORTER PROGRAM FEE

Section 72-0501. Definitions.

72-0502. Waste transporter program fees.

§ 72-0501. Definitions.

1. "Industrial-commercial waste" means a waste which originates at, is generated by, or occurs as a result of any industrial or commercial activity. The forms of waste included are exemplified by but not limited to the following:

a. liquids such as: acids, alkalis, caustics, leachate, petroleum (and its derivatives), and process of treatment wastewaters;

b. sludges which are semisolid substances resulting from process or treatment operations, or residues from storage or use of liquids;

c. solids such as: solidified chemicals, paints or pigments; the end or by-products of incineration ash; foundry sand; dredge spoil;

d. contained gaseous materials;

e. hazardous waste as defined in title nine of article twenty-seven of this chapter; and

f. any liquid, sludge, septage, solid, semisolid substance or contained gaseous material in which any of the foregoing is intermixed or absorbed, or onto which any of the foregoing is adhered.

2. "Low-level radioactive waste" means radioactive material that:

a. is not high-level radioactive waste, transuranic waste, spent nuclear fuel, or the tailings or wastes produced by the extraction or concentration of uranium or thorium from any ore processed primarily for its source material content; and

b. the United States nuclear regulatory commission, consistent with federal law and in accordance with paragraph a of this subdivision, classifies as low-level radioactive waste.

3. "Regulated waste" means any one of the following types of waste, raw sewage, septage, sludge from a sewage or water supply treatment plant, industrial-commercial waste or waste oil.

4. "Septage" means the contents of a septic tank, cesspool or other individual sewage treatment facility which received domestic sewage wastes.

5. "Waste" means any garbage, refuse, sludge from a waste treatment plant, water supply treatment plant or air pollution control facility, and other discarded material, including solid, liquid, semisolid or contained gaseous material resulting from industrial, commercial, mining and agricultural operations and from community activities, but does not include solid or dissolved materials in domestic sewage, or solid or

dissolved materials in irrigation return flows or industrial discharges which are point sources subject to permits under article seventeen of this chapter, or source, special nuclear or by-product material as defined in the Atomic Energy Act of 1954, as amended (68 Stat. 923) except as may be provided by existing agreements between the state and the federal governments.

6. "Waste oil" means used engine lubricating oil and any other oil, including but not limited to, fuel oil, motor oil, gear oil, cutting oil, transmission fluid, hydraulic fluid, dielectric fluid, oil storage tank residue, animal oil, and vegetable oil, which has been contaminated by physical or chemical impurities through use or accident, and has not subsequently been rerefined.

7. "Regulated medical waste" shall have the same meaning as such term is defined in title 15 of article 27 of this chapter.

§ 72-0502. Waste transporter program fees.

1. All persons required to obtain a permit, certificate or approval pursuant to the waste transporter permit requirements set forth in title three of article twenty-seven of this chapter shall submit annually to the department a fee in an amount to be determined as follows:

a. In the case of persons permitted pursuant to title three of article twenty-seven of this chapter to transport industrial-commercial waste or low-level radioactive waste:

- (i) \$500.00 for the first vehicle permitted pursuant to title three of article twenty-seven of this chapter; and
- (ii) \$200.00 per each additional vehicle permitted.

b. In the case of all other persons:

- (i) \$250.00 for the first vehicle permitted pursuant to title three of article twenty-seven of this chapter; and
- (ii) \$100.00 per each additional vehicle permitted.

2. All persons required to obtain a permit, certificate or approval pursuant to the waste transporter permit requirements set forth in title 15 of article 27 of this chapter shall submit annually to the department a fee in the amount of five hundred dollars (\$500.00) for the first vehicle permitted, certified or approved for the transportation of regulated medical waste, and two hundred dollars (\$200.00) for each additional vehicle so permitted, certified or approved.

Provided, however, that where a city or county is delegated the authority to administer the state waste transporter program pursuant to subdivision four of section 27-0305 of this chapter and such city or county collects a fee in connection with the issuance of a permit, certificate or approval for a waste transporter, no additional liability for fees under this section shall accrue.

TITLE 6

STATE POLLUTANT DISCHARGE ELIMINATION SYSTEM PROGRAM FEE

Section 72-0601. Definitions.

72-0602. State pollutant discharge elimination system program fees.

§ 72-0601. Definitions.

When used in this title:

1. "Facility" means any establishment for which a general permit has been issued pursuant to subdivision six of section 70-0117 of this chapter or any industrial, municipal or private/commercial/institutional (P/C/I) establishment, or any vessel for which a permit is required under titles seven and eight of article seventeen of this chapter.

2. "Industrial facility" means any manufacturing operation including, but not limited to animal feeding operations, aquatic animal production facilities, mining and silvicultural operations, and solid waste management facilities.

3. "Municipal facility" means a publicly owned treatment works, including raw discharges and combined sewer overflows, or a publicly owned drinking water treatment plant.

4. "P/C/I" means a private/commercial/institutional facility which primarily discharges sewage.

5. "Power plant" means any facility which generates electricity using a steam turbine and generator, which may be fired by coal, oil, natural gas, nuclear energy, or other fuel source.

6. "State pollutant discharge elimination system program" or "SPDES program" means those activities of the department as specified in titles seven and eight of article seventeen of this chapter related to discharges into the waters of the state and any related enforcement activities.

§ 72-0602. State pollutant discharge elimination system program fees.

All persons required to obtain a permit or certificate pursuant to the state pollutant discharge elimination system (SPDES) program as defined in section 72-0601 of this title shall submit annually to the department a fee in an amount to be determined as follows:

a. \$330.00 for any P/C/I facilities having a permit to discharge or discharging at an average daily rate of less than 100,000 gallons;

b. \$675.00 for P/C/I facilities having a permit to discharge or discharging at an average daily rate of 100,000 gallons or more;

c. \$675.00 for industrial facilities having a permit to discharge or discharging at an average daily rate of less than 10,000 gallons;

d. \$2,300.00 for industrial facilities having a permit to discharge or discharging at an average daily rate of between 10,000 gallons and

99,999 gallons;

e. \$6,700.00 for industrial facilities having a permit to discharge or discharging at an average daily rate of between 100,000 gallons and 499,999 gallons;

f. \$22,500.00 for industrial facilities having a permit to discharge or discharging at an average daily rate of between 500,000 and 999,999 gallons;

g. \$33,500.00 for industrial facilities having a permit to discharge or discharging at an average daily rate of between 1,000,000 and 9,999,999 gallons;

h. \$56,000.00 for industrial facilities having a permit to discharge or discharging at an average daily rate of 10,000,000 gallons or more;

i. \$56,000.00 for any power plant;

j. \$425.00 for municipal facilities having a permit to discharge or discharging at an average daily rate of less than 200,000 gallons;

k. \$2,000.00 for municipal facilities having a permit to discharge or discharging at an average daily rate of between 200,000 and 999,999 gallons;

l. \$8,000.00 for municipal facilities having a permit to discharge or discharging at an average daily rate of between 1,000,000 and 4,999,999 gallons;

m. \$15,500.00 for municipal facilities having a permit to discharge or discharging at an average daily rate of between 5,000,000 and 39,999,999 gallons;

n. \$38,500.00 for municipal facilities having a permit to discharge or discharging at an average daily rate of 40,000,000 gallons or more;

o. \$100.00 for any facility having a permit to discharge or discharging ballast no more than 1,000,000 gallons in any twenty-four hour period;

p. \$500.00 for any facility having a permit to discharge or discharging ballast in excess of 1,000,000 gallons in any twenty-four hour period;

q. \$110.00 per acre disturbed plus \$675.00 per future impervious acre for any facility, not owned or managed by a local government or a state department, agency, or authority, discharging or authorized to discharge pursuant to a SPDES permit for stormwater discharges from construction activity. For the purposes of this subdivision, acres disturbed are acres subject to clearing, grading, or excavating subject to SPDES permitting and future impervious acres are acres that will be newly paved or roofed during construction;

r. \$50.00 for a medium concentrated animal feeding operation discharging or authorized to discharge pursuant to a general permit;

s. \$50.00 for a large concentrated animal feeding operation discharging or authorized to discharge pursuant to a general permit;

t. \$110.00 for any facility, other than a municipal separate storm sewer as defined by 40 CFR §122.26 (b) (8), discharging or authorized to discharge pursuant to a general permit unless a specific fee is imposed pursuant to subdivisions a through s of this section for such discharge or authorization to discharge.

TITLE 7

WATER TRANSPORT PERMIT PROGRAM FEE

Section 72-0701. Definitions.

72-0702. Water transport permit program fee.

§ 72-0701. Definitions.

When used in this title:

1. "Facility" means any stationary or movable intake mechanism for the withdrawal of fresh water. For the purposes of this title multiple intake mechanism on shoreline facilities or vessels shall be considered as part of one facility.

2. "Water transport permit" means a permit required by section 15-1506 of this chapter.

§ 72-0702. Water transport permit program fee.

All persons and public corporations required to obtain a water transport permit pursuant to section 15-1506 of this chapter shall submit to the department a fee for each facility equal to one hundred dollars per million gallons of fresh water withdrawn or transported pursuant to such permit.

TITLE 10

MINED LAND RECLAMATION PROGRAM FEES

Section 72-1001. Definitions.

72-1003. Fees.

72-1005. Liability for fees.

72-1007. Disposition of fees.

72-1009. Environmental regulatory account.

72-1011. Mined land reclamation program account.

§ 72-1001. Definitions.

1. "Affected land" and "land affected by mining" means the sum of that surface area of land or land under water which:

(a) has been disturbed by mining since April first, nineteen hundred seventy-five, and has not been reclaimed, and

(b) is to be disturbed by mining during the term of the permit to mine.

2. "Mining" means the extraction of overburden and minerals from the earth; the preparation and processing of minerals, including any activities or processes or parts thereof for the extraction or removal of minerals from their original location and the preparation, washing, cleaning, crushing, or other processing of minerals at the mine location so as to make them suitable for commercial, industrial or construction use, exclusive of manufacturing processes, at the mine location; the removal of such materials through sale or exchange, or for commercial, industrial or municipal use; and the disposition of overburden, tailings and waste at the mine location. "Mining" shall not include the excavation, removal and disposition of minerals from construction projects, exclusive of the creation of water bodies, or excavations in aid of agricultural activities.

3. "Minor projects" means projects which meet all of the following criteria:

(a) total acreage affected by mining for the entire mining site is less than five acres, regardless of length of mining period;

(b) total depth of mine from floor to top of mine face is less than twenty feet;

(c) there is no on-site processing of minerals (e.g., washing, crushing);

(d) there is no mining within one hundred feet of any surface waters;

(e) there is no mining of consolidated minerals;

(f) there is no mining within five hundred feet of any dwelling; and

(g) there is no mining below the water table at the mine site.

§ 72-1003. Fees.

All persons required to obtain a permit or approval or subject to regulation under this title shall submit annually to the department a fee in the amount to be determined for affected land as follows:

1. four hundred dollars for minor projects; or
2. seven hundred dollars for affected land of an acreage equal to or less than five acres; or
3. nine hundred dollars for affected land of an acreage greater than five acres and equal to or less than ten acres; or
4. fifteen hundred dollars for affected land of an acreage greater than ten acres and equal to or less than twenty acres; or
5. four thousand dollars for affected land of an acreage greater than twenty acres and equal to or less than thirty acres; or
6. eight thousand dollars for affected land of an acreage greater than thirty acres.

§ 72-1005. Liability for fees.

Liability for fees authorized by this title shall be as follows:

1. for persons holding permits or approvals or subject to regulation under this title on January first in any year beginning with the year nineteen hundred ninety-one, liability for fees shall commence on January first;
2. for persons receiving new permits or approvals or subject to regulation under this title after September first, nineteen hundred ninety-one, liability for fees shall equal the annual fee established pursuant to this title and shall be prorated from the date of issuance;
3. for all persons holding permits or approvals, or subject to regulation under this title liability to pay annual fees shall continue until such time as reclamation has been completed and approved by the department and any required financial security has been released, and shall be prorated to the date of approval by the department.

§ 72-1007. Disposition of fees.

All fees collected pursuant to this title shall be paid into the miscellaneous special revenue fund, to the credit of the mined land reclamation program account. Moneys in such account shall be kept separately from and shall not be commingled with any other moneys in the joint or sole custody of the state comptroller.

§ 72-1009. Environmental regulatory account.

1. The environmental regulatory account shall be credited with all moneys received from fees and fee interest collected; all other moneys collected by the department pursuant to title twenty-seven of article twenty-three of this chapter, except as identified under article six of the public officers law; and any other contributions or donations by the public to such account.

2. Moneys in the account, following appropriation by the legislature, shall be allocated upon the certification of approval for availability by the director of the budget for the administration and enforcement of title twenty-seven of article twenty-three of this chapter, including but not limited to monitoring, surveillance, enforcement, training, research, administration and cooperation with any federal, state or local agency.

§ 72-1011. Mined land reclamation program account.

1. There is hereby established in the joint custody of the commissioner of taxation and finance and the comptroller a special revenue fund to be known as the "mined land reclamation program account".

2. The account shall consist of all moneys received from fees, fee

penalties, and fee and fee penalty interest collected pursuant to this title, and any other moneys collected therefor or credited or transferred thereto from any other fund, account or source.

3. Moneys in the mined land reclamation program account, following appropriation by the legislature, shall be disbursed, upon the certification of approval for availability by the director of the budget, for the administration and enforcement of title twenty-seven of article twenty-three of this chapter, including but not limited to monitoring, surveillance, enforcement, training and research.

*** ARTICLE 73**

NEW YORK STATE

CANAL FLOOD MITIGATION TASK FORCE

Section 73-0101. Flood mitigation task force.

73-0103. Definitions.

73-0105. Task force composition.

73-0107. Task force duties.

* NB Repealed 120 days after the New York State canal flood mitigation task force has submitted its completed report (see ch. 456/2007 §2)

*** § 73-0101. Flood mitigation task force.**

The New York state canal flood mitigation task force, referred to in this article as the task force, is hereby established to identify reasonable measures that can be taken to enhance flood management and mitigation in and along the New York state canal system, including the Erie Canal and major water bodies within the Oswego river basin that contribute to the flooding of the canal, and to make recommendations with respect to such measures.

* NB Repealed 120 days after the New York State canal flood mitigation task force has submitted its completed report (see ch. 456/2007 §2)

*** § 73-0103. Definitions.**

When used in this article:

1. "Adaptive measures" means any adjustment, whether passive, reactive or anticipatory, that may be taken to ameliorate the anticipated adverse consequences associated with flood events.

2. "Flood control study sector" means a particular aspect of the natural or built environment, economy, or society that could potentially be adversely impacted by flood events. Such term includes, but is not limited to, stream and river banks, locks and dams, wetlands and waterfront areas, water resources, transportation infrastructure, water supply and wastewater infrastructure, human health, recreation, tourism, power generation and business, residential, farm and municipal sectors.

3. "Flood event" means an overflow or inundation that comes from a river or other body of water, whether caused by rainfall, waterway operation, dam break, water runoff or other means, and causes or threatens damage.

4. "Canal system" shall mean the canal waterways, lands and infrastructure as set out in section two of the canal law.

* NB Repealed 120 days after the New York State canal flood mitigation task force has submitted its completed report (see ch. 456/2007 §2)

*** § 73-0105. Task force composition.**

1. The task force shall consist of fourteen members; nine of whom shall be the director of the canal corporation, commissioner of the department of environmental conservation, the secretary of state, the commissioner of transportation, the director of the state emergency management office, the commissioner of parks, recreation and historic preservation, the commissioner of agriculture and markets, the chairman of the power authority of the state of New York and the commissioner of economic development or designee; and five additional members who shall be from outside the public offices listed in this section and who shall

have professional experience in the fields of hydrology, civil engineering, climatology, emergency management and soil and water conservation. The governor shall appoint three of the five additional members and the temporary president of the senate and speaker of the assembly shall each appoint one of each of the five additional members.

2. The task force shall appoint a chairperson from among its members.

3. The members of the task force shall receive no compensation for their services, but shall be allowed their actual and necessary expenses incurred in the performance of their duties.

4. The task force shall consult with the emergency management officer, or appropriate county officer, from each county adjacent or intersected by the canal system or the Oswego river basin and each such officer shall provide to the task force a document listing their concerns and recommendations related to flooding along the canal system. The task force shall consider such concerns and recommendations in its deliberations and in the formulation of its determinations and recommendations.

5. The task force shall also solicit the views of persons who reside adjacent to the canal system or major bodies within the Oswego river basin to assist it in making its determinations and formulating its recommendations.

6. To help ensure the task force's receipt of a comprehensive and diverse array of views, a citizen advisory board to the task force shall be established. The advisory board shall consist of up to thirteen members appointed for two years, seven members shall be appointed following the recommendation of the governor; two members shall be appointed following the recommendation of the temporary president of the senate; two members shall be appointed following the recommendation of the speaker of the assembly; one member shall be appointed following the recommendation of the minority leader of the senate; and one member shall be appointed following the recommendation of the minority leader of the assembly. The advisory board shall represent a diverse array of

interests, including property owners residing adjacent to or in close proximity to the canal system or major water bodies within the Oswego river basin, recreational and commercial users of the canal system, environmental groups and hydroelectric power generators that operate facilities within the canal system. No member of the advisory board may be concurrently employed by, or provide goods or services to, any agency or public corporation which is represented on the task force. The commissioner shall select a member of the advisory board to serve as chairperson.

7. The members of the advisory board shall receive no compensation for their services, but shall be allowed their actual and necessary expenses incurred in the performance of their duties.

8. The advisory board shall advise the task force on relevant information and issues related to flooding and flood mitigation in the canal system or the Oswego river basin; make recommendations to fulfill the purposes of this article; and provide advice and assistance required by the task force.

9. The task force shall meet at least six times at the call of the chairperson.

* NB Repealed 120 days after the New York State canal flood mitigation task force has submitted its completed report (see ch. 456/2007 §2)

*** § 73-0107. Task force duties.**

The role of the task force includes, but is not limited to:

1. Conduct an in-depth examination of flood control study sectors and issues related to floodplain management, flood control and flood mitigation in and along the canal system including:

(a) Adaptive measures that can be taken to mitigate flood damages, including but not limited to feasible floodplain management activities, wetland restoration, flood control structures, communication systems and structures and associated costs;

(b) Evaluation which should include impacts on agriculture, transportation, land use, health, insurance and economic sectors such as shipping, fisheries, power generation, tourism, and recreation. Impacts on infrastructure, including bridges, low-lying roads, dams, locks, causeways, water and wastewater treatment plants and docks shall be included in the evaluation; and

(c) Evaluation of canal operation procedures and plans which may have a direct or indirect impact on flood mitigation and flood management including, but not limited to, debris management, communication, water management and flood response.

2. Evaluation and assessment of any flood control or mitigation measures identified in terms of feasibility, economic and public health impacts, and effectiveness, as well as identifying impediments to implementing flood control and mitigation measures and where possible, actions that could be taken to resolve these issues.

3. The department and the canal corporation shall provide the task force with such facilities, assistance and data as will enable the task force to carry out its powers and duties. Additionally, all other agencies of the state or subdivisions thereof shall, at the request of the chair provide the task force with such facilities, assistance, and data as will enable the task force to carry out its powers and duties.

4. The task force shall have the power to:

(a) Contract for professional and technical assistance and advice;

(b) Contract for and accept assistance including, but not limited to gifts, grants, easements, and loans of funds, real property and personal property from the federal government or any agency or instrumentality of the state, or from any other public or private source to comply, subject to the provisions of this article, with the terms and conditions thereof, subject to the approval of the division of the budget.

Notwithstanding the provisions of section eleven of the state finance law, the task force may accept gifts, grants, devises and bequests, whether conditional or unconditional with the approval of the director of the budget; and

(c) Conduct scientific and environmental studies.

* NB Repealed 120 days after the New York State canal flood mitigation task force has submitted its completed report (see ch. 456/2007 §2)

ARTICLE 75
CLIMATE CHANGE

Section 75-0101. Definitions.

- 75-0103. New York state climate action council.
- 75-0105. Statewide greenhouse gas emissions report.
- 75-0107. Statewide greenhouse gas emissions limits.
- 75-0109. Promulgation of regulations to achieve statewide greenhouse gas emissions reductions.
- 75-0111. Climate justice working group.
- 75-0113. Value of carbon.
- 75-0115. Community air monitoring program.
- 75-0117. Investment of funds.
- 75-0119. Implementation reporting.

§ 75-0101. Definitions.

For the purposes of this article the following terms shall have the following meanings:

1. "Allowance" means an authorization to emit, during a specified year, up to one ton of carbon dioxide equivalent.
2. "Carbon dioxide equivalent" means the amount of carbon dioxide by mass that would produce the same global warming impact as a given mass of another greenhouse gas over an integrated one hundred-year time frame after emission.
3. "Co-pollutants" means hazardous air pollutants produced by greenhouse gas emissions sources.
4. "Council" means the New York state climate action council established pursuant to section 75-0103 of this article.

5. "Disadvantaged communities" means communities that bear burdens of negative public health effects, environmental pollution, impacts of climate change, and possess certain socioeconomic criteria, or comprise high-concentrations of low- and moderate- income households, as identified pursuant to section 75-0111 of this article.

6. "Emissions reduction measures" means programs, measures and standards, authorized pursuant to this chapter, applicable to sources or categories of sources, that are designed to reduce emissions of greenhouse gases.

7. "Greenhouse gas" means carbon dioxide, methane, nitrous oxide, hydrofluorocarbons, perfluorocarbons, sulfur hexafluoride, and any other substance emitted into the air that may be reasonably anticipated to cause or contribute to anthropogenic climate change.

8. "Greenhouse gas emission limit" means the maximum allowable level of statewide greenhouse gas emissions, excluding emissions identified under paragraph f of subdivision two of section 75-0105 of this article, in a specified year, expressed in tons of carbon dioxide equivalent, as determined by the department pursuant to this article.

9. "Greenhouse gas emission offset" means a deduction representing one metric ton of carbon dioxide equivalent emissions, reduced, avoided, or sequestered by a greenhouse gas emission offset project from a measured baseline of emissions pursuant to the statewide greenhouse gas emissions report.

10. "Greenhouse gas emission offset projects" means one or more projects, including:

a. Natural carbon sinks including but not limited to afforestation, reforestation, or wetlands restoration;

b. Greening infrastructure;

c. Restoration and sustainable management of natural and urban forests or working lands, grasslands, coastal wetlands and sub-tidal habitats;

d. Efforts to reduce hydrofluorocarbon refrigerant, sulfur hexafluoride, and other ozone depleting substance releases;

e. Anaerobic digesters, where energy produced is directed toward localized use;

f. Carbon capture and sequestration;

g. Ecosystem restoration; and

h. Other types of projects recommended by the council in consultation with the climate justice working group that provide public health and environmental benefits, and do not create burdens in disadvantaged communities.

11. "Greenhouse gas emission source" or "source" means any anthropogenic source or category of anthropogenic sources of greenhouse gas emissions, determined by the department:

a. whose participation in the program will enable the department to effectively reduce greenhouse gas emissions; and,

b. that are capable of being monitored for compliance.

12. "Leakage" means a reduction in emissions of greenhouse gases within the state that is offset by an increase in emissions of greenhouse gases outside of the state.

13. "Statewide greenhouse gas emissions" means the total annual emissions of greenhouse gases produced within the state from anthropogenic sources and greenhouse gases produced outside of the state that are associated with the generation of electricity imported into the state. Statewide emissions shall be expressed in tons of carbon dioxide equivalents.

14. "Statewide greenhouse gas emissions limit" or "statewide emissions limit" means the maximum allowable level of statewide greenhouse gas emissions in a specified year, as determined by the department pursuant to this article.

15. "Environmental justice advisory group" shall mean the permanent environmental justice advisory group established by a chapter of the laws of two thousand nineteen amending the environmental conservation law relating to establishing a permanent environmental justice advisory group and an environmental justice interagency coordinating council, as proposed in legislative bills numbers S. 2385 and A. 1564.

§ 75-0103. New York state climate action council.

1. There is hereby established the New York state climate action council ("council") which shall consist of the following twenty-two members:

a. the commissioners of transportation, health, economic development, agriculture and markets, housing and community renewal, environmental conservation, labor, the chairperson of the public service commission, the presidents of the New York state energy research and development authority; New York power authority; Long Island power authority; the secretary of state, or their designees.

b. two non-agency expert members appointed by the governor;

c. three members to be appointed by the temporary president of the senate;

d. three members to be appointed by the speaker of the assembly;

e. one member to be appointed by the minority leader of the senate;
and

f. one member to be appointed by the minority leader of the assembly.

2. The at large members shall include at all times individuals with expertise in issues relating to climate change mitigation and/or adaptation, such as environmental justice, labor, public health and regulated industries.

3. Council members shall receive no compensation for their services but shall be reimbursed for actual and necessary expenses incurred in the performance of their duties.

4. The co-chairpersons of the council shall be the commissioner of environmental conservation and the president of the New York state energy research and development authority or their designee.

5. Each member of the council shall be entitled to one vote. The council's approval and adoption of the final scoping plan pursuant to this section, and any subsequent interim updates thereto, shall require a supermajority of the council. No action may be taken by the council unless there is a quorum, which shall at all times be a majority of the members of the council.

6. Any vacancies on the council shall be filled in the manner provided for the initial appointment.

7. The council shall convene advisory panels requiring special expertise and, at a minimum, shall establish advisory panels on transportation, energy intensive and trade-exposed industries, land-use and local government, energy efficiency and housing, power generation, and agriculture and forestry. The purpose of the advisory panels shall be to provide recommendations to the council on specific topics, in its preparation of the scoping plan, and interim updates to the scoping plan, and in fulfilling the council's ongoing duties.

a. Each advisory panel shall be chaired by the relevant agency head or his or her designee. The council may convene and dissolve additional advisory panels, in its sole discretion, and pursuant to the

requirements herein.

b. Advisory panels shall be comprised of no more than five voting members. The council shall elect advisory panel members, and such membership shall at all times represent individuals with direct involvement or expertise in matters to be addressed by the advisory panels pursuant to this section.

c. Advisory panels shall work directly with the council on the preparation of the scoping plan pursuant to this section. Each advisory panel shall coordinate with the environmental justice advisory group and climate justice working group.

d. All agencies of the state or subdivisions thereof may, at the request of any such advisory panel or the council, provide the advisory panel with such facilities, assistance, and data as will enable advisory panels to carry out their powers and duties.

8. The council shall convene a just transition working group. The working group shall be chaired by the commissioner of labor and the president of the New York state energy research and development authority and shall consist of no less than thirteen, but no more than seventeen members and shall include the commissioners of housing and community renewal, the chair of the department of public service, representatives of environmental justice communities and representatives of labor organizations, clean energy developers and at least five representatives of distinct energy-intensive industries. The just transition working group shall:

a. advise the council on issues and opportunities for workforce development and training related to energy efficiency measures, renewable energy and other clean energy technologies, with specific focus on training and workforce opportunities for disadvantaged communities, and segments of the population that may be underrepresented in the clean energy workforce such as veterans, women and formerly incarcerated persons;

b. identify energy-intensive industries and related trades and identify sector specific impacts of the state's current workforce and avenues to maximize the skills and expertise of New York state workers in the new energy economy;

c. identify sites of electric generating facilities that may be closed as a result of a transition to a clean energy sector and the issues and opportunities presented by reuse of those sites;

d. with respect to potential for greenhouse gas emission limits developed by the department of environmental conservation pursuant to this article, advise the council on the potential impacts of carbon leakage risk on New York state industries and local host communities, including the impact of any potential carbon reduction measures on the competitiveness of New York state business and industry;

e. advise the council and conduct stakeholder outreach on any other workforce matters directed by the council; and

f. at a time frame determined by the council, prepare and publish recommendations to the council on how to address: issues and opportunities related to the energy-intensive and trade-exposed entities; workforce development for trade-exposed entities, disadvantaged communities and underrepresented segments of the population; measures to minimize the carbon leakage risk and minimize anti-competitiveness impacts of any potential carbon policies and energy sector mandates.

g. The just transition working group is hereby authorized and directed to conduct a study of and report on:

i. The number of jobs created to counter climate change, which shall include but not be limited to the energy sector, building sector, transportation sector, and working lands sector;

ii. The projection of the inventory of jobs needed and the skills and training required to meet the demand of jobs to counter climate change;

and

iii. Workforce disruption due to community transitions from a low carbon economy.

9. The department and the New York state energy research and development authority shall provide the council with such facilities, assistance and data as will enable the council to carry out its powers and duties. Additionally, all other agencies of the state or subdivisions thereof may, at the request of the co-chairpersons, provide the council with such facilities, assistance, and data as will enable the council to carry out its powers and duties.

10. The council shall consult with the climate justice working group established in section 75-0111 of this article, the department of state utility intervention unit, and the federally designated electric bulk system operator.

11. The council shall on or before two years of the effective date of this article, prepare and approve a scoping plan outlining the recommendations for attaining the statewide greenhouse gas emissions limits in accordance with the schedule established in section 75-0107 of this article, and for the reduction of emissions beyond eighty-five percent, net zero emissions in all sectors of the economy, which shall inform the state energy planning board's adoption of a state energy plan in accordance with section 6-104 of the energy law. The first state energy plan issued subsequent to completion of the scoping plan required by this section shall incorporate the recommendations of the council.

12. The draft scoping plan shall be developed in consultation with the environmental justice advisory group, and the climate justice working group established pursuant to section 75-0111 of this article and other stakeholders.

a. The council shall hold at least six regional public comment hearings on the draft scoping plan, including three meetings in the upstate region and three meetings in the downstate region, and shall

allow at least one hundred twenty days for the submission of public comment.

b. The council shall provide meaningful opportunities for public comment from all segments of the population that will be impacted by the plan, including persons living in disadvantaged communities as identified pursuant to section 75-0111 of this article.

c. On or before three years of the effective date of this article, the council shall submit the final scoping plan to the governor, the speaker of the assembly and the temporary president of the senate and post such plan on its website.

13. The scoping plan shall identify and make recommendations on regulatory measures and other state actions that will ensure the attainment of the statewide greenhouse gas emissions limits established pursuant to section 75-0107 of this article. The measures and actions considered in such scoping plan shall at a minimum include:

a. Performance-based standards for sources of greenhouse gas emissions, including but not limited to sources in the transportation, building, industrial, commercial, and agricultural sectors.

b. Measures to reduce emissions from the electricity sector by displacing fossil-fuel fired electricity with renewable electricity or energy efficiency.

c. Land-use and transportation planning measures aimed at reducing greenhouse gas emissions from motor vehicles.

d. Measures to achieve long-term carbon sequestration and/or promote best management practices in land use, agriculture and forestry.

e. Measures to achieve six gigawatts of distributed solar energy capacity installed in the state by two thousand twenty-five, nine gigawatts of offshore wind capacity installed by two thousand thirty-five, a statewide energy efficiency goal of one hundred

eighty-five trillion British thermal units energy reduction from the two thousand twenty-five forecast; and three gigawatts of statewide energy storage capacity by two thousand thirty.

f. Measures to promote the beneficial electrification of personal and freight transport and other strategies to reduce greenhouse gas emissions from the transportation sector.

g. Measures to achieve reductions in energy use in existing residential or commercial buildings, including the beneficial electrification of water and space heating in buildings, establishing appliance efficiency standards, strengthening building energy codes, requiring annual building energy benchmarking, disclosing energy efficiency in home sales, and expanding the ability of state facilities to utilize performance contracting.

h. Recommendations to aid in the transition of the state workforce and the rapidly emerging clean energy industry.

i. Measures to achieve healthy forests that support clean air and water, biodiversity, and sequester carbon.

j. Measures to limit the use of chemicals, substances or products that contribute to global climate change when released to the atmosphere, but are not intended for end-use combustion.

k. Mechanisms to limit emission leakage as defined in subdivision eleven of section 75-0101 of this article.

l. Verifiable, enforceable and voluntary emissions reduction measures.

14. In developing such plan the council shall:

a. Consider all relevant information pertaining to greenhouse gas emissions reduction programs in states in the United States Climate Alliance, as well as other states, regions, localities, and nations.

b. Evaluate, using the best available economic models, emission estimation techniques and other scientific methods, the total potential costs and potential economic and non-economic benefits of the plan for reducing greenhouse gases, and make such evaluation publicly available. In conducting this evaluation, the council shall quantify:

i. The economic and social benefits of greenhouse gas emissions reductions, taking into account the value of carbon, established by the department pursuant to section 75-0113 of this article, any other tools that the council deems useful and pertinent for this analysis, and any environmental, economic and public health co-benefits (such as the reduction of co-pollutants and the diversification of energy sources); and

ii. The costs of implementing proposed emissions reduction measures, and the emissions reductions that the council anticipates achieving through these measures.

c. Take into account the relative contribution of each source or source category to statewide greenhouse gas emissions, and the potential for adverse effects on small businesses, and recommend a de minimis threshold of greenhouse gas emissions below which emission reduction requirements will not apply.

d. Identify measures to maximize reductions of both greenhouse gas emissions and co-pollutants in disadvantaged communities as identified pursuant to section 75-0111 of this article.

15. The council shall update its plan toward achieving the statewide greenhouse gas emissions limits and shall make such updates available to the governor, the speaker of the assembly and the temporary president of the senate and post such updates on its website. The first update shall occur in two thousand twenty-eight with subsequent updates due every six years thereafter.

16. The council shall identify existing climate change mitigation and adaptation efforts at the federal, state, and local levels and may make

recommendations regarding how such policies may improve the state's efforts.

17. The council shall maintain a website that includes public access to the scoping plan and greenhouse gas limit information.

§ 75-0105. Statewide greenhouse gas emissions report.

1. No later than two years after the effective date of this article, and each year thereafter, the department shall issue a report on statewide greenhouse gas emissions, expressed in tons of carbon dioxide equivalents, from all greenhouse gas emission sources in the state, including the relative contribution of each type of greenhouse gas and each type of source to the statewide total.

2. The statewide greenhouse gas emissions report shall be a comprehensive evaluation, informed by a variety of data, including but not limited to:

a. information relating to the use of fossil fuels by sector, including for electricity generation, transportation, heating, and other combustion purposes;

b. information relating to fugitive and vented emissions from systems associated with the production, processing, transport, distribution, storage, and consumption of fossil fuels, including natural gas;

c. information relating to emissions from non-fossil fuel sources, including, but not limited to, garbage incinerators, biomass combustion, landfills and landfill gas generators, and anaerobic digesters;

d. information relating to emissions associated with manufacturing, chemical production, cement plants, and other processes that produce non-combustion emissions;

e. information from sources that may be required to participate in the

registration and reporting system pursuant to subdivision four of this section; and

f. carbon dioxide emissions from biogenic sources shall be reported separately, consistent with treatment of biogenic carbon dioxide emissions under the methodologies of the Intergovernmental Panel on Climate Change.

3. The statewide greenhouse gas emissions report shall also include an estimate of greenhouse gas emissions associated with the generation of imported electricity and with the extraction and transmission of fossil fuels imported into the state which shall be counted as part of the statewide total.

4. Within one year after the effective date of this article, the department shall consider establishing a mandatory registry and reporting system from individual sources to obtain data on greenhouse gas emissions exceeding a particular threshold. If established, such registry and reporting system shall apply a consistent reporting threshold to ensure the unbiased collection of data.

5. The statewide greenhouse gas emissions report shall also include an estimate of what the statewide greenhouse gas emissions level was in 1990.

6. The statewide greenhouse gas emissions report shall utilize best available science and methods of analysis, including the comparison and reconciliation of emission estimates from all sources, fuel consumption, field data, and peer-reviewed research.

7. The statewide greenhouse gas emissions report shall clearly explain the methodology and analysis used in the department's determination of greenhouse gas emissions and shall include a detailed explanation of any changes in methodology or analysis, adjustments made to prior estimates, as needed, and any other information necessary to establish a scientifically credible account of change.

8. The department shall hold at least two public hearings to seek public input regarding the methodology and analysis used in the determination of statewide greenhouse gas emissions, and periodically thereafter.

§ 75-0107. Statewide greenhouse gas emissions limits.

1. No later than one year after the effective date of this article, the department shall, pursuant to rules and regulations promulgated after at least one public hearing, establish a statewide greenhouse gas emissions limit as a percentage of 1990 emissions, as estimated pursuant to section 75-0105 of this article, as follows:

a. 2030: 60% of 1990 emissions.

b. 2050: 15% of 1990 emissions.

2. Greenhouse gas emission limits shall be measured in units of carbon dioxide equivalents and identified for each individual type of greenhouse gas.

3. In order to ensure the most accurate determination feasible, the department shall utilize the best available scientific, technological, and economic information on greenhouse gas emissions and consult with the council, stakeholders, and the public in order to ensure that all emissions are accurately reflected in its determination of 1990 emissions levels.

4. In order to comply with the statewide greenhouse gas emissions limits promulgated pursuant to this section, a source may utilize the alternative compliance mechanism established pursuant to subdivision four of section 75-0109 of this article. The use of such mechanism shall be in accordance with the provisions of that subdivision.

§ 75-0109. Promulgation of regulations to achieve statewide greenhouse

gas emissions reductions.

1. No later than December thirty-first, two thousand twenty-eight, the department, after public workshops and consultation with the council, the environmental justice advisory group, and the climate justice working group established pursuant to section 75-0111 of this article, representatives of regulated entities, community organizations, environmental groups, health professionals, labor unions, municipal corporations, trade associations and other stakeholders, shall, after no less than two public hearings, promulgate, in accordance with subdivision three of this section, rules and regulations designed to: (i) achieve, to the maximum extent feasible and cost effective, a sixty percent reduction in statewide greenhouse gas emissions from 1990 emissions by two thousand forty; and (ii) to ensure compliance with the statewide emissions reduction limit established in paragraph b of subdivision one of section 75-0107 of this article, and work with other state agencies and authorities to promulgate regulations required by section eight of chapter one hundred six of the laws of two thousand nineteen.

2. The regulations promulgated by the department pursuant to this section shall:

a. Ensure that the aggregate emissions of greenhouse gases from greenhouse gas emission sources will not exceed the statewide greenhouse gas emissions limits established in section 75-0107 of this article.

b. Include legally enforceable emissions limits, performance standards, or measures or other requirements to control emissions from greenhouse gas emission sources, with the exception of agricultural emissions from livestock.

c. Reflect, in substantial part, the findings of the scoping plan prepared pursuant to section 75-0103 of this article.

d. Include measures to reduce emissions from greenhouse gas emission sources that have a cumulatively significant impact on statewide

greenhouse gas emissions, such as internal combustion vehicles that burn gasoline or diesel fuel and boilers or furnaces that burn oil or natural gas.

3. In promulgating these regulations, the department shall:

a. Design and implement all regulations in a manner that seeks to be equitable, to minimize costs and to maximize the total benefits to New York, and encourages early action to reduce greenhouse gas emissions;

b. Ensure that greenhouse gas emissions reductions achieved are real, permanent, quantifiable, verifiable, and enforceable by the department;

c. Ensure that activities undertaken to comply with the regulations do not result in a net increase in co-pollutant emissions or otherwise disproportionately burden disadvantaged communities as identified pursuant to section 75-0111 of this article;

d. Prioritize measures to maximize net reductions of greenhouse gas emissions and co-pollutants in disadvantaged communities as identified pursuant to section 75-0111 of this article and encourage early action to reduce greenhouse gas emissions and co-pollutants;

e. Incorporate measures to minimize leakage; and

f. Consider the following, in the course of developing a regulatory program or programs as required by this section:

i. the feasibility and adoption of: programs that utilize regulatory mechanisms, including a market-based economy-wide cap-and-invest program that could be linked to other jurisdictions and provide market certainty; clean energy supply standards; and other regulations;

ii. the affordability of the programs identified in subparagraph i of this paragraph for state residents, businesses and other entities, including how the pace and sequencing of the emissions reduction strategies affect total costs over time, and through assessing energy

cost impacts across customer classes and uses, as well as the utilization of effective cost containment measures as needed;

iii. the importance of fostering the state's economic growth and competitiveness, including the creation and maintenance of well-paying and family-sustaining jobs;

iv. the economy-wide emissions reduction strategies that result in improved public health, increased quality of life, and a cleaner environment for all New Yorkers, and that any new revenue equitably supports these outcomes;

v. the ability to maximize available funding and other resources to support emissions reductions; and

vi. the development and commercialization of low and zero emission technologies to achieve the goals of programs identified in subparagraph i of this paragraph.

4. a. The department may establish an alternative compliance mechanism to be used by sources subject to greenhouse gas emissions limits to achieve net zero emissions.

b. The use of such mechanism shall account for not greater than fifteen percent of statewide greenhouse gas emissions estimated as a percentage of nineteen ninety emissions pursuant to section 75-0105 of this article, provided that the use of this mechanism must offset a quantity greater than or equal to the greenhouse gases emitted. The offset of greenhouse gas emissions shall not result in disadvantaged communities having to bear a disproportionate burden of environmental impacts.

c. The department shall verify that greenhouse gas emission offset projects authorized pursuant to this subdivision represent greenhouse gas equivalent emission reductions or carbon sequestration that are real, additional, verifiable, enforceable, and permanent.

d. Any greenhouse gas emissions offset project shall comply with all of the requirements of this subdivision.

e. The department shall establish an application process that, at a minimum, requires a source to sufficiently demonstrate that compliance with the greenhouse gas emissions limits is not technologically feasible, and that the source has reduced emissions to the maximum extent practicable. After an initial four year period, the department shall review the participation of a source in this mechanism, and make a determination as to the source's continued need for an alternative compliance, considering the extent to which the source is utilizing the best available technology standards.

f. Sources in the electric generation sector shall not be eligible to participate in such mechanism.

g. The following types of projects shall be prohibited:

i. waste-to-energy projects, including incineration and pyrolysis; and

ii. biofuels used for energy or transportation purposes.

h. Any greenhouse gas emission offset project approved by the department shall:

i. be designed to provide a discernable benefit to the environment rather than to the source;

ii. be located in the same county, and within twenty-five linear miles, of the source of emissions, to the extent practicable;

iii. enhance the conditions of the ecosystem or geographic area adversely affected; and

iv. substantially reduce or prevent the generation or release of pollutants through source reduction.

i. A greenhouse gas emission offset project shall not be approved by the department where the project:

i. is required pursuant to any local, state or federal law, regulation, or administrative or judicial order;

ii. contains measures which the source would have undertaken anyway within the next five years;

iii. contributes to environmental research at a college or university;
or

iv. is a study or assessment without a commitment to implement the results.

j. In approving greenhouse gas emission offset projects, the department shall prioritize projects that maximize public health and environmental benefits within the state and especially localized benefits in disadvantaged communities, defined pursuant to section 75-0111 of this article.

k. The department shall establish a public registry of greenhouse gas emission offset projects approved pursuant to this subdivision.

l. Prior to the inclusion of any alternative compliance mechanism in the regulations, to the extent feasible and in the furtherance of achieving the statewide greenhouse gas emissions limit, the department shall do all of the following:

i. consult with the council, the environmental justice advisory group, and the climate justice working group;

ii. consider the potential for direct, indirect, and cumulative emission impacts from this mechanism, including localized impacts in disadvantaged communities as identified pursuant to section 75-0111 of this article;

iii. design the alternative compliance mechanism to prevent any increase in the emissions of co-pollutants; and

iv. maximize additional environmental, public health, and economic benefits for the state and for disadvantaged communities identified pursuant to section 75-0111 of this article, as appropriate.

§ 75-0111. Climate justice working group.

1. There is hereby created within the department, no later than six months after the effective date of this article, a "climate justice working group". Such working group will be comprised of representatives from: environmental justice communities, the department, the department of health, the New York state energy and research development authority, and the department of labor.

a. Environmental justice community representatives shall be members of communities of color, low-income communities, and communities bearing disproportionate pollution and climate change burdens, or shall be representatives of community-based organizations with experience and a history of advocacy on environmental justice issues, and shall include at least three representatives from New York city communities, three representatives from rural communities, and three representatives from upstate urban communities.

b. The working group, in consultation with the department, the departments of health and labor, the New York state energy and research development authority, and the environmental justice advisory group, will establish criteria to identify disadvantaged communities for the purposes of co-pollutant reductions, greenhouse gas emissions reductions, regulatory impact statements, and the allocation of investments related to this article.

c. Disadvantaged communities shall be identified based on geographic, public health, environmental hazard, and socioeconomic criteria, which shall include but are not limited to:

i. areas burdened by cumulative environmental pollution and other hazards that can lead to negative public health effects;

ii. areas with concentrations of people that are of low income, high unemployment, high rent burden, low levels of home ownership, low levels of educational attainment, or members of groups that have historically experienced discrimination on the basis of race or ethnicity; and

iii. areas vulnerable to the impacts of climate change such as flooding, storm surges, and urban heat island effects.

2. Before finalizing the criteria for identifying disadvantaged communities and identifying disadvantaged communities pursuant to subdivision one of this section, the department shall publish draft criteria and a draft list of disadvantaged communities and make such information available on its website.

a. The council shall hold at least six regional public hearings on the draft criteria and the draft list of disadvantaged communities, including three meetings in the upstate region and three meetings in the downstate region, and shall allow at least one hundred twenty days for the submission of public comment.

b. The council shall also ensure that there are meaningful opportunities for public comment for all segments of the population that will be impacted by the criteria, including persons living in areas that may be identified as disadvantaged communities under the proposed criteria.

3. The group will meet no less than annually to review the criteria and methods used to identify disadvantaged communities and may modify such methods to incorporate new data and scientific findings. The climate justice working group shall review identities of disadvantaged communities and modify such identities as needed.

§ 75-0113. Value of carbon.

1. No later than one year after the effective date of this article, the department, in consultation with the New York state energy research and development authority, shall establish a social cost of carbon for use by state agencies, expressed in terms of dollars per ton of carbon dioxide equivalent.

2. The social cost of carbon shall serve as a monetary estimate of the value of not emitting a ton of greenhouse gas emissions. As determined by the department, the social cost of carbon may be based on marginal greenhouse gas abatement costs or on the global economic, environmental, and social impacts of emitting a marginal ton of greenhouse gas emissions into the atmosphere, utilizing a range of appropriate discount rates, including a rate of zero.

3. In developing the social cost of carbon, the department shall consider prior or existing estimates of the social cost of carbon issued or adopted by the federal government, appropriate international bodies, or other appropriate and reputable scientific organizations.

§ 75-0115. Community air monitoring program.

1. For purposes of this section, the following definitions and related provisions shall apply:

a. "Community air monitoring system" means advanced sensing monitoring equipment that measures and records air pollutant concentrations in the ambient air at or near sensitive receptor locations in disadvantaged communities.

b. "Disadvantaged community" means a community identified as disadvantaged pursuant to the criteria set forth in section 75-0111 of this article.

c. "Sensitive receptors" includes hospitals, schools and day care

centers, and such other locations as the department may determine.

2. a. On or before October first, two thousand twenty-two, the department shall prepare, in consultation with the climate justice working group, a program demonstrating community air monitoring systems.

b. The program shall identify the highest priority locations in disadvantaged communities around the state to deploy community air monitoring systems, which shall be communities with potentially high exposure burdens for toxic air contaminants and criteria air pollutants. The program shall be undertaken in no less than four communities statewide with regional consideration.

c. The department shall publish the air quality data produced by the community air monitoring systems deployed pursuant to this section on its website as it becomes available.

3. On or before June first, two thousand twenty-four, the department shall prepare, in consultation with the climate justice working group, a strategy to reduce emissions of toxic air contaminants and criteria air pollutants in disadvantaged communities affected by a high cumulative exposure burden. The strategy shall include criteria for the development of community emission reduction programs. The criteria presented in the strategy shall include, but are not limited to, the following:

a. an assessment and identification of communities with high cumulative exposure burdens for toxic air contaminants and criteria air pollutants.

b. a methodology for assessing and identifying the contributing sources or categories of sources, including, but not limited to, stationary and mobile sources, and an estimate of their relative contribution to elevated exposure to air pollution in impacted communities identified pursuant to paragraph a of this subdivision.

c. an assessment of the existing and available measures for reducing emissions from the contributing sources or categories of sources

identified pursuant to paragraph b of this subdivision.

4. a. Based on the assessment and identification of disadvantaged communities with high cumulative exposure burdens for toxic air contaminants and criteria air pollutants completed pursuant to paragraph a of subdivision three of this section, the department shall select disadvantaged communities around the state for preparation of community emissions reduction programs. The department may select additional locations annually thereafter, as appropriate.

b. The department shall have the authority to adopt regulations establishing programs to achieve emissions reductions for the locations selected using the most cost-effective measures identified pursuant to paragraph c of subdivision three of this section.

§ 75-0117. Investment of funds.

State agencies, authorities and entities, in consultation with the environmental justice working group and the climate action council, shall, to the extent practicable, invest or direct available and relevant programmatic resources in a manner designed to achieve a goal for disadvantaged communities to receive forty-five percent of overall benefits of spending on clean energy and energy efficiency programs, projects or investments in the areas of housing, workforce development, pollution reduction, low income energy assistance, energy, transportation and economic development, provided however, that disadvantaged communities shall receive no less than forty percent of the overall benefits of spending on clean energy and energy efficiency programs, projects or investments and provided further that this section shall not alter funds already contracted or committed as of the effective date of this section.

§ 75-0119. Implementation reporting.

1. The department in consultation with the council shall, not less

than every four years after the promulgation of regulations pursuant to section 75-0109 of this article, publish a report which shall include recommendations regarding the implementation of greenhouse gas reduction measures.

2. The report shall, at minimum, include:

a. Whether the state is on track to meet the statewide greenhouse gas emissions limits established in section 75-0107 of this article.

b. An assessment of existing regulations and whether modifications are needed to ensure fulfillment of the statewide greenhouse gas emissions limits.

c. An overview of social benefits from the regulations or other measures, including reductions in greenhouse gas emissions and copollutants, diversification of energy sources, and other benefits to the economy, environment, and public health.

d. An overview of compliance costs for regulated entities and for the department and other state agencies.

e. Whether regulations or other greenhouse gas reduction measures undertaken are equitable, minimize costs and maximize the total benefits to the state, and encourage early action.

f. Whether activities undertaken to comply with state regulations disproportionately burden disadvantaged communities as identified pursuant to section 75-0111 of this article.

g. An assessment of local benefits and impacts of any reductions in co-pollutants related to reductions in statewide and local greenhouse gas emissions.

h. An assessment of disadvantaged communities' access to or community ownership of the services and commodities identified in section six of the chapter of the laws of two thousand nineteen which added this

article.

i. Whether entities that have voluntarily reduced their greenhouse gas emissions prior to the implementation of this article receive appropriate credit for early voluntary reductions.

j. Recommendations for future regulatory and policy action.

3. In preparing this report, the department shall, at a minimum, consult with the council, and the climate justice working group established in section 75-0111 of this article.

4. The report shall be published and posted on the department's website.

ARTICLE 76

CLIMATE CHANGE ADAPTATION COST RECOVERY PROGRAM

Section 76-0101. Definitions.

76-0103. The climate change adaptation cost recovery program.

76-0105. Requirements for climate change adaptive infrastructure projects.

§ 76-0101. Definitions.

For the purposes of this article the following terms shall have the following meanings:

1. "Affiliate" means, with respect to any specified entity, an entity that directly, or indirectly through one or more intermediaries, controls or is controlled by, or is under common control with, the entity specified.

2. "Applicable payment date" means December thirty-first of the fourth calendar year following the year in which this article is enacted into law.

3. "Climate change adaptive infrastructure project" means an infrastructure project for purposes of climate change adaptation that:

a. includes but is not limited to projects designed to avoid, moderate, repair, or adapt to negative impacts caused by climate change, and to assist communities, households, and businesses in preparing for future climate change-driven disruptions. Such project types include but are not limited to restoring coastal wetlands and developing other nature-based solutions and coastal protections; upgrading storm water drainage systems; making defensive upgrades to roads, bridges, subways, and transit systems; preparing for and recovering from hurricanes and other extreme weather events; undertaking preventive health care programs and providing medical care to treat illness or injury caused by the effects of climate change; relocating, elevating, or retrofitting wastewater treatment plants vulnerable to flooding; installing energy efficient cooling systems and other weatherization and energy efficiency upgrades and retrofits in public and private buildings, including schools and public housing; upgrading parts of the electrical grid to increase stability and resilience, including supporting the creation of self-sufficient clean energy microgrids; addressing urban heat island effects through green spaces, urban forestry, and other interventions; and responding to harmful algal blooms, loss of agricultural topsoil, and other climate-driven ecosystem threats to forests, farms, fisheries, and food systems; and

b. is guided by the project criteria identified in the statewide climate change adaptation and resilience plan adopted pursuant to subdivision six of section 76-0103 of this article.

4. "Control" (including the terms controlling, controlled by and under common control with) means the possession, direct or indirect, of the power to direct or cause the direction of the management and policies of an entity, whether through the ownership of voting securities, by contract, or otherwise.

5. "Controlled group" means two or more entities that are affiliates

of each other.

6. "Cost recovery amount" means seventy-five billion dollars.

7. "Cost recovery demand" means the portion of the cost recovery amount determined by the department pursuant to the program to be owed by a responsible party for payment to the fund.

8. "Covered greenhouse gas emissions" means, with respect to any entity, the total quantity of greenhouse gas emissions, expressed in metric tons of carbon dioxide equivalent, as defined in section 75-0101 of this chapter, attributable to the total amount of fossil fuels extracted by that entity during the covered period, as well as the total amount of crude oil refined by that entity during the covered period. For the purposes of this article, covered greenhouse gas emissions include those emissions attributable to all fossil fuel extraction and refining worldwide by such entity and are not limited to such emissions within the state.

9. "Covered period" means the period that began January first, two thousand and ended on December thirty-first, two thousand twenty-four.

10. "Crude oil" means oil or petroleum of any kind and in any form, including bitumen, oil sands, heavy oil, conventional and unconventional oil, shale oil, natural gas liquids, condensates, and related fossil fuels.

11. "Entity" means any individual, trustee, agent, partnership, association, corporation, company, municipality, political subdivision, or other legal organization, that holds or held an ownership interest in a fossil fuel business during the covered period. For purposes of this article, entities in a controlled group are treated as a single entity for the purposes of meeting the definition of responsible party and shall be jointly and severally liable for payment of any cost recovery demand owed by any entity in the controlled group.

12. "Fossil fuel" shall have the same definition as in section 1-103

of the energy law.

13. "Fossil fuel business" means a business engaging in the extraction of fossil fuels or the refining of petroleum products.

14. "Fund" means the climate change adaptation fund established pursuant to section ninety-seven-m of the state finance law.

15. "Greenhouse gas" shall have the same definition as in section 75-0101 of this chapter.

16. "Nature-based solutions" shall mean projects that utilize or mimic nature or natural processes and functions and that may also offer environmental, economic, and social benefits, while increasing resilience. Nature-based solutions include both green and natural infrastructure.

17. "Notice of cost recovery demand" means the written communication informing an entity that they are a responsible party and of the amount of the cost recovery demand payable to the fund.

18. "Petroleum products" shall have the same definition as in section 1-103 of the energy law.

19. "Program" means the climate change adaptation cost recovery program established under section 76-0103 of this article.

20. "Qualifying expenditure" means a payment from the fund in support of a climate change adaptive infrastructure project, including its operation and maintenance, as defined by the department.

21. "Responsible party" means any entity (or a successor in interest to such entity described herein), which, during any part of the covered period, was engaged in the trade or business of extracting fossil fuel or refining crude oil and is determined by the department to be responsible for more than one billion tons of covered greenhouse gas emissions. The term responsible party shall not include any person who

lacks sufficient contacts with the state to satisfy the due process clause of the United States Constitution.

§ 76-0103. The climate change adaptation cost recovery program.

1. There is hereby established a climate change adaptation cost recovery program to be administered by the department.

2. The purposes of the program shall be the following:

a. To secure compensatory payments from responsible parties based on a standard of strict liability to provide a source of revenue for climate change adaptive infrastructure projects within the state. Such payments in aggregate shall total the cost recovery amount and shall be due and payable on the applicable payment date.

b. To determine proportional liability of responsible parties for the cost recovery amount pursuant to subdivision three of this section;

c. To impose cost recovery demands on responsible parties and issue notices of cost recovery demand;

d. To accept and collect payment from responsible parties;

e. To identify climate change adaptive infrastructure projects;

f. To disperse funds to climate change adaptive infrastructure projects; and

g. To allocate funds in such a way as to achieve a goal that at least forty percent of the qualified expenditures from the program, but not less than thirty-five percent of such expenditures, shall go to climate change adaptive infrastructure projects that benefit disadvantaged communities as defined in section 75-0101 of this chapter.

3. a. A responsible party shall be strictly liable, without regard to

fault, for a share of the cost recovery amount, which shall be used for the costs of climate change adaptive infrastructure projects, including their operation and maintenance, supported by the fund.

b. With respect to each responsible party, the cost recovery demand shall be equal to an amount that bears the same ratio to the cost recovery amount as the responsible party's applicable share of covered greenhouse gas emissions bears to the aggregate applicable shares of covered greenhouse gas emissions of all responsible parties.

c. The applicable share of covered greenhouse gas emissions taken into account under this section for any responsible party shall be the amount by which the covered greenhouse gas emissions attributable to such responsible party exceeds one billion metric tons.

d. In determining the amount of greenhouse gas emissions attributable to any entity, the department may: i. require an entity to provide information to the department related to past practices, production, extraction, refining, emissions, or other historical information about such entity necessary or appropriate to enable the department to determine whether such entity is a responsible party and, if so, the amount of such responsible party's covered greenhouse gas emissions; ii. apply consistent emissions factors, consistent with the climate leadership and community protection act pursuant to chapter one hundred six of the laws of two thousand nineteen, to convert extraction and refining data into greenhouse gas emissions; and iii. utilize information received from the department of taxation and finance pursuant to subdivision (a) of section three hundred fourteen of the tax law.

e. i. The department shall issue notices of cost recovery demand to all responsible parties at the times set forth in paragraph a of subdivision four of this section. Payment of a cost recovery demand shall be made in full on the applicable payment date provided that, notwithstanding paragraph a of subdivision two of this section, the department may provide that a responsible party may elect to pay an amount no greater than ninety-two percent of the amount of the cost

recovery demand after the applicable payment date. Any such payments permitted to be made after the applicable payment date shall be made within twenty-four years of the applicable payment date, shall be no less frequent than annual beginning in the year following the applicable payment date, and shall not increase over time.

ii. Any responsible party who fails to make a payment required pursuant to this subdivision shall pay a penalty of fifty per centum of the unpaid payment amount, plus interest on the unpaid payment amount computed in accordance with section 6621(a)(2) of the United States internal revenue code of 1986 (Public Law 99-514, 26 U.S.C. section 1 et seq.) from the date the payment was required to be paid.

f. If there is any addition to the original amount of the final cost recovery demand as of the applicable payment date for failure to timely pay any amount required to be paid under this subdivision, a liquidation or sale of substantially all the assets of the responsible party (including in a proceeding under U.S. Code: Title 11 or similar case), a cessation of business by the responsible party, or any similar circumstance, then the unpaid balance of all unpaid amounts shall be due on the date of such event (or in the case of a proceeding under U.S. Code: Title 11 or similar case, on the day before the petition is filed). The preceding sentence shall not apply to the sale of substantially all of the assets of a responsible party to a buyer if such buyer enters into an agreement with the department under which such buyer is liable for all unpaid amounts due in the same manner as if such buyer were the responsible party.

4. a. Within thirty months of the effective date of this article, the department shall promulgate such regulations as are necessary or appropriate to carry out this article, including but not limited to:

i. provisions for the department to require an entity to provide information to the department related to past practices, production, extraction, refining, emissions, or other historical information about such entity necessary or appropriate to enable the department to determine whether such entity is a responsible party and, if so, the

amount of such responsible party's covered greenhouse gas emissions;

ii. adopting uniform and consistent methodologies using the best available information, such as publicly available databases of historical production data, to determine responsible parties and their applicable share of covered greenhouse gas emissions consistent with the provisions of this article;

iii. registering entities that are responsible parties under the program;

iv. issuing notices of cost recovery demand, no later than June thirtieth of the fourth calendar year following the effective date of this article, for each responsible party's cost recovery demand;

v. establishing a process such that:

(1) a responsible party may file a request for reconsideration of its cost recovery demand with the department within sixty days following service of the notice of cost recovery demand if within the United States, and within ninety days following such service outside the United States, and in doing so shall exhaust administrative remedies;

(2) a request for reconsideration shall state the grounds for the request and include supporting documentation, which may include but is not limited to documentation of the party's covered greenhouse gas emissions and the party's contacts with the state;

(3) the department shall consider whether any such requests for reconsideration, including whether a responsible party refining petroleum products, or who is a successor in interest to such an entity, establishes to the satisfaction of the department that a portion of the cost recovery demand amount was attributable to the refining of crude oil extracted by a responsible party, or who is a successor in interest to such an entity, that was accounted for in determining the cost recovery demand amount of such responsible party, and whether notices of cost recovery demand should be updated, and shall issue updated notices of cost recovery demand, if applicable, which shall include a statement of the grounds of the department's determination, within sixty days following the expiration of all periods for submitting a request for

reconsideration under item one of this subparagraph;

(4) if notices of cost recovery demand issued pursuant to item three of this subparagraph result in a new responsible party receiving a notice of cost recovery demand that was not issued a notice of cost recovery demand by the date required by subparagraph iv of this paragraph, then, in the same manner as set forth in items one, two and three of this subparagraph, such responsible party shall have sixty days from service within the United States, and ninety days from service outside the United States, to file a request for reconsideration, which filing shall exhaust such responsible party's administrative remedies, and the department shall consider such request for reconsideration and issue updated notices of cost recovery demand, if applicable, in the manner contemplated by item three of this subparagraph;

(5) if any updating of notices of cost recovery demand pursuant to such processes for reconsideration results in a new responsible party that was not previously issued a cost recovery demand, such new responsible party shall also be given the opportunity to file a request for reconsideration in the same manner as set forth in item four of this subparagraph, and such process shall continue until no new responsible party results from issuance of notices of cost recovery demand; and

(6) if the processes in this subparagraph result in issuances of notices of cost recovery demand after the applicable payment date, then the applicable payment date shall be the date which is thirty days after the final issuance of notices of cost recovery demand; and

vi. accepting payments from, pursuing collection efforts against, and negotiating settlements with responsible parties.

b. The department shall hold at least two public hearings, one in-person and one virtual, on proposed regulations, with a minimum of thirty days' public notice in compliance with the provisions of article seven of the public officers law.

5. The department shall develop procedures to make publicly available, by posting on its website, all data related to fossil fuel extraction and refining by entities which the department obtains pursuant to the program, to the maximum extent practicable.

6. Within eighteen months of the promulgation of the final regulations pursuant to subdivision four of this section, the department shall complete a statewide climate change adaptation and resilience plan, which shall be publicly available, including at a minimum on the department's website, and updated no less than every three years following the procedures of this subdivision, for the purpose of guiding the dispersal of funds, pursuant to section ninety-seven-m of the state finance law, to all regions of the state in a timely, efficient, and equitable manner in accordance with the provisions of this chapter. In completing such plan, the department shall:

a. collaborate with the department of state, homes and community renewal, the department of agriculture and markets, the New York state energy research and development authority, the department of public service, the department of transportation, the department of health, the division of budget and the division of homeland security and emergency services;

b. assess the adaptation needs of various areas vital to the state's economy, normal functioning, and the health and well-being of New Yorkers, including but not limited to: agriculture, biodiversity, ecosystem services, education, finance, healthcare, manufacturing, housing and land use, retail, tourism (including state and municipal parks), transportation, and municipal and local government.

c. identify major potential, proposed, and ongoing climate change adaptive infrastructure projects throughout the state;

d. identify opportunities for alignment with existing federal, state, and local funding streams;

e. identify potential municipal, not-for-profit, and community organization grant programs;

f. include in such plan project criteria, project types and recommendations for identifying and selecting climate change adaptive

infrastructure projects eligible to receive qualifying expenditures. When considering projects intended to stabilize tidal shorelines, the department shall encourage the use of nature-based solutions;

g. consult with stakeholders, including local governments, businesses, environmental advocates, the federally designated bulk system operator, relevant subject area experts, and representatives of disadvantaged communities; and

h. provide opportunities for public engagement in all regions of the state, including by holding at least two public hearings, one in-person and one virtual, with meaningful opportunities for participation and public comment from all segments of the population, including persons living in disadvantaged communities as identified pursuant to section 75-0111 of this chapter, a minimum of sixty days' public notice in compliance with the provisions of article seven of the public officers law, on a draft of the plan, a summary and analysis of the public comments and a description of any changes made to the plan based on the public comments received.

7. Total qualifying expenditures shall be allocated in such a way as to achieve a goal that at least forty percent of the qualified expenditures from the program, but not less than thirty-five percent of such expenditures, shall go to climate change adaptive infrastructure projects that benefit disadvantaged communities as defined in section 75-0101 of this chapter.

8. The department and the attorney general are hereby authorized to implement and enforce the provisions of this article.

9. Moneys received from cost recovery demands shall be deposited in the climate change adaptation fund established pursuant to section ninety-seven-m of the state finance law.

10. a. The department shall conduct an evaluation of the climate change adaptation cost recovery program. The purpose of this evaluation is to determine the effectiveness of the program in achieving its

purposes as defined in subdivision two of this section. Such evaluation shall include, at minimum:

i. a list of all responsible parties and their respective cost recovery demands, as well as any changes to an entity's status as a responsible party during the preceding program year;

ii. an accounting of all cost recovery demands made to responsible parties, actual monies collected, and penalties or other collection measures taken during the preceding program year;

iii. an accounting of all expenditures from the climate change adaptation fund established pursuant to section ninety-seven-m of the state finance law, including at a minimum:

(1) expenditures that benefit disadvantaged communities as defined in section 75-0101 of this chapter;

(2) expenditures by project type;

(3) expenditures by percentage of overall funding used for grant programs for municipalities and not-for-profit and community organizations; and

(4) expenditures for administration and implementation support;

iv. a review of climate change adaptive infrastructure projects' status, including the number of projects that have been completed and those projects which have been identified and remain unfunded;

v. a summary of the geographic distribution of climate change adaptive infrastructure projects; and

vi. identification of future spending needs.

b. Such evaluation shall be made public on the department's website and provided to the governor, the temporary president of the senate and the speaker of the assembly on or before January first of the second calendar year following the year in which this article is enacted into law, and annually on or before September thirtieth thereafter.

11. The department shall publish all information, requests for proposals, application forms, procedures and guidelines relating to climate change adaptive infrastructure projects on its website and in a manner that is accessible to the public and all potential recipients.

§ 76-0105. Requirements for climate change adaptive infrastructure projects.

For each contract for climate change adaptive infrastructure projects, funded in part or in whole from the climate change adaptation fund established pursuant to section ninety-seven-m of the state finance law, by a public entity, or a third party acting on behalf and for the benefit of a public entity, the "public work" for the purposes of this subdivision shall ensure that such contract shall contain a provision that the iron and steel used or supplied in the performance of the contract or any subcontract thereto, shall be produced or made in whole or substantial part in the United States, its territories or possessions. In the case of an iron or steel product all manufacturing must take place in the United States, from the initial melting stage through the application of coatings, except metallurgical processes involving the refinement of steel additives.
