Commissioner of Environmental Conservation shall evaluate the role of the commission with respect to the waters within and commingled with those in New York over which the commission has jurisdiction and shall report to the commission thereon. The Commissioner of Environmental Conservation shall transmit a copy of such report to the Governor. The Commissioner of Environmental Conservation may make such additional reports to the commission and the Governor as he deems appropriate.

TITLE 5

TRI-STATE COMPACT AND INTERSTATE ENVIRONMENTAL COMMISSION

Section 21-0501. Tri-state compact.

21-0503. Commissioners.

21-0505. Cooperation of other officers and agencies.

21-0507. Enforcement proceedings.

21-0509. Powers to be additional; inconsistent provisions.

21-0511. Further pollution.

21-0513. Hearings.

21-0515. Preparation of plan; consultation.

21-0517. Report and recommendations.

21-0519. Budget.

21-0521. Financial examination.

21-0523. Evaluation.

21-0525. Interstate air pollution.

§ 21-0501. Tri-state compact.

The tri-state compact as first entered into pursuant to chapter 4 of the laws of 1936, as reenacted by chapter 476 of the laws of 1961, and as amended by chapter 1046 of the laws of 1969, is hereby continued. The compact is as follows:

TRI-STATE COMPACT

Whereas, The tremendous growth of population and the development of the territory surrounding and adjacent to the harbor of New York has resulted in recent years in an increasingly serious pollution of the

harbor, coastal and tidal waters in such area and the tributary waters therein; and

Whereas, Such pollution constitutes a grave menace to the health, welfare and recreational facilities of the people living in such area and is occasioning great economic loss; and

Whereas, The control of future pollution and the abatement of existing pollution in the waters in such area is of prime importance to the people living in such area and can best be accomplished through the co-operation of the states of New Jersey and New York and Connecticut by and through a joint or common agency;

Now, therefore, The state of New York and the state of New Jersey and the state of Connecticut do agree and are bound as follows:

ARTICLE I

1. Each of the signatory states pledges each to the other faithful co-operation in the control of future pollution and agrees to provide for the abatement of existing pollution in the tidal and coastal waters in the adjacent portions of the signatory states defined herein as coming within the district, and consistent with such object, to enact adequate legislation which will enable each of the signatory states to put and maintain the waters thereof in a satisfactory sanitary condition and particularly to protect public health; to render safe such waters as are now used or may later become available for bathing and recreational purposes; to abate and eliminate such pollution as becomes obnoxious or causes a nuisance; to permit the maintenance of major fish life, shellfish and marine life in waters now available or that may by practicable means be made available for the development of such fish, shellfish or marine life; to prevent oil, grease or solids from being carried on the surface of the water; to prevent the formation of sludge deposits along the shores or in the waterways; and with the fulfillment of these objectives to abate and avoid incurring unnecessary economic loss by safeguarding the rights of the public in its varied legitimate uses of the waters of the district.

ARTICLE II

1. To that end they do agree that there shall be created and they do hereby create a district to be known as the Interstate Environmental District (hereinafter referred to as the district) which shall embrace the territory described as follows:

All of the coastal, estuarial and tidal waters within or covering portions of the signatory states as follows:

(a) In Connecticut, Long Island sound and estuaries and tidal waters thereof between the easterly side of New Haven harbor at Morgan Point and the Connecticut-New York state boundary, and the Housatonic river up to the northerly boundary lines of the towns of Stratford and Milford.

(b) In New York, all of the tidal waters of Greater New York city; including Kill Van Kull and Arthur Kill, Long Island Sound and the estuaries and tidal waters thereof between the New York city line and the New York-Connecticut state boundary and between the New York city line and the easterly side of Port Jefferson harbor; the Atlantic ocean and the estuaries and tidal waters thereof between the New York city line and the easterly side of Fire Island inlet; and the Hudson river and estuaries and tidal waters thereof between the New York and New Jersey state boundary and the northerly line of Rockland county on the westerly side and between the northerly line of New York city and the northerly line of Westchester county on the easterly side of the river.

(c) In New Jersey, the Hudson river and New York upper bay and estuaries and tidal waters thereof between the New York-New Jersey boundary and Constable Point on Constable Hook, the Kill Van Kull and Arthur Kill to the mouths of the rivers entering into the Kills; Newark bay and the estuaries thereof up to the mouth of the Passaic river; and up to the mouth of the Hackensack river; Raritan bay together with the Raritan river up to the Victory bridge on said river between Perth Amboy and South Amboy; together with the Cheesequake creek up to the New York and Long Branch Railroad bridge on said creek at Morgan; together with the Matawan creek up to the New York and Long Branch Railroad bridge on said creek at Matawan; Sandy Hook bay; together with the Shrewsbury river up to the passenger railroad bridge between Navesink Light and Highland Beach on said river.

ARTICLE III

1. There is hereby created the Interstate Environmental Commission (hereinafter referred to as the commission) which shall be a body corporate and politic, having the powers, duties and jurisdiction herein enumerated and such other and additional powers as shall be conferred upon it by the act or acts of a signatory state concurred in by the others and by the act or acts of congress when necessary.

ARTICLE IV

1. The commission shall consist of five commissioners from each state, each of whom shall be a resident voter of the state from which he is appointed.

The commissioners shall be chosen in the manner and for the terms provided by law of the state from which they shall be appointed, and each commissioner may be removed or suspended from office as provided by the law of the state from which he shall be appointed. The commissioners shall serve without compensation, but shall be paid their actual expenses incurred and incident to the performance of their duties.

ARTICLE V

1. The commission shall elect from its number a chairman and vice-chairman and shall appoint and at its pleasure remove or discharge such officers and legal, clerical, expert and other assistants as may be required to carry the provisions of this compact into effect, and shall fix and determine their duties, qualifications and compensations.

It shall adopt a seal and suitable by-laws and shall promulgate rules and regulations for its management and control. It may maintain one or more offices for the transaction of its business and may meet at any time or place within the signatory states.

A majority of the members from each state shall constitute a quorum for the transaction of business, the exercise of any powers, or the performance of any duties, but no action of the commission shall be binding unless at least three of the members from each state shall vote in favor thereof.

The commission shall keep accurate accounts of all receipts and disbursements and shall make an annual report to the governor and the legislature of each state setting forth in detail the operations and transactions conducted by it pursuant to this compact, and shall make recommendations for any legislative action deemed by it advisable, including amendments to the statutes of the signatory states which may be necessary to carry out the intent and purpose of this compact, and changes in the district which concentration of population or other cause may require.

The commission shall not incur any obligations for salaries, office or other administrative expenses prior to the making of appropriations adequate to meet the same; nor shall the commission pledge the credit of any of the signatory states except by and with the authority of the legislatures thereof. Each state reserves the right to provide hereafter by law for the examination and audit of the accounts of the commission by its comptroller or other official.

The commissioners shall meet and organize within ten days after the effective date of this compact.

ARTICLE VI

1. It is recognized by the signatory states that, where tidal waters are used for such varied purposes as bathing, navigation, shellfish culture, the development of fish life and the disposal of wastes, no single standard of purity is practicable in all parts of the district. In order to attain the objects of this compact, the commission, after proper study and after conducting public hearings upon due notice, shall group the designated waters of the district into classes. Where local conditions shall have changed in the future to such an extent that changes in classification become necessary, the commission may, after conducting public hearings upon due notice, adopt such changes.

Two general classifications shall be used:

(1) Class "A", in which the designated water areas are expected to be used primarily for recreational purposes, shellfish culture or the

development of fish life;

(2) Class "B", in which the designated water areas are not expected to be used primarily for recreational purposes, shellfish culture or the development of fish life.

ARTICLE VII

1. It is agreed between the signatory states that no sewage or other polluting matters shall be discharged or permitted to flow into, or be placed in, or permitted to fall or move into the tidal waters of the district, except under the following conditions and restrictions:

(1) All sewage discharged or permitted to flow into Class "A" waters of the district shall first have been so treated as

(a) to remove all floating solids and at least sixty per centum (60%) of the suspended solids; and

(b) to effect a reduction of organisms of the B. Coli group (intestinal bacilli) so that the probable number of such organisms shall not exceed one per cubic centimeter in more than fifty per centum (50%) of the samples of sewage effluent tested by the partially confirmed test; provided, however, that in the case of discharge into waters used primarily for bathing this bacterial standard need not be required except during the bathing season; and

(c) to effect a reduction in the oxygen demand of the sewage effluent sufficient to maintain an average dissolved oxygen content in the tidal waters of the district and in the general vicinity of the point of discharge of the sewage into those waters, at a depth of about five feet below the surface, of not less than fifty per centum (50%) saturation during any week of the year.

2. All sewage discharged or permitted to flow into class "B" waters of the district shall first have been so treated as

(a) to remove all floating solids and at least ten per centum (10%) of the suspended solids, or such additional percentage as may by reason of local conditions be necessary to avoid the formation of sludge deposits in the class "B" waters of the district; and

(b) to effect a reduction in the oxygen demand of the sewage effluent sufficient to maintain an average dissolved oxygen content in the tidal waters of the district and in the general vicinity of the point of

discharge of the sewage into those waters, at a depth of about five feet below the surface, of not less than thirty per centum (30%) saturation during any week of the year.

ARTICLE VIII

1. Each of the signatory states agrees, that in so far as waters within its jurisdiction may flow into any portion of the district, all sewage discharged or permitted to flow into any stream tributary to the tidal waters of the district shall be treated to that extent, if any, which may be necessary to maintain such tributary immediately above its confluence with the tidal waters of the district in a sanitary condition at least equal to the classification requirements determined by the commission for the tidal waters of the district into which it discharges. The waters of the Hudson river, immediately above the mouth of Sparkhill creek on the westerly side and the New York-New Jersey boundary extended on the easterly side of the river, shall be maintained in a sanitary condition at ebb tide at least equal to the sanitary condition prevailing in the waters of the river immediately below said boundary at flood tide.

ARTICLE IX

1. Nothing in this compact shall be construed to repeal or prevent the enactment of any legislation or the enforcement of any requirement by any signatory state imposing any additional conditions and restrictions to further lessen or prevent the pollution of waters within its jurisdiction.

ARTICLE X

1. Subject to the provisions of this compact the commission, as soon as may be after its organization, after an investigation and after conducting public hearings upon due notice, shall by order prescribe the reasonable date on or before which each municipality or other entity discharging sewage into the designated waters within the district shall be treating such sewage in accordance with the standards specified in this compact. And such order may prescribe that certain specific progress shall be made at certain definite time prior to the final date fixed in such order.

It is the desire of all parties to accomplish the objects herein set forth with the least possible injury to investments which have already been made in the construction of sewage treatment plants within the district, and where changes or additions to such plants would be necessary to conform to the standards herein adopted, a reasonable time to effect such changes or additions may, in the discretion of the commission, be granted.

ARTICLE XI

1. Each of the signatory states agrees that it will prohibit the pollution of the said waters within the district in accordance with the several articles of this compact, and that it will enact suitable and adequate legislation which will accomplish effectively the objects of this compact and which will enable its officers, departments, boards and agents to accomplish satisfactorily the obligations and duties assumed by the state under the terms of this compact, and it is further agreed that the courts of the several states shall have jurisdiction to enforce as against any person, corporation, municipality or other entity or any employee, department or subdivision of the respective signatory states any and all provisions of this compact.

The commission shall have authority to investigate and determine if the requirements of the compact and/or the orders of the commission pursuant thereto are complied with and if satisfactory progress has not been made, to bring action in its own name in the proper court or courts to compel the enforcement of any and all the provisions of this compact, and/or the orders of the commission pursuant thereto.

ARTICLE XII

1. In order that future pollution be controlled and existing pollution be abated with the greatest possible economy and efficiency, the commission shall co-operate and advise with the respective state and district authorities having jurisdiction over stream pollution, with a view to coordinating their activities and securing the most satisfactory results at lower cost. For such purpose the commission may prepare a general plan of the most practicable and economical method of securing

conformity with the standards herein set forth, having in view the future growth and development of the district. Such plan when completed shall be submitted to the governor and the legislature of each state and to the state agency or agencies or district agencies in charge of sewage problems.

The provisions of this act shall not affect the discharge from the outfall pipes of the Passaic valley sewerage system into the water of New York harbor; provided, however, that said discharge shall be in accordance with the terms and provisions of the stipulation entered into on April fourteenth, one thousand nine hundred ten, between the United States of America and Passaic valley sewerage commissioners.

ARTICLE XIII

1. Terms used in this compact are defined as follows:

"District" means the area more particularly described in article two of this compact.

"Commission" means the Interstate Environmental Commission.

"Municipality" means any city, incorporated village, borough, county, town, township, district, or any municipality governed by an improvement commission, any joint sewer commission, or any other subdivision of any one of the signatory states, located within the district.

"Rule" or "Regulation" means any rule or regulation established by the commission not inconsistent with the constitution of the United States or of any signatory state, promulgated by the commission touching the abatement or pollution of the waters of the district.

"Tidal waters" means all those waters which ebb and flow within the designated district.

"Dissolved oxygen" is the gaseous oxygen held in solution by the water at any given time. It is expressed as a percentage of the maximum amount of oxygen that would be required to saturate the water under the existing conditions of temperature and salinity.

"Pollution" is any foreign matter which renders waters unfit to sustain fish life and unsatisfactory for bathing.

"Sewage effluent" means the treated sewage discharged from a treatment plant.

"Suspended solids" means those solid particles carried in suspension

in the untreated sewage or sewage effluent.

"Entity" means any organization or association owning, controlling or operating a sewerage system or treatment plant within a municipality.

ARTICLE XIV

1. The signatory states agree to appropriate annually for the salaries, office and other administrative expenses such sum or sums as shall be recommended by the commission and approved by the governors of the signatory states, the state of New York and the state of New Jersey agreeing each to appropriate forty-five per centum (45%) thereof, and the state of Connecticut agreeing to appropriate ten per centum (10%) thereof. The state of New York and the state of New Jersey obligate themselves hereunder, however, only to the extent of fifteen thousand dollars (\$15,000.00) each in any one year, and the state of Connecticut obligated itself hereunder only to the extent of three thousand, three hundred thirty-three dollars and thirty-four cents (\$3,333.34) in any one year.

ARTICLE XV

1. Should any part of this compact be held to be contrary to the constitution of any signatory state or of the United States, all other severable objects of this compact shall continue to be in full force and effect.

ARTICLE XVI

1. This compact shall become effective as to the state of New Jersey and the state of New York immediately upon the signing thereof by the representatives of such states, and thereafter it shall also become effective as to the state of Connecticut immediately upon the signing thereof by the representatives of such state; provided, however, that prior to the signing of this compact by the representatives of the state of Connecticut the district as set forth in article two shall not embrace any territory within the jurisdiction of the state of Connecticut, nor shall the commission exercise any jurisdiction or perform any duties or acts affecting such territory; and the appropriations for salaries, office and other administrative expenses shall be borne equally by the state of New York and the state of New

Jersey.

2. Nothing herein contained shall affect or abate any action now pending brought by any governmental board or body created by or existing under any of the signatory states.

ARTICLE XVII

In addition to, or in substitution for, the classifications of waters set forth in Articles VI and VII of this compact and the effluent standards made applicable thereto, the Commission may develop and, after public hearing place in force other classifications of waters and effluent standards within the District. Such classifications shall be on the basis of present or intended uses of the waters in question and shall be accompanied by requirements governing the quality of effluents, receiving waters, or both, as the public interest may make appropriate.

Classifications, standards, and requirements adopted pursuant to this Article shall be developed and may be revised with due consideration for uniformity of requirements relating to the quality of effluents and receiving waters within the same classification in all parts of the District.

Classifications made pursuant to this Article shall be governed by and shall implement any water and related land resource plans, water use plans or pollution control plans adopted by appropriate agencies of the signatory states, acting singly or in concert, or through joint intergovernmental agencies. Any exercise of authority by the Commission pursuant to this Article shall be subject to any procedural requirements, if applicable, that may be contained in federal law.

Nothing contained in this Article shall be construed to abridge or limit any power otherwise existing of a signatory state to make and enforce classifications, standards, and requirements for effluents and receiving waters.

§ 21-0503. Commissioners.

1. The Governor shall, by and with the advice and consent of the senate, appoint four commissioners to the interstate environmental commission created by the tri-state compact, each of whom shall be a resident voter of the state of New York. The Commissioner of Environmental Conservation, and each of his successors in such office, also shall be a commissioner of the interstate environmental commission. Each commissioner shall hold office until his successor has been appointed and qualified. The commissioners serving on the effective date of this article shall continue in office until the expiration of their terms, or until their successors have qualified, or until otherwise ceasing to be commissioners pursuant to law. The Commissioner of Environmental Conservation may appoint a member of his department to act as his statutory representative on the commission.

2. At the expiration of the term of each appointive commissioner and of each succeeding appointive commissioner, the Governor shall, by and with the advice and consent of the senate, appoint a successor who shall hold office for a term of four years or until his successor has been appointed and qualified. In the event of a vacancy occurring in the office of an appointive commissioner by death, resignation or otherwise, the Governor shall, by and with the advice and consent of the senate, appoint a successor, who shall hold office for the unexpired term. Any commissioner may be removed upon charges and after hearing by the Governor. The commissioners shall have the powers and duties, and be subject to the limitations provided for in the compact and applicable laws of this state. The commissioners shall serve without compensation, but shall be paid their actual expenses incurred and incident to the performance of their duties.

§ 21-0505. Cooperation of other officers and agencies.

All state and municipal departments, commissions, boards and bodies having to do with the waters of the state shall cooperate with the commission and shall furnish to the commission such information as the commission shall request, touching the pollution or the elimination

thereof, of the waters of the district.

§ 21-0507. Enforcement proceedings.

Whenever the interstate environmental commission shall be of the opinion that any person, association or corporation, municipal or otherwise, within the district is failing or omitting, or about to fail or omit to do anything required of it by its order or by the laws governing the control or elimination of pollution of the waters of the district, or is doing or is about to do anything, or permitting or about to permit anything to be done contrary to or in violation of such orders or such laws, or the provisions of the compact, it may direct its legal representative to commence an action or a proceeding in the name of the interstate environmental commission in an appropriate court having jurisdiction for the purpose of having such violations or threatened violations stopped and prevented. Such an action or proceeding when directed against any person, firm, association, corporation, municipal or otherwise, within the state may be brought in the supreme court of this state and the said court shall have and is hereby given the necessary and appropriate jurisdiction to determine such action or proceeding upon the merits and/or to grant any relief appropriate to the case.

§ 21-0509. Powers to be additional; inconsistent provisions.

Any powers herein granted to the interstate environmental commission shall be regarded as in aid of and supplemental to, and in no case a limitation upon, any other powers legally vested in said commission. No provision of the Public Health Law and no provision of the Environmental Conservation Law, if such provision of the Environmental Conservation Law was derived from a provision of the Public Health Law, which is inconsistent with the provisions of the tri-state compact shall be applicable to the interstate environmental commission or to any matter governed by the tri-state compact.

§ 21-0511. Further pollution.

No person, firm or corporation, municipal or otherwise, shall create, establish, cause or maintain any source of pollution within the district, not existing on April 1, 1935; provided, however, that after hearing and investigation on application of such person, firm or corporation, municipal or otherwise, the commission may issue such order relating to any such pollution as it shall find will best serve the public interest.

§ 21-0513. Hearings.

Whenever the commission shall determine upon investigation that sewage or other polluting matter from any city, village, town, county, borough, municipality or other entity, as defined in the compact, building, steamboat, or other vessel, or any garbage, offal or any decomposable or putrescible matter of any kind is being discharged into any waters of the district, and whenever in the opinion of the commission such discharge is polluting such waters in a manner injurious to or so as to create a menace to public health, welfare and recreational purposes, or so as to create a public nuisance, or so as to be obnoxious, the commission may order the municipality, corporation or person so discharging sewage, refuse or other matter, to show cause before it or its duly designated representative why such discharge should not be discontinued or why said commission should not issue an order regulating such pollution. A notice shall be served on the municipality, corporation or person so discharging sewage, refuse or other matter, directing such municipality, corporation or person to show cause before the said commission on a date specified in such notice why an order should not be made directing the discontinuance of such discharge or otherwise regulating the said pollution. Such notice shall specify the time when and place where a public hearing will be held by the commission or its duly delegated representative and shall be served personally, or by mail at least fifteen days before said hearing, and in case of a municipality or a corporation, such service shall be upon an

officer thereof. The person or persons presiding at such hearing shall take evidence, and after conducting such public hearing, the commission shall by order prescribe a reasonable date on or before which such municipality, corporation or person discharging sewage, refuse or other matter into the designated waters within the district, shall cease to discharge such refuse or other matter and shall treat such sewage in accordance with the standards specified in the compact, and such order may prescribe that certain specific progress shall be made at definite times prior to the final date fixed in such order. The commission shall have authority to require from the officials and persons responsible for the execution of such orders satisfactory evidence at specified times of proper progress in the execution of such orders.

§ 21-0515. Preparation of plan; consultation.

The commission may prepare a general plan of the most practicable and economical method of securing conformity with the standards set forth in the compact, having in view the future growth and development of the district, and to that end shall cooperate and advise with the respective state authorities having jurisdiction over stream pollution and any other bodies having to do with sewage and garbage disposal and the pollution of the waters of the district, with the secretary of the army of the United States, with appropriate committees of congress and any and all other federal authorities having jurisdiction in the premises, with representatives of chambers of commerce and other civic bodies within the district, and with such bodies, commissions and legislative committees as may exist or be created in any of the signatory states, for the purpose of bringing about a comprehensive program for the abatement and elimination of pollution.

§ 21-0517. Report and recommendations.

The commission shall keep accurate accounts of all receipts and disbursements and shall report to the Governor and the legislature of this state on or before the twenty-fifth day of January in each year,

setting forth in detail the transactions conducted by it and shall make recommendations for any legislative action deemed by it advisable, including amendments to the statutes of the signatory states which may be necessary to carry out the intent and purposes of the compact.

§ 21-0519. Budget.

1. The interstate environmental commission shall submit annually to the Governor in accordance with the laws and practice of this state, for study and consideration by him, an estimate of moneys required to administer, manage and support the commission during the ensuing fiscal year. Such estimate shall include any request for appropriation of funds by New York and shall be accompanied by a tabulation of similar requests which the commission expects to make to each other member state and the formula or factors upon which such respective requests are based.

2. The Commissioner of Environmental Conservation shall be afforded an opportunity to comment on any budget request by the commission, and the commission shall be furnished with a copy of any such comments.

§ 21-0521. Financial examination.

The Comptroller of the state of New York is hereby authorized and empowered, from time to time, to examine the accounts and books of the commission including its receipts, disbursements and such other items referring to its financial standing as such Comptroller may deem proper and to report the results of such examination to the Governor of such state.

§ 21-0523. Evaluation.

On August 15, 1964, and at intervals of four years thereafter, the Commissioner of Environmental Conservation shall evaluate the role of the commission with respect to the waters within and commingled with

those in New York, and any other matter over which the commission has jurisdiction and shall report to the commission thereon. The Commissioner of Environmental Conservation shall transmit a copy of such report to the Governor. The Commissioner of Environmental Conservation may make such additional reports to the commission and the Governor as he deems appropriate.

§ 21-0525. Interstate air pollution.

When the state of New Jersey shall have enacted legislation of substantially similar import and for so long as such legislation of the state of New Jersey remains in force, the interstate environmental commission shall, in addition to its other powers, duties and functions have authority, in accordance with article three of the tri-state compact set forth in section 21-0501 of this chapter, to engage in activities with respect to interstate air pollution problems between the states of New York and New Jersey as follows:

- a. to conduct studies;
- b. to undertake research, testing and development;
- c. to gather, exchange and disseminate information with and among public or private bodies, persons or organizations and to cooperate with any of them in solving air pollution problems;
- d. to take samplings and to trace sources of air pollutants;
- e. to refer complaints to an appropriate enforcement agency or agencies of the states in which the sources are located and to which air pollutants are carried, along with such data and information as it may have obtained with respect to the nature, characteristics, source, path and effect of air pollutants;
- f. whenever found appropriate on the basis of such studies and research, (1) to make recommendations and reports to the governors and

legislatures of the participating states;

(2) to recommend to the legislatures, air pollution control agencies and municipalities of the states the establishment of such specific control and enforcement measures as may be necessary to abate air pollution in one state which endangers the health and welfare of people in another state;

(3) to join in a requirement upon the federal Administrator of the Environmental Protection Agency that he convene a conference pursuant to the federal clean air act, and to participate in such a conference; and

(4) to recommend and assist in the establishment of air pollution monitoring systems and air pollution warning systems.

The primary effort of the interstate environmental commission under this act shall be directed to air contaminant solids, liquids or gases which are toxic, disagreeable or irritant, or which are destructive.

In carrying out its functions under this act, the interstate environmental commission shall make use of the services, facilities and information of existing state, local and federal agencies wherever feasible and available.

In furtherance of the purposes of this act, the interstate environmental commission is empowered to accept moneys, property and other donations or gifts from any person whatever, whether public, private or governmental, real or artificial.

No trade secret or secret process shall be inquired into by the interstate environmental commission under this act, whether with respect to one or more of the substances or one or more of the processes, operations, techniques or devices used in connection therewith, and whenever a trade secret or secret process is involved, the activity under this act shall be limited to the identification of the device or facility from which the effluent discharged into the outer air derives, and the nature, rate and period of emission of such effluent.

All information obtained from any sampling, tracing or other specific inquiry performed under this act shall be kept and maintained as a

confidential disclosure and, except as may be essential for the purpose of referring a complaint to an appropriate enforcement agency and of any enforcement proceeding by or before any such agency, shall not be disclosed or published in any way other than such as will not identify a given substance, process, operation, technique or device with the physical location or identity of the source plant or facility, or with the product made or service performed, or with the person or persons using the same.

A printed copy of the provisions of this section shall be furnished on request to any person furnishing information to the interstate environmental commission and, in case of an inquiry at a plant or facility, to the person then in charge of the same.

So long as the activities conducted pursuant to this act are limited to the states of New York and New Jersey, all of the costs and expenses of the same, direct and indirect, shall be met, within the limits of available appropriations therefor, by said two states in equal shares and all actions of the interstate environmental commission with respect to such activities shall be governed solely by the commissioners from the states of New York and New Jersey, with like effect as though the state of Connecticut were not a participant of said commission, and for this purpose the commission shall establish administratively a separate division on interstate air pollution, and maintain separate financial accounts to reflect its direct and allocated costs and expenses; provided, however, that the full commission, including the members representing the state of Connecticut, shall rule on all matters touching the accounting systems to be used and the charging and allocation of costs and expenses.

TITLE 7

DELAWARE RIVER BASIN COMPACT

Section 21-0701. Delaware river basin compact.

21-0703. Commissioner and alternate.

21-0705. Advisors.

21-0707. Consent to alteration of diversions.

21-0709. Jurisdiction of courts.
21-0711. Prior to project approval.
21-0713. Agreements with municipalities.
21-0715. Delegations of power.
21-0716. Report and recommendations of department.
21-0717. Cooperative services.
21-0719. Budget.
21-0721. Audit.
21-0723. Inconsistent laws.

§ 21-0701. Delaware river basin compact.

The Delaware river basin compact as first entered into pursuant to chapter 148 of the laws of 1961, as renumbered by chapter 801 of the laws of 1962, and as amended by chapter 262 of the laws of 1970, is hereby continued as follows:

The Delaware river basin compact is hereby entered into and enacted into law, subject to the execution by the Governor as provided in said compact and in accordance with its terms. The compact is as follows:

WHEREAS the signatory parties recognize the water and related resources of the Delaware basin as regional assets vested with local, state and national interests, for which they have a joint responsibility; and

WHEREAS the conservation, utilization, development, management and control of the water and related resources of the Delaware River Basin under a comprehensive multi-purpose plan will bring the greatest benefits and produce the most efficient service in the public welfare; and

WHEREAS such a comprehensive plan administered by a basin-wide agency will provide effective flood damage reduction; conservation and development of ground and surface water supply for municipal, industrial and agricultural uses; development of recreational facilities in

relation to reservoirs, lakes and streams; propagation of fish and game; promotion of related forestry, soil conservation and watershed projects; protection and aid to fisheries dependent upon water resources; development of hydro-electric power potentialities; improved navigation; control of the movement of salt water; abatement and control of stream pollution; and regulation of stream flows toward the attainment of these goals; and

WHEREAS decisions of the United States Supreme Court relating to the waters of the basin have confirmed the interstate regional character of the water resources of the Delaware River Basin, and the United States Corps of Engineers has in a prior report on the Delaware River Basin (House Document 179, 73d Cong., 2nd Sess.) officially recognized the need for an interstate agency and the economies that can result from unified development and control of the water resources of the basin; and

WHEREAS the water resources of the basin are presently subject to the duplicating, overlapping and uncoordinated administration of some 43 state agencies, 14 interstate agencies and 19 federal agencies which exercise a multiplicity of powers and duties resulting in a splintering of authority and responsibilities; and

WHEREAS the joint advisory body known as the Interstate Commission on the Delaware River Basin (INCodel), created by the respective commissions or committee on Interstate Cooperation of the States of Delaware, New Jersey, New York and Pennsylvania, has on the basis of its extensive investigations, surveys and studies concluded that regional development of the Delaware River Basin is feasible, advisable and urgently needed; and has recommended that an interstate compact with federal participation be consummated to this end; and

WHEREAS the Congress of the United States and the executive branch of the government have recognized the national interest in the Delaware River Basin by authorizing and directing the Corps of Engineers, U.S. Department of the Army, to make a comprehensive survey and report on the water and related resources of the Delaware River Basin, enlisting the technical aid and planning participation of many federal, state and

municipal agencies dealing with the waters of the basin, and in particular the federal departments of Agriculture, Commerce, Health, Education and Welfare, Interior, and Federal Power Commission; and

WHEREAS some 22,000,000 people of the United States at present live and work in the region of the Delaware River Basin and its environs, and the government, employment, industry and economic development of the entire region and the health, safety and general welfare of its population are and will continue to be vitally affected by the use, conservation, management and control of the water and related resources of the Delaware River Basin; and

WHEREAS demands upon the waters and related resources of the basin are expected to mount rapidly because of the anticipated increase in the population of the region projected to reach 30,000,000 by 1980 and 40,000,000 by 2010, and because of the anticipated increase in industrial growth projected to double by 1980; and

WHEREAS water resources planning and development is technical, complex and expensive, and has often required fifteen to twenty years from the conception to the completion of a large dam and reservoir; and

WHEREAS the public interest requires that facilities must be ready and operative when needed, to avoid the catastrophe of unexpected floods or prolonged drought, and for other purposes; and

WHEREAS the Delaware River Basin Advisory Committee, a temporary body constituted by the governors of the four basin states and the mayors of the cities of New York and Philadelphia, has prepared a draft of an interstate-federal compact for the creation of a basin agency, and the signatory parties desire to effectuate the purposes thereof;

Now therefore the states of Delaware, New Jersey and New York and the Commonwealth of Pennsylvania, and the United States of America hereby solemnly covenant and agree with each other, upon the enactment of concurrent legislation by the Congress of the United States and by the respective state legislatures, having the same effect as this Part as

follows:

ARTICLE 1--SHORT TITLE, DEFINITIONS, PURPOSE AND LIMITATIONS

Section 1.1 Short title.

This act shall be known and may be cited as the Delaware River Basin Compact.

1.2. Definitions.

For the purposes of this compact, and of any supplemental or concurring legislation enacted pursuant thereto, except as may be otherwise required by the context:

(a) "Basin" shall mean the area of drainage into the Delaware River and its tributaries, including Delaware Bay;

(b) "Commission" shall mean the Delaware River Basin Commission created and constituted by this compact;

(c) "Compact" shall mean the compact as contained title 7 of article 21 of the Environmental Conservation Law.

(d) "Cost" shall mean direct and indirect expenditures, commitment, and net induced adverse effects, whether or not compensated for, used or incurred in connection with the establishment, acquisition, construction, maintenance and operation of a project;

(e) "Facility" shall mean any real or personal property, within or without the basin, and improvements thereof or thereon, and any and all rights of way, water, water rights, plants, structures, machinery and equipment, acquired, constructed, operated or maintained for the beneficial use of water resources or related land uses including, without limiting the generality of the foregoing, any and all things and appurtenances necessary, useful or convenient for the control, collection, storage, withdrawal, diversion, release, treatment, transmission, sale or exchange of water; or for navigation thereon, or the development and use of hydroelectric energy and power, and public recreational facilities; or the propagation of fish and wildlife; or to conserve and protect the water resources of the basin or any existing or future water supply source, or to facilitate any other uses of any of them;

(f) "Federal government" shall mean the government of the United States of America, and any appropriate branch, department, bureau or

division thereof, as the case may be;

(g) "Project" shall mean any work, service or activity which is separately planned, financed, or identified by the commission, or any separate facility undertaken or to be undertaken within a specified area, for the conservation, utilization, control, development or management of water resources which can be established and utilized independently or as an addition to an existing facility, and can be considered as a separate entity for purposes of evaluation;

(h) "Signatory party" shall mean a state or commonwealth party to this compact, and the federal government;

(i) "Water resources" shall include water and related natural resources in, on, under, or above the ground, including related uses of land, which are subject to beneficial use, ownership or control.

1.3 Purpose and findings.

The legislative bodies of the respective signatory parties hereby find and declare:

(a) The water resources of the basin are affected with a local, state, regional and national interest and their planning, conservation, utilization, development, management and control, under appropriate arrangements for intergovernmental cooperation, are public purposes of the respective signatory parties.

(b) The water resources of the basin are subject to the sovereign right and responsibility of the signatory parties, and it is the purpose of this compact to provide for a joint exercise of such powers of sovereignty in the common interests of the people of the region.

(c) The water resources of the basin are functionally interrelated, and the uses of these resources are interdependent. A single administrative agency is therefore essential for effective and economical direction, supervision and coordination of efforts and programs of federal, state and local governments and of private enterprise.

(d) The water resources of the Delaware River Basin, if properly planned and utilized, are ample to meet all presently projected demands, including existing and added diversions in future years; and ever increasing economies and efficiencies in the use and reuse of water resources can be brought about by comprehensive planning, programming

and management.

(e) In general, the purposes of this compact are to promote interstate comity; to remove causes of present and future controversy; to make secure and protect present developments within the states; to encourage and provide for the planning, conservation, utilization, development, management and control of the water resources of the basin; to provide for cooperative planning and action by the signatory parties with respect to such water resources; and to apply the principle of equal and uniform treatment to all water users who are similarly situated and to all users of related facilities, without regard to established political boundaries.

1.4 Powers of Congress; withdrawal.

Nothing in this compact shall be construed to relinquish the functions, powers or duties of the Congress of the United States with respect to the control of any navigable waters within the basin, nor shall any provision hereof be construed in derogation of any of the constitutional powers of the Congress to regulate commerce among the states and with foreign nations. The power and right of the Congress to withdraw the federal government as a party to this compact or to revise or modify the terms, conditions and provisions under which it may remain a party by amendment, repeal or modification of any federal statute applicable thereto is recognized by the signatory parties.

1.5 Existing agencies; construction.

It is the purpose of the signatory parties to preserve and utilize the functions, powers and duties of existing offices and agencies of government to the extent not inconsistent with this compact, and the commission is authorized and directed to utilize and employ such offices and agencies for the purpose of this compact to the fullest extent it finds feasible and advantageous.

1.6 Duration of compact.

(a) The duration of this compact shall be for an initial period of 100 years from its effective date, and it shall be continued for additional periods of 100 years if not later than 20 years nor sooner than 25 years prior to the termination of the initial period or any succeeding period none of the signatory states, by authority of an act of its legislature,

notifies the commission of intention to terminate the compact at the end of the then current 100 year period.

(b) In the event that this compact should be terminated by operation of paragraph (a) above, the commission shall be dissolved, its assets and liabilities transferred, and its corporate affairs wound up, in such manner as may be provided by act of the Congress.

ARTICLE 2--ORGANIZATION AND AREA

Section 2.1 Commission created.

The Delaware River Basin Commission is hereby created as a body politic and corporate, with succession for the duration of this compact, as an agency and instrumentality of the governments of the respective signatory parties.

2.2 Commission membership.

The commission shall consist of the Governors of the signatory states, ex officio, and one commissioner to be appointed by the President of the United States to serve during the term of office of the President.

2.3 Alternates.

Each member of the commission shall appoint an alternate to act in his place and stead, with authority to attend all meetings of the commission, and with power to vote in the absence of the member. Unless otherwise provided by law of the signatory party for which he is appointed, each alternate shall serve during the term of the member appointing him, subject to removal at the pleasure of the member. In the event of a vacancy in the office of alternate, it shall be filled in the same manner as an original appointment for the unexpired term only.

2.4 Compensation.

Members of the commission and alternates shall serve without compensation but may be reimbursed for necessary expenses incurred in and incident to the performance of their duties.

2.5 Voting power.

Each member shall be entitled to one vote on all matters which may come before the commission. No action of the commission shall be taken

at any meeting unless a majority of the membership shall vote in favor thereof.

2.6 Organization and procedure.

The commission shall provide for its own organization and procedure, and shall adopt rules and regulations governing its meetings and transactions. It shall organize annually by the election of a chairman and vice-chairman from among its members. It shall provide by its rules for the appointment by each member in his discretion of an advisor to serve without compensation, who may attend all meetings of the commission and its committees.

2.7 Jurisdiction of the commission.

The commission shall have, exercise and discharge its functions, powers and duties within the limits of the basin, except that it may in its discretion act outside the basin whenever such action may be necessary or convenient to effectuate its powers or duties within the basin, or to sell or dispose of water, hydroelectric power or other water resources within or without the basin. The commission shall exercise such power outside the basin only upon the consent of the state in which it proposes to act.

ARTICLE 3--POWERS AND DUTIES OF THE COMMISSION

Section 3.1 Purpose and policy.

The commission shall develop and effectuate plans, policies and projects relating to the water resources of the basin. It shall adopt and promote uniform and coordinated policies for water conservation, control, use and management in the basin. It shall encourage the planning, development and financing of water resources projects according to such plans and policies.

3.2 Comprehensive plan, program and budgets.

The commission shall, in accordance with Article 13 of this compact, formulate and adopt:

(a) A comprehensive plan, after consultation with water users and interested public bodies, for the immediate and long range development and uses of the water resources of the basin;

(b) A water resources program, based upon the comprehensive plan, which shall include a systematic presentation of the quantity and quality of water resources needs of the area to be served for such reasonably foreseeable period as the commission may determine, balanced by existing and proposed projects required to satisfy such needs, including all public and private projects affecting the basin, together with a separate statement of the projects proposed to be undertaken by the commission during such period; and

(c) An annual current expense budget, and an annual capital budget consistent with the water resources program covering the commission's projects and facilities for the budget period.

3.3 Allocations, diversions and releases.

The commission shall have the power from time to time as need appears, in accordance with the doctrine of equitable apportionment, to allocate the waters of the basin to and among the states signatory to this compact and to and among their respective political subdivisions, and to impose conditions, obligations and release requirements related thereto, subject to the following limitations:

(a) The commission, without the unanimous consent of the parties to the United States Supreme Court decree in *New Jersey v. New York*, 347 U.S. 995 (1954), shall not impair, diminish or otherwise adversely affect the diversions, compensating releases, rights, conditions, obligations, and provisions for the administration thereof as provided in said decree; provided, however, that after consultation with the river master under said decree the commission may find and declare a state of emergency resulting from a drought or catastrophe and it may thereupon by unanimous consent of its members authorize and direct an increase or decrease in any allocation or diversion permitted or releases required by the decree, in such manner and for such limited time as may be necessary to meet such an emergency condition.

(b) No allocation of waters hereafter made pursuant to this section shall constitute a prior appropriation of the waters of the basin or confer any superiority of right in respect to the use of those waters, nor shall any such action be deemed to constitute an apportionment of the waters of the basin among the parties hereto; provided that this paragraph shall not be deemed to limit or restrict the power of the

commission to enter into covenants with respect to water supply, with a duration not exceeding the life of this compact, as it may deem necessary for the benefit or development of the water resources of the basin.

(c) Any proper party deeming itself aggrieved by action of the commission with respect to an out-of-basin diversion or compensating releases in connection therewith, notwithstanding the powers delegated to the commission by this compact may invoke the original jurisdiction of the United States Supreme Court within one year after such action for an adjudication and determination thereof de novo. Any other action of the commission pursuant to this section shall be subject to judicial review in any court of competent jurisdiction.

3.4 Supreme court decree; waivers.

Each of the signatory states and their respective political subdivisions, in consideration of like action by the others, and in recognition of reciprocal benefits, hereby waives and relinquishes for the duration of this compact any right, privilege or power it may have to apply for any modification of the terms of the decree of the United States Supreme Court in *New Jersey v. New York*, 347 U.S. 995 (1954) which would increase or decrease the diversions authorized or increase or decrease the releases required thereunder, except that a proceeding to modify such decree to increase diversions or compensating releases in connection with such increased diversions may be prosecuted by a proper party to effectuate rights, powers, duties and obligations under Section 3.3 of this compact, and except as may be required to effectuate the provisions of paragraphs III B 3 and V B of said decree.

3.5 Supreme court decree; specific limitations on commission.

Except as specifically provided in Sections 3.3 and 3.4 of this article, nothing in this compact shall be construed in any way to impair, diminish or otherwise adversely affect the rights, powers, privileges, conditions and obligations contained in the decree of the United States Supreme Court in *New Jersey v. New York*, 347 U.S. 995 (1954). To this end, and without limitation thereto, the commission shall not:

(a) Acquire, construct or operate any project or facility or make any

order or take any action which would impede or interfere with the rights, powers, privileges, conditions or obligations contained in said decree;

(b) Impose or collect any fee, charge or assessment with respect to diversions of waters of the basin permitted by said decree;

(c) Exercise any jurisdiction, except upon consent of all the parties to said decree, over the planning, design, construction, operation or control of any projects, structures or facilities constructed or used in connection with withdrawals, diversions and releases of waters of the basin authorized by said decree or of the withdrawals, diversions or releases to be made thereunder; or

(d) Serve as river master under said decree, except upon consent of all the parties thereto.

3.6 General powers.

The commission may:

(a) Plan, design, acquire, construct, reconstruct, complete, own, improve, extend, develop, operate and maintain any and all projects, facilities, properties, activities and services, determined by the commission to be necessary, convenient or useful for the purposes of this compact;

(b) Establish standards of planning, design and operation of all projects and facilities in the basin which affect its water resources, including without limitation thereto water and waste treatment plants, stream and lake recreational facilities, trunk mains for water distribution, local flood protection works, small watershed management programs, and ground water recharging operations;

(c) Conduct and sponsor research on water resources, their planning, use, conservation, management, development, control and protection, and the capacity, adaptability and best utility of each facility thereof, and collect, compile, correlate, analyze, report and interpret data on water resources and uses in the basin, including without limitation thereto the relation of water to other resources, industrial water technology, ground water movement, relation between water price and water demand, and general hydrological conditions;

(d) Compile and coordinate systematic stream stage and ground water level forecasting data, and publicize such information when and as

needed for water uses, flood warning, quality maintenance or other purposes;

(e) Conduct such special ground water investigations, tests, and operations and compile such data relating thereto as may be required to formulate and administer the comprehensive plan;

(f) Prepare, publish and disseminate information and reports with respect to the water problems of the basin and for the presentation of the needs, resources and policies of the basin to executive and legislative branches of the signatory parties;

(g) Negotiate for such loans, grants, services or other aids as may be lawfully available from public or private sources to finance or assist in effectuating any of the purposes of this compact; and to receive and accept such aid upon such terms and conditions, and subject to such provisions for repayment as may be required by federal or state law or as the commission may deem necessary or desirable;

(h) Exercise such other and different powers as may be delegated to it by this compact or otherwise pursuant to law, and have and exercise all powers necessary or convenient to carry out its express powers or which may be reasonably implied therefrom.

3.7 Rates and charges.

The commission may from time to time after public notice and hearing fix, alter and revise rates, rentals, charges and tolls and classifications thereof, for the use of facilities which it may own or operate and for products and services rendered thereby, without regulation or control by any department, office or agency of any signatory party.

3.8 Referral and review.

No project having a substantial effect on the water resources of the basin shall hereafter be undertaken by any person, corporation or governmental authority unless it shall have been first submitted to and approved by the commission, subject to the provisions of Sections 3.3 and 3.5. The commission shall approve a project whenever it finds and determines that such project would not substantially impair or conflict with the comprehensive plan and may modify and approve as modified, or may disapprove any such project whenever it finds and determines that

the project would substantially impair or conflict with such plan. The commission shall provide by regulation for the procedure of submission, review and consideration of projects, and for its determinations pursuant to this section. Any determination of the commission hereunder shall be subject to judicial review in any court of competent jurisdiction.

3.9 Coordination and cooperation.

The commission shall promote and aid the coordination of the activities and programs of federal, state, municipal and private agencies concerned with water resources administration in the basin. To this end, but without limitation thereto, the commission may:

(a) Advise, consult, contract, financially assist, or otherwise cooperate with any and all such agencies;

(b) Employ any other agency or instrumentality of any of the signatory parties or of any political subdivision thereof, in the design, construction, operation and maintenance of structures, and the installation and management of river control systems, or for any other purpose;

(c) Develop and adopt plans and specifications for particular water resources projects and facilities which so far as consistent with the comprehensive plan incorporate any separate plans of other public and private organizations operating in the basin, and permit the decentralized administration thereof;

(d) Qualify as a sponsoring agency under any federal legislation heretofore or hereafter enacted to provide financial or other assistance for the planning, conservation, utilization, development, management or control of water resources.

3.10 Advisory committees.

The commission may constitute and empower advisory committees, which may be comprised of representatives of the public and of federal, state, county and municipal governments, water resources agencies, water-using industries, water-interest groups, labor and agriculture.

ARTICLE 4--WATER SUPPLY

Section 4.1 Generally.

The commission shall have power to develop, implement and effectuate plans and projects for the use of the waters of the basin for domestic, municipal, agricultural and industrial water supply. To this end, without limitation thereto, it may provide for, construct, acquire, operate and maintain dams, reservoirs and other facilities for utilization of surface and ground water resources, and all related structures, appurtenances and equipment on the river and its tributaries and at such off-river sites as it may find appropriate, and may regulate and control the use thereof.

4.2 Storage and release of waters.

(a) The commission shall have power to acquire, operate and control projects and facilities for the storage and release of waters, for the regulation of flows and supplies of surface and ground waters of the basin, for the protection of public health, stream quality control, economic development, improvement of fisheries, recreation, dilution and abatement of pollution, the prevention of undue salinity and other purposes.

(b) No signatory party shall permit any augmentation of flow to be diminished by the diversion of any water of the basin during any period in which waters are being released from storage under the direction of the commission for the purpose of augmenting such flow, except in cases where such diversion is duly authorized by this compact, or by the commission pursuant thereto, or by the judgment, order or decree of a court of competent jurisdiction.

4.3 Assessable improvements.

The commission may undertake to provide stream regulation in the main stream or any tributary in the basin and may assess on an annual basis or otherwise the cost thereof upon water users or any classification of them specially benefited thereby to a measurable extent, provided that no such assessment shall exceed the actual benefit to any water user. Any such assessment shall follow the procedure prescribed by law for local improvement assessments and shall be subject to judicial review in any court of competent jurisdiction.

4.4 Coordination.

Prior to entering upon the execution of any project authorized by this

article, the commission shall review and consider all existing rights, plans and programs of the signatory parties, their political subdivisions, private parties, and water users which are pertinent to such project, and shall hold a public hearing on each proposed project.

4.5 Additional powers.

In connection with any project authorized by this article, the commission shall have power to provide storage, treatment, pumping and transmission facilities, but nothing herein shall be construed to authorize the commission to engage in the business of distributing water.

ARTICLE 5--POLLUTION CONTROL

Section 5.1 General powers.

The commission may undertake investigations and surveys, and acquire, construct, operate and maintain projects and facilities to control potential pollution and abate or dilute existing pollution of the water resources of the basin. It may invoke as complainant the power and jurisdiction of water pollution abatement agencies of the signatory parties.

5.2 Policy and standards.

The commission may assume jurisdiction to control future pollution and abate existing pollution in the waters of the basin, whenever it determines after investigation and public hearing upon due notice that the effectuation of the comprehensive plan so requires. The standard of such control shall be that pollution by sewage or industrial or other waste originating within a signatory state shall not injuriously affect waters of the basin as contemplated by the comprehensive plan. The commission, after such public hearing may classify the waters of the basin and establish standards of treatment of sewage, industrial or other waste, according to such classes including allowance for the variable factors of surface and ground waters, such as size of the stream, flow, movement, location, character, self-purification, and usage of the waters affected. After such investigation, notice and hearing the commission may adopt and from time to time amend and repeal rules, regulations and standards to control such future pollution and

abate existing pollution, and to require such treatment of sewage, industrial or other waste within a time reasonable for the construction of the necessary works as may be required to protect the public health or to preserve the waters of the basin for uses in accordance with the comprehensive plan.

5.3 Cooperative legislation and administration.

Each of the signatory parties covenants and agrees to prohibit and control pollution of the waters of the basin according to the requirements of this compact and to cooperate faithfully in the control of future pollution in and abatement of existing pollution from the rivers, streams, and waters in the basin which flow through, under, into or border upon any of such signatory states, and in order to effect such object, agrees to enact any necessary legislation to enable each such party to place and maintain the waters of said basin in a satisfactory condition, available for safe and satisfactory use as public and industrial water supplies after reasonable treatment, suitable for recreational usage, capable of maintaining fish and other aquatic life, free from unsightly or malodorous nuisances due to floating solids or sludge deposits and adaptable to such other uses as may be provided by the comprehensive plan.

5.4 Enforcement.

The commission may, after investigation and hearing, issue an order or orders upon any person or public or private corporation, or other entity, to cease the discharge of sewage, industrial or other waste into waters of the basin which it determines to be in violation of such rules and regulations as it shall have adopted for the prevention and abatement of pollution. Any such order or orders may prescribe the date, including a reasonable time for the construction of any necessary works, on or before which such discharge shall be wholly or partially discontinued, modified or treated, or otherwise conformed to the requirements of such rules and regulations. Such order shall be reviewable in any court of competent jurisdiction. The courts of the signatory parties shall have jurisdiction to enforce against any person, public or private corporation, or other entity, any and all provisions of this Article or of any such order. The commission may bring an action

in its own name in any such court of competent jurisdiction to compel compliance with any provision of this Article, or any rule or regulation issued pursuant thereto or of any such order, according to the practice and procedure of the court.

5.5 Further jurisdiction.

Nothing in this compact shall be construed to repeal, modify or qualify the authority of any signatory party to enact any legislation or enforce any additional conditions and restrictions to lessen or prevent the pollution of waters within its jurisdiction.

ARTICLE 6--FLOOD PROTECTION

Section 6.1 General powers.

The commission may plan, design, construct and operate and maintain projects and facilities, as it may deem necessary or desirable for flood damage reduction. It shall have power to operate such facilities and to store and release waters on the Delaware River and its tributaries and elsewhere within the basin, in such manner, at such times, and under such regulations as the commission may deem appropriate to meet flood conditions as they may arise.

6.2 Flood plain zoning.

(a) The commission shall have power to adopt, amend and repeal recommended standards, in the manner provided by this section, relating to the nature and extent of the uses of land in areas subject to flooding by waters of the Delaware River and its tributaries. Such standards shall not be deemed to impair or restrict the power of the signatory parties or their political subdivisions to adopt zoning and other land use regulations not inconsistent therewith.

(b) The commission may study and determine the nature and extent of the flood plains of the Delaware River and its tributaries. Upon the basis of such studies, it may establish encroachment lines and delineate the areas subject to flood, including a classification of lands with reference to relative risk of flood and the establishment of standards for flood plain use which will safeguard the public health, safety and property. Prior to the adoption of any standards delineating such area or defining such use, the commission shall hold public hearings, in the manner provided by Article 14, with respect to the substance of such

standards. At or before such public hearings the proposed standards shall be available, and all interested persons shall be given an opportunity to be heard thereon at the hearing. Upon the adoption and promulgation of such standards, the commission may enter into agreements to provide technical and financial aid to any municipal corporation for the administration and enforcement of any local land use ordinances or regulations giving effect to such standards.

6.3 Flood lands acquisition.

The commission shall have power to acquire the fee or any lesser interest in lands and improvements thereon within the area of a flood plain for the purpose of restricting the use of such property so as to minimize the flood hazard, converting property to uses appropriate to flood plain conditions, or preventing unwarranted constrictions that reduce the ability of the river channel to carry flood water. Any such action shall be in accord with the standards adopted and promulgated pursuant to Section 6.2.

6.4 Flood and stream stage warnings and posting.

The commission may cause lands particularly subject to flood to be posted with flood hazard warnings, and may from time to time cause flood advisory notices to be published and circulated as conditions may warrant.

ARTICLE 7--WATERSHED MANAGEMENT

Section 7.1 Watersheds generally.

The commission shall promote sound practices of watershed management in the basin, including projects and facilities to retard runoff and waterflow and prevent soil erosion.

7.2 Soil conservation and forestry.

The commission may acquire, sponsor or operate facilities and projects to encourage soil conservation, prevent and control erosion, and to promote land reclamation and sound forestry practices.

7.3 Fish and wildlife.

The commission may acquire, sponsor or operate projects and facilities

for the maintenance and improvement of fish and wildlife habitats related to the water resources of the basin.

7.4 Cooperative planning and operation.

(a) The commission shall cooperate with the appropriate agencies of the signatory parties and with other public and private agencies in the planning and effectuation of a coordinated program of facilities and projects authorized by this Article.

(b) The commission shall not operate any such project or facility unless it has first found and determined that no other suitable unit or agency of government is available to operate the same upon reasonable conditions, in accordance with the intent and purpose expressed in Section 1.5 of this compact.

ARTICLE 8--RECREATION

Section 8.1 Development.

The commission shall provide for the development of water related public sports and recreational facilities. The commission on its own account or in cooperation with a signatory party, political subdivision or any agency thereof, may provide for the construction, maintenance and administration of such facilities, subject to the provisions of Section 8.2 hereof.

8.2 Cooperative planning and operation.

(a) The commission shall cooperate with the appropriate agencies of the signatory parties and with other public and private agencies in the planning and effectuation of a coordinated program of facilities and projects authorized by this article.

(b) The commission shall not operate any such project or facility unless it has first found and determined that no other suitable unit or agency of government is available to operate the same upon reasonable conditions, in accordance with the intent and purpose expressed in Section 1.5 of this compact.

8.3 Operation and maintenance.

The commission, within limits prescribed by this article, shall:

(a) Encourage activities of other public agencies having water related recreational interests and assist in the coordination thereof;

(b) Recommend standards for the development and administration of

water related recreational facilities;

(c) Provide for the administration, operation and maintenance of recreational facilities owned or controlled by the commission and for the letting and supervision of private concessions in accordance with this article.

8.4 Concessions.

The commission shall after notice and public hearing provide by regulation for the award of contracts for private concessions in connection with recreational facilities, including any renewal or extension thereof, upon sealed competitive bids after public advertisement therefor.

ARTICLE 9--HYDROELECTRIC POWER

Section 9.1 Development.

The waters of the Delaware River and its tributaries may be impounded and used by or under authority of the commission for the generation of hydroelectric power and hydroelectric energy, in accordance with the comprehensive plan.

9.2 Power generation.

The commission may develop and operate, or authorize to be developed and operated, dams and related facilities and appurtenances for the purpose of generating hydroelectric power and hydroelectric energy.

9.3 Transmission.

The commission may provide facilities for the transmission of hydroelectric power and hydroelectric energy produced by it where such facilities are not otherwise available upon reasonable terms, for the purpose of wholesale marketing of power and nothing herein shall be construed to authorize the commission to engage in the business of direct sale to consumers.

9.4 Development contracts.

The commission may after public notice and hearing enter into contracts on reasonable terms, consideration and duration under which public utilities or public agencies may develop hydroelectric power and

hydroelectric energy through the use of dams, related facilities and appurtenances.

9.5 Rates and charges.

Rates and charges fixed by the commission for power which is produced by its facilities shall be reasonable, nondiscriminatory, and just.

ARTICLE 10--REGULATION OF WITHDRAWALS AND DIVERSIONS

Section 10.1 Power of regulation.

The commission may regulate and control withdrawals and diversions from surface waters and ground waters of the basin, as provided by this article. The commission may enter into agreements with the signatory parties relating to the exercise of such power of regulation or control and may delegate to any of them such powers of the commission as it may deem necessary or desirable.

10.2 Determination of protected areas.

The commission may from time to time after public hearing upon due notice determine and delineate such areas within the basin wherein the demands upon supply made by water users have developed or threatened to develop to such a degree as to create a water shortage or to impair or conflict with the requirements or effectuation of the comprehensive plan, and any such areas may be designated as "protected areas." The commission, whenever it determines that such shortage no longer exists, shall terminate the protected status of such area and shall give public notice of such termination.

10.3 Withdrawal permits.

In any protected areas so determined and delineated, no person, firm, corporation or other entity shall divert or withdraw water for domestic, municipal, agricultural or industrial uses in excess of such quantities as the commission may prescribe by general regulation, except (i) pursuant to a permit granted under this article, or (ii) pursuant to a permit or approval heretofore granted under the laws of any of the signatory states.

10.4 Emergency.

In the event of a drought or other condition which may cause an actual and immediate shortage of available water supply within the basin, or within any part thereof, the commission may, after public hearing, determine and delineate the area of such shortage and declare a water supply emergency therein. For the duration of such emergency as determined by the commission no person, firm, corporation or other public or private entity shall divert or withdraw water for any purpose, in excess of such quantities as the commission may prescribe by general regulation or authorize by special permit granted hereunder.

10.5 Standards.

Permits shall be granted, modified or denied as the case may be so as to avoid such depletion of the natural stream flows and ground waters in the protected area or in an emergency area as will adversely affect the comprehensive plan or the just and equitable interests and rights of other lawful users of the same source, giving due regard to the need to balance and reconcile alternative and conflicting uses in the event of an actual or threatened shortage of water of the quality required.

10.6 Judicial review.

The determinations and delineations of the commission pursuant to Section 10.2 and the granting, modification or denial of permits pursuant to Section 10.3 through 10.5 shall be subject to judicial review in any court of competent jurisdiction.

10.7 Maintenance of records.

Each state shall provide for the maintenance and preservation of such records of authorized diversions and withdrawals and the annual volume thereof as the commission shall prescribe. Such records and supplementary reports shall be furnished to the commission at its request.

10.8 Existing state systems.

Whenever the commission finds it necessary or desirable to exercise the powers conferred by this article any diversion or withdrawal permits authorized or issued under the laws of any of the signatory states shall be superseded to the extent of any conflict with the control and

regulation exercised by the commission.

ARTICLE 11--INTERGOVERNMENTAL RELATIONS

Section 11.1 Federal agencies and projects.

For the purposes of avoiding conflicts of jurisdiction and of giving full effect to the commission as a regional agency of the signatory parties, the following rules shall govern federal projects affecting the water resources of the basin, subject in each case to the provisions of Section 1.4 of this compact:

(a) The planning of all projects related to powers delegated to the commission by this compact shall be undertaken in consultation with the commission;

(b) No expenditure or commitment shall be made for or on account of the construction, acquisition or operation of any project or facility nor shall it be deemed authorized, unless it shall have first been included by the commission in the comprehensive plan;

(c) Each federal agency otherwise authorized by law to plan, design, construct, operate or maintain any project or facility in or for the basin shall continue to have, exercise and discharge such authority except as specifically provided by this section.

11.2 State and local agencies and projects.

For the purpose of avoiding conflicts of jurisdiction and of giving full effect to the commission as a regional agency of the signatory parties, the following rules shall govern projects of the signatory states, their political subdivisions and public corporations affecting water resources of the basin:

(a) The planning of all projects related to powers delegated to the commission by this compact shall be undertaken in consultation with the commission;

(b) No expenditure or commitment shall be made for or on account of the construction, acquisition or operation of any project or facility unless it shall have first been included by the commission in the comprehensive plan;

(c) Each state and local agency otherwise authorized by law to plan, design, construct, operate or maintain any project or facility in or for the basin shall continue to have, exercise and discharge such authority,

except as specifically provided by this section.

11.3 Reserved taxing powers of states.

Each of the signatory parties reserves the right to levy, assess and collect fees, charges and taxes on or measured by the withdrawal or diversion of waters of the basin for use within the jurisdictions of the respective signatory parties.

11.4 Project costs and evaluation standards.

The commission shall establish uniform standards and procedures for the evaluation, determination of benefits, and cost allocations of projects affecting the basin, and for the determination of project priorities, pursuant to the requirements of the comprehensive plan and its water resources program. The commission shall develop equitable cost sharing and reimbursement formulas for the signatory parties including:

- (a) Uniform and consistent procedures for the allocation of project costs among purposes included in multiple-purpose programs;
- (b) Contracts and arrangements for sharing financial responsibility among and with signatory parties, public bodies, groups and private enterprise, and for the supervision of their performance;
- (c) Establishment and supervision of a system of accounts for reimbursable purposes and directing the payments and charges to be made from such accounts;
- (d) Determining the basis and apportioning amounts (i) of reimbursable revenues to be paid signatory parties or their political subdivisions, and (ii) of payments in lieu of taxes to any of them.

11.5 Cooperative services.

The commission shall furnish technical services, advice and consultation to authorize agencies of the signatory parties with respect to the water resources of the basin, and each of the signatory parties pledges itself to provide technical and administrative services to the commission upon request, within the limits of available appropriations and to cooperate generally with the commission for the purposes of this compact, and the cost of such services may be reimbursable whenever the parties deem appropriate.

ARTICLE 12--CAPITAL FINANCING

Section 12.1 Borrowing power.

The commission may borrow money for any of the purposes of this compact, and may issue its negotiable bonds and other evidences of indebtedness in respect thereto. All such bonds and evidences of indebtedness shall be payable solely out of the properties and revenues of the commission without recourse to taxation. The bonds and other obligations of the commission, except as may be otherwise provided in the indenture under which they were issued, shall be direct and general obligations of the commission and the full faith and credit of the commission are hereby pledged for the prompt payment of the debt service thereon and for the fulfillment of all other undertakings of the commission assumed by it to or for the benefit of the holders thereof.

12.2 Funds and expenses.

The purposes of this compact shall include without limitation thereto all costs of any project or facility or any part thereof, including interest during a period of construction and a reasonable time thereafter and any incidental expenses (legal, engineering, fiscal, financial consultant and other expenses) connected with issuing and disposing of the bonds; all amounts required for the creation of an operating fund, construction fund, reserve fund, sinking fund, or other special fund; all other expenses connected with the planning, design, acquisition, construction, completion, improvement or reconstruction of any facility or any part thereof; and reimbursement of advances by the commission or by others for such purposes and for working capital.

12.3 Credit excluded; officers, state and municipal.

The commission shall have no power to pledge the credit of any signatory party, or of any county or municipality, or to impose any obligation for payment of the bonds upon any signatory party or any county or municipality. Neither the commissioners nor any person executing the bonds shall be liable personally on the bonds of the commission or be subject to any personal liability or accountability by reason of the issuance thereof.

12.4 Funding and refunding.

Whenever the commission deems it expedient, it may fund and refund its bonds and other obligations whether or not such bonds and obligations have matured. It may provide for the issuance, sale or exchange of refunding bonds for the purpose of redeeming or retiring any bonds (including the payment of any premium, duplicate interest or cash adjustment required in connection therewith) issued by the commission or issued by any other issuing body, the proceeds of the sale of which have been applied to any facility acquired by the commission or which are payable out of the revenues of any facility acquired by the commission. Bonds may be issued partly to refund bonds and other obligations then outstanding, and partly for any other purpose of the commission. All provisions of this compact applicable to the issuance of bonds are applicable to refunding bonds and to the issuance, sale or exchange thereof.

12.5 Bonds; authorization generally.

Bonds and other indebtedness of the commission shall be authorized by resolution of the commission. The validity of the authorization and issuance of any bonds by the commission shall not be dependent upon nor affected in any way by: (i) the disposition of bond proceeds by the commission or by contract, commitment or action taken with respect to such proceeds; or (ii) the failure to complete any part of the project for which bonds are authorized to be issued. The commission may issue bonds in one or more series and may provide for one or more consolidated bond issues, in such principal amounts and with such terms and provisions as the commission may deem necessary. The bonds may be secured by a pledge of all or any part of the property, revenues and franchises under its control. Bonds may be issued by the commission in such amount, with such maturities and in such denominations and form or forms, whether coupon or registered, as to both principal and interest, as may be determined by the commission. The commission may provide for redemption of bonds prior to maturity on such notice and at such time or times and with such redemption provisions, including premiums, as the commission may determine.

12.6 Bonds; resolutions and indentures generally.

The commission may determine and enter into indentures providing for

the principal amount, date or dates, maturities, interest rate, denominations, form, registration, transfer, interchange and other provisions of the bonds and coupons and the terms and conditions upon which the same shall be executed, issued, secured, sold, paid, redeemed, funded and refunded. The resolution of the commission authorizing any bond or any indenture so authorized under which the bonds are issued may include all such covenants and other provisions other than any restriction on the regulatory powers vested in the commission by this compact as the commission may deem necessary or desirable for the issue, payment, security, protection or marketing of the bonds, including without limitation covenants and other provisions as to the rates or amounts of fees, rents and other charges to be charged or made for use of the facilities; the use, pledge, custody, securing, application and disposition of such revenues, of the proceeds of the bonds, and of any other moneys of the commission; the operation, maintenance, repair and reconstruction of the facilities and the amounts which may be expended therefor; the sale, lease or other disposition of the facilities; the insuring of the facilities and of the revenues derived therefrom; the construction or other acquisition of other facilities; the issuance of additional bonds or other indebtedness; the rights of the bondholders and of any trustee for the bondholders upon default by the commission or otherwise; and the modification of the provisions of the indenture and of the bonds. Reference on the face of the bonds to such resolution or indenture by its date of adoption or the apparent date on the face thereof is sufficient to incorporate all of the provisions thereof and of this compact into the body of the bonds and their appurtenant coupons. Each taker and subsequent holder of the bonds or coupons, whether the coupons are attached to or detached from the bonds, has recourse to all of the provisions of the indenture and of this compact and is bound thereby.

12.7 Maximum maturity.

No bond by its terms shall mature in more than fifty years from its own date and in the event any authorized issue is divided into two or more series or divisions, the maximum maturity date hereby authorized shall be calculated from the date on the face of each bond separately, irrespective of the fact that different dates may be prescribed for the

bonds of each separate series or division of any authorized issue.

12.8 Tax exemption.

All bonds issued by the commission under the provisions of this compact and the interest thereof shall at all times be free and exempt from all taxation by or under authority of any of the signatory parties, except for transfer, inheritance and estate taxes.

12.9 Interest.

Bonds shall bear interest at a rate determined by the commission, payable annually or semi-annually.

12.10 Place of payment.

The commission may provide for the payment of the principal and interest of bonds at any place or places within or without the signatory states, and in any specified lawful coin or currency of the United States of America.

12.11 Execution.

The commission may provide for the execution and authentication of bonds by the manual, lithographed or printed facsimile signature of officers of the commission, and by additional authentication by a trustee or fiscal agent appointed by the commission. If any of the officers whose signatures or counter signatures appear upon the bonds or coupons cease to be officers before the delivery of the bonds or coupons, their signatures or counter signatures are nevertheless valid and of the same force and effect as if the officers had remained in office until the delivery of the bonds and coupons.

12.12 Holding own bonds.

The commission shall have power out of any funds available therefor to purchase its bonds and may hold, cancel or resell such bonds.

12.13 Sale.

The commission may fix terms and conditions for the sale or other disposition of any authorized issue of bonds. The commission may sell bonds at less than their par or face value but no issue of bonds may be

sold at an aggregate price below the par or face value thereof if such sale would result in a net interest cost to the commission calculated upon the entire issue so sold of more than six percent per annum payable semi-annually, according to standard tables of bond values. All bonds issued and sold for cash pursuant to this act shall be sold on sealed proposals to the highest bidder. Prior to such sale, the commission shall advertise for bids by publication of a notice of sale not less than ten days prior to the date of sale, at least once in a newspaper of general circulation printed and published in New York City carrying municipal bond notices and devoted primarily to financial news. The commission may reject any and all bids submitted and may thereafter sell the bonds so advertised for sale at private sale to any financially responsible bidder under such terms and conditions as it deems most advantageous to the public interest, but the bonds shall not be sold at a net interest cost calculated upon the entire issue so advertised, greater than the lowest bid which was rejected. In the event the commission desires to issue its bonds in exchange for an existing facility or portion thereof, or in exchange for bonds secured by the revenues of an existing facility, it may exchange such bonds for the existing facility or portion thereof or for the bonds so secured, plus an additional amount of cash, without advertising such bonds for sale.

12.14 Negotiability.

All bonds issued under the provisions of this compact are negotiable instruments, except when registered in the name of a registered owner.

12.15 Legal investments.

Bonds of the commission shall be legal investments for savings banks, fiduciaries and public funds in each of the signatory states.

12.16 Validation proceedings.

Prior to the issuance of any bonds, the commission may institute a special proceeding to determine the legality of proceedings to issue the bonds and their validity under the laws of any of the signatory parties. Such proceedings shall be instituted and prosecuted in rem and the judgment rendered therein shall be conclusive against all persons whomsoever and against each of the signatory parties.

12.17 Recording.

No indenture need be recorded or filed in any public office, other than the office of the commission. The pledge of revenues provided in any indenture shall take effect forthwith as provided therein and irrespective of the date of receipt of such revenues by the commission or the indenture trustee. Such pledge shall be effective as provided in the indenture without physical delivery of the revenues to the commission or to the indenture trustee.

12.18 Pledged revenues.

Bond redemption and interest payments shall, to the extent provided in the resolution or indenture, constitute a first, direct and exclusive charge and lien on all such rates, rents, tolls, fees and charges and other revenues and interest thereon received from the use and operation of the facility, and on any sinking or other funds created therefrom. All such rates, rents, tolls, fees, charges and other revenues, together with interest thereon, shall constitute a trust fund for the security and payment of such bonds and except as and to the extent provided in the indenture with respect to the payment therefrom of expenses for other purposes including administration, operation, maintenance, improvements or extensions of the facilities or other purposes shall not be used or pledged for any other purpose so long as such bonds, or any of them, are outstanding and unpaid.

12.19 Remedies.

The holder of any bond may for the equal benefit and protection of all holders of bonds similarly situated: (a) by mandamus or other appropriate proceedings require and compel the performance of any of the duties imposed upon the commission or assumed by it, its officers, agents or employees under the provisions of any indenture, in connection with the acquisition, construction, operation, maintenance, repair, reconstruction or insurance of the facilities, or in connection with the collection, deposit, investment, application and disbursement of the rates, rents, tolls, fees, charges and other revenues derived from the operation and use of the facilities, or in connection with the deposit, investment and disbursement of the proceeds received from the sale of

bonds; or (b) by action or suit in a court of competent jurisdiction of any signatory party require the commission to account as if it were the trustee of an express trust, or enjoin any acts or things which may be unlawful or in violation of the rights of the holders of the bonds. The enumeration of such rights and remedies does not, however, exclude the exercise or prosecution of any other rights or remedies available to the holders of bonds.

12.20 Capital financing by signatory parties; guarantees.

(a) The signatory parties will provide such capital funds required for projects of the commission as may be authorized by their respective statutes in accordance with a cost sharing plan prepared pursuant to Article 11 of this compact; but nothing in this section shall be deemed to impose any mandatory obligation on any of the signatory parties other than such obligations as may be assumed by a signatory party in connection with a specific project or facility.

(b) Bonds of the commission, notwithstanding any other provision of this compact, may be executed and delivered to any duly authorized agency of any of the signatory parties without public offering and may be sold and resold with or without the guarantee of such signatory party, subject to and in accordance with the constitutions of the respective signatory parties.

(c) The commission may receive and accept, and the signatory parties may make, loans, grants, appropriations, advances and payments of reimbursable or non-reimbursable funds or property in any form for the capital or operating purposes of the commission.

ARTICLE 13--PLAN, PROGRAM AND BUDGETS

Section 13.1 Comprehensive plan.

The commission shall develop and adopt, and may from time to time review and revise, a comprehensive plan for the immediate and long range development and use of the water resources of the basin. The plan shall include all public and private projects and facilities which are required, in the judgment of the commission, for the optimum planning, development, conservation, utilization, management and control of the water resources of the basin to meet present and future needs; provided that the plan shall include any projects required to conform with any present or future decree or judgment of any court of competent

jurisdiction. The commission may adopt a comprehensive plan or any revision thereof in such part or parts as it may deem appropriate, provided that before the adoption of the plan or any part or revision thereof the commission shall consult with water users and interested public bodies and public utilities and shall consider and give due regard to the findings and recommendations of the various agencies of the signatory parties and their political subdivisions. The commission shall conduct public hearings with respect to the comprehensive plan prior to the adoption of the plan or any part or revision thereof.

13.2 Water resources program.

The commission shall annually adopt a water resources program, based upon the comprehensive plan, consisting of the projects and facilities which the commission proposes to be undertaken by the commission and by other authorized governmental and private agencies, organizations and persons during the ensuing six years or such other reasonably foreseeable period as the commission may determine. The water resources program shall include a systematic presentation of:

- 1) the quantity and quality of water resources needs for such period;
- 2) the existing and proposed projects and facilities required to satisfy such needs, including all public and private projects to be anticipated;
- 3) a separate statement of the projects proposed to be undertaken by the commission during such period.

13.3 Annual current expense and capital budgets.

(a) The commission shall annually adopt a capital budget including all capital projects it proposes to undertake or continue during the budget period containing a statement of the estimated cost of each project and the method of financing thereof.

(b) The commission shall annually adopt a current expense budget for each fiscal year. Such budget shall include the commission's estimated expenses for administration, operation, maintenance and repairs, including a separate statement thereof for each project, together with its cost allocation. The total of such expenses shall be balanced by the

commission's estimated revenues from all sources, including the cost allocations undertaken by any of the signatory parties in connection with any project. Following the adoption of the annual current expense budget by the commission, the executive director of the commission shall:

1) certify to the respective signatory parties the amounts due in accordance with existing cost sharing established for each project; and

2) transmit certified copies of such budget to the principal budget officer of the respective signatory parties at such time and in such manner as may be required under their respective budgetary procedures. The amount required to balance the current expense budget in addition to the aggregate amount of item (1) above and all other revenues available to the commission shall be apportioned equitably among the signatory parties by unanimous vote of the commission, and the amount of such apportionment to each signatory party shall be certified together with the budget.

(c) The respective signatory parties covenant and agree to include the amounts so apportioned for the support of the current expense budget in their respective budgets next to be adopted, subject to such review and approval as may be required by their respective budgetary processes. Such amounts shall be due and payable to the commission in quarterly installments during its fiscal year, provided that the commission may draw upon its working capital to finance its current expense budget pending remittances by the signatory parties.

ARTICLE 14--GENERAL PROVISIONS

Section 14.1 Auxiliary powers of commission; functions of commissioners.

(a) The commission, for the purposes of this compact, may:

1) Adopt and use a corporate seal, enter into contracts, sue and be sued in all courts of competent jurisdiction;

2) Receive and accept such payments, appropriations, grants, gifts, loans, advances and other funds, properties and services as may be transferred or made available to it by any signatory party or by any other public or private corporation or individual, and enter into

agreements to make reimbursement for all or part thereof;

3) Provide for, acquire and adopt detailed engineering, administrative, financial and operating plans and specifications to effectuate, maintain or develop any facility or project;

4) Control and regulate the use of facilities owned or operated by the commission;

5) Acquire, own, operate, maintain, control, sell and convey real and personal property and any interest therein by contract, purchase, lease, license, mortgage or otherwise as it may deem necessary for any project or facility, including any and all appurtenances thereto necessary, useful or convenient for such ownership, operation, control, maintenance or conveyance;

6) Have and exercise all corporate powers essential to the declared objects and purposes of the commission.

(b) The commissioners, subject to the provisions of this compact, shall:

1) Serve as the governing body of the commission, and exercise and discharge its powers and duties except as otherwise provided by or pursuant to this compact;

2) Determine the character of and the necessity for its obligations and expenditures and the manner in which they shall be incurred, allowed, and paid subject to any provisions of law specifically applicable to agencies or instrumentalities created by compact;

3) Provide for the internal organization and administration of the commission;

4) Appoint the principal officers of the commission and delegate to and allocate among them administrative functions, powers and duties;

5) Create and abolish offices, employments and positions as it deems

necessary for the purposes of the commission, and subject to the provisions of this article, fix and provide for the qualification, appointment, removal, term, tenure, compensation, pension and retirement rights of its officers and employees;

6) Let and execute contracts to carry out the powers of the commission.

14.2 Regulations; enforcement.

The commission may:

(a) Make and enforce reasonable rules and regulations for the effectuation, application and enforcement of this compact; and it may adopt and enforce practices and schedules for or in connection with the use, maintenance and administration of projects and facilities it may own or operate and any product or service rendered thereby; provided that any rule or regulation, other than one which deals solely with the internal management of the commission, shall be adopted only after public hearing and shall not be effective unless and until filed in accordance with the law of the respective signatory parties applicable to administrative rules and regulations generally; and

(b) Designate any officer, agent or employee of the commission to be an investigator or watchman and such person shall be vested with the powers of a peace officer of the state in which he is duly assigned to perform his duties.

14.3 Tax exemption.

The commission, its property, functions, and activities shall be exempt from taxation by or under the authority of any of the signatory parties or any political subdivision thereof; provided that in lieu of property taxes the commission shall, as to specific projects, make payments to local taxing districts in annual amounts which shall equal the taxes lawfully assessed upon property for the tax year next prior to its acquisition by the commission for a period of ten years. The nature and amount of such payments shall be reviewed by the commission at the end of ten years, and from time to time thereafter, upon reasonable notice and opportunity to be heard to the affected taxing district, and the payments may be thereupon terminated or continued in such reasonable

amount as may be necessary or desirable to take into account hardships incurred and benefits received by the taxing jurisdiction which are attributable to the project.

14.4 Meetings; public hearing; records, minutes.

(a) All meetings of the commission shall be open to the public.

(b) The commission shall conduct at least one public hearing prior to the adoption of the comprehensive plan, water resources program, annual capital and current expense budgets, the letting of any contract for the sale or other disposition by the commission of hydroelectric energy or water resources to any person, corporation or entity, and in all other cases wherein this compact requires a public hearing. Such hearing shall be held upon at least ten days public notice given by posting at the offices of the commission. The commission shall also provide forthwith for distribution of such notice to the press and by the mailing of a copy thereof to any person who shall request such notices.

(c) The minutes of the commission shall be a public record open to inspection at its offices during regular business hours.

14.5 Officers generally.

(a) The officers of the commission shall consist of an executive director and such additional officers, deputies and assistants as the commission may determine. The executive director shall be appointed and may be removed by the affirmative vote of a majority of the full membership of the commission. All other officers and employees shall be appointed by the executive director under such rules of procedure as the commission may determine.

(b) In the appointment and promotion of officers and employees for the commission, no political, racial, religious or residence test or qualification shall be permitted or given consideration, but all such appointments and promotions shall be solely on the basis of merit and fitness. Any officer or employee of the commission who is found by the commission to be guilty of a violation of this section shall be removed from office by the commission.

14.6 Oath of office.

An oath of office in such form as the commission shall prescribe shall be taken, subscribed and filed with the commission by the executive director and by each officer appointed by him not later than fifteen

days after the appointment.

14.7 Bond.

Each officer shall give such bond and in such form and amount as the commission may require for which the commission may pay the premium.

14.8 Prohibited activities.

(a) No commissioner officer or employee shall:

1) be financially interested, either directly or indirectly, in any contract, sale, purchase, lease or transfer of real or personal property to which the commission is a party;

2) solicit or accept money or any other thing of value in addition to the compensation or expenses paid him by the commission for services performed within the scope of his official duties;

3) offer money or any thing of value for or in consideration of obtaining an appointment, promotion or privilege in his employment with the commission.

(b) Any officer or employee who shall willfully violate any of the provisions of this section shall forfeit his office or employment.

(c) Any contract or agreement knowingly made in controvention of this section is void.

(d) Officers and employees of the commission shall be subject in addition to the provisions of this section to such criminal and civil sanctions for misconduct in office as may be imposed by federal law and the law of the signatory state in which such misconduct occurs.

14.9 Purchasing.

Contracts for the construction, reconstruction or improvement of any facility when the expenditure required exceeds ten thousand dollars and contracts for the purchase of services, supplies, equipment and materials when the expenditure required exceeds two thousand five hundred dollars shall be advertised and let upon sealed bids to the lowest responsible bidder. Notice requesting such bids shall be published in a manner reasonably likely to attract prospective bidders, which publication shall be made at least ten days before bids are

received and in at least two newspapers of general circulation in the basin. The commission may reject any and all bids and readvertise in its discretion. If after rejecting bids the commission determines and resolves that in its opinion the supplies, equipment and materials may be purchased at a lower price in the open market, the commission may give each responsible bidder an opportunity to negotiate a price and may proceed to purchase the supplies, equipment and materials in the open market at a negotiated price which is lower than the lowest rejected bid of a responsible bidder, without further observance of the provisions requiring bids or notice. The commission shall adopt rules and regulations to provide for purchasing from the lowest responsible bidder when sealed bids, notice and publication are not required by this section. The commission may suspend and waive the provisions of this section requiring competitive bids whenever:

- 1) the purchase is to be made from or the contract to be made with the federal or any state government or any agency or political subdivision thereof or pursuant to any open end bulk purchase contract of any of them;

- 2) the public exigency requires the immediate delivery of the articles or performance of the service;

- 3) only one source of supply is available;

- 4) the equipment to be purchased is of a technical nature and the procurement thereof without advertising is necessary in order to assure standardization of equipment and interchangeability of parts in the public interest; or

- 5) services are to be provided of a specialized or professional nature.

14.10 Insurance.

The commission may self-insure or purchase insurance and pay the premiums therefor against loss or damage to any of its properties; against liability for injury to persons or property; and against loss of

revenue from any cause whatsoever. Such insurance coverage shall be in such form and amount as the commission may determine, subject to the requirements of any agreement arising out of the issuance of bonds by the commission.

14.11 Annual independent audit.

(a) As soon as practical after the closing of the fiscal year, an audit shall be made of the financial accounts of the commission. The audit shall be made by qualified certified public accountants selected by the commission, who have no personal interest direct or indirect in the financial affairs of the commission or any of its officers or employees. The report of audit shall be prepared in accordance with accepted accounting practices and shall be filed with the chairman and such other officers as the commission shall direct. Copies of the report shall be distributed to each commissioner and shall be made available for public distribution.

(b) Each signatory party by its duly authorized officers shall be entitled to examine and audit at any time all of the books, documents, records, files and accounts and all other papers, things or property of the commission. The representatives of the signatory parties shall have access to all books, documents, records, accounts, reports, files and all other papers, things or property belonging to or in use by the commission and necessary to facilitate the audit and they shall be afforded full facilities for verifying transactions with the balances or securities held by depositaries, fiscal agents and custodians.

(c) The financial transactions of the commission shall be subject to audit by the general accounting office in accordance with the principles and procedures applicable to commercial corporate transactions and under such rules and regulations as may be prescribed by the comptroller general of the United States. The audit shall be conducted at the place or places where the accounts of the commission are kept.

(d) Any officer or employee who shall refuse to give all required assistance and information to the accountants selected by the commission or to the authorized officers of any signatory party or who shall refuse to submit to them for examination such books, documents, records, files, accounts, papers, things or property as may be requested shall forfeit his office.

14.12 Reports.

The commission shall make and publish an annual report to the legislative bodies of the signatory parties and to the public reporting on its programs, operations and finances. It may also prepare, publish and distribute such other public reports and informational materials as it may deem necessary or desirable.

14.13 Grants, loans or payments by states or political subdivisions.

(a) Any or all of the signatory parties or any political subdivision thereof may:

1) Appropriate to the commission such funds as may be necessary to pay preliminary expenses such as the expenses incurred in the making of borings, and other studies of subsurface conditions, in the preparation of contracts for the sale of water and in the preparation of detailed plans and estimates required for the financing of a project;

2) Advance to the commission, either as grants or loans, such funds as may be necessary or convenient to finance the operation and management of or construction by the commission of any facility or project;

3) Make payments to the commission for benefits received or to be received from the operation of any of the projects or facilities of the commission.

(b) Any funds which may be loaned to the commission either by a signatory party or a political subdivision thereof shall be repaid by the commission through the issuance of bonds or out of other income of the commission, such repayment to be made within such period and upon such terms as may be agreed upon between the commission and the signatory party or political subdivision making the loan.

14.14 Condemnation proceedings.

(a) The commission shall have the power to acquire by condemnation the fee or any lesser interest in lands, lands lying under water, development rights in land, riparian rights, water rights, waters and other real or personal property within the basin for any project or facility authorized pursuant to this compact. This grant of power of eminent domain includes but is not limited to the power to condemn for the purposes of this compact any property already devoted to a public

use, by whomsoever owned or held, other than property of a signatory party and any property held, constructed, operated or maintained in connection with a diversion authorized by a United States Supreme Court decree. Any condemnation of any property or franchises owned or used by a municipal or privately owned public utility, unless the affected public utility facility is to be relocated or replaced, shall be subject to the authority of such state board, commission or other body as may have regulatory jurisdiction over such public utility.

(b) Such power of condemnation shall be exercised in accordance with the provisions of any federal law applicable to the commission; provided that if there is no such applicable federal law, condemnation proceedings shall be in accordance with the provisions of such general state condemnation law as may be in force in the signatory state in which the property is located.

(c) Any award or compensation for the taking of property pursuant to this article shall be paid by the commission, and none of the signatory parties nor any other agency, instrumentality or political subdivision thereof shall be liable for such award or compensation.

14.15 Conveyance of lands and relocation of public facilities.

(a) The respective officers, agencies, departments, commissions or bodies having jurisdiction and control over real and personal property owned by the signatory parties are authorized and empowered to transfer and convey in accordance with the laws of the respective parties to the commission any such property as may be necessary or convenient to the effectuation of the authorized purposes of the commission.

(b) Each political subdivision of each of the signatory parties is authorized and empowered, notwithstanding any contrary provision of law, to grant and convey to the commission, upon the commission's request, any real property or any interest therein owned by such political subdivision including lands lying under water and lands already devoted to public use which may be necessary or convenient to the effectuation of the authorized purposes of the commission.

(c) Any highway, public utility or other public facility which will be dislocated by reason of a project deemed necessary by the commission to effectuate the authorized purposes of this compact shall be relocated and the cost thereof shall be paid in accordance with the law of the state in which the facility is located; provided that the cost of such

relocation payable by the commission shall not in any event exceed the expenditure required to serve the public convenience and necessity.

14.16 Rights of way.

Permission is hereby granted to the commission to locate, construct and maintain any aqueducts, lines, pipes, conduits and auxiliary facilities authorized to be acquired, constructed, owned, operated or maintained by the commission in, over, under or across any streets and highways now or hereafter owned, opened or dedicated to or for public use, subject to such reasonable conditions as the highway department of the signatory party may require.

14.17 Penal sanction.

Any person, association or corporation who violates or attempts or conspires to violate any provision of this compact or any rule, regulation or order of the commission duly made, promulgated or issued pursuant to the compact in addition to any other remedy, penalty or consequence provided by law shall be punishable as may be provided by statute of any of the signatory parties within which the offense is committed; provided that in the absence of such provision any such person, association or corporation shall be liable to a penalty of not less than \$50 nor more than \$1000 for each such offense to be fixed by the court which the commission may recover in its own name in any court of competent jurisdiction, and in a summary proceeding where available under the practice and procedure of such court. For the purposes of this section in the event of a continuing offense each day of such violation, attempt or conspiracy shall constitute a separate offense.

14.18 Tort liability.

The commission shall be responsible for claims arising out of the negligent acts or omissions of its officers, agents and employees only to the extent and subject to the procedures prescribed by law generally with respect to officers, agents and employees of the government of the United States.

14.19 Effect on riparian rights.

Nothing contained in this compact shall be construed as affecting or

intending to affect or in any way to interfere with the law of the respective signatory parties relating to riparian rights.

14.20 Amendments and supplements.

Amendments and supplements to this compact to implement the purposes thereof may be adopted by legislative action of any of the signatory parties concurred in by all of the others.

14.21 Construction and severability.

The provisions of this act and of agreements thereunder shall be severable and if any phrase, clause, sentence or provision of this compact or such agreement is declared to be unconstitutional or the applicability thereof to any signatory party, agency or person is held invalid, the constitutionality of the remainder of this compact or such agreement and the applicability thereof to any other signatory party, agency, person or circumstance shall not be affected thereby. It is the legislative intent that the provisions of this compact be reasonably and liberally construed.

14.22 Effective date; execution.

This compact shall become binding and effective thirty days after the enactment of concurring legislation by the federal government, the states of Delaware, New Jersey and New York, and the Commonwealth of Pennsylvania. The compact shall be signed and sealed in six duplicate original copies by the respective chief executives of the signatory parties. One such copy shall be filed with the Secretary of State of each of the signatory parties or in accordance with the laws of the state in which the filing is made, and one copy shall be filed and retained in the archives of the commission upon its organization. The signatures shall be affixed and attested under the following form:

In Witness Whereof, and in evidence of the adoption and enactment into law of this compact by the Congress and legislatures, respectively, of the signatory parties, the President of the United States and the respective Governors do hereby, in accordance with authority conferred by law, sign this compact in six duplicate original copies, as attested by the respective secretaries of state, and have caused the seals of the

United States and of the respective states to be hereunto affixed
this.....day of.....

§ 21-0703. Commissioner and alternate.

1. As provided in the second subdivision of section two of article two of the compact, the Governor shall be this state's member on the commission established thereby. The Governor shall appoint an officer of the Department of Environmental Conservation as his alternate pursuant to the third subdivision of said section two of article two of the compact.

2. Any person serving on the Delaware river basin commission pursuant to this section shall be reimbursed for all necessary expenses incurred as an incident of such service, and such reimbursement shall be from the funds of said person's department or office.

§ 21-0705. Advisors.

1. The member of the Delaware river basin commission from this state shall have an advisor as contemplated by subdivision six of section two of article two of the compact. Such advisor shall be the mayor of the city of New York or his designee, but no designee of the mayor shall be recognized as an advisor or accorded any privileges as such unless the mayor shall have notified the commission member from this state and the Delaware river basin commission in writing of the selection of such designee and of his identity.

2. The Department of Environmental Conservation shall provide an advisory committee who together with the state Commissioner of Commerce shall constitute an advisory committee with whom the member of the Delaware river basin commission from this state may consult with respect to the conduct of New York participation in the compact. Such member of the commission also may consult from time to time with other officers of the state government or any subdivision thereof, as may be appropriate.

§ 21-0707. Consent to alteration of diversions.

1. Consent of this state to the impairment, diminution or other adverse effect on diversions, compensating releases, rights, conditions, obligations, and provisions for the administration thereof as contemplated by subdivision three of section three of article three of the compact shall not be given, except with the prior approval of the Department of Environmental Conservation.

2. Except with respect to diversions governed by subdivision one of this section and the provision of the compact referred to therein, the provisions of section 15-1505 of this chapter shall not apply to any diversion or furnishing of water authorized by or made pursuant to the compact.

§ 21-0709. Jurisdiction of courts.

Except as otherwise specifically provided herein, the phrase "court of competent jurisdiction" as used in the compact shall, with reference to this state, mean the supreme court, and said court is hereby given all necessary and appropriate jurisdiction to hear and determine any action or proceeding brought before it pursuant to appropriate provisions of the compact. As used in subdivision six of section ten of article ten of the compact, the phrase "court of competent jurisdiction" shall mean a court in which an appropriate proceeding under article seventy-eight of the Civil Practice Law and Rules may be brought. As used in item one of paragraph (a) of subdivision one of section fourteen of article fourteen of the compact, the phrase "court of competent jurisdiction" shall mean any court of this state in which an action or proceeding of the class brought by the Delaware river basin commission may be heard and determined.

§ 21-0711. Prior to project approval.

No project requiring a license, permit or other approval by any agency or officer of this state, or any subdivision thereof, shall be given any such license, permit, or approval, if such project requires approval of the Delaware river basin commission pursuant to the compact and such has not been given.

§ 21-0713. Agreements with municipalities.

Any city, county, town or village within the "basin", as that term is defined in the compact, shall have power to make agreements to provide technical and financial aid as contemplated by paragraph (b) of subdivision two of section six of article six of the compact. Nothing herein contained shall be construed to relieve any such city, county, town or village from compliance with any general or special laws relating to the receipt of grants or other assistance from other governmental units and contracts in connection therewith.

§ 21-0715. Delegations of power.

No agency or officer of this state or any subdivision thereof shall accept or exercise any delegation of power pursuant to subdivision one of section ten of article ten of the compact unless, in the absence of the compact, it would have the constitutional or statutory power to exercise such power on its own account.

§ 21-0716. Report and recommendations of department.

The department shall submit to the governor and the legislature of this state on or before the twenty-fifth day of January, nineteen hundred seventy-eight, and every year thereafter, a detailed examination and evaluation of the programs and activities of the commission as they relate to New York state and shall make recommendations for any legislative action deemed by the department advisable, including

amendments to the statutes of the signatory states which may be necessary to carry out the intent and purposes of the compact.

§ 21-0717. Cooperative services.

Departments, agencies and officers shall provide technical and administrative services to the Delaware river basin commission upon request, within the limits of available appropriations and shall cooperate generally with said commission for the purposes of the compact.

§ 21-0719. Budget.

The Delaware river basin commission shall submit annually to the Director of the Budget, in accordance with the rules and practice of the state, for study and consideration by such Director, an estimate of moneys required to administer, manage and support the commission during the ensuing fiscal year. Such estimate shall include any request for appropriation of funds by New York and shall be accompanied by a tabulation of similar requests which the commission expects to make to each other member state and the formula or factors upon which such respective requests are based. The provisions of subdivision three of section thirteen of article thirteen of the compact shall apply to the budgetary and other fiscal matters related to the participation of this state in the compact.

§ 21-0721. Audit.

Pursuant to paragraph (b) of subdivision eleven of section fourteen of article fourteen of the compact, the State Comptroller is hereby authorized and empowered from time to time to examine the accounts and books of the commission, including its receipts, disbursements and such other items referring to its financial standing as such Comptroller may deem proper and to report the results of such examination to the

Governor.

§ 21-0723. Inconsistent laws.

No provision of this chapter or of any other law, which is inconsistent with the provisions of the compact shall be applicable to the Delaware river basin commission or to any matter governed by the compact.

TITLE 9

GREAT LAKES BASIN COMPACT

Section 21-0901. Great Lakes basin compact.

21-0903. Representation on the commission.

21-0905. Budget.

21-0907. Examination of commission accounts.

21-0909. Transmittal of documents.

21-0911. Inconsistent provisions.

21-0913. Appraisal of commission.

21-0915. Termination.

21-0917. The Great Lakes Basin advisory council.

§ 21-0901. Great Lakes Basin Compact.

The Great Lakes Basin Compact, as first enacted by chapter 643 of the laws of 1960, as reenacted by chapter 473 of the laws of 1961, and as renumbered by chapter 73 of the laws of 1962, is hereby continued. The compact is as follows:

The party states solemnly agree:

ARTICLE I

The purposes of this compact are, through means of joint or cooperative action:

1. To promote the orderly, integrated, and comprehensive development, use, and conservation of the water resources of the Great Lakes Basin (hereinafter called the Basin).

2. To plan for the welfare and development of the water resources of the Basin as a whole as well as for those portions of the Basin which may have problems of special concern.

3. To make it possible for the states of the Basin and their people to derive the maximum benefit from utilization of public works, in the form of navigational aids or otherwise, which may exist or which may be constructed from time to time.

4. To advise in securing and maintaining a proper balance among industrial, commercial, agricultural, water supply, residential, recreational, and other legitimate uses of the water resources of the Basin.

5. To establish and maintain an intergovernmental agency to the end that the purposes of this compact may be accomplished more effectively.

ARTICLE II

A. This compact shall enter into force and become effective and binding when it has been enacted by the legislatures of any four of the States of Illinois, Indiana, Michigan, Minnesota, New York, Ohio, Pennsylvania, and Wisconsin and thereafter shall enter into force and become effective and binding as to any other of said states when enacted by the legislature thereof.

B. The Province of Ontario and the Province of Quebec, or either of them, may become states party to this compact by taking such action as their laws and the laws of the Government of Canada may prescribe for adherence thereto. For the purpose of this compact the word "state" shall be construed to include a Province of Canada.

ARTICLE III

The Great Lakes Commission created by Article IV of this compact shall

exercise its powers and perform its functions in respect to the Basin which, for the purposes of this compact, shall consist of so much of the following as may be within the party states:

1. Lakes Erie, Huron, Michigan, Ontario, St. Clair, Superior, and the St. Lawrence River, together with any and all natural or man-made water interconnections between or among them.

2. All rivers, ponds, lakes, streams, and other watercourses which, in their natural state or in their prevailing condition, are tributary to Lakes Erie, Huron, Michigan, Ontario, St. Clair, and Superior or any of them or which comprise part of any watershed draining into any of said lakes.

ARTICLE IV

A. There is hereby created an agency of the party states to be known as The Great Lakes Commission, (hereinafter called the Commission). In that name the Commission may sue and be sued, acquire, hold and convey real and personal property and any interest therein. The Commission shall have a seal with the words "The Great Lakes Commission" and such other design as it may prescribe engraved thereon by which it shall authenticate its proceedings. Transactions involving real or personal property shall conform to the laws of the state in which the property is located, and the Commission may by bylaws provide for the execution and acknowledgment of all instruments in its behalf.

B. The Commission shall be composed of not less than three commissioners nor more than five commissioners from each party state designated or appointed in accordance with the law of the state which they represent and serving and subject to removal in accordance with such law.

C. Each state delegation shall be entitled to three votes in the Commission. The presence of commissioners from a majority of the party states shall constitute a quorum for the transaction of business at any meeting of the Commission. Actions of the Commission shall be by a majority of the votes cast except that any recommendations made pursuant

to Article VI of this compact shall require an affirmative vote of not less than a majority of the votes cast from each of a majority of the states present and voting.

D. The commissioners of any two or more party states may meet separately to consider problems of particular interest to their states but no action taken at any such meeting shall be deemed an action of the Commission unless and until the Commission shall specifically approve the same.

E. In the absence of any commissioner, his vote may be cast by another representative or commissioner of his state provided that said commissioner or other representative casting said vote shall have a written proxy in proper form as may be required by the Commission.

F. The Commission shall elect annually from among its members a chairman and vice-chairman. The Commission shall appoint an Executive Director who shall also act as secretary-treasurer, and who shall be bonded in such amount as the Commission may require. The Executive Director shall serve at the pleasure of the Commission and at such compensation and under such terms and conditions as may be fixed by it. The Executive Director shall be custodian of the records of the Commission with authority to affix the Commission's official seal and to attest to and certify such records or copies thereof.

G. The Executive Director, subject to the approval of the Commission in such cases as its bylaws may provide, shall appoint and remove or discharge such personnel as may be necessary for the performance of the Commission's functions. Subject to the aforesaid approval, the Executive Director may fix their compensation, define their duties, and require bonds of such of them as the Commission may designate.

H. The Executive Director, on behalf of, as trustee for, and with the approval of the Commission, may borrow, accept, or contract for the services of personnel from any state or government or any subdivision or agency thereof, from any intergovernmental agency, or from any institution, person, firm or corporation; and may accept for any of the

Commission's purposes and functions under this compact any and all donations, gifts, and grants of money, equipment, supplies, materials, and services from any state or government or any subdivision or agency thereof or intergovernmental agency or from any institution, person, firm or corporation and may receive and utilize the same.

I. The Commission may establish and maintain one or more offices for the transacting of its business and for such purposes the Executive Director, on behalf of, as trustee for, and with the approval of the Commission, may acquire, hold and dispose of real and personal property necessary to the performance of its functions.

J. No tax levied or imposed by any party state or any political subdivision thereof shall be deemed to apply to property, transactions, or income of the Commission.

K. The Commission may adopt, amend and rescind bylaws, rules and regulations for the conduct of its business.

L. The organization meeting of the Commission shall be held within six months from the effective date of this compact.

M. The Commission and its Executive Director shall make available to the party states any information within its possession and shall always provide free access to its records by duly authorized representatives of such party states.

N. The Commission shall keep a written record of its meetings and proceedings and shall annually make a report thereof to be submitted to the duly designated official of each party state.

O. The Commission shall make and transmit annually to the legislature and Governor of each party state a report covering the activities of the Commission for the preceding year and embodying such recommendations as may have been adopted by the Commission. The Commission may issue such additional reports as it may deem desirable.

ARTICLE V

A. The members of the Commission shall serve without compensation, but the expenses of each commissioner shall be met by the state which he represents in accordance with the law of that state. All other expenses incurred by the Commission in the course of exercising the powers conferred upon it by this compact, unless met in some other manner specifically provided by this compact, shall be paid by the Commission out of its own funds.

B. The Commission shall submit to the executive head or designated officer of each party state a budget of its estimated expenditures for such period as may be required by the laws of that state for presentation to the legislature thereof.

C. Each of the Commission's budgets of estimated expenditures shall contain specific recommendations of the amount or amounts to be appropriated by each of the party states. Detailed commission budgets shall be recommended by a majority of the votes cast, and the costs shall be allocated equitably among the party states in accordance with their respective interests.

D. The Commission shall not pledge the credit of any party state. The Commission may meet any of its obligations in whole or in part with funds available to it under Article IV (II) of this compact, provided that the Commission takes specific action setting aside such funds prior to the incurring of any obligations to be met in whole or in part in this manner. Except where the Commission makes use of funds available to it under Article IV (H) hereof, the Commission shall not incur any obligations prior to the allotment of funds by the party states adequate to meet the same.

E. The Commission shall keep accurate accounts of all receipts and disbursements. The receipts and disbursements of the Commission shall be subject to the audit and accounting procedures established under the bylaws. However, all receipts and disbursements of funds handled by the Commission shall be audited yearly by a qualified public accountant and the report of the audit shall be included in and become a part of the

annual report of the Commission.

F. The accounts of the Commission shall be open at any reasonable time for inspection by such agency, representative or representatives of the party states as may be duly constituted for that purpose and by others who may be authorized by the Commission.

ARTICLE VI

The Commission shall have power to:

A. Collect, correlate, interpret, and report on data relating to the water resources and the use thereof in the Basin or any portion thereof.

B. Recommend methods for the orderly, efficient, and balanced development, use, and conservation of the water resources of the Basin or any portion thereof to the party states and to any other governments or agencies having interests in or jurisdiction over the Basin or any portion thereof.

C. Consider the need for and desirability of public works and improvements relating to the water resources in the Basin or any portion thereof.

D. Consider means of improving navigation and port facilities in the Basin or any portion thereof.

E. Consider means of improving and maintaining the fisheries of the Basin or any portion thereof.

F. Recommend policies relating to water resources including the institution and alteration of flood plain and other zoning laws, ordinances and regulations.

G. Recommend uniform or other laws, ordinances, or regulations relating to the development, use and conservation of the Basin's water resources to the party states or any of them and to other governments, political subdivisions, agencies or intergovernmental bodies having

interests in or jurisdiction sufficient to affect conditions in the Basin or any portion thereof.

H. Consider and recommend amendments or agreements supplementary to this compact to the party states or any of them, and assist in the formulation and drafting of such amendments or supplementary agreements.

I. Prepare and publish reports, bulletins, and publications appropriate to this work and fix reasonable sale prices therefor.

J. With respect to the water resources of the Basin or any portion thereof, recommend agreements between the governments of the United States and Canada.

K. Recommend mutual arrangements expressed by concurrent or reciprocal legislation on the part of Congress and the Parliament of Canada including but not limited to such agreements and mutual arrangements as are provided for by Article XIII of the Treaty of 1909 Relating to Boundary Waters and Questions Arising Between the United States and Canada. (Treaty Series, No. 548).

L. Cooperate with the governments of the United States and of Canada, the party states and any public or private agencies or bodies having interests in or jurisdiction sufficient to affect the Basin or any portion thereof.

M. At the request of the United States, or in the event that a Province shall be a party state, at the request of the Government of Canada, assist in the negotiation and formulation of any treaty or other mutual arrangement or agreement between the United States and Canada with reference to the Basin or any portion thereof.

N. Make any recommendation and do all things necessary and proper to carry out the powers conferred upon the Commission by this compact, provided that no action of the Commission shall have the force of law in, or be binding upon, any party state.

ARTICLE VII

Each party state agrees to consider the action the Commission recommends in respect to:

- A. Stabilization of lake levels.
- B. Measures for combating pollution, beach erosion, floods, and shore inundation.
- C. Uniformity in navigation regulations within the constitutional powers of the states.
- D. Proposed navigation aids and improvements.
- E. Uniformity or effective coordinating action in fishing laws and regulations and cooperative action to eradicate destructive and parasitical forces endangering the fisheries, wild life and other water resources.
- F. Suitable hydroelectric power developments.
- G. Cooperative programs for control of soil and bank erosion for the general improvement of the Basin.
- H. Diversion of waters from and into the Basin.
- I. Other measures the Commission may recommend to the states pursuant to Article VI of this compact.

ARTICLE VIII

This compact shall continue in force and remain binding upon each party state until renounced by act of the legislature of such state, in such form and manner as it may choose and as may be valid and effective to repeal a statute of said state, provided that such renunciation shall not become effective until six months after notice of such action shall have been officially communicated in writing to the executive head of the other party states.

ARTICLE IX

It is intended that the provisions of this compact shall be reasonably and liberally construed to effectuate the purposes thereof. The provisions of this compact shall be severable and if any phrase, clause, sentence or provision of this compact is declared to be contrary to the constitution of any party state or of the United States, or in the case of a Province, to the British North America Act of 1867 as amended, or the applicability thereof to any state, agency, person or circumstance is held invalid, the constitutionality of the remainder of this compact and the applicability thereof to any state, agency, person or circumstance shall not be affected thereby, provided further that if this compact shall be held contrary to the constitution of the United States, or in the case of a Province, to the British North America Act of 1867 as amended, or of any party state, the compact shall remain in full force and effect as to the remaining states and in full force and effect as to the state affected as to all severable matters.

§ 21-0903. Representation on the commission.

In pursuance of article four of the compact there shall be five commissioners. One shall be the Commissioner of Environmental Conservation or, if designated by him, one of his principal deputies. The other four commissioners shall be designated by the Governor to serve at his pleasure. Each commissioner shall have three-fifths of one vote and is hereby given all of the powers conferred on a commissioner by the compact or which shall be necessary or incidental to the performance of his functions as such a commissioner. It is hereby specifically recognized that the interests and activities of the Great Lakes Commission contemplate many aspects of the great lakes and of their relation to the member states. Accordingly, it is declared to be the legislative intent that each of the New York commissioners, and such commissioners as a group, shall confer and consult with all other agencies and officers of the state government whenever appropriate to coordinate or make known the views and policies of such agencies and officers with respect to the work of the commission or the interests of

the state in the great lakes basin.

§ 21-0905. Budget.

1. The Great Lakes Commission shall submit annually to the Commissioner of Environmental Conservation, in accordance with the laws and practice of this state, for study and consideration by such commissioner, an estimate of moneys required to administer, manage and support the commission during the ensuing fiscal year. Such estimate shall include any requests for appropriation of funds by New York state and shall be accompanied by a tabulation of similar requests which the commission expects to make to each other member state and the formula or factors upon which such respective requests are based.

2. The Commissioner of Environmental Conservation shall include a suitable item or items of estimated expenditures for the Great Lakes Commission in the budget estimates of his department.

§ 21-0907. Examination of commission accounts.

In accordance with paragraph F of article five of the compact, the state Comptroller is hereby authorized and empowered from time to time to examine the accounts and books of the commission, including its receipts, disbursements and such other items referring to its financial standing as such Comptroller may deem proper and to report the results of such examination to the Governor.

§ 21-0909. Transmittal of documents.

The Secretary of State is hereby authorized and directed to transmit a duly authenticated copy of this title and the act by which it has been added to the Environmental Conservation Law to each jurisdiction party to the compact.

§ 21-0911. Inconsistent provisions.

No provision of the Conservation Law, and no provision of the Environmental Conservation Law, if such provision of the Environmental Conservation Law was derived from a provision of the Conservation Law, which is inconsistent with the provisions of the Great Lakes Basin Compact shall be applicable to the Great Lakes Commission or to any matter governed by the Great Lakes Basin Compact.

§ 21-0913. Appraisal of commission.

On August 15, 1964, and at intervals of four years thereafter, the Commissioner of Environmental Conservation shall evaluate the role of the Great Lakes Commission with respect to the interests of this state in the Great Lakes, and shall report to the commission thereon. The Commissioner of Environmental Conservation shall transmit a copy of such report to the Governor. The Commissioner of Environmental Conservation may make such additional reports to the Great Lakes Commission and the Governor as he deems appropriate.

§ 21-0915. Termination.

In accordance with article eight of the compact, termination of the participation of this state in such compact shall be evidenced by repeal of this title. Notice of intention to withdraw from the compact shall be executed and transmitted by the Governor.

§ 21-0917. The Great Lakes Basin advisory council.

1. As used in this section:

a. "Great Lakes Basin" means the watershed of the Great Lakes and the St. Lawrence River, upstream from Trois Rivieres, Quebec, consisting in

New York State of the Lake Erie, Niagara River, Lake Ontario minor tributaries, Genesee River, Seneca-Oneida Oswego River, Black River, St. Lawrence River, and Lake Champlain drainage basins.

b. "Great Lakes region" means the geographic region composed of the states of Illinois, Indiana, Michigan, Minnesota, New York, Ohio and Wisconsin, the commonwealth of Pennsylvania, and the provinces of Ontario and Quebec, Canada.

2. There is hereby established within the department the Great Lakes Basin advisory council (hereinafter referred to as the "council") consisting of nineteen members to advise the governor and the commissioner on matters relating to the state's role in regional, federal, and international activities aimed at the protection of the quality and quantity of water in the Great Lakes, domestic, municipal, industrial and agricultural water supplies, navigation, hydroelectric power and energy production, recreation, fish and wildlife habitat, and a balanced ecosystem which are all vital to the future environmental, social, and economic health of New York State and the other states and provinces comprising the Great Lakes region.

a. The council shall:

(i) advise the commissioner and the governor on the implementation and any modifications to any comprehensive long-term Great Lakes management plan developed by the department;

(ii) advise the state's members on the board of directors of the Great Lakes protection fund;

(iii) annually identify specific research or program needs for funding from the New York Great Lakes protection fund, after consultation with the Great Lakes protection fund, other Great Lakes states and other concerned parties. Such annual program, with as much detail on the scope and expectations of each project as is practical, shall be submitted to the commissioner, who shall select specific projects from the program, recommended by the council and shall submit such projects to the department for implementation; and

(iv) evaluate and report to the governor and the legislature on the projects funded by the New York Great Lakes protection fund.

b. The governor shall appoint nine members with one representing an institution that performs research on the issues and the problems of the Great Lakes, one representing a labor union whose members derive their livelihood from the Great Lakes, three representing environmental or conservation organizations with interests in the Great Lakes Basin, two representing business organizations whose commercial interest lies in activities in or around Lake Ontario, Lake Erie and/or the St. Lawrence River, one representing a municipality adjacent to Lake Erie, Lake Ontario or the St. Lawrence River, and one representing a county having a population of two hundred and fifty thousand people or less adjacent to Lake Erie, Lake Ontario or the St. Lawrence River. The temporary president of the Senate and the speaker of the Assembly shall each appoint two members who have a demonstrated knowledge in Great Lakes issues. The commissioner, the commissioners of the departments of state, health, transportation, economic development and the chairman of the power authority of the state of New York or their designated representative shall be ex-officio members. The appointed members of the council shall serve terms of three years; provided, however, that of the members first appointed by the governor, three shall be appointed for a term of three years, three shall be appointed for a term of two years and three shall be appointed for a term of one year. An appointment to fill a vacancy shall be made for the remainder of the affected term in the same manner as the original appointment was made. Such appointment shall be made within sixty days of the date the position becomes vacant. Members shall serve until their successor has been appointed. The governor shall designate the chairperson.

3. The advisory council shall meet at a minimum of two times annually.

4. Advisory council members shall receive no compensation for their services, but shall be reimbursed for their actual and necessary expenses incurred during the performance of their duties.

5. The council shall submit a report prior to January first beginning in nineteen hundred ninety and annually thereafter to the governor, the speaker of the Assembly, the temporary president of the Senate and the

chairmen of the Senate and Assembly committees on environmental conservation. Such report should include an evaluation of the problems and conditions of the Great Lakes and recommendations for departmental or legislative solutions.

TITLE 10

GREAT LAKES-ST. LAWRENCE RIVER BASIN WATER RESOURCES COMPACT

Section 21-1001. The Great Lakes-St. Lawrence River Basin Water Resources Compact.

21-1003. Rules and regulations.

21-1005. Report and recommendations of department.

21-1007. The Great Lakes Basin advisory council; convening.

21-1009. Grievances.

§ 21-1001. The Great Lakes-St. Lawrence River Basin Water Resources Compact.

GREAT LAKES-ST. LAWRENCE RIVER BASIN WATER RESOURCES COMPACT

ARTICLE 1

SHORT TITLE, DEFINITIONS, PURPOSES AND DURATION

Section 1.1. Short Title. This act shall be known and may be cited as the "Great Lakes-St. Lawrence River Basin Water Resources Compact."

Section 1.2. Definitions. For the purposes of this Compact, and of any supplemental or concurring legislation enacted pursuant thereto, except as may be otherwise required by the context:

Adaptive Management means a Water resources management system that provides a systematic process for evaluation, monitoring and learning from the outcomes of operational programs and adjustment of policies, plans and programs based on experience and the evolution of scientific knowledge concerning Water resources and Water Dependent Natural Resources.

Agreement means the Great Lakes-St. Lawrence River Basin Sustainable

Water Resources Agreement.

Applicant means a Person who is required to submit a Proposal that is subject to management and regulation under this Compact. Application has a corresponding meaning.

Basin or Great Lakes-St. Lawrence River Basin means the watershed of the Great Lakes and the St. Lawrence River upstream from Trois-Rivieres, Quebec within the jurisdiction of the Parties.

Basin Ecosystem or Great Lakes-St. Lawrence River Basin Ecosystem means the interacting components of air, land, water and living organisms, including humankind, within the Basin.

Community within a Straddling County means any incorporated city, town or the equivalent thereof, that is located outside the Basin but wholly within a County that lies partly within the Basin and that is not a Straddling Community.

Compact means this Compact.

Consumptive Use means that portion of the water withdrawn or withheld from the Basin that is lost or otherwise not returned to the Basin due to evaporation, incorporation into products, or other processes.

Council means the Great Lakes-St. Lawrence River Basin Water Resources Council, created by this Compact.

Council Review means the collective review by the Council members as described in article 4 of this Compact.

County means the largest territorial division for local government in a State. The County boundaries shall be defined as those boundaries that exist as of December 13, 2005.

Cumulative Impacts mean the impact on the Basin Ecosystem that results from incremental effects of all aspects of a withdrawal, diversion or

Consumptive Use in addition to other past, present, and reasonably foreseeable future Withdrawals, Diversions and Consumptive Uses regardless of who undertakes the other Withdrawals, Diversions and Consumptive Uses. Cumulative Impacts can result from individually minor but collectively significant Withdrawals, Diversions and Consumptive Uses taking place over a period of time.

Decision-Making Standard means the decision-making standard established by Section 4.11 for Proposals subject to management and regulation in Section 4.10.

Diversion means a transfer of Water from the Basin into another watershed, or from the watershed of one of the Great Lakes into that of another by any means of transfer, including but not limited to a pipeline, canal, tunnel, aqueduct, channel, modification of the direction of a water course, a tanker ship, tanker truck or rail tanker but does not apply to Water that is used in the Basin or a Great Lake watershed to manufacture or produce a Product that is then transferred out of the Basin or watershed. Divert has a corresponding meaning.

Environmentally Sound and Economically Feasible Water Conservation Measures mean those measures, methods, technologies or practices for efficient water use and for reduction of water loss and waste or for reducing a Withdrawal, Consumptive Use or Diversion that (i) are environmentally sound, (ii) reflect best practices applicable to the water use sector, (iii) are technically feasible and available, (iv) are economically feasible and cost effective based on an analysis that considers direct and avoided economic and environmental costs and (v) consider the particular facilities and processes involved, taking into account the environmental impact, age of equipment and facilities involved, the processes employed, energy impacts and other appropriate factors.

Exception means a transfer of Water that is excepted under Section 4.9 from the prohibition against Diversions in Section 4.8.

Exception Standard means the standard for Exceptions established in

Section 4.9.4.

Intra-Basin Transfer means the transfer of Water from the watershed of one of the Great Lakes into the watershed of another Great Lake.

Measures means any legislation, law, regulation, directive, requirement, guideline, program, policy, administrative practice or other procedure.

New or Increased Diversion means a new Diversion, an increase in an existing Diversion, or the alteration of an existing Withdrawal so that it becomes a Diversion.

New or Increased Withdrawal or Consumptive Use means a new Withdrawal or Consumptive Use or an increase in an existing Withdrawal or Consumptive Use.

Originating Party means the Party within whose jurisdiction an Application or registration is made or required.

Party means a State party to this Compact.

Person means a human being or a legal person, including a government or a non-governmental organization, including any scientific, professional, business, non-profit, or public interest organization or association that is neither affiliated with, nor under the direction of a government.

Product means something produced in the Basin by human or mechanical effort or through agricultural processes and used in manufacturing, commercial or other processes or intended for intermediate or end use consumers. (i) Water used as part of the packaging of a Product shall be considered to be part of the Product. (ii) Other than Water used as part of the packaging of a Product, Water that is used primarily to transport materials in or out of the Basin is not a Product or part of a Product. (iii) Except as provided in (i) above, Water which is transferred as part of a public or private supply is not a Product or part of a

Product. (iv) Water in its natural state such as in lakes, rivers, reservoirs, aquifers, or water basins is not a Product.

Proposal means a Withdrawal, Diversion or Consumptive Use of Water that is subject to this Compact.

Province means Ontario or Quebec.

Public Water Supply Purposes means water distributed to the public through a physically connected system of treatment, storage and distribution facilities serving a group of largely residential customers that may also serve industrial, commercial, and other institutional operators. Water Withdrawn directly from the Basin and not through such a system shall not be considered to be used for Public Water Supply Purposes.

Regional Body means the members of the Council and the Premiers of Ontario and Quebec or their designee as established by the Agreement.

Regional Review means the collective review by the Regional Body as described in Article 4 of this Compact.

Source Watershed means the watershed from which a Withdrawal originates. If Water is Withdrawn directly from a Great Lake or from the St. Lawrence River, then the Source Watershed shall be considered to be the watershed of that Great Lake or the watershed of the St. Lawrence River, respectively. If Water is Withdrawn from the watershed of a stream that is a direct tributary to a great lake or a direct tributary to the St. Lawrence River, then the Source Watershed shall be considered to be the watershed of that Great Lake or the watershed of the St. Lawrence River, respectively, with a preference to the direct tributary stream watershed from which it was Withdrawn.

Standard of Review and Decision means the Exception Standard, Decision-Making Standard and reviews as outlined in Article 4 of this Compact.

State means one of the states of Illinois, Indiana, Michigan, Minnesota, New York, Ohio or Wisconsin or the Commonwealth of Pennsylvania.

Straddling Community means any incorporated city, town or the equivalent thereof, wholly within any County that lies partly or completely within the Basin, whose corporate boundary existing as of the effective date of this Compact, is partly within the Basin or partly within two Great Lakes watersheds.

Technical Review means a detailed review conducted to determine whether or not a Proposal that requires Regional Review under this Compact meets the Standard of Review and Decision following procedures and guidelines as set out in this Compact.

Water means ground or surface water contained within the Basin.

Water Dependent Natural Resources means the interacting components of land, Water and living organisms affected by the Waters of the Basin.

Waters of the Basin or Basin Water means the Great Lakes and all streams, rivers, lakes, connecting channels and other bodies of water, including tributary groundwater, within the Basin.

Withdrawal means the taking of water from surface water or groundwater. Withdraw has a corresponding meaning.

Section 1.3. Findings and Purposes.

The legislative bodies of the respective Parties hereby find and declare:

1. Findings:

a. The Waters of the Basin are precious public natural resources shared and held in trust by the States;

b. The Waters of the Basin are interconnected and part of a single hydrologic system;

c. The Waters of the Basin can concurrently serve multiple uses. Such multiple uses include municipal, public, industrial, commercial, agriculture, mining, navigation, energy development and production, recreation, the subsistence, economic and cultural activities of native peoples, water quality maintenance, and the maintenance of fish and wildlife habitat and a balanced ecosystem. And, other purposes are encouraged, recognizing that such uses are interdependent and must be balanced;

d. Future Diversions and Consumptive Uses of Basin Water resources have the potential to significantly impact the environment, economy and welfare of the Great Lakes-St. Lawrence River region;

e. Continued sustainable, accessible and adequate water supplies for the people and economy of the Basin are of vital importance; and,

f. The Parties have a shared duty to protect, conserve, restore, improve and manage the renewable but finite Waters of the Basin for the use, benefit and enjoyment of all their citizens, including generations yet to come. The most effective means of protecting, conserving, restoring, improving and managing the Basin Waters is through the joint pursuit of unified and cooperative principles, policies and programs mutually agreed upon, enacted and adhered to by all Parties.

2. Purposes:

a. To act together to protect, conserve, restore, improve and effectively manage the Waters and Water Dependent Natural Resources of the Basin under appropriate arrangements for intergovernmental cooperation and consultation because current lack of full scientific certainty should not be used as a reason for postponing measures to protect the Basin Ecosystem;

b. To remove causes of present and future controversies;

c. To provide for cooperative planning and action by the Parties with respect to such Water resources;

d. To facilitate consistent approaches to Water management across the Basin while retaining State management authority over Water management decisions within the Basin;

e. To facilitate the exchange of data, strengthen the scientific information base upon which decisions are made and engage in consultation on the potential effects of proposed Withdrawals and losses on the Waters and Water Dependent Natural Resources of the Basin;

f. To prevent significant adverse impacts of Withdrawals and losses on the Basin's ecosystems and watersheds;

g. To promote interstate and State-Provincial comity; and,

h. To promote an Adaptive Management approach to the conservation and management of Basin Water resources, which recognizes, considers and provides adjustments for the uncertainties in, and evolution of, scientific knowledge concerning the Basin's Waters and Water Dependent Natural Resources.

Section 1.4. Science. 1. The Parties commit to provide leadership for the development of a collaborative strategy with other regional partners to strengthen the scientific basis for sound Water management decision making under this Compact.

2. The strategy shall guide the collection and application of scientific information to support:

a. An improved understanding of the individual and Cumulative Impacts of Withdrawals from various locations and Water sources on the Basin Ecosystem and to develop a mechanism by which impacts of Withdrawals may be assessed;

b. The periodic assessment of Cumulative Impacts of Withdrawals, Diversions and Consumptive Uses on a Great Lake and St. Lawrence River watershed basis;

c. Improved scientific understanding of the Waters of the Basin;

d. Improved understanding of the role of groundwater in Basin Water resources management; and,

e. The development, transfer and application of science and research related to Water conservation and Water use efficiency.

ARTICLE 2 ORGANIZATION

Section 2.1. Council Created.

The Great Lakes-St. Lawrence River Basin Water Resources Council is hereby created as a body politic and corporate, with succession for the duration of this Compact, as an agency and instrumentality of the governments of the respective Parties.

Section 2.2. Council membership.

The Council shall consist of the Governors of the Parties, ex officio.

Section 2.3. Alternates.

Each member of the Council shall appoint at least one alternate who may act in his or her place and stead, with authority to attend all meetings of the Council and with power to vote in the absence of the member. Unless otherwise provided by law of the Party for which he or she is appointed, each alternate shall serve during the term of the member appointing him or her, subject to removal at the pleasure of the member. In the event of a vacancy in the office of alternate, it shall be filled in the same manner as an original appointment for the unexpired term only.

Section 2.4. Voting.

1. Each member is entitled to one vote on all matters that may come before the Council.
2. Unless otherwise stated, the rule of decision shall be by a simple majority.
3. The Council shall annually adopt a budget for each fiscal year and the amount required to balance the budget shall be apportioned equitably among the Parties by unanimous vote of the Council. The appropriation of such amounts shall be subject to such review and approval as may be required by the budgetary processes of the respective Parties.
4. The participation of Council members from a majority of the Parties shall constitute a quorum for the transaction of business at any meeting of the Council.

Section 2.5. Organization and Procedure.

The Council shall provide for its own organization and procedure, and may adopt rules and regulations governing its meetings and transactions, as well as the procedures and timeline for submission, review and consideration of Proposals that come before the Council for its review and action. The Council shall organize, annually, by the election of a Chair and Vice Chair from among its members. Each member may appoint an advisor, who may attend all meetings of the Council and its committees, but shall not have voting power. The Council may employ or appoint professional and administrative personnel, including an Executive Director, as it may deem advisable, to carry out the purposes of this Compact.

Section 2.6. Use of Existing Offices and Agencies.

It is the policy of the Parties to preserve and utilize the functions, powers and duties of existing offices and agencies of government to the extent consistent with this Compact. Further, the Council shall promote

and aid the coordination of the activities and programs of the Parties concerned with Water resources management in the Basin. To this end, but without limitation, the Council may:

1. Advise, consult, contract, assist or otherwise cooperate with any and all such agencies;
2. Employ any other agency or instrumentality of any of the Parties for any purpose; and,
3. Develop and adopt plans consistent with the Water resources plans of the Parties.

Section 2.7. Jurisdiction.

The Council shall have, exercise and discharge its functions, powers and duties within the limits of the Basin. Outside the Basin, it may act in its discretion, but only to the extent such action may be necessary or convenient to effectuate or implement its powers or responsibilities within the Basin and subject to the consent of the jurisdiction wherein it proposes to act.

Section 2.8. Status, Immunities and Privileges.

1. The Council, its members and personnel in their official capacity and when engaged directly in the affairs of the Council, its property and its assets, wherever located and by whomsoever held, shall enjoy the same immunity from suit and every form of judicial process as is enjoyed by the Parties, except to the extent that the Council may expressly waive its immunity for the purposes of any proceedings or by the terms of any contract.

2. The property and assets of the Council, wherever located and by whomsoever held, shall be considered public property and shall be immune from search, requisition, confiscation, expropriation or any other form of taking or foreclosure by executive or legislative action.

3. The Council, its property and its assets, income and the operations it carries out pursuant to this Compact shall be immune from all taxation by or under the authority of any of the Parties or any political subdivision thereof; provided, however, that in lieu of property taxes the Council may make reasonable payments to local taxing districts in annual amounts which shall approximate the taxes lawfully assessed upon similar property.

Section 2.9. Advisory Committees.

The Council may constitute and empower advisory committees, which may be comprised of representatives of the public and of federal, State, tribal, county and local governments, water resources agencies, water-using industries and sectors, water-interest groups and academic experts in related fields.

ARTICLE 3 GENERAL POWERS AND DUTIES

Section 3.1. General.

The Waters and Water Dependent Natural Resources of the Basin are subject to the sovereign right and responsibilities of the Parties, and it is the purpose of this Compact to provide for joint exercise of such powers of sovereignty by the Council in the common interests of the people of the region, in the manner and to the extent provided in this Compact. The Council and the Parties shall use the Standard of Review and Decision and procedures contained in or adopted pursuant to this Compact as the means to exercise their authority under this Compact.

The Council may revise the Standard of Review and Decision, after consultation with the Provinces and upon unanimous vote of all Council members, by regulation duly adopted in accordance with Section 3.3 of this Compact and in accordance with each Party's respective statutory authorities and applicable procedures.

The Council shall identify priorities and develop plans and policies relating to Basin Water resources. It shall adopt and promote uniform

and coordinated policies for Water resources conservation and management in the Basin.

Section 3.2. Council Powers.

The Council may: plan; conduct research and collect, compile, analyze, interpret, report and disseminate data on Water resources and uses; forecast Water levels; conduct investigations; institute court actions; design, acquire, construct, reconstruct, own, operate, maintain, control, sell and convey real and personal property and any interest therein as it may deem necessary, useful or convenient to carry out the purposes of this Compact; make contracts; receive and accept such payments, appropriations, grants, gifts, loans, advances and other funds, properties and services as may be transferred or made available to it by any Party or by any other public or private agency, corporation or individual; and, exercise such other and different powers as may be delegated to it by this Compact or otherwise pursuant to law, and have and exercise all powers necessary or convenient to carry out its express powers or which may be reasonably implied therefrom.

Section 3.3. Rules and Regulations.

1. The Council may promulgate and enforce such rules and regulations as may be necessary for the implementation and enforcement of this Compact. The Council may adopt by regulation, after public notice and public hearing, reasonable Application fees with respect to those Proposals for Exceptions that are subject to Council review under Section 4.9. Any rule or regulation of the Council, other than one which deals solely with the internal management of the Council or its property, shall be adopted only after public notice and hearing.

2. Each Party, in accordance with its respective statutory authorities and applicable procedures, may adopt and enforce rules and regulations to implement and enforce this Compact and the programs adopted by such Party to carry out the management programs contemplated by this Compact.

Section 3.4. Program Review and Findings.

1. Each Party shall submit a report to the Council and the Regional Body detailing its Water management and conservation and efficiency programs that implement this Compact. The report shall set out the manner in which Water Withdrawals are managed by sector, Water source, quantity or any other means, and how the provisions of the Standard of Review and Decision and conservation and efficiency programs are implemented. The first report shall be provided by each Party one year from the effective date of this Compact and thereafter every 5 years.

2. The Council, in cooperation with the Provinces, shall review its Water management and conservation and efficiency programs and those of the Parties that are established in this Compact and make findings on whether the Water management program provisions in this Compact are being met, and if not, recommend options to assist the Parties in meeting the provisions of this Compact. Such review shall take place:

- a. 30 days after the first report is submitted by all Parties; and,
- b. Every five years after the effective date of this Compact; and,
- c. At any other time at the request of one of the Parties.

3. As one of its duties and responsibilities, the Council may recommend a range of approaches to the Parties with respect to the development, enhancement and application of Water management and conservation and efficiency programs to implement the Standard of Review and Decision reflecting improved scientific understanding of the Waters of the Basin, including groundwater, and the impacts of Withdrawals on the Basin Ecosystem.

ARTICLE 4

WATER MANAGEMENT AND REGULATION

Section 4.1. Water Resources Inventory, Registration and Reporting.

1. Within five years of the effective date of this Compact, each Party shall develop and maintain a Water resources inventory for the

collection, interpretation, storage, retrieval, exchange, and dissemination of information concerning the Water resources of the Party, including, but not limited to, information on the location, type, quantity, and use of those resources and the location, type, and quantity of Withdrawals, Diversions and Consumptive Uses. To the extent feasible, the Water resources inventory shall be developed in cooperation with local, State, federal, tribal and other private agencies and entities, as well as the Council. Each Party's agencies shall cooperate with that Party in the development and maintenance of the inventory.

2. The Council shall assist each Party to develop a common base of data regarding the management of the Water Resources of the Basin and to establish systematic arrangements for the exchange of those data with other States and Provinces.

3. To develop and maintain a compatible base of Water use information, within five years of the effective date of this Compact any Person who Withdraws Water in an amount of 100,000 gallons per day or greater average in any 30-day period (including Consumptive Uses) from all sources, or Diverts Water of any amount, shall register the Withdrawal or Diversion by a date set by the Council unless the Person has previously registered in accordance with an existing State program. The Person shall register the Withdrawal or Diversion with the Originating Party using a form prescribed by the Originating Party that shall include, at a minimum and without limitation: the name and address of the registrant and date of registration; the locations and sources of the Withdrawal or Diversion; the capacity of the Withdrawal or Diversion per day and the amount Withdrawn or Diverted from each source; the uses made of the Water; places of use and places of discharge; and, such other information as the Originating Party may require. All registrations shall include an estimate of the volume of the Withdrawal or Diversion in terms of gallons per day average in any 30-day period.

4. All registrants shall annually report the monthly volumes of the Withdrawal, Consumptive Use and Diversion in gallons to the Originating Party and any other information requested by the Originating Party.

5. Each Party shall annually report the information gathered pursuant to this Section to a Great Lakes - St. Lawrence River Water use data base repository and aggregated information shall be made publicly available, consistent with the confidentiality requirements in Section 8.3.

6. Information gathered by the Parties pursuant to this Section shall be used to improve the sources and applications of scientific information regarding the Waters of the Basin and the impacts of the Withdrawals and Diversions from various locations and Water sources on the Basin Ecosystem, and to better understand the role of groundwater in the Basin. The Council and the Parties shall coordinate the collection and application of scientific information to further develop a mechanism by which individual and Cumulative Impacts of Withdrawals, Consumptive Uses and Diversions shall be assessed.

Section 4.2. Water Conservation and Efficiency Programs.

1. The Council commits to identify, in cooperation with the Provinces, Basin-wide Water conservation and efficiency objectives to assist the Parties in developing their Water conservation and efficiency program. These objectives are based on the goals of:

a. Ensuring improvement of the Waters and Water Dependent Natural Resources;

b. Protecting and restoring the hydrologic and ecosystem integrity of the Basin;

c. Retaining the quantity of surface water and groundwater in the Basin;

d. Ensuring sustainable use of Waters of the Basin; and,

e. Promoting the efficiency of use and reducing losses and waste of Water.

2. Within two years of the effective date of this Compact, each Party shall develop its own Water conservation and efficiency goals and objectives consistent with the Basin-wide goals and objectives, and shall develop and implement a Water conservation and efficiency program, either voluntary or mandatory, within its jurisdiction based on the Party's goals and objectives. Each Party shall annually assess its programs in meeting the Party's goals and objectives, report to the Council and the Regional Body and make this annual assessment available to the public.

3. Beginning five years after the effective date of this Compact, and every five years thereafter, the Council, in cooperation with the Provinces, shall review and modify as appropriate the Basin-wide objectives, and the Parties shall have regard for any such modifications in implementing their programs. This assessment will be based on examining new technologies, new patterns of Water use, new resource demands and threats, and Cumulative Impact assessment under Section 4.15.

4. Within two years of the effective date of this Compact, the Parties commit to promote Environmentally Sound and Economically Feasible Water Conservation Measures such as:

- a. Measures that promote efficient use of Water;
- b. Identification and sharing of best management practices and state of the art conservation and efficiency technologies;
- c. Application of sound planning principles;
- d. Demand-side and supply-side Measures or incentives; and,
- e. Development, transfer and application of science and research.

5. Each Party shall implement in accordance with Paragraph 2 a voluntary or mandatory Water conservation program for all, including

existing, Basin Water users. Conservation programs need to adjust to new demands and the potential impacts of cumulative effects and climate.

Section 4.3. Party Powers and Duties.

1. Each Party, within its jurisdiction, shall manage and regulate New or Increased Withdrawals, Consumptive Uses and Diversions, including Exceptions, in accordance with this Compact.

2. Each Party shall require an Applicant to submit an Application in such manner and with such accompanying information as the Party shall prescribe.

3. No Party may approve a Proposal if the Party determines that the Proposal is inconsistent with this Compact or the Standard of Review and Decision or any implementing rules or regulations promulgated thereunder. The Party may approve, approve with modifications or disapprove any Proposal depending on the Proposal's consistency with this Compact and the Standard of Review and Decision.

4. Each Party shall monitor the implementation of any approved Proposal to ensure consistency with the approval and may take all necessary enforcement actions.

5. No Party shall approve a Proposal subject to Council or Regional Review, or both, pursuant to this Compact unless it shall have been first submitted to and reviewed by either the Council or Regional Body, or both, and approved by the council, as applicable. Sufficient opportunity shall be provided for comment on the Proposal's consistency with this Compact and the Standard of Review and Decision. All such comments shall become part of the Party's formal record of decision, and the Party shall take into consideration any such comments received.

Section 4.4. Requirement for Originating Party Approval.

No Proposal subject to management and regulation under this Compact shall hereafter be undertaken by any Person unless it shall have been

approved by the Originating Party.

Section 4.5. Regional Review.

1. General.

a. It is the intention of the Parties to participate in Regional Review of Proposals with the Provinces, as described in this Compact and the Agreement.

b. Unless the Applicant or the Originating Party otherwise requests, it shall be the goal of the Regional Body to conclude its review no later than 90 days after notice under Section 4.5.2 of such Proposal is received from the Originating Party.

c. Proposals for Exceptions subject to Regional Review shall be submitted by the Originating Party to the Regional Body for Regional Review, and where applicable, to the Council for concurrent review.

d. The Parties agree that the protection of the integrity of the Great Lakes - St. Lawrence River Basin ecosystem shall be the overarching principle for reviewing Proposals subject to Regional Review, recognizing uncertainties with respect to demands that may be placed on Basin Water, including groundwater, levels and flows of the Great Lakes and the St. Lawrence River, future changes in environmental conditions, the reliability of existing data and the extent to which Diversions may harm the integrity of the Basin Ecosystem.

e. The Originating Party shall have lead responsibility for coordinating information for resolution of issues related to evaluation of a Proposal, and shall consult with the Applicant throughout the Regional Review Process.

f. A majority of the members of the Regional Body may request Regional review of a regionally significant or potentially precedent setting Proposal. Such Regional Review must be conducted, to the extent possible, within the time frames set forth in this Section. Any such

Regional Review shall be undertaken only after consulting the Applicant.

2. Notice from Originating Party to the Regional Body.

a. The Originating Party shall determine if a Proposal is subject to Regional Review. If so, the Originating Party shall provide timely notice to the Regional Body and the public.

b. Such notice shall not be given unless and until all information, documents and the Originating Party's Technical Review needed to evaluate whether the Proposal meets the Standard of Review and Decision have been provided.

c. An Originating Party may:

i. Provide notice to the Regional Body of an Application, even if notification is not required; or,

ii. Request Regional Review of an application, even if Regional Review is not required. Any such Regional Review shall be undertaken only after consulting the Applicant.

d. An Originating Party may provide preliminary notice of a potential Proposal.

3. Public Participation.

a. To ensure adequate public participation, the Regional Body shall adopt procedures for the review of Proposals that are subject to Regional Review in accordance with this Article.

b. The Regional Body shall provide notice to the public of Proposal undergoing Regional Review. Such notice shall indicate that the public has an opportunity to comment in writing to the Regional Body on whether the Proposal meets the Standard of Review and Decision.

c. The Regional Body shall hold a public meeting in the State or

Province of the Originating Party in order to receive public comment on the issue of whether the Proposal under consideration meets the Standard of Review and Decision.

d. The Regional Body shall consider the comments received before issuing a Declaration of Finding.

e. The Regional Body shall forward the comments it receives to the Originating Party.

4. Technical Review.

a. The Originating Party shall provide the Regional Body with its Technical Review of the Proposal under consideration.

b. The Originating Party's Technical Review shall thoroughly analyze the Proposal and provide an evaluation of the Proposal sufficient for a determination of whether the Proposal meets the Standard of Review and Decision.

c. Any member of the Regional Body may conduct their own Technical Review of any Proposal subject to Regional Review.

d. At the request of the majority of its members, the Regional Body shall make such arrangements as it considers appropriate for an independent Technical Review of a Proposal.

e. All Parties shall exercise their best efforts to ensure that a Technical Review undertaken under Sections 4.5.4.c and 4.5.4.d does not unnecessarily delay the decision by the Originating Party on the Application. Unless the Applicant or the Originating Party otherwise requests, all Technical Reviews shall be completed no later than 60 days after the date the notice of the Proposal was given to the Regional Body.

5. Declaration of Finding.

a. The Regional Body shall meet to consider a Proposal. The Applicant shall be provided with an opportunity to present the Proposal to the Regional Body at such time.

b. The Regional Body, having considered the notice, the Originating Party's Technical Review, any other independent Technical Review that is made, any comments or objections including the analysis of comments made by the public, First Nations and federally recognized Tribes, and any other information that is provided under this Compact shall issue a Declaration of Finding that the Proposal under consideration:

i. Meets the Standard of Review and Decision;

ii. Does not meet the Standard of Review and Decision; or,

iii. Would meet the Standard of Review and Decision if certain conditions were met.

c. An Originating Party may decline to participate in a Declaration of Finding made by the Regional Body.

d. The Parties recognize and affirm that it is preferable for all members of the Regional Body to agree whether the Proposal meets the Standard of Review and Decision.

e. If the members of the Regional Body who participate in the Declaration of Finding all agree, they shall issue a written Declaration of Finding with consensus.

f. In the event that the members cannot agree, the Regional Body shall make every reasonable effort to achieve consensus within 25 days.

g. Should consensus not be achieved, the Regional Body may issue a Declaration of Finding that presents different points of view and indicates each Party's conclusions.

h. The Regional Body shall release the Declarations of Finding to the

public.

i. The Originating Party and the Council shall consider the Declaration of Finding before making a decision on the Proposal.

Section 4.6. Proposals Subject to Prior Notice.

1. Beginning no later than five years of the effective date of this Compact, the Originating Party shall provide all Parties and the Provinces with detailed and timely notice and an opportunity to comment within 90 days on any Proposal for a New or Increased Consumptive Use of 5 million gallons per day or greater average in any 90-day period. Comments shall address whether or not the Proposal is consistent with the Standard of Review and Decision. The Originating Party shall provide a response to any such comment received from another Party.

2. A Party may provide notice, an opportunity to comment and a response to comments even if this is not required under Paragraph 1 of this Section. Any provision of such notice and opportunity to comment shall be undertaken only after consulting the Applicant.

Section 4.7. Council Actions.

1. Proposals for Exceptions subject to Council Review shall be submitted by the Originating Party to the Council for Council Review, and where applicable, to the Regional Body for concurrent review.

2. The Council shall review and take action on Proposals in accordance with this Compact and the Standard of Review and Decision. The Council shall not take action on a Proposal subject to Regional Review pursuant to this Compact unless the Proposal shall have been first submitted to and reviewed by the Regional Body. The Council shall consider any findings resulting from such review.

Section 4.8. Prohibition of New or Increased Diversions.

All New or Increased Diversions are prohibited, except as provided for

in this Article.

Section 4.9. Exceptions to the Prohibition of Diversions.

1. Straddling Communities. A Proposal to transfer Water to an area within a Straddling Community but outside the Basin or outside the source great lake Watershed shall be excepted from the prohibition against Diversions and be managed and regulated by the Originating Party provided that, regardless of the volume of Water transferred, all the Water so transferred shall be used solely for Public Water Supply Purposes within the Straddling Community, and:

a. All Water Withdrawn from the Basin shall be returned, either naturally or after use, to the Source Watershed less an allowance for Consumptive Use. No surface water or groundwater from outside the Basin may be used to satisfy any portion of this criterion except if it:

i. Is part of a water supply or wastewater treatment system that combines water from inside and outside of the Basin;

ii. Is treated to meet applicable water quality discharge standards and to prevent the introduction of invasive species into the Basin;

iii. Maximizes the portion of water returned to the Source Watershed as Basin Water and minimizes the surface water or groundwater from outside the Basin;

b. If the Proposal results from a New or Increased Withdrawal of 100,000 gallons per day or greater average over any 90-day period, the Proposal shall also meet the Exception Standard; and

c. If the Proposal results in a New or Increased Consumptive Use of 5 million gallons per day or greater average over any 90-day period, the Proposal shall also undergo Regional Review.

2. Intra-Basin Transfer. A Proposal for an Intra-Basin Transfer that would be considered a Diversion under this Compact, and not already

excepted pursuant to Paragraph 1 of this Section, shall be excepted from the prohibition against Diversions, provided that:

a. If the Proposal results from a New or Increased Withdrawal less than 100,000 gallons per day average over any 90-day period, the Proposal shall be subject to management and regulation at the discretion of the Originating Party.

b. If the Proposal results from a New or Increased Withdrawal 100,000 gallons per day or greater average over any 90-day period and if the Consumptive Use resulting from the Withdrawal is less than five million gallons per day average over any 90-day period:

i. The Proposal shall meet the Exception Standard and be subject to management and regulation by the Originating Party, except that the Water may be returned to another Great Lake watershed rather than the Source Watershed;

ii. The Applicant shall demonstrate that there is no feasible, cost effective, and environmentally sound water supply alternative within the Great Lake watershed to which the Water will be transferred, including conservation of existing water supplies; and,

iii. The Originating Party shall provide notice to the other Parties prior to making any decision with respect to the Proposal.

c. If the Proposal results in a New or Increased Consumptive Use of 5 million gallons per day or greater average over any 90-day period:

i. The Proposal shall be subject to management and regulation by the Originating Party and shall meet the Exception Standard, ensuring that Water Withdrawn shall be returned to the Source Watershed;

ii. The Applicant shall demonstrate that there is no feasible, cost effective, and environmentally sound water supply alternative within the great lake watershed to which the Water will be transferred, including conservation of existing water supplies;

iii. The Proposal undergoes Regional Review; and,

iv. The Proposal is approved by the Council. Council approval shall be given unless one or more Council Members vote to disapprove.

3. Straddling Counties. A Proposal to transfer Water to a Community within a Straddling County that would be considered a Diversion under this Compact shall be excepted from the prohibition against Diversions, provided that it satisfies all of the following conditions:

a. The Water shall be used solely for the Public Water Supply Purposes of the Community within a Straddling County that is without adequate supplies of potable water;

b. The Proposal meets the Exception Standard, maximizing the portion of water returned to the Source Watershed as Basin Water and minimizing the surface water or groundwater from outside the Basin;

c. The Proposal shall be subject to management and regulation by the Originating Party, regardless of its size;

d. There is no reasonable water supply alternative within the basin in which the community is located, including conservation of existing water supplies;

e. Caution shall be used in determining whether or not the Proposal meets the conditions for this Exception. This Exception should not be authorized unless it can be shown that it will not endanger the integrity of the Basin Ecosystem;

f. The Proposal undergoes Regional Review; and,

g. The Proposal is approved by the Council. Council approval shall be given unless one or more Council Members vote to disapprove.

A Proposal must satisfy all of the conditions listed above. Further,

substantive consideration will also be given to whether or not the Proposal can provide sufficient scientifically based evidence that the existing water supply is derived from groundwater that is hydrologically interconnected to Waters of the Basin.

4. Exception Standard. Proposals subject to management and regulation in this Section shall be declared to meet this Exception Standard and may be approved as appropriate only when the following criteria are met:

a. The need for all or part of the proposed Exception cannot be reasonably avoided through the efficient use and conservation of existing water supplies;

b. The Exception will be limited to quantities that are considered reasonable for the purposes for which it is proposed;

c. All Water Withdrawn shall be returned, either naturally or after use, to the Source Watershed less an allowance for Consumptive Use. No surface water or groundwater from the outside the Basin may be used to satisfy any portion of this criterion except if it:

i. Is part of a water supply or wastewater treatment system that combines water from inside and outside of the Basin;

ii. Is treated to meet applicable water quality discharge standards and to prevent the introduction of invasive species into the Basin;

d. The Exception will be implemented so as to ensure that it will result in no significant individual or cumulative adverse impacts to the quantity or quality of the Waters and Water Dependent Natural Resources of the Basin with consideration given to the potential Cumulative Impacts of any precedent-setting consequences associated with the Proposal;

e. The Exception will be implemented so as to incorporate Environmentally Sound and Economically Feasible Water Conservation Measures to minimize Water Withdrawals or Consumptive Use;

f. The Exception will be implemented so as to ensure that it is in compliance with all applicable municipal, State and federal laws as well as regional interstate and international agreements, including the Boundary Waters Treaty of 1909; and,

g. All other applicable criteria in Section 4.9 have also been met.

Section 4.10. Management and regulation of New or Increased Withdrawals and Consumptive Uses.

1. Within five years of the effective date of this Compact, each Party shall create a program for the management and regulation of New or Increased Withdrawals and Consumptive Uses by adopting and implementing Measures consistent with the Decision-Making Standard. Each Party, through a considered process, shall set and may modify threshold levels for the regulation of New or Increased Withdrawals in order to assure an effective and efficient Water management program that will ensure that uses overall are reasonable, that Withdrawals overall will not result in significant impacts to the Waters and Water Dependent Natural Resources of the Basin, determined on the basis of significant impacts to the physical, chemical, and biological integrity of Source Watersheds, and that all other objectives of the Compact are achieved. Each Party may determine the scope and thresholds of its program, including which New or Increased Withdrawals and Consumptive Uses will be subject to the program.

2. Any Party that fails to set threshold levels that comply with Section 4.10.1 any time before 10 years after the effective date of this Compact shall apply a threshold level for management and regulation of all New or Increased Withdrawals of 100,000 gallons per day or greater average in any 90 day period.

3. The Parties intend programs for New or Increased Withdrawals and Consumptive Uses to evolve as may be necessary to protect Basin Waters. Pursuant to Section 3.4, the Council, in cooperation with the Provinces, shall periodically assess the Water management programs of the Parties.

Such assessments may produce recommendations for the strengthening of the programs, including without limitation, establishing lower thresholds for management and regulation in accordance with the Decision-Making Standard.

Section 4.11. Decision-Making Standard.

Proposals subject to management and regulation in Section 4.10 shall be declared to meet this Decision-Making Standard and may be approved as appropriate only when the following criteria are met:

1. All Water Withdrawn shall be returned, either naturally or after use, to the Source Watershed less an allowance for Consumptive Use;
2. The Withdrawal or Consumptive Use will be implemented so as to ensure that the Proposal will result in no significant individual or cumulative adverse impacts to the quantity or quality of the Waters and Water Dependent Natural Resources and the applicable Source Watershed;
3. The Withdrawal or Consumptive Use will be implemented so as to incorporate Environmentally Sound and Economically Feasible Water Conservation Measures;
4. The Withdrawal or Consumptive Use will be implemented so as to ensure that it is in compliance with all applicable municipal, State and federal laws as well as regional interstate and international agreements, including the Boundary Waters Treaty of 1909;
5. The proposed use is reasonable, based upon a consideration of the following factors:
 - a. Whether the proposed Withdrawal or Consumptive Use is planned in a fashion that provides for efficient use of the water, and will avoid or minimize the waste of Water;
 - b. If the proposal is for an increased Withdrawal or Consumptive Use, whether efficient use is made of existing water supplies;

c. The balance between economic development, social development and environmental protection of the proposed Withdrawal and use and other existing or planned withdrawals and water uses sharing the water source;

d. The supply potential of the water source, considering quantity, quality, and reliability and safe yield of hydrologically interconnected water sources;

e. The probable degree and duration of any adverse impacts caused or expected to be caused by the proposed Withdrawal and use under foreseeable conditions, to other lawful consumptive or non-consumptive uses of water or to the quantity or quality of the Waters and Water Dependent Natural Resources of the Basin, and the proposed plans and arrangements for avoidance or mitigation of such impacts; and,

f. If a proposal includes restoration of hydrologic conditions and functions of the Source Watershed, the Party may consider that.

Section 4.12. Applicability.

1. Minimum Standard. This Standard of Review and Decision shall be used as a minimum standard. Parties may impose a more restrictive decision-making standard for Withdrawals under their authority. It is also acknowledged that although a Proposal meets the Standard of Review and Decision it may not be approved under the laws of the Originating Party that has implemented more restrictive Measures.

2. Baseline. a. To establish a baseline for determining a New or Increased Diversion, Consumptive Use or Withdrawal, each Party shall develop either or both of the following lists for their jurisdiction:

i. A list of existing Withdrawal approvals as of the effective date of the Compact;

ii. A list of the capacity of existing systems as of the effective date of this Compact. The capacity of the existing systems should be

presented in terms of Withdrawal capacity, treatment capacity, distribution capacity, or other capacity limiting factors. The capacity of the existing systems must represent the state of the systems. Existing capacity determinations shall be based upon approval limits or the most restrictive capacity information.

b. For all purposes of this Compact, volumes of Diversions, Consumptive Uses, or Withdrawals of Water set forth in the list(s) prepared by each Party in accordance with this Section, shall constitute the baseline volume.

c. The list(s) shall be furnished to the Regional Body and the Council within one year of the effective date of this Compact.

3. Timing of Additional Applications. Applications for New or Increased Withdrawals, Consumptive Uses or Exceptions shall be considered cumulatively within ten years of any application.

4. Change of Ownership. Unless a new owner proposes a project that shall result in a Proposal for a new or Increased Diversion or Consumptive Use subject to Regional Review or Council approval, the change of ownership in and of itself shall not require Regional Review or Council approval.

5. Groundwater. The Basin surface water divide shall be used for the purpose of managing and regulating New or Increased Diversions, Consumptive Uses or Withdrawals of surface water and groundwater.

6. Withdrawal Systems. The total volume of surface water and groundwater resources that supply a common distribution system shall determine the volume of a Withdrawal, Consumptive Use or Diversion.

7. Connecting Channels. The watershed of each Great Lake shall include its upstream and downstream connecting channels.

8. Transmission in Water Lines. Transmission of Water within a line that extends outside the Basin as it conveys Water from one point to

another within the Basin shall not be considered a Diversion if none of the Water is used outside the Basin.

9. Hydrologic Units. The Lake Michigan and Lake Huron watersheds shall be considered to be a single hydrologic unit and watershed.

10. Bulk Water Transfer. A Proposal to Withdraw Water and to remove it from the Basin in any container greater than 5.7 gallons shall be treated under this Compact in the same manner as a Proposal for a Diversion. Each Party shall have the discretion, within its jurisdiction, to determine the treatment of Proposals to Withdraw Water and to remove it from the Basin in any container of 5.7 gallons or less.

Section 4.13. Exemptions.

Withdrawals from the Basin for the following purposes are exempt from the requirements of Article 4.

1. To supply vehicles, including vessels and aircraft, whether for the needs of the persons or animals being transported or for ballast or other needs related to the operation of the vehicles.

2. To use in a non-commercial project on a short-term basis for firefighting, humanitarian, or emergency response purposes.

Section 4.14. U.S. Supreme Court Decree: Wisconsin et al. v. Illinois et al.

1. Notwithstanding any terms of this Compact to the contrary, with the exception of Paragraph 5 of this Section, current, New or Increased Withdrawals, Consumptive Uses and Diversions of Basin Water by the State of Illinois shall be governed by the terms of the United States Supreme Court decree in Wisconsin et al. v. Illinois et al. and shall not be subject to the terms of this Compact nor any rules or regulations promulgated pursuant to this Compact. This means that, with the exception of Paragraph 5 of this Section, for purposes of this Compact, current, New or Increased Withdrawals, Consumptive Uses and Diversions

of Basin Water within the State of Illinois shall be allowed unless prohibited by the terms of the United States Supreme Court decree in *Wisconsin et al. v. Illinois et al.*

2. The Parties acknowledge that the United States Supreme Court decree in *Wisconsin et al. v. Illinois et al.* shall continue in full force and effect, that this Compact shall not modify any terms thereof, and that this Compact shall grant the parties no additional rights, obligations, remedies or defenses thereto. The Parties specifically acknowledge that this Compact shall not prohibit or limit the State of Illinois in any manner from seeking additional Basin Water as allowed under the terms of the United States Supreme Court decree in *Wisconsin et al. v. Illinois et al.*, any other party from objecting to any request by the State of Illinois for additional Basin Water under the terms of said decree, or any party from seeking any other type of modification to said decree. If an application is made by any party to the Supreme Court of the United States to modify said decree, the Parties to this Compact who are also parties to the decree shall seek formal input from the Canadian Provinces of Ontario and Quebec, with respect to the proposed modification, use best efforts to facilitate the appropriate participation of said Provinces in the proceedings to modify the decree, and shall not unreasonably impede or restrict such participation.

3. With the exception of Paragraph 5 of this Section, because current, New or Increased Withdrawals, Consumptive Uses and Diversions of Basin Water by the State of Illinois are not subject to the terms of this Compact, the State of Illinois is prohibited from using any term of this Compact, including Section 4.9, to seek New or Increased Withdrawals, Consumptive Uses or Diversions of Basin Water.

4. With the exception of Paragraph 5 of this Section, because Sections 4.3, 4.4, 4.5, 4.6, 4.7, 4.8, 4.9, 4.10, 4.11, 4.12 (Paragraphs 1, 2, 3, 4, 6 and 10 only), and 4.13 of this Compact all relate to current, New or Increased Withdrawals, Consumptive Uses and Diversions of Basin Waters, said provisions do not apply to the State of Illinois. All other provisions of this Compact not listed in the preceding sentence shall apply to the State of Illinois, including the Water Conservation

Programs provision of Section 4.2.

5. In the event of a Proposal for a Diversion of Basin Water for use outside the territorial boundaries of the Parties to this Compact, decisions by the State of Illinois regarding such a Proposal would be subject to all terms of this Compact, except Paragraphs 1, 3 and 4 of this Section.

6. For purposes of the State of Illinois' participation in this Compact, the entirety of this Section 4.14 is necessary for the continued implementation of this Compact and, if severed, this Compact shall no longer be binding on or enforceable by or against the State of Illinois.

Section 4.15. Assessment of Cumulative Impacts.

1. The Parties in cooperation with the Provinces shall collectively conduct within the Basin, on a Lake watershed and St. Lawrence River Basin basis, a periodic assessment of the Cumulative Impacts of Withdrawals, Diversions and Consumptive Uses from the Waters of the Basin, every 5 years or each time the incremental Basin Water losses reach 50 million gallons per day average in any 90-day period in excess of the quantity at the time of the most recent assessment, whichever comes first, or at the request of one or more of the Parties. The assessment shall form the basis for a review of the Standard of Review and Decision, Council and Party regulations and their application. This assessment shall:

a. Utilize the most current and appropriate guidelines for such a review, which may include but not be limited to Council on Environmental Quality and Environment Canada guidelines;

b. Give substantive consideration to climate change or other significant threats to Basin Waters and take into account the current state of scientific knowledge, or uncertainty, and appropriate Measures to exercise caution in cases of uncertainty if serious damage may result;

c. Consider adaptive management principles and approaches, recognizing, considering and providing adjustments for the uncertainties in, and evolution of science concerning the Basin's water resources, watersheds and ecosystems, including potential changes to Basin-wide processes, such as lake level cycles and climate.

2. The Parties have the responsibility of conducting this Cumulative Impact assessment. Applicants are not required to participate in this assessment.

3. Unless required by other statutes, Applicants are not required to conduct a separate cumulative impact assessment in connection with an Application but shall submit information about the potential impacts of a Proposal to the quantity or quality of the Waters and Water Dependent Natural Resources of the applicable Source Watershed. An Applicant may, however, provide an analysis of how their Proposal meets the no significant adverse Cumulative Impact provision of the Standard of Review and Decision.

ARTICLE 5 TRIBAL CONSULTATION

Section 5.1. Consultation with Tribes.

1. In addition to all other opportunities to comment pursuant to Section 6.2, appropriate consultations shall occur with federally recognized Tribes in the Originating Party for all Proposals subject to Council or Regional Review pursuant to this Compact. Such consultations shall be organized in the manner suitable to the individual Proposal and the laws and policies of the Originating Party.

2. All federally recognized Tribes within the Basin shall receive reasonable notice indicating that they have an opportunity to comment in writing to the Council or the Regional Body, or both, and other relevant organizations on whether the Proposal meets the requirements of the Standard of Review and Decision when a Proposal is subject to Regional Review or Council approval. Any notice from the Council shall inform the

Tribes of any meeting or hearing that is to be held under Section 6.2 and invite them to attend. The Parties and the Council shall consider the comments received under this Section before approving, approving with modifications or disapproving any Proposal subject to Council or Regional Review.

3. In addition to the specific consultation mechanisms described above, the Council shall seek to establish mutually agreed upon mechanisms or processes to facilitate dialogue with, and input from federally recognized Tribes on matters to be dealt with by the Council; and, the Council shall seek to establish mechanisms and processes with federally recognized Tribes designed to facilitate on-going scientific and technical interaction and data exchange regarding matters falling within the scope of this Compact. This may include participation of tribal representatives on advisory committees established under this Compact or such other processes that are mutually-agreed upon with federally recognized Tribes individually or through duly-authorized intertribal agencies or bodies.

ARTICLE 6

PUBLIC PARTICIPATION

Section 6.1. Meetings, Public Hearings and Records.

1. The Parties recognize the importance and necessity of public participation in promoting management of the Water Resources of the Basin. Consequently, all meetings of the Council shall be open to the public, except with respect to issues of personnel.

2. The minutes of the Council shall be a public record open to inspection at its offices during regular business hours.

Section 6.2. Public Participation.

It is the intent of the Council to conduct public participation processes concurrently and jointly with processes undertaken by the Parties and through Regional Review. To ensure adequate public participation, each Party or the Council shall ensure procedures for the

review of Proposals subject to the Standard of Review and Decision consistent with the following requirements:

1. Provide public notification of receipt of all Applications and a reasonable opportunity for the public to submit comments before Applications are acted upon.
2. Assure public accessibility to all documents relevant to an Application, including public comment received.
3. Provide guidance on standards for determining whether to conduct a public meeting(s) or hearing(s) for an Application, time and place of such a meeting or hearing, and procedures for conducting of the same.
4. Provide the record of decision for public inspection including comments, objections, responses and approvals, approvals with conditions and disapprovals.

ARTICLE 7

DISPUTE RESOLUTION AND ENFORCEMENT

Section 7.1. Good Faith Implementation.

Each of the Parties pledges to support implementation of all provisions of this Compact, and covenants that its officers and agencies shall not hinder, impair, or prevent any other Party carrying out any provision of this Compact.

Section 7.2. Alternative Dispute Resolution.

1. Desiring that this Compact be carried out in full, the Parties agree that disputes between the Parties regarding interpretation, application and implementation of this Compact shall be settled by alternative dispute resolution.

2. The Council, in consultation with the Provinces, shall provide by rule procedures for the resolution of disputes pursuant to this section.

Section 7.3. Enforcement.

1. Any Person aggrieved by any action taken by the Council pursuant to the authorities contained in this Compact shall be entitled to a hearing before the Council. Any Person aggrieved by a Party action shall be entitled to a hearing pursuant to the relevant Party's administrative procedures and laws. After exhaustion of such administrative remedies, (i) any aggrieved Person shall have the right to judicial review of a Council action in the United States District Courts for the District of Columbia or the District Court in which the Council maintains offices, provided such action is commenced within 90 days; and, (ii) any aggrieved Person shall have the right to judicial review of a Party's action in the relevant Party's court of competent jurisdiction, provided that an action or proceeding for such review is commenced within the time frames provided for by the Party's law. For the purposes of this Paragraph, a State or Province is deemed to be an aggrieved Person with respect to any Party action pursuant to this Compact.

2. a. Any Party or the Council may initiate actions to compel compliance with the provisions of this Compact, and the rules and regulations promulgated hereunder by the Council. Jurisdiction over such actions is granted to the court of the relevant Party, as well as the United States District Courts for the District of Columbia and the District Court in which the Council maintains offices. The remedies available to any such court shall include, but not be limited to, equitable relief and civil penalties.

b. Each Party may issue orders within its respective jurisdiction and may initiate actions to compel compliance with the provisions of its respective statutes and regulations adopted to implement the authorities contemplated by this Compact in accordance with the provisions of the laws adopted in each Party's jurisdiction.

3. Any aggrieved Person, Party or the Council may commence a civil action in the relevant Party's courts and administrative systems to compel any Person to comply with this Compact should any such Person, without approval having been given, undertake a New or Increased

Withdrawal, Consumptive Use or Diversion that is prohibited or subject to approval pursuant to this Compact.

a. No action under this subsection may be commenced if:

i. The Originating Party or Council approval for the New or Increased Withdrawal, Consumptive Use or Diversion has been granted; or,

ii. The Originating Party or Council has found that the New or Increased Withdrawal, Consumptive Use or Diversion is not subject to approval pursuant to this Compact.

b. No action under this subsection may be commenced unless:

i. A Person commencing such action has first given 60 days prior notice to the Originating Party, the Council and Person alleged to be in noncompliance; and,

ii. Neither the Originating Party nor the Council has commenced and is diligently prosecuting appropriate enforcement actions to compel compliance with this Compact.

The available remedies shall include equitable relief, and the prevailing or substantially prevailing party may recover the costs of litigation, including reasonable attorney and expert witness fees, whenever the court determines that such an award is appropriate.

4. Each of the Parties may adopt provisions providing additional enforcement mechanisms and remedies including equitable relief and civil penalties applicable within its jurisdiction to assist in the implementation of this Compact.

ARTICLE 8 ADDITIONAL PROVISIONS

Section 8.1. Effect on Existing Rights.

1. Nothing in this Compact shall be construed to affect, limit,

diminish or impair any rights validly established and existing as of the effective date of this Compact under State or federal law governing the Withdrawal of Waters of the Basin.

2. Nothing contained in this Compact shall be construed as affecting or intending to affect or in any way to interfere with the law of the respective Parties relating to common law Water rights.

3. Nothing in this Compact is intended to abrogate or derogate from treaty rights or rights held by any Tribe recognized by the federal government of the United States based upon its status as a Tribe recognized by the federal government of the United States.

4. An approval by a Party or the Council under this Compact does not give any property rights, nor any exclusive privileges, nor shall it be construed to grant or confer any right, title, easement, or interest in, to or over any land belonging to or held in trust by a Party; neither does it authorize any injury to private property or invasion of private rights, nor infringement of federal, State or local laws or regulations; nor does it obviate the necessity of obtaining federal assent when necessary.

Section 8.2. Relationship to Agreements Concluded by the United States of America.

1. Nothing in this Compact is intended to provide nor shall be construed to provide, directly or indirectly, to any Person any right, claim or remedy under any treaty or international agreement nor is it intended to derogate any right, claim, or remedy that already exists under any treaty or international agreement.

2. Nothing in this Compact is intended to infringe nor shall be construed to infringe upon the treaty power of the United States of America, nor shall any term hereof be construed to alter or amend any treaty or term thereof that has been or may hereafter be executed by the United States of America.

3. Nothing in this Compact is intended to affect nor shall be construed to affect the application of the Boundary Waters Treaty of 1909 whose requirements continue to apply in addition to the requirements of this Compact.

Section 8.3. Confidentiality.

1. Nothing in this Compact requires a Party to breach confidentiality obligations or requirements prohibiting disclosure, or to compromise security of commercially sensitive or proprietary information.

2. A Party may take measures, including but not limited to deletion and redaction, deemed necessary to protect any confidential, proprietary or commercially sensitive information when distributing information to other Parties. The Party shall summarize or paraphrase any such information in a manner sufficient for the Council to exercise its authorities contained in this Compact.

Section 8.4. Additional Laws.

Nothing in this Compact shall be construed to repeal, modify or qualify the authority of any Party to enact any legislation or enforce any additional conditions and restrictions regarding the management and regulation of Waters within its jurisdiction.

Section 8.5. Amendments and Supplements.

The provisions of this Compact shall remain in full force and effect until amended by action of the governing bodies of the Parties and consented to and approved by any other necessary authority in the same manner as this Compact is required to be ratified to become effective.

Section 8.6. Severability.

Should a court of competent jurisdiction hold any part of this Compact to be void or unenforceable, it shall be considered severable from those portions of the Compact capable of continued implementation in the

absence of the voided provisions. All other provisions capable of continued implementation shall continue in full force and effect.

Section 8.7. Duration of Compact and Termination.

Once effective, the Compact shall continue in force and remain binding upon each and every Party unless terminated.

This Compact may be terminated at any time by a majority vote of the Parties. In the event of such termination, all rights established under it shall continue unimpaired.

ARTICLE 9 EFFECTUATION

Section 9.1. Repealer.

All acts and parts of acts inconsistent with this act are to the extent of such inconsistency hereby repealed.

Section 9.2. Effectuation by Chief Executive.

The Governor is authorized to take such action as may be necessary and proper in his or her discretion to effectuate the Compact and the initial organization and operation thereunder.

Section 9.3. Entire Agreement.

The parties consider this Compact to be complete and an integral whole. Each provision of this Compact is considered material to the entire Compact, and failure to implement or adhere to any provision may be considered a material breach. Unless otherwise noted in this Compact, any change or amendment made to the Compact by any Party in its implementing legislation or by the U.S. Congress when giving its consent to this Compact is not considered effective unless concurred in by all Parties.

Section 9.4. Effective Date and Execution.

This Compact shall become binding and effective when ratified through concurring legislation by the states of Illinois, Indiana, Michigan, Minnesota, New York, Ohio and Wisconsin and the Commonwealth of Pennsylvania and consented to by the Congress of the United States. This Compact shall be signed and sealed in nine identical original copies by the respective chief executives of the signatory Parties. One such copy shall be filed with the Secretary of State of each of the signatory Parties or in accordance with the laws of the state in which the filing is made, and one copy shall be filed and retained in the archives of the Council upon its organization. The signatures shall be affixed and attested under the following form:

In Witness Whereof, and in evidence of the adoption and enactment into law of this Compact by the legislatures of the signatory parties and consent by the Congress of the United States, the respective Governors do hereby, in accordance with the authority conferred by law, sign this Compact in nine duplicate original copies, attested by the respective Secretaries of State, and have caused the seals of the respective states to be hereunto affixed this_____ day of (month), (year)

§ 21-1003. Rules and regulations.

The department is authorized to promulgate rules and regulations necessary to implement and administer this title.

§ 21-1005. Report and recommendations of department.

The department shall submit to the governor and the legislature on or before the first day of the January next succeeding the approval of the Compact its recommendations for any legislative action deemed by the department advisable, including amendments to the statutes of the state of New York as well as recommendations for rules or regulations which it determines are necessary to carry out the intent and purposes of the Compact. The department shall also, as it deems advisable, submit to the governor and the legislature information on the programs and activities of the Council as they relate to the state of New York.

§ 21-1007. The Great Lakes Basin advisory council; convening.

1. Not later than three months after the effective date of this section, the commissioner shall convene the Great Lakes Basin advisory council pursuant to section 21-0917 of this article.

2. The advisory council shall be convened for the purpose of developing recommendations for legislation, regulations or rules that are necessary to implement and effectuate the requirements and purposes of the Compact. The recommendations shall include, but shall not be limited to the following:

a. the evaluation and recommendations of the threshold levels to be included in the implementing legislation regulation or rules for regulating new or increased water withdrawals in the state;

b. the establishment of a permitting program or alternative programs in order to meet the water management objectives of this state;

c. the development of the state's water conservation and efficiency programs;

d. the method for establishing the baseline for determining a new or increased diversion, consumptive use, or withdrawal pursuant to Section 4.12.2 of the Compact; and

e. the collection and application of scientific information to improve understanding of the waters of the Great Lakes Basin and the impacts of withdrawals and diversions.

3. The advisory council shall present its final recommendations to the governor and the legislature not later than eighteen months after the effective date of this section.

4. The department shall not adopt any rule or regulation pursuant to the Compact prior to advisory council issuing its final recommendations

to the governor and the legislature.

§ 21-1009. Grievances.

1. For the purposes of section 7.3 of the Compact, a person shall be aggrieved only when they have exhausted all rights and remedies afforded pursuant to article seventy-eight of the civil practice law and rules and:

a. there is interference with a present use of the water by the complaining person or an interference with the complaining person's present enjoyment of riparian land occurring prior to suit, or which will immediately occur when the withdrawal complained of is begun;

b. a decrease in the market value of the complaining person's interest in riparian land occurring prior to suit or which will immediately occur when the withdrawal complained of is begun, regardless of whether his or her use of the water or enjoyment of riparian land was interfered with prior to suit, or will be immediately interfered with when the withdrawal complained of is begun; or

c. the complaining person is an applicant, and the complaining person's application is denied or modified in whole or in part.

2. Nothing contained in this section shall, however, be construed as depriving any person of any remedy either at law or in equity, which he or she now has, or may hereafter acquire, under the laws of this state.

TITLE 11

CHAMPLAIN BASIN COMPACT

Section 21-1101. Champlain basin compact.

21-1103. State member of the basin panel and representative; planning members.

21-1105. Advisors.

21-1107. Cooperative services.

21-1109. Budget.

21-1111. Audit.

21-1113. Inconsistent laws.

§ 21-1101. Champlain basin compact.

The Champlain basin compact as first entered into pursuant to chapter 905 of the laws of 1966, is hereby continued as follows:

THE CHAMPLAIN BASIN COMPACT

ARTICLE 1--PURPOSE

1.1 The signatory parties agree that there is need for a regional intergovernmental forum for consideration of the problems and coordination of governmental activities in the great underdeveloped Champlain Basin.

1.2 The signatory parties recognize the water and related resources of the Champlain Basin as regional assets vested with local, state and national interests for which they have joint responsibility, and that the conservation, utilization, development, management and control of the water and related resources of the Champlain Basin under a comprehensive multi-purpose plan is essential to provide the greatest benefits for the public welfare.

1.3 The signatory parties acknowledge that planning and protection are essential in order to assure orderly development, safeguard the values of the area, and preserve the magnificent beauties and amenities of the great boundary sea of Lake Champlain and its environs, and this need is greatest in the areas most subject to the pressures of urbanization, the counties riparian on Lake Champlain and in particular the lake and its immediate environs.

1.4 To these ends, the signatory parties find that it is essential to establish a joint agency of the signatory parties, with powers sufficient and appropriate:

a) to provide a forum for consultation among and coordination of

governmental agencies in the area.

b) formulate a comprehensive plan and program to effectuate proper management of the water and related resources of the Champlain Basin.

c) encourage and implement planning and protection of values and amenities in the counties riparian on Lake Champlain.

d) consider, formulate and recommend programs and provisions for the protection of the values and amenities of Lake Champlain and its immediate environs; and administer and enforce such programs when authorized by the legislatures of the respective states.

ARTICLE 2--SHORT TITLE, DEFINITIONS

2.1 This act shall be known and may be cited as the Champlain Basin Compact.

2.2 The term "Champlain Region" shall mean the area included within the boundaries of the Champlain Basin.

2.3 The term "Champlain Basin" shall mean Lake Champlain, its tributaries and all land drained by that Lake and its tributaries to whatever extent they lie within the signatory states.

2.4 The term "Champlain Valley" shall mean the area in Vermont contained in the counties of Grand Isle, Franklin, Chittenden, Addison, and those portions of Rutland County which are within the basin, the areas in New York contained in the counties of Clinton, Essex, Warren, and those portions of Washington county which are within the basin.

2.5 The term "Lake Champlain Park" shall mean Lake Champlain, its bays and indentations and shores, and the land and waters in both states contained within one quarter of a mile west of the outside state property line of Interstate 87 from the international boundary to Glens Falls, on the east side contained within one quarter of a mile east of the outside state property lines of Interstate 89 starting at the Canadian border to Burlington, Interstate 189 to South Burlington, U.

S. 7 to Vergennes, 22A to Fairhaven and 4 to Whitehall, provided that with respect to advertising this shall include any structures, displays or devices which can be seen from the lake if they are not otherwise included.

2.6 The term "Lake Champlain" shall include the Lake, its islands, the lands under its waters up to the international boundary and its tributaries up to the boundaries of the Lake Champlain Park.

ARTICLE 3

3.1 The Champlain Basin Compact shall come into effect when enacted by the legislatures of Vermont and New York.

The provisions of Title 1 of Article 6 with respect to water and related resources management and the operation of the Basin panel with respect thereto shall come into effect when enacted by Vermont and New York and Title II of Article 6 shall come into effect when such a title has been enacted by the two states and the Congress has enacted legislation making the United States a signatory party to the provisions of Title II of Article 6 and provided for United States participation in the Basin Panel.

The provisions of Articles 7 and 8, the operation of the Valley Council with respect thereto, and all provisions of the compact except Title II of Article 6 as provided for shall come into effect when enacted by Vermont and New York.

3.2 The province of Quebec and the Government of Canada subject to such arrangements as may be necessary to effect participation under the constitutions of both nations may participate in this agreement or the Basin Panel thereof to that extent and under such terms as may be agreed between such government or governments and the signatory parties.

3.3 The Interstate Commission on the Lake Champlain Basin (Incochamp) is hereby created by the signatory parties as a body politic and corporate, with succession for the duration of this compact, as an agency and instrumentality of those parties. The Commission shall be

composed of six members from each state and when the United States participates in the Basin Panel as a signatory party, a representative of the United States with the following powers and duties.

The states of Vermont and New York, and when the United States participates as a signatory party, the United States of America shall be entitled to a representative on the Basin Panel to act for it in the management of the water and related resources of the Champlain Basin under the provisions of Article 6. In the instance of Vermont and New York, the state member shall be the Governor or a representative designated by the Governor to act for him. The United States representative shall be appointed by the President.

Each state shall name four planning members, and a state legislator from a constituency in the Champlain Basin. These members shall be designated or appointed and serve and be subject to removal as provided in the legislation by which their state enacts this compact.

The representatives of the signatory parties shall exercise the following voting powers in the Commission:

The representative of the United States may participate in all discussions but vote only on all matters with respect to the provisions of Article 6 and the Basin Panel thereof.

The representatives of each state on the Basin Panel may participate in all discussions and vote on all matters.

The planning members may participate in all discussions and vote on all matters except those matters within the purview of the Basin Panel as embodied in Article 6 of this compact. The legislative member may participate in all discussions and vote on all matters except those matters within the purview of the Basin Panel as embodied in Article 6 of this compact and those with respect to management and administration of regulatory and proprietary functions contained or established under the provisions of Articles 7 and 8.

3.4 a) The Commission as a whole shall act as a forum for the problems of the Champlain region and, where needful, in coordinating the activities within the region of the signatory parties, their subdivisions and agencies, and in addressing general recommendations to any government or governments with jurisdiction within the area encompassed by the signatory parties other than recommendations with respect to subjects on which recommendations are within the purview of the Basin Panel as embodied in Article 6 of this compact.

b) The Basin Panel of the Commission shall be composed of the representatives of the signatory parties designated to act for them in the management of the water and related resources of the Champlain Basin. Voting on all matters as included in Article 6 of this agreement shall be limited to the members of the Basin Panel. Each member of the panel shall be entitled to one vote on all matters which may come before the panel. No action of the panel shall be taken at any meeting unless a majority of the membership shall vote in favor thereof. Each member of the panel shall appoint an alternative to act in his place and stead, who shall attend all meetings of the Panel with power to vote in the absence of the member.

c) The Valley Council of the Commission shall act with respect to matters relative to the Valley and Lake Champlain Park as included in Articles 7 and 8 and shall be composed of the four planning members from each state, the representatives of each state on the Basin Panel and subject to the limitations described in 3.3 herein the Legislative members. Each member of the Valley Council shall be entitled to one vote. When the United States participates in the Basin Panel, the representative of the United States shall be entitled to participate in the discussions in the Valley Council and the Commission as a whole.

d) No action of the Commission as a whole or its Valley Council shall be binding unless taken at a meeting in which a majority of the members from each state are present and unless a majority of those qualified to vote on such action from each state concur, provided that any action not binding for such reason may be ratified within thirty days by the concurrence of a majority of each state. In the absence of any

representative his vote may be cast by another representative of his government in the Commission, provided that the representative casting the vote shall have a written proxy in proper form as may be required by the Commission.

3.5 The Commission may sue and be sued, and shall have a seal.

3.6 The Commission shall elect annually, from among its members, a chairman, a vice-chairman, and a treasurer. The commission shall appoint an executive director who shall also act as secretary and who, together with the treasurer, shall be bonded in such amounts as the Commission may require. Each panel shall elect annually a chairman and vice-chairman from among its members.

3.7 Irrespective of the civil service, personnel or other merit system laws of any of the signatory parties, the Commission shall appoint and remove or discharge such personnel as may be necessary for the performance of the Commission's functions. The Commission may establish and maintain in conjunction with any one or more of the signatory parties a suitable retirement system for its employees. Employees of the Commission shall be eligible for social security coverage in respect to old age and survivors insurance, provided that the Commission takes such steps as may be necessary to participate in such program as of insurance as a governmental agency or unit.

3.8 The commission may establish and maintain or participate in such additional programs of employee benefits as may be appropriate to afford employees of the Commission terms and conditions of employment similar to those enjoyed by employees of the signatory states generally.

3.9 a) The Commission may borrow, accept or contract for the services of personnel from any inter-governmental agency or government with jurisdiction in the region or any subdivision or agency thereof, or from any institution, person, firm or corporation.

b) The Commission may accept for any of its purposes and functions under this Compact any and all donations, and grants of money,

equipment, supplies, materials, and services, conditional or otherwise, from any government, inter-governmental agency, institution, person, firm, or corporation, and may receive, utilize, and dispose of the same provided no non-governmental donation or grant in kind or money shall be accepted for administrative or operating expenses. The Commission shall have the power to apply and qualify for and accept federal grants.

3.10 a) The Commission may establish and maintain such facilities as may be necessary for the transacting of its business. For these purposes the Commission may acquire, hold and convey real and personal property and any interest therein.

b) The Commission may adopt, amend, and rescind bylaws, rules, and regulations for the conduct of its business.

c) The Commission annually shall make a report to the Governors and the President of the United States. The report, which shall cover the activities of the Commission for the preceding year and embody such recommendations as may have been adopted by the Commission, shall be transmitted to the legislatures of all governments with jurisdiction in the region. The Commission may issue such additional reports as it may deem desirable.

ARTICLE 4--FINANCE

4.1 The Commission shall submit to the executive head or designated officer of each signatory party a budget or budgets for the Basin or Valley including a statement of all funds expected to be available to the Commission and their sources and, a request for an appropriation to cover that party's share of expenditures for such period as may be required by the laws of that jurisdiction for presentation to the legislature thereof.

4. With due regard for such monies and other assistance as may be made available to it, the Commission shall be provided with such funds by each of the several parties participating therein to provide the means of establishing and maintaining facilities, a staff of personnel, and such activities as may be necessary to fulfill the powers and duties

imposed upon and entrusted to the Commission or the Basin Panel or Valley Council thereof.

With due allowance for monies otherwise available, and monies made available by the United States of America, each budget of the Commission shall be the responsibility of the signatory parties, but as to the states apportioned between them as follows: 50% on an equal basis; 30% on the basis of population; 20% on the basis of area, such population to be determined in accordance with the last official United States Census of Population.

4.3 The Commission shall not pledge the credit of any jurisdiction. The Commission may meet any of its obligations in whole or in part with funds available to it under 3.8(b) of this compact, provided that the Commission takes specific action setting aside such funds prior to the incurring of any obligation to be met in whole or in part in such manner.

4.4 The Commission shall keep accurate accounts of all receipts and disbursements. The receipts and disbursements of the Commission shall be subject to the audit and accounting procedures established under its bylaws. However, all receipts and disbursements of funds handled by the Commission shall be audited by a qualified public accountant and the report of the audit shall be included in and become part of the annual report of the Commission.

4.5 The accounts of the Commission shall be open at any reasonable time for inspection by such agency, representative, or representatives of the jurisdictions which appropriate funds to the Commission.

ARTICLE 5--CHAMPLAIN REGION--ORDERLY DEVELOPMENT

5.1 The Commission shall act as a general forum for the problems of the region, including, but not limited to, those for which the agreement establishes separate consideration by the Basin Panel and Valley Council, and to that end shall encourage and implement channels of communication and coordination among those departments and agencies of the signatory parties and their subdivisions as have significant

interest in the subject matters of the Commission's activities and may make such recommendations to those parties, and those departments, agencies, and subdivisions as may be desirable for the welfare and orderly development of the region.

5.2 The Commission shall hold an annual general conference and such other conferences or meetings, general or particular, as it may deem advisable to promote the welfare and orderly development of the region.

5.3 The Commission shall sponsor, organize or encourage and aid conferences of the local governments of the Basin or such areas thereof as may be appropriate to implement inter-governmental information, co-operation, and coordination on and among all levels of government in the region. To effectuate better coordination in the region the Commission shall promote mutual aid and multilateral arrangements between the signatory parties and their agencies and local governments and their agencies and encourage interlocal legislation and agreements. It may sponsor or encourage the publications of local government bulletins or information to these ends.

5.4 The Commission may:

a) establish advisory and other technical committees as occasion warrants, composed of private citizens, expert and lay personnel, representatives of industry, labor, commerce, agriculture, civic associations and officials, and personnel of any government or inter-governmental organization having jurisdiction in the region.

b) cooperate with all appropriate governmental and private agencies in the encouragement of the orderly development of the region and of tourist traffic and facilities.

c) organize, sponsor and encourage historical observances or other festivals and exhibitions to promote the welfare and orderly development of the region.

d) plan and recommend governmental services and programs which would

be of assistance to the orderly growth and prosperity of the region, and to the well-being of its population.

e) study and recommend means for the most effective utilization of such federal assistance as may be available on a regional basis or may have an interstate or regional impact.

f) assist the party states in cooperative planning undertakings with the federal government or any agencies thereof within the Champlain region.

5.5 The Commission shall compile and keep current an inventory of scenic, ecological and historic sites and its recommendations with respect thereto.

ARTICLE 6--LAKE CHAMPLAIN BASIN--WATERSHED MANAGEMENT

Title I

6.1 It is the purpose of this Compact to provide in the Champlain Basin improved procedures for the coordination of the policies, programs and activities of the several jurisdictions and private persons and entities in the field of water and related resources and for the planning and management of the development, use and conservation of such water and related resources.

6.2 The Commission utilizing appropriate state and other duly authorized public agencies may through its Basin Panel:

a) Conduct and sponsor research on water resources and their planning, use, conservation, management, development, control, and protection, and the capacity, adaptability, and best utility of each facility thereof, and collect, compile, correlate, analyze, report, and interpret data on water resources and uses in the basin, including without limitation thereto the relation of water to other resources, industrial water technology, ground water movement, relation between water price and water demand and other economic factors, and general hydrological conditions:

b) Collect, compile, coordinate, and interpret systematic stream stage and ground water data, and publicize such information when and as needed for water uses, flood warning, quality maintenance, or other purposes:

c) Conduct ground and surface water investigations, tests, and operations, and compile data relating thereto as may be required to formulate and administer the comprehensive plan:

d) Prepare, publish, and disseminate information and reports concerning the water problems of the basin and for the presentation of the needs and resources of the basin and policies of the commission to executive and legislative branches of the signatory parties to this article.

6.3 The Commission through its Basin Panel shall develop and adopt, and may from time to time review and revise, a comprehensive plan for the immediate and long range development and use of the water resources of the basin. The plan shall include all public and private projects and facilities which are required, in the judgment of the Commission, for the optimum planning, development, conservation, utilization, management, and control of the water resources of the basin to meet present and future needs. The commission may adopt a comprehensive plan or any revision thereof in such part or parts as it may deem appropriate, provided that before the adoption of the plan or any part or revision thereof the Commission shall consult with water users and interested public bodies and public utilities and shall consider and give due regard to the findings and recommendations of the various agencies of the signatory parties, their political subdivisions and interested groups. The Commission shall conduct public hearings with respect to the comprehensive plan prior to the adoption of the plan or any part of the revision thereof and shall make public any dissenting or minority opinions.

6.4 The Commission shall promote and aid the coordination of the activities and programs of Federal, state, municipal, and private agencies concerned with water resources administration in the basin.

6.5 In the event the legislatures of the two states and the Congress of the United States do not within a year from the date of the enactment of this Compact enact a Title II of this article providing for the implementation of the comprehensive plan in terms of a water resources program and management of water and related resources in the Champlain Basin, the Basin Panel shall prepare and recommend provisions to effectuate these purposes for enactment as such title by the two states and the United States. Nothing in this article, however, shall be construed to prohibit action by the Basin Panel to this end during the two year period immediately following the enactment of this compact or thereafter.

ARTICLE 7--CHAMPLAIN VALLEY--PLANNING FOR DEVELOPMENT

7.1 It is the purpose of this Compact to encourage and coordinate local, regional, interstate and international planning and zoning in the Champlain Valley in order to safeguard its beauty and amenities and assure its orderly development as population pressures inevitably grow in this core of the Champlain Basin.

7.2 The Commission, acting through its Valley Council may recommend standards as guides for planning, zoning, and other action which will promote balanced development.

7.3 The Commission, acting through its Valley Council may act as coordinator or as an agency for the inter-governmental coordination and effectuation of local, regional, state, interstate and international planning.

7.4 a) The Commission, acting through its Valley Council after consultation with appropriate agencies of the signatory states, may recommend a comprehensive master plan for their public works and like expenditures in the Valley or a portion thereof, which, in those particulars and for such period as is approved by the legislatures of the signatory states, shall be observed by them with the same force and effect as if incorporated in this agreement.

The Valley Council may, from time to time, recommend plans for the Valley, supplementary to or amendatory of any previous plan, which in the same fashion shall be observed by the parties so agreeing, with same force and effect as if incorporated in this agreement.

b) The Valley Council in consultation with the planning agencies of the states and their political subdivisions is authorized to adopt and from time to time, amend or extend, a comprehensive plan for the development and protection of the Champlain Valley to serve as a general framework or guide of development within which each part of the Valley may be more precisely planned and which shall include among things, a land use plan and which shall serve to reconcile and integrate planning proposals throughout the valley.

ARTICLE 8--LAKE CHAMPLAIN PARK

8.1 The signatory parties find that the protection of the amenities and resources of Lake Champlain and its adjacent area is central to the economic health and orderly development of the entire valley and region. Accordingly, it is the purpose of this Compact to provide through the Commission acting through its Valley Panel a mechanism for joint action of the signatory parties in safeguarding the values, resources, and amenities of Lake Champlain and its adjacent area in accordance with the comprehensive plan.

8.2 The Lake Champlain Park as described in 2.5 of this agreement shall constitute a zone in which the Valley Council may perform the functions described in this article.

8.3 The Commission through its Valley Panel may draft and recommend for adoption ordinances and regulations which would assist, develop and protect the park area and the character of its communities.

Local governments may consider parts of their area which are within the park area under the provisions of this article separately from the municipality as a whole and pursuant to the laws of the state governing the adoption of these regulations generally may enact regulations limited to the designated area. In making recommendations to a local

government which is partly in and partly out of the park, the Valley Council may make recommendations for the entire municipality.

8.4 In order to preserve and enhance the natural beauty and the amenities of the Lake Champlain Park; protect and conserve the investment of the signatory parties in forest land, islands, state campsites and other interest in real property in the parks; preserve and regulate the park for public uses for the resort of the public for recreation, transportation, pleasure, air, light, and enjoyment; keep it open, safe, clean and in good order for the welfare of society and prevent unrestricted commercial development, the Commission through its Valley Council shall recommend within three years after the adoption of the Compact, or report its reasons for not so doing, legislation for these purposes which shall come into effect inside the boundaries of the parks area within the jurisdiction of a state upon enactment by the legislature concurred in by the legislature of the other state:

a) Protection of the Lake and its Environs

Regulation of: advertising, objectionable use of property, filling or use for private purposes of state lands under water, conduct of boats and vessels with respect to safety and sanitation, maintenance of lake levels, sewage disposal into the lake, dumping and littering on its waters or frozen surface. The encouragement of restrictive covenants.

b) Coordination of Law Enforcement

Establishment of common high and low water marks and state jurisdiction with regard thereto, aid to local law enforcement over the use of the lake, provisions for the enforcement of laws by joint or coordinated state or local action, deputation of law enforcement powers as among jurisdictions, provisions for the appearance of the Commission in the courts of either state with power to bring actions or proceedings in law or equity to enforce provisions of law and requirements as they apply to the area set forth in paragraph 2.5 of this Compact.

A negative report shall not preclude a later affirmative

recommendation or recommendations on these subjects by the Valley Council. The listing of matters in (a) and (b) of this paragraph shall not be interpreted to preclude recommendations on matters not so listed. Nothing in this article shall be construed to prohibit action by a signatory party, or the signatory parties by means of legislation other than legislation concurred in by both states.

8.5 Nothing in this Compact or in any regulation issued under the provisions of this article or concurrent legislation enacted in accordance therewith shall be interpreted to supersede actions of a park district created under the laws of either state lying wholly or partially in the Lake Champlain Park unless the Valley Council specifically states such effect is necessary for the adequate protection of the amenities and values of the Lake Champlain Park.

Nor shall this compact be interpreted to prohibit more stringent action by a signatory party.

ARTICLE 9

Except as may be stipulated in Title II of Article 6 nothing in this Compact shall be construed to impair, or otherwise affect the jurisdiction of any interstate agency in which any party state participates not to abridge, impair, or otherwise affect the provisions of any compact to which any one or more of the party states may be a party, nor to supersede, diminish, or otherwise affect any obligation assumed under any such compact; nor shall anything in this compact be construed to discourage additional interstate compacts among some or all of the party states or the establishment of intergovernmental agencies in sub-areas of the region or to limit the jurisdiction or activities of any participating government, agency, or officer thereof, or any private person or agency.

ARTICLE 10

The provisions of this Compact shall be severable and if phrase, clause, sentence or provision of this Compact is declared to be unconstitutional or the applicability thereof to any state, agency, person or circumstance is held invalid, the constitutionality of this

Compact, and the applicability thereof to any state, person or circumstance shall not be affected thereby. It is the legislative intent that the provisions of this Compact be reasonably and liberally construed.

ARTICLE 11

This Compact shall continue in force and remain binding on the signatory parties unless renounced by legislative action of a signatory party at least four years in advance of the effective date of withdrawal. Such withdrawal shall not affect the operation of the provisions of this Compact with respect to the continued operations of the Basin Panel and Article 6 under separate withdrawal provisions for that article.

§ 21-1103. State member of the basin panel and representative; planning members.

1. As provided in the third subdivision of section three of article three of the compact the Governor shall be this state's member on the basin panel established thereby or shall appoint a representative to act for him. He shall appoint four planning members of the commissions to serve at his pleasure: a citizen who is a resident of the valley, a state planning official, a state parks official and an officer of the Department of Environmental Conservation.

2. The legislative member shall be elected by a majority vote of the legislators elected from the counties of Clinton, Essex, Warren and Washington.

3. Any person, member or alternate, serving on the interstate commission on Lake Champlain basin (Incochamp) pursuant to this section shall be reimbursed for all necessary expenses incurred as an incident of such service, and such reimbursement shall be from the funds of said person's department or office. For this purpose the citizen member shall be considered as a member of the executive department.

§ 21-1105. Advisors.

The Department of Environmental Conservation shall provide an advisory committee who together with the state Commissioner of Commerce and the director of the office of regional development shall constitute an advisory committee with whom the members of the interstate commission on the Lake Champlain basin from this state may consult with respect to New York participation in the compact. Such members of the commission may also consult from time to time with other officers of the state government or any subdivisions thereof, as may be appropriate.

§ 21-1107. Cooperative services.

Departments, agencies and officers shall provide technical and administrative services to the interstate commission on the Lake Champlain basin upon request.

§ 21-1109. Budget.

The interstate commission on the Lake Champlain basin shall submit annually to the Director of the Budget, in accordance with the rules and practice of the state, for study and consideration by such Director, an estimate of moneys required to administer, manage and support, the commission during the ensuing fiscal year. Such estimate shall include any request for appropriation of funds by New York and shall be accompanied by a tabulation of similar requests which the commission expects to make to each other member and the formula or factors upon which such respective requests are based.

§ 21-1111. Audit.

Pursuant to subdivision five of article four of the compact, the state Comptroller is hereby authorized and empowered from time to time to

examine the accounts and books of the commission, including its receipts, disbursements and such other items referring to its financial standing as such Comptroller may deem proper and to report the results of such examination to the Governor.

§ 21-1113. Inconsistent laws.

No provision of this chapter or of any other law, which is inconsistent with the provisions of the compact shall be applicable to the interstate commission on the Lake Champlain basin or to any matters governed by the compact.

TITLE 13

SUSQUEHANNA RIVER BASIN COMPACT

Section 21-1301. Susquehanna river basin compact.

21-1303. Member and alternate.

21-1305. Advisory committee.

21-1307. Consent to alteration of diversion.

21-1309. Jurisdiction of courts.

21-1311. Prior project approval.

21-1313. Delegations of power.

21-1315. Cooperative services.

21-1316. Report and recommendations of department.

21-1317. Budget.

21-1319. Audit.

21-1321. Inconsistent laws.

§ 21-1301. Susquehanna river basin compact.

The Susquehanna river basin compact as first entered into pursuant to chapter 785 of the laws of 1967, is hereby continued as follows:

SUSQUEHANNA RIVER BASIN COMPACT

Preamble

Whereas the signatory parties hereto recognize the water resources of

the Susquehanna River Basin as regional assets vested with local, state, and national interest for which they have a joint responsibility; and declare as follows:

1. The conservation, utilization, development, management, and control of the water resources of the Susquehanna River Basin under comprehensive multiple purpose planning will bring the greatest benefits and produce the most efficient service in the public interest; and

2. This comprehensive planning administered by a basin-wide agency will provide flood damage reduction, conservation and development of surface and ground water supply for municipal, industrial, and agricultural uses, development of recreational facilities in relation to reservoirs, lakes and streams, propagation of fish and game, promotion of forest land management, soil conservation, and watershed projects, protection and aid to fisheries, development of hydroelectric power potentialities, improved navigation, control of the movement of salt water, abatement and control of water pollution, and regulation of stream flows toward the attainment of these goals; and

3. The water resources of the basin are presently subject to the duplicating, overlapping, and uncoordinated administration of a large number of governmental agencies which exercise a multiplicity of powers resulting in a splintering of authority and responsibility; and

4. The Interstate Advisory Committee on the Susquehanna River Basin, created by action of the states of New York, Pennsylvania, and Maryland, on the basis of its studies and deliberation has concluded that regional development of the Susquehanna River Basin is feasible, advisable, and urgently needed, and has recommended that an intergovernmental compact with Federal participation be consummated to this end; and

5. The Congress of the United States and the executive branch of the Federal government have recognized a national interest in the Susquehanna River Basin by authorizing and directing the Corps of Engineers of the Department of the Army, the Department of Agriculture, the Department of Health, Education and Welfare, the Department of

Interior, and other Federal agencies to cooperate in making comprehensive surveys and reports concerning the water resources of the Susquehanna River Basin in which individually or severally the technical aid and assistance of many Federal and state agencies have been enlisted, and which are being or have been coordinated through a Susquehanna River Basin Study Coordinating Committee on which the Corps of Engineers of the Department of the Army, the Department of Agriculture, the Department of Commerce, the Department of Health, Education and Welfare, the Department of Interior, the Department of Housing and Urban Development and its predecessor Housing and Home Finance Agency, the Federal Power Commission, and the States of New York, Pennsylvania, and Maryland are or were represented; and

6. Some three million people live and work in the Susquehanna River Basin and its environs, and the government, employment, industry, and economic development of the entire region and the health, safety, and general well being of its population are and will continue to be affected vitally by the conservation, utilization, development, management, and control of the water resources of the basin; and

7. Demands upon the water resources of the basin are expected to mount because of anticipated increases in population and by reason of industrial and economic growth of the basin and its service area; and

8. Water resources planning and development are technical, complex, and expensive, often requiring fifteen to twenty years from the conception to the completion of large or extensive projects; and

9. The public interest requires that facilities must be ready and operative when and where needed, to avoid the damages of unexpected floods or prolonged drought, and for other purposes; and

10. The Interstate Advisory Committee on the Susquehanna River Basin has prepared a draft of an intergovernmental compact for the creation of a basin agency, and the signatory parties desire to effectuate the purposes thereof;

Now therefore

The States of New York and Maryland and the Commonwealth of Pennsylvania, and the United States of America hereby solemnly covenant and agree with each other, upon the enactment of concurrent legislation by the Congress of the United States and by the respective state legislatures, to the Susquehanna River Basin Compact which consists of this Preamble and the Articles that follow.

ARTICLE 1--SHORT TITLE, DEFINITIONS, PURPOSES, AND LIMITATIONS

Section 1.1. Short Title.

This compact shall be known and may be cited as the Susquehanna River Basin Compact.

1.2 Definitions.

For the purposes of this compact, and of any supplemental or concurring legislation enacted pursuant to it:

1. "Basin" shall mean the area of drainage of the Susquehanna River and its tributaries into Chesapeake Bay to the southern edge of the Pennsylvania Railroad bridge between Harve de Grace and Perryville, Maryland.

2. "Commission" shall mean the Susquehanna River Basin Commission hereby created, and the term "Commissioner" shall mean a member of the commission.

3. "Cost" shall mean direct and indirect expenditures, commitment, and net induced adverse effects, whether or not compensated for, used or incurred in connection with the establishment, acquisition, construction, maintenance, and operation of a project.

4. "Diversion" shall mean the transfer of water into or from the basin.

5. "Facility" shall mean any real or personal property, within or

without the basin, and improvements thereof or thereon, and any and all rights of way, water, water rights, plants, structures, machinery, and equipment acquired, constructed, operated, or maintained for the beneficial use of water resources or related land uses or otherwise including, without limiting the generality of the foregoing, any and all things and appurtenances necessary, useful, or convenient for the control, collection, storage, withdrawal, diversion, release, treatment, transmission, sale, or exchange of water; or for navigation thereon, or the development and use of hydroelectric energy and power, and public recreational facilities; of the propagation of fish and wildlife; or to conserve and protect the water resources of the basin or any existing or future water supply source, or to facilitate any other uses of any of them.

6. "Federal government" shall mean the government of the United States of America, and any appropriate branch, department, bureau, or division thereof, as the case may be.

7. "Project" shall mean any work, service, or activity which is separately planned, financed, or identified by the commission, or any separate facility undertaken or to be undertaken by the commission or otherwise within a specified area, for the conservation, utilization, control, development, or management of water resources which can be established and utilized independently or as an addition to an existing facility and can be considered as a separate entity for purposes of evaluation.

8. "Signatory party" shall mean a state or commonwealth party to this compact, or the Federal government.

9. "Waters" shall mean both surface and underground waters which are contained within the drainage area of the Susquehanna River in the states of New York, Pennsylvania, and Maryland.

10. "Water resources" shall include all waters and related natural resources within the basin.

11. "Withdrawal" shall mean a taking or removal of water from any source within the basin for use within the basin.

12. "Person" shall mean an individual, corporation, partnership, unincorporated association, and the like and shall have no gender, and the singular shall include the plural.

1.3 Purpose and Findings.

The legislative bodies of the respective signatory parties hereby find and declare:

1. The water resources of the Susquehanna River Basin are affected with a local, state, regional, and national interest, and the planning, conservation, utilization, development, management, and control of these resources, under appropriate arrangements for intergovernmental cooperation, are public purposes of the respective signatory parties.

2. The water resources of the basin are subject to the sovereign rights and responsibilities of the signatory parties, and it is the purpose of this compact to provide for a joint exercise of these powers of sovereignty in the common interest of the people of the region.

3. The water resources of the basin are functionally interrelated, and the uses of these resources are interdependent. A single administrative agency is therefore essential for effective and economical direction, supervision, and coordination of water resources efforts and programs of federal, state, and local governments and of private enterprise.

4. Present and future demands require increasing economies and efficiencies in the use and reuse of water resources, and these can be brought about only by comprehensive planning, programming, and management under the direction of a single administrative agency.

5. In general, the purposes of this compact are to promote interstate comity; to remove causes of possible controversy; to make secure and protect developments within the states; to encourage and provide for the

planning, conservation, utilization, development, management, and control of the water resources of the basin; to provide for cooperative and coordinated planning and action by the signatory parties with respect to water resources; and to apply the principle of equal and uniform treatment to all users of water and of water related facilities without regard to political boundaries.

6. It is the express intent of the signatory parties that the commission shall engage in the construction, operation, and maintenance of a project only when the project is necessary to the execution of the comprehensive plan and no other competent agency is in a position to act, or such agency fails to act.

1.4. Powers of Congress; Withdrawal.

Nothing in this compact shall be construed to relinquish the functions, powers, or duties of the Congress of the United States with respect to the control of any navigable waters within the basin nor shall any provisions hereof be construed in derogation of any of the constitutional powers of the Congress to regulate commerce among the states and with foreign nations. The power and right of the Congress to withdraw the Federal government as a party to this compact or to revise or modify the terms, conditions, and provisions under which it may remain a party by amendment, repeal, or modification of any Federal statute applicable hereto is recognized by the signatory parties.

1.5 Duration of Compact.

(a) The duration of this compact shall be for an initial period of 100 years from its effective date, and it shall be continued for additional periods of 100 years if not less than 20 years nor more than 25 years prior to the termination of the initial period or any succeeding period none of the signatory states, by authority of an act of its legislature, notifies the commission of intention to terminate the compact at the end of the then current 100-year period.

(b) In the event this compact should be terminated by operation of paragraph (a) above, the commission shall be dissolved, its assets and liabilities transferred in accordance with the equities of the signatory

parties therein, and its corporate affairs wound up in accordance with agreement of the signatory parties or, failing agreement, by act of the Congress.

ARTICLE 2--ORGANIZATION AND AREA

Section 2.1 Commission Created.

The Susquehanna River Basin Commission is hereby created as a body politic and corporate, with succession for the duration of this compact, as an agency and instrumentality of the governments of the respective signatory parties.

2.2 Commission Membership.

The members of the commission shall be the governor or the designee of the governor of each signatory state, to act for him, and one member to be appointed by the President of the United States to serve at the pleasure of the President.

2.3 Alternates.

An alternate from each signatory party shall be appointed by its member of the commission unless otherwise provided by the laws of the signatory party. The alternate, in the absence of the member, shall represent the member and act for him. In the event of a vacancy in the office of alternate, it shall be filled in the same manner as the original appointment.

2.4 Compensation.

Members of the commission and alternates shall serve without compensation from the commission but may be reimbursed for necessary expenses incurred in and incident to the performance of their duties.

2.5 Voting Power.

Each member is entitled to one vote. No action of the commission may

be taken unless three of the four members vote in favor thereof.

2.6 Organization and Procedure.

The commission shall provide for its own organization and procedure, and shall adopt the rules and regulations governing its meetings and transactions. It shall organize annually by the election of a chairman and vice-chairman from among its members. It shall provide by its rules for the appointment by each member in his discretion of an advisor to serve without compensation from the commission, who may attend all meetings of the commission and its committees.

2.7 Jurisdiction of the Commission.

The commission shall have, exercise, and discharge its functions, powers, and duties within the limits of the basin. Outside the basin, the commission shall act at its discretion, but only to the extent necessary to implement its responsibilities within the basin, and where necessary subject to the consent of the state wherein it proposes to act.

ARTICLE 3--POWERS AND DUTIES OF THE COMMISSION

Section 3.1 General.

The Commission shall develop and effectuate plans, policies, and projects relating to the water resources of the basin. It shall adopt and promote uniform and coordinated policies for water resources conservation and management in the basin. It shall encourage and direct the planning, development, operation, and subject to applicable laws the financing of water resources projects according to such plans and policies.

3.2 Policy.

It is the policy of the signatory parties to preserve and utilize the functions, powers, and duties of the existing offices and agencies of government to the extent consistent with this compact, and the

commission is directed to utilize those offices and agencies for the purposes of this compact.

3.3 Comprehensive Plan, Program and Budgets.

The commission in accordance with Article 14 of this compact, shall formulate and adopt:

1. A comprehensive plan, after consultation with appropriate water users and interested public bodies for the immediate and long range development and use of the water resources of the basin;
2. A water resources program, based upon the comprehensive plan, which shall include a systematic presentation of the quantity and quality of water resources needs of the area to be served for such reasonably foreseeable period as the commission may determine, balanced by existing and proposed projects required to satisfy such needs, including all public and private projects affecting the basin, together with a separate statement of the projects proposed to be undertaken by the commission during such period; and
3. An annual current expense budget and an annual capital budget consistent with the commission's program, projects, and facilities for the budget period.

3.4 Powers of Commission.

The commission may:

1. Plan, design, acquire, construct, reconstruct, complete, own, improve, extend, develop, operate, and maintain any and all projects, facilities, properties, activities, and services which are determined by the commission to be necessary, convenient, or useful for the purposes of this compact.
2. Establish standards of planning, design, and operation of all projects and facilities in the basin to the extent they affect water

resources, including without limitation thereto water, sewage and other waste treatment plants and facilities, pipelines, transmission lines, stream and lake recreational facilities, trunk mains for water distribution, local flood protection works, watershed management programs, and ground water recharging operations.

3. Conduct and sponsor research on water resources and their planning, use, conservation, management, development, control, and protection, and the capacity, adaptability, and best utility of each facility thereof, and collect, compile, correlate, analyze, report, and interpret data on water resources and uses in the basin, including without limitation thereto the relation of water to other resources, industrial water technology, ground water movement, relation between water price and water demand and other economic factors, and general hydrological conditions.

4. Collect, compile, coordinate, and interpret systematic surface and ground water data, and publicize such information when and as needed for water uses, flood warning, quality maintenance, or other purposes.

5. Conduct ground and surface water investigations, tests, and operations, and compile data relating thereto as may be required to formulate and administer the comprehensive plan.

6. Prepare, publish, and disseminate information and reports concerning the water problems of the basin and for the presentation of the needs and resources of the basin and policies of the commission to executive and legislative branches of the signatory parties.

7. Negotiate loans, grants, gifts, services, or other aids as may be lawfully available from public or private sources to finance or assist in effectuating any of the purposes of this compact, and receive and accept them upon terms and conditions, and subject to provisions, as may be required by Federal or state law or as the commission may deem necessary or desirable.

8. Exercise such other and different powers as may be delegated to it

by this compact or otherwise pursuant to law, and have and exercise all powers necessary or convenient to carry out its express powers and other powers which reasonably may be implied therefrom.

9. Adopt, amend, and repeal rules and regulations to implement this compact.

3.5 Duties of the Commission.

The commission shall:

1. Develop and effectuate plans, policies, and projects relating to water resources, adopt, promote, and coordinate policies and standards for water resources conservation, control, utilization, and management, and promote and implement the planning, development, and financing of water resources projects.

2. Undertake investigations, studies, and surveys, and acquire, construct, operate, and maintain projects and facilities in regard to the water resources of the basin, whenever it is deemed necessary to do so to activate or effectuate any of the provisions of this compact.

3. Administer, manage, and control water resources in all matters determined by the commission to be interstate in nature or to have a major effect on the water resources and water resources management.

4. Assume jurisdiction in any matter affecting water resources whenever it determines after investigation and public hearing upon due notice given, that the effectuation of the comprehensive plan or the implementation of this compact so requires. If the commission finds upon subsequent hearing requested by an affected signatory party that the party will take the necessary action, the commission may relinquish jurisdiction.

5. Investigate and determine if the requirements of the compact or the rules and regulations of the commission are complied with, and if satisfactory progress has not been made, institute an action or actions

in its own name in any state or federal court of competent jurisdiction to compel compliance with any and all of the provisions of this compact or any of the rules and regulations of the commission adopted pursuant thereto. An action shall be instituted in the name of the commission and shall be conducted by its own counsel.

3.6 Cooperative Legislation and Further Jurisdiction.

(a) Each of the signatory parties agrees that it will seek enactment of such additional legislation as will be required to enable its officers, departments, commissions, boards, and agents to accomplish effectively the obligations and duties assumed under the terms of this compact.

(b) Nothing in the compact shall be construed to repeal, modify, or qualify the authority of any signatory party to enact any legislation or enforce any additional conditions and restrictions within its jurisdiction.

3.7 Coordination and Cooperation.

The commission shall promote and aid the coordination of the activities and programs of Federal, state, municipal, and private agencies concerned with water resources administration in the basin. To this end, but without limitation thereto, the commission may:

1. Advise, consult, contract, financially assist, or otherwise cooperate with any and all such agencies;

2. Employ any other agency or instrumentality of any of the signatory parties or of any political subdivision thereof, in the design, construction, operation, and maintenance of structures, and the installation and management of river control systems, or for any other purpose;

3. Develop and adopt plans and specifications for particular water resources projects and facilities which so far as consistent with the comprehensive plan incorporate any separate plans of other public and private organizations operating in the basin, and permit the

decentralized administration thereof;

4. Qualify as a sponsoring agency under any Federal legislation heretofore or hereafter enacted to provide financial or other assistance for the planning, conservation, utilization, development, management, or control of water resources.

3.8 Allocations, Diversions, and Releases.

(a) The commission shall have power from time to time as the need appears, to allocate the waters of the basin to and among the states signatory to this compact and impose related conditions, obligations, and release requirements.

(b) The commission shall have power from time to time as the need appears to enter into agreements with other river basin commissions or other states with respect to in-basin and out-of-basin allocations, withdrawals, and diversions.

(c) No allocation of waters made pursuant to this section shall constitute a prior appropriation of the waters of the basin or confer any superiority of right in respect to the use of those waters, nor shall any such action be deemed to constitute an apportionment of the waters of the basin among the parties hereto. This subsection shall not be deemed to limit or restrict the power of the commission to enter into covenants with respect to water supply, with a duration not exceeding the life of this compact, as it may deem necessary for the benefit or development of the water resources of the basin.

3.9 Rates and Charges.

The commission, from time to time after public hearing upon due notice given may fix, alter, and revise rates, rentals, charges, and tolls, and classifications thereof, without regulation or control by any department, office, or agency of any signatory party, for the use of facilities owned or operated by it, and any services or products which it provides.

3.10 Referral and Review.

No projects affecting the water resources of the basin, except those not requiring review and approval by the commission under paragraph 3 following, shall be undertaken by any person, governmental authority or other entity prior to submission to and approval by the commission or appropriate agencies of the signatory parties for review.

1. All water resources projects for which a permit or other form of permission to proceed with construction or implementation is required by legislative action of a signatory party or by rule or regulation of an office or agency of a signatory party having functions, powers, and duties in the planning, conservation, development, management, or control of water resources shall be submitted as heretofore to the appropriate office or agency of the signatory party for review and approval. To assure that the commission is apprised of all projects within the basin, monthly reports and listings of all permits granted, or similar actions taken, by offices or agencies of the signatory parties shall be submitted to the commission in a manner prescribed by it.

Those projects which also require commission approval pursuant to the provisions of paragraphs 2(ii) and 2(iii) following shall be submitted to the commission through appropriate offices or agencies of a signatory party, except that, if no agency of a signatory party has jurisdiction, such projects shall be submitted directly to the commission in such manner as the commission shall prescribe.

2. Approval of the commission shall be required for, but not limited to, the following:

(i) All projects on or crossing the boundary between any two signatory states;

(ii) Any project involving the diversion of water;

(iii) Any project within the boundaries of any signatory state found and determined by the commission or by any agency of a signatory party having functions, powers, and duties in the planning, conservation, development, management, or control of water resources to have a significant effect on water resources within another signatory state; and

(iv) Any project which has been included by the commission, after hearing, as provided in Article 14, Section 14.1, as a part of the commission's comprehensive plan for the development of the water resources of the basin, or which would have a significant effect upon the plan.

3. Review and approval by the commission shall not be required for:

(i) Projects which fall into an exempt classification or designation established by legislative action of a signatory party or by rule or regulation of an office or agency of a signatory party having functions, powers, and duties in the planning, conservation, development, management, or control of water resources. The sponsors of those projects are not required to obtain a permit or other form of permission to proceed with construction or implementation, unless it is determined by the commission or by the agency of a signatory party that such project or projects may cause an adverse, adverse cumulative, or an interstate effect on water resources of the basin, and the project sponsor has been notified in writing by the commission or by the agency of a signatory party that commission approval is required.

(ii) Projects which are classified by the commission as not requiring its view and approval, for so long as they are so classified.

4. The commission shall approve a project if it determines that the project is not detrimental to the proper conservation, development, management, or control of the water resources of the basin and may modify and approve as modified, or may disapprove the project, if it determines that the project is not in the best interest of the conservation, development, management, or control of the basin's water resources, or is in conflict with the comprehensive plan.

5. The commission, after consultation with the appropriate offices or agencies of the signatory parties, shall establish the procedure of submission, review, and consideration of projects. Any procedure for review and approval of diversions of water shall include public hearing on due notice given with opportunity for interested persons, agencies, governmental units, and signatory parties to be heard and to present evidence. A complete transcript of the proceedings at the hearing shall

be made and preserved, and it shall be made available under rules for that purpose adopted by the commission.

6. Any determination of the commission pursuant to this article or any article of the compact providing for judicial review shall be subject to such judicial review in any court of competent jurisdiction, provided that an action or proceeding or for such review is commenced within 90 days from the effective date of the determination sought to be reviewed; but a determination of the commission concerning a diversion, under Section 3.10-2(ii) with the claimed effect of reducing below a proper minimum the flow of water in that portion of the basin within the area of a signatory party, shall be subject to judicial review under the particular provisions of paragraph 7 below.

7. Any signatory party deeming itself aggrieved by an action of the commission concerning a diversion under Section 3.10-2(ii) with the claimed effect of reducing below a proper minimum the flow of water in that portion of the basin which lies within the area of that signatory party, and notwithstanding the powers provided to the commission by this compact, may have review of commission action approving the diversion in the Supreme Court of the United States; provided that a proceeding for such review is commenced within one year from the date of action sought to be reviewed. Any such review shall be on the record made before the commission. The action of the commission shall be affirmed, unless the court finds that it is not supported by substantial evidence.

3.11 Advisory Committees.

The commission may constitute and empower advisory committees.

ARTICLE 4--WATER SUPPLY

Section 4.1 Generally.

The commission shall have power to develop, implement, and effectuate plans and projects for the use of the water of the basin for domestic, municipal, agricultural, and industrial water supply. To this end, without limitation thereto, it may provide for, construct, acquire,

operate, and maintain dams, reservoirs, and other facilities for utilization of surface and ground water resources, and all related structures, appurtenances, and equipment on the river and its tributaries and at such off-river sites as it may find appropriate, and may regulate and control the use thereof.

4.2 Storage and Release of Waters.

(a) The commission shall have power to acquire, construct, operate, and control projects and facilities for the storage and release of waters, for the regulation of flows and supplies of surface, and ground waters of the basin, for the protection of public health, stream quality control, economic development, improvement of fisheries, recreation, dilution and abatement of pollution, the prevention of undue salinity, and other purposes.

(b) No signatory party shall permit any augmentation of flow to be diminished by the diversion of any water of the basin during any period in which waters are being released from storage under the direction of the commission for the purpose of augmenting such flow, except in cases where the diversion is authorized by this compact, or by the commission pursuant thereto, or by the judgment, order, or decree of a court of competent jurisdiction.

4.3 Assessable Improvements.

The commission may provide water management and regulation in the main stream or any tributary in the basin and, in accordance with the procedures of applicable state laws, may assess on an annual basis or otherwise the cost thereof upon water users or any classification of them specially benefited thereby to a measurable extent, provided that no such assessment shall exceed the actual benefit to any water user. Any such assessment shall follow the procedure prescribed by law for local improvement assessments and shall be subject to review in any court of competent jurisdiction.

4.4 Coordination.

Prior to entering upon the execution of any project authorized by this

article, the commission shall review and consider all existing rights, plans, and programs of the signatory parties, their political subdivisions, private parties, and water users which are pertinent to such project, and shall hold a public hearing on each proposed project.

4.5 Additional Powers.

In connection with any project authorized by this article, the commission shall have power to provide storage, treatment, pumping, and transmission facilities, but nothing herein shall be construed to authorize the commission to engage in the business of distributing water.

ARTICLE 5--WATER QUALITY MANAGEMENT AND CONTROL

Section 5.1 General Powers.

(a) The commission may undertake or contract for investigations, studies, and surveys pertaining to existing water quality, effects of varied actual or projected operations on water quality, new compounds and materials and probable future water quality in the basin. The commission may receive, expend, and administer funds, Federal, state, local, or private as may be available to carry out these functions relating to water quality investigations.

(b) The commission may acquire, construct, operate, and maintain projects and facilities for the management and control of water quality in the basin whenever the commission deems necessary to activate or effectuate any of the provisions of this compact.

5.2 Policy and Standards.

(a) In order to conserve, protect, and utilize the water quality of the basin in accordance with the best interests of the people of the basin and the states, it shall be the policy of the commission to encourage and coordinate the efforts of the signatory parties to prevent, reduce, control, and eliminate water pollution and to maintain water quality as required by the comprehensive plan.

(b) The legislative intent in enacting this article is to give specific emphasis to the primary role of the states in water quality management and control.

(c) The commission shall recommend to the signatory parties the establishment, modification, or amendment of standards of quality for any waters of the basin in relation to their reasonable and necessary use as the commission shall deem to be in the public interest.

(d) The commission shall encourage cooperation and uniform enforcement programs and policies by the water quality control agencies of the signatory parties in meeting the water quality standards established in the comprehensive plan.

(e) The commission may assume jurisdiction whenever it determines after investigation and public hearing upon due notice given that the effectuation of the comprehensive plan so requires. After such investigation, notice, and hearing, the commission may adopt such rules, regulations, and water quality standards as may be required to preserve, protect, improve, and develop the quality of the waters of the basin in accordance with the comprehensive plan.

5.3 Cooperative Administration and Enforcement.

(a) Each of the signatory parties agrees to prohibit and control pollution of the waters of the basin according to the requirements of this compact and to cooperate faithfully in the control of future pollution in and abatement of existing pollution from the waters of the basin.

(b) The commission shall have the authority to investigate and determine if the requirements of the compact or the rules, regulations, and water quality standards of the commission are complied with and if satisfactory progress has not been made, may institute an action or actions in its own name in the proper court or courts of competent jurisdiction to compel compliance with any and all of the provisions of this compact or any of the rules, regulations, and water quality standards of the commission adopted pursuant thereto.

5.4 Further Jurisdiction.

Nothing in this compact shall be construed to repeal, modify, or qualify the authority of any signatory party to enact any legislation or enforce any additional conditions and restrictions to lessen or prevent the pollution of waters within its jurisdiction.

ARTICLE 6--FLOOD PROTECTION

Section 6.1 Flood Control Authority.

The commission may plan, design, construct, and operate and maintain projects and facilities it deems necessary or desirable for flood plain development and flood damage reduction. It shall have power to operate such facilities and to store and release waters of the Susquehanna River and its tributaries and elsewhere within the basin, in such manner, at such times, and under such regulations as the commission may deem appropriate to meet flood conditions as they may arise.

6.2 Regulation.

(a) The commission may study and determine the nature and extent of the flood plains of the Susquehanna River and its tributaries. Upon the basis of the studies, it may delineate area subject to flooding, including but not limited to a classification of lands with reference to relative risk of flooding and the establishment of standards for flood plain use which will promote economic development and safeguard the public health, welfare, safety, and property. Prior to the adoption of any standards delineating the area or defining the use, the commission shall hold public hearings with respect to the substance of the standards in the manner provided by Article 15. The proposed standards shall be available from the commission at the time notice is given, and interested persons shall be given an opportunity to be heard thereon at the hearings.

(b) The commission shall have power to promulgate, adopt, amend, and repeal from time to time as necessary, standards relating to the nature and extent of the uses of land in areas subject to flooding.

(c) In taking action pursuant to subsection (b) of this section and as a prerequisite thereto, the commission shall consider the effect of particular uses of the flood plain in question on the health and safety of persons and property in the basin, the economic and technical feasibility of measures available for the development and protection of the flood plain, and the responsibilities, if any, of local, state, and federal governments connected with the use or proposed use of the flood plain in question. The commission shall regulate the use of particular

flood plains in the manner and degree it finds necessary for the factors enumerated in this subsection, but only with the consent of the affected signatory state, and shall suspend such regulation when and so long as the signatory party or parties or political subdivision possessing jurisdiction have in force applicable laws which the commission finds give adequate protection for the purpose of this section.

(d) In order to conserve, protect, and utilize the Susquehanna River and its tributaries in accordance with the best interests of the people of the basin and the signatory parties, it shall be the policy of the commission to encourage and coordinate the efforts of the signatory parties to control modification of the river and its tributaries by encroachment.

6.3 Flood Lands Acquisition.

The commission shall have power to acquire the fee or any lesser interest in lands and improvements thereon within the area of a flood plain for the purpose of regulating the use or types of construction of such property to minimize the flood hazard, convert the property to uses or types of construction appropriate to flood plain conditions, or prevent constrictions or obstructions that reduce the ability of the river channel and flood plain to carry flood water.

6.4 Existing Structures.

No rule or regulation issued by the commission pursuant to this shall be construed to require the demolition, removal, or alteration of any structure in place or under construction prior to the issuance thereof, without the payment of just compensation therefor. However, new construction or any addition to or alteration in any existing structure made or commenced subsequent to the issuance of such rule or regulation, or amendment, shall conform thereto.

6.5 Police Powers.

The regulation of use of flood plain lands is within the police powers of the signatory states for the protection of public health and the

safety of the people and their property and shall not be deemed a taking of land or lands for which compensation shall be paid to the owners thereof.

6.6 Cooperation.

Each of the signatory parties agrees to control flood plain use along and encroachment upon the Susquehanna and its tributaries and to cooperate faithfully in these respects.

6.7 Other Authority.

Nothing in this article shall be construed to prevent or in any way to limit the power of any signatory party, or any agency or subdivision thereof, to issue or adopt and enforce any requirement or requirements with respect to flood plain use or construction thereon more stringent than the rules, regulations, or encroachment lines in force pursuant to this article. The commission may appear in any court of competent jurisdiction to bring actions or proceedings in law or equity to enforce the provisions of this article.

6.8 Debris.

The signatory states agree that dumping or littering upon or in the waters of the Susquehanna River or its tributaries or upon the frozen surfaces thereof of any rubbish, trash, litter, debris, abandoned properties, waste material, or offensive matter, is prohibited and that the law enforcement officials of each state shall enforce this prohibition.

ARTICLE 7--WATERSHED MANAGEMENT

Section 7.1 Watersheds Generally.

The commission shall promote sound practices of watershed management in the basin, including projects and facilities to retard runoff and waterflow and prevent soil erosion.

7.2 Soil Conservation and Land and Forest Management.

The commission, subject to the limitations in Section 7.4(b), may acquire, sponsor, or operate facilities and projects to encourage soil conservation, prevent and control erosion, and promote land reclamation and sound land and forest management.

7.3 Fish and Wildlife.

The commission, subject to the limitations in Section 7.4(b), may acquire, sponsor, or operate projects and facilities for the maintenance and improvement of fish and wildlife habitat related to the water resources of the basin.

7.4 Cooperative Planning and Operation.

(a) The commission shall cooperate with the appropriate agencies of the signatory parties and with other public and private agencies in the planning and effectuation of a coordinated program of facilities and projects authorized by this article.

(b) The commission shall not acquire or operate any such project or facility unless it has first found and determined that no other suitable unit or agency of government is in a position to acquire or operate the same upon reasonable conditions, or such unit or agency fails to do so.

ARTICLE 8--RECREATION

Section 8.1 Development.

The commission may provide for the development of water related public sports and recreational facilities. The commission on its own account or in cooperation with a signatory party, political subdivision or any agency thereof, may provide for the construction, maintenance, and administration of such facilities, subject to the provisions of Section 8.2 hereof.

8.2 Cooperative Planning Operation.

(a) The commission shall cooperate with the appropriate agencies of the signatory parties and with other public and private agencies in the

planning and effectuation of a coordinated program of facilities and projects authorized by this article.

(b) The commission shall not operate any such project or facility unless it has first found and determined that no other suitable unit or agency of government is available to operate the same upon reasonable conditions.

8.3 Operation and Maintenance.

The commission, within limits prescribed by this article, shall:

1. Encourage activities of other public agencies having water related recreational interests and assist in the coordination thereof;

2. Recommend standards for the development and administration of water related recreational facilities;

3. Provide for the administration, operation, and maintenance of recreation facilities owned or controlled by the commission and for the letting and supervision of private concessions in accordance with this article.

8.4 Concessions.

The commission, after public hearing upon due notice given shall provide by regulation a procedure for the award of contracts for private concessions in connection with its recreational facilities, including any renewal or extension thereof, under terms and conditions determined by the commission.

ARTICLE 9--OTHER PUBLIC VALUES

Section 9.1 Inherent Values.

The signatory parties agree that it is a purpose of this compact in effectuating the conservation and management of water resources to preserve and promote the economic and other values inherent in the historic and the scenic and other natural amenities of the Susquehanna

River Basin for the enjoyment and enrichment of future generations, for the promotion and protection of tourist attractions in the basin, and for the maintenance of the economic health of allied enterprises and occupations so as to effect orderly, balanced, and considered development in the basin.

9.2 Project Compatibility.

To this end, the signatory parties agree that in the consideration, authorization, construction, maintenance, and operation of all water resources projects in the Susquehanna basin, their agencies and subdivisions, and the Susquehanna River Basin Commission will consider the compatibility of such projects with these other public values.

9.3 Regulation Standards.

The commission may recommend to governmental units with jurisdiction within areas considered for scenic or historic designation minimum standards of regulation of land and water use and such other protective measures as the commission may deem desirable.

9.4 Local Area Protection.

The commission may draft and recommend for adoption ordinances and regulations which would assist, promote, develop, and protect those areas and the character of their communities. Local governments may consider parts of their area which have been designated scenic or historic areas under the provisions of this article separately from the municipality as a whole, and pursuant to the laws of the state governing the adoption of those regulations generally may enact regulations limited to the designated area. In making recommendations to a local government which is partly in and partly out of such a scenic or historic area the commission may make recommendations for the entire municipality.

ARTICLE 10--HYDROELECTRIC POWER

Section 10.1 Development.

The waters of the Susquehanna River and its tributaries may be impounded and used by or under authority of the commission for the generation of hydroelectric power and hydroelectric energy in accordance with the comprehensive plan.

10.2 Power Generation.

The commission may develop and operate, or authorize to be developed and operated, dams and related facilities and appurtenances for the purpose of generating hydroelectric power and hydroelectric energy.

10.3 Transmission.

The commission may provide facilities for the transmission of hydroelectric power and hydroelectric energy produced by it where such facilities are not otherwise available upon reasonable terms, for the purpose of wholesale marketing of power and nothing herein shall be construed to authorize the commission to engage in the business of direct sale to consumers.

10.4 Development Contracts.

The commission, after public hearing upon due notice given may enter into contracts on reasonable terms, consideration, and duration under which public utilities or public agencies may develop hydroelectric power and hydroelectric energy through the use of dams, related facilities, and appurtenances.

10.5 Rates and Charges.

Rates and charges fixed by the commission for power which is produced by its facilities shall be reasonable, nondiscriminatory, and just.

ARTICLE 11--REGULATION OF WITHDRAWAL AND DIVERSIONS; PROTECTED AREAS AND EMERGENCIES

Section 11.1 Power of Regulation.

The commission may regulate and control withdrawals and diversions from surface waters and ground waters of the basin, as provided by this article. The commission may enter into agreements with the signatory parties relating to the exercise of such power or regulation or control and may delegate to any of them such powers of the commission as it may deem necessary or desirable.

11.2 Determination of Protected Area.

The commission, from time to time after public hearing upon due notice given may determine and delineate such areas within the basin wherein the demands upon supply made by water users have developed or threaten to develop to such a degree as to create a water shortage or impair or conflict with the requirements or effectuation of the comprehensive plan, and any such area may be designated as a protected area, with the consent of the member or members from the affected state or states. The commission, whenever it determines that such shortage no longer exists, shall terminate the protected status of such area and shall give public notice of such termination.

11.3 Diversion and Withdrawal Permits.

In any protected areas so determined and delineated, no person shall divert or withdraw water for domestic, municipal, agricultural, or industrial uses in excess of such quantities as the commission may prescribe by general regulations, except (1) pursuant to a permit granted under this article, or (2) pursuant to a permit or approval heretofore granted under the laws of any of the signatory states.

11.4 Emergency.

(a) In the event of a drought which may cause an actual and immediate shortage of available water supply within the basin, or within any part thereof, the commission after public hearing upon due notice given may determine and delineate the area of the shortage and by unanimous vote declare a drought emergency therein. For the duration of the drought emergency as determined by the commission, it thereupon may direct

increases or decreases in any allocations, diversions, or releases previously granted or required, for a limited time to meet the emergency condition.

(b) In the event of a disaster or catastrophe other than drought, natural or manmade, which causes or may cause an actual and immediate shortage of available and usable water, the commission by unanimous consent may impose direct controls on the use of water and shall take such action as is necessary to coordinate the effort of federal, state, and local agencies and other persons and entities affected.

11.5 Standards.

Permits shall be granted, modified, or denied, as the case may be, to avoid such depletion of the natural stream flows and ground waters in the protected area or in an emergency area as will adversely affect the comprehensive plan or the just and equitable interests and rights of other lawful users of the same source, giving due regard to the need to balance and reconcile alternative and conflicting uses in the event of an actual or threatened shortage of water of the quality required.

11.6 Judicial Review.

The determinations and delineations of the commission pursuant to Section 11.2 and the granting, modification or denial of permits pursuant to Section 11.3, 11.4, and 11.5 shall be subject to judicial review in any court of competent jurisdiction.

11.7 Maintenance of Records.

Each signatory party shall provide for the maintenance and preservation of such records of authorized diversions and withdrawals and the annual volume thereof as the commission shall prescribe. Such records and supplementary reports shall be furnished to the commission at its request.

11.8 Existing State Systems.

Whenever the commission finds it necessary or desirable to exercise the powers conferred with respect to emergencies by this article, any diversion or withdrawal permits authorized or issued under the laws of any of the signatory states shall be superseded to the extent of any conflict with the control and regulation exercised by the commission.

ARTICLE 12--INTERGOVERNMENTAL RELATIONS

Section 12.1 Federal Agencies and Projects.

For the purposes of avoiding conflicts of jurisdiction and of giving full effect to the commission as a regional agency of the signatory parties, the following rules shall govern Federal projects affecting the water resources of the basin, subject in each case to the provisions of Section 1.4 of this compact:

1. The planning of all projects related to powers delegated to the commission by this compact shall be undertaken in consultation with the commission.

2. No expenditure or commitment shall be made for or on account of the construction, acquisition, or operation of any project or facility nor shall it be deemed authorized, unless it shall have first been included by the commission in the comprehensive plan.

3. Each Federal agency otherwise authorized by law to plan, design, construct, operate or maintain any project or facility in or for the basin shall continue to have, exercise, and discharge such authority except as specifically provided by this section.

12.2 State and Local Agencies and Projects.

For the purposes of avoiding conflicts of jurisdiction and of giving full effect to the commission as a regional agency of the signatory parties, the following rules shall govern projects of the signatory states, their political subdivisions and public corporations affecting water resources of the basin:

1. The planning of all projects related to powers delegated to the commission by this compact shall be undertaken in consultation with the commission;

2. No expenditure or commitment shall be made for or on account of the construction, acquisition, or operation of any project or facility unless it first has been included by the commission in the comprehensive plan;

3. Each state and local agency otherwise authorized by law to plan, design, construct, operate, or maintain any project or facility in or for the basin shall continue to have, exercise, and discharge such authority, except as specifically provided by this section.

12.3 Reserved Taxing Powers of States.

Each of the signatory parties reserves the right to levy, assess, and collect fees, charges, and taxes on or measured by the withdrawal or diversion of waters of the basin for use within the jurisdiction of the respective signatory parties.

12.4 Project Costs and Evaluation Standards.

The commission shall establish uniform standards and procedures for the evaluation, determination of benefits, and cost allocations of projects affecting the basin, and for the determination of project priorities, pursuant to the requirements of the comprehensive plan and its water resources program. The commission shall develop equitable cost sharing and reimbursement formulas for the signatory parties including:

1. Uniform and consistent procedures for the allocation of project costs among purposes included in multiple-purpose programs;

2. Contracts and arrangements for sharing financial responsibility among and with signatory parties, public bodies, groups, and private enterprise, and for the supervision of their performance;

3. Establishment and supervision of a system of accounts for reimbursement purposes and directing the payments and charges to be made from such accounts;

4. Determining the basis and apportioning amounts (i) of reimbursable revenues to be paid signatory parties or their political subdivisions, and (ii) of payments in lieu of taxes to any of them.

12.5 Cooperative Services.

The commission shall furnish technical services, advice, and consultation to authorized agencies of the signatory parties with respect to the water resources of the basin, and each of the signatory parties pledges itself to provide technical and administrative service to the commission upon request within the limits of available appropriations, and to cooperate generally with the commission for the purposes of this compact, and the cost of such service may be reimbursable whenever the parties deem appropriate.

ARTICLE 13--CAPITAL FINANCING

Section 13.1 Borrowing Power.

The commission may borrow money for any of the purposes of this compact and may issue its negotiable bonds and other evidences of indebtedness in respect thereto.

All such bonds and evidences of indebtedness shall be payable solely out of the properties and revenues of the commission without recourse to taxation. The bonds and other obligations of the commission, except as may be otherwise provided in the indenture under which they were issued, shall be direct and general obligations of the commission, and the full faith and credit of the commission are hereby pledged for the prompt payment of the debt service thereon and for the fulfillment of all other undertakings of the commission assumed by it to or for the benefit of the holders thereof.

13.2 Funds and Expenses.

The purposes of this compact shall include without limitation thereto all costs of any project or facility or any part thereof, including interest during a period of construction and a reasonable time thereafter and any incidental expenses (legal, engineering, fiscal, financial consultant, and other expenses) connected with issuing and disposing of the bonds; all amounts required for the creation of an operating fund, construction fund, reserve fund, sinking fund, or other special fund; all other expenses connected with the planning, design, acquisition, construction, completion, improvement, or reconstruction of any facility or any part thereof; and reimbursement of advances by the commission or by others for such purposes and for working capital.

13.3 Credit Excluded; Officers, State and Municipal.

The commission shall have no power to pledge the credit of any signatory party or of any county or municipality, or to impose any obligation for payment of the bonds upon any signatory party or any county or municipality. Neither the commissioners nor any person executing the bonds shall be liable personally on the bonds of the commission or be subject to any personal liability or accountability by reason of the issuance thereof.

13.4 Funding and Refunding.

Whenever the commission deems it expedient, it may fund and refund its bonds and other obligations, whether or not such bonds and obligations have matured. It may provide for the issuance, sale, or exchange of refunding bonds for the purpose of redeeming or retiring any bonds (including payment of any premium, duplicate interest, or cash adjustment required in connection therewith) issued by the commission or issued by any other issuing body, the proceeds of the sale of which have been applied to any facility acquired by the commission or which are payable out of the revenues of any facility acquired by the commission. Bonds may be issued partly to refund bonds and other obligations then outstanding, and partly for any other purpose of the commission. All provisions of this compact applicable to the issuance of bonds are

applicable to refunding bonds and to the issuance, sale, or exchange thereof.

13.5 Bonds: Authorization Generally.

Bonds and other indebtedness of the commission shall be authorized by resolution of the commission. The validity of the authorization and issuance of any bonds by the commission shall not be dependent upon or affected in any way by: (1) the disposition of bond proceeds by the commission or by contract, commitment or action taken with respect to such proceeds; or (2) the failure to complete any part of the project for which bonds are authorized to be issued. The commission may issue bonds in one or more series and may provide for one or more consolidated bond issues, in such principal amounts and with such terms and provisions as the commission may deem necessary. The bonds may be secured by a pledge of all or any part of the property, revenues, and franchises under its control. Bonds may be issued by the commission in such amount, with such maturities and in such denominations and form or forms, whether coupon or registered, as to both principal and interest, as may be determined by the commission. The commission may provide for redemption of bonds prior to maturity on such notice and at such time or times and with such redemption provisions, including premiums, as the commission may determine.

13.6 Bonds, Resolutions and Indentures Generally.

The commission may determine and enter into indentures providing for the principal amount, date or dates, maturities, interest rate, denominations, form, registration, transfer, interchange, and other provisions of the bonds and coupons and the terms and conditions upon which the same shall be executed, issued, secured, sold, paid, redeemed, funded, and refunded. The resolution of the commission authorizing any bond or any indenture so authorized under which the bonds are issued may include all such covenants and other provisions other than any restriction on the regulatory powers vested in the commission by this compact as the commission may deem necessary or desirable for the issue, payment, security, protection, or marketing of the bonds, including

without limitation covenants and other provisions as to the rates or amounts of fees, rents, and other charges to be charged or made for use of the facilities; the use, pledge, custody, securing, application, and disposition of such revenues, of the proceeds of the bonds, and of any other moneys of the commission; the operation, maintenance, repair, and reconstruction of the facilities and the amounts which may be expended therefor; the sale, lease, or other disposition of the facilities; the insuring of the facilities and of the revenues derived therefrom; the construction or other acquisition of other facilities; the issuance of additional bonds or other indebtedness; the rights of the bondholders and of any trustee for the bondholders upon default by the commission or otherwise; and the modification of the provisions of the indenture and of the bonds. Reference on the face of the bonds to such resolution or indenture by its date of adoption or the apparent date on the face thereof is sufficient to incorporate all of the provisions thereof and of this compact into the body of the bonds and their appurtenant coupons. Each taker and subsequent holder of the bonds or coupons, whether the coupons are attached to or detached from the bonds, has recourse to all of the provisions of the indenture and of this compact and is bound thereby.

13.7 Maximum Maturity.

No bond or its terms shall mature in more than fifty years from its own date, or on any date subsequent to the duration of this compact, and in the event any authorized issue is divided into two or more series or divisions, the maximum maturity date herein authorized shall be calculated from the date on the face of each bond separately, irrespective of the fact that different dates may be prescribed for the bonds of each separate series or division of any authorized issue.

13.8 Tax Exemption.

All bonds issued by the commission under the provisions of this compact and the interest thereon shall at all times be free and exempt from all taxation by or under authority of any of the signatory parties, except for transfer, inheritance, and estate taxes.

13.9 Interest.

Bonds shall bear interest at a rate determined by the commission, payable annually or semi-annually.

13.10 Place of Payment.

The commission may provide for the payment of the principal and interest of bonds at any place or places within or without the signatory states, and in any specified lawful coin or currency of the United States of America.

13.11 Execution.

The commission may provide for the execution and authentication of bonds by the manual, lithographed, or printed facsimile signature of officers of the commission, and by additional authentication by a trustee or fiscal agent appointed by the commission. If any of the officers whose signatures or countersignatures appear upon the bonds or coupons ceases to be an officer before the delivery of the bonds or coupons, his signature or countersignature is nevertheless valid and of the same force and effect as if the officer had remained in office until the delivery of the bonds and coupons.

13.12 Holding Own Bonds.

The commission shall have power out of any funds available therefor to purchase its bonds and may hold, cancel, or resell such bonds.

13.13 Sale.

The commission may fix terms and conditions for the sale or other disposition of any authorized issue of bonds and may sell its bonds at less than their par or face value. All bonds issued and sold for cash pursuant to this compact shall be sold on sealed proposals to the highest bidder. Prior to such sale, the commission shall advertise for

bids by publication of a notice of sale not less than ten days prior to the date of sale, at least once in a newspaper of general circulation printed and published in New York City carrying municipal bonds notices and devoted primarily to financial news. The commission may reject any and all bids submitted and may thereafter sell the bonds so advertised for sale at private sale to any financially responsible bidder under such terms and conditions as it deems most advantageous to the public interest, but the bonds shall not be sold at a net interest cost calculated upon the entire issue so advertised, greater than the lowest bid which was rejected. In the event the commission desires to issue its bonds in exchange for an existing facility or portion thereof, or in exchange for bonds secured by the revenues of an existing facility, it may exchange such bonds for the existing facility or portion thereof or for the bonds so secured, plus an additional amount of cash, without advertising such bonds for sale.

13.14 Negotiability.

All bonds issued under the provisions of this compact are negotiable instruments, except when registered in the name of a registered owner.

13.15 Legal Investments.

Bonds of the commission shall be legal investments for savings banks, fiduciaries and public funds in each of the signatory states.

13.16 Validation Proceedings.

Prior to the issuance of any bonds, the commission may institute a special proceeding to determine the legality of proceedings to issue the bonds and their validity under the laws of any of the signatory parties. Such proceedings shall be instituted and prosecuted in rem, and the judgment rendered therein shall be conclusive against all persons whomsoever and against each of the signatory parties.

13.17 Recording.

No indenture need be recorded or filed in any public office, other than the office of the commission. The pledge of revenues provided in any indenture shall take effect forthwith as provided therein and irrespective of the date of receipts of such revenues by the commission or the indenture trustee. Such pledge shall be effective as provided in the indenture without physical delivery of the revenues to the commission or the indenture trustee.

13.18 Pledged Revenues.

Bond redemption and interest payments, to the extent provided in the resolution or indenture, shall constitute a first, direct and exclusive charge and lien on all such rates, rents, tolls, fees, and charges and other revenues and interest thereon received from the use and operation of the facility, and on any sinking or other funds created therefrom. All such rates, rents, tolls, fees, charges and other revenues, together with interest thereon, shall constitute a trust fund for the security and payment of such bonds, and except as and to the extent provided in the indenture with respect to the payment therefrom of expenses for other purposes including administration, operation, maintenance, improvements, or extensions of the facilities or other purposes shall not be used or pledged for any other purpose so long as such bonds, or any of them, are outstanding, and unpaid.

13.19 Remedies.

The holder of any bond may for the equal benefit and protection of all holders of bonds similarly situated; (1) by mandamus or other appropriate proceedings require and compel the performance of any of the duties imposed upon the commission or assumed by it, its officers, agents, or employees under the provisions of any indenture, in connection with the acquisition, construction, operation, maintenance, repair, reconstruction, or insurance of the facilities, or in connection with the collection, deposit, investment, application, and disbursement of the rates, rents, tolls, fees, charges, and other revenues derived from the operation and use of the facilities, or in connection with the deposit, investment, and disbursement of the proceeds received from the

sale of bonds; or (2) by action or suit in a court of competent jurisdiction of any signatory party require the commission to account as if it were the trustee of an express trust, or enjoin any acts or things which may be unlawful or in violation of the rights of the holders of the bonds. The enumeration of such rights and remedies, however, does not exclude the exercise or prosecution of any other rights or remedies available to the holders of bonds.

13.20 Capital Financing by Signatory Parties; Guarantees.

(a) The signatory parties shall provide such capital funds required for projects of the commission as may be authorized by their respective statutes in accordance with a cost sharing plan prepared pursuant to Article 12 of this compact; but nothing in this section shall be deemed to impose any mandatory obligation on any of the signatory parties other than such obligations as may be assumed by a signatory party in connection with a specific project or facility.

(b) Bonds of the commission, notwithstanding any other provision of this compact, may be executed and delivered to any duly authorized agency of any of the signatory parties without public offering and may be sold and resold with or without the guaranty of such signatory party, subject to and in accordance with the constitutions of the respective signatory parties.

(c) The commission may receive and accept, and the signatory parties may make, loans, grants, appropriations, advances, and payments of reimbursable or nonreimbursable funds or property in any form for the capital or operating purposes of the commission.

ARTICLE 14--PLAN, PROGRAM AND BUDGETS

Section 14.1 Comprehensive Plan.

The commission shall develop and adopt, and may from time to time review and revise, a comprehensive plan for the immediate and long range development and use of the water resources of the basin. The plan shall include all public and private projects and facilities which are required, in the judgment of the commission, for the optimum planning, development, conservation, utilization, management, and control of the water resources of the basin to meet present and future needs. The

commission may adopt a comprehensive plan or any revision thereof in such part or parts as it may deem appropriate, provided that before the adoption of the plan or any part or revision thereof the commission shall consult with water users and interested public bodies and public utilities and shall consider and give due regard to the findings and recommendations of the various agencies of the signatory parties, their political subdivisions, and interested groups. The commission shall conduct public hearings upon due notice given with respect to the comprehensive plan prior to the adoption of the plan or any part of the revision thereof, except that public and private projects and facilities which, in the judgment of the commission, are not required for the optimum planning, development, conservation, utilization, management, and control of the water resources of the basin and which, in the judgment of the commission, will not significantly affect the water resources of the basin, may be added directly to the comprehensive plan at any time at the discretion of the commission without public hearing thereon. The comprehensive plan shall take into consideration the effect of the plan or any part thereof upon the receiving waters of Chesapeake Bay.

14.2 Water Resources Program.

The commission shall annually adopt a water resources program, based upon the comprehensive plan, consisting of the projects and facilities which the commission proposes to be undertaken by the commission and by other authorized governmental and private agencies, organizations, and persons during the ensuing six years or such other reasonably foreseeable period as the commission may determine. The water resources program shall include a systematic presentation of:

1. The quantity and quality of water resources needs for such period;
2. The existing and proposed projects and facilities required to satisfy such needs, including all public and private projects to be anticipated; and
3. A separate statement of the projects proposed to be undertaken by

the commission during such period.

14.3 Annual Current Expense and Capital Budgets.

(a) The commission shall annually adopt a capital budget including all capital projects it proposes to undertake or continue during the budget period containing a statement of the estimated cost of each project and the method of financing thereof.

(b) The commission shall annually adopt a current expense budget for each fiscal year. Such budget shall include the commission's estimated expenses for administration, operation, maintenance, and repairs, including a separate statement thereof for each project, together with its cost allocation. The total of such expenses shall be balanced by the commission's estimated revenues from all sources, including the cost allocations undertaken by any of the signatory parties in connection with any project. Following the adoption of the annual current expense budget by the commission, the executive director of the commission shall:

1. Certify to the respective signatory parties the amounts due in accordance with existing cost sharing established for each project; and

2. Transmit certified copies of such budget to the principal budget officer of the respective signatory parties at such time and in such manner as may be required under their respective budgetary procedures. The amount required to balance the current expense budget in addition to the aggregate amount of item 1 above and all other revenues available to the commission shall be apportioned equitably among the signatory parties by unanimous vote of the commission, and the amount of such apportionment to each signatory party shall be certified together with the budget.

(c) The respective signatory parties covenant and agree to include the amount so apportioned for the support of the current expense budget in their respective budgets next to be adopted, subject to such review and approval as may be required by their respective budgetary processes. Such amounts shall be due and payable to the commission in quarterly installments during its fiscal year, provided that the commission may draw upon its working capital to finance its current expense budget

pending remittance by the signatory parties.

ARTICLE 15--GENERAL PROVISIONS

Section 15.1 Auxiliary Powers of Commission; Functions of Commissioners.

(a) The commission, for the purposes of this compact, may:

1. Adopt and use a corporate seal, enter into contracts, and sue and be sued in any court of competent jurisdiction;

2. Receive and accept such payments, appropriations, grants, gifts, loans, advances, and other funds, properties, and services as may be transferred or made available to it by any signatory party or by any other public or private corporation or individual, and enter into agreements to make reimbursement for all or part thereof;

3. Provide for, acquire, and adopt detailed engineering, administrative, financial, and operating plans and specifications to effectuate, maintain, or develop any facility or project;

4. Control and regulate the use of facilities owned or operated by the commission;

5. Acquire, own, operate, maintain, control, sell and convey real and personal property and any interest therein by contract, purchase, lease, license, mortgage, or otherwise as it may deem necessary for any project or facility, including any and all appurtenances thereto necessary, useful, or convenient for such ownership, operation, control, maintenance, or conveyance;

6. Have and exercise all corporate powers essential to the declared objects and purposes of the commission.

(b) The commissioners, subject to the provisions of this compact, shall:

1. Serve as the governing body of the commission, and exercise and discharge its powers and duties, except as otherwise provided by or

pursuant to this compact;

2. Determine the character of and the necessity for its obligations and expenditures and the manner in which they shall be incurred, allowed, and paid subject to any provisions of law specifically applicable to agencies or instrumentalities created by this compact;

3. Provide for the internal organization and administration of the commission;

4. Appoint the principal officers of the commission and delegate to and allocate among them administrative functions, powers and duties;

5. Create and abolish offices, employments, and positions as it deems necessary for the purposes of the commission, and subject to the provisions of this article, fix and provide for the qualification, appointments, removal, term, tenure, compensation, pension, and retirement rights of its officers and employees;

6. Let and execute contracts to carry out the powers of the commission.

15.2 Regulations; Enforcement.

The commission may:

1. Make and enforce rules and regulations for the effectuation, application, and enforcement of this compact; and it may adopt and enforce practices and schedules for or in connection with the use, maintenance, and administration of projects and facilities it may own or operate and any product or service rendered thereby; provided that any rule or regulation, other than one which deals solely with the internal management of the commission, shall not be effective unless and until filed in accordance with the law of the respective signatory parties applicable to administrative rules and regulations generally; and

2. Designate any officer, agent, or employee of the commission to be

an investigator or watchman and such person shall be vested with the powers of a peace officer of the state in which he is duly assigned to perform his duties.

15.3 Tax Exemptions.

The commission, its property, functions and activities shall be exempt from taxation by or under the authority of any of the signatory parties or any political subdivision thereof; provided that in lieu of property taxes the commission, as to its specific projects, shall make payments to local taxing districts in annual amounts which shall equal the taxes lawfully assessed upon property for the tax year next prior to its acquisition by the commission for a period of ten years. The nature and amount of such payments shall be reviewed by the commission at the end of ten years, and from time to time thereafter, upon reasonable notice and opportunity to be heard to the affected taxing district, and the payments may be thereupon terminated or continued in such reasonable amount as may be necessary or desirable to take into account hardships incurred and benefits received by the taxing jurisdiction which are attributable to the project.

15.4 Meetings; Public Hearing; Records, Minutes.

(a) All meetings of the commission shall be open to the public.

(b) The commission shall conduct at least one public hearing in each state prior to the adoption of the initial comprehensive plan. In all other cases wherein this compact requires a public hearing, such hearing shall be held upon not less than twenty days' public notice given by posting at the offices of the commission, and published at least once in a newspaper or newspapers of general circulation in the area or areas affected. The commission shall also provide forthwith for distribution of such notice to the press and by the mailing of a copy thereof to any person who shall request such notices.

(c) The minutes of the commission shall be a public record open to inspection at its offices during regular business hours.

15.5 Officers Generally.

(a) The officers of the commission shall consist of an executive

director and such additional officers, deputies, and assistants as the commission may determine. The executive director shall be appointed and may be removed by the affirmative vote of a majority of the full membership of the commission. All other officers and employees shall be appointed or dismissed by the executive director under such rules of procedure as the commission may establish.

(b) In the appointment and promotion of officers and employees for the commission, no political, racial, religious, or residence test or qualification shall be permitted or given consideration, but all such appointments and promotions shall be solely on the basis of merit and fitness. Any officer or employee of the commission who is found by the commission to be guilty of a violation of this section shall be immediately dismissed.

15.6 Oath of Office.

An oath of office in such form as the commission shall prescribe shall be taken, subscribed, and filed with the commission by the executive director and by each officer appointed by him not later than fifteen days after the appointment.

15.7 Bond.

Each officer shall give such bond and in such form and amount as the commission may require, for which the commission shall pay the premium.

15.8 Prohibited Activities.

(a) No commissioner, officer or employee shall:

1. Be financially interested, either directly or indirectly, in any contract, sale, purchase, lease, or transfer of real or personal property to which the commission is a party;

2. Solicit or accept money or any other thing of value in addition to the compensation or expense paid him by the commission for services performed within the scope of his official duties;

3. Offer money or any thing of value for or in consideration of obtaining an appointment, promotion, or privilege in his employment with the commission.

(b) Any officer or employee who willfully violates any of the provisions of this section shall forfeit his office or employment.

(c) Any contract or agreement knowingly made in contravention of this section is void.

(d) Officers and employees of the commission shall be subject, in addition to the provisions of this section, to such criminal and civil sanctions for misconduct in office as may be imposed by Federal law and the law of the signatory state in which such misconduct occurs.

15.9 Purchasing.

Contracts for the construction, reconstruction or improvement of any facility when the expenditure required exceeds ten thousand dollars, and contracts for the purchase of services, supplies, equipment, and materials when the expenditure required exceeds five thousand dollars shall be advertised and let upon sealed bids to the lowest responsible bidder. Notice requesting such bids shall be published in a manner reasonably likely to attract prospective bidders, which publication shall be made at least thirty days before bids are received and in at least two newspapers of general circulation in the basin. The commission may reject any and all bids and readvertise in its discretion. If after rejecting bids the commission determines and resolves that in its opinion the supplies, equipment, and materials may be purchased at a lower price in the open market, the commission may give each responsible bidder an opportunity to negotiate a price and may proceed to purchase the supplies, equipment, and materials in the open market at a negotiated price which is lower than the lowest rejected bid of a responsible bidder, without further observance of the provisions requiring bids or notice. The commission shall adopt rules and regulations to provide for purchasing from the lowest responsible bidder when sealed bids, notice, and publication are not required by this section. The commission may suspend and waive the provisions of this section requiring competitive bids whenever:

1. The purchase is to be made from or the contract to be made with the Federal or any state government or any agency or political subdivision thereof or pursuant to any open and bulk purchase contract of any of them;

2. The public exigency requires the immediate delivery of the articles or performance of the service;

3. Only one source of supply is available;

4. The equipment to be purchased is of a technical nature and the procurement thereof without advertising is necessary in order to assure standardization of equipment and interchangeability of parts in the public interest; or

5. Services are to be provided of a specialized or professional nature.

15.10 Insurance.

The commission may self-insure or purchase insurance and pay the premiums therefor against loss or damage to any of its properties; against liability for injury to persons or property; and against loss of revenue from any cause whatsoever. Such insurance coverage shall be in such form and amount as the commission may determine, subject to the requirements of any agreement arising out of the issuance of bonds by the commission.

15.11 Annual Independent Audit.

(a) As soon as practical after the closing of the fiscal year an audit shall be made of the financial accounts of the commission. The audit shall be made by qualified certified public accountants selected by the commission, who have no personal interest direct or indirect in the financial affairs of the commission or any of its officers or employees. The report of audit shall be prepared in accordance with accepted accounting practices and shall be filed with the chairman and such other officers as the commission shall direct. Copies of the report shall be

distributed to each commissioner and shall be made available for public distribution.

(b) Each signatory party by its duly authorized officers shall be entitled to examine and audit at any time all of the books, documents, records, files, and accounts and all other papers, things, or property of the commission. The representatives of the signatory parties shall have access to all books, documents, records, accounts, reports, files, and all other papers, things, or property belonging to or in use by the commission and necessary to facilitate the audit and they shall be afforded full facilities for verifying transactions with the balances or securities held by depositaries, fiscal agents, and custodians.

(c) The financial transactions of the commission shall be subject to audit by the General Accounting Office in accordance with the principles and procedures applicable to commercial corporate transactions and under such rules and regulations as may be prescribed by the Comptroller General of the United States. The audit shall be conducted at the place or places where the accounts of the commission are kept.

(d) Any officer or employee who shall refuse to give all required assistance and information to the accountants selected by the commission or to the authorized officers of any signatory party or who shall refuse to submit to them for examination such books, documents, records, files, accounts, papers, things, or property as may be requested shall forfeit his office.

15.12 Reports.

The commission shall make and publish an annual report to the legislative bodies of the signatory parties and to the public reporting on its programs, operations, and finances. It may also prepare, publish, and distribute such other public reports and informational materials as it may deem necessary or desirable.

15.13 Grants, Loans, or Payments by States or Political Subdivisions.

(a) Any or all of the signatory parties or any political subdivision thereof may:

1. Appropriate to the commission such funds as may be necessary to pay

preliminary expenses such as the expenses incurred in the making of borings, and other studies of subsurface conditions, in the preparation of contracts for the sale of water and in the preparation of detailed plans and estimates required for the financing of a project;

2. Advance to the commission, either as grants or loans, such funds as may be necessary or convenient to finance the operation and management of or construction by the commission of any facility or project;

3. Make payments to the commission for benefits received or to be received from the operation of any of the projects or facilities of the commission.

(b) Any funds which may be loaned to the commission either by a signatory party or a political subdivision thereof shall be repaid by the commission through the issuance of bonds or out of the other income of the commission, such repayment to be made within such period and upon such terms as may be agreed upon between the commission and the signatory party or political subdivision making the loan.

15.14 Condemnation Proceedings.

(a) The commission shall have the power to acquire by condemnation the fee or any lesser interest in lands, lands lying under water, development rights in land, riparian rights, water rights, waters and other real or personal property within the basin for any project or facility authorized pursuant to this compact. This grant of power of eminent domain includes but is not limited to the power to condemn for the purposes of this compact any property already devoted to a public use, by whomsoever owned or held, other than property of a signatory party. Any condemnation of any property or franchises owned or used by a municipal or privately owned public utility, unless the affected public utility facility is to be relocated or replaced, shall be subject to the authority of such state board, commission, or other body as may have regulatory jurisdiction over such public utility.

(b) The power of condemnation referred to in sub-section (a) shall be exercised in accordance with the provisions of the state condemnation law in force in the signatory state in which the property is located. If there is no applicable state condemnation law, the power of condemnation

shall be exercised in accordance with the provisions of Federal condemnation law.

(c) Any award or compensation for the taking of property pursuant to this article shall be paid by the commission, and none of the signatory parties nor any other agency, instrumentality or political subdivision thereof shall be liable for such award or compensation.

15.15 Conveyance of Lands and Relocation of Public Facilities.

(a) The respective officers, agencies, departments, commissions, or bodies having jurisdiction and control over real and personal property owned by the signatory parties are authorized and empowered to transfer and convey in accordance with the laws of the respective parties to the commission any such property as may be necessary or convenient to the effectuation of the authorized purposes of the commission.

(b) Each political subdivision of each of the signatory parties, notwithstanding any contrary provisions of law, is authorized and empowered to grant and convey to the commission, upon the commission's request, any real property or any interest therein owned by such political subdivision including lands lying under water and lands already devoted to public use which may be necessary or convenient to the effectuation of the authorized purposes of the commission.

(c) Any highway, public utility, or other public facility which will be dislocated by reason of a project deemed necessary by the commission to effectuate the authorized purposes of this compact shall be relocated and the cost thereof shall be paid in accordance with the law of the state in which the facility is located; provided that the cost of such relocation payable by the commission shall not in any event exceed the expenditure required to serve the public convenience and necessity.

15.16 Rights of Way.

Permission is hereby granted to the commission to locate, construct, and maintain any aqueducts, lines, pipes, conduits, and auxiliary facilities authorized to be acquired, constructed, owned, operated, or maintained by the commission in, over, under, or across any streets and highways now or hereafter owned, opened, or dedicated to or for public use, subject to such reasonable conditions as the highway department of

the signatory party may require.

15.17 Penalty.

Any person, association, or corporation who violates or attempts or conspires to violate any provisions of this compact or any rule, regulation, or order of the commission duly made, promulgated, or issued pursuant to the compact in addition to any other remedy, penalty, or consequence provided by law shall be punishable as may be provided by statute of any of the signatory parties within which the violation is committed; provided that in the absence of such provision any such person, association, or corporation shall be liable to a penalty of not less than \$50 nor more than \$1,000 for each such violation to be fixed by the court which the commission may recover in its own name in any court of competent jurisdiction, and in a summary proceeding where available under the practice and procedure of such court. For the purposes of this section in the event of a continuing offense each day of such violation, attempt, or conspiracy shall constitute a separate offense.

15.18 Tort Liability.

The commission shall be responsible for claims arising out of the negligent acts or omissions of its officers, agents, and employees only to the extent and subject to the procedures prescribed by law generally with respect to officers, agents, and employees of the government of the United States.

15.19 Effect on Riparian Rights.

Nothing contained in this compact shall be construed as affecting or intending to affect or in any way to interfere with the law of the respective signatory parties relating to riparian rights.

15.20 Amendments and Supplements.

Amendments and supplements to this compact to implement the purposes

thereof may be adopted by legislative action of any of the signatory parties concurred in by all of the others.

15.21 Construction and Severability.

The provisions of this compact and of agreements thereunder shall be severable and if any phrase, clause, sentence, or provision of the Susquehanna River Basin Compact or such agreement is declared to be unconstitutional or the applicability thereof to any signatory party, agency, or person is held invalid, the constitutionality of the remainder of such compact or such agreement and the applicability thereof to any other signatory party, agency, person, or circumstance shall not be affected thereby. It is the legislative intent that the provisions of such compact be reasonably and liberally construed.

15.22 Effective Date; Execution.

This compact shall become binding and effective thirty days after the enactment of concurring legislation by the Federal government, the states of Maryland and New York, and the Commonwealth of Pennsylvania. The compact shall be signed and sealed in five identical original copies by the respective chief executives of the signatory parties. One such copy shall be filed with the Secretary of State of each of the signatory parties or in accordance with the laws of the state in which the filing is made, and one copy shall be filed and retained in the archives of the commission upon its organization.

§ 21-1303. Member and alternate.

1. As provided in section 2.2 of the compact, the Governor or his designee shall be this state's member on the commission established thereby. An officer of the Department of Environmental Conservation shall be appointed as the designee if one is appointed. The Governor shall appoint an alternate pursuant to section 2.3 of the compact. If the Governor does not appoint a designee to act for him, he shall appoint an officer of the Department of Environmental Conservation as

alternate.

2. Any person serving on the Susquehanna river basin commission pursuant to this section shall be reimbursed for all necessary expenses incurred as an incident of such service and such reimbursement shall be from the funds of said person's department or office.

§ 21-1305. Advisory committee.

The Department of Environmental Conservation shall provide an advisory committee with whom the member of the Susquehanna river basin commission from this state may consult with respect to the conduct of New York participation in the compact.

§ 21-1307. Consent to alteration of diversion.

1. Consent of the member from this state to the impairment, diminution, or other adverse effect on diversions, compensating releases, rights, conditions, obligations and provisions for the administration thereof as contemplated by section 3.8 of the compact shall not be given, except with the prior approval of the Department of Environmental Conservation.

2. Except with respect to diversions governed by subdivision one of this section the provisions of section 15-1505 of this chapter shall not apply to any diversion or furnishing of water authorized or made pursuant to the compact.

§ 21-1309. Jurisdiction of courts.

Except as otherwise specifically provided herein, the phrase "court of competent jurisdiction" as used in the compact shall mean, with reference to courts of this state, the supreme court, and said court is hereby given all necessary and appropriate jurisdiction to hear and

determine any action or proceeding brought before it pursuant to appropriate provisions of the compact. As used in section 11.6 of the compact, the phrase "court of competent jurisdiction" shall mean, with reference to courts of this state, a court in which an appropriate proceeding under article seventy-eight of the Civil Practice Law and Rules may be brought. As used in clause one of subdivision (a) of section 15.1 of the compact, the phrase "court of competent jurisdiction" shall mean with reference to courts of this state, any court in which an action or proceeding of the class brought by the Susquehanna river basin commission may be heard and determined.

§ 21-1311. Prior project approval.

No project requiring license, permit or other approval by any agency or officer of this state, or any subdivision thereof, shall be given any final license, permit or approval, by such agency or officer of this state if such project requires approval of the Susquehanna river basin commission pursuant to this compact and such approval has not been given.

§ 21-1313. Delegations of power.

No agency or officer of this state or any subdivision thereof shall accept or exercise any delegation of power pursuant to section 11.1 of the compact unless, in the absence of the compact, it would have the constitutional or statutory power to exercise such power on its own account.

§ 21-1315. Cooperative services.

Departments, agencies and officers shall provide technical and administrative services to the Susquehanna river basin commission upon request within the limits of available appropriations and shall cooperate generally with said commission for the purposes of the

compact.

§ 21-1316. Report and recommendations of department.

The department shall submit to the governor and the legislature of this state on or before the twenty-fifth day of January, nineteen hundred seventy-eight, and every year thereafter, a detailed examination and evaluation of the programs and activities of the commission as they relate to New York state and shall make recommendations for any legislative action deemed by the department advisable, including amendments to the statutes of the signatory states which may be necessary to carry out the intent and purposes of the compact.

§ 21-1317. Budget.

The Susquehanna river basin commission shall submit annually to the Director of the Budget, in accordance with the rules and practices of the state for study and consideration by such Director, an estimate of monies required to administer, manage and support the commission during the ensuing fiscal year. Such estimate shall include any request for appropriation of funds by New York and shall be accompanied by a tabulation of similar requests which the commission expects to make to each signatory and the formula or factors upon which such respective requests are based. The provisions of section 14.3 of the compact apply to the budgetary and other fiscal matters related to the participation of this state in the compact.

§ 21-1319. Audit.

Pursuant to subdivision (b) of section 15.11 of the compact, the state Comptroller is hereby authorized and empowered from time to time to examine the accounts and books of the commission, including its receipts, disbursements and other items referring to its financial standing as the Comptroller may deem proper and to report the results of

such examination to the Governor.

§ 21-1321. Inconsistent laws.

No provision of this chapter or of any other law of this state which is inconsistent with the provisions of the compact shall be applicable to the Susquehanna river basin commission or to any matter governed by the compact.

* TITLE 15

MID-ATLANTIC STATES AIR POLLUTION CONTROL COMPACT

Section 21-1501. Mid-Atlantic states air pollution control compact.

21-1503. Commissioner and alternate.

21-1505. Advisors.

21-1507. Jurisdiction of courts.

21-1509. Budget.

21-1511. Audit.

21-1513. Inconsistent laws.

* NB Denied Congressional consent; preempted by enactment of federal Air Quality Act of 1967 (81 stat. 485)

*** § 21-1501. Mid-Atlantic states air pollution control compact.**

The mid-Atlantic states air pollution control compact as first entered into pursuant to chapter 475 of the laws of 1967, as amended by chapter 476 of the laws of 1967, and as amended by chapter 385 of the laws of 1968, and as subject to execution by the governor as provided in said compact, is hereby continued. The compact is as follows:

WHEREAS, the signatory parties recognize that they have certain serious problems in common with respect to pollution of the atmosphere by man-made contaminants; and

WHEREAS, the nature and sources of air pollution are such that the

states' efforts can be effectively supplemented by control measures applicable to regional airsheds which cut across state boundaries; and

WHEREAS, the signatory parties recognize that the protection and improvement of the quality of their common atmosphere is vested with local, state and national interests, for which they have a joint responsibility; and

WHEREAS, the signatory parties have determined to establish a federal-interstate agency, with jurisdiction and powers adequate to cope with interstate air pollution problems;

Now therefore, the states of New Jersey and New York and the United States of America, and if any of them should join herein, the states of Delaware, Connecticut and the commonwealth of Pennsylvania, respectively, hereby solemnly covenant and agree with each other, upon the enactment of concurring legislation by the congress of the United States and by the respective state legislatures, having the same effect as this part as follows:

ARTICLE 1

SHORT TITLE, DEFINITIONS AND FINDINGS

§ 1.1. Short title. This act shall be known and may be cited as the "Mid-Atlantic States Air Pollution Control Compact".

§ 1.2. Definitions. For the purposes of this compact, and of any supplemental or concurring legislation enacted pursuant thereto, except as may be otherwise required by the context:

(a) "Commission" shall mean the commission established by this compact;

(b) "Region" shall mean the territorial limits of the states which are or become parties to this compact;

(c) "Compact" shall mean section 21-1501 of this title;

(d) "Federal government" shall mean the government of the United States of America, and any appropriate branch, department, bureau or division thereof, as the case may be;

(e) "Signatory party" shall mean a state, commonwealth, or the federal government, which has become a party to this compact by enactment of concurring legislation;

(f) "District" shall mean any area established, identified or defined by the commission in connection with the abatement or control of air pollution;

(g) "Air contaminant" shall mean dust, fumes, mist, smoke, or other particulate matter, vapor, gas, odorous substance, or any combination thereof;

(h) "Air pollution" shall mean the presence in the outdoor atmosphere of one or more air contaminants in such quantities and duration as is or tends to be injurious to human health or welfare, animal or plant life, or property, or would unreasonably interfere with the enjoyment of life or property;

(i) "Emission" shall mean a release into the outdoor atmosphere of air contaminants.

§ 1.3. Findings of fact. It is hereby found and declared that:

(a) The tremendous growth of population and industry has resulted in substantial increases in atmospheric waste and air pollution over the entire region;

(b) Air pollution does not respect political boundaries, and persons far removed from its sources and having no responsibility for or control over its creation endure health hazards, discomfort and inconvenience and experience property damage and economic loss;

(c) Air pollution is associated with such important respiratory diseases as lung cancer, emphysema, chronic bronchitis and asthma, and is a general hazard to the public health and welfare, agricultural crops, livestock and other property;

(d) It is necessary and desirable to abate existing air pollution and prevent future air pollution so as to secure and maintain air quality which is consistent with the public health and welfare, the propagation and protection of plant and animal life, and the protection of property and other resources of the region;

(e) In the present state of the art, there are no public facilities for collection and disposal of atmospheric waste comparable to facilities to cope with liquid and solid waste, and the effects of emissions differ greatly among air resource uses and users, under the various meteorological and geographic conditions, which disregard state boundaries.

(f) Air pollution can best be controlled and abated at its sources,

and, while such prevention, control and abatement is the primary obligation of the states, counties or municipalities in which it originates, the problems of interstate air pollution can be more readily and effectively solved under a coordinated regionwide agency of the state and federal governments.

§ 1.4. Existing agencies; construction. It is the purpose of the signatory parties to preserve and utilize the functions, powers and duties of existing offices and agencies of government to the extent not inconsistent with the compact and the commission is authorized and directed to utilize and employ such offices and agencies for the purpose of this compact to the fullest extent it finds feasible and advantageous.

ARTICLE 2

ORGANIZATION AND ADMINISTRATION

§ 2.1. Commission created. There is hereby created the mid-Atlantic states air pollution control commission as a body politic and corporate, with perpetual succession as an agency and instrumentality of the respective signatory parties.

§ 2.2. Commission membership. The commission shall consist of the governors of the signatory states, ex-officio, and one commissioner to be appointed by the president of the United States, to serve during the term of office of the president appointing him and until the appointment and qualification of his successor.

§ 2.3. Alternates. Each member of the commission shall appoint an alternate to act in his place and stead, with authority to attend all meetings of the commission, and with power to vote in the absence of the member. Unless otherwise provided by law of the signatory party for which he is appointed, each alternate shall serve during the term of the member appointing him, subject to removal at the pleasure of the member. In the event of a vacancy in the office of alternate, it shall be filled in the same manner as an original appointment for the unexpired term only. In the event of the temporary absence or disability of an alternate, the member of the commission may appoint another qualified person to act as his alternate for the duration of such temporary absence or disability.

§ 2.4. Compensation. Members of the commission and alternates shall serve without compensation from the commission but may be reimbursed for

necessary expenses incurred in and incident to the performance of their duties.

§ 2.5. Voting power. Each member shall be entitled to one vote on all matters which may come before the commission. No action of the commission shall be taken at any meeting unless a majority of the membership shall vote in favor thereof.

§ 2.6. Organization; procedure. The commission shall provide for its own organization and procedure and shall adopt rules and regulations governing its meetings and transactions. It shall organize annually by the election of a chairman and vice-chairman from among its members. It shall provide by its rules for the appointment by each member in his discretion of an advisor to serve without compensation, who may attend all meetings of the commission and its committees.

§ 2.7. Jurisdiction. The commission shall have, exercise and discharge its functions, powers and duties within the region. It may by contract or otherwise act jointly, concurrently, or in cooperation with any other agency or instrumentality of government within or without the region for the purpose of effectuating the purposes of this compact.

§ 2.8. Retained jurisdiction of signatory parties. (a) Unless authorized by laws of the signatory states other than this compact, the commission shall not have power to require licenses or permits for the construction, establishment, installation, maintenance or operation of any air pollution source or other equipment, device or facility; to require commission approval of any of the foregoing; or to confer upon the commission any other power of licensure.

(b) Nothing in this compact shall be construed to abrogate, impair or in any way prevent the enactment or application of any state or local law, code, ordinance, rule or regulation not inconsistent with this compact, or with any standard, rule or regulation of the commission; and any such state or local law, code, ordinance, rule or regulation may be more restrictive than any requirement in effect pursuant to this compact.

(c) Nothing in this compact shall be construed to affect any aspect of employer-employee relations, including without limitation, statutes, rules or regulations governing industrial health and safety.

ARTICLE 3

POWERS AND DUTIES OF THE COMMISSION

§ 3.1. General powers.

The commission shall:

(a) Investigate the causes and sources of air pollution, identify air contaminants, and provide for research and the compilation and analysis of information relating thereto;

(b) Establish, after consultation with the appropriate agency of the signatory parties, standards for air quality and requirements for the control of emissions of air contaminants to abate existing air pollution and to prevent future air pollution, subject to the provisions of article four of this compact;

(c) Provide and administer plans and programs to effectuate such air quality standards and emission control requirements;

(d) Promote, sponsor and conduct technical, educational and research programs and projects to identify and evaluate air contaminants and to develop and apply methods, systems and procedures for the abatement and prevention of air pollution; and

(e) Enforce or provide for the enforcement of the compact and rules and regulations lawfully promulgated thereunder;

(f) Furnish technical services, advice and consultation to agencies of the signatory parties, provided that the costs of such services may be reimbursable whenever the parties deem appropriate.

§ 3.2. Auxiliary powers. In furtherance of the powers and duties elsewhere prescribed in this compact, the commission may:

(a) Sue and be sued in a court of competent jurisdiction;

(b) Have a seal and alter the same at pleasure;

(c) Acquire, hold and dispose of real and personal property by gift, purchase, lease, license or other similar manner for its corporate purposes and accept grants and comply with the conditions thereof;

(d) Provide for the organization and administration of a commission staff and retain and employ counsel and private consultants on a contract basis or otherwise;

(e) Administer and enforce the provisions of this compact;

(f) Make and enforce such rules and regulations as the commission may deem necessary to effectuate the purposes of this compact or to prevent the circumvention or evasion thereof;

(g) By its members and its properly designated officers, agents and

employees, administer oaths and issue subpoenas throughout the region to compel the attendance of witnesses and the giving of testimony and the production of other evidence;

(h) Have for its members and its properly designated officers, agents and employees, full and free access, ingress and egress to and from all property, premises and places in the region, for the purpose of making inspection or enforcing the provisions of this compact, where there is reasonable cause to believe there is a violation of this compact or of any rule or regulation lawfully made thereunder; and no person shall obstruct or in any way interfere with any such member, officer, employee or agent in the making of such inspection, or in the enforcement of the provisions of this compact or in the performance of any other power or duty under this compact; and

(i) Cooperate with and receive from any department, division, bureau, board, commission, or agency of any or all of the signatory parties, or of any county or municipality thereof, such assistance and data as will enable it properly to carry out its powers and duties hereunder, and may authorize and request any such department, division, bureau, board, commission or agency, with the consent thereof, to execute such of its functions and powers as the public interest may require.

ARTICLE 4

AIR QUALITY STANDARDS AND EMISSION CONTROL REQUIREMENTS

§ 4.1. Generally. The commission shall have jurisdiction to abate existing air pollution and to prevent and control future air pollution in the region, and to this end it shall:

(a) Prepare and develop standards of air quality and emission control requirements for the region as required to protect the public health and welfare and prevent air pollution which would unreasonably impair the beneficial use of the air of the region. To this end, it shall encourage and conduct studies, investigations and research relating to air pollution and its causes, prevention, control and abatement.

(b) For the purpose of such standards, the commission may establish and delineate districts and airsheds, seasonal requirements, and classifications of air contaminants by type and source, for general or selective application of such standards and emission controls.

(c) Prior to the adoption of standards or emission control requirements, the commission shall hold public hearings upon due notice

of the proposed standards, and all interested persons shall be given an opportunity to be heard at such hearing. After such notice and hearing, the commission may adopt and from time to time amend and repeal standards in the form of rules and regulations to prevent or control future air pollution and to abate existing air pollution, and to require the installation of such measures, systems and procedures for the abatement or prevention of air pollution as may be required to protect the public health, safety, property rights, and general welfare. Any such rule or regulation, amendment or repeal thereof shall take effect not less than sixty (60) days after its adoption by the commission and filing as required by law.

§ 4.2. Monitoring; warnings; emergencies. The commission shall: (a) Provide for a uniform, comprehensive and integrated system for monitoring atmospheric waste in the region, the measurement and forecasting of air pollution, and the identification of significant meteorological, geographical, and ecological factors within the region, its districts or airsheds;

(b) Establish and administer warning and alert procedures and systems with respect to impending and existing conditions of sewer and immediately dangerous air pollution;

(c) Upon authorization by any one of the signatory states, exercise emergency powers within those portions of the region lying within the authorizing state to require the reduction or cessation of emissions of air contaminants, and to require the taking or refining from any other measure as may be necessary in the public interest to alleviate or abate the immediate danger.

§ 4.3. Enforcement. (a) The commission may, after such notice and hearing as may be required by due process of law, issue an order or orders to any person or public or private corporation, or other entity, to cease and desist from any emissions which it determines to be in violation of such rules and regulations as it shall have adopted for the prevention and abatement of air pollution. Any such order or orders may prescribe a schedule, including a reasonable time for the construction and installation of any necessary systems, methods and procedures, on or before which the emission of air contaminants shall be wholly or partially discontinued, modified or treated, or otherwise required to conform to the standards established by the commission. Any court of

competent jurisdiction shall have jurisdiction to enforce by injunction in a summary manner against any person, public or private corporation, or other entity, any and all provisions of this article or of any such order. The commission may bring an action in its own name in any such court of competent jurisdiction to compel compliance with any provisions of this compact, or of any rule, regulation or order issued pursuant thereto, according to the practice and procedure of the court.

(b) In the case of air pollution not within an interstate district or airshed as established by the commission, the commission shall give priority to enforcement proceedings by other agencies of the signatory parties; provided, however, that the provisions of this subdivision may not be asserted as a defense in any action or proceeding brought by the commission.

§ 4.4. Hearings; subpoenas. (a) The commission shall establish by appropriate regulation the procedure to be followed in the conduct of its hearings. Neither the commission nor any person designated by it to conduct a hearing shall be bound by common law or statutory rules of evidence or by technical or formal rules of procedure in the conduct of such hearings.

(b) The commission, or such member or officer of the commission as may be designated by the commission for that purpose shall have the power to issue subpoenas effective throughout the region to compel the attendance of witnesses and the giving of testimony or production of other evidence, and to administer oaths in connection with any such hearing. It shall be the duty of the commission or of such member or officer of the commission as it may designate to issue subpoenas at the request of and on behalf of any part to a hearing before the commission. Subpoenas issued by the commission shall be enforced by any court of competent jurisdiction of the signatory parties, according to the practice and procedure of the court applicable to subpoenas issued in proceedings pending before it.

§ 4.5. Penal sanction. Any person, association, or corporation who violates or attempts or conspires to violate any provision of this compact or any rule, regulation or order of the commission duly made, promulgated or issued pursuant to the compact, in addition to any other remedy, penalty or consequence provided by law, shall be punishable as may be provided by statute of any of the signatory parties within which

the offense is committed; provided that in the absence of such provision any such person, association or corporation, shall be liable to a penalty of not less than fifty dollars and not more than one thousand dollars, for each such offense to be fixed by the court, which the commission may recover in its own name in any court of competent jurisdiction, and in a summary proceeding where available under the practice and procedure of such court. For the purposes of this section in the event of a continuing offense, each day of such violation, attempt or conspiracy shall constitute a separate offense.

§ 4.6. Judiciary review. Any order or determination of the commission under this article shall be subject to judicial review in any court of competent jurisdiction as provided by the law of a signatory party.

ARTICLE 5

PERSONNEL AND PROCEDURES GENERALLY

§ 5.1. Powers of the commissioners. The commissioners, subject to the provisions of this compact, shall:

(a) Serve as the governing body of the commission, and exercise and discharge its powers and duties except as otherwise provided by or pursuant to this compact;

(b) Determine the character of and the necessity for its obligations and expenditures and the manner in which they shall be incurred, allowed and paid subject to any provisions of law specifically applicable to agencies or instrumentalities created by compact;

(c) Provide for the internal organization and administration of the commission;

(d) Appoint or provide for the appointment of the principal officers of the commission and delegate to and allocate among them administrative functions, powers and duties;

(e) Create and abolish such offices, employments and positions as it deems necessary for the purposes of the compact, and subject to the provisions of this article, fix and provide for the qualification, appointment, removal, term, tenure, compensation, pension and retirement rights of its officers and employees;

(f) Let and execute contracts to carry out the powers of the commission.

§ 5.2. Regulations; enforcement. The commission may:

(a) Make and enforce reasonable rules and regulations in the form of

an air pollution code or otherwise, for the effectuation, application and enforcement of this compact; provided that any rule or regulation, other than one which deals solely with the internal management of the commission, shall be adopted only after public hearing and shall not be effective unless and until filed in accordance with the law of the respective signatory parties applicable to administrative rules and regulations generally; provided further, that a certified copy of any such rule or regulation, attested as true and correct by the commission, shall be presumptive evidence of the regular making, adoption, filing and publication thereof; and

(b) Designate any officer, agent or employee of the commission to be an investigator, and such person shall be vested with the powers of a peace officer of the state in which he is duly assigned to perform his duties.

§ 5.3. Confidential information. Any records or other information furnished to or obtained by the commission in the exercise of its powers, functions and duties from any private person, corporation or other entity which records or information, as certified by the owner or operator, relate to production or sales figures, or to secret processes or production, or which if made known to others would tend to affect adversely the competitive position of such owner or operator, shall be retained solely for the use of the commission and its employees, in the administration and enforcement of this compact, and for the use of air pollution control agencies of the signatory parties in the administration and enforcement of state or federal law, and shall not be published or disclosed for any other purpose by any officer or employee of the commission or any other person without the written consent of such owner or operator.

§ 5.4. Officers generally. (a) The officers of the commission shall consist of an executive director and such additional officers, deputies and assistants as the commission may determine. The executive director shall be appointed and may be removed by the affirmative vote of a majority of the full membership of the commission. All other officers and employees shall be appointed in such manner and under such rules of procedure as the commission may determine.

(b) In the appointment and promotion of officers and employees for the commission, no political, racial, religious or residency test or

qualification shall be permitted or given consideration, but all such appointments and promotions shall be solely on the basis of merit and fitness. Any officer or employee of the commission who is found by the commission to be guilty of a violation of this section shall be removed from office by the commission.

§ 5.5. Meetings; records. (a) All meetings of the commission shall be open to the public.

(b) The minutes of the commission shall be a public record open to inspection and copying at its offices during regular business hours, subject to the law relating to public records of the signatory states in which such minutes are located.

§ 5.6. Prohibited activities. (a) No commissioner, officer or employee shall:

1) be financially interested, either directly or indirectly, in any contract, sale, purchase, lease or transfer of real or personal property to which the commission is a party;

2) solicit or accept money or any other thing of value in addition to the compensation or expenses paid him by the commission for services performed within the scope of his official duties;

3) offer money or any thing of value for or in consideration of obtaining an appointment, promotion or privilege in his employment with the commission.

(b) Any officer or employee who shall wilfully violate any of the provisions of this section shall forfeit his office or employment.

(c) Any contract or agreement knowingly made in contravention of this section shall be void.

(d) Officers and employees of the commission shall be subject in addition to the provisions of this section to such criminal and civil sanctions for misconduct in office as may be imposed by federal law and the law of the signatory state in which such misconduct occurs.

§ 5.7. Audit. The commission shall provide for an annual independent audit of its accounts and financial transactions by a certified public accountant, and for the publication of the report of such audit.

§ 5.8. Tort liability. The commission shall be responsible for claims

arising out of the negligent acts or omissions of its officers, agents and employees only to the extent and subject to the procedures prescribed by law generally with respect to officers, agents and employees of the government of the United States.

ARTICLE 6

GENERAL PROVISIONS

§ 6.1. Commission budget. The commission shall annually adopt a current expense budget for each fiscal year, and shall apportion the amount required to balance the expenditures therein, less estimated revenues from all sources, to the signatory parties in accordance with such equitable cost-sharing formulae as the members of the commission may adopt by unanimous vote. Following the adoption of its annual budget, the commission shall transmit certified copies of the budget to the budget officer of the respective signatory parties at such time and in such manner as may be required under their respective budgetary procedures. The signatory parties covenant and agree to include the amount so apportioned for the support of the commission's current expense budget in their respective budgets next to be adopted, subject to such review and approval as may be required by their respective budgetary processes. Such amounts shall be due and payable to the commission in equal quarterly installments during the commission's fiscal year.

§ 6.2. Cooperation. Each signatory party pledges faithful cooperation in the control of air pollution in the region and consistent with such object to enact (or if enacted, to keep in force and where necessary to amend) laws which will:

(a) Enable it to secure and maintain standards of air quality at least equal to those prescribed by the commission;

(b) Accomplish effectively the objectives of this compact, and enable its officers, departments, boards and agents satisfactorily to accomplish the obligations and duties assumed by the party under the terms hereof; and

(c) Enable it to provide technical and administrative services to the commission upon request, within the limits of available appropriations, and to cooperate generally with the commission for the purposes of this compact, provided that the cost of such services may be reimbursable whenever the parties deem appropriate.

§ 6.3. Withdrawal from compact. (a) A signatory party may withdraw from this compact by enacting a statute repealing the same, but no such withdrawal shall become effective until two (2) years after the chief executive of the withdrawing party has given notice of the withdrawal to the commission and to each commissioner.

(b) No withdrawal shall affect any obligation of a signatory party or any person therein accruing prior to the effective date of the withdrawal, nor any abatement order of the commission issued prior to such effective date nor shall any proceeding initiated for the enforcement thereof be invalidated or otherwise affected thereby. The jurisdiction of all appropriate courts and agencies for the enforcement of any such order shall continue, notwithstanding the fact that the effective date of the withdrawal may have passed.

§ 6.5. Amendments and supplements. Amendments and supplements to this compact to implement the purposes thereof may be adopted by legislative action of any of the signatory parties concurred in by all of the others.

§ 6.6. Construction and severability. The provisions of this compact and of agreements thereunder shall be severable and if any phrase, clause, sentence or provision of this compact of such agreement is declared to be unconstitutional or the applicability thereof to any signatory party, agency or person is held invalid, the constitutionality of the remainder of such compact or such agreement and the applicability thereof to any other signatory party, agency, person or circumstance shall not be affected thereby. It is the legislative intent that the provisions of such compact be reasonably and liberally construed.

§ 6.7. Effective date; execution. (a) This compact shall become binding and effective thirty days after the enactment of concurring legislation by the federal government and the state of New Jersey. The compact shall be signed and sealed in six duplicate original copies by the respective chief executives of the signatory parties. One such copy shall be filed with each of the signatory parties in accordance with the laws of the party in which the filing is made, and the remaining copies shall be filed and retained in the archives of the commission upon its organization.

(b) Thereafter, the compact shall become binding and effective separately as to each of the states of Connecticut and Delaware and the

commonwealth of Pennsylvania thirty (30) days after enactment of concurring legislation by such states or commonwealth.

* NB Denied Congressional consent; preempted by enactment of federal Air Quality Act of 1967 (81 stat. 485)

*** § 21-1503. Commissioner and alternate.**

The Governor shall be this state's member on the mid-Atlantic states air pollution control commission. The Governor shall appoint the Commissioner of Environmental Conservation as his alternate pursuant to section 2.3 of article two of such compact.

* NB Denied Congressional consent; preempted by enactment of federal Air Quality Act of 1967 (81 stat. 485)

*** § 21-1505. Advisors.**

1. The mayor of the city of New York, or his designee, shall be the advisor of this state's member of the mid-Atlantic states air pollution control commission, as contemplated by section 2.6 of article two of the mid-Atlantic states air pollution control compact, provided that any such designee shall not be accorded any privileges as such unless the mayor shall have notified this state's member and the commission in writing of the selection of such designee.

2. The Department of Environmental Conservation shall provide an advisory committee with whom this state's member of the commission may consult with respect to the conduct of New York participation in the compact. Such member of the commission also may consult from time to time with other officers of the state government or any subdivision thereof, as may be appropriate.

* NB Denied Congressional consent; preempted by enactment of federal Air Quality Act of 1967 (81 stat. 485)

*** § 21-1507. Jurisdiction of courts.**

Except as otherwise specifically provided in such compact, the phrase "court of competent jurisdiction" as used in the mid-Atlantic states air pollution control compact shall, with reference to this state, mean the supreme court, and said court is hereby given all necessary and appropriate jurisdiction to hear and determine any action or proceeding brought before it pursuant to appropriate provisions of the compact. As used in section 4.6 of the compact, the phrase "court of competent jurisdiction" shall mean a court in which an appropriate proceeding under article seventy-eight of the Civil Practice Law and Rules may be brought. As used in subdivision a of section 3.2 of the compact, the phrase "court of competent jurisdiction" shall mean any court of this state in which an action or proceeding of the same class brought by a resident could be heard and determined.

* NB Denied Congressional consent; preempted by enactment of federal Air Quality Act of 1967 (81 stat. 485)

*** § 21-1509. Budget.**

The mid-Atlantic states air pollution control commission shall submit annually to the Director of the Budget, in accordance with the rules and practice of the state, for study and consideration by such Director, an estimate of moneys required to administer, manage and support the commission during the ensuing fiscal year. Such estimate shall include any request for appropriation of funds by New York and shall be accompanied by a tabulation of similar requests which the commission expects to make to each other signatory party and the formula or factors upon which such respective requests are based. The provisions of section 6.1 of the compact shall apply to the budgetary and other fiscal matters relating to the participation of this state in the compact.

* NB Denied Congressional consent; preempted by enactment of federal Air Quality Act of 1967 (81 stat. 485)

*** § 21-1511. Audit.**

Pursuant to section 6.1 of the mid-Atlantic states air pollution control compact, the state Comptroller is hereby authorized and empowered from time to time to examine the accounts and books of the commission, including its receipts, disbursements and such other items referring to its financial standing as the Comptroller may deem proper and to report the results of such examination to the Governor.

* NB Denied Congressional consent; preempted by enactment of federal Air Quality Act of 1967 (81 stat. 485)

*** § 21-1513. Inconsistent laws.**

No provision of this chapter or of any other law which is inconsistent with the provisions of the mid-Atlantic states air pollution control compact shall be applicable to the mid-Atlantic states air pollution control commission or to any matter governed by such compact.

* NB Denied Congressional consent; preempted by enactment of federal Air Quality Act of 1967 (81 stat. 485)

TITLE 17

DELAWARE RIVER BASIN WATER COMMISSION COMPACT

Section 21-1701. The Delaware river basin water commission compact approved.

21-1703. Force and effect of the compact.

21-1705. Consent of the congress.

21-1707. Effective date of this act.

§ 21-1701. The Delaware river basin water commission compact approved.

The authority of the Governor to enter into a compact on behalf of the state of New York with the states of Delaware and New Jersey and the commonwealth of Pennsylvania in substantially the following form, which authority was first conferred by chapter 701 of the laws of 1952, is hereby continued:

COMPACT

BETWEEN THE STATES OF DELAWARE, NEW JERSEY
AND NEW YORK AND THE COMMONWEALTH OF
PENNSYLVANIA CREATING THE DELAWARE
RIVER BASIN WATER COMMISSION AND
DEFINING ITS POWERS AND DUTIES

Whereas, the peoples of the States of Delaware, New Jersey, and New York and the Commonwealth of Pennsylvania have a common interest in the waters of the Delaware River Basin; and

Whereas, it is desirable that the water and water resources of the Delaware River and its tributaries be developed, utilized, controlled, and conserved for the benefit of all the people; and

Whereas, the United States Supreme Court, in its decision in the Delaware River Case (283 U.S. 336), established the principle of equitable apportionment of the waters of the upper Delaware River Basin; and

Whereas, political subdivisions and metropolitan areas in the States of New Jersey and New York and the Commonwealth of Pennsylvania have been confronted constantly with the problem of meeting existing and prospective requirements of the people within their respective areas for obtaining and maintaining an adequate and satisfactory supply of water, both for domestic and industrial purposes; and

Whereas, it is essential that there be maintained an adequate minimum flow in the Delaware River for the protection of public health, for the benefit of industry and of fisheries, such as oysters, clams and other shellfish, for animal and aquatic life, for recreation, for general sanitary conditions, for the dilution and abatement of pollution, and for the prevention of undue salinity; and

Whereas, for the purpose of promoting interstate cooperation in various fields of governmental operations, including the utilization, control and conservation of water resources of interstate river systems, the States of Delaware, New Jersey, and New York and the Commonwealth of

Pennsylvania each has created and now maintains a Commission (or Committee) on Interstate Cooperation, which Commissions have jointly organized and established and are now maintaining, in cooperation with each of the others, a joint advisory board known as "The Interstate Commission on the Delaware River Basin" for the purpose, among other activities, of formulating and recommending integrated programs for the development, utilization, control and conservation of the water resources of the Delaware River Basin; and

Whereas, upon the recommendation of the said Interstate Commission on the Delaware River Basin, submitted through the Commission on Interstate Cooperation of each of the States concerned, the legislatures of the States of New Jersey and New York and the Commonwealth of Pennsylvania, by reciprocal legislation, enacted laws at their 1949 Sessions (New Jersey Laws of 1949, Chap. 105; New York Laws of 1949, Chap. 610; Pennsylvania Laws of 1949, Act 475), authorizing and directing the said Interstate Commission on the Delaware River Basin to make surveys and investigations to determine and report on the feasibility and advisability of the future construction of an integrated water project designed, among other purposes, to meet the combined prospective water supply requirements of political subdivisions and metropolitan areas in the said States, both within and outside the said Basin, empowering such Commission to enter upon lands, structures, and waters for the purposes of such surveys and investigations, making an appropriation to such Commission, and requiring a full report of its proceedings, findings, conclusions, recommendations, and such draft or drafts of legislation as it may deem necessary or proper for enactment by such States; and

Whereas, based upon a full report submitted by the Interstate Commission on the Delaware River Basin setting forth the findings, conclusions, and recommendations resulting from its surveys and investigations, it is the opinion of that Commission, concurred in by each of the aforesaid Commissions on Interstate Cooperation, that the future construction of integrated water projects in the Delaware River Basin is feasible, advisable, and urgently needed, and can best be accomplished by and through a joint administrative agency created by an agreement or compact between the States of Delaware, New Jersey, and New

York and the Commonwealth of Pennsylvania; and

Whereas, the Congress of the United States, by its joint Resolution of March 1, 1911 (36 Stat. 961), relating to the conservation of forests and water supply and protection of forests from fire, gave general consent to encourage the making of agreements or compacts between States for the purpose of conserving the forests and the water supply;

Now, Therefore, the Commonwealth of Pennsylvania and the States of New Jersey and New York (and the State of Delaware if and when Delaware becomes a signatory State) do hereby solemnly covenant and agree each with the other as follows:

ARTICLE 1
CREATION AND PURPOSES OF THE COMMISSION

1. There is created hereby a body corporate and politic with perpetual succession, to be known as The Delaware River Basin Water Commission (hereinafter in this compact referred to as the Commission), which shall constitute a public corporate instrumentality of the Commonwealth of Pennsylvania and of the States of New Jersey and New York, (and of the State of Delaware if and when Delaware becomes a signatory State), and of each of them, to exercise an essential governmental function of each of the signatory States, for the purposes of developing, utilizing, controlling, and conserving the water resources of the Delaware River Basin in order to assure an adequate water supply:

(a) to meet the domestic and industrial requirements of political subdivisions and metropolitan areas within those States;

(b) to provide an adequate minimum flow in the Delaware River for the protection of public health, for the benefit of industry and of fisheries, such as oysters, clams, and other shellfish, for animal and aquatic life, for recreation, for general sanitary conditions, for the dilution and abatement of pollution, and for the prevention of undue salinity; and

(c) to provide for such other uses of water as navigation, flood control, production of hydro-electric power, and related uses.

2. In order to effectuate the foregoing purposes, the Commission shall

determine the exact locations and character of, formulate plans for, and determine all matters in connection with, the construction, operation and maintenance of dams, reservoirs, and appurtenant structures within the Delaware River Basin as herein defined for the storage and effective regulation of the water resources thereof, and treatment plants, aqueducts, conduits, or other facilities, and shall finance, construct, operate, and maintain such structures and facilities as are deemed necessary to the following project, or a reasonable modification thereof, that is to say: (a) a dam across the West Branch of the Delaware River near Cannonsville, New York; (b) a dam across the Delaware River near Barryville, New York; (c) a dam across the Neversink River near Godeffroy, New York; (d) a dam across the Delaware River near Wallpack Bend; (e) a dam across the East Branch of the Delaware River near Fish Eddy; (f) a dam across Flat Brook near Flatbrookville, New Jersey; (g) an aqueduct connecting the reservoir created by the dam across the Delaware River near Barryville, New York, with the reservoir on the Neversink River created by a dam near Godeffroy, New York; (h) an aqueduct, with equalizing reservoir en route, to convey a supply of water from the reservoir on the Neversink River created by the dam near Godeffroy, New York, to municipalities in northern New Jersey and to New York City; and (i) such dams, reservoirs, tunnels, conduits, and other facilities as may be required to furnish water supply to Philadelphia and adjacent areas.

3. For the purpose of this compact the "Delaware River Basin" is defined as all that land from which surface water drains naturally into the Delaware River.

ARTICLE II COMMISSIONERS

1. The Commission shall consist of three members from each signatory State, who shall be citizens and residents thereof and shall be appointed by the Governor of that State, by and with the consent of its Senate, unless its Constitution otherwise provides.

2. The term of each such commissioner shall be for five years, provided, however, that the terms of the three commissioners first

appointed by each state shall be as follows, to wit: one for three years, one for four years, and one for five years. All commissioners shall continue to hold office after the expiration of the terms for which they shall have been appointed until their respective successors shall have been appointed and qualified, but no period during which any commissioner shall hold over shall be deemed to be an extension of his term of office for the purpose of computing the date on which his successor's term expires.

3. Any commissioner may be removed or suspended from office as provided by the Constitution or applicable law of the State which he represents. In the event of a vacancy in the office of any commissioner, from any reason or cause, such vacancy shall be filled by appointment by the Governor of the State concerned, subject to confirmation as above provided, for the unexpired term.

4. The commissioners shall serve without compensation but shall be paid their actual and necessary expenses incurred in and incident to the performance of their duties, provided, however, that the elected officers of the Commission shall receive such compensation as may be fixed by the Commission.

5. The Federal Government may be represented on the Commission by three advisory members who shall serve without compensation from the Commission. The Constitution and other laws of the United States shall apply to the appointment or removal of such advisory members and the term or terms during which they shall serve.

ARTICLE III

OFFICERS, EMPLOYEES, MANAGEMENT AND PROCEDURE

1. The commissioners shall have charge of the Commission's property and affairs. The Commission shall adopt an official seal and suitable by-laws and shall promulgate rules and regulations for its management and control.

2. A majority of the commissioners from the signatory States shall constitute a quorum for the transaction of business at any meeting of

the Commission. No action shall be taken by the Commission unless a majority of the members from each state are present at a meeting of the Commission and no action so taken, including any action which, for the purposes of the project authorized by paragraph two of Article I of this compact or for any expansion thereof or any new project, imposes any financial obligation on any signatory State or on any political subdivision therein or which allocates water for water supply or for the maintenance of an adequate minimum flow to any signatory State or any political subdivision therein, shall be binding or effective unless a majority of the members from each State shall have voted in favor thereof; provided, however, that no action taken at any meeting of the Commission by any member shall have force or effect until the Governor of the State, which such member represents, shall have an opportunity to approve or veto the same. For the purpose of procuring such approval or veto, the secretary or other officer of the Commission in charge of the minutes of the proceedings of the Commission shall transmit to the Governors of the signatory States at their official offices a certified copy of the minutes of every meeting of the Commission as soon after the holding of such meeting as such minutes can be written out. Each Governor shall, within five days after such minutes shall have been delivered at his official office, cause the same to be returned to the Commission either with his approval or with his veto of any action therein recited as having been taken by any member of the Commission appointed from his State, provided, however, that if a Governor shall not return the said minutes within the said period then at the expiration thereof any action therein recited will have full force and effect according to the wording thereof. If a Governor within the said period returns the said minutes with a veto against the action of any member of the Commission from his State as recited therein, then such action of such member shall be null and void. A governor may by order filed with the secretary of the Commission relieve the members from his State from the duty of procuring his approval of their action upon any particular matter or class of matters, and thereupon the secretary or other officer in charge of the minutes of the proceedings of the Commission shall be relieved from reporting the same to him.

3. The Commission shall elect annually a chairman and a vice-chairman.

The Commission shall appoint a secretary and a treasurer, who may be but need not be members of the Commission. The secretary shall be custodian of the records of the Commission with authority to affix the Commission's official seal and to attest to and certify such records or copies thereof. Disbursements by the Commission shall be valid only when authorized by the Commission.

4. The Commission shall appoint and at its pleasure remove or discharge counsel, an executive director, engineers, and such other agents and employees as it may require for the performance of the powers and functions of the Commission. The Commission shall determine and fix the duties and compensation of its appointed officers and employees, and shall fix the compensation, if any, of its elected officers.

5. The Commission may establish and maintain one or more offices within the area of the signatory States for the transaction of its business and may meet at any time or place, but must meet at least once each year.

6. The Commission shall keep accurate accounts of all receipts and disbursements. The accounts of the Commission shall be open at any reasonable time for inspection and audit by such representative or representatives of the respective signatory States as may be duly constituted for that purpose, and for inspection by others who may be authorized by the Commission.

7. The Commission shall make an annual report to the Governor and the legislature of each signatory State setting forth in detail the operations and transactions conducted by it pursuant to this compact, and shall make recommendations for any legislative action deemed by it to be advisable, including amendments to the statutes of the signatory States which may be deemed necessary to carry out the intent and purpose of this compact.

8. No member, agent or employee of the Commission shall have a personal interest, either directly or indirectly, in any contract entered into by the Commission, including the sale to the Commission of

any real or personal property. A violation of this provision shall constitute a misdemeanor and, upon trial and conviction, shall be punishable in accordance with the laws of the signatory State in which the offense is committed, but, in no event, shall the punishment therefor exceed imprisonment for more than one year or a fine of more than five hundred dollars, or both.

9. No member, agent or employee of the Commission, while acting within the scope of his authority, shall be personally liable for any acts performed in the execution of the powers expressly authorized by this compact.

ARTICLE IV GENERAL POWERS AND LIABILITY TO SUIT

1. For the effectuation of its authorized purposes, the Commission is hereby granted and shall have the following powers in addition to such powers as may be provided for elsewhere in this compact, to wit:

(a) To sue in its own name in Federal and State courts.

(b) To acquire, own, hire, use, operate, and dispose of personal property.

(c) To acquire, own, use, and operate real property and interests therein, to make improvements thereon, and to convey, lease or otherwise dispose of any such property no longer necessary for the authorized purposes of the Commission.

(d) To grant, by lease or otherwise, the use of any property or facility owned or controlled by the Commission, and to make charges therefor.

(e) To exercise the right of eminent domain, as provided in Article V of this compact.

(f) To borrow money, make and issue from time to time negotiable bonds and notes, to fund and refund the same, and to provide for the rights of the holders of its bonds and notes, as provided in Article XIII of this compact.

(g) To establish, levy, and collect, without being subject to the supervision or regulation of any commission, board, bureau or agency of any of the signatory States or political subdivisions thereof, such rentals, fees or other charges for use of the facilities of or for the

services rendered by the Commission, and to revise such rentals, fees, or other charges as may be necessary to assure revenues at least adequate to defray the expenses of operation and maintenance of the said facilities, to pay the interest on and principal of any bonds or other obligations of the Commission, and to establish any reasonable reserves therefor.

(h) To accept such payments, appropriations, grants, gifts, loans, and other funds, properties, and services as may be made available to it by the Federal government or any of its agencies, by the governments and political subdivisions of the signatory States, or by private agencies, corporations, or individuals.

(i) To conduct surveys of dam, reservoir, treatment plant, aqueduct, or conduit locations and study subsurface conditions affecting the selection of such locations. Members of the Commission and its duly accredited agents, engineers, contractors, and employees may enter upon any lands, structures, and waters within any of the signatory States for such purposes or whenever it is deemed necessary for any of the purposes authorized by this compact, and such entry shall not be deemed a trespass or an entry under any condemnation proceedings which may be then pending. In the exercise of this power, the Commission shall save harmless the signatory States from, and be responsible to any property owner for, any damage caused by surveys or by entry on lands or any other damage resulting therefrom, and the Commission shall require every contractor or other agency performing work for said Commission to provide security for the faithful performance of any contract with the Commission and to save harmless the Commission and the signatory States from damages caused as aforesaid.

(j) To determine the exact locations and character of, to formulate plans for, and to determine all matters in connection with, the construction, operation, and maintenance of the dams, reservoirs, and appurtenant structures within the Delaware River Basin as herein defined for the storage and effective regulation of the water resources thereof, and treatment plants, aqueducts, conduits, and other facilities deemed necessary or convenient to effectuate the structures and facilities described in paragraph 2 of Article I of this compact, and to finance, construct, operate and maintain such structures and facilities.

(k) To prepare, upon the request of two or more signatory States, or

upon its own initiative, in appropriate form for submission to the legislatures of the signatory States, a report covering plans for, and the method of financing of, any new project, or any expansion of the project authorized and described in paragraph 2 of Article I of this compact; and, upon approval of such report by the legislatures of the signatory States and upon approval by the appropriate agency or agencies of the State or States of the detailed plans and specifications, all in accordance with the provisions of Article XI of this compact, to finance, construct, operate and maintain such new or expanded project.

(l) To determine and to allocate, subject to the provisions of paragraph 2 of Article III, to each of the signatory States an equitable apportionment of available water supply in order to meet domestic and industrial requirements of political subdivisions and metropolitan areas therein.

(m) To release, subject to the provisions of Article IX, the quantity of water required to be released from storage in order to maintain an adequate minimum flow in the Delaware River during periods of low flow therein for the protection of public health, for the benefit of industry and of fisheries, such as oysters, clams, and other shellfish, for animal and aquatic life, for recreation, for general sanitary conditions, for the dilution and abatement of pollution, and for the prevention of undue salinity.

(n) To provide for such other uses of the water and water resources of the Delaware River Basin as navigation, flood control, production of hydro-electric power, and related uses, and to cooperate with other appropriate agencies for that purpose.

(o) To develop, or to provide for the development of, subject to the provisions of Article X, hydro-electric power and energy inherent in the development and use of the waters to which this compact relates and incident to the control and conservation of such waters.

(p) To make, enter into, and perform contracts with the Federal government, with any of the signatory States or any of their political subdivisions, with public or private agencies, and with corporations or individuals, including (1) contracts for the sale of water for water supply, for the sale of falling water and hydro-electric power and energy, subject to the provisions of Article X, or for other services, (2) contracts for payments by the signatory States, or the political

subdivisions thereof, for benefits resulting from water released from storage in order to maintain an adequate minimum flow in the Delaware River during periods of low flow therein, and (3) any other contracts necessary or incidental to the performance of its duties and the execution of its powers under this compact.

(q) To take all measures necessary to guard and protect the areas in which its facilities or developments are located or in which any work of construction under authority of this compact is in progress, and to protect its facilities and developments from damage by pollution or otherwise, and to appoint a suitable number of persons as guards for such purposes. Such persons shall possess the power and authority of a constable, peace officer, or police officer and shall have full power to serve as such officers within the signatory States and to enforce the provisions of such laws thereof as are applicable to the purposes of this paragraph.

(r) To do all acts and things necessary or convenient to carry out the powers expressly granted in this compact.

2. The signatory States consent to suits, actions or proceedings of any form or nature at law, in equity or otherwise (including proceedings to enforce arbitration agreements) against the Commission, and to appeals therefrom and reviews thereof, except as hereinafter provided in subparagraphs (a) and (b) hereof.

(a) The foregoing consent does not extend to civil suits, actions or proceedings for the recovery of statutory penalties.

(b) The foregoing consent does not extend to suits, actions or proceedings for judgments, orders or decrees restraining, enjoining or preventing the Commission from committing or continuing to commit any act or acts, other than suits, actions or proceedings by the attorney general of any of the signatory States. The attorney general of each of the signatory States is hereby authorized to bring such suits, actions or proceedings in his discretion on behalf of any person or persons whatsoever who requests him so to do except in the cases excluded by subparagraph (a) hereof; provided, that in any such suit, action or proceeding, no judgment, order or decree shall be entered except upon at least two days' prior written notice to the Commission of the proposed entry thereof.

(c) The foregoing consent is granted upon the condition that venue in any suit, action or proceeding against the Commission shall be laid within a county or a judicial district, established by any of the said signatory States or by the United States, and situated wholly or partially within one of the signatory States. The Commission shall be deemed to be a resident of each such county or judicial district for the purpose of such suits, actions or proceedings. Although the Commission is engaged in the performance of governmental functions, the signatory States consent to liability on the part of the Commission in such suits, actions or proceedings for tortious acts committed by it and its agents to the same extent as though it were a private corporation.

* (d) The foregoing consent is granted upon the condition that any suit, action or proceeding prosecuted or maintained hereunder shall be commenced within one year after the cause of action therefor shall have accrued, and upon the further condition that in the case of any suit, action or proceeding for the recovery or payment of money, prosecuted or maintained hereunder, a notice of claim shall have been served upon the Commission by or on behalf of the plaintiff or plaintiffs at least sixty days before such suit, action or proceeding is commenced. The provisions of this subparagraph shall not apply to claims arising out of provisions of any workmen's compensation law of any of the signatory States.

* NB Effective until concurrence by members of the Delaware River Basin Water Commission

* (d) The foregoing consent is granted upon the condition that any suit, action or proceeding prosecuted or maintained hereunder shall be commenced within one year and ninety days after the cause of action therefor shall have accrued, and upon the further condition that in the case of any suit, action or proceeding for the recovery or payment of money, prosecuted or maintained hereunder, a notice of claim shall have been served upon the Commission by or on behalf of the plaintiff or plaintiffs within the time limit established by and in compliance with section fifty-e of the general municipal law. The provisions of this subparagraph shall not apply to claims arising out of provisions of any workmen's compensation law of any of the signatory States.

* NB Effective upon concurrence by the members of the Delaware River Basin Water Commission

(e) The notice of claim required by subparagraph (d) hereof shall be

in writing, sworn to by or on behalf of the claimant or claimants, and shall set forth (1) the name and post office address of each claimant and of his attorney, if any, (2) the nature of the claim, (3) the time when, the place where and the manner in which the claim arose, and (4) the items of damage or injuries claimed to have been sustained so far as then practicable. Such notice may be served in the manner in which process may be served, or in lieu thereof, may be sent by registered mail to the Commission at its principal office. Where the claimant is an infant or is mentally or physically incapacitated and by reason of such disability no notice of claim is filed or suit, action or proceeding commenced within the time specified in subparagraph (d) hereof, or where a person entitled to make a claim dies and by reason of his death no notice of claim is filed or suit, action or proceeding commenced within the time specified in subparagraph (d) hereof, then any court in which such suit, action or proceeding may be brought may in its discretion grant leave to serve the notice of claim and to commence the suit, action or proceeding within a reasonable time but in any event within three years after the cause of action accrued. Application for such leave must be made upon an affidavit showing the particular facts which caused the delay and shall be accompanied by a copy of the proposed notice of claim if such notice has not been served, and such application shall be made only upon notice to the Commission.

(f) The commissioners, officers or employees of the Commission shall not be subject to suits, actions or proceedings for judgments, orders or decrees restraining, preventing or enjoining them in their official or personal capacities from committing or continuing to commit any act or acts on behalf of the Commission other than suits, actions and proceedings brought by the attorney general of any of the signatory States. The attorney general of each of the signatory States is hereby authorized to bring such suits, actions or proceedings in his discretion on behalf of any person or persons whatsoever who requests him so to do except in the cases excluded by subparagraph (a) hereof; provided, that in any such suit, action or proceeding brought by an attorney general, no judgment, order or decree shall be entered except upon at least two days' notice to the defendant of the proposed entry thereof.

ARTICLE V

CONDEMNATION PROCEEDINGS

1. The commission shall have the power, except as hereinafter provided and limited, to acquire by condemnation lands, lands lying under water, rights in land, riparian rights, water rights, waters, and other property within the Delaware River basin as defined herein or required for aqueducts, or conduits deemed necessary or convenient to effectuate the structures and facilities described in paragraph two of Article I of this compact. This grant of the power of eminent domain includes, except as hereinafter provided and limited, but is not limited to, the power to condemn property, within the Delaware river basin as defined herein or required for aqueducts, or conduits deemed necessary or convenient to effectuate the structures and facilities described in paragraph two of Article I of this compact, owned or held by a political subdivision for municipal or public purposes, by a public district, by a public corporation or by a public authority, and includes as well the power to condemn any property already devoted to a public purpose, by whomsoever owned or held, other than property owned or held by the signatory States and other than property owned or held by the City of New York, wherever situate, for its water supply or for its water supply system. Nothing herein shall be deemed to include the power to condemn the lands, structures or properties necessary or convenient to the exercise of the rights reserved in Article XVI of this compact.

2. Such power shall be exercised in accordance with the provisions of such special law, specifically applicable to the said Commission, as may now or hereafter be in force in the signatory State in which such property is located; provided, that if there be no such special law in force in such State, condemnation proceedings shall be in accordance with the provisions of such applicable general condemnation law as may be in force in such State.

3. Any award or compensation for the taking of property pursuant to this Article shall be paid by the Commission, and none of the signatory States nor any agency, instrumentality, or political subdivision thereof shall be liable for such award or compensation.

ARTICLE VI

CONVEYANCE OF LANDS AND RELOCATION OF PUBLIC FACILITIES

1. The signatory States hereby consent to the acquisition, use and occupation by the Commission, pursuant to the laws of the respective States, of any real property within the said States, or any of them, including lands lying under water and lands already devoted to public use, which may be or may become necessary or convenient for the construction, operation, and maintenance of dams, reservoirs, treatment plants, aqueducts, conduits, and other structures or facilities, approved in accordance with the provisions of this compact; provided, such lands and property are located within the Delaware River Basin as defined herein or required for aqueducts, or conduits deemed necessary or convenient to effectuate the structures and facilities described in paragraph 2 of Article I of this compact.

2. The signatory States hereby authorize their respective officers, agencies, departments, commissions or bodies having jurisdiction and control over real property owned by the signatory States to convey in accordance with the laws of the respective States, to the Commission, with or without consideration, any such real property as may be necessary or convenient to the effectuation of the authorized purposes of the Commission.

3. Each political subdivision of each of the signatory States is hereby authorized and empowered, notwithstanding any contrary provision of law, to grant and convey to the Commission, upon the Commission's request, but not otherwise, upon reasonable terms and conditions, any real property owned by such political subdivision, including lands lying under water and lands already devoted to public use, which may be necessary or convenient to the effectuation of the authorized purposes of the Commission.

4. The term "real property" as used in this compact shall include any and all things and rights usually included within the said term and includes not only fees simple absolute, but also any and all lesser interests such as easements, rights of way, uses, leases, licenses, and all other incorporeal hereditaments, and every estate, interest or right, legal or equitable, including terms of years and liens thereon by

way of judgments, mortgages or otherwise, and also claims for damage to real property.

5. Any highway, sewer, public utility, or other public facility, which will be dislocated by reason of the constructions deemed necessary by the Commission to effectuate the authorized purposes of this compact, shall be relocated, providing that such relocation be required to serve the public interest, in the manner provided for by the laws of the respective signatory States, at the expense of the Commission.

ARTICLE VII

TAXES AND PAYMENTS IN LIEU OF TAXES

1. The effectuation of its authorized purposes by the Commission is and will be in all respects for the benefit of the people of the signatory States; and, since the Commission will be performing essential governmental functions in effectuating said purposes, the bonds or other securities or obligations issued by the Commission and the income therefrom, or any profit made on the sale thereof, shall be exempt from all taxation by or within the States of Delaware, New Jersey and New York and the Commonwealth of Pennsylvania except for transfer and inheritance taxes.

2. Lands acquired by the Commission for the purposes of this compact shall be taxable in the tax districts wherein such lands are located at the average value thereof as improved on the date of acquisition. Such average value shall be determined on the basis of computation of the average assessed value of such lands as improved for the five-year period immediately prior to such date of acquisition. The assessed value of such land shall be reviewed by the taxing authority at the end of each five-year period after the date of acquisition and such assessed valuation shall be increased or decreased percentagewise as the average assessed valuation of all the other property in the tax district has increased or decreased in such five-year period. However, none of the dams, reservoirs, treatment plants, aqueducts, conduits, or other structures, or facilities, or their appurtenances, to be built in accordance with the authority conferred by this compact shall be taxable, nor shall the assessed value of the lands upon which such

structures are built be increased by reason of their presence thereon.

3. Notwithstanding the provisions of the last preceding paragraph, the Commission is hereby authorized and empowered to enter into agreements with political subdivisions to pay a fair and reasonable sum or sums to the said political subdivisions in lieu of taxes which otherwise would be levied and collected with respect to any property hereafter acquired by the Commission. Any such payment or payments made by the Commission may be paid on an annual basis, or such payment or payments may be made in a lump sum or sums or over a stated period of years, as shall be agreed upon by and between the Commission and such political subdivision; provided, however, that in any case the payment or payments shall not be in excess of the amount of the taxes upon such property when last assessed prior to the time of its acquisition by the Commission. Every political subdivision wherein property shall be acquired by the Commission is authorized and empowered to enter into such agreement or agreements with the Commission to accept such payment or payments.

ARTICLE VIII CONTRACTS FOR WATER SUPPLY

1. The term "political subdivision", as used in this Article, shall mean and include, in addition to its usual meaning, water districts, water supply districts, and any other public authorities, public corporations, commissions or bodies having power to own, acquire, or contract for a public water supply.

2. Political subdivisions of the signatory States, either directly or through any board of water commissioners, district water supply commissioners, or any other board, commission, or public authority having jurisdiction or control over all or any part of a water supply or distribution system, may enter into contracts for the supplying of water by the Commission and the payment of any fees or other charges to the Commission. The contracts may be made for a specified or an unlimited time notwithstanding any other provisions of law, general or special, on any terms and conditions which may be approved by the political subdivision and which may be agreed to by the Commission, and such

contracts shall be valid and binding upon the political subdivision, notwithstanding that no appropriation has been made or provided to cover the cost or estimated cost of the contract.

3. Such political subdivision is hereby authorized and directed to do and perform any and all acts or things necessary, convenient or desirable to carry out and perform every such contract and to provide for the payment of any obligations thereunder in the same manner as other obligations of such political subdivision. Each political subdivision shall pay promptly to the Commission all fees and other charges due the Commission.

ARTICLE IX RELEASE OF STORED WATERS

1. No signatory State shall permit the flow in the Delaware River to be diminished by the diversion of any water from the main channel of the Delaware River during any period in which waters are being released from storage reservoirs constructed under the provisions of this compact for the purpose of maintaining an adequate minimum flow in the Delaware River during the periods of low flow therein, except in cases where such diversion shall have been duly authorized under the provisions of this compact.

2. The Commission shall release water from storage for the purpose of maintaining an adequate minimum flow in the Delaware River during periods of low flow therein in accordance with the following provisions:

(a) Upon and after completion of a storage reservoir on the West Branch of the Delaware River near Cannonsville, New York, sufficient water shall be released from the aforesaid reservoir to maintain a minimum flow in the Delaware River, as measured at the stream gaging station at Port Jervis, New York, of at least 1800 cubic feet per second.

(b) Upon and after completion of storage reservoirs on the West Branch of the Delaware River near Cannonsville, New York, on the main channel of the Delaware River near Barryville, New York, and on the Neversink River near Godeffroy, New York, sufficient water shall be released from the system consisting of the three aforesaid reservoirs to maintain a

minimum flow in the Delaware River, as measured at the stream gaging station at Trenton, New Jersey, of at least 4000 cubic feet per second.

(c) Upon and after completion of storage reservoirs on the West Branch of the Delaware River near Cannonsville, New York, on the main channel of the Delaware River near Barryville, New York, on the Neversink River near Godeffroy, New York, and on the main channel of the Delaware River near Wallpack Bend, sufficient water shall be released from the system consisting of the four aforesaid reservoirs to maintain a minimum flow in the Delaware River, as measured at the stream gaging station at Trenton, New Jersey, of at least 4800 cubic feet per second.

(d) The intent and purpose of the requirements of paragraphs (b) and (c) of this article are to provide for a flow at all times of at least 4000 cubic feet per second, or at least 4800 cubic feet per second, as the case may be, from the non-tidal section of the Delaware River above Trenton into the tidal section of the Delaware River below Trenton. Accordingly, the requirements for the flow of at least 4,000 cubic feet per second, or at least 4800 cubic feet per second, at Trenton may be reduced by the Commission in such a manner as to carry out this intent and purpose in the event the Commission is called upon to utilize a part of the waters which would otherwise flow in the Delaware River at Trenton as a source of water supply for the City of Philadelphia and other political subdivisions and metropolitan areas in the greater Philadelphia-South Jersey area which are situated wholly within the Delaware River Basin.

ARTICLE X HYDROELECTRIC POWER AND ENERGY

In the exercise of its power to develop, or to provide for the development of, hydroelectric power and energy, no water shall be used in addition to the water which would otherwise be developed and used by the Commission for water supply and for water required to be released from storage in order to maintain an adequate minimum flow in the Delaware River during periods of low flow therein. The Commission shall not engage in the transmission and distribution of power and energy except for its own use.

ARTICLE XI FORMULATION AND APPROVAL OF PLANS

1. Upon the request of two or more signatory States, or upon its own initiative, the Commission shall prepare, in appropriate form for submission to the legislatures of the signatory States, a report covering plans for, and the method of financing, any new project, or any expansion of the project authorized and described in paragraph 2 of Article I of this compact, for the construction, operation, and maintenance of such dams, reservoirs, and appurtenant structures within the Delaware River Basin, and such treatment plants, aqueducts, conduits, and other facilities, as may be required to effectuate the purposes of this compact.

2. Prior to the submission of any such report to the legislatures of the signatory States the Commission shall:

(a) Conduct investigations in such manner as to give appropriate consideration and weight to the interrelation of the proposed project with projects and programs of other agencies, public and private, federal, interstate, state, and local, concerning the development, utilization, control and conservation of the water resources of the Delaware River Basin.

(b) Transmit a copy of its tentative draft of a report concerning any proposed project to the following agencies, or their respective successors, for the purpose of affording such agencies an opportunity to submit to the Commission, within ninety days from the date of receipt of such tentative draft, written statements of their views and recommendations regarding any such project: Water Pollution Control Commission of the State of Delaware; Division of Water Policy and Supply of the State of New Jersey; Water Power and Control Commission of the State of New York; Water and Power Resources Board of the Commonwealth of Pennsylvania; and the Interstate Commission on the Delaware River Basin. Representatives of each of the aforesaid agencies may, in order to analyze and appraise any project proposed by the Commission created by this compact, enter upon any lands, structures, and waters within the states in which the Delaware River Basin is located, for the purpose of surveying dam, reservoir, treatment plant, aqueduct, or conduit locations, studying subsurface conditions affecting the selection of such locations, and for such other purposes as may be deemed necessary.

(c) Include in its report, for submission to the legislatures of the signatory States, the statements of views and recommendations, if any, of the aforesaid agencies.

3. The report, prepared after compliance with the procedures hereinbefore provided, shall be submitted by the Commission to the legislatures of the signatory States. The Commission shall have authority to proceed with the project proposed in the said report when such report has been approved by the legislatures of all the signatory States, or by the legislatures of the States of New Jersey and New York and the Commonwealth of Pennsylvania.

4. Prior to proceeding with any construction which is a part of the project authorized and described in paragraph 2 of Article I of this compact, or of any authorized expansion thereof, or of any authorized new project, the Commission shall submit detailed plans and specifications for the construction of any structure, or part thereof, to, and secure the approval of, the appropriate agency or agencies of the State or States within which such construction is necessary as a part of the said project.

ARTICLE XII

GRANTS, LOANS, OR PAYMENTS BY STATES OR POLITICAL SUBDIVISIONS

1. Any or all of the signatory States, or any political subdivisions thereof, may after appropriate legislative authorization for that purpose,

(a) Appropriate to the Commission such funds as may be necessary to pay preliminary expenses such as the expenses incurred in the making of borings and other studies of sub-surface conditions, in the preparation of contracts for the sale of water, and in the preparation of detailed plans and estimates required for the financing of a construction project.

(b) advance to the Commission, either as grants or loans, such funds as may be necessary or convenient to finance the operation and management of, or construction by, the Commission.

(c) make payments to the Commission for benefits received, or to be received, from the operation of any of the structures or facilities of

the Commission.

2. Any funds which may be loaned to the Commission either by a signatory State, or a political subdivision thereof, shall be repaid by the Commission through the issuance of bonds, or out of other income of the Commission, such repayment to be made within such period and upon such terms as may be agreed upon between the Commission and the State or political subdivision making the loan.

ARTICLE XIII FINANCING

1. The Commission shall have power and is hereby authorized, from time to time, to issue its negotiable bonds for any of its authorized purposes, to issue its bonds to refund bonds issued by it, to issue its negotiable notes in anticipation of bonds, and to pay its bonds and notes from revenues of the Commission and the proceeds of its bonds and other moneys of the Commission, as the resolution authorizing the issuance may provide:

(a) Refunding bonds may be issued partially to refund bonds then outstanding and partially for any other of its authorized purposes. Refunding bonds may be issued whenever the Commission deems expedient, whether the bonds to be refunded have or have not matured, and may be exchanged for the bonds to be refunded with such cash adjustments as may be agreed, or may be sold before the bonds to be refunded become due and the proceeds applied to the purchase, redemption or payment of the bonds to be refunded, including interest accrued, and any redemption premiums payable, thereon.

(b) Except as may be otherwise expressly provided by the Commission, every issue of bonds shall be general obligations payable out of any moneys or revenues of the Commission, subject only to any agreements with the holders of any bonds pledging any moneys or revenues.

(c) Whether or not bonds or notes issued by the Commission are of such form and character as to be negotiable instruments, such bonds or notes shall be fully negotiable within the meaning and for all the purposes of the Negotiable Instruments Law, subject only to any provisions of the bonds for registration.

(d) The Commission may issue temporary bonds, with or without coupons,

pending the preparation of definitive bonds, exchangeable for definitive bonds.

(e) Bonds shall be authorized by resolution of the Commission and shall bear such date or dates, mature at such time or times, bear interest at such rate or rates not exceeding five per centum per annum, be in such denominations, be in such form, either coupon or registered, carry such registration privileges, be executed in such manner, be payable in such medium of payment and at such place or places, and be subject to such terms of redemption, as such resolution or resolutions may provide, but in no event shall the redemption price of a bond exceed the par value thereof and a premium of four per centum plus accrued interest. The official seal of the Commission, or a facsimile thereof, shall be impressed, engraved, or otherwise reproduced on each bond or note, and be attested by the Secretary or by such other officer or agent as the Commission shall appoint and authorize. If any officer or authorized agent whose signature, or a facsimile thereof, shall appear on any bonds, coupons, or notes, shall cease to be such officer or authorized agent before the delivery of the bonds or notes, such signature or such facsimile signature shall be valid and sufficient for all purposes the same as if he had continued in office until such delivery. The bonds shall be sold at public sale for a price not less than ninety-six per centum of the par value thereof plus accrued interest, provided that the interest cost to maturity of the money for any issue of such bonds shall not exceed five per centum per annum.

(f) Any resolution of the Commission authorizing the issuance of bonds may appoint a trustee or trustees, a fiscal agent or fiscal agents, a paying agent or paying agents, and such other fiduciaries as such resolution may provide. Any trustee, fiscal agent, paying agent and other fiduciary so appointed may be any trust company or bank having the powers of a trust company within any one of the signatory States.

(g) In order to secure the payment of its bonds the Commission shall have power, in the resolution authorizing the issuance of the bonds (which shall be deemed a contract with the bondholders):

(1) to pledge all or any part of its revenues to which its right then exists or may thereafter come into existence, and the moneys derived therefrom, and the proceeds of bonds;

(2) to covenant against pledging all or any part of its revenues, or

against mortgaging all or any part of its real or personal property then owned or thereafter acquired, or against permitting or suffering any lien on such revenues or property; to covenant with respect to limitations on its right to sell, lease or otherwise dispose of any project or any part thereof, or any property of any kind;

(3) to covenant as to the bonds to be issued and the limitations thereon and the terms and conditions thereof and as to the custody, application and disposition of the proceeds thereof, and to covenant as to the issuance of additional bonds or as to limitations on the issuance of additional bonds and on the incurring of other debts by it;

(4) to provide for the replacement of lost, destroyed or mutilated bonds;

(5) to provide for the investment of all or a part of its funds on deposit with the trustee or other fiduciary in such obligations as the resolution authorizing the issuance of the bonds may provide;

(6) to covenant against extending the time for the payment of bonds or interest thereon; to covenant as to the redemption premiums and other terms and conditions thereof;

(7) to covenant as to the payment of the principal of or interest on the bonds, or any other obligations, as to the sources and methods of such payment, as to the rank or priority of any such bonds or obligations with respect to any lien or security or as to the acceleration of the maturity of any such bonds or obligations;

(8) to covenant as to the rates of fees or other charges to be established and to be charged, and the amount to be raised each year or other period of time by such charges or other revenues and as to the use and disposition to be made thereof; to create or authorize the creation of special funds or moneys to be held in pledge or otherwise for construction, operating expense, payment or redemption of bonds, reserves or other purposes and to covenant as to the use and disposition of the moneys held in such funds;

(9) to establish the procedure, if any, by which the terms of any contract or covenant with or for the benefit of the bondholders may be amended or abrogated, the amount of bonds the holders of which must consent thereto, and the manner in which such consent may be given;

(10) to covenant as to the maintenance of its real and personal property, the replacement thereof, the insurance to be carried thereon,

and the use and disposition of insurance moneys;

(11) to provide for the rights and liabilities, powers and duties arising upon the breach of any covenant, condition or obligation; to prescribe the events of default and the terms and conditions upon which any or all of the bonds shall become or may be declared due and payable before maturity and the terms and conditions upon which any such declaration and its consequences may be waived;

(12) to vest in a trustee or trustees such property, rights, powers and duties in trust for the bondholders, as the Commission may determine, which may include any or all of the rights, powers and duties of the statutory trustee appointed by the holders of bonds pursuant to sub-paragraph (a) of paragraph 2 of this Article; to limit or abrogate the rights of the holders of such bonds to appoint such statutory trustee, or to limit the rights, duties and powers of such statutory trustee;

(13) to limit the rights of the bondholders to enforce any pledge or covenant securing the bonds; and

(14) to make covenants other than and in addition to the covenants herein expressly authorized, of like or different character; and to make such covenants to do or refrain from doing such acts and things as may be necessary or convenient or desirable in order to better secure the bonds or which, in the absolute discretion of the commission, will tend to make the bonds more marketable, notwithstanding that such covenants, acts or things may not be enumerated herein.

(h) Any pledge of revenues or other moneys made by the Commission shall be valid and binding from the time when the pledge is made; the revenues or other moneys so pledged and thereafter received by the Commission shall immediately be subject to the lien of such pledge without any physical delivery thereof or further act, and the lien of any such pledge shall be valid and binding as against all parties having claims of any kind in tort, contract or otherwise against the Commission, irrespective of whether such parties have notice thereof. Neither the resolution nor any other instrument by which a pledge is created need be filed or recorded except in the records of the Commission.

(i) Bonds may be issued under the provisions of this compact without obtaining the consent of any department, division, commission, board,

bureau or agency of any of the signatory States, and without any other proceedings or the happening of any other conditions or things than those proceedings, conditions or things which are specifically required by this compact.

(j) The Commission shall not have power to mortgage real property.

(k) Moneys of the Commission or moneys held in pledge or otherwise for the payment of bonds or in any way to secure bonds and the deposits of such moneys may be secured in such manner as the Commission may require and all banks and trust companies in each of the signatory States are authorized to give such security therefor.

(l) Neither the members of the Commission nor any person executing the bonds shall be liable personally on the bonds or be subject to any personal liability or accountability by reason of the issuance thereof.

(m) The Commission shall have the power to purchase its bonds out of any funds available therefor. The Commission may refund, or it may hold, cancel, or resell, such bonds subject to and in accordance with agreements with bondholders.

2. The following provisions shall be applicable to an issue of bonds authorized or issued by the Commission, only if the resolution of the Commission authorizing or providing for the issuance of such bonds shall provide in substance that the holders of the bonds of such issue shall be entitled to the benefits and be subject to the provisions of this paragraph 2:

(a) In the event that there shall be a default in the payment of principal of or interest on any bonds of such issue after the same shall become due, whether at maturity or upon call for redemption, and such default shall continue for a period of thirty days, or in the event that the Commission shall fail or refuse to comply with the provisions of this compact or shall fail or refuse to carry out and perform the terms of any contract or covenant with or for the benefit of the holders of any such bonds, and such failure or refusal shall continue for a period of thirty days after written notice by any holder of bonds of such issue or by a trustee for bondholders to the Commission of its existence and nature, the holders of twenty-five per centum (25%) in aggregate principal amount of the bonds of such issue then outstanding by instrument or instruments filed in the office of the Secretary of State

of each signatory State and proved or acknowledged in the same manner as a deed to be recorded, may appoint a statutory trustee to represent the holders of the bonds of such issue for the purposes provided in this paragraph 2.

(b) Such statutory trustee may and, upon written request of the holders of twenty-five per centum (25%) in aggregate principal amount of the bonds of such issue then outstanding, shall, in his or its own name:

(1) by civil action or suit, enforce all rights of the holders of such bonds, including the right to require the Commission to charge and collect revenues adequate to carry out any contract as to, or pledge of, such charges and revenues, and to require the Commission to carry out and perform the terms of any contract or covenant with or for the benefit of the holders of such bonds or its duties under this compact;

(2) bring action or suit upon all or any part of such bonds or interest coupons or claims appurtenant thereto;

(3) by action or suit require the Commission to account as if it were the trustee of an express trust for the holders of such bonds;

(4) by action or suit enjoin any acts or things which may be unlawful or in violation of the covenants of the Commission or the rights of the holders of such bonds; or

(5) declare all such bonds due and payable, whether or not in advance of maturity, upon thirty days' prior notice in writing to the Commission and if all defaults shall be made good, then with the consent of the holders of twenty-five per centum (25%) of the principal amount of such bonds then outstanding, annul such declaration and its consequences.

(c) Before declaring the principal of all such bonds due and payable the statutory trustee shall first give thirty days' notice in writing to the Commission.

(d) Any such statutory trustee, whether or not the issue of bonds represented by such trustee has been declared due and payable, shall be entitled as of right to the appointment of a receiver of any part or parts of the property of the Commission the revenues derived from which property are pledged for the security of the bonds of such issue and such receiver may enter and take possession of such part or parts of such property and subject to any pledge or agreement with bondholders shall take possession of all moneys and other property derived from or applicable to the construction, operation, maintenance and

reconstruction of such part or parts of such property and proceed with any construction thereon which the Commission is under obligation to do and to operate, maintain and reconstruct such part or parts of the property and collect and receive all revenues thereafter arising therefrom subject to any pledge thereof or agreement with bondholders relating thereto, and perform the public duties and carry out the agreements and obligations of the Commission under the direction of the court. In any suit, action or proceeding by the statutory trustee the fees, counsel fees and expenses of the said trustee and of the receiver, if any, shall constitute taxable disbursements and all costs and disbursements allowed by the court shall be a first charge on any revenues derived from such property.

(e) Such statutory trustee shall, in addition to the foregoing, have and possess all of the powers necessary or appropriate for the exercise of any function specifically set forth herein or incident to the general representation of bondholders in the enforcement and protection of their rights.

3. Notes issued in anticipation of bonds shall be paid from any moneys of the Commission available therefor and not otherwise pledged or from the proceeds of sale of the bonds of the Commission in anticipation of which they were issued. The notes shall be issued and sold in the same manner as the bonds and such notes and the resolution or resolutions authorizing the same may contain any provisions, conditions or limitations which the bonds or a bond resolution of the Commission may contain. Such note shall be as fully negotiable as the bonds of the Commission.

4. Bonds issued by the Commission under the provisions of this compact are hereby made securities in which any signatory State and all political subdivisions thereof, their officers, boards, commissions, departments or other agencies, all banks, bankers, savings banks, trust companies, savings and loan associations, investment companies and other persons carrying on a banking business, all insurance companies, insurance associations, and other persons carrying on an insurance business, and other fiduciaries, and all other persons whatsoever, except as hereinafter provided, who now are or may hereafter be

authorized to invest in bonds or other obligations of any signatory State, may properly and legally invest any funds, including capital belonging to them or within their control; provided that, notwithstanding the provisions of any other general or special law to the contrary, such bonds shall not be eligible for the investment of funds, including capital, of trusts, estates or guardianships under the control of individual administrators, guardians, executors, trustees and other individual fiduciaries. Said bonds or other securities or obligations are hereby made securities which may properly and legally be deposited with and received by any State or municipal officers or agency of any signatory State for any purpose for which the deposit of bonds or other obligations of such State is now or may hereafter be authorized by law.

5. Each of the signatory States hereby pledges to and agrees with the holders of the bonds and notes issued in accordance with the provisions of this compact, that such State will not limit or restrict the rights hereby vested in the Commission to maintain, construct, reconstruct, and operate any project as defined in this compact or to establish and collect such rents, fees, receipts or other charges as may be convenient or necessary to produce sufficient revenues to meet the expenses of maintenance and operation thereof and to fulfill the terms of any agreements made with the holders of bonds authorized by this compact or in any way impair the rights or remedies of the holders of such bonds until the bonds, together with interest thereon, are fully paid and discharged.

ARTICLE XIV CREDIT OF SIGNATORY STATES NOT PLEDGED

Bonds or notes issued under the provisions of this compact shall not be deemed to constitute a debt or liability of any of the signatory States or of any political subdivision thereof or a pledge of the faith and credit of any of the signatory States or of any such political subdivision. All such bonds or notes shall contain on the face thereof a statement to the effect that none of the signatory States nor any political subdivision thereof is obligated to pay the same or the interest thereon and that neither the faith and credit nor the taxing

power of any signatory State or of any political subdivision thereof is pledged to the payment of the principal of or the interest on such bonds.

ARTICLE XV NONIMPAIRMENT OF STATE POWERS

1. Except as provided in Article XVI of this compact, the signatory States, as of the effective date of this compact, waive, renounce and release any claim, or alleged claim, of or to a prior appropriation of the waters of the Delaware river, and waive, renounce and release any claim or alleged claim, of or to any superior right of appropriation, diversion or use of said waters.

2. Nothing in this compact shall be construed as impairing the powers of any signatory State to develop, improve, utilize, control, or conserve the water resources of the upper Delaware River Basin within the boundaries of such State; provided, however, that the exercise of such powers by said State shall not conflict with the power of the Commission established by this compact with respect to those water resources authorized to be developed, improved, utilized, controlled, or conserved by such Commission.

3. Nothing in this compact shall be deemed to authorize the taking in any of the signatory States of a supply of water from this Commission unless and until all of the laws of the State, in which the proposed taking of such water is located, have been complied with, and the approval of such taking has been secured from the appropriate agency or agencies of said State having jurisdiction over the taking of water supplied.

ARTICLE XVI EXISTING RIGHTS, DEVELOPMENTS AND COMPACTS

1. Nothing in this compact shall be deemed to affect any right of the States of New Jersey, New York, the Commonwealth of Pennsylvania and the City of New York, or any of them, granted or reserved by or pursuant to the decision of the United States Supreme Court in *New Jersey versus New York, et al.*, (283 U.S. 336), or any modification thereof by that Court.

2. Nothing in any existing compact between any two or more of the signatory States shall be impaired or invalidated by any of the provisions of this compact.

ARTICLE XVII
CONSTRUCTION AND SEVERABILITY

The provisions of this compact, or of agreements thereunder, shall be severable and if any phrase, clause, sentence, or provision of this compact or such agreement is declared to be unconstitutional or the applicability thereof to any State, agency, or person is held invalid, the constitutionality of the remainder of this compact or such agreement and the applicability thereof to any other State, agency, person, or circumstance shall not be affected thereby. It is the legislative intent that the provisions of this compact be reasonably and liberally construed.

ARTICLE XVIII
EFFECTIVE DATE

1. This compact shall enter into force and become effective and binding between the States of New Jersey and New York and the Commonwealth of Pennsylvania when (a) it has been adopted and enacted into law by the respective legislatures of the said States and Commonwealth, and (b) it has been signed by the respective Governors of the said States and Commonwealth, after authorization therefor by their respective legislatures, and has been attested by the Secretary of the State of each of said States and Commonwealth and the Seal of each of said States and Commonwealth has been affixed thereto, and (c) the Congress of the United States of America has consented thereto.

2. This compact shall become effective and binding with respect to the State of Delaware, either at the same time it becomes effective and binding between the States of New Jersey and New York and the Commonwealth of Pennsylvania as provided in the first paragraph of this Article or at any time thereafter, when (a) it has been adopted and enacted into law by the legislature of the State of Delaware, and (b) it has been signed by the Governor of the State of Delaware, after

authorization therefor by the legislature thereof, and has been attested by the Secretary of State of the State and the Seal of that State has been affixed thereto.

3. This compact shall be signed, attested, and sealed in five originals, one original to be forwarded to the Governor of each signatory State for filing in accordance with the laws of that State and one original to be deposited in the archives of the Commission upon its establishment.

IN WITNESS WHEREOF, and in evidence of the adoption and enactment into law of this compact by the legislatures of the respective States, the respective Governors of the signatory States do hereby, in accordance with authority conferred by the legislatures of their respective States, sign this compact in five originals, as attested by the respective Secretaries of State of the said States, and have caused the respective Seals of the said States to be hereunto affixed,
this.....day of.....,19....

§ 21-1703. Force and effect of the compact.

Upon its signature by the respective governors on behalf of at least the state of New Jersey and the commonwealth of Pennsylvania and by the Governor on behalf of the state of New York, and upon the attestation thereof by the secretary of state of each of the signatory states and commonwealth and the affixing thereto of the seal of each of the said states and commonwealth, and the aforesaid compact, which may be known and cited as the Delaware basin compact, shall be and become binding and shall have the force and effect of a statute of the state of New York, and the Delaware river basin water commission shall thereupon become vested with all the powers, rights and privileges, and be subject to the duties and obligations, contained in said compact as though the same were specifically authorized and imposed by statute, and the state of New York shall be bound by all of the obligations assumed by it under said compact; and the Governor shall transmit an original signed copy thereof to the Secretary of State of the state of New York for filing in

his office.

§ 21-1705. Consent of the congress.

The Governor is hereby authorized to apply, on behalf of the state of New York, to the congress of the United States for its consent and approval to the aforesaid compact; but, in the absence of such consent and approval, the Delaware river basin water commission shall have all of the powers which the commonwealth of Pennsylvania and the states of New Jersey and New York (and the State of Delaware if and when it becomes a signatory state) may confer upon it without the consent and approval of the congress.

§ 21-1707. Effective date of this act.

The provisions of this act shall become effective immediately upon final enactment; but the Governor shall not enter into the compact herein set forth until the state of New Jersey and the commonwealth of Pennsylvania shall have passed a substantially similar act embodying the said compact between at least the states of New Jersey, New York and the commonwealth of Pennsylvania.

ARTICLE 22
MINING OF URANIUM

Section 22-1010. Purpose.

22-1030. Legislative findings.

22-1050. Definitions.

22-1070. Activities prohibited.

§ 22-1010. Purpose.

The purpose of this article is to prohibit mining of uranium within the state.

§ 22-1030. Legislative findings.

The legislature hereby finds and declares that mining of uranium may pose a significant danger to the public health, safety and welfare and the environment in that:

1. such mining activities may pose a significant threat of contamination and depletion of the state's drinking water supplies, including surface and subsurface waters;
2. mining activity poses the danger of release of airborne radioactive particulates which may endanger the health of residents and the value of livestock and dairy products;
3. no adequate method currently exists for storing wastes created as a result of uranium mining;
4. in the event of abandonment of any such mine site caused by financial insolvency or other reasons, significant cleanup costs may be forced upon state or local governments and may harm their fiscal integrity;
5. abatement of the hazards associated with uranium mining requires technology or administrative techniques not yet extant, proven reliable, or proven economically feasible;
6. the activities associated with uranium mining may detract from scenic qualities, and reduce property values, tourist revenues, and the general quality of life in the affected area.

The legislature therefore finds that particular caution is needed in determining public policy pertaining to the mining of uranium and that the prohibition of this activity is necessary at this time to insure the protection of the public health, safety and welfare.

§ 22-1050. Definitions.

For the purposes of this article the following terms shall have the following meanings:

1. "Mining" means the extraction or removal of minerals from the ground or the breaking of the surface soil in order to facilitate or accomplish the extraction or removal of such minerals for commercial or industrial use; but shall not include excavation or grading when conducted solely in aid of on-site farming or construction.

2. "Person" means any natural person, corporation, association, partnership, receiver, trustee, executor, administrator, guardian, fiduciary or other representative of any kind, and includes any department, agency or instrumentality of the state or any of its governmental subdivisions.

§ 22-1070. Activities prohibited.

No person shall mine for uranium by any method including, but not limited to, drilling, excavation and liquid or chemical extraction. Nothing in this article shall be construed to prohibit or in any way restrict mining for coal, peat, garnet, marble, granite, or any other material which may contain traces of uranium in amounts which are uneconomical to extract or remove for commercial and industrial use.

ARTICLE 23 MINERAL RESOURCES

- Title
1. Definitions
 3. General provisions
 5. Well permits and well spacing in oil and natural gas pools and fields
 7. Voluntary integration and unitization in oil and natural gas pools and fields

9. Compulsory integration and unitization in oil and natural gas pools and fields
11. Leases for production and storage of oil and gas on state lands
13. Underground storage of gas
17. Liquefied natural and petroleum gas
19. Oil, gas and solution mining regulation and reclamation fee
21. Interstate compact to conserve oil and gas
23. Rerefining of used oil
24. New York state oil energy conservation program
27. New York state mined land reclamation law

TITLE 1
DEFINITIONS

Section 23-0101. Definitions.
23-0102. Short title.

§ 23-0101. Definitions.

As used in this article, unless the context otherwise requires:

1. "Buffer zone" means all that area outside and surrounding the underground gas storage reservoir which the department approves as appropriate to protect the integrity of the reservoir, no part of which shall be more than thirty-five hundred linear feet from the boundary thereof.

2. "Cavity" means an open or partially open space left after a salt has been solution mined.

3. "Commissioner" means the commissioner of environmental conservation.

4. "Department" means the department of environmental conservation.

5. "Fund" means the oil and gas fund as established in section eighty-three-a of the state finance law.

6. "Field" means the general area underlaid by one or more pools.

7. "Gas" means all natural, manufactured, mixed, and byproduct gas, and all other hydrocarbons not defined as oil in this section.

8. "Local agency" means any local agency, board, authority, school district, commission or governing body, including any county, city, town, village or other political subdivision of the state.

9. "Metered" means the physical measurement of gas by means acceptable to the department.

10. "Oil" means crude petroleum oil and all other hydrocarbons, regardless of gravity, that are produced at the wellhead in liquid form by ordinary production methods and that are not the result of condensation of gas.

11. "Owner" means the person who has the right to drill into and produce from a pool or a salt deposit and to appropriate the oil, gas or salt he produces either for himself or others, or for himself and others.

12. "Person" means and includes any natural person, corporation, association, partnership, receiver, trustee, executor, administrator, guardian, fiduciary, or other representative of any kind, and includes any department, agency or instrumentality of the state or any of its governmental subdivisions.

13. "Plug and abandon" means the plugging, replugging if necessary, and abandonment of a well bore including the placing of all bridges, plugs, and fluids therein and the restoration and reclamation of the surface in the immediate vicinity to a reasonable condition consistent with the adjacent terrain.

14. "Pool" means an underground reservoir containing a common accumulation of oil or gas or both; each zone of a structure which is completely separated from any other zone in the same structure is a pool.

15. "Producer" means the owner of a well or wells capable of producing oil, gas, or salt; or any salt or hydrocarbon mixture.

16. "Product" means any commodity made from oil or gas and includes refined crude oil, crude tops, topped crude, processed crude, processed crude petroleum, residue from crude petroleum, cracking stock, uncracked fuel oil, fuel oil, treated crude oil, residuum, gas oil, casinghead gasoline, natural-gas gasoline, kerosene, benzine, wash oil, waste oil, blended gasoline, lubricating oil, blends or mixtures of oil with one or more liquid products or by-products derived from oil or gas, and blends or mixtures of two or more liquid products or by-products derived from oil or gas, whether herein enumerated or not.

17. "Reservoir" means any underground reservoir, natural or artificial cavern or geologic dome, sand or stratigraphic trap, whether or not previously occupied by or containing oil or gas.

18. "Salt" means sodium chloride, evaporite or other water soluble minerals, either in solution or as a solid or crystalline material in a pure state or as a mixture.

19. "Solution mining" means the dissolving of an underground salt by water to produce a brine for transport to another underground or surface location for sale, processing or storage.

20. "Waste" means

a. Physical waste, as that term is generally understood in the oil and gas industry;

b. The inefficient, excessive or improper use of, or the unnecessary dissipation of reservoir energy;

c. The locating, spacing, drilling, equipping, operating, or producing of any oil or gas well or wells in a manner which causes or tends to cause reduction in the quantity of oil or gas ultimately recoverable from a pool under prudent and proper operations, or which causes or tends to cause unnecessary or excessive surface loss or destruction of oil or gas;

d. The inefficient storing of oil or gas; and

e. The flaring of gas produced from an oil or condensate well after the department has found that the use of the gas, on terms that are just and reasonable, is, or will be economically feasible within a reasonable time.

§ 23-0102. Short title.

This article shall be known and may be cited as the "oil, gas and solution mining law".

TITLE 3

GENERAL PROVISIONS

Section 23-0301. Declaration of policy.

23-0303. Administration of article.

23-0305. Powers and duties of the commissioner and the department.

23-0309. Severability.

23-0311. New York state oil, gas and solution mining advisory board.

23-0313. Public access to records.

§ 23-0301. Declaration of policy.

It is hereby declared to be in the public interest to regulate the

development, production and utilization of natural resources of oil and gas in this state in such a manner as will prevent waste; to authorize and to provide for the operation and development of oil and gas properties in such a manner that a greater ultimate recovery of oil and gas may be had, and that the correlative rights of all owners and the rights of all persons including landowners and the general public may be fully protected, and to provide in similar fashion for the underground storage of gas, the solution mining of salt and geothermal, stratigraphic and brine disposal wells.

§ 23-0303. Administration of article.

1. Except to the extent that the administration of this article is specifically entrusted to other agencies or officers of the state by its provisions, such administration shall be by the department. Geological services for the department in connection with the administration of this article shall be provided by or in cooperation with the state geologist. Within appropriations therefor the department is authorized to employ such personnel as may be necessary for the administration of this article and may also employ or secure the services of such engineering, technical and other consultants as it may require from time to time.

2. The provisions of this article shall supersede all local laws or ordinances relating to the regulation of the oil, gas and solution mining industries; but shall not supersede local government jurisdiction over local roads or the rights of local governments under the real property tax law.

3. a. The commissioner shall accept from municipalities requests for funds from the oil and gas fund to reimburse the municipality for costs incurred in repairing damages to municipal land or property. Such requests shall include such explanatory material and documentation as the commissioner may require.

b. The commissioner and director of the budget, may recommend payment

to the municipality to satisfy the request for reimbursement upon finding that:

(1) The municipality has made a bona fide effort to seek relief and recover its costs from those deemed to be responsible and any other appropriate avenues, but has been unsuccessful;

(2) The damage was a direct result of activities regulated under this article and that the amount of funds requested is reasonable in view of such damages; and

(3) The costs were incurred after the effective date of this subdivision.

§ 23-0305. Powers and duties of the commissioner and the department.

1. The provisions of this section shall apply only to rules, regulations, orders and hearings made or conducted in the administration of this article.

2. No rule, regulation, order or amendment thereof, except in an emergency, shall be made by the department without a public hearing upon at least ten days' notice, exclusive of the date of service. The public hearing shall be held at such time and place as may be prescribed by the department and any interested person shall be entitled to be heard.

3. When an emergency requiring immediate action is found to exist, the department may make an emergency order without notice or hearing, which shall be effective when made. No emergency order shall be effective for more than fifteen days.

4. Any notice required by this article shall be given by the department by any one or more of the following methods: (a) personal service, (b) publication in one or more issues of a newspaper of general circulation in the county where the land affected or some part thereof is situated, or (c) by registered or certified mail addressed, postage prepaid, to the last known mailing address of the person or persons affected. The date of service shall be the date on which service was made in the case of personal service, the date of first publication in

the case of notice by publication, and the date of mailing in the case of notice by mail. The notice shall specify the style and number of the proceeding, the time and place of the hearing, and shall briefly state the purpose of the proceeding. Should the department elect to give notice by personal service, such service may be made by any officer authorized to serve process, or by any agent of the department in the same manner as is provided by law for the service of process in civil actions in the courts of the state.

5. All rules, regulations and orders made by the department shall be in writing, shall be entered in full and indexed in books to be kept by the department for that purpose, and shall be public records open for inspection at all times during reasonable office hours. A copy of any department rule or regulation shall be received in evidence in all courts of this state with the same effect as the original, if certified by a member or duly authorized employee of the department.

6. The department may act upon its own motion or upon the application of any interested person. On the filing of an application concerning any matter within the jurisdiction of the department, pursuant to this article, the department shall promptly fix a date for a hearing thereon, and shall cause notice of the hearing to be given. The hearings shall be held without undue delay after the filing of the petition. The department shall make its order within sixty days after the conclusion of the hearing.

7. To aid in the administration of this article, the commissioner may issue subpoenas in his name requiring the attendance and giving of testimony by witnesses and the production of books, papers and other documentary evidence for any hearing, proceeding or investigation conducted or to be conducted by or before the department. Service of such a subpoena, enforcement of obedience thereto, and punishment for disobedience thereof shall be had as and in the manner provided by the Civil Practice Law and Rules relating to enforcement of a subpoena issued by a board or committee except that in the case of hearings, proceedings or investigations before or conducted by the department neither the holder of a permit or lease issued pursuant to this article,

nor an employee of such permit holder or lessee, nor an officer or stockholder in a permittee or lessee corporation, when required to attend as a witness, shall be entitled to any subpoena fee or mileage. Any member of the department or any person who may be designated by the department to hold hearings may administer oaths to witnesses. The department also may provide for the taking of depositions of witnesses for the purpose of any such hearing. In such case such officer, employee or other person may administer oaths to the witnesses whose depositions are to be taken. Each deposition shall be reduced to writing and subscribed by the deponent. The provisions of this subdivision shall apply only to the administration of this article.

8. With respect to oil pools or fields and natural gas pools or fields, the department shall have power to:

a. Make such investigations as it deems proper to determine whether waste exists or is imminent.

b. Require identification of ownership of producing leases, tanks, plants, structures and facilities for the transportation and refining of oil and gas.

c. Classify and reclassify pools as oil or gas pools, or wells as oil or gas wells, including the delineation of boundaries for purposes material to the interpretation or administration of this article.

d. Require the drilling, casing, operation, plugging and replugging of wells and reclamation of surrounding land in accordance with rules and regulations of the department in such manner as to prevent or remedy the following, including but not limited to: the escape of oil, gas, brine or water out of one stratum into another; the intrusion of water into oil or gas strata other than during enhanced recovery operations; the pollution of fresh water supplies by oil, gas, salt water or other contaminants; and blowouts, cavings, seepages and fires.

e. Enter, take temporary possession of, plug or replug any abandoned well as provided in the rules and regulations, whenever any owner or

operator neglects or refuses to comply with such rules and regulations. Such plugging or replugging by the department shall be at the expense of the owner or operator whose duty it may be to plug the well and who shall hold harmless the state of New York for all accounts, damages, costs and judgments arising from the plugging or replugging of the well and the surface restoration of the affected land. Primary liability for the expense of such plugging or replugging and first recourse for the recovery thereof shall be to the operator unless a contract for the production, development, exploration or other working of the well, to which the lessor or other grantor of the oil and gas rights is a party, shall place such liability on the owner or on the owner of another interest in the land on which the well is situated. When an operator violates any provision of this article, any rule or regulation promulgated thereunder, or any order issued pursuant thereto in reference to plugging or replugging an abandoned well, the operator may not transfer the operator's responsibility therefor by surrendering the lease. Prior to the commencement of drilling of any well, the operator shall be required to furnish to the department, and continuously maintain, a bond acceptable to it conditioned upon the performance of said operator's plugging responsibilities with respect to said well. Upon the approval of the department, in lieu of such bond, the operator may deposit cash or negotiable bonds of the United States Government of like amount in an escrow account conditioned upon the performance of said operator's plugging responsibilities with respect to said well. Any interest accruing as a result of the aforementioned escrow deposit shall be the exclusive property of the operator. The aforementioned bonding requirements shall remain the obligation of the original operator regardless of changes in operators unless a subsequent operator has furnished the appropriate bond or substitute as herein provided acceptable to the department and approval for the transfer of the well plugging responsibilities to the subsequent operator has been granted by the department. The failure of any operator to maintain a bond or other financial security as prescribed herein shall be deemed a breach of plugging responsibilities and entitle the department to claim the proceeds of the bond or other financial security. The cost of plugging or replugging any well, where such action is necessary or incident to the commencing or carrying on of storage operations pursuant to section

23-1103 or 23-1301 shall be borne by the operator of the storage facility.

f. Require that every person who produces, sells, purchases, acquires, stores or injects oil or gas and associated fluids and every person who transports oil or gas in this state shall keep and maintain complete and accurate records of the quantities thereof. Quantities of associated fluids injected or produced may be reported as estimated volumes. True copies or duplicates shall be kept or made available for examination within this state by the department or its agents at all reasonable times and every such person shall file with the department such reports concerning production, sales, purchases, acquisitions, injection, transportation or storage on a form provided by the department or approved by the department prior to submittal.

g. In addition to the powers provided for in titles 1, 3, 5 and 13 of article 71, order an immediate suspension of drilling or production operations whenever such operations are being carried on in violation of this article or any rule or regulation promulgated thereunder or order issued pursuant thereto. Any order issued pursuant to this paragraph may be reviewed upon application of an aggrieved party by means of an order to show cause which order shall be issued by any justice of the supreme court in the judicial district in which any order applies and shall be returnable on the third succeeding business day following the issuance of such order. Service of such show cause order shall be made upon the regional office of the department for the region in which such order applies, and upon the attorney general by delivery of such order to an assistant attorney general at an office of the attorney general in the county in which venue of the proceeding is designated, or if there is no office of the attorney general within such county, at the office of the attorney general nearest such county. Except as hereinabove specified, the proceeding to review an order under this paragraph shall be governed by article seventy-eight of the civil practice law and rules.

h. Require the immediate reporting of any non-routine incident including but not limited to casing and drill pipe failures, casing cement failures, fishing jobs, fires, seepages, blowouts and other

incidents during drilling, completion, producing, plugging or replugging operations that may affect the health, safety, welfare or property of any person. The department may require the operator, or any agent thereof, to record any data which the department believes may be of subsequent use for adequate evaluation of a non-routine incident.

i. Require the taking and making of well logs, well samples, directional surveys and reports on well locations and elevations, drilling and production, and further require their filing pursuant to the provisions of this article. Upon the request of the state geologist, the department shall cause such duplicate samples or copies of records and reports as may be required pursuant to this article to be furnished to him.

j. Give notice to persons engaged in underground mining operations of the commencement of any phase of oil or gas well operations which may affect the safety of such underground mining operations or of the mining properties involved. Rules and regulations promulgated under this article shall specify the distance from underground mining operations within which such notice shall be given and shall contain such other provisions as in the judgment of the department shall be necessary in the interest of safety. The department shall not be required to furnish any notice required by this paragraph unless the person or persons engaged in underground mining operations or having rights in mining properties have notified the department of the existence and location of such underground mining operations or properties.

k. (1) Except as to production of gas from lands under the waters of Lake Erie, in order to satisfy the financial security requirements contained in paragraph e of this subdivision for wells less than six thousand feet in depth for which the department either shall have issued or shall issue permits to drill such wells or, on or after June fifth, nineteen hundred seventy-three, shall have issued acknowledgements of notices of intention to drill such wells, without any way affecting any obligations to plug such wells, the operator shall provide a bond or other financial security acceptable to the department in the following amount:

(i) for wells less than two thousand five hundred feet in depth:

(a) twenty-five hundred dollars per well, provided that the operator shall not be required to provide financial security under this item exceeding twenty-five thousand dollars for up to twenty-five wells;

(b) for twenty-six to fifty wells, twenty-five thousand dollars, plus twenty-five hundred dollars per well in excess of twenty-five wells, provided that the operator shall not be required to provide financial security under this item exceeding forty thousand dollars;

(c) for fifty-one to one hundred wells, forty thousand dollars, plus twenty-five hundred dollars per well in excess of fifty wells, provided that the operator shall not be required to provide financial security under this item exceeding seventy thousand dollars;

(d) for over one hundred wells, seventy thousand dollars, plus twenty-five hundred dollars per well in excess of one hundred wells, provided that the operator shall not be required to provide financial security under this item exceeding one hundred thousand dollars.

(ii) for wells between two thousand five hundred feet and six thousand feet in depth:

(a) five thousand dollars per well, provided that the operator shall not be required to provide financial security under this item exceeding forty thousand dollars for up to twenty-five wells;

(b) for twenty-six to fifty wells, forty thousand dollars, plus five thousand dollars per well in excess of twenty-five wells, provided that the operator shall not be required to provide financial security under this item exceeding sixty thousand dollars;

(c) for fifty-one to one hundred wells, sixty thousand dollars, plus five thousand dollars per well in excess of fifty wells, provided that the operator shall not be required to provide financial security under this item exceeding one hundred thousand dollars;

(d) for over one hundred wells, one hundred thousand dollars, plus five thousand dollars per well in excess of one hundred wells, provided that the operator shall not be required to provide financial security under this item exceeding one hundred fifty thousand dollars.

(2) In the event that an operator shall have wells described in clauses (i) and (ii) of subparagraph (1) of this paragraph, in lieu of providing financial security under the provisions of each such clause, such operator may file financial security as if all such wells were

between two thousand five hundred feet and six thousand feet in depth.

(3) For wells greater than six thousand feet in depth, the operator may be required to provide additional financial security consistent with criteria contained in rules and regulations to be adopted to implement this subparagraph.

8-a. The department shall include consideration of future physical climate risk due to sea level rise, and/or storm surges and/or flooding, based on available data predicting the likelihood of extreme weather events, including hazard risk analysis data if applicable, to permits issued pursuant to title five of this article.

9. With respect to solution mining areas the department shall have the power to:

a. Require identification of ownership of producing leases and solution mining equipment such as structures, tanks, gathering systems and facilities for the transportation of salt brine.

b. Require the drilling, casing, operation and plugging of wells in accordance with rules and regulations of the department in such a manner as to prevent the loss or escape of oil or gas reserves to the surface or to other strata; the intrusion of brine or water into commercial oil or gas reserves; the pollution of fresh water supplies by oil, gas or salt water, and to facilitate the efficient use of ground and surface waters in solution mining.

c. Give notice to persons engaging in underground mining operations of the commencing of any phase of solution mining well operations which may affect the safety of such underground mining operations or of the mining properties involved. Rules and regulations of the department adopted pursuant hereto shall specify the distance from such underground mining operations within which such notice shall be given and shall contain such other provisions as in the judgment of the department shall be necessary in the interest of safety. The department shall not be required to furnish any notice pursuant hereto unless the person or persons engaged in underground mining operations or having rights in

mining properties have notified the department of the existence and location of such underground mining operations or properties.

d. Require metering or other measuring of brine produced by solution mining, and the maintenance of the records from each cavity or group of interconnected cavities until the wells in a cavity have been plugged and abandoned. These records shall be given to the department on request.

e. Enter, take temporary possession of, plug or replug any abandoned well as provided in the rules and regulations, whenever any operator neglects or refuses to comply with such rules and regulations. Such plugging or replugging by the department shall be at the expense of the owner or operator whose duty it shall be to plug the well and who shall hold harmless the state of New York for all accounts, damages, costs and judgments arising for the plugging or replugging of the well and the surface restoration of the affected land. Primary liability for the expense of such plugging or replugging and first recourse for the recovery thereof shall be to the operator unless a contract for the production, development, exploration or other working of the well, to which the lessor or other grantor of the solution salt rights is a party, shall place such liability on the owner or on the owner of another interest in the land on which the well is situated. When an operator violates any provision of this article, any rule or regulation promulgated thereunder, or any order issued pursuant thereto in reference to plugging or replugging an abandoned well, the operator may not transfer the operator's responsibility therefor by surrendering the lease. Prior to the commencement of drilling of any well to which this subdivision applies, the operator shall be required to furnish to the department, and continuously maintain, a bond acceptable to it conditioned upon the performance of said operator's plugging responsibilities with respect to said well. Upon the approval of the department, in lieu of such bond, the operator may deposit cash or negotiable bonds of the United States Government of like amount in an escrow account conditioned upon the performance of said operator's plugging responsibilities with respect to said well. Any interest accruing as a result of aforementioned escrow deposit shall be the

exclusive property of the operator. The aforementioned bonding requirements shall remain the obligation of the original operator regardless of changes in operators unless a subsequent operator has furnished the appropriate bond or substitute as herein provided acceptable to the department and approval for the transfer of the well plugging responsibility to the subsequent operator has been granted by the department. The failure of any operator to maintain a bond or other financial security as prescribed herein shall be deemed a breach of plugging responsibilities and entitle the department to claim the proceeds of the bond or other financial security. Any order issued pursuant to this paragraph may be reviewed upon application of an aggrieved party by means of an order to show cause which order shall be issued by any justice of the supreme court in the judicial district in which any such order applies and shall be returnable on the third succeeding business day following the issuance of such order. Service of such show cause order shall be made upon the regional office of the department for the region in which such order applies, and upon the attorney general by delivery of such order to an assistant attorney general at an office of the attorney general in the county in which venue of the proceeding is designated, or if there is no office of the attorney general within such county, at the office of the attorney general nearest such county. Except as hereinabove specified, the proceeding to review an order under this paragraph shall be governed by article seventy-eight of the civil practice law and rules.

f. (1) In order to satisfy the financial security requirements contained in paragraph e of this subdivision for all wells for which the department either shall have issued or shall issue permits to drill such wells or, on or after June fifth, nineteen hundred seventy-three, shall have issued acknowledgements of notices of intention to drill such wells, without in any way affecting any obligation to plug such wells, the operator shall provide a bond or other financial security acceptable to the department in the following amount:

(i) for wells less than two thousand five hundred feet in depth:

(a) twenty-five hundred dollars per well, provided that the operator shall not be required to provide financial security under this item exceeding twenty-five thousand dollars for up to twenty-five wells;

(b) for twenty-six to fifty wells, twenty-five thousand dollars, plus twenty-five hundred dollars per well in excess of twenty-five wells, provided that the operator shall not be required to provide financial security under this item exceeding forty thousand dollars;

(c) for fifty-one to one hundred wells, forty thousand dollars, plus twenty-five hundred dollars per well in excess of fifty wells, provided that the operator shall not be required to provide financial security under this item exceeding seventy thousand dollars;

(d) for over one hundred wells, seventy thousand dollars, plus twenty-five hundred dollars per well in excess of one hundred wells, provided that the operator shall not be required to provide financial security under this item exceeding one hundred thousand dollars.

(ii) for wells between two thousand five hundred feet and six thousand feet in depth:

(a) five thousand dollars per well provided that the operator shall not be required to provide financial security under this item exceeding forty thousand dollars for up to twenty-five wells;

(b) for twenty-six to fifty wells, forty thousand dollars, plus five thousand dollars per well in excess of twenty-five wells, provided that the operator shall not be required to provide financial security under this item exceeding sixty thousand dollars;

(c) for fifty-one to one hundred wells, sixty thousand dollars, plus five thousand dollars per well in excess of fifty wells, provided that the operator shall not be required to provide financial security under this item exceeding one hundred fifty thousand dollars;

(d) for over one hundred wells, one hundred thousand dollars, plus five thousand dollars per well in excess of one hundred wells, provided that the operator shall not be required to provide financial security under this item exceeding one hundred fifty thousand dollars.

(2) In the event that an operator shall have wells described in clauses (i) and (ii) of subparagraph (1) of this paragraph, in lieu of providing financial security under the provisions of each such clause, such operator may file financial security as if all such wells were between two thousand five hundred feet and six thousand feet in depth.

(3) For wells greater than six thousand feet in depth, the operator may be required to provide additional financial security consistent with criteria contained in rules and regulation to be adopted to implement

this subparagraph.

10. In the case of any well legally plugged pursuant to subdivision nine hereof, the responsibility for the cost of replugging or reinforcing the plugging of any well, whenever such replugging or reinforcing is made necessary by reason of the commencement or expansion of storage operations, shall be borne by the operator of the storage facility.

11. The department may use any of its powers for the purpose of cooperating with any other state or jurisdiction in regulating or otherwise affecting the development or production of oil, gas or salt at any location where such development or production may have a physical effect on development or production in such other state or jurisdiction.

12. With respect to the production of gas from lands under the waters of Lake Erie:

a. This state shall indemnify all municipalities adjacent to Lake Erie within the state of New York for expenses of restoration of fresh water supplies, cleanup of beaches, piers and similar facilities, and for liability claims arising from any discharge or spill occasioned by exploration, drilling or production of operations.

b. If any oil or other hazardous substance is discharged in the course of drilling for or piping natural gas so as to pollute the waters or endanger other natural resources of the state, the department shall immediately act to remove or arrange for the removal of such substance and to terminate or arrange for the termination of such discharge, unless the department determines that such removal or termination will be done properly and expeditiously by the lessee, owner or operator of the drilling or piping operation.

c. Whenever the department acts to remove or arrange for the removal of any substance, or terminates or arranges for the termination of any discharge, the department may draw upon moneys that may be set aside for the department for such purposes from the governmental emergency fund,

under such terms and conditions as the governor and the legislature have established for use of such moneys.

d. No action taken by any person to contain or remove a discharge shall be construed as an admission of liability for said discharge. Provided that any person who undertakes removal or cleanup operations shall, at the request of the department or an appropriate federal agency, coordinate his actions with ongoing state or federal operations. No person who renders assistance in containing or removing a discharge shall be liable for any civil damages to third parties resulting solely from acts or omissions in rendering such assistance except for acts or omissions of gross negligence or willful misconduct. In the course of cleanup operations, no person shall discharge any detergent into the waters of this state without prior authorization of the commissioner.

13. Every person granted a permit to drill pursuant to this section shall give notice by certified mail to any local government affected of the location of the drilling site prior to the commencement of drilling operations. Such prior notice shall also be given by certified mail to any landowner whose surface rights will be affected by drilling operations.

14. With respect to wells drilled deeper than five hundred feet below the earth's surface for the purpose of conducting stratigraphic tests, for finding or producing hot water or steam, for injecting fluids to recover heat from the surrounding geologic materials, which shall not include closed-loop boreholes installed for the purpose of facilitating a geothermal heating or cooling system, or for the disposal of brines, the department shall have the power to:

a. Require all exploration, drilling and development operations to be conducted in accordance with standards promulgated by the department in rules and regulations.

b. Conduct investigations to determine the extent of compliance with this section and all rules, regulations and orders issued pursuant thereto.

c. Classify a well as one subject to this section and require its identification as a geothermal, stratigraphic or brine disposal well.

d. Require the drilling, casing, operation, plugging and replugging of wells subject to this section and reclamation of surrounding land in accordance with rules and regulations of the department.

e. Enter, take temporary possession of, plug or replug any abandoned well subject to this section as provided in the rules and regulations, whenever the well's owner or operator neglects or refuses to comply with such rules and regulations. Such plugging or replugging by the department shall be at the expense of the owner or operator whose duty it shall be to plug the well and who shall hold harmless the state of New York for all accounts, damages, costs and judgments arising from the plugging or replugging of the well and the surface restoration of the affected land.

f. Require that the operator furnish to the department, and continuously maintain, a bond or other financial security conditioned upon the satisfactory performance of the operator's plugging responsibilities with respect to said well. The failure of any operator to maintain a bond or other financial security as prescribed herein shall be deemed a breach of plugging responsibilities and entitle the department to claim the proceeds of the bond or other financial security. Such bond or other financial security shall be for an amount as determined pursuant to the provisions of paragraph k of subdivision eight of this section.

g. In addition to the powers provided for in titles one, three, five and thirteen of article seventy-one of this chapter, order an immediate suspension of operations carried on in violation of the oil, gas and solution mining law or any rule or regulation promulgated thereunder or order issued pursuant thereto.

h. Require the immediate reporting of any non-routine incident, including but not limited to casing and drill pipe failures, casing

cement failures, fishing jobs, fires, seepages, blowouts and other incidents during drilling, completion, producing, plugging or replugging operations that may affect the health, safety, welfare or property of any person or which may be injurious to plants or animals. The department may require the operator or any agent thereof to record and provide any data which the department believes may be of use for adequate evaluation of a non-routine incident.

i. Require the taking and making of logs, samples, directional surveys and reports on locations, elevations, drilling and production, and further require filing of such information pursuant to the provisions of the oil, gas and solution mining law. Upon the request of the state geologist, the department shall cause such samples or copies of records and reports to be furnished to the state geologist.

j. Give notice to persons engaged in underground mining operations of the commencement of any phase of geothermal, stratigraphic and brine disposal well operations which may affect the safety of such underground mining operations or of the mining properties involved. The department shall not be required to furnish any notice required by this paragraph unless the person or persons engaged in underground mining operations or having rights in mining properties have notified the department of the existence and location of such underground mining operations or properties.

15. The department is authorized to regulate for the purposes of protecting natural resources and the environment or public health and safety, closed-loop boreholes deeper than five hundred feet below the earth's surface installed for the purpose of facilitating a geothermal heating or cooling system and no later than December thirty-first, two thousand twenty-four shall promulgate regulations relating to such boreholes, and may update such regulations from time to time. When regulating such closed-loop boreholes, the department shall consider relevant prevailing industry standards.

§ 23-0309. Severability.

The provisions of this article shall be severable and if any phrase, clause, sentence or provision of this article, or the applicability thereof to any person or circumstance shall be held invalid, the remainder of this article and the application thereof shall not be affected thereby.

§ 23-0311. New York state oil, gas and solution mining advisory board.

1. A thirteen member New York state oil, gas and solution mining advisory board shall be created within the department to advise and assist the commissioner and other state agencies on activities and policies related to the development, operation and regulation of the oil, gas and solution mining industry. The members shall be appointed by the governor, with a majority representative of the respective industries. Three of the members shall be appointed upon recommendation of the majority leader of the senate and three of the members shall be appointed upon recommendation of the speaker of the assembly. Appointments shall be made for three-year terms. Members shall continue in office until their successors have been appointed and qualified. The governor shall select a chair from among the members. The board shall meet at least twice yearly and the members shall receive reimbursement for expenses. The department shall provide the board with secretarial services.

2. The chair of the public service commission, the president of the New York state energy research and development authority, the state geologist, and the commissioner shall serve the board in an ex-officio capacity.

3. The commissioner shall seek the views of the board on matters within their scope of concern and shall specifically request the board's participation at an early developmental stage of any new rules, regulations and policies being contemplated or developed. In addition to such other duties as the commissioner may suggest or the board on its own volition may choose to undertake, the board shall:

a. Review and comment on the criteria to be used by the department in selecting abandoned wells for plugging or replugging.

b. Review and comment on proposed rules and regulations and department activities affecting the industry.

c. Recommend to the governor, the commissioner, and other state agencies program directions or modifications related to the development, operation, and regulation of the oil, gas, and solution mining industry.

§ 23-0313. Public access to records.

1. a. Any records or reports or portions thereof pertaining to the production, sale, purchase, acquisition, storage or injection of oil and gas and associated fluids and any records or reports or portions thereof pertaining to the transportation of oil and gas, and any information obtained therefrom, shall be for the confidential use of the department and other departments, agencies and officers of the state for a period of six months following the period to which such records or reports apply, unless the person furnishing the records or reports expressly agrees to their earlier publication or availability to the general public, except as provided in subdivision five of section five hundred ninety-five of the real property tax law. Notwithstanding any law to the contrary, such records shall not be excepted from disclosure to the public after expiration of such six-month period. Nothing in this subdivision shall be construed to prevent the use of such records, reports or information obtained therefrom by any department, agency or officer of the state government in compiling or publishing analyses or summaries relating to the general condition of the industry, the economy or the condition of the natural resources of this state, provided that such analyses or summaries do not involve the publication of records, reports or information relating to a single firm or business enterprise.

b. Notwithstanding any law to the contrary, records or portions thereof pertaining to metering or other measuring of brine produced by

solution mining and to each solution mining cavity or group of interconnected solution mining cavities shall not be released by the department for publication nor be available to the general public without consent of the producer.

c. Notwithstanding any law to the contrary, applications for permits, records or portions thereof which pertain to the total depth and plugging records of wells subject to the oil, gas and solution mining law shall not be excepted from disclosure to the public.

d. Well logs, well samples, directional surveys and reports on well drilling and completion, for all wells subject to the oil, gas and solution mining law, shall be for the confidential use of the department and other departments, agencies and offices of the state government until six months after the commencement of actual drilling operations.

(1) The department may extend the six-month period for an additional six months for a well where drilling operations have been continuous throughout that period. A written request for the extension by the person furnishing the records will not be considered unless it is submitted to the department no more than thirty days before the expiration of the first six-month period. The department shall act upon the request within fifteen days after receipt of the written notification.

(2) The records subject to this paragraph may be excepted from disclosure after the applicable six-month period pursuant to the provisions of subdivision two of section eighty-seven of the public officers law provided, however, that such records cannot be excepted from disclosure for longer than two years after the commencement of the applicable six-month period. A written request for the exception by the person furnishing the records will not be considered unless it is submitted to the department at least thirty days before the expiration date of the applicable six-month period. The request for the exception from disclosure must be sent by certified mail, return receipt requested, and addressed to the New York State Department of Environmental Conservation, Division of Mineral Resources, Records Custodian, Albany, New York. Any person may make a request to the department for disclosure of records pursuant to this subparagraph in

accordance with article six of the public officers law.

2. The records which the department has excepted from disclosure pursuant to article six of the public officers law on or before the effective date of this section shall continue to be excepted from disclosure for one year after the effective date of this section or two years from the commencement of actual drilling operations, whichever is later. The person furnishing the records may authorize the release of these records at any time before the expiration of the applicable periods. Any person may make a request to the department for disclosure of records pursuant to this subdivision in accordance with article six of the public officers law.

TITLE 5

WELL PERMITS AND WELL SPACING IN OIL AND NATURAL GAS POOLS AND FIELDS

Section 23-0501. Well permits.

23-0503. Well spacing in oil and natural gas pools and fields.

§ 23-0501. Well permits.

1. a. This section shall not apply to (1) wells drilled, deepened, plugged back or converted in oil fields or pools which were discovered, developed and operated prior to January first, nineteen hundred eighty-one, and (2) wells drilled, deepened, plugged back or converted in natural gas fields or pools which were discovered, developed and operated prior to January first, nineteen hundred ninety-five and which are not being extended.

b. As used in titles five, seven and nine of this article, unless the context otherwise requires:

(1) "Statewide spacing" means spacing units for gas or oil wells that are within ten percent of the following sizes, as applicable, unless another percentage is specifically stated:

(i) For Medina gas pools at any depth, 40 acres with the wellbore within the target formation no less than 460 feet from any unit

boundary, plus, if applicable, the number of additional acres necessary and sufficient to ensure that any horizontal wellbore within the target formation is not less than 460 feet from any unit boundary;

(ii) For Onondaga reef or Oriskany gas pools at any depth, 160 acres with the wellbore within the target formation no less than 660 feet from any unit boundary, plus, if applicable, the number of additional acres necessary and sufficient to ensure that any horizontal wellbore within the target formation is not less than 660 feet from any unit boundary;

(iii) For fault-bounded Trenton and/or Black River hydrothermal dolomite gas pools where the majority of the pool is between 4,000 and 8,000 feet deep, 320 acres with the proposed productive section of the wellbore within the target formation no less than one-half mile from any other well in another unit in the same pool and no less than 1,000 feet from any unit boundary that is not defined by a field-bounding fault but in no event less than 660 feet from any unit boundary;

(iv) For fault-bounded Trenton and/or Black River hydrothermal dolomite gas pools where the majority of the pool is below 8,000 feet, within five percent of 640 acres with the proposed productive section of the wellbore within the target formation no less than one mile from any other well in another unit in the same pool and no less than 1,500 feet from any unit boundary that is not defined by a field-bounding fault but in no event less than 660 feet from any unit boundary;

(v) For shale gas pools at any depth, for a vertical well outside any existing spacing unit for the same formation, 40 acres with the wellbore within the target formation no less than 460 feet from any unit boundary;

(vi) For shale gas pools at any depth, for a horizontal well outside any existing spacing unit for the same formation and with a written commitment from the well operator to drill infill wells pursuant to subdivision 4 of section 23-0503 of this title, with all horizontal infill wells in the unit to be drilled from a common well pad within three years of the date the first well in the unit commences drilling, notwithstanding the ten percent tolerance specified in this subparagraph, up to 640 acres with the initial horizontal wellbore or wellbores within the target formation approximately centered in the spacing unit and no wellbore in the target formation less than 330 feet from any unit boundary;

(vii) For shale gas pools at any depth, for a horizontal well outside any existing spacing unit for the same formation and in the absence of a written commitment from the well operator to drill infill wells pursuant to subdivision 4 of section 23-0503 of this title, 40 acres with the wellbore within the target formation no less than 330 feet from any unit boundary plus the number of additional acres necessary and sufficient to ensure that the wellbore within the target formation is not less than 330 feet from any unit boundary;

(viii) For all other gas pools where the majority of the pool is above the depth of 4,000 feet, 80 acres with the wellbore within the target formation no less than 460 feet from any unit boundary, plus, if applicable, the number of additional acres necessary and sufficient to ensure that any horizontal wellbore within the target formation is not less than 460 feet from any unit boundary;

(ix) For all other gas pools where the majority of the pool is 4,000 to 6,000 feet deep, 160 acres with the wellbore within the target formation no less than 660 feet from any unit boundary, plus, if applicable, the number of additional acres necessary and sufficient to ensure that any horizontal wellbore within the target formation is not less than 660 feet from any unit boundary;

(x) For all other gas pools where the majority of the pool is 6,000 to 8,000 feet deep, 320 acres with the wellbore within the target formation no less than 1,000 feet from any unit boundary, plus, if applicable, the number of additional acres necessary and sufficient to ensure that any horizontal wellbore within the target formation is not less than 1,000 feet from any unit boundary;

(xi) For all other gas pools where the majority of the pool is below 8,000 feet, within five percent of 640 acres with the wellbore within the target formation no less than 1,500 feet from any unit boundary, plus, if applicable, the number of additional acres necessary and sufficient to ensure that any horizontal wellbore within the target formation is not less than 1,500 feet from any unit boundary;

(xii) For oil pools in the Bass Island, Trenton, Black River, Onondaga reef or other oil-bearing reefs at any depth, 40 acres with the wellbore within the target formation no less than 460 feet from any unit boundary, plus, if applicable, the number of additional acres necessary and sufficient to ensure that any horizontal wellbore within the target

formation is not less than 460 feet from any unit boundary; and

(xiii) For all other oil pools at any depth, the wellbore within the target formation shall be no less than 165 feet from any lease boundary.

Wells completed under a well permit issued pursuant to clause (xii) or (xiii) of this subparagraph that do not produce oil may not commence production of natural gas prior to modification of the spacing unit pursuant to applicable provisions of this title.

(2) "Well operator" means the applicant for a permit to drill, deepen, plug back or convert a well subject to this title and titles 7 and 9 of this article, or the actual operator of the well if the well is not operated by the original applicant.

(3) "Permit" or "well permit" means a permit to drill, deepen, plug back or convert a well for production of oil or gas.

2. Every person who applies for a permit to drill an oil or gas well or deepen or plug back a well to a different pool after the effective date of this section, notwithstanding prior orders, shall control through fee ownership, voluntary agreement, or integration pursuant to section 23-0701 or 23-0901 of this article no less than sixty percent of the acreage within the proposed spacing unit for such well and shall provide the department with:

a. A map in a format specified by the department depicting the proposed spacing unit for the well, the surface and bottom hole locations of the well, the location of the wellbore in the target formation, the location of any field-bounding faults within the proposed spacing unit, the acreage of the proposed spacing unit, and the boundaries of each tract wholly or partially within the proposed spacing unit as may be evidenced by tax identification numbers; and

b. A demonstration that the applicant controls the oil or gas rights, as applicable, in the target formation to be penetrated by the wellbore, provided that, if the applicant does not control such oil or gas rights, the department shall issue a permit that is conditional upon the applicant completing the integration process required by section 23-0901 of this article before the applicant can exercise the right to drill,

deepen, plug back or convert under the permit.

3. (a) No permits shall be issued authorizing an applicant to drill, deepen, plug back, or convert wells that use high-volume hydraulic fracturing or carbon dioxide to complete or recomplete natural gas or oil resources. For purposes of this section, high-volume hydraulic fracturing shall be defined as the stimulation of a well using three hundred thousand or more gallons of water as the base fluid for hydraulic fracturing for all stages in a well completion, regardless of whether the well is vertical or directional, including horizontal.

(b) There shall be a moratorium on the department taking actions on applications filed after the effective date of the chapter of the laws of 2020 which added this subdivision to drill, deepen, plug back, or convert wells that use gelled propane hydraulic fracturing to complete or recomplete natural gas or oil resources until the department completes an analysis of the potential impacts of gelled propane fracturing and makes the analysis publicly available. The scope of the department's analysis shall reflect the potential for development of oil and gas wells using gelled propane hydraulic fracturing and shall disclose the potential adverse impacts to the environment. For purposes of this section, gelled propane hydraulic fracturing shall be defined as the stimulation of a well using gelled propane or liquefied petroleum gas as the base fluid for hydraulic fracturing for all stages in a well completion, regardless of whether the well is vertical or directional, including horizontal.

4. In furtherance of the policy objectives of this article, the department shall take all actions required by it under this title and titles 7 and 9 of this article as expeditiously as possible.

§ 23-0503. Well spacing in oil and natural gas pools and fields.

1. Spacing orders are not required for wells drilled, deepened, plugged back or converted in oil fields or pools which were discovered, developed and operated prior to January first, nineteen hundred eighty-one. Spacing orders are not required for wells drilled, deepened,

plugged back or converted in natural gas fields or pools, which were discovered, developed and operated prior to January first, nineteen hundred ninety-five and which are not being extended.

2. The department shall issue a permit to drill, deepen, plug back or convert a well, if the proposed spacing unit submitted to the department pursuant to paragraph a of subdivision 2 of section 23-0501 of this title conforms to statewide spacing and is of approximately uniform shape with other spacing units within the same field or pool, and abuts other spacing units in the same pool, unless sufficient distance remains between units for another unit to be developed. Prior to issuing any such permit, the department shall publish a notice of intent to issue a well permit in the environmental notice bulletin, which shall include information concerning the spacing unit associated with the well.

3. a. If the proposed spacing unit does not meet the requirements described in subdivision two of this section, the department shall determine if the proposed spacing unit satisfies the policy objectives of section 23-0301 of this article.

b. If the department determines the proposed spacing unit meets the policy objectives of section 23-0301 of this article, the department shall issue a notice of intent to issue a permit and spacing order. The well operator shall cause such notice to be published in a form and manner prescribed by the department. If the notice of intent relates to a proposed spacing unit that is not of a uniform size and shape with other spacing units for the field or pool, the department shall, if necessary, make such adjustment of the allowable production from the well to be drilled thereon so that the owners in the spacing unit receive their just and equitable shares of the production from the pool. Any such adjustment of the allowables shall be included in the notice of intent to issue a permit and spacing order.

c. Any comments regarding a notice of intent to issue a permit and spacing order must be received by the department within thirty days of the date of the notice of intent and must meet the substantive and significant requirement for establishing an issue for adjudication. Any

challenge to a spacing unit must contain (i) a description and a map of the proposed alternative spacing unit; (ii) a technical justification of the proposed alternative spacing unit, which shall include a description and analysis of the scientific data intended by the owner to support its proposed spacing unit configuration; and (iii) the name, address and experience of any expert witness proposed to support the proposed alternative spacing unit configuration. The department may request the owner challenging the spacing unit to present its scientific data to the department.

d. The department shall determine whether substantive and significant issues have been raised. If the department receives no comments or if the comments do not raise a substantive and significant issue, the department shall issue the permit and the final spacing order. If the department determines that substantive and significant issues have been raised in a timely manner, the department shall schedule an adjudicatory hearing.

4. The department may issue permits to drill infill wells on a reasonably uniform pattern within the spacing unit after an integration order has been issued, if required, and only if it determines that drilling infill wells is necessary to satisfy the policy objectives of section 23-0301 of this article. The distances from the unit boundaries set forth in paragraph b of subdivision 1 of section 23-0501 of this title shall apply to any infill wells. For purposes of this section, new lateral wellbores drilled from the original wellbore in the unit are not considered infill wells if they are drilled prior to the first product sales from the original surface location. In a spacing unit established pursuant to clause (vi) of subparagraph 1 of paragraph b of subdivision 1 of section 23-0501 of this title, infill wells shall be deemed necessary, and the number of infill wells required to satisfy the policy objectives of section 23-0301 of this article must be drilled within three years of the date the first well in the unit commences drilling.

5. For wells permitted prior to the effective date of this section where a spacing order is required but has not been issued, the department shall issue a notice of intent to issue a spacing order. The

well operator shall cause such notice to be published in a form and manner prescribed by the department. The department may issue an order without a hearing if the proposed spacing unit complies with the requirements of subdivision two of this section and no substantive and significant objections to the boundaries of the proposed spacing unit are received within thirty days after publication of the notice by the well operator. If the department determines that substantive and significant issues have been raised in a timely manner, the department shall schedule an adjudicatory hearing.

6. Unless it is extinguished pursuant to subdivision seven of this section, a spacing unit established by the department shall be binding upon all persons and their heirs, successors and assigns. Upon good cause shown, an order establishing a spacing unit or a spacing unit which conforms to statewide spacing may be modified by the department without conducting a hearing if a finding has been made that no facts are in dispute after all affected persons have been provided a reasonable opportunity to comment. In a spacing unit established pursuant to clause (vi) of subparagraph 1 of paragraph b of subdivision 1 of section 23-0501 of this title, failure to drill infill wells pursuant to subdivision 4 of this section shall constitute good cause for the department to initiate a modification of the spacing unit. If necessary, upon issuance of an order which changes unit boundaries, the well operator shall adjust the accounts for owners within the original and modified units to reflect the modified boundary. Any participation by new owners and any adjustment of revenue or royalties resulting from participation by new owners shall be on a prospective basis only. If the initial risk penalty phase pursuant to title 9 of this article is in effect, any new owner added to the unit may elect to be integrated as a participating owner, a non-participating owner or an integrated royalty owner as defined by title 9 of this article. Full well costs shall be assessed against new participating owners and non-participating owners and included in the risk penalty calculation. If the initial risk penalty phase has concluded, any new owner added to the spacing unit may elect to be integrated as a participating owner or an integrated royalty owner on a prospective basis only.

7. Upon the expiration of a well permit or the plugging and abandonment of all wells in a spacing unit, the spacing unit shall be extinguished. Upon extinguishment, all lands within such spacing unit shall be eligible for inclusion in subsequent spacing units.

8. The department, without considering correlative rights, may grant a permit to those entities described in paragraphs b and c of subdivision 3 of section 23-1901 of this article for the purposes of natural gas development if the department determines, after notice and hearing, that the natural gas resource would not be developed by any other entity within twelve months of the close of the hearing record. In the event that the department shall not receive timely notice of appearance prior to the scheduled date of hearing, it may dispense with such hearing. In making its determination the department shall require that the entity described in paragraphs b and c of subdivision 3 of section 23-1901 of this article submit a finding made by such entity that such drilling is likely to be economically sound, and that the entity in question utilize the resource for its exclusive use when granting such a permit.

TITLE 7

VOLUNTARY INTEGRATION AND UNITIZATION IN OIL AND NATURAL GAS POOLS AND FIELDS

Section 23-0701. Voluntary integration and unitization in oil and natural gas pools and fields.

§ 23-0701. Voluntary integration and unitization in oil and natural gas pools and fields.

1. Voluntary integration and unitization in oil pools or fields and in natural gas pools or fields shall be subject to the provisions of this section. When two or more separately owned tracts are embraced within a spacing unit, or when there are separately owned interests in all or a part of a spacing unit, the interested persons may integrate their tracts or interests for the development and operation of the spacing unit. An agreement for the unit or for the cooperative development and

operation of a field, pool, or part thereof, may be submitted to the department for approval as being in the public interest or reasonably necessary to prevent waste. Such approval shall constitute a complete defense to any suit charging violation of any statute of this state relating to trusts and monopolies on account thereof or on account of operations conducted pursuant thereto. Failure to submit such an agreement to the department for approval shall not for that reason imply or constitute evidence that the agreement or operations conducted pursuant thereto are in violation of laws relating to trusts and monopolies.

2. Upon twenty-one days notice to the fee owners of oil and gas interests under lease in a spacing unit, a well operator may record as to each tract for which notice has been given a declaration of voluntary integration. The declaration of voluntary integration shall include the acreage applicable to each tract so integrated and the proportion such acreage bears to the entire spacing unit. The declaration of voluntary integration shall be final and binding upon all persons and their heirs, successors and assigns, and all persons who take title by operation of law.

TITLE 9

COMPULSORY INTEGRATION AND UNITIZATION IN OIL AND NATURAL GAS POOLS AND FIELDS

Section 23-0901. Compulsory integration and unitization in oil and natural gas pools and fields.

§ 23-0901. Compulsory integration and unitization in oil and natural gas pools and fields.

1. Compulsory integration and unitization in oil pools and fields and in natural gas pools and fields shall be subject to the provisions of this section with subdivision 3 to be specifically applicable to integration within individual spacing units, and subdivisions 4 through 12 to be specifically applicable to unit operation of an entire pool or

part thereof.

2. The department shall not make any order requiring the integration of interests in any spacing unit or requiring the development or operation of any field, pool or part thereof as a unit unless it finds, after detailed study and analysis, notice and hearing, that the integration of interests in spacing units, under conditions then existing in this state, or in the field or pool to be affected, is necessary to carry out the policy provisions of section 23-0301 of this article.

3. In the absence of voluntary integration as permitted by section 23-0701 of this article and after finding as required by subdivision 2 of this section, the department shall make an order integrating all tracts or interests in the spacing unit for development and operation. Each such integration order shall be upon terms and conditions that are just and reasonable and subject to the following:

a. As used in this section or otherwise in this article, to the extent applicable to oil and gas wells:

(1) "Integrated non-participating owner" or "non-participating owner" means an owner who elects to reimburse the well operator, out of production proceeds, for such owner's proportionate share of the actual well costs of the initial well in a spacing unit and be subject to a risk penalty, and complies with all of the requirements for integration, including the terms of integration, as specified in an order of integration issued pursuant to the compulsory integration provisions of this section. The non-participating owner shall receive the full share of production attributable to such owner's proportionate interest in the spacing unit following the recoupment by the well operator of the owner's proportionate share of the actual well costs plus a risk penalty of two hundred percent of the share of the actual well costs allocable to such owner. In the case of a leased tract, a royalty shall be deducted from the non-participating owner's share of production, which shall not be subject to charges or costs, but shall be separately calculated and paid to the non-participating owner on behalf of the royalty owner as follows:

- (i) During the recovery of the actual well costs, 1/16 or 6.25%,
- (ii) During the recovery of the first 100% of the risk penalty, 3/32 or 9.38%,
- (iii) During the recovery of the second 100% of the risk penalty, the lowest royalty fraction set forth in an existing lease in the unit, but no less than 1/8 or 12.5%.

Nothing in this subparagraph relieves any lessee of its obligation to pay, from the commencement of production, any remaining royalty and overriding royalty owed under the terms of its lease.

(2) "Integrated participating owner" or "participating owner" means an owner who elects to participate in the initial well in a spacing unit, pays all costs associated with participation and complies with all of the requirements for participation, including the terms of integration, specified in an order of integration issued pursuant to the compulsory integration provisions of this section.

(3) "Integrated royalty owner" means an owner who has either elected to be an integrated royalty owner or who does not elect to become either a participating owner or a non-participating owner. The integrated royalty owner shall receive a royalty equal to the lowest royalty in an existing lease in the spacing unit, but no less than one-eighth. The integrated royalty owner shall have no obligation to the well operator or any other owner for any charges, taxes or fees associated with the operation of the oil or gas well and, notwithstanding any other law to the contrary, shall not be liable by reason of the owner's status as an integrated royalty owner for any claims for personal injury or property damage suffered by any person relating to the drilling and operation of the well.

(4) "Risk penalty" means the percentage applied to well costs to reimburse the well operator for the risk involved with the exploration for and development of a well or the percentage applied to other costs that are subject to recoupment and a risk penalty, as provided herein. At any time during a risk penalty phase, an owner subject to a risk penalty may pay to the well operator the full amount subject to recoupment by the well operator, to terminate the risk penalty phase and be eligible for other opportunities for participation as provided herein.

(5) "Well costs" means the costs incurred or estimated to be incurred by the well operator in relation to the drilling, completion, and the installation of surface equipment, other than as described in item E of clause (ii) of subparagraph 1 of paragraph c of this subdivision, including, without limitation, surveying, drill site preparation, leasing of surface rights and access roads pertinent to the drill site, construction of access roads, permitting, drilling, stimulation, testing, well logging, drilling insurance, plugging and abandonment of the well, environmental mitigation costs associated with drilling and any other costs associated with the foregoing that the operator has incurred or anticipates incurring, including a reasonable charge for supervision of the foregoing activities.

b. If upon issuance of a well permit by the department, the well operator does not control all owners within the spacing unit, either through lease or voluntary agreement, the department shall schedule an integration hearing.

c. The well operator shall, no later than thirty days prior to the date of the integration hearing scheduled by the department, provide actual notice of the hearing to all uncontrolled owners wholly or partially within the spacing unit and shall provide notice by publication in a form and manner prescribed by the department. Prior to or contemporaneously with such notice, the well operator shall provide to the department the well operator's estimate of those well costs that the owners electing to participate shall be required to pay to the well operator prior to or at the integration hearing based on each owner's proportionate share of such costs and a list of each tract wholly or partially within the spacing unit, the acreage attributable thereto, the percentage interest of the total spacing unit of each tract, an indication of whether the tract is controlled by the well operator and the names and addresses of the uncontrolled owners. If applicable, such list shall also identify each tract where the owners remain unknown or cannot be located after diligent efforts by the well operator. To the extent an owner cannot be determined after diligent efforts by the well operator and such owner is integrated as an integrated royalty owner, the well operator shall hold the royalty percentage payable to such

integrated royalty owner in an interest bearing account for such integrated royalty owner until the owner is located or the property is deemed abandoned, whichever comes first.

(1) The notice of hearing to each uncontrolled owner shall be made in a form prescribed by the department, and shall include:

(i) An election form, as prescribed by the department, granting the uncontrolled owner the right to elect to be integrated into the spacing unit as an integrated participating owner, an integrated non-participating owner or an integrated royalty owner. Such form shall set forth the well operator's good faith estimate of those well costs which the owners electing to be integrated as participating owners will be responsible for paying to the well operator prior to conclusion of the integration hearing, based on each owner's proportionate share of such costs, and confirm that if an uncontrolled owner does not make a timely election and does not timely comply with all of the requirements to be either a participating owner or a non-participating owner, that such uncontrolled owner shall be integrated into the spacing unit as an integrated royalty owner.

(ii) A copy of the proposed order of integration, which shall include the proposed terms of integration applicable to integrated participating owners and integrated non-participating owners. The proposed order of integration shall include the following terms in addition to any applicable risk penalty:

A. The owner shall be liable for its proportionate share of all costs and expenses, including taxes, and claims of third parties related to the well, operations thereon and in conjunction therewith, and shall be entitled to its proportionate share of all benefits therefrom. If an owner's share of production is subject to a risk penalty, the well operator shall establish a risk penalty account for such owner and all costs, expenses and benefits attributable to such owner shall be reflected in the penalty account;

B. The well operator shall hold any funds paid by the owner or recouped through the risk penalty attributable to the plugging and abandonment costs of the well, as estimated prior to the drilling of the well, in an interest bearing account until such funds are required and

utilized for such purpose;

C. The owner shall be liable for and shall indemnify all other persons participating in the development of the well, whether participating owners, non-participating owners or otherwise, including the well operator, from and against all claims arising out of the owner's non-payment of rentals, royalties and other payments or burdens on the oil and gas rights that such owner contributes to the spacing unit and from and against all claims associated with the loss or failure of title to the oil and gas rights the owner contributes to the spacing unit;

D. The well operator shall have a first lien on the production of the owner to pay any outstanding costs, expenses or claims and the well operator shall be entitled to withhold and retain for the purposes of set off any revenue or production owed or due to the owner under an order of integration. Nothing in this paragraph shall affect the well operator's right to collect any outstanding amounts incurred nor the right of any fee owner of oil and gas interests to collect any amounts owed under the terms of any lease from such owner. The exercise of any remedy shall not preclude the well operator from seeking any other remedies available under the law;

E. Whether or not the owner is subject to a risk penalty, the well operator shall submit to the owner a written authority for expenditure of the estimated costs associated with the construction of any facilities not included in well costs beyond the surface equipment at the wellhead to the first point of interconnection with other facilities that commingle production from a group of wells that includes the well, including, but not limited to, pipe, compression, processing, treating, dehydrating or separating equipment, fixtures, related buildings and other equipment. The owner shall have thirty days to elect to participate and pay its proportionate share of such estimated cost, the failure of which shall be deemed to be an election by the owner not to participate. If the owner elects not to participate or is deemed to have elected not to participate, the well operator shall be entitled to retain for its own account all of the owner's share of production from the well until the well operator has recouped from the net proceeds of

the owner's share of production the owner's share of the actual costs of the facilities, plus a risk penalty of one hundred percent of such costs. Any such amounts shall be added to the risk penalty account for such owner;

F. If the owner is not subject to a risk penalty, the owner shall have the right to take its share of gas or oil production in kind and shall be responsible for its transportation and marketing arrangements downstream of the facilities constructed pursuant to item E of this clause. The owner's election to take in kind must be conveyed to the well operator no later than fourteen days prior to first production from the well or upon seventy-five days written notice to well operator at any time following first production from the well subject to the expiration of any existing contracts;

G. If the owner is not subject to a risk penalty and does not take its share of gas or oil production in kind, the well operator shall market the owner's share of production from the well ratably with its own share of production from the well for the account of the owner. The well operator shall pay the owner based on the price received by the well operator for production in the general area less (I) the owner's proportionate share of all costs incurred by the well operator for transporting, treating, processing, or otherwise making the production marketable, and (II) a marketing fee not to exceed five percent of the sales price of the production;

H. The well operator shall be entitled to propose and conduct a subsequent operation on a well, meaning any reworking, sidetracking, deepening, re-completing or plugging back of the well or the drilling of a lateral or an infill well in the formation for which the unit was created. Owners shall be provided with a written authorization for expenditure of the estimated costs of the subsequent operation. An owner shall not be entitled to participate in a subsequent operation as long as the owner is in a risk penalty phase. If a subsequent operation is proposed while an owner is in a risk penalty phase, the owner's proportionate share of the actual cost of the subsequent operation plus two hundred percent of such actual costs shall be added to the risk

penalty account for such owner. The owner not in a risk penalty phase shall have thirty days to elect and pay its proportionate share of the estimated costs, unless a drilling rig is on location, in which event notice of a subsequent operation may be given by telephone and the owner shall have forty-eight hours, exclusive of Saturday, Sunday and legal holidays, to make an election and thirty days to pay the owner's proportionate share of costs. The failure of any such owner to elect and pay in a timely manner shall be deemed an election by the owner not to participate in the subsequent operation. If such owner elects or is deemed to have elected not to participate in the subsequent operation, the well operator shall be entitled to retain all of the owner's proportionate share of production from the well until the well operator has recouped the proportionate share of the actual costs of the subsequent operation attributable to such owner, plus two hundred percent of such actual costs;

I. The well operator, on behalf of the owner, shall be entitled to conduct all acts associated with the well and necessary facilities related thereto, including without limitation: conducting title examination and curative work on the tracts included in the spacing unit; arranging for contract services or employees of the well operator, at the customary salaries, wages and benefits of such employees, to oversee the operation and maintenance of the well and the facilities in the production unit associated with the well; arranging for and maintaining required financial security for well bonds and insurance; discharging litigation, claims of third parties and disputing tax assessments; developing and implementing emergency responses and dealing with catastrophic events; and arranging for the storage, transporting and disposal of produced water, by-products or refuse associated with production and maintenance facilities; and

J. Other terms may be included in the order of integration if the department determines such terms are reasonably required to further the policy objectives of section 23-0301 of this article.

(2) Within twenty-one days of receiving notice of the integration hearing, each uncontrolled owner shall provide to the well operator and the department its election as to whether it chooses to be integrated as

a participating owner, a non-participating owner or an integrated royalty owner. Failure of an uncontrolled owner to elect to be integrated as a participating owner, a non-participating owner or an integrated royalty owner and to pay the amount specified in the notice by the date of the hearing, or to make any election, shall result in the owner being integrated as an integrated royalty owner. Nothing contained in this section shall preclude any person from entering into a lease or other voluntary agreement at any time prior to the hearing.

d. If substantive and significant issues are raised during the integration hearing, the department shall schedule an adjudicatory hearing.

e. If no substantive and significant issues are raised at the hearing, the department shall issue a final order of integration confirming the status of all uncontrolled owners in the spacing unit as participating owners, non-participating owners or integrated royalty owners; the terms of integration; the acreage attributable to each owner and the proportion such acreage bears to the entire spacing unit; and the royalty applicable to each integrated royalty owner. Such order shall be recorded by the well operator in the office of the county clerk in the county or counties where the spacing unit is wholly or partially located and such order shall be final and binding upon the well operator, all owners and their heirs, successors and assigns.

f. All operations including, but not limited to, the commencement, drilling, or operation of a well or the existence of a shut-in well upon any portion of a spacing unit covered by an order of integration shall be deemed for all purposes the conduct of such operations upon each separately owned tract in the spacing unit by the owner or several owners thereof. That portion of the production allocated to each tract included in a spacing unit covered by an order of integration shall, when produced, be deemed for all purposes to have been produced from such tract by a well drilled thereon.

4. The department upon its own motion may, and upon the application of any interested person shall, hold a hearing to consider the need for the

operation as a unit of an entire pool or part thereof.

5. The department shall make an order providing for the unit operation of a pool or part thereof if it finds that such operation is reasonably necessary to increase substantially the ultimate recovery of oil and gas, and the value of the estimated additional recovery of oil or gas exceeds the estimated additional cost incident to conducting such operation. The order shall be upon terms and conditions that are just and reasonable and shall prescribe a plan for unit operations that shall include:

a. A description of the unitized area, termed the unit area.

b. A statement of the nature of the operations contemplated.

c. An allocation to the separately owned tracts in the unit area of all the oil and gas that is produced from the unit area and is saved, being the production that is not used in the conduct of operations on the unit area or not unavoidably lost. The allocation shall be in accord with the agreement, if any, of the interested parties. If there is no such agreement, the department shall determine the value, from evidence introduced at the hearing, of each separately owned tract in the unit area, exclusive of physical equipment, for development of oil and gas by unit operations, and the production allocated to each tract shall be the proportion that the value of each tract so determined bears to the value of all tracts in the unit area.

d. A provision for the credits and charges to be made in the adjustment among the owners in the unit area for their respective investments in wells, tanks, pumps, machinery, materials, and equipment contributed to the unit operations.

e. A provision providing how the expenses of unit operations, including capital investment, shall be determined and charged to the separately owned tracts and how said expenses shall be paid.

f. A provision, if necessary, for carrying or otherwise financing any

person who is unable to meet his financial obligations in connection with the unit, allowing a reasonable interest charge for such service.

g. A provision for the supervision and conduct of the unit operations, in respect to which each person shall have a vote with a value corresponding to the percentage of the expenses of unit operations chargeable against the interest of such person.

h. The time when the unit operations shall commence, and the manner in which, and the circumstances under which, the unit operations shall terminate.

i. Such additional provisions as are found to be appropriate for carrying on the unit operations, and for the protection or adjustment of correlative rights.

6. No order of the department providing for unit operations shall become effective unless and until the plan for unit operations prescribed by the department has been approved in writing by the owners of sixty percent or more in interest as the costs of such unit operations are shared under the order of the department, and by owners of record of a like percentage of a one-eighth royalty interest in and to the unit area, and the department has made a finding, either in the order providing for unit operations, or in a supplemental order, that the plan for unit operations has been so approved by the required number of owners and royalty owners. If the plan for unit operations has not been so approved by owners and royalty owners at the time the order providing for unit operations is made, the department shall upon application and notice hold such supplemental hearings as may be required to determine if and when the plan for unit operations has been so approved. If the owners and royalty owners, or either, owning the required percentage of interest in the unit area do not approve the plan for unit operations within a period of six months from the date on which the order providing for unit operations is made, such order shall cease to be of force and shall be revoked by the department.

7. An order providing for unit operations may be amended by an order

made by the department, in the same manner and subject to the same conditions as an original order providing for unit operations, provided

a. if such an amendment affects only the rights and interests of the owners, the approval of the amendment by the royalty owners shall not be required, and

b. no such order of amendment shall change the percentage for allocation of oil and gas as established for any separately owned tract by the original order, except with the consent of all persons owning interest in such tract.

8. The department, by an order, may provide for the unit operation of a pool or a part thereof that embraces a unit area established by a previous order of the department. Such order, in providing for the allocation of unit production, shall first treat the unit area previously established as a single tract, and the portion of the unit production so allocated thereto shall then be allocated among the separately owned tracts included in such previously established unit area in the same proportions as those specified in the previous order.

9. Oil and gas allocated to a separately owned tract shall be deemed, for all purposes, to have been actually produced from such tract, and all operations, including, but not limited to, the commencement, drilling, or operation of a well upon any portion of the unit area shall be deemed for all purposes the conduct of such operations upon each separately owned tract in the unit area by its several owners. The operations conducted pursuant to the order of the department shall constitute a fulfillment of all the express or implied obligations of each lease or contract covering lands in the unit area to the extent that compliance with such obligations cannot be had because of the order of the department.

10. Oil and gas allocated to any tract, and the proceeds from the sale thereof, shall be the property and income of the several persons to whom, or to whose credit, the same are allocated or payable under the order providing for unit operations.

11. No division order or other contract relating to the sale or purchase of production from a separately owned tract shall be terminated by the order providing for unit operations, but shall remain in force and apply to oil and gas allocated to such tract until terminated in accordance with the provisions thereof.

12. Except to the extent that the parties affected so agree, no order providing for unit operations shall be construed to result in a transfer of all or any part of the title of any person to the oil and gas rights in any tract in the unit area. All property, whether real or personal, that may be acquired in the conduct of unit operations hereunder shall be acquired for the account of the owners within the unit area, and shall be the property of such owners in the proportion that the expenses of unit operations are charged.

13. Any person taking title by operation of law to any oil and gas interests integrated into a spacing unit pursuant to an order of integration, shall take such interests subject to the terms and conditions of the final order of integration issued by the department duly recorded in accordance with the provisions of this section and shall be subject to all liabilities and benefits associated therewith, unless such person, within sixty days of the taking of such interest, elects to be an integrated royalty owner and notifies the well operator of such election.

TITLE 11

LEASES FOR PRODUCTION AND STORAGE OF OIL AND GAS ON STATE LANDS

Section 23-1101. Procedure for obtaining oil and gas production lease.

23-1103. Procedure for obtaining gas storage lease.

23-1105. Prohibition on state authorizations related to certain offshore oil and natural gas production.

§ 23-1101. Procedure for obtaining oil and gas production lease.

1. The department may make leases on behalf of this state, upon such terms and conditions including consideration as to the department seem just and proper for:

a. The exploration, development and production of gas in state-owned lands, except state park lands, state forests, reforestation areas, wildlife management areas, unique areas, the marine and coastal district as defined in section 13-0103 of this chapter, and the lands under the waters of Lake Ontario or along its shoreline; and

b. The exploration, development and production of oil in state-owned lands, except state park lands, state forests, reforestation areas, wildlife management areas, unique areas, the marine and coastal district as defined in section 13-0103 of this chapter, and the lands under the waters of Lake Erie and Lake Ontario or along their shorelines.

2. All oil and gas leases shall:

a. Be limited in duration to a period not to exceed ten years and as long thereafter as oil and gas is produced in commercially paying quantities;

b. Provide for payment to the agency having jurisdiction over the leased lands of such consideration, royalties, rentals, bonuses and other compensation as shall, in the discretion of the department, be in the best interests of the people of the state of New York;

c. Provide for prompt exploration followed within a reasonable time by operations for the production of oil and gas, if such be found, and shall also contain provisions for the termination of such lease by reason of the lessee's failure to so explore or operate;

d. Be invalid unless they shall have the prior approval of such state department, division, bureau or agency thereof, or state agency having jurisdiction over the land in question; and authority to give such consent is hereby conferred upon the head of any such state department,

or a division, bureau or agency thereof, or any state agency, and with respect to lands under water held by the state in its sovereign capacity, jurisdiction is deemed to be in the Commissioner of General Services; and

e. Be inapplicable to any state park lands and to any lands the leasing of which is prohibited by the State Constitution.

3. In addition to the requirements contained in paragraphs a, c and e of subdivision two of this section, all gas leases with respect to the lands under the waters of Lake Erie shall:

a. Provide for payment to the general fund of the state such consideration, royalties, rentals, bonuses or other compensation as shall, in the discretion of the department, be in the best interests of the people of the state of New York.

b. Require that no well shall be permitted nearer than one-half mile from the shore, two miles from public water intake areas, and one thousand feet from any other structure or installation in or on Lake Erie.

c. Require that the following procedures be established if there is evidence suggesting that liquid hydrocarbons may exist in a stratum penetrated by the well bore:

(i) Drilling or completion operations shall cease immediately.

(ii) The department shall be notified of the evidence indicating the presence of liquid hydrocarbons, pursuant to such notification arrangements as the department shall prescribe.

(iii) A formation test shall be conducted in the presence of a department representative.

(iv) If the formation test indicates the presence of appreciable liquid hydrocarbons, the well bore shall be permanently plugged and abandoned from total depth to the lake bottom with cement.

(v) If the formation test does not indicate the presence of appreciable liquid hydrocarbons, drilling may be resumed after an intermediate string of casing has been set, cemented and tested.

(vi) If there is any further indication of liquid hydrocarbons the procedures outlined in paragraphs one through five hereof shall be repeated.

d. Require that each lessee, or other person desiring to install a pipeline, bury the most shoreward portion of each pipeline, in accordance with rules and regulations which shall be promulgated by the department, to obviate the risk of damage from ice, wave and wind conditions.

e. Be conditioned upon the posting by the responsible parties of a liability bond or liability insurance coverage in such form as the department may by regulation require and in such amount as the department shall deem to be reasonably sufficient to correct, repair or remedy to the satisfaction of the department any environmental damage or hazardous discharge resulting from gas exploration or recovery.

f. Provide that each lessee shall be strictly liable to the state for all reasonable expenses involved in the restoration of fresh water supplies, cleanup of beaches, piers and other similar facilities, which may be required as a result of exploration, drilling or production operations, and for liability claims arising therefrom.

g. Require each lessee to immediately notify the department of any discharge of oil or other pollutant, to act expeditiously to terminate such discharge and to remove the substance discharged.

h. Provide for the use and regular inspection of modern anti-pollution devices, including blow-out preventors on every drilling rig.

i. Provide that when a well is permanently abandoned for any reason it shall be permanently plugged by filling the well bore for its total depth, with cement or other suitable material.

j. Provide that, where in the department's opinion, damage to the environment is imminent or an emergency exists, the department shall order the immediate plugging and abandonment, either temporary or

permanent, of any well on lands beneath Lake Erie.

3-a. For any lease relating to the exploration, development, and production of gas or oil in state forests, reforestation areas, wildlife management areas, and unique areas, which was entered into, on, or before the effective date of a chapter of the laws of two thousand twenty-five which amended subdivision one of this section, any assignment, transfer, or modification of such lease shall not be considered the making of a lease under such law; provided, however, that no such assignment, transfer, or modification shall allow for an increase in acreage under the lease, the expansion of existing gas or oil wells, the drilling of new gas or oil wells, or the expansion or building of any other new gas or oil infrastructure other than well-plugging and remediation activities; and provided, further, that no such lease shall be continued or renewed upon expiration.

4. Any such oil, gas, or oil and gas lease or leases made and granted pursuant to this section shall be awarded to the highest responsible bidder after advertisement for sealed bids. Such advertisements for bids shall be published in the official newspaper or newspapers, if any, or otherwise in a newspaper or newspapers designated for such purpose. Such advertisement shall contain a statement of the time and place where all bids received pursuant to such notice will be publicly opened and read. All bids received shall be publicly opened and read at the time and place specified. At least thirty days shall elapse between the first publication of such advertisement and the date specified for the opening and reading of bids. Bids shall be submitted on forms provided by the department, which forms shall indicate the method or methods for computing compensation to the state for the lease and shall contain such other directions as may be appropriate to secure comparability of bids submitted for any given lease. The department, in its discretion, shall determine the highest bid after taking into consideration the anticipated compensation to be returned to the state under any such lease by way of royalty payments, delayed lease rental payments, bonuses or other compensation or consideration, or by a combination of any or all of the same. In cases where two or more responsible bidders submit identical bids, the department in its discretion, may award the lease

involved to any of such bidders. The department in its discretion, may also reject any or all bids and readvertise for new bids. The department may disallow any bid if the bidder upon request fails to furnish satisfactory evidence of responsibility.

5. Notwithstanding the requirements contained in subdivision four of this section, the department may negotiate and grant an oil or gas lease on small parcels of stateowned land without public bid in order to consolidate large drilling or production units controlled by a single entity. The department shall make a determination that public bid of such property is unreasonable or impracticable and publish such determination in the state register prior to the granting of any such lease.

6. Notwithstanding subdivision four of this section, the department may negotiate and grant an oil or gas lease of lands identified in subdivision one of this section where oil and gas exploration and development rights are co-owned by the state and another owner, including the United States. The department shall publish its intention to enter into negotiations on such lease in the state register prior to the granting of any such lease.

§ 23-1103. Procedure for obtaining gas storage lease.

1. The department may make leases on behalf of this state for the storage of gas, and liquefied petroleum gas, in state owned lands upon such terms and conditions including consideration as to it shall seem just and proper.

2. All leases made pursuant to this section shall:

a. Provide for payment to the agency having jurisdiction over the leased lands of adequate and reasonable consideration;

b. Be invalid unless they shall have the prior approval of such state department, division, bureau or agency thereof, or state agency having

jurisdiction over the land in question, and authority to give such consent is hereby conferred upon the head of any such state department, or a division, bureau or agency thereof, or any state agency; and with respect to lands under water held by the state in its sovereign capacity, jurisdiction is deemed to be in the Commissioner of General Services;

c. Contain such other terms and provisions as may be necessary or appropriate in order to promote the purposes of this article and the public policy of this state; and

d. Be inapplicable to any lands the leasing of which is prohibited by the State Constitution.

§ 23-1105. Prohibition on state authorizations related to certain offshore oil and natural gas production.

1. Neither the department nor the office of general services shall enter into any new lease or other conveyance, lease renewal, extension or modification, that authorizes the exploration for, or the development and production of, oil or natural gas upon lands owned by the state in the marine and coastal district as defined in section 13-0103 of this chapter, that would result in the increase of oil or natural gas production from federal waters.

2. The department is authorized to establish such rules and regulations as it shall deem necessary to implement this section.

3. For the purposes of this section, the following terms have the following meanings:

a. "Development" means those activities taking place following the discovery of oil and natural gas, including geophysical activity, drilling, platform construction, pipeline construction, and operation of all onshore support facilities that are performed for the purposes of ultimately producing the resources discovered.

b. "Exploration" means the process of searching for oil and natural gas, including any drilling whether on or off known geological structures, including the drilling of a well in which a discovery of oil or natural gas is made and the drilling of any additional delineation well after the discovery that is needed to delineate any reservoir and a lessee to determine whether to proceed with development and production.

c. "Federal waters" means those waters and submerged lands lying seaward to the state waters of New York that appertain to the United States and are subject to federal jurisdiction and control.

d. "New or additional exploration, development, or production of oil or natural gas" includes any activity undertaken to increase the capacity of any pipeline or other infrastructure used to convey oil or natural gas from federal waters.

e. "Production" means those activities that take place after the successful completion of any means for the removal of oil and natural gas, including that removal, field operations, transfer or resources to shore, operation, monitoring, maintenance, and workover drilling. "Producing" means undertaking those activities.

TITLE 13

UNDERGROUND STORAGE OF GAS

Section 23-1301. Procedure for obtaining underground storage permit.

23-1303. Authority to acquire property.

23-1305. Procedure for abandoning storage reservoir.

23-1307. Ownership of storage gas and storage rights.

§ 23-1301. Procedure for obtaining underground storage permit.

1. No underground reservoir shall be devoted to the storage of gas, or liquefied petroleum gas unless the prospective operator of such storage reservoir shall have received from the department, after approval in

writing of the state geologist, an underground storage permit which shall be in full force. The application for said permit shall include the following:

a. A map showing the location and boundaries of the proposed underground storage reservoir.

b. A report containing sufficient data to show that the reservoir is adaptable for storage purposes.

c. An affidavit signed by the prospective operator to the effect that he has acquired by grant, lease or other agreement at least seventy-five percent of the storage rights in said reservoir and in the buffer zone established to protect the reservoir as approved by the department, calculated on the basis of surface acreage; and such affidavit shall also set forth that the applicant will agree as a condition to the issuance of such permit that it will thereafter within a reasonable time either acquire by negotiation, or file and proceed with condemnation proceedings to acquire, any outstanding storage rights in the remaining reservoir and buffer zone acreage.

d. Such other information as the department may require.

2. The permit shall be granted within ninety days of application unless the department finds that the application and the information submitted with it do not meet the requirements of this section. The department may revoke or suspend any underground storage permit in force hereunder for failure to comply with any of its provisions or for failure to comply with subdivision 4 of this section.

3. Subdivisions 1 and 2 of this section shall not apply to underground storage reservoirs or the storage of gas therein provided that such reservoirs have been placed in operation prior to October 1, 1963 and so long as such operation is not abandoned.

4. Every operator shall file with the department on or before December 31 of each year, a report with respect to each underground storage

reservoir operated by him showing any change in:

a. The estimated size in surface acreage or shape of the reservoir and the buffer zone if any;

b. His estimate of total capacity of the reservoir;

c. His estimate of working capacity of the reservoir; and

d. Any other engineering, geological or operational data that may be requested by the department.

5. The applicant for a permit for the following purposes shall submit with his application the following fees:

a. for a new underground storage reservoir, a fee of ten thousand dollars.

b. for a modification of the storage capacity of an existing underground storage reservoir, a fee of five thousand dollars.

6. No permit issued hereunder and no provision of this article shall be construed to diminish or impair the jurisdiction of the Public Service Commission with respect to regulation of the manufacture, transportation, distribution or sale of gas.

§ 23-1303. Authority to acquire property.

1. Any corporation empowered to produce, transport, distribute or store gas within this state for ultimate public use, which holds an underground storage permit from the department or which is otherwise lawfully operating an underground storage reservoir and its buffer zone, and which after reasonable effort is unable to obtain rights in real property and wells thereon necessary for activation, operation, or protection of the storage reservoir and its buffer zone shall, subject to the applicable provisions of the eminent domain procedure law, have

the authority to acquire such rights as may be required adequately to examine, prepare, maintain, operate and protect, and for access to such underground storage reservoir and its buffer zone; provided that no right of acquisition under this section shall extend to any lands or interests therein which have been acquired, or, in the hands of the present holder, could have been acquired by acquisition; and, provided further, that any acquisition of cemetery lands or burial grounds shall be in the sound discretion of the court and with due provision for the relocation of human remains.

2. Underground gas storage operators authorized by this section to maintain acquisition proceedings before filing a suit for such acquisition shall have filed with the department a map showing the location, boundaries and estimated size of surface acreage of the underground storage reservoir and its buffer zone.

3. Any operator of an underground gas storage reservoir who at any time controls less than one hundred per cent of the storage rights within that reservoir and its buffer zone and is authorized by this section to maintain a proceeding shall acquire the storage rights remaining in the reservoir and its buffer zone acreage by negotiation or file and proceed with acquisition proceedings within a reasonable time but not to exceed a two year period after the first injection of gas, or after the effective date of this section, whichever is later or within any extension granted by the department.

4. Any operator who seeks to acquire underground gas storage and buffer zone rights as authorized by this section shall name as parties defendant all the owners of all the parcels of property located within the boundaries of the reservoir and its buffer zone from whom storage rights have not previously been legally acquired by grant, lease, or other voluntary agreement; provided, however, that a failure to join the owners of any parcel in the reservoir and its buffer zone due to inadvertence shall not constitute a jurisdictional defect in any proceeding of acquisition.

5. The value of any property acquired pursuant to this section shall

include the value of any commercially recoverable native oil and gas in place to the extent that the holder of the property interest being acquired has a right thereto. The same provision shall apply to the holder of salt rights.

6. The cost of, or possible necessity for, plugging any well or wells, when such plugging or replugging is or may be made necessary by reason of the storage use made possible or facilitated by acquisition shall not be considered in computing the value of property or any interest therein taken under this section.

7. The use of salt cavities for the storage of gas or other petroleum products or byproducts shall be at the discretion of the owner of the salt deposits at the location of the cavity. Salt cavities may be used for salt recovery and storage with the consent and agreement of the owners of the salt cavity and the stored material. Conversion of any salt cavity for the storage of gas or other petroleum products or byproducts shall be in accordance with section 23-1103 or 23-1301 of this article.

§ 23-1305. Procedure for abandoning storage reservoir.

In connection with the abandonment of any underground storage reservoir for which a permit has been granted pursuant to this article or in connection with the revocation of any such permit, the department shall require the premises to be placed in a condition which, to the extent practicable, shall assure the continuance of the same in a condition which does not constitute a menace to the present or future health or safety of persons, or safety or value of property. In case the operator shall fail to put the premises in a satisfactory condition prior to any such abandonment or immediately upon revocation of a permit, the department may do or cause to be done all things necessary to place the premises in satisfactory condition and the operator shall be liable for the cost.

§ 23-1307. Ownership of storage gas and storage rights.

1. All gas and liquefied petroleum gas, which has previously been reduced to possession, and which is lawfully injected into an underground storage reservoir, shall be deemed the property of the injector, his heirs, successors or assigns, provided that the injector, his heirs, successors or assigns, shall have no right to reserves of native gas or oil remaining in any stratum or portion thereof which have not been condemned hereunder or otherwise acquired by such injector, his heirs, successors or assigns. Nothing contained in this subdivision shall be construed to confer on any operator any storage rights not otherwise acquired or held by him.

2. No production lease shall be construed to include rights to store oil or gas unless the lease includes a provision granting such storage rights. The rule of construction provided in this subdivision is not intended to alter any law or rule of construction applicable to leases made prior to October 1, 1963 or to imply any rule of construction for such leases.

TITLE 17

LIQUEFIED NATURAL AND PETROLEUM GAS

Section 23-1701. Short title.

23-1703. Legislative findings.

23-1705. Definitions.

23-1707. Environmental safety permit; siting.

23-1709. Criteria for siting.

23-1711. Permit processing.

23-1713. Transportation of liquefied natural and petroleum gas; certified routes.

23-1715. Inspection to insure compliance; allocation of enforcement costs; revocation; civil and criminal penalties.

23-1717. Training and qualification of municipal fire department personnel; strict liability.

23-1719. Non-conforming facilities; conformance to safety

- criteria; moratorium.
- 23-1721. Hardship; petition and hearing; permit.
- 23-1723. Judicial review.
- 23-1725. Preservation of jurisdiction of public service commission; consultation and coordination with commission and energy office.
- 23-1727. Severability.

§ 23-1701. Short title.

This title shall be known as the "liquefied natural and petroleum gas act".

§ 23-1703. Legislative findings.

The legislature finds that it is necessary for the protection of the public health, the environment and the economic welfare of the people of this state to regulate and control the siting of liquefied natural and petroleum gas facilities in this state because of the hazards posed by liquefied natural and petroleum gas storage and transportation, particularly in populated areas. The legislature finds that liquefied natural and petroleum gas is an extremely volatile, highly flammable and dangerous substance which if released into the air is capable, under unfavorable atmospheric conditions, of causing severe damage even in areas distant from the point of release. The legislature further finds that the use of imported and domestic liquefied natural and petroleum gas is increasing, making its regulation in the public interest essential; and requiring particular caution in its storage, transportation, and conversion, to be carried out other than in residential areas or in dangerous proximity to contiguous population, with the imposition of strict liability in the handling thereof.

It is the purpose of the legislature, subject to the provisions of this act, that liquefied natural or petroleum gas facilities not be sited in residential areas, or in dangerous proximity to contiguous

populations, and that transportation of liquefied natural or petroleum gas be effected under maximum safeguards to protect such areas and populations against possible catastrophic danger in the mishandling or possible escape thereof. Natural gas stored or transported at normal temperatures, whether under pressure or otherwise, after conversion thereof from its super-cooled or cryogenic state as liquefied gas and liquefied petroleum gases in the form of butane, bottled gas, propane, propylene and butylene gas when stored or transported at their respective normal temperatures are not subject to regulation under the provisions of this act.

§ 23-1705. Definitions.

As used in this title, unless the context otherwise requires:

1. "Liquefied natural gas", sometimes referred to as "LNG", and "liquefied petroleum gas", sometimes referred to as "LPG", are gas cooled to its liquid state provided, however, the provisions of this act shall not be deemed to apply to liquefied petroleum gas in the form of butane, bottled gas, propane, propylene or butylene when used, stored or transported at their respective normal temperatures, are not subject to this act.

2. "Liquefied natural or petroleum gas facility" means any structure or facility which is used for the storage or confinement of liquefied natural or petroleum gas, or for the conversion of liquefied natural or petroleum gas into natural gas. The former shall be designated as a "liquefied natural or petroleum gas storage facility"; the latter as a "liquefied natural or petroleum gas conversion facility".

3. "Liquefied natural or petroleum gas transportation activity" means the loading, unloading, or transportation, by whatever means, of liquefied natural gas or liquefied petroleum gas.

4. "Natural gas" means natural or petroleum gas in a non-liquid or gaseous state, whether under pressure or otherwise, and whether or not

the product of conversion from liquefied natural gas or liquefied petroleum gas. The storage and transportation of natural gas, whether under pressure or not, and which take place at normal temperatures, are not subject to this act.

5. "Non-conforming facility" means a liquefied natural or petroleum gas facility in actual use and operation on September first, nineteen hundred seventy-six which is exempted from the requirements of section 23-1707 but is subject to the requirements of section 23-1719.

6. "Person" means any individual, corporation, partnership, association, cooperative or otherwise, trust or estate, governmental agency, authority, public benefit corporation, municipality or agency thereof, board or commission, or other public or private legal entity.

7. "Permit" means an environmental safety permit issued by the department pursuant to this title.

§ 23-1707. Environmental safety permit; siting.

No person shall commence the preparation of a site for, or begin the construction of, a liquefied natural or petroleum gas storage or conversion facility in the state without having first obtained an environmental safety permit issued with respect to such facility or activity by the commissioner pursuant to this title. Any such facility with respect to which a permit is issued shall not thereafter be built, maintained or operated, and any such activity with respect to which a permit is issued, shall not be carried out, except in conformity with such permit and any terms, limitations or conditions contained therein; provided that nothing herein shall exempt such facility from compliance with state law and regulations thereunder or with municipal laws and regulations thereunder not inconsistent with the provisions of such permit. A permit may be transferred, subject to the approval of the commissioner, to a person who agrees to comply with the terms, limitations and conditions contained therein. This section shall not apply to a liquefied natural or petroleum gas storage or conversion

facility in actual use and operation on September first, nineteen hundred seventy-six.

§ 23-1709. Criteria for siting.

1. The department shall, after investigation and opportunity for public comment, within one year from the effective date of this section, adopt, and file with the secretary of state, regulations establishing criteria for the siting of liquefied natural and petroleum gas facilities. Such siting criteria shall be designed to insure the maximum safety of the public from hazards associated with liquefied natural or petroleum gas storage, transportation and conversion. The department shall also within one year from such effective date adopt regulations prescribing the form and content of applications for environmental safety permits to construct a liquefied natural or petroleum gas facility.

2. The regulations issued pursuant to subdivision one of this section for the siting of liquefied natural or petroleum gas facilities shall take into account, among other factors:

(a) The density of population in areas neighboring the liquefied natural or petroleum gas facility;

(b) The density of population in areas neighboring delivery routes of liquefied natural or petroleum gas to a liquefied natural or petroleum gas facility, if delivery is by water-borne vessel, rail or motor vehicle;

(c) The risk of accident during the transportation of liquefied natural or petroleum gas to or from a liquefied natural or petroleum gas facility which could result in a release of liquefied natural or petroleum gas from containment and the safeguards necessary to reduce such risk;

(d) The physical properties of liquefied natural or petroleum gas, including: (i) the effect of cryogenic temperatures upon containers of liquefied natural or petroleum gas; (ii) the maximum distance that a liquefied natural or petroleum gas vapor cloud is projected to expand and pose a threat to the public; and, (iii) the flammability or

explosiveness of such a cloud formed by vaporizing liquefied natural or petroleum gas.

3. The regulations issued by the department pursuant to subdivision one prescribing the form of an application for an environmental safety permit to construct a liquefied natural or petroleum gas facility shall require the applicant to supply detailed information regarding:

(a) The location of the proposed facility;

(b) A description of the design and capacity of the facility;

(c) The expected sources of natural gas or liquefied natural or petroleum gas for the facility, the proposed methods of transporting natural gas or liquefied natural or petroleum gas to and from the facility, and the routes which deliveries will traverse;

(d) The need for the facility;

(e) The environmental impacts of the proposed facility;

(f) A description of reasonable alternative locations for the proposed facility;

(g) Such other information as the department shall prescribe to allow it to render a decision as to whether the proposed liquefied natural or petroleum gas facility is necessary and compatible with the surrounding environment and with the safety of neighboring populations.

4. The rules and regulations adopted by the department to implement this title and the provisions of article 70 of this chapter and rules and regulations adopted thereunder shall govern environmental safety permit applications, renewals, modifications, suspensions and revocations under this title.

§ 23-1711. Permit processing.

1. Any person desiring to construct, reconstruct, enlarge the storage capacity or, if constructed but unused, put into actual use and operation a liquefied natural or petroleum gas facility in the state shall obtain a permit pursuant to this section.

2. Notice of any public hearing conducted in connection with any

environmental safety permit shall be published in at least two newspapers having a general circulation in the area in which the proposed activity is located, and in contiguous areas potentially affected by the proposed action.

3. The department shall render a decision based upon the record either granting the permit, denying it, or granting it upon such terms, conditions, limitations, or modifications thereof as the department may deem appropriate. The department shall deny a permit if residential areas and contiguous populations, will be endangered, or it otherwise does not conform to the siting criteria established for liquefied natural or petroleum gas facilities, or the department finds that the facility is not necessary, or is otherwise not in the public interest to be approved.

§ 23-1713. Transportation of liquefied natural and petroleum gas; certified routes.

1. Except for transportation by navigable waterways, all intrastate transportation of liquefied natural and petroleum gas in its cryogenic state must be along established routes in accordance with a schedule filed with the department, and approved in accordance with this section.

2. The department of transportation in consultation with the department of environmental conservation shall establish criteria for the safe transportation of such liquefied natural and petroleum gas. Such criteria shall take into consideration the proximity of the route or routes to contiguous populations, the capability of municipal fire departments to protect communities and contiguous populations against fire cloud damage attendant upon vapor release of the gas from its cryogenic state due to accident or malfunction in equipment, and the risk of further accident related thereto and conflagration attendant upon its ignition. Such department's criteria shall be no less restrictive than existing federal regulations. Such department shall within one year from the effective date of this section, adopt regulations prescribing the forms and procedures to be followed, which

shall include notice to all affected municipal police and fire departments, for the certification of routes to be used for the safe intrastate transportation of such liquefied natural and petroleum gas.

3. The department of transportation in consultation with the department of environmental conservation shall maintain a map of certified routes for the intrastate transportation of such liquefied natural and petroleum gas. In order to have a route certified under this section, any person proposing to undertake intrastate transportation of such liquefied natural or petroleum gas shall file with such department the proposed transportation route, subject to approval as herein provided.

4. Upon application therefor, and before certifying a route for intrastate transportation of such liquefied natural or petroleum gas under subdivision three, the department of transportation shall hold a public hearing and shall render a decision with respect thereto in accordance with the requirements of section 23-1711, and, to the extent applicable, section 23-1709. In addition, upon route certification, such limitations as are appropriate for safety purposes shall be established by such department for each such certified route, and the department, further, shall establish procedure and notice requirements for the particular route, in accordance with subdivision two hereof, to be given to all affected municipal police and fire departments, to assure adequate notice to all affected municipalities.

§ 23-1715. Inspection to insure compliance; allocation of enforcement costs; revocation; civil and criminal penalties.

1. The department shall have continuing responsibility of inspection to insure compliance with the terms of an environmental safety permit issued under section 23-1707, of route certification under section 23-1713, and with regard to non-conforming facilities under section 23-1719, all in accordance with the terms of this title. It may do so either with its own personnel exclusively, or by contract with one or more of the affected municipalities, utilizing municipal inspection

personnel, or with one or more private firms qualified to monitor compliance and certify with respect thereto, or by a combination of the foregoing means as it may by regulation provide.

2. The expense of enforcement of this act, including necessary training and qualification of municipal fire department personnel under section 23-1717, shall be allocated by the department and assessed upon an appropriate basis against the utilities and others subject to the terms of this title, in order that the administration hereof shall be at no net expense to the state or any affected municipality, but rather charged on an allocated basis to the regulated corporations and individuals subject to the requirements of this title, to be included as part of the expense related to the furnishing of this form of energy, and properly to be borne by the users thereof.

3. After notice and upon hearing if requested, the department shall determine the reasonable cost to the department of its enforcement responsibilities under this title, including direct costs, contractual obligations under subdivision one of this section and under section 23-1717, and allocated departmental overhead; and, further, shall assess said total cost, on an annual basis, against the utilities and others subject to this title, allocated on the basis of direct costs related to each of the foregoing, including contractual obligations incurred in enforcement and training, and allocated departmental overhead charged on the basis of departmental action required during the year with regard to the particular utilities and others subject to its administration and enforcement responsibilities.

4. In the event of the failure of the holder of an environmental safety permit issued under section 23-1707, of route certification under section 23-1713, or of a non-conforming facility under section 23-1719 to comply with the terms thereof or the provisions of the rules and regulations adopted under article 70 of this chapter, the department may revoke said permit or certificate pursuant to the provisions of article 70 of this chapter and impose upon the holder of such permit or certificate a civil penalty of up to one thousand dollars for each day the holder thereof has failed to comply with this title or a permit or

certificate issued hereunder, together with the allocated costs of the revocation and enforcement proceeding itself.

5. In addition to any civil penalty assessed by the department pursuant to subdivision four of this section, any person who knowingly violates any provision of this title, any permit or certificate granted under this title, or any order, rule, or regulation issued pursuant to this title, except where such violation is unintentional and technical, shall be guilty of a class A misdemeanor.

§ 23-1717. Training and qualification of municipal fire department personnel; strict liability.

1. The legislature finds that liquefied natural and petroleum gas, in view of its extreme volatility, high flammability, and dangerous qualities if mishandled resulting in accidental release, poses problems of the control thereof related to the lack of current training and qualification of municipal fire department personnel responsible for control and extinguishment of fire resulting from mishandling and accidental release during its storage, transportation, and conversion.

2. Within thirty days after this title shall become effective, every utility or other person subject to the jurisdiction of the public service commission and which is engaged in the storage, transportation, or conversion of liquefied natural or petroleum gas within the state shall give notice to the department that it is a person subject to this title, and shall specify by geographical description the municipality or municipalities, or parts thereof, within the state where it is handling or otherwise using liquefied natural or petroleum gas, with the nature of such use, storage, transportation, or conversion, with the amounts thereof in each location, on a monthly and annual basis, with any projected increase or decrease in the use or handling thereof at such location or locations within the state on a five year basis from date of report.

3. Within sixty days thereafter, the department, in consultation with

the municipal fire department or departments indicated to be those required to be trained and qualified under this title to control and extinguish fires related to the reported facilities and transportation of liquefied natural or petroleum gas, shall determine and report what, if any, programs are necessary to enable such municipal fire department or departments to be adequately prepared to control and extinguish such fires and to protect persons and property within their municipality or municipalities who might be subject to such danger.

4. The report of the department shall detail the capability and preparedness, or lack thereof, of such fire department or departments effectively to prevent or extinguish a fire at or related to any of the reported facilities, or in connection with the transportation of liquefied natural or petroleum gas; proposals for further training and qualification of personnel which, if implemented, would enable such fire department or departments effectively to carry out such responsibilities; and a detailed analysis of the cost of training and qualification of such municipal fire department personnel to do so, including those related to additional manpower, new or additional equipment, or training of such personnel, although not limited thereto. Such report, in its cost analysis and in making recommendations with respect thereto, shall report separately with regard to projected hiring of additional personnel, the purchase of new or additional equipment and supplies, and necessary training courses, on an initial and continuing basis, together with any other proposals in implementation of this section; and, in addition, shall make specific finding, with regard to the particular municipal fire department or departments involved, which of said proposals is or are required to be implemented to be carried out to comply with the requirements of subdivision three of this section, together with the reasonable cost thereof.

5. Notice of the department's determination with regard to implementation of the training and qualification requirements of this section and of the cost thereof shall be given to the utility or other person subject to this section under subdivision two hereof and to the municipal fire department or departments identified to be with jurisdiction under subdivision three hereof. If a hearing is requested

within thirty days, a hearing shall be held promptly with regard to the program and the cost thereof and, on the basis of the record of the hearing the department, by its commissioner, may modify the program and adjust the cost thereof to be charged against the utility, utilities, or other persons subject to this title in accordance with the provisions of subdivisions two and three of section 23-1715. Such cost, as related to the training and qualification requirements of this title may, at the option of the department, be paid to the department under subdivision three of section 23-1715, or by the utility or other person directly to the chief fiscal officer or officers of the municipality or municipalities involved pursuant to this section; and, in any event, shall be expended only on programs thus approved by the department for the purpose of carrying out the requirements of this section.

6. Upon application for an environmental safety permit under section 23-1707 or for certification of a transportation route under section 23-1713, the procedure of notification, consultation, and report and determination with regard to municipal fire department training program and cost thereof shall be integrated with the application and the determination of the department, if to grant the permit or certificate or certificates, shall include the determination thereof with regard to implementation of the training and qualification requirements of this section and the allocation of the cost thereof, with respect to the particular permit or certificate or certificates granted, to the utility or other person subject to the requirements of this title.

7. In the event that more than one utility or other person is determined to be charged with the cost of training and qualification under this section, said charge or charges may be apportioned by the department between or among them on an equitable basis related to the degree to which each is responsible, based on the degree and complexity of the cost of training and qualification involved. In no event shall the department of environmental conservation, or its commissioner, by virtue of this section, be determined to have any jurisdiction over the operation or administration of any municipal fire department reimbursed under this title and section, or over its fire fighting methods, deployment of personnel, fiscal policies, or other aspects of its

administration. The department is authorized to promulgate rules and regulations necessary to effectuate the purposes of this section.

8. The storage, transportation, and conversion of liquefied natural and petroleum gas within the state, in view of its extreme volatility, high flammability, and dangerous qualities if mishandled resulting in accidental release, is determined to be hazardous and entails strict liability on the part of any person, as defined under this title, that undertakes such activities in the state. Neither compliance with the requirements of this title, nor the exercise of due care, shall excuse any such person from liability for personal or property damage determined to be caused by the accidental release of liquefied natural or petroleum gas within the state, and neither proof of means of ignition nor distinctions between direct and consequential damage shall relieve such person of absolute liability without regard to intent or negligence for any personal or property damage thereby caused.

§ 23-1719. Non-conforming facilities; conformance to safety criteria; moratorium.

The legislature finds that existing facilities have been constructed and are in the process of being used which by reason of their construction in residential areas or in dangerous proximity to contiguous populations, or otherwise, are in violation of the terms of this act, and, having been constructed before its enactment, have not been approved in accordance with the procedures herein required. Taking into account the needs of the service areas involved, the substantial capital investment of the utilities therein, and the changes in corporate plans that compliance with this title will entail, as against the hazards posed to surrounding and contiguous areas and their populations by the potential mishandling or accidental discharge of liquefied natural or petroleum gas in its cryogenic state, the following procedure is established to conform existing facilities to the safety criteria herein prescribed, or, in the alternative, to reexamine the necessity of their use in current locations, and to require alternative siting.

1. Effective on passage hereof, and until regulations pursuant to section 23-1709 are adopted and filed, no liquefied natural or petroleum gas facility may be constructed, reconstructed, enlarged in storage capacity, or, if constructed but unused, put into actual use and operation in this state, and no environmental safety permit pursuant to section 23-1707 of this title shall be issued for such facility.

2. With regard to any non-conforming liquefied natural or petroleum gas storage or conversion facility in actual use and operation on September first, nineteen hundred seventy-six, the following special procedures shall apply:

a. On or before September first, nineteen hundred seventy-six, or the thirtieth day after the effective date of this title, whichever shall be later, the department shall notify any such non-conforming facility of the provisions of this section and of this title, and shall advise it of the procedures to be followed hereunder in terms of conformance to safety criteria or alternative siting.

b. Within thirty days after this title shall become effective, such non-conforming facility shall give the initial notice required under subdivision two of section 23-1717, specifying by geographical description the municipality or municipalities, or parts thereof, within the state within which it is handling or otherwise using liquefied natural or petroleum gas, with the nature of such use, storage, transportation, or conversion, with the amounts thereof in each location, on a monthly and annual basis, with any projected increase or decrease in the use or handling thereof at such location or locations within the state on a five year basis from date of report.

c. Within sixty days thereafter, the department shall complete the consultation and report required by subdivisions three and four of section 23-1717, and the notification required by the first sentence of subdivision five of that section. Thereafter, further proceedings under subdivision five shall be integrated with the hearing hereinafter directed to be had with regard to the non-conforming facility; and the

implementation of the balance of section 23-1717, with regard to training and qualification of municipal fire department personnel, shall be effected in accordance with the determination of the department with regard to the non-conforming facility.

d. Within one hundred and eighty days after this title shall become effective, a public hearing or hearings shall be held in the area or areas in which the non-conforming facility or facilities are located. Such hearing or hearings shall be held on sixty days' notice and as otherwise provided in subdivisions two and three of section 23-1711. Notice shall be given by the facility or facilities in accordance with subdivision three thereof, and public participation shall be afforded by appropriate location and scheduling, and the opportunity to submit oral or written statements for the record.

e. In the adjudicatory phase of the hearing or hearings, evidence may be received relating to the criteria set forth in section 23-1709 as they relate to the non-conforming facility, and with regard to the capability of municipal fire department personnel to control and extinguish fire resulting from mishandling and accidental release of liquefied natural and petroleum gas during its storage, transportation, or conversion. At the time of the notice of hearing the department shall make public its report under paragraph c of subdivision two of this section, together with all information secured by it with respect to the training and qualification of the municipal fire department or departments and their personnel to control or extinguish fires related to the use of the non-conforming facility, and additional oral testimony by the municipal fire department or departments with respect thereto shall be required at the hearing.

3. Upon the basis of the record the department shall render a decision, (a) permitting the facility to continue at the location, under such terms, conditions, or modification of procedures as the department may deem appropriate; or (b) directing discontinuance of the facility upon a showing of alternate means of meeting the service needs currently satisfied thereby, or upon a showing that the service needs currently satisfied thereby are not sufficient to outweigh the public interest in

safety within the terms of section 23-1711. Location within a residential area or in dangerous proximity to contiguous populations shall not, in and of themselves, be determinative with respect to the department determination, but shall be considered along with the other factors set forth in section 23-1709 as criteria for siting, and the information elicited before and at the hearing with respect to the training and qualification of municipal fire department personnel to control or extinguish fires related to the facility under subdivision two of this section, in determining whether or not to permit continuation of the facility at the existing location. In the event it is determined to permit continuation of the facility, it shall be under such limitations in terms of time and conditions as will permit the department currently to review the status of the facility, and to integrate its continued operation with the regulation of other facilities and activities subject to this title to be certified under sections 23-1707 and 23-1713. In the event it is determined to direct discontinuance of the facility, it may be effected over the course of a phase-out period not to exceed three years from the date of determination, in order to arrange for alternate facilities or other means of meeting approved service needs of the area currently served by the facility. In connection with the foregoing, it shall be appropriate at the hearing or hearings provided under this section to receive evidence with regard to capital investment in any such non-conforming facility, the extent of amortization and of tax writeoff thereof, adaptability for alternate use, availability of alternate siting or means of meeting demonstrated and approved service needs of the area. With regard thereto, it shall be appropriate to solicit information and recommendations from the public service commission with respect to consumer needs and the meeting thereof in economical fashion consistent with the requirements of this title, and from the state energy office, if established, with regard to state energy policy. The cost of the hearing and of allocated departmental overhead shall be assessed against the non-conforming facility pursuant to subdivisions two and three of section 23-1715. It is anticipated that any hearing or hearings held under this section with regard to non-conforming facilities will also relate to the function of the department in adopting regulations establishing criteria for the siting of liquefied natural and petroleum

gas facilities, and such shall also be considered in the allocation of expense with regard to hearing or hearings held under this section.

§ 23-1721. Hardship; petition and hearing; permit.

1. Any person, upon a showing of hardship caused by the moratorium under subdivision one of section 23-1719 may petition the department for a review of the application of the moratorium to any proposed activity subject to this title. This shall be by notice to the department of the activity proposed to be conducted, including the information related to geographical location, nature of proposed use, storage, transportation, or conversion, and proposed and projected amounts of liquefied natural or petroleum gas proposed to be used or handled as required in subdivision two of section 23-1719 and subdivision two of section 23-1717.

2. Thereafter, within thirty days after receipt of the petition, the department shall schedule a hearing upon thirty days' notice, to be held in accordance with the other requirements of paragraphs d and e of subdivision two of section 23-1719, insofar as applicable, and upon such further terms and conditions as it may establish.

3. If the proposed activity is not contrary to the policy of this title, or of any provision thereof, the department may permit the activity to continue during the moratorium, provided that permission may be revoked by the department if its terms are violated, and provided, further, that any such hardship permit issued by the department shall be in addition to, and not in lieu of such certification as may be required by any municipality within the jurisdiction of which such proposed activity will be undertaken. Cost of application and hearing shall be assessed against the applicant.

§ 23-1723. Judicial review.

Review under this title may be had in a proceeding under article

seventy-eight of the civil practice law and rules at the instance of any person aggrieved.

§ 23-1725. Preservation of jurisdiction of public service commission; consultation and coordination with commission and energy office.

Except herein as specifically provided with regard to the public safety, as legislatively determined, this title shall not otherwise affect the jurisdiction of the public service commission in the performance of its statutory responsibilities with regard to the regulation of utilities, the setting of rates, and other aspects of its jurisdiction. The department shall consult on a continuing basis with the public service commission and the state energy office, if established, in the administration of this title, and shall coordinate its administration thereof with those agencies in the interests of coordinated state energy policy.

§ 23-1727. Severability.

If any part of this title or the application thereof to any person or circumstances shall be adjudged to be invalid by a court of competent jurisdiction, such order or judgment shall be confined in its applicability to the controversy in which it was rendered, and not affect or invalidate the remainder of any provision of any section or subdivision hereof or the application of any part of the act so interpreted, or otherwise, to any other person or circumstance, and to this end the provisions of each section of the act, and of subdivisions and parts thereof, are hereby declared to be separable.

TITLE 19

OIL, GAS AND SOLUTION MINING REGULATION AND RECLAMATION FEE

Section 23-1901. Construction of title.

23-1903. Imposition of oil, gas and solution mining regulation

and reclamation fees.

§ 23-1901. Construction of title.

1. Nothing contained herein shall release a person from any obligation imposed by the provisions of this article or rules and regulations promulgated thereunder.

2. This title shall supersede all other laws enacted by local governments or agencies concerning the imposition of a fee relating to circumstances described in this title. Nothing in the preceding sentence or in this title shall be construed as superseding or in any way limiting the right of any local government to impose real property taxes pursuant to the real property tax law.

3. Except as otherwise provided in subdivision 4 of this section, the following owners shall not be subject to the fees imposed in this title:

a. The United States of America or any of its agencies or instrumentalities;

b. The state of New York or any of its agencies; and

c. Local Agencies.

4. Agencies shall be subject to the fees imposed in this title when such agencies produce oil or gas, or engage in solution mining, for sale or exchange.

§ 23-1903. Imposition of oil, gas and solution mining regulation and reclamation fees.

1. When a permit is granted to a person by the department pursuant to section 23-0305 of this article to drill a well or when a person converts a well to one subject to the oil, gas and solution mining law,

such person shall pay to the department:

a. A one hundred dollar fee to be credited to the oil and gas account established under chapter fifty-eight of the laws of nineteen hundred eighty-two; and

b. A fee in accordance with the depth drilled or expected to be drilled as set forth below:

0- 500ft. - \$ 190

501- 1000ft. - \$ 380

1001- 1500ft. - \$ 570

1501- 2000ft. - \$ 760

2001- 2500ft. - \$ 950

2501- 3000ft. - \$1,140

3001- 3500ft. - \$1,330

3501- 4000ft. - \$1,520

4001- 4500ft. - \$1,710

4501- 5000ft. - \$1,900

5001- 5500ft. - \$2,090

5501- 6000ft. - \$2,280

6001- 6500ft. - \$2,470

6501- 7000ft. - \$2,660

7001- 7500ft. - \$2,850

7501- 8000ft. - \$3,040

8001- 8500ft. - \$3,230

8501- 9000ft. - \$3,420

9001- 9500ft. - \$3,610

9501-10,000ft.- \$3,800

over 10,000ft.- \$3,800 plus \$190 for each incremental 500

feet of depth over 10,000 feet.

A person who has paid the fees described shall not be required to pay any additional fee for a well conversion. The fee for well deepening permits pertaining to wells for which a well drilling permit was issued after August twenty-fifth, nineteen hundred eighty-one, shall be calculated on the basis of the additional depth drilled.

In the event the actual depth drilled exceeds the depth expected to be drilled, an additional amount shall be paid such that the total fee paid shall be in accordance with the schedule set forth in this paragraph.

2. Upon requesting from the department any determination under the Natural Gas Policy Act, such person shall pay a fifty dollar fee per well for each such determination.

3. The department shall have the authority to establish reasonable fees by rule for closed-loop boreholes deeper than five hundred feet below the earth's surface pursuant to subdivision fifteen of section 23-0305 of this article to be credited to the oil and gas account established under chapter fifty-eight of the laws of nineteen hundred eighty-two for the purposes of environmental protection or greenhouse gas emission reduction.

TITLE 21

INTERSTATE COMPACT TO CONSERVE OIL AND GAS

Section 23-2101. Interstate compact to conserve oil and gas.

§ 23-2101. Interstate Compact to Conserve Oil and Gas.

1. The Interstate Compact to Conserve Oil and Gas, as first enacted by chapter 501 of the laws of 1941, and as re-enacted by chapter 263 of the laws of 1963, is hereby continued as follows:

INTERSTATE COMPACT TO CONSERVE OIL AND GAS

ARTICLE I

This agreement may become effective within any compacting state at any time as prescribed by that state, and shall become effective within those states ratifying it whenever any three of the states of Texas, Oklahoma, California, Kansas and New Mexico have ratified and Congress has given its consent. Any oil-producing state may become a party thereto as hereinafter provided.

ARTICLE II

The purpose of this compact is to conserve oil and gas by the prevention of physical waste thereof from any cause.

ARTICLE III

Each state bound hereby agrees that within a reasonable time it will enact laws, or if laws have been enacted, then it agrees to continue the same in force, to accomplish within reasonable limits the prevention of:

- (a) The operation of any oil well with an inefficient gas-oil ratio.
- (b) The drowning with water of any stratum capable of producing oil or gas, or both oil and gas in paying quantities.
- (c) The avoidable escape into the open air of the wasteful burning of gas from a natural gas well.
- (d) The creation of unnecessary fire hazards.
- (e) The drilling, equipping, locating, spacing or operating of a well or wells so as to bring about physical waste of oil or gas or loss in the ultimate recovery thereof.

(f) The inefficient, excessive or improper use of the reservoir energy in producing any well.

The enumeration of the foregoing subjects shall not limit the scope of the authority of any state.

ARTICLE IV

Each state bound hereby agrees that it will, within a reasonable time, enact statutes, or if such statutes have been enacted then that it will continue the same in force, providing in effect that oil produced in violation of its valid oil and/or gas conservation statutes or any valid rule, order or regulation promulgated thereunder, shall be denied access to commerce; and providing for stringent penalties for the waste of either oil or gas.

ARTICLE V

It is not the purpose of this compact to authorize the states joining herein to limit the production of oil or gas for the purpose of stabilizing or fixing the price thereof, or create or perpetuate monopoly, or to promote regimentation, but is limited to the purpose of conserving oil and gas and preventing the avoidable waste thereof within reasonable limitations.

ARTICLE VI

Each state joining herein shall appoint one representative to a commission hereby constituted and designated as THE INTERSTATE OIL COMPACT COMMISSION, the duty of which said Commission shall be to make inquiry and ascertain from time to time such methods, practices, circumstances and conditions as may be disclosed for bringing about conservation and at such intervals as said commission deems beneficial it shall report its findings and recommendations to the several states for adoption or rejection.

The commission shall have power to recommend the coordination of the exercise of the police powers of the several states within their several jurisdictions to promote the maximum ultimate recovery from the petroleum reserves of said states, and to recommend measures for the

maximum ultimate recovery of oil and gas. Said Commission shall organize and adopt suitable rules and regulations for the conduct of its business.

No action shall be taken by the Commission except:

(a) By the affirmative votes of the majority of the whole number of the compacting states, represented at any meeting, and

(b) By a concurring vote of a majority in interest of the compacting states at said meeting, such interest to be determined as follows:

Such vote of each state shall be in the decimal proportion fixed by the ratio of its daily average production during the preceding calendar half-year to the daily average production of the compacting states during said period.

ARTICLE VII

No state by joining herein shall become financially obligated to any other state, nor shall the breach of the terms hereof by any state subject such state to financial responsibility to the other states joining herein.

ARTICLE VIII

This compact shall expire September 1, 1937, but any state joining herein may, upon sixty (60) days notice, withdraw herefrom. The representatives of the signatory states have signed this agreement in a single original which shall be deposited in the archives of the Department of State of the United States, and a duly certified copy shall be forwarded to the Governor of each of the signatory states.

This compact shall become effective when ratified and approved as provided in Article I of this compact. Any oil-producing state may become a party hereto by affixing its signature to a counterpart to be similarly deposited, certified and ratified.

Done in the City of Dallas, Texas, this sixteenth day of February, 1935.

E. W. MARLAND

The Governor of the State of Oklahoma

JAMES V. ALLRED

The Governor of the State of Texas

R. L. PATTERSON

For the State of California

FRANK VESELY

E. H. WELLS

HUGH BURCH

HIRAM M. DOW

For the State of New Mexico

The following representatives recommend to their respective Governors and Legislatures the ratification of the foregoing agreement:

JOHN W. OLVEY

of Arkansas

WARWICK M. DOWNING

of Colorado

WILLIAM BELL

of Illinois

GORDON E. VAN EENANAAM

GERALD COTTER

of Michigan

RALPH J. PRYOR

E. B. SHAWVER

T. C. JOHNSON

of Kansas

2. The Governor of this state is authorized and empowered, on behalf of the state, to execute agreements for the further extension of the operation of such compact and to determine if and when it shall be for the best interests of this state to withdraw from such compact upon sixty days' notice as provided therein. In the event the Governor shall determine that the state should withdraw from such compact, he shall have full power and authority to give necessary notice and to take any and all steps necessary and proper to effect the withdrawal of this state from such compact.

3. The Commissioner shall be the official representative of this state on the Interstate Oil Compact Commission. At the direction of the commissioner, any other officer or employee of the department may serve as substitute representative in the place and stead of the commissioner. The commissioner shall consult and coordinate with the president of the New York state energy research and development authority on issues relating to state energy policy.

4. The Interstate Oil Compact Commission shall submit annually in accordance with the laws and practices of this state, to the department, for study and consideration an estimate of moneys required to administer, manage and support the commission during the ensuing fiscal year. Such estimate shall include any request for appropriation of funds by New York and shall be accompanied by a tabulation of similar requests which the commission expects to make to each other member state and the formula or factors upon which such respective requests are based.

5. The department shall include a suitable item or items of estimated expenditures for the Interstate Oil Compact Commission in the budget estimates of the department.

6. The State Comptroller is hereby authorized and empowered from time to time to examine the accounts and books of the commission, including its receipts, disbursements and such other items referring to its financial standing as such Comptroller may deem proper and to report the results of such examination to the Governor.

7. No provision of the Conservation Law, and no provision of the Environmental Conservation Law, if such provision of the Environmental Conservation Law was derived from a provision of the Conservation Law, which is inconsistent with the provisions of the Interstate Compact to Conserve Oil and Gas shall be applicable to the Interstate Oil Compact Commission or to any matter governed by the Interstate Compact to Conserve Oil and Gas.

8. Nothing in this section is intended or shall be construed to prevent or prohibit the production of oil by water induction methods

commonly called water flooding nor to require or necessitate the enactment of conservation statutes unless and until the Legislature shall determine by law that such statutes are advisable or necessary to prevent the physical waste of oil or gas.

9. The commissioner shall make such reports to the Interstate Oil Compact Commission and the Governor as he deems appropriate.

10. When the Governor on behalf of the state, executes any agreement for the extension of the operation of the compact herein set forth, he shall affix his signature thereto under a recital that such agreement is executed pursuant to the provisions of the compact, subject to the limitations and qualifications which are contained in the several subdivisions of this section and are in aid and furtherance thereof.

TITLE 23

REREFINING OF USED OIL

Section 23-2301. Definitions.

23-2303. Official encouragement for the use of rerefined oil.

23-2305. Regulations of the commissioner.

23-2307. Used oil retention facilities required; installation and maintenance; posting of notice.

23-2308. Prohibited disposal of used oil.

23-2309. Records.

23-2311. Reports.

§ 23-2301. Definitions.

For the purposes of this title:

1. The term "used oil" means all petroleum-based lubricating oils which have through use been contaminated by physical or chemical impurities which have not been removed by subsequent rerefining;

2. The term "rerefined oil" means used oil which has been refined to

remove the physical and chemical contaminants so that it shall be suitable for lube stock or fuel oil acquired through use, which by itself or when blended with new oil or additives is substantially equivalent or superior to new oil intended for the same purposes, as specified in the American Petroleum Institute's engine service classifications;

3. The term "new oil" means all oil which has been refined from virgin oil and may or may not contain additives, but has never been used, and does not include used oil or rerefined oil;

4. The term "lubricating oil" means all petroleum-based oil which:

a. is suitable for use as a lubricant, or

b. is sold for use as a lubricant, and

c. is not consumed in normal use;

5. The term "fuel oil" means all oil which has been refined, rerefined, or otherwise processed for the purpose of being burned to produce heat;

6. The term "on-premises oil changing operation" means any establishment that drains or collects used oil and replaces the used oil with new or rerefined lubricating oil;

7. The term "service establishment" means every automobile service station including gas only outlets and any other retail outlet and boat marina selling at least five hundred gallons of lubricating oil annually and having an on-premises oil changing operation;

8. The term "used oil collector" means any waste transporter as defined in title three of article twenty-seven of this chapter who controls a system which functions to retrieve or collect used oil for sale or transfer to oil rerefining facilities, or for other methods of disposal, but shall not include service establishments;

9. The term "rerefiner" means any person who rerefines used oil to remove its physical and chemical contaminants; and

10. The term "disposal" means the discharge, deposit, injection, dumping, spilling, leaking or placing of any used oil into or on any land or water so that such used oil or any related constituent thereof may enter the environment or be emitted into the air or discharged into any waters of the state including groundwaters thereof. Disposal shall include the incineration of used oil and the burning of used oil for the purpose of recovering usable energy.

11. The term "retail establishment" means every vendor that sells lubricating oil at retail in quantities in excess of one thousand gallons per year.

§ 23-2303. Official encouragement for the use of rerefined oil.

All state and local officials shall act within their authority to encourage the use of rerefined oil. Such action shall include, but not be limited to:

1. Review of any laws, rules and regulations, ordinances or specifications which exclude the use of rerefined oil products that meet the standards as specified in the American Petroleum Institute's engine service classifications for oil products; and

2. Educating the private sectors of the economy as to the merits of rerefined oil, and the need for its use in order to reduce the drain on the nation's oil reserves and minimize the disposal of used oil in ways harmful to the environment.

§ 23-2305. Regulations of the commissioner.

The commissioner shall, after holding a public hearing with due

notice, promulgate rules and regulations governing used oil collectors and rerefiners, in conformance with article twenty-seven of this chapter, to carry out the requirements of this title.

§ 23-2307. Used oil retention facilities required; installation and maintenance; posting of notice.

1. Service establishments. a. Every service establishment, and every other person, industrial operation, airport, trucking terminal, state or local government facility generating at least five hundred gallons of used oil annually, shall, no later than September first, nineteen hundred seventy-nine, provide and maintain used oil retention facilities, properly sheltered and protected to prevent spillage, seepage or discharge of used oil into storm or sanitary sewers or into or on any lands or waters of the state including groundwaters thereof. The used oil shall be periodically removed from the retention facility by a waste transporter duly permitted by the department under the provisions of title three of article twenty-seven of this chapter. Waste transporters may dispose of used oil only by delivery to a rerefiner except where otherwise permitted by the commissioner. Rules and regulations defining proper design and maintenance of a retention facility may be promulgated by the commissioner.

b. An owner or an employee of every service establishment who is present on the premises shall be required to accept during the normal business hours of the establishment and at no charge, used oil in quantities not exceeding five gallons per day from any individual; provided, however, this requirement to accept does not apply if the petroleum-based lubricating oil brought to the establishment is determined to have been contaminated through other than ordinary and normal use, and does not apply if the used oil retention facility is temporarily filled to capacity; and provided further that such establishment need only accept used oil in screw-top, rigid, closed containers. No such establishment shall impose upon a customer a separate charge or fee for accepting or disposing of used oil; nor shall such establishment impose any charge upon any individual who is not a

customer for such service.

c. Every service establishment shall post a conspicuous sign, open to public view, stating: "WE ACCEPT USED OIL FOR RECYCLING AT NO CHARGE". Such establishment may additionally state, on the same sign or an additional sign, that used oil is accepted only during normal business hours and may state such hours.

2. Retail establishments. a. Unless exempted, every retail establishment shall provide and maintain used oil retention facilities, properly sheltered and protected to prevent spillage, seepage or discharge of used oil into storm or sanitary sewers or into or on any lands or waters of the state including groundwater thereof. The used oil shall be periodically removed from the retention facility by a waste transporter duly permitted by the department under the provisions of title three of article twenty-seven of this chapter. Waste transporters may dispose of used oil only by delivery to a rerefiner except where otherwise permitted by the commissioner. Rules and regulations defining proper design and maintenance of a retention facility may be promulgated by the commissioner.

b. Every retail establishment shall be required to accept at no charge, used oil in quantities not exceeding five gallons per day from any individual during normal business hours of the establishment; provided, however, this requirement to accept does not apply if the petroleum-based lubricating oil brought to the establishment is determined to have been contaminated through other than ordinary and normal use; and provided further, that such establishment need only accept used oil in screw-top, rigid, closed containers.

c. Exemptions. Pursuant to rules and regulations promulgated by the department for the implementation of this section, a retail establishment shall not be required to accept used oil if:

(1) the used oil retention facility is temporarily filled to capacity; or

(2) the retail establishment has a current contract with another retail establishment, municipality or service establishment with an

on-premises used oil retention facility, for the collection of the contracting retail establishment's used lubricating oil. In counties or cities with a population of one million or more the distance between such contracting retail establishment and the contractor shall not exceed eight miles. In all other areas of the state the contracting retail establishment and the contractor shall be within the same or adjacent towns or cities; or

(3) the retail establishment has been granted a hardship waiver by the commissioner for the inability to comply with this section.

d. Signs required. (1) Every retail establishment with an on-premises used oil retention facility shall post a conspicuous sign, open to public view, stating "WE ACCEPT USED OIL FOR RECYCLING AT NO CHARGE". Such establishment may additionally state, on the same sign or an additional sign, that used oil is accepted only during normal business hours, and may state such hours.

(2) Every retail establishment that contracts with another retail establishment or service establishment, shall post a conspicuous sign, open to the public view stating: "USED OIL FOR RECYCLING WILL BE ACCEPTED BY (name of contracted establishment) AT (Address of contracted establishment) AT NO CHARGE". Such establishment may additionally state, on the same sign or an additional sign, that used oil is accepted only during normal business hours of the contracted establishment, and may state such hours.

3. For the purposes of this section, so long as a service or retail establishment shall maintain its used oil retention facilities in compliance with the provisions of this section and any rules and regulations promulgated hereunder and shall deliver collected quantities of used oil to a duly permitted waste transporter or dispose of the used oil as otherwise authorized or permitted by the commissioner, such service establishment shall be exempt from the provisions of titles seven and nine of article twenty-seven and article seventy-two of this chapter.

§ 23-2308. Prohibited disposal of used oil.

1. No person shall engage in the improper disposal of used oil. Used oil shall only be deposited in an available used oil retention facility or disposed of as otherwise authorized or permitted by the commissioner.

The provisions of this section shall not apply to the use of used oil for maintenance or lubrication of agricultural equipment.

2. No person shall sell or offer for sale a used oil disposal kit or product which is comprised of absorbent material into which the lubricating oil from a vehicle is drained when performing an oil change and which is intended for disposal into the solid waste stream rather than for reuse or recycling.

§ 23-2309. Records.

Every used oil collector and rerefiner shall maintain complete records, in conformance with article twenty-seven of this chapter.

§ 23-2311. Reports.

The commissioner shall in consultation with the commissioners of the state energy office and transportation, submit a report to the governor and legislature not later than April first of each year, containing, but not limited to, the following information:

1. The amount of lubricating oil sold throughout the state in the previous year;

2. The amount and location of used oil collected and the amount received in the previous year;

3. The significance of used oil as a contributor to air and water pollution and other environmental problems;

4. The problems of the oil rerefining industry in carrying out the purposes of this title, and possible solutions thereto, including but not limited to, new technological requirements, marketing techniques and deficiencies and suggested tax incentive programs;

5. The estimated impact which the provisions of this title and other relevant provisions of law have had upon the conservation of petroleum resources; and

6. Proposals for further legislative action to aid in carrying out the purposes of this title.

TITLE 24

NEW YORK STATE OIL ENERGY CONSERVATION PROGRAM

Section 23-2401. Legislative intent.

23-2402. New York state oil energy conservation program.

§ 23-2401. Legislative intent.

The legislature finds and declares that the conservation of the state's oil reserves will be of broad benefit to the state. Through utilization of modern well closure technologies, oil will be conserved for the state's future. The legislature further finds that such closure will provide an increased supply of high grade crude oil used for the development of advanced lubricants which are crucial in the promotion of the use of high efficiency engines. In recognition of the potential energy conservation benefits to be accrued from the closure of such wells, the legislature declares that a program directed toward the implementation of modern well closure technologies on abandoned oil wells will provide energy, economic and environmental benefits to the state.

§ 23-2402. New York state oil energy conservation program.

1. The department shall actively implement a modern oil well closure technologies program which shall assist in the implementation of closure technologies on abandoned oil wells and well fields in the state. The program shall:

a. promote the implementation of plugging closure technologies on abandoned oil wells; and

b. identify special needs and problems facing firms implementing well plugging technologies on abandoned oil wells and recommend approaches and solutions to address such identified needs and problems.

2. The program shall provide for grants for programs of oil well plugging on abandoned oil wells by persons, firms, or corporations located in the state of New York.

3. Applications for grants under this program shall be evaluated based upon the following criteria:

a. the technical feasibility of the proposals;

b. the energy conservation potential of such applications;

c. the extent such closure will provide for high grade crude oil utilized for the development of high efficiency lubricants;

d. the environmental benefits to be accrued from the utilization of such technologies; and

e. the possibilities for dissemination of the closure technologies to other firms.

4. The department, in carrying out the provisions of this title, shall coordinate, where feasible, with the state energy office.

NEW YORK STATE MINED LAND RECLAMATION LAW

Section 23-2701. Short title.

23-2703. Declaration of policy.

23-2705. Definitions.

23-2709. Administration of title.

23-2711. Permits.

23-2713. Mined land-use plan.

23-2715. Financial security for reclamation.

23-2719. Enforcement.

23-2721. Judicial review.

23-2722. Interstate mining compact.

23-2723. Severability.

§ 23-2701. Short title.

This title shall be known and may be cited as the "New York State Mined Land Reclamation Law".

§ 23-2703. Declaration of policy.

1. The legislature hereby declares that it is the policy of this state to foster and encourage the development of an economically sound and stable mining industry, and the orderly development of domestic mineral resources and reserves necessary to assure satisfaction of economic needs compatible with sound environmental management practices. The legislature further declares it to be the policy of this state to provide for the management and planning for the use of these non-renewable natural resources and to provide, in conjunction with such mining operations, for reclamation of affected lands; to encourage productive use including but not restricted to the planting of forests, the planting of crops for harvest, the seeding of grass and legumes for grazing purposes, the protection and enhancement of wildlife and aquatic resources, the establishment of recreational, home, commercial, and industrial sites; to provide for the conservation, development, utilization, management and appropriate use of all the natural resources

of such areas for compatible multiple purposes; to prevent pollution; to protect and perpetuate the taxable value of property; to protect the health, safety and general welfare of the people, as well as the natural beauty and aesthetic values in the affected areas of the state.

2. For the purposes stated herein, this title shall supersede all other state and local laws relating to the extractive mining industry; provided, however, that nothing in this title shall be construed to prevent any local government from:

a. enacting or enforcing local laws or ordinances of general applicability, except that such local laws or ordinances shall not regulate mining and/or reclamation activities regulated by state statute, regulation, or permit; or

b. enacting or enforcing local zoning ordinances or laws which determine permissible uses in zoning districts. Where mining is designated a permissible use in a zoning district and allowed by special use permit, conditions placed on such special use permits shall be limited to the following:

(i) ingress and egress to public thoroughfares controlled by the local government;

(ii) routing of mineral transport vehicles on roads controlled by the local government;

(iii) requirements and conditions as specified in the permit issued by the department under this title concerning setback from property boundaries and public thoroughfare rights-of-way natural or man-made barriers to restrict access, if required, dust control and hours of operation, when such requirements and conditions are established pursuant to subdivision three of section 23-2711 of this title;

(iv) enforcement of reclamation requirements contained in mined land reclamation permits issued by the state; or

c. enacting or enforcing local laws or ordinances regulating mining or the reclamation of mines not required to be permitted by the state; or

d. enacting or enforcing local laws or ordinances requiring the

monitoring of groundwater impacts resulting from mining or the reclamation of mines within counties with a population of one million or more which draw their primary source of drinking water for a majority of county residents from a designated sole source aquifer.

3. No agency of this state shall consider an application for a permit to mine as complete or process such application for a permit to mine pursuant to this title, within counties with a population of one million or more which draw their primary source of drinking water for a majority of county residents from a designated sole source aquifer, if local zoning laws or ordinances prohibit mining uses within the area proposed to be mined.

§ 23-2705. Definitions.

As used in this title, unless the context otherwise requires:

1. "Abandoned" means the cessation of mining and reclamation activities on land affected by mining without prior notification to the department of such cessation of activities or without describing such cessation in a mined land-use plan approved by the department, and after opportunity to be heard.

2. "Affected land" and "land affected by mining" means the sum of that surface area of land or land under water which: (i) has been disturbed by mining since April first, nineteen hundred seventy-five and not been reclaimed, and (ii) is to be disturbed by mining during the term of the permit to mine.

3. "Applicant" means that person making application to the department for a mining permit.

4. "Haulageway" means all roads utilized for mining purposes, together with that area of land over which material is transported, that are located within the permitted area.

5. "Mine" means any excavation from which a mineral is to be produced for sale or exchange, or for commercial, industrial or municipal use; all haulageways and all equipment above, on or below the surface of the ground used in connection with such excavation, and all lands included in the life of the mine review by the department.

6. "Mined land-use plan" means a document, consisting of a mining plan and a reclamation plan, which describes proposals for conduct of the applicant's mining operation and reclamation of the land to be mined to achieve the purposes of this title.

7. "Mineral" means any naturally formed, usually inorganic, solid material located on or below the surface of the earth. For the purposes of this title, peat and topsoil shall be considered minerals.

8. "Mining" means the extraction of overburden and minerals from the earth; the preparation and processing of minerals, including any activities or processes or parts thereof for the extraction or removal of minerals from their original location and the preparation, washing, cleaning, crushing, stockpiling or other processing of minerals at the mine location so as to make them suitable for commercial, industrial, or construction use; exclusive of manufacturing processes, at the mine location; the removal of such materials through sale or exchange, or for commercial, industrial or municipal use; and the disposition of overburden, tailings and waste at the mine location. "Mining" shall not include the excavation, removal and disposition of minerals from construction projects, exclusive of the creation of water bodies, or excavations in aid of agricultural activities.

9. "Mining plan" means a description of the applicant's mining operation which shall include maps, plans, written materials and other documents as required by the department.

10. "Overburden" means all of the earth, vegetation and other materials which lie above or alongside a mineral deposit.

11. "Permittee" means any person who holds a valid mining permit from

the department for the boundaries of the land identified in the mined land-use plan.

12. "Person" means any individual, public or private corporation, political subdivision, government agency, department or bureau of the state, municipality, industry, partnership, association, firm, trust, estate or any other legal entity whatsoever.

13. "Person engaged in mining" means a person who is subject to this title but who is mining without a mining permit issued by the department.

14. "Reclamation" means the conditioning of the affected land to make it suitable for any uses or purposes consistent with the provisions of this title.

15. "Reclamation plan" means a description of operations to be performed by the applicant to reclaim the land to be mined over the life of the mine. The reclamation plan shall include maps, plans, the schedule for reclamation, written material and other documents as required by the department.

16. "Spoil" means any waste material removed from its natural place in the process of mining and all waste material directly connected with the cleaning and preparation of any minerals.

17. "Tailings" means material of inferior quality or value resulting from the removal, preparation or processing of minerals.

§ 23-2709. Administration of title.

1. The department shall have and be entitled to exercise the following powers and duties:

(a) to issue permits in accordance with the criteria set forth in this article and the rules and regulations promulgated thereunder;

(b) to administer and enforce the provisions of this title and any

rule or regulation promulgated thereunder or order issued pursuant thereto;

(c) to establish environmental standards and criteria for mining and reclamation of the affected land to achieve the purposes of this title;

(d) to order, pursuant to section 71-0301 of this chapter, an immediate suspension of mining or reclamation operations or operations incidental or appurtenant thereto whenever such operations are being carried on in violation of this title or of rules, regulations and orders adopted pursuant thereto;

(e) to conduct investigations and obtain data with respect to research experiments and demonstrations, and to collect and disseminate information regarding mining and reclamation;

(f) to accept grants or funds for purposes of administration of this title and research into the fields of mining and land reclamation;

(g) to cooperate with any other governmental entity to further the purposes of this title;

(h) to contract with the soil and water conservation district in the county where a mine is located to achieve the purposes of this title;

(i) to allow, upon agreement by the department and the permittee, the reclamation of unreclaimed land affected by mining prior to April first, nineteen hundred seventy-five, as a substitute for reclamation of land affected by mining after that date, provided that a net environmental benefit results from such substitution; and

(j) to determine, after notice and an opportunity for a hearing, if a mining operation has been abandoned.

2. This title shall not apply to the commissioner of general services acting with respect to lands under water pursuant to the public lands law.

3. The state geological survey shall be the state agency responsible for the collection of mineral production information for the state in association with the United States bureau of mines. The state geological survey shall also continue to be the state agency responsible for the conduct of mineral resource investigations and inventories. Such information shall be made available to the department upon request and the survey shall have access to any records of the department collected

in conjunction with the administration of this title.

§ 23-2711. Permits.

1. After September first, nineteen hundred ninety-one, any person who mines or proposes to mine from each mine site more than one thousand tons or seven hundred fifty cubic yards, whichever is less, of minerals from the earth within twelve successive calendar months or who mines or proposes to mine over one hundred cubic yards of minerals from or adjacent to any body of water not subject to the jurisdiction of article fifteen of this chapter or to the public lands law shall not engage in such mining unless a permit for such mining operation has been obtained from the department. A separate permit shall be obtained for each mine site.

2. Applications for permits may be submitted for annual terms not to exceed five years. A complete application for a new mining permit shall contain the following:

- (a) completed application forms;
- (b) a mined land-use plan;
- (c) a statement by the applicant that mining is not prohibited at that location; and
- (d) such additional information as the department may require.

3. Upon receipt of a complete application for a mining permit, for a property not previously permitted pursuant to this title, a notice shall be sent by the department, by certified mail, to the chief administrative officer of the political subdivision in which the proposed mine is to be located (hereafter, "local government"). Such notice will be accompanied by copies of all documents which comprise the complete application and shall state whether the application is a major project or a minor project as described in article seventy of this chapter.

(a) The chief administrative officer may make a determination, and notify the department and applicant, in regard to:

- (i) appropriate setbacks from property boundaries or public

thoroughfare rights-of-way,

(ii) manmade or natural barriers designed to restrict access if needed, and, if affirmative, the type, length, height and location thereof,

(iii) the control of dust,

(iv) hours of operation, and

(v) whether mining is prohibited at that location.

Any determination made by a local government hereunder shall be accompanied by supporting documentation justifying the particular determinations on an individual basis. The chief administrative officer must provide any determinations, notices and supporting documents according to the following schedule:

(i) within thirty days after receipt for a major project,

(ii) within thirty days after receipt for a minor project.

(b) If the department finds that the determinations made by the local government pursuant to paragraph (a) of this subdivision are reasonable and necessary, the department shall incorporate these into the permit, if one is issued. If the department does not agree that the determinations are justifiable, then the department shall provide a written statement to the local government and the applicant, as to the reason or reasons why the whole or a part of any of the determinations was not incorporated.

(c) A proposed mine of five acres or greater total acreage, regardless of length of the mining period, shall be a major project. The department shall, by regulation, provide a minimum thirty day public comment period on all permit applications for mined land reclamation permits classified as major projects.

4. Upon approval of the application by the department and receipt of financial security as provided in section 23-2715 of this title, a permit shall be issued by the department. Upon issuance of a permit by the department, the department shall forward a copy thereof by certified mail, to the chief executive officer of the county, town, village, or city in which the mining operation is located. The department may include in permits such conditions as may be required to achieve the purposes of this title.

5. A permit issued pursuant to this title or a certified copy thereof, must be publicly displayed by the permittee at the mine and must at all times be visible, legible, and protected from the elements.

6. The department may suspend or revoke a permit to mine for repeated or willful violation of any of the terms of the permit or provisions of this title or for repeated or willful deviation from those descriptions contained in the mined land-use plan. The department may refuse to renew a permit upon a finding that the permittee is in repeated or willful violation of any of the terms of the permit, this title or any rule, regulation, standard, or condition promulgated thereto.

7. Nothing in this title shall be construed as exempting any person from the provisions of any other law or regulation not otherwise superseded by this title.

8. Notwithstanding any other provision of law, counties, cities, towns and villages shall be exempted from the fees for the permit, application, amendment and renewal required by this article.

9. Counties, cities, towns and villages shall not be required to obtain a permit if such county, city, town or village mines or proposes to mine from any mine site less than one thousand tons or seven hundred fifty cubic yards, whichever is less, of minerals from the earth within twelve successive calendar months and which does not require a permit pursuant to title five of article fifteen of this chapter.

10. The applicant, permittee or, in the event no application has been made or permit issued, the person engaged in mining shall have the primary obligation to comply with the provisions of this title as well as the conditions of any permit issued thereunder.

11. Permits issued pursuant to this title shall be renewable. A complete application for renewal shall contain the following:

- (a) completed application forms;
- (b) an updated mining plan map consistent with paragraph (a) of

subdivision one of section 23-2713 of this title and including an identification of the area to be mined during the proposed permit term;

- (c) a description of any changes to the mined land-use plan; and
- (d) an identification of reclamation accomplished during the existing permit term.

12. The procedure for transfer of a permit issued pursuant to this title is the procedure for permit modification pursuant to article seventy of this chapter.

12-a. (a) Notwithstanding any provision of this section to the contrary, any person who engages in or proposes to engage in bluestone mining exploration shall not commence such exploration unless a written authorization for such exploration has been obtained from the department. The department may grant an authorization for bluestone mining exploration for a period of at least one hundred eighty days and not to exceed one year where the land affected by mining will not exceed one acre, and is not adjacent to any body of water. Bluestone to be removed from the site may not exceed five hundred tons in twelve successive calendar months and any overburden shall remain on the one acre site at all times. As used in this subdivision, the term "bluestone" means quartz/feldspathic sandstone of Devonian age, which is easily separated along bedding planes.

(b) Only persons with five or fewer employees shall be eligible to apply for an authorization for bluestone mining exploration, provided, however that a small business shall be eligible to apply on behalf of such a person. A person may possess no more than five authorizations for bluestone mining exploration at any one time, and no such authorizations shall be for adjacent sites. As used in this paragraph, "small business" means any business which is resident in this state, independently owned and operated, not dominant in its field, and employing not more than one hundred individuals.

(c) An application for authorization must be submitted on a form prescribed by the department at least forty-five days before exploration and removal of bluestone is expected to commence. The requirements of such application shall include, but not be limited to, a description of the proposed activity, a map showing the area to be affected by mining,

with the location of the one acre site on which mining activities are proposed and a statement that such mining activities conform with local zoning, copies of any local permits, and measures to control erosion of sediment and prevent contamination of groundwater or adverse impacts to aquifers. Upon receipt of a complete application for bluestone mining exploration authorization, for a property not previously authorized pursuant to this subdivision, a notice shall be sent by the department, by certified mail, to the chief administrative officer of the political subdivision in which the proposed bluestone mine is to be located. Such notice shall be accompanied by copies of all documents which comprise the complete application. The chief administrative officer may make a determination within thirty days after receipt accompanied by supporting documentation justifying the particular determinations on an individual basis pursuant to subparagraphs (i), (ii), (iii), (iv) and (v) of paragraph a of subdivision three of this section.

(d) An authorization for bluestone mining exploration issued pursuant to this subdivision must be publicly displayed by the holder at the one acre site and must at all times be visible, legible and protected from the elements.

(e) The person engaged in bluestone mining exploration shall complete reclamation, in accordance with requirements set forth by the department, no later than one year from the date of authorization by the department unless the person engaged in mining obtains a renewal of the authorization or a permit pursuant to this title. An authorization issued pursuant to this section may be renewed for an additional one year term upon application to the department at least thirty days prior to the expiration of the authorization. The total authorization period shall not exceed two years. Before the department may issue a bluestone mining exploration authorization, the applicant shall furnish acceptable financial security. Department review of acceptable financial security shall be governed by the provisions set forth in section 23-2715 of this title and the regulations promulgated pursuant to such section. There shall be no fee for such authorization.

(f) On or before March fifteenth, two thousand eight, the department shall submit a report to the governor and legislature regarding bluestone mining exploration in the state. Such report shall list the sites, including locations of sites, and detrimental environmental

impacts, if any, an assessment as to the degree to which the adoption of this subdivision benefits the environment, as well as an assessment of the enforcement activities undertaken against individuals authorized pursuant to this subdivision.

13. The rules and regulations adopted by the department to implement this title and the provisions of article seventy and rules and regulations adopted thereunder shall govern permit applications, renewals, modifications, suspensions and revocations under this title.

§ 23-2713. Mined land-use plan.

1. All mining and reclamation activities on the affected land shall be conducted in accordance with an approved mined land-use plan. The approved mined land-use plan shall consist of both a mining and a reclamation plan, and any other information which the department deems necessary in order to achieve the purposes of this title.

(a) The mining plan shall consist of a written and graphic description of the proposed mining operation, including the boundaries of the land controlled by the applicant, the outline of potential affected acreage and the general sequence of areas to be mined through successive permit terms. The graphic description shall include the location of the mine and shall identify the land affected by mining after April first, nineteen hundred seventy-five, including but not limited to areas of excavation; areas of overburden, tailings, and spoil; areas of topsoil and mineral stock piles; processing plant areas; haulageways; shipping and storage areas; drainage features and water impoundments. The written description of the plan shall include the applicant's mining method and measures to be taken to minimize adverse environmental impacts resulting from the mining operation.

(b) The reclamation plan shall consist of a graphic and written description of the proposed reclamation. The graphic description shall include maps and cross sections which illustrate the final physical state of the reclaimed land. The written description of the plan shall describe the manner in which the affected land is to be reclaimed, and a schedule for performing such reclamation.

(c) A draft environmental impact statement prepared pursuant to article eight of this chapter may be submitted in lieu of a mined land-use plan if the department determines that it conforms to the requirements of this section and the rules and regulations promulgated pursuant thereto.

(d) The department may, after notice and an opportunity for a hearing, impose a reclamation plan in the absence of an approved reclamation plan or upon a finding of noncompliance with or failure of an approved reclamation plan.

2. The reclamation of all affected land shall be completed in accordance with the schedule contained in the approved mined land-use plan pertaining thereto. The schedule, where possible, shall provide for orderly, continuing reclamation concurrent with mining. The permittee shall submit to the department a notice of termination of mining within thirty days after such termination. Reclamation of the affected land shall be completed within a two year period after mining is terminated, as determined by the department, unless the department deems it in the best interest of the people of the state to allow a longer period for reclamation. The permittee shall submit to the department a notice of completion of reclamation within thirty days of such completion. If the department fails to approve or disapprove the adequacy of reclamation within ninety days after receipt of the notice of completion of reclamation, the permittee may notify the department of such failure by means of certified mail return receipt requested addressed to the commissioner. If within thirty days after receipt of such notice, the department fails to mail a decision, the permittee shall be relieved of the obligation to maintain financial security in respect to reclamation; provided, however, nothing herein shall relieve the permittee of the obligation to accomplish adequate reclamation. The permittee shall file periodic reports at such times as the department shall require, indicating areas for which reclamation has been completed. The department shall inspect such areas and notify the permittee whether the reclamation is in accordance with the approved plan or whether there are deficiencies that must be corrected.

§ 23-2715. Financial security for reclamation.

1. Before the department may issue a permit, the applicant, unless exempt, shall furnish financial security to ensure the performance of reclamation as provided in the approved mined land-use plan and naming the state as beneficiary. Financial security shall be in the form of a bond from a corporate surety licensed to do business as such in the state or any other form the department may deem acceptable. Any interest accruing as a result of such security shall be the exclusive property of the permittee.

2. The department shall determine the amount, condition, and terms of the financial security. The amount shall be based upon the estimated cost of reclaiming the affected land, which shall be based on information contained in the permit application and upon such information as an investigation by the department may disclose.

3. The financial security shall remain in full force and effect until the department has approved the reclamation. At the discretion of the department, the permittee may secure the release of that portion of the financial security for affected land on which reclamation has been completed and approved by the department.

4. If the financial security shall for any reason be cancelled, within thirty days after receiving notice thereof, the permittee shall provide a valid replacement under the same conditions as described in this section. Failure to provide a replacement bond within such period may, at the discretion of the commissioner, result in the immediate suspension of the mining permit by the department.

5. If a permit is suspended or revoked, the department may require the permittee to commence reclamation upon thirty days notice.

6. If the permittee fails to commence or to complete the reclamation as required, the department may attach the financial security furnished by the permittee. In any event, the full cost of completing reclamation shall be the personal liability of the permittee and/or the person

engaged in mining and the department, acting by the attorney general, may bring suit to recover all costs to secure the reclamation not covered by the financial security. The materials, machinery, implements and tools of every description which may be found at the mine, or other assets of the permittee and/or the person engaged in mining shall be subject to a lien of the department for the amount expended for reclamation of affected lands and shall not be removed without the written consent of the department. Such lien may be foreclosed by the attorney general in the same manner as a mechanic's lien. Any and all moneys recovered shall be deposited in the environmental regulatory account pursuant to section 72-1009 of this chapter.

7. Political subdivisions, municipalities, the United States and any of its agencies and agencies of the state shall be exempt from the requirements of this section.

§ 23-2719. Enforcement.

The provisions of this title and any rules and regulations promulgated thereunder shall be enforced pursuant to title 13, article 71 of this chapter.

§ 23-2721. Judicial review.

Any act, omission, determination or order of the department or of any officer or employee thereof, pursuant to or within the scope of this title, may be reviewed in accordance with article seventy-eight of the civil practice law and rules.

§ 23-2722. Interstate mining compact.

The "interstate mining compact" is hereby enacted into law and entered into by this state with all other states legally joining therein in the form substantially as follows:

THE INTERSTATE MINING COMPACT
ARTICLE I
POLICIES AND PURPOSES

There is created the "interstate mining compact".

1.1 The party states find that:

(a) Mining and the contributions thereof to the economy and well-being of every state are of basic significance.

(b) The effects of mining on the availability of land, water and other resources for other uses present special problems which properly can be approached only with due consideration for the rights and interests of those engaged in mining, those using or proposing to use these resources for other purposes, and the public.

(c) Measures for the reduction of the adverse effects of mining on land, water and other resources may be costly and the devising of means to deal with them are of both public and private concern.

(d) Such variables as soil structure and composition, physiography, climatic conditions, and the needs of the public make impracticable the application to all mining areas of a single standard for the conservation, adaption, or restoration of mined land, or the development of mineral and other natural resources, but justifiable requirements of law and practice relating to the effects of mining on land, water, and other resources may be reduced in equity or effectiveness unless they pertain similarly from state to state for all mining operations similarly situated.

(e) The states are in a position and have the responsibility to assure that mining shall be conducted in accordance with sound conservation principles, and with due regard for local conditions.

1.2 The purposes of this compact are to:

(a) Advance the protection and restoration of land, water and other resources affected by mining.

(b) Assist in the reduction or elimination or counteracting of pollution or deterioration of land, water and air attributable to mining.

(c) Encourage, with due recognition of relevant regional, physical,

and other differences, programs in each of the party states which will achieve comparable results in protecting, conserving, and improving the usefulness of natural resources, to the end that the most desirable conduct of mining and related operations may be universally facilitated.

(d) Assist the party states in their efforts to facilitate the use of land and other resources affected by mining, so that such use may be consistent with sound land use, public health, and public safety, and to this end to study and recommend, wherever desirable, techniques for the improvement, restoration or protection of such land and other resources.

(e) Assist in achieving and maintaining an efficient and productive mining industry and in increasing economic and other benefits attributable to mining.

ARTICLE II DEFINITIONS

As used in this compact, unless the context clearly requires a different construction:

2.1 "Mining" means the breaking of the surface soil in order to facilitate or accomplish the extraction or removal of minerals, ores, or other solid matter, any activity or process constituting all or part of a process for the extraction or removal of minerals, ores, and other solid matter from its original location, and the preparation, washing, cleaning, or other treatment of minerals, ores, or other solid matter so as to make them suitable for commercial, industrial, or construction use; but shall not include those aspects of deep mining not having significant effect on the surface, and shall not include excavation or grading when conducted solely in aid of on site farming or construction.

2.2 "State" means a state of the United States, the District of Columbia, and the commonwealth of Puerto Rico, or a territory or possession of the United States.

ARTICLE III THE COMMISSION

3.1 There is created the "interstate mining commission". The commission consists of one voting member from each state. The governor

of each party state shall notify the commission in writing of the member and any alternates. An alternate may act on behalf of the member only in the member's absence. The method for selection and the expenses of each commission member shall be the responsibility of the member's respective state.

3.2 Each commission member is entitled to one vote. No action of the commission is binding unless a majority of the total membership cast their votes in the affirmative.

3.3 The commission shall elect annually from among its members a chairperson. The commission shall adopt and publish, in convenient form, by-laws, and policies which are not inconsistent with this compact, including procedure in regard to notice, conduct and recording of meetings; access by the public to records; provision of information to the public; conduct of adjudicatory hearings; and issuance of decisions.

3.4 The commission shall meet at least once annually and shall also meet upon the call of the chairperson or a commission member.

3.5 All meetings of the commission shall be open to the public with reasonable advance notice. The commission may, by majority vote, close a meeting to the public for the purpose of considering sensitive personnel or legal strategy matters; however, all commission actions and decisions shall be made in open meetings and appropriately recorded.

3.6 The commission may establish advisory committees for the purpose of advising the commission on any matters pertaining to mining.

3.7 The office of the commission shall be in a party state. The commission may appoint or contract for and compensate such limited staff necessary to carry out its duties and functions. The staff shall serve at the commission's pleasure with the exception that staff hired as the result of securing federal funds shall be hired and governed under applicable federal statutes and regulations. In selecting any staff, the commission shall assure that the staff has adequate experience and formal training to carry out the functions assigned to it by the

commission.

3.8 The commission shall:

(a) Receive and act on the petition of a non-party state to become an eligible state.

(b) Submit an annual report to, and otherwise communicate with, the governors and the appropriate officers of the legislative bodies of the commission.

(c) Hear, negotiate, and, as necessary, resolve by final decision disputes which may arise between the party states regarding this compact.

ARTICLE IV

BUDGET

4.1 The commission shall submit to each party state a budget of its estimated expenditures for such period as may be required by the laws of that party state for presentation to the legislature thereof.

4.2 Each of the commission's budgets of estimated expenditures shall contain specific recommendations of the amount or amounts to be appropriated by each of the party states. The total amount of appropriations requested under any such budget shall be apportioned among the party states as follows: one-half in equal shares, and the remainder in proportion to the value of minerals, ores, and other solid matter mined. In determining such values, the commission shall employ such available public source or sources of information as, in its judgment, present the most equitable and accurate comparisons among the party states. Each of the commission's budgets of estimated expenditures and requests for appropriations shall indicate the source or sources used in obtaining information concerning value of minerals, ores, and other solid matter mined.

4.3 The commission shall keep accurate accounts of all receipts and disbursements. The receipts and disbursements of the commission shall be subject to the audit and accounting procedures established under its by-laws. All receipts and disbursements of funds handled by the commission shall be audited yearly by a qualified public accountant and

the report of the audit shall be included in and become part of the annual report of the commission.

4.4 The commission may accept for any of its purposes and functions and may utilize and dispose of any donations, grants of money, equipment, supplies, materials and services from any state or the United States (or any subdivision or agency thereof), or interstate agency, or from any institution, person, firm or corporation. The nature, amount and condition, if any, attendant upon any donation or grant accepted or received by the commission, together with the identity of the donor, grantor or lender, shall be detailed in the annual report of the commission.

4.5 The commission is a legal entity separate and distinct from the party states and is liable for its actions as a separate and distinct legal entity. Liabilities of the commission are not liabilities of the party state. Members of the commission are not personally liable for actions taken by them in their official capacity.

(a) Nothing in this compact alters liability for any act, omission, course of conduct or liability resulting from any casual or other relationships.

(b) Any person aggrieved by a final decision of the commission may obtain judicial review of such decision in any court of jurisdiction by filing in such court a petition for review within sixty days after the commission's final decision.

ARTICLE V POWERS

5.1 In addition to any other powers conferred upon the interstate mining commission, such commission shall have power to:

(a) Study mining operations, processes and techniques for the purpose of gaining knowledge concerning the effects of such operation, processes and techniques on land, soil, water, air, plant and animal life, recreation, and patterns of community or regional development or change.

(b) Study the conservation, adaption, improvement and restoration of land and related resources affected by mining.

(c) Make recommendations concerning any aspect or aspects of law or

practice and governmental administration dealing with matters within the purview of this compact.

(d) Gather and disseminate information relating to any of the matters within the purview of this compact.

(e) Cooperate with the federal government and any public or private entities having interest in any subject coming within the purview of this compact.

(f) Consult, upon the request of a party state and within resources available therefor, with the officials of such state in respect to any problems within the purview of this compact.

(g) Study and make recommendations with respect to any practice, process, techniques, or course of action that may improve the efficiency of mining or the economic yield from mining operations.

(h) Study and make recommendations relating to the safeguarding of access to resources which are or may become the subject of mining operations to the end that the needs of the economy for the products of mining may not be adversely affected by unplanned or inappropriate use of land and other resources containing minerals or otherwise connected with actual or potential mining sites.

ARTICLE VI STATE PROGRAMS

6.1 Each party state agrees that within a reasonable time, it will formulate and establish an effective program for the conservation and use of mined land, by the establishment of standards, enactment of laws, or the continuing of the same in force, to accomplish:

(a) The protection of the public and the protection of adjoining, and other, landowners from damage to their lands and the structures and other property thereon resulting from the conduct of mining operations or the abandonment or neglect of land and property formerly used in the conduct of such operations.

(b) The conduct of mining and the handling of refuse and other mining wastes in ways that will reduce adverse effects on the economic, residential, recreational or aesthetic value and utility of land and water.

(c) The institution and maintenance of suitable programs of adaption, restoration, and rehabilitation of mined lands.

(d) The prevention, abatement and control of water, air and soil pollution resulting from mining, present, past and future.

ARTICLE VII

ENTRY INTO FORCE AND WITHDRAWAL

7.1 This compact shall enter into force when enacted into law by any four or more states. Thereafter, this compact shall become effective as to any other state upon its enactment thereof.

7.2 Any party state may withdraw from this compact by enacting a statute repealing the same, but no such withdrawal shall take effect until one year after the withdrawing party state has given notice in writing of the withdrawal to all other party states. No withdrawal shall affect any liability already incurred by or chargeable to a party state prior to the time of such withdrawal.

ARTICLE VIII

EFFECT ON OTHER LAWS

8.1 Nothing within this compact shall be construed to limit, repeal or supersede any other law of any party state.

ARTICLE IX

SEVERABILITY AND CONSTRUCTION

9.1 The provisions of this compact shall be severable and if any phrase, clause, sentence or provision of this compact is declared by a court of competent jurisdiction to be contrary to the constitution of any participating state or of the United States or the applicability thereof to any government, agency, person or circumstance is held invalid, the validity of the remainder of this compact and the applicability thereof to any government, agency, person or circumstance shall not be affected thereby. If any provision of this compact shall be held contrary to the constitution of any state participating therein, the compact shall remain in full force and effect as to the state affected as to all severable matters.

9.2 The governor shall appoint one member and one alternate member to represent New York's interests on the interstate mining commission.

§ 23-2723. Severability.

The provisions of this title shall be severable and if any phrase, clause, sentence or provision of this title, or the applicability thereof to any person or circumstance shall be held invalid, the remainder of this title and the application thereof shall not be affected thereby.

ARTICLE 24

FRESHWATER WETLANDS

- Title 1. General provisions and public policy. (§§24-0101--24-0107).
3. Freshwater wetlands studies; notification and maps.
 (§24-0301).
5. Local implementation. (§§24-0501--24-0511).
7. Freshwater wetlands regulations. (§§24-0701--24-0705).
8. Regulation of wetlands in the Adirondack park.
 (§§24-0801--24-0805).
9. Freshwater wetlands preservation program.
 (§§24-0901--24-0905).
13. Miscellaneous provisions. (§§24-1301--24-1305).

TITLE 1

GENERAL PROVISIONS AND PUBLIC POLICY

- Section 24-0101. Short title.
24-0103. Declaration of policy.
24-0105. Statement of findings.
24-0107. Definitions.

§ 24-0101. Short title.

This article shall be known as the "Freshwater Wetlands Act".

§ 24-0103. Declaration of policy.

It is declared to be the public policy of the state to preserve, protect and conserve freshwater wetlands and the benefits derived therefrom, to prevent the despoliation and destruction of freshwater wetlands, and to regulate use and development of such wetlands to secure the natural benefits of freshwater wetlands, consistent with the general welfare and beneficial economic, social and agricultural development of the state.

§ 24-0105. Statement of findings.

1. The freshwater wetlands of the state of New York are invaluable resources for flood protection, wildlife habitat, open space, climate change mitigation through the accumulation and storage of large amounts of carbon, and water resources.

2. Considerable acreage of freshwater wetlands in the state of New York has been lost, despoiled or impaired by unregulated draining, dredging, filling, excavating, building, pollution or other activities inconsistent with the natural uses of such areas. Freshwater wetlands are in jeopardy of being lost, despoiled or impaired by such activities and because of the recent curtailment of federal wetland protections.

3. Recurrent flooding aggravated or caused by the loss of freshwater wetlands has serious effects upon natural ecosystems and communities. The increasing severity and duration of storm-related flooding due to climate change, which has caused billions of dollars of property damage across the state, makes protection of all freshwater wetlands in the state of vital importance.

4. Freshwater wetlands conservation is a matter of state concern since a wetland in one region is affected by acts on rivers, streams and wetlands of other regions.

5. The natural systems affecting freshwater wetlands overlap many localities. While many local governments individually have enacted ordinances to conserve freshwater wetlands and to reduce flood hazards and losses, effective freshwater wetlands management requires uniformity in laws to eliminate inconsistent or conflicting local laws. One locality alone lacks adequate jurisdiction to protect itself from misuse or neglect of adjacent localities.

6. Freshwater wetlands are an integral part of the unique scenic, aesthetic, wildlife, recreational, open space, ecological and natural resources of the Adirondack park and are recognized and protected by the Adirondack park agency act. The act provides a mechanism for the regulation of Adirondack wetlands by the Adirondack park agency and local governments which is consistent with both the state interest in the preservation and development of the park area and the state policy to preserve, protect and conserve freshwater wetlands expressed in this article.

7. Any loss of freshwater wetlands deprives the people of the state of some or all of the many and multiple benefits to be derived from wetlands, to wit:

- (a) flood and storm control by the hydrologic absorption and storage capacity of freshwater wetlands;

- (b) wildlife habitat by providing breeding, nesting and feeding grounds and cover for many forms of wildlife, wildfowl and shorebirds, including migratory wildfowl and rare, endangered or threatened species, fish, reptiles and amphibians, insects and other invertebrates;

- (c) protection of subsurface water resources and provision for valuable watersheds and recharging ground water supplies;

- (d) recreation by providing areas for hunting, fishing, boating, hiking, bird watching, photography, camping and other uses;

- (e) pollution treatment by serving as biological and chemical oxidation basins and carbon sinks;

- (f) erosion control by serving as sedimentation areas and filtering basins, absorbing silt and organic matter and protecting channels and harbors;

- (g) education and scientific research by providing readily accessible

outdoor bio-physical laboratories, living classrooms and vast training and education resources;

(h) open space and aesthetic appreciation by providing often the only remaining open areas along crowded river fronts and coastal Great Lakes regions;

(i) sources of nutrients in freshwater food cycles and nursery grounds and sanctuaries for freshwater fish;

(j) preservation of plant species that are rare, endangered or threatened, or exploitably vulnerable as defined in section 9-1503 of this chapter; and

(k) preservation of communities of plants and animals that are deemed by the commissioner to be rare in the state or in a region of the state.

8. Regulation of freshwater wetlands, in accordance with the agricultural exemption established in title seven hereof, is consistent with the legitimate interests of farmers and other landowners to graze and water livestock, make reasonable use of water resources, harvest natural products of the wetlands, selectively cut timber and otherwise engage in the use of land for agricultural production.

§ 24-0107. Definitions.

1. * "Freshwater wetlands" means lands and waters of the state, that are not tidal wetlands as defined in subdivision one of section 25-0103 of this chapter, that have an area of at least twelve and four-tenths acres or, if less than twelve and four-tenths acres in size, are of unusual importance, and which contain any or all of the following:

* NB Effective until January 1, 2028

* "Freshwater wetlands" means lands and waters of the state, that are not tidal wetlands as defined in subdivision one of section 25-0103 of this chapter, that have an area of at least seven and four-tenths acres or, if less than seven and four-tenths acres in size, are of unusual importance, and which contain any or all of the following:

* NB Effective January 1, 2028

(a) lands and submerged lands commonly called marshes, swamps, sloughs, bogs, and flats supporting aquatic or semi-aquatic vegetation

of the following types:

(1) wetland trees, which depend upon seasonal or permanent flooding or sufficiently water-logged soils to give them a competitive advantage over other trees; including, among others, red maple (*Acer rubrum*), willows (*Salix* spp.), black spruce (*Picea mariana*); swamp white oak (*Quercus bicolor*), red ash (*Fraxinus pennsylvanica*), black ash (*Fraxinus nigra*), silver maple (*Acer saccharinum*), American elm (*Ulmus americana*), and Larch (*Larix laricina*);

(2) wetland shrubs, which depend upon seasonal or permanent flooding or sufficiently water-logged soils to give them a competitive advantage over other shrubs; including, among others, alder (*Alnus* spp.), buttonbush (*Cephalanthus occidentalis*), bog rosemary (*Andromeda glaucophylla*), dogwoods (*Cornus* spp.), and leatherleaf (*Chamaedaphne calyculata*);

(3) emergent vegetation, including, among others, cattails (*Typha* spp.), pickerelweed (*Pontederia cordata*), bulrushes (*Scirpus* spp.), arrow arum (*Peltandra virginica*), arrowheads (*Sagittaria* spp.), reed (*Phragmites communis*), wildrice (*Zizania aquatica*), bur-reeds (*Sparganium* spp.), purple loosestrife (*Lythrum salicaria*), swamp loosestrife (*Decodon verticillatus*); and water plantain (*Alisma plantago-aquatica*);

(4) rooted, floating-leaved vegetation; including, among others, water-lily (*Nymphaea odorata*), water shield (*Brasenia schreberi*), and spatterdock (*Nuphar* spp.);

(5) free-floating vegetation; including, among others, duckweed (*Lemna* spp.), big duckweed (*Spirodela polyrhiza*), and watermeal (*Wolffia* spp.);

(6) wet meadow vegetation, which depends upon seasonal or permanent flooding or sufficiently water-logged soils to give it a competitive advantage over other open land vegetation; including, among others, sedges (*Carex* spp.), rushes (*Juncus* spp.), cattails (*Typha* spp.), rice cut-grass (*Leersia oryzoides*), reed canary grass (*Phalaris arundinacea*), swamp loosestrife (*Decodon verticillatus*), and spikerush (*Eleocharis* spp.);

(7) bog mat vegetation; including, among others, sphagnum mosses (*Sphagnum* spp.), bog rosemary (*Andromeda glaucophylla*), leatherleaf (*Chamaedaphne calyculata*), pitcher plant (*Sarracenia purpurea*), and cranberries (*Vaccinium macrocarpon* and *V. oxycoccos*);

(8) submergent vegetation; including, among others, pondweeds (*Potamogeton* spp.), naiads (*Najas* spp.), bladderworts (*Utricularia* spp.), wild celery (*Vallisneria americana*), coontail (*Ceratophyllum demersum*), water milfoils (*Myriophyllum* spp.), muskgrass (*Chara* spp.), stonewort (*Nitella* spp.), water weeds (*Elodea* spp.), and water smartweed (*Polygonum amphibium*);

(b) lands and submerged lands containing remnants of any vegetation that is not aquatic or semi-aquatic that has died because of wet conditions over a sufficiently long period, provided that such wet conditions do not exceed a maximum seasonal water depth of six feet and provided further that such conditions can be expected to persist indefinitely, barring human intervention;

(c) lands and waters substantially enclosed by aquatic or semi-aquatic vegetation as set forth in paragraph (a) of this subdivision or by dead vegetation as set forth in paragraph (b) of this subdivision, the regulation of which is necessary to protect and preserve the aquatic and semi-aquatic vegetation; and

(d) the waters overlying the areas set forth in paragraphs (a) and (b) of this subdivision and the lands underlying paragraph (c) of this subdivision.

2. "Freshwater wetlands map" shall mean a map developed by the department pursuant to section 24-0301 of this article on which are indicated the boundaries of any freshwater wetlands. Freshwater wetland maps depict the approximate location of wetlands and are not necessarily determinative as to whether a permit is required pursuant to section 24-0701 of this article.

3. "Boundaries of a freshwater wetland" shall mean the outer limit of the vegetation specified in paragraphs (a) and (b) of subdivision one of this section and of the lands and waters specified in paragraph (c) of such subdivision.

4. "Local government" shall mean a village, town, city, or county.

5. "State agency" shall mean any state department, bureau, commission, board or other agency, public authority or public benefit corporation.

6. "Person" means any corporation, firm, partnership, association, trust, estate, one or more individuals, and any unit of government or agency or subdivision thereof, including the state.

7. "Board" shall mean the freshwater wetland appeals board.

8. "Pollution" shall mean the presence in the environment of human-induced conditions, or contaminants in quantities or characteristics which are or may be injurious to human, plant or wildlife, or other animal life or to property.

9. "Unusual importance" shall mean a freshwater wetland, regardless of size, that possesses one or more of the following characteristics as determined by the department pursuant to regulations:

(a) it is located in a watershed that has experienced significant flooding in the past, or is expected to experience significant flooding in the future from severe storm events related to climate change;

(b) it is located within or adjacent to an urban area, as defined by the United States census bureau;

(c) it contains a plant species occurring in fewer than thirty-five sites statewide or having fewer than five thousand individuals statewide;

(d) it contains habitat for an essential behavior of an endangered or threatened species or a species of special concern as defined under section 11-0535 of this chapter or listed as a species of greatest conservation need in New York's wildlife action plan;

(e) it is classified by the department as a Class I wetland;

(f) it was previously classified and mapped by the department as a wetland of unusual local importance;

(g) it is a vernal pool that is known to be productive for amphibian breeding;

(h) it is located in an area designated as a floodway on the most current Digital Flood Insurance Rate Map (DFIRM) produced by the Federal Emergency Management Agency;

(i) it was previously mapped by the department as a wetland on or before December thirty-first, two thousand twenty-four;

(j) it has wetland functions and values that are of local or regional significance; or

(k) it is determined by the commissioner to be of significant importance to protecting the state's water quality.

10. "Delineation" shall mean a precise representation of a regulated freshwater wetland as defined in subdivision one of this section.

TITLE 3

FRESHWATER WETLANDS STUDIES; NOTIFICATION AND MAPS

Section 24-0301. Commissioner's study.

§ 24-0301. Commissioner's study.

1. Except as provided in subdivision three of this section, the commissioner shall supervise the maintenance of freshwater wetlands maps, which shall be available to the public for inspection and examination at the regional office of the department in which the wetlands are wholly or partly located on the department's website. Digital files of freshwater wetland maps may also be made available, upon request, to the clerk of each county, city, town, or village in which each such wetland or a portion thereof is located. The commissioner may readjust the map at any time to more accurately depict the approximate location of wetlands, provided however, that a description of such changes shall be made available on the department's website along with the date such changes were made.

2. Except as provided in subdivision three of this section, the commissioner may, upon their own initiative, and shall, upon a written request by a landowner whose land or a portion thereof may be included within a wetland, or upon the written request of another person or persons or an official body whose interests are shown to be affected, cause to be delineated the boundary line or lines of a freshwater wetland or a portion thereof. The commissioner shall undertake to delineate the boundary of a particular wetland or wetlands, or a

particular part of the boundary thereof only upon a showing by the applicant therefor of good cause for such delineation and the establishment of such line. Such delineation shall be effective for a period of five years from the date of such delineation.

3. The supervision of the maintenance of any freshwater wetlands map or portion thereof applicable to wetlands within the Adirondack park, the readjustment and precise delineation of wetland boundary lines and the other functions and duties ascribed to the commissioner by subdivisions one and two of this section shall be performed by the Adirondack park agency, which shall make such maps available for public inspection and examination at its headquarters and on the agency's website.

4. There is a rebuttable presumption that mapped and unmapped areas meeting the definition of a freshwater wetland in this article are regulated and subject to permit requirements. This presumption may be rebutted by presenting information to the department that the area does not meet the definition contained in this article. A wetland delineation by the department, or a verification by the department of a wetland delineation by another party, is required to identify the regulated freshwater wetland boundary in a particular location.

5. By January 1, 2025, in addition to any ongoing aerial photography, soil surveys or field verifications being conducted by the department, the department shall accept information from federal government sources, other state sources, local governments, colleges, universities, environmental organizations or other private agencies, regarding the location of freshwater wetlands.

6. By January 1, 2025, the department shall make educational materials available on its website to inform landowners and local governments of the process for determining how to identify freshwater wetlands.

TITLE 5

LOCAL IMPLEMENTATION

Section 24-0501. Local freshwater wetlands protection procedures.

24-0503. Transfer of function to county; supersession by department.

24-0505. Exemption from local implementation.

24-0507. Reservation of local jurisdiction.

24-0509. Relationship to other laws.

24-0511. Local freshwater wetlands protection procedures in the Adirondack park.

§ 24-0501. Local freshwater wetlands protection procedures.

1. On or after September 1, 1975, each local government may adopt, amend, and implement a freshwater wetlands protection law or ordinance in accordance with this article to be applicable to all freshwater wetlands wholly or partially within its jurisdiction. No freshwater wetlands protection law or ordinance adopted by a county pursuant to this section shall be applicable within the boundaries of any city, town or village which has adopted and is implementing a local freshwater wetlands protection law or ordinance consistent with this article.

2. Said freshwater wetlands protection law or ordinance may be in such form and with such procedures prescribed as may be determined by the local government adopting the same, or it may set forth the procedures and concepts contained in this article; provided, however, that no local freshwater wetlands protection law or ordinance enacted pursuant to subdivision one hereof shall be less protective of freshwater wetlands or effectiveness of administrative and judicial review, than the procedures set forth in this article, nor shall such local law or ordinance affect the activities exempted from permit by section 24-0701 of title seven hereof.

3. Adoption by a local government, pursuant to this article, of a local freshwater wetlands protection law or ordinance by reference to the procedures and concepts set forth herein shall be sufficient if reference is made to the procedures and concepts of this article with exceptions, additions, and modifications thereto noted; and the

adoption, once effected, shall include subsequent statutory amendments to this article as aforesaid; subject, again, to exception, addition, or modification by such municipality, without time limitation. At any time after a local adoption of the procedures contained in this article, a local government subject to this section may rescind its adoption thereof and simultaneously adopt a local freshwater wetlands protection procedure in accordance with subdivisions one and two of this section.

4. Within thirty days after the adoption of a freshwater wetlands protection law or ordinance pursuant to this article, the local government shall notify the department thereof, under such terms and conditions as the department may prescribe, together with its technical and administrative capacity to administer the act. Failure of a local government to give such notice shall constitute a transfer of function pursuant to this subdivision and section 24-0503 of this article.

5. A local government or the department shall have the right, in its regulation of freshwater wetlands within its jurisdiction, to charge such fees and expenses to an applicant for official action as shall enable it to recover the costs incurred by reason of such application.

6. Any local government which defaults or transfers its authority pursuant to subdivision four of this section or section 24-0503 of this article, may recover such authority at any time by adopting a local freshwater wetland protection local law or ordinance consistent with this article and notifying the county and the department of the adoption. Such notice shall be given by certified mail within ten days of the adoption thereof. Such local law or ordinance shall not become effective in less than sixty nor more than one hundred days from the adoption thereof.

7. The technical services of the department shall be made available to municipalities, on a fee basis, in the implementation of the procedure herein set forth.

§ 24-0503. Transfer of function to county; supersession by department.

1. In the event that a town, village, city or county shall certify in writing, as hereinafter provided, that it does not possess the technical capacity or the procedures effectively to carry out the requirements of this title, such local function shall be transferred to the county or the department, as the case may be. The certification of the town, village or city shall be by certified mail to the chief executive officer of the county, or, in the case of a county, to the commissioner.

2. In the event that the commissioner shall find that a local government does not possess the technical capacity or the implemented procedures effectively to carry out the requirements of this title, and that his failure to act will entail a default, or the potential of a default, in freshwater wetlands regulation, the commissioner may supersede the local government and order, alternatively, either that the local function be transferred to the county, or that the department itself undertake the local function, all to the extent necessary to carry out the purposes of this article. The supersession of the local government, shall be by order of the commissioner sent, by certified mail, to the chief executive officer of the local government involved.

3. In the event of transfer or supersession under subdivision one or two of this section, subsequent proceedings shall be in accordance with the further requirements of this article.

§ 24-0505. Exemption from local implementation.

The commissioner, by rule, may exempt from local implementation under this title those freshwater wetlands which, by reason of their size or special characteristics of unique environmental value or by reason of common characteristics, are appropriately to be administered pursuant to this article by the department alone. Such rule, based upon findings of fact made after public hearing, may relate to classes of wetlands based on size or particular characteristics, or to particular wetlands the characteristics of which make them subject to the exercise of the commissioner's discretion pursuant to this section. The commissioner

shall make an order to such effect in each such instance and send a certified copy thereof to the executive officer of each local government affected thereby within ten days of his signing the same; such order shall not take effect until forty days after such signing.

§ 24-0507. Reservation of local jurisdiction.

1. Except as provided in this article, jurisdiction over all areas which would qualify as freshwater wetlands less than twelve and four-tenths acres in size and are not of unusual importance is reserved to the city, town or village in which they are wholly or partially located, and the implementation of this article with respect thereto is the responsibility of said city, town or village, in accordance with section 24-0501 and title twenty-three of article seventy-one of this chapter, except that a city, town or village in the exercise of its powers under this section, shall not be subject to the provisions of subdivision four of section 24-0501, subdivisions two and three of section 24-0503, or section 24-0505 of this article.

* NB Effective until January 1, 2028

* 1. Except as provided in this article, jurisdiction over all areas which would qualify as freshwater wetlands less than seven and four-tenths acres in size and are not of unusual importance is reserved to the city, town or village in which they are wholly or partially located, and the implementation of this article with respect thereto is the responsibility of said city, town or village, in accordance with section 24-0501 and title twenty-three of article seventy-one of this chapter, except that a city, town or village in the exercise of its powers under this section, shall not be subject to the provisions of subdivision four of section 24-0501, subdivisions two and three of section 24-0503, or section 24-0505 of this article.

* NB Effective January 1, 2028

2. The department shall consult with any city, town, or village that exercises its powers under this section for the protection of freshwater wetlands.

§ 24-0509. Relationship to other laws.

No provision of this article shall be deemed to remove from any local government any authority pertaining to the regulation of freshwater wetlands, whether such wetlands are under the jurisdiction of the department or a county pursuant to subdivision 4 of section 24-0501 of this title, under the county, general city, general municipal, municipal home rule, town, village, or any other law, provided, however, that any such regulation by a local government shall be at least as protective of freshwater wetlands as the regulations in effect pursuant to the provisions of this chapter or any rule or regulation promulgated pursuant to the provisions of this article or pursuant to a local freshwater wetlands protection law or ordinance adopted by a county pursuant to the provisions of section 24-0501 of this title.

§ 24-0511. Local freshwater wetlands protection procedures in the Adirondack park.

Except for section 24-0509, this title shall not apply to freshwater wetlands protection laws or ordinances adopted by towns or villages with respect to their territories within the Adirondack park. Such laws or ordinances are governed by title eight of this article.

TITLE 7

FRESHWATER WETLANDS REGULATIONS

Section 24-0701. Permits.

24-0703. Applications for permits.

24-0705. Granting permits.

§ 24-0701. Permits.

1. Any person desiring to conduct activities on freshwater wetlands, or the regulated areas adjacent to these wetlands set forth in subdivision two of this section, must obtain a permit as provided in

this title.

2. Activities subject to regulation shall include any form of draining, dredging, excavation, removal of soil, mud, sand, shells, gravel or other aggregate from any freshwater wetland, either directly or indirectly; and any form of dumping, filling, or depositing of any soil, stones, sand, gravel, mud, rubbish or fill of any kind, either directly or indirectly; erecting any structures, roads, the driving of pilings, or placing of any other obstructions whether or not changing the ebb and flow of the water; any form of pollution, including but not limited to, installing a septic tank, running a sewer outfall, discharging sewage treatment effluent or other liquid wastes into or so as to drain into a freshwater wetland; and any other activity which substantially impairs any of the several functions served by freshwater wetlands or the benefits derived therefrom which are set forth in section 24-0105 of this article. These activities are subject to regulation whether or not they occur upon the wetland itself, if they impinge upon or otherwise substantially affect the wetlands and are located not more than one hundred feet from the boundary of such wetland. Provided, that a greater distance from any such wetland may be regulated pursuant to this article by the appropriate local government or by the department, whichever has jurisdiction over such wetland, where necessary to protect and preserve the wetland.

3. The depositing or removal of the natural products of the freshwater wetlands by recreational or commercial fishing, shell-fishing, aquaculture, hunting or trapping shall be excluded from regulated activities, where otherwise legally permitted and regulated.

4. On lands in active agricultural use or silviculture use, the activities of farmers and other landowners in grazing and watering livestock, making reasonable use of water resources, harvesting natural products of the wetlands, selectively cutting timber, draining land or wetlands for growing agricultural products and otherwise engaging in the use of wetlands or other land for growing agricultural products shall be excluded from regulated activities and shall not require a permit under subdivision one of this section, except that structures not required for

enhancement or maintenance of the agricultural productivity of the land and any filling activities shall not be excluded hereunder, and provided that the use of land that meets the definition of a freshwater wetland in section 24-0107 of this article for uses other than those referred to in this subdivision shall be subject to the provisions of this article. All activities on lands that meet the definition of a freshwater wetland shall be subject to the provisions of this article once agricultural or silviculture activities cease.

5. Public health activities, orders, and regulations of the department of health shall be excluded from regulated activities. Copies of all such public health orders and regulations affecting wetlands shall be filed with the department of environmental conservation. The commissioner may request modification of such orders or regulations if he deems such necessary to implement the policy of this article.

6. The commissioner shall review all current mosquito control projects to determine whether they are having any adverse impact on freshwater wetlands. Where any adverse impact is found, the commissioner may require modification of such projects if he deems such necessary for the implementation of the policies of this article.

7. Where dredging or filling is in navigable waters of the state or is for the reconstruction or repair of certain dams and docks, and where such activity also affects freshwater wetlands, any person undertaking such activity must seek permission under this article as well as under any other applicable law.

8. On any land that is being developed pursuant to a planned unit development ordinance or local law where freshwater wetlands are to remain as open space, development activities shall be permitted in areas contiguous to such wetlands if the local government affirms that such activities will not despoil said wetland.

§ 24-0703. Applications for permits.

1. Any person proposing to conduct or cause to be conducted a regulated activity upon any freshwater wetland shall file an application for a permit with the clerk of the local government having jurisdiction or the department, as the case may be. Review of the application shall be made by the local government or the commissioner, as the case may be, in accordance with applicable law and such rules hereunder as may be adopted by the commissioner. Such application shall include a detailed description of the proposed activity and a map showing the area of freshwater wetland directly affected, with the location of the proposed activity thereon. For any person proposing to conduct or cause to be conducted a regulated activity involving the use of a pipeline upon any freshwater wetland, such application shall also include the name of the insurance company covering such proposed activity, the amount of coverage and what is covered under the plan. The clerk or commissioner shall cause notice of such application to be mailed to all local governments where the proposed activity or any part of it is located.

2. No sooner than thirty days and not later than sixty days after the receipt by a local government of an application, and after notice of application has been published by the applicant in two newspapers having a general circulation in the area, the local government shall hold a public hearing on such application at a suitable location in the local government where the affected wetland is situated unless no notice of objection has been filed or unless the local government finds the activity to be of such a minor nature as not to affect or endanger the balance of systems within the wetlands, in which case the local government may, in the exercise of discretion, dispense with such hearing. Where the local government finds that a hearing is not necessary, a decision setting forth reasons therefor shall be prepared, shall be a matter of public record and shall be mailed to all local governments where the proposed work or any part of it is located and to all persons who filed a statement with the local government following the publication of such notice of application. All owners of record of the adjacent land and the local governments where the proposed activity is located shall be notified by certified mail of the hearing not less than fifteen days prior to the date set for such hearing. The local government shall cause notice of such hearing to be published in two

newspapers having a general circulation in the area where the affected freshwater wetlands are located. All applications and maps and documents relating thereto shall be open for public inspection at the office of the clerk of the local government in which the wetland is situated. At such hearing any person or persons filing a request for a hearing or a timely notice of appearance may appear and be heard.

3. In addition to the provisions of article 70 of this chapter and rules and regulations adopted thereunder, the rules and regulations adopted by the department pursuant to this article to implement its processing of permit applications, renewals, modifications, suspensions and revocations shall govern permit administration by the department under this article, provided however, that after the department has given notice to an applicant that an application is complete, or the application is deemed complete, the applicant shall cause a notice of application to be published in a newspaper of general circulation in the affected area as provided in rules and regulations of the department.

4. The applicant shall have the burden of demonstrating that the proposed activity will be in accord with the policies and provisions of this article. To the greatest extent practicable, such hearing shall be incorporated with any public hearing required by the town, village, general city, general municipal or environmental conservation laws in connection with approvals or permits otherwise required before commencement of regulated activities on lands containing such wetlands.

5. Any person may inquire of the department as to whether or not a given parcel of land includes a freshwater wetland subject to regulation or a regulated freshwater wetland adjacent area. The department shall give a definite answer in writing within ninety days of such request as to the status of such parcel and whether a permit is required for the proposed activity, provided that the person has a delineation verified by the department and site-specific development plans. Provided that, in the event that weather or ground conditions prevent the department from making a determination within ninety days, it may extend such period until a determination can be made. Such answer in the affirmative shall be reviewable; such an answer in the negative shall be a complete

defense to the enforcement of this article as to such parcel of land for a period of five years from the date the department issues the negative answer.

§ 24-0705. Granting permits.

1. In granting, denying or limiting any permit, the local government or the commissioner shall consider the effect of the proposed activity with reference to the public health and welfare, climate change, fishing, flood, hurricane and storm dangers, and protection or enhancement of the several functions of the freshwater wetlands and the benefits derived therefrom which are set forth in section 24-0103 of this article. The effects of the proposed activity shall be considered by the department or a local government, as the case may be, irrespective of political boundaries.

2. Duly filed notice in writing that the state or any agency or subdivision thereof is in the process of acquiring any freshwater wetlands by negotiation or condemnation shall be sufficient basis for denial of any permit.

3. No permit shall be granted under this section unless the proposed activity is consistent with the land use regulations applicable pursuant to section 24-0903 of this article within the boundaries of the local government involved and with the policy set forth in section 24-0103 of this article.

4. In granting a permit, the local government or the commissioner may limit the same or impose conditions or limitations designed to carry out the public policy set forth in this article. The local government or the commissioner may require a bond in an amount and with surety and conditions satisfactory to him securing to the state or local government, as the case may be, compliance with the conditions and limitations set forth in the permit. The local government may suspend or revoke a permit if it finds that the applicant has not complied with any of the conditions or limitations set forth in the permit or has exceeded

the scope of the activity as set forth in the application. The local government may suspend the permit if the applicant fails to comply with the terms and conditions set forth in the application. Department suspension and revocation proceedings shall be governed by the provisions of article 70 of this chapter and rules and regulations adopted thereunder and by the provisions of rules and regulations adopted by the department as provided in section 24-1301 of this article.

5. The local government or the commissioner shall state upon the record findings and reasons for all actions taken pursuant to this section.

6. Review of the determination of the local government or of the commissioner shall be, within a period of thirty days after the filing thereof, pursuant to the provisions of article seventy-eight of the civil practice law and rules. Any owner of the wetland affected and any resident or citizen of the local government shall be deemed to have the requisite standing to seek review.

7. In the event that the court finds the action reviewed constitutes a taking without just compensation, and the land so regulated merits protection under this article, the court may, at the election of the commissioner, either (i) set aside the order or (ii) require the commissioner to proceed under the condemnation law to acquire the wetlands or such less than fee rights therein as have been taken.

TITLE 8

REGULATION OF WETLANDS IN THE ADIRONDACK PARK

Section 24-0801. Permits for wetlands in the Adirondack park.

24-0803. Transfer of jurisdiction to local government.

24-0805. Land use regulations for freshwater wetlands in the Adirondack park.

§ 24-0801. Permits for wetlands in the Adirondack park.

1. As used in this title, the term "freshwater wetlands", in addition to its meaning under section 24-0107 of this article, shall mean "wetlands" as defined in subdivision sixty-eight of section eight hundred two of article twenty-seven of the executive law.

2. Where the activities otherwise subject to regulation under this article involve freshwater wetlands located within the boundaries of the Adirondack park, the inquiries referred to and the applications provided for in section 24-0703 of this article shall be made to and filed with the Adirondack park agency at its headquarters office, under such regulations and procedures as the Adirondack park agency may promulgate. The Adirondack park agency shall review the application in place of the commissioner or local government as provided in section 24-0705 of this article, having due regard for the declaration of policy and statement of findings set forth in this article and for the considerations set forth in subdivision one of section 24-0705 of this article. The agency shall in addition determine prior to the granting of any permit that the proposed activity will be consistent with the Adirondack park land use and development plan and would not have an undue adverse impact upon the natural, scenic, aesthetic, ecological, wildlife, historic, recreational or open space resources of the park, taking into account the economic and social or other benefits to be derived from the activity. Any person may seek review of a ruling made solely pursuant to the provisions of this article by the Adirondack park agency pursuant to the provisions of article seventy-eight of the civil practice law and rules.

§ 24-0803. Transfer of jurisdiction to local government.

1. Notwithstanding anything in article twenty-seven of the executive law to the contrary, the Adirondack park agency may transfer to a town or village any or all of its jurisdiction over regulated activities conducted upon, or land use and development or subdivision involving, those wetlands located on private lands which it finds, due to their size or other characteristics, are of lesser regional importance and are appropriately to be administered by such local governments alone.

2. The agency shall not transfer such jurisdiction unless the town or village (a) has adopted and implemented a local freshwater wetlands protection law or ordinance or has in a local land use program provided by local law or ordinance for the protection of such wetlands, which law or ordinance:

(i) meets the criteria set forth in subdivision two of section 24-0501 of this article,

(ii) provides for a review of regulated activities, land use and development and subdivision pursuant to the standards set forth in subdivision two of section 24-0801 of this article, and

(iii) contains at a minimum land use regulations meeting the criteria of subdivision one of section 24-0903 of this article; and

(b) possesses the technical or administrative capacity to administer the local law or ordinance.

3. In connection with a transfer of its jurisdiction pursuant to this section, the agency may impose reasonable conditions in furtherance of the policies and purposes of this article and of article twenty-seven of the executive law.

4. A local government regulating wetlands pursuant to this section shall have the right to charge such fees and expenses to an applicant for official action as shall enable it to recover the costs incurred by reason of such application.

5. The technical services of the department or the agency shall be made available to towns and villages, on a fee basis, in the implementation of the procedures set forth in this section.

§ 24-0805. Land use regulations for freshwater wetlands in the Adirondack park.

Except as to wetlands upon private lands within local governments to which jurisdiction has been transferred pursuant to section 24-0803 of this article, the Adirondack park agency shall also exercise the

functions assigned to the commissioner under section 24-0903 of this article.

TITLE 9

FRESHWATER WETLANDS PRESERVATION PROGRAM

Section 24-0901. Cooperative agreements.

24-0903. Land use regulations for freshwater wetlands.

24-0905. Tax abatement.

§ 24-0901. Cooperative agreements.

1. The commissioner shall confer with local government officials in each region to establish a program for the protection of the freshwater wetlands of the state.

2. The commissioner may enter into cooperative agreements with any city, village, town or county, or with an owner of freshwater wetlands or with any one or more of them, for the purpose of preserving and maintaining, in accordance with the policies of this article, those freshwater wetlands which are within the boundaries of such city, village, town or county.

3. The cooperative agreement shall provide that the freshwater wetlands be preserved and maintained in their natural state and may provide for access thereto to be retained by such owner for purposes compatible with the purposes of this article.

4. A cooperative agreement with any such village, town, city or county may provide for the development by personnel and facilities of the department or the payment out of funds appropriated therefor, for the purpose of preserving, maintaining, or enhancing such wetlands in accordance with the policies of this article, and for the furnishing of such personnel, facilities or funds as may be agreed upon by the parties to the cooperative agreement.

5. This section shall not prevent any freshwater wetland from being designated as part of the natural and historic preserves of the state, nor shall it prevent preservation of such lands by dedication as state parks. The office of parks and recreation shall outline to the commissioner its plans to preserve freshwater wetlands as parks and reserves as soon as possible after the effective date of this article.

§ 24-0903. Land use regulations for freshwater wetlands.

1. The commissioner shall classify freshwater wetlands according to their most appropriate uses, in light of the values set forth in section 24-0105 of this article and the present conditions of such wetlands. The commissioner shall determine what uses of such wetlands are most compatible with the foregoing and shall prepare minimum land use regulations to permit only such compatible uses. The classifications may cover freshwater wetlands in more than one governmental subdivision. Permits pursuant to section 24-0701 of this article are required whether or not a classification has been promulgated.

2. The commissioner shall upon completion of minimum land use regulations as provided in subdivision one of this section, forward the same to the local governments affected thereby. Within six months of receipt of the minimum land use regulations, the legislative body of each such local government shall submit to the commissioner proposed regulations governing the freshwater wetlands within its boundaries. Such proposed regulations shall be consistent with the purposes of this article and may be more restrictive than the minimum land use regulations as determined by the commissioner under this article. Where the proposed local wetlands use regulations do not meet the minimum land use regulations as determined by the commissioner, the proposed local regulations shall be accompanied by supporting materials setting forth, among other things, that there are overriding economic and social considerations vital to the growth and economic base of such local government that clearly require such variance.

3. If the commissioner finds that the proposals meet the conditions

stated in subdivision two of this section, the commissioner, after taking into consideration their effect on other local governments, may approve said local land use regulations.

4. In the event the commissioner does not approve local freshwater wetlands land use regulations, he shall then frame land use regulations governing such freshwater wetlands.

5. Prior to the adoption of any land use regulations governing freshwater wetlands, the commissioner shall hold a public hearing thereon in the area in which the affected freshwater wetlands are located, and give fifteen days prior notice thereof by posting on the department's website or by publication at least once in a newspaper having general circulation in the area of the local government involved. The commissioner shall promulgate the regulations and post such order on the department's website or publish such order in a newspaper having general circulation in the area of the local government affected and make such plan available for public inspection and review.

6. The commissioner shall accept and review applications to change the regulations annually.

7. Any person aggrieved by any such order or regulation may seek judicial review pursuant to article seventy-eight of the civil practice law and rules in the supreme court for the county in which the freshwater wetland is located, within thirty days after the date of the filing of the order with the clerk of the county in which the wetland is located.

8. Except as provided in section 24-0805 of this article, this section shall not apply to freshwater wetlands or portions thereof located within the Adirondack park.

§ 24-0905. Tax abatement.

Any freshwater wetland subject to land use regulations pursuant to

section 24-0903 of this article or subject to a cooperative agreement pursuant to section 24-0901 of this article shall be deemed subject to a limitation on the use of such wetlands for the purposes of property tax evaluation, in the same manner as if an easement or right had been acquired pursuant to the general municipal law. Assessed value shall be based, during the duration of such agreement or regulations, on the uses remaining to the owner thereof.

TITLE 13

MISCELLANEOUS PROVISIONS

Section 24-1301. Miscellaneous provisions.

24-1303. Severability.

24-1305. Applicability.

§ 24-1301. Miscellaneous provisions.

1. The provisions of this article shall not be construed to limit in any manner the functions, powers and duties of the commissioner or the department of environmental conservation, or of any other state department or agency, under this chapter or any other laws.

2. The commissioner, his agents or employees and the personnel of the Adirondack park agency may enter upon any lands or waters after reasonable notice and for good cause shown for the purpose of undertaking any investigations, examination, survey, or other activity for the purposes of this article.

3. The commissioner may adopt and, from time to time, amend rules and regulations consistent with this article to assist him in carrying out his functions, powers and duties hereunder.

4. Notwithstanding any other provision of this chapter, a privately owned parcel of land or part thereof within the county of Richmond that did not contain a designation as a freshwater wetland on the tentative freshwater wetlands map filed in the office of the clerk of Richmond

county in 1981 shall not be on any tentative freshwater wetlands map if the landowner has any written determination from the department pursuant to subdivision five of section 24-0703 of this article that such parcel of land or part thereof did not meet the statutory definition of a freshwater wetland. Such representations shall be considered to have been definitive when made, and such parcel or part thereof shall not be designated as a freshwater wetland on any final map filed in the office of the clerk of Richmond county pursuant to this article. The provisions of this subdivision shall not apply to any parcel of land or part thereof, purchased after January first, nineteen hundred eighty-seven, or to any such parcel or part thereof owned wholly or in part by any unit of government or agency or subdivision thereof, any authority or agency existing pursuant to governmental action, or subdivision thereof; including the state and the city of New York.

§ 24-1303. Severability.

The provisions of this article shall be severable, and if any clause, sentence, paragraph, subdivision or part of this article shall be adjudged by any court of competent jurisdiction to be invalid, such judgment shall not affect, impair or invalidate the remainder thereof but shall be confined in its operation to the clause, sentence, paragraph, subdivision or part thereof directly involved in the controversy in which such judgment shall have been rendered.

§ 24-1305. Applicability.

The provisions of this article shall not apply to any land use, improvement or development for which final approval shall have been obtained prior to the effective date of this article from the local governmental authority or authorities having jurisdiction over such land use. As used in this section, the term "final approval" shall mean the issuance of a building permit or other authorization for the commencement of the use, improvement or development for which such permit or authorization was issued or in those local governments which

do not require such permits or authorizations, the actual commencement of the use, improvement or development of the land.

ARTICLE 25
TIDAL WETLANDS

- Title 1. General provisions and public policy
2. Wetlands inventory
 3. Program and land-use regulation for tidal wetlands
 4. Regulated activities
 6. Miscellaneous provisions

TITLE 1
GENERAL PROVISIONS AND PUBLIC POLICY

- Section 25-0101. Short title.
- 25-0102. Declaration of policy.
- 25-0103. Definitions.

§ 25-0101. Short title.

This article shall be known as the "Tidal Wetlands Act".

§ 25-0102. Declaration of policy.

It is declared to be the public policy of this state to preserve and protect tidal wetlands, and to prevent their despoliation and destruction, giving due consideration to the reasonable economic and social development of the state.

§ 25-0103. Definitions.

1. "Tidal wetlands" shall mean and include the following:
 - (a) those areas which border on or lie beneath tidal waters, such as,

but not limited to, banks, bogs, salt marsh, swamps, meadows, flats or other low lands subject to tidal action, including those areas now or formerly connected to tidal waters;

(b) all banks, bogs, meadows, flats and tidal marsh subject to such tides, and upon which grow or may grow some or any of the following: salt hay (*Spartina patens* and *Distichlis spicata*), black grass (*Juncus Gerardi*), saltworts (*Salicornia* ssp.), sea lavender (*Limonium carolinianum*), tall cordgrass (*Spartina pectinata* and *Spartina cynosuroides*), hightide bush (*Iva frutescens*), cattails (*Typha angustifolia* and *Typha latifolia*), groundsel (*Baccharis halmilifolia*), marsh mallow (*Hybiscus palustris*) and the intertidal zone including low marsh cordgrass (*Spartina alterniflora*).

2. "Commissioner" shall mean the commissioner of environmental conservation.

3. "Pollution" shall mean the presence in the environment of conditions or contaminants in quantities or characteristics which are or may be injurious to human, plant, or marine life, wildlife, or other animal life, or to property, or which unreasonably interfere with the comfortable enjoyment of life and property throughout such tidal wetlands as may be affected thereby.

4. "Person" shall mean any individual, public or private corporation, political subdivision, government agency, department or bureau of the state, bi-state authority, municipality, industry, co-partnership, association, firm, trust, estate or any other legal entity whatsoever.

5. "Municipality" shall mean a village, town, city or county.

TITLE 2

WETLANDS INVENTORY

Section 25-0201. Inventory of tidal wetlands.

25-0202. Moratorium on alteration of tidal wetlands.

§ 25-0201. Inventory of tidal wetlands.

1. The commissioner shall as soon as practicable make an inventory of all tidal wetlands in the state of New York. This inventory, and any restrictive orders issued pursuant to section 25-0302 of this act, shall comprise a part of the statewide environmental plan as provided for in section 3-0303 of the environmental conservation law.

2. The inventory shall set forth the boundaries of such wetlands using such photographic and cartographic standards and techniques as the commissioner may deem reasonable and appropriate in order to provide clear and accurate maps of the tidal wetlands of the state for the purpose of effectuating the policies and provisions of this act. Said boundaries shall generally delineate all tidal wetlands in the state as defined in section 25-0101 of this act. At least sixty days prior to the commencement of the inventory the commissioner shall file with the secretary of state a detailed description of the technical methods and requirements to be utilized in compiling the inventory, and he shall afford the public an opportunity to submit written comments thereon.

3. Upon completion of a tentative tidal wetlands boundary map for a particular area, the commissioner or his designated hearing officer shall hold a public hearing in order to afford an opportunity for any person to propose additions or deletions from such map. The commissioner shall give notice of such hearing to each owner of record of all lands designated as such wetland as shown on such maps, and also to the chief administrative officer of each municipality within whose boundary any such wetland or portion thereof is located, by certified mail, return receipt requested, not less than thirty days prior to the date set for such hearing. The commissioner shall also cause notice of such hearing to be published at least once, not more than thirty days nor fewer than ten days before the date set for such hearing, in at least two newspapers having a general circulation in the area where such wetlands are located.

4. After considering the testimony given at such hearing and any other facts which may be deemed pertinent and after considering the rights of

affected property owners and the policy and purposes of this act, the commissioner shall establish by order the final bounds of each such wetland. A copy of the order, together with a copy of the map depicting such final boundary lines, shall be filed in the office of the clerk of the county in which each such wetland is located. The commissioner shall simultaneously give notice of such order to each owner of all lands designated as such wetlands by mailing a copy of such order to such owner. The commissioner shall also simultaneously give notice of such order by certified mail to the chief administrative officer of each municipality within whose boundary any such wetland or portion thereof is located. The commissioner shall also cause a copy of such order to be published in at least two newspapers having a general circulation in the area where such wetlands are located.

5. Any person aggrieved by such order may seek judicial review pursuant to article seventy-eight of the civil practice law and rules in the supreme court for the county in which the tidal wetlands are located, within thirty days after the date of the filing of the order with the clerk of the county in which such wetlands are located.

6. The commissioner shall supervise the maintenance of such boundary maps, which shall be available to the public for inspection and examination. The statewide inventory shall be readjusted from time to time as may be necessary to reflect such natural changes as have occurred through erosion, accretion, and otherwise and also to reflect such other changes as have occurred as a result of the granting of permits pursuant to section 25-0403 of this act.

§ 25-0202. Moratorium on alteration of tidal wetlands.

1. No person shall alter the state of any tidal wetland or of any area immediately adjacent to such wetland as the commissioner may reasonably deem necessary to preserve in order to effectuate the policies and provisions of this act, prior to the effective date of the land-use regulations adopted by the commissioner pursuant to this act, unless a permit for such alteration shall have been obtained pursuant to section

15-0505 of the environmental conservation law. This moratorium shall not restrict in any way any summary action taken by the commissioner under section 71-0301 of the environmental conservation law.

2. Any person, upon a showing of hardships caused by this moratorium, may petition the commissioner for a review of the application of the moratorium to any tidal wetland or any area immediately adjacent thereto. Within thirty days of the petition being received, the commissioner shall provide the petitioner and any other person an opportunity to be heard. Notice of such hearing shall be published in at least two newspapers having a general circulation in the area where the wetlands are located, and notice of such hearing shall also be given by registered mail to the chief administrative officer of each municipality within whose boundary any such wetland or portion thereof is located. If the proposed alterations of the tidal wetlands are not contrary to the policy or any provision of this act, the commissioner may permit the alteration to continue during the moratorium, provided that permission may be revoked by the commissioner if its terms are violated and that the permission ends upon completion of the inventory for the area in which the affected wetlands are located, and provided further that any such hardship permit issued by the commissioner shall be in addition to, and not in lieu of, such permit or permits as may be required by any municipality within whose boundary such wetland or portion thereof is located.

3. Within thirty days after such permission has been granted or denied, any aggrieved person may seek judicial review of such decision pursuant to article seventy-eight of the civil practice law and rules in the supreme court for the county in which such wetlands are situated.

TITLE 3

PROGRAM AND LAND-USE REGULATION FOR TIDAL WETLANDS

Section 25-0301. Program and cooperative agreements for the protection of tidal wetlands.

25-0302. Land-use regulation of tidal wetlands.

§ 25-0301. Program and cooperative agreements for the protection of tidal wetlands.

1. Upon completion of the inventory with respect to tidal wetlands, the commissioner shall confer with the local government officials involved to establish a program for the protection of such tidal wetlands.

2. The commissioner may enter into cooperative agreements with any village, town, city or county, or with any one or more of them, for the purpose of preserving, maintaining and enhancing, in accordance with the policies of this act, those tidal wetlands included within the boundaries of such villages, towns, cities and counties.

3. A cooperative agreement with any such village, town, city or county may provide for the development by personnel and facilities of the department of environmental conservation, or the payment out of funds appropriated for the purpose, of the cost of preserving, maintaining or enhancing such tidal wetlands in accordance with the policies of this act, and for the furnishing of such personnel, facilities or funds as may be agreed upon within the cooperative agreement.

4. The cooperative agreement shall provide that the tidal wetlands be preserved and maintained in their natural or enhanced state, provided, however, that a reservation in any such agreement by a village, town, city or county of the right to operate or lease for operation shellfish beds lying within the area, and a reservation of the income from such operation or lease for the village, town, city or county shall be allowed and not considered a violation of preservation and maintenance of a natural state.

5. This section shall not prevent any tidal wetlands from being designated as portions of the state's natural and historic preserves, nor shall it prevent the dedication of any such lands as state parks. The office of parks and recreation shall outline to the commissioner its plans to preserve tidal wetlands in parklands as soon as practicable.

§ 25-0302. Land-use regulation of tidal wetlands.

1. Upon completion of the inventory the commissioner shall adopt land-use regulations governing the uses of said inventoried wetlands. In preparing such regulations the commissioner shall be guided by factors including, but not limited to, the public policy set forth in this act as well as the present and potential value of the particular wetland for marine food production, as a wildlife habitat, as an element of flood and storm control, and as a source of recreation, education and research. The commissioner shall determine what uses of inventoried wetlands may be compatible with any or all of the foregoing, and he shall prepare such appropriate land-use regulations as may permit only such compatible uses. These regulations shall be filed with the secretary of state and shall take effect thirty days after such filing. A copy of such regulations shall also be simultaneously forwarded by certified mail to the chief administrative officer of each municipality within whose boundary any such wetland or portion thereof is located. No permits may be granted by any local body, nor shall any construction or activity take place at variance with these regulations.

2. The placing of any tidal wetlands under a land-use regulation which restricts its use shall be deemed a limitation on the use of such wetlands for the purposes of property tax valuation, in the same manner as if an easement or right had been acquired under the general municipal law. Assessment shall be based on present use under the restricting regulation.

TITLE 4

REGULATED ACTIVITIES

Section 25-0401. Regulated activities.

25-0402. Application for permits.

25-0403. Granting of permits.

25-0404. Judicial review.

25-0405. Payments for extractions from or filling in wetlands.

§ 25-0401. Regulated activities.

1. After completion of the inventory prescribed in title 2 of this article with respect to any tidal wetland, no person may conduct any of the activities set forth in subdivision 2 of this section unless he has obtained a permit from the commissioner to do so. The permit issued by the commissioner shall be in addition to, and not in lieu of, such permit or permits as may be required by any municipality within whose boundary such wetland or portion thereof is located.

2. Activities subject to regulation hereunder include any form of draining, dredging, excavation, and removal either directly or indirectly, of soil, mud, sand, shells, gravel or other aggregate from any tidal wetland; any form of dumping, filling, or depositing, either directly or indirectly, of any soil, stones, sand, gravel, mud, rubbish, or fill of any kind; the erection of any structures or roads, the driving of any pilings or placing of any other obstructions, whether or not changing the ebb and flow of the tide, and any other activity within or immediately adjacent to inventoried wetlands which may substantially impair or alter the natural condition of the tidal wetland area.

3. The depositing or removal of the natural products of the tidal wetlands by recreational or commercial fishing, shellfishing, aquaculture, hunting or trapping, shall be excluded from regulation hereunder, where otherwise legally permitted.

4. Activities, orders, and regulations of the department of health or of units of local government with respect to matters of public health shall be excluded from regulation hereunder, except as hereinafter provided. Copies of all such public health orders and regulations affecting tidal wetlands shall be filed with the department of environmental conservation. The commissioner may require modification of such orders or regulations if he deems it necessary to implement the policy of this act.

5. The commissioner shall review all current mosquito control projects to determine whether they are having any adverse impact on tidal wetlands. Where any adverse impact is found, the commissioner following a public hearing, may require modification of such projects if he deems it necessary to implement the policy of this act.

6. Where the dredging or filling is in the navigable waters of the state or is for the reconstruction or repair of certain dams and docks, and where such activity also substantially affects tidal wetlands, any person undertaking such activity must seek permission under this act as well as under any other applicable law.

§ 25-0402. Application for permits.

1. Any person proposing to conduct or cause to be conducted an activity regulated under this act upon any inventoried tidal wetland shall file an application for a permit with the commissioner, in such form and containing such information as the commissioner may prescribe. The applicant shall have the burden of demonstrating that the proposed activity will be in complete accord with the policy and provisions of this act. Such application shall include a detailed description of the proposed work and a map showing the area of tidal wetland directly affected, with the location of the proposed work thereon, together with the names of the owners of record of adjacent lands and the known claimants of water rights in or adjacent to the tidal wetlands of whom the applicant has notice. The commissioner shall cause a copy of such application to be mailed to the chief administrative officer in the municipality where the proposed work or any part of it is located.

2. The rules and regulations adopted by the department to implement this article and the provisions of article 70 of this chapter and rules and regulations adopted thereunder shall govern permit applications, renewals, modifications, suspensions and revocations under this article.

§ 25-0403. Granting of permits.

1. In granting, denying or limiting any permit under this act, the commissioner shall consider the compatibility of the proposed activity with reference to the public health and welfare, marine fisheries, shellfisheries, wildlife, flood and hurricane and storm dangers, and the land-use regulations promulgated pursuant to section 25-0302 of this act.

2. Notice that the state or any agency or subdivision thereof is in the process of acquisition of any tidal wetlands by negotiation or condemnation shall be sufficient basis for denial of any permit under this section.

3. In granting a permit, the commissioner may impose such conditions or limitations as may be necessary to carry out the public policy set forth in this act. The commissioner may require a bond in an amount and with surety and conditions satisfactory to him securing to the state compliance with the conditions and limitations set forth in the permit.

§ 25-0404. Judicial review.

Any person aggrieved by the issuance, denial, suspension, or revocation of a permit may within thirty days from the date of the commissioner's order seek judicial review pursuant to article seventy-eight of the civil practice law and rules in the supreme court for the county in which the tidal wetlands affected are located. In the event that the court may find that the determination of the commissioner constitutes the equivalent of a taking without compensation, and the land so regulated otherwise meets the interest and objectives of this act it may, at the election of the commissioner, either set aside the order or require the commissioner to acquire the tidal wetlands or such rights in them as have been taken, proceeding under the power of eminent domain.

§ 25-0405. Payments for extractions from or filling in wetlands.

1. Any applicant for a permit to dredge, excavate, or remove soil, mud, sand, shells, gravel or other aggregate from any publicly-owned tidal wetland shall be required to pay to the public owner thereof such amount, which shall not be nominal, as the office of general services or its local equivalent body shall determine to be the value of the aggregate extracted. Any person aggrieved by such determination may seek judicial review pursuant to article seventy-eight of the civil practice law and rules in the supreme court for the county in which the tidal wetland is located.

2. Any applicant for a permit to dump, fill, or deposit any soil, stones, sand, gravel, mud, rubbish, or fill of any kind onto or in any publicly-owned tidal wetlands shall be required to pay to the owner such amount, which shall not be nominal, as the office of general services or its local equivalent shall determine. Any person aggrieved by such determination may seek judicial review pursuant to article seventy-eight of the civil practice law and rules in the supreme court for the county in which the tidal wetland is located.

3. Monies paid to the state under this section shall be used by the commissioner for preservation of the tidal wetlands.

TITLE 6

MISCELLANEOUS PROVISIONS

Section 25-0601. Severability.

§ 25-0601. Severability.

The provisions of this act shall be severable, and if any clause, sentence, paragraph, subdivision or part of this act shall be adjudged by any court of competent jurisdiction to be invalid, such judgment shall not affect, impair or invalidate the remainder thereof, but shall be confined in its operation to the clause, sentence, paragraph, subdivision or part thereof directly involved in the controversy in

which such judgment shall have been rendered.

TITLE I

SOLID AND HAZARDOUS WASTE MANAGEMENT POLICY AND PLANNING

Section 27-0101. Legislative purposes.

27-0103. State solid waste management plan.

27-0105. Preferred statewide hazardous waste management practices hierarchy.

27-0106. State solid waste management policy.

27-0107. Local solid waste management plans; purpose and scope.

27-0109. State assistance for local solid waste management plans.

§ 27-0101. Legislative purposes.

1. It is the purpose of the legislature of the state of New York in enacting this article to encourage the development of economical projects for the present and future collection, treatment and management of solid and hazardous waste in such a manner as will assure full consideration of all aspects of planning for proper and effective solid and hazardous waste disposal, coordinated, so far as practicable, with other related state, regional and local planning activities, and consistent with the protection of the public health, including such factors as population change, urban and metropolitan development, land use planning, water pollution and air pollution control, and the feasibility of regional resource recovery programs.

2. It is furthermore the purpose of the legislature of the state of New York to effect maximum resource recovery from solid waste on a cost-effective basis, with minimum environmental debit, energy-efficient materials recovery, prudent land use, maximum economic benefits and maximum effective private sector participation, with due concern for the

primacy of the local and regional role in resource recovery procedures upon the basis of public knowledge and consent.

§ 27-0103. State solid waste management plan.

1. For the purposes of this article, the department is designated as the official state agency with the responsibility for preparing and updating the New York state solid waste management plan (hereinafter referred to as the "plan") consistent with the state resource recovery policies declared in the New York state resource recovery policy act, with this title, with titles five and seven of this article, and with the federal "Resource Conservation and Recovery Act of 1976" and amendments thereto.

2. The commissioner shall biennially review the status of programs and information contained within the plan and make recommendations for legislation or other state action related to:

(a) comprehensive procurement policies applicable to state agencies and public authorities which will give maximum feasible encouragement to the procurement of products manufactured with stated levels of secondary materials;

(b) incentives for developing and expanding markets for promoting the return of secondary materials and other recovered resources to productive use; and

(c) analysis of packaging and other various components of the waste stream to propose changes which will conserve energy and reduce solid waste generation.

In making such recommendations and reviewing said plans the commissioner shall take into account sound principles of solid waste management and relevant considerations of natural resources conservation, energy production and employment creating opportunities and shall further take into account any relevant changes in federal and state laws, any local solid waste management plans developed pursuant to section 27-0107 of this article, and the experience of agencies, local governments, private industry, the public and the results of the public

participation contemplated by the United States Environmental Protection Agency's Guidelines for Public Participation in Programs under the Resource Conservation and Recovery Act (40 CFR Part 25). On the basis of that review, the commissioner shall modify the plan, as appropriate, and, not later than March thirty-first of every other year, shall file such modified plan with the governor and the legislature.

3. Amendments to the plan shall assure current attention to:

(a) an identification of the boundaries of those regions within the state which, as a result of urban concentration, geographic conditions, secondary materials markets, technological feasibility, and other factors, are appropriate for carrying out regional solid waste management;

(b) identification of which solid waste functions will be planned for and carried out by which local authorities, regional authorities, state authorities, agencies and public benefit corporations, giving due consideration to the compatibility of the planning and implementing functions which can be combined at the local level;

(c) identification of local, regional and state authorities and agencies which shall have responsibility for the solid waste functions identified in the plan which shall be managed and carried out by or on behalf of such entities or any combination thereof, giving due consideration to the compatibility of the planning and implementing functions which can be combined at the local level;

(c-1) identification of strategies, programs and practices, in consultation with the commissioner of the office of general services, to be undertaken by the state in the management of solid waste generated by state agencies, to ensure the attainment by the state of statewide solid waste reduction and recycling goals established in the plan. Using information obtained from individual state agencies, the plan shall set forth dates by which the state of New York as a generator of solid waste is to recover progressively increasing amounts of recyclable materials from its waste stream and attain a reduction in its waste stream, consistent with the statewide waste reduction and recycling goals identified in the plan.

(d) identification of the environmental impacts including, but not limited to, air or water pollution, or the generation of hazardous waste

resulting from the utilization of solid waste management technologies;

(e) identification and projections of changes in the waste stream that are likely to occur during the useful life of a proposed facility, on a statewide and regional basis, during the projected planning period;

(f) the status of solid waste management activities and capacity, and projected special needs within the state;

(g) an assessment of future programs and resource needs to effectuate the purposes of such plan;

(h) an assessment of alternative resource recovery practices including but not limited to source separation, waste volume reduction, community recycling centers and sanitary landfill or other environmentally sound disposal manner or practice;

(i) any local solid waste management plan submitted to the commissioner by or on behalf of any municipality;

(j) legislative recommendations appropriate to effectuate the purposes of this title; and

(k) any other recommendations as may be appropriate.

4. In the case of any region which, pursuant to the federal "Resource Conservation and Recovery Act of 1976", would be located in two or more states, the commissioner shall include in the plan an identification of such regions and the function to be performed thereby and shall submit to the governor and the legislature recommendations for the development and enactment of the interstate agreements necessary to carry out the purposes of this article.

5. In connection with developing and updating the plan, the commissioner may request and shall receive from any department, division, board, bureau, commission or other agency of the state or any political subdivision thereof or any public authority such assistance and data as may be reasonably necessary to enable the commissioner to carry out his responsibilities under this section. In making such request, the commissioner shall consult and cooperate with such municipality or other public body to ensure against unnecessary duplication of effort or other administrative inefficiency.

§ 27-0105. Preferred statewide hazardous waste management practices hierarchy.

It is hereby declared that the following preferred hazardous waste management practices hierarchy is to be used to guide all hazardous waste policies and decisions:

a. The generation of hazardous wastes is to be reduced or eliminated to the maximum extent practical;

b. Hazardous wastes that continue to be generated are to be recovered, reused or recycled to the maximum extent practical;

c. Detoxification, treatment or destruction technologies are to be utilized for hazardous wastes which cannot be reduced, recovered, reused or recycled; and

d. Land disposal of industrial hazardous wastes, except treated residuals posing no significant threat to the public health or to the environment, should be phased out as it is the least preferable method of industrial hazardous waste management.

§ 27-0106. State solid waste management policy.

In the interest of public health, safety and welfare and in order to conserve energy and natural resources, the state of New York, in enacting this section, establishes as its policy that:

1. The following are the solid waste management priorities in this state:

(a) first, to reduce the amount of solid waste generated;

(b) second, to reuse material for the purpose for which it was originally intended or to recycle material that cannot be reused;

(c) third, to recover, in an environmentally acceptable manner, energy from solid waste that can not be economically and technically reused or recycled; and

(d) fourth, to dispose of solid waste that is not being reused, recycled or from which energy is not being recovered, by land burial or other methods approved by the department.

2. State government must make an essential contribution to the development and implementation of environmentally, economically and technically viable solid waste management programs through fulfilling its responsibilities to provide programs which promote waste reduction and the expansion of markets for recovered materials, clearly articulated, responsive and consistently applied regulatory structures, and a full range of technical assistance to local governments. A state-local partnership, in which the basic responsibility for the planning and operation of solid waste management facilities remains with local governments and the state provides necessary guidance and assistance, must be forged.

3. This policy, after consideration of economic and technical feasibility, shall guide the solid waste management programs and decisions of the department and other state agencies and authorities.

§ 27-0107. Local solid waste management plans; purpose and scope.

1. Purpose and scope. (a) A planning unit may undertake and complete a timely process leading to a local solid waste management plan for such unit for at least a ten-year period. For purposes of this section and section 27-0109 of this article, "planning unit" shall mean a county, two or more counties acting jointly, a local government agency or authority established pursuant to state law for the purposes of managing solid waste, any city located in the county of Nassau, or two or more other municipalities which the department determines to be capable of implementing a regional solid waste management program.

(b) The local solid waste management plan shall:

(i) characterize the solid waste stream to be managed in the planning period and methods to increase waste diversion including, but not limited to recycling and composting;

(ii) assess existing and alternate proposed solid waste management

programs and facilities;

(iii) address to the maximum extent practicable the comments and views expressed by concerned governmental, environmental, commercial and industrial interests and the public on the waste reduction, recycling, reuse and disposal alternatives;

(iv) identify the parties with responsibility to implement each element of the plan and the steps which must be undertaken by each;

(v) set forth a timetable for implementing the plan;

(vi) describe the participation in the preparation of the plan of each municipality which has chosen to participate in such preparation; and

(vii) describe (A) measures undertaken by the municipalities participating in the planning unit to secure participation of neighboring jurisdictions, (B) the limitations, if any, imposed by the proposed plan on solid waste management alternatives available to such neighboring jurisdictions, and (C) alternatives which would be available if a local solid waste management plan including such jurisdictions were prepared. Specific written suggestions received from neighboring jurisdictions shall be summarized and reflected in the plan.

(c) Such plan shall take into account the objectives of the state solid waste management policy, provide for or take into account management of all solid waste within the planning unit, and embody, as may be appropriate to the circumstances, sound principles of solid waste management, natural resources conservation, energy production, and employment creating opportunities.

(d) Such plan is authorized to include and shall utilize, to the extent practicable, prepared resource materials or generic analyses so as to minimize the development and use of original data to degrees of detail not pertinent to the circumstances.

(e) A plan may be submitted to the department by a planning unit on its own initiative or upon the request of the participating municipalities. The department shall review such plan and advise the planning unit that:

(i) the plan contains the elements set forth in paragraph (b) of this subdivision. Thereafter such plan shall become the local solid waste management plan in effect for such municipalities; or

(ii) the plan as submitted does not contain the elements set forth in paragraph (b) of this subdivision. The department shall state the

reasons for its determination under this subparagraph.

(f) For purposes of this subdivision, the department shall not serve as lead agency as defined in subdivision six of section 8-0111 of this chapter.

(g) For purposes of this section, "solid waste" shall have the same meaning as is found in subdivision one of section 27-0701 of this article, but shall not include source, special nuclear or by-product material as defined in the atomic energy act of 1954, as amended, or hazardous waste which appears on the list or satisfies the characteristics of hazardous waste promulgated pursuant to section 27-0903 of this article or, low level radioactive waste as defined in section 29-0101 of this chapter.

2. The department shall promulgate rules and regulations in accordance with the provisions of the state administrative procedure act for the implementation of this section and section 27-0109 of this article.

§ 27-0109. State assistance for local solid waste management plans.

1. As a complement to, and in conjunction with the technical assistance provided pursuant to this chapter, and to foster and facilitate local planning, a planning unit may apply for state assistance for developing solid waste management plans pursuant to section 27-0107 of this article or to update or revise an existing plan to address the elements contained in paragraph (c) of subdivision one of such section.

2. The commissioner is authorized to contract to make a state grant, within the limit of appropriation therefor, to any planning unit for up to ninety percent of the costs to prepare, update or revise its local solid waste management plan; provided, however, that no such grant has been previously made to a planning unit which is a part of or is served by the planning unit seeking such grant. A planning unit may receive a grant pursuant to this subdivision which shall not exceed the greater of twenty-five thousand dollars or one dollar for each resident of the planning unit, based upon the current federal decennial census.

3. Applications for such assistance shall outline the proposed scope and timetable for preparation of the plan pursuant to section 27-0107 of this article. In addition, the planning unit must demonstrate its intent that the purpose of undertaking the plan is to develop a viable solution to its solid waste management needs which cannot be achieved based on an existing plan.

4. Payments authorized under this section for the preparation, update or revision of a plan shall be made as follows:

(a) not more than fifty percent of the total grant upon approval by the department of the grant request; and

(b) the balance of the total grant in not more than three periodic payments for unreimbursed costs, as provided in the contract.

5. The commissioner may, in the commissioner's discretion, deny funding to a planning unit which is within the jurisdiction of another planning unit or proposed planning unit.

TITLE 3

WASTE TRANSPORTER PERMITS

Section 27-0301. Intent and purpose.

27-0303. Definitions.

27-0305. Permits for waste transporters.

27-0307. Waste transporter permit revocation notifications.

§ 27-0301. Intent and purpose.

It is declared to be the intent and purpose of this title to protect the environment from mishandling and mismanagement of all regulated wastes transported from the site of generation to the site of ultimate treatment, storage or disposal and to prevent a discharge of wastes into the environment, whether accidental or intentional, except at a site approved for the treatment, storage or disposal of such wastes.

§ 27-0303. Definitions.

When used in this title:

1. "Disposal" means the abandonment, discharge, deposit, injection, dumping, spilling, leaking or placing of any substance so that such substance or any related constituent thereof may enter the environment. Disposal also means the thermal destruction of waste or hazardous waste and the burning of such wastes as fuel for the purpose of recovering useable energy.

2. "Industrial-commercial waste" means a waste which originates at, is generated by, or occurs as a result of any industrial or commercial activity. The forms of waste included are exemplified by but not limited to the following:

a. liquids such as: acids, alkalis, caustics, leachate, petroleum (and its derivatives), and process or treatment wastewaters;

b. sludges which are semisolid substances resulting from process or treatment operations, or residues from storage or use of liquids;

c. solids such as: solidified chemicals, paints or pigments; the end or by-products of incineration ash; foundry sand; dredge spoil;

d. contained gaseous materials;

e. hazardous waste as defined in title 9 of this article; and

f. any liquid, sludge, septage, solid, semisolid substance or contained gaseous material in which any of the foregoing is intermixed or absorbed, or onto which any of the foregoing is adhered.

3. "Person" means any individual, public or private corporation, political subdivision, government agency, department or bureau of the state or federal government, municipality, industry, co-partnership,

association, firm, trust, estate or any other legal entity.

4. "Regulated waste" means any one of the following types of waste: raw sewage, septage, sludge from a sewage or water supply treatment plant, industrial-commercial waste, low-level radioactive waste as defined in subdivision nine of this section, waste tires or waste oil.

5. "Septage" means the contents of a septic tank, cesspool or other individual sewage treatment facility which receives domestic sewage wastes.

6. "Storage" means the holding of waste for a temporary period, at the end of which the waste is processed, recovered, disposed of, or stored elsewhere.

7. "Waste" means any garbage, refuse, sludge from a waste treatment plant, water supply treatment plant or air pollution control facility, and other discarded material, including solid, liquid, semisolid or contained gaseous material resulting from industrial, commercial, mining and agricultural operations and from community activities, but does not include solid or dissolved material in domestic sewage, or solid or dissolved materials in irrigation return flows or industrial discharges which are point sources subject to permits under article 17 of this chapter, or source, special nuclear or by-product material as defined in the Atomic Energy Act of 1954, as amended (68 Stat. 923) except as may be provided by existing agreements between the state and the federal government.

8. "Waste oil" means used engine lubricating oil and any other oil, including but not limited to, fuel oil, motor oil, gear oil, cutting oil, transmission fluid, hydraulic fluid, dielectric fluid, oil storage tank residue, animal oil, and vegetable oil, which has been contaminated by physical or chemical impurities, through use or accident, and has not subsequently been rerefined.

* 9. "Low-level radioactive waste" means radioactive material that:

a. is not high-level radioactive waste, transuranic waste, spent

nuclear fuel, or the tailings or wastes produced by the extraction or concentration of uranium or thorium from any ore processed primarily for its source material content; and

b. the United States nuclear regulatory commission, consistent with federal law and in accordance with paragraph a of this subdivision, classifies as low-level radioactive waste.

* NB There are 2 sb 9's

* 9. "Environment" means any water, water vapor, any land including land surface or subsurface, air, fish, wildlife, biota and all other natural resources.

* NB There are 2 sb 9's

11. "Regulated medical waste" shall have the same meaning as such term is defined in title 15 of this article.

12. "Waste tires" shall mean waste tires transported for a fee for the purpose of reuse, recycling or disposal, except those tires collected and transported incidental to the collection and transportation of solid waste.

§ 27-0305. Permits for waste transporters.

1. Except as otherwise exempted by this title, no person shall engage in the transportation of regulated waste originating or terminating at a location in this state without a permit pursuant to this section. In addition, no person shall engage in the transportation of low-level radioactive waste into, within or through this state without a permit pursuant to this section.

2. (a) The commissioner may, by regulation, exempt from the permit requirements of this title persons engaged in the transportation of:

- (1) types of wastes which do not constitute a hazard to human health and the environment;
- (2) small quantities of waste; or
- (3) wastes transported by rail, water and air carriers.

(b) The commissioner may also exempt from the permit requirements of this title persons engaged in the transportation of low-level radioactive waste only upon a showing by such person that compliance with such requirements would create a hardship on his own business activities and upon a determination that, based upon the characteristics including half life, concentration, activity, and toxicity of the specific low-level radioactive waste transported, such transport imposes no potential significant adverse impact on public health, safety or welfare, the environment, or natural resources as determined by the department in consultation with the department of health. The commissioner shall promulgate guidelines for the purpose of determining the circumstances under which such exemption may be granted. Any person granted such an exemption must comply with such conditions as specified by the commissioner. Such exemption shall be reviewed periodically as specified by the commissioner but at least once every two years. Any exemption granted hereunder may be revoked after due notice and opportunity for hearing for a violation of any provision of this title or other applicable laws, rules or regulations relating to the transportation of regulated wastes or upon a showing that the exempted person no longer meets the requisite guidelines for exemption.

3. A generator of a waste may obtain a permit pursuant to this title to transport his own waste or if he contracts with another person to remove, transport or dispose of regulated wastes. If a generator obtains such a permit, a person engaged in the removal, transportation or disposal of his waste shall not be required to obtain a permit pursuant to this title for the transportation of such wastes.

4. The department shall make rules and regulations implementing this section promulgated in accordance with the state administrative procedure act in order to carry out and enforce the intent and purposes thereof. Such rules and regulations and the provisions of article 70 of this chapter and rules and regulations adopted thereunder shall govern permit applications, permit conditions, renewals, modifications, suspensions and revocations under this section. The department shall, in promulgating any new or revised rule or regulation, accompany such rulemaking with an environmental impact statement or a written

assessment stating the extent to or means by which such rule or regulation will carry out the intent and purpose of this section. The responsibility for the issuance and review of permits and the enforcement of the provisions of this section may be delegated to regional, district or county offices of the state department of health, or to local health departments where their jurisdiction may apply.

5. Applications filed pursuant to this section shall indicate the mechanical and other equipment, holding tanks and vehicles and any place of temporary storage used or to be used by the applicant and the place or places where and the manner in which the applicant will finally dispose of the regulated wastes, and such other information as the department deems necessary. If the department determines that the proposed method of transportation, the place or manner in which the waste product is to be treated, stored or disposed of or the method or location of temporary storage will be detrimental to or substantially damage or pollute the environment or natural resources of the state, it may deny the permit or may impose such permit conditions as will adequately protect against unreasonable defilement or degradation of the natural resources of the state.

6. As a condition for the permit the department shall require every vehicle operated by the transporter to be conspicuously marked or placarded to identify, in a manner consistent with section fourteen-f of the transportation law and any rules and regulations promulgated thereunder and any related federal requirements, the regulated waste transported or its principal hazard. Further, any such vehicle shall be conspicuously marked or placarded in a like manner with the full name, including the full first name or legally registered trade name or names of the transporter and the number of the waste transporter permit issued pursuant to this section; provided, however, that such marking or placarding for any vehicle transporting low-level radioactive waste shall be consistent with federal rules and regulations. The commissioner may, by rules and regulations prescribe with respect to any specific regulated waste the minimum quantities below which no marking or placard is required, consistent with section fourteen-f of the transportation law and any rules and regulations promulgated thereunder.

7. As a condition for the permit or the exemption therefrom the department shall require the transporter, except transporters of hazardous waste subject to manifesting under section 27-0905 of this article, to make an annual report to the department, indicating the number and type of installations emptied or cleaned, the volume and nature of waste products disposed of, and the place and manner in which such waste products were finally disposed, and such other information as the department may require.

8. Such permit shall be renewed annually. The fees for such permit or renewal shall be those established by regulation promulgated pursuant to article 70 of this chapter. A renewal may be denied by the department for failure of the applicant to properly report as provided in subdivision 7 of this section.

9. The department may suspend or revoke any permit upon proof that the permittee has been found guilty of a misdemeanor in the violation of the provisions of this section as provided in section 71-1503, or if the department determines that the permittee has violated the provisions of this section, the rules and regulations implementing it or the rules and regulations adopted to implement article 70 of this chapter.

10. The department is authorized and directed to adopt rules and regulations with respect to the institution of a system of manifests associated with the transportation of low-level radioactive wastes, consistent with requirements of the United States nuclear regulatory commission, and in furtherance of the agreement between the state and the nuclear regulatory commission dated July fourth, nineteen hundred sixty-two. Such rules and regulations shall provide that a copy of the manifest shall be returned to the department.

11. The department shall issue a report based upon information made available to the department pursuant to this section, on an annual basis to the governor, the temporary president of the senate and the speaker of the assembly. Such report shall include, but not be limited to, the number, origin and destination of truckloads of low-level radioactive

waste leaving or entering the state for disposal and the types of low-level radioactive waste being transported into, through or within this state and the frequency of such movement.

12. No person shall engage in the transportation of regulated medical waste originating or terminating at a location within the state without a permit pursuant to the provisions of title 15 of this article, unless otherwise exempted therein.

§ 27-0307. Waste transporter permit revocation notifications.

After the issuance of an order of suspension or revocation of the permit of a waste transporter, the department shall publish notice of such suspension or revocation in a newspaper or newspapers having a general circulation in the area or areas served by the permittee and in the environmental notice bulletin published by the department. Such notice shall include a statement that the permittee is no longer licensed or permitted to handle such waste. The department shall publish such notice once each week for two consecutive weeks with the first publication to be completed on or before the fifteenth day following such revocation or suspension.

TITLE 4

MARKETING OF RECYCLABLE MATERIALS

Section 27-0401. Secondary materials.

27-0403. Legislative intent.

27-0405. New York state local resource reuse and development program.

§ 27-0401. Secondary materials.

1. As used in this article, "secondary materials" shall mean material recovered from or otherwise destined for the waste stream, including but not limited to, post-consumer material, industrial scrap material and

overstock or obsolete inventories from distributors, wholesalers and other companies as defined in rules and regulations promulgated by the commissioner of economic development in consultation with the commissioner but such term does not include those materials and by-products generated from, and commonly reused within, an original manufacturing process.

2. For the purposes of this article, the department shall assist the department of economic development in conducting secondary materials market development programs pursuant to article six of the economic development law, as added by chapter six hundred fifteen of the laws of nineteen hundred eighty-seven, and other state agencies and authorities conducting waste reduction and recycling programs.

3. The department shall assist in providing consumer education on the economic and environmental benefits of solid waste management practices and the concomitant needs for waste reduction and for consumers to actively seek consumer products which contain secondary materials or which are easily recycled or reused.

§ 27-0403. Legislative intent.

The legislature hereby finds and declares that development and implementation of local programs to conserve energy through sound solid waste management efforts can be of broad benefit to the state. Through utilization of resource reuse and other programs, primary raw materials can be conserved, energy savings can be gained, the amount of waste disposed of in landfills can be reduced, and, through proper management of the waste stream, improved operations at waste-to-energy facilities may be realized. In recognition of the potential benefits to be accrued from implementing sound solid waste management programs, the legislature hereby declares that a program directed toward enhancing the state's resource reuse efforts will provide energy, economic and environmental benefits for New York state.

§ 27-0405. New York state local resource reuse and development program.

1. The department shall design and actively implement a local resource reuse and development program which shall promote the collection, intermediate processing and marketing of waste materials that are now being disposed of as municipal solid waste in New York state. The program shall:

(a) promote the development and implementation of resource reuse programs by municipalities;

(b) serve as a clearinghouse for information regarding existing municipal resource reuse programs;

(c) identify special needs and problems facing municipalities in developing and implementing resource reuse programs, and recommend approaches and solutions to address such identified needs and problems; and

(d) provide other technical assistance to municipalities seeking to develop and implement resource reuse programs.

2. The program shall provide funding for up to seventy-five percent of the cost of municipal resource reuse programs, including the cost of planning, designing, coordinating and implementing collection, processing, marketing, public participation, promotional and other activities essential to carrying out the program. Funds shall be made available for one or more of the following purposes:

(a) an analysis of the municipal waste stream;

(b) a preliminary market survey to identify:

(1) firms in the region that currently process, broker, market or otherwise engage in resource reuse activities, and

(2) the quantity of additional waste materials that current markets could absorb;

(c) development and distribution of information based on the operation of the program and the related materials and market considerations;

(d) support of a local resource reuse coordinator who will be responsible for overseeing development and implementation of the municipal resource reuse program. Duties shall include coordinating municipal collection, intermediate processing and marketing efforts with existing local, regional and state resource reuse and market development

efforts; and

(e) development of a comprehensive resource reuse public education and promotion campaign to inform residents regarding the need for and operation of local resource reuse efforts and to increase public awareness of the benefits to be accrued from utilizing reused and recycled products. The promotional campaign shall include, but need not be limited to:

(1) public education and outreach activities such as: magazine, newspaper, television, radio and public transportation advertisements and public informational meetings and seminars; and

(2) dissemination of public information materials providing the details of the municipal program including, but not limited to items to be collected, collection locations and schedules.

3. The department shall receive applications for assistance from a municipality, acting alone or in conjunction with one or more other municipalities. Applications shall be evaluated based on the following criteria:

(a) energy savings of the proposal;

(b) technical feasibility of the proposal;

(c) municipal government commitment to the program;

(d) whether the applicant has pursued other sources of funding, including, but not limited to funding available under title nine of article fifty-one of this chapter; and

(e) demonstrated ability of the applicant to carry out the proposed program.

4. In evaluating proposals, the department shall consider the potential for coordination and consolidation of solid waste practices among municipalities within specified areas or regions, and shall encourage such cooperation and consolidation where it is practicable and would result in enhanced energy savings, environmental protection and cost effectiveness.

TITLE 5

STATE AID FOR IMPLEMENTATION OF RESOURCE

**RECOVERY AND OTHER IMPROVED SOLID
WASTE MANAGEMENT SYSTEMS**

Section 27-0501. Definitions.

27-0503. State aid.

27-0505. Powers and duties of the commissioner.

27-0507. Powers of municipalities.

27-0509. Technical assistance.

§ 27-0501. Definitions.

1. "Collection system development program" means a comprehensive review of existing solid waste collection practices and the development of designs for efficient and cost-effective systems for the systematic collection of solid waste of one or more municipalities or any portion thereof.

2. "Preparation of contract documents" means the preparation of documents for entering into contracts for (a) the design, construction, operation, financing, ownership or maintenance of a solid waste management facility; (b) a system of collection and disposal of municipal solid waste through resource recovery; and (c) the marketing of materials and energy recovered from solid waste. Such documents may include detailed construction plans and specifications, bid advertisements, requests for proposals and reports evaluating bids and proposals.

3. "Implementation feasibility project" means the investigation and evaluation of any one or more of the following: engineering, economic, environmental, technological, administrative, institutional, social and political factors affecting the acceptability of a solid waste management facility or system of which the facility is part for the purpose of determining the feasibility of constructing such proposed facility or establishing such system.

4. "Municipality" means a village, town, city or county or any designated agency thereof, or any two or more of the foregoing which are

acting jointly in connection with a solid waste management facility, a solid waste management district, or a public benefit corporation having power granted otherwise than under this article to construct, operate and maintain a solid waste management facility, including a public corporation created pursuant to agreement or compact with another state.

5. "Recycling center" means a community-based facility where separated solid waste can be stored, assembled and prepared for sale or other disposition.

6. "Resource recovery" means the separation, extraction and recovery of useable materials, energy or heat from solid waste through source separation, recycling centers or other programs, projects or facilities.

7. "Solid waste" means all materials or substances discarded or rejected as being spent, useless, worthless, or in excess to the owners at the time of such discard or rejection, including but not limited to garbage, refuse, industrial and commercial waste, sludges from air or water pollution control facilities or water supply treatment facilities, rubbish, ashes, contained gaseous material, incinerator residue, demolition and construction debris and offal, but not including sewage and other highly diluted water-carried materials or substances and those in gaseous form.

8. "Solid waste management facility" means any facility employed beyond the initial solid waste collection process, including but not limited to recycling centers, transfer stations, baling facilities, rail haul or barge haul facilities, processing systems, including resource recovery facilities or other facilities for reducing solid waste volume, sanitary landfills, plants and facilities for compacting, composting or pyrolization of solid waste, incinerators and other solid waste disposal, reduction or conversion facilities.

9. "Source separation" means the segregation of recyclable materials from the solid waste stream at the point of generation for separate collection, sale or other disposition.

10. "Secondary materials" means those commodities that have been reclaimed for reuse and are used in place of a primary or raw material in manufacturing a product.

§ 27-0503. State aid.

1. The commissioner may, in the name of the state, make or contract to make, within the limitation of appropriations therefor, a state grant for the payment to any municipality of not more than fifty percent of the eligible cost of collection system development programs, preparation of contract documents, and implementation feasibility projects.

2. The commissioner shall enter into a grant agreement pursuant to this title only upon a finding that the municipality has given due consideration to the items listed below or that such consideration will be given through the fulfillment of the terms of the proposed grant agreement. Pursuant to section 27-0505 of this title, the commissioner shall adopt guidelines relative to the criteria for making such finding. These guidelines shall require at least that relative to the proposed facility, system or actions which are to be the subject of the proposed grant agreement, due consideration shall be given to:

- (a) any relevant, prior solid waste management study or report;
- (b) reasonable alternatives which would achieve the same or similar objectives, including opportunities for utilizing:
 - (i) existing solid waste management-resource recovery alternatives;
 - (ii) existing facilities of the secondary materials industry;
 - (iii) source separation programs and recycling centers, composting programs; and
 - (iv) multi-municipal or regional arrangements for resource recovery and solid waste management;
- (c) effects on the use, conservation and production of energy; and
- (d) effects on employment.

3. Payments authorized pursuant to this title shall be made in three apportionments in accordance with the following:

- (a) the first payment, not to exceed fifty percent, less retained

percentages, of the total grant shall be payable when acceptable documents, as required to be prepared by the grant agreement, are approved by the commissioner. In the case of collection system development programs and implementation feasibility projects, such documents shall include a report containing recommended actions and a time schedule for taking such actions. In the case of preparation of contract documents, such documents shall include construction plans and specifications, bid advertisements, requests for proposals, or evaluation reports of bids or proposals containing recommended actions.

(b) the balance of the grant, less retained percentages, shall be payable:

(i) in the case of collection system development programs or implementation feasibility projects, when the municipality officially acts upon the recommendations contained in the approved report; and

(ii) in the case of preparation of contract documents, when contracts are awarded or when construction begins, whichever occurs first.

(c) the final payment shall be made after appropriate audit.

(d) the department shall oversee the use of the grant to assist the municipality.

§ 27-0505. Powers and duties of the commissioner.

In administering and enforcing the provisions of this title, the commissioner shall:

1. make an estimate of funds or appropriations for inclusion annually in the executive budget for state aid under this title including section 27-0509 hereof;

2. receive applications for state aid in such form and containing such information as he may require;

3. qualify municipalities for state aid and advise them concerning such qualification;

4. in the cases of collection system development programs and

implementation feasibility projects, approve the geographical scope and subject matter coverage thereof prior to commencement to work thereon;

5. approve prior to final payment the documents in respect to which state aid has been sought;

6. approve vouchers for payment of state aid grants;

7. adopt guidelines setting forth criteria by which to evaluate the eligibility and relative entitlement of municipalities for funding under this title; and

8. perform such other and further acts and promulgate such further rules and regulations as may be necessary, proper and desirable to carry out effectively the provisions of this title.

§ 27-0507. Powers of municipalities.

Any municipality may:

1. apply to and contract with the commissioner for state aid pursuant to this article;

2. enter into contracts for consulting, engineering and other professional services for the preparation of documents in respect to which state aid is to be sought pursuant to this title; provided, however, the contract costs negotiated between the person or firm chosen to perform such services and the applicant for state aid under this title shall be subject to the approval of the commissioner; and

3. expend money received from the state pursuant to this title only for purposes consistent therewith.

§ 27-0509. Technical assistance.

The commissioner shall prepare and distribute to municipalities, and may distribute to other persons, upon request, information relevant to the source separation of solid waste. The commissioner shall provide consultations to assist in the development of programs under this section. Such technical assistance program shall include, but not be limited to:

1. classification of recyclable materials;
2. techniques for home sorting of solid waste;
3. collection systems for separated materials which promote the efficiency of resource recovery facilities;
4. use of compartmentalized sanitation vehicles to maintain collected materials in an uncontaminated condition;
5. identification of appropriate marketing specifications and markets to assist persons who engage in preparing recovered materials for market;
6. education and public information programs which include source reduction and the relationship between solid waste and energy;
7. projections of probable changes in the waste stream due to changes in population, industry and employment in the municipality;
8. model local law or ordinance to implement source separation; and
9. other relevant information for solid waste management.

TITLE 7

SOLID WASTE MANAGEMENT AND RESOURCE RECOVERY FACILITIES

Section 27-0701. Definitions.

27-0703. Powers and duties of the department; solid waste management facilities.

- 27-0704. Land burial and disposal in the counties of Nassau and Suffolk; special provisions.
- 27-0705. Adoption of rules and regulations; public hearings.
- 27-0706. Closure requirements for certain landfills and recycling requirements for certain municipalities.
- 27-0707. Permits for new solid waste management facilities.
- 27-0711. Local laws, ordinances and regulations.
- 27-0712. Coverage of all vehicles, including barges transporting solid waste.
- 27-0715. Solid waste management technical assistance.
- 27-0717. Bureau of waste reduction and recycling.
- 27-0719. Battery management and disposal.

§ 27-0701. Definitions.

As used in this title:

1. "Solid waste" means all putrescible and non-putrescible materials or substances discarded or rejected as being spent, useless, worthless or in excess to the owners at the time of such discard or rejection, except including but not limited to garbage, refuse, industrial and commercial waste, sludges from air or water control facilities, rubbish, ashes, contained gaseous material, incinerator residue, demolition and construction debris, discarded automobiles and offal but not including sewage and other highly diluted water carried materials or substances and those in gaseous form.

2. "Solid waste management facility" means any facility employed beyond the initial solid waste collection process including, but not limited to, transfer stations, baling facilities, rail haul or barge haul facilities, processing systems, including resource recovery facilities or other facilities for reducing solid waste volume, sanitary landfills, facilities for the disposal of construction and demolition debris, plants and facilities for compacting, composting or pyrolyzation of solid wastes, incinerators and other solid waste disposal, reduction or conversion facilities.

3. "Solid waste management" means the purposeful and systematic transportation, storage, processing, recovery and disposal of solid waste.

4. "Resource recovery" means the separation, extraction and recovery of useable materials, energy or heat from solid waste through source separation, recycling centers or other programs, projects or facilities.

§ 27-0703. Powers and duties of the department; solid waste management facilities.

1. To the maximum extent feasible, the department shall carry out the provisions of this title so as to facilitate short and long term planning for solid waste disposal, to promote cooperation among neighboring localities in the planning and implementation of solid waste management programs and facilities, and to facilitate implementation of solutions to solid waste management problems confronted by localities.

2. The department shall have the power to: (a) Adopt and promulgate, amend and repeal rules and regulations governing the operation of solid waste management facilities. Such rules and regulations shall be directed at the prevention or reduction of (i) water pollution, (ii) air pollution, (iii) noise pollution, (iv) obnoxious odors, (v) unsightly conditions caused by uncontrolled release of litter, (vi) infestation of flies and vermin, and (vii) other conditions inimical to the public health, safety and welfare. In promulgating such rules and regulations, the department shall give due regard to the economic and technological feasibility of compliance therewith. Any rule or regulation promulgated pursuant hereto may differ in its terms and provisions as between particular types of solid waste management facilities and as between particular areas of the state.

(b) Provide technical assistance to municipalities and other persons engaged in solid waste management and provide training for proper operation of solid waste management facilities.

(c) Cooperate with appropriate local, state, interstate and federal

agencies to promote the operation of solid waste management facilities in a safe, sanitary, efficient and environmentally sound manner.

3. The department shall, in promulgating any new or revised rule or regulation, accompany such rule making with an environmental impact statement or a written assessment stating the extent to or means by which such rule or regulation will prevent or reduce the factors identified in subparagraphs (i) through (vii) of paragraph (a) of subdivision two of this section.

4. Siting, design, construction, and operating requirements established pursuant to subdivision two of this section for solid waste management facilities shall be embodied in rules and regulations of the department promulgated pursuant to the state administrative procedure act.

5. The commissioner shall cause program plans to be prepared for all solid waste management assistance programs of the department enacted or substantially modified by the solid waste management act of 1988 or hereafter enacted, for the program of funding small scale, low technology approaches to resource recovery pursuant to section 51-0905 of this chapter, and for the local resource reuse and development program established by section 27-0405 of this article. Such plans shall be consistent with the legislative intent and statutory authorization for such programs. Program plans shall be derived from and shall be consistent with the state solid waste management policy set forth in section 27-0106 of this article. Such plans shall be transmitted to the temporary president and the minority leader of the senate and the speaker and the minority leader of the assembly within ninety days of the effective date of this act or of the effective date of any statute authorizing such program. Program plans shall describe the goals and objectives of each program, operational priorities and administrative procedures to be established in administering each program, shall guide the development of operating procedures and administrative rules and regulations governing each program, shall set forth the manner in which the program shall be coordinated with other solid waste management programs and shall set forth a description of the operating

relationships with the department of environmental conservation, other relevant agencies and authorities and regional and local public and private organizations.

6. Notwithstanding any other provision of law or rule or regulation to the contrary, the owner or operator of a solid waste management facility engaged in the storage of one thousand or more waste tires in existence on or after the effective date of this subdivision shall submit to the department a completed application for a permit to continue to operate such facility, or cease operations and begin removal of the waste tires from the facility and dispose of or treat them in a lawful manner pursuant to a removal plan approved by the department. The owner or operator must provide financial assurance to cover the cost of closure of the facility at its maximum capacity, in a form and amount acceptable to the department, before a permit will be issued. Any owner or operator who obtained a permit pursuant to this subdivision before the effective date of the waste tire management and recycling act of 2003 shall provide such financial assurance within one hundred eighty days of the effective date of such act. Failure to provide or maintain financial assurance shall be grounds for the denial or revocation of a permit.

§ 27-0704. Land burial and disposal in the counties of Nassau and Suffolk; special provisions.

1. Definitions. As used in this section the following terms shall have the following meanings:

a. "Clean fill" shall mean material consisting of concrete, steel, wood, sand, dirt, soil, glass, or other inert material designated by the commissioner.

b. A "deep flow recharge area" shall mean a sensitive recharge area within the counties of Nassau and Suffolk within the boundaries of hydrogeologic zones I, II and III as defined in the Long Island Comprehensive Waste Treatment Management Plan of nineteen hundred seventy-eight.

c. "Downtime waste" shall mean any treatable or burnable waste accumulated during a scheduled or unscheduled maintenance period of a treatment facility.

d. "Hazardous waste" shall be defined as promulgated by the provisions of section 27-0903 of this article.

e. "Landfill" shall mean a disposal facility at which solid waste, or its residue after treatment, is intentionally placed and at which, waste shall remain after closure.

f. "Long Island Comprehensive Waste Treatment Management Plan of nineteen hundred seventy-eight" shall mean the study prepared by the Long Island Regional Planning Board pursuant to section two hundred eight of the federal water pollution control act.

g. "Treatment facility" shall mean resource recovery, incineration, composting, or other process as approved by the commissioner through which solid waste is put in order to reduce volume and toxicity.

h. "Untreatable waste" shall mean that material that because of its size or composition cannot be processed by a treatment facility.

2. The Long Island Comprehensive Waste Treatment Management Plan of nineteen hundred seventy-eight shall be kept on file in the office of the commissioner. The hydrogeologic zones and their attendant boundaries as specified in the aforementioned plan are hereby adopted. Any changes made in the boundaries and accepted by the commissioner shall be considered as automatically adopted for the purposes of this section.

3. On or after the effective date of this section and except as provided herein, no person shall commence operation, including site preparation, of a new landfill or of an expansion to an existing landfill which is located in a deep flow recharge area. However, the commissioner, after conducting a public hearing, may approve a limited expansion of any existing landfill in a deep flow recharge area for the

sole purpose of providing for solid waste disposal capacity prior to the implementation of a resource recovery system. The commissioner shall not approve any such expansion unless he finds that the owner of such landfill is a municipality that is implementing a resource recovery system which is acceptable to the commissioner and which will be operational no later than seven years after the effective date of this section and that no other feasible means of solid waste management is available, taking into account technological, economic and other essential factors.

4. On or after the effective date of this section, no person shall commence operation, including site preparation, of a new landfill or of an expansion to an existing landfill, which is located in the county of Nassau or Suffolk outside of deep flow recharge areas unless:

a. The commissioner has made an affirmative determination that such landfill will not pose a threat to groundwater quality; and

b. The owner or operator of the landfill has posted a financial guarantee such as, but not limited to, pollution liability insurance, sureties, performance bonds and/or trust funds acceptable to the commissioner securing the cost of corrective treatment, or the development of alternative water sources, should such landfill become a source of groundwater, surface water, or air pollution. The size of the financial guarantee, the financial stability of the surety, and the terms of posting shall be determined by the commissioner. Financial surety shall also be arranged to ensure the proper operation and maintenance of leachate and other collection and treatment systems for a period of time, as determined by the commissioner, after a landfill is closed; and

c. The landfill is underlain by two or more natural and/or synthetic liners each with provisions for leachate collection, and has a treatment and disposal system, all of which are approved by the commissioner. Any natural clay liners shall have a minimum compacted thickness of two feet and all liners shall have a maximum hydraulic conductivity not to exceed one times ten to the minus seven centimeters per second. If the landfill

uses two synthetic liners, the department shall require that the liners are of different chemical compositions; and

d. The landfill is designed and operated to minimize the migration of methane gas or other gases beyond the facility boundaries so as to avert the creation of a nuisance or a danger to property or public health; and

e. The landfill is prohibited from accepting industrial, commercial or institutional solid or liquid waste that is hazardous; and

f. The landfill is not located in a freshwater wetland, tidal wetland or floodplain as identified by the department.

g. Except as provided herein, the landfill accepts only material which is the product of resource recovery, incineration or composting.

Downtime waste and wastes that are untreatable by a resource recovery system may be disposed of when handled as provided in this paragraph. Downtime waste and untreatable waste that is landfilled may only be deposited in a special disposal area that is located and constructed so as to segregate these wastes and minimize their effect on residents of the surrounding area. Not more than ten percent of the annual rated capacity of a resource recovery facility may be disposed of as downtime waste per year. However, up to ten percent of the annual rated capacity of more than one resource recovery facility may be so disposed of at a single landfill.

Any such landfill may also accept wastes other than those authorized in this subdivision whenever such disposal is approved by the commissioner based upon a finding made after the opportunity for a public hearing that (i) no resource recovery facility is available to accept such waste; (ii) the owner of the landfill is making all reasonable efforts to implement a resource recovery system acceptable to the commissioner; and (iii) that the landfilling of such wastes will not have significant adverse environmental impacts. In granting any such approval, the commissioner shall impose conditions necessary to mitigate any adverse environmental impacts to the maximum extent practicable and shall impose a schedule under which the municipality shall implement an

acceptable resource recovery system.

5. Within seven years of the effective date of this section, no person shall operate a landfill existing on the effective date of this section in the counties of Nassau and Suffolk unless:

a. The owner or operator of the landfill has posted a financial guarantee such as, but not limited to, pollution liability insurance, sureties, performance bonds and/or trust funds acceptable to the commissioner securing the cost of corrective treatment, or the development of alternative water sources, should such landfill become a source of groundwater, surface water or air pollution. The size of the financial guarantee, the financial stability of the surety, and the terms of posting shall be determined by the commissioner. Financial surety shall also be arranged to ensure the proper operation and maintenance of leachate and other collection and treatment systems for a period of time, as determined by the commissioner, after a landfill is closed; and

b. The landfill is underlain by two or more natural and/or synthetic liners each with provisions for leachate collection, and has a treatment and disposal system, all of which are approved by the commissioner. Any natural clay liners shall have a minimum compacted thickness of two feet and all liners shall have a maximum hydraulic conductivity not to exceed one times ten to the minus seven centimeters per second. If the landfill uses two synthetic liners, the department shall require that the liners are of different chemical composition; and

c. The landfill is designed and operated to minimize the migration of methane gas or other gases beyond the facility boundaries so as to avert the creation of a nuisance or a danger to property or public health; and

d. The landfill does not accept industrial, commercial or institutional solid or liquid waste that is hazardous; and

e. The landfill is not located in a freshwater wetland, tidal wetland or floodplain as identified by the department.

f. Except as provided herein, the landfill accepts only material which is the product of resource recovery, incineration or composting. Downtime waste and wastes that are untreatable by a resource recovery system may be disposed of when handled as provided in this paragraph. Downtime waste and untreatable waste that is landfilled may only be deposited in a special disposal area that is located and constructed so as to segregate these wastes and minimize their effect on residents of the surrounding area. Not more than ten percent of the annual rated capacity of a resource recovery facility may be disposed of as downtime waste per year. However, up to ten percent of the annual rated capacity of more than one resource recovery facility may be so disposed of at a single landfill.

If the landfill is located outside of the deep flow recharge area, such landfill may also accept wastes other than those authorized in this subdivision whenever such disposal is approved by the commissioner based upon a finding made after the opportunity for a public hearing that (i) no resource recovery facility is available to accept such waste; (ii) the owner of the landfill is making all reasonable efforts to implement a resource recovery system acceptable to the commissioner; and (iii) that the landfilling of such wastes will not have significant adverse environmental impacts. In granting any such approval, the commissioner shall impose conditions necessary to mitigate any adverse environmental impacts to the maximum extent practicable and shall impose a schedule under which the municipality shall implement an acceptable resource recovery system.

6. Notwithstanding the other provisions of this section, the commissioner may allow, by permit, the disposal of clean fill material in the counties of Nassau and Suffolk. Such material shall not be contaminated with hazardous wastes.

§ 27-0705. Adoption of rules and regulations; public hearings.

A rule or regulation or any amendment or repeal thereof shall not be

adopted until after public hearing thereon. Notice of such hearing shall be given at least sixty days prior to the scheduled date of the hearing by public advertisement in the area of the state concerned of the date, time, place and purpose of such hearing. At such hearing, opportunity to be heard shall be given to the public. A rule or regulation or an amendment or repeal thereof shall not become effective until sixty days after certified copies thereof shall have been filed with the secretary of state.

§ 27-0706. Closure requirements for certain landfills and recycling requirements for certain municipalities.

1. For the purpose of this section the term "landfill" shall have the same meaning as such term is defined in subdivision twelve of section 27-0901 of this article.

2. a. This section shall apply to all landfills that:

(i) operated during nineteen hundred ninety-five;

(ii) did not have a valid permit to operate pursuant to this article during such year; and

(iii) accepted for disposal an average of more than eight thousand tons per day of solid waste during such year.

b. Notwithstanding any provision of law or order to the contrary, no landfill covered by this section shall accept solid waste for disposal after January first, two thousand two.

§ 27-0707. Permits for new solid waste management facilities.

1. On and after the effective date of the initial rules and regulations of the department promulgated pursuant to subdivision one of section 27-0703, no person shall commence operation, including site preparation and construction, of a new solid waste management facility until such person has obtained a permit pursuant to this title.

2. The rules and regulations adopted by the department to implement this article and the provisions of article seventy of this chapter and rules and regulations adopted thereunder shall govern permit applications, renewals, modifications, suspensions and revocations under this article. The administration of such permit applications shall be in accordance with article eight of this chapter. The rules and regulations adopted by the department to implement this article shall specify, at a minimum:

a. that an application for a permit to construct, or to renew a permit to operate, a solid waste management facility shall not be complete unless the application includes a description of how the proposed facility is consistent with the state solid waste management policy identified under section 27-0106 of this article.

b. that on or after April first, nineteen hundred ninety-one an application for a permit to construct a solid waste management facility made by or on behalf of a municipality in a planning unit shall not be complete until a local solid waste management plan which contains all of the elements set forth in paragraph b of subdivision one of section 27-0107 of this article is in effect for such municipality; provided, however, that this requirement may be waived by the commissioner for a permit to construct a solid waste management facility designed for the treatment, storage or disposal of sewage sludge and needed to implement a project described in subparagraph one of paragraph (c) of subdivision three of section ninety-seven-m of the state finance law that will expedite compliance with the Ocean Dumping Ban Act of 1988. For any such permit application submitted by a municipality prior to April first, nineteen hundred ninety-one, the department shall, upon issuance of a permit, require as a permit condition that the municipality or planning unit of which it is a part have in effect a local solid waste management plan which contains all of the elements set forth in paragraph b of subdivision one of section 27-0107 of this article by a date certain, which shall be no sooner than April first, nineteen hundred ninety-one, unless otherwise agreed by the municipality, and which shall be no later than April first, nineteen hundred ninety-two. For any such permit application submitted on behalf of a municipality

prior to April first, nineteen hundred ninety-one, the department shall require as a permit condition that the proposed solid waste management facility shall be prohibited from accepting waste from such municipality by a date certain, which shall be no sooner than April first, nineteen hundred ninety-one and no later than April first, nineteen hundred ninety-two, unless such municipality or the planning unit of which it is a part has in effect a local solid waste management plan which contains all of the elements set forth in paragraph b of subdivision one of section 27-0107 of this article. For purposes of this paragraph, "planning unit" shall have the same meaning as set forth in subdivision one of section 27-0107 of this article.

c. that a permit will be issued only if:

(1) the proposed facility will be in full compliance with the applicable rules and regulations in effect on the date of submission of the permit application; and

(2) there has been opportunity for public review and comment at relevant stages of the project planning process; and

(3) a determination has been made that the proposed facility will not result in unfair competition between municipalities and scrap dealers, processors and consumers; and

(4) the applicant has received or will receive the written opinion of counsel to each municipality or public authority which has entered into a contract, lease or rental agreement with the proposed facility that such contract, lease or rental agreement is in compliance with the applicable requirements of sections one hundred one, one hundred three and one hundred twenty-w of the general municipal law.

2-a. No exemption from the permit requirements imposed by this title shall be allowed for the establishment of a new solid waste management facility for the disposal of nonputrescible construction and demolition debris when such facility will be used for the deposition of construction and demolition debris from an offsite source when a fee or any other form of consideration is required for the privilege of using the facility for the disposal of construction and demolition debris.

2-b. The department of environmental conservation shall not issue a

permit to construct or a permit to operate a facility in Nassau county to process sewage sludge into a pellet-like product unless and until a full environmental review of the proposed facility has been conducted, including but not limited to full consideration of the impacts such facility may have upon the proximity of schools, churches, hospitals, residences, commercial districts to such facility; ambient air quality, traffic, community character and growth patterns, local aesthetics and economics, and public health and safety in the vicinity of such facility; and unless and until all relevant adverse impacts identified through the review process have been addressed by the applicant and avoided as necessary to protect the public health and safety of residents and others residing and/or working in the vicinity of any such proposed facility. The department shall conduct a minimum of one public hearing in Nassau county, as a part of such full environmental review of the proposed facility.

2-c. No permit for a solid waste management facility shall be issued for a facility located on land in agricultural production which is located within an agricultural district, or land in agricultural production that qualifies for and is receiving an agricultural assessment pursuant to section three hundred six of the agriculture and markets law. Nothing contained herein, however, shall be deemed to prohibit the issuance of such permit after appropriate review by the department when:

a. the owner of such land has entered into a written agreement which shall indicate his consent for site consideration; or

b. the applicant for the permit has made a commitment in the permit application to fund a farm land protection conservation easement within a reasonable proximity to the proposed project in an amount not less than the dollar value of any such farm land purchased; or

c. the commissioner of agriculture and markets has made a determination and the commissioner concurs that the agricultural land to be taken constitutes less than five percent of the project site.

For purposes of this subdivision, "solid waste management facility" shall have the same meaning as provided in this title, but shall not include solid waste transfer stations, or land upon which sewage sludge is applied, and determinations regarding agricultural district boundaries and agricultural assessments will be based on those in effect as of the date and initial determination is made, pursuant to article eight of this chapter, as to whether an environmental impact statement needs to be prepared for the proposed project.

3. Where a permit for a solid waste management facility has been granted, the commissioner may upon request make available such department personnel and expertise as may be needed to inform the public as to the nature of the facility which has been granted a permit, the nature of the facility operations authorized by the permit, and the effect of the permit conditions, if any, which are imposed in connection with the permit.

4. Where the commissioner denies a permit application, he shall provide to the applicant a written statement of the reasons for this determination.

5. Receipt of a permit pursuant to this section shall not relieve any person of the responsibility of constructing such facility in full compliance with any applicable laws, rules or regulations or of operating the facility in full compliance with all applicable laws, rules and regulations, including rules and regulations of the department promulgated pursuant to subdivision one of section 27-0703 and taking effect after the date application was made to the department.

6. Nothing herein shall relieve any person of the responsibility of fully complying with all applicable laws, rules and regulations, including regulations of the department, promulgated pursuant to subdivision one of section 27-0703, in the operation of a solid waste management facility not subject to the department's review under this section.

7. Notwithstanding any provision of law or order to the contrary, no

permit to construct and/or operate a solid waste management facility shall be issued for any incinerator for which a permit application was deemed complete by the department before April first, nineteen hundred eighty-six and for which no such permit was issued by the department before April first, nineteen hundred ninety-six. For the purpose of this subdivision, the term "incinerator" shall mean an enclosed device using controlled flame combustion, the primary purpose of which is to thermally break down solid, liquid or gaseous wastes, including refuse-derived fuel, producing residue that contains little or no combustible materials.

§ 27-0711. Local laws, ordinances and regulations.

Any local laws, ordinances or regulations of any governing body of a county, city, town or village which are not inconsistent with this title or with any rule or regulation which shall be promulgated pursuant to this title shall not be superseded by it, and nothing in this title or in any rule or regulation which shall be promulgated pursuant to this title shall preclude the right of any governing body of a county, city, town or village to adopt local laws, ordinances or regulations which are not inconsistent with this title or with any rule or regulation which shall be promulgated pursuant to this title provided, however, that the exercise of such right by a county shall relate only to the area thereof outside any city, village or area of any town outside the village or villages therein during such time as such city, village or town has local laws, ordinances or regulations consistent with this title or with any rule or regulation which shall be promulgated pursuant to this title. Any local laws, ordinances or regulations of a county, city, town or village which comply with at least the minimum applicable requirements set forth in any rule or regulation promulgated pursuant to this title shall be deemed consistent with this title or with any such rule or regulation.

§ 27-0712. Coverage of all vehicles, including barges transporting solid waste.

1. Legislative findings and intent. It is the purpose of this section to assure that solid waste management is conducted in a safe, sanitary, efficient and environmentally sound manner throughout the state. The legislature finds and declares that current law and regulations have not always achieved this purpose. A large percentage of solid waste is transferred and transported over water as well as by container truck. Some type of cover is necessary to protect against the spillage of waste and emission of odors during its transfer and transportation. The legislature further finds and declares that legislation is necessary to remedy this situation by requiring the responsible parties to cover such vehicles with devices which will accomplish the intent of this section.

2. A municipality or any individual, firm or corporation acting on its behalf or any other individual, firm or corporation shall not cause or permit any solid waste to be transported on any vehicle, barge, ship, or scow unless the solid waste on the vehicle, barge, ship, or scow is covered provided, however, that putrescible waste transported by rail shall be covered with sealing hard lids in a manner not inconsistent with Federal Railroad Administration regulations, and non-putrescible waste shipped by rail shall be covered with hard tarping securely fastened over the load, which shall not exceed the height of the side of the rail container, in a manner not inconsistent with Federal Railroad Administration regulations.

3. The department shall monitor and inspect such vehicles, barges, ships and scows transporting solid waste on a regular basis to insure that they are covered and in compliance with the provisions of this section.

§ 27-0715. Solid waste management technical assistance.

1. The department shall conduct a comprehensive program of technical assistance to local governments, the private sector and individuals to enhance their capabilities to properly plan for and implement solid waste management programs consistent with the state solid waste

management policy set forth in section 27-0106 of this article. This program will establish continuing and comprehensive programs of technical assistance designed to consolidate, simplify, or expedite the development and implementation of such solid waste management programs.

2. In conducting the program set forth in this section, the department shall prepare, provide and distribute to municipalities, and may distribute to other persons, information and other technical assistance concerning development and implementation of solid waste management plans, programs and facilities. Such information and assistance may be in the form of manuals, generic assessments or technical assistance documents and other written materials and, as may be appropriate, consultation services. Such information and assistance may be provided by the department directly or by contract, shall be directed toward furthering the implementation of the state solid waste management policy established pursuant to section 27-0106 of this article and the development of local solid waste management plans pursuant to section 27-0107 of this article and shall address:

(a) available techniques and technologies for various forms of solid waste management and recommendations concerning methods by which to achieve an appropriate balance among those techniques and technologies, and an assessment of their feasibility and usefulness under varying local circumstances;

(b) applicable regulatory programs and permit processes;

(c) with the assistance of the commissioner of economic development, and in cooperation with the bureau of waste reduction and recycling established pursuant to this article, assistance in developing and implementing waste reduction, source separation and recycling programs;

(d) the potential availability of financial assistance from existing state programs and other sources for any or all aspects of a proposed solid waste management program;

(e) with the assistance of the attorney general, the state comptroller, and other appropriate officers and agencies of the state, the development and implementation of contracts and service agreements, qualifications of vendors, and use of the procurement process, so as to promote compliance with the applicable provisions of the general municipal law and federal and state anti-trust statutes;

(f) model local laws or ordinances to effectively implement sound solid waste management programs, including source separation and recycling efforts and regional disposal, management, and marketing activities;

(g) generic analyses of factors associated with the construction and operation of municipal solid waste management facilities;

(h) a clearinghouse of information and suggestions from other states, agencies, and municipalities, the federal government, and other sources pertaining to development and implementation of solid waste management programs, including those relating to cost avoidance, public education and information efforts and potential host community incentives; and

(i) the availability of consultation services pertaining to the issues identified and referred to in this section.

3. In effectuating the state solid waste management policy set forth in section 27-0106 of this article, the technical assistance personnel and resources of the department and local officials should work as a team, each bringing their respective authority and responsibility to bear in the development and implementation of a viable local solid waste management program, or, as may be appropriate, as required to address specific problems associated with such programs. Accordingly, within the limits of appropriation therefor, upon designation of the local participants by a requesting local government, the department shall provide staff and other resources, as appropriate, to work jointly and in cooperation with the requesting local government on a continuing basis, as needed. State and local officials when working as a team should make available to interested parties periodic assessments of the status and effectiveness of the team's efforts.

4. In addition to providing technical assistance to municipalities and planning units in addressing the issues identified in subdivision two of section 27-0107 of this article as they relate to the particular circumstances confronted by such municipalities and planning units, the department shall assist municipalities in identifying and evaluating:

(i) alternatives available for management of current and future solid waste, including costs and impacts of specific waste management methods; and

(ii) regulatory requirements associated with the implementation of such alternatives.

5. In administering the provisions of this section, the department shall provide to the governor, the legislature, and local governments on or before December thirty-first, nineteen hundred eighty-eight and annually thereafter, a report assessing the assistance programs established pursuant to this title, including the number of municipalities and other entities which received assistance, a description of the services provided and an assessment of program effectiveness.

6. The department shall submit to the director of the division of the budget, the chairman and ranking minority member of the senate finance committee and the chairman and ranking minority member of the assembly ways and means committee an evaluation of the assistance programs established in this section, and their implementation, prepared by an entity independent of the department. Such evaluation shall be submitted by September first, nineteen hundred ninety and by September first, every two years thereafter.

7. In administering assistance programs pursuant to this section, the commissioner shall consider the potential for coordination and consolidation of solid waste management practices, including marketing efforts associated with source separation and recycling programs, among municipalities and shall encourage such cooperation and consolidation where it is practicable and would result in enhanced environmental protection and cost effectiveness.

8. To effectuate the purposes of this section, the department may request and shall be entitled to receive, from any state agency or public authority and the same are authorized to provide, such assistance, services, facilities, and data as will enable the department to carry out its functions, powers, and duties.

§ 27-0717. Bureau of waste reduction and recycling.

1. The commissioner, with the approval of the director of the division of the budget, shall establish within the department a bureau of waste reduction and recycling. Such bureau shall be a separate entity to assist in the development and promotion of local waste reduction, source separation and recycling programs. Such programs shall promote the source separation, collection, intermediate processing and marketing of waste materials that are now being disposed of as municipal solid waste in New York state. The bureau shall:

(a) promote the development and implementation of programs by municipalities;

(b) serve as a clearinghouse for information regarding existing source separation and recycling programs;

(c) identify special needs and problems in developing and implementing source separation and recycling programs, and recommend approaches and solutions to address such identified needs and problems; and

(d) coordinate its activities with other solid waste assistance programs of the department.

2. Pursuant to regulations promulgated in accordance with the state administrative procedure act, the bureau shall establish an official state recycling emblem and conduct a consumer awareness program with respect thereto. Such emblem shall be of a design to include terms or symbols for "New York State", and "recyclable" and/or "recycled" and/or "reuseable". Standards for such terms or symbols shall be developed pursuant to regulations which with respect to (a) "recyclable" shall address material for which technologies or systems for reuse as a secondary material exist; and (b) "recycled" shall address material containing a specified minimum percentage by weight of secondary materials content; and (c) "reusable" shall address ability to be repeatedly returned for refilling or reuse with the original product. Further, such regulations may stipulate prohibitions on the unauthorized use of the state recycling emblem.

3. The bureau shall implement and conduct a program of public education and information to inform the public and private sectors of the state as to the merits of the use of secondary materials and for

consumers to actively seek consumer products which contain secondary materials or which are easily recycled or reused. Such program shall communicate the importance of minimizing the need for new solid waste disposal capacity and of conserving natural resources, avoiding harm to the environment or public health, and promoting resource conservation, recovery and reuse by industry, the state of New York, public and quasi-public agencies and authorities, local governments and the general public of the state.

4. The bureau shall be responsible for the administration of the New York state local resource reuse and development program established pursuant to sections 27-0403 and 27-0405 of this article.

§ 27-0719. Battery management and disposal.

1. Legislative intent. It is the intent of the legislature to minimize the risk to the environment posed by batteries, both in consumer and non-consumer uses, whether rechargeable or nonrechargeable. Such risk is to be addressed through the elimination of mercury in zinc carbon batteries, the minimization of mercury in alkaline manganese batteries, the redesign of certain products containing rechargeable batteries, and through the development of an action plan to establish a schedule for collection systems capable of providing for the recycling or disposal of all mercuric oxide batteries, silver oxide batteries, nickel cadmium batteries, small lead acid batteries, and other types of batteries the commissioner may identify.

2. Definitions. For the purposes of this section, the following definitions shall apply:

(a) A "battery" means a device consisting of one or more cells, each cell consisting of a positive electrode, a negative electrode and an electrolyte, which is used to provide stored electrical power.

(b) An "alkaline manganese battery" means a battery consisting of a manganese dioxide positive electrode, a zinc negative electrode and an alkaline electrolyte.

(c) A "mercuric oxide battery" means a battery consisting of a

mercuric oxide positive electrode and a zinc negative electrode.

(d) A "nickel cadmium battery" means a battery consisting of a nickel positive electrode and a cadmium negative electrode.

(e) A "small lead-acid battery" means a battery consisting of positive and negative electrode materials which are leads or compounds thereof, used in nonvehicular applications and weighing less than twenty-five pounds.

(f) A "zinc carbon battery" means a battery consisting of a manganese dioxide positive electrode, a zinc negative electrode, and a non-alkaline electrolyte.

(g) A "silver oxide battery" means a battery consisting of a silver oxide positive electrode, and a zinc negative electrode.

(h) A "battery pack" means one or more batteries enclosed in a housing.

(i) A "distributor" means a seller of batteries or devices that contain batteries at the time of sale.

(j) "Easily removed" means a battery or battery pack which is either detachable or readily removable by the consumer from a consumer product without cutting or desoldering any wires.

3. Mercury reduction and elimination. (a) No person may knowingly sell or offer for sale in New York state an alkaline manganese battery manufactured on or after January first, nineteen hundred ninety-two, which contains more than 0.025 percent mercury by weight of the battery; provided, however, that for alkaline manganese batteries having sizes and shapes resembling buttons or coins, the limitation on mercury content shall be twenty-five milligrams of mercury per battery.

(b) No person may knowingly sell or offer for sale in New York state a zinc carbon battery manufactured on or after January first, nineteen hundred ninety-three that contains a mercury concentration level of more than one part per million (0.0001%) by weight.

4. Rechargeable batteries. (a) No distributor may sell or offer for sale any product which contains a nickel cadmium or small lead-acid battery or battery pack manufactured after July first, nineteen hundred ninety-three unless:

(1) In the case of consumer products, the battery can be easily

removed by the consumer, or is contained in a battery pack that is separate from the product and can be easily removed from the product.

(2) In the case of nonconsumer products, the battery can be removed or is contained in a battery pack that is separate from the product.

(3) In all cases, the battery is clearly marked as to its type, so that consumers, collectors and recyclers may easily identify chemical content.

(b) The commissioner shall authorize the sale of a consumer product or a nonconsumer product which does not comply with paragraph (a) of this subdivision, if the commissioner determines that:

(1) The product was available for sale on or before the effective date of this section, and the product cannot reasonably be redesigned and manufactured prior to July first, nineteen hundred ninety-three; provided, however, that such authorizations shall not apply to products manufactured on or after July first, nineteen hundred ninety-five; or

(2) Design of the product to comply with paragraph (a) of this subdivision would result in significant danger to public health and safety.

5. Technology assessment, collection and recycling. On or before January first, nineteen hundred ninety-three, the commissioner, in consultation with the commissioner of economic development and battery manufacturers, battery recyclers and others, shall report to the governor and the legislature on an action plan which reviews the technological feasibility of requiring the elimination of mercury from alkaline manganese batteries, and establishes a schedule for collection systems capable of providing for the recycling or disposal of all mercuric oxide batteries, silver oxide batteries, nickel cadmium batteries, small lead acid batteries, and such other type of batteries as the commissioner may identify. Such plan and schedule shall identify the appropriate role of battery manufacturers, retailers, consumers, recyclers and others in the implementation of collection systems and provide an evaluation of the feasibility of a returnable battery deposit system in New York state; provided, however, that nothing contained herein shall be deemed to authorize the commissioner to impose such system or systems.

TITLE 9

INDUSTRIAL HAZARDOUS WASTE MANAGEMENT

- Section 27-0900. Applicability.
- 27-0901. Definitions.
- 27-0903. Identification and listing of hazardous waste.
- 27-0905. Manifest system.
- 27-0907. Standards applicable to generators of hazardous waste.
- 27-0908. Hazardous waste reduction plans.
- 27-0909. Standards applicable to transporters of hazardous waste.
- 27-0910. Standards applicable to marketers of hazardous waste fuel.
- 27-0911. Standards applicable to owners and operators of hazardous waste treatment, storage, and disposal facilities.
- 27-0912. Land disposal of hazardous waste.
- 27-0913. Permits and registrations for storage, transportation, treatment, or disposal of hazardous wastes.
- 27-0914. Unauthorized possession, disposal and dealing in hazardous wastes.
- 27-0915. Inspections and general reporting.
- 27-0916. Department authority for cleanups.
- 27-0917. Financial requirements for hazardous waste facilities.
- 27-0918. Closure and post-closure plans.
- 27-0919. Proprietary information.
- 27-0920. Reports.
- 27-0921. Short-term management.
- 27-0922. Prohibitions.
- 27-0923. Special assessments on hazardous wastes generated.
- 27-0924. Hazardous materials enforcement training program.
- 27-0925. Local assessments on hazardous waste treatment, storage and disposal facilities.
- 27-0926. Use and recycling of elemental mercury and dental amalgam by dentists.

§ 27-0900. Applicability.

It is the purpose of this title to regulate the management of hazardous waste (from its generation, storage, transportation, treatment and disposal) in this state and to do so in a manner consistent with the Federal Solid Waste Disposal Act, as amended by public law 94-580, the Resource Conservation and Recovery Act of 1976, and as further amended by public law 95-609, the Quiet Communities Act of 1978, public law 96-463, the Used Oil Recycling Act of 1980, public law 96-482, the Solid Waste Disposal Act Amendments of 1980, public law 98-616, the Hazardous and Solid Waste Amendments of 1984, public law 99-339, the Safe Drinking Water Act Amendments of 1986, and public law 99-499, the Superfund Amendments and Reauthorization Act of 1986, hereinafter referred to as "RCRA". Nothing in this title shall authorize the department to adopt or amend any rule or regulation in a manner less stringent than provided in RCRA.

§ 27-0901. Definitions.

When used in this title:

1. "Administrator" means the administrator of the federal environmental protection agency.
2. "Disposal" means the abandonment, discharge, deposit, injection, dumping, spilling, leaking or placing of any substance so that such substance or any related constituent thereof may enter the environment. Disposal also means the thermal destruction of waste or hazardous waste and the burning of such wastes as fuel for the purpose of recovering useable energy.
3. "Hazardous waste" means a waste or combination of wastes, which because of its quantity, concentration, or physical, chemical or infectious characteristics may:
 - a. Cause, or significantly contribute to an increase in mortality or

an increase in serious irreversible, or incapacitating reversible illness; or

b. Pose a substantial present or potential hazard to human health or the environment when improperly treated, stored, transported, disposed, or otherwise managed.

4. "Hazardous waste generation" means the act or process of producing hazardous waste.

5. "Hazardous waste management" means the systematic control of the collection, source separation, storage, transportation, processing, treatment, recovery, and disposal of hazardous wastes.

6. "Manifest" means the form used for identifying the quantity, composition, and the origin, routing, and destination of hazardous waste during its transportation from the point of generation to the point of disposal, treatment, or storage.

7. "Person" means an individual, trust, firm, joint stock company, corporation (including a government corporation), partnership, association, state, federal government and any agency thereof, municipality, commission, political subdivision of a state, or any interstate body.

8. "Storage" means the containment of hazardous waste, either on a temporary basis or for a period of years, in such a manner as not to constitute disposal of such hazardous waste.

9. "Transport" means the movement of hazardous waste from the point of generation to any intermediate points and finally to the point of ultimate storage or disposal.

10. "Treatment" means any method, technique, or process, including neutralization, designed to change the physical, chemical or biological character or composition of any hazardous waste so as to neutralize such waste or as to render such waste nonhazardous, safer for transport,

amenable for recovery, amenable for storage, or reduced in volume.

11. "Waste" means any garbage, refuse, sludge from a waste treatment plant, water supply treatment plant, or air pollution control facility, and other discarded material, including solid, liquid, semisolid, or contained gaseous material resulting from industrial, commercial, mining and agricultural operations and from community activities, but does not include solid or dissolved material in domestic sewage, or solid or dissolved materials in irrigation return flows or industrial discharges which are point sources subject to permits under section four hundred two of the federal Water Pollution Control Act, as amended (86 Stat. 880), or source, special nuclear or by-product material as defined in the Atomic Energy Act of 1954, as amended (68 Stat. 923) except as may be provided by existing agreements between the state of New York and the government of the United States.

12. "Landfill" means a disposal facility or part of a facility where solid waste, including hazardous waste, is placed in or on land, and which is not a land treatment facility, a surface impoundment, or an injection well.

13. "Resource recovery" means any method, technique, or process utilized to separate, process, modify, convert, treat or otherwise prepare hazardous waste so that the component materials or substances thereof may be beneficially used or reused as raw materials, exclusive of useable energy.

* 14. "Commercial hazardous waste facilities" or "commercial facilities" means a facility that receives from off-site any hazardous waste from any person that is not part of the same trust, firm, joint stock company, corporation (including a government corporation), partnership, association, state, federal government and any agency thereof, municipality, commission, political subdivisions of a state, or any interstate body except when small quantities of hazardous wastes from public bodies are accepted on an emergency basis with the approval of the commissioner on a no-cost basis.

* NB There are 2 sub 14's

* 14. "Environment" means any water, water vapor, any land including

land surface or subsurface, air, fish, wildlife, biota and all other natural resources.

* NB There are 2 sub 14's

15. "Secure landburial facility" means a land disposal facility meeting the design and operation requirements promulgated by the department pursuant to this title for the proper disposal of hazardous wastes so that such wastes are immobilized or otherwise prevented from release to the environment or rendered harmless or decomposed into harmless materials within the facility.

§ 27-0903. Identification and listing of hazardous waste.

1. The commissioner shall promulgate regulations in a manner consistent with the state administrative procedure act, setting forth the criteria for identification and listing of hazardous wastes. Based on these criteria, the commissioner shall promulgate a list of hazardous wastes (which list shall also include a sublist of acute hazardous wastes) and shall identify hazardous waste by characteristic, in a manner at least as stringent as promulgated by the administrator pursuant to RCRA. The list of hazardous wastes and the identification of hazardous waste by characteristic shall determine those hazardous wastes which shall be subject to this title.

2. Where appropriate and consistent with the provisions of RCRA, such regulations shall provide for exemptions from the provisions of this title for the management of small quantities of wastes listed or identified as hazardous when generated by research and limited use operations.

3. The regulations setting forth the criteria for identification and listing, and the list of, hazardous wastes subject to this title may be amended by the commissioner from time to time as appropriate, based upon hazardous waste conditions of particular relevance to the state. The commissioner may promulgate the appropriately amended regulations only upon a showing of the circumstances constituting the hazardous waste

conditions of particular relevance to this state, and then in a manner consistent with the state administrative procedure act.

4. Uniform treatment of waste. All waste resulting from the exploration, development, extraction or production of crude oil or natural gas, including but not limited to drilling fluids and produced waters, shall be considered hazardous waste under the law of this state and subject to all pertinent generation, transportation, treatment, storage, and disposal laws and regulations, if such waste meets the definition of hazardous waste set forth in subdivision three of section 27-0901 of this chapter. Within six months from the effective date of this subdivision, the department shall make all necessary changes to bring its regulations into compliance with this section.

§ 27-0905. Manifest system.

Not later than six months after the promulgation of regulations for hazardous wastes pursuant to paragraph one of section 27-0903 of this title, and after consultation and coordination with the commissioner of transportation, the commissioner shall promulgate in a manner consistent with the state administrative procedure act, regulations establishing a manifest system by which to monitor the transportation, storage, and disposal of hazardous waste and to assure that such acts are performed in a manner consistent with this title. Such manifest systems shall conform to that adopted by the administrator pursuant to RCRA. Where appropriate and consistent with the provisions of RCRA, the commissioner may provide for exemption from the provisions of this section for the transport of hazardous waste by the generator from one facility to another owned and operated by the generator. As a minimum such system shall require that:

1. Hazardous waste generators use a specified form identifying the composition, quantity and disposition of each shipment of hazardous waste;

2. Copies of manifest be carried during transportation of hazardous

waste; and

3. Hazardous waste generators, hazardous waste transporters and owners and operators of hazardous waste treatment, storage and disposal facilities maintain copies of manifest for at least three years.

§ 27-0907. Standards applicable to generators of hazardous waste.

Not later than eighteen months after the effective date of this title, in a manner consistent with the state administrative procedure act, the commissioner shall promulgate regulations establishing standards which shall be applicable to generators of hazardous waste identified or listed under this title, necessary to protect human health and the environment. Such standards shall establish requirements respecting:

1. Recordkeeping practices that accurately identify the quantities of such hazardous waste generated, the constituents thereof which are significant in quantity or in potential harm to human health or the environment, and the disposition of such wastes;

2. Labeling practices for any containers used for the storage, transport, or disposal of hazardous waste which will identify accurately such wastes, and be in conformance with federal transportation requirements;

3. Use of appropriate containers for hazardous waste;

4. Furnishing of information on the chemical composition of such hazardous waste to persons transporting, treating, storing, or disposing of such wastes;

5. Use of the manifest system established under section 27-0905 of this title to assure that all such waste generated is designated for treatment, storage, or disposal in treatment, storage or disposal facilities (other than facilities on the plant site where the waste is generated) for which a permit has been issued as provided in section

27-0913 of this title; and

5-a. Each manifest shall contain a certification by the generator that:

a. the generator of the hazardous waste has in place a program to reduce the volume or quantity and toxicity of such waste to the degree determined by the generator to be economically practicable or, if a hazardous waste reduction plan is required by and reviewable under section 27-0908 of this title, a program that meets the requirements of that section; and

b. the proposed method of treatment, storage or disposal is that practicable method currently available to the generator which minimizes the present and future threat to human health and the environment.

6. Submission of an annual report to the commissioner, and additional reports at such times as the commissioner deems necessary, respecting

a. the quantities and composition of hazardous wastes identified or listed under this title, generated during a specified time period;

b. the disposition of all hazardous wastes reported under paragraph a of this subdivision;

c. for each waste reported under paragraph a of this subdivision, the efforts undertaken during the year to reduce the volume or quantity and toxicity of waste generated;

d. for each waste reported under paragraph a of this subdivision, the changes in volume or quantity and toxicity of waste actually achieved during the year in question in comparison with previous years;

e. certification on the part of the generator that it has in place a program to reduce the volume or quantity and toxicity of hazardous wastes to the degree determined by the generator to be economically practicable or, if a hazardous waste reduction plan is required by and

reviewable under section 27-0908 of this title, a program that meets the requirements of that section; and

f. certification that the treatment, storage or disposal method utilized by the generator is that practicable method currently available which minimizes present and future threats to human health and the environment.

7. The commissioner shall, within eighteen months after the effective date of regulations promulgated by the department pursuant to section 27-0905 of this chapter and annually thereafter, prepare and submit a report on the generating of hazardous wastes to the governor and legislature. Such report shall include, but not be limited to, the identity of generators within the state and the quantities, composition and disposition of hazardous wastes generated in the preceding year. Such information regarding quantities, composition and disposition shall be presented in aggregated form by waste type as generated in each of the department's administrative regions. The commissioner shall withhold information on hazardous wastes pursuant to section 27-0919 of this title in order to protect trade secrets.

§ 27-0908. Hazardous waste reduction plans.

1. When used in this section, the following terms shall have the following definitions:

a. "Acute hazardous waste" means any waste identified or listed as such in the regulations promulgated under section 27-0903 of this title.

b. "Generator" means any person, by site, whose act or process produces hazardous waste or whose act first causes a hazardous waste to become subject to regulation.

c. "Hazardous waste" means any waste identified or listed as such in the regulations promulgated under section 27-0903 of this title, including "acute hazardous waste".

2. For the purposes of this section, hazardous wastes generated by any corrective action required pursuant to this title for a release from a hazardous waste treatment, storage or disposal facility, or by the remediation of an inactive hazardous waste disposal site as defined in subdivision two of section 27-1301 of this article, or by the cleanup of a release to the environment reported pursuant to article 17, 37 or 40 of this chapter, or demolition and construction debris, or wastes which are otherwise subject to the requirements of this section shall not be included in the calculation of the amount of hazardous wastes generated by a person annually, nor shall such wastes be subject to the waste reduction planning requirements for this section.

3. a. Any generator of equal to or greater than one thousand tons of hazardous waste in the calendar year nineteen hundred ninety or any subsequent calendar year shall prepare, implement and submit to the department a written hazardous waste reduction plan on or before July first of the following calendar year.

b. Any generator of equal to or greater than five hundred tons of hazardous waste in the calendar year nineteen hundred ninety-one or any subsequent calendar year shall prepare, implement and submit to the department a written hazardous waste reduction plan on or before July first of the following calendar year.

c. Any generator of equal to or greater than fifty tons of hazardous waste in the calendar year nineteen hundred ninety-two or any subsequent calendar year shall prepare, implement and submit to the department a written hazardous waste reduction plan on or before July first of the following calendar year.

d. Any generator of equal to or greater than twenty-five tons of hazardous waste in the calendar year nineteen hundred ninety-five or any subsequent calendar year shall prepare, implement and submit to the department a written hazardous waste reduction plan on or before July first of the following calendar year.

e. Notwithstanding any other provision of this subdivision, any generator required to hold a hazardous waste storage, treatment or disposal permit for the on-site management of hazardous waste pursuant to section 27-0913 of this title shall prepare and submit to the department, a written hazardous waste reduction plan on or before July first, nineteen hundred ninety-one or as part of any new permit application, and shall thereafter implement the plan.

4. The hazardous waste reduction plan required under this section shall include:

a. an identification of the amounts and types of any acute hazardous waste as reported pursuant to subdivision six of section 27-0907 of this title; and an identification of the amounts and types of hazardous wastes generated during the previous calendar year which are either (i) in amounts greater than five tons or (ii) which account for at least ninety percent of all hazardous wastes generated by such generator at that facility, whichever represents the greater amount of hazardous wastes. For each such hazardous waste, such plan shall also include:

(1) a description of the process, operation or activity that resulted in the generation of such waste;

(2) a calculation of the amount of such waste generated per unit of production output or raw material used, or other appropriate index, or a demonstration why the calculation cannot be provided; and

(3) an estimate, and bases for such estimate, of the costs incurred for managing such waste, including but not limited to, storage costs, on-site treatment or disposal costs, transportation costs, commercial disposal fees and regulatory fees or a demonstration why such calculation cannot be provided.

b. For each such waste identified pursuant to paragraph a of this subdivision, an evaluation of the technical feasibility and economic practicability, including return on investment, of implementing waste reduction processes, technologies or operational changes to reduce or eliminate the generation of such waste. Such evaluation shall consider the technical feasibility and economic practicability, where applicable, of:

(i) substitution of non-toxic or less toxic inputs to the production process which result in a reduction in the volume or toxicity of such waste;

(ii) reformulation or redesign of end products to eliminate production inputs or production processes that result in the generation of such waste;

(iii) modification or redesign of production processes, technologies or equipment which result in a reduction in the volume or toxicity of such waste;

(iv) changes in materials usage, handling and storage practices, including improved inventory control, preventive maintenance, spill and leak prevention, and waste segregation, which will reduce the volume or toxicity of such waste;

(v) the use of closed loop reclamation, reuse or recycling processes or technologies which directly recycle such wastes back into the production process; and

(vi) the use of on-site or off-site recycling technologies or processes that reduce the amount of such waste that must be treated or disposed of.

c. Establishment and description of a program for implementing technically feasible and economically practicable waste reduction alternatives. Such program shall include:

(i) establishment of a general corporate, facility or organizational waste reduction policy, including a statement of waste reduction goals, along with a plan for communicating such policy and statement of goals to relevant employees and management personnel;

(ii) a time schedule for implementing each technically feasible and economically practicable waste reduction technology, process or operational change identified pursuant to paragraph b of this subdivision;

(iii) designation of the office or department responsible for implementing the waste reduction plan;

(iv) a method of waste reduction measurement which will provide a basis for charting waste reduction trends over time; and

(v) appropriate employee training programs to assure proper implementation of the economically practicable and technically feasible

waste reduction alternatives identified pursuant to paragraph b of this subdivision.

d. An evaluation of the anticipated reduction, in tons or other appropriate measurement, in the amount of hazardous wastes produced by the generator as a result of the implementation of each of the technically feasible and economically practicable waste reduction options identified pursuant to paragraph b of this subdivision.

e. An evaluation of the extent, if any, to which the implementation of each of the technically feasible and economically practicable waste reduction options identified pursuant to paragraph b of this subdivision may result in the transference of hazardous wastes into any other environmental media and the environmental benefits, if any, of the waste reduction option resulting in such transference.

5. The hazardous waste reduction plan required pursuant to this section shall be updated at least biennially to reflect changes in the types and amounts of hazardous wastes produced by the generator. In preparing such update, the generator shall evaluate or reevaluate the technical feasibility and economic practicability of waste reduction alternatives as required pursuant to subdivision four of this section for each such waste, and, if appropriate, shall revise the schedule for implementing technically feasible and economically practicable waste reduction alternatives; provided, that no evaluation or reevaluation shall be required for such wastes no longer produced by the generator. Such update shall provide continuity with previously prepared plans.

6. As a part of its hazardous waste generator report required pursuant to subdivision six of section 27-0907 of this title, each generator required to prepare a hazardous waste reduction plan pursuant to this section shall submit to the department an annual status report describing such generator's progress in achieving its time schedule for implementing technically feasible and economically practicable waste reduction alternatives, pursuant to paragraph c of subdivision four of this section. If such generator does not implement a waste reduction technology, process or operational change identified in such time

schedule, the annual status report shall identify the reason such activity was not implemented and include a reasonable revised time schedule for implementing such waste reduction alternative. If a generator determines that any method of waste reduction chosen and implemented is not achieving the degree of waste reduction anticipated, notwithstanding commitments made in the plan or biennial update, the generator may choose and implement another waste reduction alternative more likely to achieve waste reduction. The generator shall explain such action in the annual status report and account for such action in the biennial updates pursuant to paragraphs c, d and e of subdivision four of this section.

7. On or before January first, nineteen hundred ninety-one, the department shall prepare and distribute a guidance manual to assist generators in complying with the requirements of this section.

8. The department shall review each plan submitted pursuant to this section according to the schedule provided hereafter. The submission of such plan shall not be considered a permit application within subdivision four of section 70-0105 of this chapter and shall not be deemed to be a license application within subdivision four of section one hundred two of the state administrative procedure act.

a. After July first, nineteen hundred ninety-one, the department shall review and may reject, in accordance with the standards set forth in subdivision nine of this section, those portions of such plan which address hazardous wastes which are managed in a land disposal facility.

b. After July first, nineteen hundred ninety-three, the department shall review and may reject, in accordance with the standards set forth in subdivision nine of this section, those portions of such plan which address hazardous wastes which are managed through treatment, including wastes managed through thermal destruction or wastes burned as fuel for the purpose of recovering usable energy; and

c. On or after July first, nineteen hundred ninety-five, the department shall review and may reject, in accordance with the standards

set forth in subdivision nine of this section, all plans submitted by a generator utilizing recovery, reuse or recycling, except closed loop recycling directly back into the production process, as management methods.

d. Notwithstanding any other provision of law the department shall not be authorized to reject any plan or biennial update for which a notice of deficiency pursuant to paragraph a of subdivision ten of this section has not been provided to the generator within twelve months of the date such plan or biennial update was submitted.

9. The review of hazardous waste reduction plans conducted by the department pursuant to the schedule set forth in subdivision eight of this section shall be subject to the following standards. The department may reject any plan or biennial update thereof which:

a. fails to contain all the components required pursuant to subdivision four of this section;

b. fails to apply generally accepted engineering, scientific or economic principles and practices;

c. accomplishes waste reduction by transference to other environmental media without an environmental benefit from such transference;

d. is inconsistent with the preferred hazardous waste management practices hierarchy set forth in section 27-0105 of this article;

e. involves conduct which is prohibited by any applicable law or regulation;

f. fails to provide a basis for charting waste reduction trends over time;

g. beginning with the submission of the first biennial update, fails to demonstrate reasonable progress in implementing those technically feasible and economically practicable waste reduction alternatives

chosen by the generator according to the time schedule developed pursuant to paragraph c of subdivision four of this section; or

h. beginning with the submission of the first biennial update, fails to demonstrate reasonable progress in waste reduction employing the methods of waste reduction and calculation provided in the plan, or as modified in the annual report, or fails to reevaluate the technically feasible and economically practicable waste reduction alternatives as required pursuant to subdivision five of this section.

10. a. In proposing to reject any plan or biennial update thereof, the department shall provide to the generator a notice detailing the specific deficiencies the department has identified consistent with the standards set forth in subdivision nine of this section.

b. Upon receipt of such notice, the generator shall have up to sixty days to prepare a rebuttal or to modify the plan or biennial update to address the deficiencies identified in the notice and to submit such rebuttal or modified plan or update to the department.

c. If the department determines that the plan or update should not be rejected, it shall notify the generator within thirty days of submittal of a rebuttal or modified plan or update. If the department determines that the rebuttal or modified plan or update has not adequately addressed the specific deficiencies identified in the notice, or if the rebuttal or modified plan or update is not submitted within the time period specified in paragraph b of this subdivision, the department in its discretion may require further modifications, consistent with the specific deficiencies identified in the notice, within a time to be determined by the department, or make a determination to reject such plan or update. Any determination to require further modifications shall be made and provided to the generator within thirty days of submittal of a rebuttal or modified plan or update.

d. Immediately upon making a determination to reject a plan or biennial update the department shall provide to the generator a notice of final rejection. Such notice of final rejection shall detail the

specific deficiencies consistent with the standards set forth in subdivision nine of this section.

e. Within fifteen days of the date of a notice of final rejection from the department pursuant to this subdivision, a generator may request a hearing pursuant to article three of the state administrative procedure act. The department shall notify the generator of a date and place for a hearing, to be commenced not later than sixty days from the date of such notification, unless an extension of time has been agreed to pursuant to paragraph j of this subdivision.

f. The department may not require any modification to the plan or biennial update or raise any issue at hearing not identified in the notice of final rejection provided pursuant to paragraph d of this subdivision.

g. The certification prohibition in subdivision eleven of this section shall not be effective until a determination is made by the department after hearing, or until time to request such hearing has expired.

h. Any final determination of the department is reviewable pursuant to article seventy-eight of the civil practice law and rules.

i. Such review shall be commenced within the time limits set forth in section two hundred seventeen of the civil practice law and rules.

j. Any time period specified in this subdivision may be extended in writing by mutual consent of the generator and the department.

11. Any generator who has submitted a hazardous waste reduction plan according to the time schedule set forth in subdivision three of this section, which plan has not been rejected by the department, is authorized to make the certifications required under sections 27-0907 and 27-0913 of this title; provided, however, that no such generator shall make such certifications if such plan has been rejected by the department. These restrictions shall not apply to hazardous waste generated prior to the date the plan was rejected.

12. Information required to be provided to the department under this section shall be subject to the provisions of section 27-0919 of this title.

13. On or before January first, nineteen hundred ninety-three, the department shall prepare and present to the governor and the legislature a report analyzing the desirability of requiring waste reduction pursuant to this section on the part of generators of greater than fifteen tons and less than twenty-five tons of hazardous waste per calendar year. Such report shall include the number of generators in this category, the amount of wastes produced by such generators, the environmental benefit likely to be achieved, an evaluation of the potential economic impact on industry and a description of the additional resources that the department would require to analyze and approve waste reduction plans submitted by this group of generators.

14. The department shall not impose planning and reduction requirements other than those authorized pursuant to this section for those hazardous wastes which are managed in a land disposal facility, managed through treatment, or managed through recovery, reuse or recycling and which are subject to the requirements of this section. Provided however, nothing herein shall be construed to limit the department's authority contained elsewhere in this chapter to require planning and reductions in emissions, discharges or other releases.

§ 27-0909. Standards applicable to transporters of hazardous waste.

Not later than eighteen months after the effective date of this title, and after consultation and coordination with the commissioner of transportation, and after opportunity for public hearings, the commissioner shall promulgate regulations establishing such standards which shall be applicable to transporters of hazardous waste identified or listed under this title, as may be necessary to protect human health and the environment. Such standards shall include but need not be limited to requirements respecting:

1. Recordkeeping practices that accurately identify the hazardous wastes transported, and their sources and delivery points;
2. Transportation and storage of such waste only if properly labeled;
3. Compliance with the manifest system established under section 27-0905 of this title;
4. Transportation of all such hazardous waste only to the hazardous waste treatment, storage, or disposal facility or facilities which are designated on the manifest form, a copy of which shall be presented to the generator prior to transportation, and which either hold operation permits issued under this article, are a permittee under the Federal Resource Conservation and Recovery Act of nineteen hundred seventy-six or any amendments thereof, or are otherwise duly authorized to accept hazardous waste; and
5. Requirement of a bond to meet all responsibilities in case of release of hazardous wastes causing damage as a condition to the issuance of a permit to a transporter required by this title.
6. No vehicle, vehicle container, holding tank or other equipment used to transport hazardous waste shall be used in transporting any item intended for human or animal consumption unless such waste and its residue have been completely removed. The commissioner shall promulgate regulations establishing such minimum standards and procedures necessary to insure proper cleaning and removal of hazardous waste and its residue from such equipment.

§ 27-0910. Standards applicable to marketers of hazardous waste fuel.

The commissioner shall promulgate regulations establishing standards applicable to any person who distributes or markets any fuel which is produced from (a) facilities which produce a fuel (i) from any hazardous waste identified or listed in the regulations promulgated under section

27-0903 of this title or (ii) from any such hazardous waste and any other material, or (b) any fuel which otherwise contains any such hazardous waste.

§ 27-0911. Standards applicable to owners and operators of hazardous waste treatment, storage, and disposal facilities.

1. Standards applicable to owners and operators of hazardous waste treatment, storage and disposal facilities shall be those established in title seven of this article, and the regulations promulgated thereunder, shall be consistent with comparable standards promulgated by the administrator pursuant to RCRA, and shall also include compliance with the manifest system established in section 27-0905 of this title. Where appropriate and consistent with the provisions of RCRA, such standards may authorize the granting of exemptions from requirements, or variances in requirements, according to criteria established therein.

2. Such standards shall require corrective action, including corrective action beyond the facility boundary where necessary to protect human health and the environment, for all releases of hazardous waste or constituents from any solid waste management unit at a treatment, storage or disposal facility seeking a permit under section 27-0913 of this title, regardless of the time at which waste was placed in such unit.

§ 27-0912. Land disposal of hazardous waste.

1. The commissioner may promulgate rules and regulations restricting or prohibiting the land disposal of specified hazardous wastes which are identified or listed pursuant to section 27-0903 of this title. Such rules and regulations may also restrict or prohibit the storage of any hazardous waste, or classes of hazardous wastes, which is restricted or prohibited from one or more methods of land disposal under this section unless such storage is solely for the purpose of the accumulation of such quantities of hazardous waste as are necessary to facilitate proper

recovery, treatment, or disposal.

2. The commissioner shall make a written determination of each such waste or class of wastes for which land burial may not be adequately protective of public health and the environment. In making any such determination, the commissioner shall take into account the following factors:

a. the long-term containment uncertainties associated with land burial, and

b. characteristics of the hazardous waste which degrade containment mechanisms used in authorized hazardous waste land burial facilities, and

c. the persistence, toxicity, mobility, and propensity to bio-accumulate of such hazardous wastes and their toxic constituents.

3. The commissioner may, upon application of any person, certify that any specifically identified or listed hazardous waste or class of wastes is exempt from a restriction or prohibition against land burial established in the rules and regulations promulgated pursuant to this section. Such certification of exemption may be issued only in the event the commissioner makes a written determination that it is not practicable, for the reasonably foreseeable future, to manage such wastes by any means other than land burial, when public health, environmental and economic factors are considered together. Certificates of exemptions shall be valid for a fixed term not to exceed one year. Any such certificate of exemption shall be published in the environmental notice bulletin. Any request for a renewal, reissuance or recertification of exemption shall be treated as an application for a new certificate of exemption.

4. As used in this section, the term "land disposal" shall be deemed to include, but not be limited to, any placement of hazardous waste in a landfill, surface impoundment, waste pile, injection well, land treatment facility, salt dome formation, salt bed formation, or

underground mine or cave; and the term "land burial" means any placement of hazardous waste in or on land where the waste will remain after closure. "Land burial" is a form of "land disposal".

5. Any rules and regulations, and any amendments thereof adopted pursuant to the provisions of this section shall be subject to review pursuant to article seventy-eight of the civil practice law and rules.

§ 27-0913. Permits and registrations for storage, transportation, treatment, or disposal of hazardous wastes.

1. a. No person shall engage in storage, treatment, or disposal, including storage at the site of generation, of hazardous wastes without first having obtained a permit pursuant to title seven of this article. Such permits shall require corrective action, including corrective action beyond the facility boundary where necessary to protect human health and the environment, for all releases of hazardous waste or constituents from any solid waste management unit at a permitted treatment, storage or disposal facility, regardless of the time at which waste was placed in such unit, and shall contain schedules of compliance for such corrective action where such corrective action cannot be completed prior to issuance of the permit.

b. Where appropriate and consistent with the provisions of RCRA, the commissioner may by regulation provide for interim status for hazardous waste treatment, storage or disposal facilities. Such regulation may include, but shall not be limited to, termination provisions, corrective action provisions and requirements for modification of such facilities as may be necessary to protect human health and the environment. The condition of interim status shall not be deemed to be a permit within subdivision four of section 70-0105 of this chapter, and shall not be deemed to be a license within subdivision four of section one hundred two of the state administrative procedure act.

2. No person shall engage in the transportation of hazardous wastes without first complying with the requirements of title three of this

article.

3. The commissioner shall assure that permits authorizing hazardous waste treatment, storage, disposal or transportation are not issued to nor held by unqualified or unsuitable persons. To effectuate this purpose, and in addition to any other available grounds, the commissioner may, consistent with the policies of article twenty-three-A of the correction law and the provisions of section 70-0115 of this chapter, deny, suspend, revoke or modify any permit, renewal or modification thereto for the treatment, storage, disposal or transportation of hazardous waste, after determining in writing that such action is required to protect the public health and safety. Some of the factors which the commissioner may consider in arriving at his determination include the following:

a. The permit holder or applicant has been determined in an administrative, civil or criminal proceeding to have violated any provision of this article, any related order or determination of the commissioner, any regulation promulgated pursuant to this article, the condition of any permit issued thereunder, or any similar statute, regulation, order or permit condition of the federal or other state government.

b. Such permit holder or applicant has been denied a permit for the same or substantially similar activity based upon one or more of the provisions of this subdivision, or a similar provision of federal or other state law.

c. Such permit holder or applicant has been found in a civil proceeding to have committed a negligent or intentionally tortious act, or has been convicted in a criminal proceeding of a criminal act involving the handling, storing, treating, disposing or transporting hazardous waste.

d. Such permit holder or applicant has been convicted of a criminal offense under the laws of any state or of the United States which involves a violent felony offense, fraud, bribery, perjury, theft, or an

offense against public administration as that term is used in article one hundred ninety-five of the penal law.

e. Such permit holder or applicant has in any matter within the jurisdiction of the department knowingly falsified or concealed a material fact or knowingly submitted a false statement or made use of or made a false statement on or in connection with any document or application submitted to the department.

f. Such permit holder or applicant is either:

(i) an individual who had a substantial interest in or acted as a high managerial agent or director for any corporation, partnership, association or organization which committed an act or failed to act, and such act or failure to act could be the basis for the denial of a permit pursuant to this section or regulations promulgated thereunder if such corporation, partnership, association or organization applied for a permit under this title;

(ii) a corporation, partnership, association, organization, or any principal thereof, or any person holding a substantial interest therein, which committed an act or failed to act, and such act or failure to act could be the basis for the denial of a permit pursuant to this section or regulations promulgated thereunder if such corporation, partnership, association or organization applied for a permit under this title; or

(iii) a corporation, partnership, association or organization or any high managerial agent or director thereof, or any person holding a substantial interest therein, acting as high managerial agent or director for or holding a substantial interest in another corporation, partnership, association or organization which committed an act or failed to act, and such act or failure to act could be the basis for the denial of a permit pursuant to this section or regulations promulgated thereunder had such other corporation, partnership, association or organization applied for a permit under this title.

For the purposes of this subdivision, "high managerial agent" has the same meaning as is given that term in section 20.20 of the penal law, and "substantial interest" shall be defined in regulations promulgated by the commissioner.

4. Any act or failure to act which serves as a basis for denial or revocation of a permit pursuant to this subdivision shall have occurred within two years from the date on which the application for a permit, renewal or modification is submitted to the department or from the date on which the department serves notice of intent to revoke or modify a permit issued by the department in relation to an existing permit.

5. Any person denied a permit, renewal or modification on the grounds specified in this subdivision shall be entitled to a hearing within sixty days of such denial in the case of a new permit, or within fifteen days in the case of a renewal or modification of an existing permit. The conduct of such hearing shall be governed by article seventy of this chapter and regulations promulgated thereunder.

6. It shall be a condition of any permit issued under title 7 of this article for the treatment, storage or disposal of hazardous waste on the premises where such waste is generated that the permittee certify, in its annual report, that:

a. the generator has in place a program to reduce the volume or quantity and toxicity of hazardous wastes to the degree determined by the generator to be economically practicable or, if a hazardous waste reduction plan is required by and reviewable under section 27-0908 of this title, a program that meets the requirements of that section; and

b. the method of treatment, storage or disposal is that practicable method currently available to the generator which minimizes present and future threats to human health and the environment.

§ 27-0914. Unauthorized possession, disposal and dealing in hazardous wastes.

1. No person shall possess hazardous wastes without authorization.

2. No person shall dispose of hazardous wastes without authorization.

3. No person shall deal in hazardous wastes without authorization.

§ 27-0915. Inspections and general reporting.

1. For purposes of developing or assisting in the development of any regulation or enforcing the provisions of this title, any person who generates, stores, treats, transports, disposes of, or otherwise handles hazardous wastes shall, upon oral or written request of any officer or employee of the department, when properly identified and duly designated by the commissioner, furnish or permit such officer or employee at all reasonable times to have access to, and to copy all records relating to such wastes. For the purposes of developing or assisting in the development of any regulation or enforcing the provisions of this title, such officers or employees are authorized after proper notification and identification:

a. To enter at reasonable times any establishment or other place maintained by any person where hazardous wastes are generated, stored, treated, or disposed of;

b. To inspect and obtain samples from any person of any such wastes and samples of any containers or labeling for such wastes.

Each such inspection shall be commenced and completed with reasonable promptness. If the officer or employee obtains any samples, prior to his leaving the premises, he shall give to the owner, operator, or agent in charge a receipt describing the sample obtained and if requested a portion of each such sample equal in volume or weight to the portion retained. If any analysis is made of such samples, a copy of the results of such analysis shall be furnished promptly to the owner, operator, or agent in charge.

§ 27-0916. Department authority for cleanups.

1. The department shall have authority to clean up or return to its original state any area where hazardous wastes were disposed, possessed or dealt in unlawfully in violation of section 27-0914 of this article. For the purpose of this section "the original state of the area" shall mean the reasonably ascertainable condition of the property immediately prior to the unlawful act or if impracticable to determine such condition, the cleanup or restoration shall be done in a manner to restore the area to a reasonably sound environmental condition.

2. The department shall have the authority to contract with the environmental facilities corporation or any other person to perform necessary work in connection with such cleanup or restoration.

3. Notwithstanding any other provision of law to the contrary, the liability of any person designing, implementing or otherwise performing services related to cleanup or restoration work pursuant to a contract with the department, or an order of the department or a court for any injury to a person or property caused by or related to such services, shall be limited to acts or omissions of the person during the course of performing such services which are shown to have been the result of negligence, gross negligence or reckless, wanton or intentional misconduct. Notwithstanding any other provision of law, when (i) a verdict or decision in an action or claim for injury to a person or property caused by or related to such services is determined in favor of a claimant in an action involving a person performing such services and any other person or persons jointly liable, and (ii) the liability of the person performing such services is found to be fifty percent or less of the total liability assigned to all persons liable, and (iii) the liability of the person performing such services is not based on a finding of reckless disregard for the safety of others, or intentional misconduct, then the liability of the person performing such services to the claimant for loss relating to injury to property and for non-economic loss relating to injury to a person shall not exceed the equitable share of the person performing such services determined in accordance with the relative culpability of each person causing or contributing to the total liability for such losses; provided, however, that the culpable conduct of any person not a party to the action shall

not be considered in determining any equitable share herein if the claimant proves that with due diligence the claimant was unable to obtain jurisdiction over such person in said action. As used in this section, the term "non-economic loss" includes but is not limited to pain and suffering, mental anguish, loss of consortium or other damages for non-economic loss. However, nothing in this subdivision shall be deemed to alter, modify or abrogate the liability of any person performing such services for breach of any express warranty, limited or otherwise, or an express or implied warranty under the uniform commercial code, or to an employee of such person pursuant to the workers' compensation law, or to relieve from any liability any person who possessed, disposed of or dealt in hazardous wastes in violation of section 27-0914 of this article.

4. Section eight of the court of claims act or any other provisions of law to the contrary notwithstanding, the state shall be immune from liability and action with respect to any act or omission done in the exercise of the department's authority pursuant to this section; provided, however, that this subdivision shall not limit any liability which may otherwise exist for unlawful, willful or malicious acts or omissions on the part of the state, state agencies, or other officers, employees or agents.

5. Moneys for actions taken by the department pursuant to this section including any sampling of wastes, soils, air, surface water and groundwater done by or on behalf of the department and any administrative expenses related thereto, shall be payable from the hazardous waste remedial fund directly to the department pursuant to section ninety-seven-b of the state finance law.

§ 27-0917. Financial requirements for hazardous waste facilities.

1. Within eighteen months after the effective date of this section, the commissioner shall promulgate regulations for hazardous waste facilities identifying financial requirements to be included as conditions in hazardous waste facility permits for the remediation of

failures during operation and after facility closure, for facility closure, and for pre-closure and post-closure facility monitoring and maintenance. In promulgating regulations pursuant to this subdivision, the department shall identify those regulations which vary from applicable federal rules and regulations. Such regulations shall:

(a) Reflect due consideration of relevant federal requirements and except where necessary to serve the public interest or where inconsistent with the purposes of this section, conform to regulations promulgated under the Resource Conservation and Recovery Act of 1976 and the Comprehensive Environmental Response Compensation and Liability Act of 1980 but shall in no case be less stringent than such federal requirements and regulations.

(b) Reflect due consideration of the sizes and locations of affected facilities, the natures and volumes of hazardous waste involved, the types of facilities (treatment, storage or disposal) and the degrees and durations of risk to human health or the environment.

(c) Provide for the establishment, administration, terms and conditions of the following methods or instruments to be used as alternatives or in combinations, in order to achieve non-duplicative coverage of the financial assurance requirements mandated by this section:

(i) Trust funds.

(ii) Surety or performance bonds.

(iii) Letters of credit.

(iv) Liability insurance or annuities.

(v) Guarantees provided by corporate or other legal or financial affiliates of the facility owner or operator.

(d) Establish:

(i) Exemptions for identified classes of facilities engaged in treatment or storage of hazardous waste for which financial assurance requirements for closure and post-closure monitoring and maintenance are unnecessary or inappropriate.

(ii) Financial criteria for the purpose of determining the financial condition of permit applicants and permit holders. Such financial criteria shall be established for the purpose of determining the relative financial viability of permit holders and applicants. The department shall establish standards of minimum financial viability

based on the criteria. Any permit holder or applicant meeting the minimum financial viability standard may select at its own discretion which of the methods or instruments described in paragraph (c) of this subdivision will be used to meet the requirements of subdivision five of this section. With respect to permit holders or applicants which do not meet the minimum financial viability standards, the commissioner may in his discretion determine which method or instrument or combination thereof shall be used to meet the requirements of subdivision five of this section. Any decision by the commissioner with respect to determining which methods or instruments are to be used shall be accompanied by a finding regarding the public interest and shall set forth the reasons therefor.

(iii) Requirements for the initial and periodic submission by permit holders and applicants to the department of up to date financial data based on the test criteria established pursuant to subparagraph (ii) of this paragraph.

(iv) The duration of such financial requirements.

(v) The method for phasing-in financial requirements for existing facilities.

2. The commissioner shall undertake an analysis of the use of a financial test as an alternative to the requirements for use of the financial assurances methods or instruments provided for in paragraph (c) of subdivision one of this section. In his analysis the commissioner shall consider relevant federal rules and regulations and their rationale, the use of such a test by other states, and the impact on affected business and industry as well as the public health and safety and any other factors he may consider relevant.

In undertaking such analysis, the commissioner shall conduct at least one public hearing and shall make a finding as to whether or not the public interest warrants the use of a financial test for the purposes stated herein and shall report such finding to the legislature within twelve months of the effective date of this section.

In the event the commissioner finds that the public interest warrants use of a financial test, the commissioner shall within eighteen months

after the effective date of this section, promulgate regulations making provisions for use of a financial test. Any such regulations shall give due consideration to relevant federal requirements and, except where necessary to serve the public interest or where inconsistent with the purposes of this section, shall conform to relevant federal regulations but shall in no case be less stringent.

3. Any owner or operator of an existing or proposed hazardous waste facility may request a modification from the department of any of the financial requirements established pursuant to subdivision one of this section. A modification may be granted in the discretion of the department if such financial requirements are found to be unnecessary or inappropriate, consistent with public interest and the purposes of this section and supported by written findings setting forth the reasons for the modification. Such modification request shall be considered a request for modification of the permit for the facility pursuant to article seventy of this chapter. In no case shall a modification granted pursuant to this subdivision eliminate or reduce the minimum requirements established in subdivision five of this section.

4. In addition to the financial requirements established pursuant to subdivision one of this section, permits for the construction and operation of certain categories of hazardous waste facilities, as those categories are defined in regulations, may, if the commissioner determines that adequate protection of the public so requires, include conditions related to any or all of the following, including responsibility for the costs thereof:

(a) On-site environmental monitors whose function shall be to monitor compliance with permit conditions. The commissioner may promulgate regulations regarding the use of such monitors.

(b) Site safety plans whereby the permittee shall establish, with the cooperation of local government officials, a community and project safety plan, including but not limited to an accident response based on a worst-case condition, on-site and off-site, a personnel training program, provisions for coordination with local emergency services and regular training exercises. Any such plan shall be subject to the approval of the department.

(c) Long term management plans, the purpose of which shall be to insure that the permittee devotes adequate resources to the examination and implementation of technologies for hazardous waste management which provide the maximum degree of environmental and public health protection practicable. The department shall, to the extent reasonably possible, make available any information or data appropriate and consistent with the purposes of this paragraph. Such a plan shall include but not be limited to the following:

(i) An overview of existing technologies being employed at the facility.

(ii) An analysis of alternate technologies available for the treatment or disposal of waste streams currently being managed or those which the applicant/permittee anticipates managing.

(iii) An assessment of marketing considerations related to the employment of alternate technologies.

(iv) An evaluation of the feasibility of financing modifications to the existing facility in order to employ the alternate technologies.

(v) A statement from the applicant/permittee regarding its intent to implement the alternate technologies, where appropriate, and a detailed discussion of the measures the applicant/permittee will take to implement the same.

5. Any permit issued by the department to construct or operate a hazardous waste facility shall, except pursuant to regulations promulgated pursuant to subdivision two of this section, require the owner or operator, or an affiliate thereof, to secure, at a minimum, one of the instruments of financial assurance provided for in paragraph (c) of subdivision one of this section. Such instruments shall be designed to insure proper facility closure, based on the estimates approved pursuant to section 27-0918 of this chapter, and coverage of personal injury and property damage to third parties caused by the operation of such facility. Such instruments shall from time to time be reviewed and updated, pursuant to regulations promulgated by the department, to insure their continued adequacy for the purposes of this section. The requirements of this subdivision shall not apply to permits granted to the state or to any facilities exempted pursuant to subparagraph (i) of paragraph (d) of subdivision one of this section.

6. If a permit holder or applicant relies upon the financial condition of a corporate parent or affiliate to meet any financial test or criteria established pursuant to this title or regulations promulgated thereunder, the parent or affiliate shall guarantee the performance of all financial assurance requirements imposed pursuant to this title, including the costs of any closure and post-closure plan.

7. Within six months after the effective date of regulations promulgated pursuant to subdivision one of this section, owners or operators of all affected existing facilities shall make application for a permit or permit modification to achieve compliance with such regulations, and immediately upon such effective date no application for a permit for any proposed affected facility shall be complete for the purposes of article seventy of this chapter without complying with such regulations. Receipt of such applications by the department shall be published in the next issue of the environmental notice bulletin following receipt.

8. In the case of permits for the construction and operation of commercial hazardous waste facilities which utilize secure landburial facilities as a primary disposal technique, such permits shall include the conditions enumerated in subdivision four of this section. In addition, the department shall establish qualifications for on-site environmental monitors to be stationed at such facilities. In order to enhance the ability of the department to monitor all aspects of a secure landfill operator the qualifications shall include a requirement that such monitors be expert in at least one of the areas of geology, chemistry or engineering. The department shall ensure that the monitors assigned to a particular facility at any one time shall, to the extent possible, have different areas of expertise as among themselves. In addition the department shall establish a rotation of monitors, when more than one such facility exists, to ensure no individual monitor is assigned to a particular facility for more than six months in any single year.

9. The commissioner shall promulgate regulations establishing

requirements of financial responsibility to assure the completion of corrective action required pursuant to subdivision two of section 27-0911 or subdivision one of section 27-0913 of this title.

§ 27-0918. Closure and post-closure plans.

1. Owners and operators of hazardous waste facilities shall submit to the department for its approval plans for the closure and post-closure monitoring and maintenance of their facilities. The department may promulgate rules and regulations concerning the contents of such plans. Such regulations shall reflect due consideration of relevant federal requirements and except where necessary to serve the public interest or inconsistent with the purposes of this section, shall conform to relevant federal regulations, but shall in no case be less stringent than such federal requirements and regulations. In the case of new facilities, such plans shall be approved prior to the effective date of the facility's operating permit. In the case of existing facilities, such plans shall be submitted to the department within six months of the effective date of this section, and shall be approved, denied or modified by the department within twelve months of submission.

2. Together with the submission of a plan for closure and post-closure monitoring and maintenance, the owner or operator of a hazardous waste facility shall submit to the department for approval a written estimate of the costs associated therewith. The estimate of closure costs must equal the cost of closure at the point in the facility's operating life when the extent and manner of its operation would make closure the most expensive, as indicated by its closure plan.

3. The owner or operator shall prepare new closure and post-closure monitoring and maintenance cost estimates whenever the department or the owner or operator determines that a change in either the closure or post-closure monitoring and maintenance requirements affects the cost of closure or post-closure care respectively.

4. One year after the approval of the cost estimates as set forth in

subdivision two of this section, and annually thereafter until closure of the facility, the owner or operator shall adjust the closure and post-closure monitoring and maintenance estimates to account for inflation.

5. All estimates made pursuant to this section and revisions thereto shall be subject to the review and approval of the department.

6. The department shall periodically review the methods and instruments of financial assurances for permitted hazardous waste facilities to determine whether they are adequate in light of changed circumstances to insure proper closure and post-closure monitoring and maintenance of such facilities.

7. The provisions of this section relating to post-closure monitoring and maintenance plans and cost estimates associated therewith shall only apply to owners and operators of disposal facilities.

§ 27-0919. Proprietary information.

The department shall hold confidential any information concerning the chemical composition, quantity, method of treatment or disposal of hazardous waste or any information related thereto when shown by any person that such information, if made public, would divulge competitive business information, methods or processes entitled to protection as trade secrets of such person, except that such information may be disclosed to any officers, employees or authorized representatives of the United States or the state concerned with carrying out RCRA or the state hazardous waste program or when relevant in any proceeding thereunder.

§ 27-0920. Reports.

1. Subject to the moneys available to the department for such purposes, the department shall submit to the governor, the temporary

president of the senate and the speaker of the assembly on an annual basis a complete and detailed report setting forth:

(a) The status of all permits issued and pending for the treatment, storage, transportation or disposal of hazardous wastes pursuant to section 27-0707 and section 27-0913 of this chapter.

(b) The types and amounts of financial assurances which have been required pursuant to this section.

(c) Any other matters that the department determines relevant for inclusion.

2. On-site environmental monitors at commercial hazardous waste facilities which utilize secure landburial facilities as a primary disposal technique shall prepare a calendar-based quarterly report on the facility including a list of any violations observed and the actions taken to correct them, a list of any fines or penalties levied during the period covered, the status of any construction, improvement or expansion projects at the facility, any pertinent information or trends derived from monitoring devices and any other information useful to describing the operational status of the facility. The reports shall be made on a standard form as determined by the department and shall be filed within twenty days after the end of each calendar quarter with the appropriate department regional office, with the facility and with any municipality and county within which the facility is located. Each monitor assigned to the facility during a report period shall sign the report and shall be available to answer questions posed by the municipalities or facility operator concerning the activities described in each such report. Quarterly reports shall be kept on file at the appropriate regional office and made available to the public.

§ 27-0921. Short-term management.

1. a. The commissioner shall immediately begin preparation of a proposal for a short-term hazardous waste management program for the effective and safe disposal, treatment and storage of hazardous waste. Such program shall be coordinated with the on-going comprehensive program for the long-term treatment and disposal of hazardous waste.

b. As part of the proposal, a comprehensive study shall be made with regard to the short-term needs of New York state generators of hazardous waste consistent with the protection of public health and safety and the environment and in light of:

(1) federal and state laws, rules and regulations designed to ensure proper disposition of hazardous waste from generation to final storage or treatment which place substantial responsibilities on industry to responsibly and safely dispose of hazardous waste;

(2) the identified shortfall in existing available storage, treatment and disposal capacity, and the potential economic and environmental problems that may occur as a result of the potential disruption of operation of the presently permitted commercial industrial hazardous waste disposal, treatment and storage facilities located in New York; and

(3) the fact that it will take a period of several years before a comprehensive program for the long-term disposal and treatment of hazardous waste is in operation sufficient to replace or reduce present methods of hazardous waste disposal.

c. The proposed short-term hazardous waste management program shall incorporate the best short-term methods and means available to contain, store and treat hazardous waste. In preparing the program, consideration shall be given to the short-term needs of New York state generators of hazardous waste, to the siting of secure landfills or other storage facilities on suitable private or state-owned land, to the development and construction of such facilities in a manner to safely allow for the eventual retrieval of hazardous waste for the purpose of ultimate destruction, detoxification, or neutralization by industrial hazardous waste treatment facilities, to the options of public versus private ownership and operation of such facilities, to the ongoing efforts to establish and maintain a statewide waste exchange system, and to the establishment of incentives to encourage reduction of the amount of hazardous waste generated.

2. Not later than January first, nineteen hundred eighty-two, the commissioner shall submit to the legislature the study and the proposal

for a short-term hazardous waste management program required pursuant to subdivision one of this section, including any proposed implementing legislation and rules and regulations where appropriate.

§ 27-0922. Prohibitions.

The use of waste oil or used oil or other material which is contaminated or mixed with any chlorinated dibenzo-p-dioxin, or any other hazardous waste identified or listed according to the regulations promulgated pursuant to section 27-0903 of this title (other than a waste identified solely on the basis of ignitability), for dust suppression or road treatment is prohibited.

§ 27-0923. Special assessments on hazardous wastes generated.

1. On and after June first, nineteen hundred eighty-five, there is hereby imposed upon every person who is engaged within the state in the generation of hazardous waste identified or listed pursuant to this title a special assessment to be determined as follows:

a. Twenty-seven dollars per ton of hazardous waste generated which is disposed of in a landfill on the site where the waste is generated or which is designated for removal or removed from the site of generation for disposal in a landfill or which is designated for removal or removed from the site of generation for storage prior to disposal in a landfill;

b. Nine dollars per ton of hazardous waste generated which is designated for removal or removed from the site of generation for incineration or for storage prior to incineration;

c. Two dollars per ton of hazardous waste generated which is incinerated on the site where the waste is generated;

d. Sixteen dollars per ton of hazardous waste generated which is designated for removal or removed from the site of generation for

treatment or disposal, exclusive of disposal in a landfill or by incineration, or for storage prior to such treatment or disposal;

e. Any residues which are hazardous wastes remaining from the treatment of hazardous wastes in a facility located on the site where the wastes are generated, and which are subsequently disposed of or incinerated on such site or which are subsequently designated for removal or removed from the site of generation for disposal, incineration or treatment or for storage prior thereto, shall be subject to the special assessments imposed by this subdivision. Provided, however, any residues which are hazardous wastes remaining from the incineration of hazardous wastes in a facility located on the site where the wastes are initially generated and which are subsequently disposed of in a landfill on such site shall not be subject to the special assessments imposed by this subdivision.

f. Notwithstanding any provision of this section to the contrary, no special assessment shall be imposed under this section on the generation of universal wastes. For purposes of this paragraph, "universal wastes" shall mean those defined and listed in regulations promulgated pursuant to this title, provided that such wastes are regulated consistent with rules adopted by the administrator pursuant to RCRA for the management of universal wastes.

2. On or after June first, nineteen hundred eighty-five, there is hereby imposed upon persons holding permits or required to hold permits for the storage, treatment or disposal of hazardous waste pursuant to section 27-0913 of this title a hazardous waste disposal special assessment to be determined as follows:

a. Twenty-seven dollars per ton of hazardous waste which is received for disposal in a landfill or for storage prior to disposal in a landfill;

b. Nine dollars per ton of hazardous waste which is received for incineration or for storage prior to incineration;

c. Sixteen dollars per ton of hazardous waste which is received for treatment or disposal, exclusive of disposal in a landfill or by incineration, or for storage prior to such treatment or disposal;

d. No special assessment shall be imposed under this subdivision upon receipt for treatment or disposal, or storage prior thereto of hazardous waste where such waste was generated by persons subject to the special assessment under subdivision one of this section.

3. a. Notwithstanding any provision of this section to the contrary, no special assessment shall be imposed under this section on the resource recovery of any hazardous waste; provided, however, that any materials remaining from resource recovery which are hazardous wastes and which are subsequently disposed of, treated, or incinerated, shall be subject to the special assessments imposed by this section. For purposes of this section, resource recovery shall not include the removal of water from a hazardous waste.

b. In the case of a fraction of a ton, the special assessments imposed by this section shall be the same fraction of the amount of such special assessment imposed on a whole ton.

c. For the purpose of this section, generation of hazardous waste shall not include retrieval or creation of hazardous waste which must be disposed of under an order of or agreement with the department pursuant to title thirteen or title fourteen of this article or under a contract with the department pursuant to title five of article fifty-six of this chapter or under an order of or agreement with the United States environmental protection agency or an order of a court of competent jurisdiction, related to a facility addressed pursuant to the Comprehensive Environmental Response, Compensation and Liability Act (42 U.S.C. 9601 et seq.) or under a written agreement with a municipality which has entered into a memorandum of agreement with the department related to the remediation of brownfield sites as of August fifth, two thousand ten.

d. No portion of the special assessments collected pursuant to this

section shall be used for any purpose if such use, under federal law, would preclude the collection of such special assessment.

e. Notwithstanding any provision of this section to the contrary, the actual method utilized to dispose of or treat any hazardous waste shall govern the determination of the rate per ton applicable under the special assessments imposed by this section, even if such hazardous waste was designated for removal, removed, stored or received for disposal or treatment by a method different than the method actually utilized. Where any such special assessment with respect to any hazardous waste is reported and paid on the basis of a rate per ton which is greater than the rate per ton applicable to the actual method utilized to dispose of or treat such hazardous waste, the difference between the amount reported and paid and the amount due using the rate per ton applicable to the actual method utilized shall be considered an overpayment of such special assessment. The commissioner of taxation and finance shall credit or refund such overpayment in the manner provided and subject to the conditions contained in article twenty-seven of the tax law, as incorporated by subdivision six of this section.

f. No special assessment shall be imposed under this section on hazardous waste generated by or at an elementary or secondary school provided the waste results from services which are provided:

(i) under a contract with the department, or with the department's approval and in compliance with department regulations, or pursuant to an order of the department, the United States environmental protection agency or a court, related to the cleanup or remediation of a hazardous materials or hazardous waste spill, discharge, or surficial cleanup, pursuant to this chapter, other than a removal action pursuant to the Comprehensive Environmental Response, Compensation and Liability Act (42 U.S.C. 9601 et seq.);

(ii) under a contract with the department for, or with the department's approval and in compliance with department regulations, related to the cleanup and removal of a petroleum spill or discharge, pursuant to subdivision seven of section one hundred seventy-six of the navigation law;

(iii) under the order of a court, the department or the department of

health, or the United States environmental protection agency related to an inactive hazardous waste disposal site pursuant to section 27-1313 of this article, section thirteen hundred eighty-nine-b of the public health law, or the Comprehensive Environmental Response, Compensation and Liability Act (42 U.S.C. 9601 et seq.);

(iv) voluntarily and without expectation of monetary compensation in accordance with subdivision one of section 27-1321 of this article; or

(v) under permit or order requiring corrective action pursuant to this title or the Resource Conservation and Recovery Act (42 U.S.C. 6901 et seq.).

4. a. The special assessments imposed by this section shall be reported and paid to the department of taxation and finance on a quarterly basis on or before the twentieth day of the month after the end of each calendar quarter, provided, however, that the special assessments attributable to the months of June, July, August and September of nineteen hundred eighty-five shall be due on October twentieth, nineteen hundred eighty-five. The payments shall be accompanied by a return in such form as the department of taxation and finance may prescribe upon consultation with the commissioner. Provided, however, that no special assessment imposed by this section shall be required to be reported or paid with respect to any one calendar quarter if the total amount of all special assessments due for such quarter is twenty-seven dollars or less.

b. All moneys collected or received by the department of taxation and finance pursuant to this section shall be deposited daily to the credit of the comptroller with such responsible banks, banking houses or trust companies as may be designated by the comptroller. Such deposits shall be kept separate and apart from all other moneys in the possession of the comptroller. The comptroller shall require adequate security from all such depositories. Of the revenues collected under this section, the comptroller shall retain in his hands such amounts as the commissioner of taxation and finance may determine to be necessary for refunds under this section and the comptroller shall pay any refunds to which those liable for special assessments shall be entitled under the provisions of this section. The comptroller, after reserving the amount to pay such

refunds, shall, on or before the tenth day of each month, pay all special assessments, interest and penalties collected under this section and remaining to his credit in such banks, banking houses or trust companies at the close of business on the last day of the preceding month into the hazardous waste remedial fund created pursuant to section ninety-seven-b of the state finance law. Within thirty days after each quarterly reporting date, the comptroller shall certify the amount of special assessments under this section deposited in the hazardous waste remedial fund during the preceding quarter and the cumulative amount collected since the start of the current calendar year, and shall submit such certification to the governor and the chairman of the senate finance committee and the chairman of the assembly ways and means committee.

5. The commissioner and the commissioner of taxation and finance shall have the power to jointly promulgate rules and regulations necessary and appropriate to carry out the purpose of this section.

6. The provisions of article twenty-seven of the tax law shall apply to the provisions of this section in the same manner and with the same force and effect as if the language of such article had been incorporated in full into this section and had expressly referred to the special assessments under this section except that the term "special assessment" or "special assessments" when used in this section shall mean "tax" or "taxes" for the purpose of the application of article twenty-seven of the tax law as incorporated by this subdivision and except to the extent that any provision of such article is either inconsistent with a provision of this section or is not relevant to this section.

7. a. If any generator or person subject to assessment by this section fails or refuses to file a return or furnish any information requested in writing by the department of taxation and finance, said department may, from any information in its possession, make an estimate and issue an assessment against such generator or person and add a penalty of twenty-five percent of the amount of the assessment so determined. With respect to such failure or refusal to file a return or furnish any

information, the provisions of paragraph one of subsection (a) and subsection (g) of section one thousand eighty-five of the tax law shall not apply.

b. If the assessment imposed by this section or any installment or portion of the assessment is not paid on or before the date prescribed for its payment, there shall be collected as a part of the assessment, interest upon the unpaid amount at the rate of fifteen percent per annum from the date prescribed for its payment until payment is actually made to the department of taxation and finance. With respect to interest upon such unpaid amount, the underpayment rate of interest applicable to deficiencies, set by the commissioner of taxation and finance pursuant to subsection (e) of section one thousand ninety-six of the tax law, shall not apply.

§ 27-0924. Hazardous materials enforcement training program.

1. The department shall formulate and establish, no later than July first, nineteen hundred eighty-five and thereafter from time to time reformulate, a specialized educational program to be known as the "hazardous materials enforcement training program" hereinafter referred to as the "program".

a. The department shall be responsible for administration of the program and shall prescribe the curriculum which shall include, but not be limited to:

(i) a review of the provisions of this title, title three and title thirteen of this article and of title twenty-seven of article seventy-one of this chapter and any rules and regulations promulgated thereunder;

(ii) a review of the provisions of title twelve of article thirteen of the public health law and any rules and regulations promulgated thereunder;

(iii) a review of the provisions of section fourteen-f of the transportation law and any rules and regulations promulgated thereunder;

(iv) a review of the provisions of section three hundred eighty of the

vehicle and traffic law and any rules and regulations promulgated thereunder; and

(v) a description of the activities and services of the department.

b. The department shall prepare any written materials necessary or useful for the purposes of the program.

c. In preparing the curriculum for the program, the department shall consult with and receive full cooperation from the commissioners of health, transportation, and motor vehicles, the attorney general, the state fire administrator, and authorized police departments and other authorized law enforcement agencies in the state regarding the particular needs and interests of such departments and agencies relating to the contents of such curriculum.

2. The department shall notify in writing, authorized police departments and other authorized law enforcement agencies in the state of the establishment and availability of the program.

§ 27-0925. Local assessments on hazardous waste treatment, storage and disposal facilities.

1. (a) Notwithstanding any other provisions of law to the contrary, any city or town of this state, acting through its local legislative body, is hereby authorized and empowered to adopt and amend local laws imposing in any such city or town an annual assessment of not more than four per centum of the gross receipts of any commercial hazardous waste facility which is located in such city or town and may make provisions for the collection thereof.

(b) In the event that a facility subject to local assessment pursuant to this subdivision is located in more than one city or town, the total annual assessment imposed shall not exceed four per centum of the gross receipts. The maximum portion of assessment revenues allowed to the cities or towns in such a situation shall be determined by multiplying the maximum total of assessment liability which can be imposed on the facility by the ratio of the population of the assessing city or town to

the total population of all the cities or towns in which the facility is located. Population shall be based on the most recent census.

2. (a) (1) Notwithstanding any other provisions of law to the contrary, any school district of this state, acting through its local legislative body, is hereby authorized and empowered to adopt a resolution imposing in any such school district an annual assessment of not more than two per centum of the gross receipts of any commercial hazardous waste facility which is located in such school district and may make provisions for the collection thereof.

(2) Any school district whose boundaries are located within the town or city in which a commercial hazardous waste facility is located shall be entitled to a proportionate share of the annual assessment of the gross receipts collected.

(3) The annual assessment revenues shall be allowed and distributed to all school districts located in the town, or city in which the commercial hazardous waste facility is located. The distribution of annual assessment revenues among the school districts located in the town or city where the facility is located shall be done on a proportionate basis, based upon the number of students of each school district residing in the town or city where the facility is located.

(4) The distribution from the school district collecting the annual assessment revenue to any other district entitled to a proportionate basis shall be made within sixty days of receipt of the annual assessment revenues.

(b) In the event that a facility subject to local assessment pursuant to this subdivision is located in more than one school district, the total annual assessment imposed shall not exceed two per centum of the gross receipts.

3. The term "gross receipts" as used in this section means all receipts from the provision of hazardous waste management services attributable to a particular industrial hazardous waste treatment storage and disposal facility without deduction therefor due to the cost of materials or equipment used, labor or services or other costs, interest or discount paid or any other expense whatsoever; provided, however, that as used in this section, gross receipts shall not include

any amounts collected or paid pursuant to section 27-0923 of this title.

4. An assessment imposed pursuant to this section shall be in addition to any and all other assessments, taxes, agreements or contracts.

§ 27-0926. Use and recycling of elemental mercury and dental amalgam by dentists.

1. No dentist shall use or possess elemental mercury in the practice of dentistry unless such elemental mercury is contained in appropriate pre-encapsulated capsules specifically designed for the mixing of dental amalgam. All dentists shall recycle any elemental mercury, including any pre-encapsulated mercury capsule waste, and dental amalgam waste generated in their dental practices in accordance with rules and regulations established by the commissioner.

2. The commissioner is hereby authorized and directed to promulgate rules and regulations necessary for the implementation of this section.

TITLE 10

LITTER AND SOLID WASTE CONTROL

Section 27-1001. Legislative findings.

27-1003. Definitions.

27-1005. Refund value.

27-1007. Mandatory acceptance.

27-1009. Refusal of acceptance.

27-1011. Beverage container requirements.

27-1012. Deposit and disposition of refund values; registration; reports.

27-1013. Redemption centers.

27-1014. Authority to promulgate rules and regulations.

27-1015. Violations.

27-1016. Public education.

27-1018. Beverage container assistance program.

27-1019. Severability.

§ 27-1001. Legislative findings.

The legislature hereby finds that litter composed of discarded beverage containers is a growing problem of state concern and a direct threat to the health and safety of the citizens of this state. Discarded beverage containers create a hazard to vehicular traffic, a source of physical injury to pedestrians and farm animals, a hazard to farm and other machinery and an unsightly accumulation of litter which must be disposed of at increasing public expense. Beverage containers also create an unnecessary addition to the state's and municipalities' already overburdened solid waste and refuse disposal systems. Unsegregated disposal of such containers creates an impediment to the efficient operation of resource recovery plants. Further, the legislature finds that the uninhibited discard of beverage containers constitutes a waste of both mineral and energy resources. The legislature hereby finds that requiring a deposit on all beverage containers, along with certain other facilitating measures, will provide a necessary incentive for the economically efficient and environmentally benign collection and recycling of such containers.

§ 27-1003. Definitions.

Whenever used in this title:

1. "Beverage" means carbonated soft drinks, water, beer, other malt beverages and a wine product as defined in subdivision thirty-six-a of section three of the alcoholic beverage control law. "Malt beverages" means any beverage obtained by the alcoholic fermentation or infusion or decoction of barley, malt, hops, or other wholesome grain or cereal and water including, but not limited to ale, stout or malt liquor. "Water" means any beverage identified through the use of letters, words or symbols on its product label as a type of water, including any flavored water or nutritionally enhanced water, provided, however, that "water" does not include any beverage identified as a type of water to which a

sugar has been added.

2. "Beverage container" means the individual, separate, sealed glass, metal, aluminum, steel or plastic bottle, can or jar used for containing less than one gallon or 3.78 liters at the time of sale or offer for sale of a beverage intended for use or consumption in this state. Beverage containers sold or offered for sale or distributed aboard aircraft or ships shall be considered as intended for use or consumption outside this state.

2-a. "Bottler" means a person, firm or corporation who:

a. bottles, cans or otherwise packages beverages in beverage containers except that if such packaging is for any other person, firm or corporation having the right to bottle, can or otherwise package the same brand of beverage, then such other person, firm or corporation shall be the bottler; or

b. imports filled beverage containers into the United States.

3. "Commissioner" means the commissioner of environmental conservation.

4. "Dealer" means every person, firm or corporation who engages in the sale of beverages in beverage containers to a consumer for off premises consumption in this state.

5. "Department" means the department of environmental conservation.

5-a. A "deposit initiator" for each beverage container for which a refund value is established under section 27-1005 of this title means:

a. the bottler of the beverage in such container;

b. the distributor of such container if such distributor's purchase of such container was not, directly or indirectly, from a registered deposit initiator;

c. a dealer of such container who sells or offers for sale such container in this state, whose purchase of such container was not, directly or indirectly, from a registered deposit initiator; or

d. an agent acting on behalf of a registered deposit initiator.

6. "Distributor" means any person, firm or corporation which engages in the sale or offer for sale of beverages in beverage containers to a dealer.

7. "Place of business" means the location at which a dealer sells or offers for sale beverages in beverage containers to consumers.

8. "Redeemer" means every person who demands the refund value provided for herein in exchange for the empty beverage container, but shall not include a dealer as defined in subdivision four of this section.

9. "Redemption center" means any person offering to pay the refund value of an empty beverage container to a redeemer, or any person who contracts with one or more dealers or distributors to collect, sort and obtain the refund value and handling fee of empty beverage containers for, or on behalf of, such dealer or distributor under the provisions of section 27-1013 of this title.

10. "Use or consumption" means the exercise of any right or power incident to the ownership of a beverage, other than the sale or the keeping or retention of a beverage for the purpose of sale.

11. "Ship" or "ships" means any ocean going vessel used to carry passengers or freight in interstate or foreign commerce.

12. "Reverse vending machine" means an automated device that uses a laser scanner, microprocessor, or other technology to accurately recognize the universal product code (UPC) on containers to determine if the container is redeemable and accumulates information regarding containers redeemed, including the number of such containers redeemed,

thereby enabling the reverse vending machine to accept containers from redeemers and to issue a scrip or receipt for their refund value.

13. "Universal product code" or "UPC code" means a standard for encoding a set of lines and spaces that can be scanned and interpreted into numbers to identify a product. Universal product code may also mean any accepted industry barcode which replaces the UPC code including EAN and other codes that may be used to identify a product.

§ 27-1005. Refund value.

No person shall sell or offer for sale a beverage container in this state unless the deposit on such beverage container is or has been collected by a registered deposit initiator and unless such container has a refund value of not less than five cents which is clearly indicated thereon as provided in section 27-1011 of this title.

§ 27-1007. Mandatory acceptance.

Except as provided in section 27-1009 of this title:

1. (a) A dealer shall accept at his or her place of business from a redeemer any empty beverage containers of the design, shape, size, color, composition and brand sold or offered for sale by the dealer, and shall pay to the redeemer the refund value of each such beverage container as established in section 27-1005 of this title. Redemptions of refund value must be in legal tender, or a scrip or receipt from a reverse vending machine, provided that the scrip or receipt can be exchanged for legal tender for a period of not less than sixty days without requiring the purchase of other goods. The use or presence of a reverse vending machine shall not relieve a dealer of any obligations imposed pursuant to this section. If a dealer utilizes a reverse vending machine to redeem containers, the dealer shall provide redemption of beverage containers when the reverse vending machine is full, broken, under repair or does not accept a type of beverage container sold or

offered for sale by such dealer and may not limit the hours or days of redemption except as provided by subdivision three of this section.

(b) Beginning March first, two thousand ten, a dealer whose place of business is part of a chain engaged in the same general field of business which operates ten or more units in this state under common ownership and whose business has at least: (i) forty thousand but less than sixty thousand square feet devoted to the display of merchandise for sale to the public shall install and maintain at least two reverse vending machines at the dealer's place of business; (ii) sixty thousand but less than eighty-five thousand square feet devoted to the display of merchandise for sale to the public shall install and maintain at least three reverse vending machines at the dealer's place of business; or (iii) eighty-five thousand square feet devoted to the display of merchandise for sale to the public shall install and maintain at least four reverse vending machines at the dealer's place of business. The requirements of paragraph (b) of this subdivision to install and maintain reverse vending machines shall not apply to a dealer that: (i) sells only beverage containers of twenty ounces or less where such beverage containers are packaged in quantities fewer than six; (ii) sells beverage containers and devotes no more than five percent of its floor space to the display and sale of consumer commodities, as defined in section two hundred fourteen-h of the agriculture and markets law; or (iii) obtains a waiver from the commissioner authorizing dealers to provide consumers with an alternative technology that: (A) determines if the container is redeemable, (B) provides protections against fraud through a system that validates each container redeemed by reading the universal product code and, except with respect to refillable containers, renders the container unredeemable, (C) accumulates information regarding containers redeemed, and (D) issues legal tender, or a scrip, receipt, or other form of credit for the refund value, that can be exchanged for legal tender for a period of not less than sixty days without requiring the purchase of other goods. Notwithstanding the foregoing, if the alternative technology does not allow consumers to immediately obtain the refund value of the redeemed container, a dealer shall be permitted to deploy such alternative technology only if it also offers an alternative that allows consumers to conveniently and immediately obtain such refund value through a reverse vending machine

or other alternative method.

(c) A dealer to which paragraph (b) of this subdivision does not apply and whose place of business is at least forty thousand square feet which does not utilize reverse vending machines to process empty beverage containers for redemption shall: (i) establish and maintain a dedicated area within such business to accept beverage containers for redemption; (ii) adequately staff such area to facilitate efficient acceptance and processing of such containers during business hours; and (iii) post one or more conspicuous signs conforming to the size and color requirements described in subdivision two of this section at each public entrance to the business which describes where in the business the redemption area is located. The commissioner may establish in rules and regulations additional standards for the efficient processing of beverage containers by such dealers.

(d) For the purposes of this subdivision on any day that a dealer is open for less than twenty-four hours, the dealer may restrict or refuse the payment of refund values during the first and last hour the dealer is open for business.

2. A dealer shall post a conspicuous sign, at the point of sale, that states:

"NEW YORK BOTTLE BILL OF RIGHTS

STATE LAW REQUIRES US TO REDEEM EMPTY RETURNABLE BEVERAGE CONTAINERS OF
THE SAME TYPE AND BRAND THAT WE SELL OR OFFER FOR SALE
YOU HAVE CERTAIN RIGHTS UNDER THE NEW YORK STATE RETURNABLE CONTAINER
ACT:

THE RIGHT to return your empties for refund to any dealer who sells the same brand, type and size, whether you bought the beverage from the dealer or not. It is illegal to return containers for refund that you did not pay a deposit on in New York state.

THE RIGHT to get your deposit refund in cash, without proof of purchase.

THE RIGHT to return your empties any day, any hour, except for the first and last hour of the dealer's business day (empty containers may

be redeemed at any time in 24-hour stores).

THE RIGHT to return your containers if they are empty and intact. Washing containers is not required by law, but is strongly recommended to maintain sanitary conditions.

The New York state returnable container act can be enforced by the New York state department of environmental conservation, the New York state department of agriculture and markets, the New York state department of taxation and finance, the New York state attorney general and/or by your local government."

Such sign must be no less than eight inches by ten inches in size and have lettering a minimum of one quarter inch high, and of a color which contrasts with the background. The department shall maintain a toll free telephone number for a "bottle bill complaint line" that shall be available from 9:00 a.m. to 5:00 p.m. each business day to receive reports of violations of this title. The telephone number shall be listed on any sign required by this section.

3. On or after June first, two thousand nine, a dealer may limit the number of empty beverage containers to be accepted for redemption at the dealer's place of business to no less than seventy-two containers per visit, per redeemer, per day, provided that:

(a) The dealer has a written agreement with a redemption center, be it either at a fixed physical location within the same county and within one-half mile of the dealer's place of business, or a mobile redemption center, operated by a redemption center, that is located within one-quarter mile of the dealer's place of business. The redemption center must have a written agreement with the dealer to accept containers on behalf of the dealer; and the redemption center's hours of operation must cover at least 9:00 a.m. through 7:00 p.m. daily or in the case of a mobile redemption center, the hours of operation must cover at least four consecutive hours between 8:00 a.m. and 8:00 p.m. daily. The dealer must post a conspicuous, permanent sign, meeting the size and color specifications set forth in subdivision two of this section, open to public view, identifying the location and hours of

operation of the affiliated redemption center or mobile redemption center; and

(b) The dealer provides, at a minimum, a consecutive two hour period between 7:00 a.m. and 7:00 p.m. daily whereby the dealer will accept up to two hundred forty containers, per redeemer, per day, and posts a conspicuous, permanent sign, meeting the size and color specifications set forth in subdivision two of this section, open to public view, identifying those hours. The dealer may not change the hours of redemption without first posting a thirty day notice; and

(c) The dealer's primary business is the sale of food or beverages for consumption off-premises, and the dealer's place of business is less than ten thousand square feet in size.

4. A deposit initiator shall accept from a dealer or operator of a redemption center any empty beverage container of the design, shape, size, color, composition and brand sold or offered for sale by the deposit initiator, and shall pay the dealer or operator of a redemption center the refund value of each such beverage container as established by section 27-1005 of this title. A deposit initiator shall accept and redeem all such empty beverage containers from a dealer or redemption center without limitation on quantity.

5. A deposit initiator's or distributor's failure to pick up empty beverage containers, including containers processed in a reverse vending machine, from a redemption center, dealer or the operator of a reverse vending machine, shall be a violation of this title.

6. In addition to the refund value of a beverage container as established by section 27-1005 of this title, a deposit initiator shall pay to any dealer or operator of a redemption center a handling fee of three and one-half cents for each beverage container accepted by the deposit initiator from such dealer or operator of a redemption center. Payment of the handling fee shall be as compensation for collecting, sorting and packaging of empty beverage containers for transport back to the deposit initiator or its designee. Payment of the handling fee may not be conditioned on the purchase of any goods or services, nor may such payment be made out of the refund value account established

pursuant to section 27-1012 of this title. A distributor who does not initiate deposits on a type of beverage container is considered a dealer only for the purpose of receiving a handling fee from a deposit initiator.

7. A deposit initiator on a brand shall accept from a distributor who does not initiate deposits on that brand any empty beverage containers of that brand accepted by the distributor from a dealer or operator of a redemption center and shall reimburse the distributor the refund value of each such beverage container, as established by section 27-1005 of this title. In addition, the deposit initiator shall reimburse such distributor for each such beverage container the handling fee established under subdivision six of this section. Without limiting the rights of the department or any person, firm or corporation under this subdivision or any other provision of this section, a distributor shall have a civil right of action to enforce this subdivision, including, upon three days notice, the right to apply for temporary and preliminary injunctive relief against continuing violations, and until arrangements for collection and return of empty containers or reimbursement of such distributor for such deposits and handling fees are made.

8. It shall be the responsibility of the deposit initiator or distributor to provide to a dealer or redemption center a sufficient number of bags, cartons, or other suitable containers, at no cost, for the packaging, handling and pickup of empty beverage containers that are not redeemed through a reverse vending machine. The bags, cartons, or containers must be provided by the deposit initiator or distributor on a schedule that allows the dealer or redemption center sufficient time to sort the empty beverage containers prior to pick up by the deposit initiator or distributor. In addition:

(a) When picking up empty beverage containers, a deposit initiator or distributor shall not require a dealer or redemption center to load their own bags, cartons or containers onto or into the deposit initiator's or distributor's vehicle or vehicles or provide the staff or equipment needed to do so.

(b) A deposit initiator or distributor shall not require empty containers to be counted at a location other than the redemption center

or dealer's place of business. The dealer or redemption center shall have the right to be present at the count.

(c) A deposit initiator or distributor shall pick up empty beverage containers from the dealer or redemption center at reasonable times and intervals as determined in rules or regulations promulgated by the department.

9. No person shall return or assist another to return to a dealer or redemption center an empty beverage container for its refund value if such container had previously been accepted for redemption by a dealer, redemption center, or deposit initiator who initiates deposits on beverage containers of the same brand.

10. A redeemer, dealer, distributor or redemption center shall not knowingly redeem an empty beverage container on which a deposit was never paid in New York state.

11. Notwithstanding the provisions of subdivision two of section 27-1009 of this title, a deposit initiator or distributor shall accept and redeem beverage containers as provided in this title, if the dealer or operator of a redemption center shall have accepted and paid the refund value of such beverage containers.

12. No person shall intentionally program, tamper with, render inaccurate, or circumvent the proper operation of a reverse vending machine to wrongfully elicit deposit monies when no valid, redeemable beverage container has been placed in and properly processed by the reverse vending machine.

§ 27-1009. Refusal of acceptance.

1. A dealer or operator of a redemption center may refuse to accept from a redeemer, and a deposit initiator or distributor may refuse to accept from a dealer or operator of a redemption center any empty beverage container which does not state thereon a refund value as established by section 27-1005 and provided by section 27-1011 of this

title.

2. A dealer or operator of a redemption center may also refuse to accept any broken bottle, corroded, crushed or dismembered container, or any beverage container which contains a significant amount of foreign material, as determined in rules and regulations to be promulgated by the commissioner.

§ 27-1011. Beverage container requirements.

1. a. Every beverage container sold or offered for sale in this state shall clearly indicate by permanently marking or embossing the container or by printing as part of the product label the refund value of the container and the words "New York" or the letters "NY".

b. Such embossing or permanent imprinting on the beverage container shall be the responsibility of the person, firm or corporation which bottles, cans or otherwise fills or packages a beverage container or a brand owner for whose exclusive account private label beverages are bottled, canned or otherwise packaged; provided, however, that the duly authorized agent of any such person, firm or corporation may indicate such refund value by a label securely affixed on any beverage container containing beverages imported into the United States. Private label beverages shall be defined as beverages purchased from a bottler in beverage containers bearing a brand name or trademark for sale at retail directly by the owner or licensee of such brand name or trademark; or through retail dealers affiliated with such owner or licensee by a cooperative or franchise agreement.

2. No deposit initiator, distributor or dealer shall sell or offer for sale, at wholesale or retail in this state, any metal beverage container designed and constructed with a ring or tab which is detachable in opening the container unless such detachable part will decompose by photodegradation or biodegradation.

3. No deposit initiator, distributor or dealer shall sell or offer for

sale in this state beverage containers connected to each other by a separate holding device constructed of plastic which does not: (a) decompose by photodegradation or biodegradation; or

(b) comply with minimum post-consumer recycled material content and hole diameter limitations as defined in rules and regulations promulgated by the department, and is recyclable and indicates a resin identification code.

§ 27-1012. Deposit and disposition of refund values; registration; reports.

1. Each deposit initiator shall deposit in a refund value account an amount equal to the refund value initiated under section 27-1005 of this title which is received with respect to each beverage container sold by such deposit initiator. Such deposit initiator shall hold the amounts in the refund value account in trust for the state. A refund value account shall be an interest-bearing account established in a banking institution located in this state, the deposits in which are insured by an agency of the federal government. Deposits of such amounts into the refund value account shall be made not less frequently than every five business days. All interest, dividends and returns earned on the refund value account shall be paid directly into said account. The monies in such accounts shall be kept separate and apart from all other monies in the possession of the deposit initiator. The commissioner of taxation and finance may specify a system of accounts and records to be maintained with respect to accounts established under this subdivision.

2. Payments of refund values pursuant to section 27-1007 of this title shall be paid from each deposit initiator's refund value account. No other payment or withdrawal from such account may be made except as prescribed by this section.

3. Each deposit initiator shall file quarterly reports with the commissioner of taxation and finance on a form and in the manner prescribed by such commissioner. The commissioner of taxation and finance may require such reports to be filed electronically. The

quarterly reports required by this subdivision shall be filed for the quarterly periods ending on the last day of May, August, November and February of each year, and each such report shall be filed within twenty days after the end of the quarterly period covered thereby. Each such report shall include all information such commissioner shall determine appropriate including but not limited to the following information:

a. the balance in the refund value account at the beginning of the quarter for which the report is prepared;

b. all such deposits credited to the refund value account and all interest, dividends or returns received on such account, during such quarter;

c. all withdrawals from the refund value account during such quarter, including all reimbursements paid pursuant to subdivision two of this section, all service charges on the account, and all payments made pursuant to subdivision four of this section; and

d. the balance in the refund value account at the close of such quarter.

4. a. Quarterly payments. An amount equal to eighty percent of the balance outstanding in the refund value account at the close of each quarter shall be paid to the commissioner of taxation and finance at the time the report provided for in subdivision three of this section is required to be filed. The commissioner of taxation and finance may require that the payments be made electronically. The remaining twenty percent of the balance outstanding at the close of each quarter shall be the monies of the deposit initiator and may be withdrawn from such account by the deposit initiator. If the provisions of this section with respect to such account have not been fully complied with, each deposit initiator shall pay to such commissioner at such time, in lieu of the amount described in the preceding sentence, an amount equal to the balance which would have been outstanding on such date had such provisions been fully complied with. The commissioner of taxation and finance may require that the payments be made electronically.

b. Refund value account shortfall. In the event a deposit initiator pays out more in refund values than it collects in deposits of refund values during the course of a quarterly period as described in subdivision three of this section, the deposit initiator may apply to the commissioner of taxation and finance for a refund of the amount of such excess payment of refund values from sources other than the refund value account, in the manner as provided by the commissioner of taxation and finance. A deposit initiator must apply for a refund no later than twelve months after the due date for filing the quarterly report for the quarterly period for which the refund claim is made. No interest shall be payable for any refund paid pursuant to this paragraph.

c. Final report. A deposit initiator who ceases to do business in this state as a deposit initiator shall file a final report and remit payment of eighty percent of all amounts remaining in the refund value account as of the close of the deposit initiator's last day of business. The commissioner of taxation and finance may require that the payments be made electronically. The deposit initiator shall indicate on the report that it is a "final report". The final report is due to be filed with payment twenty days after the close of the quarterly period in which the deposit initiator ceases to do business. In the event the deposit initiator pays out more in refund values than it collects in such final quarterly period, the deposit initiator may apply to the commissioner of taxation and finance for a refund of the amount of such excess payment of refund values from sources other than the refund value account, in the manner as provided by the commissioner of taxation and finance.

5. All moneys collected or received by the department of taxation and finance pursuant to this title shall be deposited to the credit of the comptroller with such responsible banks, banking houses or trust companies as may be designated by the comptroller. Such deposits shall be kept separate and apart from all other moneys in the possession of the comptroller. The comptroller shall require adequate security from all such depositories. Of the total revenue collected, the comptroller shall retain the amount determined by the commissioner of taxation and finance to be necessary for refunds out of which the comptroller must

pay any refunds to which a deposit initiator may be entitled. After reserving the amount to pay refunds, the comptroller must, by the tenth day of each month, pay into the state treasury to the credit of the general fund the revenue deposited under this subdivision during the preceding calendar month and remaining to the comptroller's credit on the last day of that preceding month; provided, however, that, beginning April first, two thousand thirteen, nineteen million dollars, and all fiscal years thereafter, twenty-three million dollars plus all funds received from the payments due each fiscal year pursuant to subdivision four of this section in excess of the greater of the amount received from April first, two thousand twelve through March thirty-first, two thousand thirteen or one hundred twenty-two million two hundred thousand dollars, shall be deposited to the credit of the environmental protection fund established pursuant to section ninety-two-s of the state finance law.

6. The commissioner and the commissioner of taxation and finance shall promulgate, and shall consult each other in promulgating, such rules and regulations as may be necessary to effectuate the purposes of this title. The commissioner and the commissioner of taxation and finance shall provide all necessary aid and assistance to each other, including the sharing of any information that is necessary to their respective administration and enforcement responsibilities pursuant to the provisions of this title.

7. a. Any person who is a deposit initiator under this title before April first, two thousand nine, must apply by June first, two thousand nine to the commissioner of taxation and finance for registration as a deposit initiator. Any person who becomes a deposit initiator on or after April first, two thousand nine shall apply for registration prior to collecting any deposits as such a deposit initiator. Such application shall be in a form prescribed by the commissioner of taxation and finance and shall require such information deemed to be necessary for proper administration of this title. The commissioner of taxation and finance may require that applications for registration must be submitted electronically. The commissioner of taxation and finance shall electronically issue a deposit initiator registration certificate in a

form prescribed by the commissioner of taxation and finance within fifteen days of receipt of such application or may take an additional ten days if the commissioner of taxation and finance deems it necessary to consult with the commissioner before issuing such registration certificate. A registration certificate issued pursuant to this subdivision may be issued for a specified term of not less than three years and shall be subject to renewal in accordance with procedures specified by the commissioner of taxation and finance. The commissioner of taxation and finance shall furnish to the commissioner a complete list of registered deposit initiators and shall continually update such list as warranted. The commissioner shall share any information with the commissioner of taxation and finance that is necessary for the administration of this subdivision.

b. The commissioner of taxation and finance shall have the authority to revoke or refuse to renew any registration issued pursuant to this subdivision when he or she has determined or has been informed by the commissioner that any of the provisions of this title or rules and regulations promulgated thereunder have been violated. Such violations shall include, but not be limited to, the failure to file quarterly reports, the failure to make payments pursuant to this subdivision, the providing of false or fraudulent information to either the department of taxation and finance or the department, or knowingly aiding or abetting another person in violating any of the provisions of this title. A notice of proposed revocation or non-renewal shall be given to the deposit initiator in the manner prescribed for a notice of deficiency of tax and all the provisions applicable to a notice of deficiency under article twenty-seven of the tax law shall apply to a notice issued pursuant to this paragraph, insofar as such provisions can be made applicable to a notice authorized by this paragraph, with such modifications as may be necessary in order to adapt the language of such provisions to the notice authorized by this paragraph. All such notices issued by the commissioner of taxation and finance pursuant to this paragraph shall contain a statement advising the deposit initiator that the revocation or non-renewal of registration may be challenged through a hearing process and the petition for such a challenge must be filed with the commissioner of taxation and finance within ninety days after

such notice is issued. A deposit initiator whose registration has been so revoked or not renewed shall cease to do business as a deposit initiator in this state, until this title has been complied with and a new registration has been issued. Any deposit initiator whose registration has been so revoked may not apply for registration for two years from the date such revocation takes effect.

8. The commissioner of taxation and finance may require the maintenance of such accounts, records or documents relating to the sale of beverage containers, by any deposit initiator, bottler, distributor, dealer or redemption center as such commissioner may deem appropriate for the administration of this section. Such commissioner may make examinations, including the conduct of facility inspections during regular business hours, with respect to the accounts, records or documents required to be maintained under this subdivision. Such accounts, records and documents shall be preserved for a period of three years, except that such commissioner may consent to their destruction within that period or may require that they be kept longer. Such accounts, records and documents may be kept within the meaning of this subdivision when reproduced by any photographic, photostatic, microfilm, micro-card, miniature photographic or other process which actually reproduces the original accounts, records or documents.

9. a. Any person required to be registered under this section who, without being so registered, sells or offers for sale beverage containers in this state, in addition to any other penalty imposed by this title, shall be subject to a penalty to be assessed by the commissioner of taxation and finance in an amount not to exceed five hundred dollars for the first day on which such sales or offers for sale are made, plus an amount not to exceed five hundred dollars for each subsequent day on which such sales or offers for sale are made, not to exceed twenty-five thousand dollars in the aggregate.

b. Any deposit initiator who fails to file reports, make quarterly payments or maintain accounts or records pursuant to this section, unless it is shown that such failure was due to reasonable cause and not due to negligence or willful neglect, in addition to any other penalty

imposed by this title, shall be subject to a penalty to be assessed by the commissioner of taxation and finance of not more than one thousand dollars for each quarter during which such failure occurred, and an additional penalty of not more than one thousand dollars for each quarter such failure continues.

10. The provisions of article twenty-seven of the tax law shall apply to the provisions of this title for which the commissioner of taxation and finance is responsible, including collection of refund value amounts, in the same manner and with the same force and effect as if the language of such article had been incorporated in full into this section except to the extent that any provision of such article is either inconsistent with a provision of this section or is not relevant to this section as determined by the commissioner of taxation and finance. Furthermore, for purposes of applying the provisions of article twenty-seven of the tax law, where the terms "tax" and "taxes" appear in such article, such terms shall be construed to mean "refund value" or "balance in the refund value account".

11. If any deposit initiator fails or refuses to file a report or furnish any information requested in writing by the department of taxation and finance or the department, the department of taxation and finance with the assistance of the department may, from any information in its possession, make an estimate of the deficiency and collect such deficiency from such deposit initiator.

12. a. Each deposit initiator shall provide a report to the department describing all the types of beverage containers on which it initiates deposits. The report shall include the product name, type of beverage, size and composition of the beverage container, universal product code, and any other information the department may require. Upon request, a deposit initiator shall also provide to the department a copy of the container label or a picture of any beverage container sold or offered for sale in this state on which it initiates a deposit. Such information shall be provided in a form as prescribed by the department. The department may require that such forms be filed electronically.

b. A bottler may place on a beverage container a universal product code or other distinctive marking that is specific to the state or used only in the state and any other states with laws substantially similar to this title as a means of preventing the sale or redemption of beverage containers on which no deposit was initiated.

c. A bottler or deposit initiator shall notify the department, in a form prescribed by the department, whenever a beverage container or beverage container label is revised by altering the universal product code, or whenever the container on which a universal product code appears is changed in size, composition or glass color, or whenever the container or container label on which a universal product code appears is changed to include a universal product code that is unique to the state or used only in the state and any other states with laws substantially similar to this title.

§ 27-1013. Redemption centers.

1. The commissioner is hereby empowered to promulgate rules and regulations governing (a) the circumstances in which deposit initiators, dealers and distributors, individually or collectively, are required to accept the return of empty beverage containers, including beverage containers processed through reverse vending machines and make payment therefor; (b) the sorting of the containers which a deposit initiator or distributor may require of dealers and redemption centers; (c) the collection of returned beverage containers by deposit initiators or distributors, including the party to whom such expense is to be charged, the frequency of such pick ups and the payment for refunds and handling fees thereon; (d) the right of dealers to restrict or limit the number of containers redeemed, the rules for redemption at the dealers' place of business, and the redemption of containers from a beverage for which sales have been discontinued; (e) to issue registrations to persons, firms or corporations which establish redemption centers, subject to applicable provisions of local and state laws, at which redeemers and dealers may return empty beverage containers and receive payment of the refund value of such beverage containers. Such registrations shall be

issued at no cost. Should the department require by regulations adopted pursuant to this paragraph that redemption centers must obtain a registration as a condition of operation, any redemption center in business as of March first, two thousand thirteen that previously provided the department with the notification information required by regulations in effect as of such date may continue to operate as if the department had issued such redemption center a registration required by regulations adopted under this paragraph; provided, however, that such redemption center shall provide the department with any other information required by regulations adopted pursuant to this paragraph. The department may, after due notice and opportunity of hearing, pursuant to the provisions of section 71-1709 of this chapter, deny an application or revoke a registration. In determining whether or not to revoke a registration the commissioner shall at a minimum, take into consideration the compliance history of a violator, good faith efforts of a violator to comply, any economic benefit from noncompliance and whether the violation was procedural in nature. The commissioner's determination to revoke a registration is subject to review under article seventy-eight of the civil practice law and rules; and (f) the operation of mobile redemption centers in order to ensure that to the best extent practicable containers are not proffered for redemption to a deposit initiator or distributor outside of the geographic area where such deposit initiator sells containers and initiates deposits.

2. The department may require a redemption center to obtain a permit, as an alternative to registration if such center is located at the same facility or site as another solid waste management facility otherwise subject to the requirements of title seven of this article or the regulations promulgated pursuant thereto.

3. No dealer or distributor, as defined in section 27-1003 of this title, shall be required to obtain a permit to operate a redemption center at the same location as the dealer's or distributor's place of business. Operators of such redemption centers shall receive payment of the refund value of each beverage container from the appropriate deposit initiator or distributor as provided under section 27-1007 of this title.

4. Each dealer and redemption center shall require any person tendering for redemption more than two thousand five hundred containers at one time to such dealer or redemption center to provide such person's name and address and the license plate of the vehicle used to transport the containers, or, in the case of an agent or employee of a not-for-profit corporation, a sales tax exemption certificate. The dealer or redemption center redeeming the beverage containers shall keep the information on file for a minimum of twelve months and provide same to the department upon request.

§ 27-1014. Authority to promulgate rules and regulations.

In addition to the authority of the commissioner, under sections 27-1009 and 27-1013 of this title, the commissioner shall have the power to promulgate rules and regulations necessary and appropriate for the administration of this title.

§ 27-1015. Violations.

1. Except as otherwise provided in this section and section 27-1012 of this title, any person who shall violate any provision of this title shall be liable to the state of New York for a civil penalty of not more than five hundred dollars, and an additional civil penalty of not more than five hundred dollars for each day during which each such violation continues. Any civil penalty may be assessed following a hearing or opportunity to be heard.

2. Any distributor, deposit initiator, redemption center or dealer who violates any provision of this title, except as provided in section 27-1012 of this title, shall be liable to the state of New York for a civil penalty of not more than one thousand dollars, and an additional civil penalty of not more than one thousand dollars for each day during which each such violation continues. Any civil penalty may be assessed following a hearing or opportunity to be heard.

3. It shall be unlawful for a distributor or deposit initiator, acting alone or aided by another, to return any empty beverage container to a dealer or redemption center for its refund value if the distributor or deposit initiator had previously accepted such beverage container from any dealer or operator of a redemption center or if such container was previously accepted by a reverse vending machine. A violation of this subdivision shall be a misdemeanor punishable by a fine of not less than five hundred dollars nor more than one thousand dollars and an amount equal to two times the amount of money received as a result of such violation.

4. Any person who willfully tenders to a dealer, distributor, redemption center or deposit initiator more than forty-eight empty beverage containers for which such person knows or should reasonably know that no deposit was paid in New York state may be assessed by the department a civil penalty of up to one hundred dollars for each container or up to twenty-five thousand dollars for each such tender of containers. At each location where a person tenders containers for redemption, dealers and redemption centers must conspicuously display a sign in letters that are at least one inch in height with the following information: "WARNING: Persons tendering for redemption containers on which a deposit was never paid in this state may be subject to a civil penalty of up to one hundred dollars per container or up to twenty-five thousand dollars for each such tender of containers." Any civil penalty may be assessed following a hearing or opportunity to be heard.

5. The department, the department of agriculture and markets, the department of taxation and finance and the attorney general are hereby authorized to enforce the provisions of this title and all monies collected shall be deposited to the credit of the environmental protection fund established pursuant to section ninety-two-s of the state finance law. In addition, the provisions of section 27-1005 of this title and subdivisions one, two, three, four, five, ten and eleven of section 27-1007 of this title may be enforced by a county, city, town or village and the local legislative body thereof may adopt local laws, ordinances or regulations consistent with this title providing for the

enforcement of such provisions.

* 5-a. The city of New York, Nassau county and Suffolk county are entitled to retain twenty-five percent of all monies collected as fines or penalties pursuant to enforcement of section 27-1005 of this chapter.

* NB Repealed April 1, 2031

6. (a) Any person who willfully violates or directs another to violate the requirements to collect or charge the refund value imposed by section 27-1005 or paragraph a of subdivision nine of section 27-1012 of this title on five thousand or more beverage containers in one or more separate transactions within one year shall be guilty of a class B misdemeanor.

(b) Any person, having previously been convicted of a violation of paragraph (a) of this section within the past three years, who willfully violates or directs another to violate the requirements to collect or charge the refund value imposed by section 27-1005 or paragraph a of subdivision nine of section 27-1012 of this title on five thousand or more beverage containers in one or more separate transactions within one year shall be guilty of a class A misdemeanor.

(c) Any person who willfully violates or directs another to violate the requirements to collect or charge the refund value imposed by section 27-1005 or paragraph a of subdivision nine of section 27-1012 of this title on twenty thousand or more beverage containers in one or more separate transactions within one year shall be guilty of a class E felony.

Nothing in this subdivision shall apply to common or contract carriers or warehousemen while engaged in lawfully transporting or storing such containers as merchandise, nor to any employee of such carrier or warehouseman acting within the scope of his or her employment.

7. A violation of this title, except as otherwise provided in this section and section 27-1012 of this title, shall be a public nuisance.

§ 27-1016. Public education.

The commissioner shall establish a public education program to disseminate information regarding implementation of this title. Such information shall include, but not be limited to, publication of the New York Bottle Bill of Rights as specified in subdivision two of section 27-1007 of this title; publication of information specifying the procedures necessary to establish a redemption center as provided in section 27-1013 of this title, including information regarding financial assistance available for the establishment of redemption centers as provided in section 27-1018 of this title; publication of information delineating the relevant rights and responsibilities of deposit initiators, distributors, dealers, redemption centers and redeemers under the provisions of this title; publication of information regarding the requirement that deposit initiators register with the department of taxation and finance; and publication of information on the general benefits of recycling.

§ 27-1018. Beverage container assistance program.

Notwithstanding any other provision of law to the contrary, within the limits of appropriations therefor, the commissioner shall make state assistance payments to municipalities, businesses and not-for-profit organizations located in the state for the cost of reverse vending machines located or to be located in the state. Such state assistance payments shall not exceed fifty percent of the costs of equipment, and/or the acquisition and/or rehabilitation of real property or structures located or to be located in the state related to the collecting, sorting, and packaging of empty beverage containers subject to the provisions of this title. Such payments may include costs related to the establishment of redemption centers, including mobile redemption centers. For the purposes of this section, municipalities and not-for-profit organizations shall have the meaning as defined in section 54-0101 of this chapter and businesses shall mean a dealer, distributor or redemption center as defined in this title that employs less than fifty employees.

§ 27-1019. Severability.

The provisions of this title shall be severable and if any phrase, clause, sentence or provision of this title, or the applicability thereof to any person or circumstance shall be held invalid, the remainder of this title and the application thereof shall not be affected thereby.

TITLE 11

INDUSTRIAL SITING HAZARDOUS WASTE FACILITIES

Section 27-1101. Definitions.

- 27-1102. Hazardous waste disposal capacity assurances and statewide hazardous waste facility siting plan.
- 27-1103. Criteria for siting industrial hazardous waste treatment, storage and disposal facilities.
- 27-1105. Siting industrial hazardous waste facilities.
- 27-1107. Powers of municipalities.
- 27-1109. State siting requirements.
- 27-1111. Public participation and education.
- 27-1113. Community advisory committees.
- 27-1115. Aid to local governments.

§ 27-1101. Definitions.

As used in this title, unless the context otherwise requires:

1. "Person" means any individual, public or private corporation, political subdivision, government agency, industry, partnership, association, firm, trust, estate or any other legal entity whatsoever.
2. "Corporation" means the New York state environmental facilities corporation.
3. "Board" means a facility siting board constituted pursuant to the provisions of section 27-1105 of this title.

4. "Industrial hazardous waste" shall mean an industrial waste or combination of wastes, which because of its quantity, concentration, or physical, chemical or infectious characteristics may:

a. Cause, or significantly contribute to an increase in serious irreversible, or incapacitating reversible illness; and/or

b. Pose a substantial present or potential hazard to human health or the environment and, therefore, must be segregated and excluded from the general municipal waste system and sewage collection and treatment process.

5. "Industrial hazardous waste treatment, storage and disposal facility" shall mean a specialized facility or site other than a low-level radioactive waste management facility subject to the provisions of article twenty-nine of this chapter, or a sewage treatment facility for the purpose of treating, storing, compacting, recycling, exchanging, or disposing of industrial hazardous waste materials, including treatment, compacting, resource recovery or disposal plants, equipment and furnishings thereof used for the storage, treatment, compacting, composting, shredding, coverting, utilization, processing, or final disposal of hazardous waste, including but not limited to mechanical, chemical or thermal processing systems, incinerators, sanitary landfills, other facilities for the storage, reduction or conversion of hazardous waste, including but not limited to transfer stations, baling facilities, railroad and maritime facilities, motor trucks or vehicles and appurtenances, furnishings, equipment and machinery deemed necessary thereto.

6. "Municipality" means any town, city, county or village.

7. "Treatment" means any method, technique, or process including neutralization, designed to change the physical, chemical or biological character or composition of any hazardous waste so as to neutralize such waste or as to render such waste nonhazardous, safer for transport, amenable for recovery, amenable for storage, or reduced in volume.

8. "Storage" means the containment of hazardous waste, either on a temporary basis or for a period of years, in such a manner as not to constitute disposal of such hazardous waste.

9. "Disposal" means the abandonment, discharge, deposit, injection, dumping, spilling, leaking or placing of any substance so that such substance or any related constituent thereof may enter the environment. Disposal also means the thermal destruction of waste or hazardous waste and the burning of such wastes as fuel for the purpose of recovering useable energy.

10. "Environment" means any water, water vapor, any land including land surface or subsurface, air, fish, wildlife, biota and all other natural resources.

11. "Preferred hazardous waste management practices hierarchy" shall mean that policy established in section 27-0105 of this article.

§ 27-1102. Hazardous waste disposal capacity assurances and statewide hazardous waste facility siting plan.

1. The department shall immediately begin preparation of a statewide hazardous waste facility siting plan to establish a framework to guide state agencies and authorities and the facility siting board established pursuant to section 27-1105 of this title in the discharge of their responsibilities and to assure the availability of industrial hazardous waste treatment, storage and disposal facilities which:

a. have adequate capacity for the destruction, treatment or secure disposition of all hazardous wastes that are reasonably expected to be generated within the state in the next twenty years;

b. are within the state or outside the state in accordance with an interstate agreement or regional agreement or authority;

c. comply with all federal and state requirements governing such facilities; and

d. comply with the preferred hazardous waste management practices hierarchy established pursuant to section 27-0105 of this article.

2. The plan shall include but not be limited to:

a. an inventory and appraisal including the identification, location and life expectancy of all industrial hazardous waste treatment, storage and disposal facilities located within the state.

b. a compilation and analysis of existing inventories, reports and studies of the sources, composition and quantity of industrial hazardous waste generated within the state and of existing programs for waste reduction, recycling and reuse.

c. long-range projections of at least twenty years of the amounts and composition of hazardous waste which will be generated within the state and, to the extent feasible, in neighboring states.

d. a schedule for phasing out land disposal, other than treated residuals in compliance with the policy established in section 27-0105 of this article.

e. the identification, if appropriate, of areas of the state which have compatible hazardous waste generation streams and similar interests in providing regional hazardous waste management and disposal capacity to primarily service such areas.

f. a determination of the number, size, type and location by area of the state of new or expanded industrial hazardous waste treatment, storage and disposal facilities which will be needed for the proper long-term management of hazardous waste consistent with the assurances required pursuant to subdivision one of this section and an equitable geographic distribution of facilities.

g. an analysis of transportation routes and transportation risk and costs from industrial hazardous waste generators to existing or potentially suitable sites for industrial hazardous waste treatment, storage and disposal facilities.

h. recommendations on regional and statewide coordination of methods and procedures to encourage cooperative treatment, storage, disposal and transportation of industrial hazardous waste and other such hazardous waste management methods.

i. recommendations on procedures for periodically updating the statewide hazardous waste facility siting plan and for future coordination of hazardous waste management and planning on a regional basis.

3. The department shall prepare and adopt a draft statewide hazardous waste facility siting plan within six months after the effective date of this section.

4. Upon completion of the draft plan, the department shall make it available to all interested persons. The department shall publicize such plan and solicit comments. The department shall hold at least one public hearing within each region of the state to review and solicit comments on the draft plan.

5. Within twelve months after the effective date of this section, the department shall have completed public hearings on the draft plan and shall have considered comments and shall make such revisions to the draft plan as it deems necessary or appropriate. The department shall make the revised plan available to all interested persons and shall solicit comments and hold public hearings on the revised plan.

6. Within fifteen months after the effective date of this section, the department shall make any final revisions as it deems necessary or appropriate and adopt the plan. The adopted plan shall be transmitted to the governor and the legislature and made available to all interested parties.

7. Upon adoption of the plan the department shall immediately establish a schedule for siting any new or expanded industrial hazardous waste treatment, storage or disposal facilities identified as necessary in such plan.

§ 27-1103. Criteria for siting industrial hazardous waste treatment, storage and disposal facilities.

1. The commissioner shall, after investigation and opportunity for public comment, within one year from the effective date of this section, publish criteria for siting industrial hazardous waste treatment, storage and disposal facilities. Such siting criteria shall be designed to insure the maximum safety of the public from hazards associated with treatment, storage, and disposal of hazardous wastes. The commissioner shall also within one year from such effective date adopt criteria prescribing the form and content of applications for a certificate of environmental safety and public necessity to construct an industrial hazardous waste treatment, storage and disposal facility.

2. The criteria issued pursuant to subdivision one of this section for the siting of industrial hazardous waste treatment, storage and disposal facilities shall take into account, among other factors:

a. The consistency of the application with the plan adopted pursuant to section 27-1102 of this title,

b. The density of population in areas neighboring such facility,

c. The density of population in areas adjacent to delivery routes to such facility,

d. The risk of accident during the transportation of hazardous wastes,

e. The risk of contamination of ground and surface waters by leaching and runoff from such facility,

f. The risk of fires or explosions from improper storage and disposal methods,

g. The impact on the municipality where the facility is to be cited in terms of health, safety, cost and consistency with local planning, zoning or land use laws and ordinances,

h. The nature of the probable environmental impact, including specification of the predictable adverse effects on the natural environment and ecology, public health and safety, scenic, historic, cultural and recreational value, water and air quality, wildlife and an evaluation of measures to mitigate adverse effects, and

i. The future physical climate risk due to sea level rise, and/or storm surges and/or flooding, based on available data predicting the likelihood of future extreme weather events, including hazard risk analysis data if applicable.

3. The criteria issued by the commissioner pursuant to subdivision one of this section prescribing the form of an application for a certificate of environmental safety and public necessity to construct an industrial hazardous waste treatment, storage and disposal facility shall require the applicant to supply detailed information regarding:

a. The location of the proposed facility,

b. A description of the design and capacity of the facility,

c. The expected sources of hazardous wastes for the facility, the proposed methods of transporting such wastes to and from the facility, and the routes which deliveries will traverse,

d. The need for the facility,

e. The environmental impacts of the proposed facility,

f. A description of reasonable alternative locations for the proposed facility, and

g. Such other information as the commissioner shall prescribe as to whether the proposed facility is necessary and compatible with the surrounding environment and with the health, safety and welfare of neighboring populations.

§ 27-1105. Siting industrial hazardous waste facilities.

1. After the publication of siting criteria pursuant to subdivision one of section 27-1103 of this title, no person may commence construction or operation of the following industrial hazardous waste treatment, storage and disposal facilities, hereinafter referred to as "facility", without having received a certificate of environmental safety and public necessity from the facility siting board as hereinafter provided: (a) any new off-site facility;

(b) any new commercial facility, wherever situated;

(c) any new incineration facility, wherever situated;

(d) any new land disposal facility, wherever situated; and

(e) any expansion, wherever situated, of the aggregate land disposal capacity of an existing land disposal facility.

2. Notwithstanding the provisions of subdivision one of this section, the following industrial hazardous waste treatment, storage and disposal facilities shall not be subject to the provisions of this title:

(a) A facility that does not require permits pursuant to title nine of this article;

(b) A land disposal facility located at the site of an existing land disposal facility where both the existing facility is or was and the proposed facility will be used solely for the disposal of non-incinerable residues from the on-site thermal destruction or chemical or aqueous treatment of wastes generated at the site of such facilities;

(c) A facility that has been determined by the department to have no significant environmental impact pursuant to article eight of this

chapter; and

(d) Additional facilities, other than land disposal facilities, to be located at the site of an existing facility, the operation of which will be substantially similar to that of the existing facility with respect to the mode of waste management and the type and quantity of hazardous waste being managed.

3. To obtain the certificate of environmental safety and public necessity required pursuant to subdivision one of this section, the following procedures shall be followed:

(a) An application must be submitted to the department in the form required pursuant to subdivisions one and three of section 27-1103 of this title.

(b) On or before fifteen calendar days after the receipt of such application, the department shall mail written notice to the applicant whether or not the application is complete. If the application is not complete, the provisions of paragraphs (c) and (d) of subdivision one of section 70-0109 of this chapter shall be applicable. If, or when, the application is complete, the department shall, concurrent with notification to the applicant, send the application and written notice to the office of the governor requesting that a facility siting board be constituted consistent with this subdivision.

(c) Immediately upon determining that an application is complete, the department shall cause a notice of application to be published in the next available environmental notice bulletin which shall be not later than ten calendar days after the date of such notice and shall provide notice to the chief executive officer of each municipality in which the proposed project is located, and may direct the applicant to provide such reasonable notice and opportunity for comment to the public as the department deems appropriate. Such notice shall also be given to all property owners of record within three hundred feet of the subject facility. In addition, notice shall be published in at least two newspapers having a general circulation in the area in which the proposed activity is located, and in contiguous areas potentially affected by the proposed action.

(d) On or before fifteen calendar days after the receipt of such notification the governor shall constitute a facility siting board to be

composed of the commissioners of transportation, environmental conservation, health and commerce, the secretary of state and three ad hoc members appointed by the governor, two of whom must be residents of the county in which the facility is primarily proposed to be located. The three ad hoc members shall be employees of the state for the purposes of section seventeen of the public officers law. Each of the three ad hoc members shall receive the sum of two hundred dollars for each day in which he is actually engaged in the performance of his duties herein plus actual and necessary expenses incurred by him in the performance of such duties. The terms of the ad hoc members shall continue until a final determination has been made in the particular proceeding for which they were appointed. Each ex officio member of the board may by written instrument filed with the board designate an employee or officer of his department to act on his behalf relating to any or all business of the board. Five of the eight persons on the board shall constitute a quorum for the transaction of any business of the board, and the decision of five members of the board shall constitute action of the board. In addition to the requirements of the public officers law, no person shall be eligible to be an appointee of the governor to the board who holds another state or local office. The governor shall appoint the chairman of the board and the commissioner of environmental conservation shall make staff available to support the board in carrying out its responsibilities.

(e) The commissioner of the department of environmental conservation shall appoint a hearing officer who shall conduct an adjudicatory public hearing upon the application. Such hearing shall commence on or before sixty calendar days after the facility siting board is constituted. Such hearing shall be preceded by public notice, in the same form and manner as provided in paragraph (c) of this subdivision, published not less than thirty days prior to such hearing. The members of the board may at their option participate in the adjudicatory hearing. Such participation may include, but is not limited to, examination of witnesses and requesting the production of documents or witnesses.

(f) The board shall render a decision based upon the record either granting the application, denying it, or granting it upon such terms, conditions, limitations, or modifications thereof as the board may deem appropriate. The board shall deny an application to construct or operate

a facility if residential areas and contiguous populations will be endangered, if it otherwise does not conform to the siting criteria established for such facility pursuant to section 27-1103 of this title or, upon final adoption of the statewide hazardous waste facility siting plan established pursuant to section 27-1102 of this title, if it is not consistent with such plan or if the need for such facility is not identified in such plan and the board finds that the facility is not otherwise necessary or in the public interest.

(g) The board shall make the final decision on an application for a certificate of environmental safety pursuant to this title, upon the record made before the hearing officer, after receiving briefs from the parties to the hearing and exceptions to the recommended decision of such hearing officer and after hearing such oral argument as the board shall determine to be necessary. The chairman of the facility siting board shall mail its decision to the applicant, to the department, and to all parties to the hearing on or before sixty calendar days after receipt by the board of a complete record, as that term is defined in paragraphs (a) through (e) of subdivision one of section 302 of the state administrative procedure act.

(h) The provisions of article 70 of this chapter shall apply to applications pursuant to this title, to the extent such provisions are not inconsistent herewith.

§ 27-1107. Powers of municipalities.

Notwithstanding any other provision of law, no municipality may, except as expressly authorized by this article or the board, require any approval, consent, permit, certificate or other condition including conformity with local zoning or land use laws and ordinances, regarding the operation of a facility with respect to which a certificate hereunder has been granted; provided, however, that such municipality has received notice of the filing of the application therefor.

§ 27-1109. State siting requirements.

1. Within one year from the adoption of the plan required to be prepared pursuant to section 27-1102 of this title, and annually thereafter, the department shall review the implementation of the plan including the status of all existing facilities and all permit applications for new or expanded industrial hazardous waste treatment, storage, or disposal facilities.

2. If, upon completion of its annual review, the department finds that existing facilities alone or in combination with one or more pending or approved facility permit applications are sufficient to meet the schedule identified pursuant to subdivision eight of section 27-1102 of this title the department shall so notify the legislature and the governor, in writing, identifying such existing facilities and new facility applications pending or approved, and stating that no further action is necessary on the part of the state.

3. If, upon completion of its annual review, the department finds that existing facilities alone or in combination with one or more pending or approved new facility permit applications are not sufficient to meet the schedule identified pursuant to subdivision eight of section 27-1102 of this title, the department shall so notify the legislature and the governor in writing identifying in such notice the specific facilities needed to meet such schedule.

4. Upon such finding the department shall, consistent with its responsibilities under this title, immediately undertake measures and actions to assist any interested potential industrial hazardous waste treatment, storage and disposal facility owners and operators in finding an appropriate site or sites, and shall hold public hearings or briefings designed to encourage and facilitate discussion and negotiations among such potential owners and operators and any potential host community for any such facilities.

5. Within six months of a finding pursuant to subdivision three of this section, the department shall report in writing to the governor and legislature detailing the measures and actions taken pursuant to subdivision four of this section and whether or not such actions have

resulted in the filing of facility permit applications sufficient to meet the schedule identified pursuant to subdivision eight of section 27-1102 of this title. If such actions and measures have failed to result in filings sufficient to meet such schedule, the department shall include in its report the reasons for such failure and its recommendations on the actions necessary to meet such schedule including a determination as to the necessity for the state through the environmental facilities corporation under its existing powers or some other mechanism to initiate the siting and construction of those facilities necessary to meet such schedule.

6. Notwithstanding any other provision of this title, no new or pending application for a disposal facility subject to section 27-1105 of this title shall be deemed complete until the department has determined such application is consistent with the facility siting plan adopted pursuant to section 27-1102 of this title.

§ 27-1111. Public participation and education.

The department shall establish a public information program which addresses:

1. The nature and dimension of the industrial hazardous waste treatment, storage and disposal facility siting problem.

2. The need for the establishment of a statewide hazardous waste facility siting plan including the need to site any additional industrial hazardous waste treatment, storage and disposal facilities and the role of waste reduction, recycling and reuse in the planning process.

3. The necessity and opportunities for public participation in the siting and planning process.

§ 27-1113. Community advisory committees.

1. In addition to any authority conferred by any other provision of law, a county within which an industrial hazardous waste treatment, storage and disposal facility subject to this title is to be situated, shall constitute a committee for the purpose of entering into a dialogue with the applicant to develop mutually acceptable solutions to problems which may be created by the siting of the facility in the community.

2. The committee shall have no fewer than nine and no more than fifteen members. No more than one-third of the members shall be designated by the chief executive officer, or if none, the chairman of the county legislative body, of the affected county. No less than two-thirds of the members shall be designated by the chief executive officer of the affected city, town or village as the case may be, provided however, if the proposed facility is located in more than one city, town or village, the chief executive officer of such cities, towns, or villages shall have the authority to appoint an equal number of members to the local advisory committee, the total of which shall not be less than two-thirds of such committee.

3. The members of the committee shall be deemed employees of the public entity by which they were respectively designated for purposes of section eighteen of the public officers law.

4. Within fifteen days after receipt of notification of the constitution of a community advisory committee, the chairman of the board or his designee shall convene and preside over a conference between the applicant and such committee. The chairman of the facility siting board or his designee shall endeavor to foster a dialogue between the applicant and the committee, and to that end, shall convene and preside over such additional conferences as may be necessary.

§ 27-1115. Aid to local governments.

No later than the first day of April, nineteen hundred eighty-eight, the department shall submit to the legislature and the governor a report

recommending appropriate forms of state aid or assistance to local governmental units within the boundaries of which any industrial hazardous waste treatment, storage and disposal facilities subject to this title may be located. Such report shall be developed by the department and shall:

1. describe the nature of the probable impacts upon local governmental units of such facilities;

2. describe the possible forms or kinds of state or other aid or assistance which might be appropriate to mitigate or provide off-setting benefits with respect to each of the kinds of probable impacts on local governmental units identified pursuant to this section; and

3. set forth the department's specific recommendations to the legislature and the governor for the forms of kinds of state or other aid or assistance to local governmental units to mitigate or provide off-setting benefits with respect to such impacts, together with the reasons for the department's specific recommendations.

TITLE 12

MITIGATION AND REMEDIATION OF CERTAIN SOLID WASTE SITES AND DRINKING WATER CONTAMINATION

Section 27-1201. Definitions.

27-1203. Mitigation and remediation of solid waste sites.

27-1205. Mitigation of contaminants in drinking water.

27-1207. Use and reporting of the solid waste mitigation account
and the drinking water response account.

27-1209. Rules and regulations.

27-1211. Protection against liability and liability exemptions
and defenses.

§ 27-1201. Definitions.

When used in this title:

1. "Contaminant" means emerging contaminants pursuant to section eleven hundred twelve of the public health law, and, for solid waste sites, shall include parameters identified in regulations required to be tested by landfills to ensure the protection of groundwater quality.

2. "Contamination" or "contaminated" means the presence of a contaminant in any environmental media, including soil, surface water, or groundwater, sufficient to cause or substantially contribute to an exceedance of standards, criteria, and guidance values established by the department or drinking water standards, including maximum contaminant levels, notification levels, maximum residual disinfectant levels or action levels established by the department of health.

3. "Drinking water contamination site" means any area or site that is causing or substantially contributing to the contamination of one or more public drinking water supplies.

4. "Mitigation" means the investigation, sampling, management, or treatment of a solid waste site or drinking water contamination site required to ensure the availability of safe drinking water, including public water systems and individual onsite water supply systems necessary to meet standards, criteria, and guidance values established by the department or drinking water standards, including maximum contaminant levels, notification levels, maximum residual disinfectant levels, or action levels established by the department of health that can be successfully carried out with available, implementable and cost-effective technology. "Mitigation" activities include but are not limited to the installation of drinking water treatment systems, the provision of alternative water supplies, or repair of a landfill cap. "Mitigation" does not mean remediation.

5. "Solid waste site" means a site where (a) the department has a reasonable basis to suspect that the illegal disposal of solid waste occurred or, (b) a court of competent jurisdiction has determined that an illegal disposal of solid waste occurred, or (c) the department knows or has a reasonable basis to suspect that an inactive solid waste

management facility which does not have a current monitoring program is impacting or contaminating one or more drinking water supplies. Solid waste site shall not include a site which is currently subject to investigation or remediation pursuant to title thirteen or fourteen of this article or any site which completed such programs and was either delisted by or received a certificate of completion from the department.

6. "Solid waste management facility" means any facility employed for solid waste collection, processing and disposal including processing systems, including resource recovery facilities or other facilities for reducing solid waste volume, sanitary landfills, regulated facilities for the disposal of construction and demolition debris, regulated plants and facilities for compacting, composting or pyrolyzation of solid wastes, regulated mulch facilities, landspreading and soil amending operations, and incinerators.

§ 27-1203. Mitigation and remediation of solid waste sites.

1. The solid waste site priority in this state is to mitigate and remediate any solid waste site causing or substantially contributing to impairments of drinking water quality which may impact public health.

2. The department shall, in conjunction with the department of health, develop a system to select and prioritize sites for mitigation and remediation, considering the effects on the health of the state.

3. Beginning July first, two thousand nineteen and annually thereafter, the department shall prepare and submit to the governor and the legislature a comprehensive plan designed to mitigate and remediate solid waste sites. This plan shall establish a solid waste site mitigation and remediation priority list.

4. The department is authorized to conduct preliminary investigations to determine if a solid waste site is causing or substantially contributing to imminent or documented drinking water source contamination. The department, and any employee, agent, consultant or

other person acting at the direction of the department, shall have the authority to enter all solid waste sites for the purpose of preliminary investigation, mitigation and remediation, provided that the department has made a reasonable effort to identify the owner of such property to notify such owner of the intent to enter the property at least ten days in advance. In the event the commissioner of health makes a written determination that such ten day notice will not be sufficient to protect public health, two days' written notice shall be sufficient. Any inspection of the property and each taking of samples shall take place at reasonable times and shall be commenced and completed with reasonable promptness. Such preliminary investigation shall include:

a. conducting or causing to be conducted field investigations of high priority sites identified in the plan established pursuant to subdivision three of this section for the purpose of further defining necessary mitigation and remediation, if any. To the maximum extent practicable, the department shall utilize existing information including, but not limited to, subsurface borings and any analyses or tests of samples taken from such sites by owners or operators, other responsible persons and any federal or non-federal agencies;

b. making any subsurface borings and any analyses or tests of samples taken as may be necessary or desirable to effectuate the field investigations of sites as required under this section subject to the requirements of this title. If the owner of a solid waste site can be identified, the department shall provide such owner with a minimum of ten days' written notice of the intent to take such borings or samples in accordance with the provisions of subdivision twelve of section 27-1205 of this title. If any analysis is made of such samples, a copy of the results of such analysis shall be furnished promptly to the owner or operator. Upon the completion of all sampling activities, the department or authorized person shall remove, or cause to be removed, all equipment and well machinery and return the ground surface of the property to its condition prior to such sampling, unless the department or authorized person, and the owner of the property shall otherwise agree;

c. making any record searches or document reviews as may be necessary or desirable to effectuate the purposes of this section subject to the requirements of this title.

5. If the department or the department of health, as appropriate, determines that a solid waste site poses a significant threat to the public health or environment due to hazardous waste, the department shall refer the site to the inactive hazardous waste disposal site remedial program pursuant to title thirteen of this article.

6. Where the department has determined through a preliminary investigation conducted pursuant to subdivision four of this section that a solid waste site is causing or substantially contributing to contamination of a public drinking water supply, the owner or operator of a solid waste site shall, at the department's written request, cooperate with any and all remedial measures deemed necessary and which shall be undertaken by the department, in conjunction with the department of health, for the mitigation and remediation of a solid waste site or area which is necessary to ensure that drinking water meets applicable standards, including maximum contaminant levels, notification levels, maximum residual disinfectant levels, or action levels established by the department of health. The department may implement necessary measures to mitigate and remediate the solid waste site within amounts appropriated for such purposes from the solid waste mitigation program.

§ 27-1205. Mitigation of contaminants in drinking water.

1. Whenever the commissioner of health has required a public water system to take action to reduce exposure to an emerging contaminant or emerging contaminants and has determined that the concentration of the emerging contaminant constitutes an actual or potential threat to public health based on the best available scientific information pursuant to section eleven hundred twelve of the public health law, the department in conjunction with the department of health, may, pursuant to the Clean Water Infrastructure Act of 2017 and within the up to one hundred thirty

million dollars appropriated for such purposes, undertake all reasonable and necessary additional mitigation measures in any area of the state in which contamination is known to be present. The department shall employ feasible measures that can be successfully carried out with available, implementable and cost effective technology. Such area shall include, at a minimum, all properties served by the public water system, any individual onsite water supply systems impacted by the contamination, and any land and any surface or underground water sources impacted by the contamination. Such approved measures shall be protective of public health and may include but not be limited to the installation of treatment systems or the provision of alternative water supply sources to ensure that drinking water meets applicable standards, including maximum contaminant levels, notification levels, maximum residual disinfectant levels, or action levels established by the department of health.

2. If the department or the department of health, as applicable, determines that a drinking water contamination site poses a significant threat to the public health or environment from a hazardous waste, the department shall refer the site to the inactive hazardous waste disposal site remedial program pursuant to title thirteen of this article.

3. Whenever the commissioner of health has required a public water system to take action to reduce exposure to emerging contaminants and has determined that the concentration of the emerging contaminant constitutes an actual or potential threat to public health based on the best available scientific information pursuant to section eleven hundred twelve of the public health law:

a. the department shall have the authority to undertake directly in conjunction with the department of health, the development and implementation of all necessary and reasonable mitigation and remediation measures of drinking water contamination, as approved by the department of health, to address emerging contaminants in public water supplies;

b. the commissioner may order, after notice and opportunity for a

hearing, the owner and/or operator of the drinking water contamination site and/or any person responsible for such contamination to undertake all reasonable and necessary mitigation and remediation, as approved by the department of health, to ensure that drinking water meets applicable standards, including maximum contaminant levels, notification levels, maximum residual disinfectant levels, or action levels established by the department of health, and employ feasible measures that can be successfully carried out with available, implementable and cost effective technology, subject to the approval of the department and the department of health, at such site, and to implement such program within reasonable time limits specified in the order. Provided, however, that in the event the commissioner of health shall issue an order pursuant to subdivision three of section one thousand three hundred eighty-nine-b of the public health law, such order of the commissioner of health shall supersede any order issued hereunder.

4. The department shall have the authority a. to delegate responsibility for a specific drinking water contamination site to the municipality in which such site is located and b. to contract with any other person to perform necessary work in connection with such sites.

5. Section eight of the court of claims act or any other provision of law to the contrary notwithstanding, the state shall be immune from liability and action with respect to any act or omission done in the discharge of the department's aforesaid responsibility pursuant to this title; provided, however, that this subdivision shall not limit the liability which may otherwise exist for unlawful, willful, or malicious acts or omissions on the part of the state, state agencies, or their officers, employees or agents; or for the ownership or responsibility for the disposal of such contaminant, including liability for the cost of remediation, pursuant to this section.

6. Whenever the commissioner of health, after investigation, finds:

a. that a public drinking water contamination site represents an actual or potential threat to the public health; and

b. the threat makes it prejudicial to the public interest to delay action until a hearing can be held pursuant to this title, the department may, pursuant to paragraph a of subdivision three of this section and within the funds available to the department from the drinking water response program, develop and implement, in conjunction with the department of health, all reasonable and necessary mitigation and remedial measures to address drinking water contamination for such site to ensure that drinking water meets applicable standards, including maximum contaminant levels, notification levels, maximum residual disinfectant levels or action levels established by the department of health. Findings required pursuant to this subdivision shall be in writing and may be made by the commissioner of health on an ex parte basis subject to judicial review.

7. Any order issued pursuant to paragraph b of subdivision three of this section shall be issued only after notice and the opportunity for a hearing is provided to persons who may be the subject of such order. The commissioner or the commissioner of health shall determine which persons are responsible pursuant to said subdivision according to applicable principles of statutory or common law liability. Such persons shall be entitled to raise any defense set forth in section 27-1211 of this title or common law defense at any such hearing and such defenses shall have the same force and effect at such hearings as they would have in a court of law. In the event a hearing is held, no order shall be issued by the commissioner under subdivision three of this section until a final decision has been rendered. Any such order shall be reviewable pursuant to article seventy-eight of the civil practice law and rules within thirty days after service of such order. The commissioner or the commissioner of health may request the participation of the attorney general in such hearings.

8. The commissioner shall make all reasonable efforts, in accordance with the requirements of subdivision six of section ninety-seven-b of the state finance law, to recover all mitigation costs incurred pursuant to subdivisions one and three of this section from the owner and/or operator of the drinking water contamination site.

9. When a municipality develops and implements remediation to address a drinking water contamination site, determined pursuant to subdivision four of this section, and the plan is approved by the department, in conjunction with the department of health, which is owned or has been operated by such municipality or when the department, in conjunction with the department of health, pursuant to an agreement with a municipality, develops and implements such remediation, the commissioner shall, in the name of the state, agree in such agreement to provide from the drinking water response program, within the limitations of appropriations therefor, seventy-five percent of the eligible design and construction costs of such program for which such municipality is liable solely because of its ownership and/or operation of such site and which are not recovered from or reimbursed or paid by a responsible party or the federal government.

10. Nothing contained within this section shall be construed as impairing or in any manner affecting the right or jurisdiction of the attorney general to seek appropriate relief pursuant to his or her statutory or common law authority.

11. Moneys for actions taken or to be taken by the department, the department of health or any other state agency pursuant to this title shall be payable directly to such agencies from the drinking water response program pursuant to section ninety-seven-b of the state finance law.

12. a. Every person shall, upon the written request of the commissioner or a designee, permit a duly designated officer or employee of the department at all reasonable times to have access to and to copy all books, papers, documents and records pertinent to an ongoing investigation of drinking water contamination identified in section 27-1203 of this title.

b. The commissioner may sign and issue subpoenas in the name of the department requiring the production of books, papers, documents and other records and may take testimony by depositions under oath of any person relating to the ongoing investigation of a drinking water

contamination identified in this title. Such subpoenas and depositions shall be regulated by the state of New York's civil practice law and rules. The commissioner may invoke the powers of the supreme court of the state of New York to compel compliance with any such subpoena or any request to take such depositions.

c. When the department has substantial evidence that such drinking water contamination site is causing or substantially contributing to the contamination of drinking water, and subject to the applicable notice provisions set forth in paragraph d of this subdivision, any duly designated officer or employee of the department, or of any state agency, and any agent, consultant, contractor, or other person, including an employee, agent, consultant, or contractor of a responsible person acting at the direction of the department, so authorized in writing by the commissioner, may enter any drinking water contamination site and areas near such site and inspect and take samples of wastes, soil, air, surface water, and groundwater. In order to take such samples, the department or authorized person may utilize or cause to be utilized such sampling methods as it determines to be necessary including, but not limited to, soil borings and monitoring wells.

d. The department or authorized person shall not take any samples involving the substantial disturbance of the ground surface of any property unless it has made a reasonable effort to identify the owner of the property and to notify such owner of the intent to take such samples. If the owner can be identified, the department shall provide such owner with a minimum of ten days' written notice of the intent, unless such owners and occupants consent to an earlier date, to take such samples, unless the commissioner makes a written determination that such ten day notice will not allow the department to protect the environment or public health, in which case two days' written notice shall be sufficient. Any inspection of the property and each such taking of samples shall take place at reasonable times and shall be commenced and completed with reasonable promptness. If any officer, employee, agent, consultant, contractor, or other person so authorized in writing by the commissioner obtains any samples prior to leaving the premises, he or she shall give to the owner or operator a receipt describing the

sample obtained and, if requested, a portion of such sample equal in volume or weight to the portion retained. If any analysis is made of such samples, a copy of the results of such analysis shall be furnished promptly to the owner or operator. Upon the completion of all sampling activities, the department or authorized person shall remove, or cause to be removed, all equipment and well machinery and return the ground surface of the property to its condition prior to such sampling, unless the department or authorized person, and the owner of the property shall otherwise agree.

e. The expense of any such mitigation by the department or the department of health shall be paid by the drinking water response program, but may be recovered from any responsible person in any action or proceeding brought pursuant to the state finance law, this title, other state or federal statute, or common law if the person so authorized in writing is an employee, agent, consultant, or contractor of a responsible person acting at the direction of the department, then the expense of any such sampling and analysis shall be paid by the responsible person.

f. Any duly designated officer or employee of the department or any other state agency, and any agent, consultant, contractor, or other person acting at the direction of the department, authorized in writing by the commissioner, may enter any drinking water contamination site and areas near such site to undertake all reasonable and necessary mitigation and remediation for such site, provided: (a) the commissioner has sent a written notice to the owners of record or any known occupants of such site or nearby areas of the intended entry and work at least ten days prior to such initial entry unless such owners and occupants consent to an earlier date; and (b) the department has substantial evidence that such drinking water contamination site is causing or substantially contributing to the contamination of drinking water. In the event the commissioner of health makes a written determination that such ten day notice will not be sufficient to protect public health, two days' written notice shall be sufficient.

§ 27-1207. Use and reporting of the solid waste mitigation program and the drinking water response program.

1. Pursuant to the clean water infrastructure act of two thousand seventeen and within the up to one hundred thirty million dollars appropriated for such purposes, mitigation and remediation efforts to address public drinking water contamination from emerging contaminants and solid waste sites causing or substantially contributing to drinking water impairment that impacts public health may be conducted in accordance with this title.

2. The solid waste mitigation program shall receive no more than fifty million dollars from the clean water infrastructure act of 2017 and be made available to the department and the department of health, as applicable, for the following purposes:

- a. enumeration and assessment of solid waste sites;
- b. investigation and environmental characterization of solid waste sites, including environmental sampling;
- c. mitigation and remediation of solid waste sites;
- d. monitoring of solid waste sites; and
- e. administration and enforcement of the requirements of section 27-1203 of this title.

3. The drinking water response program shall receive no more than twenty million dollars annually from the clean water infrastructure act of 2017 and be made available to the department and the department of health, as applicable, for the following purposes:

- a. mitigation of drinking water contamination;
- b. investigation of drinking water contamination;

c. remediation of drinking water contamination; and

d. administration and enforcement of the requirements of this title except the provisions of section 27-1203.

4. On or before July first, two thousand nineteen and July first of each succeeding year, the department shall report on the status of the programs. Such status report shall reflect information available to the department as of March thirty-first of each year, and shall include information regarding the number of sites referred to the inactive hazardous waste disposal site remedial program based on information obtained pursuant to this title and an accounting of all monies expended or encumbered from the clean water infrastructure act of two thousand seventeen during the preceding fiscal year, such accounting to separately list:

a. monies expended or encumbered for the purpose of conducting site investigations;

b. monies expended or encumbered for the purpose of conducting remedial investigations and feasibility studies;

c. monies expended for mitigation and remediation measures; and

d. an accounting of payments received and payments obligated to be received pursuant to this title, and a report of the department's attempts to secure such obligations.

5. all moneys recovered pursuant to title twelve of article twenty-seven of this chapter shall be deposited into the capital projects fund (30000), provided that such moneys recovered shall be used for the same purposes as are authorized by this title.

§ 27-1209. Rules and regulations.

The department shall promulgate rules and regulations necessary and

appropriate to carry out the purposes of this title and shall at a minimum include such provisions for requisite due process and meaningful public participation as are appropriate to any action undertaken pursuant to this title, taking into consideration the nature and degree of any public health impacts and the urgency of any need for investigation or remediation of contamination.

§ 27-1211. Protection against liability and liability exemptions and defenses.

In addition to common law defenses, the provisions of sections 27-1321 and 27-1323 of this article shall apply to a solid waste site that is causing or substantially contributing to contamination of public drinking water supplies or a drinking water contamination site pursuant to this title and shall apply to emerging contaminants in the same way applicable to hazardous materials and hazardous wastes.

TITLE 13

INACTIVE HAZARDOUS WASTE DISPOSAL SITES

Section 27-1301. Definitions.

27-1303. Identification of sites.

27-1305. Reports by the department; registry of sites.

27-1307. Reports to the department.

27-1309. Access to records and sites.

27-1311. Confidentiality.

27-1313. Remedial programs.

27-1315. Rules and regulations.

27-1316. Citizen technical assistance grants.

27-1317. New use of sites.

27-1318. Institutional and engineering controls.

27-1319. State superfund management board.

27-1321. Protection against liability.

27-1323. Liability exemptions and defenses.

27-1325. Financial responsibility provisions.

27-1327. Recovery of response costs and natural resource

damages.

27-1329. Abatement actions.

27-1331. Community participation.

§ 27-1301. Definitions.

When used in this title:

1. "Hazardous waste" means a waste which appears on the list or satisfies the characteristics promulgated by the commissioner pursuant to section 27-0903 of this article and any substance which appears on the list promulgated pursuant to section 37-0103 of this chapter; provided, however, that the term "hazardous waste" does not include:

a. Natural gas, natural gas liquids, liquefied natural gas, synthetic gas usable for fuel, or mixtures of natural gas and such synthetic gas; nor

b. The residue of emissions from the engine exhaust of a motor vehicle, rolling stock, aircraft, vessel, or pipeline pumping station engine; nor

c. Source, byproduct, or special nuclear material from a nuclear incident, as those terms are defined in the atomic energy act of 1954, if such release is subject to requirements with respect to financial protection established under section 170 of such act (42 U.S.C. 2210) or, for the purpose of section 104 of the comprehensive environmental response, compensation and liability act of 1980 (42 U.S.C. 9604), or any other response action, any source, byproduct, or special nuclear material from any processing site designated under section 102(a)(1) or 302(a) of the Uranium Mill Tailings Radiation Control Act of 1978 (42 U.S.C. 7912(a)(1) or 7942(a)); nor

d. Petroleum as defined in section one hundred seventy-two of the navigation law, even if appearing on the list promulgated pursuant to section 37-0103 of this chapter.

2. "Inactive hazardous waste disposal site" means any area or structure used for the long term storage or final placement of hazardous waste including, but not limited to, dumps, landfills, lagoons and artificial treatment ponds, as to which area or structure no permit or authorization issued by the department or a federal agency for the disposal of hazardous waste was in effect after the effective date of this title and any inactive area or structure on the National Priorities List established under the authority of 42 U.S.C.A. Section 9605.

3. "Inactive hazardous waste disposal site remedial program" means activities undertaken to eliminate, remove, abate, control or monitor health and/or environmental hazards or potential hazards in connection with inactive hazardous waste disposal sites or to treat or dispose of wastes and waste contaminated materials from such sites including, but not limited to, grading, contouring, trenching, grouting, capping, excavation, transporting, incineration, chemical treatment, biological treatment or construction of leachate collection and treatment facilities.

4. "Person" means an individual, trust, firm, joint stock company, limited liability company, corporation, joint venture, partnership, association, state, municipality, commission, political subdivision of a state, public benefit corporation or any interstate body. Provided, however for purposes of this title, person shall not include a person as defined in section 27-1323 of this title.

5. "Waste" means any garbage, refuse, sludge from a waste treatment plant, water supply treatment plant, or air pollution control facility, and other discarded material, whether or not such material may eventually be used for some other purpose, including solid, liquid, semisolid, or contained gaseous material resulting from industrial, commercial, mining and agricultural operations or from community activities, and source, special nuclear or by-product material as defined in the Atomic Energy Act of 1954, as amended, except as may be provided by existing agreements between the state of New York and the government of the United States, but does not include solid or dissolved

material in domestic sewage, or solid or dissolved materials in irrigation return flows or industrial discharges which are point sources subject to permits under article seventeen of this chapter.

6. "Disposal" means the abandonment, discharge, deposit, injection, dumping, spilling, leaking or placing of any substance so that such substance or any related constituent thereof may enter the environment. Disposal also means the thermal destruction of waste or hazardous waste and the burning of such wastes as fuel for the purpose of recovering useable energy.

7. "Environment" means any water, water vapor, any land including land surface or subsurface, air, fish, wildlife, biota and all other natural resources.

8. "Natural resource damages" means the amount of money sought as compensation for injury to, destruction of, or loss of natural resources, including the reasonable costs of assessing such injury, destruction, or loss resulting from the disposal of hazardous waste at an inactive hazardous waste disposal site. Damages may also include the value of the natural resource services lost for the time period from the disposal until the attainment of such restoration, rehabilitation, replacement, and/or acquisition of equivalent natural resources.

9. "Natural resources" means land, fish, wildlife, biota, air, water, and other such resources belonging to, managed by, held in trust by, appertaining to, or otherwise controlled by the state or a municipality.

10. "Response costs" means the state's costs of developing, implementing, and/or overseeing an inactive hazardous waste disposal site remedial program.

11. "Responsible person" or "person responsible" for the disposal of hazardous waste at a site means:

(a) any person who currently owns or operates a site or any portion thereof except for a volunteer, as defined in subdivision one of section 27-1405 of this article, that is participating under a brownfield

cleanup agreement pursuant to section 27-1407 of this article, that is in full compliance with the requirements of this chapter with respect thereto, and is not engaging with the department in bad faith with respect to any provisions of this title;

(b) any person who owned or operated a site or any portion thereof at the time of disposal of the hazardous waste;

(c) any person who generated any hazardous waste disposed at a site;

(d) any person who transported any hazardous waste to a site selected by such person;

(e) any person who disposed of any hazardous waste at a site;

(f) any person who arranged for:

(i) the transportation of any hazardous waste to a site; or

(ii) the disposal of any hazardous waste at a site; and

(g) any other person who is responsible according to the applicable principles of statutory or common law liability pursuant to subdivision four of section 27-1313 of this title and/or the Comprehensive Environmental Response, Compensation, and Liability Act ("CERCLA"), 42 U.S.C. § 9601 et seq.

12. "Disadvantaged community" shall have the same meaning as subdivision five of section 75-0101 of this chapter.

§ 27-1303. Identification of sites.

1. a. For a period of one year after the effective date of the chapter of the laws of two thousand three designating and amending this paragraph, each county shall, for the purpose of locating inactive hazardous waste disposal sites, as that term was defined on January first, two thousand three, survey its jurisdiction to determine the existence and location of suspected inactive hazardous waste disposal sites and shall annually thereafter submit a report to the department describing the location of each such suspected site and the reasons for such suspicion.

b. Commencing one year after the effective date of this paragraph, each county shall, for the purpose of locating inactive hazardous waste

disposal sites, survey its jurisdiction to determine the existence and location of suspected inactive hazardous waste disposal sites and shall, after consultation with all cities, towns, and villages within its jurisdiction, annually thereafter submit a report to the department describing the location of each such suspected site and the reasons for such suspicion.

2. Each county, after consultation with all cities, towns, and villages within its jurisdiction, shall review the information concerning such county in the registry established pursuant to section 27-1305 of this article and shall, on or before September first, nineteen hundred eighty, and annually thereafter on the first day of September of each succeeding year, provide the department with any information which might correct or supplement the information in such registry with respect to suspected inactive hazardous waste disposal sites within the jurisdiction of such county.

3. Counties shall cooperate and coordinate with local jurisdictions, regional organizations or state agencies to fulfill its responsibilities under subdivisions one and two of this section. Nothing contained within this section shall reduce the powers or responsibilities of any county, other local jurisdiction, regional organization or state agency to identify, investigate, assess or monitor any inactive hazardous waste disposal site.

4. For purposes of this section, "county" shall include each city incorporating within its boundary one or more counties but shall not include those counties incorporated within a city.

§ 27-1305. Reports by the department; registry of sites.

1. The department shall maintain and make available for public inspection, either at each of its regional offices and regional sub-offices, at the office of the county clerk or register for each county and at the office of the town clerk for each town in Suffolk and Nassau counties, or on its website, a registry of inactive hazardous

waste disposal sites in such region or, with respect to the office of the county clerk or register, in such county, or with respect to its website, the entire state. The department shall provide a written copy upon requests by any person. The department shall take all necessary action to ensure that the registry provides a complete and up-to-date listing of all such sites within the region. The department shall, on or before January first, two thousand four, and annually thereafter, transmit the updated registry to the legislature and the governor. A notice of the availability of the updated registry shall be sent to the department of health and the chief executive officer of every county. Upon identification of an inactive hazardous waste disposal site not included in the registry for the immediately preceding year, the department shall notify in writing the chief executive officer of each county, city, town and village and the public water supplier which services the area in which such site is located that such site has been so identified. For the purposes of this section, "water supplier" shall mean any public water system as such term is defined for the purposes of the sanitary code of the state of New York as authorized by section two hundred twenty-five of the public health law. Such registry shall include but need not be limited to those items among the following which the commissioner determines to be necessary:

a. A description of the sites consisting of:

(i) a general description of the site, which shall include the name, if any, of the site, the address of the site, the type and quantity of the hazardous waste disposed of at the site and the name of the current owners of the site;

(ii) an assessment by the department of any significant environmental problems at and near the site;

(iii) an assessment prepared by the department of health of any serious health problems in the immediate vicinity of the site and any health problems deemed by the department of health to be related to conditions at the site;

(iv) the status of any testing, monitoring or remedial actions in progress or recommended by the department;

(v) the status of any pending legal actions and any federal, state or local government permits or approvals concerning the site; and

(vi) an assessment of the relative priority of the need for action at each site to remedy environmental and health problems resulting from the presence of wastes at such site;

b. Address and site boundaries including tax map parcel numbers or section, block and lot numbers, and if the site is located within a disadvantaged community;

c. Time period of use for disposal of hazardous waste;

d. Name of the current owner and operator and names of any past and reported owners and operators during the time period of use for disposal of hazardous waste;

e. Names of persons responsible for the generation and transportation of hazardous waste disposed of;

f. Type and quantity of hazardous waste disposed of;

g. Manner of disposal of hazardous waste;

h. Nature of soils at the site;

i. Depth of water table at the site;

j. Location, nature and size of aquifers at the site;

k. Direction of present and historic groundwater flows at the site;

l. Location, nature and size of all surface waters at and near the site;

m. Levels of contaminants, if any, in groundwater, surface water, air and soils at and near the site resulting from hazardous wastes disposed of at the site or from any other cause and areas known to be directly affected or contaminated by wastes from the site;

n. As determined by the department of health, current quality of all drinking water drawn from or distributed through the area in which the site is located when the department of health determines that water quality may have been affected by the site in question and any known change in the quality of such drinking water over time;

o. Proximity of the site to private residences, public buildings or property, school, daycare, medical, or senior care facilities, places of work or other areas where individuals may be present, or location within a disadvantaged community; and

p. The name, address and telephone number of the public water supplier which services the area in which such site is located.

2. a. The department shall conduct investigations of the sites listed in the registry and shall investigate areas or sites which it has reason to believe should be included in the registry. The purpose of these investigations shall be to develop the information required by subdivision one of this section to be included in the registry.

b. (1) Assessment and classification. The department shall, as part of the registry, assess and, based upon new information received, reassess by March thirty-first of each year, in cooperation with the department of health, the relative need for action at each site to remedy environmental and health problems resulting from the presence of hazardous wastes at such sites including in such assessment whether sites shall be prioritized under subdivision five of this section due to site location in an area identified as a disadvantaged community; provided, however, that if at the time of such assessment or reassessment, the department has not placed a site in classification 1 or 2, as described in clauses (i) and (ii) of this subparagraph, and such site is the subject of negotiations for, or implementation of, a brownfield site cleanup agreement pursuant to title fourteen of this article, obligating the person subject to such agreement to, at a minimum, eliminate or mitigate all significant threats to the public health and environment posed by the hazardous waste pursuant to such agreement, the department shall defer its assessment or reassessment

during the period such person is engaged in good faith negotiations to enter into such an agreement and, following its execution, is in compliance with the terms of such agreement, and shall assess or reassess such site upon completion of remediation to the department's satisfaction. In making its assessments, the department shall place every site in one of the following classifications:

- (i) Causing or presenting an imminent danger of causing irreversible or irreparable damage to the public health or environment--immediate action required;

- (ii) Significant threat to the public health or environment--action required;

- (iii) Does not present a significant threat to the public health or environment--action may be deferred;

- (iv) Site properly closed--requires continued management;

- (v) Site properly closed, no evidence of present or potential adverse impact--no further action required.

(2) Prioritization. The department shall, in accordance with subdivision five of this section, prioritize remedial programs at sites placed in classification 1 or 2, as described in clauses (i) and (ii) of subparagraph one of this paragraph, that are located in disadvantaged communities, consistent with the protection of public health and the environment.

c. (1) Any owner or operator of a site listed pursuant to this section may petition the commissioner for deletion of such site, modification of the site classification, or modification of any information regarding such site by submitting a written statement in such form as the commissioner may require setting forth the grounds of the petition.

(2) Within ninety days after the submittal of such petition, the commissioner may convene an administrative hearing to determine whether a particular site should be deleted from the registry, receive a modified site classification or whether any information regarding the site should be modified. In any such hearing the burden of proof shall be on the petitioner. No less than thirty days prior to the hearing the commissioner shall cause a notice of hearing to be published in the next available environmental notice bulletin, on the department's website, and in a newspaper of general circulation in the county in which the

site is located. The commissioner shall also notify in writing any owner or operator of the site, as well as the owners of record of adjacent properties, no less than thirty days prior to the hearing. The cost of any such hearing, including the cost of any public notification, shall be at the petitioner's expense.

(3) No later than thirty days following receipt of the complete record as that term is defined in the state administrative procedure act, or following the decision not to hold a hearing the commissioner shall provide the owner or operator with a written determination accompanied by reason therefor regarding the deletion of such site, modification of the site classification or modification of any information regarding such site. Any final decision rendered by the commissioner shall be reviewable under article seventy-eight of the civil practice law and rules.

(4) The commissioner may not delete any site from the registry without providing public notice no less than sixty days prior to the proposed deletion. Such notice of deletion shall be published in the next available environmental notice bulletin, on the department's website, and in a newspaper of general circulation in the county in which the site is located. The commissioner shall also notify in writing any owner or operator of the site, if applicable, no less than sixty days prior to the proposed deletion. The commissioner shall provide a thirty-day period for submission of written comments and an opportunity for submission of oral comments at a public meeting at or near the site. The commissioner shall summarize any comments received and make the summary available to the public on the department's website. The commissioner may convene an administrative hearing to determine whether a particular site should be deleted from the registry, receive a modified site classification or whether any information regarding the site should be modified.

(5) The department shall notify, as soon as possible and within available resources all public repositories of the registry, including updating its website, of any modifications or deletions to such registry. The department shall also note any such deletions or modifications in the next annual report and publication of the registry.

(6) The department shall, within ten days of any determination notify the local governments of jurisdiction whenever a change is made in the

registry pursuant to this subdivision.

d. (1) Within seven months after the effective date of this subdivision the department shall notify by certified mail the owner of all or any part of each site or area included in the registry, of the inclusion of the site or area by mailing notice to such owner at the owner's last known address. Thereafter, fifteen days before any site or area is added to the registry, the department shall notify in writing by certified mail the owner of all or any part of such site or area of the inclusion of such site or area by mailing notice to each such owner at the owner's last known address.

(2) Notice pursuant to paragraph a of this subdivision shall include but not be limited to a description of the duties and restrictions imposed by section 27-1317 of this title and by section one thousand three hundred eighty-nine-d of the public health law.

(3) Non-receipt of any notice mailed to an owner pursuant to this subdivision shall in no way affect the responsibilities, duties or liabilities imposed on any person by this title or title XII-A of article thirteen of the public health law.

e. The department shall, in consultation with the department of health, evaluate existing site evaluation systems and shall develop a system to select and prioritize sites for remedial action. Such system shall incorporate environmental, natural resource and public health concerns, and a site's location within a disadvantaged community.

f. The department shall develop a site status reporting system and utilize such system to ensure that the registry required by subdivision one of this section provides a complete and up-to-date listing of all sites in each region.

3. The department shall, as soon as possible but in no event later than January first, nineteen hundred eighty-four, and annually thereafter prepare and submit in writing a "state inactive hazardous waste remedial plan," hereinafter referred to as "the plan" to the state superfund management board. Such board shall then approve of the plan or make such modification as it is empowered to do pursuant to section

27-1319 of this chapter and submit the approved plan or modified plan, to the governor and the legislature on or before March first, nineteen hundred eighty-four and annually thereafter. In preparing, compiling and updating the plan, the department shall:

a. Conduct or cause to be conducted field investigations of high priority sites listed in the inactive hazardous waste disposal sites registry for the purpose of further defining necessary remedial action. To the maximum extent practicable, the department shall utilize existing information including, but not limited to, subsurface borings and any analyses or tests of samples taken from such sites by owners or operators, other responsible persons and any federal or non-federal agencies.

b. Make any subsurface borings and any analyses or tests of samples taken as may be necessary or desirable to effectuate the field investigations of sites as required under this section subject to the requirements of this title.

c. Make any record searches or document reviews as may be necessary or desirable to effectuate the purposes of this section subject to the requirements of this title.

d. Consider the effects on the health, environment and economy of the state when assessing the relative priority of sites as required by this section, especially any actual or significant threat of direct human contact or contamination of groundwater or drinking water.

e. Detail the recommended strategy, methods and time frame by which remedial action at sites shall be carried out, except that no information or work product associated with actual or pending litigation shall be divulged unless otherwise required by law.

f. Estimate, with reasonable specificity, based upon the field investigations, assessments, analyses, document reviews and other appropriate data gathering, the costs of remedial action for sites included in the plan, considering the appropriate methods and techniques

as currently exist in the field of hazardous waste management and any such estimates or recommendations shall reflect such costs as are reasonably necessary to contain, alleviate or end the threat to life or health or to the environment.

4. On or before July first, nineteen hundred eighty-six and July first of each succeeding year, the department shall prepare a status report on the implementation of the plan, and an update of the policies, program objectives, methods and strategies as outlined in the plan which guide the overall inactive hazardous waste site remediation program. Such status report shall reflect information available to the department as of March thirty-first of each year, and shall include an accounting of all monies expended or encumbered from the environmental quality bond act of nineteen hundred eighty-six or the hazardous waste remedial fund during the preceding fiscal year, such accounting to separately list:

a. monies expended or encumbered for the purpose of conducting site investigations;

b. monies expended or encumbered for the purpose of conducting remedial investigations and feasibility studies;

c. monies expended or encumbered for the purpose of conducting remedial design studies;

d. monies expended or encumbered for the purpose of conducting remedial construction activities;

e. monies expended or encumbered for operation, maintenance, and monitoring activities;

f. monies expended or encumbered for interim remedial measures;

g. monies expended or encumbered for administrative personnel costs associated with activities conducted at inactive hazardous waste disposal sites;

h. monies expended or encumbered for oversight activities at inactive hazardous waste disposal sites;

i. monies expended or encumbered in stand-by contracts entered into pursuant to section 3-0309 of this chapter and the purposes for which these stand-by contracts were entered into; and

j. an accounting of payments received and payments obligated to be received pursuant to this title, and a report of the department's attempts to secure such obligations.

5. Site cleanup prioritization. The department shall, no later than January first, two thousand twenty-six, submit to the governor and legislature and publish on its website site cleanup prioritization criteria. The department shall review and update criteria as necessary. The department shall describe the criteria and processes it uses to determine the relative prioritization of sites, and an explanation of the rationale of such criteria and processes. In preparing and updating such criteria, the department shall consider the effects on the health, environment and economy of the state, with particular consideration for the effects on disadvantaged communities.

6. Status report. The department no later than December thirty-first of each year, shall, using the information available to it, submit to the governor and legislature, and make public on the department's website an inactive hazardous waste remedial program status report for the previous fiscal year. Such report shall include a status update of all registered sites and an accounting of all monies expended or encumbered from the environmental quality bond act of nineteen hundred eighty-six, the hazardous waste remedial fund, the department's natural resource damages fund, or any other monies otherwise appropriated for the implementation of this title, during the preceding fiscal year, such accounting to separately list:

(i) monies expended or encumbered for the purpose of conducting site investigations;

(ii) monies expended or encumbered for the purpose of conducting remedial investigations and feasibility studies;

(iii) monies expended or encumbered for the purpose of conducting remedial design studies;

(iv) monies expended or encumbered for the purpose of conducting remedial construction activities;

(v) monies expended or encumbered for operation, maintenance, and monitoring activities;

(vi) monies expended or encumbered for interim remedial measures;

(vii) monies expended or encumbered for oversight activities, including personnel and contractor costs, at inactive hazardous waste disposal sites;

(viii) monies expended or encumbered in stand-by contracts entered into pursuant to section 3-0309 of this chapter and the purposes for which these stand-by contracts were entered into;

(ix) an accounting of payments received and payments obligated to be received pursuant to this title, and a report of the department's attempts to secure such obligations; and

(x) an accounting of all response costs recovered statewide and natural resource damages recovered at each site, including through settlement or agreement, commissioner order, judicial determination and award, a required instrument of financial responsibility, or an environmental lien.

§ 27-1307. Reports to the department.

1. In order to facilitate the department's efforts to secure information about inactive hazardous waste disposal sites in the state, any person shall, upon the request of the department, furnish to the department, in a form and manner prescribed by the department, the following information:

a. The name and location of facilities within the state that have generated significant quantities of hazardous wastes or sites within the state which have received wastes which are now or were formerly owned or operated by such person or to or from which such person has transported such wastes;

b. A description of current and past waste generating and disposal activities at facilities identified pursuant to paragraph a of this subdivision which have generated hazardous wastes including products manufactured or services provided, generic type of processes used in the manufacturing of products or provision of services, the type and annual quantity of hazardous wastes generated in significant quantities, the locations of all sites used for the disposal of wastes generated by such facilities, the years of use of such sites for the disposal of wastes, the type and quantity of waste disposed of at such sites and the manner of disposal of hazardous wastes at such sites;

c. A description of current and past waste disposal activities at sites identified pursuant to paragraph a of this subdivision which have received wastes including years of use of such sites for the disposal of wastes, type and quantity of all hazardous wastes disposed of at such sites and the manner of disposal of hazardous wastes at such sites;

d. With respect to each site identified pursuant to paragraphs a and b of this subdivision, names of persons that have transported hazardous wastes to such sites, a description of any testing, monitoring or remedial actions undertaken or planned at such sites and any significant health or environmental problems known or suspected to exist at such sites; and

e. Any other information that the department may deem necessary to prepare the state inactive hazardous waste remedial plan or the registry required by section 27-1305 of this article.

2. In the event the person furnishing such information cannot fully comply with the request for information, such person shall set forth his efforts to comply with such request.

3. Any information submitted to the department shall be considered a "written instrument" as defined in subdivision three of section 175.00 of the penal law.

§ 27-1309. Access to records and sites.

1. Every person shall, upon the written request of the commissioner or a designee, permit a duly designated officer or employee of the department at all reasonable times to have access to and to copy all books, papers, documents and records relating to the current and past hazardous waste generating, transporting or disposal activities of such person.

2. The commissioner may sign and issue subpoenas in the name of the department requiring the production of books, papers, documents and other records and may take testimony by depositions under oath of any person relating to the current and past waste generating, transporting or disposal activities of such person. Such subpoenas and depositions shall be regulated by the civil practice law and rules. The commissioner may invoke the powers of the supreme court of the state of New York to compel compliance with any such subpoena or any request to take such depositions.

3. Any duly designated officer or employee of the department, or of any state agency, and any agent, consultant, contractor, or other person, including an employee, agent, consultant, or contractor of a responsible person acting at the direction of the department, so authorized in writing by the commissioner, may enter any inactive hazardous waste disposal site and areas near such site and inspect and take samples of wastes, soils, air, surface water, and groundwater. In order to take such samples, the department or authorized person may utilize or cause to be utilized such sampling methods as it determines to be necessary including, but not limited to, soil borings and monitoring wells.

4. The department or authorized person shall not take any samples involving the substantial disturbance of the ground surface of any property unless it has made a reasonable effort to identify the owner of the property and to notify such owner of the intent to take such samples. If the owner can be identified, the department shall provide such owner with a minimum of ten days' written notice of the intent to

take such samples, unless the commissioner makes a written determination that such ten day notice will not allow the department to protect the environment or public health, in which case two days' written notice shall be sufficient. Any inspection of the property and each such taking of samples shall take place at reasonable times and shall be commenced and completed with reasonable promptness. If any officer, employee, agent, consultant, contractor, or other person so authorized in writing by the commissioner obtains any samples prior to leaving the premises, he or she shall give to the owner or operator a receipt describing the sample obtained and, if requested, a portion of such sample equal in volume or weight to the portion retained. If any analysis is made of such samples, a copy of the results of such analysis shall be furnished promptly to the owner or operator. Upon the completion of all sampling activities, the department or authorized person shall remove, or cause to be removed, all equipment and well machinery and return the ground surface of the property to its condition prior to such sampling, unless the department or authorized person, and the owner of property shall otherwise agree.

5. The expense of any such sampling and analysis shall be paid by the department, but may be recovered from any responsible person in any action or proceeding brought pursuant to this title or common law; provided, that if the person so authorized in writing shall be an employee, agent, consultant, or contractor of a responsible person acting at the direction of the department, then the expense of any such sampling and analysis shall be paid by the responsible person.

§ 27-1311. Confidentiality.

1. The department or any other state agency shall hold confidential any information in any report to the department made pursuant to section 27-1307 of this article or any records secured by the department or any inspection, sampling or analysis made by the department pursuant to section 27-1309 of this article or obtained while implementing a remedial program pursuant to section 27-1313 of this article when the site owner or operator or a generator who contributed to any waste

disposed of at the site requests that such information is entitled to protection under paragraph (d) of subdivision two of section eighty-seven of the public officers law and rules and regulations promulgated thereunder. Release of such information shall be in accordance with article six of the public officers law.

2. Any agent, consultant, contractor or other person authorized by the commissioner pursuant to this title shall hold such information confidential. Release of any such information by any agent, consultant, contractor or other person authorized by the commissioner shall only be made after a determination by the commissioner pursuant to the procedures set forth in article six of the public officers law.

3. Nothing herein shall restrict the exchange of information between the department and its agents, consultants, contractors or other persons authorized by the commissioner pursuant to this title or between separate agents, consultants, contractors or other persons authorized by the commissioner pursuant to this title.

§ 27-1313. Remedial programs.

1. a. The department shall be responsible, as provided in this section, for inactive hazardous waste disposal site remedial programs except as provided in section one thousand three hundred eighty-nine-b of the public health law.

b. The department shall have the authority to require the development and implementation of a department-approved inactive hazardous waste disposal site remedial program.

c. Section eight of the court of claims act or any other provision of law to the contrary notwithstanding, the state shall be immune from liability and action with respect to any act or omission done in the discharge of the department's aforesaid responsibility pursuant to this section; provided, however, that this paragraph shall not limit the liability which may otherwise exist for unlawful, willful or malicious

acts or omissions on the part of the state, state agencies, or their officers, employees or agents; or for the ownership or responsibility for the disposal of hazardous waste, including the cost of cleanup, pursuant to this section.

2. The department shall have the authority (a) to delegate such responsibility for a specific site to the municipality in which such site is located and (b) to contract with the environmental facilities corporation and any other person to perform necessary work in connection with such sites.

3. a. Whenever the commissioner finds that hazardous wastes at an inactive hazardous waste disposal site constitute a significant threat to the environment, he may order the owner of such site and/or any person responsible for the disposal of hazardous wastes at such site (i) to develop an inactive hazardous waste disposal site remedial program, subject to the approval of the department, at such site, and (ii) to implement such program within reasonable time limits specified in the order. Provided, however, that in the event the commissioner of health shall issue an order pursuant to subdivision three of section one thousand three hundred eighty-nine-b of the public health law, such order of the commissioner of health shall supersede any order issued hereunder.

b. Whenever the commissioner, after investigation, finds:

(i) that hazardous wastes at an inactive hazardous waste disposal site constitutes a significant threat to the environment; and

(ii) that such threat is causing or presents an imminent danger of causing irreversible or irreparable damage to the environment; and

(iii) the threat makes it prejudicial to the public interest to delay action until a hearing can be held pursuant to this title, the department may, pursuant to paragraph c of subdivision five of this section and within the funds available to the department, develop and implement an inactive hazardous waste disposal site remedial program for such site. Findings required pursuant to this paragraph shall be in writing and may be made by the commissioner on an ex parte basis subject to judicial review.

4. Any order issued pursuant to subdivision three of this section shall be issued only after notice and the opportunity for a hearing is provided to persons who may be the subject of such order. The commissioner shall determine which persons are responsible pursuant to said subdivision according to applicable principles of statutory or common law liability. Such persons shall be entitled to raise any statutory or common law defense at any such hearing and such defenses shall have the same force and effect at such hearings as they would have in a court of law. In the event a hearing is held, no order shall be issued by the commissioner under subdivision three of this section until a final decision has been rendered. Any such order shall be reviewable pursuant to article seventy-eight of the civil practice law and rules within thirty days after service of such order. The commissioner may request the participation of the attorney general in such hearings.

5. a. Whenever a person ordered to eliminate a threat to the environment pursuant to paragraph a of subdivision three of this section has failed to do so within the time limits specified in the order, the department may develop and implement an inactive hazardous waste disposal site remedial program for such site. The reasonable expenses of developing and implementing such remedial program by the department shall be paid by the person to whom the order was issued and the state may seek to recover such reasonable expenses in any court of appropriate jurisdiction.

b. In the event that the commissioner has found that hazardous wastes at a site constitute a significant threat to the environment, but after a reasonable attempt to determine who may be responsible is either unable to determine who may be responsible, or is unable to locate a person who may be responsible, the department may develop and implement an inactive hazardous waste disposal site remedial program for such site. The department shall prioritize implementation of remedial programs in accordance with subdivision five of section 27-1305 of this title. The commissioner shall make every effort, in accordance with the requirements for notice, hearing and review provided for in this title, to secure appropriate relief from any person subsequently identified or

located who is responsible for the disposal of hazardous waste at such site, including, but not limited to response costs, natural resource damages and penalties.

c. (i) Whenever the commissioner has made findings pursuant to paragraph b of subdivision three of this section or the commissioner of health has made a declaration and finding pursuant to paragraph (b) of subdivision three of section one thousand three hundred eighty-nine-b of the public health law, the department may develop and implement an inactive hazardous waste disposal site remedial program to contain, alleviate or end the threat to life or health or to the environment. The costs incurred by the department in developing and implementing such a program shall be in an amount commensurate with the actions the department deems necessary to eliminate such danger. In determining the scope, nature and content of such program, the department shall consider among others, the following factors:

(A) the technological feasibility of all actions;

(B) the nature of the danger to human health and the environment which the actions are designed to address; and

(C) the extent to which the actions would reduce such danger to human health or the environment or would otherwise benefit human health or the environment, including if the actions would benefit a disadvantaged community.

(ii) In implementing this title, the department shall consult with appropriate representatives of Indian nations on environmental and cultural resource issues related to this title of concern to either the department or Indian nations.

d. Notwithstanding the provisions of subdivision c of this section, the department shall be authorized to develop and implement an inactive hazardous waste disposal site remedial program at the site pursuant to this subdivision if, in the discretion of the department, it is cost-effective for the department to develop and implement such a remedial program. The goal of any such remedial program shall be a complete cleanup of the site through the elimination of the significant threat to the environment posed by the disposal of hazardous wastes at the site and of the imminent danger of irreversible or irreparable

damage to the environment caused by such disposal. The factors to be considered by the department in determining whether it is cost-effective to develop and implement an inactive hazardous waste disposal site remedial program at a site pursuant to this subdivision shall include, among others:

- (i) the ability of the department to determine, through the exercise of its scientific judgment, whether the elimination of the imminent danger of irreversible or irreparable damage to the environment can be achieved through limited actions;

- (ii) the ability of the department to identify the owner of the site and/or any person responsible for the disposal of hazardous wastes at such site with sufficient financial resources to develop and implement an inactive hazardous waste disposal site remedial program at such site;

- (iii) the nature of the danger to human health and the environment which the actions are designed to address; and

- (iv) the extent to which the actions would reduce such danger to human health or the environment or would otherwise benefit human health or the environment.

e. Whenever the commissioner of health makes a declaration and finding pursuant to paragraph b of subdivision three of section one thousand three hundred eighty-nine-b of the public health law, the department may implement an inactive hazardous waste site remedial program in the same manner as specified in paragraphs c and d of this subdivision.

f. The commissioner shall make every effort, in accordance with the requirements for notice, hearing and review provided for in this title to secure appropriate relief from the owner or operator of such site and/or any person responsible for the disposal of hazardous wastes at such site, including, but not limited to, response costs, natural resource damages, and penalties.

g. When a municipality develops and implements pursuant to an agreement with the department an inactive hazardous waste disposal site remedial program as approved by the department for a site which is owned or has been operated by such municipality or when the department, pursuant to an agreement with a municipality, develops and implements

such a remedial program, the commissioner shall, in the name of the state, agree in such agreement to provide from the hazardous waste remedial fund, within the limitations of appropriations therefor, seventy-five percent of the eligible design and construction costs of such remedial program for which such municipality is liable solely because of its ownership and/or operation of such site and which are not recovered from or reimbursed or paid by a responsible party or the federal government.

6. Nothing contained within this section shall be construed as impairing or in any manner affecting the right or jurisdiction of the attorney general to seek appropriate relief pursuant to his statutory or common law authority.

7. Moneys for actions taken or to be taken by the department, the department of health or any other state agency in connection with the elimination of conditions dangerous to life or health pursuant to subdivision five of section thirteen hundred eighty-nine-b of the public health law or with the elimination of a significant threat to the environment pursuant to this section shall be payable directly to such agencies from the hazardous waste remedial fund pursuant to section ninety-seven-b of the state finance law. This includes any inspection or sampling of wastes, soils, air, surface water, groundwater, or other natural resources, done on behalf of a state agency whether or not such action is taken prior to the issuance of a declaration pursuant to subdivision two of section thirteen hundred eighty-nine-b of the public health law or a finding pursuant to subdivision three of this section and any administrative expenses related thereto.

8. Any duly designated officer or employee of the department or any other state agency, and any agent, consultant, contractor, or other person, including an employee, agent, consultant, or contractor of a responsible person acting at the direction of the department, so authorized in writing by the commissioner, may enter any inactive hazardous waste disposal site and areas near such site to implement an inactive hazardous waste disposal site remedial program for such site, provided the commissioner has sent a written notice to the owners of

record or any known occupants of such site or nearby areas of the intended entry and work at least ten days prior to such initial entry.

9. Nothing herein contained shall be construed to limit or in any manner affect the power of the commissioner to issue an order according to the provisions of section 71-2727 of this chapter.

10. The department, by and through the commissioner, shall be authorized to exempt a person from the requirement to obtain any state or local permit or other authorization for any activity needed to implement an inactive hazardous waste disposal site remedial program pursuant to this title; provided, that the activity is conducted in a manner which satisfies all substantive technical requirements applicable to like activity conducted pursuant to a permit.

§ 27-1315. Rules and regulations.

1. The commissioner shall have the power to promulgate rules and regulations necessary and appropriate to carry out the purposes of this title. Any regulations shall include provisions which establish the procedures for a hearing pursuant to subdivision four of section 27-1313 of this title and shall ensure a division of functions between the commissioner, the staff who present the case, and any hearing officers appointed. In addition, any regulations shall set forth findings to be based on a factual record, which must be made before the commissioner determines that a significant threat to the environment exists.

2. Such rules and regulations of the department as shall be in effect on the effective date of this subdivision that shall have been promulgated to carry out the purposes of this title shall be deemed to be revised, as of the effective date of this subdivision, to include the definition of "hazardous waste" as it appears in section 27-1301 of this title.

§ 27-1316. Citizen technical assistance grants.

1. The commissioner is authorized to provide, or order a person acting under order or on consent, to provide grants to any not-for-profit corporation exempt from taxation under section 501(c)(3) of the internal revenue code who may be affected by an inactive hazardous waste disposal site remedial program. To qualify to receive such assistance, a community group must demonstrate that its membership represents the interests of the community affected by such site, and that members' health, economic well-being or enjoyment of the environment are potentially affected by such site. Such grants shall be known as technical assistance grants and may be used to obtain technical assistance in interpreting information with regard to the nature of the hazard posed by hazardous waste located at or emanating from an inactive hazardous waste disposal site or sites and the development and implementation of an inactive hazardous waste disposal site remedial program or programs. Such grants may also be used:

- (a) to advise affected residents on any health assessment; and
- (b) for training funds for the education of interested affected community members to enable them to more effectively participate in the remedy selection process.

Grants awarded under this section may not be used for the purposes of collecting field sampling data, political activity or lobbying legislative bodies.

2. The amount of any grant awarded under this section may not exceed fifty thousand dollars at any one site.

3. No matching contribution from the grant recipient shall be required for a technical assistance grant. Following a grant award, a portion of the grant shall be made available to the grant recipient, in advance of the expenditures to be covered by the grant, in five thousand dollar installments.

§ 27-1317. New use of sites.

Subsequent to the adoption of regulations by the department provided for in this section, no person may substantially change the manner in which an inactive hazardous waste disposal site on the registry prepared and maintained by the department pursuant to section 27-1305 of this title is used, without notifying the department and, pursuant to section one thousand three hundred eighty-nine-d of the public health law, the department of health. A substantial change of use shall be defined in rules and regulations adopted by the department and shall include, but not be limited to, the erection of a building or other structure on such site, the paving of such site for use as a roadway or parking lot, and the creation of a park or other public or private recreational facility on such site. Such notice shall be in writing, addressed to the commissioner and the commissioner of health and shall include a brief description of the proposed change of use. Such notice shall be submitted at least sixty days before any physical alteration of the land or construction shall occur or, in the event any alteration or construction is not required to initiate such change of use, at least sixty days before any change of use.

Subsequent to the adoption of regulations by the department provided for in this section, no person may substantially change the manner in which an inactive hazardous waste disposal site, for which a declaration has been issued by the commissioner of health pursuant to subdivision two of section one thousand three hundred eighty-nine-b of the public health law, is used without the written approval of the commissioner and the commissioner of health. The commissioner shall not approve such change of use if such new use will interfere significantly with a proposed, ongoing or completed inactive hazardous waste disposal site remedial program at such site or expose the environment or health to a significantly increased threat of harm.

§ 27-1318. Institutional and engineering controls.

(a) When the department approves a proposed remedial work plan that includes institutional controls and/or engineering controls as components of a proposed remedial program, such remedial work plan shall include:

(i) a complete description of any proposed use restrictions and/or institutional controls and the mechanisms that will be used to implement, maintain, monitor, and enforce such restrictions and controls;

(ii) a complete description of any proposed engineering controls and any operation, maintenance, and monitoring requirements, including the mechanisms that will be used to continually implement, maintain, monitor, and enforce such controls and requirements;

(iii) an evaluation of the reliability and viability of the long-term implementation, maintenance, monitoring, and enforcement of any proposed institutional or engineering controls and an analysis of the long-term costs of implementing, maintaining, monitoring and enforcing such controls, including costs that may be borne by state or local governments;

(iv) sufficient analysis to support a conclusion that effective implementation, maintenance, monitoring and enforcement of institutional and/or engineering controls can be reasonably expected;

(v) where required by the department, financial assurance to ensure the long-term implementation, maintenance, monitoring, and enforcement of any such controls; and

(vi) a requirement that any engineering control must be used in conjunction with institutional controls to ensure the continued integrity of such engineering control.

(b) Within one hundred eighty days of commencement of the remedial design, the owner of an inactive hazardous waste disposal site, and/or any person responsible for implementing a remedial program at such site, where institutional or engineering controls are employed pursuant to this title, shall execute an environmental easement pursuant to title thirty-six of article seventy-one of this chapter.

(c) The owner of an inactive hazardous waste disposal site, and/or any person responsible for implementing the remedial program at such site where institutional or engineering controls are employed pursuant to this title shall, unless otherwise provided in writing by the department, annually submit to the department a written statement by an individual licensed or otherwise authorized in accordance with article one hundred forty-five of the education law to practice the profession of engineering, or by such other expert as the department may find

acceptable certifying under penalty of perjury that the institutional controls and/or engineering controls employed at such site are unchanged from the previous certification and that nothing has occurred that would impair the ability of such control to protect the public health and environment, or constitute a violation or failure to comply with any operation and maintenance plan for such controls and giving access to such real property to evaluate continued maintenance of such controls.

§ 27-1319. State superfund management board.

1. a. There is hereby created within the department the "state superfund management board" hereinafter referred to as the board. Such board shall consist of fourteen members, including the commissioners of environmental conservation and health, or their designees, and twelve at large members appointed by the governor, two of whom shall be appointed upon recommendation of the temporary president of the senate and two of whom shall be appointed upon recommendation of the speaker of the assembly, one of whom shall be appointed upon recommendation of the minority leader of the senate and one of whom shall be appointed upon recommendation of the minority leader of the assembly, and, of the remaining six, two shall live within a municipality within which exists an inactive hazardous waste site, or sites, as listed pursuant to section 27-1305 of this title, and have been involved in a citizen's organization that has a purpose relating to the site or sites within that municipality, two shall be representatives of organizations whose prime function is the protection of natural resources and enhancement of the environmental quality of the state and two shall be representatives of industries that generate hazardous waste in the state. None of the members appointed by the governor shall be officers or employees of any state department or agency and each shall be, by professional training or experience and attainment, qualified to analyze and interpret matters pertaining to hazardous waste management and the remediation of inactive hazardous waste disposal sites.

b. No at large member of the board may appoint a designee to temporarily or permanently assume his place on the board.

2. a. The commissioner of environmental conservation shall serve as chairman of the board and the board shall elect a vice chairman from among the appointed members to preside in the absence of the chairman.

b. Of the twelve at large members appointed by the governor, each shall be reaffirmed or reappointed on January thirty-first, nineteen hundred ninety-one and every two years thereafter and each shall hold office until such time as the board shall cease to exist or until he shall resign or be removed in the manner provided by law. Any vacancy on the board shall be filled by appointment pursuant to subdivision one of this section for the unexpired balance of the term.

3. The members of the board shall serve without compensation for their services as members of the board, except that each of them shall be allowed the necessary and actual expenses which he shall incur in the performance of his duties under this section.

4. The board shall have the power, duty and responsibility to:

a. Serve as a working forum for the exchange of views, concerns, ideas, information and recommendations relating to hazardous waste management and the remediation of inactive hazardous waste disposal sites.

b. Request and receive from the department at each meeting of the board any portions of the plan or any revisions, amendments or changes available for review, and any supporting documents or other pertinent data. All information requested by or provided to the board shall also be provided to the temporary president of the senate, the speaker of the assembly, and the chairman of the senate and assembly environmental conservation committees.

c. Compel the attendance at each meeting of the board of such personnel of the department, or of other appropriate state departments or agencies, as may reasonably be expected to supply any pertinent data the board may request.

d. Monitor and review the implementation of the inactive hazardous waste site remediation program and the policies, program objectives, methods, and strategies outlined in the plan, the annual implementation status report, any plan update, the registry, and the quarterly site status reports by the department, as well as information which the board may acquire from other sources.

e. Review the hazardous waste site remediation remaining to be completed under the state inactive hazardous waste remedial plan as updated, the estimate of the costs which would be incurred in the completion of this remediation, the schedule under which the costs will be incurred, the revenues and resources expected to be available to meet these costs.

f. Review and evaluate the municipal cost sharing program established pursuant to paragraph g of subdivision five of section 27-1313 of this title and review the appropriate state and industry contribution to the inactive hazardous waste site remedial program.

g. Based upon its monitoring, reviewing and other information available to it, the board shall report to the governor and to the legislature on or before January first of each year its assessment of the implementation of the remediation program, together with its comments, suggestions, and recommendations regarding the program, its implementation, available funding and resources, and the need for steps to assure the future availability of funding.

5. a. The board shall:

1. Meet at least quarterly;

2. Keep a record of all its proceedings and provide such record to the public upon request; and

3. Determine the rules of its own procedures.

b. Seven members of the board shall constitute a quorum for the transaction of any business of the board.

6. Staff services, including recording of board proceedings, shall be performed by personnel of the department, or such state departments or other agencies as the chairman deems appropriate or desirable.

7. For the purposes of this section, the at large members of the board shall be considered officers or employees of public entities and shall be afforded such defense and indemnification provided pursuant to section eighteen of the public officers law.

8. The board shall cease to exist on the thirty-first day of March, nineteen hundred ninety-nine.

§ 27-1321. Protection against liability.

1. Notwithstanding any other provision of law to the contrary, any person who is, by professional training or experience and attainment, qualified to analyze and interpret matters pertaining to the treatment, storage, disposal, or transport of hazardous materials or hazardous wastes, and who voluntarily and without expectation of monetary compensation provides assistance or advice in mitigating the effects of an accidental or threatened discharge of any hazardous materials or hazardous wastes, or in preventing, cleaning up, or disposing of any such discharge, shall not be subject to a penalty or to civil liability for damages or injuries alleged to have been sustained by any person or entity by reason of an act or omission in the giving of such assistance or advice. For the purposes of this section, the term "hazardous materials" shall have the same meaning as that term is defined in regulations promulgated by the commissioner of transportation pursuant to section fourteen-f of the transportation law, and the term "hazardous wastes" shall mean those wastes identified or listed pursuant to section 27-0903 of this article and any rules and regulations promulgated thereunder.

2. Nothing in subdivision one of this section shall be deemed or construed to relieve from liability for damages or injuries any person who: (a) is alleged to have caused said damages or injuries as the result of gross negligence, or reckless, wanton or intentional misconduct, or (b) is under a legal duty to respond to the incident, or (c) receives compensation other than reimbursement for out-of-pocket expenses for services in rendering assistance or advice.

3. Notwithstanding any other provision of law to the contrary, the liability of any person designing, implementing or otherwise performing services related to an inactive hazardous waste disposal site remedial program or related to cleanup or restorative work which is conducted pursuant to a contract with the department or pursuant to an order of the department, the department of health or a court, for any injury to a person or property caused by or related to such services shall be limited to acts or omissions of the person during the course of performing such services which are shown to have been the result of negligence, gross negligence or reckless, wanton or intentional misconduct. Notwithstanding any other provision of law, when (i) a verdict or decision in an action or claim for injury to a person or property caused by or related to such services is determined in favor of a claimant in an action involving a person performing such services and any other person or persons jointly liable, and (ii) the liability of the person performing such services is found to be fifty percent or less of the total liability assigned to all persons liable, and (iii) the liability of the person performing such services is not based on a finding of reckless disregard for the safety of others, or intentional misconduct, then the liability of the person performing such services to the claimant for loss relating to injury to property and for non-economic loss relating to injury to a person shall not exceed the equitable share of the person performing such services determined in accordance with the relative culpability of each person causing or contributing to the total liability for such losses; provided, however, that the culpable conduct of any person not a party to the action shall not be considered in determining any equitable share herein if the claimant proves that with due diligence the claimant was unable to obtain jurisdiction over such person in said action. As used in this

section, the term "non-economic loss" includes but is not limited to pain and suffering, mental anguish, loss of consortium or other damages for non-economic loss. However, nothing in this subdivision shall be deemed to alter, modify or abrogate the liability of any person performing such services for breach of any express warranty, limited or otherwise, or an express or implied warranty under the uniform commercial code, or to an employee of such person pursuant to the workers' compensation law, or relieve from liability, including liability for the costs of cleanup, the owner or any person who is a person responsible for the disposal of hazardous wastes at the site, pursuant to section 27-1313 of this article.

§ 27-1323. Liability exemptions and defenses.

1. Lender exemption. (a) For purposes of this title no lender shall incur any liability from any statutory claims of the state as an owner or operator of a site, or a person responsible for the disposal of a hazardous waste at such site, provided such lender, without participating in the management of such site, holds indicia of ownership primarily to protect the lender's security interest in the site or, if such lender did not participate in the management of such site prior to a foreclosure on such site, notwithstanding that such lender:

(1) forecloses on such site; and

(2) after foreclosure, sells, releases (in the case of a lease finance transaction), or liquidates such site, maintains business activities, winds up operations, or takes any other measure to preserve, protect or prepare such site prior to sale or disposition; provided, however, that such lender shall take actions to sell, release (in the case of a lease finance transaction), or otherwise divest itself of such site at the earliest practicable, commercially reasonable time, on commercially reasonable terms, taking into account market conditions and legal and regulatory requirements.

(b) This exemption shall not apply to any lender that has caused or contributed to the release or threatened release of a hazardous waste from or onto the site, or to any lender that generated, transported, or disposed of, arranged for, or that caused the generation,

transportation, or disposal of hazardous waste from or onto such site.

(c) For purposes of this section:

(1) The term "participating in management" means actually participating in the management or operational affairs of a site and does not include merely having the capacity to influence, or the unexercised right to control, site operations.

(i) A lender who holds indicia of ownership primarily to protect a security interest in such site shall be considered to participate in management only if, while the borrower is in possession of such site encumbered by the security interest, the lender:

(A) exercises decision making control over the environmental compliance related to such site, such that the lender has undertaken responsibility for the hazardous waste handling or disposal practices related to such site; or

(B) exercises control at a level comparable to that of a manager of such site, such that the lender has assumed or manifested responsibility:

(I) for the overall management of such site encompassing day-to-day decision making with respect to environmental compliance; or

(II) over all or substantially all of the operational functions, excluding financial or administrative functions, of such site other than the function of environmental compliance.

(ii) The term "participate in management" does not include:

(A) Performing an act or failing to act prior to the time at which a security interest is created in a site;

(B) Holding a security interest or abandoning or releasing a security interest;

(C) Including in the terms of an extension of credit, or in a contract or security agreement relating to such extension, a covenant, warranty, or other term or condition that relates to environmental compliance;

(D) Monitoring or enforcing the terms and conditions of the extension of credit or security interest;

(E) Monitoring or undertaking one or more inspections of such site;

(F) Requiring a response action or other lawful means of addressing the release or threatened release of a hazardous waste in connection with such site prior to, during, or on the expiration of the term of the extension of credit;

(G) Providing financial or other advice or counseling in an effort to mitigate, prevent, or cure default or diminution in the value of such site;

(H) Restructuring, renegotiating, or otherwise agreeing to alter the terms and conditions of the extension of credit or security interest, exercising forbearance;

(I) Exercising other remedies that may be available under applicable law for the breach of a term or condition of the extension of credit or security agreement; or

(J) Conducting a response action under 42 U.S.C. Section 9607(d) or under the direction of an on-scene coordinator appointed under the national contingency plan if the actions do not rise to the level of participating in management within the meaning of this subparagraph.

(2) The term "extension of credit" includes a lease finance transaction:

(i) In which the lessor does not initially select the leased site and does not during the lease term control the daily operations or maintenance of such site; or

(ii) That conforms with regulations issued by the appropriate federal banking agency or the appropriate state bank supervisor (as those terms are defined in section 3 of the federal deposit insurance act (12 U.S.C. 1813)) or with regulations issued by the national credit union administration board, as appropriate.

(3) The term "financial or administrative function" includes a function such as that of a credit manager, accounts payable officer, accounts receivable officer, personnel manager, comptroller, or chief financial officer, or a similar function.

(4) The terms "foreclosure" and "foreclose" mean, respectively, acquiring and to acquire, a site through:

(i) Purchase at sale under a judgment or decree, power of sale, or nonjudicial foreclosure sale;

(ii) A deed in lieu of foreclosure or similar conveyance from a trustee;

(iii) Repossession if such site was security for an extension of credit previously contracted;

(iv) Conveyance pursuant to an extension of credit previously contracted, including the termination of a lease agreement; or

(v) Any other formal or informal manner by which the lender acquires, for subsequent disposition, title to or possession of a site in order to protect the lender's security interest.

(5) The term "lender" means:

(i) An insured depository institution as defined in section 3 of the federal deposit insurance act (12 U.S.C 1813);

(ii) An insured credit union as defined in section 101 of the federal credit union act (12 U.S.C. 1752);

(iii) A bank or association chartered under the farm credit act of 1971 (12 U.S.C. 2001 et seq.);

(iv) A leasing or trust company that is an affiliate of an insured depository institution;

(v) Any person, including a successor or assignee of any such person, that makes a bona fide extension of credit to or takes or acquires a security interest from a nonaffiliated person;

(vi) The federal national mortgage association, the federal home loan mortgage corporation, the federal agricultural mortgage corporation, or any other entity that in a bona fide manner buys or sells loans or interests in loans;

(vii) A person that insures or guarantees against a default in the repayment of an extension of credit, or acts as a surety with respect to an extension of credit, to a nonaffiliated person; and

(viii) A person that provides title insurance and that acquires a site as a result of assignment or conveyance in the course of underwriting claims and claims settlement.

(6) The term "operational function" includes a function such as that of a site or plant manager, operations manager, chief operating officer, or chief executive officer.

(7) The term "security interest" includes a right under a mortgage, deed of trust, assignment, judgment, lien, pledge, security agreement, factoring agreement, or lease, and any other right accruing to a person to secure the repayment of money, the performance of a duty, or any other obligation by a nonaffiliated person.

2. Municipal exemption. (a) For the purposes of this title no municipality or public corporation shall incur any liability from any statutory claims of the state as an owner or operator of a site, or a

person responsible for the disposal of a hazardous waste at such site:

(i) if such municipality or public corporation acquired such site involuntarily, and such municipality or public corporation retained such site without participating in the development of such site;

(ii) with respect to an airport or fire training site, if such site is owned or operated by such municipality, public corporation, or fire district and at which firefighting foam containing PFAS chemicals was used pursuant to law; or

(iii) with respect to a landfill, if such landfill is owned or operated by the municipality or public corporation.

(b) This exemption shall not apply to any municipality or public corporation that through action or inaction has intentionally, knowingly, recklessly, or through gross negligence caused or contributed to the release or threatened release of a hazardous waste from or onto the site, or to any municipality or public corporation that intentionally, knowingly, recklessly, or through gross negligence generated, transported, or disposed of, arranged for, or caused the generation, transportation, or disposal of hazardous waste, from or onto the site.

(c) When used in this section:

(1) "Public corporation" means a public corporation as defined in section sixty-five of the general construction law, a local public authority, supervisory district, improvement district within a county, city, town, or village, or Indian nation or tribe recognized by the state or the United States with a reservation wholly or partly within the boundaries of New York state, or any combination thereof.

(2) "Involuntary acquisition of ownership or control" includes but is not limited to the following:

(i) Acquisitions by a public corporation in its sovereign capacity, including but not limited to acquisitions pursuant to abandonment proceedings or bequest;

(ii) Acquisitions by a public corporation, or its agent, acting as a conservator or receiver pursuant to a clear and direct statutory mandate or regulatory authority;

(iii) Acquisitions of assets through foreclosure and its equivalents, or otherwise, by a public corporation in the course of administering a loan, loan guarantee, tax lien, or tax forbearance agreement, or loan

insurance program; or

(iv) Acquisitions by a public corporation pursuant to seizure, injunction, condemnation, or forfeiture authority; provided that such ownership or control is not retained primarily for investment purposes.

(3) "Airport" shall have the same meaning as provided in subdivision five of section two hundred forty of the general business law.

(4) "Landfill" shall mean an inactive municipal solid waste site where solid waste was intentionally placed and intended to remain and which was designed, constructed, operated, and closed pursuant to this chapter to minimize adverse environmental impacts and which was either (i) permitted by the department, or (ii) for a non-permitted site, had materially complied with requirements for permitting in accordance with department regulations to the extent the information is reasonably verifiable.

(5) "Firefighting foam containing PFAS chemicals" shall mean class B firefighting foam, as defined in paragraph (a) of subdivision one of section two hundred four-g of the general municipal law, that contains intentionally added perfluoroalkyl and polyfluoroalkyl substances, as defined in paragraph (d) of subdivision one of section two hundred four-g of the general municipal law.

(d) For the purpose of this section, the terms "foreclosure" and "foreclose" mean, respectively, acquiring or to acquire a property through:

(1) purchase at sale under a judgment or decree, power of sale, or non-judicial foreclosure sale;

(2) a deed in lieu of foreclosure, or similar conveyance, or abandonment from a person or trustee;

(3) conveyance pursuant to an extension of credit or tax forbearance previously contracted; or

(4) any other formal or informal manner by which a person acquires, for subsequent disposition, title to or possession of a site in order to protect the security interest of the public corporation or lender.

(e) "Participating in development" means the carrying out, or causing or permitting the carrying out, of any above-grade improvements to the site or any other environmental investigation or remediation, except for those improvements which are part of a site remedial program pursuant to this article or in furtherance of site safety, such as fencing or

lighting, but does not include licensing, regulatory oversight, or the mere capacity to regulate or influence, or the unexercised right to control the operation of the property. For purposes of this section, participating in development does not include:

- (1) having the capacity to influence management of a site;
- (2) having the unexercised right to control or to regulate the site or operations thereof;
- (3) holding, abandoning, or releasing a security interest or tax lien on such site;
- (4) including a condition relating to environmental compliance in a contract, permit, license, or security agreement;
- (5) monitoring or enforcing the terms and conditions of an agreement or tax forbearance agreement;
- (6) monitoring or undertaking one or more inspections of a site including, but not limited to, boring test wells;
- (7) exercising other remedies available under applicable laws;
- (8) licensing, permitting, or granting permits, certificates of occupancy and variances as allowed by law and/or regulation;
- (9) applying for or participating in federal or state statutory programs or benefits; or
- (10) declining to take any of the actions described in subparagraphs one through nine of this paragraph.

(f) Any municipality or public corporation that has taken possession of a site, or owns or operates a site, pursuant to this subdivision, shall notify the department of any release of hazardous waste within ten days of obtaining actual knowledge of such release, unless a shorter notice period is required under any other provision of law, in which case the shorter notice period controls. Failure to notify the department within the ten day or shorter notification period shall result in the loss of the exemption set forth in this section.

3. Fiduciary liability cap. For the purpose of this title, liability on the part of a fiduciary shall not exceed the assets held in the fiduciary capacity if such person is not liable independently of such person's ownership as a fiduciary or actions taken in a fiduciary capacity including, but not limited to, the fiduciary's negligently causing or contributing to the release or threatened release of

hazardous waste at such site.

(a) For purposes of this subdivision:

(1) the term "fiduciary" means a person acting for the benefit of another party as a bona fide trustee; executor; administrator; custodian; guardian of estates or guardian ad litem; receiver; conservator; committee of estates of incapacitated person; personal representative; trustee (including a successor to a trustee) under an indenture agreement, trust agreement, lease, or similar financing agreement, for debt securities, certificates of interest or certificates of participation in debt securities, or other forms of indebtedness as to which the trustee is not, in the capacity of trustee, the lender; or representative in any other capacity that the department, after providing public notice, determines to be similar to the various capacities previously described in this paragraph; and does not include either a person that is acting as a fiduciary with respect to a trust or other fiduciary estate that was organized for the primary purpose of, or is engaged in, actively carrying on a trade or business for profit, unless the trust or other fiduciary estate was created as part of, or to facilitate, one or more estate plans or because of the incapacity of a natural person or a person that acquires ownership or control of a property with the objective purpose of avoiding liability of the person or any other person.

(2) the term "fiduciary capacity" means the capacity of a person in holding title to a property, or otherwise having control of or an interest in a property, pursuant to the exercise of the responsibilities of the person as a fiduciary.

(b) Nothing in this subdivision affects the rights or immunities or other defenses that are available under law that are applicable to a person subject to this section; or creates any liability for a person or a private right of action against a fiduciary or any other person.

(c) Nothing in this subdivision applies to a person if that person acts in a capacity other than that of a fiduciary or in a beneficiary capacity and in that capacity, directly or indirectly, benefits from a trust or fiduciary relationship; or is a beneficiary and a fiduciary with respect to the same fiduciary estate and, as a fiduciary, receives benefits that exceed customary or reasonable compensation, and incidental benefits, permitted under other applicable law.

(d) This subdivision does not preclude a claim under this chapter against the assets of the estate or trust administered by the fiduciary; or a nonemployee agent or independent contractor retained by a fiduciary.

4. Affirmative defenses. (a) There shall be no liability under this title for a person otherwise liable who can establish by a preponderance of the evidence that the significant threat to the environment attributable to hazardous waste disposed at an inactive hazardous waste disposal site was caused solely by: (1) an act of God; (2) an act of war; or (3) an act or omission of a third party other than an employee or agent of such person, or than one whose act or omission occurs in connection with a contractual relationship existing directly or indirectly with such person (except where the sole contractual arrangement arises from a published tariff and acceptance for carriage by a common carrier or rail), if such person establishes by a preponderance of the evidence that: (i) such person exercised due care with respect to the hazardous waste concerned, taking into consideration the characteristics of such hazardous waste, in light of all relevant facts and circumstances, and (ii) took precautions against foreseeable acts or omissions of any such third party and the consequences that could foreseeably result from such acts or omissions; or any combination of them.

(b) For purposes of this section, (1) the term "act of God" means an unanticipated grave natural disaster or other natural phenomenon of an exceptional, inevitable, and irresistible character, the effects of which could not have been prevented or avoided by the exercise of due care or foresight, (2) the term "contractual relationship" includes, but is not limited to, land contracts, deeds, or other instruments transferring title or possession, unless the real property on which the site concerned is located was acquired by such person after the disposal or placement of the hazardous waste on, in, or at such site, and such person establishes one or more of the circumstances described in clause (i), (ii), or (iii) of this subparagraph by a preponderance of the evidence:

(i) At the time such person acquired the site, such person did not know and had no reason to know that any hazardous waste which is the

subject of the significant threat determination was disposed of on, in, or at the site; or

(ii) Such person is a government entity which acquired the site by escheat, or through any other involuntary transfer or acquisition or through the exercise of eminent domain authority by purchase or condemnation; or

(iii) Such person acquired the site by inheritance or bequest. In addition to establishing the foregoing, the person must establish that he or she has satisfied the requirements of clauses (i) and (ii) of subparagraph three of paragraph (a) of this subdivision, provides full cooperation, assistance, and site access to the persons that are authorized to conduct remedial actions at the site (including the cooperation and access necessary for the installation, integrity, operation, and maintenance of any complete or partial remedial action at the site), is in compliance with any land use restrictions established or relied on in connection with the remedial action at a site, and does not impede the effectiveness or integrity of any institutional and/or engineering control employed at the site in connection with a remedial action.

(c)(1) To establish that the person had no reason to know of the matter described in clause (i) of subparagraph two of paragraph (b) of this subdivision, the person must demonstrate to a court that:

(i) on or before the date on which the person acquired the site, the person carried out all appropriate inquiries, as provided in subparagraphs two and four of this paragraph, into the previous ownership and uses of the site in accordance with generally accepted good commercial and customary standards and practices; and

(ii) the person took reasonable steps to:

(A) stop any continuing release;

(B) prevent any threatened future release; and

(C) prevent or limit any human, environmental, or natural resource exposure to any previously released hazardous waste.

(2) Not later than one year after the effective date of this section, the commissioner shall by regulation establish standards and practices for the purpose of satisfying the requirement to carry out all appropriate inquiries under subparagraph one of this paragraph.

(3) In promulgating regulations that establish the standards and

practices referred to in subparagraph two of this paragraph, the commissioner shall include each of the following:

- (i) the results of an inquiry by an environmental professional;
- (ii) interviews with past and present owners, operators, and occupants of the site for the purpose of gathering information regarding the potential for contamination at the site;
- (iii) reviews of historical sources, such as chain of title documents, aerial photographs, building department records, and land use records, to determine previous uses and occupancies of the real property since the property was first developed;
- (iv) searches for recorded environmental cleanup liens against the site that are filed under federal, state, or local law;
- (v) reviews of federal, state, and local government records, waste disposal records, underground storage tank records, and hazardous waste handling, generation, treatment, disposal, and spill records, concerning contamination at or near the site;
- (vi) visual inspections of the site and of adjoining properties;
- (vii) specialized knowledge or experience on the part of the person;
- (viii) the relationship of the purchase price to the value of the property, if the property was not contaminated;
- (ix) commonly known or reasonably ascertainable information about the property;
- (x) the degree of obviousness of the presence or likely presence of contamination at the property, and the ability to detect the contamination by appropriate investigation.

(4)(i) With respect to property purchased before May thirty-first, nineteen hundred ninety-seven, in making a determination with respect to a person described in subparagraph one of this paragraph a court shall take into account:

- (A) any specialized knowledge or experience on the part of the person;
- (B) the relationship of the purchase price to the value of the property, if the property was not contaminated;
- (C) commonly known or reasonably ascertainable information about the property;
- (D) the obviousness of the presence or likely presence of contamination at the property; and
- (E) the ability of the person to detect the contamination by

appropriate inspection.

(ii) With respect to property purchased on or after May thirty-first, nineteen hundred ninety-seven, and until the commissioner promulgates the regulations described in subparagraph two of this paragraph, the procedures of the American Society for Testing and Materials, including the document known as "Standard E1527-97", entitled 'Standard Practice for Environmental Site Assessment: Phase 1 Environmental Site Assessment Process', shall satisfy the requirements in subparagraph one of this paragraph.

(5) In the case of property for residential use or other similar use purchased by a nongovernmental or noncommercial entity, a site inspection and title search that reveal no basis for further investigation shall be considered to satisfy the requirements of this subparagraph.

(d) Nothing in this subdivision shall diminish the liability of any previous owner or operator of the site who would otherwise be liable under this title. Notwithstanding this subdivision, if such person obtained actual knowledge of the release or threatened release of a hazardous waste at the site when such person owned the site and then subsequently transferred ownership of the site to another person without disclosing such knowledge, such person shall be treated as a person responsible for the disposal of hazardous waste at the site, and no defense under this subdivision shall be available to such person. Nothing in this subdivision shall affect the liability under this section of a person who, by any act or omission, caused or contributed to the release or threatened release of a hazardous waste which is the subject of such proceeding relating to such site.

5. Bona fide prospective purchaser. (a) The term "bona fide prospective purchaser" means, with respect to a site:

(1) a person who:

(i) acquires ownership of the site after October seventh, two thousand three; and

(ii) establishes by a preponderance of the evidence each of the criteria described in paragraph (b) of this subdivision; and

(2) a person:

(i) who acquires a leasehold interest in the site after October

seventh, two thousand three;

(ii) who establishes by a preponderance of the evidence that the leasehold interest is not designed to avoid liability under this title by any person; and

(iii) with respect to whom any of the following conditions apply:

(A) The owner of the site that is subject to the leasehold interest is a person described in subparagraph one of this paragraph.

(B)(I) The owner of the site that is subject to the leasehold interest was a person described in subparagraph one of this paragraph at the time the leasehold interest was acquired, but can no longer establish by a preponderance of the evidence each of the criteria described in paragraph (b) of this subdivision due to circumstances unrelated to any action of the person who holds the leasehold interest; and

(II) The person who holds the leasehold interest establishes by a preponderance of the evidence each of the criteria described in subparagraphs one, three, four, five, six, seven, and eight of paragraph (b) of this subdivision.

(C) The person who holds the leasehold interest establishes by a preponderance of the evidence each of the criteria described in paragraph (b) of this subdivision.

(b) Criteria. The criteria described in this paragraph are as follows:

(1) Disposal prior to acquisition. All disposal of hazardous waste at the site occurred before the person acquired the site.

(2) Inquiries. (i) In general. The person made all appropriate inquiries into the previous ownership and uses of the site in accordance with generally accepted good commercial and customary standards and practices in accordance with clause (ii) of this subparagraph.

(ii) Standards and practices. The standards and practices referred to in subparagraphs two, four, and five of paragraph (c) of subdivision four of this section shall be considered to satisfy the requirements of this subparagraph.

(3) Notices. The person provides all legally required notices with respect to the discovery or disposal of any hazardous waste at the site.

(4) Care. The person exercises appropriate care with respect to hazardous waste found at the site by taking reasonable steps to:

(i) stop any continuing disposal;

(ii) prevent any threatened future disposal; and

(iii) prevent or limit human, environmental, or natural resource exposure to any previously disposed hazardous waste.

(5) Cooperation, assistance, and access. The person provides full cooperation, assistance, and access to persons that are authorized to conduct response actions or natural resource restoration at a site (including the cooperation and access necessary for the installation, integrity, operation, and maintenance of any complete or partial response actions or natural resource restoration at the site).

(6) Institutional control. The person:

(i) is in compliance with any land use restrictions established or relied on in connection with the response action at a site; and

(ii) does not impede the effectiveness or integrity of any institutional control employed at the site in connection with a response action.

(7) Requests; subpoenas. The person complies with any request for information or administrative subpoena issued by the commissioner under this chapter.

(8) No affiliation. The person is not:

(i) potentially liable, or affiliated with any other person that is potentially liable, for response costs at a site through:

(A) any direct or indirect familial relationship; or

(B) any contractual, corporate, or financial relationship (other than a contractual, corporate, or financial relationship that is created by the instruments by which title to the facility is conveyed or financed, by a tenancy, by the instruments by which a leasehold interest in the site is created, or by a contract for the sale of goods or services); or

(ii) the result of a reorganization of a business entity that was potentially liable.

§ 27-1325. Financial responsibility provisions.

1. The department shall promulgate regulations regarding financial responsibility for the implementation of an inactive hazardous waste disposal site remedial program.

2. Financial responsibility required by subdivision one of this

section may be established in accordance with regulations promulgated by the commissioner by any one, or any combination, of the following: insurance, guarantee, surety bond, letter of credit, or qualification as a self-insurer. In promulgating requirements under this section, the commissioner is authorized to specify policy or other contractual terms, conditions, or defenses which are necessary or are unacceptable in establishing such evidence of financial responsibility in order to effectuate the purposes of this article.

3. In any case where the responsible person is in bankruptcy, reorganization, or arrangement pursuant to the Federal Bankruptcy Code or where, with reasonable diligence, jurisdiction in any state or federal court within the state cannot be obtained over a responsible person likely to be solvent at the time of judgment, any claim arising from conduct for which evidence of financial responsibility shall be provided under this section may be asserted directly against the guarantor providing such evidence of financial responsibility. In the case of any action pursuant to this subdivision, such guarantor shall be entitled to invoke all rights and defenses which would have been available to the responsible person if any action had been brought against the responsible person by the claimant and which would have been available to the guarantor if an action had been brought against the guarantor by the responsible person.

4. The total liability of any guarantor shall be limited to the aggregate amount which the guarantor has provided as evidence of financial responsibility to the responsible person under this chapter. Nothing in this subdivision shall be construed to limit any other state or federal statutory, contractual or common law liability of a guarantor to its responsible person including, but not limited to, the liability of such guarantor for bad faith either in negotiating or in failing to negotiate the settlement of any claim. Nothing in this subdivision shall be construed to diminish the liability of any person under section 27-1313 of this article or other applicable law.

5. For the purpose of this section, the term "guarantor" means any person, other than the responsible person, who provides evidence of

financial responsibility for a responsible person under this section.

§ 27-1327. Recovery of response costs and natural resource damages.

1. Each responsible person shall be strictly liable, jointly and severally, for all response costs and for all natural resource damages resulting from the disposal of hazardous waste at an inactive hazardous waste disposal site. The commissioner may request the attorney general commence an action in a court of competent jurisdiction to recover the response costs and/or natural resource damages. The commissioner shall prioritize recovering response costs and natural resource damages at sites placed in classification 1 or 2, as described in clauses (i) and (ii) of subparagraph one of paragraph b of subdivision two of section 27-1305 of this title, that are located in disadvantaged communities.

2. A determination or assessment of natural resource damages for the purposes of this section made or adopted by the commissioner in accordance with any applicable regulations promulgated under section 27-1315 of this title or under section 9651(c) of title 42 of the United States Code shall have the force and effect of a rebuttable presumption on behalf of the commissioner in any judicial proceeding.

3. In an action to recover response costs and/or natural resource damages, the commissioner may also seek civil penalties under section 71-2705 of this chapter.

4. All amounts received to satisfy liability for natural resource damages shall be credited to the department's natural resource damages fund to be used exclusively to reimburse the reasonable costs of assessing injury, destruction, and/or loss resulting from the disposal of hazardous waste at the site for which the natural resource damages were recovered and for the restoration, rehabilitation, replacement, and/or acquisition of equivalent natural resources. Provided that any such restoration, rehabilitation, replacement and/or acquisition shall prioritize, to the maximum extent practicable, the natural resources of the site for which the damages were recovered.

5. The state shall have an environmental lien for all response costs incurred by the state and for all natural resource damages for which a judicial determination of liability has been made upon such real property located within the state:

- (a) owned by a person liable to the state for such response costs and/or natural resource damages under this title at the time a notice of environmental lien is filed; and
- (b) upon which the disposal of hazardous wastes occurred.

6. An environmental lien shall attach when:

- (a) response costs are incurred by the state and/or a judicial judgment of liability for natural resource damages is entered;
- (b) the responsible person fails to pay such costs within ninety days after a written demand therefor by the department is mailed by certified or registered mail, return receipt requested, and/or fails to pay such natural resource damages within ninety days after entry of judgment; and
- (c) a notice of environmental lien is filed by the department as provided in paragraph (a) of subdivision ten of this section; provided, however, that a copy of the notice of environmental lien is served upon the owner of the real property subject to the environmental lien within thirty days of such filing in accordance with the provisions of section eleven of the lien law.

7. (a) An environmental lien shall continue against the real property until:

- (i) the claim or judgment against the person referred to in subdivision one of this section for response costs and/or natural resource damages is satisfied or becomes unenforceable;
- (ii) the lien is released by the commissioner pursuant to this subdivision;
- (iii) the lien is discharged by payment of monies into court; or
- (iv) the lien is otherwise vacated by court order.

(b) Upon the occurrence of any event under subparagraphs (i) through (iv) of paragraph (a) of this subdivision, except where the lien is vacated by court order, the commissioner shall execute the release of an environmental lien and file the release as provided in subdivision ten

of this section. The commissioner may release an environmental lien where:

(i) a legally enforceable agreement satisfactory to the commissioner has been executed relating to the response costs and/or natural resource damages that are the subject of the lien; or reimbursing the state for such response costs and/or natural resource damages; or an owner or operator of the site subject to the lien agrees to perform remedial work, site management, or other in-kind services of sufficient value to the commissioner; or

(ii) the attachment or enforcement of the environmental lien is determined by the commissioner not to be in the public interest.

8. An environmental lien is subject to the rights of any other person, including an owner, purchaser, holder of a mortgage or security interest, or judgment lien creditor, whose interest is perfected before a lien notice has been filed as provided in subdivision ten of this section.

9. A notice of environmental lien shall state:

(a) that the lienor is the state of New York;

(b) the name of the record owner of the real property on which the environmental lien has attached;

(c) the real property subject to the lien, with a description thereof sufficient for identification;

(d) that the real property described in the notice is the property upon which a disposal of hazardous wastes occurred and that response costs have been incurred by the lienor and/or that natural resource damages have been judicially determined to be due to the lienor as a result of such disposal;

(e) that the owner is potentially liable for response costs and/or subject to a judgment for natural resource damages pursuant to this title; and

(f) that an environmental lien has attached to the described real property.

10. (a) A notice of environmental lien shall be filed in the clerk's office of the county where the property is situated. If such property is

situated in two or more counties, the notice of environmental lien shall be filed in the office of the clerk of each of such counties. The notice of lien shall be indexed by the county clerk in accordance with the provisions of section ten of the lien law. The notice of lien shall be served upon the owner of the real property subject to the lien in accordance with the provisions of section eleven of the lien law.

(b) A release of an environmental lien shall be filed in the clerk's office of each county where the notice of environmental lien was filed and shall be indexed in the manner prescribed for indexing environmental liens.

11. An environmental lien may be enforced against the property specified in the notice of environmental lien, and an environmental lien may be vacated or discharged, as prescribed in article three of the lien law; provided, however, that nothing in this article or in article three of the lien law shall affect the right of the state to bring an action to recover response costs and/or natural resource damages under section one hundred seven of the federal comprehensive environmental response, compensation, and liability act (42 U.S.C. § 9607 et seq).

12. Amounts received by the commissioner to satisfy all or part of an environmental lien for response costs shall be deposited in the department's hazardous waste remedial fund and amounts received to satisfy all or part of an environmental lien for natural resource damages shall be deposited in the department's natural resource damages fund.

13. Environmental windfall liens. (a) A bona fide prospective purchaser whose liability under this title and/or 42 U.S.C. § 9607 et seq. arises solely from being considered an owner or operator of such site shall not be subject to this subdivision as long as the bona fide prospective purchaser does not impede the performance of a response action or natural resource restoration.

(b) If there are unrecovered response costs incurred by the department at an inactive hazardous waste disposal site for which an owner or operator of the site is not liable by reason of paragraph (a) of this subdivision, and if each of the conditions described in paragraph (c) of

this subdivision are met, the department shall have an environmental windfall lien on the facility, or may by agreement with the owner or operator, obtain from the owner or operator a lien on any other property or other assurance of payment satisfactory to the department, for the unrecovered response costs.

(c) The conditions referred to in paragraph (b) of this subdivision are the following:

(i) A response action for which there are unrecovered costs of the department is carried out at the inactive hazardous waste disposal site.

(ii) The response action increases the fair market value of the site above the fair market value of the site before the response action was initiated.

(d) An environmental windfall lien under paragraph (b) of this subdivision:

(i) shall be in an amount not to exceed the lesser of:

(A) the incremental increase in fair market value of the property, above the fair market value before the response action was initiated, attributable to the response action at the time of a sale or other disposition of the property; or

(B) any unrecovered response costs not subject to an environmental lien attached to the property pursuant to subdivision five of this section;

(ii) shall arise at the time at which costs are first incurred by the department with respect to a response action at the site; and

(iii) shall be subject to the requirements of subdivisions seven, eight, nine, ten, eleven, and twelve of this section.

14. (a) Contribution. Any person may seek contribution from any other person who is liable or potentially liable under this title during or following any civil action under this section. Such claims shall be brought in accordance with this section and the civil practice law and rules, and shall be governed by New York state law. In resolving contribution claims, the court may allocate response costs among liable parties using such equitable factors as the court determines are appropriate. Nothing in this subdivision shall diminish the right of any person to bring an action for contribution in the absence of a civil action under this section.

(b) Settlement. A person who has resolved its liability to the state in an administrative or judicially approved settlement shall not be liable for claims for contribution regarding matters addressed in the settlement. Such settlement does not discharge any of the other potentially liable persons unless its terms so provide, but it reduces the potential liability of the others by the amount of the settlement.

(c) Persons not party to settlement. (i) If the state has obtained less than complete relief from a person who has resolved its liability to the state in an administrative or judicially approved settlement, the state may bring an action against any person who has not so resolved its liability.

(ii) A person who has resolved its liability to the state for some or all of a response action or for some or all of the costs of such action in an administrative or judicially approved settlement may seek contribution from any person who is not party to a settlement referred to in paragraph (b) of this subdivision.

(iii) In any action under this paragraph, the rights of any person who has resolved its liability to the state shall be subordinate to the rights of the state.

15. (a) Limitation on claims. No new action under this title may be commenced for natural resource damages or response costs for an inactive hazardous waste site that was the subject of any previous action commenced prior to the effective date of the chapter of the laws of two thousand twenty-five which added this subdivision, regardless of: the venue in which such previous action was commenced; the statutory or common law source of such action, including settlement agreements; the completeness or totality of permissible recovery of such action; or the finality of any such action.

(b) Actions for natural resource damages. Except as provided in paragraphs (d) and (e) of this subdivision, an initial action under this title for natural resource damages that occurs after the effective date of the chapter of the laws of two thousand twenty-five which added this subdivision, shall be commenced within three years after the later of the following:

(i) the date of the discovery of the loss and its connection with the release in question; or

(ii) for any facility listed on the federal National Priorities List, any site listed on the New York state registry of inactive hazardous waste disposal sites, or any site at which a remedial action under this chapter is otherwise scheduled: the date of completion of the remedial action, excluding operation and maintenance activities.

(c) Actions for response costs. An initial action for recovery of response costs that occurs after the effective date of the chapter of the laws of two thousand twenty-five which added this subdivision shall be commenced:

(i) for a removal action, as defined by the department in regulation, within three years after completion of the removal action, except that such cost recovery action shall be commenced within six years after a determination that continued response action is otherwise appropriate and consistent with the remedial action to be taken for continued response action; and

(ii) for a remedial action, as defined by the department in regulation, within six years after initiation of physical on-site construction of the remedial action, except that, if the remedial action is initiated within three years after the completion of the removal action, costs incurred in the removal action may be recovered in the cost recovery action brought under this subparagraph.

(d) Declaratory judgment. In any such action described in this subdivision, the court shall enter a declaratory judgment on liability for response costs or natural resource damages that will be binding on any subsequent action or actions under this title to recover further response costs or damages. A subsequent action or actions under this section for further response costs at the facility or site may be maintained at any time during the response action, but must be commenced no later than three years after the date of completion of all response action. Except as otherwise provided in this paragraph, an action may be commenced under this section for recovery of costs at any time after such costs have been incurred.

(e) Limitations on actions. No action for contribution for any response costs or natural resource damages may be commenced more than three years after:

(i) the date of judgment in any action under this section for recovery of such costs or damages; or

(ii) the date of a judicially approved settlement with respect to such costs or damages.

§ 27-1329. Abatement actions.

1. (a) Maintenance, jurisdiction, etc. When the commissioner, after investigation, determines that there may be an imminent danger to the health or welfare of the people of the state or the environment, or an actual or threatened release of hazardous waste from an inactive hazardous waste disposal site, as defined in clauses (i) and (ii), respectively, of subparagraph one of paragraph b of subdivision two of section 27-1305 of this title, is resulting in or is likely to result in irreversible or irreparable damage to natural resources, the commissioner may request the attorney general to secure such relief as may be necessary to abate such danger or threat and to grant such relief as the public interest and the equities of the case may require. The commissioner may issue such orders as may be necessary to protect public health and welfare and the environment, provided the commissioner has a reasonable belief that persons responsible for implementing such orders have adequate financial resources to comply, there is evidence sufficient to support liability of such person, and the department has made all reasonable efforts to secure voluntary agreement of such person to abate the imminent danger or threat.

(b) Any such person may request a meeting with the department to discuss reconsideration of an order, within five business days of receiving such order, if such person believes they are not liable. Such request shall include a description of the reason why such person believes they are not liable and any supporting documentation. The department shall make all practicable efforts to hold such meeting within five business days of receiving such request and shall consider its evidence of such person's liability in light of any information and documentation provided.

(c) Any such order issued by the commissioner shall be a final determination of the department and subject to challenge pursuant to article seventy-eight of the civil practice law and rules.

(d) No action may be taken under paragraph (a) of this subdivision

against a bona fide prospective purchaser, as defined in subdivision five of section 27-1323 of this title.

2. Fines; reimbursement. (a) Any person who, without sufficient cause, fails or refuses to comply with any order of the commissioner under subdivision one of this section may, in an action brought in the appropriate court of competent jurisdiction to enforce such order, be fined not more than thirty-seven thousand five hundred dollars for each day in which such violation occurs or such failure to comply continues.

(b) (i) Any person who receives and complies with the terms of any order issued under subdivision one of this section may, within sixty days after completion of the required action, petition the commissioner for reimbursement from the hazardous waste remedial fund pursuant to section ninety-seven-b of the state finance law for the reasonable costs of such action, plus interest. Any interest payable under this subparagraph shall accrue on the amounts expended from the date of expenditure at the same rate as specified for interest on investments of the hazardous substance superfund established under subchapter A of chapter 98 of title 26 of the federal comprehensive environmental response, compensation, and liability act.

(ii) If the commissioner refuses to grant all or part of a petition made under this paragraph, the petitioner may within thirty days of receipt of such refusal file an action against the department pursuant to article seventy-eight of the civil practice law and rules.

(iii) Except as provided in subparagraph (iv) of this paragraph, to obtain reimbursement, the petitioner shall establish by a preponderance of the evidence that such petitioner is not liable for response costs under section 27-1313 of this title and that costs for which such petitioner seeks reimbursement are reasonable in light of the action required by the relevant order.

(iv) A petitioner under subparagraph (i) of this paragraph may also recover its reasonable costs of response to the extent that such petitioner can demonstrate, on the administrative record, that the commissioner's decision in selecting the response action ordered was arbitrary and capricious or was otherwise not in accordance with law. Reimbursement awarded under this subparagraph shall include all reasonable response costs incurred by the petitioner pursuant to the

portions of the order found to be arbitrary and capricious or otherwise not in accordance with law.

(v) Reimbursement awarded by a court under subparagraph (iii) or (iv) of this paragraph may include appropriate costs, fees, and other expenses in accordance with section eighty-six hundred one of the civil practice law and rules.

3. The commissioner shall provide notice of the provisions of this section to known responsible persons at sites listed in clauses (i) and (ii) of subparagraph one of paragraph b of subdivision two of section 27-1305 of this title, within six months of the effective date of the chapter of the laws of two thousand twenty-five which added this section, if the commissioner intends to issue an order to such responsible persons. No such orders shall be issued within a one-year period after the effective date of the chapter of the laws of two thousand twenty-five which added this section.

§ 27-1331. Community participation.

1. To facilitate an inactive hazardous waste disposal site remedial program and enable community members to participate more fully in decisions that affect their community, the department shall provide opportunities for community involvement and shall consult with the public throughout that process, before the department forms or adopts final positions. The primary goals of the community participation program at sites are to facilitate two-way communication between the department and individuals, groups, and organizations that have expressed interest in or are affected by the site or the site's remedial program, with a special focus on sites in disadvantaged communities and to take into account the community's interests in the decision-making process associated with the remediation of sites.

2. All inactive hazardous waste disposal site remedial programs shall include community participation activities which, at a minimum, shall include, but are not limited to, the preparation of a community participation plan, establishment of a document repository, and public

notice to interested individuals and groups with a prescribed comment period at select milestones.

3. The design of each community participation plan, including the level of community involvement and the tools utilized, shall take into account the scope and scale of the proposed inactive hazardous waste disposal site remedial program, local interest and history, location within a disadvantaged community, and other relevant factors. While retaining flexibility to tailor each plan to each site, community participation plans shall embody the following principles of meaningful community participation:

a. opportunities for community involvement should be provided as early as possible in the decision-making process prior to the selection of a preferred course of action by the department and/or the responsible person;

b. activities proposed in such plan should be as reflective of the diversity of interests and perspective found within the community as possible, allowing the public the opportunity to have their views heard and considered, which may include opportunities for dialogue; and

c. full, timely, and accessible disclosure and sharing of information by the department shall be provided, including the provision of technical data and the assumptions upon which any analyses are based.

4. Each community participation plan shall include the following minimum elements:

a. an inactive hazardous waste disposal site remedial program site contact list;

b. the name and address of a document repository and proof of acceptance of this designation by the repository;

c. overview of the site's history and contamination issues, including the nature of threats to public health and the environment, once known;

d. identification of major issues of public concern related to the site and a description of any interim actions planned or taken to address the issues, if appropriate;

e. a description of the phases of the major elements of the inactive hazardous waste disposal site remedial program;

f. a description of community participation activities conducted or planned relative to the inactive hazardous waste disposal site; and

g. a description of any additional community participation activities needed to address public concerns.

5. All community participation plans will be subject to department review and approval. The citizen participation plan shall be updated during the implementation of the inactive hazardous waste disposal site remedial program.

6. Document repository. A document repository shall be established at a location accessible to the public where they can review the inactive hazardous waste disposal site remedial program documents, and an electronic repository shall also exist on the department's website.

a. Documents shall be placed in the repository, which are:

(i) approved by the department; or

(ii) otherwise designated by the department for inclusion.

b. The responsible person shall make available to the department all appropriate documents for inclusion in the repository.

TITLE 14

BROWNFIELD CLEANUP PROGRAM

Section 27-1401. Short title.

27-1403. Declaration of policy and findings of fact.

27-1405. Definitions.

- 27-1407. Request for participation.
- 27-1409. Brownfield site cleanup agreement.
- 27-1411. Work plan requirements.
- 27-1413. Alternatives analysis.
- 27-1415. Remedial program requirements.
- 27-1417. Citizen participation.
- 27-1419. Certification of completion.
- 27-1420. Brownfield cleanup program report.
- 27-1421. Liability limitation.
- 27-1425. Change of use.
- 27-1427. Reserved.
- 27-1429. Permit waivers.
- 27-1431. Access to sites.
- 27-1433. Waiver of interest or penalties or other charges on
brownfield properties.
- 27-1437. BCP-EZ program.

§ 27-1401. Short title.

This title shall be known and may be cited as the "Brownfield Cleanup Program".

§ 27-1403. Declaration of policy and findings of fact.

The legislature hereby finds that there are thousands of abandoned and likely contaminated properties that threaten the health and vitality of the communities they burden, and that these sites, known as brownfields, are also contributing to sprawl development and loss of open space. It is therefore declared that, to advance the policy of the state of New York to conserve, improve, and protect its natural resources and environment and control water, land, and air pollution in order to enhance the health, safety, and welfare of the people of the state and their overall economic and social well being, it is appropriate to adopt this act to encourage persons to voluntarily remediate brownfield sites for reuse and redevelopment by establishing within the department a

statutory program to encourage cleanup and redevelopment of brownfield sites. All remedies shall be fully protective of public health and the environment including, but not limited to, groundwater according to its classification pursuant to section 17-0301 of this chapter. A remedial program that achieves a permanent cleanup of a contaminated site, including the restoration of groundwater to its classified use, is to be preferred over a remedial program that does not do so. It is the intent of the legislature that the provisions of this brownfield cleanup program shall not be construed as limiting or otherwise affecting any authority conferred upon the department by any other provision of law.

§ 27-1405. Definitions.

1. "Applicant" shall mean a person whose request to participate in the brownfield cleanup program under this title has been accepted by the department:

(a) "Participant" shall mean an applicant who either: (i) was the owner of the site at the time of the disposal or discharge of contaminants or (ii) is otherwise a person responsible according to applicable principles of statutory or common law liability, unless such person's liability arises solely as a result of such person's ownership or operation of or involvement with the site subsequent to the disposal or discharge of contaminants.

(b) "Volunteer" shall mean an applicant other than a participant, including without limitation a person whose liability arises solely as a result of such person's ownership or operation of or involvement with the site subsequent to the disposal or discharge of contaminants, provided however, such person exercises appropriate care with respect to contamination found at the facility by taking reasonable steps to:

- (i) stop any continuing release;
- (ii) prevent any threatened future release; and
- (iii) prevent or limit human, environmental, or natural resource exposure to any previously released contamination.

2. "Brownfield site" or "site" shall mean any real property where a contaminant is present at levels exceeding the soil cleanup objectives

or other health-based or environmental standards, criteria or guidance adopted by the department that are applicable based on the reasonably anticipated use of the property, in accordance with applicable regulations. Such term shall not include real property:

(a) listed in the registry of inactive hazardous waste disposal sites under section 27-1305 of this article at the time of application to this program and given a classification as described in subparagraph one or two of paragraph b of subdivision two of section 27-1305 of this article; provided, however, real property listed in the registry of inactive hazardous waste disposal sites under subparagraph two of paragraph b of subdivision two of section 27-1305 of this article, where such real property is owned by a volunteer or under contract to be transferred to a volunteer, shall not be deemed ineligible to participate, provided that, prior to the site being accepted into the brownfield cleanup program, the department has not identified any responsible party for that property having the ability to pay for the investigation or cleanup of the property and further provided that the status of any such site as listed in the registry shall not be altered prior to the issuance of a certificate of completion pursuant to section 27-1419 of this title. The department's assessment of eligibility under this paragraph shall not constitute a finding concerning liability with respect to the property;

(b) listed on the national priorities list established under authority of 42 U.S.C. section 9605;

(c) subject to an enforcement action under title seven or nine of this article, or permitted or required to be permitted as a treatment, storage or disposal facility; provided, that nothing herein contained shall be deemed otherwise to exclude from the scope of the term "brownfield site" a hazardous waste treatment, storage or disposal facility having interim status according to regulations promulgated by the commissioner and provided further that real property owned by a volunteer or under contract to be transferred to a volunteer shall not be deemed ineligible to participate provided that, prior to the site being accepted into the brownfield cleanup program, the department has not identified any responsible party for that property having the ability to pay for the investigation or cleanup of the property;

(d) subject to an order for cleanup pursuant to article twelve of the

navigation law or pursuant to title ten of article seventeen of this chapter except such property shall not be deemed ineligible if it is subject to a stipulation agreement; or

(e) subject to any other on-going state or federal environmental enforcement action related to the contamination which is at or emanating from the site subject to the present application.

3. "Brownfield site contact list" shall mean a list of persons, government agencies, groups, or organizations, including, but not limited to the chief executive officer and zoning board of each county, city, town and village in which such site is located, in a city with a population of one million or more, any community board in which such site is located, the public water supplier which serves the area in which such site is located, any site residents, any person who has requested to be placed on the site contact list, and the administrator of any school or day care facility located on the site for the purposes of posting and/or dissemination at the facility. For the purposes of this section "water supplier" means any public water system as such term is defined for the purposes of the sanitary code of the state of New York as authorized by section two hundred twenty-five of the public health law. Provided, however, that where the site or adjacent real property contains multiple dwelling units, the applicant shall work with the department to develop an alternative method for providing such notice in lieu of mailing to each individual.

4. "Brownfield site cleanup agreement" shall mean an agreement executed in accordance with section 27-1409 of this title by an applicant and the department for the purpose of completing a brownfield site remedial program.

5. "Brownfield site remedial program" or "remedial program" shall mean all remedial activities or actions undertaken to eliminate, remove, treat, abate, control, manage, or monitor contamination at or emanating from a brownfield site, including, but not limited to, the following:

(a) remedial investigation and remedy selection activities needed to develop such a program;

(b) design activities;

(c) construction activities including without limitation grading, contouring, trenching, grouting, capping, excavating, transporting, incinerating, thermally treating, chemically treating, biologically treating, constructing leachate collection and treatment systems or application of innovative technologies approved by the department;

(d) interim remedial measures;

(e) post-construction operation, maintenance, and monitoring;

(f) restoration of the environment;

(g) involvement by local governments of jurisdiction and by the general public; or

(h) oversight by the department.

6. "Citizen participation plan" shall mean the description of citizen participation activities prepared and carried out pursuant to section 27-1417 of this title.

7. "Concentrated solid or semi-solid hazardous wastes" shall mean solid or semi-solid hazardous wastes present in surface or subsurface soil, surface water or groundwater in a concentrated form, such as precipitated metallic salts, metal oxides, or chemical sludges.

7-a. "Contaminant" shall mean hazardous waste and/or petroleum as such terms are defined in this section.

8. "Contamination" or "contaminated" shall mean the presence of a contaminant in any environmental media, including soil, surface water, groundwater, air, or indoor air.

9. "Dense non-aqueous phase liquid" or "DNAPL" shall mean a hazardous waste that is a liquid that is denser than water and does not dissolve or mix easily in water.

10. "Document repository" shall mean a repository of brownfield site remedial program documents approved by the department or released for public notice established in a publicly accessible building near the location of such site.

11. "Engineering control" shall mean any physical barrier or method employed to actively or passively contain, stabilize, or monitor contamination, restrict the movement of contamination to ensure the long-term effectiveness of a remedial program, or eliminate potential exposure pathways to contamination. Engineering controls include, but are not limited to, pavement, caps, covers, subsurface barriers, vapor barriers, slurry walls, building ventilation systems, fences, access controls, provision of alternative water supplies via connection to an existing public water supply, adding treatment technologies to such water supplies, and installing filtration devices on private water supplies.

12. "Feasible" shall mean suitable to site conditions, capable of being successfully carried out with available technology, implementable and cost effective.

13. "Financial assurance" shall include but not be limited to surety bonds, trust funds, letters of credit, insurance or a multiple of financial mechanisms as determined to be adequate by the department.

14. "Free product" shall mean an immiscible non-aqueous phase liquid, other than a dense non-aqueous phase liquid present as a liquid in surface or sub-surface soil, surface water or groundwater in a potentially mobile state.

15. "Grossly contaminated soil" shall mean soil which contains free product or residual contamination which is identifiable either visually, through the perception of odor, by elevated contaminant vapor levels, by field instrumentation, or is otherwise readily detectable.

16. "Groundwater" shall mean water below the land surface in a saturated zone of soil or rock. This includes perched water separated from the main body of groundwater by an unsaturated zone.

17. "Hazardous waste" shall mean a hazardous waste as defined in section 27-1301 of this article.

18. "Institutional control" shall mean any non-physical means of enforcing a restriction on the use of real property that limits human or environmental exposure, restricts the use of groundwater, provides notice to potential owners, operators, or members of the public, or prevents actions that would interfere with the effectiveness of a remedial program or with the effectiveness and/or integrity of operation, maintenance, or monitoring activities at or pertaining to a brownfield site.

19. "Interim remedial measures" shall mean activities to address both emergency and non-emergency site conditions, which can be undertaken without extensive investigation and evaluation, to prevent, mitigate, or remedy environmental damage or the consequences of environmental damage attributable to a site, including but not limited to, the following activities: construction of diversion ditches, collection systems, free product recovery systems, or leachate collection systems; construction of fences or other barriers; installation of water filters; provision of alternative water systems; the removal of free product; or plume control.

20. "Light Non Aqueous Phase Liquid" or "LNAPL" shall mean a contaminant that is a liquid that is lighter than water and does not dissolve or mix easily in water.

21. "Municipality" shall mean a local public authority or public benefit corporation, a county, city, town, village, school district, supervisory district, district corporation, improvement district within a county, city, town or village or Indian nation or tribe recognized by the United States with a reservation wholly or partly within the boundaries of the state, or any combination thereof.

22. "Newspaper notice" shall mean the placement of a prominently located, paid newspaper advertisement in the community bulletin section or similar local section of a newspaper of general circulation in the vicinity of the brownfield site which is the subject of the notice. Such notice shall be in English and in any other language spoken by significant numbers of people within the community.

23. "Non-aqueous phase liquid" shall mean a liquid that does not dissolve or mix easily in water.

24. "Off-site contamination" shall mean any contamination which has emanated from a brownfield site beyond the real property boundaries of such site, via movement through air, indoor air, soil, surface water or groundwater.

25. "On-site contamination" shall mean any contamination located within the real property boundaries of a brownfield site.

26. "Permanent cleanup" or "permanent remedy" shall mean a cleanup or remedy that would allow a site to be used for any purpose without restriction and without reliance on the long-term employment of institutional or engineering controls.

27. "Petroleum" shall have the meaning set forth in section one hundred seventy-two of the navigation law.

28. "Residual contamination" shall mean contamination remaining as a solid, semi-solid or immiscible liquid in surface or subsurface soil, geologic matrix pore spaces or fractures and held in place by capillary forces or other physical or chemical forces that will not drain from the formation.

29. "Affordable housing project" shall mean (a) a project as shall be defined in regulation by the department, after consultation with the division of housing and community renewal, which shall at a minimum, establish the percentage of units in the project that must be below a defined percentage of the area median income; or (b) a project situated on a brownfield site that demonstrates the project is the subject of a determination by a federal, state or local government housing agency that all or a portion of the project or site will qualify for benefits, including but not limited to real property taxation exemptions, is or will be eligible under an affordable housing program which requires that a percentage of residential rental or home ownership dwelling units be

dedicated to tenants or homeowners at a defined maximum percentage or percentages of area median income based on the occupants' households annual gross income. Such federal, state or local affordable housing program shall confer a benefit to the project. For the purposes of this subdivision, the term "benefit" shall be broadly construed, and shall include, but not be limited to, tax benefits, including real estate tax benefits, tax credits, bond financing, subsidy financing, and zoning variances or waivers. Further, the department may by regulation, after consulting with the division of housing and community renewal, exclude specific benefits from qualifying pursuant to this subdivision. To demonstrate eligibility under this subdivision, the project must present a certification of compliance or other evidence of eligibility by a federal, state, or local government affordable housing agency that such project is an affordable housing project. For purposes of this subdivision, "area median income" shall mean the area median income for the primary metropolitan statistical area or for the county if located outside a metropolitan statistical area, as determined by the United States department of housing and urban development or its successor for a family of four, as adjusted for family size.

30. "Underutilized" shall be defined in regulation by the department, after consultation with the business community and the city of New York. Such regulations shall be adopted no later than October first, two thousand fifteen and take into consideration the existing use of a property relative to allowable development under zoning, the need for substantial government assistance to redevelop and other relevant factors.

31. "Upside down" shall mean a property where the projected and incurred cost of the investigation and remediation which is protective for the anticipated use of the property equals or exceeds seventy-five percent of its independent appraised value, as of the date of submission of the application for participation in the brownfield cleanup program, developed under the hypothetical condition that the property is not contaminated.

32. "Disadvantaged community" shall mean a community that is

identified pursuant to section 75-0111 of this chapter.

33. "Renewable energy facility site" shall mean real property: (a) that is used for a renewable energy system, as defined in section sixty-six-p of the public service law; or (b) any co-located system storing energy generated from such a renewable energy system prior to delivering it to the bulk transmission, sub-transmission, or distribution system.

§ 27-1407. Request for participation.

1. A person who seeks to participate in this program shall submit a request to the department on a form provided by the department. Such form shall include information to be determined by the department sufficient to allow the department to determine eligibility and the current, intended and reasonably anticipated future land use of the site pursuant to section 27-1415 of this title. Any such person shall submit an investigation report sufficient to demonstrate that the site requires remediation in order to meet the remedial requirements of this title.

1-a. If the person is also seeking a determination that the site is eligible for the tangible property credit component of the brownfield redevelopment tax credit pursuant to paragraph three of subdivision (a) of section twenty-one of the tax law for a site located in a city having a population of one million or more, such person shall submit information sufficient to demonstrate that: (a) at least half of the site area is located in an environmental zone as defined in section twenty-one of the tax law; (b) the property is upside down or underutilized; (c) the project is an affordable housing project; (d) the project is within a disadvantaged community, within a designated brownfield opportunity area, and meets the conformance determinations pursuant to subdivision ten of section nine hundred seventy-r of the general municipal law; or (e) the project is being developed as a renewable energy facility site. An applicant may request an eligibility determination for tangible property credits at any time from application until the site receives a certificate of completion pursuant to section

27-1419 of this title except for sites seeking eligibility under the underutilized category.

Sites are not eligible for tangible property tax credits if: (a) the contamination from ground water or soil vapor is solely emanating from property other than the site subject to the present application; or (b) the department has determined that the property has previously been remediated pursuant to titles nine, thirteen and fourteen of this article, title five of article fifty-six of this chapter and article twelve of the navigation law such that it may be developed for its then intended use.

2. If the person chooses, such person may also submit a work plan for a site investigation or a final report describing the results of an investigation that meets the requirements of this article.

3. The department shall notify the person requesting participation in this program within thirty days after receiving such request that such request is either complete or incomplete. In the event the application is determined to be incomplete the department shall specify in writing the missing necessary information required pursuant to this article to complete the application and shall have ten days after receipt of the missing information to issue a written determination if the application is complete.

4. Upon the receipt of an application, the department shall notify the administrator of the New York environmental protection and spill compensation fund to determine whether such person has been identified as responsible for cleanup and removal costs for the discharge of petroleum at or emanating from the brownfield site for which the person is seeking participation and whether there is an outstanding claim against such person pursuant to article twelve of the navigation law. The administrator shall notify the department and the person within thirty days of such notice of any outstanding claim by the fund against such person at the brownfield site for which the person is seeking participation.

5. Upon the determination that the application is complete, the department shall commence a thirty day comment period and place a notification of receipt of request to participate in this program in the environmental notice bulletin and provide newspaper notice. The department shall also provide notice thereof in writing to the chief executive officer and zoning board of each county, city, town and village in which such brownfield site is located, residents on and/or adjacent to the site, the public water supplier which services the area in which such brownfield site is located, any person who has requested to be placed on the brownfield site contact list and the administrator of any school or day care facility located on and/or adjacent to the site for the purposes of posting and/or dissemination at the facility. For purposes of this section "water supplier" means any public water system as such term is defined for the purposes of the sanitary code of the state of New York as authorized by section two hundred twenty-five of the public health law. Provided, however, that where the site or adjacent real property contains multiple dwelling units, the person shall work with the department to develop an alternative method for providing such notice in lieu of mailing to each individual.

6. The department shall use all best efforts to expeditiously notify the applicant within forty-five days after receiving a complete application for participation that such request is either accepted or rejected, and, for any applicant seeking to receive the tangible property credit component of the brownfield redevelopment tax credit pursuant to paragraph three of subdivision (a) of section twenty-one of the tax law, shall concurrently notify the applicant whether the criteria for receiving such component as set forth in subdivision one of this section have been met.

7. In the event a final investigation report describing the results of an investigation that meets the requirements of this article was submitted with the application, the person shall establish a document repository, notify individuals on the brownfield site contact list, and provide for a thirty day comment period. Within sixty days after receiving a person's application the commissioner shall inform the person in writing that the investigation is complete or that the

investigation is incomplete and specify the missing necessary information required pursuant to this article to complete the investigation and/or the final investigation report.

8. The department shall reject such request if:

(a) the department determines that the request is for real property which does not meet the requirements of a brownfield site as defined in this title; or

(b) there is an action or proceeding relating to the brownfield site against the person who is requesting participation that is pending in any civil or criminal court in any jurisdiction, or before any state or federal administrative agency or body, wherein the state or federal government seeks the investigation, removal, or remediation of contamination or penalties;

(c) there is an order providing for the investigation, removal, or remediation of contamination relating to the brownfield site against the person who is requesting participation; or

(d) The person requesting participation is subject to an outstanding claim as provided in subdivision four of this section.

9. The department may reject such request for participation if the department determines that the public interest would not be served by granting such request. The department shall consider factors, including but not limited to, the following:

(a) The person has been determined in an administrative, civil or criminal proceeding to have violated any provision of this article, any related order or determination of the commissioner, any regulation promulgated pursuant to this article, or any similar statute, regulation, order of the federal or other state government.

(b) The person has been denied entry into this program based upon one or more of the provisions of this subdivision, or a similar provision of federal or other state law.

(c) The person has been found in a civil proceeding to have committed a negligent or intentionally tortious act, or has been convicted in a criminal proceeding of a criminal act involving the handling, storing, treating, disposing or transporting of contaminants.

(d) The person has been convicted of a criminal offense under the laws

of any state or of the United States which involves a violent felony offense, fraud, bribery, perjury, theft, or an offense against public administration as that term is used in article one hundred ninety-five of the penal law.

(e) The person has in any matter within the jurisdiction of the department knowingly falsified or concealed a material fact or knowingly submitted a false statement or made use of or made a false statement on or in connection with any document or application submitted to the department.

(f) The person is either:

(1) an individual who had a substantial interest in or acted as a high managerial agent or director for any corporation, partnership, association or organization which committed an act or failed to act, and such act or failure to act could be the basis for the denial of a request for participation pursuant to this section or regulations promulgated thereunder if such corporation, partnership, association or organization submitted a request under this title;

(2) a corporation, partnership, association, organization, or any principal thereof, or any person holding a substantial interest therein, which committed an act or failed to act, and such act or failure to act could be the basis for the denial of a request for participation pursuant to this section or regulations promulgated thereunder if such corporation, partnership, association or organization submitted a request under this title; or

(3) a corporation, partnership, association or organization or any high managerial agent or director thereof, or any person holding a substantial interest therein, acting as high managerial agent or director for or holding a substantial interest in another corporation, partnership, association or organization which committed an act or failed to act, and such act or failure to act could be the basis for the denial of a request for a participation pursuant to this section or regulations promulgated thereunder had such other corporation, partnership, association or organization submitted a request under this title.

(g) The person's participation in any remedial program under the department's oversight was terminated by the department or by a court for failure to substantially comply with an agreement or order.

For the purposes of this subdivision, "high managerial agent" has the same meaning as is given that term in section 20.20 of the penal law, and "substantial interest" shall be defined in regulations promulgated by the commissioner.

§ 27-1409. Brownfield site cleanup agreement.

The agreement shall include, but not be limited to, the following provisions:

1. One describing the boundaries of the real property that is subject to the brownfield site cleanup agreement;

2. One requiring: (a) the participant to pay for state costs, including the recovery of state costs incurred before the effective date of such agreement; provided, however, that such costs may be based on a reasonable flat-fee for oversight, which shall reflect the projected future state costs incurred in negotiating and overseeing implementation of such agreement; and

(b) with respect to a brownfield site which the department has determined constitutes a significant threat to the public health or environment the department may include a provision requiring the applicant to provide a technical assistance grant, as described in subdivision four of section 27-1417 of this title and under the conditions described therein, to an eligible party in accordance with procedures established under such program, with the cost of such a grant incurred by a volunteer serving as an offset against such state costs;

3. One setting forth a process for resolving disputes arising from the evaluation, analysis, and oversight of the implementation of the work plan as described;

4. One requiring an indemnification provision which holds the state harmless from any claim, suit, action, and cost of every name and description arising out of or resulting from the fulfillment or

attempted fulfillment of the agreement, except for those claims, suits, actions, and costs arising from the state's gross negligence or willful or intentional misconduct;

5. One authorizing the department to terminate a brownfield site cleanup agreement at any time during the implementation of such agreement if the applicant implementing such agreement fails to substantially comply with such agreement's terms and conditions;

6. One stating that the department may exempt the applicant from the requirement to obtain any state or local permit or other authorization pursuant to section 27-1429 of this title;

7. One stating that the department shall not consider the applicant an operator of such brownfield site based solely upon execution or implementation of such brownfield site cleanup agreement for purposes of remediation liability;

8. One requiring that the applicant conduct investigation and/or remediation activities pursuant to one or more work plans which are approved by the department;

9. One requiring the preparation and implementation of a citizen participation plan consistent with the requirements of this title as soon as possible following execution of the agreement but no later than prior to the preparation of a draft remedial investigation plan by the applicant which shall include a description of citizen participation activities already performed by the applicant and/or the department;

10. One requiring a waiver by the applicant, effective upon the execution of the brownfield site cleanup agreement, any right such applicant has or may have to make a claim against the state of New York pursuant to article twelve of the navigation law with respect to the brownfield site, and a release of the New York environmental protection and spill compensation fund from any and all legal or equitable claims or causes of action that such applicant may have as a result of entering into a brownfield site cleanup agreement or fulfilling a brownfield site

remedial program at such site; and

11. The inclusion of other conditions considered necessary by the department concerning the effective and efficient implementation of this title;

12. Nothing in this section shall prohibit or limit the department from terminating a brownfield site cleanup agreement at any time during its implementation if the applicant fails to comply substantially with such agreement's terms and conditions.

13. After acceptance by the department, an executed brownfield cleanup agreement shall be submitted and returned to the department with payment of a nonrefundable program fee in the amount of fifty thousand dollars, which shall be deposited to the credit of the oversight and assistance account of the hazardous waste remedial fund pursuant to section ninety-seven-b of the state finance law. The department shall waive such fee upon a demonstration of financial hardship by the applicant. To demonstrate financial hardship the applicant must show but for the program fee, remediation of the brownfield site would not be economically viable. When evaluating financial hardship, the department will consider whether the applicant has waived their rights to tax credits, whether the location of the proposed brownfield site is in a disadvantaged community or the proposed brownfield site is being developed as an affordable housing project, the assets and income of the applicant, and any other factors deemed relevant. The department shall establish regulations governing the demonstration of financial hardship. Program fees shall not qualify for any of the tax credits available for brownfield sites under sections twenty-one, twenty-two, and twenty-three of the tax law.

§ 27-1411. Work plan requirements.

1. A remedial investigation work plan shall provide for the investigation and characterization of the nature and extent of the contamination within the boundaries of the brownfield site; provided,

however, a participant shall also be required to fully investigate and characterize the nature and extent of contamination emanating from such site; and a volunteer must perform a qualitative exposure assessment pursuant to subdivision two of section 27-1415 of this title regarding contamination emanating from such site. Such work plan shall require that the applicant cause a final report to be prepared and submitted to the department that identifies the investigation activities completed pursuant to such work plan. Such final report, at a minimum, shall:

(a) Fully characterize the nature and extent of contamination at the brownfield site; a participant shall also fully characterize the nature and extent of contamination that has emanated from the brownfield site; and a volunteer shall describe the findings of the off-site exposure assessments;

(b) State whether the completed investigation has demonstrated that conditions at the brownfield site (1) require remediation in order to meet the remedial requirements of this title; or (2) meet the requirements of this title without necessity for remediation;

(c) Within twenty days of the completion of the final report the department shall make a final determination regarding whether the site poses a significant threat based on criteria promulgated pursuant to title thirteen of this article; and

(d) For it to be determined that the requirements of this title have been met without the necessity for remediation, an alternatives analysis pursuant to section 27-1413 of this title must support such determination for all sites which do not meet the requirements in Track 1 for unrestricted use and the department must have made a final determination that the site does not pose a significant threat.

2. A remedial work plan shall provide for the development and implementation of a remedial program for such contamination within the boundaries of such brownfield site; provided, however, that a participant shall also be required to provide in such work plan for the development and implementation of a remedial program for contamination that has emanated from such site.

3. Interim remedial measures. (a) Interim remedial measure work plan. For interim remedial measures that are not emergency response actions an

interim remedial measure work plan shall be prepared by the applicant containing such provisions as the department deems appropriate.

(b) Interim remedial measure report. For interim remedial measures that are not emergency response actions, an interim remedial measure report must be prepared and submitted to the department which shall include a description of all interim remedial measures completed pursuant to the interim remedial measure work plan.

4. The commissioner shall use all best efforts to expeditiously approve, modify, or reject a proposed work plan within forty-five days from its receipt or within fifteen days of the close of the comment period, whichever is later.

(a) If the commissioner rejects a proposed work plan, the commissioner shall notify the applicant and specify the reasons for rejecting same.

(b) If the commissioner approves or modifies such proposed work plan, the commissioner shall notify the applicant, in writing, that the proposed work plan has been approved or modified. If the commissioner requires a modification, the applicant may agree to modify such proposed work plan or withdraw it from consideration.

5. Within six months of the determination that a site poses a significant threat, in the event that the applicant is a volunteer, the department shall bring an enforcement action against any parties known or suspected to be responsible for contamination (other than such volunteer) at or emanating from the site according to applicable principles of statutory or common law liability. If such action cannot be brought, or does not result in the initiation of a remedial program by such party or parties at such site, the department shall use best efforts to begin a remedial program to perform the remediation of off-site contamination at such site within one year of the completion of such enforcement action or the completion of the volunteer's on-site remedial program, whichever is later. The state shall use moneys from the hazardous waste remedial fund established pursuant to section ninety-seven-b of the state finance law, and/or from the New York environmental protection and spill compensation fund established pursuant to section one hundred seventy-nine of the navigation law, as appropriate, to undertake the investigation and/or remediation of such

contamination. The state's costs incurred relative to such off-site contamination shall be recoverable by the state from the person or persons responsible.

6. An applicant shall include with every report submitted to the department a schedule for the submission of any subsequent work plan required to meet the requirements of this title.

§ 27-1413. Alternatives analysis.

1. For sites proposed to be remediated under Track 1 pursuant to section 27-1415 of this title, the applicant shall develop and evaluate at least one remedial alternative.

2. For all other sites, the applicant shall develop and evaluate at least two remedial alternatives, one of which would achieve a Track 1 cleanup. The department shall have the discretion to require the evaluation of additional alternatives at a site that has been determined to pose a significant threat. The applicant shall submit the alternatives analysis as a part of the remedial work plan to the department for review, approval, modification or rejection.

3. Unless the applicant has elected to remediate the site to Track 1, the department may require the applicant, as a condition of continuing under this program, to develop and evaluate a Track 2 cleanup pursuant to section 27-1415 of this title for such non-significant threat site upon due consideration of the following factors:

(a) the degree to which the remedy selection criteria would be better satisfied by a Track 2 cleanup;

(b) the degree of impact a Track 2 cleanup would have on the applicant's ability to successfully cleanup and/or redevelop the property;

(c) the benefit to the environment to be realized by the expeditious remediation of the property; and

(d) the economic benefit to the state to be realized by the expeditious remediation of the property.

4. For sites that the department has determined constitute a significant threat, the department shall select the remedy from a department-approved alternatives analysis prepared by the applicant.

5. For sites that the department has determined do not constitute a significant threat, the applicant may select the remedy from a department-approved alternatives analysis, which analysis shall contain at least two remedial alternatives as set forth in subdivision two of this section. Provided, however, that where the department has required the applicant to develop and evaluate a Track 2 cleanup, the department shall have the discretion to, as a condition of continuing under this program, require the applicant to implement such remedy.

§ 27-1415. Remedial program requirements.

1. Remedial programs. All remedial programs shall be protective of public health and the environment including but not limited to groundwater according to its classification pursuant to section 17-0301 of this chapter; drinking water, surface water and air (including indoor air); sensitive populations, including children; and ecological resources, including fish and wildlife. In all cases, the target risk of residual contamination at a site shall not exceed an excess cancer risk of one in one million for carcinogenic end points and a hazard index of one for non-cancer end points.

2. Investigation. (a) Remedial investigation. A remedial investigation shall fully characterize the nature and extent of contamination at and/or emanating from a brownfield site. Such investigation shall emphasize data collection and sampling and monitoring, as necessary, and includes but is not limited to: characterization of site geologic and hydrogeologic conditions, including groundwater flow, contaminant movement, and the response of the groundwater system to extraction; and assessment of the existing and potential impact of groundwater contamination on private or community water supply wells, surface water quality, air quality, and indoor air quality.

(b) Qualitative exposure assessment. A qualitative exposure assessment shall qualitatively determine the route, intensity, frequency, and duration of actual or potential exposures of humans, fish and wildlife to contaminants. Such assessment must analyze the nature and size of the population currently exposed or which may reasonably be expected to be exposed to the contaminants that are present at or emanating from a site, and shall include a determination of the reasonably anticipated future land use of the site and affected off-site areas and the reasonably anticipated future groundwater use. A qualitative exposure assessment consists of characterizing the exposure setting, identifying current and reasonably foreseeable exposure pathways, and evaluating contaminant fate and transport. Some off-site field investigation to identify and sample any potential areas of contamination may be required to support the exposure assessment.

3. Selection. The remedial program for a site shall be selected upon due consideration of the following factors:

(a) Conformance to standards and criteria that are generally applicable, consistently applied, and officially promulgated, that are either directly applicable, or that are not directly applicable but are relevant and appropriate, unless good cause exists why conformity should be dispensed with, and with consideration being given to guidance determined, after the exercise of engineering judgment, to be applicable. Such good cause exists if any of the following is present:

(i) the proposed action is only part of a complete program that will conform to such standard or criterion upon completion; or

(ii) conformity to such standard or criterion will result in greater risk to the public health or to the environment than alternatives; or

(iii) conformity to such standard or criterion is technically impracticable from an engineering perspective; or

(iv) the program will attain a level of performance that is equivalent to that required by the standard or criterion through the use of another method or approach.

(b) Overall protectiveness of the public health and the environment.

(c) Short-term effectiveness.

(d) Long-term effectiveness and permanence. A remedial program that achieves a complete and permanent cleanup of the site is to be preferred

over a remedial program that does not do so.

(e) Reduction in toxicity, mobility and/or volume of contamination with treatment. A remedial program that permanently and significantly reduces the toxicity, mobility and/or volume of contamination is to be preferred over a remedial program that does not do so. The following is the hierarchy of the remedial technologies ranked from the most preferable to the least preferable: destruction, on-site or off-site; separation/treatment, on-site or off-site; solidification/chemical fixation, on-site or off-site; control and isolation, on-site or off-site.

(f) Implementability.

(g) Cost effectiveness.

(h) Community acceptance.

(i) Land use. The current, intended, and reasonably anticipated future land uses of the site and its surroundings shall be considered in the selection of the remedy for soil remediation, provided the department determines that there is reasonable certainty associated with such use. If the use proposed for the site does not conform with applicable zoning laws or maps or the reasonably anticipated future use of the site determined by the department pursuant to this section, the department shall disapprove such use. The reasonably anticipated future use of the site and its surroundings shall be documented by the applicant and determined by the department, taking into consideration factors including, but not limited to, those listed below:

(i) Current use and historical and/or recent development patterns.

(ii) Applicable zoning laws and maps.

(iii) Brownfield opportunity areas as designated pursuant to section nine hundred seventy-r of the general municipal law.

(iv) Applicable comprehensive community master plans, local waterfront revitalization plans as provided for in article forty-two of the executive law, or any other applicable land use plan formally adopted by a municipality.

(v) Proximity to real property currently used for residential use, and to urban, commercial, industrial, agricultural, school or day care facilities and recreational areas.

(vi) Any written and oral comments submitted by members of the public on the applicant's proposed use as part of citizen participation

activities performed by the applicant pursuant to this title.

(vii) Environmental justice concerns, which for purposes of this title, include the extent to which the proposed use may reasonably be expected to cause or increase a disproportionate burden on the community in which the site is located, including low-income minority communities, or to result in a disproportionate concentration of commercial or industrial uses in what has historically been a mixed use or residential community.

(viii) Federal or state land use designations.

(ix) Population growth patterns and projections.

(x) Accessibility to existing infrastructure.

(xi) Proximity of the site to important cultural resources, including federal or state historic or heritage sites or Native American religious sites.

(xii) Natural resources, including proximity of the site to important federal, state or local natural resources, including waterways, wildlife refuges, wetlands, or critical habitats of endangered or threatened species.

(xiii) Potential vulnerability of groundwater to contamination that might emanate from the site, including proximity to wellhead protection and groundwater recharge areas and other areas identified by the department and the state's comprehensive groundwater remediation and protection program established pursuant to title thirty-one of article fifteen of this chapter.

(xiv) Proximity to floodplains.

(xv) Geography and geology.

(xvi) Current institutional controls applicable to the site.

4. Tracks. The commissioner, in consultation with the commissioner of health, shall propose within twelve months and thereafter timely promulgate regulations which create a multi-track approach for the remediation of contamination, and, commencing on the effective date of such regulations, utilize such multi-track approach. Such regulations shall provide that groundwater use in Tracks 2, 3 or 4 can be either restricted or unrestricted. The tracks shall be as follows:

Track 1: The remedial program shall achieve a cleanup level that will

allow the site to be used for any purpose without restriction and without reliance on the long-term employment of institutional or engineering controls, and shall achieve contaminant-specific remedial action objectives for soil which conform with those contained in the generic table of contaminant-specific remedial action objectives for unrestricted use developed pursuant to subdivision six of this section. Provided, however, that volunteers whose proposed remedial program for the remediation of groundwater may require the long-term employment of institutional or engineering controls after the bulk reduction of groundwater contamination to asymptotic levels has been achieved but whose program would otherwise conform with the requirements necessary to qualify for Track 1, shall qualify for Track 1.

Track 2: The remedial program may include restrictions on the use of the site or reliance on the long-term employment of engineering and/or institutional controls, but shall achieve contaminant-specific remedial action objectives for soil which conform with those contained in one of the generic tables developed pursuant to subdivision six of this section without the use of institutional or engineering controls to reach such objectives.

Track 3: The remedial program shall achieve contaminant-specific remedial action objectives for soil which conform with the criteria used to develop the generic tables for such objectives developed pursuant to subdivision six of this section but may use site specific data to determine such objectives.

Track 4: The remedial program shall achieve a cleanup level that will be protective for the site's current, intended or reasonably anticipated residential, commercial, or industrial use with restrictions and with reliance on the long-term employment of institutional or engineering controls to achieve such level. The regulations shall include a provision requiring that a cleanup level which poses a risk in exceedance of an excess cancer risk of one in one million for carcinogenic end points and a hazard index of one for non-cancer end points for a specific contaminant at a specific site may be approved by the department without requiring the use of institutional or engineering

controls to eliminate exposure only upon a site specific finding by the commissioner, in consultation with the commissioner of health, that such level shall be protective of public health and environment. Such finding shall be included in the draft remedial work plan for the site and fully described in the notice and fact sheet provided for such work plan.

5. Source removal and control measures. The following is the hierarchy of source removal and control measures ranked from most preferable to least preferable. For all applicants, the remedial program selected pursuant to this title shall address sources in the following manner:

(a) Removal and/or treatment. All free product, concentrated solid or semi-solid contaminants, dense non-aqueous phase liquid, light non-aqueous phase liquid and/or grossly contaminated soil shall be removed and/or treated; provided however if the removal and/or treatment of all such contamination is not feasible, such contamination shall be removed or treated to the greatest extent feasible.

(b) Containment. Any source remaining following removal and/or treatment pursuant to this subdivision shall be contained; provided however if full containment is not feasible, such source shall be contained to the greatest extent feasible.

(c) Elimination of exposure. Exposure to any source remaining following removal, treatment and/or containment pursuant to this subdivision shall be eliminated through additional measures, including but not limited to, as applicable, the timely and sustained provision of alternative water supplies and the elimination of volatilization into buildings; provided however if such elimination is not feasible such exposure shall be eliminated to the greatest extent feasible.

(d) Treatment of source at the point of exposure. Treatment of source at the point of exposure, including but not limited to, as applicable, wellhead treatment or the management of volatile contamination within buildings, shall be considered as a measure of last resort.

5-a. Plume stabilization shall be evaluated for all remedies and the further migration of contamination from the site shall be prevented to the extent feasible, including any actions that would be necessary to maintain and monitor such stabilization. In addition, a participant shall prevent the further migration of plumes to the extent feasible.

6. Soil cleanup objectives. (a) The regulations shall include three generic tables of contaminant-specific remedial action objectives for soil based on current, intended or reasonably anticipated future use, including: (i) unrestricted, (ii) commercial and (iii) industrial.

(b) Such objectives shall be protective of public health and the environment pursuant to subdivision one of this section, and the level of risk associated with remedial action objectives for individual contaminants listed in the table or developed by the applicant pursuant to Track 3 shall not exceed an excess cancer risk of one in one million for carcinogenic end points and a hazard index of one for non-cancer end points; provided, however, that if the background soil concentration for a contaminant in rural soils in New York state exceeds such risk level, the contaminant-specific action objective for such contaminant may be established equal to such background concentration. In developing such tables, the department shall consider:

(i) standards, criteria and guidance which are found by the department to be applicable or relevant and appropriate pursuant to paragraph (a) of subdivision three of this section;

(ii) the behaviors of children;

(iii) the protection of adjacent residential uses;

(iv) contaminants which act through similar toxicological mechanisms or have the potential for additive and/or synergistic effects, and exposure to the same contaminant or group of contaminants from other sources and routes; and

(v) the feasibility of achieving more stringent remedial action objectives, based on experience under the existing state remedial programs, particularly where toxicological, exposure, or other pertinent data are inadequate or nonexistent for a specific contaminant.

(c) The department shall update such tables of contaminant-specific remedial action objectives every five years. The initial tables shall be published in draft form for public comment with a public comment period of one hundred twenty days, and be the subject of at least three public hearings throughout the state. Subsequent tables shall be the subject of at least one public hearing and a public comment period of at least ninety days.

(d) For Track 4, exposed surface soils shall not exceed the generic

contaminant-specific remedial action objectives for soil developed for unrestricted, commercial, or industrial use pursuant to this subdivision which conforms with the site's current intended, or reasonably anticipated future use. For purposes of this section "exposed surface soils" shall mean two feet for sites used for residential use and one foot for sites used for commercial or industrial use.

7. Institutional and engineering controls.

(a) The department may approve a proposed remedial work plan that includes institutional controls and/or engineering controls as components of a proposed remedial program provided the remedial work plan includes:

(i) a complete description of any proposed use restrictions and/or institutional controls and the mechanisms that will be used to implement, maintain, monitor, and enforce such restrictions and controls, both by the applicant and by state and local government;

(ii) a complete description of any proposed engineering controls and any operation, maintenance, and monitoring requirements, including the mechanisms that will be used to continually implement, maintain, monitor, and enforce such controls and requirements, both by the applicant and by state and local government;

(iii) an evaluation of the reliability and viability of the long-term implementation, maintenance, monitoring, and enforcement of any proposed institutional or engineering controls and an analysis of the long-term costs of implementing, maintaining, monitoring and enforcing such controls, including costs that may be borne by state or local governments;

(iv) sufficient analysis to support a conclusion that effective implementation, maintenance, monitoring and enforcement of institutional and/or engineering controls can be reasonably expected;

(v) where required by the department, financial assurance to ensure the long-term implementation, maintenance, monitoring, and enforcement of any such controls; and

(vi) a requirement that any engineering control must be used in conjunction with institutional controls to ensure the continued integrity of such engineering control.

(b) Within one hundred eighty days of commencement of the remedial

design or at least three months prior to the date of the anticipated issuance of the certificate of completion, the owner of a brownfield site, and/or any person responsible for implementing a remedial program at such site, where institutional or engineering controls are employed pursuant to this title, shall execute an environmental easement pursuant to title thirty-six of article seventy-one of this chapter.

(c) The owner of a brownfield site at which institutional or engineering controls are employed pursuant to this title shall, unless otherwise provided in writing by the department, annually submit to the department a written statement by an individual licensed or otherwise authorized in accordance with article one hundred forty-five of the education law to practice the profession of engineering, or by such other expert as the department may find acceptable certifying under penalty of perjury that the institutional controls and/or engineering controls employed at such site are unchanged from the previous certification and that nothing has occurred that would impair the ability of such control to protect the public health and environment, or constitute a violation or failure to comply with any operation and maintenance plan for such controls and giving access to the department to such real property to evaluate continued maintenance of such controls.

(d) At non-significant threat sites where contaminants in groundwater at the site boundary contravene drinking water standards, such certification shall also certify that no new information has come to the owner's attention, including groundwater monitoring data from wells located at the site boundary, if any, to indicate that the assumptions made in the qualitative exposure assessment of offsite contamination are no longer valid. Every five years the owner at such sites shall certify that the assumptions made in the qualitative exposure assessment remain valid. The requirement to provide such certifications may be terminated by a written determination by the commissioner in consultation with the commissioner of health, after notice to the parties on the brownfield site contact list and a public comment period of thirty days.

(e) The commissioner shall create, update, and maintain a database system for public information purposes and to monitor and track all brownfield sites subject to this title. Data incorporated into such system for each site for which information has been collected pursuant

to this title shall include, but shall not be limited to, a site summary, name of site owner, location, status of site remedial activity, and, if one has been created pursuant to title thirty-six of article seventy-one of this chapter, a copy of the environmental easement, and a contact number to obtain additional information. Sites shall be added to such system upon the execution of a brownfield site cleanup agreement pursuant to section 27-1409 of this title. If and when an environmental easement is modified or extinguished, the copy of the environmental easement contained in the database shall be updated accordingly. Such database shall be in such a format that it can be readily searched by affected local governments and the public for purposes including but not limited to determining whether an environmental easement has been recorded for a site pursuant to title thirty-six of article seventy-one of this chapter. The database shall be available electronically. Information from this database shall be incorporated into the geographic information system created and maintained by the department pursuant to section 3-0315 of this chapter.

8. Presumptive remedial strategies. Nothing herein contained shall be deemed to require site-specific remedy selection, and the commissioner shall have the power to develop a list of presumptive remedial strategies that applicants may use to meet the requirements associated with Tracks 1 through 4 of this section. Such remedies may be developed for specific site types and/or contaminants based upon historical patterns of remedy selection and the department's scientific and engineering evaluation of performance data on technology implementation.

9. Use of innovative technologies. The commissioner, in consultation with the commissioner of health, shall consider and encourage the use of innovative technologies which will meet the remedial objectives of this title. Consistent with the provisions of section twelve hundred eighty-five-f of the public authorities law, the commissioner, in consultation with the president of the environmental facilities corporation, shall encourage the development of such technologies.

§ 27-1417. Citizen participation.

1. Citizen participation handbook. The commissioner shall prepare a citizen participation handbook for the purpose of providing guidance to applicants in the design and implementation of meaningful citizen participation plans consistent with the requirements of this section for the remediation of brownfield sites as provided in this title. Such handbook shall encourage citizen involvement by outlining opportunities and recommended methods for effective citizen participation. The commissioner shall make such handbook available to all applicants and other interested members of the public upon request and shall make it available on the department's website.

2. Citizen participation plans. (a) The design of any citizen participation plan, including the level of citizen involvement and the tools utilized, shall take into account the scope and scale of the proposed remedial program, local interest and history, and other relevant factors. While retaining flexibility, citizen participation plans shall embody the following principles of meaningful citizen participation:

(1) opportunities for citizen involvement should be provided as early as possible in the decision making process prior to the selection of a preferred course of action by the department and/or the applicant.

(2) activities proposed in such plan should be as reflective of the diversity of interests and perspective found within the community as possible, allowing the public the opportunity to have their views heard and considered, which may include opportunities for two-way dialogue.

(3) full, timely, and accessible disclosure and sharing of information by the department shall be provided, including the provision of technical data and the assumptions upon which the analyses are based.

(b) All citizen participation plans shall include the following minimum elements:

(1) identification of the interested public and preparation of a brownfield site contact list;

(2) identification of major issues of public concern related to the brownfield site;

(3) a description and schedule of public participation activities required pursuant to this section; and

(4) a description and schedule of any additional public participation activities needed to address public concerns.

3. Citizen participation requirements. (a) In addition to the formal milestones listed below, the public may provide comments at any time during the remedial program.

(b) The person submitting a request for participation, in cooperation with the department, shall provide a newspaper notice of the person's request to participate in the program. The person, in cooperation with the department, shall also provide notice thereof to the brownfield site contact list. Such notice shall provide for a thirty day public comment period following publication.

(c) Before the department finalizes the remedial investigation workplan, the applicant, in cooperation with the department, must notify individuals on the brownfield site contact list. Such notice shall include a fact sheet describing such plan and provide for a thirty day public comment period.

(d) Before the department approves a proposed remedial investigation report, the department, in consultation with the applicant, shall notify individuals on the brownfield site contact list. Such notice shall include a fact sheet describing such report.

(e) Upon the department's determination of significant threat pursuant to section 27-1411 of this title, the department must provide notice to individuals on the brownfield site contact list. Such notice shall include a fact sheet describing the basis of the department's determination.

(f) Before the department finalizes a proposed remedial work plan or makes a determination that site conditions meet the requirements of this title without the necessity for remediation pursuant to section 27-1411 of this title, the department, in consultation with the applicant, must notify individuals on the brownfield site contact list. Such notice shall include a fact sheet describing such plan and provide for a forty-five day public comment period. The commissioner shall hold a public meeting if requested by the affected community and the commissioner has found that the site constitutes a significant threat to the public health or the environment. Further, the affected community may request a public meeting at sites that do not constitute a

significant threat. (1) To the extent that the department has determined that site conditions do not pose a significant threat and the site is being addressed by a volunteer, the notice shall state that the department has determined that no remediation is required for the off-site areas and that the department's determination of a significant threat is subject to this forty-five day comment period. (2) If the remedial work plan includes a Track 2, Track 3 or Track 4 remedy at a non-significant threat site, such comment period shall apply both to the approval of the alternatives analysis by the department and the proposed remedy selected by the applicant.

(g) Before the applicant commences construction at the brownfield site, the applicant, in cooperation with the department, shall provide notice to the individuals on the brownfield site contact list.

(h) Before the department approves a proposed final engineering report, the department, in consultation with the applicant, must notify individuals on such contact list. Such notice shall include a fact sheet describing the brownfield site report, including any proposed institutional or engineering controls.

(i) Within ten days of the issuance of a certificate of completion at a site which will utilize institutional or engineering controls, the applicant, in cooperation with the department, shall provide notice to the brownfield site contact list. Such notice shall include a fact sheet describing such controls.

4. Technical assistance grants. (a) Within the limits of appropriations made available pursuant to paragraph j of subdivision three of section ninety-seven-b of the state finance law, the commissioner is authorized to provide grants to any not-for-profit corporation exempt from taxation under section 501(c)(3) of the internal revenue code at any site determined to pose a significant threat by the department and which may be affected by a brownfield site remedial program. To qualify to receive such assistance, a community group must demonstrate that its membership represents the interests of the community affected by such site. Furthermore, the commissioner is authorized to direct any applicant who is a responsible party, as defined in section 27-1313 of this article, to provide such grants. Such grants shall be known as technical assistance grants and may be used to

obtain technical assistance in interpreting information with regard to the nature of the hazard posed by contamination located or emanating from a brownfield site or sites and the development and implementation of a brownfield site remedial program or programs. Such grants may also be used to hire health and safety experts to advise affected residents on any health assessments and for the education of interested affected community members to enable them to more effectively participate in the remedy selection process. Grants awarded under this section may not be used for the purposes of collecting field sampling data, political activity or lobbying legislative bodies.

(b) The amount of any grant awarded under this section may not exceed fifty thousand dollars at any one site.

(c) No matching contribution from the grant recipient shall be required for a technical assistance grant. Following a grant award, a portion of the grant shall be made available to the grant recipient, in advance of the expenditures to be covered by the grant, in five thousand dollar installments.

§ 27-1419. Certification of completion.

1. Upon certification by the applicant that the remediation requirements of this title have been or will be achieved in accordance with the schedules provided in reports submitted to the department on the remedial work plan for the brownfield site, such applicant shall submit to the department a final engineering report prepared by an individual licensed or otherwise authorized in accordance with article one hundred forty-five of the education law to practice the profession of engineering.

2. A final engineering report shall include, at a minimum:

(a) a description of the remediation activities completed pursuant to the remedial work plan and any interim remedial measures for the brownfield site;

(b) a certification that the data submitted to the department demonstrates that the remediation requirements set forth in the remedial work plan and any other relevant provisions of this title have been or

will be achieved in accordance with the timeframes, if any, established in such work plan;

(c) the boundaries of the real property that is subject to a brownfield site cleanup agreement;

(d) a complete description of any institutional and/or engineering controls employed at the site, including the mechanisms that will be used to continually implement, maintain, monitor, and enforce such controls both by the applicant, the applicant's successors and assigns, and by state or local government;

(e) a certification that any use restrictions, institutional controls, engineering controls and/or any operation and maintenance requirements applicable to the site are contained in an environmental easement created and recorded pursuant to title thirty-six of article seventy-one of this chapter and that any affected local governments, as defined in title thirty-six of article seventy-one of this chapter have been notified that such easement has been recorded;

(f) a certification that an operation and maintenance plan has been submitted by the applicant for the continual and proper operation, maintenance, and monitoring of any engineering controls employed at the site including the proper maintenance of any remaining monitoring wells, and that such plan has been approved by the department; and

(g) a certification that any financial assurance mechanisms required by the department pursuant to this title have been executed.

3. Upon receipt of the final engineering report, the department shall review such report and the data submitted pursuant to the brownfield site cleanup agreement as well as any other relevant information regarding the brownfield site. Upon satisfaction of the commissioner that the remediation requirements set forth in this title have been or will be achieved in accordance with the timeframes, if any, established in the remedial work plan, the commissioner shall issue a written certificate of completion. The certificate shall include such information as determined by the department of taxation and finance, including but not limited to the brownfield site boundaries included in the final engineering report, the date of the brownfield site cleanup agreement, and the applicable percentages available as of the date of the certificate of completion for that site for purposes of section

twenty-one of the tax law. For those sites for which the department has issued a notice to the applicant on or after July first, two thousand fifteen or the date of publication in the state register of proposed regulations defining "underutilized" as provided in subdivision thirty of section 27-1405 of this title, whichever shall be later, that its request for participation has been accepted under subdivision six of section 27-1407 of this title, the tangible property credit component of the brownfield redevelopment tax credit pursuant to paragraph three of subdivision (a) of section twenty-one of the tax law shall only be available to the taxpayer if the criteria for receiving such tax component have been met. For those sites for which the department has issued a notice to the taxpayer after June twenty-third, two thousand eight that its request for participation has been accepted under subdivision six of section 27-1407 of this title, the applicable percentage for the site preparation credit component pursuant to paragraph two of subdivision (a) of section twenty-one of the tax law, and the on-site groundwater remediation credit component pursuant to paragraph four of subdivision (a) of section twenty-one of the tax law shall be based on the level of cleanup achieved pursuant to subdivision four of section 27-1415 of this title and the level of cleanup of soils to contaminant-specific soil cleanup objectives promulgated pursuant to subdivision six of section 27-1415 of this title, up to a maximum of fifty percent, as follows:

(a) soil cleanup for unrestricted use, the protection of groundwater or the protection of ecological resources, the applicable percentage shall be fifty percent;

(b) soil cleanup for residential use, the applicable percentage shall be forty percent, except for Track 4 which shall be twenty-eight percent;

(c) soil cleanup for commercial use, the applicable percentage shall be thirty-three percent, except for Track 4 which shall be twenty-five percent;

(d) soil cleanup for industrial use, the applicable percentage shall be twenty-seven percent, except for Track 4 which shall be twenty-two percent.

4. The commissioner shall not issue a certificate of completion to any

applicant who has been identified by the administrator of the New York environmental protection and spill compensation fund pursuant to subdivision four of section 27-1407 of this title as a person responsible for the cleanup and removal costs for the discharge of petroleum at or emanating from the brownfield site for which the applicant is seeking a certificate of completion where the applicant has not resolved any outstanding claim at such site pursuant to article twelve of the navigation law.

5. A certificate of completion issued pursuant to this section may be transferred by the applicant or subsequent holder of the certificate of completion to a successor to a real property interest, including legal title, equitable title or leasehold, in all or a part of the brownfield site for which the certificate of completion was issued. Notwithstanding any provision of this chapter to the contrary, a certificate of completion shall not be transferred to a responsible party. Further, a certificate of completion may be modified or revoked by the commissioner upon a finding that:

(a) Either the applicant, or the applicant's successors or assigns, has failed to comply with the terms and conditions of the brownfield site cleanup agreement;

(b) The applicant made a misrepresentation of a material fact tending to demonstrate that: (i) it was qualified as a volunteer; or (ii) met the criteria set forth in subdivision one-a of section 27-1407 of this title for the purpose of receiving the tangible property credit component of the brownfield redevelopment tax credit pursuant to paragraph three of subdivision (a) of section twenty-one of the tax law;

(c) Either the applicant, or the applicant's successors or assigns, made a misrepresentation of a material fact tending to demonstrate that the cleanup levels identified in the brownfield site cleanup agreement were reached; or

(d) There is good cause for such modification or revocation.

6. Upon the commissioner's determination pursuant to subdivision three or five of this section, the commissioner shall provide the applicant with notice of such determination and notice of the right to appeal such determination. The commissioner's determination shall be final unless a

hearing is requested by certified mail sent to the commissioner within thirty days after receiving notice of such determination. After such hearing, the commissioner shall give notice of final determination to such applicant. The commissioner may promulgate regulations to effectuate the purposes of this section.

7. Nothing herein shall be construed as abrogating any powers or duties of the administrator of the New York environmental protection and spill compensation fund as provided in article twelve of the navigation law.

8. A notice of such certification of completion shall be recorded and indexed in the office of the recording officer for the county or counties where such brownfield site is located in the manner prescribed by article nine of the real property law within thirty days of the issuance of the certificate of completion if the applicant is an owner or within thirty days of acquiring title to the brownfield site if the person is a prospective purchaser.

§ 27-1420. Brownfield cleanup program report.

1. The commissioner, in consultation with the commissioner of taxation and finance, shall prepare on or before April thirtieth of each year, a report concerning the brownfield cleanup program which contains the following information for the preceding fiscal year:

a. the number of requests for participation received by the department;

b. the number of remedial investigations commenced, and the number of remedial investigations completed;

c. the number of requests for participation withdrawn or terminated prior to issuance of certificate of completion;

d. for each request for participation that resulted in a certificate

of completion, the length of time from the date the department received the request, to the date the commissioner issues the certificate of completion;

e. the total number of certificates of completion issued; and

f. such other information as the commissioner may determine is relevant to the status of the administration of the program.

2. Copies of this report shall be submitted to the governor, the director of the budget, the temporary president of the senate, the speaker of the assembly, the chair of the senate finance committee, the chair of the assembly ways and means committee and the New York brownfields advisory board.

§ 27-1421. Liability limitation.

1. Notwithstanding any other provision of law and except as provided in subdivision two of this section, after the department has issued a certificate of completion for a brownfield site, the applicant shall not be liable to the state upon any statutory or common law cause of action, arising out of the presence of any contamination in, on or emanating from the brownfield site that was the subject of such certificate at any time before the effective date of a brownfield site cleanup agreement entered into pursuant to this title, except that a participant shall not receive a release for natural resource damages that may be available under law.

2. (a) The state nonetheless shall reserve all of its rights concerning, and such liability limitation shall not extend to, any further investigation and/or remediation the department deems necessary due to:

(i) environmental contamination at, on, under, or emanating from the brownfield site if, in light of such conditions, the site is no longer protective of public health or the environment; or

(ii) non-compliance with the terms of the agreement, the remedial work

plan and the certificate of completion required by this title; or

(iii) fraud committed by the applicant in its application for or participation in this program; or

(iv) a written finding by the department that a change in an environmental standard, factor, or criterion upon which the remedial work plan or no further action determination was based, renders the brownfield site remedial program implemented at the site no longer protective of public health or the environment; or

(v) a change in the brownfield site's use subsequent to the department's issuance of the certificate of completion unless additional remediation is undertaken which shall meet the standard for protection of public health and the environment that applies under this title; or

(vi) following the certificate of completion the failure of an applicant to make substantial progress toward completion of its proposed development of the site within five years, or the applicant engages in unreasonable delay and fails to complete its proposed development of the site within a reasonable time, considering the size, scope and nature of the development. Provided however, that this subparagraph shall not apply in the case where a Track 1 - unrestricted use as provided in section 27-1415 of this title is achieved.

(b) In the case of a volunteer, subparagraph (v) of paragraph (a) of this subdivision shall not apply if Track 1-unrestricted use as provided in section 27-1415 of this title is achieved.

3. The liability limitation provided pursuant to this section shall run with the land, extending to the applicant's successors or assigns through acquisition of title to the brownfield site and to a person who develops or otherwise occupies the brownfield site; provided that such persons act with due care and in good faith to adhere to the requirements of the brownfield site cleanup agreement and certificate of completion. However, such liability limitation does not extend, and cannot be transferred, to a person who is responsible for the disposal or the discharge of contaminants on such site according to applicable principles of statutory or common law liability as of the effective date of the certification of completion issued pursuant to this title, unless that person was party to the brownfield site cleanup agreement for the brownfield site pursuant to this article.

4. The provisions of this title shall not affect an action or a claim, including a statutory or common law claim for contribution or indemnification, that an applicant has or may have against a third party.

5. Nothing in this section shall be construed to affect either the liability of any person with respect to any costs, damages, or investigative or remedial activities that are not included in the brownfield site cleanup agreement or remedial investigation work plan and/or remedial work plan for the brownfield site or the state's authority to maintain an action or proceeding against any person who is not subject to the brownfield site cleanup agreement.

6. A person who has received a liability limitation under this subdivision shall not be liable for claims for contribution regarding matters addressed in the brownfield site cleanup agreement except nothing in this section shall effect the liability of the person responsible for such person's own acts or omissions causing wrongful death or personal injury. Such liability limitation does not discharge any of the persons responsible under law to investigate and remediate the contamination, but it reduces the potential liability of the others by the amount of the value associated with the remediation activities described in the final engineering report.

7. Nothing in this section shall be construed to affect the authority of the department to reach settlement with other persons consistent with its authority under applicable law.

8. Nothing in this section shall affect the liability of any person with respect to any civil action brought by a party other than the state.

9. In addition to any other powers the department may have, the department shall have the authority to periodically inspect each brownfield site to ensure that the use of the property complies with the terms and conditions of the brownfield site cleanup agreement.

§ 27-1425. Change of use.

1. At least sixty days before the start of physical alteration or construction constituting a change of use at a brownfield site or at least sixty days before a change of use at such site not involving any physical alteration or construction, as the case may be, the person or entity proposing to make a change of use shall provide written notification to the department.

2. No person shall engage in any activity at a brownfield site that is not consistent with restrictions placed upon the use of the property, or that will, or that reasonably is anticipated to: prevent or interfere significantly with a proposed, ongoing, or completed remedial program; or expose the public health or the environment to a significantly increased threat of harm or damage from such site. If the commissioner determines that a proposed change of use is prohibited pursuant to this section, he or she shall, within forty-five days after receipt of the complete notice required by this section, provide the person giving such notice with a written determination that such change of use will not be authorized, together with the reasons for such determination.

3. For the purposes of this section:

(a) "change of use" means the transfer of title to all or part of such brownfield site, the erection of any structure on such site, the creation of a park or other public or private recreational facility on such site, or any activity that is likely to disrupt or expose contamination or to increase direct human exposure; or any other conduct that will or may tend to significantly interfere with an ongoing or completed remedial program at such site and the continued ability to implement the engineering and institutional controls associated with such site.

(b) "complete notice" means a notice that adequately appraises the department of the contemplated change of use of such site and how such change of use may affect the site's proposed, ongoing, or completed remedial program.

§ 27-1429. Permit waivers.

The department, by and through the commissioner, shall be exempt for activities conducted pursuant to subdivision five of section 27-1411 of this title and shall be authorized to exempt a person from the requirement to obtain any state or local permit or other authorization for any activity needed to implement a program for the investigation and/or remediation of contamination at or emanating from a brownfield site; provided that the activity is conducted in a manner which satisfies all substantive technical requirements applicable to like activity conducted pursuant to a permit.

§ 27-1431. Access to sites.

The department, by and through the commissioner, shall be authorized to:

1. Require that any person permit a duly designated officer or employee of the department or of a municipal corporation, or any agent, consultant, or contractor of the department or of a municipal corporation, or any other person, including an employee, agent, consultant, or contractor of an applicant acting at the direction of the department, so authorized in writing by the commissioner, to enter upon any property which has or may have been the site of the disposal or discharge of contaminants, and/or areas near such site, for the following purposes:

a. to inspect and take samples of such contaminants and/or environmental media, utilizing such sampling methods as may be necessary or appropriate, including without limitation soil borings and monitoring wells; provided, that no sampling methods involving the substantial disturbance of the ground surface of such property may be utilized until after a minimum of ten days' written notice thereof shall have been provided to the owner and operator and occupant of such property, if

identifiable by reasonable efforts, unless the commissioner makes a written determination that such notice will not allow the protection of the public health or the environment, in which case two days' written notice shall be sufficient;

b. to implement the investigation and/or remediation of contamination and/or environmental media; provided that no such work may be undertaken until after a minimum of ten days' written notice thereof shall have been provided to the owner and operator and occupant of such property, if identifiable by reasonable efforts, unless the commissioner makes a written determination that such notice will not allow the protection of the public health or the environment, in which case two days' written notice shall be sufficient.

(i) If any designated officer or employee of the department or of a municipal corporation, or any agent, consultant, or contractor of the department or of a municipal corporation, or any other person, including an employee, agent, consultant or contractor of a responsible person acting at the direction of the department obtains any samples prior to leaving the premises they shall give to the owner a receipt describing the sample obtained and, if requested, a portion of such sample equal in volume or weight to the portion retained. If any analysis is made of such samples, a copy of the results of such analysis shall be furnished promptly to the owner. Upon the completion of all sampling or subsequent remediation activities, the department shall remove, or cause to be removed, all equipment and well machinery and return the ground surface of the property to its condition prior to such sampling unless the department and the owner of the property shall agree otherwise.

(ii) the expense of any such sampling and analysis shall be paid by the department, but may be recovered from any responsible person in any action or proceeding brought pursuant to this title or common law.

c. to inspect for compliance with the site management plan approved by the department, including (i) inspection of the performance of maintenance, monitoring and operational activities required as part of the remedial program for the site, (ii) inspection for the purpose of ascertaining current uses of the site, and (iii) taking samples in accordance with paragraph (a) of this subdivision.

2. a. Require that any person furnish to the department, in a form and manner as prescribed by the department, information relating to the current and past contaminant generation, treatment, storage, disposal, and/or transportation activities of such person or any other person now or formerly under the control of such person; in the event such person cannot comply therewith, in whole or in part, such person shall furnish to the department information describing all efforts made by such person to comply therewith; any information so furnished to the department shall be considered a "written instrument" as defined in subdivision three of section 175.00 of the penal law;

b. Require that any person permit a duly designated officer or employee of the department at all reasonable times to have access to and to copy all books, papers, documents, and records relating to the current and past contaminant generation, treatment, storage, disposal, and/or transportation activities of such person or any person now or formerly under the control of such person;

c. Require, by subpoena issued in the name of the department, the production of books, papers, documents, and other records, and the rendition of testimony by deposition under oath of any person relating to the current and past contaminant generation, treatment, storage, disposal, and/or transportation activities of such person or any person now or formerly under the control of such person; such subpoenas and depositions shall be regulated by the civil practice law and rules; the commissioner may invoke the powers of the supreme court of the state of New York or any other court of competent jurisdiction to compel compliance therewith.

§ 27-1433. Waiver of interest or penalties or other charges on brownfield properties.

Notwithstanding any provision of law to the contrary, the governing body of any tax district shall be authorized, by resolution, to permit the enforcing officer to effect the cancellation in whole or in part of

any interest, penalties or other charges on real property where such real property is subject to the brownfield site clean-up agreement entered into by a volunteer pursuant to section 27-1409 of this title. Provided, however, that in cases where such interest, penalties, or other charges, if collected by a tax district, belong to a municipal corporation within such tax district, no reduction or remission in whole or in part of such interest, penalties, or other charges shall be made without the consent of the municipal corporation affected, which consent may be given by resolution adopted after a public hearing. Failure of such real property to receive a certificate of completion pursuant to section 27-1419 of this title or revocation of such certificate shall be grounds for revocation of any waiver of interest, penalties, or charges granted pursuant to this section.

§ 27-1437. BCP-EZ program.

1. The department may promulgate regulations to implement a program providing for the expedited investigation and/or remediation of contamination at brownfield sites (BCP-EZ program), provided that:

(a) at the time of the application, the department has determined that the brownfield site does not pose a significant threat pursuant to section 27-1411 of this title;

(b) the applicant has waived in writing any claim for tax credits pursuant to section twenty-one of the tax law on a form prescribed by the department; and

(c) the activity is conducted in a manner which satisfies all requirements applicable to like activity conducted pursuant to sections 27-1415 and 27-1417 of this title, except as provided in subdivision two of this section and the time periods specified in paragraphs (b) and (c) of subdivision three of section 27-1417 of this title.

2. For any site accepted into the BCP-EZ program pursuant to this section with a remedial work plan identifying a Track 4 remediation, if a contaminant is identified in soil in excess of the remedial action objectives contained in an applicable generic table developed pursuant to subdivision six of section 27-1415 of this title, the applicant may

use site-specific data to demonstrate to the department that the concentration of the contaminant in the soils reflects background conditions and, in that case, a contaminant-specific action objective for such contaminant equal to such background concentration may be established provided that such objective is protective of the public health and the environment and is determined in a manner acceptable to the department.

3. Upon the department's acceptance of the certification by the applicant that the remediation requirements of this title, pursuant to section 27-1419 of this title, have been achieved for the brownfield site and an environmental easement, if necessary, has been created and filed pursuant to title thirty-six of article seventy-one of this chapter, a site in the BCP-EZ program shall be eligible to receive a certificate of completion in accordance with section 27-1419 of this title; provided, however, that such certificate of completion shall not entitle the holder to any tax credits provided by section twenty-one of the tax law.

TITLE 15

STORAGE, TREATMENT, DISPOSAL AND TRANSPORTATION OF REGULATED MEDICAL WASTE

Section 27-1501. Definitions.

27-1503. Applicability.

27-1504. Regulated medical waste tracking program.

27-1505. Storage and containment of regulated medical waste.

27-1507. Treatment and disposal of regulated medical waste.

27-1509. Transfer of regulated medical waste to off-site treatment and disposal facilities.

27-1510. Standards applicable to generators of regulated medical waste.

27-1511. Standards applicable to transporter of regulated medical waste.

27-1513. Requirements for regulated medical waste treatment, storage and disposal facility.

27-1515. Rules and regulations.

27-1517. Permits for storage, transportation, treatment or disposal of regulated medical waste.

27-1519. Pilot projects.

§ 27-1501. Definitions.

1. "Regulated medical waste" shall mean regulated medical waste as defined pursuant to section thirteen hundred eighty-nine-aa of the public health law and regulations promulgated thereunder, provided, however, that "regulated medical waste" shall not include any hazardous waste identified or listed pursuant to section 27-0903 of this article, or any household waste as defined in regulations promulgated under such section.

2. "Person" shall mean an individual, trust, firm, joint stock company, corporation (including a government corporation), partnership, association, state or federal government and any agency thereof, municipality, commission, political subdivision of a state, or any interstate body.

3. "Storage" shall mean the containment of regulated medical waste in such a manner as not to constitute disposal of such waste.

4. "Transport" shall mean the movement of regulated medical waste from the point of generation to any intermediate points and finally to the point of ultimate disposal. For the purposes of this title, the point of generation with regard to facilities that are generator's of regulated medical waste shall be the point at which the regulated medical waste leaves the generator's facility site.

5. "Treatment" shall mean any method, technique or process designed to change the character or composition of any regulated medical waste so as to either neutralize such waste or to render such waste not infectious as approved by the commissioner of health pursuant to section thirteen hundred eighty-nine-dd of the public health law.

7. "Ownership" shall mean the possession of equity in the capital, the stock or the profits of an entity transporting regulated medical waste, including, but not limited to, property in or title to a vehicle or vessel or any exclusive lease or bailment of a motor vehicle for a period of greater than thirty days.

8. "Indirect ownership" shall mean an ownership interest in an entity that has an ownership interest in an entity transporting regulated medical waste.

9. "Substantial interest" shall mean ownership or indirect ownership of ten per centum or more.

11. "Infectious agents" shall be limited to those organisms that cause disease or an adverse health impact to humans.

§ 27-1503. Applicability.

It is the purpose of this title to regulate the transportation of regulated medical waste in a uniform manner throughout the state. All the requirements of this title shall apply to any person or persons engaged in the storage, containment, treatment, disposal or transfer of regulated medical waste off the site of the facility producing such waste. This title and the regulations promulgated pursuant hereto shall supersede all other state and local laws relating to the transportation of regulated medical waste to the extent such laws are not consistent with this title and such regulations.

§ 27-1504. Regulated medical waste tracking program.

1. The commissioner shall promulgate new regulations or amend existing regulations establishing a program for the tracking of the regulated medical waste which is generated in this state. Such regulations shall not be subject to the requirements of subdivision 2 of section 3-0301 of this chapter.

2. Such program shall:

a. Provide for tracking of the transportation of the waste from the generator to the disposal facility, except that waste that is treated need not be tracked after treatment;

b. Include a system for providing the generator of the waste with assurance that the waste was treated or received by the disposal facility; and

c. Use a uniform form for tracking provided that different forms may be required for generators of differing quantities of medical waste.

§ 27-1505. Storage and containment of regulated medical waste.

1. Containment of regulated medical waste shall be in a manner and location which affords protection from the environment and limits exposure to the public.

2. Unless otherwise approved by the department, regulated medical waste shall be contained at the generator's facility and at any other location off the site of the generator's facility only for such periods and under such conditions pursuant to rules and regulations adopted in furtherance of this title.

3. Containment of regulated medical waste shall be separate from other wastes. Containers used for the containment of regulated medical waste shall be marked with prominent warning signs on the containers with the word "infectious" or the words "regulated medical waste".

4. Regulated medical waste, except for all discarded sharps, shall be contained in bags which are impervious to moisture and have a strength sufficient to resist ripping, tearing or bursting under normal conditions of usage and of handling. The bags shall be secured so as to prevent leakage during storage, handling or transport. All bags used for

containment and disposal of regulated medical wastes shall be red in color.

5. All discarded sharps shall be contained for disposal in leakproof, rigid, puncture-resistant containers which are secured to preclude loss of the contents. Such containers shall be red in color or shall be conspicuously labeled with the word "infectious" or the words "regulated medical waste".

6. Before regulated medical waste is transported from the generator's facility, regulated medical waste contained in disposable containers shall be placed for storage or handling in disposable or reusable pails, cartons, drums or portable bins. The containment system shall be leakproof, have tight-fitting covers and be kept clean and in good repair. The containers may be of any color and shall be conspicuously labeled with the word "infectious" or the words "regulated medical waste".

7. Reusable containers for regulated medical waste shall be thoroughly washed and decontaminated each time they are emptied in conformity with procedures prescribed by the department of health, unless the surfaces of the containers have been completely protected from contamination by disposable liners, bags or other devices removed with the waste.

8. Reusable pails, drums or bins used for containment of regulated medical waste shall not be used for containment of waste to be disposed of as other wastes or for other purposes except after being decontaminated in conformity with procedures prescribed by the department of health.

9. Trash chutes shall not be used to transfer regulated medical waste between locations where it is contained.

§ 27-1507. Treatment and disposal of regulated medical waste.

1. Treatment or disposal of regulated medical waste shall be by one of

the following methods:

a. By incineration in a regulated medical waste incineration facility approved and under permit pursuant to article nineteen of this chapter which provides complete combustion of the waste to carbonized or mineralized ash. Regulated medical waste so combusted shall be disposable as nonhazardous waste provided it is not an otherwise hazardous waste as defined in the regulations promulgated under section 27-0903 of this article.

b. By discharge to sewerage system if the waste is liquid or semi-liquid except as specifically prohibited by the commissioner or the commissioner of health.

c. By decontamination by autoclaving, or by other technique approved by the department of health. Regulated medical waste so treated shall be disposed of as solid waste provided it is not otherwise a hazardous waste as defined in section 27-0903 of this article or the regulations promulgated thereunder, and is accompanied by a certificate, in a form prescribed by the commissioner of health which evidences such treatment.

d. By other method approved in writing by the commissioner of health.

2. Regulated medical wastes shall not be disposed of by burial at a landfill disposal facility, unless treated in accordance with subdivision one of this section. All sharps must be rendered unrecognizable prior to disposal.

§ 27-1509. Transfer of regulated medical waste to off-site treatment and disposal facilities.

1. No person shall transport regulated medical waste unless permitted as a regulated medical waste transporter by the department.

2. Vehicles transporting more than fifty pounds of regulated medical waste shall be identified on each side and the back of the vehicle with

the name or trademark of the transporter and with conspicuously displayed signs or decals with the word "infectious" or the words "regulated medical waste".

a. Regulated medical waste shall be transported to an off-site treatment or disposal facility in a leakproof, fully enclosed container or vehicle compartment.

b. Regulated medical waste shall not be transported in the same vehicle with other waste unless the regulated medical waste is separately contained in rigid reusable containers or kept separate by barriers from other waste, or unless all of the waste is to be treated or disposed of as regulated medical waste in accordance with the requirements of this title.

c. Regulated medical waste shall be delivered for treatment or disposal only to a facility to which delivery of such waste is authorized pursuant to this article.

d. Persons manually loading or unloading containers of regulated medical waste on or from transport vehicles shall be provided by their employer with, and shall be required to wear, protective gloves and other protective clothing as may be required by the department.

e. Surfaces of transport vehicles that have contacted spilled or leaked regulated medical waste shall be decontaminated by procedures approved by the commissioner of health.

§ 27-1510. Standards applicable to generators of regulated medical waste.

1. The commissioner shall promulgate regulations establishing standards which shall be applicable to all generators of any quantity of regulated medical waste, as may be necessary to protect human health and the environment. Such standards shall include, but need not be limited to, requirements respecting:

a. Recordkeeping practices that accurately identify the quantities of such regulated medical waste generated, and the disposition thereof;

b. Compliance with the marking, labeling and packaging requirements pursuant to section 27-1505 of this title;

c. Compliance with the tracking system pursuant to section 27-1504 of this title; and

d. Submission of an annual report to the commissioner, and additional reports at such times as the commissioner deems necessary, on such forms as the commissioner shall prescribe, respecting the quantities of regulated medical waste generated during a specified time period, and the disposition thereof.

2. Any such regulation may not exempt, but may differ in its terms as between generators of differing quantities of regulated medical waste.

§ 27-1511. Standards applicable to transporter of regulated medical waste.

1. The commissioner shall promulgate regulations establishing such standards as shall be applicable to transporters of regulated medical waste identified or listed under this title, as may be necessary to protect human health and the environment. Such standards shall include, but need not be limited to, requirements respecting:

a. Record keeping practices that accurately identify the regulated medical wastes transported, their sources and delivery points, including certification of compliance with the program to be promulgated under section 27-1504 of this title;

b. Transportation of all such regulated medical waste only to the facility or facilities approved by the department; and

c. Proof of ownership and inspection of vehicles used in transporting regulated medical waste, proof of liability insurance or other form of financial security deemed sufficient by the commissioner to meet all responsibilities in case of release of such waste causing damage as a condition to the issuance of a permit to a transporter as required by this section.

2. Except as provided in paragraph a of this subdivision, no person shall engage in the transportation of regulated medical wastes without first complying with the requirements of standards promulgated by the commissioner pursuant to subdivision one of this section and obtaining a permit issued by the department. The commissioner shall assure that permits authorizing regulated medical waste transportation are not held by unqualified or unsuitable persons pursuant to section 27-1517 of this title.

a. (i) No permit shall be required for the transportation by the generator of less than fifty pounds per month of regulated medical waste or by authorized employees of such generator acting on behalf of and under the supervision of the generator provided that (1) such waste is being transported from the point of generation for treatment or disposal to a facility approved by the department, (2) such person shall comply with the requirements of section 27-1510 of this title, (3) the generator shall have registered with the department in a form prescribed by the commissioner, which registration, at a minimum, shall designate the treatment or disposal facility and the employees acting on behalf of or under the supervision of the generator, and (4) such person would not otherwise be subject to an adverse determination under section 27-1517 of this title.

(ii) The commissioner may, after consultation with the commissioner of health, exempt a generator from the waste transporter program fees pursuant to section 72-0502 of this chapter upon a showing by such generator that compliance with such requirements would create a hardship on the generator's business activities. The commissioner shall promulgate guidelines for the purpose of determining the circumstances under which such exemption may be granted. Such exemption shall be reviewed periodically as specified by the commissioner but at least once

every two years. Any exemption granted hereunder may be revoked after due notice and opportunity for hearing for a violation of any provision of this title or other applicable laws, rules or regulations relating to the transportation of regulated wastes or upon a showing that the exempted generator no longer meets the requisite guidelines for exemption.

b. A generator of regulated medical waste may obtain a permit pursuant to this title to transport regulated medical waste.

c. The department may make rules and regulations implementing this section in order to carry out and enforce the intent and purposes thereof. Such rules and regulations and the provisions of article 70 of this chapter and rules and regulations adopted thereunder shall govern permit applications, permit conditions, renewals, modifications, suspensions and revocations under this section. The responsibility for the issuance and review of permits and the enforcement of the provisions of this section may be delegated to regional, district or county offices of the state department of health, or to local health departments where their jurisdiction may apply.

d. Applications filed pursuant to this section shall indicate the mechanical and other equipment, holding tanks and vehicles and any place of temporary storage used or to be used by the applicant and the place or places where and the manner in which the applicant will finally dispose of the regulated medical wastes, and such other information as the department deems necessary. If the department determines that the proposed method of transportation, the place or manner in which the waste product is to be treated, stored or disposed of or the method or location of temporary storage will be detrimental to the protection of public health or substantially damage or pollute the environment or natural resources of the state, it may deny the permit or may impose such permit conditions as may be necessary.

e. As a condition for the permit or the exemption therefrom the department shall require the transporter to make an annual report to the department, indicating the number and type of generators served, the

volume and nature of waste products disposed of, and the place and manner in which such waste products were finally disposed, and such other information as the department may require.

f. Such permit shall be renewed annually. The fees for such permit or renewal shall be those established pursuant to section 72-0502 of this chapter. A renewal may be denied by the department for failure of the applicant to properly report as provided in paragraph e of this subdivision.

g. The department may suspend or revoke any permit upon proof that the permittee has been found guilty of a violation of the provisions of this section as provided in title 44 of article 71 of this chapter, or if the department determines that the permittee has violated the provisions of this section, the rules and regulations implementing it or the rules and regulations adopted to implement article 70 of this chapter.

3. A transporter of regulated medical waste who has been granted a permit by the department for such activity shall notify the department within thirty days of the following occurrences:

a. Any change of substantial interest in ownership or indirect ownership or any change in name or location.

b. Ownership or control of a vehicle or container certified by the department is changed.

c. A truck, trailer, semitrailer, vacuum tank, cargo tank, or container certified by the department is involved in any spill, or in an accident which renders or may have rendered the vehicle or container in noncompliance with the requirements of this section.

§ 27-1513. Requirements for regulated medical waste treatment, storage and disposal facility.

1. Any person who operates a facility for the treatment, storage or

disposal of regulated medical waste shall have a valid and appropriate solid waste management facility permit issued by the department; except that a solid waste management facility permit shall not be required for operation of an on-site facility that is operated by a health care facility licensed pursuant to the public health law that is utilized to treat, store or dispose of regulated medical waste of the health care facility or of other generators of regulated medical waste, pursuant to written agreements with or among such other generators that shall be filed with the department of health and the department.

2. The operator of any facility used for the treatment, storage or disposal of regulated medical waste not in a category specified in subdivision one of this section shall have and shall adhere to an operation plan for the handling and disposal of regulated medical waste approved by the department. The operation plan shall include the following:

a. A method of receiving wastes which ensures that regulated medical wastes are handled separately from other wastes until treatment or disposal is accomplished and which prevents unauthorized persons from having access to or contact with the waste.

b. A method of unloading and processing of regulated medical wastes which limits the number of persons handling the wastes and minimizes the possibility of exposure of employees and the public using or visiting the facility to regulated medical waste.

c. A method of decontaminating emptied reusable regulated medical waste containers, transport vehicles or facility equipment which are known or believed to be contaminated with regulated medical waste.

d. The provision and required use of gloves and other protective clothing as shall be required by the department.

e. The means of decontamination of any person having had bodily contact with regulated medical waste while transporting the waste to the treatment or disposal site or while handling or disposing of the waste

at the site.

f. A quantification of the maximum amount of regulated medical waste to be treated, stored, or disposed of per month.

3. A new or revised operation plan for treatment, storage or disposal of regulated medical waste shall be prepared whenever there is an increase of more than twenty-five percent in the maximum quantity of regulated medical waste receiving treatment, storage or disposal per month by the facility or when changes are otherwise made in an existing operation plan.

4. Approval for acceptance of regulated medical waste at a treatment, storage or disposal facility may be withdrawn by the department for noncompliance with the operation plan.

5. As a condition of approval for such permit, any person who operates a facility for the treatment, storage and disposal of regulated medical waste shall provide:

(a) proof of liability insurance or other form of financial security deemed sufficient by the commissioner to meet all responsibilities in case of release of such waste causing damage; and

(b) certification that such activities conform with existing local zoning laws or ordinances.

§ 27-1515. Rules and Regulations.

The commissioner shall promulgate rules and regulations in conformity with the standards for storage, containment, transportation and disposal of regulated medical waste, pursuant to the provisions of this title. The commissioner shall promulgate rules and regulations, consistent with standards established by the department of health, for decontamination and treatment of regulated medical waste pursuant to the provisions of this title.

§ 27-1517. Permits for storage, transportation, treatment or disposal of regulated medical waste.

1. In order to assure that permits authorizing the storage, transportation, treatment or disposal of regulated medical waste are not issued to or held by unqualified or unsuitable persons, the commissioner may, consistent with articles twenty-three and twenty-three-a of the correction law, and the provisions of section 70-0115 of this chapter, deny, suspend, revoke or modify any permit, renewal or modification thereto for the storage, transportation, treatment or disposal of regulated medical waste, upon a written determination that such action is required to protect the public health and safety and that:

a. The permit holder or applicant has been finally determined in an administrative, civil or criminal proceeding to have violated any provision of this article, any related order or determination of the commissioner, any regulation promulgated pursuant to this article, a material condition of any permit issued thereunder, or of any substantially similar statute, regulation, order or permit condition of the federal or other state government relating to the handling, storing, treating, disposing or transporting of solid, hazardous, infectious, medical or regulated medical waste; or

b. Such permit holder or applicant has been previously denied a permit for the same or substantially similar activity based upon one or more of the provisions of this subdivision; or

c. Such permit holder or applicant has been found in a civil proceeding to have committed a negligent or intentionally tortious act in relation to the handling, storing, treating, disposing or transporting of solid, hazardous, infectious, medical or regulated medical waste, or has been convicted in a criminal proceeding of a crime involving the handling, storing, treating, disposing or transporting of solid, hazardous, infectious, medical or regulated medical waste, provided, however, that where such conviction is of a criminal offense under the laws of any other state or of the United States, such offense would constitute a crime under the laws of this state; or

d. Such permit holder has been convicted of a felony under the laws of this state involving fraud, bribery, perjury, or theft, or has been convicted under the laws of any other state or of the United States of a criminal offense which, if committed and prosecuted in this state, would constitute a similar felony under such laws of this state.

e. Such permit holder or applicant, in any matter within the jurisdiction of the department, has been determined to have knowingly falsified a material fact, or knowingly submitted a false statement, or knowingly made use of a false statement in connection with any document or application submitted to the department; or

f. Such permit holder or applicant is either:

(i) an individual who had a substantial interest in or acted as a high managerial agent or director for any corporation, partnership, association or organization which committed an act or failed to act, and such act or failure to act could be the basis for the denial of a permit pursuant to this section or regulations promulgated thereunder if such corporation, partnership, association or organization applied for a permit under this title; or

(ii) a corporation, partnership, association, or organization, or any principal thereof, or any person holding a substantial interest therein, which committed an act or failed to act, and such act or failure to act could be the basis for the denial of a permit pursuant to this section or regulations promulgated thereunder if such corporation, partnership, association or organization applied for a permit under this title; or

(iii) a corporation, partnership, association or organization or any high managerial agent or director thereof, or any person holding a substantial interest therein, acting as high managerial agent or director for or holding a substantial interest in another corporation, partnership, association or organization which committed an act or failed to act, and such act or failure to act could be the basis for the denial of a permit pursuant to this section or regulations promulgated thereunder had such other corporation, partnership, association or organization applied for a permit under this title.

For the purposes of this subdivision, "high managerial agent" has the same meaning as is given that term in section 20.20 of the penal law.

2. Any act or failure to act which serves as a basis for denial or revocation of a permit pursuant to this subdivision shall have occurred within five years from the date on which the application for a permit, renewal or modification is submitted to the department or from the date on which the department serves notice of intent to revoke or modify a permit issued by the department in relation to an existing permit.

3. Any person denied a permit, renewal or modification on the grounds specified in this section shall be entitled to a hearing within sixty days of such denial in the case of a new permit, or within fifteen days in the case of a renewal or modification of any existing permit. The conduct of such hearing shall be governed by article 70 of this chapter and regulations promulgated thereunder.

§ 27-1519. Pilot projects.

The commissioner shall cooperate with the commissioner of health to develop pilot projects pursuant to subdivision 3 of section 1389-dd of the public health law to promote the safe handling, treatment and disposal of medical waste generated in private residences. The commissioner may exempt these pilot projects from the permitting requirements of this article.

TITLE 17

LEAD-ACID BATTERY RECYCLING

Section 27-1701. Lead-acid battery recycling.

§ 27-1701. Lead-acid battery recycling.

1. Legislative findings. The legislature hereby finds that the improper disposal of lead-acid batteries is a direct threat to the

health and safety of the citizens of this state. Further, the legislature finds that the disposal of these batteries constitutes a waste of recyclable materials. Therefore, the legislature finds and declares it to be in the public interest to facilitate the collection and recycling of lead-acid batteries in this state by prohibiting the improper disposal of lead-acid batteries, establishing a financial incentive for the return of used batteries, and requiring lead-acid battery retailers and distributors to accept used batteries free of charge from the public.

2. Definitions. When used in this section:

a. "Authorized hazardous waste facility" means any hazardous waste treatment, storage and disposal facility permitted pursuant to section 27-0913 of this article which is authorized to accept lead-acid batteries.

b. "Collector" means any person who accepts lead-acid batteries in order to transfer them to a recycling facility, an authorized hazardous waste facility or another collector.

c. "Consumer" means any person who purchases a lead-acid battery for use other than resale, provided however, that consumer does not mean a person who purchases a new or used vehicle containing a lead-acid battery.

d. "Dispose" or "disposal" means the abandonment, discharge, deposit, injection, dumping, spilling, leaking or placing of any substance so that such substance or any related constituent thereof may enter the environment. Disposal also means the thermal destruction of waste or hazardous waste and the burning of such wastes as fuel for the purpose of recovering useable energy.

e. "Distributor" means any person who sells lead-acid batteries to a retailer in this state, including any manufacturer who sells to retailers in the state.

f. "Lead-acid battery" means any battery with a capacity of six or more volts which contains lead and sulfuric acid and which is used as a power source in a vehicle.

g. "Manufacturer" means any person who manufactures lead-acid batteries.

h. "Mixed municipal solid waste" means any material managed at a solid waste management facility as defined in section 27-0701 of this article.

i. "Recycling facility" means any person who processes lead-acid batteries and/or parts thereof in order to recover the materials contained therein for later use.

j. "Retailer" means any person in this state who sells new lead-acid batteries to consumers.

k. "Return incentive payment" means a payment pursuant to subdivision five of this section to a retailer from a consumer who does not return a used lead-acid battery at the time of purchasing a new lead-acid battery from such retailer.

l. "Vehicle" means any motor powered device which is self-propelled and designed for carrying persons or property or which is used for the transportation of persons, including, but not limited to, automobiles, buses, trucks, boats, motorcycles, snowmobiles and lawn and garden equipment.

3. Lead-acid battery disposal prohibitions. a. No person shall dispose of a lead-acid battery in mixed municipal solid waste or otherwise dispose of a lead-acid battery except by delivery to a retailer, distributor, collector, recycling facility or as a method of last resort to an authorized hazardous waste facility.

b. No retailer shall dispose of a lead-acid battery except by delivery to a distributor, collector, recycling facility or as a method of last resort to an authorized hazardous waste facility.

c. No distributor shall dispose of a lead-acid battery except by delivery to a collector, recycling facility or as a method of last resort to an authorized hazardous waste facility.

d. No collector shall dispose of a lead-acid battery except by delivery to a recycling facility, another collector, or as a method of last resort to an authorized hazardous waste facility.

e. No recycling facility or authorized hazardous waste facility shall store, recycle or dispose of a lead-acid battery except in accordance with regulations promulgated pursuant to this chapter.

4. Lead-acid battery collection. a. Every retailer shall accept up to two used lead-acid batteries per calendar month from any individual at no charge to such individual.

b. Every distributor shall accept up to two used lead-acid batteries per calendar month from any individual at no charge to such individual and shall accept used lead-acid batteries from any retailer to which the distributor sells lead-acid batteries at no charge to such retailer.

5. a. Any consumer purchasing a new lead-acid battery who does not return a used lead-acid battery to the retailer at the time of such purchase shall pay such retailer a return incentive payment of five dollars per lead-acid battery sold.

b. A retailer shall refund to a consumer the five dollar return incentive payment collected pursuant to this subdivision if, within thirty days of the date of the purchase of a new lead-acid battery, the consumer returns to such retailer a used lead-acid battery. Any return incentive payment not refunded to the consumer pursuant to this subdivision shall be retained by the retailer.

c. In collecting a return incentive payment pursuant to this subdivision, the retailer shall inform the consumer of the retailer's obligation to refund such return incentive payment to such consumer

should the consumer return a used lead-acid battery within thirty days.

6. Posting requirements. Every retailer and distributor shall post a conspicuous sign, open to public view, displaying the universal recycling symbol and stating: "IT IS ILLEGAL TO DISCARD VEHICLE BATTERIES. STATE LAW REQUIRES US TO ACCEPT VEHICLE BATTERIES AT NO CHARGE FOR RECYCLING."

7. Applicability of other laws. For the purposes of this section, any retailer, distributor, or collector who complies with the requirements set forth in this section shall be exempt from the provisions of titles seven and nine of this article and article seventy-two of this chapter.

8. Any provision of any local law or ordinance, or any rule or regulation promulgated thereto, governing the collection, return or recycling of lead-acid batteries which is inconsistent with any provision of this title shall upon the effective date of this title be preempted, provided, however, that such preemption shall not extend to any provision of a local law or ordinance prohibiting the illegal disposal of lead-acid batteries.

9. The provisions of this title shall be severable and if any portion thereof or the applicability thereof to any person or circumstances shall be held invalid, the remainder of this title and the application thereof shall not be affected thereby.

TITLE 18

EXTENDED PRODUCER RESPONSIBILITY FOR RECHARGEABLE BATTERIES

Section 27-1801. Short title.

27-1803. Definitions.

27-1805. Rechargeable battery disposal ban.

27-1807. Rechargeable battery recycling program.

27-1809. Enforcement of this title.

27-1811. State preemption.

§ 27-1801. Short title.

This title shall be known as and may be cited as the "Extended Producer Responsibility Law for Rechargeable Batteries".

§ 27-1803. Definitions.

When used in this title:

1. "battery manufacturer" means every person, firm or corporation that: (i) produces rechargeable batteries sold or distributed in the state, or packages such batteries for sale in the state, except that if such production or packaging is for a distributor having the right to produce or otherwise package that same brand of battery in the state, then such distributor shall be deemed to be the battery manufacturer; (ii) imports rechargeable batteries into the United States that are sold or distributed in the state; or (iii) with respect to rechargeable batteries defined in subparagraph (ii) of paragraph (a) of subdivision four of this section, if no person, firm or corporation under paragraph (i) or (ii) of this subdivision takes responsibility for the requirements under this title, "battery manufacturer" means the manufacturer of the product that comes with, or contains, the rechargeable battery at the time the product is sold;

2. "consumer" means any person who purchases one or more rechargeable batteries, or products containing such batteries at the time of sale, for personal use;

3. "place of business" means the location at which a retailer sells or offers for sale to consumers, rechargeable batteries, or products containing such batteries at the time of sale;

4. (a) "rechargeable battery" means any of the following rechargeable batteries weighing less than fifty pounds: (i) any nickel-cadmium, sealed lead, lithium ion, or nickel metal hydride battery; (ii) any battery used as the principal electric power source for an electric

scooter or bicycle with electric assist; (iii) any other such dry cell battery capable of being recharged; or (iv) battery packs containing any such batteries;

(b) "rechargeable battery" shall not include a battery used as the principal electric power source for a vehicle other than as set forth in subparagraph (ii) of paragraph (a) of this subdivision, such as, but not limited to, an automobile, boat, truck, tractor, golf cart or wheelchair; for storage of electricity generated by an alternative power source, such as solar or wind-driven generators; or for memory backup that is an integral component of an electronic device;

5. "retailer" means a person, firm or corporation that engages in the sale of rechargeable batteries, or products containing such batteries, to a consumer in the state, including, but not limited to, transactions conducted through sales outlets, catalogs, by mail, telephone or the internet. For the purposes of this section retailer shall not include a food store; and

6. "food store" means a store selling primarily food and food products for consumption or use off the premises that occupies less than fourteen thousand square feet of display space.

7. "sell" or "sale" means any transfer for consideration of title or the right to use, from a manufacturer or retailer to a person, including, but not limited to, transactions conducted through retail sales outlets, catalogs, mail, the telephone, the internet, or any electronic means; "sell" or "sale" shall not include samples, donations, and reuse.

§ 27-1805. Rechargeable battery disposal ban.

No person shall knowingly dispose of rechargeable batteries as solid waste at any time in the state.

§ 27-1807. Rechargeable battery recycling program.

1. Rechargeable batteries shall be returned to a retailer that sells such batteries that are similar in shape, size, function and weight to those to be disposed of. Rechargeable batteries contained in electronic products must be removed prior to disposal of such product.

a. Retailers having a place of business in the state shall accept from consumers at any time during normal business hours rechargeable batteries of a similar shape, size, function and weight as the retailer offers for sale; provided, however, that any acceptance of batteries from electric scooters or bicycles with electric assist shall be voluntary, and shall only be permissible at retailers which offer for sale electric scooters or bicycles with electric assist or their batteries. Retailers shall take up to ten such batteries, provided, however, with respect to rechargeable batteries defined in subparagraph (ii) of paragraph (a) of subdivision four of section 27-1803 of this title, retailers shall take up to five such batteries, per day from any person regardless of whether such person purchases replacement batteries, and retailers shall also accept as many such batteries as a consumer purchases from the retailer, except for batteries from electric scooters or bicycles with electric assist. Retailers, other than retailers not participating as a collection site who sell electric scooters or bicycles with electric assist or their batteries and no other types of rechargeable batteries, shall conspicuously post and maintain, at or near the point of entry to the place of business, a legible sign, not less than eight and one-half inches by eleven inches in size, stating that used rechargeable batteries of the size and shape sold or offered for sale by the retailer may not enter the solid waste stream, and that the retail establishment is a collection site for recycling such batteries. Such sign shall state the following in letters at least one inch in height: "It is illegal to dispose of rechargeable batteries in the state of New York as solid waste. We accept used rechargeable batteries for return to the manufacturer."

b. Retailers that sell rechargeable batteries to consumers in the state through non-retail outlets such as through catalogs, or by mail, telephone or the internet shall provide at the time of purchase or

delivery to the consumer notice of an opportunity to return used rechargeable batteries at no cost to the consumer for reuse or recycling.

c. Retailers in the state, other than retailers not participating as a collection site who sell electric scooters or bicycles with electric assist or their batteries and no other types of rechargeable batteries, shall conspicuously maintain, at a location within the retail establishment that is convenient for use by consumers, collection boxes or other suitable receptacles, supplied by the manufacturer, into which consumers may safely deposit used rechargeable batteries.

d. Retailers shall not accept rechargeable batteries defined in subparagraph (ii) of paragraph (a) of subdivision four of section 27-1803 of this title that are damaged, defective, or recalled.

e. Retailers may not sell or offer for sale to consumers in the state rechargeable batteries unless the battery manufacturer is operating in accordance with a collection, transportation, and recycling plan approved by the commissioner. The commissioner shall maintain on the department's website a list of manufacturers operating in accordance with approved plans, and the brands covered by such manufacturer's plans. No retailer shall be in violation of the requirements of this paragraph if, at the date the rechargeable battery was made available for sale, the battery manufacturer of such battery was on the list of manufacturers operating in accordance with an approved plan maintained on the department's website.

f. Retailers must be in compliance with the provisions of this subdivision no later than one hundred eighty days after the effective date of this title or, with respect to a rechargeable battery defined in subparagraph (ii) of paragraph (a) of subdivision four of section 27-1803 of this title, and with respect to the requirements of paragraph e of this subdivision one year after the effective date of the chapter of the laws of two thousand twenty-five which amended this title, or when the commissioner has approved a new or updated plan in compliance with such chapter, whichever is later.

2. Every battery manufacturer, or any combination of battery manufacturers working together, shall, at the battery manufacturer's own expense, arrange for the return of, and recycling of: all used rechargeable batteries collected by retailers; and all rechargeable batteries from electric scooters or bicycles with electric assist, and such batteries that are damaged, defective, or recalled, that are collected at permitted household hazardous waste collection sites, registered household hazardous waste collection events, appropriate municipal sites, and other collection sites described in the approved plan. Every battery manufacturer or any combination of battery manufacturers working together, shall be responsible for, at a minimum, the following:

a. (i) Within ninety days of the effective date of this title or, with respect to rechargeable batteries defined in subparagraph (ii) of paragraph (a) of subdivision four of section 27-1803 of this title, within one hundred eighty days of the effective date of the chapter of the laws of two thousand twenty-five that amended such paragraph, submittance to the commissioner of a new or updated plan that identifies the methods by which battery manufacturers will safely and promptly collect, transport, and recycle rechargeable batteries collected by retailers, permitted household hazardous waste collection sites and registered household hazardous waste collection events, appropriate municipal sites, and other collection sites described in the plan, at the expense of the battery manufacturer, including the procedures to promptly and regularly remove batteries from these locations, and provide retailers and collection sites with information on the safe handling and storage of rechargeable batteries.

(ii) With respect to rechargeable batteries defined in subparagraph (ii) of paragraph (a) of subdivision four of section 27-1803 of this title, the plan shall:

(1) propose for the department's approval a geographic distribution of collection sites to be established to maximize the opportunity for the safe collection of rechargeable batteries and be sufficient to meet the needs of consumers in an ongoing and convenient manner. Such proposal may consider registered household hazardous waste collection events,

provided however, such events shall not alone be considered sufficient to meet the needs of consumers in an ongoing and convenient manner;

(2) minimize the co-location of collection sites with residential housing, to the extent feasible;

(3) be consistent with state and local fire prevention and building code council standards;

(4) identify the criteria by which rechargeable batteries will be determined to be damaged, defective, or recalled, and how such information will be communicated to retailers and customers; and

(5) include provisions to ensure that employees of collection sites who handle or have responsibility for managing such batteries are informed about proper handling and emergency procedures.

a-1. The reimbursement to local governments of all costs incurred in relation to the collection of rechargeable batteries from electric scooters or bicycles with electric assist, including, but not limited to, costs associated with safety training and storage.

a-2. The provision of appropriate containers and other equipment to retailers and collection sites for the safe storage and handling of rechargeable batteries.

b. Submittance to the department of annual reports, on a form prescribed by the department, concerning: (i) the amount of rechargeable batteries received within the state and recycled either by number or by weight, including the weight of rechargeable batteries defined in subparagraph (ii) of paragraph a of subdivision four of section 27-1803 of this title received within the state as well as within a city with a population of one million or more; (ii) the location and address of all collection sites and events and the amount of rechargeable batteries collected at each site or event; (iii) the costs of the efforts described in subparagraphs (i) and (ii) of this paragraph, including any reimbursements to municipalities; and (iv) any other relevant information as required by the department.

c. Undertaking of efforts to educate the citizens of the state regarding the appropriate ways to recycle rechargeable batteries, which,

at a minimum, shall include:

- (i) information regarding the location of retailers, collection sites, and events, including hours of operation and rechargeable battery type acceptance;

- (ii) retailer collection site safety training and outreach, including procedures for handling, storing, and transporting damaged or recalled rechargeable batteries;

- (iii) information for relevant municipalities regarding reimbursement; and

- (iv) promotional activities in support of program implementation, including the maintenance of a website, distribution of educational materials and guidance, and the use of relevant media platforms, and other activities to maximize public awareness of collection sites.

d. Providing for the safe and prompt collection and recycling or proper disposal of batteries from electric scooters or bicycles with electric assist, collected by retailers of electric scooters, bicycles with electric assist, or their batteries and accepted by permitted household hazardous waste collection sites and registered household hazardous waste collection events, appropriate municipal sites and other collection sites described in the plan.

e. Providing for the safe and prompt collection, recycling, and disposal of damaged, defective, and recalled rechargeable batteries accepted by permitted household hazardous waste collection sites and registered household hazardous waste collection events.

2-a. A battery manufacturer may not sell, offer for sale, or distribute rechargeable batteries, excluding rechargeable batteries defined in subparagraph (ii) of paragraph (a) of subdivision four of section 27-1803 of this title, in the state unless the battery manufacturer is implementing or participating under an approved plan in accordance with this section. Provided however, beginning January first, two thousand twenty-seven, a battery manufacturer of rechargeable batteries defined in subparagraph (ii) of paragraph (a) of subdivision four of section 27-1803 of this title may not sell, offer for sale, or distribute such rechargeable batteries in the state unless the battery

manufacturer is implementing or participating under an approved plan in accordance with this section.

3. The commissioner shall approve or reject any battery manufacturer's collection, transportation, and recycling plans described in paragraph a of subdivision two of this section within ninety days of submission and, if rejected, inform the battery manufacturer in writing as to any deficiencies in said plan. Battery manufacturers shall amend and resubmit any rejected plans for reconsideration within sixty days of notification of the rejection of said plan. The commissioner shall approve or reject said plan within thirty days of resubmission and shall make any approved plan public on the department's website.

4. The commissioner shall analyze the information provided by battery manufacturers pursuant to paragraph b of subdivision two of this section and report such analysis to the governor and the legislature every two years. Provided further, that the department shall, no later than January first, two thousand thirty-one, make public a report examining voluntary collection by retailers of rechargeable batteries from electric scooters or bicycles with electric assist established pursuant to paragraph a of subdivision one of this section. Such report, shall, at a minimum:

- (i) examine information, if available, provided to the department from manufacturers in their annual reports, including any known or identified barriers to the voluntary participation of retailers to serve as collection sites, and any concerns submitted to the department;

- (ii) identify retailers participating voluntarily and examine any trends in the number and location of retailers participating voluntarily;

- (iii) evaluate the need for additional collection sites and if the existing number and location of collection sites is sufficient to meet the needs of consumers in an ongoing and convenient manner; and

- (iv) recommend to the legislature any changes to such law, including an assessment of whether it is safe and feasible to expand the collection requirements of retailers of rechargeable batteries from electric scooters or bicycles with electric assist.

5. The commissioner is authorized to promulgate any rules and regulations needed to implement this title.

6. The department, when approving or rejecting any updates to a battery manufacturer's collection, transportation, and recycling plans described in paragraph a of subdivision two of this section relating to the inclusion of batteries defined in subparagraph (ii) of paragraph (a) of subdivision four of section 27-1803 of this title, shall solicit input from the office of fire prevention and control in the division of homeland security and emergency services, and with respect to the parts of such plan directly related to the city of New York, the fire department of the city of New York.

§ 27-1809. Enforcement of this title.

1. Any person who violates the provisions of section 27-1805 of this title shall be liable for a civil penalty in the amount of fifty dollars for the first violation, one hundred dollars for a second violation committed within twelve months of a prior violation and two hundred dollars for a third or subsequent violation committed within twelve months of any prior violation.

2. Any retailer as that term is defined in section 27-1803 of this title, who violates the provisions of section 27-1807 of this title shall be liable for a civil penalty in the amount of two hundred dollars for the first violation, four hundred dollars for a second violation committed within twelve months of a prior violation, and five hundred dollars for a third or subsequent violation committed within twelve months of any prior violation.

3. Any battery manufacturer, as that term is defined in section 27-1803 of this title, who violates the provisions of section 27-1807 of this title shall be liable for a civil penalty in the amount of two thousand dollars for the first violation, four thousand dollars for a second violation committed within twelve months of a prior violation, and five thousand dollars for a third or subsequent violation committed

within twelve months of any prior violation.

4. Civil penalties under this section shall be assessed by the commissioner after a hearing or opportunity to be heard pursuant to the provisions of section 71-1709 of this chapter, or shall be assessed by the court in any action or proceeding pursuant to this section. In addition to any civil penalties, any person, retailer or manufacturer, as those terms are defined in section 27-1803 of this title, may by similar process be enjoined from continuing such violation.

5. In a city with a population of one million or more, such city shall, in addition to any authority otherwise conferred in this chapter, have concurrent authority to enforce, by an agency or agencies designated for such purpose by the mayor of such city, the provisions of section 27-1805 and subdivision one of section 27-1807 of this title. Any notice of violation issued by an agency designated by the mayor of such city charging a violation of section 27-1805 and subdivision one of section 27-1807 of this title shall be returnable to the environmental control board of such city. Such environmental control board shall have the power to impose the civil penalties set forth in subdivisions one, two and three of this section. All civil penalties collected for any violation of this title that have been imposed by the environmental control board of such city shall be paid into the general fund of such city. Such city shall share information with the department regarding enforcement, including notices of violation issued and penalties imposed and collected for violations in such city.

§ 27-1811. State preemption.

Jurisdiction in all matters pertaining to rechargeable battery recycling is, by this title, vested exclusively in the state. Any provision of any local law or ordinance, or any rule or regulation promulgated thereto, governing rechargeable battery recycling shall, upon the effective date of section 27-1805 of this title, be preempted; provided, however, that nothing in this section shall preclude a person from coordinating, for recycling or reuse, the collection of

rechargeable batteries and provided, further, however, that nothing in this section shall preclude the enforcement of this title pursuant to subdivision five of section 27-1809 of this title.

TITLE 19

WASTE TIRE MANAGEMENT AND RECYCLING

Section 27-1901. Definitions.

27-1903. Waste tire management priorities.

27-1905. Mandatory tire acceptance; notices.

27-1907. Abatement of noncompliant waste tire stockpiles.

27-1909. Market development.

27-1911. Prohibition on land burial.

27-1913. Waste tire management and recycling fee.

27-1915. Use of waste tire management and recycling fee funds.

§ 27-1901. Definitions.

When used in this title:

1. "Abatement" means the removal of a sufficient number of waste tires from a noncompliant waste tire stockpile and restoration of the site to a condition that is in substantial compliance with the rules and regulations administered by the department for waste tire storage facilities.

2. "Beneficial use" means the use of solid waste material, which would otherwise need to be placed in a landfill or disposed of through alternative means, in such a manner that the nature of the use of the material constitutes a reuse rather than disposal. Beneficial uses include incorporation of a solid waste material, which is a legitimate substitute for a raw material, into a product marketable to an end user. Waste tires which are burned as a fuel for the purposes of recovering useable energy are considered to be beneficially used only at the point at which they are burned.

3. "End use" means that a product requires no further processing or manufacturing and is used by a consumer for the product's intended application.
4. "End user" means the ultimate customer of a finished product.
5. "New tires" means tires that have never been placed on a motor vehicle wheel rim or tires placed on a motor vehicle prior to its original retail sale. It does not include recapped or resold tires.
6. "Noncompliant waste tire stockpile" means a facility, including a waste tire storage facility, parcel of property, or site so designated by the department in accordance with this title, where one thousand or more waste tires or mechanically processed waste tires have been accumulated, stored or buried in a manner that the department or a court of competent jurisdiction has determined violates any judicial administrative order, decree, law, regulation, or permit or stipulation relating to waste tires, waste tire storage facilities or solid waste.
7. "Recycle" means to use recyclables in manufacturing a product for an end use other than burning for recovery of useable energy.
8. "Recyclables" means solid waste materials that exhibit the potential to be used to make marketable products for end users.
9. "Removed from service" means removed within New York state from the service for which the tires were intended to be used when the tires and tire casings were separated for retreading.
10. "Retail sale" means the sale to any person in the state for any purpose other than resale.
11. "Tire service" means any person or business who sells or installs new tires for use on any vehicle and any person or business who engages in the retail sale of new motor vehicles. The United States of America and any of its agencies and instrumentalities, and New York state and any of its agencies, instrumentalities, public corporations, or

political subdivisions are excluded from this term.

12. "Vehicle" or "Motor Vehicle" means any device which by virtue of its design could qualify for registration pursuant to section four hundred one, four hundred ten, two thousand two hundred sixty-one, or two thousand two hundred eighty-two of the vehicle and traffic law.

13. "Waste tire" means any solid waste which consists of whole tires or portions of tires. Tire casings separated for retreading and tires with sufficient tread for resale shall be included under this term, however, crumb rubber shall not be considered a solid waste.

14. "Waste tire storage facility" means a facility at which waste tires are stored and for which a permit or registration has been issued, pursuant to department regulations.

§ 27-1903. Waste tire management priorities.

In the interest of public health, safety and welfare and in order to conserve natural resources and to promote recycling and market development for waste tires, the state of New York establishes a policy on the management of waste tires that states:

1. The waste tire management priorities in this state are:
 - (a) first, to reduce the number of waste tires generated;
 - (b) second, to remediate waste tire stockpiles in noncompliance;
 - (c) third, to recycle waste tires into value-added products;
 - (d) fourth, to beneficially use waste tires in an environmentally acceptable manner, including the beneficial use in civil engineering applications; and
 - (e) fifth, to recover, in an environmentally acceptable manner consistent with the purpose of this chapter, energy from waste tires that cannot be economically recycled or otherwise beneficially used.

2. State government must make an essential contribution to the development and implementation of environmentally, economically and

technically viable waste tire management programs. The department shall cooperate with other state agencies, including the department of economic development, New York state energy research and development authority, the department of transportation, the New York state thruway authority and the department of health, to ensure that waste tires are effectively managed and used in environmentally acceptable ways consistent with the purposes of this chapter.

§ 27-1905. Mandatory tire acceptance; notices.

1. A tire service that maintains a physical retail location in the state shall, until December thirty-first, two thousand twenty-seven:

(a) accept from a customer, waste tires of approximately the same size and in a quantity equal to the number of new tires purchased or installed by the customer;

(b) post written notice in a prominent location, which must be at least eight and one-half inches by fourteen inches in size and contain the following language:

"New York State law requires us to accept and manage waste tires from vehicles in exchange for an equal number of new tires that we sell or install. Tire retailers are required to charge a separate and distinct waste tire management and recycling fee of \$2.50 for each new tire sold.

The retailers in addition are authorized, at their sole discretion, to pass on waste tire management and recycling costs to tire purchasers. Such costs may be included as part of the advertised price of the new tire, or charged as a separate per-tire charge in an amount not to exceed \$2.50 on each new tire sold."

The written notice shall also contain one of the following statements at the end of the aforementioned language and as part of the notice, which shall accurately indicate the manner in which the tire service charges for waste tire management and recycling costs, and the amount of any charges that are separately invoiced for such costs:

"Our waste tire management and recycling costs are included in the advertised price of each new tire.", or

"We charge a separate per-tire charge of \$_____ on each new tire sold that will be listed on your invoice to cover our waste tire management and recycling costs."; and

(c) ensure that any retail advertisement of promotional material provided by or on behalf of the tire service that lists a tire price which does not include waste tire management and recycling costs contains one of the following statements conspicuously located in or on the advertisement and in the same font as the advertised price of the tire: "Additional fees relating to tire management and recycling costs may apply," or, "We charge a separate per-tire charge of \$_____ on each new tire sold that will be listed on your invoice to cover our waste tire management and recycling costs where applicable." Where the latter statement is used, it shall list the amount of the separate per-tire charge.

2. A tire service that does not maintain a physical retail location in the state shall, until December thirty-first, two thousand twenty-seven make viewable to a customer in the state a statement, prior to the purchase of new tires, that contains the following language:

"New York state law requires tire retailers to charge a separate and distinct waste tire management and recycling fee of \$2.50 for each new tire sold."

§ 27-1907. Abatement of noncompliant waste tire stockpiles.

1. No later than one year from the effective date of this title, the department shall prepare and submit to the governor and the legislature a comprehensive plan designed to abate all noncompliant waste tire stockpiles by December thirty-first, two thousand ten. This plan shall establish a noncompliant waste tire stockpile abatement priority list and schedule for abatement of each noncompliant waste tire stockpile based on potential adverse impacts upon public health, safety or welfare, the environment, or natural resources. The plan shall also include a census of compliant and non-compliant waste tire stockpiles in the state and the number of waste tires believed to be stored at each site.

2. The owner or operator of a noncompliant waste tire stockpile shall, at the department's request, submit to and/or cooperate with any and all remedial measures necessary for the abatement of noncompliant waste tire stockpiles with funds from the waste management and cleanup fund pursuant to section ninety-two-bb of the state finance law.

3. No later than two years from the effective date of this title, the department shall publish requests for proposals to seek contractors to prepare whole and mechanically processed waste tires situated at noncompliant waste tire stockpiles for arrangement in accordance with fire safety requirements and for removal for appropriate processing, recycling or beneficial use. Disposal will be considered only as a last option. The expenses of remedial and fire safety activities at a noncompliant waste tire stockpile shall be paid by the person or persons who owned, operated or maintained the noncompliant waste tire stockpile, or from the waste management and cleanup fund and shall be a debt recoverable by the state from all persons who owned, operated or maintained the noncompliant waste tire stockpile, and a lien and charge may be placed on the premises upon which the noncompliant waste tire stockpile is maintained and upon any real or personal property, equipment, vehicles, and inventory controlled by such person or persons. Moneys recovered shall be paid to the waste management and cleanup fund established pursuant to section ninety-two-bb of the state finance law.

4. If execution upon a judgment for the recovery of the expenses of any such remedial and fire safety activities at a noncompliant waste tire stockpile is returned wholly or partially unsatisfied, such judgment, if docketed in the place and manner required by law to make a judgment of a court of record a lien upon real property, shall be a first lien upon such premises, having preference over all other liens and encumbrances whatever. Notwithstanding the foregoing, such lien shall not have preference over any mortgage or other encumbrance for the benefit of the state of New York or a public benefit corporation thereof.

5. The department shall make all reasonable efforts to recover the

full amount of any funds expended from the waste management and cleanup fund for abatement or remediation through litigation or cooperative agreements. Any and all moneys recovered, repaid or reimbursed pursuant to this section shall be deposited with the comptroller and credited to such fund.

6. The department shall have authority to enter all noncompliant waste tire stockpiles for the purpose of investigation and abatement.

§ 27-1909. Market development.

No later than one year after the effective date of this title and continuing annually thereafter, the department of economic development shall:

1. assist private market development with new technologies for waste tire reuse and recycling with an emphasis on higher-value end uses in order to further create and enhance sustainable markets;

2. provide industrial and consumer education on other benefits of recycled waste tire product through the preparation of fact sheets and public workshops; and

3. prepare an annual summary report and analysis of markets and disposition of both New York state stockpiled tires and New York state annually generated waste tires. This report shall be submitted to the department and legislature by the last day of March of each year.

§ 27-1911. Prohibition on land burial.

1. No person shall knowingly dispose of waste tires in a landfill except as provided in subdivision two of this section.

2. No moneys from the waste management and cleanup fund shall be used to dispose of waste tires in a landfill unless the department has

determined that it is not feasible to convert the waste tires to a beneficial use. Department-approved beneficial uses of scrap-tire-derived material for leachate collection systems, or gas collection systems in the construction or operation of a landfill are not considered disposal.

§ 27-1913. Waste tire management and recycling fee.

1. Until December thirty-first, two thousand twenty-seven, a waste tire management and recycling fee of two dollars and fifty cents shall be charged on each new tire sold. The fee shall be paid by the purchaser to the tire service at the time the new tire or new motor vehicle is purchased; provided, however, that the fee shall be paid by a purchaser to a tire service upon installation of new tires unless the purchaser can demonstrate that the fee was previously paid to the seller.

The waste tire management and recycling fee does not apply to recapped tires.

2. Until December thirty-first, two thousand twenty-seven, the tire service shall collect the waste tire management and recycling fee from the purchaser at the time of the sale and shall remit such fee to the department of taxation and finance with the quarterly report filed pursuant to subdivision three of this section.

(a) The fee imposed shall be stated as an invoice item separate and distinct from the selling price of the tire.

(b) A tire service that maintains a physical retail location in the state shall be entitled to retain an allowance of twenty-five cents per tire from fees collected.

3. Each tire service that is a "person required to collect tax" as defined in section eleven hundred thirty-one of the tax law shall make a return to the department of taxation and finance on such form and including such information as the commissioner of taxation and finance may require. Such returns shall be due at the same time and for the same periods as the sales tax return of such tire service, in accordance with

section eleven hundred thirty-six of the tax law, and payment of all fees due for such periods shall be remitted with such returns.

4. All waste tire management and recycling fees collected by the department of taxation and finance shall be transferred to the waste management and cleanup fund pursuant to section ninety-two-bb of the state finance law.

5. (a) The provisions of article twenty-eight of the tax law, including the provisions relating to definitions, exemptions, returns, personal liability for the tax, collection of tax from the customer, payment of tax and the administration of the tax imposed, shall apply to the provisions of this section in the same manner and with the same force and effect as if the language of such article had been incorporated in full into this section and had expressly referred to the fee under this section, except to the extent that any provision of such article is either inconsistent with a provision of this section or is not relevant to this section. For purposes of this section, any reference to a tax or the taxes imposed by article twenty-eight of the tax law shall be deemed also to refer to the waste tire management and recycling fee imposed under the authority of this section unless a different meaning is clearly required.

(b) Notwithstanding the provisions of paragraph (a) of this subdivision, the exemptions provided in section eleven hundred sixteen of the tax law shall not apply to this section except with respect to the entities described in paragraphs one, two, three and six of subdivision (a) of such section.

6. (a) Until December thirty-first, two thousand twenty-seven, any additional waste tire management and recycling costs of the tire service in excess of the amount authorized to be retained pursuant to paragraph (b) of subdivision two of this section may be included in the published selling price of the new tire, or charged as a separate per-tire charge on each new tire sold. When such costs are charged as a separate per-tire charge: (i) such charge shall be stated as an invoice item separate and distinct from the selling price of the tire; (ii) the invoice shall state that the charge is imposed at the sole discretion of

the tire service; and (iii) the amount of such charge shall reflect the actual cost to the tire service for the management and recycling of waste tires accepted by the tire service pursuant to section 27-1905 of this title, provided however, that in no event shall such charge exceed two dollars and fifty cents on each new tire sold.

(b) Every tire service shall maintain accurate records of the actual costs of waste tire management and recycling incurred by such tire service, and accurate accounts of any charges or costs included in or on the sale of new tires for the purpose of waste tire management and recycling. Any tire service imposing a charge or costs for its waste tire management and recycling shall submit an annual statement of such charges or costs to the comptroller of the state of New York by the end of each calendar year. The comptroller is hereby authorized and empowered from time to time to examine the accounts and records of any tire service that imposes any costs or charges for the costs of the tire service for waste tire management and recycling as authorized by this subdivision.

§ 27-1915. Use of waste tire management and recycling fee funds.

Waste tire management and recycling fees shall be deposited in the waste management and cleanup fund established in section ninety-two-bb of the state finance law, and shall be made available for the following purposes:

1. costs of the department for the following:

(a) first-year costs:

(i) enumeration and assessment of noncompliant waste tire stockpiles; and

(ii) aerial reconnaissance to locate, survey and characterize sites environmentally, for remote sensing, special analysis and scanning;

(b) abatement of noncompliant waste tire stockpiles;

(c) administration and enforcement of the requirements of this article, exclusive of titles thirteen and fourteen; and

(d) conducting an updated market analysis of outlets for waste tire utilization including recycling and energy recovery opportunities, which

shall not include the incineration of waste tires.

2. costs of the department of economic development for the following:

- (a) conducting an updated market analysis of outlets for waste tire utilization including recycling and energy recovery opportunities;
- (b) establishment of a program to provide funds to businesses to develop technology that leads to increased markets for waste tires;
- (c) funding of demonstration projects, including, but not limited to, reuse in agricultural settings; and
- (d) administration of requirements of this section.

3. costs of the department of transportation for the following:

- (a) funding of demonstration and other projects for road base, paving and other civil engineering uses; and
- (b) administration of requirements of this section.

4. costs of the New York state thruway authority for the following:

- (a) funding of demonstration and other projects for road base, paving and other civil engineering uses; and
- (b) administration of requirements of this section.

5. costs of the New York state energy research and development authority for the following:

- (a) funding research projects which will enhance sustainable waste tire recycling activities; and
- (b) administration of requirements of this section.

6. costs of the department of health for the following:

- (a) recommendations to protect public health;
- (b) administration of requirements of this section; and
- (c) prevention or control of on-site populations of vectors, as defined in subdivision ten of section 27-2301 of this article, using techniques appropriate for protection of human health and the environment to prevent the site from being a vector breeding area.

Any funds not used for a given year shall be returned to the fund and be added to the total funds available for disbursement in the succeeding

year.

TITLE 20

POSTCONSUMER PAINT COLLECTION PROGRAM

Section 27-2001. Definitions.

27-2003. Postconsumer paint collection program.

27-2005. Reporting requirements.

27-2007. Department responsibilities.

§ 27-2001. Definitions.

As used in this title, the following terms shall have the following meanings:

1. "architectural paint" means interior and exterior architectural coatings sold in containers of five gallons or less; provided, however, that "architectural paint" shall not include industrial, original equipment or specialty coatings.

2. "commissioner" means the commissioner of environmental conservation.

3. "department" means the department of environmental conservation.

4. "environmentally sound management practices" means procedures for the collection, storage, transportation, reuse, recycling and disposal of architectural paint, to be implemented by the producer or representative organization or by the producers or representative organization's contracted partners to ensure compliance with all applicable federal, state and local laws and any regulations and ordinances for the protection of human health and the environment and these procedures shall address adequate record keeping, tracking and documenting of the final disposition of materials.

5. "postconsumer paint" means architectural paint not used and no

longer wanted by a consumer.

6. "producer" means a manufacturer of architectural paint who sells, offers for sale or distributes the architectural paint in the state.

7. "program" means the postconsumer paint collection program established pursuant to section 27-2003 of this title.

8. "recycling" means a process by which discarded products, components and by-products are transformed into new usable or marketable materials in a manner in which the original products may lose their identity. This term excludes thermal treatment or the use of postconsumer paint as a fuel substitute or for energy production.

9. "representative organization" means a not-for-profit organization established by producers to implement the postconsumer paint collection program.

10. "retailer" means a person that offers architectural paint for sale at retail in the state.

11. "Reuse" means the return of a product into the economic stream for use in the same kind of application as the product was originally intended to be used, without a change in the product's identity.

12. "Sell" or "sale" means any transfer for consideration of title or the right to use, from a manufacturer or retailer to a person, including, but not limited to, transactions conducted through retail sales outlets, catalogs, mail, the telephone, the internet, or any electronic means; this does not include samples, donations, and reuse.

§ 27-2003. Postconsumer paint collection program.

1. No later than July first, two thousand twenty, a producer, either individually or cooperatively, or a representative organization shall submit to the department for the department's approval a plan for the

establishment of a postconsumer paint collection program. Such plan shall be accompanied by a fee of five thousand dollars for an individual producer or, in the case of a representative organization or producers acting collectively, a fee of ten thousand dollars. The program will minimize public sector involvement in the management of postconsumer paint by reducing its generation, promoting its reuse and recycling and negotiating and executing agreements to collect, transport, reuse, recycle and properly dispose of postconsumer paint using environmentally sound management practices.

2. A producer may satisfy the postconsumer paint collection program requirement of this section by agreeing to participate collectively with other producers. Any such collective postconsumer paint collection program shall meet the same requirements as an individual producer. Such program shall submit a registration to the department along with a registration fee of ten thousand dollars.

3. The plan submitted by the producer or representative organization to the department under this section shall:

(a) provide a list of each participating producer and brands covered by the program.

(b) provide information on the architectural paint products covered under the program.

(c) describe how the producer or representative organization will collect, transport, recycle, and process postconsumer paint for end-of-life management, including recycling and disposal, using environmentally sound management practices.

(d) describe how it will provide for convenient and cost-effective statewide collection of postconsumer paint in the state. The producer or representative organization may coordinate the program with existing municipal waste collection infrastructure as is mutually agreeable. A paint retailer may participate, on a voluntary basis, as a paint collection site if the paint retailer volunteers to act as such and complies with all applicable laws and regulations.

(e) provide geographic modeling to determine the number and distribution of sites for collection of postconsumer paint based on the following criteria (i) at least ninety percent of New York residents

shall have a collection site within a fifteen mile radius; and (ii) one additional collection site will be established for every fifty thousand residents of an urbanized area (as defined by the United States Census Bureau), unless the producer is a small business taxpayer as defined in paragraph (f) of subdivision one of section two hundred ten of the tax law or unless otherwise approved by the commissioner.

(f) describe the intended treatment, storage, transportation and disposal options and methods for the collection of postconsumer paint. The management of paint under the program shall promote reuse and recycling.

(g) describe in detail education and outreach efforts to inform consumers and retailers about the program. These materials should include (i) information about collection opportunities for postconsumer paint; (ii) information about the charge for the operation of the program that shall be included by the producer in the price charged to the retailer of all architectural paint sold in the state; and (iii) efforts to promote the source reduction, reuse, and recycling of architectural paint.

(h) set forth the process by which an independent financial auditor will be selected and identify the criteria used by the producer or representative organization in selecting an independent auditor.

(i) identify, in detail, the operational plans for interacting with retailers on the proper handling and management of postconsumer paint.

(j) include the targeted annual collection rate.

(k) be reviewed by an independent financial auditor to assure that any added cost to paint sold in the state as a result of the postconsumer paint collection program does not exceed the costs of the program. The independent auditor shall verify that the amount added to each unit of paint will cover the costs of the postconsumer paint collection program.

4. The independent financial auditor may be selected by the department and the department shall review the work product of any such independent auditor. The department may terminate the services of any such independent auditor. The cost of any work performed by such independent auditor shall be funded by the program.

5. The department shall approve or reject a plan submitted under this

section within sixty days of submission and, if rejected, inform the producer or representative organization in writing as to any deficiencies in said plan. A producer or representative organization shall amend and resubmit any rejected plans for reconsideration within sixty days of notification of the rejection of said plan. The department shall approve or reject said plan within thirty days of resubmission.

6. Beginning not later than January first, two thousand twenty-one or six months after the plan is approved under subdivision five of this section, whichever occurs later, the producer or representative organization shall implement the postconsumer paint collection program utilizing collection sites established pursuant to paragraph (e) of subdivision three of this section.

7. Not later than the implementation date of the program, information regarding the approved plan, the names of participating producers, and the brands of architectural paint covered by the program shall be posted on the department's website and on the website of the producer and representative organization.

8. Upon implementation of the program, each producer shall include in the price of any architectural paint sold to retailers and distributors in the state the per container amount in the approved program plan. A retailer or distributor shall not deduct this amount from the purchase price.

9. A producer or retailer shall not sell, or offer for sale, architectural paint to any person in the state unless the producer and the producer's brands are registered with the department pursuant to section 27-2003 of this title on and after the date of implementation of the postconsumer paint collection program.

10. (a) A retailer shall be in compliance with this section if, on the date the architectural paint was offered for sale, the producer is listed on the department's website as implementing or participating in an approved program or if the paint brand is listed on the department's website as being included in the program.

(b) A paint collection site authorized under the provisions of this section shall not charge any additional amount for the disposal of paint when it is offered for disposal.

11. (a) A producer or the representative organization that organizes the collection, transport and processing of postconsumer paint, in an action solely to increase the recycling of architectural paint by a producer, representative organization, or retailer that affects the types and quantities being recycled or the cost and structure of any return program shall not be liable for any claim of a violation of antitrust, restraint of trade or unfair trade practice arising from conduct undertaken in accordance with the program pursuant to this section.

(b) Provided however, paragraph (a) of this subdivision shall not apply to any agreement establishing or affecting the price of paint except for the postconsumer paint collection assessment or the output or production of paint or any agreement restricting the geographic area or customers to which paint will be sold.

12. The operator of the postconsumer paint collection program shall update the plan, as needed, when there are changes proposed to the current program. A new plan or amendment will be required to be submitted to the department for approval when:

- (a) there is an addition to the products covered under the program; or
- (b) there is a revision of the program's goals; or
- (c) every four years from the date of approval of a previous plan.

The operator of the postconsumer paint collection program shall notify the department annually, in writing, if there are no changes proposed to the program and the producer or representative organization intends to continue implementation of the program as previously approved by the department.

13. Any person who becomes a producer after July first, two thousand twenty shall submit a plan to the department prior to selling or offering for sale in the state any architectural paint, and must comply with the requirements of this title.

§ 27-2005. Reporting requirements.

1. On or before October fifteenth, two thousand twenty-one, and annually thereafter, each operator of a program shall submit a report to the commissioner that details the postconsumer paint collection program for the prior year's program from July first to June thirtieth. The report shall be posted on the department's website. The report shall be posted on the website of the producer and representative organization. Said report shall include a copy of the independent audit detailed in paragraph (d) of this subdivision. Such annual report shall include:

(a) a detailed description of the methods used to collect, transport and process postconsumer paint in the state including detailing collection methods made available to consumers and an evaluation of the program's collection convenience;

(b) the overall volume of postconsumer paint collected in the state;

(c) the volume and type of postconsumer paint collected in the state by method of disposition, including reuse, recycling and other methods of processing or disposal;

(d) the total cost of implementing the program, as determined by an independent financial audit, as performed by an independent auditor;

(e) samples of all educational materials provided to consumers of architectural paint and retailers; and

(f) a detailed list of efforts undertaken and an evaluation of the methods used to disseminate such materials including recommendations, if any, for how the educational component of the program can be improved.

2. The department shall submit a report regarding the implementation of this title in this state to the governor and legislature by April first, two thousand twenty-two and every two years thereafter. The report must include, at a minimum, an evaluation of:

(a) the architectural and postconsumer paint stream in the state;

(b) disposal, recycling and reuse rates in the state for architectural paint;

(c) a discussion of compliance and enforcement related to the requirements of this title; and

(d) recommendations for any changes to this title.

§ 27-2007. Department responsibilities.

1. The department shall promulgate all necessary rules and regulations including, but not limited to, standards for reuse.

2. The department shall (a) maintain a list of producers who are implementing or participating pursuant to section 27-2003 of this title, (b) maintain a list of each such producer's brands, and (c) post such lists on the department's website.

TITLE 21

MERCURY-ADDED CONSUMER PRODUCTS

Section 27-2101. Definitions.

27-2103. Labeling.

27-2105. Disposal.

27-2107. Prohibitions.

27-2109. Advisory committee on mercury pollution.

27-2111. Regulations.

27-2113. Exemptions.

27-2115. Interstate clearinghouse.

27-2117. Phase-out of mercury-added components in motor vehicles.

27-2119. Phase-out of mercury-containing flooring.

§ 27-2101. Definitions.

As used in this title:

1. "Hazardous waste management facility" shall have the same meaning as "commercial hazardous waste facilities" as defined in section 27-0901 of this article.

2. "Collector" means any person who accepts mercury-added consumer products in order to transfer them to a solid waste management facility, a hazardous waste management facility or another collector.

3. "Consumer" means any person who purchases a mercury-added consumer product for use other than resale.

4. "Dispose" or "disposal" means the abandonment, discharge, deposit, injection, dumping, spilling, leaking or placing of any substance so that such substance or any related constituent thereof may enter the environment. Disposal also means the thermal destruction of waste or hazardous waste and the burning of such wastes as fuel for the purpose of recovering useable energy.

5. "Distributor" means any person who sells mercury-added consumer products to a retailer in this state, including any manufacturer who sells to retailers in the state.

6. "Manufacturer" means any person who manufactures mercury-added consumer products.

7. "Mercury-added consumer product" means any device or material into which elemental mercury or mercury compounds are intentionally added during such device's or material's formulation or manufacture, and in which the continued presence of mercury is required to provide a specific characteristic, appearance or quality, or to perform a specific function. Such term shall include, but not be limited to mercury-containing:

- (a) thermostats;
- (b) thermometers;
- (c) switches, whether individually or as part of another product;
- (d) medical or scientific instruments;
- (e) electrical relays and other electrical devices;
- (f) lamps; and
- (g) batteries sold to consumers, not including button batteries.

8. "Mercury-added novelty consumer product" means a mercury-added

consumer product intended mainly for personal or household enjoyment or adornment. Mercury-added novelty consumer products include, but are not limited to, items intended for use as practical jokes, figurines, adornments, toys, games, cards, ornaments, yard statues and figures, candles, jewelry, holiday decorations, items of apparel (including footwear), or similar products. A product is not a mercury-added novelty consumer product solely on the basis that it is a game with a light screen display containing mercury, or includes a removable battery containing mercury.

9. "Mercury fever thermometer" or "mercury body thermometer" means a mercury-added consumer product that is used for measuring body temperature. A product is not a "mercury fever thermometer" or "mercury body thermometer" solely on the basis that it includes a removable battery containing mercury.

10. "Solid waste" means solid waste as defined in section 27-0701 of this article.

11. "Retailer" means any person in this state who sells new mercury-added consumer products to consumers for purposes other than resale.

12. "Solid waste management facility" means a solid waste management facility as defined in section 27-0701 of this article.

13. "Elemental mercury" means the material represented by the chemical symbol Hg. Elemental Hg is a silvery-white liquid (at room temperature) with an atomic number of 80 and an atomic mass of 200.59.

14. "Mercury barometer" means a mercury-added consumer product used for measuring atmospheric pressure.

15. "Mercury esophageal dilator" or "mercury bougie tube" means a mercury-added consumer product in the form of a long, flexible tube that is passed down a patient's esophagus to dilate a narrowed area.

16. "Mercury flow meter" means a mercury-added consumer product used for measuring the flow or quantity of a moving fluid or gas.

17. "Mercury hydrometer" means a mercury-added consumer product used for measuring the specific gravity of a liquid.

18. "Mercury hygrometer" or "mercury psychrometer" means a mercury-added consumer product used for measuring the water vapor content of air.

19. "Mercury gastrointestinal tube" means a mercury-added consumer product in the form of a tube used for addressing intestinal obstructions.

20. "Mercury manometer" means a mercury-added consumer product used for measuring the pressure of liquids and gases.

21. "Mercury pyrometer" means a mercury-added consumer product used for measuring the temperature of extremely hot materials.

22. "Mercury sphygmomanometer" means a mercury-added consumer product used for measuring blood pressure in the arteries.

23. "Mercury thermometer" means a mercury-added consumer product used for measuring temperature.

24. "Mercury thermostat" means a mercury-added consumer product that uses a mercury switch to sense and control room temperature through communication with heating, ventilating or air conditioning equipment. Such term includes thermostats used to sense and control room temperature in residential, commercial, industrial and other buildings, but does not include a thermostat used to control temperature as part of a manufacturing process.

25. "Mercury relay" means a mercury-added consumer product or device that opens or closes electrical contacts to affect the operation of other devices in the same or another electrical circuit. Such term

includes mercury displacement relays and mercury contact relays but shall not include mercury wetted reed relays.

26. "Mercury switch" means a mercury-added consumer product or device that opens or closes an electrical circuit or gas valve. Such term includes mercury float switches actuated by rising or falling liquid levels, mercury tilt switches actuated by a change in the switch position, mercury pressure switches actuated by a change in pressure, and mercury temperature switches actuated by a change in temperature but shall not include mercury flame sensors. Mercury switch does not include a mercury thermostat.

27. "Household" means a single or multiple family residence.

28. "Manufacturer" means any person, firm, association, partnership, limited liability company, corporation, governmental entity, organization, combination or joint venture which is the last entity to produce or assemble a new motor vehicle that utilizes mercury-added components or, in the case of an imported motor vehicle, the importer or domestic distributor of such vehicle.

29. "Mercury-added component" means a motor vehicle component that contains greater than fifteen milligrams of mercury, which was intentionally added to such vehicle in order to provide a specific characteristic, appearance or quality, to perform a specific function, or for any other purpose. Such components shall include, but not be limited to, switches, sensors, lights and navigational systems.

30. "Mercury-added lamp" means an electric lamp to which mercury or mercury compounds are intentionally added during the manufacturing process, including, but not limited to, compact fluorescent lamps, fluorescent lamps and tubular fluorescent lamps with normal or long lifetime.

31. "Producer of mercury-added lamps" means any person who:

- (a) manufactures and sells mercury-added lamps under its own brand;
- (b) resells under its own brand equipment produced by other suppliers,

a reseller not being regarded as the producer of mercury-added lamps if the brand of the producer of mercury-added lamps appears on the equipment, as provided for in paragraph (a) of this subdivision; or

(c) serves as the importer or domestic distributor of a mercury-added lamp if the brand name owner is located outside of the United States.

32. "General purpose lights" means lamps, bulbs, tubes, or other electric devices that provide functional illumination for indoor residential, indoor commercial, and outdoor use. General purpose lights shall not include special purpose lights.

33. "Special purpose lights" means the following specialty lighting: appliance, black light, germicidal, colored, plant light, reflector, reprographic, shatter-resistant, cold temperature, sign service, and preheat.

34. "Long lifetime" means more than twenty-four thousand hours when tested on a T8 instant start ballast, a T12 rapid start ballast, or a T5 programmed start ballast, and turned on and off every three hours ("three hour starts").

§ 27-2103. Labeling.

1. Mercury-added consumer products sold or offered for sale in this state by a distributor or retailer shall be labeled by the manufacturer thereof in accordance with the provisions of this section.

2. Unless alternative labeling is approved by the commissioner pursuant to subdivision four of this section, the labeling of mercury-added consumer products shall:

(a) clearly and conspicuously inform the consumer that mercury is present in such product and that such product shall not be disposed of or placed in a waste stream destined for disposal in mixed municipal solid waste until the mercury is removed and reused, recycled or otherwise managed to ensure that the mercury does not become part of solid waste or contaminate wastewater;

(b) be conspicuous to the consumer prior to the purchase, and during the installation and removal of such product;

(c) be affixed to the product and be composed of a material sufficiently durable to remain legible and so affixed for the useful life of the product; and

(d) be printed and affixed to the product by the manufacturer thereof.

3. Automobile manufacturers shall be deemed to meet the labeling requirements of this section, with respect to either original equipment or service parts, if new automobiles bear a label on the doorpost that lists the mercury-added components that may be present in such vehicle. Such label shall, to the largest extent possible, be consistent with labeling provisions of other states. An automobile manufacturer may apply to the commissioner for approval of an alternative to the labeling requirement that would be at least as effective in providing presale notification of mercury content.

4. (a) The commissioner may promulgate rules and/or regulations specifying labeling requirements, provided, however, that any such rules and/or regulations shall allow for the use of labels adopted by other states that meet the requirements of subdivision two of this section.

(b) The commissioner shall promulgate rules and/or regulations to authorize alternative labeling, including package labeling, for mercury-added consumer products as defined in this title under the following conditions:

(i) a manufacturer must submit a written request for alternative labeling documenting that a product or class of products cannot reasonably be labeled to comply with specific requirements of this title; and

(ii) all authorizations for alternative labeling granted under this subdivision shall be valid for four years and may be renewed.

§ 27-2105. Disposal.

1. No person shall knowingly or intentionally dispose of a mercury-added consumer product in solid waste or otherwise dispose of

such a product except by separated delivery thereof to a solid waste management facility or hazardous waste management facility permitted or authorized pursuant to title seven or nine of this article.

2. No person or collector shall knowingly or intentionally dispose of any mercury-added consumer product by delivery to a resource recovery facility as permitted pursuant to title seven of this article where waste or hazardous waste is burned as fuel for the purpose of recovering usable energy.

3. No collector, solid waste management facility, or hazardous waste management facility shall knowingly or intentionally store, recycle or dispose of any mercury-added consumer product except in accordance with regulations promulgated pursuant to this article.

4. The department, in consultation with the department of health, shall develop and disseminate informational materials on the dangers of mercury-added consumer products, and the requirements of this section relating to the separation and disposal of mercury-added consumer products.

§ 27-2107. Prohibitions.

1. On and after January first, two thousand five, no person shall sell, offer for sale or distribute free of charge in the state any mercury-added novelty consumer product. A manufacturer that produces or sells mercury-added novelty consumer products shall notify retailers that sell mercury-added novelty consumer products about such product ban and inform such retailers of how to properly dispose of the remaining inventory.

2. On and after January first, two thousand five, no person shall sell, offer for sale or distribute free of charge mercury fever thermometers or mercury body thermometers except by prescription written by a physician. A manufacturer of such thermometers shall provide the buyer or the recipient with notice of mercury content, instructions on

proper disposal and instructions that clearly describe how to carefully handle the thermometer to avoid breakage and on proper cleanup should a breakage occur.

3. On or after January first, two thousand five, no person shall sell, offer for sale or distribute free of charge in the state elemental mercury, other than within a mercury-added consumer product, without requiring the final purchaser or recipient to sign a statement that the purchaser will use the mercury only for medical, pre-encapsulated dental amalgam, research, or manufacturing purposes.

4. On or after September fourth, two thousand four, no primary or secondary school in New York state may use or purchase elemental mercury. Mercury-added consumer products which are not otherwise prohibited by this title that are used by schools are not subject to this prohibition.

5. On or after January first, two thousand six, no person shall sell, offer for sale or distribute the following mercury-added consumer products:

- (a) mercury barometers;
- (b) mercury esophageal dilators, mercury bougie tubes or mercury gastrointestinal tubes;
- (c) mercury flow meters;
- (d) mercury hygrometers or mercury psychrometers; and
- (e) mercury pyrometers;

The provisions of this subdivision shall not apply to the sale or distribution of any mercury-added consumer product delineated in this subdivision if such product is used to replace a product that is a component in a larger product in use prior to January first, two thousand six, or the resale of any mercury-added consumer product delineated in this subdivision manufactured before December thirty-first, two thousand five.

6. On or after January first, two thousand seven, no person shall sell, offer for sale or distribute any mercury hydrometer or mercury

manometer. The provisions of this subdivision shall not apply to the sale or distribution of any mercury-added consumer product delineated in this subdivision if such product is used to replace a product that is a component in a larger product in use prior to January first, two thousand seven, or the resale of any mercury-added consumer product delineated in this subdivision manufactured before December thirty-first, two thousand six.

7. On or after January first, two thousand eight, no person shall sell, offer for sale or distribute any mercury switch or mercury relay individually or as a product component. The provisions of this subdivision shall not apply to the sale or distribution of any mercury-added consumer product delineated in this subdivision if such product is used to replace a product that is a component in a larger product in use prior to January first, two thousand eight, or the resale of any mercury-added consumer product delineated in this subdivision manufactured before December thirty-first, two thousand seven.

8. On or after January first, two thousand twelve, no person shall sell, offer for sale or distribute any mercury sphygmomanometer, mercury wetted reed relay, mercury flame sensor, mercury thermometer, or mercury thermostat, except for mercury thermostats used by a blind or visually impaired person. The provisions of this subdivision shall not apply to the sale or distribution of any mercury-added consumer product delineated in this subdivision if such product is used to replace a product that is a component in a larger product in use prior to January first, two thousand twelve or the resale of any mercury-added consumer product delineated in this subdivision manufactured prior to January first, two thousand twelve.

9. The provisions of subdivisions five, six, seven and eight of this section shall not apply to the sale or distribution of any mercury-added consumer product delineated in those subdivisions if the use of such product is a federal requirement. The department shall develop informational materials on the dangers of mercury-added consumer products, specifically thermometers and barometers, and disseminate such materials to antique dealers and resale establishments.

10. The department may grant a waiver from the provisions of subdivision eight of this section upon request by the manufacturer of a mercury-added consumer product.

(a) An application for a waiver shall be in the form prescribed by the department and document the basis for the requested waiver or renewal of a waiver and describe how the manufacturer will ensure that a system exists for the proper collection, transportation and processing of the mercury-added consumer products at the end of their useful life.

(b) The application must include at a minimum, information that demonstrates:

(i) there are no non-mercury alternatives that are comparable in price to, are as effective in performance as, or are as accurate and precise as the identified mercury-added consumer product;

(ii) the use of the mercury-added consumer product provides a net benefit to the environment, public health, or public safety when compared to a non-mercury alternative; or

(iii) there are other factors affecting the use of non-mercury alternatives.

(c) The manufacturer must notify the regional multi-state clearinghouse, as identified in section 27-2115 of this title, of its request for a waiver pursuant to this subdivision and provide the clearinghouse with the information required in its waiver application.

(d) The department may grant or deny, in whole or in part, a request for a waiver. In determining whether to grant or deny a waiver or waiver renewal, the department may consult with the clearinghouse, other states, or regional governmental organizations to promote consistency in the implementation of this subdivision.

(e) Waivers shall be granted for a period not to exceed two years. Upon a request by the manufacturer, the department may renew a waiver for a period not to exceed two years if the department finds that the manufacturer continues to meet the requirements for a waiver, that the manufacturer has complied with all conditions of the original waiver, and the manufacturer demonstrates that reasonable efforts have been made to remove mercury from the product subject to the waiver.

11. On and after January first, two thousand twenty-one, no producer

of mercury-added lamps shall sell, offer for sale, or distribute such lamps that fail to meet mercury content standards adopted by the department pursuant to rules and regulations. Such standards shall include what, if any, allowance should be granted for slight variations in the amount of mercury resulting from production variances. For the following general purpose lights, mercury content shall be no higher than:

(a) 2.5 milligrams for screw-based compact fluorescent lamps less than thirty watts;

(b) 3.5 milligrams for straight fluorescent T8 lamps with a normal lifetime (excluding 8-foot models) and 3.0 milligrams for straight fluorescent T5 lamps with a normal lifetime;

(c) 5.0 milligrams for straight fluorescent T8 and T5 lamps with a long lifetime;

(d) 15.0 milligrams for non-linear fluorescent T8, T5, and T12 lamps and 8-foot linear fluorescent lamps (excluding very high output models);

12. On or before December thirty-first, two thousand twenty-six, mercury content standards established in accordance with this section shall not apply to special purpose lights.

§ 27-2109. Advisory committee on mercury pollution.

1. There shall be established, within the department, an advisory committee on mercury pollution to examine, evaluate and make recommendations concerning the prevention and cleanup of mercury pollution, and the latest technology for the remediation of mercury pollution.

2. The advisory committee on mercury pollution shall consist of seven members, each appointed member to serve a term of two years, to be appointed as follows:

- (a) one member appointed by the temporary president of the senate;
- (b) one member appointed by the speaker of the assembly;
- (c) the commissioner, or his or her designee; and
- (d) four members appointed by the governor as follows:

(i) one shall be a representative of an industry that manufactures mercury-added consumer products,
(ii) one shall be a public health specialist,
(iii) one shall be a toxicologist, and
(iv) one shall be a scientist who is knowledgeable on matters relating to mercury contamination.

3. The members of such committee shall be broadly representative of the geographic areas of the state. The commissioner, or his or her designee, shall serve as the chair of the committee. Vacancies in the membership of the committee shall be filled in the manner provided for original appointments.

4. The members of the advisory committee on mercury pollution shall receive no compensation for their services, but shall be allowed their actual and necessary expenses incurred in the performance of their duties pursuant to this section.

5. To the maximum extent feasible, the advisory committee on mercury pollution shall be entitled to request and receive data from any department, division, board, bureau, commission or agency of the state or any political subdivision thereof as it may reasonably request to carry out properly its powers and duties pursuant to this section.

6. On or before February first, two thousand six, the advisory committee on mercury pollution shall submit a report to the governor and the legislature relating to:

(a) the extent of mercury contamination in the soil, waters and air of the state;

(b) the extent of any health risk from mercury contamination in the state, especially to pregnant women, children and people that use fish as a major source of food;

(c) the methods available to minimize the risk of further contamination or increased health risks to the public;

(d) the potential costs of minimizing further risk and recommendations on how to acquire the funds necessary to reduce contamination and minimize the risk of mercury-related health problems;

(e) the effectiveness of the provisions of this title in reducing mercury contamination and mercury-related health problems; and

(f) any necessary coordination with other states to effectively address mercury issues.

§ 27-2111. Regulations.

The department shall promulgate and enforce any regulations necessary to implement the provisions of this title.

Such regulations shall provide for the proper storage, recycling and disposal of mercury-added consumer products at facilities regulated pursuant to titles seven and nine of this article.

§ 27-2113. Exemptions.

1. The provisions of this title shall not apply to photographic film and paper, pharmaceutical products, biological products or any substance that may be lawfully sold over the counter without a prescription under the federal Food, Drug and Cosmetic Act, 21 USC 301 et seq. For the purposes of this subdivision, "biological product" means a virus, therapeutic serum, toxin, antitoxin, vaccine, blood, blood component or derivative, allergenic product or an analogous product, or arsphenamine, or any other trivalent organic arsenic compound used for the prevention, treatment or cure of a disease or condition of human beings.

2. The provisions of subdivision one of section 27-2105 of this title shall not apply to mercury-containing lamps discarded by households.

3. The provisions of subdivision one of section 27-2105 of this title shall not apply to mercury-containing lamps discarded by a small business if such small business discards no more than fifteen mercury-containing lamps per month. For the purposes of this subdivision "small business" means any business which is resident in this state, independently owned and operated, not dominant in its field, and

employing not more than one hundred individuals.

§ 27-2115. Interstate clearinghouse.

1. (a) The department is authorized to participate in the regional, multi-state clearinghouse to assist in carrying out the requirements of this title. The department is authorized to collect the following information from product manufacturers or trade associations representing manufacturers of a product or component to which mercury is intentionally added during formulation or manufacture, or a product containing one or more components to which mercury is intentionally added during formulation or manufacture:

- (i) a brief description of the product or product component;
- (ii) the purpose for which mercury is used in the product or product component;
- (iii) the amount of mercury in each unit of the product or component;
- (iv) the total amount of mercury contained in all units of the product or product components; and
- (v) the name and address of the manufacturer, and the name, address and phone number of a contact person for the manufacturer.

(b) Every mercury-added consumer product or product component for which federal law governs notice in a manner that preempts state authority shall be exempt from the requirements of this subdivision.

(c) With the approval of the department, a manufacturer may supply the information required by paragraph (a) of this subdivision for a product category rather than an individual product. The manufacturer shall update and revise the information in the notification whenever there is a significant change in the information or when requested by the department.

(d) A product or product component shall not be offered for final sale, use or distributed for promotional purposes unless the manufacturer of the product or product component or a trade association representing manufacturers of the product or component has provided the information required in paragraph (a) of this subdivision.

2. The clearinghouse is authorized to maintain information on behalf

of New York state, including, but not limited to: (a) a list of all products containing mercury, including mercury-added consumer products; and (b) a file on all exemptions granted by the states.

§ 27-2117. Phase-out of mercury-added components in motor vehicles.

1. Commencing with the motor vehicle model year for the fourth year after the calendar year in which this subdivision takes effect, no manufacturer shall equip any motor vehicle sold in this state with any mercury-added component.

2. Notwithstanding the provisions of subdivision one of this section, a motor vehicle may be equipped with a mercury-added component which is necessary to comply with federal or state safety or health requirements, or for the purposes of national security, provided that the manufacturer applies for and receives an exemption from the commissioner.

3. If granted an exemption, every motor vehicle that is equipped with a mercury-added component shall be labeled by the manufacturer as required in subdivision 3 of section 27-2103 of this title.

§ 27-2119. Phase-out of mercury-containing flooring.

1. Commencing a year after the calendar year in which this section takes effect, no public or nonpublic elementary or secondary school shall install a mercury-containing floor nor shall any school install a floor over a mercury-containing floor prior to removal of the mercury-containing floor.

2. The time weighted average mercury vapor exposure for an employee or student of a public or nonpublic elementary or secondary school shall not exceed 750 ng/m (3).

3. For purposes of this section:

(a) "mercury-containing floor" shall mean a floor containing

phenyl-mercuric-acetate catalyst.

(b) "time weighted average" shall mean an employee's average airborne exposure in an eight-hour work shift of a forty-hour work week or for a person under the age of eighteen shall mean sixteen hours or less per week averaged over the school year.

TITLE 22

FOOD DONATION AND FOOD SCRAPS RECYCLING

Section 27-2201. Definitions.

27-2203. Designated food scraps generator responsibilities.

27-2205. Waste transporter responsibilities.

27-2207. Transfer facility.

27-2209. Food scraps disposal prohibition.

27-2211. Department responsibilities.

27-2213. Regulations.

27-2215. Exclusions.

27-2217. Annual Report.

27-2218. Supermarket excess edible food.

27-2219. Severability.

§ 27-2201. Definitions.

1. "Designated food scraps generator" means a person who generates at a single location an annual average of two tons per week or more of food scraps between January first, two thousand twenty-three and December thirty-first, two thousand twenty-six, an annual average of one ton per week or more of food scraps between January first, two thousand twenty-seven and December thirty-first, two thousand twenty-eight, and an annual average of one-half ton per week or more of food scraps beginning January first, two thousand twenty-nine and thereafter based on a methodology established by the department pursuant to regulations, including, supermarkets, large food service businesses, higher educational institutions, hotels, food processors, correctional facilities, and sports or entertainment venues. For a location with multiple independent food service businesses, such as a mall or college

campus, the entity responsible for contracting for solid waste hauling services is responsible for managing food scraps from the independent businesses.

2. "Food scraps" means inedible food, trimmings from the preparation of food, food-soiled paper, and edible food that is not donated. Food scraps shall not include used cooking oil, yellow grease or food from residential sources, or any food identified in regulations promulgated by the department in consultation with the department of agriculture and markets or any food which is subject to a recall or seizure due to the presence of pathogens, including but not limited to: *Listeria Monocytogenes*, confirmed *Clostridium Botulinum*, *E. coli* 0157:H7 and all salmonella in ready-to-eat foods.

3. "Organics recycler" means a facility, permitted by the department, that recycles food scraps through use as animal feed or a feed ingredient, rendering, land application, composting, aerobic digestion, anaerobic digestion, fermentation, or ethanol production. Animal scraps, food soiled paper, and post-consumer food scraps are prohibited for use as animal feed or as a feed ingredient. The proportion of the product created from food scraps by a composting or digestion facility, including a wastewater treatment plant that operates a digestion facility, or other treatment system, must be used in a beneficial manner as a soil amendment and shall not be disposed of or incinerated.

4. "Person" means any business entity, partnership, company, corporation, not-for-profit corporation, association, governmental entity, public benefit corporation, public authority, firm, or organization.

5. "Single location" means contiguous property under common ownership, which may include one or more buildings.

6. "Incinerator" shall have the same meaning as provided in section 72-0401 of this chapter.

7. "Landfill" shall have the same meaning as provided in section

72-0401 of this chapter.

8. "Transfer facility" means a solid waste management facility, whether owned or operated by a private or public entity, other than a recyclables handling and recovery facility, used oil facility, or a construction and demolition debris processing facility, where solid waste is received for the purpose of subsequent transfer to another solid waste management facility for processing, treating, disposal, recovery, or further transfer.

9. "Excess edible food" means edible food that is not sold or used by a designated food scrap generator and is still safe to be consumed but is being disposed of by the generator, but shall not include unpackaged fresh meat, fish or poultry, food damaged by pests, mold, bacteria or other contamination, food subject to governmental or producer recall due to food safety and food returned to a supplier.

10. "Food relief organization" means a religious organization or other not-for-profit that provides food for free to needy individuals, including, but not limited to, a food pantry, food bank, or soup kitchen or community-based organization that provides food for free to needy individuals.

§ 27-2203. Designated food scraps generator responsibilities.

1. Effective January first, two thousand twenty-two:

(a) all designated food scraps generators shall separate their excess edible food for donation for human consumption to the maximum extent practicable, and in accordance with applicable laws, rules and regulations related to food donation; and

(b) * except as provided in paragraph (c) of this subdivision, each designated food scraps generator that is within twenty-five miles of an organics recycler, to the extent that the recycler has capacity to accept all of such generator's food scraps based on the department's yearly estimate of an organic recyclers' capacity pursuant to section 27-2211 of this title, shall:

* NB Effective until January 1, 2027

* except as provided in paragraph (c) of this subdivision, each designated food scraps generator that is within fifty miles of an organics recycler, to the extent that the recycler has capacity to accept all of such generator's food scraps based on the department's yearly estimate of an organic recyclers' capacity pursuant to section 27-2211 of this title, shall:

* NB Effective January 1, 2027

(i) separate its remaining food scraps from other solid waste;

(ii) ensure proper storage for food scraps on site which shall preclude such materials from becoming odorous or attracting vectors, such as a container that has a lid and a latch that keeps the lid closed and is resistant to tampering by rodents or other wildlife and has sufficient capacity;

(iii) have information available and provide training for employees concerning the proper methods to separate and store food scraps; and

(iv) obtain a transporter that will deliver food scraps to an organics recycler, self-haul its food scraps to an organics recycler, or provide for organics recycling on-site via in vessel composting, aerobic or anaerobic digestion or any other method of processing organic waste that the department approves by regulation, for some or all of the food waste it generates on its premises, provided that the remainder is delivered to an organics recycler.

(c) The provisions of paragraph (b) of this subdivision shall not apply to any designated food scraps generator that has all of its food scraps processed in a mixed solid waste composting or mixed solid waste anaerobic digestion facility.

2. All designated food scraps generators shall submit an annual report to the department on or before March first, two thousand twenty-three, and annually thereafter, in an electronic format. The annual report must summarize the amount of edible food donated, the amount of food scraps recycled, the organics recycler or recyclers and associated transporters used, and any other information as required by the department.

3. A designated food scraps generator may petition the department for a temporary waiver from some or all of the requirements of this title.

The petition must include evidence of undue hardship based on:

- * (a) the designated food scraps generator does not meet the two tons per week threshold;

- * NB Effective until January 1, 2027

- * (a) the designated food scraps generator does not meet the tonnage per week threshold pursuant to subdivision one of section 27-2201 of this title;

- * NB Effective January 1, 2027

- (b) the cost of processing organic waste is not reasonably competitive with the cost of disposing of waste by landfill;

- (c) the organics recycler does not have sufficient capacity, despite the department's calculation; or

- (d) the unique circumstances of the generator.

A waiver shall be no longer than one year in duration provided, however, the department may renew such waiver.

§ 27-2205. Waste transporter responsibilities.

1. Any waste transporter that collects food scraps for recycling from a designated food scraps generator shall:

- (a) deliver food scraps to a transfer facility that will deliver such food scraps to an organics recycler unless such generator has received a temporary waiver under subdivision three of section 27-2203 of this title; or

- (b) deliver such food scraps directly to an organics recycler.

2. Any waste transporter that collects food scraps from a designated food scraps generator shall take all reasonable precautions to not deliver those food scraps to an incinerator or a landfill nor commingle the material with any other solid waste unless such commingled waste can be processed by an organics recycler or unless such generator has received a temporary waiver under subdivision three of section 27-2203 of this title.

§ 27-2207. Transfer facility.

Any transfer facility that receives food scraps from a designated food scraps generator must ensure that the food scraps are taken to an organics recycler unless such generator has received a temporary waiver under subdivision three of section 27-2203 of this title. A transfer facility shall take all reasonable precautions to not commingle the material with any other solid waste unless such commingled waste can be processed by an organics recycler.

§ 27-2209. Food scraps disposal prohibition.

Incinerators and landfills shall take all reasonable precautions to not accept food scraps from designated food scraps generators required to send their food scraps to an organics recycler as outlined under section 27-2203 of this title, after January first, two thousand twenty-two, unless the designated food scraps generator has received a temporary waiver under subdivision three of section 27-2203 of this title.

§ 27-2211. Department responsibilities.

1. The department shall publish on its website: (a) the methodology the department will use to determine who is a designated food scrap generator; (b) the waiver process; (c) procedures to minimize odors and vectors; and (d) a list of all designated food scraps generators, organics recyclers, and all waste transporters that manage source-separated organics.

2. No later than June first, two thousand twenty-one and annually thereafter, the department shall assess the capacity of each organic recycler and notify designated food scraps generators if they are required to comply with the provisions of paragraph (b) of subdivision one of section 27-2203 of this title.

3. The department shall develop and make available educational materials to assist designated food scraps generators with compliance with this title. The department shall also develop education materials on food waste minimization and encourage municipalities to disseminate these materials both on their municipal websites and in any such future mailings to their residents as they may distribute.

4. The department shall regulate organics recyclers to ensure that their activities do not impair water quality or otherwise harm human health and the environment.

§ 27-2213. Regulations.

The department shall, after one or more public hearings, promulgate rules and regulations necessary to implement the provisions of this title including: (a) the methodology the department will use to determine who is a designated food scraps generator; (b) the waiver process; (c) procedures to minimize odors and vectors; (d) a list of all designated food scraps generators, organics recyclers, and all waste transporters that manage source-separated organics; and (e) how designated food scraps generators shall comply with the provisions of paragraph (a) and subparagraph (i) of paragraph (b) of subdivision one of section 27-2203 of this title.

§ 27-2215. Exclusions.

1. This title shall not apply to any designated food scraps generators located in a city with a population of one million or more which has a local law, ordinance or regulation in place which requires the diversion of edible food and food scraps from disposal.

2. This title does not apply to hospitals, nursing homes, adult care facilities, and elementary and secondary schools.

§ 27-2217. Annual report.

No later than January first, two thousand twenty-three, and on an annual basis thereafter, the department shall submit an annual report to the governor and legislature describing the operation of the food donation and food scraps recycling program including amount of edible food donated, amount of food scraps recycled, sample educational materials, and number of waivers provided.

*** § 27-2218. Supermarket excess edible food.**

1. For the purpose of this section, "supermarket" means a physical retail store which has at the subject location more than ten thousand square feet devoted to offering food for human consumption for sale to the general public and generates an annual average of less than two tons per week of food scraps pursuant to subdivision one of section 27-2201 of this title.

2. Every supermarket shall from time to time make excess edible food available to food relief organizations. No supermarket shall be required to make available a particular quantity or level of excess edible food or to transport or distribute any excess edible food.

3. A supermarket shall be deemed in compliance with this section if it in good faith arranges with a food relief organization that has requested in writing to collect excess edible food from the supermarket for the collection of such excess edible food. The rights, liabilities or immunity of any party under this section shall be governed pursuant to the Bill Emerson Good Samaritan Food Donation Act (42 U.S.C. § 1791 et seq.), as of January seventh, two thousand eleven.

4. A supermarket may impose reasonable restrictions as to the time and manner of collection by a food relief organization so as not to interfere with its business operations.

5. A supermarket may, in accordance with any applicable laws, dispose

of any excess edible food which is not picked up by a food relief organization within a reasonable time.

6. Nothing in this section shall be construed to supersede any state or federal health laws or regulations regarding the handling of excess edible food.

7. A supermarket that does not meet the requirements of this section shall not be subject to the penalties specified in title twenty-seven of article seventy-one of this chapter.

* NB Repealed December 31, 2026

§ 27-2219. Severability.

The provisions of this title shall be severable and if any portion thereof or the applicability thereof to any person or circumstance is held invalid, the remainder of this title and the application thereof shall not be affected thereby.

*** TITLE 23**

VEHICLE DISMANTLING FACILITIES

Section 27-2301. Definitions.

27-2303. Regulation of vehicle dismantling facilities.

* NB There are 2 Title 23's

*** § 27-2301. Definitions.**

As used in this title:

1. "Container" shall mean any portable device in which a material is stored, transported, treated, disposed of or otherwise handled.

2. "Contingency plan" means a document describing organized, planned and technically coordinated and financially feasible courses of action

to be followed in case of emergency or other special conditions.

3. "Discharge" shall mean the accidental or intentional spilling, leaking, pumping, pouring, emitting, emptying or dumping of any solid waste, or solid waste constituent, including leachate, into or on any air, land or water.

4. "End of life vehicle" shall mean any motor vehicle sold, given, or otherwise disposed of as junk or salvage.

5. "Good condition" shall mean no severe rusting, apparent structural defects or deteriorations and not leaking.

6. "Groundwater" shall mean water below the land surface in a saturated zone of soil or rock. This includes perched water separated from the main body of groundwater by an unsaturated zone.

7. "Leak-resistant" or "leak-proof" shall mean designed and maintained to prevent the escape of contained liquids or other materials when appropriately closed regardless of container orientation (i.e., upright, tipped over).

8. "Mercury containing devices" shall mean any device or material into which elemental mercury or mercury compounds are intentionally added during the manufacture of such devices and which the continued presence of mercury is required to provide a specific characteristic, appearance or quality or to perform a specific function. Such items include but are not limited to convenience lighting switches, antilock brake assemblies, and high intensity discharge head lamps.

9. "Surface water" shall mean lakes, bays, sounds, ponds, impounding reservoirs, perennial streams and springs, rivers, creeks, estuaries, marshes, inlets, canals, the Atlantic ocean within the territorial limits of New York state, and all other perennial bodies of surface water, natural or artificial, inland or coastal, fresh or salt, public or private, pursuant to article 15 of this chapter.

10. "Vector" shall mean a carrier that is capable of transmitting a pathogen from one organism to another including, but not limited to, flies and other insects, rodents, birds and vermin.

11. "Vehicle dismantler" shall mean any person or entity engaged in the business of acquiring motor vehicles or trailers for the purpose of dismantling the same for parts or reselling such vehicles as scrap, but shall not include a person that receives no more than twenty-five end of life vehicles per year and stores less than fifty end of life vehicles on site at any one time.

* NB There are 2 § 27-2301's

*** § 27-2303. Regulation of vehicle dismantling facilities.**

All vehicle dismantlers owning or controlling a facility for the dismantling of end of life vehicles on site shall be subject to the requirements of this title.

1. An annual report shall be submitted to the department, to be included on the department's website, including, but not be limited to, the following:

- (a) the number of end of life vehicles received at the facility;
- (b) the number of end of life vehicles crushed and removed from the facility;
- (c) the number of end of life vehicles stored at the facility at the end of the reporting year;
- (d) the approximate area at the facility used for storage of end of life vehicles;
- (e) the quantities of waste vehicle fluids extracted from end of life vehicles received and their disposition, including the quantity sold, used on-site, stored on-site, and disposed; and
- (f) the number and if applicable nature of any violation of all applicable rules and regulations of the state.

2. All fluid draining, removal, and collection activities shall be conducted on asphalt or concrete surface or other surface that allows

equivalent protections to surface and groundwater. Such surfaces shall be cleaned daily, or more frequently when spillage has occurred, using absorbent materials that are collected and properly disposed of.

3. All fluids shall be completely drained, removed, collected, and stored for appropriate use, treatment or disposal.

4. End of life vehicles arriving at the facility shall be inspected upon arrival for leaking fluids and unauthorized waste. Leaks should be remedied or contained to avoid releases of fluids to the environment.

5. Prior to vehicle crushing or shredding, the following potential environmental contaminants shall be drained, removed, deployed, collected and/or stored, as appropriate and in accordance with best management practices:

- (a) fluids including engine oil, transmission fluid, transaxle fluid, front and rear axle fluid, brake fluid, power steering fluid, coolant, and fuel;

- (b) lead acid batteries;

- (c) small PCB capacitors, mercury switches or other mercury containing devices;

- (d) refrigerants used in automobile air conditioning systems; and

- (e) air bags are deployed or removed.

6. Fluids shall be contained in an appropriate container for the specific waste vehicle fluid. Fluids that are stored shall be placed in closed containers. The containers shall be in good condition. The containers shall be clearly and legibly marked as to contents. Containers shall be stored on a bermed asphalt or concrete surface or surface that allows equivalent protection to groundwater.

7. Lead acid batteries shall not be stored on the ground. All lead acid batteries shall be covered by a tarp or other means in a manner that severely restricts water from coming into contact with the lead acid battery. Leaking batteries shall be stored in a leakproof container separately from intact lead acid batteries and provisions shall be in place to absorb any leakage.

8. Small PCB capacitors, mercury switches and other mercury containing devices shall be stored in an appropriate labeled container for recycling or disposal.

9. No more than one thousand waste tires off vehicles shall be stored at the facility at any one time unless a permit is obtained pursuant to this title.

10. Fluids shall not be intentionally released on the ground or to surface water.

11. Ensure the safe storage of automobiles at such facilities, including the regulation of stacking automobiles.

12. Access to and use of facility shall be continuously controlled by fencing, gates, signs, or natural barriers.

13. Vegetation shall be controlled to prevent encroachment into fire access lanes or driveways at the facility and to decrease the potential of fire.

14. Ensure the safe handling, processing and storage of any residues, including, but not limited to, product left over after an automobile is crushed and parts have been extracted, in such a manner as to prevent off-site migration or run-off.

15. Dust shall be effectively controlled so to not constitute a nuisance or hazard to health, safety, or property.

16. The facility shall be maintained so as to prevent or control on-site populations of vectors using techniques appropriate for protection of human health and the environment and prevent the facility from being a vector breeding area.

17. The facility shall have a contingency plan which includes a description of the actions to be taken by facility employees in the

event of a fire, a spill or release of vehicle waste fluids, or unauthorized material is received at the facility.

18. Upon the receipt of an end of life vehicle, the date that it is received shall be recorded and maintained on-site.

* NB There are 2 § 27-2303's

* TITLE 23

WIRELESS TELEPHONE RECYCLING

Section 27-2301. Definitions.

27-2303. Wireless telephone collection.

27-2305. Preemption and severability.

* NB There are 2 Title 23's

*** § 27-2301. Definitions.**

For the purposes of this section:

1. "Wireless telephone service supplier" means a person or entity which provides wireless telephone service, as defined in paragraph (b) of subdivision one of section twelve hundred twenty-five-c of the vehicle and traffic law.

2. "Wireless telephone" shall have the same meaning as "mobile telephone" as defined in paragraph (a) of subdivision one of section twelve hundred twenty-five-c of the vehicle and traffic law.

* NB There are 2 § 27-2301's

*** § 27-2303. Wireless telephone collection.**

1. (a) Every wireless telephone service supplier engaged in the retail sale of wireless telephones shall:

(i) accept, at no charge, up to ten used wireless telephones from any person during the normal business hours of such business; or

(ii) offer to any person at no charge, the shipping of used wireless telephones to a recycling program conducted by such business. Information about such a program shall be readily available at such business locations and on its website.

(b) Every wireless telephone service supplier required to accept used wireless telephones or provide shipping at no charge for used wireless telephones pursuant to paragraph (a) of this subdivision shall conspicuously post a sign open to public view, clearly indicating that used wireless telephones are accepted or shipping is provided at no charge. Such signs may also state that used wireless telephones shall only be accepted during normal business hours, and may state such hours.

2. Every wireless telephone service supplier required to accept or pay for the shipment of used wireless telephones shall take reasonable steps to ensure each used wireless telephone accepted or shipped pursuant to this section shall either be recycled, reused or disposed of in an environmentally sound manner.

* NB There are 2 § 27-2303's

§ 27-2305. Preemption and severability.

1. Any provision of any local law or ordinance, or any rule or regulation promulgated thereto, governing the collection, return or recycling of wireless telephones shall upon the effective date of this title be preempted.

2. The provisions of this title shall be severable and if any portion thereof or the applicability thereof to any person or circumstances shall be held invalid, the remainder of this title and the application thereof shall not be affected thereby.

TITLE 24

ENVIRONMENTAL TESTS REPORTING REQUIREMENTS

Section 27-2401. Definitions.

27-2403. Notification requirements.

27-2405. Tenant notification of indoor air contamination.

§ 27-2401. Definitions.

As used in this title:

1. "Owner" shall mean any person or persons who owns a dwelling unit or commercial space located on real property.

2. "Real property" shall mean lands, tenements and hereditaments.

§ 27-2403. Notification requirements.

1. A person identified as a responsible party pursuant to title thirteen of this article or a participant as defined in paragraph (a) of subdivision one of section 27-1405 of this article shall provide within thirty days of validation of any test undertaken pursuant to this article or article twelve of the navigation law the results of any such test to any identifiable owner of real property that has been tested. In the event that such a test is undertaken by the department, the department shall provide, within thirty days of validation of such test, the results of such test to any identifiable owner of real property that has been tested.

2. Such person identified as a responsible party pursuant to title thirteen of this article or a participant as defined in paragraph (a) of subdivision one of section 27-1405 of this article knowingly failing to provide test results as required in subdivision one of this section shall be considered a violation of any order on consent or a breach of any agreement entered into with the department.

§ 27-2405. Tenant notification of indoor air contamination.

1. For purposes of this section:

a. "test results" shall include the results of any tests conducted on indoor air, subslab air, ambient air, subslab groundwater samples, and subslab soil samples; and

b. "issuer" means:

(i) a person subject to an order issued pursuant to title thirteen of this article, article twelve of the navigation law, or title twelve-A of article thirteen of the public health law,

(ii) a participant as defined in subdivision 1 of section 27-1405 of this article subject to an agreement entered into pursuant to title fourteen of this article, or

(iii) by a municipality subject to a contract entered into pursuant to title five of article fifty-six of this chapter; or

(iv) by the department.

2. Any owner of real property or any owner's agent to whom indoor air contamination test results have been provided by an issuer shall, in cases where test results exceed department of health indoor air guidelines or the occupational safety and health administration guidelines for indoor air quality, provide a fact sheet and timely notice of any public meetings required to be held to discuss such results to all tenants and occupants and upon request such test results and any closure letter, within fifteen days of receipt of such results. Generic fact sheets shall be prepared by the department of health and shall identify at a minimum the compound or contaminant of concern, reportable detection levels established by the department of health indoor air guidelines or the occupational safety and health administration guidelines for indoor air quality and health risks associated with exposure to such compound or contaminant and a means to obtain more information on the compound or contaminant.

3. For real property for which an engineering control is in place to mitigate indoor air contamination, or if the real property is subject to ongoing monitoring pursuant to an ongoing remedial program, the owner or owner's agent of real property to whom indoor air contamination test results have been provided by an issuer shall provide, or cause to be

provided, fact sheets, and upon request any test results, or closure letter received by such owner or owner's agent to any prospective tenant prior to the signing of a binding lease or rental agreement. Generic fact sheets shall be prepared by the department of health and shall identify at a minimum the compound or contaminant of concern, reportable detection levels established by the department of health indoor air guidelines or the occupational safety and health administration guidelines for indoor air quality and health risks associated with exposure to such compound or contaminant and a means to obtain more information on the compound or contaminant. Such notice shall be included in the rental or lease agreement and shall contain the following in at least twelve point type in bold face on the first page: "NOTIFICATION OF TEST RESULTS The property has been tested for contamination of indoor air: test results and additional information are available upon request."

TITLE 25

PHASE-OUT OF CREOSOTE

Section 27-2501. Definitions.

27-2503. Prohibition of manufacture, sale, and use of creosote.

27-2505. Disposal of creosote prohibited.

27-2507. Combustion of creosote.

27-2509. Powers and duties of the commissioner.

27-2511. Powers and duties of the department.

27-2513. Exemptions.

§ 27-2501. Definitions.

1. As used in this title, the term "creosote" means a substance obtained from the high temperature treatment of coal and coal tar and that is used primarily as a wood preservative.

2. As used in this title, the term "marina" shall have the same meaning as defined in section thirty-three-c of the navigation law.

§ 27-2503. Prohibition of manufacture, sale, and use of creosote.

1. Except as set forth in subdivision two of this section and section 27-2513 of this title, on and after January first, two thousand eight, creosote or products containing creosote shall not be manufactured, sold, or used in this state.

2. Wood treated with creosote that is in use in this state as of such date may continue to be used in such use.

§ 27-2505. Disposal of creosote prohibited.

On and after January first, two thousand eight, neither creosote nor any wood or other product treated with or containing creosote shall be disposed of in this state, except in a permitted facility pursuant to this section, in a landfill permitted by the department and approved by the department to accept this material and properly lined to prevent groundwater contamination, or by any method approved by the department.

§ 27-2507. Combustion of creosote.

On and after January first, two thousand eight, neither creosote or any wood or other product treated with or containing creosote shall be burned in any manner in this state, including in fireplaces and stoves, except in a facility permitted pursuant to this article and article nineteen of this chapter to burn the specific type of creosote waste.

§ 27-2509. Powers and duties of the commissioner.

1. The commissioner shall have the power and the duty to adopt such rules and regulations as he or she deems necessary for the implementation of this title.

2. The commissioner may, at his or her discretion, grant an emergency waiver to the provisions of section 27-2503 of this title on a case by case basis to persons or entities involving acts of God, war, strike, riot or other catastrophe as to which the negligence or willful misconduct on the part of such person or entity was not the proximate cause. The commissioner may adopt guidelines for applying for and granting such waivers but in no case shall a waiver be deemed in effect for any person or entity for more than one year without proper renewal.

3. The commissioner shall also have the authority to temporarily waive the provisions of section 27-2503 of this title if he or she determines such waiver to be necessary to meet the construction or reconstruction needs as a result of a declared state of emergency.

§ 27-2511. Powers and duties of the department.

The department or the commissioner, as appropriate, shall have the authority to:

1. Administer and enforce this title and any rules and regulations adopted pursuant to this title.

2. Issue such orders and initiate such proceedings as may be necessary for the enforcement of this title and any rules and regulations adopted pursuant to this title.

3. Assist affected industries in identifying reliable supplies of alternative construction materials that are both economical and effective.

§ 27-2513. Exemptions.

Notwithstanding any inconsistent provision of law, this title shall not apply to:

1. railroads, as defined in subdivisions twenty-four and twenty-nine of section two of the transportation law or within the scope of titles nine and eleven of article five of the public authorities law;

2. the operation and/or maintenance of railroad and railroad shipping facilities, including but not limited to the right of way, tracks, track sidings, team tracks and bridges;

3. any electric corporation, as defined by subdivision thirteen of section two of the public service law, nor shall it apply to the operation, use, or maintenance of any new or existing utility pole or facilities owned or used, in whole or in part, by a telephone corporation, utility company, or cable television company, as defined by subdivisions seventeen and twenty-three of section two and subdivision one of section two hundred twelve of the public service law, respectively;

4. the use of one or more utility poles by any person in connection with the suspension or support of power, communications, utility wires, lines or cables and related equipment, antennae, lighting, signals, electric or electronic devices or similar equipment or apparatus;

5. any public authority that owns and operates electric transmission or distribution lines, a municipally owned electric utility or a rural electric cooperative, nor shall it apply to the operation, use, or maintenance of any new or existing utility pole or facilities owned or used, in whole or in part, by any such public authority, municipally owned electric utility, or rural electric cooperative; and

6. until January first, two thousand ten, any existing marina or other facility for berthing and mooring of pleasure vessels, including rowboats and canoes, and the storage thereof, and any existing facility that services pleasure vessels other than an existing marina or other facility for berthing and mooring of pleasure vessels, or facility that services pleasure vessels owned and/or operated by a municipal entity. For the purpose of this section, pleasure vessel shall have the same meaning as in paragraph (c) of subdivision six of section two of the

navigation law.

TITLE 26

ELECTRONIC EQUIPMENT RECYCLING AND REUSE

Section 27-2601. Definitions.

27-2603. Manufacturer collection; recycling surcharge.

27-2605. Manufacturer electronic waste registration and responsibilities.

27-2607. Retailer requirements.

27-2609. Labeling.

27-2611. Disposal ban.

27-2613. Electronic waste collection, consolidation and recycling.

27-2615. Department responsibilities.

27-2617. Reporting requirements.

27-2619. Preemption.

27-2621. Disposition of fees.

§ 27-2601. Definitions.

As used in this title:

1. "Cathode ray tube" means a vacuum tube or picture tube used to convert an electronic signal into a visual image.

2. "Computer" means an electronic, magnetic, optical, electrochemical or other high-speed data processing device performing a logical, arithmetic or storage function, including a laptop computer and desktop computer, and includes any cable, cord, or wiring permanently affixed to or incorporated into such product, and may include both a computer central processing unit and a monitor; but such term shall not include an automated typewriter or typesetter, a portable hand-held calculator, a portable digital assistant, server, or other similar device.

3. "Computer peripheral" means a monitor; electronic keyboard;

electronic mouse or similar pointing device; facsimile machine, document scanner, or printer intended for use with a computer; and includes any cable, cord, or wiring permanently affixed to or incorporated into any such product. Computer peripheral shall not include any document scanner or printer which weighs one hundred pounds or more.

4. "Consumer" means a person located in the state who owns or uses covered electronic equipment, including but not limited to an individual, a business, corporation, limited partnership, not-for-profit corporation, the state, a public corporation, public school, school district, private or parochial school or board of cooperative educational services or governmental entity, but does not include an entity involved in a wholesale transaction between a distributor and retailer.

5. "Covered electronic equipment" means: a computer; computer peripheral; small electronic equipment; small-scale server; cathode ray tube; or television, as defined in this section. "Covered electronic equipment" does not include any motor vehicle or any part thereof; camera or video camera; portable or stationary radio; household appliances such as clothes washers, clothes dryers, refrigerators, freezers, microwave ovens, ovens, ranges or dishwashers; equipment that is functionally or physically part of a larger piece of equipment intended for use in an industrial, research and development or commercial setting; security or anti-terrorism equipment; monitoring and control instrument or system; thermostat; hand-held transceiver; telephone of any type; portable digital assistant or similar device; calculator; global positioning system (GPS) receiver or similar navigation device; a server other than a small-scale server; a cash register or retail self checkout system; a stand-alone storage product intended for use in industrial, research and development or commercial settings; commercial medical equipment that contains within it a cathode ray tube, a flat panel display or similar video display device, and is not separate from the larger piece of equipment; or other medical devices as that term is defined under the Federal Food, Drug and Cosmetic Act.

6. "Electronic waste" means covered electronic equipment that has been discarded or is no longer wanted by its owner, or for any other reason enters the waste collection, recovery, treatment, processing, or recycling system. For purposes of section 27-2611 of this title, "electronic waste" does not include the case, shell, or other enclosure of covered electronic equipment from which incorporated assemblies, sub-assemblies, components, materials, wiring, circuitry and commodities have been removed.

7. "Electronic waste collection site" means a facility at a fixed or temporary site at which electronic waste is accepted from consumers and temporarily stored for more than five days in a calendar year before such waste is transported to an electronic waste consolidation facility or electronic waste recycling facility. Electronic waste collection sites include, but are not limited to, dedicated sites and facilities for the acceptance of electronic waste, and retail stores and outlets, municipal or private electronic waste collection sites and not-for-profit donation sites that have agreed to accept electronic waste.

8. "Electronic waste consolidation facility" means a facility that receives and stores electronic waste for the purpose of organizing, categorizing or consolidating items of electronic waste before such waste is transported to an electronic waste recycling facility. Electronic waste consolidation facilities include, but are not limited to, facilities of brokers acting as intermediaries between electronic waste buyers and sellers, and regional centers at which electronic waste is organized, categorized or consolidated after being transported to such centers from electronic waste collection sites or other electronic waste consolidation facilities.

9. "Electronic waste recycling facility" means a facility at which electronic waste is recycled.

10. "Label" means a marker on the surface of covered electronic equipment conveying information; for the purposes of this title, labels must be permanent and can be attached, printed, engraved or incorporated

in any other permanent way that is obvious and visible to users of the product.

11. "Manufacturer" means a person who: (a) assembles or substantially assembles covered electronic equipment for sale in the state; (b) manufactures covered electronic equipment under its own brand name or under any other brand name for sale in the state; (c) sells, under its own brand name, covered electronic equipment sold in the state; (d) owns a brand name that it licenses to another person for use on covered electronic equipment sold in the state; (e) imports covered electronic equipment for sale in the state; or (f) manufactures covered electronic equipment for sale in the state without affixing a brand name.

"Manufacturer" does not mean a person who assembles or substantially assembles, and sells less than one thousand units of covered electronic equipment annually in this state, or whose primary business is the sale of covered electronic equipment which is comprised primarily of rebuilt, refurbished or used components. If more than one person is a manufacturer of a brand of covered electronic equipment, any such person may assume responsibility for obligations of a manufacturer of that brand under this title. If none of those persons assumes responsibility for the obligations of a manufacturer under this title, any and all such persons jointly and severally may be considered to be the responsible manufacturer of that brand for purposes of this title.

12. "Manufacturer's brands" means a manufacturer's name, brand name or brand label, and all manufacturer's names, brand names and brand labels for which the manufacturer has a legal right or interest, including those names, brand names, and brand labels of companies that have been acquired by the manufacturer or in which the manufacturer asserts a legal interest such as trademark, license, service mark, or patent.

13. "Monitor" means a separate visual display component of a computer, whether sold separately or together with a computer central processing unit, and includes a cathode ray tube, liquid crystal display, gas plasma, digital light processing or other image projection technology, greater than four inches when measured diagonally, and its case, interior wires and circuitry, and any cable cord or wiring permanently

affixed thereto or incorporated into such product.

14. "Person" means any individual, business entity, partnership, company, corporation, not-for-profit corporation, association, governmental entity, public benefit corporation, public authority, firm, organization, or any other group of individuals, or any officer or employee or agent thereof.

15. "Recycle" means to separate, dismantle or process the materials, components or commodities contained in electronic waste for the purpose of preparing the materials, components or commodities for use or reuse in new products or components thereof, but not for energy recovery or energy generation by means of combustion, gasification, pyrolysis or other means. Recycling includes the manual and mechanical separation of electronic waste to recover materials, components or commodities contained therein for the purpose of reuse or recycling, and changing the physical or chemical composition of electronic waste to segregate components for purposes of recycling those components.

16. "Retailer" means a person who sells covered electronic equipment to a person in the state through any means, including, but not limited to, transactions conducted through retail sales outlets, mail, catalogs, the telephone or the internet, or any electronic means. "Retailer" does not include a person who sells or offers for sale fewer than ten items of covered electronic equipment during a calendar year.

17. "Reuse" means the use of electronic waste that is tested and certified to be in good working order and which was removed from the waste stream for use for the same purpose for which it was manufactured, including the continued use of whole systems or components.

18. "Sell" or "sale" means any transfer for consideration of title or the right to use, from a manufacturer or retailer to a person, including, but not limited to, transactions conducted through retail sales outlets, catalogs, mail, the telephone, the internet, or any electronic means; this includes transfer of new products or used products that may have been refurbished by their manufacturer or

manufacturer-approved party and that are offered for sale by a manufacturer or retailer, but does not include consumer-to-consumer second-hand transfer. "Sell or sale" does not include: (a) the transfer of used covered electronic equipment or a lease of covered electronic equipment; or (b) wholesale transactions among a manufacturer, wholesaler and retailer.

19. "Small electronic equipment" means any portable digital music player that has memory capability and is battery-powered, video cassette recorder, a digital video disc player, digital video recorder, digital converter box, cable or satellite receiver, or electronic or video game console, and includes any cable, cord, or wiring permanently affixed to or incorporated into any such product.

20. "Small-scale server" means a computer that typically uses desktop components in a desktop form factor, but is designed primarily to be a storage host for other computers. To be considered a small-scale server, a computer must have the following characteristics: designed in a pedestal, tower, or other form factor similar to those of desktop computers such that all data processing, storage, and network interfacing is contained within one box or product; intended to be operational twenty-four hours per day and seven days a week, and unscheduled downtime is extremely low, such as on the order of hours per year; is capable of operating in a simultaneous multi-user environment serving several users through networked client units; and designed for an industry accepted operating system for home or low-end server applications.

21. "Television" means a display system containing a cathode ray tube or any other type of display primarily intended to receive video programming via broadcast, cable or satellite transmission, having a viewable area greater than four inches when measured diagonally.

§ 27-2603. Manufacturer collection; recycling surcharge.

1. (a) Beginning April first, two thousand eleven, a manufacturer of

covered electronic equipment must accept for collection, handling and recycling or reuse electronic waste for which it is the manufacturer. Such waste shall count toward the amount of electronic waste required to be accepted pursuant to subdivision four of this section.

(b) Beginning April first, two thousand eleven, a manufacturer of covered electronic equipment must accept for collection, handling and recycling or reuse one piece of electronic waste of any manufacturer's brand if offered by a consumer with the purchase of covered electronic equipment of the same type by a consumer. Such waste shall count toward the amount of the electronic waste required to be accepted pursuant to subdivision four of this section.

2. Beginning April first, two thousand eleven, each manufacturer must accept for collection, handling and recycling or reuse the manufacturer's acceptance standard as specified in subdivision four of this section.

3. Statewide recycling or reuse goal. (a) For the period from April first, two thousand eleven through December thirty-first, two thousand eleven, the statewide recycling or reuse goal for electronic waste shall be the product of the latest population estimate for the state, as published by the U.S. Census bureau multiplied by three pounds multiplied by three-quarters.

(b) For calendar year two thousand twelve, the statewide recycling or reuse goal for all electronic waste shall be the product of the latest population estimate for the state, as published by the U.S. Census bureau multiplied by four pounds.

(c) For calendar year two thousand thirteen, the statewide recycling or reuse goal for all electronic waste shall be the product of the latest population estimate for the state, as published by the U.S. Census bureau multiplied by five pounds.

(d) For calendar year two thousand fourteen and annually thereafter, the statewide recycling or reuse goal for all electronic waste is the product of the base weight multiplied by the goal attainment percentage. For the purposes of this paragraph, "base weight" means the greater of: (i) the average weight of all electronic waste collected for recycling or reuse during the previous three calendar years as reported to the

department pursuant to paragraph (b) of subdivision one of section 27-2617 of this title; or (ii) the three year average of the sum of all electronic waste collected for recycling or reuse during the previous three calendar years based on information reported to the department pursuant to paragraph (b) of subdivision one, paragraph (b) of subdivision two and paragraph (b) of subdivision three of section 27-2613 of this title.

(e) The "goal attainment percentage" means:

(i) ninety percent if the base weight is less than ninety percent of the statewide recycling or reuse goal for the previous calendar year;

(ii) ninety-five percent if the base weight is ninety percent or greater, but does not exceed ninety-five percent of the statewide recycling or reuse goal for the previous calendar year;

(iii) one hundred percent if the base weight is ninety-five percent or greater, but does not exceed one hundred five percent of the statewide recycling or reuse goal for the previous calendar year;

(iv) one hundred five percent if the base weight is one hundred five percent or greater, but does not exceed one hundred ten percent of the statewide recycling or reuse goal for the previous calendar year; and

(v) one hundred ten percent if the base weight is one hundred ten percent or greater of the statewide recycling or reuse goal for the previous calendar year.

4. Manufacturer acceptance standard. (a) For the period April first, two thousand eleven through December thirty-first, two thousand eleven and annually thereafter, each manufacturer's acceptance standard is the product of the statewide recycling or reuse goal under paragraph (a), (b), (c) or (d) of subdivision three of this section, as appropriate, multiplied by that manufacturer's market share pursuant to paragraph (b) of this subdivision.

(b) Each manufacturer's market share of electronic waste shall be determined by the department based on the manufacturer's percentage share of the total weight of covered electronic equipment sold as determined by the best available information, including, but not limited to, state sales data reported by weight. Beginning April first, two thousand eleven, and every calendar year thereafter, the department shall provide each manufacturer with a determination of its market share

of electronic waste which shall be the quotient of the total weight of the manufacturer's covered electronic equipment sold to persons in this state based on the average annual retail sales during the preceding three calendar years, as reported under sections 27-2605 and 27-2617 of this title divided by the total weight of all manufacturers covered electronic equipment sold to persons in this state based on the average annual retail sales during the preceding three calendar years, as reported under sections 27-2605 and 27-2617 of this title.

5. In the absence of a waiver by the department pursuant to subdivision three of section 27-2615 of this title, beginning in calendar year two thousand thirteen, a manufacturer that fails to meet its manufacturer's acceptance standard for the previous calendar year as required by subdivision four of this section shall be subject to a recycling surcharge, determined as follows:

(a) If a manufacturer accepts at least ninety percent but less than one hundred percent of its manufacturer's acceptance standard as required by subdivision four of this section, the surcharge shall be thirty cents multiplied by the number of additional pounds of electronic waste that should have been accepted by such manufacturer.

(b) If a manufacturer accepts at least fifty percent but less than ninety percent of its manufacturer's acceptance standard as required by subdivision four of this section, the surcharge shall be forty cents multiplied by the number of additional pounds of electronic waste that should have been accepted by such manufacturer.

(c) If a manufacturer accepts less than fifty percent of its manufacturer's acceptance standard as required by subdivision four of this section, the surcharge shall be fifty cents multiplied by the number of additional pounds of electronic waste that should have been accepted by such manufacturer.

6. The recycling surcharge shall be paid to the department with the annual report required pursuant to section 27-2617 of this title.

7. Beginning with calendar year two thousand fourteen, if a manufacturer accepts more than its manufacturer's acceptance standard as required by subdivision four of this section, the excess weight may be

used as electronic waste acceptance credits and may be sold, traded, or banked for a period no longer than three calendar years succeeding the year in which the credits were earned; provided, however, that no more than twenty-five percent of a manufacturer's obligation for any calendar year may be met with recycling credits generated in a prior calendar year.

§ 27-2605. Manufacturer electronic waste registration and responsibilities.

1. A manufacturer shall submit a registration on a form prescribed by the department to the department by January first, two thousand eleven, along with a registration fee of five thousand dollars. The department may require such form to be filed electronically. Such registration shall include:

- (a) the manufacturer's name, address, and telephone number;
- (b) the name and title of an officer, director, or other individual designated as the manufacturer's contact for purposes of this title;
- (c) a list identifying the manufacturer's brands;
- (d) a general description of the manner in which the manufacturer will comply with section 27-2603 of this title, including specific information on the manufacturer's electronic waste acceptance program in the state, and a current list of locations within the state where consumers may return electronic waste;
- (e) sales data reported by weight for the manufacturer's covered electronic equipment sold in this state for the previous three calendar years, categorized by type to the extent known. If the manufacturer cannot provide accurate state sales data, it must explain why such data cannot be provided, and estimate state sales data by (i) dividing its national sales data by weight by the national population according to the most recent census and multiplying the result by the population of the state, or (ii) another method approved by the department;
- (f) a statement disclosing whether: (i) any covered electronic device sold in this state exceeds the maximum concentration values established for lead, mercury, cadmium, hexavalent chromium, polybrominated biphenyls (PBBs), and polybrominated diphenyl ethers (PBDEs) under the

restriction of hazardous substances directive (RoHS) pursuant to 2002/95/EC of the European Parliament and Council and any amendments thereto and if so, a listing of any covered electronic equipment that is not in compliance with such directive; or (ii) the manufacturer has received an exemption from one or more of those maximum concentration values under the RoHS directive that has been approved and published by the European Commission; and

(g) any other information as the department may require.

2. A manufacturer's registration is effective upon acceptance by the department and must be updated within thirty days of any material change to the information required by subdivision one of this section.

3. Any person who becomes a manufacturer on or after January first, two thousand eleven shall register with the department prior to selling or offering for sale in the state any covered electronic equipment, and must comply with the requirements of this title.

4. No later than April first, two thousand eleven, a manufacturer shall not sell or offer for sale electronic equipment in the state unless the manufacturer has registered with the department and maintains an electronic waste acceptance program through which the manufacturer, either directly or through an agent or designee, accepts electronic waste from consumers in the state for recycling. The manufacturer shall ensure that retailers are notified of such registration.

5. The electronic waste acceptance program shall include, at a minimum:

(a) collection, handling and recycling or reuse of electronic waste pursuant to section 27-2603 of this title in a manner convenient to consumers. The following acceptance methods shall be considered reasonably convenient: (i) mail or ship back return programs; (ii) collection or acceptance events conducted by the manufacturer or the manufacturer's agent or designee, including events conducted through local governments or private parties; (iii) fixed acceptance locations such as dedicated acceptance sites operated by the manufacturer or its agent or designee; (iv) agreements with local governments, retail

stores, sales outlets and not-for-profit organizations which have agreed to provide facilities for the collection of electronic waste; (v) community collection events; and (vi) any combination of these or other acceptance methods which effectively provide for the acceptance of electronic waste for recycling or reuse through means that are available and reasonably convenient to consumers in the state. At a minimum, the manufacturer shall ensure that all counties of the state, and all municipalities which have a population of ten thousand or greater, have at least one method of acceptance that is available within such county or municipality. The department may establish additional requirements to ensure convenient collection from consumers;

(b) information on how consumers can destroy all data on any electronic waste, either through physical destruction of the hard drive or through data wiping;

(c) a public education program to inform consumers about the manufacturer's electronic waste acceptance program, including at a minimum: (i) an internet website and a toll-free telephone number and written information included in the product manual for, or at the time of sale of, covered electronic equipment that provides sufficient information to allow a consumer of covered electronic equipment to learn how to return the covered equipment for recycling or reuse, and in the case of manufacturers of computers, hard drives and other covered electronic equipment that have internal memory on which personal or other confidential data can be stored, such website shall provide instructions for how consumers can destroy such data before surrendering the products for recycling or reuse; (ii) advertisements and press releases if any; and

(d) any other information as required by the department in accordance with regulations promulgated pursuant to this article.

6. A manufacturer shall maintain records demonstrating compliance with this title and make them available for audit and inspection by the department for a period of three years.

7. A manufacturer may satisfy the electronic waste collection requirements of this section by agreeing to participate in a collective electronic waste acceptance program with other manufacturers. Any such

collective electronic waste acceptance program must meet the same requirements as an individual manufacturer. Any collective electronic waste acceptance program must include a list of manufacturers that are participating in such program along with other identifying information as may be required by the department. Such program shall submit a registration to the department along with a registration fee of ten thousand dollars.

8. A manufacturer shall be responsible for all costs associated with the implementation of the electronic waste acceptance program. The manufacturer shall not charge consumers for the collection, handling and recycling and reuse of electronic waste, provided that such prohibition shall not apply to a charge on business consumers or to charges for premium services. This prohibition shall not apply to a manufacturer's contract with a consumer for the collection, handling, recycling or reuse of electronic waste that was entered into prior to the effective date of this section. For purposes of this subdivision, "business consumer" means a for-profit entity which has fifty or more full time employees or a not-for-profit corporation with seventy-five or more full time employees, but not a not-for-profit corporation designated under section 501(c)(3) of the internal revenue code. For purposes of this subdivision, "premium services" means equipment and data security services, refurbishment for reuse by the consumer, and other custom services as may be determined by the department.

§ 27-2607. Retailer requirements.

1. At the location of sale of covered electronic equipment, a retailer shall provide purchasers of covered electronic equipment with information, if any, about opportunities for the return of electronic waste that has been provided to the retailer by a manufacturer.

2. Beginning April first, two thousand eleven, no retailer shall sell or offer for sale in the state any covered electronic equipment unless the manufacturer and the manufacturer's brands are registered with the department pursuant to section 27-2605 of this title. If the retailer

purchased covered electronic equipment from a manufacturer who fails to register by January first, two thousand eleven, or prior to the date the manufacturer withdrew its registration or the registration was revoked by the department, the retailer may continue to sell the covered electronic equipment for one hundred eighty days after April first, two thousand eleven, or the date the registration was withdrawn or revoked.

§ 27-2609. Labeling.

Beginning April first, two thousand eleven, a manufacturer may not offer for sale in the state or deliver to retailers for subsequent sale covered electronic equipment unless it has a visible, permanent label clearly identifying the manufacturer of that equipment.

§ 27-2611. Disposal ban.

1. Beginning April first, two thousand eleven, no manufacturer, retailer, or owner or operator of an electronic waste collection site, electronic waste consolidation facility or electronic waste recycling facility in the state shall dispose of electronic waste at a solid waste management facility or hazardous waste management facility, or place electronic waste for collection which is intended for disposal at a solid waste management facility or hazardous waste management facility.

2. Beginning January first, two thousand twelve, no person except for an individual or household shall place or dispose of any electronic waste in any solid waste management facility, or place electronic waste for collection which is intended for disposal at a solid waste management facility or hazardous waste management facility in this state. Persons engaged in the collection of solid waste for delivery to a solid waste management facility shall provide written information to users of such facility on the proper methods for the recycling of electronic waste.

3. Beginning January first, two thousand fifteen, no individual or

household shall place or dispose of any electronic waste in any solid waste management facility, or place electronic waste for collection which is intended for disposal at a solid waste management facility or hazardous waste management facility in this state.

4. Beginning January first, two thousand twelve, an owner or operator of a solid waste management facility or hazardous waste management facility shall educate users of such facility on the proper methods for the management of electronic waste. Such education shall include:

(a) providing written information to users of such facility on the proper methods for recycling of electronic waste; and

(b) posting, in conspicuous locations at such facility, signs stating that electronic waste may not be disposed of at the facility.

§ 27-2613. Electronic waste collection, consolidation and recycling.

1. Electronic waste collection sites. No later than January first, two thousand eleven, each person who owns or operates an electronic waste collection site in the state shall:

(a) register with the department on a form prescribed by the department. The department may require such form to be filed electronically. The registration shall include: (i) the name, address, and telephone number of the owners and the operators of the electronic waste collection site; and (ii) the name, address, and telephone number of the electronic waste collection site. Any person who commences the operation of an electronic waste collection site on or after January first, two thousand eleven shall register with the department at least thirty days prior to receiving any electronic waste at such collection site. A registration is effective upon acceptance by the department. In the case of collection sites operated by a retailer, a single registration listing the name, address, and telephone number of the individual collection sites may be submitted covering all their collection sites;

(b) beginning March first, two thousand twelve, each person operating an electronic waste collection site shall submit to the department an annual report for the period of April first, two thousand eleven through

December thirty-first, two thousand eleven and each calendar year thereafter, on a form prescribed by the department. The department may require annual reports to be filed electronically. Annual reports shall include, but not be limited to, the following information: (i) the quantity, by weight, of electronic waste received from consumers in the state; (ii) the name and address of each person to whom the electronic waste collection site sent electronic waste during the reporting period, along with the quantity, by weight, of electronic waste that was sent to each such person; and (iii) the weight of electronic waste collected on behalf of or pursuant to an agreement with each manufacturer during the reporting period. All quantities of electronic waste reported by the collection site must separately include electronic waste generated by New York state consumers and electronic waste received from or shipped outside the state;

(c) manage electronic waste in a manner that complies with all applicable laws, rules and regulations;

(d) store electronic waste (i) in a fully enclosed building with a roof, floor and walls, or (ii) in a secure container (e.g., package or vehicle), that is constructed and maintained to minimize breakage of electronic waste and to prevent releases of hazardous materials to the environment;

(e) remove electronic waste from the site within one year of the waste's receipt at the site, and maintain records demonstrating compliance with this requirement.

2. Electronic waste consolidation facilities. (a) No later than January first, two thousand eleven, each person who operates an electronic waste consolidation facility in the state shall register with the department on a form prescribed by the department. The department may require such form to be filed electronically. The registration shall include: (i) the name, address and telephone number of the owner and the operator of the facility; and (ii) the name, address and telephone number of the electronic waste consolidation facility. Any person who commences the operation of an electronic waste consolidation facility on or after January first, two thousand eleven shall register with the department at least thirty days prior to receiving any electronic waste. A registration is effective upon acceptance by the department. Any

registration required by this paragraph shall be accompanied by a registration fee of two hundred fifty dollars.

(b) Beginning March first, two thousand twelve, each person operating an electronic waste consolidation facility shall submit to the department an annual report for the period of April first, two thousand eleven through December thirty-first, two thousand eleven and each calendar year thereafter, on a form prescribed by the department. The department may require annual reports to be filed electronically. Annual reports shall include, but not be limited to, the following information: (i) the name and address of each electronic waste collection site from which the consolidation facility received electronic waste during the reporting period, along with the quantity, by weight, of electronic waste received from each collection site; (ii) the name and address of each person to whom the electronic waste consolidation facility sent electronic waste during the reporting period, along with the quantity, by weight, of electronic waste that was sent to each such person; (iii) the weight of electronic waste collected on behalf of or pursuant to an agreement with each manufacturer during the reporting period; and (iv) a certification by the owner or operator of the electronic waste consolidation facility that such a facility has complied with the requirements of this title and all other applicable laws, rules, and regulations. All quantities of electronic waste reported by the consolidation facility must separately include electronic waste generated by New York state consumers and electronic waste received from or shipped outside the state.

(c) Each person operating an electronic waste consolidation facility shall:

(i) manage electronic waste in a manner that complies with all applicable laws, rules and regulations;

(ii) store electronic waste (A) in a fully enclosed building with a roof, floor and walls, or (B) in a secure container (e.g., package or vehicle), that is constructed and maintained to minimize breakage of electronic waste and to prevent releases of hazardous materials to the environment;

(iii) have a means to control entry, at all times, to the active portion of the facility;

(iv) inform all employees who handle or have responsibility for

managing electronic waste about the proper handling and emergency procedures appropriate to the type or types of electronic waste handled at the facility;

(v) remove electronic waste from the site within one year of the waste's receipt at the site, and maintain records demonstrating compliance with this requirement; and

(vi) maintain the records required by paragraphs (a) and (b) of this subdivision and by subparagraph (v) of this paragraph on site and make them available for audit and inspection by the department for a period of three years.

(d) A person operating an electronic waste consolidation facility shall not engage in electronic waste recycling unless such person is also registered as an electronic waste recycling facility, and complies with the requirements of this section that are applicable to each type of facility.

(e) A person operating an electronic waste consolidation facility may accept electronic waste in the same manner as an electronic waste collection site provided that such person complies with the requirements of this section that are applicable to electronic waste collection sites.

3. Electronic waste recycling facilities. (a) No later than January first, two thousand eleven, each person operating an electronic waste recycling facility in the state shall register with the department on a form prescribed by the department. The department may require such form to be filed electronically. The registration shall include: (i) the name, address and telephone number of the owner and the operator of the facility; and (ii) the name, address, and telephone number of the electronic waste recycling facility. Any person who commences the operation of an electronic waste recycling facility on or after January first, two thousand eleven shall register with the department at least thirty days prior to receiving any electronic waste. A registration is effective upon acceptance by the department. Any registration required by this paragraph shall be accompanied by a registration fee of two hundred fifty dollars.

(b) Beginning March first, two thousand twelve, each person operating an electronic waste recycling facility shall submit to the department an

annual report for the period of April first, two thousand eleven through December thirty-first, two thousand eleven and each calendar year thereafter, on a form prescribed by the department. The department may require annual reports to be filed electronically. Annual reports shall include, but not be limited to, the following information: (i) the quantity, by weight, of electronic waste received from consumers in the state; (ii) the name and address of each electronic waste collection site and electronic waste consolidation facility from which electronic waste was received during the reporting period, along with the quantity, by weight, of electronic waste received from each person; (iii) the name and address of each person to whom the facility sent electronic waste or component materials during the reporting period, along with the quantity, by weight, of electronic waste or component materials thereof sent to each such person; (iv) the weight of electronic waste collected on behalf of or pursuant to an agreement with each manufacturer during the reporting period; and (v) a certification by the owner or operator of the facility that such facility has complied with the requirements of this title and all other applicable laws, rules, and regulations. All quantities of electronic waste reported by the recycling facility must separately include electronic waste generated by New York state consumers and electronic waste received from or shipped outside the state.

(c) Each person operating an electronic waste recycling facility shall:

(i) manage and recycle electronic waste in a manner that complies with all applicable laws, rules and regulations;

(ii) store electronic waste (A) in a fully enclosed building with a roof, floor and walls, or (B) in a secure container (e.g., package or vehicle), that is constructed and maintained to minimize breakage of electronic waste and to prevent releases of hazardous materials to the environment;

(iii) have a means to control entry, at all times, through gates or other entrances to the active portion of the facility;

(iv) inform all employees who handle or have responsibility for managing electronic waste about proper handling and emergency procedures appropriate to the type or types of electronic waste handled at the facility;

(v) remove electronic waste from the site within one year of the waste's receipt at the site, and maintain records demonstrating compliance with this requirement; and

(vi) maintain the records required by paragraphs (a) and (b) of this subdivision and by subparagraph (v) of this paragraph on site and make them available for audit and inspection by the department for a period of three years.

(d) A person operating an electronic waste recycling facility may also operate such facility as an electronic waste consolidation facility provided that such person complies with the requirements of this section that are applicable to each type of facility. Where a facility is operated for both purposes, only one registration fee must be paid.

(e) A person operating an electronic waste recycling facility may accept electronic waste in the same manner as an electronic waste collection site provided that such person complies with the requirements of this section that are applicable to electronic waste collection sites.

4. Except to the extent otherwise required by law, no manufacturer or person operating an electronic waste collection site, electronic waste consolidation facility or electronic waste recycling facility shall have any responsibility or liability for any data in any form stored on electronic waste surrendered for recycling or reuse, unless such person misuses or knowingly and intentionally, or with gross negligence, discloses the data. This provision shall not prohibit any such person from entering into agreements that provide for the destruction of data on covered electronic equipment.

§ 27-2615. Department responsibilities.

1. The department is authorized to promulgate rules and regulations necessary to implement and administer this title. At a minimum, the department shall promulgate rules and regulations on: standards for reuse; electronic waste acceptance credits; waivers of the recycling surcharge; and acceptable alternative methods for the determination of state sales data.

2. The department shall (a) maintain a list of manufacturers who are registered pursuant to section 27-2605 of this title, (b) maintain a list of each such manufacturer's brands, and (c) post such lists on the department's website.

3. The department may waive the recycling surcharge payable by a manufacturer under this title when the manufacturer demonstrates in an application to the department it was unable to accept the weight of electronic waste required by section 27-2603 of this title despite the manufacturer's best efforts. The application shall be made with the annual report required by section 27-2617 of this title. The application shall include such information as the department requires. A waiver provided pursuant to this subdivision shall not relieve a manufacturer from the obligation to comply with the provisions of this title not specifically addressed in such waiver.

§ 27-2617. Reporting requirements.

1. Beginning March first, two thousand twelve, for the period of April first, two thousand eleven through December thirty-first, two thousand eleven and each calendar year thereafter, a manufacturer that offers covered electronic equipment for sale in this state shall submit a report to the department on a form prescribed by the department that includes the following:

(a) sales data reported by weight for the manufacturer's covered electronic equipment sold in this state for the previous three calendar years, categorized by type to the extent known. If the manufacturer cannot provide accurate state sales data, it must explain why such data cannot be provided, and estimate state sales data by (i) dividing its national sales data by weight by the national population according to the most recent census and multiplying the result by the population of the state, or (ii) another method approved by the department;

(b) the quantity, by weight, of electronic waste collected for recycling or reuse in this state, categorized by the type of covered electronic equipment collected during the reporting period, the methods

used to accept the electronic waste, and the approximate weight of electronic waste accepted by each method used to the extent known;

(c) all quantities of electronic waste reported by the manufacturer must separately include electronic waste generated by New York state consumers and electronic waste received from or shipped outside the state: (i) the quantity, by weight, of electronic waste received directly from consumers in the state through a mail back program; (ii) the name and address of each electronic waste collection site, electronic waste consolidation facility, and electronic waste recycling facility at which electronic waste from consumers was received on behalf of the manufacturer during the reporting period, along with the quantity, by weight, of electronic waste received; and (iii) the name and address of each person to whom the manufacturer sent electronic waste or component materials during the reporting period, along with the quantity, by weight, of electronic waste or component materials thereof sent to each such person;

(d) the number of electronic waste acceptance credits purchased, sold, banked and traded during the reporting period, the number of electronic waste acceptance credits used to meet the requirements of section 27-2603 of this title, and from whom they were purchased and to whom they were sold or traded, and the number of electronic waste acceptance credits retained as of the date of the report;

(e) the amount of any recycling surcharge owed for the reporting period, with sufficient information to demonstrate the basis for the calculation of the surcharge;

(f) the names and locations of electronic waste recycling facilities utilized by the manufacturer and entities to which electronic waste is sent for reuse, whether in the state or outside the state, including details on the methods of recycling or reuse of electronic waste, any disassembly or physical recovery operation used, and the environmental management measures implemented by such recycling facility or entity;

(g) information detailing the acceptance methods made available to consumers in municipalities which have a population of greater than ten thousand and in each county of the state to meet the requirements of paragraph (a) of subdivision five of section 27-2605 of this title;

(h) a brief description of its public education program including the number of visits to the internet website and calls to the toll-free

telephone number provided by the manufacturer as required by section 27-2605 of this title;

(i) any other information as required by the department; and

(j) a signature by an officer, director, or other individual affirming the accuracy of the report.

2. The department may require annual reports to be filed electronically.

3. The report shall be accompanied by an annual reporting fee of three thousand dollars, and any recycling surcharge due pursuant to section 27-2603 of this title.

4. The department shall submit a report on implementation of the title in this state to the governor and legislature by April first, two thousand twelve and every two years thereafter. The report must include, at a minimum, an evaluation of:

(a) the electronic waste stream in the state;

(b) recycling and reuse rates in the state for covered electronic equipment;

(c) a discussion of compliance and enforcement related to the requirements of this title;

(d) recommendations for any changes to this title; and

(e) a discussion of opportunities for business development in the state related to the acceptance, collection, handling and recycling or reuse of electronic equipment in this state.

§ 27-2619. Preemption.

Jurisdiction in all matters pertaining to electronic waste recycling, including but not limited to the obligations of manufacturers, retailers, electronic waste collection sites, electronic waste consolidation facilities and electronic waste recycling facilities with respect to electronic waste recycling, is, by this title, vested exclusively in the state. Any provision of any local law or ordinance, or any rule or regulation promulgated thereto, governing covered

electronic equipment and the collection, reuse, or recycling of electronic waste shall upon the effective date of this title be preempted.

§ 27-2621. Disposition of fees.

All fees and charges collected pursuant to this title shall be deposited into the environmental protection fund established pursuant to section ninety-two-s of the state finance law.

* TITLE 27

PLASTIC BAG REDUCTION, REUSE AND RECYCLING

Section 27-2701. Definitions.

27-2703. Store operator responsibilities.

27-2705. Recycling program requirements.

27-2707. Manufacturer responsibilities.

27-2709. Department responsibility.

27-2711. Regulations.

27-2713. Preemption.

* NB There are 2 Title 27's

*** § 27-2701. Definitions.**

As used in this title:

1. "Compostable plastic bag" means a plastic bag that at a minimum meets the American Society for Testing and Materials standard D6400 for compostable plastic, as amended.

2. "Manufacturer" means the producer of a plastic carryout bag or film plastic sold to a store or the manufacturer's agent or broker who sold the plastic carryout bag or film plastic to the store.

3. "Operator" means a person in control of, or having daily

responsibility for, the daily operation of a store, which may include, but is not limited to, the owner of the store.

4. "Plastic carryout bag" means a plastic carryout bag provided by a store to a customer at the point of sale.

5. "Reusable bag" means:

(a) a bag made of cloth or other machine washable fabric that has handles; or

(b) a durable plastic bag with handles that is specifically designed and manufactured for multiple reuse.

6. "Store" means a retail establishment that provides plastic carryout bags to its customers as a result of the sale of a product and (a) has over ten thousand square feet of retail space, or (b) such retail establishment is part of a chain engaged in the same general field of business which operates five or more units of over five thousand square feet of retail space in this state under common ownership and management.

7. "Film plastic" means uncontaminated non-rigid film plastic packaging products composed of plastic resins, which include, but are not limited to, newspaper bags, dry cleaning bags and shrink-wrap.

* NB There are 2 § 27-2701's

*** § 27-2703. Store operator responsibilities.**

1. The operator of a store shall establish an at-store recycling program pursuant to the provisions of this title that provides an opportunity for a customer of the store to return to the store clean plastic carryout bags and film plastic.

2. A retail establishment that does not meet the definition of a store and that provides plastic carryout bags to customers at the point of sale may also adopt an at-store recycling program.

* NB There are 2 § 27-2703's

§ 27-2705. Recycling program requirements.

An at-store recycling program provided by the operator of a store shall require:

1. a plastic carryout bag provided by the store to have printed or displayed on the bag, in a manner visible to a consumer, the words "PLEASE RETURN TO A PARTICIPATING STORE FOR RECYCLING". Provided, however, such store shall be allowed for one year from the effective date of this subdivision to use its existing stock of plastic carryout bags. A store may also apply to the commissioner for approval of an alternative plastic bag recycling message. The commissioner shall approve or reject the proposed message within forty-five days;

2. a collection bin that is visible, easily accessible to the consumer, and clearly marked that the collection bin is available for the purpose of collecting and recycling plastic carryout bags and film plastic. This subdivision shall apply to stores not within an enclosed shopping mall and stores of at least fifty thousand square feet within an enclosed shopping mall. In the case of an enclosed shopping mall, the owner of the enclosed mall shall place bins at reasonable intervals throughout the enclosed mall area;

3. all plastic carryout bags and film plastic collected by the store to be collected, transported and recycled along with any other in-store plastic recycling, except for plastic bags that are not sufficiently free of foreign material to enter the recycling stream. Plastic carryout bags and film plastic collected by the store or the manufacturer, which are free of foreign material, shall not be disposed of in any solid waste disposal facility permitted or authorized pursuant to title seven of this article;

4. the store or its agent to maintain, for a minimum of three years, records describing the collection, transport and recycling of plastic carryout bags and film plastic collected by weight, provided however

that stores or its agents may weigh such bags, film plastic and any other in-store plastic recycling at a regional collection center. Such records shall be made available to the department upon request, to demonstrate compliance with this title; and

5. the operator of the store to (a) make reusable bags available to customers within the store for purchase, and (b) permit a reuseable bag to be used in lieu of a plastic carryout bag or paper bag.

§ 27-2707. Manufacturer responsibilities.

1. When the manufacturer accepts plastic carryout bags and film plastic for return, it or its agent shall maintain, for a minimum of three years, records describing the collection, transport and recycling of plastic carryout bags and film plastic collected by weight, provided that the manufacturer or its agents may weigh such bags, film plastic and any other plastic resins at a regional collection center. Such records shall be made available to the department upon request, to demonstrate compliance with this title.

2. Manufacturers of compostable plastic bags sold to stores in the state that are subject to the provisions of this title shall have printed on the bag, in a manner visible to the consumer, the words "COMPOSTABLE BAG -- DO NOT PLACE IN RECYCLING BIN". Provided however, such bags may be sold or distributed for one year from the effective date of this section to use the store's existing stock of compostable bags.

§ 27-2709. Department responsibility.

1. The department shall develop educational materials to encourage the reduction, reuse and recycling of plastic carryout bags and film plastic and shall make those materials available to stores required to comply with this article.

2. The department shall provide information regarding the availability of recycling facilities and companies that recycle plastic bags and film plastic, including the addresses and phone numbers of such facilities and companies to stores required to comply with this article.

§ 27-2711. Regulations.

The department is authorized to promulgate any rules and regulations necessary to implement the provisions of this title and shall promulgate, and update the most recent version of, rules and regulations pertaining to the definition of compostable as prescribed in American Society for Testing and Materials Standard D6400.

§ 27-2713. Preemption.

Jurisdiction in all matters pertaining to plastic bag and film plastic recycling is by this article vested exclusively in the state. Any provision of any local law or ordinance, or any rule or regulation promulgated thereto, governing the recycling of plastic bags and film plastic shall, upon the effective date of this title, be preempted. Provided however, nothing in this section shall preclude a person from coordinating for recycling or reuse the collection of plastic bags or film plastic.

*** TITLE 27**

DRUG MANAGEMENT AND DISPOSAL

Section 27-2701. Definition.

27-2703. Public information on the disposal of drugs.

* NB There are 2 Title 27's

*** § 27-2701. Definition.**

As used in this title, "drug" means any drug, as defined in

subdivision seven of section sixty-eight hundred two of the education law.

* NB There are 2 § 27-2701's

*** § 27-2703. Public information on the disposal of drugs.**

1. The department in consultation with the department of health, shall develop and implement a public information program on the proper disposal of drugs pursuant to this title. Such public information program shall include information on the proper storage and disposal of drugs, and on drug disposal sites.

2. The department, in consultation with the education department, shall establish a notice containing information on the proper storage and disposal of drugs, which shall be conspicuously displayed in every pharmacy registered pursuant to subdivision two of section sixty-eight hundred eight of the education law and in every other retail business authorized to sell drugs.

* NB There are 2 § 27-2703's

TITLE 28

BAG WASTE REDUCTION

Section 27-2801. Definitions.

27-2803. Plastic carryout bag ban.

27-2805. Paper carryout bag reduction fee.

27-2807. Violations.

27-2809. Preemption of local law.

§ 27-2801. Definitions.

As used in this title:

1. "Exempt bag" means a bag: (a) used solely to contain or wrap uncooked meat, fish, or poultry; (b) bags used by a customer solely to

package bulk items such as fruits, vegetables, grains, or candy; (c) bags used solely to contain food sliced or prepared to order; (d) bags used solely to contain a newspaper for delivery to a subscriber; (e) bags sold in bulk to a consumer at the point of sale; (f) trash bags; (g) food storage bags; (h) garment bags; (i) bags prepackaged for sale to a customer; (j) plastic carryout bags provided by a restaurant, tavern or similar food service establishment, as defined in the state sanitary code, to carryout or deliver food; or (k) bags provided by a pharmacy to carry prescription drugs.

2. "Plastic carryout bag" means any plastic bag, other than an exempt bag, that is provided to a customer by a person required to collect tax to be used by the customer to carry tangible personal property, regardless of whether such person required to collect tax sells any tangible personal property or service to the customer, and regardless of whether any tangible personal property or service sold is exempt from tax under article twenty-eight of the tax law.

3. "Paper carryout bag" means a paper bag, other than an exempt bag, that is provided to a customer by a person required to collect tax to be used by the customer to carry tangible personal property, regardless of whether such person required to collect tax sells any tangible personal property or service to the customer, and regardless of whether any tangible personal property or service sold is exempt from tax under article twenty-eight of the tax law.

4. "Reusable bag" means a bag: (a) made of cloth or other machine washable fabric that has handles; or (b) a durable bag with handles that is specifically designed and manufactured for multiple reuse.

5. "Person required to collect tax" means any vendor of tangible personal property subject to the tax imposed by subdivision (a) of section eleven hundred five of the tax law.

§ 27-2803. Plastic carryout bag ban.

1. No person required to collect tax shall distribute any plastic carryout bags to its customers unless such bags are exempt bags as defined in subdivision one of section 27-2801 of this title.

2. No person required to collect tax shall prevent a person from using a bag of any kind that they have brought for purposes of carrying goods.

3. Nothing in this section shall be deemed to exempt the provisions set forth in title 27 of this article relating to at store recycling.

§ 27-2805. Paper carryout bag reduction fee.

1. (a) Notwithstanding any other provision of law to the contrary, any city and any county, other than a county wholly within such a city, acting through its local legislative body, is hereby authorized and empowered to adopt and amend local laws, ordinances or resolutions imposing a paper carryout bag reduction fee within the territorial limits of such city or county, to take effect on or after March first, two thousand twenty. Notwithstanding the foregoing, if a county and a city wholly within such county both impose such fee, the fee imposed by such county shall not apply within the territorial limits of such city.

(b) Such paper carryout bag reduction fee, whether or not any tangible personal property is sold therewith, shall be imposed at a rate of five cents on each paper carryout bag provided by a person required to collect tax to a customer in this state; provided, however, that such paper carryout bag reduction fee shall not be imposed on paper carryout bags that are subject to a fee on the provision of such paper carryout bag pursuant to a local law or ordinance that was adopted prior to the effective date of this section. The paper carryout bag reduction fee must be reflected and made payable on the sales slip, invoice, receipt, or other statement of the price rendered to the customer.

(c) Such paper carryout bag reduction fee shall not constitute a receipt for the sale of tangible personal property subject to tax pursuant to article twenty-eight and pursuant to the authority of article twenty-nine of the tax law, and transfer of a bag to a customer by a person required to collect tax shall not constitute a retail sale.

(d) It shall be unlawful for a municipal corporation to adopt or amend a local law, ordinance or resolution requiring the imposition of any fee on the provision of a paper carryout bag except as expressly authorized by this section. Where a municipal corporation that adopted such a local law, ordinance or resolution prior to the effective date of this section is, or is located in, a county that has imposed a paper carryout bag reduction fee pursuant to this section, such municipal corporation shall be prohibited from requiring the imposition of a fee on any provision of paper carryout bags that occurs more than one year after such county paper carryout bag reduction fee takes effect.

2. Any such local law, ordinance or resolution adopted pursuant to this section shall state the amount of the paper carryout bag reduction fee and the date on which a person required to collect tax shall begin to add such paper carryout bag reduction fee to the sales slip, invoice, receipt, or other statement of the price rendered to its customers. No such local law, ordinance or resolution shall be effective unless a certified copy of such law, ordinance or resolution is mailed by registered or certified mail to the commissioner of taxation and finance in accordance with the provisions of subdivisions (d) and (e) of section twelve hundred ten of the tax law.

3. The paper carryout bag reduction fee imposed by this section shall not apply to any customer using the supplemental nutritional assistance program, special supplemental nutrition program for women, infants and children, or any successor programs used as full or partial payment for the items purchased.

4. The paper carryout bag reduction fee must be reported and paid to the commissioner of taxation and finance on a quarterly basis on or before the twentieth day of the month following each quarterly period ending on the last day of February, May, August and November, respectively. The payments must be accompanied by a return in the form and containing the information the commissioner of taxation and finance may prescribe.

5. Any sales slip, invoice, receipt, or other statement of price

furnished by a person required to collect tax to a customer shall separately state the paper carryout bag reduction fee and shall state the number of bags provided to the customer.

6. (a) Except as otherwise provided in this section, any paper carryout bag reduction fee imposed under the authority of this section shall be administered and collected by the commissioner of taxation and finance in a like manner as the taxes imposed by articles twenty-eight and twenty-nine of the tax law. All the provisions of articles twenty-eight and twenty-nine of the tax law, including the provisions relating to definitions, exemptions, returns, personal liability for the tax, collection of tax from the customer, payment of tax and the administration of the taxes imposed by such article, shall apply to the paper carryout bag reduction fee imposed under the authority of this section, with such modifications as may be necessary in order to adapt the language of those provisions to the paper carryout bag reduction fee imposed under the authority of this section. Those provisions shall apply with the same force and effect as if the language of those provisions had been set forth in full in this section, except to the extent that any of those provisions is either inconsistent with a provision of this section or is not relevant to the paper carryout bag reduction fee imposed under the authority of this section. For purposes of this section, any reference in this chapter to a tax or the taxes imposed by articles twenty-eight and twenty-nine of the tax law shall be deemed also to refer to the paper carryout bag reduction fee imposed under the authority of this section unless a different meaning is clearly required.

(b) Notwithstanding the provisions of paragraph (a) of this subdivision:

(1) the exemptions provided for in section eleven hundred sixteen of the tax law, other than the exemptions in paragraphs one, two and three of subdivision (a) of such section, shall not apply to the paper carryout bag reduction fees imposed under the authority of this section;

(2) the credit provided in subdivision (f) of section eleven hundred thirty-seven of the tax law shall not apply to this section.

(c) Notwithstanding the provisions of paragraph (a) of this subdivision or subdivision (a) of section eleven hundred forty-six of

the tax law, the commissioner of taxation and finance may, in his or her discretion, permit the commissioner or his or her authorized representative to inspect any return related to the paper carryout bag reduction fee filed under this section, or may furnish to the commissioner or his or her authorized representative any such return or supply him or her with information concerning an item contained in any such return, or disclosed by any investigation of a liability under this section.

7. All paper carryout bag reduction fee monies and any related penalties and interest remitted to the commissioner of taxation and finance under this section, except as hereinafter provided, shall be deposited daily with such responsible banks, banking houses, or trust companies as may be designated by the state comptroller. Of the revenues deposited, the comptroller shall retain in the comptroller's hands such amount as the commissioner of taxation and finance may determine to be necessary for refunds or reimbursements of the fees collected or received pursuant to this section, out of which the comptroller shall pay any refunds or reimbursements of such fees to which persons shall be entitled under the provisions of this section. The comptroller, after reserving such refund and reimbursement fund shall, on or before the twelfth day of each month, pay to the appropriate fiscal officers of the counties or cities imposing tax under subdivision one of this section an amount equal to forty percent of the paper carryout bag reduction fee monies and any related penalties and interest collected by the commissioner of taxation and finance in respect of each such county or city in the preceding calendar month to be used for the purpose of purchasing and distributing reusable bags, with priority given to low- and fixed-income communities. Provided further that at the end of each fiscal year, any funds which have not been used for the purpose defined in this section shall be returned to the comptroller and be deposited into the general fund to be used for the purpose of purchasing and distributing reusable bags with priority given to low- and fixed-income communities. Any remaining amount of paper carryout bag reduction fee monies and any related penalties and interest shall be deposited monthly into the environmental protection fund established pursuant to section ninety-two-s of the state finance law.

§ 27-2807. Violations.

1. Any person required to collect tax who violates any provision of section 27-2803 of this title shall receive a warning notice for the first such violation. A person required to collect tax shall be liable to the state of New York for a civil penalty of two hundred fifty dollars for the first violation after receiving a warning and five hundred dollars for any subsequent violation in the same calendar year. For purposes of this section, each commercial transaction shall constitute no more than one violation. A hearing or opportunity to be heard shall be provided prior to the assessment of any civil penalty.

2. The department, the department of agriculture and markets, and the attorney general are hereby authorized to enforce the provisions of this title, and all monies collected shall be deposited to the credit of the environmental protection fund established pursuant to section ninety-two-s of the state finance law.

§ 27-2809. Preemption of local law.

Jurisdiction in all matters pertaining to plastic carryout bags is vested exclusively in the state.

*** TITLE 29**

MERCURY THERMOSTAT COLLECTION ACT

Section 27-2901. Definitions.

27-2903. Mercury-containing thermostat collection.

27-2905. Thermostat wholesaler and retailer requirements.

27-2907. Department responsibilities.

27-2909. Disposal prohibition.

* NB Repealed January 1, 2027

*** § 27-2901. Definitions.**

1. "Collection program" means a system for the collection, transportation, recycling, and disposal of out-of-service mercury thermostats that is financed and managed or provided by a thermostat manufacturer individually or collectively with other thermostat manufacturers in accordance with this section.
2. "Mercury thermostat" means a product or device that uses a mercury switch to sense and control room temperature through communication with heating, ventilation, or air-conditioning equipment and includes thermostats used to sense and control room temperature in residential, commercial, industrial and other buildings but does not include a thermostat used to sense and control temperature as part of a manufacturing process.
3. "Out-of-service mercury thermostat" means a mercury thermostat that is removed, replaced or otherwise taken out of service.
4. "Qualified contractor" means a person engaged in the business of installation, service or removal of heating, ventilation, and air-conditioning components who employs seven or more service technicians or installers.
5. "Qualified local government authorities" means any municipal corporation or planning unit as defined in section 27-0107 of this article, or county departments of health.
6. "Thermostat manufacturer" means a person who owns or owned a name brand of one or more mercury thermostats sold in the state.
7. "Thermostat retailer" means a person who sells thermostats of any kind primarily to homeowners or other nonprofessionals through any sale or distribution mechanism including sales using the internet or catalogs.
8. "Thermostat wholesaler" means a person who is engaged in the

distribution and wholesale selling of heating, ventilation or air-conditioning components, including thermostats, to contractors, and whose total wholesale sales account for eighty percent or more of its total sales. A thermostat manufacturer is not, by virtue of manufacturing, a thermostat wholesaler.

* NB Repealed January 1, 2027

*** § 27-2903. Mercury-containing thermostat collection.**

1. Each thermostat manufacturer shall, individually or collectively, with other thermostat manufacturers, establish and maintain a program for the collection, transportation, recycling, disposal and proper management of out-of-service mercury thermostats in accordance with the provisions of this section.

2. Each thermostat manufacturer shall, individually or collectively with other thermostat manufacturers through a collection program, do the following:

(a) On and after July first, two thousand fourteen, compile a list of thermostat wholesalers in the state and offer each thermostat wholesaler containers for the collection of out-of-service mercury thermostats.

(b) On and after July first, two thousand fourteen, make collection containers available to all qualified contractors, thermostat wholesalers, thermostat retailers, and qualified local government authorities that request a container. Each thermostat manufacturer shall with each container include information regarding the proper management of out-of-service mercury thermostats.

(c) Establish a system to collect, transport, recycle, dispose and properly manage out-of-service mercury thermostats from all collection sites.

(d) Not include any fees or other charges to consumers or persons participating in the program. Each thermostat wholesaler, qualified contractor, qualified local government authority, or thermostat retailer that is provided with one or more collection containers may be charged a fee not to exceed twenty-six dollars to replace any collection container that is misplaced, stolen or otherwise lost.

(e) Beginning July first, two thousand fourteen, conduct education and outreach efforts, including, but not limited to the following:

(i) establish and maintain a public website for the dissemination of educational materials to promote the collection of out-of-service mercury thermostats. This website shall include templates of the educational materials on the internet website in a form and format that can be easily downloaded and printed. The link to this website shall be provided to the department;

(ii) contact thermostat wholesalers at least once a year to encourage their support and participation in educating customers on the importance of statutory requirements for the collection and proper management of out-of-service mercury thermostats;

(iii) create and maintain a web-based program that allows contractors and consumers to identify collection sites for out-of-service mercury thermostats in the state and provide a list of collection sites to the department; and

(iv) develop informational articles, press releases, and news stories pertaining to the importance of and opportunities for collecting and recycling out-of-service mercury thermostats and distribute those materials to trade publications, local media, and stakeholder groups.

(f) On or before July first, two thousand fourteen, develop and update as necessary educational and other outreach materials for distribution to contractors, contractor associations and consumers. These materials shall be made available for use by participating thermostat wholesalers, thermostat retailers, contractors, and qualified government authorities. The materials shall include, but not be limited to, the following:

(i) signage, such as posters and cling signage, that can be prominently displayed to promote the collection of out-of-service mercury thermostats to contractors and consumers; and

(ii) written materials or templates of materials for reproduction by thermostat wholesalers and thermostat retailers to be provided to customers at the time of purchase or delivery of a thermostat. The materials shall include, but not be limited to, information on the importance of properly managing out-of-service mercury thermostats and opportunities for the collection of these thermostats.

(g) Provide an opportunity for the department to review and offer feedback and suggestions on the collection program.

3. The collection programs established by thermostat manufacturers under this section shall be designed to achieve collectively the following statewide goals:

(a) For calendar year two thousand fifteen, the collection of no less than fifteen thousand five hundred out-of-service mercury thermostats;

(b) For calendar years two thousand sixteen through two thousand twenty-three, the collection goals shall be established by the department. The department shall establish collection goals no later than October first, two thousand fifteen. The collection goals established by the department shall achieve the maximum feasible number of out-of-service mercury thermostats in the state. In developing the collection goals, the department shall take into account, at a minimum, (i) the effectiveness of collection programs for out-of-service mercury thermostats in the state and other states, including education and outreach efforts, (ii) collection requirements in other states, including those states with the highest collection goals, (iii) any reports or studies on the number of out-of-service mercury thermostats that are available for collection in this state, other states, and nationally, and (iv) other relevant factors. Prior to establishing the collection goals, the department shall consult with stakeholder groups that include, at a minimum, representatives of thermostat manufacturers, environmental groups, municipal recyclers, thermostat wholesalers, qualified contractors, and thermostat retailers.

(c) Thermostat manufacturers shall implement any collection program revisions approved by the department within ninety days.

4. If the collection programs do not collectively achieve the collection goals provided for in subdivision three of this section for calendar year two thousand fifteen or any year thereafter the department, after conducting stakeholder consultations, may require modifications to one or more collection programs that the department determines are necessary to achieve the collection goals. Modifications required by the department may include improvements to outreach and education conducted under the collection program, expansion of the number and location of collection sites established under the program, modification of the roles of participants, and a five dollar financial

incentive in the form of either cash or coupon offered by the manufacturer to contractors and consumers for each out-of-service mercury thermostat returned to a collection site.

5. No later than April first, two thousand fifteen, and no later than April first of each year thereafter, each thermostat manufacturer shall, individually or collectively with other thermostat manufacturers, submit an annual report on its collection program to the department covering the one-year period ending December thirty-first of the previous year. Each report shall be posted on the manufacturer's or program operator's respective internet website. The annual report shall include the following:

- (a) the number of out-of-service mercury thermostats collected and managed under this section during the previous calendar year;

- (b) the estimated total amount of mercury contained in the out-of-service mercury thermostats collected under this section during the previous calendar year;

- (c) a list of all thermostat wholesalers, contractors, qualified local government authorities, and thermostat retailers participating in the program as mercury thermostat collection sites and the number of out-of-service mercury thermostats returned by each;

- (d) an accounting of the program's administrative costs;

- (e) a description of outreach strategies employed under paragraph (e) of subdivision two of this section;

- (f) examples of outreach and educational materials used under paragraph (e) of subdivision two of this section;

- (g) the internet website address of addresses where the annual report may be viewed online;

- (h) a description of how the out-of-service mercury thermostats were managed;

- (i) any modifications that the thermostat manufacturer is planning to make in its collection program; and

- (j) the identification of a collection program contact and the business phone number, mailing address, and e-mail address for the contact.

6. All contractors, thermostat wholesalers, thermostat manufacturers,

and thermostat retailers participating in the program shall handle and manage the out-of-service mercury thermostats in a manner that is consistent with the requirements for the disposal of hazardous waste.

7. On and after July first, two thousand fourteen, no thermostat wholesaler shall sell, offer to sell, distribute, or offer to distribute thermostats unless the wholesaler participates as a collection site for out-of-service mercury thermostats or requests and receives a waiver from the department following a demonstration that such participation would pose an undue burden.

* NB Repealed January 1, 2027

*** § 27-2905. Thermostat wholesaler and retailer requirements.**

No thermostat wholesaler or thermostat retailer shall sell, offer for sale or distribute any thermostat for final sale unless the manufacturer of such thermostat is listed on the department's website, in accordance with the provisions of this title.

* NB Repealed January 1, 2027

*** § 27-2907. Department responsibilities.**

1. No later than June first, two thousand fifteen, the department shall maintain on its website information regarding the collection and proper management of out-of-service mercury thermostats in the state. The information shall include the following:

(a) a description of the collection programs established under this section;

(b) a report on the progress towards achieving the statewide collection goals set forth in this title; and

(c) a list of all thermostat wholesalers, contractors, qualified local government authorities, and thermostat retailers participating in the program as collection sites.

2. No later than November first, two thousand eighteen, the department

shall submit a written report to the governor and the legislature regarding the effectiveness of the collection programs established under this section, information on the number of out-of-service thermostats collected, how the out-of-service thermostats were managed, and an estimate of the number of thermostats that are available for collection. The department shall use this information to recommend whether the provisions of this section should be extended, along with any other statutory changes. In preparing the report, the department shall consult with mercury thermostat manufacturers, environmental organizations, municipal recyclers, and other interest groups.

* NB Repealed January 1, 2027

*** § 27-2909. Disposal prohibition.**

1. No transporter shall knowingly commingle mercury-added thermostats with solid waste or recyclable materials.

2. No transporter shall knowingly deliver mercury-added thermostats or knowingly cause such materials to be delivered to:

(a) an incinerator;

(b) a landfill;

(c) a transfer station; or

(d) anyone who the transporter knows or should know will either commingle such materials with other solid waste or deliver such materials to an incinerator or a landfill for disposal.

3. No operator of an incinerator or a landfill shall knowingly accept mercury-added thermostats for disposal.

4. No operator of a transfer station shall knowingly commingle mercury-added thermostats with other solid waste or cause such materials to be transferred to an incinerator or landfill for disposal.

5. Each landfill and transfer station shall post, in a conspicuous location at the facility, a sign stating that mercury-added thermostats are not accepted at the facility.

* NB Repealed January 1, 2027

TITLE 30

**EXPANDED POLYSTYRENE FOAM CONTAINERS AND POLYSTYRENE LOOSE FILL
PACKAGING BAN**

Section 27-3001. Definitions.

27-3003. Expanded polystyrene foam containers and polystyrene
loose fill packaging ban.

27-3005. Exemptions and waivers.

27-3007. Preemption.

27-3009. Severability.

§ 27-3001. Definitions.

For the purposes of this title, the following terms shall have the following meanings:

1. "Covered food service provider" means a person engaged in the business of selling or distributing prepared food or beverages for on-premise or off-premise consumption including but not limited to: (a) food service establishments, caterers, temporary food service establishments, mobile food service establishments, and pushcarts as defined in the New York State Sanitary Code; (b) retail food stores as defined in article 28 of the agriculture and markets law; (c) delicatessens; (d) grocery stores; (e) restaurants; (f) cafeterias; (g) coffee shops; (h) hospitals, adult care facilities, and nursing homes; and (i) elementary and secondary schools, colleges, and universities.

2. "Disposable food service container" means a bowl, carton, clamshell, cup, lid, plate, tray, or any other product that is designed or used for the temporary storage or transport of a prepared food or beverage including a container generally recognized by the public as being designed for single use.

3. "Expanded polystyrene foam" means expanded foam thermoplastics

utilizing a styrene monomer and processed by any number of techniques. Such term shall not include rigid polystyrene.

4. "Manufacturer" means every person, firm or corporation that produces or imports polystyrene loose fill packaging or expanded polystyrene containers that are not wholly encapsulated or encased within a more durable container and are designed or intended to be used for cold storage that is sold, offered for sale, or distributed in the state.

5. "Polystyrene loose fill packaging" means a void-filling packaging product made of expanded polystyrene foam that is used as a packaging fill, commonly referred to as packing peanuts.

6. "Prepared food" means food or beverages that are cooked, chopped, sliced, mixed, brewed, frozen, heated, squeezed, combined or otherwise prepared on the premises of a covered food service provider for immediate consumption and require no further preparation to be consumed. Prepared food includes but is not limited to ready to eat takeout foods and beverages.

7. "Rigid polystyrene" means plastic packaging made from rigid, polystyrene resin that has not been expanded, extruded, or foamed.

8. "Store" means a retail or wholesale establishment other than a covered food service provider.

§ 27-3003. Expanded polystyrene foam containers and polystyrene loose fill packaging ban.

1. (a) Beginning January first, two thousand twenty-two, no covered food service provider or store shall sell, offer for sale, or distribute disposable food service containers that contain expanded polystyrene foam in the state.

(b) Beginning January first, two thousand twenty-two, no manufacturer or store shall sell, offer for sale, or distribute polystyrene loose

fill packaging in the state.

(c) Beginning January first, two thousand twenty-six, no covered food service provider, manufacturer or store shall sell, offer for sale, or distribute expanded polystyrene containers that are not wholly encapsulated or encased within a more durable container and are designed or intended to be used for cold storage, including but not limited to coolers and ice chests.

2. The department is authorized to promulgate any other such rules and regulations as it shall deem necessary to implement the provisions of this title including criteria related to what constitutes comparable costs pursuant to subdivision two of section 27-3005 of this title.

§ 27-3005. Exemptions and waivers.

1. Notwithstanding any inconsistent provision of law, this title shall not apply to:

(a) Prepackaged food filled or sealed prior to receipt at a covered food service provider; or

(b) Raw meat, pork, seafood, poultry or fish sold for the purpose of cooking or preparing off-premises by the customer; or

* (c) Expanded polystyrene containers that are not wholly encapsulated or encased within a more durable container and are used for cold storage for:

(i) drugs and medical devices as defined in the federal food, drug, and cosmetic act (21 U.S.C. Sec. 301 et seq.);

(ii) animal biologics, including vaccines, bacterins, antisera, diagnostic kits, and other products of biological origin, and other packaging materials regulated by the United States department of agriculture under the virus, serum, toxin act (21 U.S.C. 151-159), including vaccines;

(iii) tissues as defined in section forty-three hundred sixty of the public health law or biological products as defined in the federal Public Health Service Act (42 U.S.C. Sec 262);

(iv) temperature-sensitive samples, cultures or specialized laboratory reagents requiring cold storage during shipment, either delivered to or

received from:

(A) the department of agriculture and market's food laboratory pursuant to its duties under the agriculture and markets law; or

(B) laboratories for testing to help ensure human health, animal health, and/or food safety pursuant to statutory or regulatory requirements of, or standards established under, programs administered by the department, the department of health, the department of agriculture and markets, the United States department of agriculture and/or the United States food and drug administration; or

(v) microbial cultures used for dairy, meat, or fermented beverage manufacturing and requiring cold storage during shipment or delivery to dairy or meat processing plants or breweries and wineries as defined in section three of the alcoholic beverage control law.

* NB Effective until January 1, 2030

* (c) Expanded polystyrene containers that are not wholly encapsulated or encased within a more durable container and are used for cold storage for:

(i) drugs and medical devices as defined in the federal food, drug, and cosmetic act (21 U.S.C. Sec. 301 et seq.);

(ii) animal biologics, including vaccines, bacterins, antisera, diagnostic kits, and other products of biological origin, and other packaging materials regulated by the United States department of agriculture under the virus, serum, toxin act (21 U.S.C. 151-159), including vaccines;

(iii) tissues as defined in section forty-three hundred sixty of the public health law or biological products as defined in the federal Public Health Service Act (42 U.S.C. Sec 262); or

(iv) temperature-sensitive samples, cultures or specialized laboratory reagents requiring cold storage during shipment, either delivered to or received from:

(A) the department of agriculture and market's food laboratory pursuant to its duties under the agriculture and markets law; or

(B) laboratories for testing to help ensure human health, animal health, and/or food safety pursuant to statutory or regulatory requirements of, or standards established under, programs administered by the department, the department of health, the department of agriculture and markets, the United States department of agriculture

and/or the United States food and drug administration.

* NB Effective January 1, 2030 until January 1, 2035

* (c) Expanded polystyrene containers that are not wholly encapsulated or encased within a more durable container and are used for cold storage for:

(i) drugs and medical devices as defined in the federal food, drug, and cosmetic act (21 U.S.C. Sec. 301 et seq.);

(ii) animal biologics, including vaccines, bacterins, antisera, diagnostic kits, and other products of biological origin, and other packaging materials regulated by the United States department of agriculture under the virus, serum, toxin act (21 U.S.C. 151-159), including vaccines; or

(iii) tissues as defined in section forty-three hundred sixty of the public health law or biological products as defined in the federal Public Health Service Act (42 U.S.C. Sec 262).

* NB Effective January 1, 2035

2. Any facility, regardless of its income, including soup kitchens, food pantries and places of worship, operated by a not-for-profit corporation or by a federal, state, or local government agency that provides food to needy individuals at no or nominal charge, and any covered food service provider having an annual gross income under five hundred thousand dollars per location as stated on the income tax filing for the most recent tax year and that: (a) does not operate ten or more locations within the state; and (b) is not operated pursuant to a franchise agreement may request from the department, in a manner and form established by the department, a financial hardship waiver of the requirements of section 27-3003 of this title. Such waiver request may apply to one or more disposable food service containers sold, offered for sale, or distributed by any such covered food service provider. The department shall grant a waiver if such covered food service provider demonstrates that there is no alternative product of comparable cost that is not composed of expanded polystyrene foam and that the purchase or use of an alternative product that is not composed of expanded polystyrene foam would create an undue financial hardship. Such financial hardship waiver shall be valid for twelve months and shall be renewable upon application to the department.

§ 27-3007. Preemption.

1. Except as provided in subdivisions two and three of this section, this title shall supersede and preempt all local laws, ordinances or regulations governing the sale, offer for sale, or distribution of disposable food service containers or containers designed or intended to be used for cold storage containing expanded polystyrene foam and polystyrene loose fill packaging.

2. Any local law, ordinance or regulation of any county shall not be preempted if such local law, ordinance or regulation provides environmental protection equal to or greater than the provisions of this title or any rules or regulations promulgated hereunder, and such county files with the department a written declaration of its intent to administer and enforce such local law, ordinance or regulation.

3. This title shall not apply in a city with a population of one million or more which has a local law, ordinance or regulation in place which restricts the sale, offer for sale, or distribution of expanded polystyrene containers and polystyrene loose fill packaging.

§ 27-3009. Severability.

If any clause, sentence, paragraph, section or part of this title shall be adjudged by any court of competent jurisdiction to be invalid, such judgment shall not affect, impair or invalidate the remainder thereof, but shall be confined in its operation to the clause, sentence, paragraph, section or part thereof directly involved in the controversy in which such judgment shall have been rendered.

TITLE 31

CONSTRUCTION AND DEMOLITION DEBRIS

Section 27-3101. Waste tracking documents.

§ 27-3101. Waste tracking documents.

1. All generators in a city with a population of one million or more that generate construction and demolition debris, as defined in section 71-2702 of this chapter, shall provide waste transporters with a waste tracking document for each construction and demolition debris shipment, in a form prescribed or approved by the department, specifying the quantity and type of construction and demolition debris, and signed and dated by an authorized representative of the generator and with a certification in a form prescribed by the department, which shall contain a certification by the generator that the information therein is true, accurate and complete.

2. All transporters of construction and demolition debris generated in a city with a population of one million or more shall:

(a) not accept a shipment of debris that does not match the quantity or type listed on the debris tracking document;

(b) have the debris tracking document signed by the receiving location or facility upon delivery of the solid debris and provide a copy of the tracking document to the receiving location or facility.

3. Failure to maintain such tracking documents is a class A misdemeanor.

TITLE 32

SMALL PLASTIC BOTTLE HOSPITALITY PERSONAL CARE PRODUCT RESTRICTIONS

Section 27-3201. Definitions.

27-3203. Small plastic bottle hospitality personal care products.

27-3205. Violations.

27-3207. Preemption of local law.

§ 27-3201. Definitions.

As used in this title:

1. "Hotel" means a building or portion of a building which is regularly used and kept open as such for the lodging of guests. Hotel includes an apartment hotel, a motel or a boarding house, whether or not meals are served.

2. "Hospitality personal care product" means a product provided by a hotel and intended to be applied to or used on the human body or any part thereof for cleansing, conditioning, or moisturizing. Hospitality personal care product includes, but is not limited to, shampoo, conditioner, lotion, and liquid soap.

3. "Small plastic bottle" means a plastic container with less than a twelve ounce capacity that is intended to be non-reusable by the end user.

§ 27-3203. Small plastic bottle hospitality personal care products.

Effective January first, two thousand twenty-five for all hotels with fifty rooms or more and January first, two thousand twenty-six for all hotels with less than fifty rooms, a hotel shall not provide any small plastic bottle containing a hospitality personal care product.

§ 27-3205. Violations.

1. A hotel that violates a provision of this title shall receive a warning notice for the first such violation, detailing the hotel's requirement to correct the violation within thirty days from the date the notice is sent. A hotel shall be liable to the state for a civil penalty of two hundred fifty dollars for the first violation after receiving a warning and failing to correct the violation within thirty days and five hundred dollars for any subsequent violation in the same calendar year. A hearing or opportunity to be heard shall be provided

prior to the assessment of any civil penalty.

2. The department is hereby authorized to enforce the provisions of this title and all monies collected shall be deposited to the credit of the environmental protection fund established pursuant to section ninety-two-s of the state finance law.

§ 27-3207. Preemption of local law.

Jurisdiction in all matters pertaining to restrictions on the provision of small plastic bottle hospitality personal care products is vested exclusively in the state.

TITLE 33

EXTENDED PRODUCER RESPONSIBILITY FOR CARPET

Section 27-3301. Definitions.

27-3303. Producer plan.

27-3305. Producer responsibilities.

27-3307. Retailer requirements.

27-3309. Department responsibilities.

27-3311. Carpet stewardship advisory board.

27-3313. Labeling and design requirements.

27-3315. Post-consumer content requirements.

27-3317. Penalties.

27-3319. Limits on liability for antitrust, restraint of trade,
or unfair trade practices.

27-3321. Rules and regulations.

§ 27-3301. Definitions.

For the purposes of this title, the following terms shall have the following meanings:

1. "Brand" means a name, symbol, word, or mark that attributes the

product to the owner or licensee of the brand as the producer.

2. "Carpet" means a manufactured article that is (a) used by a consumer, (b) affixed or placed on the floor or building walking surface as a decorative or functional building interior or exterior feature, and (c) primarily constructed of a top surface of synthetic or natural face fibers or yarns or tufts attached to a backing system made of synthetic or natural materials. "Carpet" includes, but is not limited to, a commercial or residential broadloom carpet, modular carpet tiles, artificial turf, a pad or underlayment used in conjunction with a carpet. "Carpet" does not include handmade rugs, area rugs, or mats.

3. "Closed loop recycling" means recycling in which materials that are reclaimed are returned to the original process or processes in which they were generated and they are reused in the production process.

3-a. "Carpet collection program" or "program" means a program financed and implemented by producers, either individually, or through a representative organization, that provides for, but is not limited to, the collection, transportation, reuse, recycling, proper end-of-life management, or an appropriate combination thereof, of discarded carpet.

4. "Collection site" means a permanent location in the state at which discarded carpet may be returned by a consumer. Collection sites shall accept all types of carpet as defined by this title regardless of brand.

5. "Consumer" means a person located in the state who purchases, owns, leases, or uses carpet, including but not limited to an individual, a business, corporation, limited partnership, not-for-profit corporation, the state, a public corporation, public school, school district, private or parochial school, or board of cooperative educational services or governmental entity.

6. "Discarded carpet" means carpet that a consumer has used and disposed of in the state and is no longer used for its manufactured purpose.

7. "Energy recovery" means the process by which all or a portion of solid waste materials are processed or combusted in order to utilize the heat content or other forms of energy derived from such solid waste materials.

8. "Perfluoroalkyl and polyfluoroalkyl substances" or "PFAS substances" means a class of fluorinated organic chemicals containing at least one fully fluorinated carbon atom.

9. "Producer" means any person who manufactures carpet that is sold, offered for sale, or distributed in the state under the manufacturer's own name or brand. "Producer" includes:

(a) the owner of a trademark or brand under which carpet is sold, offered for sale, or distributed in this state, whether or not such trademark or brand is registered in the state; and

(b) any person who imports a carpet into the United States that is sold or offered for sale in the state and that is manufactured by a person who does not have a presence in the United States.

10. "Recycling" means to separate, dismantle or process the materials, components or commodities contained in discarded carpet for the purpose of preparing the materials, components, or commodities for use or reuse in new products or components. "Recycling" does not include: (a) energy recovery or energy generation by any means, including but not limited to, combustion, incineration, pyrolysis, gasification, solvolysis, waste to fuel or any chemical conversion process; or (b) landfill disposal of discarded carpet or discarded product component materials.

11. "Recycling rate" means the percentage of discarded carpet that is managed through recycling or reuse, as defined by this title, and is computed by dividing the amount of recycled output derived from collected carpet, plus any pounds sent for reuse by the estimated total amount of discarded carpet generated during a program year.

12. "Representative organization" means a not-for-profit organization established by a producer or group of producers to implement the carpet collection program.

13. "Retailer" means any person who sells or offers for sale carpet to a consumer in the state.

14. "Reuse" means the return of a product into the economic stream for use in the same kind of application as the product was originally intended to be used, without a change in the product's identity.

15. "Sell" or "sale" means any transfer for consideration of title or the right to use, from a manufacturer or retailer to a person, including, but not limited to, transactions conducted through retail sales outlets, catalogs, mail, the telephone, the internet, or any electronic means; this does not include samples, donations, and reuse.

§ 27-3303. Producer plan.

1. No later than December thirty-first, two thousand twenty-five, a producer, either individually or cooperatively with one or more producers, or a representative organization shall submit to the department for the department's approval a plan for the establishment of a carpet collection program that meets the collection requirements described in this section.

2. A producer may satisfy the carpet collection program requirement of this section by agreeing to participate collectively with other producers. Any such collective carpet collection program shall notify the department.

3. A producer or representative organization shall update the plan, as needed, when there are changes proposed to the current program. A new plan or amendment will be required to be submitted to the department for approval when:

- (a) there is a revision of the program's goals; or
- (b) every three years from the date of approval of a previous plan.

4. The plan submitted by the producer or representative organization

to the department under this section shall, at a minimum:

(a) provide a list of each participating producer and brands covered by the program;

(b) provide information on the products covered by the program;

(c) describe how the producer or representative organization will collect, transport, recycle, and process carpet;

(d) describe how the program will provide for collection of carpet in the state, free of cost and in a manner convenient to consumers and carpet installers, including how the program will achieve, at a minimum, a convenience standard which ensures that all counties of the state and all municipalities which have a population of ten thousand or greater have at least one permanent collection site and one additional permanent collection site for every thirty thousand people located in those areas, that accepts carpet from consumers during normal business hours; however, with respect to a city having a population of one million or more, after consultation with the department of sanitation of such city, the department may otherwise establish an alternative convenience standard. The producer or representative organization may coordinate the program with existing municipal waste collection infrastructure as is mutually agreeable. Convenience standards shall be evaluated by the department periodically and the department may require additional collection locations to ensure adequate consumer convenience;

(e) describe in detail education and outreach efforts to inform consumers, carpet installers and others engaged in the management of discarded carpet about the program including, at a minimum, an internet website and a toll-free telephone number and written information included at the time of sale of carpet that provides sufficient information to allow a consumer to learn how to return such carpet for disposal, recycling or reuse;

(f) describe the methods to be used to reuse or recycle discarded carpet;

(g) describe the methods to be used to manage or dispose of discarded carpet that cannot be recycled or reused;

(h) describe how the program will meet annual performance goals, as determined by the department, provided that at a minimum, the program shall achieve the following recycling rates:

(i) a thirty percent recycling rate for carpets of which ten percent

shall be closed-loop recycling by five years after the plan is approved by the department pursuant to section 27-3309 of this title;

(ii) a fifty percent recycling rate for carpets of which twenty percent shall be closed-loop recycling by ten years after the plan is approved by the department pursuant to section 27-3309 of this title; and

(iii) a seventy-five percent recycling rate for carpets, of which forty percent shall be closed-loop recycling by fifteen years after the plan is approved by the department pursuant to section 27-3309 of this title;

(i) describe what, if any, incentives will be used to encourage retailer participation;

(j) describe the outreach and education methods that will be used to encourage municipal landfill and transfer station participation;

(k) describe the sources of data and methodology for estimating the amount of carpet discarded in the state annually; and

(l) any other information as specified by the department.

§ 27-3305. Producer responsibilities.

1. Beginning not later than July first, two thousand twenty-six, the producer or representative organization shall implement the carpet collection program utilizing collection sites established pursuant to paragraph (d) of subdivision four of section 27-3303 of this title.

2. A producer shall not sell, or offer for sale, carpet to any person in the state unless the producer is implementing or participating under an approved plan.

3. The program shall be free to the consumer, convenient and adequate to serve the needs of consumers in all areas of the state on an ongoing basis.

4. A producer or representative organization shall maintain records demonstrating compliance with the provisions of this title and make them available for audit and inspection by the department for a period of

three years. The department shall make such records available to the public upon request in accordance with the provisions of the state freedom of information law and the regulations promulgated thereunder. Record holders shall submit the records required to comply with the request within sixty working days of written notification by the department of receipt of the request.

5. A producer or representative organization shall be responsible for all costs associated with the implementation of the carpet collection program, including but not limited to the cost of collection. A producer, producers or representative organization shall pay costs incurred by the department in the administration and enforcement of this title. Exclusive of fines and penalties, the department shall only be reimbursed its actual cost of administration and enforcement.

6. Any person who becomes a producer on or after December thirty-first, two thousand twenty-five shall submit a plan to the department, or notify the department that it has joined an existing plan, prior to selling or offering for sale in the state any carpet, and shall comply with the requirements of this title.

7. On or before July first, two thousand twenty-seven, and annually thereafter, a producer or representative organization shall submit a report to the department that includes, for the previous program year, a description of the program, including, but not limited to, the following:

- (a) a detailed description of the methods used to collect, transport, and process carpet in the state, including detailing collection methods made available to consumers and an evaluation of the program's collection convenience;

- (b) identification of all collection sites in the state;

- (c) the weight of all of the producer's carpet collected in the state by method of disposition, including reuse, recycling and other methods of processing or disposal;

- (d) an evaluation of whether the performance goals and recycling rates have been achieved;

- (e) the total cost of implementing the program;

(f) samples of all educational materials provided to consumers and a detailed list of efforts undertaken and an evaluation of the methods used to disseminate such materials including recommendations, if any, for how the educational component of the program can be improved; and

(g) any other information required by the department.

8. On or before January first of each program year following implementation of the plan pursuant to section 27-3303 of this title, each producer, group of producers or representative organization shall submit a report to the department that assesses compliance with performance goals and describes any modifications necessary to achieve such goals.

§ 27-3307. Retailer requirements.

1. Beginning July first, two thousand twenty-six, no retailer may sell or offer for sale carpet in the state unless the producer of such carpet is participating in a carpet collection program. A retailer shall be in compliance with this section if, on the date the carpet was offered for sale, the producer is listed on the department's website as implementing or participating in an approved program or if the carpet brand is listed on the department's website as being included in the program.

2. Any retailer may participate, on a voluntary basis, as a designated collection site pursuant to a carpet collection program and in accordance with all applicable laws and regulations.

§ 27-3309. Department responsibilities.

1. The department shall (a) maintain a list of producers who are implementing or participating pursuant to section 27-3303 of this title, (b) maintain a list of each such producer's brands, and (c) post such lists on the department's website.

2. Beginning July first, two thousand twenty-six, the department shall

post on its website the location of all collection sites identified to the department by the producer in its plans and annual reports.

3. The department shall post on its website each producer plan approved by the department.

4. Within ninety days after receipt of a proposed plan or plan amendment, the department shall approve or reject the plan or the plan amendment. If the plan or plan amendment is approved, the department shall notify the producer or representative organization in writing. If the department rejects the plan or plan amendment, the department shall notify the producer or representative organization in writing stating the reason for rejecting the plan or plan amendment. A producer or representative organization whose plan is rejected shall submit a revised plan to the department within thirty days of receiving a notice of rejection. If the department rejects the subsequent proposal, the producer or producers at issue shall be out of compliance and subject to enforcement provisions.

5. The department shall submit a report regarding the implementation of this title in this state to the governor and legislature by April first, two thousand twenty-seven and every two years thereafter. The report shall include, at a minimum, an evaluation of:

- (a) the stream of carpet in the state;
- (b) disposal, recycling and reuse rates in the state for carpet;
- (c) a discussion of compliance and enforcement related to the requirements of this title; and
- (d) recommendations for any changes to this title.

6. Starting four years after the plan is approved by the department pursuant to this section, the department shall impose a penalty of twenty-five cents per pound to be assessed on the producer or representative organization for the number of additional pounds of carpet that would have needed to be recycled through the program to achieve the performance goals specified in the approved stewardship plan. All penalties collected pursuant to this section shall be paid over to the commissioner for deposit to the environmental protection

fund established pursuant to section ninety-two-s of the state finance law.

§ 27-3311. Carpet stewardship advisory board.

1. There is hereby established within the department the carpet stewardship advisory board to make recommendations to the commissioner regarding producer plans required by this title.

2. The board shall be composed of thirteen voting members. Such members shall include:

- (a) one representative of carpet producers;
- (b) two representatives of carpet retailers;
- (c) one representative of carpet recyclers;
- (d) two representatives of carpet collectors;
- (e) one representative of a company that utilizes discarded carpet to manufacture a new product;
- (f) one representative of a carpet installer association;
- (g) one representative from a statewide environmental organization;
- (h) one representative from a statewide waste disposal association;
- (i) one representative from the New York product stewardship council;
- (j) one representative from a consumer organization; and
- (k) one representative from a statewide recycling organization.

3. The members shall be appointed as follows:

- (a) two members to be appointed by the temporary president of the senate;
 - (b) two members to be appointed by the speaker of the assembly;
 - (c) one member to be appointed by the minority leader of the senate;
 - (d) one member to be appointed by the minority leader of the assembly;
- and
- (e) seven members to be appointed by the executive.

4. Such appointments shall be made no later than the first day of January following the date on which this title takes effect. The members shall designate a chair from among the members by majority vote. Board

members shall receive no compensation but shall be entitled to their necessary and actual expenses incurred in the performance of their board duties.

5. The board shall meet at least biannually by call of the chair.

§ 27-3313. Labeling and design requirements.

1. On and after one year after the plan is approved by the department pursuant to section 27-3309 of this title, carpet sold or offered for sale in the state shall be accompanied by the following identifying information:

- (a) Name of the producer and contact information; and
- (b) Carpet material, composition, and type of construction.

2. On and after December thirty-first, two thousand twenty-six, no carpet sold or offered for sale in the state shall contain or be treated with PFAS substances for any purpose.

§ 27-3315. Post-consumer content requirements.

All carpet sold in the state shall be manufactured with the following minimum amounts from post-consumer sources:

1. within one year after the plan is approved by the department pursuant to section 27-3309 of this title, a minimum of ten percent post-consumer content;

2. within four years thereafter, a minimum of twenty percent post-consumer content; and

3. five years thereafter, a minimum of thirty percent post-consumer content.

§ 27-3317. Penalties.

Any producer, representative organization, or retailer who violates any provision of or fails to perform any duty imposed pursuant to this title shall be liable for a civil penalty not to exceed five hundred dollars for each violation and an additional penalty of not more than five hundred dollars for each day during which such violation continues. Civil penalties shall be assessed by the department after a hearing or opportunity to be heard pursuant to the provisions of section 71-1709 of this chapter.

§ 27-3319. Limits on liability for antitrust, restraint of trade, or unfair trade practices.

1. A producer, representative organization, or retailer shall not be liable for any claim of a violation of antitrust, restraint of trade, or unfair trade practice laws arising from the performance of an action required to be undertaken by this title or which is necessary to implement or participate under a producer plan approved by the department, solely to increase the collection and recycling of carpet, which affects the types and quantities being collected and recycled or the cost and structure of such collection program that the producer, representative organization, or retailer is participating in pursuant to this title.

2. Provided, however, subdivision one of this section shall not apply to any agreement establishing or affecting the price of carpet, except, as necessary, to fulfill producer responsibility under subdivision five of section 27-3305 of this title, the output or production of carpet, or restricting the geographic area or customers to which carpet will be sold.

§ 27-3321. Rules and regulations.

The department is authorized to promulgate any rules and regulations

necessary to implement this title.

ARTICLE 28

POLLUTION PREVENTION

Section 28-0101. Declaration of policy.

28-0103. Declaration of purpose.

28-0105. Definitions.

28-0107. Powers and duties of the department.

28-0109. Small business pollution prevention and environmental compliance assistance program.

28-0111. Pollution prevention and environmental compliance coordinating council.

28-0112. Pollution prevention institute program.

28-0113. Pollution prevention program evaluation.

§ 28-0101. Declaration of policy.

It is declared to be the policy of the state of New York to promote affordable and cost effective methods to reduce energy and resource consumption and reduce or eliminate the use of hazardous substances and the generation of such substances, pollution or waste at the source in order to conserve, improve and protect New York's environment and natural resources; enhance the health, safety and welfare of its citizens; and increase the economic competitiveness of New York businesses.

§ 28-0103. Declaration of purpose.

It is the purpose of this article to:

1. promote pollution prevention as a means for preventing the risks associated with the use and production of hazardous substances, including risks to public health and the environment;

2. promote pollution prevention as a means for reducing energy and resource consumption, and reducing or eliminating the generation of hazardous substances, pollution and waste;

3. promote implementation of affordable and cost effective methods of achieving pollution prevention as means of sustaining and safeguarding the competitive advantage of New York businesses, large and small, and advancing innovation in the reduction of energy and resource consumption and the reduction or elimination of hazardous substances, pollution and waste;

4. promote voluntary implementation of pollution prevention as a means for meeting the requirements of state or federal environmental laws or regulations; and

5. promote coordination and cooperation between all federal, state and local agencies and private organizations administering programs related to pollution prevention, energy consumption, resource consumption, the use and generation of hazardous substances, or the generation of waste or pollution.

§ 28-0105. Definitions.

As used in this article, the following words and phrases shall mean:

1. "Hazardous substance" shall mean any substance listed as a substance hazardous to public health, safety or the environment in regulations promulgated pursuant to article 37 of this chapter.

2. "Local agency" shall mean any local agency, board, district, commission or governing body, including any city, county, or other political subdivision of the state.

3. "Pollution prevention" shall mean changes in production methods, work practices, raw materials or the provision of services that reduce energy or resource consumption, or that reduce, avoid or eliminate the

use of hazardous substances or the generation of such substances, pollutants or waste per unit of product or service provided, so as to reduce risks to public health or the environment, without shifting risks between individuals or environmental media. Such term shall include the redesign, modification, upgrade or replacement of processes, procedures, equipment or technology; reformulation or redesign of products, substitution of inputs or raw materials; improvements in housekeeping, maintenance, training or inventory control; and extended use or reuse of materials through methods integral to the production process or provision of service, such as in-process, closed-loop recycling. Such term shall not include incineration, energy recovery from the combustion of waste, transfer from one medium of release or discharge to another medium, off-site or out-of-production recycling, end-of-pipe treatment, or any practice which alters the physical, chemical or biological characteristics or volume of a hazardous substance, pollutant or solid waste through a process or activity which itself is not integral to and necessary for the production of a product or the providing of a service.

4. "Pollutant" shall mean any substance, contaminant, waste or emission which contributes to pollution.

5. "Solid waste" shall mean a solid waste as such term is defined by subdivision 1 of section 27-0701 of this chapter.

6. "State agency" shall mean any state department, agency, board, public benefit corporation, public authority or commission.

§ 28-0107. Powers and duties of the department.

Consistent with the policy of the state as it is declared in section 28-0101 of this article, the department shall have the power to:

1. Develop, coordinate, implement and measure policies, planning and programs to promote pollution prevention, including but not limited to, technical assistance programs and the identification of alternative compliance approaches that incorporate pollution prevention;

2. Provide education, training, outreach and technical assistance, including on-site technical assistance, to the public regarding pollution prevention, including but not limited to businesses, not-for-profit organizations and state and local agencies;

3. Track, monitor and analyze efforts to achieve pollution prevention and the effects of pollution prevention on the consumption of energy and natural resources; the use of hazardous substances; and the generation of hazardous substances, pollution and waste;

4. Promote the consideration of opportunities for pollution prevention throughout the department's programs, including the provision of information on pollution prevention options, technical information and technical assistance to permit applicants, owners and operators of facilities that are subject to departmental inspections, and to persons who are subject to departmental enforcement actions;

5. Develop policies to facilitate, support and encourage the provision of pollution prevention and compliance assistance, including on-site technical assistance, by all department staff, including regulatory program staff, to businesses, not-for-profit organizations, state and local agencies or other persons who request such assistance, including the adoption of policies to address how the department will respond if violations are identified in the course of providing such assistance;

6. Coordinate pollution prevention outreach and technical assistance with inspection and enforcement efforts, including the targeting of specific sectors for concentrated outreach prior to inspection and enforcement and the establishment of a technical assistance referral system;

7. Provide opportunities for training in pollution prevention to all appropriate department staff on an annual basis;

8. Promote and encourage the adoption of environmental management systems as a way to achieve pollution prevention and continually improve

environmental, economic and management performance across a range of organizations and settings, including state and local agencies, businesses, and not-for-profit organizations;

9. Develop pollution prevention information that can be distributed by other state agencies and public authorities that are involved in the regulation of, or provision of financial assistance to businesses, municipalities and not-for-profit organizations;

10. Coordinate and cooperate with federal, state and local agencies, public and private organizations, and groups administering programs or engaged in activities related to pollution prevention, energy consumption, resource consumption, the use and generation of hazardous substances, or the generation of waste or pollution; and

11. Encourage, support and undertake research, development and technology transfer in support of pollution prevention, and coordinate and cooperate with federal, state and local agencies, businesses and business associations, public and private organizations, and groups engaged in pollution prevention research, development and technology transfer, including educational, civic and research organizations, colleges, universities, institutes or foundations.

§ 28-0109. Small business pollution prevention and environmental compliance assistance program.

1. The commissioner is hereby authorized and directed to establish, develop and implement a small business pollution prevention and environmental compliance assistance program. The purpose of such program shall be to:

a. assist eligible businesses to achieve pollution prevention and improved environmental performance;

b. assist eligible businesses to comply with the provisions of and rules adopted pursuant to this chapter; and

c. support all environmental and regulatory programs carried out pursuant to this chapter, including permitting, facility inspection and enforcement activities. For the purposes of this section, "eligible business" shall mean a small to medium-sized business, not-for-profit organization or municipality which employs less than five hundred persons on a full-time basis.

2. The commissioner, after providing notice and opportunity for public hearing, may exclude from the small business pollution prevention and environmental compliance assistance program any category of regulated entity that the commissioner determines to have sufficient technical and financial capabilities to meet the requirements of this chapter without such assistance. The department may designate eligibility for assistance based on whether an eligible business has sufficient technical and financial capabilities to comply with federal and state law without such assistance. Such determination or designation shall be based on criteria formally adopted by the department as guidance or regulation therefor. Such program shall include:

a. the development, collection and coordination of information concerning pollution prevention and compliance methods, and programs to encourage lawful cooperation among eligible businesses and other persons to further comply with the provisions of this chapter;

b. adequate mechanisms for assisting eligible businesses with pollution prevention, environmental compliance and accidental release detection and prevention, including providing information concerning alternative technologies, process changes, and products and methods of operation that help to achieve pollution prevention;

c. the provision of assistance for eligible businesses in:

- (i) determining applicable requirements of this chapter and rules and regulations promulgated pursuant thereto,
- (ii) submitting complete permit applications, and
- (iii) receiving permits issued by the department in a timely and efficient manner;

d. adequate mechanisms for referring eligible businesses to qualified auditors, or to the extent possible, offering eligible businesses and responding to requests from eligible businesses for audits of the operations of such businesses to determine compliance with this chapter and rules and regulations promulgated pursuant thereto;

e. procedures for offering eligible businesses and responding to requests from eligible businesses for technical, pollution prevention and environmental compliance assistance including, but not limited to:

(i) on-site technical assistance and consultations regarding the identification and implementation of opportunities to achieve pollution prevention or enhance compliance, including the adoption of comprehensive pollution prevention plans or environmental management systems;

(ii) assistance in the modification of any work practice and the identification of affordable and cost effective alternative technologies or technological improvements to achieve pollution prevention or to achieve compliance with or to establish compliance procedures pursuant to this chapter and rules and regulations promulgated pursuant thereto; and

(iii) the establishment of a schedule of milestones for implementing such work practice or method of pollution prevention or compliance preceding any applicable compliance date, based on the technology and financial capability of such eligible business. No modification shall be recommended unless it is in compliance with the applicable requirements of environmental laws;

f. procedures for soliciting input from and exchanging information with the small business pollution prevention and environmental compliance ombudsman program created pursuant to section 138 of the economic development law, regarding pollution prevention opportunities and compliance requirements for small businesses;

g. adequate mechanisms for the collection and dissemination of information to eligible businesses, including the development of guidance manuals and the establishment of a toll-free telephone number

dedicated to answering questions involving pollution prevention and small business compliance;

h. procedures for assuring the confidentiality of information received from eligible businesses;

i. the identification of individuals, firms and/or state and local agencies with a distinctive competence in areas related to pollution prevention and compliance with environmental laws, rules and regulations, and a demonstrated ability to serve eligible businesses, for the purpose of referring eligible businesses with identified needs to consultants or agencies with relevant expertise; and

j. the provision of information on state-sponsored programs offering financial or technical assistance and on funding available from private lenders to eligible businesses, and of aid to such businesses in applying for financial assistance or funding.

3. In developing and implementing the small business pollution prevention and environmental compliance assistance program, the department shall consult with the pollution prevention and environmental compliance coordinating council as created pursuant to section 28-0111 of this article, the environmental facilities corporation, the small business pollution prevention and environmental compliance ombudsman program as created pursuant to section 138 of the economic development law and the office of waste prevention services as created pursuant to article 14 of the economic development law.

§ 28-0111. Pollution prevention and environmental compliance coordinating council.

1. There is hereby established a pollution prevention and environmental compliance coordinating council which shall:

a. provide guidance to the department on the development and implementation of pollution prevention programs, including the small

business pollution prevention and environmental compliance assistance program and the identification of alternative compliance approaches that incorporate pollution prevention;

b. coordinate the activities of the department, the environmental facilities corporation, the department of economic development, the New York state energy research and development authority and the New York foundation for science, technology and innovation to promote pollution prevention and environmental compliance;

c. make periodic reports to the governor and the legislature concerning the effectiveness of pollution prevention programs, including the adequacy of funding available, and difficulties encountered; and

d. make recommendations for the development of programs to further promote pollution prevention and assist small businesses, including technical and financial assistance programs.

2. The pollution prevention and environmental compliance coordinating council shall include the commissioner, the president of the environmental facilities corporation, the commissioner of economic development, the chairperson of the New York state energy research and development authority, and the executive director of the New York foundation for science, technology and innovation; or their designees. The council shall consult with representatives of businesses; organizations whose prime function is the enhancement of the environmental quality of the state; municipalities, not-for-profit organizations and private contractors which provide pollution prevention and compliance assistance; and any other parties the coordinating council deems appropriate.

3. The coordinating council shall meet at least quarterly and shall designate one of its members to serve as chairperson and one of its members to serve as secretary for the development and dissemination of reports and advisory opinions. For the first year of its existence, the coordinating council shall designate the commissioner or his or her designee to serve as chairperson.

§ 28-0112. Pollution prevention institute program.

1. There is hereby established the New York state pollution prevention institute program. The "pollution prevention institute" shall mean an institute whose mission is to promote one or more of the purposes of section 28-0103 of this article through research, development, technology demonstration, technology transfer, education, outreach, recognition and training programs in a manner consistent with the definition of pollution prevention and the principles of pollution prevention established by this article, including but not limited to green chemistry and reuse and remanufacturing.

2. The commissioner is hereby directed to award, on a competitive basis, within amounts appropriated, after consultation with the pollution prevention and environmental compliance coordinating council, state assistance payments to one public or private university or non-profit institution, or more as part of a consortium, to establish, operate and maintain a pollution prevention institute in New York state consistent with the principles established by this article.

§ 28-0113. Pollution prevention program evaluation.

Within thirty-six months after the effective date of this article, the department shall, in coordination with the environmental facilities corporation and the department of economic development, prepare and submit to the governor and the legislature a report evaluating the programs proposed, adopted or implemented pursuant to this article. The evaluation shall include:

1. an identification of the specific measures taken to develop and implement such programs;

2. an evaluation of the resources available to implement such programs and whether those resources are sufficient; and

3. an analysis of the adequacy of measures taken to assist small businesses in achieving pollution prevention and complying with this chapter.

ARTICLE 29

LOW-LEVEL RADIOACTIVE WASTE FACILITIES

TITLE 1. Siting.

3. Commission for siting low-level radioactive waste disposal facilities
5. Advisory committee on permanent disposal facilities siting and disposal method selection
7. Financial assurance

TITLE 1

SITING

Section 29-0101. Definitions.

29-0103. Siting criteria for permanent disposal facilities.

29-0105. Certification of site and disposal method selection.

§ 29-0101. Definitions.

For the purposes of this article:

1. "Low-level radioactive waste" means radioactive material that:

a. is not high-level radioactive waste, transuranic waste, spent nuclear fuel, or the tailings or wastes produced by the extraction or concentration of uranium or thorium from any ore processed primarily for its source material content; and

b. the United States nuclear regulatory commission, consistent with federal law and in accordance with paragraph a of this subdivision, classifies as low-level radioactive waste.

2. "Low-level radioactive waste management facilities" means facilities authorized pursuant to section eighteen hundred fifty-four-c of the public authorities law for permanent disposal of low-level radioactive waste and any associated facilities for treatment and handling of such waste, including, but not limited, to facilities for purposes of stabilization, volume reduction, or protection of health and safety of workers or members of the public from potential exposure to hazards.

3. "Permanent disposal facilities" means low-level radioactive waste management facilities for permanent disposal of low-level radioactive waste generated within the state of New York, other than such waste which is a federal responsibility pursuant to the provisions of federal law pertaining to state and federal responsibilities for disposal of low-level radioactive waste.

4. "Shallow land burial" means emplacement of low-level radioactive waste in or within the upper thirty meters of the surface of the earth in trenches, holes, or other excavations in which only soil provides structural integrity, a barrier to migration of low-level radioactive waste from or subsurface water into such excavation, or a barrier to entry of surface water to such excavation or in a manner that fails to allow during the institutional control period for monitoring and control of releases of radioactivity.

5. "State agency" means any office, department, board, commission, bureau, division, council, authority, corporation, agency, or instrumentality of the state.

6. "Commission" means the commission for siting low-level radioactive waste disposal facilities created pursuant to section 29-0301 of this article.

§ 29-0103. Siting criteria for permanent disposal facilities.

1. No later than July thirty-first, nineteen hundred eighty-seven, the department shall publish draft regulations which specify the criteria for siting permanent disposal facilities and shall promulgate final regulations no later than December thirty-first, nineteen hundred eighty-seven. Such regulations shall be specific to the types of disposal methods which may be employed at a permanent disposal site and shall include criteria for:

- a. above ground, engineered, monitored disposal;
- b. underground mined repository disposal; and
- c. where practicable, other disposal methods for which there are applicable regulations but in no event including shallow land burial.

Such regulations shall specify the minimum characteristics a disposal site and a disposal method must have under existing federal and state law to be acceptable for use for permanent disposal facilities.

2. The department shall hold hearings on the proposed siting criteria regulations.

3. In adopting the siting criteria regulations the department shall not be subject to the requirements of sections two hundred two-a, two hundred two-b and two hundred two-c of the state administrative procedure act.

§ 29-0105. Certification of site and disposal method selection.

1. Upon application by the commission, the department shall certify that the commission's selection of the site or sites and disposal method or methods pursuant to section 29-0305 of this article is in conformance with the applicable siting criteria promulgated pursuant to section 29-0103 of this title; shall certify that, with modifications proposed by the department, the selection would be in conformance with the applicable siting criteria; or shall refuse to certify such selection

and shall specify the manner in which such selection fails to meet the applicable siting criteria. Such certification or refusal to certify shall be based upon the record. The department shall hold public hearings with respect to the draft environmental impact statement and with respect to the application for certification. Such hearings and such certification or refusal to certify shall be completed within one hundred eighty days of the commission's submission of a complete application for certification.

2. The department shall publish in the state register notice of its decision on the application for certification of the site and disposal method selection.

3. The department's decision on the application for certification of the site and disposal method selection and the accompanying final environmental impact statement shall be submitted by the department to the governor, the legislature, and the chairman of the New York state energy research and development authority. In addition to any other information otherwise required for a final environmental impact statement, such statement shall include:

a. copies of the minutes of the public hearing held on the draft environmental impact statement on siting and disposal method selection and of recommendations from the advisory committee established pursuant to section 29-0501 of this article, and the department's responses to the views, comments, information, and recommendations therein; and

b. a listing providing a brief description, identification, or reference for each report, study, or other document relied upon by the department for information supporting its analyses or conclusions.

* TITLE 3

COMMISSION FOR SITING LOW-LEVEL RADIOACTIVE WASTE DISPOSAL FACILITIES

Section 29-0301. Appointment of the commission.

29-0303. Duties of the commission.

29-0305. Operation of the commission.

29-0307. Cooperation with other agencies.

29-0309. Tenure of the commission.

* NB Commission existence pursuant to § 29-0309

*** § 29-0301. Appointment of the commission.**

1. There is hereby created a commission for siting low-level radioactive waste disposal facilities. The commission shall consist of seven members appointed by the governor whose appointment shall be effective when issued. The members of the commission, to the extent practicable, shall be competent and knowledgeable concerning low-level radioactive waste and shall be qualified as follows:

a. a geologist;

b. a medical doctor;

c. a health physicist;

d. a professional engineer;

e. a social scientist;

f. an environmentalist who represents a non-profit environmental organization;

g. a private citizen who shall be designated to act as chairperson.

2. The chairperson shall appoint an executive director to the commission.

3. In the event of resignation of one of the commission members, the governor shall appoint a replacement. Each member shall receive the sum of two hundred dollars for each day in which the member is actually and primarily engaged in the performance of the duties specified herein plus actual and necessary expenses incurred by such member in the performance

of such duties.

4. The members of the commission, the executive director and any employees of the commission shall be considered public officers for purposes of the public officers law.

5. Four of the seven members of the commission shall constitute a quorum for the transaction of business of the commission and the decision of four members of the commission shall constitute action of the commission; provided, however, that no application for certification pursuant to section 29-0105 of this article shall be made except upon the affirmative vote of four or more members of the commission.

* NB Commission existence pursuant to § 29-0309

*** § 29-0303. Duties of the commission.**

1. The commission shall immediately commence the preparation of a siting and disposal method selection which shall, upon certification by the department, be the site or sites and method or methods for permanent disposal facilities which shall be constructed or operated by the energy research and development authority pursuant to section eighteen hundred fifty-four-c of the public authorities law.

2. The commission shall evaluate all reasonable alternative disposal methods including but not limited to deep vertical shaft mined disposal and above ground monitored retrievable disposal and issue a report providing full documentation of its evaluation of all disposal methods it has considered, and selecting and justifying a tentative preferred disposal method and any method-specific site selection criteria. After opportunity for review and comment by the citizen advisory committee and an independent technical and scientific evaluation panel established pursuant to subdivision eleven of this section, the commission shall issue a report and draft a generic, non-site specific, environmental impact statement selecting and justifying a preferred disposal method and any related method-specific site selection criteria. The commission shall select as its preferred disposal method that method which is

projected best to meet applicable regulatory criteria and performance objectives and maintain exposure to the general public as low as reasonably achievable, taking into account engineering and economic feasibility compared to other available disposal methods. The preferred disposal method and accompanying draft generic environmental impact statement shall be submitted to the department as an application for decision. The standards and procedures by which the department shall administer the commission's application are set forth in subdivision four of section 70-0117 of this chapter and implementing regulations. Consistent with the department's decision on preferred disposal method or methods, the commission shall proceed to select the site or sites for permanent disposal facilities in accordance with subdivisions five through eight of this section.

3. The commission shall issue a report concerning all lands excluded from consideration for siting permanent disposal facilities, which report shall include information sufficient to permit full independent review and evaluation by the citizen advisory committee and by an independent technical and scientific evaluation panel, established pursuant to subdivision eleven of this section, of the basis for such exclusion.

4. The commission shall also make available for full independent review and evaluation by the citizen advisory committee and by an independent technical and scientific evaluation panel, established pursuant to subdivision eleven of this section, the reports and other documents which serve as the basis for or otherwise provide its detailed explanation or justification for its decisions made prior to September first, nineteen hundred eighty-nine, to select or narrow the range of alternatives it was considering for sites for permanent disposal facilities.

5. Upon completing the preparation of its site and final disposal method selection, the commission shall submit its application for certification of this selection by the department pursuant to section 29-0105 of this article. The commission shall simultaneously deliver a copy of its draft environmental impact statement and application to the

governor, the legislature, the chairman of the energy research and development authority, the citizen advisory committee and the county government of each county within which was located any portion of a site for which the commission conducted detailed characterization studies.

6. The site and disposal method selection and the application for certification, together with the department's certification thereof, shall be considered a single action for purposes of article eight of this chapter and judicial review. The commission shall prepare a draft environmental impact statement to accompany its application for certification, the scope of which must be approved by the department. For purposes of satisfying the requirements of article eight of this chapter, the department shall be the lead agency. The commission shall recommend a site specific mitigation program as part of the environmental impact statement that will serve as an additional measure to offset adverse economic, social, and environmental impacts and serve as a form of compensation to the affected area.

7. The commission's site and disposal method selection shall identify a site or sites and appropriate disposal method or methods for permanent disposal facilities. Such site or sites shall not include the western New York nuclear service center. The commission shall take into account the following factors in the selection of the permanent disposal facility site or sites and disposal method or methods:

a. the nature and probability of the impacts on public health and safety, including predictable adverse effects from:

(i) accidents during transportation of low-level radioactive waste to such facilities;

(ii) contamination of ground or surface water by leaching and runoff from such facilities; and

(iii) fires or explosions from improper storage or disposal of volatile, combustible, or potentially explosive materials, if any, which may compose a portion of the low-level radioactive waste to be delivered to such facilities;

b. the nature of the probable environmental impacts, including the

predictable adverse effects on the natural environment and ecology, scenic, historic, agricultural, cultural, and recreational values, water and air quality, and wildlife;

c. the potential for avoidance or mitigation of harm from the unanticipated release of low-level radioactive waste or contaminated materials;

d. the ability for retrieval or recovery of such waste;

e. differences in the density of population in the vicinity of the potential sites;

f. the adequacy of routes and means for transportation of low-level radioactive waste to such facilities;

g. the nature of the probable impact of such facilities on local governmental units within which such facilities would be located; and

h. the comparative economic implications, including those resulting from engineering considerations, of the potential site or sites and disposal methods for such facilities.

8. The commission shall select one site for a permanent disposal facility after consideration of all relevant public health and safety, environmental and economic factors, provided, however, that an additional site may be selected if the commission finds that the use of an additional site presents specific advantages with respect to such factors. To the extent the commission determines that different disposal methods are appropriate for different categories of low-level radioactive waste with differing physical or chemical characteristics, the commission may select more than one disposal method to be utilized at each particular site, specifying the particular disposal methods to be utilized at such site for particular categories of such waste; provided that utilization of the disposal methods selected at the site selected shall be capable of meeting or exceeding applicable requirements of state and federal regulations. The site or sites

selected shall be of sufficient capacity to provide for disposal, using the selected disposal methods, of all low-level radioactive waste estimated by the commission to be generated in New York and to require disposal at low-level radioactive waste management facilities for a period of at least thirty years.

9. In performing its duties, the commission shall hold periodic meetings which shall be publicly noticed pursuant to article seven of the public officers law.

10. Whenever the commission makes a decision to:

(i) select, or narrow the range of alternatives it is considering for, disposal methods or sites for permanent disposal facilities,

(ii) establish the plans for pre-characterizing or characterizing, or otherwise gathering site-specific data for, candidate sites for permanent disposal facilities, or

(iii) project the types, quantities, or activity levels of low-level radioactive wastes which might be disposed of at permanent disposal facilities,

it shall promptly issue a report or other document which serves as the basis for or otherwise provides its detailed explanation or justification for that decision. Such report or other document shall include information sufficient to permit full independent review and evaluation by the department, the citizen advisory committee and by an independent technical and scientific evaluation panel, established pursuant to subdivision eleven of this section, of the nature, sources, and quality of any specific data relied upon, the nature of assumptions made, and the specific analytical methods, procedures, or techniques employed, including modelling and calculations performed, and any other information and analyses upon which the commission would intend to rely in justifying its decisions to any reviewing body. The report shall be made available to the public upon request. The commission shall simultaneously have published in the state register, and send to any person who has requested to be placed on the commission's mailing list, notice of availability of that report or other document and provide a copy of the report or other document to the governor, the speaker of the assembly, the majority leader of the senate, the minority leader of the

assembly, the minority leader of the senate, the citizen advisory committee, and any independent technical and scientific evaluation panel established pursuant to subdivision eleven of this section.

11. Pursuant to contract, the department of health shall arrange to have one or more independent panels of technical and scientific experts review and evaluate the commission's decision and report on its selection of a tentative preferred disposal method and decisions and report on lands excluded from consideration for siting permanent disposal facilities, issued in accordance with subdivisions two and three of this section, and each other decision made and related report issued by the commission pursuant to subdivision four or ten of this section. For each such commission decision and report, the independent technical and scientific evaluation panel or panels shall assess the nature, sources and quality of any specific data the commission relied upon, the nature of assumptions made, and the specific analytical methods, procedures or techniques employed, including modelling and calculations performed, and any other information and analyses relied upon for the commission's decision. The department of health may engage more than one panel to assess a commission decision and report, in order to provide for complete coverage of those matters in the review and evaluation of that decision and report. Upon completion of each such review and evaluation, any independent technical and scientific evaluation panel shall provide a written report containing its findings, conclusions and recommendations to the commission, the citizen advisory committee, the department of health and the department of environmental conservation.

12. Whenever the commission receives written comments or a report from the citizen advisory committee or any independent technical and scientific evaluation panel established pursuant to subdivision eleven of this section, it shall provide a detailed written response, within a reasonable time, addressing the points made in the comments or report. Upon receipt of any such report the commission shall cause it to be made available to the public upon request and submitted to the governor, the majority leader of the senate, the speaker of the assembly, the minority leader of the senate and the minority leader of the assembly. Notice of

such report shall be published by the commission in the state register and sent to any person who has requested to be placed on the commission's mailing list.

* NB Commission existence pursuant to § 29-0309

*** § 29-0305. Operation of the commission.**

1. The commission may hire or contract with such persons as it deems necessary, convenient, or desirable to carry out its duties pursuant to this title.

2. Officers and employees of the commission shall be appointed in accordance with civil service rules; provided, however, that officers and employees of state departments and agencies may be transferred to the commission without examination and without loss of any civil service status or rights. Each employee who is transferred pursuant to this subdivision is deemed to be on leave of absence from his or her former position during the tenure of the commission. No such transfer may, however, be made except with the approval of the head of the state department or agency involved, the director of the budget and the chairman of the commission, and in compliance with the rules and regulations of the civil service commission of the state.

3. After the department has approved, pursuant to subdivision 2 of section 29-0303 of this title, a preferred disposal method, the commission, its employees, agents, consultants, or contractors may, after proper notification and identification, enter at reasonable times upon such lands, waters or premises as in the judgment of the commission may be necessary, convenient, or desirable for the purpose of making surveys, soundings, borings, and examinations to accomplish any purposes authorized by this title, the commission being liable for actual damage done. Each such entry shall be commenced and completed with reasonable promptness. If the officer or employee obtains any samples prior to his leaving the premises, he shall give to the owner, operator, or agent in charge a receipt describing the sample obtained and, if requested, a portion of each such sample equal in volume or weight to the portion

retained. If any analysis is made of such samples, a copy of the results of such analysis shall be furnished promptly to the owner, operator, or agent in charge.

4. The commission shall require all computerized data generated by its staff and contractors, when obtainable by the public pursuant to article six of the public officers law, to be made available in a format that is accessible for general use.

* NB Commission existence pursuant to § 29-0309

*** § 29-0307. Cooperation with other agencies.**

1. All agencies and authorities of the state, municipalities, and political subdivisions of the state are hereby directed to cooperate with the commission in order to facilitate and expedite the responsibilities and duties of the commission. To the extent practicable and not otherwise inconsistent with law and upon the request of the commission, any agency or authority of the state shall provide copies of existing studies, surveys, plans, data, and other materials in its possession to the commission.

2. The commission shall assure that the advisory committee appointed pursuant to section 29-0501 of this article has a timely opportunity to provide information and recommendations to the commission on all aspects of its activities pursuant to section 29-0303 of this title.

3. In consultation and cooperation with the advisory committee established pursuant to section 29-0501 of this article, the commission shall keep the public informed of its activities in developing the draft environmental impact statement required by section 29-0303 of this title and encourage the public to participate by providing views, comments, information, and analysis concerning siting and disposal method selection for permanent disposal facilities.

4. The department of audit and control and the department of law are hereby directed to expedite the processing of all contracts associated

with carrying out the provisions of this section.

* NB Commission existence pursuant to § 29-0309

*** § 29-0309. Tenure of the commission.**

The commission shall continue in existence only until final judicial review of the department's certification of the commission's selection pursuant to section 29-0105 of this article.

* NB Commission existence pursuant to this section.

TITLE 5

**ADVISORY COMMITTEE ON PERMANENT DISPOSAL FACILITIES SITING
AND DISPOSAL METHOD SELECTION**

Section 29-0501. Citizen advisory committee on permanent disposal facilities siting and disposal method selection.

29-0503. State agency actions on licenses, permits, or approvals for low-level radioactive waste management facilities.

29-0505. General provisions on environmental review and judicial review.

29-0507. State licenses, permits, and other approvals exclusive.

29-0509. Aid to local governments.

§ 29-0501. Citizen advisory committee on permanent disposal facilities siting and disposal method selection.

1. A citizen advisory committee on siting and disposal method selection for permanent disposal facilities is hereby established independent of the commission and shall continue in existence until the department has issued its final environmental impact statement pursuant to section 29-0105 of this article. The members shall be appointed by the governor and shall consist of: two representatives of non-profit environmental organizations; two health physicists or medical doctors knowledgeable of radiation health effects; two representatives of

low-level radioactive waste generators in New York; a private citizen residing in New York who is technically competent and knowledgeable concerning low-level radioactive waste; four private citizens, residing in New York who are knowledgeable concerning low-level radioactive waste, of whom one shall be knowledgeable and experienced in agricultural production and one in local public health services; and one elected local government representative of each county in which a candidate site has been identified, which county shall be represented until such time as no candidate site is being considered therein and, upon issuance of the commission's draft environmental impact statement pursuant to subdivision six of section 29-0303 of this article, three private citizens from the county within which each proposed site is primarily located. The governor shall designate the chairman from among the members of the committee. No member shall receive any compensation, but shall be entitled to reimbursement for actual and necessary expenses in performing the duties of the citizen advisory committee.

2. The citizen advisory committee shall:

a. meet at least bi-monthly to provide information and review activities of the commission and the department pursuant to sections 29-0103, 29-0105, 29-0303 and 29-0509 of this article and to receive a written report from the commission, the department and the energy research and development authority on plans and progress in carrying out activities and duties pursuant to the low-level radioactive waste management act. In particular, the citizen advisory committee shall provide information and recommendations in response to the commission's draft environmental impact statements prepared pursuant to section 29-0303 of this article, including reviewing public views, comments, and information submitted in response thereto;

b. review and comment semi-annually on the commission's plans and schedule for carrying out the provisions of section 29-0303 of this article;

c. have minutes taken of each meeting of the citizen advisory committee and make them available to the public within ten working days

from the date of the meeting, and a video or audio record of any meeting sponsored by the committee shall be kept, copies of which shall be made available at the actual cost of reproduction;

d. consult with and advise the commissioner of health in planning and carrying out a public information and education program on low-level radioactive waste pursuant to the provisions of article twenty-four-C of the public health law;

e. hire an executive director, and clerical support, and may contract for necessary specialized services;

f. facilitate the public review and comment process and issue reports containing the committee's comments and recommendations concerning:

(i) the candidate disposal method selection process;

(ii) the site selection process, including previously excluded lands and voluntary sites;

(iii) site characterization;

(iv) the process for matching the site with the preferred disposal method;

(v) the draft environmental impact statement; and

(vi) the manner in which the commission carries out its responsibilities to keep the public informed of its activities;

g. make copies of its reports available to the public upon request and submit copies to the governor, the majority leader of the senate, the speaker of the assembly, the minority leader of the senate and the minority leader of the assembly; and

h. exercise and perform such other advisory functions related to the commission's or the department's activities conducted pursuant to sections 29-0103, 29-0105, 29-0303 and 29-0509 of this article as the chairman of the commission or commissioner of environmental conservation may request.

3. The department of health shall provide such administrative support services to the citizen advisory committee as may be determined

reasonable for the proper execution of the committee's responsibilities.

4. All agencies and authorities of the state are hereby directed to cooperate with the citizen advisory committee in order to facilitate and expedite the responsibilities and duties of the committee.

§ 29-0503. State agency actions on licenses, permits, or approvals for low-level radioactive waste management facilities.

1. With respect to any particular permanent disposal facilities, all applications for state licenses, permits, or other approvals required for those facilities shall be submitted contemporaneously to the respective state agencies with jurisdiction to grant such licenses, permits, or other approvals; and shall be accompanied by a draft environmental impact statement for those facilities and a list identifying each state license, permit, or other approval for which such applications have been submitted and the jurisdictional state agency for such license, permit, or other approval.

2. Notwithstanding any other provision of law, all applications to a single state agency for required state licenses, permits, or other approvals for particular low-level radioactive waste management facilities shall be consolidated by such state agency and considered in a single proceeding, which shall be completed as expeditiously as possible.

3. All state agencies to which applications for required licenses, permits, or other approvals for particular low-level radioactive waste management facilities have been submitted shall keep each other informed of the procedural status of such applications and the proceedings thereon.

4. With respect to the proceedings on applications for required state licenses, permits, and other approvals for particular low-level radioactive waste management facilities:

a. If any such license, permit, or other approval for the particular low-level radioactive waste management facilities in question is within the jurisdiction of the department, the department shall be the lead agency with respect to environmental review of all applications to state agencies for such licenses, permits, or other approvals.

b. No later than thirty days after submission to the lead agency and other state agencies of such applications, the lead agency and each such other state agency shall give notice to the applicant that such applications within their respective jurisdictions have been determined to be complete or have been determined to be incomplete; provided, however, that when there is a requirement pursuant to federal law for a tentative determination or draft permit to be prepared prior to public notice or hearing, the time within which the agency shall make its determination whether or not the application is complete shall be extended by thirty days. If any such application has been determined to be incomplete, such notice shall include a detailed list of specific deficiencies in such application.

c. No later than sixty days after the lead agency and other jurisdictional state agencies have made their respective determinations that such applications within their respective jurisdictions are complete, the lead agency shall begin public hearings on the draft environmental impact statement and all other matters related to such applications. Any state agency, other than the lead agency, which determines to conduct public hearings with respect to any action or proceeding before it on such applications shall conduct such public hearings jointly with the public hearings conducted by the lead agency with respect to such facilities. The department shall hold an issues conference prior to the commencement of the hearing. At least one hearing shall be held at a reasonably convenient location in the general geographic vicinity of each of the proposed sites.

d. No later than one hundred fifty days after the commencement of such hearings for any low-level radioactive waste management facilities, such hearings and the period for the receipt of any written comments, arguments, or analyses with respect to matters raised in such hearings

shall have been completed.

e. No later than ninety days after completion of such hearings and the period for the receipt of written comments, arguments, or analyses with respect to matters raised in such hearings, the lead agency shall issue a final environmental impact statement related to the applications which were the subject of such hearings. In addition to any other information otherwise required for a final environmental impact statement, such statement shall include:

(i) Copies of the minutes of the public hearings held on the draft environmental impact statement associated with a state agency action on a license, permit, or approval for a low-level radioactive waste management facility, and the department's responses to the views, comments, information and recommendations thereon; and

(ii) A listing providing a brief description, identification, or reference for each report, study, or other document relied upon by the department for information supporting its analyses or conclusions.

f. The lead agency shall keep each other state agency before which any such application is pending informed of the progress of its development of the final environmental impact statement. Immediately upon issuance of the final environmental impact statement, the lead agency shall deliver a copy to each such other state agency. No later than thirty days after the issuance of such final environmental impact statement, the lead agency and each such other state agency shall issue their decisions with respect to such licenses, permits, and other approvals with any reasonable modifications or conditions which the lead agency, and each such other state agency, respectively, finds required in accordance with the provisions of law and regulations applicable to its respective action or proceeding. Each agency shall publish notice in the state register of its decision with respect to such licensing or other approval. Each such decision shall be based upon the administrative record for the respective action or proceeding.

5. In any action or proceeding of the department or any other state agency on any application for a required state license, permit, or other approval for any low-level radioactive waste management facilities,

including any related draft or final environmental impact statement proposed or submitted in connection with such application, the following matters as determined by statute or certified pursuant to section 29-0105 of this article shall not be in issue:

- a. the need for such facilities or the alternative of no action;
- b. the site or sites of such facilities;
- c. for permanent disposal facilities, the disposal methods to be utilized;
- d. the nature or type of facilities as specifically required or authorized by statute; and
- e. the classes of waste which may be stored or disposed of at such facilities.

§ 29-0505. General provisions on environmental review and judicial review.

Notwithstanding any other provision of law:

1. In the event of any inconsistency between the provisions of this article and the provisions of article eight or seventy of this chapter, or regulations issued pursuant thereto, the provisions of this article shall have precedence and apply to the exclusion of such provisions of article eight or seventy of this chapter or the regulations issued pursuant thereto.

2. a. Any person aggrieved by any administrative action or proceeding in connection with the adoption of siting criteria regulations pursuant to section 29-0103 of this article, with a certification or refusal to certify a site or disposal method selection pursuant to section 29-0105 of this article or with the issuance or denial of a required state license, permit, or other approval for low-level radioactive waste management facilities may seek judicial review of such administrative

action or proceeding in accordance with the provisions of this subdivision. Any such special proceeding for judicial review shall be brought in the appellate division of the supreme court of the judicial department embracing the county wherein the site of the facilities is located, or, if the certification or the application for a state license, permit, or other approval is denied, the county wherein the commission or applicant proposed to site or locate the facilities. Such review may be initiated only by the filing of a petition in such court within thirty days after publication in the state register of notice of the administrative action or decision, together with proof of service of a demand on the commission, the department, and other state agencies, as applicable, for the filing with the court of a copy of the administrative record. Upon receipt of such petition and demand, a copy of the administrative record and any decision shall forthwith be delivered by the commission, the department, or other state agency, as applicable, to the court. The petition and any subsequent appeal shall be heard on the administrative record without requirement of reproduction. No objection that has not been urged on the administrative record shall be considered by the court, unless the failure or neglect to urge such objection below shall be excused because the information underlying such objection was unknown at the time of the administrative proceeding or because of other extraordinary circumstances.

b. If such facilities are proposed to be sited or located in more than one judicial department, such proceeding may be brought in any one but only one of such departments. If petitions are filed in more than one court, the court in which a petition was first filed shall retain exclusive jurisdiction of the proceeding, and all other petitions shall be transferred forthwith to said court. Upon motion by any party to the proceeding, or on its own motion, said court may transfer the proceedings to the appellate division in any other judicial department for good cause. The jurisdiction of the appellate division shall be exclusive and its judgment and order shall be final, subject to review by the court of appeals in the same manner and form and with the same effect as provided for appeals in a special proceeding. All such special proceedings shall be heard and determined by the appellate division and by the court of appeals as expeditiously as possible and with precedence

over all other matters except special proceedings under the election law.

c. Except as otherwise provided in this subdivision, article seventy-eight of the civil practice law and rules shall apply to special proceedings and appeals therefrom taken pursuant to this subdivision.

§ 29-0507. State licenses, permits, and other approvals exclusive.

Notwithstanding any other provision of law, no county, city, village, town, or special district, or any agency or instrumentality thereof, may prohibit, or require any license, permit, other approval, or condition related to, the construction or operation of low-level radioactive waste management facilities for which required state licenses, permits, or other approvals have been issued. Nothing in this section shall preclude any county, city, village, town, or special district, or any agency or instrumentality thereof, from requesting, proposing, or advocating imposition of reasonable conditions on the construction or operation of low-level radioactive waste management facilities in any proceeding upon an application for a required state license, permit, or other approval for such facilities.

§ 29-0509. Aid to local governments.

No later than the first day of April, nineteen hundred eighty-seven, the department shall submit to the legislature and the governor a report recommending appropriate forms of state aid to local governmental units within the boundaries of which any low-level radioactive waste management facilities may be located. Such report shall be developed by the department and shall:

1. describe the nature of the probable impacts upon local governmental units, including both impacts normally expected from the presence, construction, operation, maintenance, closure, and post-closure care of such low-level radioactive waste management facilities and impacts which

might result from an emergency or other abnormal or unusual event associated with the operation, maintenance, closure, or post-closure care of such low-level radioactive waste facilities;

2. describe the possible forms or kinds of aid or assistance which might be appropriate to mitigate or provide off-setting benefits with respect to each of the kinds of probable impacts on local governmental units identified pursuant to this section; and

3. set forth the department's specific recommendations to the legislature and the governor for the forms or kinds of state assistance to local governmental units to mitigate or provide off-setting benefits with respect to such impacts, together with the reasons for the department's specific recommendations.

TITLE 7

FINANCIAL ASSURANCE

Section 29-0701. Financial requirements for low-level radioactive waste disposal facilities.

29-0703. Closure and post-closure plans.

§ 29-0701. Financial requirements for low-level radioactive waste disposal facilities.

1. Within eighteen months after the effective date of this section, the commissioner shall promulgate regulations applicable to facilities for the permanent disposal of low-level radioactive waste which identify financial requirements to be included as conditions in permits for facilities for the management of low-level radioactive waste. Such conditions shall provide for the remediation of failures during operation and after facility closure, for facility closure, and for pre-closure and post-closure facility monitoring and maintenance. Such regulations shall:

a. Reflect due consideration of the sizes and locations of affected

facilities, the natures and volume of low-level radioactive waste involved, the types of facilities and the degrees and durations of risk to human health or the environment.

b. Provide for the establishment, administration, terms and conditions of the following methods or instruments to be used as alternatives or in combinations, in order to achieve non-duplicative coverage of the financial assurance requirements mandated by this section:

(i) Trust funds.

(ii) Surety or performance bonds.

(iii) Letters of credit.

(iv) Liability insurance or annuities.

(v) Guarantees provided by corporate or other legal or financial affiliates of the facility owner or operator.

c. Establish the duration of such financial requirements.

2. Any owner or operator of such a facility for the management of low-level radioactive waste may request a modification of any of the financial requirements established pursuant to subdivision one of this section. A modification may be granted in the discretion of the department if such financial requirements are found to be unnecessary or inappropriate, consistent with the public interest and the purposes of this section and supported by written findings setting forth the reasons for the modification. Such a modification request shall be considered a request for modification of the permit for the facility. In no case shall a modification granted pursuant to this subdivision eliminate or reduce the minimum requirements established in subdivision four of this section.

3. In addition to the financial requirements established pursuant to subdivision one of this section, any permits for such facilities for the management of low-level radioactive waste issued by the department may, if it is determined that adequate protection of the public so requires, include conditions related to any or all of the following, including responsibility for the costs thereof:

a. On-site environmental monitors whose function shall be to monitor compliance with permit conditions. The commissioner may promulgate regulations regarding the use of such monitors.

b. Site safety plans whereby the permittee shall establish, with the cooperation of local government officials, a community and project safety plan, including but not limited to an accident response based on a worst-case condition, on-site and off-site, a personnel training program, provisions for coordination with local emergency services and regular training exercises. Any such plan shall be subject to the approval of the department.

4. Any permits for such facilities for the management of low-level radioactive waste issued by the department shall require the owner or operator to provide, at a minimum, one of the methods or instruments of financial assurance provided for in paragraph b of subdivision one of this section. Such methods or instruments shall be designed to insure proper facility closure, based on the estimates approved pursuant to section 29-0703 of this title, and coverage of personal injury and property damage to third parties caused by the operation of such facility. Such methods or instruments shall from time to time be reviewed and updated, pursuant to regulations promulgated by the department, to insure their continued adequacy for the purposes of this section.

§ 29-0703. Closure and post-closure plans.

1. Any permits for such facilities for the management of low-level radioactive waste issued by the department shall require owners and operators of facilities for the permanent disposal of low-level radioactive waste to submit to the department for its approval plans for the closure and post-closure monitoring and maintenance of their facilities. The department may promulgate rules and regulations concerning the contents of such plans. Such plans shall be approved prior to the effective date of the facilities' operating permit.

2. Together with the submission of a plan for closure and post-closure monitoring and maintenance, the owner or operator of such facilities for the permanent disposal of low-level radioactive waste shall submit to the department for approval a written estimate of the costs associated with closure at the estimated point in the facilities' operating life when the extent and manner of their operation would make closure the most expensive, as indicated by the closure plan.

3. The owner or operator shall prepare new closure and post-closure monitoring and maintenance cost estimates whenever a change in the closure and post-closure monitoring and maintenance requirements affects the cost of the closure or post-closure care.

4. One year after the approval of the cost estimates as set forth in subdivision two of this section, and annually thereafter until closure of the facilities, the operator's closure and post-closure monitoring and maintenance estimates shall be adjusted to account for inflation.

5. All estimates made pursuant to this section and revision thereto shall be subject to the review and approval of the department.

6. The methods and instruments of financial assurances for permitted facilities for permanent disposal of low-level radioactive waste shall be periodically reviewed by the department to determine whether they are adequate in light of changed circumstances to insure proper closure and post-closure monitoring and maintenance of such facilities.

ARTICLE 30

DECOMMISSIONING NUCLEAR POWER PLANT DISCHARGES INTO THE HUDSON RIVER

Section 30-0101*. Legislative findings.

30-0103. Unlawful discharges.

* NB Section 30-0101 inadvertently added as 30-101

* § 30-101. Legislative findings.

1. The legislature finds that while the energy and economic output generated by nuclear power plants are beneficial to the state and its residents, discharges into waters of the state of radiological agents from nuclear power plants have various adverse and substantial economic impacts on the state and its residents.

2. The legislature further finds that communities with interests in the Hudson River are concerned with the economic impacts on local real estate values and economic development with respect to the discharge of waste from nuclear power plants into waters of the state during plant decommissioning, which effect is no longer balanced by countervailing economic benefits of the plant to those communities that the plant provided during operation.

3. The legislature further finds that other methods of managing waste from decommissioning nuclear power plants are available and would not result in the same economic impacts.

4. The legislature therefore finds and declares that it is the duty of the state to act to preserve the economic vitality of affected communities.

* NB Section inadvertently added as 30-101 instead of 30-0101

§ 30-0103. Unlawful discharges.

To the extent not subject to preemption by federal law, and notwithstanding any other state or local law, rule, or regulation to the contrary, it shall be unlawful to discharge any radiological substance into the Hudson River in connection with the decommissioning of a nuclear power plant.

12. Pesticide sales and use data base and recordkeeping and reporting
13. Unlawful acts
15. Seizure

TITLE 1 DEFINITIONS

Section 33-0101. Definitions.
33-0103. Exemptions.

§ 33-0101. Definitions.

1. "Active ingredient" means:

a. In the case of a pesticide other than a plant regulator, defoliant or desiccant, an ingredient which will prevent, destroy, repel, or mitigate insects, fungi, rodents, weeds, or other pests.

b. In the case of a plant regulator, an ingredient which, through physiological action, will accelerate or retard the rate of growth or rate of maturation or otherwise alter the behavior of ornamental or crop plants or their produce.

c. In the case of a defoliant, an ingredient which will cause the leaves or foliage to drop from a plant.

d. In the case of a desiccant, an ingredient which will artificially

accelerate the drying of plant tissue.

2. "Adulterated" shall apply to any pesticide if its strength or purity falls below the professed standard or quality as expressed on labeling or under which it is sold, or if any substance has been substituted wholly or in part for the article, or if any valuable constituent of the article has been wholly or in part abstracted.

3. "Affected area" means the area defined in a petition for the protection of a grape growing area.

4. "Agency" means any state agency; municipal corporation; public authority; college, as that term is defined in the education law; railroad, as that term is defined in the railroad law; or telegraph, telephone, telegraph and telephone, pipeline, gas, electric, or gas and electric corporation as those terms are defined in the transportation corporations law, which applies pesticides.

5. "Agricultural commodity" means any plant or part thereof, or animal, or animal product, produced by a person (including farmers, ranchers, vineyardists, plant propagators, Christmas tree growers, aquaculturists, floriculturists, orchardists, foresters or other comparable persons) primarily for sale, consumption, propagation or other use by man or animals.

6. "Aircraft" means any contrivance now known, or hereafter invented, used or designed for navigation of, or flight in, the air.

7. "Antidote" means the most practical immediate treatment in case of poisoning and includes first-aid treatment.

8. "Application of pesticide" means any application of pesticides by aircraft or ground equipment.

9. "Business registration" means the requirement of each person or business providing services of commercial application of pesticides, either entirely or as part of the business, to register with the

department.

10. "Certified applicator" means any individual who is certified to use or supervise the use of any pesticide in any category of use covered by his certification.

11. "Commercial application" means any application of any pesticide except as defined in private or residential application of pesticides.

12. "Defoliant" means any substance or mixture of substances intended for causing the leaves or foliage to drop from a plant, with or without causing abscission.

13. "Degradation" means the decomposition of a compound by stages, exhibiting well-defined intermediate products.

14. "Desiccant" means any substance or mixture of substances intended for artificially accelerating the drying of plant tissue.

15. "Development" means natural and normal growth before harvest.

16. "Experimental use permit" means a permit issued to an applicant for the use of a limited amount of a pesticide not registered pursuant to this article to accumulate data necessary to apply to register the pesticide.

17. "Fungi" means all non-chlorophyll-bearing thallophytes (that is, all non-chlorophyll-bearing plants of a lower order than mosses and liverworts) as, for example, rusts, smuts, mildews, molds, yeast, and bacteria, except those on or in living man or other animals.

18. "Fungicide" means any substance or mixture of substances intended for preventing, destroying, repelling, or mitigating any fungi.

19. "General use pesticide" means a pesticide which does not meet the state criteria for a restricted pesticide as established under authority of section 33-0303 of this article.

20. "Grape grower" means a producer of grapes for profit.

21. "Grape vineyard" means lands upon which grapevines are maintained and harvested for profit.

22. "Ground equipment" means any machine or device (other than aircraft) for use on land or water, designed for, or adaptable to use in applying pesticide as spray, dust, aerosol, fog, or in any other form.

23. "Herbicide" means any substance or mixture of substances intended for preventing, destroying, repelling, or mitigating any weed.

24. "Insect" means any of the numerous small invertebrate animals generally having the body more or less obviously segmented, for the most part belonging to the class Insecta, comprising six-legged, usually winged forms, as, for example, beetles, bugs, bees, flies, and to other allied classes of arthropods whose members are wingless and usually have more than six legs, as, for example, spiders, mites, ticks, centipedes, and wood lice, except those on or in living man. This term shall also include hematodes.

25. "Inert ingredient" means an ingredient which is not an active ingredient.

26. "Ingredient statement" means either:

a. A statement of the name and percentage of each active ingredient, together with the total percentage of the inert ingredients, in the pesticide; and

b. If the pesticide contains arsenic in any form, a statement of the percentage of total and water soluble arsenic, each calculated as elemental arsenic.

27. "Insecticide" means any substance or mixture of substances intended for preventing, destroying, repelling, or mitigating any

insects which may be present in any environment whatsoever, except those on or in living man.

28. "Label" means the written, printed, or graphic matter on, or attached to, the pesticide, or its immediate container and any outside containers or wrappers.

29. "Labeling" means all labels and other written, printed, or graphic matter:

a. Upon the pesticide or any of its containers or wrappers;

b. Accompanying the pesticide at any time;

c. To which reference is made on the label or in literature accompanying the pesticide, except when accurate, non-misleading reference is made to current official publications of the United States Department of Agriculture or Interior, the United States Public Health Service, state agricultural experiment stations, state colleges of agriculture, or other similar federal institutions or official agencies of this state or other states authorized by law to conduct research in the field of pesticides.

30. "Major source of agricultural income" means that the producers of grapes within the affected area obtain at least ten percent of their gross income as a group in any five year period from the production of grapes.

31. "Metabolite" means any of the various organic compounds produced by metabolism.

32. "Misbranded" shall apply to any pesticide:

a. If its labeling bears any statement, design, or graphic representation relative thereto or to its ingredients which is false or misleading in any particular;

b. If it is an imitation of or is offered for sale under the name of another pesticide; or if its labeling bears any reference to registration under this article;

c. If the labeling accompanying it does not contain instructions for use which are necessary and, if complied with, adequate for the protection of the public;

d. If the label does not contain a warning or caution statement which may be necessary and, if complied with, adequate to prevent injury to health and the environment;

e. If the label is not visible and readable on the outside of the marketing package which is presented or displayed under customary conditions of purchase;

f. If any word, statement, or other information required by or under the authority of this article to appear on the labeling is not prominently placed thereon with such conspicuousness (as compared with other words, statements, designs, or graphic matter in the labeling) and in such terms as to render it likely to be read and understood by the ordinary individual under customary conditions of purchase and use;

g. If in the case of an insecticide, fungicide, or herbicide, when used as directed or in accordance with commonly recognized practice, it shall be injurious to living man or other vertebrate animals or vegetation, except weeds, to which it is applied, or to the person applying such pesticide; or

h. If in the case of a plant regulator, defoliant, or desiccant when used as directed it shall be injurious to living man or other vertebrate animals, or vegetation to which it is applied, or to the person applying such pesticide; provided, that physical or physiological effects on plants or parts thereof shall not be deemed injurious, when this is the purpose for which the plant regulator, defoliant, or desiccant was applied, in accordance with the label claims and recommendations.

i. If its labeling in any other way fails to conform to the labeling requirements of the Federal Insecticide, Fungicide, and Rodenticide Act of 1972, as amended.

33. "Person" means any individual, partnership, association, corporation, organized group of persons whether incorporated or not, private or public authority, state government or agency, political subdivision, governmental agency or any other legal entity whatever.

34. "Pest" means (1) any insect, rodent, fungus, weed, or (2) any other form of terrestrial or aquatic plant or animal life or virus, bacteria or other micro-organism (except viruses, bacteria or other micro-organisms on or in living man or other living animals) which the commissioner declares to be a pest.

35. "Pesticide" means:

a. Any substance or mixture or substances intended for preventing, destroying, repelling, or mitigating any pest; and

b. Any substance or mixture of substances intended for use as a plant regulator, defoliant or desiccant.

36. "Pesticide business" means any person providing commercial application of pesticides for hire.

37. "Plant regulator" means any substance or mixture of substances, intended through physiological action, for accelerating or retarding the rate of growth or rate of maturation, or for otherwise altering the behavior of ornamental or crop plants or their produce, but shall not include substances to the extent that they are intended as plant nutrients, trace elements, nutritional chemicals, plant inoculants, and soil amendments.

38. "Private application" means any application of any pesticide for the purpose of producing an agricultural commodity

a. on property owned or rented by the applicator or the applicator's employer, or

b. if applied without compensation other than the barter of personal services between producers of agricultural commodities, on property owned or rented by a party to such a barter transaction.

39. "Proximity" means a radial distance of two miles from the site of damage to grape vineyards.

40. "Registrant" means the person registering any pesticide pursuant to the provisions of this article.

41. "Residential application" shall mean the application of general use pesticides by ground equipment on property owned or leased by the applicator, excluding any establishment selling or processing food and any residential structure other than the specific dwelling unit in which the applicator resides.

42. "Restricted use pesticide" means a pesticide, as defined in this article and determined as provided in section 33-0303:

a. Which (1) either (a) persists in the environment, or (b) accumulates as either the pesticide per se, a pesticide metabolite, or a pesticide degradation product in plant or animal tissue or product, and is not excreted or eliminated within a reasonable period of time, and which may be transferred to other forms of life; and (2) which by virtue of such persistence or accumulation creates a present or future risk of harmful effects on any organism other than the target organisms; or

b. Which the commissioner finds is so hazardous to man or other forms of life that restrictions on its sale, purchase, use, or possession are in the public interest.

43. "Rodenticide" means any substance or mixture of substances intended for preventing, destroying, repelling, or mitigating rodents or any other vertebrate animals which the commissioner shall declare to be

a pest.

44. "Target organisms" means those organisms which the pesticide is intended to inhibit or destroy pursuant to its registered labeled usage.

45. "Weed" means any plant which grows where not wanted.

46. "Commercial lawn application" means the application of pesticide to ground, trees, or shrubs on public or private outdoor property. For the purposes of this article the following shall not be considered commercial lawn application:

a. the application of pesticide for the purpose of producing an agricultural commodity;

b. residential application of pesticides;

c. the application of pesticides around or near the foundation of a building for the purpose of indoor pest control;

d. the application of pesticides by or on behalf of agencies except that agencies shall be subject to visual notification requirements pursuant to section 33-1003 where such application is within one hundred feet of a dwelling, multiple dwelling, public building or public park; and

e. the application of pesticides on golf courses or turf farms.

47. "Major change in labeling" shall mean any new label or labeling or any amended label or labeling for a pesticide product which contains an active ingredient previously registered and which (a) results in a major change in the use pattern for the active ingredient; (b) changes the classification of the active ingredient or the product to general use or restricted use; increases the application rate; changes the percent concentration of an active ingredient other than an increase due to changes in methods of analysis; adds a previously-registered active ingredient or deletes any active ingredient; or (c) any other change

which significantly increases the potential exposure of any non-target organism or which increases the potential for a significant impact to humans, property or the environment.

48. "Residential lawn application" means the application of general use pesticides to ground, trees or shrubs on property owned by or leased to the individual making such application. For the purposes of this article the following shall not be considered residential lawn application:

a. The application of pesticides for the purpose of producing an agricultural commodity;

b. The application of pesticides around or near the foundation of a building for the purpose of indoor pest control;

c. The application of pesticides by or on behalf of agencies except that agencies shall be subject to visual notification requirements pursuant to section 33-1003 of this article where such application is within one hundred feet of a dwelling, multiple dwelling, public building or public park; and

d. The application of pesticides on golf courses or turf farms.

49. "Abutting property" shall mean any property which has any boundary or boundary point in common with the property on which the pesticide is to be applied.

§ 33-0103. Exemptions.

1. The provisions of subdivisions 1 through 5 inclusive of section 33-0303 and titles 5, 7, 11, 13 and 15 of this article shall not apply to:

a. Any carrier while lawfully engaged in transporting a pesticide within this state, if such carrier shall, upon request, permit the

commissioner or his designated agent to copy all records showing the transactions in and movement of the articles;

b. The manufacturer or shipper of a pesticide for experimental use only:

(1) By or under the supervision of an agency of this state or of the federal government authorized by law to conduct research in the field of pesticides which has a valid experimental permit issued by the commissioner, or

(2) By others having a valid experimental permit issued by the commissioner if the pesticide is not sold and if the container thereof is plainly and conspicuously marked "For experimental use only--Not to be sold," together with the manufacturer's name and address. However, if such a written permit has been obtained from the commissioner, pesticides may be sold for experimental purposes subject to such restrictions and conditions as may be set forth in the permit.

2. No article shall be deemed in violation of this article when intended solely for export to a foreign country, and when prepared or packed according to the specifications or directions of the purchaser. If not so exported, all of the provisions of this article shall apply.

3. Notwithstanding any other provision of this article, registration is not required in the case of a pesticide shipped from one plant within this state to another plant within this state operated by the same person.

TITLE 3

GENERAL PROVISIONS

Section 33-0301. Declaration of policy and purposes.

33-0303. Powers and duties of the commissioner and the department.

33-0304. Fees.

33-0305. Severability.

§ 33-0301. Declaration of policy and purposes.

The purpose of this article is to regulate the registration, commercial use, purchase and custom application of pesticides. Pesticides, properly used for the control of insects, fungi, weeds, and nematodes, and as defoliants, desiccants, and plant regulators and for related purposes, are valuable, important and necessary to the welfare, health, economic well-being and productive and industrial capabilities of the people of this state. However, such materials, if improperly used, may injure health, property and wildlife. It is hereby declared to be a matter of legislative determination that the regulation of the registration, commercial use, purchase and custom application of pesticides is needed in the public interest and that in the exercise of the police power all persons be required to register or obtain permits before engaging in such activities.

§ 33-0303. Powers and duties of the commissioner and the department.

1. Jurisdiction in all matters pertaining to the distribution, sale, use and transportation of pesticides, is by this article vested exclusively in the commissioner.

2. All authority vested in the commissioner by this article may be executed with like force and effect by employees of the department designated by the commissioner; however, all hearings held under this article except those held under the provisions of title 9 shall be conducted by the commissioner or by a person designated by him for that purpose, and any decision rendered after any such hearing shall be made by the commissioner.

3. The commissioner is authorized, after a hearing:

a. To declare as a pest any form of plant or animal life or virus which is injurious to plants, men, domestic animals, articles, or substances;

b. To determine whether pesticides are highly toxic to man, and to promulgate a list of such pesticides;

c. To determine standards of coloring or discoloring for pesticides, and to subject pesticides to the requirements of paragraph d of subdivision 1 of section 33-1301;

d. To promulgate a list of restricted use pesticides and the usages of such pesticides that may be permitted subject to whatever conditions or limitations which the commissioner deems appropriate to fully protect the public interest; provided, however, that no hearing shall be required on individual additions to such list unless requested sixty days after notice has been provided in the environmental notice bulletin as prescribed in section 3-0306 of such law, as added by chapter seven hundred fourteen of the laws of nineteen hundred seventy-five, by the applicant or an interested party; and

e. To adopt, promulgate and issue such rules and regulations as he may deem necessary to carry out and give full force and effect to the provisions of this article. However, rules and regulations regarding business registration and certification may be adopted only after a public hearing. Such rules and regulations may prescribe methods to be used in the application of pesticides, including the time, place, manner and method of application and equipment used, and may restrict or prohibit use of materials in designated areas during specified periods of time, and shall encompass all reasonable factors which he deems necessary to prevent damage or injury to health, property and wildlife. Rules and regulations shall be filed and open for public inspection at the principal office of the department and shall be filed with the Secretary of State. The commissioner shall promulgate a regulation authorizing the use of alternative containers for pesticides by pesticide users.

4. In order to avoid confusion endangering the public health, or the life or health of any other non-target organisms, resulting from diverse requirements, particularly as to labeling and coloring of pesticides, and to avoid increased costs to the people of this state due to the

necessity of complying with diverse requirements in the manufacture and sale of pesticides, it is desirable that there should be uniformity between the requirements of the several states and the federal government relating to pesticides. To this end the commissioner is authorized, after due public hearing, to adopt by regulation such regulations, applicable to and in conformity with the primary standards established by this article, as have been or may be prescribed with respect to pesticides by departments or agencies of the United States government.

5. The commissioner may require the submission of the complete formula of any pesticide whenever he deems it necessary in the administration of this article. The commissioner, of his own motion or upon complaint, may cause an examination to be made to determine whether any pesticide complies with the requirements of this article. If it shall appear from such examination that a pesticide fails to comply with the provisions of this article, the commissioner shall cause notice to be given to the offending person in the manner provided in section 71-2903, and the proceedings shall be as provided in such article provided that pesticides may be seized and confiscated as provided in title 15 of this article 33.

6. The commissioner may cooperate with any other agency of the state or its subdivisions or with any agency of any other state or of the federal government for the purpose of carrying out the provisions of this article and of securing uniformity of regulations.

7. The commissioner, in consultation with the commissioner of education and the commissioner of health, shall develop guidance on pesticide alternatives to facilitate compliance with section four hundred nine-k of the education law and three hundred ninety-g of the social services law.

§ 33-0304. Fees.

All fees collected pursuant to this article shall be deposited into

the environmental conservation special revenue fund to the credit of the environmental regulatory account; provided, however, that the first five million dollars collected pursuant to this article shall be deposited into the environmental protection fund established pursuant to section ninety-two-s of the state finance law.

§ 33-0305. Severability.

If any provision of this article is declared unconstitutional, or the applicability thereof to any person or circumstance is held invalid, by a court of competent jurisdiction, the constitutionality of the remainder of the article, and the applicability thereof to other persons and circumstances shall not be affected.

TITLE 5

TESTING OF PESTICIDE SAMPLES

Section 33-0501. Testing of pesticide samples.

§ 33-0501. Testing of pesticide samples.

1. The commissioner shall take and seal samples of pesticides in duplicate in the presence of at least one witness and shall, tender, and, if accepted, deliver to the person in charge of the pesticide one of such samples.

2. The department shall examine, analyze, or test, or cause to be examined, analyzed or tested the pesticide samples taken under the provisions of this article.

3. At least every two years the department shall make public the results of examinations, analyses, trials, and tests of any sample or samples so procured, together with such additional information as circumstances advise. These published results shall be the property of the state of New York and shall not be used for advertising or

regulatory purposes by any person or agency, government or otherwise without the commissioner's permission.

TITLE 7

REGISTRATION OF PESTICIDES

Section 33-0701. Scope of registration.

33-0703. Application for registration.

33-0704. Review of applications to register pesticides.

33-0705. Fee for registration.

33-0707. Disclosure of pesticide formulas.

33-0709. Requirements for registration.

33-0711. Procedure when registration is denied.

33-0713. Cancellation of registration.

33-0714. Water quality monitoring for pesticides.

33-0715. Advisory committees.

33-0717. Public hearing regarding registration.

33-0719. Suspension of pesticide registration.

33-0721. Judicial review.

33-0723. Experimental use permits.

33-0725. Approved agricultural uses.

§ 33-0701. Scope of registration.

Every pesticide which is used, distributed, sold, or offered for sale within this state or delivered for transportation or transported in intrastate commerce or between points within this state through any point outside this state shall be registered every two years with the office of the commissioner; provided that any pesticide imported into this state, which is registered under the provisions of any federal act providing for the registration of pesticides may, in the discretion of the commissioner, be exempted from registration under this article, when sold or distributed in the unbroken immediate container in which it was originally shipped.

§ 33-0703. Application for registration.

The applicant shall file with the commissioner a statement including:

1. The name and address of the applicant and the name and address of the person whose name will appear on the label, if other than the applicant;
2. The name of the pesticide;
3. A complete copy of the labeling accompanying the pesticide and a statement of all claims to be made for it including directions for use;
4. If requested by the commissioner a full description of the tests made and their results upon which the claims are based. In the case of registration of a pesticide which has been registered for the previous year, a statement shall be required only with respect to information which is different from that furnished when the pesticide was last registered; and
5. For restricted use pesticides, if requested by the commissioner a Spanish or other language translation of the label including directions for use.

§ 33-0704. Review of applications to register pesticides.

1. For registration applications subject to review pursuant to subdivisions two through five of this section, an application for pesticide registration shall be determined by the commissioner to be complete or incomplete within sixty days of receipt of an application for registration. If the commissioner does not issue a determination of completeness or incompleteness within sixty days of receipt of an application for registration, the application shall be deemed complete. Upon reaching a determination of completeness or incompleteness, the commissioner shall send written notice to the applicant. If the application is determined to be incomplete, the commissioner shall

include a statement of the reasons for which the application was determined to be incomplete. The resubmission of the application or the submission of additional information in response to a request for additional information shall commence a new sixty calendar day period for department review of the additional information for purposes of determining completeness.

2. The commissioner shall issue or deny registration of a pesticide which contains an active ingredient not previously registered by the commissioner or which contains an active ingredient previously registered for which a major change in labeling is proposed within one hundred fifty days of a determination that such application is complete. If registration of such pesticide is not granted or denied within such period, the applicant may submit to the commissioner, in the form prescribed by the commissioner, a request to grant or deny the registration. If the registration is not granted or denied within thirty days following the receipt of such a request, the registration shall be deemed granted. Any denial of registration shall specify the grounds for denial.

3. The commissioner shall issue or deny registration of a pesticide to meet a special local need within sixty days of a determination that such application is complete. If registration of such pesticide is not granted or denied within such period, the applicant may submit to the commissioner, in the form prescribed by the commissioner, a request to grant or deny the registration. If the registration is not granted or denied within ten business days following receipt of such a request, the registration shall be deemed granted. Any denial of registration shall specify the grounds for denial.

4. The commissioner shall issue or deny registration of a pesticide which contains an active ingredient previously registered and which does not propose a major change in labeling within ninety days of a determination that such application is complete. If registration of such pesticide is not granted or denied within such period, the applicant may submit to the commissioner, in the form prescribed by the commissioner, a request to grant or deny the registration. If the registration is not

granted or denied within thirty days following the receipt of such a request, the registration shall be deemed granted. Any denial of registration shall specify the grounds for denial.

5. The commissioner shall grant or deny registration of amended labeling of a pesticide product previously registered, other than a major change in labeling, within thirty days following a determination that the application to register the amended labeling is complete. If registration of such amended labeling is not granted or denied within thirty days of a determination that the application is complete, the applicant may submit, in the form prescribed by the commissioner, a request to grant or deny registration of the amended labeling. If registration of the amended labeling is not granted or denied within thirty days following receipt of such a request, the registration shall be deemed granted. Any denial shall specify the grounds for denial.

6. At any time during the review of an application to register a pesticide the commissioner may request reasonable additional information from the applicant with regard to any matter contained in the application when such additional information is necessary for the commissioner to make a decision on the registration application. Such request shall not extend any time period within which a registration decision must be made.

7. A request that the commissioner apply for an emergency exemption from a federal act providing for the registration of pesticides for a use of a pesticide for which no registration has been issued under such federal act shall be filed with the commissioner at least one hundred five days prior to the date on which such use is proposed to commence. Within thirty days of receipt of such a request, the commissioner shall determine whether the materials submitted with the request are adequate to support an application for an emergency exemption, and shall so inform the person submitting the request. If a request is determined to be adequate to support an application for an emergency exemption, an application shall be filed by the commissioner at least sixty days prior to the date upon which such use is proposed to commence.

8. Any time period specified in this section may be extended with the consent of the applicant.

9. The commissioner shall promulgate rules and regulations necessary and appropriate to carry out the purposes of this title, which shall include a definition of a complete application to register a pesticide. Regulations defining a complete application to register a pesticide shall be promulgated not later than April 1, 1993.

§ 33-0705. Fee for registration.

The applicant for registration shall pay a fee as follows:

a. Six hundred dollars for each pesticide proposed to be registered, provided that the applicant has submitted to the department proof in the form of a federal income tax return for the previous year showing gross annual sales, for federal income tax purposes, of three million five hundred thousand dollars or less; and

b. For all others, six hundred twenty dollars for each pesticide proposed to be registered.

§ 33-0707. Disclosure of pesticide formulas.

The commissioner, whenever he deems it necessary in the administration of subdivisions 1 through 5 inclusive of section 33-0303 and titles 5, 7, 11, 13 and 15 of this article, may require the submission of the complete formula of any pesticide. Notwithstanding the provisions of this article, information relative to formulas of products acquired by authority of this section may be revealed, when necessary under this section, to an advisory committee, or to any federal or state department or agency consulted, or at a public hearing, or in findings of fact issued by the commissioner.

§ 33-0709. Requirements for registration.

If it appears to the commissioner that the composition of the pesticide is such as to warrant the proposed claims for it, and if the pesticide and its labeling and other material required to be submitted comply with the requirements of this article, he shall register the pesticide.

§ 33-0711. Procedure when registration is denied.

If the commissioner shall decide that the pesticide does not warrant the proposed claims for it or if the pesticide and its labeling and other material required to be submitted do not comply with the provisions of this article, he shall notify the applicant for registration of the manner in which the pesticide, labeling, or other material required to be submitted fail to comply with this article so as to afford the registrant an opportunity to make the necessary corrections. If, upon receipt of such notice, the applicant for registration does not make the corrections, the commissioner shall refuse to register the article, and shall notify the applicant of his action and the reasons for his refusal. Whenever an application for registration is refused, the applicant, within thirty days after service of notice of such refusal, may file a petition requesting that the matter be referred to an advisory committee or file objections and request a public hearing in accordance with section 33-0717.

§ 33-0713. Cancellation of registration.

1. The commissioner, in accordance with the procedures specified in this article may cancel the registration of a pesticide whenever it does not appear that the article or its labeling or other material required to be submitted complies with the provisions of this article.

2. Whenever the commissioner determines that registration of a pesticide should be canceled, he shall notify the registrant of his

action and the reasons therefor.

3. A cancellation of registration shall be effective thirty days after service of the foregoing notice unless within such time the registrant (a) makes the necessary corrections; (b) files a petition requesting that the matter be referred to an advisory committee; or (c) files objections and requests a public hearing.

§ 33-0714. Water quality monitoring for pesticides.

The department, in coordination with the United States Geological Survey National Water Quality Assessment Program, the New York State Water Resources Institute, and other parties, shall conduct a water quality monitoring program to provide an adequate understanding of the health and environmental impacts of pesticide use in the state. The department shall utilize this program, as it deems necessary, in: making pesticide registration decisions; reviewing suspensions and cancellations of pesticide registrations in the state; and assessing the status, trends, and health impacts of any pesticide contamination of ground and surface waters on Long Island and throughout the state.

§ 33-0715. Advisory committees.

1. The commissioner on his own motion, may at any time refer matters concerning registration of pesticides or the suspension or cancellation of such registration, to an advisory committee. Each advisory committee shall be composed of experts, qualified in the subject matter and of adequately diversified professional background selected by the department and shall include one or more representatives from the state college of agriculture. The committee shall not have more than seven members. Advisory committee members shall not receive a salary or other compensation, but shall be reimbursed for their necessary traveling and subsistence expenses while serving away from their places of residence. All costs may be assessed against the petitioner, unless the matter was referred to the advisory committee upon the motion of the commissioner

without a petition. The commissioner shall furnish the committee with adequate clerical and other assistance, and shall by rules and regulations prescribe the procedures to be followed by the committee.

2. Whenever the applicant or registrant requests an advisory committee hearing or the commissioner determines that a matter should be referred to an advisory committee, the commissioner shall submit the application for registration of the article and all relevant data before him to the committee forthwith. The petitioner, as well as representatives of the department shall have the right to consult with the advisory committee. As soon as practicable after any such submission, but not later than sixty days, the committee shall, after independent study of the data submitted by the commissioner and all other pertinent information available to it, submit a report and recommendation to the commissioner as to the registration of the article, together with all underlying data and a statement of the reasons or basis for the recommendations. After due consideration of the views of the committee and all other data before him the commissioner shall, within ninety days after receipt of the report and recommendations of the advisory committee, make his determination and issue an order, with findings of fact, with respect to registration of the article and notify the applicant for registration or registrant of his decision. The applicant for registration, or registrant, may file objections and request a public hearing within sixty days from the date of the commissioner's order made after receiving the report and recommendations of the advisory committee.

§ 33-0717. Public hearing regarding registration.

In the event a hearing is requested, the commissioner shall, after due notice, hold a public hearing for the purpose of receiving evidence relevant and material to the issues raised by the objections. Any report, recommendations, underlying data, and reasons certified to the commissioner by an advisory committee shall be made a part of the record of the hearing, if relevant and material. Upon request of the commissioner, petitioner, or hearing officer, the advisory committee shall designate one of its members to appear and testify at the hearing

with respect to its report and recommendations. However, any other member of the advisory committee may also appear and testify at the hearing. As soon as practicable after completion of the hearing, the commissioner shall evaluate the data and reports before him, act upon the objections and issue an order granting, denying, or canceling the registration. Such order shall be based only on substantial evidence of record at such hearing, including any report, recommendations, underlying data, and reason certified to the commissioner by an advisory committee, and shall set forth detailed findings of fact upon which the order is based. In connection with consideration of any registration or application for registration under this section, the commissioner may consult with any federal agency or any other state department or agency.

§ 33-0719. Suspension of pesticide registration.

Notwithstanding any other provision of this article, the commissioner may, by order, suspend the registration of a pesticide immediately when he finds that such action is necessary to prevent an imminent hazard to the public or any other non-target organism. In such case, he shall give the registrant prompt notice of such action and afford the registrant the opportunity to have the matter submitted to an advisory committee and for an expedited hearing under this article.

§ 33-0721. Judicial review.

Final orders of the commissioner under this title shall be subject to review under article 78 of the Civil Practice Law and Rules instituted within thirty days after receipt by the applicant for registration or registrant of the commissioner's order.

§ 33-0723. Experimental use permits.

1. The commissioner is hereby authorized to apply to the United States environmental protection agency for certification pursuant to section

five of the Federal Insecticide, Fungicide and Rodenticide Act of 1972, as amended, to issue experimental use permits, and to establish by regulation any requirements as are necessary to qualify for such certification.

2. After certification by the administrator of the United States environmental protection agency to issue experimental use permits, the commissioner is hereby authorized to issue such permits as shall be required for the shipment, delivery, or use of a pesticide product which is to be tested to determine the scope of limitations of its usefulness and the effect of its use on human life and the environment. Such permits may be issued for products for use only in experimental programs under the supervision of qualified persons and broad scale testing under normal conditions of use. The commissioner may require such information and data concerning the product and the proposed testing program as is deemed necessary to make determinations on the merits of the pesticides being tested.

3. The commissioner is authorized to exempt from the requirement for experimental use permits substances or mixtures of substances in early research stages such as those being put through laboratory or greenhouse tests or limited scale field trials or other tests for the purpose of determining pesticide value and from which the user does not expect to receive any benefit in pest control.

§ 33-0725. Approved agricultural uses.

A pesticide shall be used in accordance with its labeling. Unless the labeling specifically prohibits such use, a pesticide registered for use in New York state may be used for agricultural purposes only in a dosage, concentration or frequency less than that specified on the labeling.

TITLE 9 PERMITS AND CERTIFICATION

Section 33-0901. Commercial permits.

33-0903. Purchase permits.

33-0905. Pesticide applicator certification.

33-0907. Pesticide business and agency registration.

33-0909. Denial or revocation of certification or registration.

33-0911. Certification and registration fees.

§ 33-0901. Commercial permits.

1. A commercial permit is required for the distribution, sale, offer for sale, purchase for the purpose of re-sale or possession for the purpose of re-sale of a restricted use pesticide.

2. Any person desiring such a permit shall file an application containing such information required by the commissioner and in a form prescribed by the commissioner. The commissioner shall examine the application and shall issue or refuse to issue the permit requested therein. The commissioner shall impose whatever restrictions or conditions on the permit he deems appropriate in order to fully protect the public interest. Such a permit shall not be valid for more than two years as determined by the commissioner. A separate permit is required for each location in the state, and a fee for each location in the state of six hundred dollars is required.

3. Upon the sale by a commercial permit holder of a restricted use pesticide to a purchase permit holder, the commercial permit holder shall cancel the permit in a manner to be prescribed by the commissioner.

4. The holder of a commercial permit may purchase restricted use pesticides for re-sale without being required to obtain and present a purchase permit, as provided for in section 33-0903.

5. The holder of a commercial permit must maintain and make available to the commissioner or his agents, for at least two years, accurate and detailed records accounting for all restricted use pesticides acquired

by him and disposed of by him, including, but not limited to dates, names and addresses of all suppliers and the quantities acquired from each, and the names, addresses, permit numbers or certification identification card numbers of all purchasers, and the quantities purchased by each.

6. The reasons for the denial of an application or revocation of a commercial permit may include, but not be limited to, the commissioner being satisfied of one or more of the following:

a. That any statement in the application or upon which the permit was issued is or was false or misleading;

b. That the applicant or permit holder does not have adequate facilities for the storage and distribution of restricted use pesticides;

c. That the applicant or permit holder has engaged in fraudulent business practices relating to the sale and distribution of pesticides;

d. That the applicant or permit holder has failed to comply with any provision of subdivisions 1 through 5 inclusive of section 33-0303 and titles 5, 7, 11, 13 and 15 of this article or rules and regulations of the department made pursuant thereto; or

e. That the applicant or permit holder has failed to demonstrate that he has sufficient knowledge and experience concerning the proper use and application of pesticides.

7. A formal hearing shall not be required and the commissioner's decision in denying or revoking a permit shall be final unless the applicant or permit holder institutes a review within the time and in the manner prescribed by article 78 of the Civil Practice Law and Rules.

§ 33-0903. Purchase permits.

1. A purchase permit or certification identification card is required for the purchase, possession or use of a restricted use pesticide.

2. Any person desiring such a permit shall file an application containing such information required by the commissioner and in a form prescribed by the commissioner. The commissioner shall examine the application and shall issue or refuse to issue the permit requested therein. The commissioner shall not issue a permit to so purchase, possess or use a particular pesticide if there is a reasonably less dangerous alternative available capable of performing the task required. The commissioner shall impose whatever restrictions or conditions on the permit he deems appropriate in order to fully protect the public interest.

3. Upon the purchase by a purchase permit holder of a restricted use pesticide he shall present his purchase permit and have it cancelled by the commercial permit holder selling the pesticide in a manner to be prescribed by the commissioner.

4. The reasons for the denial of an application or revocation of a permit may include, but not be limited to, the commissioner being satisfied of one or more of the following:

a. That any statement in the application or upon which the permit was issued, is or was false or misleading;

b. That the applicant or permit holder failed to justify his need for the quantity and types of restricted use pesticides requested;

c. That the applicant or permit holder stored, applied, used or disposed of any pesticide contrary to the registered labeled usage or contrary to the conditions specified in his permit;

d. That the applicant or permit holder has failed to comply with any provisions of this article or rules and regulations of the department made pursuant thereto; or

e. That the applicant or permit holder has failed to demonstrate that he has sufficient knowledge and experience concerning the proper use, application and disposal of pesticides.

5. A formal hearing shall not be required and the commissioner's decision in denying or revoking a permit shall be final unless the applicant or permit holder institutes a review within the time and in the manner prescribed by article 78 of the Civil Practice Law and Rules.

6. The commissioner is authorized to exempt holders of a pesticide applicator certification from the requirement of obtaining a purchase permit as provided for herein. Such exemption shall apply only to those restricted use pesticides designated by the commissioner.

§ 33-0905. Pesticide applicator certification.

1. Any person who engages in the commercial or private application of pesticides or the sale of restricted use pesticides shall be certified by the commissioner except as provided in subdivision two of this section. No certification shall be valid unless the certified person also holds a valid identification card issued by the commissioner.

2. The provisions of this article relating to registration and certification shall not apply to:

a. residential application of pesticides as defined in this article;
or

b. private application of a general use pesticide as defined in this article.

2-a. The commissioner may, pursuant to paragraph e of subdivision three of section 33-0303 of this article, adopt regulations on the use of pesticides including the appropriate method and setting for the use of pesticides classified by the United States environmental protection agency as an exempt material under 40 CFR part 152.25, often called

minimum risk pesticides, which are exempt from the requirements of the Federal Insecticide, Fungicide and Rodenticide Act. Such regulations shall encompass all factors necessary to prevent damage or injury to health, property and wildlife.

3. a. Application for pesticide applicator certification shall be made to the commissioner. The application shall be on a form prescribed by the commissioner and shall be accompanied by the fee or fees provided in section 33-0911.

b. An applicant for certification shall satisfy the commissioner as to his knowledge and experience concerning the proper use and application of pesticides and pesticide application equipment through examination prior to initial certification. Recertification shall be by training, workbook, or examination as required by the commissioner.

c. Upon certification, the commissioner shall certify the applicant for the appropriate category of certification and shall issue a certification identification card to the applicant. The certification may restrict the applicant to the use of a certain type or types of equipment or materials.

d. Except as provided in paragraph e of this subdivision, pesticide applicator certifications shall be valid for three years after which every applicator shall recertify according to the requirements then in effect. Certification identification cards shall be valid for three years.

e. Private applicator certifications shall be valid for five years after which every such applicator shall recertify according to the requirements then in effect. Private applicator certification identification cards shall be valid for five years.

g. The commissioner is authorized to provide all examinations, training materials, applications, and any other forms or written materials necessary for a private and/or commercial applicator certification in Spanish for applicants whose primary language is

Spanish and for other languages if the commissioner deems it necessary. The commissioner may require applicants for registration of pesticides to make available pesticide label information and instructions in Spanish and other languages, when necessary, for applicators certified in Spanish or other languages.

4. Certified pesticide applicators shall maintain such records and shall furnish such reports concerning the application of pesticides as the commissioner shall require. All records required to be kept under this section shall be available for inspection by the commissioner.

5. a. Every certified applicator shall, prior to the application of a pesticide within or on the premises of a dwelling, supply the occupants therein with a copy of the information, including any warnings, contained on the label of the pesticide to be applied. Such information shall be supplied in either a written, digital or electronic format which shall be determined by the occupants of such dwelling, provided however that the certified applicator must also have a written copy of such information in his/her possession.

b. Except as provided in paragraph c of this subdivision, every certified applicator shall, prior to the application of a pesticide within or on the premises of a multiple dwelling, building, or structure other than a dwelling supply the owner or his agent, with a copy of the information, including all warnings, contained on the label of the pesticide to be applied. Such information shall be supplied in either a written, digital or electronic format which shall be determined by the owner or his or her agent, provided however that the certified applicator must also have a written copy of such information in his or her possession. Such owner or agent shall make available upon request at reasonable times such information in written or electronic form if available to the occupants or residents of such multiple dwelling, building, or structure.

c. In the case where an occupant of a multiple dwelling unit retains a certified applicator to apply pesticides within such unit, such certified applicator shall, prior to the application of a pesticide,

supply any information, including all warnings, contained on the label of the pesticides to the occupants.

d. For the purposes of this subdivision:

(i) A "dwelling" is any building or structure or portion thereof which is occupied in whole or in part as the home, residence or sleeping place for one or two families;

(ii) A "multiple dwelling" shall mean any dwelling which is to be occupied by or is occupied as the residence or home of three or more families living independently of each other;

(iii) A "multiple dwelling unit" shall mean that portion of a multiple dwelling occupied by one or more persons as the residence or home of such persons; and

(iv) "Premises" shall mean land and improvements or appurtenances or any part thereof.

§ 33-0907. Pesticide business and agency registration.

1. Any pesticide business or agency as defined in this article shall register with the commissioner.

2. Applications for pesticide business or agency registration shall be made to the commissioner. The application shall be on a form prescribed by the commissioner and shall provide such information as the commissioner shall require.

3. An applicant for pesticide business or agency registration shall satisfy standards, as determined by the commissioner to be appropriate, with respect to knowledge and experience concerning the proper use and application of pesticides and pesticide equipment.

4. Business or agency registration shall be valid for three years.

§ 33-0909. Denial or revocation of certification or registration.

1. The commissioner, after due notice and opportunity of hearing to an applicant, certified applicator, or registered pesticide business or agency, may deny an application or revoke a certificate or registration upon a determination that:

a. any statement in the application or upon which the certificate or registration was issued is or was false or misleading;

b. the applicant or certified applicator has been convicted of a felony;

c. the applicant, certified applicator, or registered business or agency applied or used any pesticide contrary to the registered label usage;

d. the applicant, certified applicator, or registered business or agency has engaged in fraudulent business practices in the application of pesticides;

e. the applicant, certified applicator, or registered business or agency has failed to comply with any provision of this article or rules and regulations of the department made pursuant thereto; or

f. the applicant or certified applicator has failed to demonstrate that he has sufficient knowledge and experience concerning the proper use and application of pesticides.

2. The commissioner's determination to refuse or revoke certification or registration shall be final unless the aggrieved party institutes a proceeding under article seventy-eight of the civil practice law and rules within thirty days of service on him by personal service or by certified mail of the commissioner's order.

§ 33-0911. Certification and registration fees.

1. Every applicant for pesticide applicator certification shall pay an

examination fee of one hundred dollars for each examination.

2. Fees for pesticide applicator certification shall be four hundred fifty dollars for commercial pesticide applicator certification in one individual category, one hundred fifty dollars for each additional category and one hundred fifty dollars for each additional sub-category chosen. For private applicators a fee of twenty-five dollars for the initial certified private applicator and five dollars for subsequent applicators on the same farm or business shall be charged at the time of initial certification, renewal of certification or recertification.

3. Pesticide businesses shall pay a registration fee of nine hundred dollars. When the applicant regularly maintains or operates more than one business address a fee may be required for each of the applicant's business addresses in the state. Any agency which is a state agency, municipal corporation, public authority, or college shall be exempt from any fee for registration.

TITLE 9-A

SPECIAL PERMITS AND CERTIFICATION FOR COMMERCIAL APPLICATION OF AQUATIC ANTIFOULING PAINTS

Section 33-0920. Definitions.

33-0921. Aquatic antifouling paint applicator certification.

33-0922. Aquatic antifouling paint business registration.

33-0923. Denial or revocation of certification or registration.

33-0924. Certification and registration fees.

33-0925. Sanctions.

§ 33-0920. Definitions.

For the purposes of this title:

1. "Aquatic antifouling paint application business" shall mean a business that commercially applies aquatic antifouling paints.

2. "Aquatic antifouling paints" are pesticide products used on vessel hulls, boat bottoms, structures and other marine surfaces to inhibit the growth of aquatic organisms.

3. "Application of aquatic antifouling paint" shall mean the commercial application of aquatic antifouling paints.

4. "Aquatic antifouling paint applicator" shall be a person certified by the department pursuant to section 33-0921 of this title.

§ 33-0921. Aquatic antifouling paint applicator certification.

1. Notwithstanding any other provision of law or regulation pursuant to this title, a person who is certified by the commissioner as an aquatic antifouling paint applicator may engage in the commercial application of aquatic antifouling paint.

2. Application for aquatic antifouling paint applicator certification shall be made to the commissioner. The application shall be on a form prescribed by the commissioner and shall be accompanied by the fee or fees provided in section 33-0911 of this article.

3. An applicant for aquatic antifouling paint applicator certification shall successfully complete a comprehensive twenty-hour training course approved by the department including eight hours of category-specific training which includes topics related to the safe and proper use, handling, storage and disposal of aquatic antifouling paints and/or satisfy the commissioner as to the applicant's knowledge and experience concerning the proper use and application of aquatic antifouling paint and application equipment through examination prior to initial certification. The commissioner may consider appropriate experience of the applicant as specified in regulations when determining eligibility for examination.

4. Aquatic antifouling paint applicator certification shall be valid for three years after which every applicator shall recertify.

Recertification shall require no more than five hours of course work by training, workbook, or examination as required by the commissioner.

5. No certification shall be valid unless the certified person also holds a valid identification card issued by the commissioner. Certification identification cards shall be valid for three years.

6. Certified aquatic antifouling paint applicators shall maintain such records and shall furnish such reports concerning the application of aquatic antifouling paints as the commissioner shall require. All records required to be kept under this section shall be available for inspection by the commissioner.

§ 33-0922. Aquatic antifouling paint business registration.

1. Notwithstanding any other provision of law or regulation pursuant to this title, an aquatic antifouling paint application business as defined in this title shall register with the commissioner.

2. Applications for aquatic antifouling paint application business registration shall be made to the commissioner and applicants shall provide such information as the commissioner shall require. The application shall be on a form prescribed by the commissioner and shall be accompanied by the fee or fees provided in section 33-0911 of this article.

3. An applicant for aquatic antifouling paint application business shall satisfy standards, as determined by the commissioner to be appropriate, with respect to knowledge and experience concerning the proper use and application of aquatic antifouling paint application and equipment. In addition to any other standards determined by the commissioner to be appropriate, an applicant shall: (a) employ at least one person who is a certified commercial pesticide applicator or technician certified in the application of aquatic antifouling paint or an aquatic antifouling paint applicator at each location required to be registered; or (b) have entered into a contract with another registered

business that employs a person who is a certified commercial pesticide applicator or technician certified in the application of aquatic antifouling paint or an aquatic antifouling paint applicator, pursuant to which contract such registered business has agreed to apply aquatic antifouling paint at each such location for such applicant.

4. Business registration shall be valid for three years.

5. When engaged in the commercial application of aquatic antifouling paints, an aquatic antifouling paint application business shall ensure that such aquatic antifouling paints are only applied by an employee who is a certified commercial pesticide applicator or technician certified in the application of aquatic antifouling paint or an aquatic antifouling paint applicator, or a person who is a certified commercial pesticide applicator or technician certified in the application of aquatic antifouling paint or an aquatic antifouling paint applicator employed by another registered business with which such business has contracted to apply aquatic antifouling paints; provided, however, that until such time as authorization for pesticide application by pesticide apprentices is repealed, aquatic antifouling paint registered as a general use pesticide may be applied by a commercial pesticide apprentice who is at least seventeen years of age and employed by such business (a) working under the direct supervision of a certified commercial pesticide applicator, or (b) working under the supervision of a certified pesticide technician qualified in aquatic antifouling paints, if such application is otherwise done in compliance with the rules and regulations of the department, and who, during the handling and application of such paint, utilizes appropriate safety equipment including but not limited to a respirator, eye protection and skin protection.

6. Such aquatic antifouling paint application business shall, for a period of five years, maintain for inspection by the department an annual report listing the names and certification numbers of all employees or contractors engaged in the application of aquatic antifouling paints on behalf of such business during the prior twelve months.

§ 33-0923. Denial or revocation of certification or registration.

The commissioner, after due notice and opportunity of hearing to an applicant, certified applicator, or registered pesticide business or agency, may deny an application or revoke a certificate or registration pursuant to section 33-0909 of this article.

§ 33-0924. Certification and registration fees.

All fees established by the commissioner for certification and registration pursuant to this title shall be the same as those established by section 33-0911 of this article.

§ 33-0925. Sanctions.

Notwithstanding any other provision of law or regulation pursuant to this title and/or any provision of this article as it relates to the application of aquatic antifouling paints, any person who violates any provision of this title or any rule, regulation or order issued thereunder shall be liable to the people of this state for a civil penalty of up to one thousand dollars for a first violation to be assessed by the commissioner after a hearing or opportunity to be heard. In determining the amount of the penalty, the commissioner shall take into account whether the violation posed an immediate threat to the environment or the health and safety of the public. Any subsequent violation of this title and/or any provision of this article as it relates to the application of aquatic antifouling paints would be subject to the appropriate sanctions pursuant to sections 71-2907 and 71-2911 of this chapter.

TITLE 10

SPECIAL REQUIREMENTS FOR COMMERCIAL AND RESIDENTIAL LAWN APPLICATIONS

Section 33-1001. Requirements and restrictions.
33-1003. Visual notification.
33-1004. Lawn applications; certain municipalities.
33-1005. Rules and regulations.
33-1005*2. Commissioner's regulations.

§ 33-1001. Requirements and restrictions.

1. Prior to any commercial lawn application the applicator shall enter into a written contract with the owner of the property or his or her agent specifying the approximate date or dates of application, number of applications, and total cost for the service to be provided.

2. Prior to any commercial lawn application the applicator shall supply the property owner or his or her agent with a copy of:

a. a list of substances to be applied including brand names and generic names of active ingredients;

b. any warnings that appear on the label of pesticides to be applied that are pertinent to the protection of humans, animals or the environment; and

c. the company name, address, telephone number, business registration number and applicator certification identification card number.

Such information shall be supplied in either a written, digital or electronic format which shall be determined by the owner or his or her agent provided however that the applicator must also have a written copy of such information in his or her possession.

3. In the event that application on the date or dates specified becomes infeasible, the person who is to provide such application shall give the owner or his agent oral or written notice of the proposed alternate date or dates, and shall receive acceptance of such alternate date or dates from the owner or his agent prior to initiating commercial

lawn application.

4. Persons providing commercial lawn applications shall maintain copies of all contracts required pursuant to subdivision one of this section.

§ 33-1003. Visual notification.

1. All persons providing commercial lawn application shall affix markers to be placed within or along the perimeter of the area where pesticides will be applied. Markers are to be placed so as to be clearly visible to persons immediately outside the perimeter of such property. Such markers shall be posted at least twelve inches above the ground and shall be at least four inches by five inches in size.

2. The markers required pursuant to this section shall be in place on the day during which the pesticide is being applied and shall instruct persons not to enter the property and not to remove the signs for a period of at least twenty-four hours. Such instruction shall be printed boldly in letters at least three-eighths of an inch in height.

§ 33-1004. Lawn applications; certain municipalities.

1. Notwithstanding any other provision of law to the contrary, any county not contained entirely within a city, and any city with a population of one million or more, may, after public hearing, adopt a local law comprised of the following provisions in their entirety and without exception including all applicable definitions as provided in this article:

a. All retail establishments that sell general use pesticides for commercial or residential lawn application shall display a sign meeting standards, established by the commissioner pursuant to subdivision one of section 33-1005 of this article, in a conspicuous place, and such sign shall be placed as close as possible to the place where such

pesticides are displayed.

b. (i) At least forty-eight hours prior to any commercial lawn application of a pesticide, the person or business making such application shall supply written notice, as defined in subdivision three of section 33-1005 of this article to:

A. occupants of all dwellings, as defined in paragraph d of subdivision five of section 33-0905 of this article, on abutting property with a boundary that is within one hundred fifty feet of the site of such application; and to owners, owners' agents, or other persons in a position of authority for all other types of premises, as defined in paragraph d of subdivision five of section 33-0905 of this article, that are on abutting property with a boundary that is within one hundred fifty feet of the site of such application. Owners or owners' agents of multiple family dwellings shall supply such written notice to the occupants of such multiple family dwellings and for all other types of premises, owners, owners' agents or other persons in a position of authority shall post such written notice in a manner specified by the commissioner; and

B. owners, owners' agents or other persons in positions of authority for multiple family dwellings, the property of which is the site of such application. Owners, or owners' agents of multiple family dwellings shall supply such written notice to the occupants of such multiple family dwellings in a manner specified by the commissioner.

(ii) The prior notification provisions of this paragraph shall not apply to the following:

A. the application of anti-microbial pesticides and anti-microbial products as defined by FIFRA in 7 U.S.C. Section 136 (mm) and 136 q (h) (2);

B. the use of an aerosol product with a directed spray, in containers of eighteen fluid ounces or less, when used to protect individuals from an imminent threat from stinging and biting insects, including venomous spiders, bees, wasps and hornets. This section shall not exempt from

notification the use of any fogger product or aerosol product that discharges to a wide area;

C. the use of non-volatile insect or rodent bait in a tamper resistant container;

D. the application of a pesticide classified by the United States Environmental Protection Agency as an exempt material under 40 CFR Part 152.25;

E. the application of a pesticide which the United States Environmental Protection Agency has determined satisfies its reduced risk criteria, including a biopesticide;

F. the use of boric acid and disodium octaborate tetrahydrate;

G. the use of horticultural soap and oils that do not contain synthetic pesticides or synergists;

H. the application of a granular pesticide, where granular pesticide means any ground applied solid pesticide that is not a dust or powder;

I. the application of a pesticide by direct injection into a plant or the ground;

J. the spot application of a pesticide, where spot application means the application of pesticide in a manually pressurized or non-pressurized container of thirty-two fluid ounces or less to an area of ground less than nine square feet;

K. the application of a pesticide to the ground or turf of any cemetery; and

L. an emergency application of a pesticide when necessary to protect against an imminent threat to human health, provided, however, that prior to any such emergency application, the person providing such application shall make a good faith effort to supply the written notice

required pursuant to this title. Upon making an emergency application, the person making such application shall notify the commissioner of health, using a form developed by such commissioner for such purposes that shall include minimally the name of the person making such application, the pesticide business registration number or certified applicator number of the person making such application, the location of such application, the date of such application, the product name and United States Environmental Protection Agency registration number of the pesticide applied and the reason for such application.

c. (i) All persons performing residential lawn applications treating an area more than one hundred square feet shall affix markers to be placed within or along the perimeter of the area where pesticides will be applied. Markers are to be placed so as to be clearly visible to persons immediately outside the perimeter of such property. Markers shall be posted at least twelve inches above the ground and shall be at least four inches by five inches in size. Such markers shall be in both the English and Spanish languages, and any other languages if the commissioner deems it necessary pursuant to rules and regulations.

(ii) The markers required pursuant to this paragraph shall be in place on the day during which the pesticide is being applied and shall instruct persons not to enter the property and not to remove the signs for a period of at least twenty-four hours. Such instruction shall be printed boldly in letters at least three-eighths of an inch in height.

2. Any county not contained entirely within a city or any city with a population of one million or more that adopts a local law pursuant to the provisions of this section, shall, in addition to any authority otherwise conferred in this chapter, have concurrent authority to enforce such local law administratively, provided however that all sanctions, which shall be assessed after providing a hearing or opportunity to be heard, shall be as specified in section 71-2907 of this chapter and shall be payable to and deposited with the enforcing municipality.

2-a. Within twenty days after the adoption of a local law pursuant to this section, the clerk or other officer designated by the legislative

body shall forward one certified copy thereof to the commissioner and one to the attorney general.

2-b. Any local law adopted pursuant to this section shall take effect on the first day of January after it shall have been adopted.

3. The commissioner of health shall review any emergency form submitted pursuant to this section to ensure that the circumstance did warrant such emergency application. Such forms shall be kept on file at the department of health for three years from the date of application and shall be made available to any person upon request.

*** § 33-1005. Rules and regulations.**

The commissioner shall have the power to promulgate the rules and regulations necessary and appropriate to carry out the purposes of this title.

* NB There are 2 § 33-1005's

*** § 33-1005. Commissioner's regulations.**

For purposes of implementing section 33-1004 of this article in any county not contained entirely within a city or any city with a population of one million or more that has adopted a local law pursuant to such section:

1. The commissioner shall promulgate rules and regulations establishing uniform standards for a consumer pesticide use information sign which shall be placed in retail establishments that sell general use pesticides for commercial or residential lawn application. This sign shall be in both the English and Spanish languages, and any other languages if the commissioner deems it necessary pursuant to rules and regulations, and shall contain the following information:

a. a warning notice directing consumers to follow directions on

labels;

b. a provision to inform the customer of the posting requirements set forth in paragraph c of subdivision one of section 33-1004 of this article; and

c. a recommendation that the customer notify neighbors prior to the application of pesticides so that such neighbors may take precautions to avoid pesticide exposure.

2. The commissioner shall prepare and publish, in consultation with the commissioner of health, educational materials, in both the English and Spanish languages and any other languages if the commissioner deems it necessary, explaining the requirements of paragraphs b and c of subdivision one of section 33-1004 of this article and section three hundred ninety-c of the social services law and the human and environmental health effects of lawn care pesticides.

3. a. The commissioner shall promulgate rules and regulations specifying the following: the content and form of the written notice required in paragraph b of subdivision one of section 33-1004 of this article, with the content consisting minimally of the following:

(i) the address of the premises where application is to be done;

(ii) the name and telephone number and pesticide business registration number or certified applicator number of the person providing the application;

(iii) the specific date of each pesticide application and two alternative dates to the proposed date of application when, due to weather conditions, the pesticide application on the proposed date is precluded;

(iv) the product name or names and the United States Environmental Protection Agency registration number or numbers of the pesticide or pesticides to be applied;

(v) a prominent statement that reads: "This notice is to inform you of a pending pesticide application to: 1. a neighboring property; or 2. this premise. You may wish to take precautions to minimize pesticide exposure to yourself, family members, pets or family possessions.

Further information about the product or products being applied, including any warnings that appear on the labels of such pesticide or pesticides that are pertinent to the protection of humans, animals or the environment, can be obtained by calling the National Pesticides Telecommunications Network at 1-800-858-7378 or the New York State Department of Health Center for Environmental Health Info line at 1-800-458-1158".

b. The commissioner shall review and revise as necessary the phone numbers required to appear in notices pursuant to this section and pursuant to section four hundred nine-h of the education law and section three hundred ninety-c of the social services law. Notwithstanding the provisions of the state administrative procedure act, such phone numbers shall be established as a rule by publication in the environmental notice bulletin.

c. The written notice required by paragraph b of subdivision one of section 33-1004 of this article shall be in both the English and Spanish languages, and any other languages if the commissioner deems it necessary pursuant to rules and regulations.

4. The commissioner shall promulgate rules and regulations specifying: the manner in which persons providing commercial lawn application shall supply written notice as required under paragraph b of subdivision one of section 33-1004 of this article including, but not limited to, mailing, or leaving with a responsible adult or in a conspicuous location on the premises or abutting property; the manner in which the owner or owner's agent of multiple family dwellings covered under paragraph b of subdivision one of section 33-1004 of this article shall supply such written notice to the occupants of such multiple family dwellings; and for all other premises covered under paragraph b of subdivision one of section 33-1004 of this article, the manner in which the owner, owner's agent or other person in a position of authority shall supply such written notice. Such rules and regulations shall specify a manner in which persons providing commercial lawn applications may provide an option to occupants of dwellings to decline further notices.

5. The commissioner is hereby authorized to promulgate rules and regulations, not inconsistent with any other provisions of law, specifying procedures for the department's investigation and processing of alleged violations of paragraph c of subdivision one of section 33-1004 of this article that pertain to persons performing residential lawn applications. Such uniform procedures may require complaints to be in the form of a sworn statement containing the facts upon which an alleged violation is based and may provide that the department is not required to perform any testing or sampling in relation to the investigation of any such alleged violations.

* NB There are 2 § 33-1005's

TITLE 11

PROTECTION OF GRAPE GROWING AREAS

Section 33-1101. Petition for protection of a grape growing area.

33-1103. Public hearing.

33-1105. Orders.

§ 33-1101. Petition for protection of a grape growing area.

1. The requirements for a petition for protection of a grape growing area are as follows:

a. The petition must be in a form prescribed by the commissioner;

b. The petition must be signed by ten or more grape growers in the same or contiguous towns in the state;

c. The petition must allege that the use of 2,4-D (2,4 Dichlorophenoxyacetic acid), 2,4-5-T (Trichlorophenoxyacetic acid) or MCP (2 Methyl, 4 Chlorophenoxyacetic acid) in proximity to grape vineyards or crops of grapes described in the petition has proved harmful to the development of grapevines or the grape crop in the affected area in the same or any prior year; and

d. The petition must request that the use of such chemical substances be prohibited or restricted within the affected area.

2. In counting the required number of petitioners, joint tenants or tenants by the entireties shall be counted as one signer.

3. The commissioner shall ascertain whether at least ten of the signers of the petition are grape growers and owners of grape vineyards within the affected area.

§ 33-1103. Public hearing.

1. If the commissioner determines that the petition is properly filed, he shall hold a public hearing.

2. The commissioner shall give at least ten days' notice of the time and place at which the hearing will be held, as follows:

a. By posting in at least five of the most public places within the affected area; and

b. By notice by mail to each of the petitioners and to each manufacturer, supplier and dealer furnishing the chemical substances complained of within the affected area, so far as is known to the commissioner, after diligent inquiry.

3. Proof of notice shall be evidenced by affidavit of the commissioner appended to the minutes of the hearing at which the petition is considered.

§ 33-1105. Orders.

1. If the commissioner finds, from testimony adduced, that:

a. There has been actual damage to grapevines or grape crops within the affected area; and

b. Such damage was caused by the use of the chemical substance complained of in the petition, and by that cause alone; and

c. Such use was upon lands within the affected area or in proximity to the affected area, or upon the damaged crop itself; and

d. The commercial production of grapes within the affected area constitutes a major source of agricultural income within the affected area; then the commissioner may issue his order prohibiting or restricting the use of 2,4-D (2,4-D Dichlorophenoxyacetic acid), 2,4-5-T (Trichlorophenoxyacetic acid) or MCP (2 Methyl, 4 Chlorophenoxyacetic acid) within or in proximity to the affected area for a period of time to be specified in the order. The affected area may be altered by description in the order of the commissioner, if the commissioner finds that such alteration should be made to effectuate the purposes of the petition. All restrictions upon the use of 2,4-D (2,4-Dichlorophenoxyacetic acid), 2,4-5-T (Trichlorophenoxyacetic acid) or MCP (2 Methyl, 4 Chlorophenoxyacetic acid) within or in proximity to the affected area shall be set forth in the order with particularity.

2. The order shall continue in effect from year to year unless modified or rescinded by the commissioner. Not later than February 15 of each year, the commissioner shall give notice of the order by publication in a newspaper of general circulation in the area affected. The notice shall state the terms of the order in general language and that the order will continue in effect for the period of time specified in the order, unless a petition for modification or rescission of the order, signed by ten or more grape growers or fifty or more persons not grape growers in the affected area is filed with the commissioner on or before March 1 of such year.

3. If a request for modification or rescission is received, the commissioner shall hold a hearing after giving notice as provided in section 33-1103. After the hearing, the commissioner shall make such

findings as the evidence adduced justifies and may continue, modify, or rescind the order. If the commissioner modifies or rescinds the order, he shall give notice of his action as provided in subdivision 4 of this section.

4. All orders shall be effected upon posting the same prominently in at least five of the most public places within the affected area. They shall also be published in a newspaper having general circulation in the areas affected but such publication shall not be a condition precedent to their effectiveness.

TITLE 12

PESTICIDE SALES AND USE DATA BASE AND RECORDKEEPING AND REPORTING

Section 33-1201. Pesticide sales and use computer data base.

33-1203. Access to pesticide information.

33-1205. Recordkeeping and reporting.

33-1207. Recordkeeping and reporting by importers and manufacturers.

§ 33-1201. Pesticide sales and use computer data base.

1. a. The department shall develop a pesticide sales and use computer data base. The data base shall be maintained at the department.

b. Such data base shall consist of all information compiled from reports submitted to the department pursuant to sections 33-1205 and 33-1207 of this title. Such reports shall be entered into and maintained on a computerized data base and shall be updated annually. Information obtained for and contained in the data base shall be accessible by interested parties only to the extent permitted pursuant to the provisions of subdivision two of this section and paragraph a of subdivision 1 of section 33-1203 of this title.

2. The commissioner shall prepare an annual report summarizing pesticide sales, quantity of pesticides used, category of applicator and

region of application. Pesticide data shall be compiled and reported by both EPA registration number and by active ingredient. The commissioner shall not provide the name, address, or any other information which would otherwise identify a commercial or private applicator, or any person who sells or offers for sale restricted use or general use pesticides to a private applicator, or any person who received the services of a commercial applicator. In accordance with article six of the public officers law, proprietary information contained within such record, including price charged per product, shall not be disclosed. The report shall be posted on the department's website annually by December thirty-first and be submitted to the governor, the temporary president of the senate and the speaker of the assembly.

§ 33-1203. Access to pesticide information.

1. a. The commissioner shall, upon written request of an interested party, in printed or electronic form, as requested by such party provide the information on pesticides submitted to the department pursuant to sections 33-1205 and 33-1207 of this title. Such information shall be provided by county or counties, or five-digit zip code or codes as selected by the interested party making the written request. Pesticide data shall be provided by EPA registration number, product name and active ingredient. The commissioner shall not provide the name, address, or any other information which would otherwise identify a commercial or private applicator, or any person who sells or offers for sale restricted use or general use pesticides to a private applicator, or any person who received the services of a commercial applicator. In accordance with article six of the public officers law, proprietary information contained within such record, including price charged per product, shall not be disclosed. The provisions of this paragraph shall not apply to the provision of pesticide data to the commissioner of health, the health research science board and researchers pursuant to title one-B of article twenty-four of the public health law.

b. The department shall, upon request from the department of health, compile pesticide application information by nine-digit zip code and

provide the information to the commissioner of health for researchers entitled to receive information pursuant to paragraph (d) of subdivision one of section twenty-four hundred eleven of the public health law provided, however, if the nine-digit zip code cannot be determined, the information shall be compiled by town or city.

2. The fees for copies of information shall not exceed twenty-five cents per photocopy not in excess of nine inches by fourteen inches, or the actual cost of reproducing any information.

§ 33-1205. Recordkeeping and reporting.

1. All commercial applicators shall maintain pesticide use records for each pesticide application containing the following:

- a. EPA registration number;
- b. product name;
- c. quantity of each pesticide used;
- d. date applied;
- e. location of application by address (including five-digit zip code).

Such records shall be maintained for a period of not less than three years. All commercial applicators shall file, at least annually, a report or reports containing such information with the department in an electronic format developed or accepted by the department consistent with system file specifications or on scannable forms, if developed by the department, on or before February first for the prior calendar year. All commercial applicators shall also maintain corresponding records of the dosage rates, methods of application and target organisms for each pesticide application. These records shall be maintained on an annual basis and retained for a period of not less than three years and shall be available for inspection upon request by the department.

2. a. Every person who sells or offers for sale restricted use pesticides to private applicators shall issue a record to the private applicator of each sale of a restricted use pesticide or a general use pesticide used in agricultural crop production to such applicator. Such record of each sale shall include the following:

1. EPA registration number;
2. product name of the pesticide purchased;
3. quantity of the pesticide purchased;
4. date purchased;

5. location of intended application by address (including five-digit zip code) or if address is unavailable by town or city (including five-digit zip code) if the location of intended application differs from the billing address that appears on the record.

Every person who sells or offers for sale restricted use pesticides to private applicators shall file, at least annually, a report or reports containing such information with the department in an electronic format developed or accepted by the department consistent with system file specifications or on scannable forms, if developed by the department, on or before February first for the prior calendar year. The department shall not use the reports filed pursuant to this paragraph for enforcement purposes.

b. All private applicators shall maintain, at a minimum, records of the restricted pesticides purchased, crop treated by such, method of application, and date of application or applications. This information shall be maintained on an annual basis and retained for a minimum of three years, and shall be available for inspection upon request by the department.

c. A private applicator shall, upon request, within six months,

provide site-specific information relating to pesticide applications to any researcher entitled to receive information pursuant to paragraph (d) of subdivision one of section twenty-four hundred eleven of the public health law, provided, however, such request shall not be granted during planting and harvesting unless at a time and in a manner that is mutually convenient.

§ 33-1207. Recordkeeping and reporting by importers and manufacturers.

1. Each person manufacturing or compounding a registered restricted use pesticide in this state, or importing or causing a registered restricted use pesticide to be imported into this state for use, distribution, or storage, shall maintain records of all sales within the state during the preceding year of each restricted use pesticide product which he or she has imported, manufactured or compounded. The record of each restricted use pesticide product shall include:

- a. EPA registration number;
- b. container size; and
- c. number of containers sold to New York purchasers.

2. Such records shall be maintained for a period of not less than three years. All manufacturers and importers shall file an annual report containing such information with the department in an electronic format developed or accepted by the department consistent with system file specifications on or before February first for the prior calendar year.

TITLE 13

UNLAWFUL ACTS

Section 33-1301. Unlawful acts.

33-1303. Registration not a defense.

§ 33-1301. Unlawful acts.

It shall be unlawful:

1. For any person to distribute, sell, offer for sale or use within this state or deliver for transportation or transport in intrastate commerce or between points within this state through any point outside this state any of the following:

a. Any pesticide which has not been registered pursuant to the provisions of this article or any pesticide if any of the claims made for it or any of the directions for its use differ in substance from the representations made in connection with its registration, or if the composition of a pesticide differs from its composition as represented in connection with its registration; provided that in the discretion of the commissioner a change in the labeling or formula of a pesticide may be made within a registration period without requiring reregistration of the product.

* b. Except as specified in regulation authorizing alternative pesticide containers, any pesticide unless it:

(1) is in the registrant's or the manufacturer's unbroken immediate container, and there is affixed to such container, and to the outside container or wrapper of the retail package, if there be one, through which the required information on the immediate container cannot be clearly read, a label bearing (i) the name and address of the manufacturer, registrant, or person for whom manufactured;

(ii) the name, brand, or trade-mark under which said article is sold; and

(iii) the net weight or measure of the content; subject, however, to such reasonable variations as the commissioner may permit; or

(2) meets the requirements of subparagraph one of this paragraph except that the container has been accidentally damaged during handling prior to sale and the damage has been repaired by such person in accordance with his or her own specific "minor repair program" approved by the United States environmental protection agency pursuant to its October ninth, two thousand nine pesticide container repair interim policy. A copy of the approved program shall be forwarded to the

department within thirty days of approval and shall be kept at the person's place of business and be available for department review upon request.

* NB Effective until July 1, 2028

* b. Except as specified in regulation authorizing alternative pesticide containers, any pesticide unless it is in the registrant's or the manufacturer's unbroken immediate container, and there is affixed to such container, and to the outside container or wrapper of the retail package, if there be one, through which the required information on the immediate container cannot be clearly read, a label bearing:

(1) The name and address of the manufacturer, registrant, or person for whom manufactured;

(2) The name, brand, or trade-mark under which said article is sold; and

(3) The net weight or measure of the content; subject, however, to such reasonable variations as the commissioner may permit.

* NB Effective July 1, 2028

c. Any pesticide which contains any substance or substances in quantities highly toxic to man, determined as provided in section 33-0303, unless the label shall bear, in addition to any other matter required by this article:

(1) The skull and crossbones;

(2) The word "poison" prominently, in red, on a background of distinctly contrasting color; and

(3) A statement of an antidote for the pesticide.

d. The pesticide commonly known as standard lead arsenate, basic lead arsenate, calcium arsenate, magnesium arsenate, zinc arsenate, zinc arsenite, sodium fluoride, sodium fluosilicate, and barium fluosilicate, unless they have been distinctly colored or discolored as provided by regulations issued in accordance with this article, or any other white powder pesticide which the commissioner, after investigation of and after public hearing on the necessity for such action for the protection of the public health and the feasibility of such coloration or discoloration, shall, by regulation, require to be distinctly colored or discolored; unless it has been so colored or discolored; provided, that

the commissioner may exempt any pesticide to the extent that it is intended for a particular use or uses from the coloring or discoloring required or authorized by this section if he determines that such coloring or discoloring for such use or uses is not necessary for the protection of the public health.

e. Any pesticide which is adulterated or misbranded.

2. For any person to detach, alter, deface, or destroy, in whole or in part, any label or labeling provided for in this article or regulations promulgated hereunder, or to add any substance to, or take any substance from, a pesticide in a manner that may defeat the purpose of this article.

3. For any person to use for his own advantage or to reveal, other than to the commissioner or proper officials or employees of the state or to the courts of this state in response to a subpoena, or to physicians, or in emergencies to pharmacists and other qualified persons, for use in the preparation of antidotes, any information relative to formulas of products acquired by authority of this article.

4. For any person to store or dispose of any pesticide, or of any container which holds or has held a pesticide, except in compliance with the rules and regulations of the commissioner.

5. For any person to distribute, sell, offer for sale, purchase for the purpose of re-sale, or possess for the purpose of re-sale any restricted use pesticide without a commercial permit issued by the commissioner.

6. For a commercial permit holder to sell restricted use pesticides except to the holder of a non-cancelled purchase permit or to the holder of a commercial permit or a certified applicator.

7. For any person to purchase or possess, except for the purpose of re-sale, or use any restricted use pesticide without a purchase permit issued by the commissioner or without being a certified applicator.

8. For any person to engage in application of pesticides without a pesticide applicator certificate registration issued by the commissioner, except while working under the direct supervision of a certified applicator.

8-a. For any person or business to engage in the business of applying pesticides unless the business is registered by the commissioner.

9. For any person to use 2,4-D (2,4-Dichlorophenoxyacetic acid), 2,4-5-T (Trichlorophenoxyacetic acid) or MCP (2 Methyl, 4 Chlorophenoxyacetic acid) within or in proximity to an affected area, in violation of an order of the commissioner prohibiting or restricting such use.

10. For any person to remove or dispose of a seized or quarantined pesticide by sale or otherwise without the commissioner's permission.

11. In cities with a population of one million or more, it shall be unlawful to use any pesticide containing the active ingredient 4-aminopyridine, including but not limited to Avitrol.

12. For any state department, agency, public benefit corporation or any pesticide applicator employed thereby as a contractor or subcontractor to apply glyphosate on state property, provided that the application of glyphosate on state property is permitted only for (a) direct application in circumstances when there is no actual or significant threat of direct human exposure and no effective and practicable alternative, and (b) for the following uses, pursuant to regulations promulgated by the department:

- (i) to maintain critical infrastructure;
- (ii) to manage roadside vegetation to ensure public safety;
- (iii) habitat management for the control of invasive species identified pursuant to title seventeen of article nine of this chapter, pests of significant public health importance, noxious weeds designated by the department as injurious to ecosystem health, and the protection of critical native plant species; and

(iv) for research purposes to develop sustainable alternatives for agricultural and environmental usages, as well as research regarding the environmental motility of glyphosate.

The department shall post information on its website regarding glyphosate usage pursuant to this section, including amount and location, by April first of each year.

13. a. It shall be unlawful for any person to apply or treat outdoor ornamental plants and turf, except for the production of agricultural commodities or structural commercial applications within one foot of a building foundation perimeter to manage structural pests provided that the application is not conducted on any blooming plant, with a pesticide containing:

(1) the active ingredients imidacloprid, thiamethoxam or acetamiprid on or after December thirty-first, two thousand twenty-six;

(2) the active ingredients clothianidin or dinotefuran effective December thirty-first, two thousand twenty-four.

b. (1) The provisions of paragraph a of this subdivision shall not apply where the department, by written order, determines that:

(i) a valid environmental emergency exists;

(ii) the pesticide would be effective in addressing the environmental emergency; and

(iii) no other, less harmful pesticide or pest management practice would be effective in addressing the environmental emergency.

(2) Any such order shall include the basis for the department's determination and specify the approved time period, geographic scope, and purpose of the permitted use of such pesticide. An order issued pursuant to this section shall be valid for a period not to exceed one year.

c. The provisions of this subdivision shall not apply to pesticide applications by, or under the supervision of, a certified applicator for treatment against invasive species affecting woody plants.

d. For the purposes of this subdivision "environmental emergency"

means: an occurrence of any pest which presents a significant risk of harm or injury to the environment, or significant harm, injury, or loss to agricultural crops, including, but not limited to, any exotic or foreign pest.

e. Applicators using a pesticide containing the active ingredients imidacloprid, thiamethoxam, acetamiprid, clothianidin, or dinotefuran pursuant to paragraph b or c of this subdivision must take a department approved neonicotinoid course annually and maintain a record of this course for three years.

§ 33-1303. Registration not a defense.

In no event shall registration of a pesticide, be construed as a defense for the commission of any offense prohibited under subdivisions 1 through 7 of section 33-1301.

TITLE 15

SEIZURE

Section 33-1501. Pesticides which may be seized.

33-1503. Procedure following seizure.

§ 33-1501. Pesticides which may be seized.

1. Any pesticide that is distributed, sold, offered for sale or used within this state or delivered for transportation or transported in intrastate commerce or between points within this state through any point outside this state may be seized for confiscation or be made the subject of a stop-use order:

a. If it is adulterated or misbranded, or if it has not been registered as required under this article;

b. If it fails to bear on its label the information required by this

article;

c. If it is a white powder pesticide and is not colored as required under this article;

d. If a permit required by this article has not been issued in respect to such pesticide; or

e. If there is probable cause to believe a pesticide is being used in violation of any provision of this article, title three of article fifteen of this chapter or rules or regulations promulgated pursuant to any such provision.

2. Whenever the commissioner or his duly authorized representative shall find distributed, sold, exposed or offered for sale within this state any pesticide which is adulterated or misbranded as defined in this article, or which fails to bear on its label the information required by this article, or which is not colored or registered as required under this article, or for which a permit has not been issued for its sale, offer for sale, purchase, possession or use as required by this article, he may seize or destroy such pesticide.

3. Whenever the commissioner finds, or has probable cause to believe, that a pesticide is being used in violation of any provision of this article, title three of article fifteen of this chapter, or rules and regulations promulgated pursuant thereto, the commissioner may issue a stop-use order requiring the user of the pesticide immediately to cease using such pesticide and immediately to remove such pesticide to the specified location. Within thirty days of the issuance of a stop-use order, the commissioner shall either rescind the stop-use order or commence a proceeding to seize and destroy such pesticides.

§ 33-1503. Procedure following seizure.

1. Whenever the commissioner finds, or has probable cause to believe, that any pesticide is adulterated or misbranded or improperly labeled,

or is not colored within the meaning of this article, or is not registered as required under this article, or for which a permit has not been issued for its sale, offer for sale, purchase, possession or use as required by this article, he may affix to such pesticide a tag or other appropriate marking giving notice that such pesticide is or is suspected of being adulterated or misbranded, or improperly labeled, or not colored, or not registered as required under this article, or for which a permit has not been issued for its sale, offer for sale, purchase, possession or use as required by this article, and has been quarantined, and warning all persons not to remove or dispose of such pesticide, by sale or otherwise, until permission for removal or disposal is given by the commissioner or his duly authorized representative.

2. Before destruction of any pesticide following seizure or quarantine, the commissioner shall give the owner, proprietor or custodian of such pesticide ten days' notice in writing, to be served either personally or by mail, of a hearing for the owner, proprietor, or custodian, to show cause why such pesticide should not be destroyed or otherwise disposed of in accordance with the provisions of law.

3. Following such hearing, the commissioner shall render a decision in writing and filed with the department, and a copy thereof shall be served either personally or by mail on the owner, proprietor, or custodian of such pesticide, but formal findings of fact shall not be required to be made or filed. The decision shall be subject to review under article 78 of the Civil Practice Law and Rules instituted within thirty days after receipt by the owner, proprietor or custodian of such pesticide of a copy of the commissioner's decision.

4. Whenever any pesticide is seized or quarantined as provided in this section, the destruction and disposition thereof, together with any necessary storage, handling or other incidentals between the time of seizure or quarantine and the destruction and disposition thereof, shall be the responsibility, both financially and otherwise, of the owner, proprietor or custodian of such pesticide; provided, however, that such destruction and disposition shall be carried out only under the direction and immediate supervision of the commissioner or his duly

authorized representative.

ARTICLE 34

COASTAL EROSION HAZARD AREAS

Section 34-0101. Statement of findings.

34-0102. Declaration of policy.

34-0103. Definitions.

34-0104. Identification of coastal erosion hazard areas.

34-0105. Local regulation of coastal erosion hazard areas.

34-0106. County regulation of coastal erosion hazard areas.

34-0107. Department regulation of coastal erosion hazard areas.

34-0108. Rules and regulations.

34-0109. Administration; applications for permits.

34-0110. Provision of technical assistance.

34-0111. Severability.

34-0112. Judicial review.

34-0113. Applicability.

§ 34-0101. Statement of findings.

1. Certain sections of the coastline of the state of New York are prone to erosion from action of the adjacent water bodies. Such erosion may be caused by the action of waves, currents running along the shore, tides, wind-driven water and ice as well as human activities such as construction and shipping. Such areas are also prone to erosion caused by the wind, runoff of rain water along the surface of the land, or groundwater seepage as well as by human activities such as construction, navigation and certain forms of recreation.

2. Coastal erosion causes extensive damage to publicly and privately owned property and to natural resources as well as endangering human lives. When this occurs, individuals and private businesses suffer significant economic losses, as does the state's economy, either directly through property damage or indirectly through loss of economic return. Large public expenditures may also be necessitated for the

removal of debris and damaged structures and replacement of essential public facilities and services.

3. Man often contributes to erosion-related problems by building without considering the potential for damage to property, by undertaking activities which destroy natural protective features such as dunes or vegetation and by building structures intended for erosion prevention which may exacerbate erosion conditions on adjacent or nearby property, and by water action produced by wakes from boats.

4. Programs to build erosion protective structures, either with private or public funds, are costly, often only partially effective over time, and may even be harmful to adjacent or nearby properties, and in some sections of the state major erosion protective structures of great length would be required to effectively reduce future damages due to erosion.

§ 34-0102. Declaration of policy.

It is declared to be the public policy of the state of New York that:

1. Those areas of the state's coastline most prone to erosion hazards should be identified.

2. Any activities, development or other actions in such erosion hazard areas should be undertaken in such manner as to minimize damage to property, and to prevent the exacerbation of erosion hazards. Such actions may be restricted or prohibited if necessary to protect natural protective features or to prevent or reduce erosion impacts.

3. Local governments should be encouraged to use all authorities that can be applied within the identified erosion hazard areas to achieve these objectives.

4. Public actions, such as the provision of additional municipal services, which are likely to encourage new permanent activities or

development within coastal erosion hazard areas should not occur unless such hazard areas have been protected by erosion protection structures or non-structural measures which are most likely to prevent damage from effects of erosion during the anticipated life of the proposed activities or development.

5. Publicly-financed structures to minimize erosion damage should be utilized only where necessary to protect human life, existing investment in development or new development which requires a location within the erosion hazard area or adjacent coastal waters to be able to function. Both publicly and privately financed erosion protective structures should be designed to minimize damage to other man-made property or to natural protective features or to other natural resources; long term costs of such structures should be carefully weighed against public benefits before construction is undertaken.

§ 34-0103. Definitions.

1. "Activities or development" shall mean any land use, construction or placement by any person of a structure, or any action which materially alters the condition of land, including grading and excavating or other disturbance of soil. The term shall include the division of land into lots, parcels or sites.

2. "Coastal erosion" or "erosion" shall mean loss or displacement of land along the coastline due to the action of waves, currents running along the shore, tides, wind-driven water or water-borne ice or other impacts of coastal storms. It shall also mean loss or displacement of land along the coastline due to the action of wind, runoff of surface waters, or groundwater seepage.

3. "Coastal erosion hazard area" or "erosion hazard area" shall mean those areas of the coastline:

(a) Which are determined as likely to be subject to erosion within a forty-year period. The inland boundary of such areas shall be determined on the basis of shoreline recession analysis and other pertinent studies

and surveys by starting at the bluff edge or most landward point of active erosion and measuring along a line which is normal to the line of mean high water a distance which is forty times the long-term average annual rate of shoreline recession, where such average annual recession rate is at least one foot; or

(b) Which constitute natural protective features, the alteration of which might reduce or destroy the protection afforded other lands against erosion, or lower the reserves of sand or other natural materials available to replenish storm losses through natural processes.

The erosion hazard area is to be identified as provided in section 34-0104 of this article and shall be the area within which new activities or development shall be reviewed to effectuate the policies and purposes of this article to minimize damage caused by erosion to structures and to prevent damage to natural protective features caused by activities or development, as provided for in section 34-0108 of this article.

4. "Coastline" shall mean the lands adjacent to the state's coastal waters, including lakes Erie and Ontario, the St. Lawrence and Niagara rivers, the Hudson river south of the federal dam at Troy, the East river, the Harlem river, the Kill van Kull and Arthur Kill, Long Island sound and the Atlantic ocean, their connecting water bodies, bays, harbors, shallows and marshes.

5. "Erosion protective structure" shall mean a structure specifically designed to reduce or prevent erosion including man made protection features created by landfill or deposition.

6. "Land" shall mean the earth, on or below the surface of the ground, including water and air above.

7. "Local government" shall mean a village, town (outside the area of any incorporated village), city or county.

8. "Natural protective features" shall mean without limitation, beaches, dunes, shoals, bars, spits, barrier islands, bluffs and

wetlands; associated natural vegetation shall also be considered as part of such natural protective features.

9. "Person" shall mean any individual, public or private corporation, political subdivision, government agency, partnership, association, firm, trust, estate or any other legal entity whatsoever.

10. "State agency" shall mean any department, bureau, commission, board, public authority or other agency of the state, including any public benefit corporation, any member of which is appointed by the governor.

11. "Structure" shall mean any object constructed, installed or placed on land or in water, including, but not limited to, buildings, permanent sheds, mobile homes, tanks, bulkheads, piers, docks, groins, jetties and any additions or alterations thereto.

12. "Significant fish and wildlife habitat" shall mean habitats which are essential to the survival of a large portion of a particular fish or wildlife population, support rare or endangered species, are found at a very low frequency within a geographic area, support fish or wildlife populations having significant commercial or recreational value or would be difficult or impossible to replace.

§ 34-0104. Identification of coastal erosion hazard areas.

1. The commissioner shall as soon as practicable, but no later than thirty months after the effective date of this article, after the adoption of rules and regulations pursuant to subdivision one of section 34-0108 of this article, and in full cooperation with and consultation with local governments in which such land is located prepare a preliminary identification of the erosion hazard areas of the state's coastline. The identification may, in the discretion of the commissioner, be carried out on a regional basis, with priority given to the identification of critical erosion areas. Such preliminary identification shall include, for each such area, a map showing the area

subject to erosion, a statement of the long-term average annual rate of loss of land in such area from erosion, if applicable, and an identification of any land areas containing or comprising natural protective features the alteration of which might reduce or destroy the protection afforded other lands against erosion, or lower the reserves of sand or other natural materials available to replenish storm losses through natural processes.

2. Upon completion of a preliminary identification of an erosion hazard area, the commissioner or his designated hearing officer shall hold a public hearing in a place reasonably accessible to residents of the affected area in order to afford an opportunity for any person to propose changes in such preliminary identification. The commissioner shall give notice of such hearing to each owner of record, as shown on the latest completed tax assessment rolls, of lands included within such area, and also to the chief executive officer and clerk of each local government within the boundaries of which any portion of such area may be located, by certified mail at least thirty days prior to the date set for such hearing, and shall insure that a copy of the preliminary identification is available for public inspection at a convenient location in such local government. The commissioner shall also cause notice of such hearing to be published at least once, not more than thirty days nor fewer than ten days before the date set for such hearing, in at least one newspaper having general circulation in the area involved and in the environmental notice publication provided for under section 3-0306 of this chapter.

3. After considering the testimony given at such hearings and the potential erosion hazard in accordance with the purposes and policies of this article, and after consultation with affected local governments, the commissioner shall issue the final identification of the erosion hazard areas. Such final identification shall not be made less than sixty days from the date of the public hearing required by subdivision two hereof. A copy of such final identification shall be filed in the office of the clerk of each local government in which such area or any portion thereof is located. Notice that such final identification has been made shall be given each owner of lands included within the erosion

hazard area, as such ownership is shown on the latest completed tax assessment rolls, by certified mail in any case where a notice by certified mail was not sent pursuant to subdivision two of this section, and in all other cases by first class mail. Such notice shall also be given at such time to the chief executive officer of each local government within the boundaries of which such erosion hazard area or any portion thereof is located.

4. The commissioner shall review the boundaries of each erosion hazard area identified pursuant to this section ten years from the date of its identification and every ten years thereafter. The commissioner may revise erosion hazard area maps not sooner than twelve months after the occurrence of a major man made or natural event or a major coastal storm if he determines that topographical changes or loss of structural protection at the end of such a twelve month period and as a result of such event or such storm justify, pursuant to the regulations of the department, adjustment of the erosion hazard area boundary by twenty-five feet or more. Following such review, the commissioner shall adjust the boundaries of such erosion hazard area to effect any additions, deletions or technical changes, or to reflect any changes due to erosion, accretion or other natural or man-made changes. The commissioner shall follow the procedures set forth in subdivisions two and three of this section with respect to any lands which are proposed to be added to or deleted from an erosion hazard area because of an adjustment of the boundaries of such erosion hazard area pursuant to this subdivision.

5. The commissioner shall maintain a current file of maps or descriptions of all erosion hazard areas pursuant to this article, which shall be available to the public for inspection and examination at the regional office of the department in which the area is wholly or partly located and in the office of the clerk of each local government in which each such area or part thereof is located.

§ 34-0105. Local regulation of coastal erosion hazard areas.

1. Within six months after the date on which a final identification of an erosion hazard area is filed with the clerk of a city, town or village pursuant to subdivision three of section 34-0104 of this article, such city, town or village shall submit to the commissioner an erosion hazard area ordinance or local law applicable to that portion of such area located within its jurisdiction. Then the commissioner shall review and certify such regulations as being consistent with the purposes of this article and in accordance with minimum standards promulgated under section 34-0108 of this article. All such ordinances or local laws shall include a map or other identification of the erosion hazard area subject to regulation, and zoning regulations, subdivision regulations, site plan approval regulations or any other applications of the police power, as such regulations may be authorized by the municipal home rule law or other state enabling legislation, for the reasonable and prudent use of erosion hazard areas in accordance with minimum standards promulgated by the commissioner pursuant to section 34-0108 of this article. Nothing in this article shall be construed to increase the powers of any city, town or village; provided, however, that to carry out the purpose of this article, any regulations adopted in compliance with the provisions of this subdivision may be made applicable to only that portion of such city, town or village which is located within the erosion hazard area. The commissioner shall provide whatever technical assistance he may deem necessary for preparation of an ordinance or local law pursuant to this section.

2. Such erosion hazard area ordinance or local law shall be subject to public notification and review and, be submitted to the commissioner for approval as to its consistency with the minimum standards promulgated pursuant to section 34-0108 of this article; the commissioner shall act to approve or disapprove such ordinance or local law within thirty working days of its receipt. If the commissioner disapproves the ordinance or local law, he shall notify the city, town or village in writing of the reasons for such disapproval, or modification necessary for approval. The commissioner shall issue findings as part of his decision.

3. In the case of the commissioners disapproval of a local law or

ordinance under subdivision two of this section, the commissioner, at his discretion, may extend the six month period for the adoption of an erosion hazard area local law or ordinance for a reasonable time period not to exceed an additional six months, during which time, the local government may adopt and re-submit a new or modified local law or ordinance to the commissioner for approval as provided in subdivision two of this section. During such extension period, provisions of section 34-0106 of this article shall not apply.

4. Prior to the adoption of any amendment to an approved erosion hazard area ordinance or local law, the local government shall notify the commissioner, who shall within fifteen days after receipt of such notification advise the local government whether such amendment conforms to the minimum standards promulgated pursuant to section 34-0108 of this article. Any amendment to such ordinance or local law that relates to such minimum standards shall be subject to approval by the commissioner as provided in subdivision two of this section.

5. The commissioner shall revoke his approval of an erosion hazard area ordinance or local law if he determines, after notice and hearing relative thereto, that the affected city, town or village has failed to administer or enforce such ordinance or local law to adequately carry out the purposes and policies of this article. In the event of such revocation, the provisions of subdivision seven of section 34-0106 of this article or the provisions of subdivision three of section 34-0107 of this article shall apply.

6. Where an application is made for any permit, variance or other form of approval required pursuant to any local law or ordinance enacted or adopted and approved by the commissioner pursuant to this section, for any activity or development within a designated erosion hazard area, the city, town or village to which such application is made shall ascertain what, if any, other permit, variance or hearing procedures or applications are required with regard to such activity or by any governing body of the state or any of its subdivisions pursuant to any federal, state or local law or ordinance. Such city, town or village, at the request of the applicant, shall consolidate and coordinate said

application, permit, variance and hearing procedures, as required by each such governing authority, into a single, comprehensive hearing and review procedure with regard to such activity or development. However, nothing contained in this section shall be deemed to limit or restrict the state, its subdivisions or any other governing authorities, which are properly a party to such consolidated review proceeding, from the independent exercise of such discretionary authority with respect to the issuance, denial or modification of such permits, variances or other forms of approval as they may have been granted by law.

§ 34-0106. County regulation of coastal erosion hazard areas.

1. If a city, other than a city which wholly includes one or more counties, a town or village fails to submit an erosion hazard area ordinance or local law to the commissioner within the time specified in subdivision one of section 34-0105 of this article, as such time may be extended by the commissioner under subdivision three of such section or if an ordinance or local law has been disapproved pursuant to subdivision two of such section, the commissioner shall notify the clerk of the legislative body of the county in which such city, town or village is located. Within six months from receipt of such notification, such county shall submit to the commissioner a county erosion hazard area local law meeting the criteria specified in subdivision one of section 34-0105 of this article, applicable to the erosion hazard area of such city, town or village. Notwithstanding any other provisions of law, whether general or special, or any provision of local law or ordinance, to carry out the purposes of this section, counties shall, within the erosion hazard area subject to such county local law, be deemed to possess the same implementation powers as could be exercised by the city, town or village within which the erosion hazard area is situated. The commissioner shall provide whatever technical assistance he may deem necessary for preparation of a local law pursuant to this section.

2. Such county erosion hazard area local law shall be subject to public notification and review and, be submitted to the commissioner for

approval as to its consistency with the minimum standards promulgated pursuant to section 34-0108 of this article; the commissioner shall act to approve or disapprove such local law within thirty working days of its receipt. If the commissioner disapproves the local law, he shall notify the county legislative body in writing of the reasons for such disapproval or modification necessary for approval. The commissioner shall issue findings as part of his decision.

3. In case of disapproval of a county erosion hazard area local law under subdivision two of this section, the commissioner at his discretion may extend the six month period for adoption of such local law for a reasonable time period not to exceed an additional six months, during which time, the county may adopt and re-submit a new or modified county erosion hazard area local law to the commissioner for approval as provided in subdivision two of this section.

4. Prior to the adoption of any amendment to an approved county erosion hazard area local law, the county shall notify the commissioner, who shall within fifteen days after receipt of such notification advise the county whether such amendment relates to the minimum standards promulgated pursuant to section 34-0108 of this article. Any amendment to such local law that relates to such minimum standards shall be subject to approval by the commissioner as provided in subdivision two of this section.

5. Nothing in this section shall be construed to prohibit any city, town or village from adopting and enforcing any ordinances or local laws, or exercising any other lawful powers within any area governed by an approved county erosion hazard area local law; provided, however, that to the extent of any inconsistency between a city, town or village ordinance or local law and an approved county erosion hazard area local law, the latter shall apply.

6. In any city, town or village where there is in effect a county erosion hazard area local law adopted pursuant to this section, nothing herein shall be construed as preventing such city, town or village from submitting, at any time, an erosion hazard area ordinance or local law

to the commissioner for approval pursuant to section 34-0105 of this article. If such ordinance or local law is approved by the commissioner, he shall immediately notify the affected county, and the county local law shall cease to apply to the affected erosion hazard area from the date of receipt by the county of such notification.

7. (a) If approval of a city (other than a city which wholly includes one or more counties), town or village erosion hazard area ordinance or local law is revoked by the commissioner pursuant to subdivision four of section 34-0105 of this article, the commissioner may designate the county in which such city, town or village is located to administer and enforce such city, town or village ordinance or local law so as to insure compliance of activities or development in the affected erosion hazard area with the minimum standards promulgated pursuant to section 34-0108 of this article. Such county shall be deemed to possess all administrative and enforcement powers included in such city, town or village ordinance or local law.

(b) The commissioner shall reinstate approval of the city, town or village ordinance or local law when the commissioner is satisfied that the city, town or village will carry out the purposes and policies of this article, at which time administration and enforcement by the county pursuant to this subdivision shall cease, and the city, town or village shall administer and enforce such ordinance or local law.

8. The commissioner shall revoke his approval of a county erosion hazard area local law, or shall revoke his designation pursuant to subdivision six of this section of a county to administer and enforce a city, town or village ordinance or local law, if he determines, after notice and hearing relative thereto, that the affected county has failed to administer or enforce such ordinance or local law to adequately carry out the purposes and policies of this article. In the event of such revocation, the provisions of subdivision three of section 34-0107 of this article shall apply.

9. Where an application is made for any permit, variance or other form of approval required pursuant to any local law enacted and approved by the commissioner pursuant to this section, for any activity or

development within a designated erosion hazard area, the county to which such application is made shall ascertain what, if any, other permit, variance or hearing procedures or applications are required with regard to such activity or development by any governing body of the state or its subdivisions pursuant to any federal, state or local law or ordinance. Such county, at the request of the applicant, shall consolidate and coordinate said application, permit, variance and hearing procedures, as required by each such governing authority, into a single, comprehensive hearing and review procedure with regard to such activity or development. However, nothing contained in this section shall be deemed to limit or restrict the state, its subdivisions, or any other governing authorities, which are properly a party to such consolidated review proceeding, from the independent exercise of such discretionary authority with respect to the issuance, denial or modification of such permits, variances or other forms of approval as they may have been granted by law.

§ 34-0107. Department regulation of coastal erosion hazard areas.

1. If a city which wholly includes one or more counties fails to submit an erosion hazard area local law or ordinance to the commissioner within the time specified in subdivision one of section 34-0105 of this article, as such time may be extended by the commissioner under subdivision three of such section, or if such local law or ordinance has been disapproved pursuant to subdivision two of such section, or if a county fails to submit an erosion hazard area local law to the commissioner within the time specified in subdivision one of section 34-0106 of this article as such time may be extended by the commissioner under subdivision three of such section, or if a county local law has been disapproved pursuant to subdivision two of such section, the commissioner shall, within ninety days after such failure or disapproval, as the case may be, issue and enforce regulations which apply the minimum standards promulgated pursuant to section 34-0108 of this article within the affected erosion hazard area.

2. Prior to the issuance of regulations applicable to a particular

erosion hazard area pursuant to subdivision one of this section, the commissioner shall hold a public hearing thereon in the affected city, town or village, and shall give at least fifteen days prior notice thereof by publication at least once in a newspaper having general circulation therein. The commissioner shall issue the regulations within thirty days after the close of such hearing, shall publish a summary of such regulations in a newspaper having general circulation in the affected city, town or village, and shall make such regulations available for public inspection. Such regulations shall not take effect until thirty days after the filing thereof with the clerk of the affected county.

3. If the commissioner does not designate, pursuant to subdivision eight of section 34-0106 of this article, a county to administer and enforce a city, town or village erosion hazard area ordinance or local law for which approval has been revoked pursuant to subdivision five of section 34-0105 of this article, or if the commissioner, pursuant to subdivision seven of section 34-0106 of this article, revokes his approval of a county erosion hazard area local law or, pursuant to such subdivision revokes his designation of a county to administer and enforce a city, town or village erosion hazard area ordinance or local law, he shall administer and enforce the affected ordinance or local law in such manner as to insure compliance of activities or development in the affected erosion hazard area with the minimum standards promulgated pursuant to section 34-0108 of this article. The commissioner may designate such county to commence administration and enforcement of an ordinance or local law subject to this subdivision upon receiving satisfactory assurance that such administration and enforcement will be undertaken in such manner as to adequately carry out the purposes and policies of this article.

4. Nothing in this section shall be construed to prohibit any local government from adopting and enforcing any ordinances or local laws, or exercising any other lawful powers within any area governed by erosion hazard area regulations adopted pursuant to this section; provided, however, that to the extent of any inconsistency between a county, city, town or village ordinance or local law and erosion hazard area

regulations adopted pursuant to this section, the latter shall apply.

5. In any city, town or village where there are in effect erosion hazard area regulations issued by the commissioner pursuant to this section, nothing herein shall be construed as preventing such city, town or village from submitting, at any time, an erosion hazard area ordinance or local law to the commissioner for approval pursuant to section 34-0105 of this article, or for any county to provide such regulation in absence of local law or ordinance, pursuant to section 34-0106 of this article. Before county assumption of such regulation, there shall be notification given to the city, town or village of such intention by the county, and any objections shall be reviewed and considered by the commissioner before approving such county regulation. When a county, city, town or village local law or ordinance is approved by the commissioner, the erosion hazard area regulations issued by the commissioner pursuant to this section shall cease to apply, and a notice to that effect shall be filed with the clerks of the affected local governments.

6. Consistent with the provisions and purposes of article seventy of this chapter, where an application is made to the commissioner for a permit pursuant to section 34-0109 of this article for any activity or development within a designated erosion hazard area, the commissioner shall ascertain what, if any, other permit, variance or hearing procedures or applications are required with regard to such activity or development by any governing body of the state or any of its subdivisions pursuant to any federal, state or local law or ordinance. The commissioner, at the request of the applicant shall consolidate and coordinate said application, permit, variance and hearing procedures, as required by each such governing authority, into a single, comprehensive hearing and review procedure with regard to such activity or development. However, nothing contained in this section shall be deemed to limit or restrict the state, its subdivisions or any other governing authorities, which are properly a party to such consolidated review proceeding, from the independent exercise of such discretionary authority with respect to the issuance, denial or modification of such permits, variances or other forms of approval as they may have been

granted by law.

§ 34-0108. Rules and regulations.

1. After consultation with affected state agencies and representatives of local governments, and after conducting public hearings and review of any other comments submitted, the commissioner shall adopt rules and regulations implementing the provisions of this article within one hundred eighty days after the effective date hereof.

2. The rules and regulations adopted by the commissioner shall include a procedure pursuant to which any owner of land in an erosion hazard area identified pursuant to section 34-0104 of this article may appeal from the inclusion of such land in such erosion hazard area. Such procedure shall provide that the sole basis for such appeal shall be technical information indicating either (a) that the long-term average annual recession or other method used in identifying the erosion hazard area was incorrect, or (b) that an area has been identified as a natural protective area erroneously, and that the commissioner shall decide such appeal within thirty days after receipt thereof, and shall adjust the boundaries of the identified erosion hazard area or identified natural protective features accordingly.

3. The rules and regulations adopted by the commissioner pursuant to sections 34-0105, 34-0106 and 34-0107 of this article shall establish minimum standards and criteria to be applied to activities or development in erosion hazard areas. Such standards and criteria shall be used to deny, condition or modify a proposed action, if necessary, to implement the policies and purposes of this article. Standards and criteria promulgated pursuant to this section shall include but shall not be limited to:

(a) minimum setback requirements for structures within coastal erosion hazard areas taking into consideration recession rates, the useful life of the proposed structure, and the protection afforded by natural protective features and existing erosion protection structures.

(b) regulation of activities or development, including placement of

erosion protection structures or use of non-structural measures so there will be no measurable increase in erosion to the development site or at other locations.

(c) regulation of activities or development, including placement of erosion protection structures, so as to minimize adverse effects upon natural protective features, existing erosion protection structures or natural resources, such as significant fish and wildlife habitat.

(d) standards and criteria shall provide that erosion protection structures that are proposed for construction or reconstruction shall have a reasonable probability of controlling long-term erosion on the immediate site for a period of at least thirty years and that a long-term maintenance program is provided for such structures; however such standards and criteria may allow for such protection structures to be constructed of materials which by themselves have a working life of less than thirty years, when the maintenance program assures that they will be regularly maintained and replaced as necessary to attain the required thirty years of erosion protection.

(e) restoration and stabilization standards for activities which are to be undertaken in connection with activities or development to insure that land areas are maintained and where necessary restored to minimize erosion on the site or to other nearby lands.

4. The rules and regulations shall provide procedure pursuant to which the strict application of their standards and criteria may be varied or modified in cases where practical difficulty or unnecessary hardship is shown, provided that in granting any such variance, the following criteria are met:

(a) for any proposed activities and development where public funds are utilized the public benefits clearly outweigh the long-range adverse effects.

(b) no reasonable prudent alternative site is available.

(c) all responsible means and measures to mitigate adverse impacts on natural systems in the area have been incorporated into the project design and will be implemented at the developer's expense.

(d) the development will be reasonably safe from flood and erosion damage.

(e) the variance provided will be the minimum necessary to overcome

the practical difficulty or unnecessary hardship which was the basis for requesting such variance.

5. Notwithstanding section 34-0105 or 34-0106 of this article, in the case of any department, bureau, commission, board or other agency of the state, or any public benefit corporation, any member of which is appointed by the governor, a permit shall be obtained from the department pursuant to section 34-0109 of this article provided, however, in cases where there is a local law or ordinance in effect the commissioner shall make a finding prior to the issuance of the permit that the conditions of such local law or ordinance have been met, insofar as such conditions relate to the standards and criteria adopted pursuant to section 34-0108 of this article.

§ 34-0109. Administration; applications for permits.

1. Applicability. (a) Where the commissioner has, pursuant to subdivision one of section 34-0107 of this article, issued regulations which apply the minimum standards promulgated pursuant to section 34-0108 of this article to activities or development within any erosion hazard area, any person proposing to undertake activities or development subject to such regulations shall obtain a permit as provided in this section.

(b) A proposed activity or development in an erosion hazard area shall be deemed an action that is likely to require the preparation of an environmental impact statement pursuant to subparagraph (i) of paragraph (c) of subdivision two of section 8-0113 of this chapter.

2. Applications for permits. (a) An application for a permit shall be submitted in such form and manner as the commissioner may prescribe, and shall contain a detailed description of the proposed development which is sufficient to enable the commissioner to make the findings and determinations required by this section.

(b) Review by the commissioner of applications for permits pursuant to this section shall be governed by the provisions of article seventy of this chapter.

3. Decision. (a) No permit shall be granted pursuant to this section unless the commissioner shall find that the proposed activity complies with the minimum standards promulgated pursuant to section 34-0108 of this article as such standards are applied to the affected erosion hazard area by the regulations issued by the commissioner pursuant to section 34-0107 of this article.

(b) In granting a permit, the commissioner may limit such permit or impose reasonable conditions or limitations designed to carry out the public policy set forth in this article. Upon a finding that the applicant has a record of non-compliance with the terms and conditions of permits, the commissioner may require a bond or other form of financial security in amount and with surety and conditions satisfactory to him to secure compliance with the terms, conditions and limitations set forth in the permit. The commissioner may suspend or revoke a permit if he finds that the applicant has not complied with any of the terms, conditions or limitations set forth in the permit.

§ 34-0110. Provision of technical assistance.

The commissioner shall encourage and assist affected local governments in the preparation and implementation of erosion hazard area ordinances and local laws. When an erosion hazard area has been identified pursuant to section 34-0104 of this article, the commissioner shall provide to the affected local governments whatever technical assistance may be necessary to enable such local governments to prepare and adopt erosion hazard area ordinances or local laws meeting the requirements of section 34-0105 of this article or section 34-0106 of this article, as the case may be. Such efforts shall include, as may be necessary, maps, model erosion hazard area regulations, and other information.

§ 34-0111. Severability.

The provisions of this article shall be severable, and if any clause, sentence, paragraph, subdivision or part of this article shall be

adjudged invalid by a court of competent jurisdiction, such order or judgment shall be confined in its operation to the controversy in which it was rendered, and shall not affect or invalidate the remainder of any provision of any section or the application of any part thereof to any other person or circumstance.

§ 34-0112. Judicial review.

Any person aggrieved by an act, order, determination or decision of the commissioner made pursuant to this article may seek judicial review pursuant to article seventy-eight of the civil practice law and rules in the supreme court for the county in which the erosion hazard area affected is located.

§ 34-0113. Applicability.

The provisions of this article shall not apply to any activities or development for which final approval shall have been obtained from the local government or other authorities having jurisdiction over such activities or development, if such final approval was obtained prior to the date of approval of erosion hazard area regulations by the commissioner pursuant to section 34-0105 or 34-0106 of this article, or promulgation of such regulations pursuant to section 34-0107 of this article. As used in this section, the term "final approval" shall mean:

1. in the case of subdivision of land, conditional or preliminary approval of such plat pursuant to section two hundred seventy-six of the town law, section 7-728 of the village law or section thirty-two of the general city law; provided, however, that final plat approval is granted within six months of preliminary plat approval.

2. in the case of a site plan not involving the subdivision of land, approval by the appropriate body or office of a city, town or village of the site plan.

3. in those cases not covered by subdivision one or two of this section, the issuance of a building permit or other authorization for the commencement of the activities or development for which such permit or authorization was issued or in those local governments which do not require such permits or authorizations, the actual commencement of the activities or development.

ARTICLE 35

DETERGENTS AND OTHER HOUSEHOLD CLEANSING PRODUCTS

Section 35-0101. Scope of article.

35-0103. Definitions.

35-0105. Distribution and sale of household cleansing products;
possession or use of household cleansing products
containing phosphorus by commercial establishments
restricted.

35-0107. Powers and duties of commissioner.

35-0109. Notice of public hearing held pursuant to this article;
hearing procedure.

§ 35-0101. Scope of article.

By the enactment of this article the state fully exercises the exclusive right to regulate and control the labelling and ingredients of household cleansing products distributed, sold, offered, or exposed for sale in this state, within the scope and limitations of this article. The terms "regulation" and "control" include prohibitions or other restrictions on the distribution, sale, offering or exposing for sale of such products in this state. In order to assure statewide uniformity, such regulation and control by any political subdivision of the state of such products is prohibited after June 25, 1971 provided, however, that any such regulation and control in effect on June 1, 1971 shall be unaffected by this section.

§ 35-0103. Definitions.

The following terms, whenever used or referred to in this article, shall have the following meaning unless a different meaning clearly appears from the context:

1. "Household cleansing product" means any product, including but not limited to soaps and detergents, containing a surfactant as a wetting or dirt emulsifying agent and used primarily for domestic or commercial cleaning purposes, including but not limited to, the cleansing of fabrics, dishes, food utensils and household and commercial premises. Household cleansing product shall not mean foods, drugs, cosmetics, insecticides, fungicides and rodenticides or cleansing products used primarily in industrial manufacturing, production and assembling processes as provided by the commissioner by rule and regulation.

2. "Person" means any individual, partnership, firm or corporation.

3. "Phosphorus" means elemental phosphorus.

4. "Commercial establishment" means any premises used for the purpose of carrying on or exercising any trade, business, profession, vocation, or commercial or charitable activity, including but not limited to laundries, hospitals, and food or restaurant establishments.

§ 35-0105. Distribution and sale of household cleansing products; possession or use of household cleansing products containing phosphorus by commercial establishments restricted.

1. No person shall distribute, sell, offer or expose for sale in this state any household cleansing product unless its wrapper or container shall be plainly labeled as provided in this subdivision. The commissioner may by rule or regulation exempt products shipped or distributed in bulk from provisions of this subdivision. The wrapper or container of every household cleansing product must list the weight of each ingredient which the commissioner determines may affect adversely

human health or the environment, including but not limited to phosphorus. Such listing shall be by percentage of total weight of such product and by grams per recommended use, in descending order of predominance. Labeling of ingredients shall be in accordance with the nomenclature established by regulation of the commissioner. The percentage by weight in the container and the weight in grams per recommended use level of each ingredient shall be expressed to at least two significant figures or as specified by the commissioner. Analyses to determine actual composition shall be performed in accordance with rules and regulations of the commissioner.

2. a. (1) No household cleansing product, except those used in dishwashers, food and beverage processing equipment, and dairy equipment, shall be distributed, sold, offered or exposed for sale in this state which contains a phosphorus compound other than such trace concentrations as may be authorized by the commissioner by regulation.

(2) No household cleansing product used in dishwashers shall be distributed, sold, offered or exposed for sale in this state which contains a phosphorus compound in excess of five-tenths percent by weight expressed as phosphorus.

(3) No household cleansing product used in food and beverage processing equipment and dairy equipment shall be distributed, sold, offered or exposed for sale in this state which contains a phosphorus compound in excess of eight and seven-tenths percent by weight expressed as phosphorus.

b. No owner, occupant, or person in control of a commercial establishment shall possess or use or authorize any other person by way of service contract or other arrangement to possess or use in this state any household cleansing product which contains a phosphorus compound in excess of the amount allowed for such product under paragraph a of this subdivision.

3. No person shall distribute, sell, offer or expose for sale in this state any household cleansing product which does not comply with regulations of the commissioner promulgated pursuant to subdivision 3 of section 35-0107.

4. No household cleansing product shall be distributed, sold, offered or exposed for sale in this state which contains 1,4-dioxane other than such trace concentrations; such trace concentrations shall not exceed two parts per million by December thirty-first, two thousand twenty-two; and further, shall not exceed one part per million by December thirty-first, two thousand twenty-three.

5. No later than May first, two thousand twenty-five, and every two years thereafter, the department, in consultation with the department of health, shall review such trace concentration thresholds and determine whether such concentrations shall be lowered to better protect human health and the environment.

6. A manufacturer of a household cleansing product, otherwise subject to the requirements of subdivision four of this section, may apply to the department for a one-year waiver from such requirements for a specific household cleansing product, upon such proof that the manufacturer has taken steps to reduce the presence of 1,4-dioxane in that product and is unable to comply with the requirements of subdivision four of this section. Thereafter, a manufacturer may apply for one additional one-year waiver for such product, upon such the satisfaction of such similar proof.

7. The department is authorized to promulgate such rules and regulations as it shall deem necessary to implement the provisions of this section, including rules and regulations with respect to any allowable trace concentrations.

§ 35-0107. Powers and duties of commissioner.

1. The commissioner is hereby authorized to promulgate regulations requiring manufacturers of household cleansing products distributed, sold or offered for sale in this state, to furnish to the commissioner for the public record as herein provided information regarding such products in a form prescribed by the commissioner including the nature

and extent of investigations and research performed by the manufacturer concerning the effects of such products on human health and the environment. These reports shall be available to the public at the department of environmental conservation, except those portions the manufacturer determines, subject to the approval of the commissioner, would be, if disclosed, seriously prejudicial to the manufacturer's legitimate interest in trade secrets and economics of operation.

2. No later than February 1, 1973 the commissioner shall prepare and submit a comprehensive report to the governor and legislature on the status of progress made in research and development to provide a safe and effective substitute for phosphates in household cleansing products.

3. Whenever the commissioner finds, after investigation, that any ingredient of household cleansing products distributed, sold, offered or exposed for sale in this state, other than an ingredient for which limitations are set forth in subdivision 2 of section 35-0105, will or is likely to materially affect adversely human health or the environment, he may, after public hearing, restrict or limit by regulation the use of such ingredient in such products.

§ 35-0109. Notice of public hearing held pursuant to this article; hearing procedure.

1. Notice of public hearing shall be by publication in two newspapers most likely to give notice to the people of this state of such hearings at least once in each of three successive weeks, provided, however, that notice of public hearing shall be given to the manufacturer or manufacturers of such household cleansing products in writing, whenever practicable or in such other form as in the commissioner's judgment will reasonably notify such manufacturer of said hearing. Such hearing shall not be conducted less than sixty days following the date of first publication of notice of such hearing.

2. The commissioner may adopt other appropriate regulations prescribing the procedures to be followed at such hearings.

ARTICLE 36

PARTICIPATION IN FLOOD INSURANCE PROGRAMS

Section 36-0101. Declaration of findings.

36-0103. Definitions.

36-0105. Local responsibility.

36-0107. Powers of local governments.

36-0109. Sanctions.

36-0111. Flood hazard evaluation of state facilities, lands and programs.

36-0113. Miscellaneous.

§ 36-0101. Declaration of findings.

The legislature finds and declares that:

1. It is in the interest of the people of this state to provide for participation in the national flood insurance program as enacted by the congress of the United States;

2. The essence of the national flood insurance program is the regulation of land uses within areas identified by the director of the federal emergency management agency as areas of special flood hazard. Land use regulation is principally a matter of local concern; therefore, local governments have the principal responsibility for enacting appropriate land use regulations that will meet federal standards and permit the sale of flood insurance in such communities;

3. Providing for the availability of flood insurance for all residents of the state is the policy of the state; all local governments with land use jurisdiction over any area of special flood hazard must comply with all national flood insurance program requirements so that the residents of such local communities may purchase flood insurance; and

4. All publicly owned facilities within any identified area of special

flood hazard must be in compliance with the national flood insurance program requirements.

§ 36-0103. Definitions.

1. "Area of special flood hazard" means any area subject to a one percent or greater chance of flooding in any given year as determined by the federal emergency management agency.

2. "Local government with land use jurisdiction" means a city; a town as to all areas within such town outside the limits of any village; and a village.

3. "National flood insurance program" means that act of congress codified as chapter fifty of title forty-two of the United States code, all acts amendatory thereof and all regulations promulgated thereunder.

§ 36-0105. Local responsibility.

1. Every local government with land use jurisdiction over any area of special flood hazard that was, prior to the effective date of this article, a participant in the national flood insurance program shall continue to maintain such participation in the national flood insurance program.

2. Every local government with land use jurisdiction over any area of special flood hazard that was not, prior to the effective date of this article, directly participating in the national flood insurance program but was relying on state administration of the minimum land use regulations necessary to meet the requirements of the national flood insurance program, must apply for and complete all requirements for participation in the national flood insurance program.

3. Any local government that, after the effective date of this article, is notified by the federal emergency management agency of the

existence of an area of special flood hazard within the bounds of such local government shall promptly, within the time frames required by the national flood insurance program, apply for and complete all requirements for participation in the national flood insurance program.

4. Any local government that, prior to the effective date of this article, was notified by the federal emergency management agency of the existence within its bounds of an area of special flood hazard and that has not qualified as of the effective date of this article for participation in the national flood insurance program shall, within the time frames required by the national flood insurance program, apply for and complete all requirements for participation in the national flood insurance program.

§ 36-0107. Powers of local governments.

Notwithstanding any other law:

1. All local governments with land use jurisdiction over any area of special flood hazard shall, and are authorized to, take any action necessary to achieve and maintain participation in the national flood insurance program.

2. Any local law or ordinance adopted for the purpose of qualifying a local government as a participant in the national flood insurance program shall apply to any construction or improvement undertaken within any such local government by any county, city, town, village, school district or public improvement district.

§ 36-0109. Sanctions.

Any local government with land use jurisdiction that fails to qualify for participation in the national flood insurance program, or that has had its participation terminated by the federal emergency management agency, faces sanctions under federal law including, in areas of special

flood hazard, ineligibility for flood disaster aid, ineligibility for federally provided loans or federally guaranteed financing, including residential and other mortgages granted by any banking institution that is a member of the federal deposit insurance corporation or other federal instrumentality. The state of New York will cooperate with the federal government in the enforcement of these sanctions.

§ 36-0111. Flood hazard evaluation of state facilities, lands and programs.

1. State agencies shall take affirmative action to minimize flood hazards and losses in connection with state-owned and state-financed buildings, roads and other facilities, the disposition of state land and properties, the administration of state and state-assisted planning programs, and the preparation and administration of state building, sanitary and other pertinent codes. Such action shall include, but not be limited to, requirements for the evaluation and reduction of flood hazards in the siting, planning, construction and maintenance of such facilities and the administration of such programs; needed and economically feasible flood-proofing and other protective measures of existing state facilities; and appropriate flood hazard restrictions binding upon purchasers and persons acquiring state lands and properties, or interests therein, and their successors.

2. The commissioner shall assist state agencies in determining and evaluating flood hazards and alternative protective measures, and shall promulgate regulations, in consultation with the director of the budget, to govern the review by the commissioner of potential flood hazards at proposed construction sites of state, and state-financed facilities. Such regulations shall ensure that reviews thereunder shall be coordinated with those of appropriate environmental impact statements, project notification and review systems, and state capital construction funding requests.

3. The department, pursuant to designation by the governor, shall act as the state coordinating agency for the national flood insurance

program in order to assist in its review of state agency activities and to serve as a resource for local governments.

§ 36-0113. Miscellaneous.

1. In order to assure the continued availability of flood insurance in any community described in subdivision two or four of section 36-0105 of this article while it completes the process of qualifying as a participant in the national flood insurance program, the department is authorized and directed to provide technical assistance necessary to enable such local governments to assume their responsibilities in as expeditious a manner as possible.

2. The commissioner shall review, and appropriately amend or repeal, all regulations of the department relating to the implementation of the former article thirty-six of the environmental conservation law which was repealed by the same chapter of the laws of nineteen hundred ninety-two that enacted this article thirty-six.

3. Nothing contained in this article shall be construed to affect the validity of any local law or ordinance heretofore enacted by any local government.

4. If any provision of this article or the application thereof to any person or circumstances shall be adjudged invalid by a court of competent jurisdiction, such order or judgment shall be confined in its operation to the controversy in which it was rendered, and shall not affect or invalidate the remainder of any provision of any section or the application of any part thereof to any other person or circumstances and to this end the provisions of this article are hereby declared to be severable.

ARTICLE 37

**SUBSTANCES HAZARDOUS OR ACUTELY HAZARDOUS TO PUBLIC HEALTH, SAFETY
OR THE ENVIRONMENT**

TITLE I
SUBSTANCES HAZARDOUS TO THE ENVIRONMENT

- Section 37-0101. Definitions.
- 37-0103. Lists of substances hazardous or acutely hazardous to public health, safety or the environment.
- 37-0105. Rules and regulations.
- 37-0107. Prohibition against storage or release.
- 37-0109. Chromated copper arsenate pressure treated lumber; public facilities.
- 37-0111. Prohibition against brominated flame retardants.
- 37-0113. Lead and mercury-added wheel weights; prohibited.
- 37-0115. Lead-containing jewelry.
- 37-0117. Prohibition of cosmetic products and personal care products containing 1,4-dioxane or mercury.
- 37-0119. Prohibition against certain uses of trichloroethylene.
- 37-0119*2. Coal tar; prohibited.
- 37-0121. Prohibition against the use of perfluoroalkyl and polyfluoroalkyl substances in apparel.

TITLE II
HAZARDOUS PACKAGING

- Section 37-0201. Legislative findings and intent.
- 37-0203. Definitions.
- 37-0205. Prohibitions.
- 37-0207. Exemptions.
- 37-0209. Prohibition on the use of perfluoroalkyl and polyfluoroalkyl substances in food packaging.
- 37-0211. Violations.
- 37-0213. Reports.
- 37-0215. Rules and regulations.

TITLE III
GOVERNMENT AGENCY REPORTING OF TOXIC CHEMICAL RELEASES

- Section 37-0301. Definitions.
- 37-0303. Applicability.
- 37-0305. Toxic chemical release form.
- 37-0307. Availability of information.

TITLE 5

BISPHENOL A

- Section 37-0501. Short title.
- 37-0503. Definitions.
- 37-0505. Child care products.
- 37-0507. Product labeling.
- 37-0509. Preemption.
- 37-0511. Rules and regulations.

TITLE VII

TRIS

- Section 37-0701. Short title.
- 37-0703. Definitions.
- 37-0705. Child care products.
- 37-0707. Preemption.
- 37-0709. Rules and regulations.

TITLE IX

TOXIC CHEMICALS IN CHILDREN'S PRODUCTS

- Section 37-0901. Definitions.
- 37-0903. Applicability.
- 37-0905. Chemicals of concern and high-priority chemicals.
- 37-0907. Reporting on the use of chemicals.
- 37-0909. Sales prohibition.
- 37-0911. Children's product safety council; established.
- 37-0913. Notice to retailers and the public.
- 37-0915. Enforcement and implementation.
- 37-0917. Regulations.

TITLE X

REGULATION OF CHEMICALS IN UPHOLSTERED FURNITURE, MATTRESSES AND ELECTRONIC ENCLOSURES

- Section 37-1001. Definitions.
- 37-1003. Furniture and mattresses.
- 37-1005. Exemptions.
- 37-1007. Electronic display.
- 37-1009. Reporting.
- 37-1011. Certification of compliance.
- 37-1013. Severability.
- 37-1015. Regulations.

TITLE 11

REGULATION OF COATED OR TREATED SEEDS

Section 37-1101. Unlawful acts.

TITLE I

SUBSTANCES HAZARDOUS TO THE ENVIRONMENT

- Section 37-0101. Definitions.
- 37-0103. Lists of substances hazardous or acutely hazardous to public health, safety or the environment.
- 37-0105. Rules and regulations.
- 37-0107. Prohibition against storage or release.
- 37-0109. Chromated copper arsenate pressure treated lumber; public facilities.
- 37-0111. Prohibition against brominated flame retardants.
- 37-0113. Lead and mercury-added wheel weights; prohibited.
- 37-0115. Lead-containing jewelry.
- 37-0117. Prohibition of cosmetic products and personal care products containing 1,4-dioxane or mercury.
- 37-0119. Prohibition against certain uses of trichloroethylene.
- 37-0119*2. Coal tar; prohibited.
- 37-0121. Prohibition against the use of perfluoroalkyl and polyfluoroalkyl substances in apparel and outdoor apparel for severe wet conditions.

§ 37-0101. Definitions.

As used in this article, unless the context requires otherwise:

1. "Oral LD (rat) toxicity" means a calculated dose of a substance which is expected to cause the death of fifty percent of an experimental rat population when administered orally.

2. "Inhalation LC (rat) toxicity" means a calculated concentration of substance in air, exposure to which is expected to cause death of fifty percent of an experimental rat population when inhaled.

3. "Dermal LD (rabbit) toxicity" means a calculated dose of a substance which is expected to cause the death of fifty percent of an experimental rabbit population when applied to the skin.

4. "Brominated flame retardants" refers generally to any product containing a mixture of chemicals known as brominated diphenyl ether to prevent, reduce or retard the risk of fire in electronic devices, furniture, and textiles.

5. "Polybrominated diphenyl ether" (PBDE) is a mixture of brominated diphenyl ethers, usually marketed as pentabromodiphenyl ether or octabromodiphenyl ether, according to how many hydrogen atoms in the diphenyloxide structure are replaced with bromine atoms.

6. "Process", as used in section 37-0111 of this title, shall not include the processing of metallic recyclables containing pentabrominated diphenyl ether or octabrominated diphenyl ether that is conducted in compliance with all applicable federal, state, and local laws.

7. "Perfluoroalkyl and polyfluoroalkyl substances" or "PFAS" shall mean a class of fluorinated organic chemicals containing at least one fully fluorinated carbon atom.

§ 37-0103. Lists of substances hazardous or acutely hazardous to public health, safety or the environment.

1. No later than two years from the date on which this section as hereby amended takes effect, the commissioner shall promulgate and thereafter from time to time amend regulations consistent with the state administrative procedure act which contain:

(a) A list of substances hazardous to the public health, safety or the environment, as required by paragraph (b) of subdivision ten of section 71-2702 of this chapter, which meet the following criteria:

(i) because of their quantity, concentration, or physical, chemical or

infectious characteristics cause physical injury or illness when improperly treated, stored, transported, disposed of, or otherwise managed; or

(ii) pose a present or potential hazard to the environment when improperly treated, stored, transported, disposed of, or otherwise managed; or

(iii) because of their toxicity or concentration within biological chains, present a demonstrated threat to biological life cycles when released into the environment.

(b) A list of substances acutely hazardous to public health, safety or the environment, as required by paragraph (b) of subdivision eleven of section 71-2702 of this chapter, which meet the following criteria:

(i) A. have an oral LD (rat) toxicity of less than 50 milligrams per kilogram; or

B. have an inhalation LC (rat) toxicity of less than 2 milligrams per liter; or

C. have a dermal LD (rabbit) toxicity of less than 200 milligrams per kilogram; or

(ii) cause or are capable of causing death, serious illness or serious physical injury to any person or persons as a consequence of release into the environment.

2. In promulgating a list pursuant to paragraph (a) of subdivision one of this section, the commissioner shall include the following:

(a) substances whose manufacture, processing, contribution in commerce, use, possession or disposal is banned, prohibited or limited pursuant to the federal Toxic Substances Control Act (15 U.S.C. 2601 et seq.) as of January 1, 2008, as amended from time to time;

(b) substances and pesticides whose use or possession is prohibited pursuant to the federal Insecticide, Fungicide and Rodenticide Act (7 U.S.C. 135 et seq.) as of January 1, 2008, as amended from time to time; and

(c) substances defined as hazardous substances pursuant to the federal Comprehensive Environmental Response, Compensation and Liability Act (26 U.S.C. 4611 et seq.; 42 U.S.C. 9601 et seq.) as of January 1, 2008, as

amended from time to time.

§ 37-0105. Rules and regulations.

The department is hereby authorized to promulgate rules and regulations pertaining to the storage and release to the environment of substances hazardous or acutely hazardous to public health, safety or the environment. Such rules and regulations may require the users of substances which may meet the criteria upon which the lists referred to in paragraphs (a) and (b) of subdivision one of section 37-0103 of this chapter are based to furnish to the department for the public record any information regarding such substances which the said user may have, and the nature and extent of research performed by said user concerning the effects of such substances on human health and the environment. Prior to promulgation of rules and regulations hereunder, public hearings shall be held upon notice in two newspapers in the locality of said public hearings, at least two times per week in each of three successive weeks. Such hearings shall be conducted not less than sixty (60) days following the date of last publication.

§ 37-0107. Prohibition against storage or release.

No person shall store or release to the environment substances hazardous or acutely hazardous to public health, safety or the environment in contravention of rules and regulations promulgated pursuant hereto.

§ 37-0109. Chromated copper arsenate pressure treated lumber; public facilities.

1. The state, and any political subdivision thereof, school district, board of cooperative educational services or public authority, and any agency of any such entity shall be prohibited from constructing, any structure on any playground owned or operated by such an entity, which

uses lumber which is pressure treated with chromated copper arsenate.

2. The state, and any political subdivision thereof, school district, board of cooperative educational services or public authority, and any agency of any such entity shall maintain and operate all (a) structures constructed with lumber which is pressure treated with chromated copper arsenate, which is on any playground owned or operated by such an entity, or (b) picnic tables constructed with lumber which is pressure treated with chromated copper arsenate, which is on any facility owned or operated by such an entity, in such a manner as to minimize chromated copper arsenate from leaching from such structure or picnic table. Every such entity shall maintain the ground cover surrounding any such structure or picnic table in a manner to minimize exposure to potential chromated copper arsenate contamination.

3. The commissioner shall compile and publish information on the dangers and hazards to public health and the environment of the use of chromated copper arsenate pressure treated lumber. In addition, the commissioner shall compile and publish a list of less toxic materials which may be used as an alternative to the use of chromated copper arsenate pressure treated lumber. The department shall also compile and publish information on non-toxic methods and materials that are available to adequately maintain playground structures and picnic tables constructed with chromated copper arsenate pressure treated lumber in a manner that minimizes chromated copper arsenate from leaching from such structures and picnic tables. The department shall insure that the information compiled and published pursuant to this subdivision is widely disseminated to the general public.

§ 37-0111. Prohibition against brominated flame retardants.

1. Manufacture, process, or distribution of brominated flame retardants. (a) No person shall manufacture, process or distribute in commerce a product, or a flame-retardant part of a product, containing more than one-tenth of one per centum of pentabrominated diphenyl ether or octabrominated diphenyl ether, by mass.

(b) The commissioner may waive the provisions of this section in whole or in part upon a finding by the commissioner, in consultation with the commissioners of health and labor in a particular instance that there is no significant threat to the public health.

2. Administration. (a) The commissioner is hereby authorized and directed to prescribe such rules and regulations, including provisions for maintenance of records relating to products, fabrics or related materials, and for the labeling for a product, fabric or related material, as may be necessary and proper for purposes of administration and enforcement of this article.

(b) The commissioner is hereby empowered to order the recall of or confiscation of consumer products offered for sale which do not meet the standards set forth in or pursuant to this section.

(c) The commissioner may obtain from any person by regulation or subpoena issued pursuant thereto such information in the form of testimony, books, records, or other writings as is pertinent to the findings or determinations which he or she is required or authorized to make pursuant to this section.

All information reported to or otherwise obtained by the commissioner or his or her representative pursuant to this section which information contains or relates to a trade secret shall be considered confidential, except that such information may be disclosed to other officers or employees concerned with carrying out this section or when relevant in any proceeding under this section.

3. Guaranty. (a) No person shall be subject to prosecution under this section if such person: (1) establishes a guaranty received in good faith signed by and containing the name and address of the person residing in the United States by whom the product, fabric or related material guaranteed was manufactured or from whom it was received, to the effect that reasonable and representative tests showing that the product, fabric or related material covered by the guaranty, or used in the product, fabric or related material covered by the guaranty meets the requirements of this section; and (2) has not, by further processing, affected the flammability of the product, fabric or related

material covered by the guaranty which he or she received. Such guaranty shall be either: (A) a separate guaranty specifically designating the product, fabric or related material guaranteed, in which case it may be on the invoice or other paper relating to such product, fabric or related material; or (B) a continuing guaranty filed with the department or with the federal trade commission applicable to any product, fabric or related material handled by a guarantor, in such form as the department or the federal trade commission by rules or regulations may prescribe; or (C) a continuing guaranty given by seller to buyer applicable to any product, fabric or related material sold or to be sold to buyer by seller in a form as the department or the federal trade commission by rules or regulations may prescribe.

(b) The furnishing with respect to any product, fabric or related material, of a false guaranty, except by a person relying upon a guaranty to the same effect received in good faith and signed by and containing the name and address of the person residing in the United States by whom the product, fabric or related material guaranteed was manufactured or from whom it was received, with reason to believe the product, fabric or related material falsely guaranteed may be introduced, sold or transported in commerce, is unlawful.

4. Exclusions. (a) The provisions of this section shall not apply to any common carrier, contract carrier or freight forwarder with respect to a product, fabric or related material shipped or delivered for shipment through the state for commerce in another state or country.

(b) As used in this section, "distribute in commerce" shall not include the resale of products manufactured prior to January first, two thousand six or replacement parts manufactured prior to January first, two thousand six.

5. Violations. A violation of any provision of this section or any rule or regulation of the commissioner promulgated hereunder is a misdemeanor. Each product, fabric or related material made, sold or exposed for sale, shall constitute a separate violation.

6. Severability. The provisions of this section shall be severable and and if any portion thereof or the applicability thereof to any person or

circumstances shall be held to be invalid, the remainder of this title and the application thereof shall not be affected thereby.

§ 37-0113. Lead and mercury-added wheel weights; prohibited.

1. On and after April first, two thousand eleven any person replacing or balancing a tire on a motor vehicle required to be registered under article fourteen of title four of the vehicle and traffic law, shall not use a wheel weight or other product for balancing motor vehicle wheels if the weight or other balancing product contains more than 0.1 percent lead by weight.

2. On and after April first, two thousand eleven, a person shall not sell or offer to sell or distribute weights or other products for balancing motor vehicle wheels if the weight or other balancing product contains more than 0.1 percent lead by weight.

3. On and after April first, two thousand twelve, a person may not sell a new motor vehicle that is equipped with a weight or other product for balancing motor vehicle wheels if the weight or other balancing product contains more than 0.1 percent lead by weight.

4. On or after April first, two thousand eighteen, any person replacing or balancing a tire on a motor vehicle required to be registered under article fourteen of title four of the vehicle and traffic law, shall not use a wheel weight or other product for balancing motor vehicle wheels if the weight or other balancing product contains mercury that was intentionally added during the manufacture of the product.

5. On and after April first, two thousand eighteen, a person shall not sell or offer to sell or distribute weights or other products for balancing motor vehicle wheels if the weight or other balancing product contains mercury that was intentionally added during the manufacture of the product.

6. For purposes of this section, the following terms shall have the following meanings:

a. "New motor vehicle" means a motor vehicle that is required to be registered under article fourteen of title four of the vehicle and traffic law that has not been previously sold to any person except a distributor, wholesaler or motor vehicle dealer for resale.

b. "Person" means any individual, firm, association, partnership, corporation, organization, or joint venture.

§ 37-0115. Lead-containing jewelry.

For purposes of this section, the following terms shall have the following definitions:

1. "Body piercing jewelry" means any part of jewelry that is manufactured or sold for placement in a new piercing or a mucous membrane, but does not include any part of that jewelry that is not placed within a new piercing or a mucous membrane.

2. "Children" means children under the age of twelve.

3. "Children's jewelry" means jewelry that is made for, marketed for use by, or marketed to, children and includes jewelry that meets any of the following conditions:

(a) Represented in its packaging, display, or advertising, as appropriate for use by children.

(b) Sold in conjunction with, attached to, or packaged together with other products that are packaged, displayed, or advertised as appropriate for use by children.

(c) Sized for children and not intended for use by adults.

(d) Sold in any of the following:

(1) A vending machine.

(2) Retail store, catalogue, or online web site, in which a person exclusively offers for sale products that are packaged, displayed, or

advertised as appropriate for use by children.

(3) A discrete portion of a retail store, catalogue, or online web site, in which a person offers for sale products that are packaged, displayed, or advertised as appropriate for use by children.

4. "Jewelry" means any of the following ornaments worn by a person:

(a) ankle bracelet;

(b) arm cuff;

(c) bracelet;

(d) brooch;

(e) chain;

(f) crown;

(g) cuff link;

(h) hair accessory;

(i) earring;

(j) necklace;

(k) decorative pin;

(l) ring;

(m) body piercing jewelry;

(n) jewelry placed in the mouth for display or ornament;

(o) any charm, bead, chain, link, pendant, or other component of the items listed in this definition;

(p) a charm, bead, chain, link, pendant, or other attachment to shoes or clothing that can be removed and may be used as a component of an item listed in this definition;

(q) a watch in which a timepiece is a component of an item listed in this definition, excluding the timepiece itself if the timepiece can be removed from the ornament.

5. Effective January first, two thousand twenty-one, no manufacturer shall sell, or offer for sale, children's jewelry that contains a total lead content in any component part of the item that is more than 0.004% (40 parts per million) but less than 0.01% (100 parts per million) by total weight or a lower standard for lead content as may be established by federal or state law or rule unless that item bears a warning statement that indicates that at least one component part of the item contains lead.

The warning statement for children's jewelry shall contain at least the following: "WARNING: CONTAINS LEAD. MAY BE HARMFUL IF EATEN OR CHEWED. "

A manufacturer is in compliance if the warning statement is provided on the children's jewelry or on the label on the immediate container of the children's jewelry.

The warning statement requirement does not apply to any children's jewelry:

(a) for which federal law governs warning in a manner that preempts state authority;

(b) if the component parts of the children's jewelry containing lead are inaccessible to a child through normal and reasonably foreseeable use and abuse as defined by the United States Consumer Product Safety Commission;

(c) if the component parts in question are exempt from third-party testing as determined by the United States Consumer Product Safety Commission; or

(d) to children's jewelry resold or offered for resale, or distributed by consumers for consumer use.

§ 37-0117. Prohibition of cosmetic products and personal care products containing 1,4-dioxane or mercury.

1. The term "cosmetic product" shall mean any article (a) intended to be rubbed, sprinkled, or sprayed on, introduced into, or otherwise applied to the human body or any part thereof for beautifying, promoting attractiveness, or altering the appearance, and (b) intended for use as a component of any such article. The term "cosmetic product" shall not include any personal care product as defined in this section for which a prescription is required for distribution or dispensation as provided in section two hundred eighty-one of the public health law or section sixty-eight hundred ten of the education law.

2. The term "personal care product" shall mean any product intended for cleaning or cleansing any part of the body, such as the skin and hair, and including but not limited to, hair shampoo, hair conditioner, soap, bath gels and other bath products. The term "personal care product" shall not include any product for which a prescription is required for distribution or dispensation as provided in section two hundred eighty-one of the public health law or section sixty-eight hundred ten of the education law.

3. No person shall sell or offer for sale any cosmetic product containing 1,4-dioxane, other than such trace concentrations, that exceeds ten parts per million by December thirty-first, two thousand twenty-two.

4. No person shall sell or offer for sale any personal care product containing 1,4-dioxane, other than such trace concentrations, as authorized by the commissioner, in consultation with the department of health, by regulation; and further, such trace concentrations for personal care products shall not exceed two parts per million by December thirty-first, two thousand twenty-two and one part per million by December thirty-first, two thousand twenty-three.

5. No later than May first, two thousand twenty-five, and every two years thereafter, the department, in consultation with the department of health, shall review such trace concentration thresholds and determine whether such concentrations shall be lowered to better protect human health and the environment.

6. The department is authorized to promulgate such rules and regulations as it shall deem necessary to implement the provisions of this section, including rules and regulations with respect to any allowable trace concentrations.

7. A manufacturer of a cosmetic product or personal care product, otherwise subject to the requirements of subdivisions three and four of this section, may apply to the department for a one-year waiver from such requirements for a specific cosmetic product or personal care

product, and upon such proof that the manufacturer has taken steps to reduce the presence of 1,4-dioxane in that product and is unable to comply with the requirements of subdivisions three and four of this section. Thereafter, a manufacturer may apply for one additional one-year waiver for such product, upon its satisfaction of such similar proof.

8. No person shall sell or offer for sale any cosmetic product or personal care product containing mercury, other than in trace amounts identified by the department, in consultation with the department of health, in regulations. Any such trace amounts shall be consistent with the permissible concentrations of trace amounts allowed by the food and drug administration as (a) unavoidable under conditions of good manufacturing practice, or (b) necessary for use as a preservative in the absence of an effective and safe nonmercurial preservative substitute in cosmetic products intended for use only in the area of the eye. For the purposes of this subdivision "mercury" shall mean elemental mercury Hg, mercuric iodide, mercury oxide, mercurous chloride, ethyl mercury, phenyl mercuric salts, ammoniated mercury, amide chloride of mercury, mercury sulfide or cinnabaris, or mercury iodide.

*** § 37-0119. Prohibition against certain uses of trichloroethylene.**

1. No person shall use trichloroethylene as a vapor degreaser, an intermediate chemical to produce other chemicals, a refrigerant, or an extraction solvent or in any other manufacturing or industrial cleaning process or use.

2. For purposes of this section:

(a) "Extraction solvent" means a solvent used to separate a specific substance from a mixture.

(b) "Refrigerant" means a chemical that is used as a heat carrier in a cooling mechanism and that changes from liquid to gas and back again in the refrigeration cycle.

(c) "Trichloroethylene" means a chemical with the Chemical Registry Abstract Services Number of 79-01-6.

(d) "Vapor degreaser" means a substance boiled to a vapor that condenses onto metal parts, causing beading and dripping, and that removes contaminants from the parts.

3. Severability. The provisions of this section shall be severable and if any portion thereof or the applicability thereof to any person or circumstance is held invalid, the remainder of this section and the application thereof shall not be affected thereby.

* NB There are 2 § 37-0119's

*** § 37-0119. Coal tar; prohibited.**

1. A person shall not sell or offer for sale a pavement product containing coal tar.

2. A person shall not apply a pavement product that is labeled as containing coal tar on a driveway or parking area.

3. For purposes of this section, the following terms shall have the following meanings:

a. "Coal tar" means a viscous substance obtained by the destructive distillation of coal and containing levels of polycyclic aromatic hydrocarbons (PAHs) in excess of ten thousand milligrams per kilogram.

b. "Pavement product" means a material that is for use on an asphalt or concrete surface, including but not limited to sealcoat.

* NB There are 2 § 37-0119's

§ 37-0121. Prohibition against the use of perfluoroalkyl and polyfluoroalkyl substances in apparel and outdoor apparel for severe wet conditions.

1. After January first, two thousand twenty-five, no person shall sell or offer for sale in this state any new, not previously used, apparel

containing perfluoroalkyl and polyfluoroalkyl substances as intentionally added chemicals.

2. In addition to the provisions of subdivision one of this section, one year after the department's adoption of the regulations required by this subdivision, but no later than January first, two thousand twenty-seven, no person shall sell or offer for sale in this state any new, not previously used, apparel containing perfluoroalkyl and polyfluoroalkyl substances at or above a level that the department shall establish in regulation.

3. On or after January first, two thousand twenty-eight, no person shall sell or offer for sale in this state any new, not previously used, outdoor apparel for severe wet conditions containing perfluoroalkyl and polyfluoroalkyl substances: (a) at or above a level that the department shall establish in regulation, or (b) as intentionally added chemicals.

4. For the purposes of this section, the following terms shall have the following meanings:

(a) "Intentionally added chemical" means a chemical in a product that serves an intended function or technical effect in the product or product component, including the PFAS within intentionally added chemicals and PFAS that are intentional breakdown products of an added chemical that also have a functional or technical effect in the product or product component.

(b) "Apparel" means clothing items intended for regular wear or formal occasions including, but not limited to, undergarments, shirts, pants, skirts, dresses, overalls, bodysuits, vests, dancewear, suits, saris, scarves, tops, leggings, leisurewear, formal wear, outdoor apparel, onesies, bibs, and diapers. "Apparel" shall not include:

(i) professional uniforms that are worn to protect the wearer from health or environmental hazards, including personal protective equipment; or

(ii) outdoor apparel for severe wet conditions.

(c) "Outdoor apparel" means clothing items intended primarily for outdoor activities, including but not limited to, hiking, camping, skiing, climbing, bicycling, and fishing.

(d) "Outdoor apparel for severe wet conditions" means outdoor apparel that are extreme and extended use products designed for outdoor sports experts for applications that provide protection against extended exposure to extreme rain conditions or against extended immersion in water or wet conditions, such as from snow, in order to protect the health and safety of the user and that are not marketed for general consumer use.

(e) "Manufacturer" means a person, firm, association, partnership, or corporation:

(i) that produces or whose brand name is affixed to apparel or outdoor apparel for severe wet conditions; or

(ii) in the case of apparel or outdoor apparel for severe wet conditions that was imported into the United States, "manufacturer" means the importer or first domestic distributor of the apparel or outdoor apparel for severe wet conditions if no person who is a manufacturer within the meaning of subparagraph (i) of this paragraph has a presence in the United States.

5. No person that sells or offers for sale any apparel or outdoor apparel for severe wet conditions shall be held in violation of this section if they can show that they relied in good faith on the written assurance of the manufacturer that such apparel or outdoor apparel for severe wet conditions meets the requirements of this section. Such written assurance shall take the form of a certificate of compliance stating that such apparel or outdoor apparel for severe wet conditions is in compliance with the requirements of this section. The certificate of compliance shall be signed by an authorized official of the manufacturer.

6. In addition to any other applicable penalties, it shall be a violation of this section to provide a certificate of compliance as contemplated by subdivision five of this section when the applicable apparel or outdoor apparel for severe wet conditions does not satisfy the limitations on the presence of perfluoroalkyl and polyfluoroalkyl substances set forth in subdivisions one, two and three of this section.

TITLE II
HAZARDOUS PACKAGING

Section 37-0201. Legislative findings and intent.

37-0203. Definitions.

37-0205. Prohibitions.

37-0207. Exemptions.

37-0209. Prohibition on the use of perfluoroalkyl and
polyfluoroalkyl substances in food packaging.

37-0211. Violations.

37-0213. Reports.

37-0215. Rules and regulations.

§ 37-0201. Legislative findings and intent.

The legislature finds and declares that:

1. The management of solid waste can pose a wide range of hazards to public health and safety and to the environment; and

2. Packaging comprises a significant percentage of the overall solid waste stream; and

3. The presence of heavy metals in packaging is a part of the total concern in light of their likely presence in emissions or ash when packaging is incinerated, or in leachate when packaging is landfilled; and

4. Lead, mercury, cadmium and hexavalent chromium, on the basis of available scientific and medical evidence, are of particular concern; and

5. It is desirable as a first step in reducing the toxicity of packaging waste to eliminate the addition of these heavy metals to packaging; and

6. The intent of this title is to achieve this reduction in toxicity

without impeding or discouraging the expanded use of post-consumer materials in the production of packaging and its components.

§ 37-0203. Definitions.

For the purposes of this title, the term:

1. "Distributor" shall mean any person, firm, association, partnership or corporation, who or which imports or causes to be imported into the state, any container, whether filled or unfilled, used to package products.

2. "Manufacturer" shall mean a person, firm, association, partnership or corporation, who or which makes containers to be used to package products.

3. "Package" means a container providing a means of marketing, protecting or handling a product and shall include a unit package, an intermediate package and a shipping container. "Package" shall also mean and include, but not be limited to, such unsealed receptacles as carrying cases, crates, cups, pails, rigid foil and other trays, wrappers and wrapping films, bags and tubs.

4. "Packaging component" means any individual assembled part of a package such as, but not limited to, any interior or exterior blocking, bracing, cushioning, weatherproofing, exterior strapping, coatings, closures, inks and labels.

5. "Food packaging" means a package or packaging component that is intended for direct food contact and is comprised, in substantial part, of paper, paperboard, or other materials originally derived from plant fibers.

6. "Perfluoroalkyl and polyfluoroalkyl substances" or "PFAS substances" shall mean, for the purposes of food packaging, a class of fluorinated organic chemicals containing at least one fully fluorinated

carbon atom.

§ 37-0205. Prohibitions.

1. No package or packaging component shall be offered for sale or for promotional purposes by a manufacturer or distributor which includes in the package itself, or in any packaging component, inks, dyes, pigments, adhesives, stabilizers or any other additives to which lead, cadmium, mercury or hexavalent chromium has been included as an element during manufacture or distribution in excess of the concentration levels set forth in subdivision three of this section.

2. No product shall be offered for sale or for promotional purposes by a manufacturer or distributor in a package which includes, in the package itself or in any of its packaging components, inks, dyes, pigments, adhesives, stabilizers or any other additives to which lead, cadmium, mercury or hexavalent chromium has been included as an element during manufacture or distribution in excess of the concentration levels set forth in subdivision three of this section.

3. The sum of the concentration levels of lead, cadmium, mercury or hexavalent chromium present in any package or packaging component shall not exceed the following prior to incineration:

600 parts per million by weight (0.06%), effective January 1, 1992

250 parts per million by weight (0.025%), effective January 1, 1993

100 parts per million by weight (0.01%), effective January 1, 1994.

§ 37-0207. Exemptions.

All packaging and packaging components shall be subject to this title except the following:

1. Those packages or packaging components which have been delivered to a distributor or manufacturer prior to January 1, 1992; or those packages or packaging components with a code indicating date of manufacture that were manufactured prior to January 1, 1992; or

2. Those packages or packaging components to which lead, cadmium, mercury or hexavalent chromium have been added in the manufacturing, forming, printing or distribution process in order to comply with health or safety requirements of federal law or for which there is no practicable alternative, as determined by the commissioner, provided that the manufacturer of a package or packaging component must petition the department for any exemption from the provisions of this title for a particular package or packaging component based on either criterion; provided further that the department may grant a two year exemption if warranted by the circumstances; and provided further that such an exemption may upon meeting either criterion of this subdivision be renewed for two years; or

3. Packages and packaging components that exceed the maximum levels set forth in subdivision three of section 37-0205 of this title only because of the addition of post-consumer materials, provided that the exemption for this subdivision shall expire on January 1, 1996.

4. Until January first, nineteen hundred ninety-four, any glass container that is intended for reuse or refilling that uses pigments in or on the container that exceed the maximum levels set forth in subdivision three of section 37-0205 of this title.

§ 37-0209. Prohibition on the use of perfluoroalkyl and polyfluoroalkyl substances in food packaging.

1. No person shall distribute, sell or offer for sale in this state food packaging containing perfluoroalkyl and polyfluoroalkyl (PFAS) substances as intentionally added chemicals.

2. For purposes of this section, "intentionally added chemical" shall

have the same meaning as subdivision eleven of section 37-0901 of this article.

§ 37-0211. Violations.

1. A violation of any of the provisions of this title or any rule or regulation promulgated pursuant thereto shall be punishable in the case of a first violation, by a civil penalty not to exceed ten thousand dollars. In the case of a second and any further violation, the liability shall be for a civil penalty not to exceed twenty-five thousand dollars for each violation.

2. No manufacturer or distributor of a product shall be held in violation of this title who can show that, in the purchase of a package or packaging component, he or she relied in good faith on the written assurance of the manufacturer of such packaging or packaging component that such packaging or packaging component met the requirements of this title. Such written assurance shall take the form of a certificate of compliance stating that a package or packaging component is in compliance with the requirements of this title, provided however, where compliance is achieved under an exemption provided in subdivision two or three of section 37-0207 of this title, the certificate shall state the specific basis upon which the exemption is claimed. The certificate of compliance shall be signed by an authorized official of the manufacturing or distributing company.

§ 37-0213. Reports.

The department shall include a report on the effectiveness of this title as part of its annual solid waste management plan as required by section 27-0103 of this chapter. The report shall contain a review of other toxic substances contained in packaging and recommend additions to the list of hazardous ingredients set forth in this title in order to further reduce the toxicity of packaging waste, and shall contain a recommendation whether to continue the recycling exemption as it is

provided for in subdivision three of section 37-0207 of this title, and a description of the nature of the substitutes used in lieu of the lead, mercury, cadmium, or hexavalent chromium. The department may include recommendations of the source reduction council of the conference of North-Eastern governors in the report. Recommendations made by the department to eliminate toxic substances contained in packaging shall include a determination of whether the ingredient presents or will present an unreasonable risk to health or the environment, based upon a recognized risk assessment protocol and taking into account the magnitude and severity of the harm against the benefits of the substance or mixture to society as well as the availability of substitutes for the substance or mixture and other adverse effects which such proposed action to eliminate such ingredient may have on society.

§ 37-0215. Rules and regulations.

The commissioner shall have the power to adopt such rules and regulations to provide for the effective application and enforcement of this title. The commissioner, to the extent practicable and appropriate, shall utilize the standards designated by the American Society for Testing and Materials in determining "unit packaging", "intermediate packages" and "shipping containers".

TITLE 3

GOVERNMENT AGENCY REPORTING OF TOXIC CHEMICAL RELEASES

Section 37-0301. Definitions.

37-0303. Applicability.

37-0305. Toxic chemical release form.

37-0307. Availability of information.

§ 37-0301. Definitions.

As used in this title, the following terms shall have the following meanings:

1. "Facility" means all buildings, equipment, structures, and other stationary items located on a single site or adjacent sites and owned or operated by the same person (or by any person who controls, is controlled by, or is under common control with, such person).

2. "State agency" means:

(a) each state department;

(b) division of military and naval affairs, division of state police, division of housing and community renewal, division for youth, office of general services, office of parks, recreation and historic preservation, and state university of New York;

(c) any division, board, commission, office, or bureau of any state department which is required to obtain a permit issued by the department or which undertakes an activity for which it must register with the department; and

(d) dormitory authority of the state of New York, facilities development corporation, metropolitan transportation authority (including the operations of all of its operating units), New York state energy research and development authority, New York state environmental facilities corporation, New York state olympic regional development authority, New York state thruway authority, New York state urban development corporation, port authority of New York and New Jersey, and power authority of the state of New York.

3. The term "manufacture" means to produce, prepare, import, or compound a toxic chemical.

4. The term "process" means the preparation of a toxic chemical, after its manufacture, for distribution in commerce in the same form or physical state as, or in a different form or physical state from, that in which it was received by the person so preparing such chemical, or as part of an article containing the toxic chemical.

5. The term "release" means any spilling, leaking, pumping, pouring, emitting, emptying, discharging, injecting, escaping, leaching, dumping, or disposing into the environment (including the abandonment or

discarding of barrels, containers, and other closed receptacles) of any hazardous chemical, extremely hazardous substance, or toxic chemical.

6. The term "toxic chemical" means a substance on the list described in 42 U.S.C. § 11023(c).

§ 37-0303. Applicability.

The provisions of this title shall apply to every facility owned by, or operated on behalf of, a state agency that manufactures or processes greater than twelve thousand five hundred pounds per year of a toxic chemical, or otherwise uses greater than five thousand pounds per year of a toxic chemical.

§ 37-0305. Toxic chemical release form.

1. The owner or operator of each facility subject to the requirements of this title shall complete a toxic chemical release form as published pursuant to subsection (g) of 42 U.S.C. § 11023, as amended and subsections (a) and (b) of 42 U.S.C. § 13106, as amended for each toxic chemical listed pursuant to subsection (c) of 42 U.S.C. § 11023, as amended that was manufactured or processed in quantities greater than twelve thousand five hundred pounds per year, or otherwise used in quantities greater than five thousand pounds per year at each facility during the preceding calendar year. Such form shall be submitted to the commissioner on or before July first, nineteen hundred ninety-six and thereafter on or before July first and shall contain data reflecting releases during the preceding calendar year.

2. The commissioner may require that submittal be on diskette or other compatible electronic media.

3. A facility specified in section 37-0303 of this title is exempt from the reporting requirement set forth in subdivision one of this section if the owner or operator of the facility certifies in writing to

the commissioner that no toxic chemical is manufactured or processed in quantities greater than twelve thousand five hundred pounds per year, or otherwise used in quantities greater than five thousand pounds per year at the facility. The certification must be submitted to the commissioner by the first applicable reporting date set forth in subdivision one of this section. Such facility is exempt from further reporting unless a toxic chemical is manufactured or processed in quantities exceeding twelve thousand five hundred pounds per year, or otherwise used in quantities exceeding five thousand pounds per year at the facility. The commissioner may request, from the owner or operator, documentation to support a claim that a facility qualified for this exemption.

§ 37-0307. Availability of information.

1. The release forms required under this title are intended to provide information to government agencies and the public, including citizens of communities surrounding covered facilities. The release form shall be available to inform persons about releases of toxic chemicals to the environment; to assist government agencies, researchers, and other persons in the conduct of research and data gathering; to aid in the development of appropriate regulations, guidelines, and standards; and for similar purposes. Each release form shall be printed out upon request and made available during normal working hours to the general public at the main office of the department and at the regional office that encompasses the region in which the facility is located.

2. The commissioner shall maintain in a computer data base a toxic chemical inventory based on data submitted to the commissioner pursuant to this title. Such data shall be made available upon request as a printout and diskette, as per request.

3. By December thirty-first of each year, the commissioner shall issue a written report that shall be available at no charge to the public in which the information compiled pursuant to this title is summarized for each facility subject to the provisions of this title.

TITLE 5
BISPHENOL A

Section 37-0501. Short title.
37-0503. Definitions.
37-0505. Child care products.
37-0507. Product labeling.
37-0509. Preemption.
37-0511. Rules and regulations.

§ 37-0501. Short title.

This title shall be known and may be cited as the "bisphenol A-free children and babies act".

§ 37-0503. Definitions.

As used in this title, "child care product" means all pacifiers and unfilled beverage containers to be used by children under three years old for the consumption of liquids including pacifiers, baby bottles, baby bottle liners and cups, cup lids, straws and sippy cups.

§ 37-0505. Child care products.

1. Beginning December first, two thousand ten, no person, firm, partnership, association, limited liability company or corporation shall sell or offer for sale any child care product intended for use by a child three years of age or younger containing bisphenol A.

2. The provisions of this section shall not apply to the sale or distribution of child care products resold or offered for resale, or distributed by consumers for consumer use.

§ 37-0507. Product labeling.

The commissioner may authorize product labeling of products that do not contain bisphenol A. The label on such products may prominently state "Bisphenol A Free" or "BPA-Free" to inform consumers that the product does not contain the chemical bisphenol A.

§ 37-0509. Preemption.

Jurisdiction in all matters pertaining to bisphenol A which are regulated pursuant to the provisions of this title shall be vested exclusively in the state.

§ 37-0511. Rules and regulations.

The department is authorized to promulgate such rules and regulations as it shall deem necessary to implement the provisions of this title.

TITLE VII

TRIS

Section 37-0701. Short title.

37-0703. Definitions.

37-0705. Child care products.

37-0707. Preemption.

37-0709. Rules and regulations.

§ 37-0701. Short title.

This title shall be known and may be cited as the "TRIS-free children and babies act".

§ 37-0703. Definitions.

As used in this title:

1. "Child care product" means a consumer product intended for use by children under three years of age, such as baby products, toys, car seats, nursing pillows, crib mattresses, and strollers.

2. "TRIS" shall include TCEP (TRIS (2-chloroethyl) phosphate) and TDCPP (TRIS (1,3-dichloro-2-propyl) phosphate).

§ 37-0705. Child care products.

1. Beginning December first, two thousand thirteen, no person, firm, partnership, association, limited liability company or corporation shall sell or offer for sale any child care product intended for use by a child three years of age or younger containing TRIS.

2. The provisions of this section shall not apply to the sale or distribution of child care products resold or offered for resale, or distributed by consumers for consumer use.

§ 37-0707. Preemption.

Jurisdiction in all matters pertaining to TRIS which are regulated pursuant to the provisions of this title shall be vested exclusively in the state.

§ 37-0709. Rules and regulations.

The department is authorized to promulgate such rules and regulations as it shall deem necessary to implement the provisions of this title.

TITLE IX

TOXIC CHEMICALS IN CHILDREN'S PRODUCTS

Section 37-0901. Definitions.

37-0903. Applicability.

37-0905. Chemicals of concern and high-priority chemicals.

37-0907. Reporting on the use of chemicals.

37-0909. Sales prohibition.

37-0911. Children's product safety council; established.

37-0913. Notice to retailers and the public.

37-0915. Enforcement and implementation.

37-0917. Regulations.

§ 37-0901. Definitions.

As used in this title, unless the context otherwise indicates, the following terms have the following meanings.

1. "Children's apparel" means any item of clothing that consists of fabric or related material intended or promoted for use in children's clothing. Children's apparel does not mean protective equipment designed to prevent injury, including, but not limited to, bicycle helmets, athletic supporters, knee pads or elbow pads.

2. "Chemical" means a substance with a distinct molecular composition or a group of structurally related substances and includes the breakdown products of the substance or substances that form through decomposition, degradation or metabolism.

3. " Chemical of concern" means a chemical identified by the department by rule pursuant to subdivision one of section 37-0905 of this title.

4. "Children" means a person or persons aged twelve and under.

5. "Children's product" means a consumer product primarily intended for, made for or marketed for use by children, such as baby products, toys, car seats, school supplies, personal care products as defined in

section 37-0117 of this article, a product designed or intended by the manufacturer to help a child with sucking or teething, to facilitate sleep, relaxation, or the feeding of a child, and children's novelty products, children's jewelry as defined in section 37-0115 of this article, children's bedding, furniture, furnishings, and apparel. "Children's product" does not include (a) batteries; (b) consumer electronic products and their component parts including but not limited to personal computers, audio and video equipment, calculators, wireless phones, game consoles, video toys that can be connected to a video screen and are operated at a nominal voltage exceeding twenty-four volts and handheld devices incorporating a video screen, used to access interactive software and their associated peripherals, accessories and peripherals to children's electronic products including plugs, keyboards and headphones, interactive software, intended for leisure and entertainment, such as computer games, and their storage media, such as compact disks; or (c) sporting equipment including bicycles and tricycles, skis, snow boards, sleds, and roller skates; and hunting and fishing equipment or components thereof; (d) science kits including chemistry sets and model rockets; (e) toy engines and sets of darts with metallic points; (f) motor vehicles or their component parts, watercraft or their component parts, all-terrain vehicles or their component parts, or off-highway motorcycles or their component parts.

6. "Consumer product" means any product that is regularly used or purchased to be used for personal, family or household purposes. Consumer product shall not mean: (a) a food or beverage or an additive to a food or beverage regulated by the United States Food and Drug Administration; or (b) a drug, biologic or medical device regulated by the United States Food and Drug Administration.

7. "Distributor" means a person who sells children's products to retail establishments on a wholesale basis.

8. "Manufacturer" means any person who currently manufactures a children's product or whose brand name is affixed to the children's product. In the case of a children's product that was imported into the United States, "manufacturer" includes the importer or first domestic

distributor of the children's product if the person who currently manufactures or assembles the children's product or whose brand name is affixed to the children's product does not have a presence in the United States.

9. "Practical quantification limit" means the lowest level that can be reliably achieved within specified limits of precision and accuracy during routine laboratory operating conditions.

10. "High-priority chemical" means (a) a chemical designated pursuant to paragraph (a) of subdivision two of section 37-0905 of this title; and

(b) a chemical adopted by the department pursuant to paragraph (b) of subdivision two of section 37-0905 of this title.

11. "Intentionally added chemical" means a chemical in a product that serves an intended function in the product component.

12. "Toy" means a product designed or intended by the manufacturer to be used by children at play.

13. "Trace contaminant" means a trace amount of a chemical or chemicals that is incidental to manufacturing, including an unintended by-product of chemical reactions during the manufacture of the children's product, a trace impurity in feed-stock, an incompletely reacted chemical mixture, or a degradation product.

14. "Very persistent" means having a half-life greater than or equal to one of the following: (a) a half-life in soil or sediment of greater than one hundred eighty days; (b) a half-life greater than or equal to sixty days in water or evidence of long-range transport.

15. "Very bioaccumulative" means having a bioconcentration factor or bioaccumulation factor greater than or equal to five thousand, or if neither are available, having a log Kow greater than 5.0.

§ 37-0903. Applicability.

1. New children's products. The provisions of this title shall apply to chemicals of concern and high-priority chemicals in children's products sold or distributed as new and does not apply to used children's products that are sold or distributed for free at secondhand stores, yard sales, on the internet or donated to charities.

2. Exceptions. (a) The requirements of this title shall not apply to high priority chemicals used in or for industry or manufacturing, including chemicals processed or otherwise used in or for industrial or manufacturing processes and not included in the final product.

(b) Combustion. The requirements of this title shall not apply to high-priority chemicals generated solely as combustion by-products or that are present in combustible fuels.

(c) Small business exception. The requirements of this title shall not apply to children's product manufacturers that employ five persons or fewer and are independently owned and operated.

(d) Retailers. A retailer is exempt from the requirements of this title unless that retailer knowingly sells a children's product containing a high-priority chemical after the effective date of its prohibition for which that retailer has received notification pursuant to section 37-0913 of this title.

§ 37-0905. Chemicals of concern and high-priority chemicals.

1. Chemicals of concern.

(a) Within two years of the effective date of this title, the department, in consultation with the department of health, shall promulgate a list of chemicals of concern. A chemical may be listed as a chemical of concern if it has been identified by a government entity and/or identified on the basis of credible scientific evidence as being:

(i) a carcinogen, reproductive or developmental toxicant, neurotoxicant, asthmagen, or endocrine disruptor;

(ii) persistent, bioaccumulative and toxic; or

(iii) very persistent and very bioaccumulative.

(b) The department shall review lists codified or promulgated in other states as chemicals of concern to determine if such chemicals meet the criteria of paragraph (a) of this subdivision. The department at a minimum shall consider:

- (i) 1,1,2,2-Tetrachloroethane (CAS 79-34-5)
- (ii) 1,1,3,3-Tetramethyl-4-butylphenol; 4-tert-octylphenol (CAS 140-66-9)
- (iii) 1,4-Dioxane (CAS 123-91-1)
- (iv) 2,2',3,3',4,4',5,5',6,6'-Decabromodiphenyl ether; BDE-209 (CAS 1163-19-5)
- (v) 2,4-Diaminotoluene (CAS 95-80-7)
- (vi) 2-Aminotoluene (CAS 95-53-4)
- (vii) 2-Ethylhexanoic acid (CAS 149-57-5)
- (viii) 2-Ethyl-hexyl-2, 3, 4, 5 tetrabromobenzoate (TBB) (CAS 183658-27-7)
- (ix) 2-Ethyl-hexyl-4-methoxycinnamate (CAS 5466-77-3)
- (x) 2-Methoxyethanol (CAS 109-86-4)
- (xi) 3,3'-Dimethylbenzidine and dyes metabolized to 3,3'-Dimethylbenzidine (CAS 119-93-7)
- (xii) 4-Nonylphenol; 4-NP and its isomer mixtures including CAS 84852-15-3 and CAS 25154-52-3 (CAS 104-40-5)
- (xiii) Acetaldehyde (CAS 75-07-0)
- (xiv) Acrylonitrile (CAS 107-13-1)
- (xv) Aniline (CAS 62-53-3)
- (xvi) Antimony & antimony compounds (CAS 7440-36-0)
- (xvii) Arsenic & arsenic compounds (CAS 7440-38-2) including arsenic trioxide & dimethyl arsenic (CAS 75-60-5)
- (xviii) Asbestos (CAS 1332-21-4)
- (xix) Benzene (CAS 71-43-2)
- (xx) Benzene, pentachloro (CAS 608-93-5)
- (xxi) Benzophenone-2 (BP-2); 2,2',4,4'-tetrahydroxybenzophenone (CAS 131-55-5)
- (xxii) Bis(2-ethylhexyl) tetrabromophthalate (TBPH) (CAS 26040-51-7)
- (xxiii) Bis(chloromethyl) propane-1-3-diyltetrakis-(2-chloroethyl) bis(phosphate)(V6)(CAS 38051-10-4)
- (xxiv) Bisphenol A (CAS 80-05-7)
- (xxv) Bisphenol F (CAS 620-92-8)

(xxvi) Bisphenol S (CAS 80-09-1)
(xxvii) Butyl benzyl phthalate (BBP) (CAS 85-68-7)
(xxviii) Butylated Hydroxyanisole; (BHA) (CAS 25013-16-5)
(xxix) C.I. solvent yellow 14 (CAS 842-07-9)
(xxx) Cadmium & cadmium compounds (CAS 7440-43-9)
(xxxi) Carbon disulfide (CAS 75-15-0)
(xxxii) Chlorinated paraffins (CAS 108171-26-2)
(xxxiii) Cobalt & cobalt compounds (CAS 7440-48-4)
(xxxiv) Decabromodiphenyl ethane (DBPE) (CAS 84852-53-9)
(xxxv) Di-2-ethylhexyl phthalate (CAS 117-81-7)
(xxxvi) Di-(2-methoxyethyl) phthalate (DMEP) (CAS 117-82-8)
(xxxvii) Dicyclohexyl phthalate (DCHP) (CAS 84-61-7)
(xxxviii) Diethyl phthalate (CAS 84-66-2)
(xxxix) Diisobutyl phthalate (DIBP) (CAS 84-69-5)
(xl) Di-n-hexyl phthalate (CAS 84-75-3)
(xli) Di-n-octyl phthalate (DNOP) (CAS 117-84-0)
(xlii) Dipentyl phthalate (DPP) (CAS 131-18-0)
(xliii) Ethylene glycol (CAS 107-21-1)
(xliv) Ethylene glycol monoethyl ester (CAS 110-80-5)
(xlv) Ethyl hexyl d-phenol phosphate (EHDPP) (CAS 1241-94-7)
(xlvi) Formaldehyde (CAS 50-00-0)
(xlvii) Hexabromocyclododecane (HBCD) (CAS 25637-99-4)
(xlviii) Hexachlorobenzene (CAS 118-74-1)
(xlix) Hexachlorobutadiene (CAS 87-68-3)
(l) Isopropylated triphenyl phosphate (IPTPP) (CAS 68437-41-7)
(li) Mercury & mercury compounds (CAS 7439-97-6) including methyl mercury (CAS 22967-92-6)
(lii) Methyl ethyl ketone (CAS 78-93-3)
(liii) Methyl paraben (CAS 99-76-3)
(liv) Methylene chloride (CAS 75-09-2)
(lv) N-methylpyrrolidone (CAS 872-50-4)
(lvi) Nickel and nickel compounds (CAS N/A)
(lvii) N-nitrosodimethylamine (CAS 62-75-9)
(lviii) N-nitrosodiphenylamine (CAS 86-30-6)
(lvix) Perchloroethylene (CAS 127-18-4)
(lx) Perfluorooctanoic acid (PFOA & related substances) (CAS 335-67-1)
(lxi) Perfluorooctanyl sulphonic acid and its salts (PFOS) (CAS

1763-23-1)

(lxii) Phenol (CAS 108-95-2)

(lxiii) Phenol, 4-octyl- (CAS 1806-26-4)

(lxiv) P-hydroxybenzoic acid (CAS 99-96-7)

(lxv) Propyl paraben (CAS 94-13-3)

(lxvi) Styrene (CAS 100-42-5)

(lxvii) Tetrabromobisphenol A (CAS 79-94-7)

(lxviii) Tetrachloroethene (CAS 127-18-4)

(lxix) Toluene (CAS 108-88-3)

(lxx) Tricresyl phosphate (TCP) (CAS 1330-78-5)

(lxxi) Tri-n-butyl phosphate (TNBP) (CAS 126-73-8)

(lxxii) Triphenyl phosphate (TPP) (CAS 115-86-6)

(lxxiii) Tris(1-chloro-2-propyl) phosphate (TCPP) (CAS 13674-84-5)

(lxxiv) Tris(2-chloroethyl) phosphate (CAS 115-96-8)

(lxxv) Tris(2,3-dibromopropylphosphate) (CAS 126-72-7)

(lxxvi) Vinyl chloride (CAS 75-01-4)

(lxxvii) Organohalogen flame retardants

(c) The department, in consultation with the department of health, shall periodically review the list of chemicals of concern and may through regulation add or remove a chemical from the list on the basis of credible scientific evidence. The department may remove a chemical from the list of chemicals of concern if, upon review, it determines on the basis of credible scientific evidence that such chemical no longer meets the criteria for listing under paragraph (a) of this subdivision.

2. High-priority chemicals. (a) The following chemicals are designated high priority chemicals for purposes of this title:

(i) Tris (1, 3 dichloro-2-propyl) phosphate (CAS 13674-87-8)

(ii) Benzene (CAS 71-43-2)

(iii) Mercury and mercury compounds, including methyl mercury (CAS 7439-97-6)

(iv) Asbestos (CAS 1332-21-4)

(v) Arsenic and arsenic compounds (CAS 7440-38-2) including arsenic trioxide (CASRN 1327-53-3) and dimethyl arsenic (CASRN 75-60-5)

(vi) Cadmium (CAS 7440-43-9) (other than toy coatings)

(vii) Organohalogen flame retardants in upholstered bedding or furniture

(b) The department shall periodically review the list of high priority chemicals and may by rule add to the list of high-priority chemicals if the criteria of paragraph (a) of subdivision one of this section are met and the chemical is present in a children's product and meets any of the following criteria:

(i) The chemical or its metabolites have been found through biomonitoring to be present in humans;

(ii) The chemical has been found through sampling and analysis to be present in household dust, indoor air, drinking water or elsewhere in the home environment;

(iii) The chemical has been found through monitoring to be present in fish, wildlife or the natural environment; or

(iv) The sale or use of the chemical or a children's product containing the chemical has been banned in another state or states within the United States because of the health effects of such chemical or the children's product safety council established pursuant to section 37-0911 of this title has recommended the chemical be listed as a high-priority chemical. The department shall, as part of its periodic review, consider whether the sale or use of a chemical or a children's product containing the chemical has been banned in another state or within the United States because of the health effects of such chemical.

(c) The department, in consultation with the department of health, may remove a chemical from the list of high priority chemicals if it determines on the basis of credible scientific evidence that such chemical no longer meets the criteria of paragraph (b) of this subdivision.

§ 37-0907. Reporting on the use of chemicals.

1. Reporting of chemical use. No later than twelve months after a chemical of concern or high-priority chemical appears on the lists promulgated pursuant to section 37-0905 of this title, every manufacturer who offers a children's product for sale or distribution in this state that contains a chemical of concern or a high-priority chemical shall report such chemical use at or above practical quantification limits to the department, provided however, that the

department may, through regulation, establish an alternative threshold for the reporting of trace contaminants.

(a) This report must at a minimum identify the children's product, the high-priority chemical or chemicals of concern contained in the children's product and the intended purpose of such chemicals. The department may also require reporting of the following information:

(i) the amount of such chemical in the children's product; or

(ii) information on the likelihood that the chemical will be released from the children's product to the environment during the product's life cycle and the extent to which users of the product are likely to be exposed to the chemical.

(b) The department is authorized to direct submission of such report to the interstate chemicals clearinghouse and may otherwise provide for reciprocal data sharing with other states which require reporting of the same information.

2. Waiver of reporting. Upon application by a manufacturer, the commissioner may waive all or part of the reporting requirements under subdivision one of this section for one or more specified uses of a high-priority chemical. In making such determination, the commissioner may consider: (a) if substantially equivalent information is already publicly available or that the information is not needed for the purposes of this chapter, (b) similar waivers granted by other states, and (c) whether the specified use or uses are minor in volume.

3. Fees. The manufacturer shall pay a fee upon submission of a report of chemical use pursuant to subdivision one of this section or a waiver request pursuant to subdivision two of this section to cover the department's reasonable costs in the administration and enforcement of this title. Exclusive of fines and penalties, the state shall only recover its actual cost of administration and enforcement.

§ 37-0909. Sales prohibition.

1. Effective January first, two thousand twenty-three, no person shall distribute, sell or offer for sale in this state a children's product in

which tris (1, 3 dichloro-2-propyl) phosphate (CAS 13674-87-8), benzene (CAS 71-43-2),, or asbestos (CAS 1332-21-4) is intentionally added. This provision shall not apply: (a) to a children's product solely based on its containing an enclosed battery or enclosed electronic components; (b) where state regulation of children's products is preempted by federal law; (c) where the chemical is present as a trace contaminant; or (d) to an inaccessible component of a children's product that during reasonable, foreseeable use and abuse of the product would not come into direct contact with a child's skin or mouth, as determined by the department. The commissioner may exempt a children's product from this prohibition if, in the commissioner's judgment, the lack of availability of the children's product could pose an unreasonable risk to public health, safety or welfare.

2. (a) To the extent allowed by federal law, the department may, by regulation, prohibit the distribution, sale, or offer for sale in this state of a children's product that contains a chemical added to the high-priority chemicals list pursuant to section 37-0905 of this title, or a chemical recommended for prohibition by the children's product safety council pursuant to paragraph (b) of subdivision five of section 37-0911 of this title.

(b) In developing rules to prohibit a chemical pursuant to this subdivision, the department shall rely on credible scientific evidence and consider information relevant to the hazards based on the quantitative extent of potential exposures to the chemical under its intended or reasonably anticipated conditions of use.

§ 37-0911. Children's product safety council; established. 1. There shall be established, within the department, the children's product safety council. Such council shall be composed of ten members as follows:

- (a) the commissioner, or the commissioner's designee, who shall be the chair of the council;
- (b) the commissioner of health or his or her designee;
- (c) a designee of the commissioner with expertise in epidemiology, toxicology or health risk assessment;

(d) a designee of the commissioner of health with expertise in epidemiology, toxicology or health risk assessment; and

(e) six members appointed by the governor, two of whom shall be recommended by the temporary president of the senate, and two by the speaker of the assembly.

2. (a) Of the four members appointed to the children's product safety council and recommended by the temporary president of the senate and the speaker of the assembly, the temporary president of the senate and the speaker of the assembly shall each recommend:

(i) one member who has expertise in pediatrics; and

(ii) one member who has a background or expertise in toxicology or health risk assessment.

(b) Of the two additional members appointed to the children's product safety council, the governor shall appoint members who have a background in environmental health and safety, risk assessment or medicine.

(c) The members of such council appointed pursuant to paragraph (e) of subdivision one of this section shall serve terms of two years.

(d) The members appointed pursuant to paragraph (e) of subdivision one of this section shall each serve his or her term of office or until his or her successor is appointed; provided that any vacancy in the position of an appointed member shall be filled in the same manner as the original appointment and only for the unexpired term of the vacancy.

3. The members of the children's product safety council shall receive no compensation for their services, but shall be allowed their actual and necessary expenses incurred in the performance of their duties pursuant to this title.

4. The children's product safety council shall meet at such times and places as may be determined by its chair. The council shall meet at a minimum of two times per year. All meetings shall be open to the public pursuant to article seven of the public officers law. A majority of the members of such council shall constitute a quorum for the transaction of business. Action may be taken, and motions and resolutions adopted, at any meeting by the affirmative vote of a majority of the full membership of the council.

5. (a) The council shall make recommendations to the department relating to those chemicals, which the department may list as high-priority chemicals pursuant to section 37-0905 of this title. The council shall provide the department with its first list of recommended high-priority chemicals no later than one year from the initial meeting of the council, and the council shall update the list annually thereafter. In determining what chemicals shall be recommended as high-priority chemicals the council shall, at a minimum, consider the criteria of paragraph (b) of subdivision two of section 37-0905 of this title;

(b) The council shall make recommendations to the department relating to those chemicals which should be prohibited by the department pursuant to subdivision two of section 37-0909 of this title.

(i) In determining what chemicals shall be recommended for prohibition, the council shall, at a minimum, consider those chemicals listed as high-priority chemicals pursuant to section 37-0905 of this title.

(ii) The council shall provide the department with its first list of such chemicals no later than two years from the initial meeting of the council. The council shall update the list, including a review of the chemicals listed as high-priority chemicals pursuant to section 37-0905 of this title, annually thereafter.

6. The children's product safety council shall be entitled to request and receive information from any state, municipal department, board, commission or agency that may be required or are deemed necessary for the purposes of such council.

7. Before the council advances any recommendation to the department, the council shall provide an opportunity for public and stakeholder comments. Final recommendations of the council shall be posted on the department's website within thirty days after the council adopts such recommendations.

§ 37-0913. Notice to retailers and the public.

1. A manufacturer of a children's product containing a high-priority chemical shall notify persons that offer the children's product for sale or distribution in the state, in a form prescribed by the department, of the use of such high-priority chemical and provide such persons with information regarding the toxicity of such chemical, except that this subdivision shall apply to trace contaminants in a manner consistent with section 37-0907 of this title.

2. The department shall provide information to the public about children's products containing chemicals of concern or high priority chemicals by posting such information as reported by the manufacturers on the department's website, provided however, that the department shall not be held liable for the accuracy of a manufacturer's report.

§ 37-0915. Enforcement and implementation.

1. Failure to provide notice. A children's product containing a high-priority chemical may not be sold, offered for sale or distributed for sale in this state unless the manufacturer has provided a report to the department required under section 37-0907 of this title by the date required in such section. The commissioner may exempt a children's product from this prohibition if, in the commissioner's judgment, the lack of availability of the children's product could pose an unreasonable risk to public health, safety or welfare.

2. Statement of compliance. The department may request the manufacturer of the children's product to provide a statement of compliance on a form provided by the department, within fifteen days of receipt of a request from the department. The statement of compliance shall:

(a) attest that the children's product does not contain the high-priority chemical; or

(b) attest that notification required by section 37-0913 of this title has been provided;

(c) attest that the manufacturer has notified persons who sell the

product in this state that the sale of the children's product is prohibited;

(d) attest that the presence of a high-priority chemical is only as a trace contaminant; or

(e) attest that the chemical prohibited pursuant to subdivision two of section 37-0909 of this title is only present in an inaccessible component of the children's product.

§ 37-0917. Regulations.

The department may adopt any rules and regulations it deems necessary to implement the provisions of this title.

TITLE 10

REGULATION OF CHEMICALS IN UPHOLSTERED FURNITURE, MATTRESSES AND ELECTRONIC ENCLOSURES

Section 37-1001. Definitions.

37-1003. Furniture and mattresses.

37-1005. Exemptions.

37-1007. Electronic display.

37-1009. Reporting.

37-1011. Certification of compliance.

37-1013. Severability.

37-1015. Regulations.

§ 37-1001. Definitions.

As used in this title:

1. "Consumer product" means any product that is regularly used or purchased to be used for personal, family or household purposes. Consumer product shall not mean: (a) a food or beverage or an additive to a food or beverage regulated by the United States Food and Drug Administration; or (b) a drug, biologic or medical device regulated by

the United States Food and Drug Administration.

2. "Covered flame retardant chemical" means any chemical that meets both of the following criteria:

(a) A functional use for the chemical is to resist or inhibit the spread of fire or as a synergist to chemicals that resist or inhibit the spread of fire; and

(b) The chemical is one of the following: a halogenated, organophosphorus, organonitrogen, or nanoscale chemical. As used in this title:

(i) "Halogenated chemical" is any chemical that contains one or more halogen elements, including fluorine, chlorine, bromine, or iodine.

(ii) "Organophosphorus chemical" is any chemical that contains one or more carbon elements and one or more phosphorus elements.

(iii) "Organonitrogen chemical" is any chemical that contains one or more carbon elements and one or more nitrogen elements.

3. "Custom upholsterer" means a person who, either by himself or herself or through employees or agents, repairs, reupholsters, recovers, restores, or renews upholstered furniture. A custom upholsterer shall not include any manufacturer of new, ready to be sold furniture, or new made to order furniture.

4. "Electronic display" means a consumer product with a display screen and associated electronics that, as its primary function, displays visual information from wired or wireless sources and is available for purchase by individuals or households for personal use in a residential space. Electronic display shall not include: (a) any electronic display with a screen area smaller than or equal to one hundred square centimeters or fifteen and one-half square inches; (b) projectors; (c) virtual reality headsets; (d) all-in-one video conference systems; or (e) displays that are integrated with appliances and are not available for purchase as separate products by end-users.

5. "Gel foam mattress" means a mattress in which interior foam layers are composed of polyurethane foam or latex foam which has a polyurethane-based gel material either mixed with the foam or applied to

the outer surface of polyurethane or latex foam, or a mattress in which the core or padding layers are composed solely of gel material.

6. "Intentionally added" shall have the same meaning as "intentionally added chemical" in subdivision eleven of section 37-0901 of this article.

7. "Mattress" means a ticking filled with a resilient material used alone or in combination with other products intended or promoted for sleeping upon.

8. "Memory foam mattress" means a mattress which contains interior layers of foam composed of viscoelastic polyurethane foam or low-resistance polyurethane foam.

9. "Organohalogen flame retardant chemical" means a chemical that meets both of the following criteria:

(a) A functional use for the chemical is to resist or inhibit the spread of fire or as a synergist to chemicals that resist or inhibit the spread of fire; and

(b) The chemical contains one or more halogen elements, including fluorine, chlorine, bromine, or iodine, bonded to carbon.

10. "Reupholstered furniture" means furniture whose original fabric, padding, decking, barrier material, foam, or other resilient filling has been replaced by a custom upholsterer, that has not been sold since the time of the replacement.

11. "Ticking" means the outermost layer of fabric or related material that encloses the core and upholstery materials of a mattress or mattress pad. A mattress ticking may consist of several layers of fabric or related materials quilted together.

12. "Upholstered furniture" means any item of furniture, that consists, in whole or in part, of leather, plastic, fabric or other material that contains cotton, wool, polyurethane or other natural or synthetic material that is placed in cushions or on the frame of the

furniture.

13. "Upholstered or reupholstered furniture component" means the separate constituent parts of upholstered furniture, specifically cover fabrics, barrier materials, resilient filling materials, and decking materials.

§ 37-1003. Furniture and mattresses.

1. Beginning December first, two thousand twenty-four, no person shall sell or offer for sale in the state of New York any new, not previously owned, upholstered furniture or mattress, that contains, or a constituent component of which contains, any covered flame retardant chemical, individually or in combination, that is any of the following:

- (a) At or above levels set by the department in regulation; or
- (b) Intentionally added.

2. Beginning December first, two thousand twenty-five, a custom upholsterer in the state of New York shall not repair, reupholster, re-cover, restore, or renew upholstered furniture or reupholstered furniture using replacement components that contain any covered flame retardant chemical, individually or in combination, that is any of the following:

- (a) At or above levels set by the department in regulation; or
- (b) Intentionally added.

§ 37-1005. Exemptions.

The prohibitions in section 37-1003 of this title shall not apply to the following:

1. Electronic components of mattresses, reupholstered furniture, or upholstered furniture, or any associated casing for such electronic components.

2. Upholstered or reupholstered furniture components other than those identified in subdivision thirteen of section 37-1001 of this title.

3. Thread or fiber when used for stitching mattress components together.

4. The natural fibers wool, silk, and other animal fibers whether used singly or in combination with other materials.

5. Textiles made using modacrylic fiber components without antimony trioxide when used internally as a barrier material in a memory foam or gel foam mattress or aramid fibers when used in the fabric that covers the bottom (non-sleep surface) of a mattress that has a sleeping surface on only one side of the mattress. This exemption shall expire on January first, two thousand twenty-six.

§ 37-1007. Electronic display.

Beginning December first, two thousand twenty-four, no person shall sell or offer for sale in the state of New York any electronic display that contains, in the enclosure or stand of such electronic display, any organohalogen flame retardant chemical, individually or in combination, that is any of the following:

- (a) At or above levels set by the department in regulation; or
- (b) Intentionally added.

§ 37-1009. Reporting.

1. For the purposes of this section, "manufacturer" shall mean a person who: (a) assembles or substantially assembles electronic displays for sale in the state; (b) manufactures electronic displays, under its own brand name or under any other brand name, for sale in the state; (c) sells, under its own brand name, electronic displays in the state; (d) owns a brand name that it licenses to another person for use on electronic displays sold in the state; (e) imports electronic displays

for sale in the state; or (f) manufactures electronic displays for sale in the state without affixing a brand name.

2. Beginning one year after the effective date of this title, no electronic display shall be sold in the state unless the manufacturer has submitted an annual report identifying all of the organohalogen flame retardant chemicals used in the enclosure or stand of the electronic display in a form determined by the department.

§ 37-1011. Certification of compliance.

1. For the purpose of this section the following terms shall have the following meanings:

(a) "covered products" shall mean:

(i) mattresses, upholstered furniture, or electronic displays; or

(ii) upholstered or reupholstered furniture components for custom upholsterers.

(b) "manufacturer" shall mean a person who, for sale in the state:

(i) assembles or substantially assembles covered products;

(ii) manufactures covered products under its own brand name or under any other brand name;

(iii) sells covered products under its own brand name;

(iv) owns a brand name that it licenses to another person for use on covered products;

(v) imports covered products; or

(vi) manufactures covered products without affixing a brand name.

2. No person that sells covered products shall be held in violation of this title if they can show that they relied in good faith on the written assurance of the manufacturer that such covered products met the requirements of this title. Such written assurance shall take the form of a certificate of compliance stating that such covered product is in compliance with the requirements of this title, provided however, where compliance is achieved under an exemption provided in section 37-1005 of this title, the certificate shall state the specific basis upon which the exemption is claimed. The certificate of compliance shall be signed

by an authorized official of the manufacturer.

§ 37-1013. Severability.

If any clause, sentence, paragraph, subdivision, section or part of this act shall be adjudged by any court of competent jurisdiction to be invalid, such judgment shall not affect, impair, or invalidate the remainder thereof, but shall be confined in its operation to the clause, sentence, paragraph, subdivision, section or part thereof directly involved in the controversy in which such judgment shall have been rendered. It is hereby declared to be the intent of the legislature that this act would have been enacted even if such invalid provisions had not been included herein.

§ 37-1015. Regulations.

The department may adopt any rules and regulations it deems necessary to implement the provisions of this title.

TITLE 11

REGULATION OF COATED OR TREATED SEEDS

Section 37-1101. Unlawful acts.

§ 37-1101. Unlawful acts.

1. Beginning January first, two thousand twenty-nine, it shall be unlawful for any person to sell, offer for sale or use, or distribute within the state any corn, soybean or wheat seeds coated or treated with pesticides, as defined in subdivision thirty-five of section 33-0101 of this chapter, with the active ingredients clothianidin, imidacloprid, thiamethoxam, or any other neonicotinoid as determined by the department in regulation unless a valid waiver is issued by the department to the user pursuant to subdivision two of this section.

2. The commissioner in consultation with the commissioner of agriculture and markets may issue a waiver to allow the use of such seeds for the production of agricultural commodities.

(a) No such waiver shall be valid for more than two years.

(b) Such waiver shall be granted only if at a minimum the following conditions are met:

(i) the farm owner must complete an integrated pest management training;

(ii) a pest risk assessment and a pest risk assessment report must be completed;

(iii) any such seeds may only be planted on the farm property or properties identified in the pest risk assessment report; and

(iv) the farm owner must maintain current records of such pest risk assessment report and records of when treated seeds are planted, both of which shall be subject to review upon request by the department.

(c) The commissioner in consultation with the commissioner of agriculture and markets shall promulgate any appropriate regulations prior to undertaking this waiver process.

(d) The department shall annually report to the legislature on the number of waivers granted.

ARTICLE 38

CHLOROFLUOROCARBON COMPOUNDS

Section 38-0101. Declaration of policy.

38-0103. Definitions.

38-0105. Distribution and sale of products containing
chlorofluorocarbon compounds.

38-0107. Regulation of the use of chlorofluorocarbon compounds.

38-0109. Notice of public hearing.

38-0111. Severability.

§ 38-0101. Declaration of policy.

It is hereby declared to be the policy of the state to protect present

and future New Yorkers from the dangers inherent in the depletion of the world's ozone layer, by restricting the distribution and sale of chlorofluorocarbon compounds as specified herein.

§ 38-0103. Definitions.

The following terms, whenever used or referred to in this article, shall have the following meaning unless a different meaning clearly appears from the context:

1. "Chlorofluorocarbon compounds" shall mean one or more of the following substances used alone or in combination with other compounds: CFC-11, CFC-12, CFC-113, CFC-114, or CFC-115.

2. "Ozone" means an allotropic, triatomic form of oxygen, chemically described as O₃.

3. "Halon compounds" shall mean one or more of the following substances: halon-1211, halon-1301 and halon-2402.

4. "Person" shall mean any person, business enterprise or state authority, locality or municipality.

5. "Motor vehicle" shall mean motor vehicle as defined by section one hundred twenty-five and omnibus as defined by section one hundred twenty-six of the vehicle and traffic law.

6. "Motor vehicle air conditioner" means mechanical vapor compression refrigeration equipment used to cool the drivers or passenger compartment of any motor vehicle.

7. "Approved motor vehicle refrigerant recapturing equipment" means equipment that is certified by Underwriters Laboratories (or another independent standards testing organization acceptable to the department) to meet the Underwriters Laboratories standard applicable to equipment for the removal and storage of used CFC refrigerants from motor vehicle

air conditioners (Underwriters Laboratories standards 1963, October 2, 1989) unless such standard is modified by the commissioner through regulation. Equipment purchased before the date of such certification shall be considered approved if the manufacturer provides proof that the model is functionally identical to a model which is certified pursuant to this section.

8. "Approved motor vehicle refrigerant recycling equipment" means equipment that is certified by Underwriters Laboratories (or another independent standards testing organization acceptable to the department) to meet the society of automotive engineers standard applicable to equipment for the extraction and reclamation of refrigerant from motor vehicle air conditioners (SAE standard J-1990, October, 1989), unless such standard is modified by the commissioner through regulation. Equipment purchased before the date of such certification shall be considered approved if the manufacturer provides proof that the model is functionally identical to the model which is certified pursuant to this section.

9. "Properly using" approved motor vehicle refrigerant recycling equipment means using such equipment in conformity with the Society of Automotive Engineers standard establishing the recommended service procedure for containment of CFC-12 refrigerant (SAE standard J-1989 or revisions thereof).

10. "Recycle" means to decontaminate, reclaim, or reprocess CFC refrigerants captured from a motor vehicle air conditioner or refrigeration system for reuse, or to destroy such compounds by methods approved by either the United States Environmental Protection Agency or the commissioner.

11. "Refrigeration system" shall mean and shall be limited to: refrigerators used in retail stores, cold storage warehouse refrigeration systems, and air conditioning systems in large buildings, including but not limited to, those systems commonly referred to as chillers.

§ 38-0105. Distribution and sale of products containing chlorofluorocarbon compounds.

3. The commissioner shall be prepared to implement regulations developed pursuant to section 38-0107 of this chapter limiting or prohibiting the distribution, sale, or offer or exposure for sale of any aerosol spray can containing a restricted use chlorofluorocarbon compound as of January first, nineteen hundred seventy-eight should the commissioner affirmatively find pursuant to that section that the distribution, sale, or offer or exposure for sale of restricted use chlorofluorocarbon compounds will create significant environmental or public health hazards.

§ 38-0107. Regulation of the use of chlorofluorocarbon compounds.

1. The commissioner shall by regulation provide that:

(a) On and after January first, nineteen hundred ninety-one, no person repairing or servicing motor vehicle air conditioners shall knowingly vent into the atmosphere the chlorofluorocarbon compounds contained in such air conditioners and shall capture for recycling or capture and recycle, to the greatest extent possible, the chlorofluorocarbon compounds during servicing and repair of such air conditioners by properly using approved refrigerant recycling equipment provided, however, that the provisions of this paragraph shall not apply to any automobile repair shop with less than four covered bays, until January first, nineteen hundred ninety-two;

(b) On and after January first, nineteen hundred ninety-two, no motor vehicle air conditioners shall be disposed of by any means without first having had the chlorofluorocarbon refrigerants contained within mechanical cooling systems captured for recycling. Such recapture shall be performed by the person accepting the motor vehicle air conditioners for recycling or dismantling. In making captured chlorofluorocarbon compound refrigerants, which are captured from disposed of motor vehicle mobile air conditioning systems, suitable for reentry into the market place, the captured chlorofluorocarbon compound refrigerants must be

recycled to a uniform level of quality such as that specified by the Air-Conditioning and Refrigeration Institution (ARI) Standard 700 "Specifications for Fluorocarbon Refrigerants";

(c) On and after January first, nineteen hundred ninety-two, no chlorofluorocarbon compounds shall knowingly be vented into the atmosphere or otherwise be improperly disposed of during the repair, servicing or disposal of refrigeration systems but instead shall to the greatest extent possible be captured for recycling. In making captured chlorofluorocarbon compound refrigerants, which are captured from a refrigeration system, suitable for reentry into the market place, the captured chlorofluorocarbon compound refrigerants must be recycled to a uniform level of quality such as that specified by the Air-Conditioning and Refrigeration Institute (ARI) Standard 700 "Specification for Fluorocarbon Refrigerants".

(d) On and after January first, nineteen hundred ninety-two, no containers containing less than fifteen pounds of chlorofluorocarbon compounds, commonly used for recharging automotive air conditioners, shall be sold or offered for sale within the state except for sales to persons meeting the requirements of section three hundred ninety-eight-c of the vehicle and traffic law and who have obtained for use in their business approved motor vehicle refrigerant recycling equipment or approved motor vehicle refrigerant recapturing equipment or to persons for purposes of resale only. Persons wishing to purchase chlorofluorocarbon compounds in containers with a capacity less than fifteen pounds must show proof of compliance with the requirements of this section.

2. The commissioner is hereby directed upon application by an interested party to determine, after a hearing, whether any uses, including but not limited to medical uses, of chlorofluorocarbon compounds and halon compounds are so necessary to human health, safety and welfare that they should be exempted from the application of this section and section three hundred ninety-nine-t of the general business law or, upon a finding that appropriate refrigerant recycling equipment does not exist in sufficient quantities, to phase in compliance with the provisions of subdivision one of this section by postponing the compliance dates therein. Upon receiving an application to phase in

compliance with the provisions of paragraph (a), (b), or (c) of subdivision one of this section, the commissioner shall approve or deny the application within ninety days. If the commissioner fails to act within ninety days, the application shall automatically be granted for one hundred eighty days or until such time as the commissioner renders a decision, whichever is longer.

Any action of the commissioner under this article shall be subject to judicial review in a proceeding under article seventy-eight of the civil practice law and rules instituted within thirty days of its effective date.

3. Any local law, ordinance, rule or regulation relating to sale, use, reuse, reclamation, or disposal of chlorofluorocarbon compounds must be identical to or the same as the provisions of this article and the rules and regulations adopted hereunder.

§ 38-0109. Notice of public hearing.

Notice of public hearing shall be by publication in two newspapers likely to give notice to the people of the state of such hearings at least once in each of three successive weeks. In addition, the commissioner shall give notice by letter to the manufacturers of chlorofluorocarbon compounds known to the commissioner whenever practicable.

§ 38-0111. Severability.

The provisions of this act shall be severable, and if any clause, sentence, paragraph, subdivision or part of this act shall be adjudged by any court of competent jurisdiction to be invalid, such judgment shall not affect, impair or invalidate the remainder thereof, but shall be confined in its operation to the clause, sentence, paragraph, subdivision or part thereof directly involved in the controversy in which such judgment shall have been rendered.

ARTICLE 39
**SEWAGE SYSTEM CLEANERS AND ADDITIVES USED
IN RESTRICTED GEOGRAPHICAL AREAS**

Section 39-0101. Declaration of policy.

39-0103. Definitions.

39-0105. Prohibition of sale and use.

39-0107. Powers and duties of the commissioner.

§ 39-0101. Declaration of policy.

It is declared to be the public policy of this state to prevent the pollution of water resources in restricted geographical areas through the use of sewage system cleaners and additives by establishing a regulatory program restricting the use of such products.

§ 39-0103. Definitions.

The following terms, whenever used or referred to in this article, shall have the following meanings:

1. "Sewage system cleaner" means (a) any solid or liquid material intended or used primarily for the purpose of cleaning, treating, or unclogging any part of a sewage system or (b) any solid or liquid material intended or used primarily for the purpose of continuously or automatically deodorizing or disinfecting any part of a sewage system including but not limited to solid cakes or devices placed in plumbing fixtures. Excluded from the definition are products intended or used primarily in the manual surface cleaning, scouring, treating, deodorizing or disinfecting of common plumbing fixtures.

2. "Sewage system" means any part of a wastewater disposal system, including but not limited to all toilets, urinals, piping, drains, sewers, septic tanks, distribution boxes, absorption fields, seepage

pits, cesspools, and dry wells.

3. "Hydrocarbon chemical" means any compound composed of carbon and hydrogen.

4. "Restricted chemical material" means (a) any halogenated hydrocarbon chemical (aliphatic or aromatic) including but not limited to trichloroethane, tetrachloroethylene, methylene chloride, halogenated benzenes, carbon tetrachloride, or (b) any aromatic hydrocarbon chemical including but not limited to benzene, toluene, naphthalene, or (c) any halogenated phenol derivative in which a hydroxide group and two or more halogen atoms are substituted onto the aromatic carbons of a benzene ring including but not limited to trichlorophenol, pentachlorophenol, or (d) acrolein, acrylonitrile, or benzidine.

5. "Restricted geographic areas" means Nassau and Suffolk counties.

§ 39-0105. Prohibition of sale and use.

1. No person shall distribute, sell, offer or expose for sale in restricted geographical areas any sewage system cleaner or additive containing any restricted chemical material in excess of one part per hundred by weight.

2. No person shall use, introduce or apply or cause any other person to use, introduce or apply in any sewage system, surface waters, or groundwaters in restricted geographical areas any sewage system cleaner or additive containing any restricted chemical material in excess of one part per hundred.

§ 39-0107. Powers and duties of the commissioner.

1. The commissioner shall, within three calendar months after the effective date of this article, promulgate regulations establishing methods for identification and quantification of ingredients in sewage

system cleaners and additives used in restricted geographical areas.

2. The commissioner shall, within three calendar months after the effective date of this article, promulgate regulations requiring manufacturers of sewage system cleaners or additives distributed, sold or offered for sale in restricted geographical areas to furnish to the commissioner existing information regarding chemical components including the nature and extent of investigations and research performed by the manufacturer concerning the effects of such products on the quality of groundwaters, provided, however, that in lieu of furnishing said information, such manufacturers may refer the commissioner to any federal or state agency which has obtained said information, to the extent that said information is available to the commissioner from any such agency.

3. Whenever the commissioner finds, after investigation and public hearing, that any ingredient other than a restricted chemical material in a sewage system cleaner or additive distributed, sold, offered or exposed for sale in restricted geographical areas is likely to have a dangerous, deleterious or injurious effect upon the public health or environment, he shall prohibit or restrict in restricted geographical areas the sale, distribution, offer or exposure for sale or use by any person of sewage system cleaners or additives containing such ingredients.

4. The commissioner shall hold confidential any information obtained pursuant to subdivision two of this section when shown by any manufacturer that such information, if made public, would divulge competitive business information, methods or processes entitled to protection as trade secrets of such manufacturers.

ARTICLE 40

HAZARDOUS SUBSTANCES BULK STORAGE ACT

Section 40-0101. Legislative findings and declarations.

40-0103. Applicability.

40-0105. Definitions.

40-0107. Registration and fees.
40-0109. Access to records and facilities.
40-0111. Corrective actions and reporting.
40-0113. Rules and regulations.
40-0115. Sales of hazardous substances.
40-0117. Compliance with regulations.
40-0119. Trade secret information.
40-0121. Preemption and delegation.
40-0123. Severability.

§ 40-0101. Legislative findings and declarations.

The legislature finds and declares that the lands, water and air of New York state constitute an irreplaceable resource upon which is founded the well-being of public health, economic vitality and the state's environment. These resources may be contaminated by releases of hazardous substances from active and abandoned storage facilities. Once these resources are contaminated, they cannot be completely restored to their original state and therefore, contamination of the resources must be prevented through improved safeguards in storage, handling and processing of hazardous substances.

The legislature finds and declares these releases to be a threat to the public health and welfare and hereby exercises the power of the state to prevent these releases from occurring through the establishment of a state regulatory program governing existing, new and abandoned facilities.

§ 40-0103. Applicability.

This article applies to all storage facilities which are used for the storage of hazardous substances, except that this article shall not apply to any storage facilities, regulated under:

1. Title 7, 9 or 11 of article 27 of this chapter;

2. The Natural Gas Pipeline Safety Act of 1968 (49 U.S.C. § 1671 et seq.);
3. The Hazardous Liquid Pipeline Safety Act of 1979 (49 U.S.C. § 2001 et seq.);
4. The Natural Gas Act (15 U.S.C. § 717 et seq.);
5. The Liquefied Natural and Petroleum Gas Act (Title 17 of article 23 of this chapter); or
6. Provisions relating to liquid petroleum pipeline corporations (article 3-C of the public service law); or
7. The Atomic Energy Act of 1954, as amended (42 U.S.C. § 2011 et seq.).

§ 40-0105. Definitions.

1. "Abandoned storage facility" means a storage facility which is no longer being maintained in accordance with this article or the regulations promulgated thereunder.
2. "Authorization" means the possession, where required, of a valid license, permit or certificate issued by an agency of the state of New York or the federal government or an order issued by the commissioner or the administrator of the federal environmental protection agency under applicable statutes, rules or regulations regarding the possession or release of hazardous substances or otherwise engaging in conduct which is exempt under applicable statutes, rules or regulations from the requirements of possessing such a license, permit, certificate or order.
3. "Environment" means any water, water vapor, any land including land surface or subsurface, air, fish, wildlife, biota and all other natural resources.

4. "Hazardous substance" means any substance listed as a substance hazardous to the public health, safety or the environment in regulations promulgated pursuant to article thirty-seven of this chapter; provided however, that the term "hazardous substance" shall not include petroleum as defined in section 17-1003 of this chapter.

5. "Modified storage facility" means a storage facility at which there has occurred substantial reconditioning or repair of an existing tank or storage vessel or associated pipes, lines or fixtures or replacement of a substantial portion of the storage facility.

6. "Operator" means any person who leases, operates, controls or supervises a facility.

7. "Owner" means any person who has legal title to a facility.

8. "Person" or "persons" means any individual, public or private corporation, political subdivision, government agency, municipality, co-partnership, association, firm, consortium, joint venture, interstate body, trust, estate or any other legal entity whatsoever.

9. "Release" means any unauthorized pumping, pouring, spilling, leaking, emitting, discharging, escaping, emptying, leaching or disposing, directly or indirectly, of a hazardous substance so that the substance or any related constituent thereof, or any degradation product of such a substance or of a related constituent thereof, may enter the environment.

10. "Storage facility" or "facility" means a single property or contiguous or adjacent properties used for a common purpose which are owned or operated by the same person on or in which are located one or more tanks which are used for the storage or containment of hazardous substances.

11. "Tank" means a device or holding vessel designed to contain an accumulation of a hazardous substance which is constructed of

non-earthen materials that provide structural support. The term "tank" includes all associated pipes, lines, fixtures, and other ancillary equipment.

Such term shall not include:

a. non-stationary tanks, barrels, drums, containers or other holding vessels stored at a facility for a period of less than ninety days, or where individual capacity of such non-stationary tanks, barrels, drums, containers, or other holding vessels at a facility is less than one thousand kilograms (2,200 lbs.);

b. flow-through process tanks or other equipment wherein physical, chemical or biological changes take place as part of a process;

c. septic tanks, stormwater or wastewater collection systems;

d. capacitors or transformers containing polychlorinated biphenyls;

e. above ground tanks on an operating farm used solely to store or contain hazardous substances which will be used for agricultural purposes on such farm; or

f. tanks which have been permanently closed in accordance with regulations promulgated pursuant to section 40-0113 of this chapter.

§ 40-0107. Registration and fees.

1. On or before July first, nineteen hundred eighty-seven, the department shall promulgate a schedule of registration fees per storage facility for the cost of inspecting such facilities and based on the size and type of such facilities, which shall not exceed:

a. one hundred twenty-five dollars per facility, up to two hundred fifty facilities at a single contiguous site; and

b. seventy-five dollars per facility in excess of two hundred fifty facilities at a single contiguous site.

In no case shall the registration fees charged to an owner exceed fifty thousand dollars for storage facilities located at a single contiguous site. Fees shall be paid to the department at the time of registration or registration renewal. Registration shall be renewed every two years or whenever title to a storage facility is transferred, whichever first occurs. Registration shall be on forms and in accordance with procedures prescribed by the department.

2. Within one year of the promulgation of the schedule of registration fees pursuant to subdivision one of this section, all owners shall identify and register each storage facility with the department.

3. The fees established pursuant to this section are intended to provide revenues sufficient to meet the costs incurred by the department in implementing the provisions of this article on and after the promulgation of the schedule of registration fees. All fees collected pursuant to this section shall be paid to the state comptroller for deposit in the miscellaneous special revenue fund, hazardous substances bulk storage account, and shall be subject to appropriation and allocation pursuant to the state finance law. Expenditures from the hazardous substances bulk storage account of the miscellaneous special revenue fund shall be limited to the costs of the department related to this article. The commissioner shall, on or before December thirty-first, nineteen hundred eighty-eight, report to the legislature and the governor on the adequacy of the fee schedule in providing sufficient revenues necessary to implement the provisions of this article.

§ 40-0109. Access to records and facilities.

1. To carry out the purpose of this article and any rule, regulation or order issued thereunder, the department may, at reasonable times:

a. have the right to entry to, upon, or through any storage facility in which a hazardous substance is stored or in which any records are required to be maintained;

b. have access to and copy any records required to be maintained;

c. inspect any equipment, practice or method which is required by the provisions of this article; and

d. have access to and inspect any monitoring stations or conduct tests or take samples to identify any actual or suspected release of a hazardous substance resulting from the operation of the facility, including the right to take split samples.

2. Any person storing a hazardous substance may be required to furnish the department with information on the storage facility, repairs or replacements, hazardous substances stored, storage and handling practices, or results of tests, monitoring and inspections.

§ 40-0111. Corrective actions and reporting.

1. Where a release of any hazardous substance is suspected or appears probable, the department may order the owner to inspect any storage facility, location and/or associated equipment suspected to be the source of the release and to test for tightness and structural soundness. If the owner fails to conduct such tests within ten days of notification of such an order the department may conduct such tests. The reasonable expenses of conducting such tests incurred by the department shall be paid by the owner.

2. It shall be unlawful to continue operation of any tank where a continuing release to the environment is occurring. The contents of such a tank shall be promptly removed to a secure storage location. The department may prohibit deliveries of hazardous substances to any tank (i) that is leaking or (ii) where a leak appears probable. If the source of the leak or a probable leak cannot be determined, the department may

prohibit deliveries to any tank or tanks that may be the probable source of a leak until such time as the source has been identified, at which time the prohibition on delivery will apply to the leaking tank or tanks. In addition, the department may prohibit deliveries of hazardous substances to any tank that is in violation of any requirement prescribed by regulation pursuant to this title related to:

- a. installing required equipment for spill prevention, overfill protection, leak detection, corrosion protection or secondary containment;

- b. performing leak detection or inspections of tank systems;

- c. properly operating or maintaining leak detection; or

- d. properly operating or maintaining spill, overfill or corrosion protection equipment.

- (i) The department shall attach a tag to the tank or tanks to identify those tanks to which delivery is prohibited and provide a written notice to the owner and operator specifying the reasons for the prohibition of delivery.

- (ii) As promptly as possible thereafter, not to exceed fifteen days, the commissioner shall provide the owner or operator an opportunity to be heard and to present proof that such conditions or activity does not violate the provisions of this section or of the rules or regulations adopted pursuant to this title. The commissioner shall adopt rules and regulations describing the procedure to be followed in the prohibition of hazardous substance deliveries. In adopting such rules and regulations the department shall allow for the owner or operator at any time to submit information to the department to demonstrate that the owner or operator is in compliance with the requirements or has corrected the violation that prompted the department to prohibit deliveries of hazardous substances and to allow the tank or tanks to be, as promptly as possible, brought back into operation, not to exceed two business days from the department's determination that a tank is in compliance. The department shall use its best efforts to timely determine compliance.

(iii) Unless otherwise authorized by the department, no person shall tamper with or remove, or cause the tampering with or removal of, a tag attached to any tank under the provisions of this subdivision.

(iv) No person shall deliver, cause the delivery of, deposit, or accept a hazardous substance to any tank or tanks to which a tag is affixed pursuant to this subdivision.

3. Any person who is the owner of, or in actual or constructive possession or control of, a hazardous substance, as defined in section 40-0105 of this article, or any employee or agent thereof, or any person in a contractual relationship therewith who inspects, tests or repairs any portion of the facility which was or is used for the storage of hazardous substances, shall promptly notify the department as soon as he has knowledge of the release of a reportable quantity of a hazardous substance into the environment.

§ 40-0113. Rules and regulations.

1. The department, on or before July first, nineteen hundred eighty-eight, shall promulgate rules and regulations to implement this article. Such rules and regulations may differ as required based on the nature of the hazardous substance stored, the type or class of storage facility, and the degree of environmental protection required.

The regulations shall include but are not limited to:

a. A list of hazardous substances described by subdivision four of section 40-0105 of this article. Such list shall indicate the minimum quantity of each such hazardous substance the storage of which shall be subject to regulation pursuant to this article. Such list shall also indicate the minimum quantity of each such hazardous substance which, if released into the environment, shall be deemed to be a reportable quantity.

b. Minimum standards and schedules for design, construction, installation, operation, maintenance, repair, monitoring, testing and

inspection of facilities. Schedules shall be based on factors such as type of facility, type and quantity of hazardous substances stored, facility age, condition and construction type, soil conditions, location of facility relative to water supplies, surrounding population, and other environmental factors including but not limited to future physical climate risk due to sea level rise, and/or storm surges and/or flooding, based on available data predicting the likelihood of future extreme weather events, including hazard risk analysis data if available.

c. Requirements for maintaining records pursuant to this article.

d. Requirements for reporting releases and corrective action in response to such releases, and for taking such corrective action pursuant to this article.

e. Provision for variances from specific provisions, provided it can be shown to the satisfaction of the department that the new or alternate design, practice or method used or proposed to be used provides protection equal to or greater than the requirements of the regulations. The regulations shall also include policies, procedures and criteria for reviewing such variance requests.

f. Criteria whereby facilities are properly closed and thereby released from testing and inspection requirements.

g. Requirements for maintaining such evidence of financial responsibility as is deemed necessary and desirable for operating, maintaining or closing storage facilities pursuant to this article.

Evidence of financial responsibility shall be established in accordance with such regulations and may include, but shall not be limited to any one or any combination of the following: insurance, guarantee, surety bond, letter of credit, or qualification as a self-insurer.

h. Rules and training requirements for operators of hazardous substance storage facilities. The department shall specify training

requirements for:

- (i) persons having primary responsibility for on-site operation and maintenance of storage tank systems;
- (ii) persons having daily on-site responsibility for the operation and maintenance of storage tank systems; and
- (iii) daily, on-site employees having primary responsibility for addressing emergencies presented by a spill or release from a storage tank system.

2. Nothing in this article shall authorize the department to adopt or amend any rule or regulation in a manner less stringent than provided in the Federal Resource Conservation and Recovery Act of 1976, as amended, and in rules and regulations promulgated pursuant thereto.

§ 40-0115. Sales of hazardous substances.

1. The manufacturer or distributor of a hazardous substance must provide the operator of the storage facility which purchases such substances with technical guidance and recommended practices for the storage and handling of such substances.

2. No delivery of a hazardous substance may be made to a storage facility that is not registered pursuant to section 40-0107 of this article.

§ 40-0117. Compliance with regulations.

It shall be unlawful to operate, maintain or close a storage facility other than in compliance with the regulations promulgated pursuant to this article.

§ 40-0119. Trade secret information.

Disclosure to the public by the department of any information required

to be provided under this article which is claimed to be a trade secret or confidential business information, shall be treated as such pursuant to the provisions of the freedom of information law (article six of the public officers law).

§ 40-0121. Preemption and delegation.

1. Any local law or ordinance which is inconsistent with any provision of this article or any rule or regulation promulgated thereunder shall be preempted.

2. Notwithstanding subdivision one of this section, the department may approve and formally delegate the administration and enforcement of the provisions of this article to any county or to any city with a population of one million or more, provided that, upon written application from such county or city, the department determines that the local law or ordinance affords an equal or greater level of environmental protection than is afforded by the requirements of this article or of the rules and regulations promulgated thereunder. In approving and delegating the activities provided for under this article, the department shall set forth the terms and conditions of such approval and delegation necessary to meet its responsibility under this article, including the reservation of the right to take enforcement actions.

3. Notwithstanding any other provision of law, if a county, or a city with a population of one million or more, has a local law or ordinance which would be approvable under subdivision two of this section, except with respect to enforcement or penalties for violations, such county or city may, after being so notified in writing by the department, adopt a local law or ordinance authorizing enforcement authority and penalty provisions equivalent to those provided in title forty-three of article seventy-one of this chapter.

4. Upon formal delegation, the delegated county or city may directly assess and receive the fees authorized by section 40-0107 of this article, provided that any such fees so received are used for the

purpose of administering and enforcing the provisions of the approved local law or ordinance. In no event shall duplicate fees be assessed by both the department and by any delegated county or city.

§ 40-0123. Severability.

The provisions of this article shall be severable and if any phrase, clause, sentence or provision of this article, or the applicability thereof to any person or circumstance shall be held invalid, the remainder of this article and the application thereof shall not be affected thereby.

ARTICLE 41

**POWERS AND DUTIES OF THE DEPARTMENT APPLICABLE ONLY TO
THE SIXTH PARK REGION**

Section 41-0101. Sixth park region; definition.

41-0103. Regulation of navigation.

41-0105. Acquisition, maintenance and operation of parks, state recreational and historic facilities and services.

41-0107. Approval of certain applications and projects.

§ 41-0101. Sixth park region; definition.

The sixth region shall consist of the counties of Hamilton and Essex and those portions of the counties of Saint Lawrence, Lewis, Oneida, Clinton, Franklin, Herkimer, Fulton, Ulster, Saratoga, Warren, Washington, Greene, Delaware and Sullivan lying within the Adirondack or Catskill parks as defined in section 9-0101 of this chapter.

§ 41-0103. Regulation of navigation.

The department shall, within the sixth park region, administer articles 3 and 11 of the Navigation Law.

§ 41-0105. Acquisition, maintenance and operation of parks, state recreational and historic facilities and services.

The department shall, within the sixth park region, consistent with section 9-0109 of this chapter, acquire, establish, maintain and operate parks, state recreational and historic facilities and services, and all the functions, powers, duties and obligations relating thereto, possessed by the department immediately preceding the effective date of this chapter, are hereby continued.

§ 41-0107. Approval of certain applications and projects.

Approval by the commissioner shall be required for all applications for funds under, and for all projects undertaken pursuant to the following provisions of the Conservation Law, if the funds are to be used, or the projects undertaken, in the sixth park region as defined by section 41-0101: (a) section 1-0312, the Land and Water Conservation Fund; (b) title 7 of article 1, the Park and Recreation Land Acquisition Act and (c) title 8 of article 1, Park, Marine, Forest Recreation and Historic Site Development.

ARTICLE 42

HISTORIC HUDSON-HOOSIC RIVERS PARTNERSHIP

Section 42-0101. Definitions.

42-0103. The Historic Hudson-Hoosic Rivers Partnership.

42-0105. The Historic Hudson-Hoosic Rivers Partnership Reserve.

42-0107. Powers and duties of the partnership.

42-0109. Stewardship plan.

42-0111. Appropriations by municipalities.

42-0113. Cooperation of state agencies.

42-0115. Stewardship fund.

42-0117. Siena College revolutionary war institute.

§ 42-0101. Definitions.

1. "Partnership" shall mean the organization established as the Historic Hudson-Hoosic Rivers Partnership pursuant to section 42-0103 of this article.

2. "Reserve" shall mean a region in which there is a combination of publicly and privately owned lands and land uses, within a defined area where there are traditional patterns including agriculture and open space, town settlement and economic activity, which due to their pattern and configuration, and because of the need for sustained productivity could best be protected, developed and managed through the development of a comprehensive stewardship plan addressing matters including, but not limited to, collaborative agriculture and open space protection, tourism development and revitalization of main streets, recreational development, and protection and interpretation of natural and cultural heritage.

3. "Historic Hudson-Hoosic Rivers area" or "area" shall mean the contiguous area in Saratoga, Washington and Rensselaer counties within the towns of Saratoga, Stillwater, Northumberland, Easton, Fort Edward, Waterford, Halfmoon, Greenwich, Schaghticoke, Hoosick, Moreau, White Creek, Cambridge, Kingsbury, Corinth and Pittstown; the villages of South Glens Falls, Cambridge, Hudson Falls, Valley Falls, Schaghticoke, Corinth and Hoosick Falls; and the city of Mechanicville.

4. "Historic Hudson-Hoosic Rivers fund" or "fund" shall be the fund established pursuant to section 42-0115 of this article.

§ 42-0103. The Historic Hudson-Hoosic Rivers Partnership.

1. The Historic Hudson-Hoosic Rivers Partnership is hereby established in the department to be a body corporate and public, and to consist of up to thirty-seven voting members. The following individuals shall be invited to become members: the supervisor of the town of Saratoga, the

supervisor of the town of Fort Edward, the supervisor of the town of Greenwich, the supervisor of the town of Easton, the supervisor of the town of Stillwater, the supervisor of the town of Waterford, the supervisor of the town of Northumberland, the supervisor of the town of Halfmoon, the supervisor of the town of Mechanicville, the supervisor of the town of White Creek, the supervisor of the town of Cambridge, the supervisor of the town of Moreau, the supervisor of the town of Schaghticoke, the supervisor of the town of Pittstown, the supervisor of the town of Hoosick, the supervisor of the town of Kingsbury, the supervisor of the town of Corinth, the mayor of the city of Mechanicville, the mayor of the village of Schuylerville, the mayor of the village of Victory, the mayor of the village of Stillwater, the mayor of the village of Fort Edward, the mayor of the village of Greenwich, the mayor of the village of South Glens Falls, the mayor of the village of Cambridge, the mayor of the village of Hudson Falls, the mayor of the village of Valley Falls, the mayor of the village of Schaghticoke, the mayor of the village of Corinth, the mayor of the village of Hoosick Falls and the mayor of the village of Waterford. In addition, six members shall be appointed as follows: two shall be appointed by the governor, two shall be appointed by the temporary president of the senate and two shall be appointed by the speaker of the assembly. The commissioner and the commissioners of agriculture and markets, and parks, recreation and historic preservation shall be nonvoting ex-officio members of the partnership. The six appointed members of the partnership, two of which shall be residents of Saratoga county, two of which shall be residents of Rensselaer county and two of which shall be residents of Washington county, shall by training, education and experience or attainment be qualified to analyze, interpret and/or support matters relevant to historical, environmental, economic or scenic preservation work of the partnership. Each ex-officio member of the partnership may designate a representative to attend, in his or her place, meetings of the partnership and to act in his or her behalf at meetings and with respect to the business of the partnership.

2. The term of office for appointees shall be four years. Members may serve on the partnership until they resign or are replaced. In the event of a vacancy occurring other than by the expiration of a member's term,

such vacancy shall be filled for the balance of the unexpired term in the same manner as the original appointment.

3. A majority of the members of the partnership shall constitute a quorum.

4. The members of the partnership shall receive no compensation for their services, but shall be entitled to reimbursement for their expenses actually and necessarily incurred in the performance of their duties.

5. Notwithstanding any inconsistent provisions of law, general, special or local, no officer or employee of the state or any civil division thereof, shall be deemed to have forfeited or shall forfeit his or her office or employment by reason of his or her acceptance of membership on the partnership.

6. At the initial meeting, the partnership shall elect officers, who shall serve at the pleasure of the partnership.

8. The partnership shall meet at least once every two months until approval of the plan by the commissioner as provided pursuant to section 42-0109 of this article, and at least once every quarter thereafter.

9. Every state agency and public corporation having jurisdiction of land within municipalities located within the Historic Hudson-Hoosic Rivers Partnership Reserve shall, to the fullest extent practicable, cooperate and assist the partnership in carrying out the provisions of this article.

§ 42-0105. The Historic Hudson-Hoosic Rivers Partnership Reserve.

The area encompassed within the municipal boundaries in the towns of Saratoga, Stillwater, Northumberland, Easton, Fort Edward, Waterford, Halfmoon, Moreau, Schaghticoke, Cambridge, White Creek, Pittstown, Hoosick, Kingsbury, Corinth and Greenwich; the villages of South Glens

Falls, Cambridge, Hudson Falls, Valley Falls, Schaghticoke, Corinth and Hoosick Falls; and the city of Mechanicville is hereby designated to be the Historic Hudson-Hoosic Rivers Partnership Reserve.

§ 42-0107. Powers and duties of the partnership.

The partnership shall have the power:

1. To sue and be sued.
2. To make by-laws for the management and regulation of its affairs.
3. To make and execute contracts and all other instruments necessary or convenient for the exercise of its powers and functions under this article.
4. To appoint and remove an executive officer, officers, agents and employees, and prescribe their duties and qualifications and fix their compensation.
5. To contract for professional and technical assistance and advice, including retaining or employing counsel, private consultants and independent contractors.
6. To accept gifts, grants, loans, or contributions from, and enter into contracts or other transactions with, the United States and the state or any commission of either of them, any municipality, any public or private corporation, individual or other legal entity, and to use any such gifts, grants, loans or contributions to advance any of its corporate purposes.
7. To conduct scientific, economic and environmental studies.
8. To conduct environmental education programs.
9. To facilitate and provide passive recreational activities including

hiking, nature study and photography.

10. To make recommendations regarding necessary facilities including paths and trails, education center and related parking areas.

11. To assist individuals, corporations, associations and public entities on ways to protect the resources of the reserve.

12. To prepare an annual report on the conduct of its activities which shall include a recommended budget for the next year.

13. To adopt and use a seal.

14. To construct or cause to have constructed necessary facilities, including paths and trails, a visitor education center, and related parking areas on the land described in section three of the chapter of the laws of two thousand fifteen that added this subdivision.

15. To exercise and perform such other powers and duties as shall have been or may be conferred by law.

§ 42-0109. Stewardship plan.

1. The partnership shall develop a stewardship plan which shall represent the fundamental document defining the recommended protection and beneficial public use goals for the reserve and the means and techniques for their attainment. To the fullest extent practicable, the plan shall be consistent with the state open space plan and the Erie Canalway National Heritage Corridor preservation and management plan, as such plans are amended. The plan shall include, but need not be limited to:

a. A survey or inventory of the following, together with the establishment of management priorities therefor:

- (i) historic resources;
- (ii) scenic resources;

- (iii) recreational uses; and
- (iv) farmland and agricultural related uses.

b. An economic plan that shall include but not be limited to:

(i) A main street element for traditional commercial streets in reserve communities;

(ii) A tourism plan with elements of branding, marketing and promotion; and

(iii) A strategy for small enterprise business financing and support to nurture entrepreneurs interested in launching business activity in the reserve particularly relating to services for tourists and businesses adaptively using historic structures.

c. Regional cost sharing opportunities helping municipalities in the reserve to approach common matters collectively through agreements.

d. An education program including publications and guided activities.

e. A financial plan for implementation of plan recommendations.

2. A draft plan shall be submitted to the commissioner, the commissioner of parks, recreation and historic preservation and secretary of state within thirty months of the effective date of this article. The commissioner, in consultation with the commissioner of parks, recreation and historic preservation and secretary of state, may approve the plan, may return the plan to the partnership with recommendations for approval, or may reject such plan. Prior to submission of the draft plan, the partnership shall hold at least one public hearing on the draft plan in each county for which the plan is applicable. The local legislative body of each city, town or village within the boundaries designated by the draft plan must approve the plan following the public hearing or hearings and before it is submitted to the commissioner. A copy of the approved plan shall be provided to the governor, the temporary president of the senate and the speaker of the assembly.

3. Not less than once every five years the partnership shall review

the plan, and shall include as part of such review a public hearing in each county for which the plan is applicable. The partnership shall propose amendments to the management plan as they are deemed to be necessary and appropriate.

§ 42-0111. Appropriations by municipalities.

To effectuate the purposes of this article, the local legislative bodies of the towns, villages and city within the reserve and the counties of Saratoga, Washington and Rensselaer may appropriate and pay over to the partnership moneys to be expended by the partnership to carry out its functions pursuant to this article.

§ 42-0113. Cooperation of state agencies.

To effectuate the purposes of this article, the partnership may request from any department, board, bureau, commission or other agency of the state, and the same are authorized to provide, such cooperation and assistance, services and data as will enable the partnership properly to carry out its functions pursuant to this article.

§ 42-0115. Stewardship fund.

1. There is hereby established in the joint custody of the state comptroller and the commissioner of taxation and finance a special fund to be known as the "Historic Hudson-Hoosic Rivers fund".

2. Moneys in the fund shall consist of all moneys appropriated for the purpose of such fund, donations to the partnership and all moneys transferred to such fund pursuant to law. Any interest received by the comptroller on money on deposit in the fund shall be retained in and become part of the fund.

3. Moneys in the fund may be used, pursuant to appropriation, by the

partnership for its purposes under this article.

§ 42-0117. Siena College revolutionary war institute.

The partnership may enter into an agreement with the Siena College revolutionary war institute to provide diverse, academically based education opportunities based on the historic resources of the Historic Hudson-Hoosic Rivers Partnership Reserve for local schools, residents in the reserve and visitors to the reserve to learn about our nation's birth and democratic foundations.

ARTICLE 43

LAKE GEORGE PARK COMMISSION

Section 43-0101. Legislative intent.

43-0103. Definitions.

43-0105. Lake George park commission; continuation.

43-0107. Powers.

43-0109. Expenses; employees.

43-0110. Wastewater management.

43-0111. Commercial use in zones.

43-0112. Stormwater management and stream corridor management.

43-0113. Appropriations by municipalities in certain counties.

43-0115. Restrictions on use of signs and advertising devices.

43-0117. Operation of ferries and certain other boats, barges
and vessels restricted.

43-0119. Land use restrictions within Lake George park.

43-0121. Compliance with sewage disposal requirements.

43-0123. Environmental review.

43-0125. Regulatory and user fees.

§ 43-0101. Legislative intent.

The preservation and enhancement of natural beauty in the state, the preservation and conservation of pure water supplies and other natural

resources, the preservation and development of natural resources and recreational facilities for the benefit of the public, the promotion of the study of history, natural science, and lore, the conservation and protection of state lands in the forest preserve and areas adjacent thereto, and the promotion and preservation of the health and welfare of the public residing, sojourning, or visiting therein being the concern of the state, the legislature hereby declares it to be in the public interest to preserve, protect, conserve and enhance the unique natural scenic beauty and to promote the study of the history, natural science, and lore of Lake George and the area near or adjacent thereto and to provide means whereby owners of real property near or adjacent to the lake, other interested individuals, corporations, associations, organizations, and municipalities bordering on the lake may preserve, protect and enhance the natural scenic beauty of the lake and its surrounding countryside and regulate the use of the lake and the area near or adjacent thereto for appropriate residential, conservation, health, recreational, and educational purposes.

§ 43-0103. Definitions.

As used in this article:

1. "Lake George park" means the bed, waters, islands, and shore of Lake George and all land in the counties of Essex, Warren and Washington surrounding said lake and situate within the following described boundaries:

Beginning at the southwesterly corner of lot 18 of the Crane Brush Patent in the northerly bounds of the Ogilvie Patent, running from thence northerly along the westerly bounds of the said lot 18 and the easterly bounds of lot 11 of the said Crane Brush Patent, to the northwesterly corner of the said lot 18 and the northeasterly corner of the said lot 11; thence westerly along the northerly bounds of the said lot 11 to the southeasterly corner of lot 12, Crane Brush Patent; thence northerly along the easterly bounds of the said lot 12 to the northeasterly corner thereof in the southerly bounds of lot 13, Crane

Brush Patent; thence easterly along the southerly bounds of a portion of the southerly bounds of the said lot 13 to the southeasterly corner thereof and the southwesterly corner of lot 16, Crane Brush Patent; thence northerly along the westerly bounds of the said lot 16 to the northwesterly corner thereof in the southerly bounds of lot 3, Garland Patent; thence easterly along the southerly bounds of lot 3, Garland Patent to the southeasterly corner thereof; thence northerly along the easterly bounds of the said lot 3 to the northeasterly corner thereof in the southerly bounds of the Norman Patent; thence northerly, crossing the said Norman Patent in a straight line, to the southeasterly corner of lot 10, McDonald Patent; thence northerly along the easterly bounds of the said lot 10 to the northeasterly corner thereof in the southerly bounds of Porter's Patent; thence westerly along the southerly bounds of lots 7 and 6, Porter's Patent to the southwesterly corner of the said lot 6; thence northerly along the westerly bounds of the said lot 6, Porter's Patent, to the northwesterly corner thereof; thence running in a straight line northerly, crossing the remaining portion of Porter's Patent and also crossing Robert's Patent, to the southwesterly corner of lot 86, Northwest Bay Tract; thence northwesterly along the westerly bounds of lots 86, 91 and 99, Northwest Bay Tract, to the northwesterly corner of the said lot 99; thence easterly along the northerly bounds of the said lot 99 to the southwesterly corner of lot 116, Brant Lake Tract; thence northerly along the westerly bounds of lots 116, 117, and 118, Brant Lake Tract, to the northwesterly corner of the said lot 118; thence easterly along the northerly bounds of lots 118, and 113, Brant Lake Tract to the northeasterly corner of the said lot 113; thence northerly along the westerly bounds of lots 87 and 88, Brant Lake Tract, to the northwesterly corner of the said lot 88; thence easterly along the northerly bounds of lots 88, 79, 56, 47, 24 and 15, Brant Lake Tract, to the northeasterly corner of the said lot 15 and to a point in the westerly bounds of the Hague Tract; thence northerly along the westerly bounds of the Hague Tract to the northwesterly corner of lot 38, Hague Tract; thence easterly along the northerly bounds of the said lot 38 to the northeasterly corner thereof; thence northerly along the westerly bounds of a portion of the westerly bounds of lot 37 and the westerly bounds of lot 36, Hague Tract, to the northwesterly corner of the said lot 36; thence easterly along a portion of the northerly bounds

of the said lot 36 to the southwesterly corner of lot 33, Hague Tract; thence northerly along the westerly bounds of lots 33, 30 and a portion of lot 29, Hague Tract, to the Warren-Essex County line; thence running northeasterly along the said county line to the center of Trout Brook; thence northerly, downstream, along Trout Brook as it winds and turns, to the intersection of Trout Brook with State Highway Route 9N; thence southwesterly along said State Highway to the intersection of the said State Highway with Alexandria Avenue south of Ticonderoga Village; thence easterly along Alexandria Avenue, crossing the outlet of Lake George, and continuing along said Alexandria Avenue and said line extended, to the American Telephone and Telegraph Company's telephone cable line; thence southerly along said telephone cable line to the north bounds of lot 77 of the Alexander Turner Patent; thence westerly along the north bounds of lot 77 and lot 79 of said Patent to the northwest corner of lot 79; thence southerly along the west bounds of lots 79, 80, 81, 82, 83, and 84 to the southwest corner of said lot 84; thence westerly along the division line between lots 85 and 67 of said Turner Patent to the northwest corner of lot 67; thence southerly along the west bounds of lots 67, 16, 17, 18, 19 and 20 of said Turner Patent to the division line between the Town of Putnam and the Town of Dresden; thence westerly along said town line to the northwest corner of lot 52 of the aforesaid Turner Patent; thence southerly along the west bounds of lots 52, 51, and 50 of said Turner Patent, to the division line between the Turner Patent and the South Bay Tract; thence southwesterly along said division line to the northwest corner of lot 148, South Bay Tract; thence southerly along the west bounds of lots 148 and 149 of the South Bay Tract to the north line of lot 162 of said tract; thence westerly along the north line of said lot 162 to the northwest corner thereof; thence southerly along the west bounds of lots 162, 161, 160, 159, 158 and 44 to the southwest corner of said lot 44; thence westerly along the southerly bounds of lots 39 and 22, South Bay Tract, to the southwesterly corner of the said lot 22; thence southerly along the westerly bounds of lot 23, South Bay Tract to the southwesterly corner thereof; thence westerly along the southerly bounds of lot 12, South Bay Tract, to the southwesterly corner thereof; thence southerly along the westerly bounds of lot 11 of South Bay Tract to the southwest corner of lot 11; thence westerly along the south bounds of lot 77 to the

southwest corner thereof; thence southerly along the west bounds of lots 76, 75, and 74 of the South Bay Tract to the southwest corner of lot 74; thence westerly along the south bounds of lots 89, 99, 105, and 118 of the South Bay Tract to the southwest corner of lot 118; thence southerly along the west bounds of lots 117, 116, and 115 to the division line between the South Bay Tract and the Westfield Tract; thence westerly along said division line to the northwest corner of lot 56 of the Westfield Tract; thence southerly along the westerly bounds of lots 56 and 49 of the Westfield Tract to the southwesterly corner of the said lot 49; thence westerly along the southerly bounds of lot 50, Westfield Tract to the southwesterly corner of the said lot 50; thence southerly along the westerly bounds of lots 43 and 42, of the Westfield Tract to the southwesterly corner of the said lot 42; thence running in a straight line crossing lots 37 and 31 of the Westfield Tract to the northwesterly corner of lot 25 of the Westfield Tract; thence westerly along the southerly bounds of an unnumbered lot, and the southerly bounds of lot 28, Westfield Tract and the southerly bounds of lot 47, Lake George Tract, to the southwesterly corner of the said lot 47, and the northwesterly corner of lot 46, and the northeasterly corner of lot 45, Lake George Tract; thence southerly along the easterly bounds of lots 45, 39, 37 and 27, Lake George Tract; to the southeasterly corner of the said lot 27; thence westerly along the southerly bounds of the said lot 27 to the easterly bounds of lot 28, Lake George Tract; thence southerly along a portion of the easterly bounds of the said lot 28 and the easterly bounds of lot 29, Lake George Tract to the southeasterly corner of the said lot 29; thence westerly along the southerly bounds of the said lot 29 and a portion of the southerly bounds of lot 30, being also along a portion of the northerly bounds of lot 23, and the northerly bounds of lot 24, all in Lake George Tract, to the northwesterly corner of the said lot 24; thence southerly along the westerly bounds of the said lot 24 to the southwesterly corner thereof; thence westerly along a portion of the northerly bounds of lot 18, Lake George Tract, to the northwesterly corner thereof; thence southerly along the easterly bounds of lots 17, 15, 16, 14, 12, 9 and a portion of lot 5, Lake George Tract and continuing the same course southerly to the center of the Farm to Market Road; thence westerly in the center of the said road to the Warren-Washington County Line; thence southerly along

the said county line to the northeasterly corner of the Queensbury Patent; thence westerly along the northerly bounds of the Queensbury Patent to the southeasterly corner of the Hasborne Patent; thence northerly along the easterly bounds of the Hasborne Patent to the northeasterly corner thereof; thence westerly along the northerly bounds of the Hasborne Patent and the northerly bounds of the Fairlie Patent to the northwesterly corner of the said Fairlie Patent; thence southerly along a portion of the westerly bounds of the Fairlie Patent to the northeasterly corner of lot 18, French Mountain Tract; thence westerly along the northerly bounds of lots 18, 20, 21, and 25 of the French Mountain Tract to the northwesterly corner of the said lot 25; thence running in a straight line westerly crossing the southerly portion of the Houghton Patent to the northwesterly corner of lot 60, Luzerne Tract; thence southerly along the westerly bounds of the said lot 60 to the southwesterly corner thereof; thence westerly along the southerly bounds of lots 59, 58 and 57, Luzerne Tract to the southwesterly corner of the said lot 57; thence northerly along a portion of the westerly bounds of the said lot 57 to the southeasterly corner of lot 66, Luzerne Tract; thence westerly along the southerly bounds of the said lot 66 to the southwesterly corner thereof; thence northerly along a portion of the westerly bounds of the said lot 66 to the northeasterly corner of lot 67, Luzerne Tract and being in the southerly bounds of the Randall Location; thence westerly along the southerly bounds of the said Randall Location to the southwesterly corner thereof; thence northerly along the westerly bounds of the said Randall Location and the westerly bounds of lots 75, 78, 83, 93, 98 and 107, Luzerne Tract, to a point in the southerly bounds of lot 113, Luzerne Tract; thence westerly along a portion of the southerly bounds of the said lot 113 to the southwesterly corner thereof; thence northerly along the westerly bounds of the said lot 113 to the northwesterly corner thereof in the southerly bounds of the J. Ross Patent; thence easterly along a portion of the southerly bounds of the J. Ross Patent to the southeasterly corner thereof; thence northerly along the easterly bounds of the said J. Ross Patent to the northeasterly corner thereof; thence running in a straight line northerly to the southeasterly corner of the J. Thurman Farm; thence northerly along a portion of the easterly bounds of the said J. Thurman Farm to the northwesterly corner of lot 143, Luzerne Tract; thence

easterly along the northerly bounds of the said lot 143, Luzerne Tract, to the northeasterly corner thereof in the westerly bounds of the McCauley Patent; thence northerly along a portion of the McCauley Patent to the northwesterly corner thereof; thence easterly along a portion of the northerly bounds of the McCauley Patent to the southwesterly corner of lot 6, David Smith Patent; thence easterly along the southerly bounds of lots 6, 7, and 22 of the said Smith Patent to the southeasterly corner of the said lot 22; thence northerly along the easterly bounds of lots 22, 21, 20, 19, 18, 17, 16, and 15 of the said Smith Patent to the northeasterly corner of the said lot 15 in the southerly bounds of lot 29 of the James Abeel 3000 acre Patent; thence westerly along a portion of the southerly bounds of the said lot 29 to the southwesterly corner thereof; thence northerly along the westerly bounds of lots 29, 27, 26, 22, 21 and 16 of the said James Abeel 3000 acre Patent to the northwesterly corner of the said lot 16; thence westerly along the northerly bounds of lot 17, of the James Abeel 3000 acre Patent to the northwesterly corner thereof; thence northerly along the westerly bounds of lots 14, 11, 8, 5 and 2 of the James Abeel 3000 acre Patent to a point in the southerly bounds of lot 33, Northwest Bay Tract; thence westerly along a portion of the southerly bounds of the said lot 33 to the southwesterly corner thereof, the same being the southeasterly corner of the John Campbell Patent; thence northerly and northeasterly along the easterly and southeasterly bounds of the said John Campbell Patent to the southeasterly corner of the Ogilvie Patent; thence northeasterly along the southeasterly bounds of the said Ogilvie Patent to the northeasterly corner thereof at the southeasterly corner of lot 10 of the Crane Brush Patent; thence westerly along the southerly bounds of the said lots 10 and 18 to the point and place of beginning.

2. "Zone" means any area of land within the Lake George park in which the use of land for commercial purposes is prohibited, restricted, or controlled pursuant to the provisions of this article, local law or ordinance, agreement, restrictive covenant, or otherwise.

3. "Commercial purposes" means use of lands, including structures thereon for any purpose from which a profit may be derived, other than a lease or rental of residential property for single, private family

residential purposes.

4. "Commission" means the Lake George park commission.

5. "Surface water runoff" means water which flows over the land and does not percolate into the soil.

6. "Stormwater runoff" means any surface water runoff or runoff in channels which results directly either from a rain storm or from the melting of snowpack.

§ 43-0105. Lake George park commission; continuation.

There shall continue to be in the department a commission to be known as "Lake George park commission." Such commission shall be a body corporate and politic. It shall consist of the commissioner, ex officio, and nine members to be appointed by the governor, by and with the advice and consent of the senate, at least two of whom shall reside in the county of Essex, two in the county of Warren and two in the county of Washington and at least three of whom shall be members of a civic, protective or service association in the Lake George area. In making appointments pursuant hereto the governor shall give consideration to nominations made by such associations in such area. The members shall be appointed for overlapping nine year terms of office running from April first of the year in which such terms shall, respectively, commence, provided, however, that of the members first appointed one shall be appointed for a one-year term of office beginning April 1, 1961, one for a two-year term of office, one for a three-year term of office, one for a four-year term of office, one for a five-year term of office, one for a six-year term of office, one for a seven-year term of office, one for an eight-year term of office and one for a nine-year term of office, each of which shall commence on such date. An appointment to fill a vacancy shall be made for the remainder of the affected term of office. The officers thereof shall consist of a chairman, vice-chairman and secretary-treasurer to be elected by the commission. The members of the commission shall receive no compensation but may be reimbursed for

expenses necessarily incurred in the performance of their duties.

§ 43-0107. Powers.

The commission shall have power to:

1. Sue and be sued.
2. Make and execute contracts and all other instruments necessary or convenient for the exercise of its powers and functions under this article.
3. Establish and maintain such facilities as may be necessary for the transacting of its business.
4. Utilize, to the extent feasible, the staff and facilities of existing state agencies, pursuant to an allocation to be made by the director of the budget.
5. Hold hearings and subpoena witnesses in the exercise of its powers, functions and duties provided for by this article.
6. Contract for professional and technical assistance and advice.
7. Contract for and to accept assistance, including but not limited to gifts, grants or loans of funds or of property from the federal government or any agency or instrumentality thereof, or from any agency or instrumentality of the state, or from any other public or private source and to comply, subject to the provisions of this article, with the terms and conditions thereof, subject to the approval of the director of the budget.
8. Adopt, amend and repeal, after public hearing according to the provisions of the state administrative procedure act (except in the case of rules and regulations that related to the organization or internal management of the agency), such rules and regulations, consistent with

this article, as it deems necessary to administer this article, and to do any and all things necessary or convenient to carry out the purpose and policies of this article and to exercise all powers granted by law.

9. Adopt, amend and repeal, after public hearing according to the provisions of the state administrative procedure act, rules and regulations relating to tree-cutting within the park; provided, however, that nothing herein shall prevent a municipality from adopting a law, code, ordinance or regulation which is more stringent than such rules and regulations adopted by the commission.

10. Encourage individuals, corporations, associations and organizations to acquire real property or interests or rights in real property for the preservation of open space characterized by natural scenic beauty or conditions enhancing parkwide qualities, and to preserve such lands or interests or rights in real property through the establishment of land trusts and other lawful means for protecting and preserving such lands.

11. Encourage and assist in the creation of special local improvement districts for purposes including control of storm water runoff problems and the acquisition of significant environmental areas, including wetlands, to control such problems.

12. Study, monitor and inspect for pollution from any source within the park and to enforce the provisions of this article and any regulations promulgated pursuant thereto, cooperate with, aid and assist municipalities and state agencies in enforcing the laws affecting or applying to Lake George and the area lying within the park and undertake projects to abate pollution and preserve water quality.

13. Take into consideration the cumulative impact upon all of the resources of the park in making any determination or taking actions pursuant to the powers of this article.

14. Intervene in proceedings before state agencies including the department and the Adirondack park agency on matters affecting the park.

15. Encourage individuals, corporations, associations, and organizations to preserve and enhance the natural scenic beauty of Lake George and lands within the Lake George park.

16. Adopt, sponsor, and encourage the use of forms of deeds, agreements, covenants, and other legal documents by means of which owners of real property within the Lake George park may voluntarily prohibit, restrict, and control the use thereof for commercial purposes.

17. Encourage owners of real property within the Lake George park by written instruments to prohibit, restrict, or control voluntarily the use of such real property for commercial purposes.

18. Acquire interests or rights in real property within the Lake George park for the purpose of prohibiting, restricting, or controlling the use of such real property for commercial purposes.

19. Establish rules, regulations, and procedures by or pursuant to which the commission may authorize or permit a necessary or desirable use of land or prevent unnecessary hardship in an individual or particular instance by altering or modifying in whole or in part any restriction contained in any conveyance to or agreement with the commission or which the commission has power to alter or modify.

20. Encourage, cooperate with, aid, and assist municipalities lying wholly or partly within the Lake George park in the preparation and adoption of zoning laws or ordinances and other local legislation prohibiting, restricting, regulating, or controlling the uses of real property for commercial purposes within the Lake George park.

21. Make maps and plans for proposed or permanent zones.

22. Establish as a proposed zone any area of land, exclusive of state or municipally owned land, lying within the Lake George park.

23. Alter, reduce, or extend any such proposed zone.

24. Establish as a permanent zone any area of land, exclusive of state or municipally owned land, lying within the Lake George park in which the use of all real property for commercial purposes is (a) prohibited, or (b) restricted or controlled.

25. Alter or extend a permanent zone under the procedure applicable to the original establishment of a permanent zone.

26. Enter upon any land, water, or premises within the Lake George park at reasonable times for the purpose of making surveys.

27. Cooperate with, aid, and assist municipalities and law enforcement agencies in enforcing laws affecting or applying to Lake George and the area lying within the Lake George park.

28. In cooperation with existing law enforcement agencies, arrange for the appointment of patrolmen who, within the Lake George park, shall have the powers set forth in section 71-0202 of this chapter in respect to the enforcement of all laws and local ordinances or laws pertaining to Lake George or the Lake George park. Pursuant to this subdivision, members and employees of the commission may be appointed patrolmen but if appointed shall serve without compensation. Such patrolmen shall have the right to use sirens, display flags, or other identifying insignia and wear badges while engaged in law enforcement activities within the Lake George park.

29. Promote the study of the history, historical significance, natural science, and lore of Lake George and the area within the Lake George park and in cooperation with the Education Department to preserve the historical relics found in or near Lake George.

30. Encourage individuals, corporations, associations, organizations, and municipalities to protect and preserve the purity of the waters of Lake George.

31. Establish advisory committees and enlist and accept the support

and cooperation of organizations of property owners or others interested in promoting the purposes and objectives of this article.

32. Do all things necessary or convenient to carry out the powers expressly granted by this article.

§ 43-0109. Expenses; employees.

The commission may appoint employees and agents and fix their compensation within moneys available therefor. Such compensation and the other necessary expenses of the commission shall be paid from moneys received by the commission from appropriations from the state including from the Lake George park trust fund pursuant to section ninety-seven-h of the state finance law or one or more municipalities in the counties of Essex, Warren or Washington, or from gifts or contributions, which the commission is hereby authorized to accept. Moneys appropriated for use of the commission by the state shall be paid out of the state treasury on the audit and warrant of the Comptroller on vouchers certified or approved by the chairman of the commission or by an officer or employee of the commission designated in writing by the chairman.

§ 43-0110. Wastewater management.

1. The commission, in consultation with the department, the department of health and each municipality located in whole or in part within the park, and subject to approval by the department and department of health, shall adopt, after public hearing according to the provisions of the state administrative procedure act, rules and regulations for the discharge of sewage or treated sewage effluent onto the land or into the groundwater of the park to ensure optimum protection of ground and surface waters within the park. Such rules and regulations may be more stringent than rules and regulations adopted by the department. For purposes of this section, the discharges shall include sewage or treated sewage effluent applied to the soil or entering the groundwater through runoff, seepage, percolation, spray irrigation and ground and spring

water flow.

2. The rules and regulations adopted by the commission under subdivision one of this section shall be applicable to all development within the park with respect to the discharge of wastewater; provided, however, that nothing shall prevent a municipality from adopting a law, code, ordinance or regulation which is more stringent than such rules and regulations adopted by the commission.

3. The commission may delegate all or some of its authority under this section to any municipality located in whole or in part within the park subject to such conditions as the commission may establish.

§ 43-0111. Commercial use in zones.

On and after (a) the establishment, alteration, or extension of a permanent zone, (b) the filing of the order establishing, altering, or extending such zone, together with the map and description thereof, in the office of the clerk of each county in which such zone is located, (c) the recording in the appropriate county clerk's office of the written instruments by which the use for commercial purposes of all real property in such zone is prohibited, restricted, or controlled, and (d) notice of the establishment, alteration, or extension of such zone has been published four times in a newspaper having general circulation in the area in which such zone is located, no real property within such zone shall be used for commercial purposes except as authorized or permitted by the terms of the order establishing, altering, or extending such zone or as authorized or permitted pursuant to subdivision 5 of section 43-0107 of this article.

§ 43-0112. Stormwater management and stream corridor management.

1. Stormwater management plans for lands where development is occurring or may occur in the future. The commission shall adopt, after public hearing according to the provisions of the state administrative

procedure act, rules and regulations for the preparation of local stormwater management plans and stormwater regulatory programs. Such rules and regulations shall be developed in consultation with the department, the Adirondack park agency and each municipality located in whole or in part within the park, and shall be subject to approval by the department and Adirondack park agency.

a. Within eighteen months of the effective date of such rules and regulations of the commission, each municipality located in whole or in part within the Lake George park shall prepare a stormwater management plan and a stormwater regulatory control program which implements such plan consistent with such rules and regulations and subject to the approval of the commission.

b. Stormwater management plans and their implementing stormwater control regulatory programs shall be designed:

(1) to prevent any increase in stormwater runoff from any development in order to reduce flooding, siltation and streambank erosion; and

(2) to prevent any increase in pollution caused by stormwater runoff from development, which would otherwise degrade the quality of water in Lake George and its tributaries and render it unfit for human consumption, interfere with water-based recreation or adversely affect aquatic life.

c. In addition to pollution standards, the stormwater control regulatory program shall incorporate a standard which requires that the total annual volume of surface water runoff which flows from any specific site during and following development shall not exceed that which prevailed prior to development. The methods used to determine the annual volumes of surface water runoff shall be developed by the commission and incorporated in the rules and regulations for the preparation of the local stormwater management plans and regulatory control programs.

d. Any municipality located in whole or in part within the park may enter into an agreement with the commission for the commission to develop the municipality's stormwater management plan. Such an agreement

must be entered into within ninety days of the effective date of the commission's rules and regulations adopted pursuant to this subdivision and, if such agreement is not made in such time period and the municipality fails to meet the requirement of paragraph a of this subdivision, the commission shall be deemed to have the authority to develop such plan.

2. Stormwater management study for sites and areas where development has occurred prior to the effective date of this section. The commission, in consultation with the department, the Adirondack park agency and each municipality located in whole or in part within the park, and subject to the approval by the department and Adirondack park agency, shall prepare a study of the feasibility of reducing the impacts of stormwater runoff in areas of the park where development has already occurred. This study shall assess the impact of stormwater runoff on water quality from existing development, identify cost effective measures to control stormwater runoff, and propose funding mechanisms for implementation of such measures. The commission shall complete the study within two years of the effective date of this section. Upon completion of the study of the commission, the study's recommendations shall be incorporated by the commission into the stormwater management plan and by each municipality into its stormwater regulatory control program, subject to the approval of the commission.

3. Implementation. In addition to existing powers and authorities therefor, each municipality located in whole or in part within the park is hereby authorized and empowered to adopt and implement a stormwater regulatory control program consistent with the provisions of this section. If the commission finds that any such municipality has failed to adopt such program, to incorporate recommendations pursuant to subdivision two of this section or to implement such program, the commission is hereby authorized and empowered to assume the authority of the municipality that has failed to act, adopt and implement a stormwater regulatory program consistent with the provisions of this section for the municipality subject to the commission's finding.

4. Nothing in this section shall be construed to limit the

department's authority to regulate discharges or stormwater.

5. The commission shall, after consultation with the department, the department of health, the Adirondack park agency and each municipality located in whole or in part within the park, further promulgate regulations relative to stream corridor management which shall include standards for the location of roads, stream channelization, the frequency of stream crossings, and timber harvesting and vegetative cutting restrictions within designated stream corridors. The regulations adopted pursuant to this section may be stricter than regulations promulgated by the department.

6. In cooperation with local lake associations and educational institutions, the commission shall continue existing water quality monitoring programs to monitor water quality in Lake George to determine the effectiveness of control measures, and to identify sources of ground and surface water contamination for investigation and enforcement purposes.

§ 43-0113. Appropriations by municipalities in certain counties.

The governing body of any municipality in the counties of Essex, Warren or Washington may raise, appropriate and pay over to the commission moneys to be expended by the commission for any of the purposes hereof.

§ 43-0115. Restrictions on use of signs and advertising devices.

1. In order to preserve and enhance the natural beauty of the Lake George park, to protect and conserve the investment of the state in forest lands, islands, state campsites and other interests in real property in said park; to preserve and regulate the said park for public uses for the resort of the public for recreation, transportation, pleasure, air, light and enjoyment and to keep it open, safe, clean and in good order for the welfare of society and to prevent the unrestricted

use of signs, and advertising structures and devices in said park, no person, partnership, association or corporation shall, except as provided in subdivisions two and three of this section, erect or maintain or allow to be erected or maintained within the boundaries of the Lake George park any advertising sign or advertising structure or device of any kind, except under written permit from Lake George park commission.

2. The provisions of this section shall not apply to:

a. Signs erected or maintained upon a parcel of land used for business purposes in connection with the principal business or principal businesses conducted thereon, provided that:

(1) Not more than two such signs are erected on such parcel of land, and such signs are located at least fifty feet apart, and

(2) No such sign has an area of more than forty-eight square feet, and

(3) No such sign extends more than twenty feet above ground level, and

(4) No such sign is placed within ten feet of a highway right of way, and

(5) No such sign is illuminated by or contains a flashing, intermittent, rotating, or moving light or lights, and

(6) No such sign moves or the visible portion thereof contains any moving or animated parts.

b. A sign erected or maintained within an incorporated village.

c. A sign erected by the state, a county, a town or an agency or department thereof.

3. To effectuate the purposes enumerated in subdivision 1 of this section, the commission shall establish uniform written rules and procedures for the application for and granting of permits for the erection or maintenance of signs, advertising structures and devices for which permits are required to be obtained from it under this section. Such rules and procedures shall contain provisions for the granting of the requisite permit for any such sign, advertising structure or device erected prior to the effective date of this section for a period of time

not exceeding the remaining or undepreciated useful life of such sign, advertising structure or device as determined by an appropriate depreciation formula, provided that no such sign shall be permitted after July 1, 1973. For such purpose, until July 1, 1973, the commission shall authorize the use of a formula commonly used for income tax purposes or the depreciation formula used in the depreciation schedules of the income tax returns of the owner of such sign, advertising structure or device.

4. Any action of the commission by which an application for a permit under this section is denied shall be reviewable pursuant to the provisions of article 78 of the Civil Practice Law and Rules.

§ 43-0117. Operation of ferries and certain other boats, barges and vessels restricted.

1. No person, partnership, or corporation shall operate a ferry or other boat transporting motor vehicles on the waters of Lake George without first obtaining a permit for such operation from the Lake George park commission.

2. No person, partnership or corporation shall operate a night club, restaurant, dance hall or other place of amusement, or engage in the business of selling or offering for sale any kind of food or beverage on or from a boat, barge or vessel on the waters of Lake George without first obtaining a permit for such operation from the Lake George park commission. The provisions of this subdivision shall not apply to any such operation in existence prior to January 1, 1963.

3. No person, partnership or corporation shall operate, propel or tow a boat, barge, vessel or other floating object used as, or as a vehicle for, an advertising sign or advertising structure or device on the waters of Lake George without first obtaining a permit therefor from the Lake George park commission.

4. In order to protect and preserve the water quality of Lake George,

to provide reasonable public access to Lake George without overcrowding, congestion or safety hazards, and to protect the resources of Lake George, the commission shall, consistent with the purposes of this article, promulgate regulations relative to the permitting of boats, the registration and the regulation of docks, wharfs and moorings, the regulation of marinas, the limits of speed and sound on Lake George, the regulation of recreational activities such as regatta-type events, water skiing, parasailing and other similar activities, and the regulation of tour boats, boat rentals and other rental activities. Following the promulgation of such regulations: (a) no person shall construct any dock, wharf, mooring, marina or put any such structure to use without first obtaining a permit from the commission, and (b) no person shall operate any boat or vessel, or undertake any regulated activity without complying with such regulations and obtaining a permit from the commission, if required.

5. To effectuate the purposes enumerated in subdivision four of this section, pending adoption by the commission of rules and regulations relative to the registration and regulation of docks, wharfs, moorings, and marinas, the provisions of part 646 of Title VI of the codes, rules and regulations of the state of New York shall be continued; provided, however, that such regulations shall be administered by the commission.

§ 43-0119. Land use restrictions within Lake George park.

1. No real property lying within the boundaries of the Lake George park shall be used for the operation of a junk yard, automobile grave yard, second-hand automobile parts yard, automobile service station selling petroleum products or repairing motor vehicles, circus, carnival, shooting gallery, outdoor drive-in theatre, commercial dance hall, slaughter house, house trailer camp, trailer court, campsite or similar use operated for commercial purposes in which dwelling facilities are normally occupied for temporary periods, public dump or public dumping ground, boarding stable or business offering riding horses for hire without a permit therefor having been first obtained from the village within which such real property is located, or if such

real property is not located within a village, from the town within which such real property is located.

2. No such permit shall be granted by any village or town board until after a public hearing has been held on the application therefor. Such a public hearing shall be held only after notice thereof has been published in a newspaper having general circulation in such village or town at least ten days before such hearing and notice thereof has been served on the department, Lake George park commission and all owners of real property within five hundred feet of the premises for which application for such permit is made at least ten days before such hearing.

3. The village or town board, in granting or denying any application for such a permit shall consider:

a. the statements made in the application for such permit, all facts presented at such hearing and other facts known to such board,

b. the effect of the proposed use on the general welfare, safety and health of the public and on the general welfare of the municipality,

c. the character of the area in which the real property is located,

d. the suitability of the real property for the use proposed in the application,

e. whether the proposed use is consistent with the purposes and intent of this article,

f. whether the real property lies within a zone or proposed zone in which the proposed use is or is proposed to be prohibited, and

g. whether the proposed use is consistent with standards for the granting or denying of applications for such permits established by such boards in furtherance of the purposes of this article.

4. The action of a village or town board granting or denying any application for such a permit shall be reviewable pursuant to article 78 of the Civil Practice Law and Rules.

5. The board of trustees of such a village or the town board of such a town may fix reasonable fees for the making of applications for permits pursuant to this section and reasonable fees for the issuance of such permits.

§ 43-0121. Compliance with sewage disposal requirements.

1. Where a provision of this chapter, or rules or regulations issued pursuant thereto, or the Public Health Law or state sanitary code requires that the sewage disposal facilities of a building or structure proposed to be erected or constructed comply with the requirements thereof, no such building or structure shall be erected, constructed or thereafter occupied within the boundaries of the Lake George park without a permit therefor having been first obtained from the village within which the real property on which it is to be erected, constructed or thereafter occupied is located, or if such real property is not located within a village, from the town within which such real property on which it is to be erected, constructed or thereafter occupied is located.

2. No such permit for erection or construction shall be granted by any such village or town board until the applicant therefor has obtained the approval required under the provisions of this chapter, or rules or regulations issued pursuant thereto, or under the Public Health Law or state sanitary code and no such permit for occupancy shall be granted by any such village or town board until the applicant therefor has obtained the approval required under the provisions of this chapter, or rules or regulations issued pursuant thereto, or under the Public Health Law or state sanitary code.

3. The board of trustees of such a village or a town board of such a town may fix reasonable fees for such permits and may each delegate its

power to issue such permits to an officer or employee of the village or town, as the case may be.

4. The action of a village or town board, or of an authorized officer or employee thereof, in granting or denying any application for such a permit shall be reviewable pursuant to article 78 of the Civil Practice Law and Rules.

5. Such a village board of trustees, town board, the Lake George park commission or any voter or taxpayer of the village or town in which such a building or structure is located shall have the right to bring a proceeding to enjoin the construction, continued construction or occupancy of any building or structure which is erected, constructed or occupied without compliance with the requirements of this section.

§ 43-0123. Environmental review.

Notwithstanding any other provision of law, rule or regulation to the contrary, the commission shall be deemed to be a state agency for purposes of article 8 of this chapter. The commission shall offer assistance to local agencies within the park regarding implementation of such article.

§ 43-0125. Regulatory and user fees.

1. The legislature finds that comprehensive environmental regulatory management and conservation within the Lake George park are essential to protect an important part of the environmental resources of the state and the public health and welfare. It further declares that regulated entities and users of the unique resources of Lake George park should bear a significant portion of the costs of regulation, management and conservation activities which assure the protection and continued beneficial use of the resources of the park.

2. The following annual fees to be paid to the commission are hereby

established:

(a) Dock, wharf and mooring fees. The owner of a dock, wharf or mooring within the park used for non-commercial residential purposes shall pay an annual fee of fifty dollars. The owner of a dock or wharf within the park used for commercial purposes shall pay an annual fee of five dollars per linear foot for each such dock. The owner of a mooring used for commercial purposes shall pay an annual fee of one hundred dollars for each mooring. New docks constructed for commercial use after the effective date of this section shall pay a first time fee of ten dollars per linear foot and five dollars per linear foot annually thereafter.

(b) Boat fees. In addition to the registration required by the state, any mechanically propelled boat or vessel with ten horsepower or more used on Lake George shall have an annual permit issued by the commission. The fee therefor for boats twenty feet or less in length overall shall be forty dollars; for boats twenty-one to twenty-five feet in length overall, fifty dollars; and for boats over twenty-five feet in length overall, fifty dollars plus seven dollars and fifty cents for each foot by which the length overall exceeds twenty-five feet; for boats over twenty-five feet in length overall outfitted for overnight use, fifty dollars plus thirty dollars for each foot by which the overall length exceeds twenty-five feet. The commission may establish a one week use permit for twenty dollars. The commission may establish a one day use permit for twelve dollars for any mechanically propelled boat or vessel with ten horsepower or more.

3. The commission may charge a fee to an applicant for a permit in order to recover the costs incurred in reviewing and acting upon an application for such permit.

4. Except as otherwise provided by law, all fees collected pursuant to this section shall be deposited to the credit of the Lake George park trust fund pursuant to section ninety-seven-h of the state finance law.

ARTICLE 44

HUDSON RIVER VALLEY GREENWAY

Section 44-0101. Legislative intent.

44-0103. Definitions.

44-0105. Hudson river valley greenway communities council.

44-0107. Powers and duties of the council.

44-0109. Designation.

44-0111. Greenway heritage conservancy for the Hudson river valley.

44-0113. Powers and duties of the conservancy.

44-0115. State agency reports and consistency.

44-0117. Hudson river valley geographic information systems.

44-0119. Greenway compact.

44-0121. Greenway trail.

§ 44-0101. Legislative intent.

The Hudson river valley region possesses unique scenic beauty, natural and cultural resources of state and national significance. Efforts including the creation of a state management program for the Hudson estuarine district and fishery, establishment of the heritage task force for the Hudson river valley, establishment of five state designated urban cultural parks in the valley and the preparation of numerous local government waterfront revitalization programs in the valley have been undertaken in recent years to protect and enhance the special places of scenic, cultural and ecological importance. It is the intention of the legislature that these efforts be continued and strengthened under the cooperative program of the Hudson river valley greenway in order to continue and advance the state's commitment to the preservation, enhancement and development of the world-renowned scenic, natural, historic, cultural and recreational resources of the Hudson river valley while continuing to emphasize economic development activities and remaining consistent with the tradition of municipal home rule.

§ 44-0103. Definitions.

As used in this article, the following words and terms shall have the

following meanings unless the context indicates another or different meaning or intent:

1. "Hudson river valley" shall mean the areas of Bronx and New York counties designated pursuant to section 44-0109 of this article, the counties of Westchester, Rockland, Putnam, Orange, Dutchess, Ulster, Columbia, Greene, Albany, Rensselaer, Saratoga and Washington, excluding any area of Greene county within the Catskill park, as defined in subdivision two of section 9-0101 of this chapter.

2. "Compact" or "greenway compact" shall mean the overall greenway plan adopted by the council pursuant to section 44-0119 of this article.

3. "Conservancy" or "greenway heritage conservancy" shall mean the greenway heritage conservancy for the Hudson river valley, a public benefit corporation, reestablished pursuant to section 44-0111 of this article.

4. "Council" shall mean the Hudson river valley greenway communities council reenacted pursuant to section 44-0105 of this article.

5. "Countryside" shall mean the cities, towns and villages within the greenway which do not border the Hudson river.

6. "Greenway criteria" or "criteria" shall mean natural and cultural resource protection, regional planning, economic development, public access and heritage environmental education identified as the basis for attaining the goal of a Hudson river valley greenway.

7. "Greenway" shall mean the area designated as the Hudson river valley greenway pursuant to section 44-0109 of this article.

8. "Greenway districts" or "districts" shall mean areas made of neighboring communities within the greenway and designated by the council for the purpose of regional planning.

9. "Greenway trail" or "trail" means the trail established pursuant to

section 44-0121 of this article.

10. "Participating community" shall mean a county, city, town or village which has adopted the regional plan for its district pursuant to section 44-0119 of this article.

11. "Riverside" shall mean the cities, towns and villages within the greenway which border the Hudson river and shall include the city of New York, with respect to areas of Bronx and New York counties designated pursuant to section 44-0109 of this article.

12. "Chief elected official of a county" shall mean the county executive, or if there is none, the chairman of the board of supervisors, or if there is neither, any other officers possessing similar powers and duties.

13. "Fund" shall mean the Hudson river valley greenway fund established in section ninety-seven-n of the state finance law.

§ 44-0105. Hudson river valley greenway communities council.

1. The governor's council on the Hudson river valley is hereby recreated within the executive department to be the Hudson river valley greenway communities council. The council shall consist of a total of twenty-seven voting members. The governor shall appoint two members, one of whom shall be the chairperson. The legislative body of each town, city or village other than the city of New York which is adjacent to the Hudson river may forward the names of a recommended council appointee to the chief elected official of the county in which it is incorporated. One voting member shall be appointed from among the names forwarded by the towns, cities and villages by the chief elected official of each of the ten counties of Westchester, Putnam, Dutchess, Columbia, Rensselaer, Albany, Greene, Ulster, Orange and Rockland, and two voting members shall be appointed by the mayor of the city of New York after consultation with the presidents of the boroughs of the Bronx and Manhattan. Two voting members shall be appointed by the temporary
