§ 3202. Live pathogenic microorganisms or viruses; sale or other disposal; labeling containers. 1. All live pathogenic microorganisms or viruses other than vaccine virus when given away or sold shall bear a label on the container showing the contents of the container.

2. If the distributor is required to be registered, the label shall also bear the registration number assigned by the department, or in the city of New York by the department of health of such city, for the handling of pathogenic microorganisms or viruses, the name of the person obtaining the material, and the destination of the pathogenic microorganisms or viruses.
