(i) the availability and accessibility of services for individuals diagnosed with traumatic brain injury, the cost of receiving such services, and any disparities that may exist in the regional availability of services;

(ii) emerging trends in traumatic brain injury, including changes in incidences, changes in the needs of individuals with traumatic brain injury, and assess the training service providers receive relating to traumatic brain injury;

(iii) the difference in services availability and outcomes for individuals that may be enrolled in any Medicaid waiver; and

(iv) the efficiency of the administrative processes that provide individuals with traumatic brain injury official approvals or denials of service.

(b) The council shall post the recommendations developed pursuant to paragraph (a) of this subdivision on the department's website on or before one year from the date this paragraph shall take effect and annually thereafter.

3. The members of the council shall receive no compensation for their services, but shall be allowed their actual and necessary expenses incurred in the performance of their duties hereunder, subject to the approval of the commissioner.

4. (a) Within the traumatic brain injury services coordinating council there shall be established a concussion management advisory committee which shall develop recommendations specific to concussion management, academic scholarship, and public awareness for submission to the traumatic brain injury services coordinating council for consideration. The committee shall consist of members appointed from the membership of the traumatic brain injury services coordinating council by a majority vote of the council. Additional committee members may be appointed by the commissioner and shall have demonstrated experience with or expertise in one of the following areas: public health expertise related

to mild traumatic brain injuries and concussions, academic research in the area of traumatic brain injuries and concussion management, and public awareness experience related to the recognition of mild traumatic brain injuries and concussions. Committee membership shall not exceed twelve members. The committee may consult with a member or members of the public who have demonstrated expertise and interest in mild traumatic brain injuries and concussions.

(b) The recommendations of the advisory committee shall include, but not be limited to:

(i) methods to raise public awareness of mild traumatic brain injuries and concussions;

(ii) the development of outreach services to provide coordinated information regarding the recognition and management of mild traumatic brain injuries and concussions; and

(iii) the development of a clearinghouse of academic research and scientific findings related to the recognition, management, and treatment of mild traumatic injuries and concussions.

ARTICLE 27-CCC

LEUKEMIA, LYMPHOMA AND MYELOMA RESEARCH, EDUCATION AND TREATMENT PROGRAM

Section 2747. Leukemia, lymphoma and myeloma research, education and treatment.

§ 2747. Leukemia, lymphoma and myeloma research, education and treatment. The commissioner shall establish within the department a program to promote research, education and treatment regarding leukemia, lymphoma and myeloma. To carry out the purposes of this section, the commissioner shall have the following powers and duties:

1. to promote research, education and treatment programs designed to reduce or prevent the incidence and severity of leukemia, lymphoma and myeloma;

2. to accept and expend any grants, awards or other funds or appropriations as may be available for these purposes subject to

limitations as to the approval of expenditures and audit as prescribed for state funds by the state finance law; and

3. to enter into contracts within the amounts available therefor as may be necessary to implement the provisions of this section.

ARTICLE 27-D

NEW YORK STATE BURNS CARE INSTITUTE

Section 2750. Legislative findings and purpose.

2751. New York state burns care institute; organization.

2752. Functions, powers and duties.

§ 2750. Legislative findings and purpose. One of the three major causes of accidental death in New York state is burn injury, and one of the contributing factors to the high mortality rate from burn injuries is the lack of trained individuals and available facilities for the treatment and rehabilitation of the victims of burn injury. In order to provide for the improved delivery of medical care to the victims of burn injury in the state, the department of health shall have the central and comprehensive responsibility for the development and administration of the state's policy with respect to medical care of victims of burn injury.

§ 2751. New York state burns care institute; organization. 1. The New York state burns care institute is hereby created within the department of health.

2. The commissioner shall appoint a director of the institute and may employ such assistants and personnel as are necessary to carry out the provisions of this article.

§ 2752. Functions, powers and duties. In order to further the declared purposes of this article, the institute shall have the

following functions, powers and duties:

1. To contract with such regional burns care centers as the commissioner may determine, and on connection therewith, to:
 - (a) conduct scientific investigations of methods of treatment of burn injuries and rehabilitation of burn injury victims, such investigations to be primarily conducted as clinical research investigations; and to
 - (b) conduct a program of professional education and training in the treatment of burn injury and the rehabilitation of victims of burn injury for medical students, physicians, nurses and ambulance attendants located in the vicinities of the central and regional burns treatment centers.
2. To determine the need for and coordinate and supervise the establishment and operation of such regional and local burns treatment centers as are necessary in the state.
3. To develop and supervise programs of professional education and training in the treatment of burn injury and the rehabilitation of victims of burn injury for medical students, physicians, nurses and ambulance attendants in regional and local burns treatment centers.
4. To gather data and statistics and conduct investigations and research relating to the causes and prevention of burn injuries and the treatment of burn injury victims including the methods and procedures for their rehabilitation, and to disseminate information and conduct educational programs as to such causes, prevention and treatment.
5. To enter into such contracts and agreements with individuals, colleges, universities, associations, corporations, municipalities and other units of government as may be deemed necessary and advisable to carry out the general intent and purposes of this article. Such contracts may provide for payment by the state for materials, equipment or services.
6. The commissioner may adopt such rules and regulations as are necessary to effectuate the purposes and provisions of this article.

ARTICLE 27-DD

STATE ADVISORY PANEL ON HIV/HBV INFECTED HEALTH CARE WORKERS

Section 2760. Advisory panel established.

2761. Function, powers and duties.

§ 2760. Advisory panel established. 1. A state advisory panel for the evaluation of health care workers with human immunodeficiency virus (HIV) or hepatitis B (HBV) (hereinafter referred to in this article as HIV/HBV) is hereby established in the department. This panel shall be known as the health care worker HIV/HBV advisory panel and shall be composed of three to five members. The commissioner shall appoint three members for a term of two years: a state or local public health officer, an infectious disease expert and an expert in infection control or epidemiology. For the purpose of the panel's deliberations on a specific case: (a) the commissioner may appoint a health professional with expertise relevant to procedures performed by the health care worker, provided, however, that the commissioner shall appoint such professional if the health care worker so requests; and (b) the commissioner shall, at the health care worker's request, appoint the health care worker's personal physician. The commissioner shall appoint the chairperson of the panel. A vacancy occurring during a term shall be filled by appointment by the commissioner for the unexpired term. Any member may be removed from the panel at the pleasure of the commissioner.

2. Each member of the panel shall receive up to one hundred fifty dollars as prescribed by the commissioner for each day devoted to panel work not to exceed forty-five hundred dollars in any one year, and shall be reimbursed for actual and necessary expenses incurred in the performance of his/her duties.

3. The department shall advise the panel members of statutory and regulatory confidentiality provisions and restrictions on disclosure of information which are applicable to the panel members and to panel operations.

§ 2761. Function, powers and duties. 1. The health care worker HIV/HBV advisory panel shall only evaluate and advise an HIV/HBV infected health care worker who voluntarily seeks the panel's review of the risk of HIV/HBV transmission to others through his/her workplace practice. Prior to the panel's evaluation of the worker, the panel must fully advise the worker of the panel's authority to investigate, to recommend practice restrictions or modifications, to advise facilities of such restrictions and to refer cases to professional licensing, registration and certification boards. If the health care worker is affiliated with or employed at a facility licensed by the department, the panel may evaluate and advise the worker only after such facility has completed its review of the scope of practice of the worker. This institutional review may be conducted through the facility's existing quality assurance program as required under section twenty-eight hundred five-j of this chapter, and need not require the creation of a separate facility HIV/HBV panel. Notwithstanding any other provision of law, rule or regulation, the panel may request and shall be entitled to receive patient records and other documents or information reasonably necessary for and relevant to the panel's deliberations and the implementation of this article including information and reports available to the department under section twenty-eight hundred five-m of this chapter, provided that the panel may only request records with patient names if essential to the panel's complete review of the case and provided further that employees of the department, other than the panel, shall redact patient names before panel review of such records. Any such information and reports provided to the panel that are subject to section two thousand eight hundred five-m of this chapter shall remain subject to the limitations on disclosure provided by such section. The panel may seek the advice of professionals with relevant expertise. The panel shall give the health care worker an opportunity to meet with the panel. The health care worker may be accompanied by a union or other representative at such meeting. Only when evidence indicates that the health care worker's practice poses a significant risk of harm to patients, the panel shall make appropriate recommendations that are least restrictive with respect to the health care worker's practice

including, but not limited to, training or monitoring, or, if necessary, reassignment or practice restrictions.

2. The panel shall evaluate an HIV/HBV infected health care worker pursuant to comprehensive medical criteria, including:

(a) physical or mental condition that interferes with or is significantly likely to interfere with the worker's ability to perform assigned tasks or regular duties;

(b) lack of compliance with established guidelines to prevent transmission of disease and/or documentation or evidence of previous transmission of bloodborne pathogens;

(c) the appropriateness of techniques as related to performance of procedures; and

(d) any health condition that would pose a significant risk to others.

3. When the panel recommends training, monitoring, reassignment, any similar action, or practice restrictions, the health care worker shall provide written assurance to the panel that he/she has informed facilities licensed by the department where the worker provides patient care of the panel's recommendations and shall identify the person or persons at the facilities so informed. If the health care worker fails to inform facilities licensed by the department where he/she provides patient care of the panel's recommendations, the panel shall so notify such facilities. If the health care worker fails to comply with the panel's recommendations or compliance cannot be determined by the panel after reasonable effort, the panel shall disclose the nature of its recommendations to the professional licensing, registration or certification boards relevant to the health care worker. The panel may periodically monitor and reevaluate the worker, with the worker's consent, at a frequency and through a mechanism to be determined by agreement between the worker and the panel.

4. The information received by the panel, the record of deliberations of the panel, and the decisions of the panel are not disclosable pursuant to article six of the public officers law. If the health care worker fails to comply with the recommendations of the panel or compliance cannot be determined by the panel after reasonable effort,

information held by the panel, the panel's deliberations and recommendations may be disclosed to and utilized by the office of professional medical conduct, the office of professional discipline and appropriate disciplinary bodies. The meetings of the panel are not subject to article seven of the public officers law. The members of the panel are bound by article six-A of the public officers law (personal privacy protection law).

5. A health care worker's petition to the panel shall not prevent or preclude the worker from seeking relief in any other forum at any time.

6. The commissioner may promulgate regulations implementing this article.

ARTICLE 27-E

THE ACQUIRED IMMUNE DEFICIENCY SYNDROME INSTITUTE

Section 2775. The acquired immune deficiency syndrome institute.

2776. Powers and duties.

2777. Research council.

2778. Advisory council.

2779. Reports by the commissioner.

§ 2775. The acquired immune deficiency syndrome institute. 1. There is hereby established within the department of health the acquired immune deficiency syndrome institute. The institute shall have the central responsibility for administering the provisions of this article and otherwise coordinating the state's policies with respect to acquired immune deficiency syndrome.

2. The commissioner shall appoint a director of the institute and may assign such personnel within the amounts appropriated as is necessary to carry out the provisions of this article.

§ 2776. Powers and duties. 1. The institute shall have the following

powers and duties:

(a) to develop and promote scientific investigations into the cause, prevention, methods of treatment, and cure of the acquired diseases of immunosuppression;

(b) to develop and promote programs of professional education and training and improvements in instrumentation as necessary adjuncts to such scientific investigations;

(c) to develop and maintain a clearing house within the department for information collected on acquired immune deficiency syndrome, including a catalogue of the existing medical literature and the results of existing epidemiological studies;

(d) to develop and promote an outreach campaign directed toward targeted high risk populations to provide coordinated information regarding the treatment and counseling programs and sources of financial assistance available; and

(e) to promote the availability of supportive services for affected persons.

2. Personal data in any investigations, reports and information relating thereto shall be kept confidential and be afforded all of the protections provided by the provisions of paragraph (j) of subdivision one of section two hundred six of the public health law. The institute may, however, from time to time publish analyses of such scientific investigations in such a manner as to assure that the identities of the individuals concerned cannot be ascertained.

§ 2777. Research council. 1. There shall be established within the institute a research council composed of seven members to be appointed by the commissioner. The members shall be representative of recognized centers engaged in the scientific investigation of acquired immunosuppressive diseases.

2. The research council shall be responsible for making recommendations to the institute for the purpose of carrying out the provisions of paragraphs (a) and (b) of subdivision one of section twenty-seven hundred seventy-six of this article.

3. The council shall meet at least four times a year. Special meetings may be called by the chairman, and shall be called by him at the request of the commissioner.

4. The members of the council shall receive no compensation for their services, but shall be allowed their actual and necessary expenses incurred in the performance of their duties hereunder.

§ 2778. Advisory council. 1. There shall be established within the institute an advisory council composed of seventeen members who shall be appointed in the following manner: three shall be appointed by the temporary president of the senate and one by the minority leader of the senate; three shall be appointed by the speaker of the assembly and one by the minority leader of the assembly; nine shall be appointed by the governor. The governor shall designate the chairman of the advisory council. The members of the council shall be representative of the public, educational and medical institutions, local health departments and nonprofit organizations, including organizations providing services to high risk populations.

2. The advisory council shall be responsible for advising the commissioner with respect to the implementation of this article and shall make recommendations to the institute for the purpose of carrying out the provisions of paragraphs (c), (d) and (e) of subdivision one of section twenty-seven hundred seventy-six hereof.

3. The council shall meet at least four times a year. Special meetings may be called by the chairman, and shall be called by him at the request of the commissioner.

4. The members of the council shall receive no compensation for their services, but shall be allowed their actual and necessary expenses incurred in the performance of their duties hereunder.

§ 2779. Reports by the commissioner. The commissioner shall make a first preliminary report to the governor and the legislature of its findings, conclusions, and recommendations not later than December first, nineteen hundred eighty-three, a second preliminary report of its findings, conclusions and recommendations not later than March first, nineteen hundred eighty-four and a final report of its findings, conclusions and recommendations not later than March first, nineteen hundred eighty-five, and shall submit with its reports such legislative proposals as it deems necessary to implement its recommendations.

ARTICLE 27-F

HIV AND AIDS RELATED INFORMATION

Section 2780. Definitions.

2781. HIV related testing.

2781-a. Required offering of HIV related testing.

2782. Confidentiality and disclosure.

2783. Penalties; immunities.

2784. Applicability to insurance institutions and insurance support organizations.

2785. Court authorization for disclosure of confidential HIV related information.

2785-a. Court order for HIV related testing in certain cases.

2786. Rules and regulations; forms; report.

2787. Separability.

§ 2780. Definitions. As used in this article, the following terms shall have the following meanings:

1. "AIDS" means acquired immune deficiency syndrome, as may be defined from time to time by the centers for disease control of the United States public health service.

2. "HIV infection" means infection with the human immunodeficiency virus or any other related virus identified as a probable causative agent of AIDS.

3. "HIV related illness" means any illness that may result from or may be associated with HIV infection.

4. "HIV related test or HIV related testing" means any laboratory test, tests or series of tests approved for the diagnosis of HIV.

4-a. "Rapid HIV test or testing" means any laboratory screening test or tests approved for detecting antibodies to HIV, that produce results in sixty minutes or less, and encompasses a confirmatory HIV related test if the screening test is reactive.

5. "Capacity to consent" means an individual's ability, determined without regard to the individual's age, to understand and appreciate the nature and consequences of a proposed health care service, treatment, or procedure, or of a proposed disclosure of confidential HIV related information, as the case may be, and to make an informed decision concerning the service, treatment, procedure or disclosure.

6. "Protected individual" means a person who is the subject of an HIV related test or who has been diagnosed as having HIV infection, AIDS or HIV related illness.

7. "Confidential HIV related information" means any information, in the possession of a person who provides one or more health or social services or who obtains the information pursuant to a release of confidential HIV related information, concerning whether an individual has been the subject of an HIV related test, or has HIV infection, HIV related illness or AIDS, or information which identifies or reasonably could identify an individual as having one or more of such conditions, including information pertaining to such individual's contacts.

8. "Health or social service" means any public or private care, treatment, clinical laboratory test, counseling or educational service for adults or children, and acute, chronic, custodial, residential, outpatient, home or other health care provided pursuant to this chapter or the social services law; public assistance or care as defined in

article one of the social services law; employment-related services, housing services, foster care, shelter, protective services, day care, or preventive services provided pursuant to the social services law; services for the mentally disabled as defined in article one of the mental hygiene law; probation services, provided pursuant to articles twelve and twelve-A of the executive law; parole services, provided pursuant to article eight of the correction law; corrections and community supervision, provided pursuant to the correction law; detention and rehabilitative services provided pursuant to article nineteen-G of the executive law; and the activities of the health care worker HIV/HBV advisory panel pursuant to article twenty-seven-DD of this chapter.

9. "Release of confidential HIV related information" means a written authorization for disclosure of confidential HIV related information which is signed by the protected individual, or if the protected individual lacks capacity to consent, a person authorized pursuant to law to consent to health care for the individual. Such release shall be dated and shall specify to whom disclosure is authorized, the purpose for such disclosure and the time period during which the release is to be effective. A general authorization for the release of medical or other information shall not be construed as a release of confidential HIV related information, unless such authorization specifically indicates its dual purpose as a general authorization and an authorization for the release of confidential HIV related information and complies with the requirements of this subdivision.

10. "Contact" means an identified spouse or sex partner of the protected individual, a person identified as having shared hypodermic needles or syringes with the protected individual or a person who the protected individual may have exposed to HIV under circumstances that present a risk of transmission of HIV, as determined by the commissioner.

11. "Person" includes any natural person, partnership, association, joint venture, trust, public or private corporation, or state or local government agency.

12. "Health facility" means a hospital as defined in section two thousand eight hundred one of this chapter, blood bank, blood center, sperm bank, organ or tissue bank, clinical laboratory, or facility providing care or treatment to persons with a mental disability as defined in article one of the mental hygiene law.

13. "Health care provider" means any physician, nurse, provider of services for the mentally disabled as defined in article one of the mental hygiene law, or other person involved in providing medical, nursing, counseling, or other health care or mental health service, including those associated with, or under contract to, a health maintenance organization or medical services plan.

14. "Child" means any protected individual actually or apparently under eighteen years of age.

15. "Authorized agency" means any agency defined by section three hundred seventy-one of the social services law and, for the purposes of this article, shall include such corporations incorporated or organized under the laws of the state as may be specifically authorized by their certificates of incorporation to receive children for the purposes of adoption or foster care.

16. "Insurance institution" means any corporation, association, partnership, reciprocal exchange, interinsurer, fraternal benefits society, agent, broker or other entity including, but not limited to, any health maintenance organization, medical service plan, or hospital plan which: (a) is engaged in the business of insurance; (b) provides health services coverage plans; or (c) provides benefits under, administers, or provides services for, an employee welfare benefit plan as defined in 29 U.S.C. 1002(1).

17. "Insurance support organization" means any person who regularly engages, in whole or in part, in the practice of assembling or collecting information about natural persons for the primary purpose of providing the information to an insurance institution for insurance

transactions, including: (a) the furnishing of consumer reports or investigative consumer reports to an insurance institution for use in connection with an insurance transaction; or (b) the collection of personal information from insurance institutions or other insurance support organizations for the purpose of detecting or preventing fraud, material misrepresentation, or material non-disclosure in connection with insurance underwriting or insurance claim activity. The following persons shall not be considered "insurance-support organizations" for the purposes of this article: government institutions, insurance institutions, health facilities and health care providers.

§ 2781. HIV related testing. 1. Except as provided in section three thousand one hundred twenty-one of the civil practice law and rules, or unless otherwise specifically authorized or required by a state or federal law, no person shall order the performance of an HIV related test without first, at a minimum, providing notice by means readily accessible in multiple languages to the protected individual, or, when the protected individual lacks capacity to consent, a person authorized to consent to health care for such individual, that an HIV-related test is being performed, or over the objection of such individual or authorized persons. Such notice may be provided orally, in writing by prominently displayed signage, by electronic means or other appropriate form of communication. Such notice shall include information that HIV testing is voluntary. A refusal of an HIV related test shall be noted in the individual's record.

2. Prior to ordering the test, information shall be provided, either orally or by prominently displayed signage, by printed materials, by electronic means or other appropriate form of communication to the subject of an HIV related test or, if the subject lacks capacity to consent, to a person authorized pursuant to law to consent to health care for the subject, explaining that:

(a) HIV causes AIDS and can be transmitted through sexual activities and needle-sharing, by pregnant women to their fetuses, and through breastfeeding infants;

(b) there is treatment for HIV that can help an individual stay

healthy;

(c) individuals with HIV or AIDS can adopt safe practices to protect uninfected and infected people in their lives from becoming infected or multiply infected with HIV;

(d) testing is voluntary and can be done anonymously at a public testing center;

(e) the law protects the confidentiality of HIV related test results;

(f) the law prohibits discrimination based on an individual's HIV status and services are available to help with such consequences; and

(g) the law requires that an individual be notified before an HIV-related test is performed, and that no test shall be performed over their objection; and

(h) pre- and post-exposure prophylaxis medications (PrEP and PEP) are available to protect persons at risk of HIV infection.

Protocols shall be in place to ensure compliance with this section.

4. A health care provider who is not authorized by the commissioner to provide HIV related tests on an anonymous basis shall refer a person who requests an anonymous test to a test site which does provide anonymous testing. The provisions of this subdivision shall not apply to a health care provider ordering the performance of an HIV related test on an individual proposed for insurance coverage.

5. At the time of communicating the test result to the subject of the test, a person ordering the performance of an HIV related test shall, directly or through a representative:

(a) in the case of a test indicating evidence of HIV infection, provide the subject of the test or, if the subject lacks capacity to consent, the person authorized pursuant to law to consent to health care for the subject with counseling or referrals for counseling: (i) for coping with the emotional consequences of learning the result; (ii) regarding the discrimination problems that disclosure of the result could cause; (iii) for behavior change to prevent transmission or contraction of HIV infection; (iv) to inform such person of available medical treatments; and (v) regarding the need to notify his or her contacts; and (vi) regarding pre- and post-exposure prophylaxis

medications available to sexual partners to prevent HIV infection.

(b) in the case of a test not indicating evidence of HIV infection, provide (in a manner which may consist of oral or written reference to information previously provided) the subject of the test, or if the subject lacks capacity to consent, the person authorized pursuant to law to consent to health care for the subject, with information concerning (i) the risks of participating in high risk sexual or needle-sharing behavior; and (ii) regarding pre- and post-exposure prophylaxis medications available to prevent HIV infection.

5-a. With the consent of the subject of a test indicating evidence of HIV infection or, if the subject lacks capacity to consent, with the consent of the person authorized pursuant to law to consent to health care for the subject, the person who ordered the performance of the HIV related test, or such person's representative, shall provide or arrange with a health care provider for an appointment for follow-up medical care for HIV for such subject.

6. The provisions of this section shall not apply to the performance of an HIV related test:

(a) by a health care provider or health facility in relation to the procuring, processing, distributing or use of a human body or a human body part, including organs, tissues, eyes, bones, arteries, blood, semen, or other body fluids, for use in medical research or therapy, or for transplantation to individuals provided, however, that where the test results are communicated to the subject, post-test counseling, as described in subdivision five of this section, shall nonetheless be required; or

(b) for the purpose of research if the testing is performed in a manner by which the identity of the test subject is not known and may not be retrieved by the researcher; or

(c) on a deceased person, when such test is conducted to determine the cause of death or for epidemiological purposes; or

(d) conducted pursuant to section twenty-five hundred-f of this chapter; or

(e) in situations involving occupational exposures which create a significant risk of contracting or transmitting HIV infection, as

defined in regulations of the department and pursuant to protocols adopted by the department,

(i) provided that:

(A) the person who is the source of the occupational exposure is deceased, comatose or is determined by his or her attending health care professional to lack mental capacity to consent to an HIV related test and is not reasonably expected to recover in time for the exposed person to receive appropriate medical treatment, as determined by the exposed person's attending health care professional who would order or provide such treatment;

(B) there is no person available or reasonably likely to become available who has the legal authority to consent to the HIV related test on behalf of the source person in time for the exposed person to receive appropriate medical treatment; and

(C) the exposed person will benefit medically by knowing the source person's HIV test results, as determined by the exposed person's health care professional and documented in the exposed person's medical record;

(ii) in which case

(A) a provider shall order an anonymous HIV test of the source person; and

(B) the results of such anonymous test, but not the identity of the source person, shall be disclosed only to the attending health care professional of the exposed person solely for the purpose of assisting the exposed person in making appropriate decisions regarding post-exposure medical treatment; and

(C) the results of the test shall not be disclosed to the source person or placed in the source person's medical record.

7. In the event that an HIV related test is ordered by a physician or certified nurse practitioner pursuant to the provisions of the education law providing for non-patient specific regimens, then for the purposes of this section the individual administering the test shall be deemed to be the individual ordering the test.

§ 2781-a. Required offering of HIV related testing. 1. Every individual age thirteen and older (or younger than thirteen if there is

evidence or indication of risk activity) who receives health services as an inpatient or in the emergency department of a general hospital defined in subdivision ten of section twenty-eight hundred one of this chapter or who receives primary care services in an outpatient department of such hospital or in a diagnostic and treatment center licensed under article twenty-eight of this chapter or from a physician, physician assistant, nurse practitioner, or midwife providing primary care shall in accordance with subdivision one of section two thousand seven hundred eighty-one of this article be offered an HIV related test unless the health care practitioner providing such services reasonably believes that (a) the individual is being treated for a life threatening emergency; or (b) the individual has previously been offered or has been the subject of an HIV related test (except that a test shall be offered if otherwise indicated); or (c) the individual lacks capacity to consent to an HIV related test.

2. As used in this section, "primary care" means the medical fields of family medicine, general pediatrics, primary care, internal medicine, primary care obstetrics, or primary care gynecology, without regard to board certification.

3. The offering of HIV related testing under this section shall be culturally and linguistically appropriate in accordance with rules and regulations promulgated by the commissioner.

4. This section shall not affect the scope of practice of any health care practitioner or diminish any authority or legal or professional obligation of any health care practitioner to offer an HIV related test or to provide services or care for the subject of an HIV related test.

§ 2782. Confidentiality and disclosure. 1. No person who obtains confidential HIV related information in the course of providing any health or social service or pursuant to a release of confidential HIV related information may disclose or be compelled to disclose such information, except to the following:

(a) the protected individual or, when the protected individual lacks

capacity to consent, a person authorized pursuant to law to consent to health care for the individual;

(b) any person to whom disclosure is authorized pursuant to a release of confidential HIV related information;

(c) an agent or employee of a health facility or health care provider if (1) the agent or employee is permitted to access medical records, (2) the health facility or health care provider itself is authorized to obtain the HIV related information, and (3) the agent or employee provides health care to the protected individual, or maintains or processes medical records for billing or reimbursement;

(d) a health care provider or health facility when knowledge of the HIV related information is necessary to provide appropriate care or treatment to the protected individual, a child of the individual, a contact of the protected individual or a person authorized to consent to health care for such a contact;

(e) a health facility or health care provider, in relation to the procurement, processing, distributing or use of a human body or a human body part, including organs, tissues, eyes, bones, arteries, blood, semen, or other body fluids, for use in medical education, research, therapy, or for transplantation to individuals;

(f) health facility staff committees or accreditation or oversight review organizations authorized to access medical records; provided that such committees or organizations may only disclose confidential HIV related information: (1) back to the facility or provider of a health or social service; (2) to carry out the monitoring, evaluation, or service review for which it was obtained; or (3) to a federal, state or local government agency for the purposes of and subject to the conditions provided in subdivision six of this section;

(g) a federal, state, county or local health officer when such disclosure is mandated by federal or state law;

(h) an authorized agency in connection with foster care or adoption of a child. Such agency shall be authorized to redisclose such information only pursuant to this article or in accordance with the provisions of subdivision eight of section three hundred seventy-two and section three hundred seventy-three-a of the social services law;

(i) third party reimbursers or their agents to the extent necessary to reimburse health care providers for health services; provided that,

where necessary, an otherwise appropriate authorization for such disclosure has been secured by the provider;

(j) an insurance institution, for other than the purpose set forth in paragraph (i) of this subdivision, provided the insurance institution secures a dated and written authorization that indicates that health care providers, health facilities, insurance institutions, and other persons are authorized to disclose information about the protected individual, the nature of the information to be disclosed, the purposes for which the information is to be disclosed and which is signed by: (1) the protected individual; (2) if the protected individual lacks the capacity to consent, such other person authorized pursuant to law to consent for such individual; or (3) if the protected individual is deceased, the beneficiary or claimant for benefits under an insurance policy, a health services plan, or an employee welfare benefit plan as defined in 29 U.S.C. 1002(1), covering such protected individual;

(k) any person to whom disclosure is ordered by a court of competent jurisdiction pursuant to section twenty-seven hundred eighty-five of this article;

(l) an employee or agent of the department of corrections and community supervision, in accordance with paragraph (a) of subdivision two of section twenty-seven hundred eighty-six of this article, to the extent the employee or agent is authorized to access records containing such information in order to carry out the department's functions, powers and duties with respect to the protected individual, pursuant to section two hundred fifty-nine-a of the executive law;

(m) an employee or agent of the office of probation and correctional alternatives or any local probation department, in accordance with paragraph (a) of subdivision two of section twenty-seven hundred eighty-six of this article, to the extent the employee or agent is authorized to access records containing such information in order to carry out the office's or department's functions, powers and duties with respect to the protected individual, pursuant to articles twelve and twelve-A of the executive law;

(n) a medical director of a local correctional facility as defined in section forty of the correction law, in accordance with paragraph (a) of subdivision two of section twenty-seven hundred eighty-six of this article, to the extent the medical director is authorized to access

records containing such information in order to carry out his or her functions, powers and duties with respect to the protected individual;

(o) an employee or agent of the commission of correction, in accordance with paragraph (a) of subdivision two of section twenty-seven hundred eighty-six of this article, to the extent the employee or agent is authorized to access records containing such information in order to carry out the commission's functions, powers and duties with respect to the protected individual, pursuant to article three of the correction law;

(p) an attorney appointed to represent a minor pursuant to the social services law or the family court act, with respect to confidential HIV related information relating to the minor and for the purpose of representing the minor. If the minor has the capacity to consent, the minor's attorney may not redisclose confidential HIV related information without the minor's permission. If the minor lacks capacity to consent, the minor's attorney may redisclose confidential HIV related information for the sole purpose of representing the minor. This paragraph shall not limit the ability of the minor's attorney to seek relief under section twenty-seven hundred eighty-five of this chapter.

(q) an executor or an administrator of an estate shall have access to the confidential HIV information of a deceased person as needed to fulfill his or her responsibilities/duties as an executor or administrator.

(r) qualified researchers for medical research purposes upon the approval of a research protocol by a human research review committee established and approved under the provisions of article twenty-four-A of this chapter or by an institutional review board established and approved under the provisions of 45 CFR part 46 or 42 USC 300 V-1, for the purpose of reviewing and monitoring research involving human subjects, provided that in no event shall any qualified researcher disclose information tending to identify the subjects of the research.

(s) an employee or agent of the board of correction of the city of New York, in accordance with paragraph (a) of subdivision two of section twenty-seven hundred eighty-six of this article, to the extent the employee or agent is authorized to access records containing such information in order to carry out the board's functions, powers and duties with respect to the protected individual, pursuant to the charter

of the city of New York.

2. A state, county or local health officer may disclose confidential HIV related information when:

(a) disclosure is specifically authorized or required by federal or state law; or

(b) disclosure is made pursuant to a release of confidential HIV related information; or

(c) disclosure is requested by a physician pursuant to subdivision four of this section; or

(d) disclosure is authorized by court order pursuant to the provisions of section twenty-seven hundred eighty-five of this article.

3. No person to whom confidential HIV related information has been disclosed pursuant to this article shall disclose the information to another person except as authorized by this article, provided, however, that the provisions of this subdivision shall not apply:

(a) to the protected individual; or

(b) to a natural person who is authorized pursuant to law to consent to health care for the protected individual; or

(c) to a protected individual's foster parent as defined in section three hundred seventy-one of the social services law and subject to regulations promulgated pursuant to paragraph (a) of subdivision two of section twenty-seven hundred eighty-six of this article, for the purpose of providing care, treatment or supervision of the protected individual; or

(d) a prospective adoptive parent as specified in section three hundred seventy-three-a of the social services law and subject to regulations promulgated pursuant to paragraph (a) of subdivision two of section twenty-seven hundred eighty-six of this article with whom a child who is the protected individual has been placed for adoption; or

(e) to a relative or other person legally responsible to whom a child who is the protected individual is to be placed or discharged pursuant to section ten hundred seventeen or ten hundred fifty-five of the family court act and subject to regulations promulgated pursuant to paragraph (a) of subdivision two of section twenty-seven hundred eighty-six of this article, for the purpose of providing care, treatment or

supervision of the protected individual.

4. (a) A physician may disclose confidential HIV related information under the following conditions:

(1) disclosure is made to a contact, to a public health officer for the purpose of making the disclosure to said contact and pursuant to section twenty-one hundred thirty of this chapter; or

(2) the physician believes disclosure is medically appropriate and there is a significant risk of infection to the contact; and

(3) the physician has counseled the protected individual regarding the need to notify the contact; and

(4) the physician has informed the protected individual of his or her intent to make such disclosure to a contact, the physician's responsibility to report the infected individual's case pursuant to section twenty-one hundred thirty of this chapter and has given the protected individual the opportunity to express a preference as to whether disclosure should be made by the physician directly or to a public health officer for the purpose of said disclosure. If the protected individual expresses a preference for disclosure by a public health officer, the physician shall honor such preference.

(5) If a physician chooses to make a notification pursuant to this section, he or she shall report to the municipal health commissioner or district health officer on his or her efforts to notify the contacts of the protected individual. Such report shall be in a manner and on forms prescribed by the commissioner and shall include the identity of the protected individual and any contacts as well as information as to whether the contacts were successfully notified.

(6) Within a reasonable time of receiving a report that a physician or his or her designated agent did not notify or verify notification of contacts provided by the protected individual, the health commissioner or district health officer of the municipality from which the report originates shall take reasonable measures to notify such contacts and otherwise comply with the provisions of this chapter.

(b) When making such disclosures to the contact, the physician or public health officer shall provide or make referrals for the provision of the appropriate medical advice and counseling for coping with the emotional consequences of learning the information and for changing

behavior to prevent transmission or contraction of HIV infection. The physician or public health officer shall not disclose the identity of the protected individual or the identity of any other contact. A physician or public health officer making a notification pursuant to this subdivision shall make such disclosure in person, except where circumstances reasonably prevent doing so.

(c) A physician or public health officer shall have no obligation to identify or locate any contact except as provided pursuant to title three of article twenty-one of this chapter.

(d) A physician may, upon the consent of a parent or guardian, disclose confidential HIV related information to a state, county, or local health officer for the purpose of reviewing the medical history of a child to determine the fitness of the child to attend school.

(e) A physician may disclose confidential HIV related information pertaining to a protected individual to a person (known to the physician) authorized pursuant to law to consent to health care for a protected individual when the physician reasonably believes that: (1) disclosure is medically necessary in order to provide timely care and treatment for the protected individual; and (2) after appropriate counseling as to the need for such disclosure, the protected individual will not inform a person authorized by law to consent to health care; provided, however, that the physician shall not make such disclosure if, in the judgment of the physician: (A) the disclosure would not be in the best interest of the protected individual; or (B) the protected individual is authorized pursuant to law to consent to such care and treatment. Any decision or action by a physician under this paragraph, and the basis therefor, shall be recorded in the protected individual's medical record.

5. (a) Whenever disclosure of confidential HIV related information is made pursuant to this article, except for disclosures made pursuant to paragraphs (a), (d) and (i) of subdivision one of this section or paragraph (a) or (e) of subdivision four of this section, such disclosure shall be accompanied or followed by a statement in writing which includes the following or substantially similar language: "This information has been disclosed to you from confidential records which are protected by state law. State law prohibits you from making any

further disclosure of this information without the specific written consent of the person to whom it pertains, or as otherwise permitted by law. Any unauthorized further disclosure in violation of state law may result in a fine or jail sentence or both. A general authorization for the release of medical or other information is NOT sufficient authorization for further disclosure." An oral disclosure shall be accompanied or followed by such a notice within ten days.

(b) Except for disclosures made pursuant to paragraph (c) of subdivision one of this section, or to persons reviewing information or records in the ordinary course of ensuring that a health facility is in compliance with applicable quality of care standards or any other authorized program evaluation, program monitoring or service review, or to governmental agents requiring information necessary for payments to be made on behalf of patients or clients pursuant to contract or in accordance to law, a notation of all such disclosures shall be placed in the medical record of a protected individual, who shall be informed of such disclosures upon request; provided, however, that for disclosures made to insurance institutions such a notation need only be entered at the time the disclosure is first made.

6. (a) The provisions of this subdivision shall apply where a provider of a health or social service possesses confidential HIV related information relating to individuals who are recipients of the service, and a federal, state or local government agency supervises or monitors the provider or administers the program under which the service is provided.

(b) Confidential HIV related information relating to a recipient of such service may be disclosed in accordance with regulations promulgated pursuant to paragraph (a) of subdivision two of section twenty-seven hundred eighty-six of this article to an authorized employee or agent of such provider or government agency, when reasonably necessary for such supervision, monitoring, administration, or provision of such service. The term "authorized employee or agent", as used in this subdivision shall only include any employee or agent who would, in the ordinary course of business of the provider or government agency, have access to records relating to the care of, treatment of, or provision of a health or social service to the protected individual.

7. Nothing in this section shall limit a person's or agency's responsibility or authority to report, investigate, or redisclose, child protective and adult protective services information in accordance with title six of article six and titles one and two of article nine-B of the social services law, or to provide or monitor the provision of child and adult protective or preventive services.

8. Confidential HIV related information shall be recorded in the medical record of the protected individual. The provisions of this section shall not prohibit the listing of acquired immune deficiency syndrome, HIV related illness or HIV infection in a certificate of death, autopsy report or related documents prepared pursuant to article forty-one of this chapter or other applicable laws, ordinances, rules or regulations relating to the documentation of cause of death, nor shall this section be construed to modify any laws, ordinances, rules or regulations relative to access to death certificates, autopsy reports or such other related documents. Under no circumstances shall confidential HIV related information be disclosable pursuant to article six of the public officers law. Notwithstanding the foregoing, confidential HIV information obtained pursuant to section 390.15 of the criminal procedure law or section 347.1 of the family court act by either court order or consent of the protected individual shall not be recorded in the medical record of the protected individual unless he or she consents to the recording of such information in a written statement containing the relevant information specified in subdivision two of section two thousand seven hundred eighty-one of this article.

9. Confidential HIV related information shall be disclosed upon the request of the health care worker HIV/HBV advisory panel, established pursuant to article twenty-seven-DD of this chapter, to the panel or its designee only when reasonably necessary for the evaluation of a worker who has voluntarily sought the panel's review.

§ 2783. Penalties; immunities. 1. Any person who shall:

(a) perform, or permit or procure the performance of, an HIV related

test in violation of section twenty-seven hundred eighty-one of this article; or

(b) disclose, or compel another person to disclose, or procure the disclosure of, confidential HIV related information in violation of section twenty-seven hundred eighty-two of this article; shall be subject to a civil penalty not to exceed five thousand dollars for each occurrence. Such penalty may be recovered in the same manner as the penalty provided in section twelve of this chapter.

2. Any person who willfully commits an act enumerated in subdivision one of this section shall be guilty of a misdemeanor and subject to the penalties provided in section twelve-b of this chapter.

3. There shall be no criminal sanction or civil liability on the part of, and no cause of action for damages shall arise against any physician, his or her employer, or a physician's designated agent, or health facility or health care provider with which the physician is associated, or public health officer, on account of:

(a) the failure to disclose confidential HIV related information to a contact or person authorized pursuant to law to consent to health care for a protected individual; or

(b) the disclosure of confidential HIV related information to a contact or person authorized pursuant to law to consent to health care for a protected individual, when carried out in compliance with this article; or

(c) the disclosure of confidential HIV related information to any person, agency, or officer authorized to receive such information, when carried out in good faith and without malice, and in compliance with the provisions of this article; or

(d) the municipal health commissioner or district health officer's failure to notify contacts pursuant to this chapter.

4. Any cause of action to recover damages based on a failure to provide information, explanations, or counseling prior to the execution of a written informed consent, or based on a lack of informed consent in the ordering or performance of an HIV related test in violation of this article shall be governed by the provisions of section two thousand

eight hundred five-d of this chapter.

§ 2784. Applicability to insurance institutions and insurance support organizations. Except for disclosure to third party reimbursers and insurance institutions pursuant to paragraphs (i) and (j) of subdivision one of section twenty-seven hundred eighty-two of this article and except for disclosures pursuant to section twenty-seven hundred eighty-five of this article, the provisions of this article shall not apply to insurance institutions and insurance support organizations, except that health care providers associated with or under contract to a health maintenance organization or other medical services plan shall be subject to the provisions of this article.

§ 2785. Court authorization for disclosure of confidential HIV related information. 1. Notwithstanding any other provision of law, no court shall issue an order for the disclosure of confidential HIV related information, except a court of record of competent jurisdiction in accordance with the provisions of this section.

2. A court may grant an order for disclosure of confidential HIV related information upon an application showing: (a) a compelling need for disclosure of the information for the adjudication of a criminal or civil proceeding; (b) a clear and imminent danger to an individual whose life or health may unknowingly be at significant risk as a result of contact with the individual to whom the information pertains; (c) upon application of a state, county or local health officer, a clear and imminent danger to the public health; or (d) that the applicant is lawfully entitled to the disclosure and the disclosure is consistent with the provisions of this article.

3. Upon receiving an application for an order authorizing disclosure pursuant to this section, the court shall enter an order directing that all pleadings, papers, affidavits, judgments, orders of the court, briefs and memoranda of law which are part of the application or the decision thereon, be sealed and not made available to any person, except

to the extent necessary to conduct any proceedings in connection with the determination of whether to grant or deny the application, including any appeal. Such an order shall further direct that all subsequent proceedings in connection with the application shall be conducted in camera, and, where appropriate to prevent the unauthorized disclosure of confidential HIV related information, that any pleadings, papers, affidavits, judgments, orders of the court, briefs and memoranda of law which are part of the application or the decision thereon not state the name of the individual concerning whom confidential HIV related information is sought.

4. (a) The individual concerning whom confidential HIV related information is sought and any person holding records concerning confidential HIV related information from whom disclosure is sought shall be given adequate notice of such application in a manner which will not disclose to any other person the identity of the individual, and shall be afforded an opportunity to file a written response to the application, or to appear in person for the limited purpose of providing evidence on the statutory criteria for the issuance of an order pursuant to this section.

(b) The court may grant an order without such notice and opportunity to be heard, where an ex parte application by a public health officer shows that a clear and imminent danger to an individual whose life or health may unknowingly be at risk requires an immediate order.

(c) Service of a subpoena shall not be subject to this subdivision.

5. In assessing compelling need and clear and imminent danger, the court shall provide written findings of fact, including scientific or medical findings, citing specific evidence in the record which supports each finding, and shall weigh the need for disclosure against the privacy interest of the protected individual and the public interest which may be disserved by disclosure which deters future testing or treatment or which may lead to discrimination.

6. An order authorizing disclosure of confidential HIV related information shall:

(a) limit disclosure to that information which is necessary to fulfill

the purpose for which the order is granted; and

(b) limit disclosure to those persons whose need for the information is the basis for the order, and specifically prohibit redisclosure by such persons to any other persons, whether or not they are parties to the action; and

(c) to the extent possible consistent with this section, conform to the provisions of this article; and

(d) include such other measures as the court deems necessary to limit any disclosures not authorized by its order.

§ 2785-a. Court order for HIV related testing in certain cases. 1.

Notwithstanding any contrary provision of law or regulation, a state, county or local public health officer to whom an order or a consent for an HIV test is addressed or sent, in accordance with section 390.15 of the criminal procedure law or section 347.1 of the family court act, must cause HIV related testing to be administered to the subject named therein and, if the test is pursuant to court order, must immediately provide to the court that issued the order a written report specifying the date on which such test was completed. Such report to the court shall not, however, disclose the results of such test. Such officer must disclose the results of the testing to the victim indicated in the order or consent and must also disclose the results to the person tested, unless the person tested has been asked to but declines to authorize such disclosure to himself or herself.

2. At the time of communicating the test results to the subject or the victim, such public health officer shall directly provide the victim and person tested with (a) counseling or referrals for counseling for the purposes specified in subdivision five of section two thousand seven hundred eighty-one of this article; (b) counseling with regard to HIV disease and HIV testing in accordance with law and consistent with subdivision five of section two thousand seven hundred eighty-one of this article; and (c) appropriate health care and support services, or referrals to such available services. If at the time of communicating the test results, the person tested is in the custody of the department of corrections and community supervision, office of children and family

services, office of mental health or a local correctional institution, the counseling and services required by this subdivision may be provided by a public health officer associated with the county or facility within which the person tested is confined.

3. Unless inconsistent with this section, the provisions of this article regarding the confidentiality and disclosure of HIV related information shall apply to proceedings conducted pursuant to section 390.15 of the criminal procedure law or section 347.1 of the family court act.

§ 2786. Rules and regulations; forms; report. 1. The commissioner shall promulgate rules and regulations concerning implementation of this article for health facilities, health care providers and other persons to whom this article is applicable. The commissioner shall also develop standardized model forms to be used for informed consent for HIV related testing and for the release of confidential HIV related information and materials for pre-test counseling as required by subdivision three of section twenty-seven hundred eighty-one of this article, and for post-test counseling as required by subdivision five of section twenty-seven hundred eighty-one of this article. Persons, health facilities and health care providers may use forms for informed consent for HIV related testing, and for the release of confidential HIV related information other than those forms developed pursuant to this section, provided they contain information consistent with the standardized model forms developed by the commissioner. All forms developed or used pursuant to this section shall be written in a clear and coherent manner using words with common, everyday meanings. The commissioner, in consultation with the AIDS institute advisory council, shall promulgate regulations to identify those circumstances which create a significant risk of contracting or transmitting HIV infection; provided, however, that such regulations shall not be determinative of any significant risk determined pursuant to paragraph (a) of subdivision four of section twenty-seven hundred eighty-two or section twenty-seven hundred eighty-five of this article.

2. (a) Each state agency authorized pursuant to this article to obtain confidential HIV related information and the board of correction of the city of New York shall, in consultation with the department of health, promulgate regulations: (1) to provide safeguards to prevent discrimination, abuse or other adverse actions directed toward protected individuals; (2) to prohibit the disclosure of such information except in accordance with this article; (3) to seek to protect individuals in contact with the protected individual when such contact creates a significant risk of contracting or transmitting HIV infection through the exchange of body fluids, and (4) to establish criteria for determining when it is reasonably necessary for a provider of a health or social service or the state agency or a local government agency to have or to use confidential HIV related information for supervision, monitoring, investigation, or administration and for determining which employees and agents may, in the ordinary course of business of the agency or provider, be authorized to access confidential HIV related information pursuant to the provisions of paragraphs (l) and (m) of subdivision one and subdivision six of section twenty-seven hundred eighty-two of this article; and provided further that such regulations shall be promulgated by the chairperson of the commission of correction where disclosure is made pursuant to paragraphs (n) and (o) of subdivision one of section twenty-seven hundred eighty-two of this article.

(b) The department of health, in consultation with agencies referred to in paragraph (a) of this subdivision, shall submit a report to the legislature by December first, nineteen hundred eighty-nine, outlining the status and content of such regulations, their effect on the regulated facilities and the protected individuals served by them, the extent to which they conform with current medical and scientific knowledge on the transmissibility of HIV infection, and any recommendations for changes in said regulations.

§ 2787. Separability. If any section, clause or provision of this article shall be deemed by any court of competent jurisdiction to be unconstitutional or ineffective in whole or in part, to the extent that it is not unconstitutional or ineffective, it shall be valid and

effective and no other section, clause or provision shall on account thereof be deemed invalid or ineffective.

* ARTICLE 27-G

ADULT CYSTIC FIBROSIS ASSISTANCE PROGRAM

Section 2795. New York state adult cystic fibrosis assistance program.

* Repealed March 31, 2027

*** § 2795. New York state adult cystic fibrosis assistance program. 1.** Subject to available appropriation for the purpose outlined in this article, the department shall establish an adult cystic fibrosis assistance program, which shall be known as the "New York State Adult Cystic Fibrosis Assistance Program", and which shall consist of administrative support services for the provision of financial assistance for services such as prescription drug costs, device costs, medical care services, behavioral health services, and insurance premiums for the treatment of cystic fibrosis disease and its conditions.

2. The commissioner shall enter into a contract for the operation and promotion of the adult cystic fibrosis assistance program subject to such terms and conditions as may be contained within such contract with an organization that has experience and expertise improving access to healthcare for patients who are underinsured by dispersing financial assistance grants to cover costs of essential treatments and medications. The contractor may subcontract as needed for the effective performance of the contract. All such subcontractors and the terms of such subcontracts shall be subject to approval by the commissioner.

3. The duties of the contractor shall include, but not be limited to, the following:

(a) verification of patient eligibility for financial assistance grants allowable pursuant to paragraph (b) of this subdivision. To be eligible for a financial assistance grant, a patient shall meet criteria determined by the department, which shall include but not be limited to,

requiring the patient:

- (i) be a New York state resident;
 - (ii) be at least twenty-one years of age or older;
 - (iii) have a diagnosis of cystic fibrosis; and
 - (iv) have some form of primary private health insurance or Medicare and is not eligible for state Medicaid, and shall maintain health insurance during the financial assistance award period;
- (b) review of financial assistance grant applications submitted by eligible patients for approval, for services including but not limited to prescription drug costs, device costs, medical care services, behavioral health services, and medical, vision and dental insurance premiums, for patient treatment of cystic fibrosis;
- (c) disbursement of grant funding for applications approved pursuant to paragraph (b) of this subdivision related to the care and treatment of cystic fibrosis not otherwise covered by a health insurance policy;
- (d) preparation and submission of a monthly report to the department. Such report shall include but not be limited to:
- (i) new grants, which is the number of new grant recipients for initial grant periods;
 - (ii) renewal grants, which is the number of renewal grant recipients for renewal grant periods;
 - (iii) total active grant recipient count, which is the total number of active grant recipients;
 - (iv) grant recipients by insurance type, which is the number of active grant recipients sorted by insurance type;
 - (v) program expenses, which is the total amount spent sorted by assistance type but does not include administration fees;
 - (vi) application outcomes report, which is the number of grant recipients who have become inactive, sorted by reason; and
 - (vii) allotment used, which is the total amount of copayment assistance provided to each grant recipient compared to what is currently used by the grant recipient.

DIABETES RESEARCH AND EDUCATION PROGRAM

Section 2796*2. Special programs with respect to diabetes.

* NB There are two Article 27-H's

§ 2796. Special programs with respect to diabetes. The commissioner shall establish within the department a program to promote research and patient education regarding diabetes. To carry out the purposes of this section, the commissioner shall have the following powers and duties:

1. to promote scientific investigations with respect to the causes, prevention and treatment of diabetes;
2. to promote patient education programs designed to reduce or prevent the incidence and severity of diabetes;
3. to accept and expend any grants, awards or other funds or appropriations as may be available for these purposes subject to limitations as to the approval of expenditures and audit as prescribed for state funds by the state finance law; and
4. to enter into contracts within the amounts available therefor as may be necessary to implement the provisions of this section.

* ARTICLE 27-H

THE TICK-BORNE DISEASE INSTITUTE

Section 2797. Tick-borne disease institute.

2798. Powers and duties.

* NB There are 2 Article 27-H's

§ 2797. Tick-borne disease institute. 1. There is hereby established within the department the tick-borne disease institute. The institute shall have responsibility for administering the provisions of this article and otherwise coordinating the state's policies with respect to lyme disease and other tick-borne diseases.

2. The commissioner shall appoint a director to the institute and may assign such personnel within the amounts appropriated as is necessary to carry out the provisions of this article.

§ 2798. Powers and duties. The tick-borne disease institute established by section twenty-seven hundred ninety-seven of this article shall have the following powers and duties:

1. to develop and promote investigations into the cause, prevention, detection, spread, methods of treatment, and cure of tick-borne diseases; and

2. to develop and promote an outreach campaign directed toward targeted high-risk populations to provide coordinated information regarding the cause, prevention, detection, and treatment of tick-borne disease.

ARTICLE 27-K

NEW YORK WELLNESS WORKS

Section 2799-o. New York wellness works; program established.

2799-q. Participation in New York wellness works.

2799-r. Program evaluations and recommendations; reports and statewide conference on best practices.

§ 2799-o. New York wellness works; program established. 1. The New York wellness works program is hereby established as a partnership between the state and employers to encourage health screening, education and incentives tailored to employees' specific needs to help promote health and prevent disease.

2. Upon the commissioner's approval, and within the amount appropriated, the department shall make available grants for the purpose of enabling employers to develop and implement health promotion and disease prevention initiatives. Such initiatives may include, but shall

not be limited to:

(a) the compilation of individual or aggregate employee health profiles, on an individual voluntary basis, with recommendations and incentives for health promotion activities based on individual or aggregate health information; or

(b) specific screening, education and health incentives; or

(c) such other employer-based health promotion and disease prevention measures, including changes to the work environment and policy changes in the worksite, as the commissioner may approve in accordance with this article.

3. The department may contract with an organization or organizations for the administration of the program, in accordance with the criteria for participation in said program as set forth in section two thousand seven hundred ninety-nine-q of this article.

4. In addition to any amounts as may be appropriated for grants, the commissioner is authorized to seek and receive funds from philanthropic foundations and other sources to further support such purposes.

§ 2799-q. Participation in New York wellness works. The commissioner, in consultation with the advisory panel, shall establish criteria for implementation and operation of the New York wellness works program, which at a minimum shall include:

(a) applicant eligibility and selection criteria;

(b) program operating requirements and standards;

(c) employee safeguards.

§ 2799-r. Program evaluations and recommendations; reports and statewide conference on best practices. 1. Employers participating in the New York wellness works program pursuant to this article shall report to the commissioner on the findings, experience and benefits pursuant to such program.

2. The commissioner shall evaluate and report his or her findings

concerning the New York wellness works program, including but not limited to the health and cost benefits, and shall make recommendations for modifying, expanding or otherwise improving the program as well as recommendations for other health system improvements based on such program. Such report shall incorporate the information submitted pursuant to subdivision one of this section and shall be submitted to the governor, temporary president of the senate, speaker of the assembly and the school of public health and health professions at the university at Buffalo on or before February first, two thousand nine.

On or before May first, two thousand nine, and at least biennially thereafter, the commissioner in consultation with the advisory panel shall convene a statewide conference to further promote the sharing of best practices among employers and others in pursuit of the goals of the New York wellness works program.

§ 2800. Declaration of policy and statement of purpose. Hospital and related services including health-related service of the highest quality, efficiently provided and properly utilized at a reasonable cost, are of vital concern to the public health. In order to provide for the protection and promotion of the health of the inhabitants of the state, pursuant to section three of article seventeen of the constitution, the department of health shall have the central, comprehensive responsibility for the development and administration of the state's policy with respect to hospital and related services, and all public and private institutions, whether state, county, municipal, incorporated or not incorporated, serving principally as facilities for

the prevention, diagnosis or treatment of human disease, pain, injury, deformity or physical condition or for the rendering of health-related service shall be subject to the provisions of this article.

§ 2801. Definitions. The following words or phrases, as used in this article, shall have the following meanings, unless the context otherwise requires:

* 1. "Hospital" means a facility or institution engaged principally in providing services by or under the supervision of a physician or, in the case of a dental clinic or dental dispensary, of a dentist, or, in the case of a midwifery birth center, of a midwife, for the prevention, diagnosis or treatment of human disease, pain, injury, deformity or physical condition, including, but not limited to, a general hospital, public health center, diagnostic center, treatment center, a rural emergency hospital under 42 USC 1395x(kkk), or successor provisions, dental clinic, dental dispensary, rehabilitation center other than a facility used solely for vocational rehabilitation, nursing home, tuberculosis hospital, chronic disease hospital, maternity hospital, midwifery birth center, lying-in-asylum, out-patient department, out-patient lodge, dispensary and a laboratory or central service facility serving one or more such institutions, but the term hospital shall not include an institution, sanitarium or other facility engaged principally in providing services for the prevention, diagnosis or treatment of mental disability and which is subject to the powers of visitation, examination, inspection and investigation of the department of mental hygiene except for those distinct parts of such a facility which provide hospital service. The provisions of this article shall not apply to a facility or institution engaged principally in providing services by or under the supervision of the bona fide members and adherents of a recognized religious organization whose teachings include reliance on spiritual means through prayer alone for healing in the practice of the religion of such organization and where services are provided in accordance with those teachings. No provision of this article or any other provision of law shall be construed to: (a) limit the volume of mental health, substance use disorder services or developmental disability services that can be provided by a provider of

primary care services licensed under this article and authorized to provide integrated services in accordance with regulations issued by the commissioner in consultation with the commissioner of the office of mental health, the commissioner of the office of alcoholism and substance abuse services and the commissioner of the office for people with developmental disabilities, including regulations issued pursuant to subdivision seven of section three hundred sixty-five-l of the social services law or part L of chapter fifty-six of the laws of two thousand twelve; (b) require a provider licensed pursuant to article thirty-one of the mental hygiene law or certified pursuant to article sixteen or article thirty-two of the mental hygiene law to obtain an operating certificate from the department if such provider has been authorized to provide integrated services in accordance with regulations issued by the commissioner in consultation with the commissioner of the office of mental health, the commissioner of the office of alcoholism and substance abuse services and the commissioner of the office for people with developmental disabilities, including regulations issued pursuant to subdivision seven of section three hundred sixty-five-l of the social services law or part L of chapter fifty-six of the laws of two thousand twelve.

* NB Effective until the date that the rates of reimbursement for integrated behavioral health services are approved and certified by parties set forth in chapter 60 of 2026 § 8

* 1. "Hospital" means a facility or institution engaged principally in providing services by or under the supervision of a physician or, in the case of a dental clinic or dental dispensary, of a dentist, or, in the case of a midwifery birth center, of a midwife, for the prevention, diagnosis or treatment of human disease, pain, injury, deformity or physical condition, including, but not limited to, a general hospital, public health center, diagnostic center, treatment center, a rural emergency hospital under 42 USC 1395x(kkk), or successor provisions, dental clinic, dental dispensary, rehabilitation center other than a facility used solely for vocational rehabilitation, nursing home, tuberculosis hospital, chronic disease hospital, maternity hospital, midwifery birth center, lying-in-asylum, out-patient department, out-patient lodge, dispensary and a laboratory or central service facility serving one or more such institutions, but the term hospital

shall not include an institution, sanitarium or other facility engaged principally in providing services for the prevention, diagnosis or treatment of mental disability and which is subject to the powers of visitation, examination, inspection and investigation of the department of mental hygiene except for those distinct parts of such a facility which provide hospital service. The provisions of this article shall not apply to a facility or institution engaged principally in providing services by or under the supervision of the bona fide members and adherents of a recognized religious organization whose teachings include reliance on spiritual means through prayer alone for healing in the practice of the religion of such organization and where services are provided in accordance with those teachings. No provision of this article shall be construed to limit the volume of primary care services that can be provided by a program licensed to provide integrated behavioral health services, as defined in section 36.08 of the mental hygiene law. No provision of this article or any other provision of law shall be construed to: (a) limit the volume of mental health, substance use disorder services or developmental disability services that can be provided by a provider of primary care services licensed under this article and authorized to provide integrated services in accordance with regulations issued by the commissioner in consultation with the commissioner of the office of mental health, the commissioner of the office of addiction services and supports and the commissioner of the office for people with developmental disabilities, including regulations issued pursuant to subdivision seven of section three hundred sixty-five-l of the social services law or part L of chapter fifty-six of the laws of two thousand twelve; (b) require a provider licensed pursuant to article thirty-one of the mental hygiene law or certified pursuant to article sixteen or article thirty-two of the mental hygiene law to obtain an operating certificate from the department if such provider has been authorized to provide integrated services in accordance with regulations issued by the commissioner in consultation with the commissioner of the office of mental health, the commissioner of the office of addiction services and supports and the commissioner of the office for people with developmental disabilities, including regulations issued pursuant to subdivision seven of section three hundred sixty-five-l of the social services law or part L of chapter

fifty-six of the laws of two thousand twelve; or (c) require a provider licensed under section 36.08 of the mental hygiene law to obtain a license from the department.

* NB Effective on the date that the rates of reimbursement for integrated behavioral health services are approved and certified by parties set forth in chapter 60 of 2026 § 8

2. "Nursing home" means a facility providing therein nursing care to sick, invalid, infirm, disabled or convalescent persons in addition to lodging and board or health-related service, or any combination of the foregoing, and in addition thereto, providing nursing care and health-related service, or either of them, to persons who are not occupants of the facility.

3. "Residential health care facility" means a nursing home or a facility providing health-related service.

4. (a) "Hospital service" means the preadmission, out-patient, in-patient and post discharge care provided in or by a hospital, and such other items or services as are necessary for such care, which are provided by or under the supervision of a physician for the purpose of prevention, diagnosis or treatment of human disease, pain, injury, disability, deformity or physical condition, including, but not limited to, nursing service, home-care nursing and other paramedical service, ambulance service, service provided by an intern or resident in training, laboratory service, medical social service, drugs, biologicals, supplies, appliances, equipment, bed and board.

(b) "Health-related service" means service in a facility or facilities which provide or offer lodging, board and physical care including, but not limited to, the recording of health information, dietary supervision and supervised hygienic services incident to such service.

5. "Construction" means the erection, building, or substantial acquisition, alteration, reconstruction, improvement, extension or modification of a hospital, including its equipment; the inspection and supervision thereof; and the studies, surveys, designs, plans, working drawings, specifications, procedures and other actions necessary

thereto.

6. "Council" and "public health council" mean the public health and health planning council.

7. "Government agency" means a department, board, bureau, division, office, agency, public benefit or other corporation, or any other unit, however described, of the state or a political subdivision thereof.

8. "Caretaker" means a person appointed pursuant to the provisions of section twenty-eight hundred six-b of this article, to act as a fiduciary responsible to the court which appoints him for the conserving and preserving of the rights and property of the operator of a residential health care facility, while also preserving and providing for the rights of the patients in such facility to care appropriate to their needs in a clean and wholesome environment in accordance with applicable federal and state laws and regulations.

9. "Out-patient lodge" means a facility affiliated with an institution providing hospital service, which provides therein food and overnight lodging to the chronically ill undergoing out-patient treatment for cancer at such institution.

10. "General hospital" means a hospital engaged in providing medical or medical and surgical services primarily to in-patients by or under the supervision of a physician on a twenty-four hour basis with provisions for admission or treatment of persons in need of emergency care and with an organized medical staff and nursing service, including facilities providing services relating to particular diseases, injuries, conditions or deformities. The term general hospital shall not include a residential health care facility, public health center, diagnostic center, treatment center, out-patient lodge, dispensary and laboratory or central service facility serving more than one institution.

11. "Midwifery birth center" means a hospital engaged principally in providing prenatal and obstetric care, where such services are provided principally by midwives.

12. "Facility fee" means any fee charged or billed by a hospital or by a health care professional authorized under title eight of the education law that is: (a) intended to compensate the hospital or health care professional for the operational expenses regardless of the modality through which the health care services are provided; and (b) separate and distinct from a professional fee. "Facility fee" shall not include any fee charged or billed by a residential health care facility.

13. "Health system" means a group of one or more hospitals and providers affiliated through ownership, governance, membership or other means.

14. "Provider" means an individual or entity, whether for profit or nonprofit, whose primary purpose is to provide professional health care services.

§ 2801-a. Establishment or incorporation of hospitals. 1. No hospital, as defined in this article, shall be established except with the written approval of the public health and health planning council. No certificate of incorporation of a business membership or not-for-profit corporation shall hereafter be filed which includes among its corporate purposes or powers the establishment or operation of any hospital, as defined in this article, or the solicitation of contributions for any such purpose, or two or more of such purposes, except with the written approval of the public health and health planning council, and when otherwise required by law of a justice of the supreme court, endorsed on or annexed to the certificate of incorporation. No articles of organization of a limited liability company established pursuant to the New York limited liability company law which includes among its powers or purposes the establishment or operation of any hospital as defined in this article, shall be filed with the department of state except upon the approval of the public health and health planning council.

2. With respect to the incorporation or establishment of any hospital, as defined in this article, the public health and health planning

council shall give written approval after all of the following requirements have been met. An application for approval of the proposed certificate of incorporation, articles of organization or establishment shall be filed with the public health and health planning council together with such other forms and information as shall be prescribed by, or acceptable to, the public health and health planning council. Thereafter, the public health and health planning council shall forward a copy of the proposed certificate or application for establishment, and accompanying documents, to the health systems agency, if any, having geographical jurisdiction of the area where the proposed institution is to be located. The public health and health planning council shall act upon such application after the health systems agency has had a reasonable time to submit their recommendations. At the time members of the public health and health planning council are notified that an application is scheduled for consideration, the applicant and the health systems agency shall be so notified in writing. The public health and health planning council shall afford the applicant an opportunity to present information in person concerning the application to a committee designated by the council. The public health and health planning council shall not take any action contrary to the advice of the health systems agency until it affords to the health systems agency an opportunity to request a public hearing and, if so requested, a public hearing shall be held. If the public health and health planning council proposes to disapprove the application it shall afford the applicant an opportunity to request a public hearing. The public health and health planning council may hold a public hearing on the application on its own motion. Any public hearing held pursuant to this subdivision may be conducted by the public health and health planning council, or by any individual designated by the public health and health planning council. Beginning on January first, nineteen hundred ninety-four, and each year thereafter, a complete application received between January first and June thirtieth of each year shall be reviewed by the appropriate health systems agency and the department and presented to the public health and health planning council for its consideration prior to June thirtieth of the following year and a complete application received between July first and December thirty-first of each year shall be reviewed by the appropriate health systems agency and the department presented to the

public health and health planning council for consideration prior to December thirty-first of the following year.

2-a. (a) Notwithstanding any provision of law to the contrary, the commissioner is authorized to approve a certificate of incorporation or articles of organization for establishment of a hospital, provided that: (i) the certificate of incorporation or articles of organization reflects solely a change in the form of the business organization of an existing entity which had been approved by the public health and health planning council or its predecessor; and (ii) every incorporator, stockholder, member, director and sponsor of the new entity shall have been an owner, partner, incorporator, stockholder, member, director or sponsor of the existing entity; and (iii) the distribution of ownership, interests and voting rights in the new entity shall be the same as in the existing entity; and (iv) there shall be no change in the operator of a hospital other than the form of its business organization, as a result of the approval of such certificate of incorporation or articles of organization. Any approval by the public health and health planning council of a person as an owner, incorporator, stockholder, member, director or sponsor in the existing entity shall be deemed to be approval for the same degree of participation in the new entity. If the proposal is acceptable to the commissioner an amended operating certificate shall be issued. In the event the commissioner determines that the proposed transfer is not approvable the application shall be referred to the public health and health planning council for its review and action. If the public health and health planning council proposes to disapprove the application, it shall afford the applicant an opportunity to request a public hearing and, if so requested, a public hearing shall be held. Any public hearing held pursuant to this subdivision may be conducted by the public health and health planning council, or by any individual designated by the public health and health planning council.

2-b. (a) This subdivision applies with respect to an application under this section relating to the incorporation or establishment of any nursing home, in addition to subdivision two of this section.

(b) The department shall provide notice, in writing or electronically, of an application for establishment to the state office of long-term

care ombudsman, within thirty days of acknowledgement of the application by the department. Thereafter, the state office of the long-term care ombudsman shall submit its recommendation to the department and to the public health and health planning council for consideration about such application. At the time members of such council are notified that an application is scheduled for consideration by a committee designated by the public health and health planning council, the department shall also notify the state office of the long-term care ombudsman, in writing or electronically.

(c) In the case of an application for establishment relating to an existing nursing home, the established operator and applicant shall provide notice of the application, in writing or electronically, to residents of the nursing home and their representatives and the staff of the nursing home, including their union representatives, within thirty days of acknowledgment of the application by the department. The established operator and applicant shall also immediately notify residents of the nursing home and their representatives and the staff of the nursing home, including their union representatives, when the established operator and applicant is notified that its application is scheduled for consideration by a committee designated by the public health and health planning council.

3. The public health and health planning council shall not approve a certificate of incorporation, articles of organization or application for establishment unless it is satisfied, insofar as applicable, as to (a) the public need for the existence of the institution at the time and place and under the circumstances proposed, provided, however, that in the case of an institution proposed to be established or operated by an organization defined in subdivision one of section one hundred seventy-two-a of the executive law, the needs of the members of the religious denomination concerned, for care or treatment in accordance with their religious or ethical convictions, shall be deemed to be public need; (b) the character, competence, and standing in the community, of the proposed incorporators, directors, sponsors, stockholders, members or operators; with respect to any proposed incorporator, director, sponsor, stockholder, member or operator who is already or within the past ten years has been an incorporator, director,

sponsor, member, principal stockholder, principal member, or operator of any hospital, private proprietary home for adults, residence for adults, or non-profit home for the aged or blind which has been issued an operating certificate by the state department of social services, or a halfway house, hostel or other residential facility or institution for the care, custody or treatment of the mentally disabled which is subject to approval by the department of mental hygiene, no approval shall be granted unless the public health and health planning council, having afforded an adequate opportunity to members of health systems agencies, if any, having geographical jurisdiction of the area where the institution is to be located to be heard, shall affirmatively find by substantial evidence as to each such incorporator, director, sponsor, principal stockholder or operator that a substantially consistent high level of care is being or was being rendered in each such hospital, home, residence, halfway house, hostel, or other residential facility or institution with which such person is or was affiliated; for the purposes of this paragraph, the public health and health planning council shall adopt rules and regulations, subject to the approval of the commissioner, to establish the criteria to be used to determine whether a substantially consistent high level of care has been rendered, provided, however, that there shall not be a finding that a substantially consistent high level of care has been rendered where there have been violations of the state hospital code, or other applicable rules and regulations, that (i) threatened to directly affect the health, safety or welfare of any patient or resident, and (ii) were recurrent or were not promptly corrected; (c) the financial resources of the proposed institution and its sources of future revenues; and (d) such other matters as it shall deem pertinent.

3-a. Notwithstanding any other provisions of this chapter, the public health council is hereby empowered to approve the establishment, for demonstration purposes, of not more than one existing hospital within the geographical jurisdiction of each health systems agency established under the provisions of subdivision (c) of section twenty-nine hundred four of this chapter. The purposes of such hospitals shall be to offer and provide nursing home services, board and lodging to persons requiring such services within one hospital. The public health council

may approve the establishment of such hospitals without regard to the requirement of public need as set forth in subdivision three of this section.

3-b. (a) This subdivision applies to an application under this section relating to a nursing home, and applies in addition to subdivision three of this section.

(b) The application shall provide information as to the character, competence and standing in the community of every individual and entity of the applicant and specify the identity of every nursing home in which each of those individuals and entities is, or in the preceding seven years has held a controlling interest or has been a controlling person, principal stockholder or principal member; and the nature of that interest. As used in this subdivision, "individual and entity of the applicant" shall include but not be limited to an individual or entity that is a controlling person, principal stockholder, or principal member of the applicant. The council shall not approve the application unless it finds that each individual and entity, in relation to ownership of a nursing home located in the United States, for at least the previous seven years, demonstrated satisfactory character, competence and standing in the community and the nursing home provided a consistently high level of care. The council shall adopt rules and regulations, subject to the approval of the commissioner, to establish the criteria to be used to determine whether a consistently high level of care has or has not been rendered by an applicant at such nursing home. The council shall consider, at a minimum, the following occurrences to determine whether a consistently high level of care has been delivered at a facility, and shall require the applicant to disclose and provide an explanation for any of the following occurrences: (i) a facility that has earned a two-star rating or less by the federal centers for Medicare and Medicaid Services (CMS) (or a comparable rating under a successor CMS rating system); (ii) where there have been violations of the state or federal nursing home code, or other applicable rules and regulations, that threatened to directly affect the health, safety or welfare of any patient or resident, including but not limited to a finding of immediate jeopardy, or actual harm, and were recurrent or were not promptly corrected, including but not limited to repeat deficiencies for the same

or similar violations over a three year period or during the entire duration of ownership if less than three years, or any facility which has been in receivership; (iii) where a facility has closed as a result of a settlement agreement from a decertification action or licensure revocation; or (iv) has been involuntarily terminated from the Medicare or Medicaid program in the prior five years, provided however, that where an applicant has taken over a facility and promptly corrected such deficiencies, the council may consider the application.

4. (a) Any change in the person who is the operator of a hospital shall be approved by the public health and health planning council in accordance with the provisions of subdivisions two and three of this section. Notwithstanding any inconsistent provision of this paragraph, any change by a natural person who is the operator of a hospital seeking to transfer part of his or her interest in such hospital to another person or persons so as to create a partnership shall be approved in accordance with the provisions of paragraph (b) of this subdivision.

(b) (i) Any transfer, assignment or other disposition of ten percent or more of an interest or voting rights in a partnership or limited liability company, which is the operator of a hospital to a new partner or member, shall be approved by the public health and health planning council, in accordance with the provisions of subdivisions two and three of this section, except that: (A) any such change shall be subject to the approval by the public health and health planning council in accordance with paragraph (b) of subdivision three of this section only with respect to the new partner or member, and any remaining partners or members who have not been previously approved for that facility in accordance with such paragraph, and (B) such change shall not be subject to paragraph (a) of subdivision three of this section.

(ii) With respect to a transfer, assignment or disposition involving less than ten percent of an interest or voting rights in such partnership or limited liability company to a new partner or member, no prior approval of the public health and health planning council shall be required. However, no such transaction shall be effective unless at least ninety days prior to the intended effective date thereof, the partnership or limited liability company fully completes and files with the public health and health planning council notice on a form, to be

developed by the public health and health planning council, which shall disclose such information as may reasonably be necessary for the public health and health planning council to determine whether it should bar the transaction for any of the reasons set forth in item (A), (B), (C) or (D) below. Within ninety days from the date of receipt of such notice, the public health and health planning council may bar any transaction under this subparagraph: (A) if the equity position of the partnership or limited liability company, determined in accordance with generally accepted accounting principles, would be reduced as a result of the transfer, assignment or disposition; (B) if the transaction would result in the ownership of a partnership or membership interest by any persons who have been convicted of a felony described in subdivision five of section twenty-eight hundred six of this article; (C) if there are reasonable grounds to believe that the proposed transaction does not satisfy the character and competence criteria set forth in subdivision three of this section; or (D) if the transaction, together with all transactions under this subparagraph for the partnership, or successor, during any five year period would, in the aggregate, involve twenty-five percent or more of the interest in the partnership. The public health and health planning council shall state specific reasons for barring any transaction under this subparagraph and shall so notify each party to the proposed transaction.

(iii) With respect to a transfer, assignment or disposition of an interest or voting rights in such partnership or limited liability company to any remaining partner or member, which transaction involves the withdrawal of the transferor from the partnership or limited liability company, no prior approval of the public health and health planning council shall be required. However, no such transaction shall be effective unless at least ninety days prior to the intended effective date thereof, the partnership or limited liability company fully completes and files with the public health and health planning council notice on a form, to be developed by the public health and health planning council, which shall disclose such information as may reasonably be necessary for the public health and health planning council to determine whether it should bar the transaction for the reason set forth below. Within ninety days from the date of receipt of such notice, the public health and health planning council may bar any

transaction under this subparagraph if the equity position of the partnership or limited liability company, determined in accordance with generally accepted accounting principles, would be reduced as a result of the transfer, assignment or disposition. The public health and health planning council shall state specific reasons for barring any transaction under this subparagraph and shall so notify each party to the proposed transaction.

(c) Any transfer, assignment or other disposition of ten percent or more of the stock or voting rights thereunder of a corporation which is the operator of a hospital or which is a member of a limited liability company which is the operator of a hospital to a new stockholder, or any transfer, assignment or other disposition of the stock or voting rights thereunder of such a corporation which results in the ownership or control of more than ten percent of the stock or voting rights thereunder of such corporation by any person not previously approved by the public health and health planning council, or its predecessor, for that corporation shall be subject to approval by the public health and health planning council, in accordance with the provisions of subdivisions two and three of this section and rules and regulations pursuant thereto; except that: any such transaction shall be subject to the approval by the public health and health planning council in accordance with paragraph (b) of subdivision three of this section only with respect to a new stockholder or a new principal stockholder; and shall not be subject to paragraph (a) of subdivision three of this section. In the absence of such approval, the operating certificate of such hospital shall be subject to revocation or suspension. No prior approval of the public health and health planning council shall be required with respect to a transfer, assignment or disposition of ten percent or more of the stock or voting rights thereunder of a corporation which is the operator of a hospital or which is a member of a limited liability company which is the owner of a hospital to any person previously approved by the public health and health planning council, or its predecessor, for that corporation. However, no such transaction shall be effective unless at least ninety days prior to the intended effective date thereof, the stockholder completes and files with the public health and health planning council notice on forms to be developed by the public health and health planning council, which shall

disclose such information as may reasonably be necessary for the public health and health planning council to determine whether it should bar the transaction. Such transaction will be final as of the intended effective date unless, prior thereto, the public health and health planning council shall state specific reasons for barring such transactions under this paragraph and shall notify each party to the proposed transaction. Nothing in this paragraph shall be construed as permitting a person not previously approved by the public health and health planning council for that corporation to become the owner of ten percent or more of the stock of a corporation which is the operator of a hospital or which is a member of a limited liability company which is the owner of a hospital without first obtaining the approval of the public health and health planning council.

(d) No hospital shall be approved for establishment which would be operated by a limited partnership, or by a partnership any of the members of which are not natural persons.

(e) No hospital shall be approved for establishment which would be operated by a corporation any of the stock of which is owned by another corporation or a limited liability company if any of its corporate members' stock is owned by another corporation.

(f) No corporation shall be a member of a limited liability company authorized to operate a hospital unless its proposed incorporators, directors, stockholders or principal stockholders shall have been approved in accordance with the provisions of subdivision three of this section applicable to the approval of the proposed incorporators, directors or stockholders of any other corporation requiring approval for establishment.

(g) A natural person appointed as trustee of an express testamentary trust, created by a deceased sole proprietor, partner or shareholder in the operation of a hospital for the benefit of a person of less than twenty-five years of age, may, as the trustee, apply pursuant to subdivision two of this section for approval to operate or participate in the operation of a facility or interest therein which is included in the corpus of such trust until such time as all beneficiaries attain the age of twenty-five, unless the trust instrument provides for earlier termination, or such beneficiaries receive establishment approval in their own right, or until a transfer of the trust corpus is approved by

the public health and health planning council, in accordance with this subdivision and subdivisions two and three of this section, whichever first occurs. The public health and health planning council shall not approve any such application unless it is satisfied as to:

- (i) the character, competence and standing in the community of each proposed trustee operator pursuant to the provisions of paragraph (b) of subdivision three of this section; and

- (ii) the ability of the trustee under the terms of the trust instrument to operate or participate in the operation of the hospital in a manner consistent with this chapter and regulations promulgated pursuant thereto.

(h) A natural person appointed conservator pursuant to article eighty-one of the mental hygiene law, or a natural person appointed committee of the property of an incompetent pursuant to article eighty-one of the mental hygiene law or a sole proprietor, partner or shareholder of a hospital, may apply pursuant to subdivision two of this section for approval to operate a hospital owned by the conservatee or incompetent for a period not exceeding two years or until a transfer of the hospital is approved by the public health and health planning council in accordance with subdivisions two and three of this section, whichever occurs first. The public health and health planning council shall not approve any such application unless it is satisfied as to:

- (i) the character, competence and standing in the community of the proposed conservator operator or committee operator pursuant to the provisions of paragraph (b) of subdivision three of this section; and

- (ii) the ability of the conservator or committee under the terms of the court order to operate the hospital in a manner consistent with this chapter and regulations promulgated pursuant thereto.

(i) Upon recommendation by the commissioner, if the public health and health planning council finds by substantial evidence that an improper delegation of management authority by a governing authority or operator of a general hospital has occurred as defined by paragraph (g) of subdivision one of section twenty-eight hundred six-a of this article, the establishment approval of such hospital shall be subject to revocation or suspension.

5. Except as otherwise hereinafter provided, no county, city, town,

village or other governmental subdivision shall establish or create any agency concerned with the establishment of any hospital as defined in this article without securing the written approval of the public health and health planning council in accordance with the requirements and procedures of subdivisions two and three of this section with respect to certificates of incorporation, articles of organization and establishment, except that the requirements relating to the proposed incorporators, directors and sponsors shall not apply. The preceding shall not apply to the establishment of state hospitals by the state of New York or to the establishment of municipal hospitals by the city of New York.

6. No corporation having power to solicit contributions for charitable purposes shall be deemed to have authority to solicit contributions for any purpose for which the approval of the public health and health planning council is required, unless the certificate of incorporation specifically makes provision therefor, and the written approval of the public health and health planning council, or its predecessor is endorsed on or annexed to such certificate.

7. Where such approval has not been obtained the public health and health planning council may institute and maintain an action in the supreme court through the attorney general to procure a judgment dissolving and vacating or annulling the certificate of incorporation of

(a) any such corporation, or

(b) any corporation hereafter incorporated, the name, purposes, objects or the activities of which in any manner may lead to the belief that the corporation possesses or may exercise any of such purposes.

8. No corporation heretofore formed, having among its powers the power to solicit contributions for charitable purposes, may solicit or continue to solicit contributions for a purpose for which the approval of the public health and health planning council is required without the written approval of the public health and health planning council, except: (a) a corporation which, prior to June first, nineteen hundred seventy, had received the approval of the state board of social welfare of a certificate of incorporation containing such power; or (b) a

corporation, which prior to December first, two thousand ten, had received the approval of the public health council of a certificate of incorporation containing such power. If such approval is not obtained and the corporation continues to solicit or to receive contributions for such purpose or advertises that it has obtained such approval, the public health and health planning council may institute and maintain an action in the supreme court through the attorney general to procure a judgment dissolving and vacating or annulling the certificate of incorporation of any such corporation.

9. Only a natural person, a partnership or limited liability company may hereafter undertake to engage in the business of operating or conducting a hospital, as defined in this article, for profit, except that: (a) a person, partnership or corporation which owned and was operating a hospital on April fourth, nineteen hundred fifty-six, may continue to own and operate such hospital; (b) a business corporation may, with the approval of the public health council, and in accordance with the provisions of subdivisions two and three of this section, undertake to engage in the business of operating or conducting a hospital, as defined in this article for profit, provided that such corporation shall not discriminate because of race, color, creed, national origin or sponsor in admission or retention of patients; (c) a business corporation owning and operating a nursing home on May twenty-second, nineteen hundred sixty-nine, in accordance with applicable provisions of law, may continue to own and operate such nursing home; (d) a person who, or a partnership which, is operating a private proprietary nursing home in accordance with applicable provisions of law may, with the approval of the public health and health planning council, and in accordance with the provisions of subdivision three of this section and any rules and regulations thereunder form a business corporation to engage in the business of operating or conducting such nursing home, provided, however, that such corporation shall not discriminate because of race, color, creed, national origin or sponsor in admission or retention of patients; (e) a business corporation operating a nursing home, which corporation was formed with the approval of the state board of social welfare, may continue to own and operate such nursing home.

10. (a) The public health and health planning council, by a majority vote of its members, shall adopt and amend rules and regulations, to effectuate the provisions and purposes of this section, and to provide for the revocation, limitation or annulment of approvals of establishment.

(b) (i) No approval of establishment shall be revoked, limited or annulled without first offering the person who received such approval the opportunity of requesting a public hearing. (ii) The commissioner, at the request of the public health and health planning council, shall fix a time and place for any such hearing requested. (iii) Notice of the time and place of the hearing shall be served in person or mailed by registered mail to the person who has received establishment approval at least twenty-one days before the date fixed for the hearing. (iv) Such person shall file with the department, not less than eight days prior to the hearing, a written answer. (v) All orders or determinations hereunder shall be subject to review as provided in article seventy-eight of the civil practice law and rules. Application for such review must be made within sixty days after service in person or by registered mail of a copy of such order or determination.

11. Any person filing a proposed certificate of incorporation, articles of organization or an application for establishment of a residential health care facility for approval of the public health and health planning council shall file with the commissioner such information as may be prescribed by regulation, including, but not limited to, the following:

(a) The name and address and a description of the interest held by each of the following persons:

(i) any person, who directly or indirectly, beneficially owns any interest in the land on which the facility is located;

(ii) any person who, directly or indirectly, beneficially owns any interest in the building in which the facility is located;

(iii) any person who, directly or indirectly, beneficially owns any interest in any mortgage, note, deed of trust or other obligation secured in whole or in part by the land on which or building in which the facility is located; and

(iv) any person who, directly or indirectly, has any interest as lessor or lessee in any lease or sub-lease of the land on which or the building in which the facility is located.

(b) If any person named in response to paragraph (a) of this subdivision is a partnership or limited liability company, then the name and address of each partner or member.

(c) If any person named in response to paragraph (a) of this subdivision is a corporation, other than a corporation whose shares are traded on a national securities exchange or are regularly quoted in an over-the-counter market or which is a commercial bank, savings bank or savings and loan association, then the name and address of each officer, director, stockholder and, if known, each principal stockholder and controlling person of such corporation.

(d) If any corporation named in response to paragraph (a) of this subdivision is a corporation whose shares are traded on a national securities exchange or are regularly quoted in an over-the-counter market or which is a commercial bank, savings bank or savings and loan association, then the name and address of the principal executive officers and each director and, if known, each principal stockholder of such corporation.

* (e) Information pertaining to staffing, the source of staffing, and staff skill mix.

* NB Effective October 21, 2021

12. The following definitions shall be applicable to this section:

(a) "Controlling person" of any corporation, partnership, limited liability company or other entity means any person who by reason of a direct or indirect ownership interest (whether of record or beneficial) has the ability, acting either alone or in concert with others with ownership or membership interests, to direct or cause the direction of the management or policies of said corporation, partnership, limited liability company or other entity. Neither the commissioner nor any employee of the department nor any member of a local legislative body of a county or municipality, nor any county or municipal official except when acting as the administrator of a residential health care facility, shall, by reason of his or her official position, be deemed a controlling person of any corporation, partnership, limited liability

company or other entity, nor shall any person who serves as an officer, administrator or other employee of any corporation, partnership, limited liability company or other entity or as a member of a board of directors or trustees of any corporation be deemed to be a controlling person of such corporation, partnership, limited liability company or other entity as a result of such position or his or her official actions in such position.

(b) "Principal stockholder" of a corporation means any person who beneficially owns, holds or has the power to vote, ten percent or more of any class of securities issued by said corporation.

(c) "Principal member" of a limited liability company means any person who beneficially owns, holds or has the power to vote, ten percent or more interest determined by such member's share in the current profits of the limited liability company.

13. Any person who operates a hospital without the written approval of the public health and health planning council shall be liable to the people of the state for a civil penalty not to exceed ten thousand dollars for every such violation.

14. (a) The public health and health planning council may approve the establishment of not-for-profit rural health networks as defined in article twenty-nine-A of this chapter, pursuant to the provisions of subdivisions two and three of this section, except that the public health and health planning council shall not consider the public need for and financial resources and sources of future revenues of such networks which do not seek approval to operate a hospital. In addition to character and competence, the public health and health planning council may take into consideration available network plans.

(b) The board of directors or trustees of a not-for-profit rural health network shall be comprised of a representative or representatives of participating providers and members of the general public residing in the area served by such network.

15. (a) Diagnostic or treatment centers established exclusively to provide end stage renal disease services may be operated by corporations and limited liability companies formed under the laws of New York whose

stockholders or members, as applicable, are not natural persons if such corporations and limited liability companies and its principal stockholders and members, as applicable, and controlling persons comply with all applicable requirements of this section and demonstrate, to the satisfaction of the public health and health planning council, sufficient experience and expertise in delivering high quality end stage renal disease care. For purposes of this subdivision, the public health and health planning council shall adopt and amend rules and regulations, notwithstanding any inconsistent provision of this section, to address any matter it deems pertinent to the establishment and operation of diagnostic or treatment centers pursuant to this subdivision; provided that such rules and regulations shall include, but not be limited to provisions governing or relating to: (i) any direct or indirect changes or transfers of ownership interests or voting rights in such corporations and limited liability companies or their stockholders or members, as applicable, and provide for public health and health planning council approval of any change in controlling interests, principal stockholders, principal members, controlling persons, parent company or sponsors; (ii) oversight of the operator and its stockholders or members, as applicable, including local governance of the diagnostic or treatment centers; and (iii) relating to the character and competence and qualifications of, and changes relating to, the directors, managers and officers of the operator and its principal stockholders, principal members, controlling persons, parent company or sponsors.

(b) The following provisions of this section shall not apply to diagnostic or treatment centers operated pursuant to this subdivision: (i) paragraph (b) of subdivision three of this section, relating to stockholders and members; (ii) paragraph (c) of subdivision four of this section, relating to the disposition of stock or voting rights; and (iii) paragraph (e) of subdivision four of this section, relating to the ownership of stock or membership.

16. (a) The commissioner shall charge to applicants for the establishment of hospitals the following application fee:

- | | |
|---|---------|
| (i) For general hospitals: | \$3,000 |
| (ii) For nursing homes: | \$3,000 |
| (iii) For safety net diagnostic and treatment centers | |

as defined in paragraph (c) of this subdivision: \$1,000

(iv) For all other diagnostic and treatment centers: \$2,000

(b) An applicant for both establishment and construction of a hospital shall not be subject to this subdivision and shall be subject to fees and charges as set forth in section twenty-eight hundred two of this article.

(c) The commissioner may designate a diagnostic and treatment center or proposed diagnostic and treatment center as a "safety net diagnostic and treatment center" if it is operated or proposes to be operated by a not-for-profit corporation or local health department; participates or intends to participate in the medical assistance program; demonstrates or projects that a significant percentage of its visits, as determined by the commissioner, were by uninsured individuals; and principally provides primary care services as defined by the commissioner.

(d) The fees and charges paid by an applicant pursuant to this subdivision for any application for establishment of a hospital approved in accordance with this section shall be deemed allowable capital costs in the determination of reimbursement rates established pursuant to this article. The cost of such fees and charges shall not be subject to reimbursement ceiling or other penalties used by the commissioner for the purpose of establishing reimbursement rates pursuant to this article. All fees pursuant to this section shall be payable to the department of health for deposit into the special revenue funds - other, miscellaneous special revenue fund - 339, certificate of need account.

17. (a) Diagnostic or treatment centers or other facilities managed and administered by a local health department for the purpose of providing limited health care services as defined by the commissioner may be operated by a local health department. Such facilities shall be referred to in this subdivision as "municipal limited health care service facilities".

(b) The commissioner shall promulgate regulations for municipal limited health care service facilities, which may be different from the regulations otherwise applicable to hospitals, including, but not limited to: designating or limiting the diagnoses and services that may be provided; employee health requirements; and requirements or guidelines for advertising and signage, disclosure of ownership

interests, informed consent, record keeping, referral for treatment, case reporting to the patient's primary care or other health care providers, design, construction, fixtures, and equipment.

§ 2801-b. Improper practices in hospital staff appointments and extension of professional privileges prohibited. 1. It shall be an improper practice for the governing body of a hospital to refuse to act upon an application for staff membership or professional privileges or to deny or withhold from a physician, podiatrist, optometrist, dentist or licensed midwife staff membership or professional privileges in a hospital, or to exclude or expel a physician, podiatrist, optometrist, dentist or licensed midwife from staff membership in a hospital or curtail, terminate or diminish in any way a physician's, podiatrist's, optometrist's, dentist's or licensed midwife's professional privileges in a hospital, without stating the reasons therefor, or if the reasons stated are unrelated to standards of patient care, patient welfare, the objectives of the institution or the character or competency of the applicant. It shall be an improper practice for a governing body of a hospital to refuse to act upon an application or to deny or to withhold staff membership or professional privileges to a podiatrist based solely upon a practitioner's category of licensure.

2. Any person claiming to be aggrieved by an improper practice as defined in this section may, by himself or his attorney, make, sign and file with the public health council a verified complaint in writing which shall state the name and address of the hospital whose governing body is alleged to have committed the improper practice complained of and which shall set forth the particulars thereof and contain such other information as may be required by the council.

3. After the filing of any such complaint, the public health council shall make a prompt investigation in connection therewith. In conducting such investigation, the public health council is authorized to receive reports from the governing body of the hospital and the complainant, as the case may be, and the furnishing of such information to the public health council, or by the council to the governing body or complainant,

shall not subject any person or hospital to any action for damages or other relief. Such information when received by the public health council, or its authorized representative, shall be kept confidential and shall be used solely for the purposes of this section and the improvement of the standards of patient care and patient welfare. The records of such proceedings shall not be admissible as evidence in any other action of any kind in any court or before any other tribunal, board, agency, or person. If the council shall determine after such investigation that cause exists for crediting the allegations of the complaint, the council shall promptly so advise the governing body of the hospital against which the complaint was made, and shall direct that such governing body make a review of the actions of such body in denying or withholding staff membership or professional privileges from the complainant physician, podiatrist, optometrist, dentist or licensed midwife or in excluding or expelling such physician, podiatrist, optometrist, dentist or licensed midwife from staff membership or in curtailing, terminating or in any way diminishing such physician's, podiatrist's, optometrist's, dentist's or licensed midwife's professional privileges in the hospital.

4. The provisions of this section shall not be deemed to impair or affect any other right or remedy.

§ 2801-c. Injunctions. The supreme court may enjoin violations or threatened violations of any provisions of this article; and it may enjoin violations of the regulations of the department adopted thereunder. Upon request of the public health council or the commissioner, the attorney general shall maintain an action in the supreme court in the name of the people of the state to enjoin any such violation. Notwithstanding any limitation of the civil practice law and rules, such court may, on motion and affidavit, and upon proof that such violation is one which reasonably may result in injury to any person, whether or not such person is a party to such action, grant a temporary injunction upon such terms as may be just, pending the determination of the action. No security on the part of the people of this state shall be required. In any action for injunction brought pursuant to this article,

any finding of the public health council or the commissioner or hearing officer designated by either shall be prima facie evidence of the fact or facts found therein.

§ 2801-d. Private actions by patients of residential health care facilities. 1. Any residential health care facility that deprives any patient of said facility of any right or benefit, as hereinafter defined, shall be liable to said patient for injuries suffered as a result of said deprivation, except as hereinafter provided. For purposes of this section a "right or benefit" of a patient of a residential health care facility shall mean any right or benefit created or established for the well-being of the patient by the terms of any contract, by any state statute, code, rule or regulation or by any applicable federal statute, code, rule or regulation, where noncompliance by said facility with such statute, code, rule or regulation has not been expressly authorized by the appropriate governmental authority. No person who pleads and proves, as an affirmative defense, that the facility exercised all care reasonably necessary to prevent and limit the deprivation and injury for which liability is asserted shall be liable under this section. For the purposes of this section, "injury" shall include, but not be limited to, physical harm to a patient; emotional harm to a patient; death of a patient; and financial loss to a patient.

2. Upon a finding that a patient has been deprived of a right or benefit and that said patient has been injured as a result of said deprivation, and unless there is a finding that the facility exercised all care reasonably necessary to prevent and limit the deprivation and injury to the patient, compensatory damages shall be assessed in an amount sufficient to compensate such patient for such injury, but in no event less than twenty-five percent of the daily per-patient rate of payment established for the residential health care facility under section twenty-eight hundred seven of this article or, in the case of a residential health care facility not having such an established rate, the average daily total charges per patient for said facility, for each day that such injury exists. In addition, where the deprivation of any

such right or benefit is found to have been willful or in reckless disregard of the lawful rights of the patient, punitive damages may be assessed.

3. A patient residing in a residential health care facility may also maintain an action pursuant to this section for any other type of relief, including injunctive and declaratory relief, permitted by law.

4. Any damages recoverable pursuant to this section, including minimum damages as provided by subdivision two of this section, may be recovered in any action which a court may authorize to be brought as a class action pursuant to article nine of the civil practice law and rules. The remedies provided in this section are in addition to and cumulative with any other remedies available to a patient, the patient's legal representative, or the patient's estate at law or in equity or by administrative proceedings, including tort causes of action, and may be granted regardless of whether such other remedies are available or are sought. A violation of subdivision three of section twenty-eight hundred three-c of this article is not a prerequisite for a claim under this section. Exhaustion of any available administrative remedies shall not be required prior to commencement of suit hereunder.

4-a. Under this section, any action that may be brought, and any relief that may be sought or received, may be brought, sought or received in an appropriate case by the patient's legal representative or the patient's estate.

5. The amount of any damages recovered by a patient, in an action brought pursuant to this section shall be exempt for purposes of determining initial or continuing eligibility for medical assistance under title eleven of article five of the social services law and shall neither be taken into consideration nor required to be applied toward the payment or part payment of the cost of medical care or services available under said title eleven.

6. If judgment in an action maintained under this section is rendered in favor of the plaintiff, in its discretion the court may, if justice

requires, award attorneys' fees to the plaintiff based on the reasonable value of legal services rendered and payable by the defendant.

7. Any waiver by a patient or his legal representative of the right to commence an action under this section, whether oral or in writing, shall be null and void and without legal force or effect.

8. Any party to an action brought under this section shall be entitled to a trial by jury and any waiver of the right to a trial by a jury, whether oral or in writing, prior to the commencement of an action, shall be null and void, and without legal force or effect.

9. No insurance premium or part thereof paid by any residential health care facility which is attributable solely to insurance against liability pursuant to this section shall be allowed as a reimbursable cost for purposes of any proposed rate schedule for payments for hospital or health-related service which the commissioner shall determine and certify pursuant to section twenty-eight hundred seven of this chapter.

10. a. No person shall discriminate against any patient of a residential health care facility because such patient, or the patient's legal representative, has brought or caused to be brought any action pursuant to this section, or against any patient or employee of a residential health care facility because such patient or employee has given or provided or is to give or provide testimony or other evidence for purposes of such action.

b. Any patient who has reason to believe that he or she may have been discriminated against in violation of this subdivision may, within thirty days after such alleged violation occurs, file a complaint with the commissioner. The commissioner shall investigate any such complaint, and shall, if such complaint is deemed meritorious, serve upon the administrator of the subject facility, in his capacity as a representative of the facility, either by personal service or by certified mail addressed to the administrator in care of the facility, return receipt requested, a complaint stating the substance of the

alleged discrimination with reasonable particularity. A hearing shall be conducted in accordance with section twelve-a of this chapter within thirty days of the service of such complaint. The hearing officer shall make a report of his findings to the commissioner, who, if he determines that a violation of this subdivision has occurred, may grant whatever relief is necessary and appropriate to remedy the violation, including, but not limited to readmittance of patients wrongfully discharged. Any such order of the commissioner shall be appealable by a proceeding under article seventy-eight of the civil practice law and rules.

c. Whenever the commissioner has issued an order as provided in this subdivision he may apply to any court of competent jurisdiction for the enforcement of such order.

d. Any action taken by the commissioner in accordance with the provisions of this subdivision shall not be exclusive, and may be taken in conjunction with an action for a civil penalty for a violation of paragraph a of this subdivision, or any private civil action brought by an injured party, or both.

e. Any employee who has reason to believe that he or she may have been discriminated against in violation of this subdivision may bring a proceeding in accordance with the provisions of article fifteen of the executive law.

§ 2801-e. Voluntary residential health care facility rightsizing demonstration program. 1. The voluntary residential health care facility rightsizing demonstration program is intended to be a flexible and innovative approach to dealing with excess capacity in residential health care facilities due to changes in care delivery and other factors. The demonstration is designed to promote the development of less restrictive and less institutional long-term care programs and services; discourage inappropriate nursing home placements; generate medicaid savings to the state and localities; and assist residential health care facilities with the financial implications of declining occupancies.

2. Notwithstanding any inconsistent provision of law or regulation to the contrary, a residential health care facility, as defined in section twenty-eight hundred one of this article, may apply to temporarily decertify or permanently convert a portion of its existing certified beds to another type of program or service under the voluntary residential health care facility rightsizing demonstration program. The commissioner may approve temporary decertifications and permanent conversions of beds totaling no more than five thousand residential health care facility beds on a statewide basis under this program. Such approvals shall reflect, to the extent practicable, participation by a variety of residential health care facilities based on geography, size and other pertinent factors.

3. For this purpose, a residential health care facility may submit, in a format and within timeframes specified by the commissioner, an application to temporarily decertify beds, or to permanently convert beds under this demonstration. Each such application shall include an estimate of the cost savings to the Medicaid program that would result from the proposal within the applicant facility. The commissioner shall begin soliciting applications within one hundred eighty days of the effective date of this section, provided however that multiple solicitations for proposals may be issued. In considering such applications, the commissioner shall take into account:

- (a) the potential for improved quality of care and quality of life for consumers;

- (b) the likelihood that the proposal would result in cost savings to the Medicaid program;

- (c) residential health care facility capacity and estimated public need in the planning area in which the applicant is located;

- (d) the availability of less restrictive and less institutional long-term care programs and services, as defined in this section, in the planning area; and

- (e) the potential for improving the financial viability of the applicant facility or facilities.

4. Any reductions in the number of operational residential health care

facility beds resulting from this demonstration shall not be considered to create additional public need for residential health care facility beds under this article.

5. (a) Subject to the approval of the commissioner and the director of the budget, a residential health care facility may temporarily decertify beds for up to five years. Such beds will remain on the facility's license during and after the five-year period. Temporarily decertified beds may, with the prior approval of the commissioner and the director of the budget be reactivated in whole or in part at any time on or after one year after the effective date of temporary decertification by the facility and may be reactivated with the prior approval of the commissioner and the director of the budget after the five-year period has ended. A residential health care facility that reactivates temporarily decertified beds may not temporarily decertify such beds again during the demonstration. The commissioner may require the immediate reactivation of such beds if necessary to respond to emergency situations and/or facility closures. In the event the commissioner requires such reactivation, the prohibition on temporarily decertifying beds after a reactivation of beds shall not apply.

(b) Notwithstanding any inconsistent provision of law or regulation to the contrary, for purposes of determining medical assistance payments by government agencies for residential health care facility services provided pursuant to title eleven of article five of the social services law for facilities that have temporarily decertified beds:

(i) the facility's capital cost reimbursement shall be adjusted to appropriately take into account the new bed capacity of the facility;

(ii) the facility's peer group assignment for indirect cost reimbursement shall be based on its total certified beds less the number of beds that have been temporarily decertified; and

(iii) the facility's vacancy rate shall be calculated on the basis of its total certified beds less the number of beds that have been temporarily decertified for purposes of determining eligibility for payments for reserved bed days for residents of residential health care facilities, provided, however, that such payments for reserved bed days for facilities that have temporarily decertified beds shall be in an amount that is fifty percent of the otherwise applicable payment amount

for such beds.

6. (a) Subject to the approval of the commissioner, a residential health care facility may permanently convert beds to less restrictive and less institutional long-term care beds, units or slots, including, but not limited to, assisted living program, adult care facility, adult day health care, long-term home health care program and managed long-term care demonstration beds, units or slots. For this purpose, residential health care facility beds may be converted to beds, units or slots in the selected program or service on a one-to-one or other ratio or basis. A residential health care facility that permanently converts beds under this subdivision relinquishes its license for the converted beds.

(b) If the facility seeks to permanently convert beds and neither the facility nor its sponsoring organization is licensed to provide the program or service, it must obtain the written approval of the public health council, if required, pursuant to section twenty-eight hundred one-a of this article or article thirty-six of this chapter to initiate the new program or service.

(c) The commissioner may, as necessary, waive existing methodologies for determining public need under this article, article thirty-six of this chapter and article seven of the social services law, as well as enrollment limitations under section forty-four hundred three-f of this chapter, to accommodate permanent conversions of beds to other programs or services on the basis that any such increases in capacity are linked to commensurate reductions in the number of residential health care facility beds.

(d) For purposes of adjusting the capital component of residential health care facility rates of payment determined pursuant to this article for facilities that have permanently converted beds, the commissioner shall appropriately take into account the new bed capacity of the facility.

7. No later than January first, two thousand seven, the commissioner shall provide the governor, the majority leader of the senate and the speaker of the assembly with a written evaluation of the program. Such evaluation shall address the overall effectiveness of the program in

reducing costs, encouraging placements in appropriate long-term care settings and enhancing the availability of less restrictive and less institutional long-term care programs and services, and contain recommendations relative to extending and/or expanding the program.

§ 2801-f. Residential health care facility quality incentive payment program. Subject to amounts appropriated for the residential health care facility quality incentive payment program, the department may make a payment to operators of residential health care facilities, located in social services districts which do not include a city with a population of over one million persons, that are in compliance with applicable statutes and regulations in order to enhance the quality of patient care and patient safety. Provided that prior to receiving quality incentive payment program funds, the facility shall submit an expenditure plan to the department. Such plan shall detail how the quality incentive payment program funds will be used to improve the physical environment of the facility or the quality of care and services rendered to residents.

§ 2801-g. Community forum on hospital closure. 1. No later than thirty days after the closure of a general hospital, the commissioner shall hold a public community forum for the purpose of obtaining public input concerning the anticipated impact of the general hospital's closure on access to health care services by members of the surrounding community, including but not limited to recipients of medical assistance for needy persons, the uninsured, and underserved populations, and options and proposals to ameliorate such anticipated impact. The commissioner shall afford community members, health care providers, labor unions, payers, businesses and consumers a reasonable opportunity to speak about relevant matters at such community forum.

2. No later than sixty days after holding a community forum pursuant to subdivision one of this section, the commissioner shall make available to the public on the department's website information regarding:

(a) the anticipated impact of the general hospital's closure on access

to health care services by members of the surrounding community, including but not limited to recipients of medical assistance for needy persons, the uninsured, and underserved populations;

(b) specific measures the department and other parties have taken or will take to ameliorate such anticipated impact; and

(c) any further recommendations regarding access to health care services in communities impacted by the general hospital's closure.

3. A community forum conducted pursuant to this section shall be held at a location within a reasonable proximity to the general hospital subject to closure, and shall be announced no less than ten days prior to the date of such community forum.

4. At least thirty days prior to a general hospital applying to the federal centers for medicare and medicaid services to convert from a general hospital with inpatients to a rural emergency hospital under 42 USC 1395x(kkk), or successor provisions, such hospital shall hold a public community forum for the purpose of obtaining public input concerning the anticipated impact of the hospital's closure of inpatient units, including but not limited to, the impact on recipients of medical assistance for needy persons, the uninsured, people with disabilities, and medically underserved populations, and options and proposals to ameliorate such anticipated impact. The hospital shall notify health care providers, labor unions, the congressional representative for the district in which the facility is located, the county executive of the county in which the facility is located, and the state senator and assembly member representing the area within which the facility is located of the date, time, and location of the community forum. The hospital shall afford all public participants a reasonable opportunity to speak about relevant matters at such community forum. Prior to any community forum and as soon as practicable, the hospital shall be required to:

(a) notify the office of mental health and the local director of community services in the event such general hospital has psychiatric inpatient beds licensed under article thirty-one of the mental hygiene law or designated pursuant to section 9.39 of the mental hygiene law, and

(b) notify the office of addiction services and supports in the event such general hospital has inpatient substance use disorder treatment programs or inpatient chemical dependence treatment programs licensed under article thirty-two of the mental hygiene law. The commissioner shall also accept comments submitted in writing at such public forum and by mail within at least two weeks following the community forum.

§ 2801-h. Personal caregiving visitors for nursing home residents during public health emergencies. 1. As used in this section, the following terms have the following meanings:

(a) "personal caregiving visitor" means a family member, close friend, or legal guardian of a resident designated by the resident or the resident's lawful representative to assist with personal caregiving or compassionate caregiving for the resident;

(b) "personal caregiving" means care and support of a resident by a personal caregiving visitor that is provided to benefit such resident's mental, physical, or social well-being;

(c) "compassionate caregiving" means personal caregiving that is provided in anticipation of the end of a resident's life or in the instance of significant mental, physical, or social decline or crisis of a resident;

(d) "resident" means a resident of a nursing home; in relation to a personal caregiving visitor, "resident" means the resident to whom the personal caregiving visitor has been designated to assist with personal caregiving or compassionate caregiving; and

(e) "visit" includes assisting with personal caregiving or compassionate caregiving for a resident.

2. During a public health emergency declared under section twenty-four or section twenty-eight of the executive law personal caregiving visitors may visit residents of nursing homes, in compliance with federal law and regulations and state regulations made under this section. Nursing homes shall admit any personal caregiving visitor who is in compliance with applicable requirements under this section.

3. The commissioner shall make regulations under this section which

shall:

(a) require nursing homes to allow personal caregiving visitors to visit residents subject to this section;

(b) set forth procedures for the designation of personal caregiving visitors by residents or resident's lawful representatives, which: (i) shall include documentation of each designated personal caregiving visitor in the facility records; (ii) shall include procedures to ensure that the preferences of the resident regarding the designation of a personal caregiving visitor are respected; and (iii) may include, in appropriate circumstances, requiring a health or mental health professional licensed or certified under the education law to state that the personal caregiving will substantially benefit the resident's mental, physical, or social well-being. A nursing home shall not require that the health professional be affiliated with such nursing home;

(c) set forth procedures for changing a personal caregiving visitor designation;

(d) provide that a resident shall be entitled to designate at least two personal caregiving visitors;

(e) provide that personal caregiving visitors shall be exempt from prohibitions on visiting residents at nursing homes, subject to the limitations and requirements of this section;

(f) set forth the circumstances under which visiting by personal caregiving visitors may be temporarily limited or suspended at a nursing home to protect the health, safety and welfare of residents, including, but not limited to, local infection rates, temporary inadequate staff capacity, or an acute emergency situation;

(g) require, at a minimum, that all personal caregiving visitors follow safety protocols which may include, but need not be limited to:

(i) testing for communicable diseases;

(ii) checking body temperature upon entry into the nursing home;

(iii) health screenings upon entry into the nursing home;

(iv) appropriate use of personal protective equipment;

(v) social distancing (except as necessary for personal caregiving by the personal caregiving visitor for the resident); and

(vi) any other requirement the department deems appropriate;

(h) set forth standards for frequency and duration of visits by personal caregiving visitors at nursing homes;

(i) set forth standards for limiting the total number of personal caregiving visitors for a resident and/or limiting the total number of personal caregiving visitors allowed to visit a nursing home at any one time based on the circumstances of the residents and the nursing home;

(j) require personal caregiving and compassionate caregiving to be documented in the resident's individualized comprehensive plan of care; and

(k) make appropriate provisions for compassionate caregiving.

4. The department shall post the requirements consistent with regulations, on its website, including any requirements as to time periods and region.

5. This section does not require the medical assistance program to cover personal caregiving or compassionate caregiving and such caregiving shall not be reimbursed under the medical assistance program.

6. This section does not relieve any nursing home, or nursing home operator or administrator, of any obligation or responsibility imposed by any other applicable law or regulation.

7. Nothing in this section shall be construed to limit access by any visitor to a facility that would otherwise be permitted under federal or state law or regulation.

§ 2802. Approval of construction. The construction of a hospital, whether public or private, incorporated or not incorporated, shall require the prior approval of the commissioner.

1. An application for such construction shall be filed with the department, together with such other forms and information as shall be prescribed by, or acceptable to, the department. Thereafter the department shall forward a copy of the application and accompanying documents to the public health and health planning council and the health systems agency, if any, having geographical jurisdiction of the area where the hospital is located.

1-a. The following types of construction projects by a hospital possessing a valid operating certificate shall not require prior approval pursuant to this section, provided that a written notice has been submitted to the department together with, where appropriate, a written architect and/or engineering certification that the project meets the applicable statutes, codes and regulations specified in the certification statement and, where required by the department, the hospital shall implement a plan to protect patient safety during construction:

(a) correction of cited deficiencies, provided that the construction is limited to the correction of the deficiencies and is authorized by a plan of correction approved by the department;

(b) repair or maintenance, regardless of cost, including routine purchases and the acquisition of minor equipment undertaken in the course of a hospital's inventory control functions; provided that for projects under this paragraph with a total cost of up to six million dollars, no written notice shall be required;

(c) non-clinical infrastructure projects regardless of cost including, but not limited to, replacement of heating, ventilating and air conditioning systems, roofs, fire alarm and call bell systems, parking lots and elevators;

(d) one for one equipment replacements regardless of cost, including replacement of equipment with another piece of equipment used for similar purposes but employing current technology; and

(e) other projects as specified in regulations adopted by the council and approved by the commissioner.

1-b. The commissioner is authorized to waive any requirement for pre-opening certifications and/or surveys for construction projects approved in accordance with this section.

2. The commissioner shall not act upon an application for construction of a hospital until the public health and health planning council and the health systems agency have had a reasonable time to submit their recommendations, and unless (a) the applicant has obtained all approvals and consents required by law for its incorporation or establishment

(including the approval of the public health and health planning council pursuant to the provisions of this article) provided, however, that the commissioner may act upon an application for construction by an applicant possessing a valid operating certificate when the application qualifies for review without the recommendation of the council pursuant to regulations adopted by the council and approved by the commissioner, or as otherwise authorized by this section; and (b) the commissioner is satisfied as to the public need for the construction, at the time and place and under the circumstances proposed, provided however that, in the case of an application by a hospital established or operated by an organization defined in subdivision one of section four hundred eighty-two-b of the social services law, the needs of the members of the religious denomination concerned, for care or treatment in accordance with their religious or ethical convictions, shall be deemed to be public need.

2-a. The council shall afford the applicant an opportunity to present information in person concerning an application to a committee designated by the council.

2-b. Beginning on January first, nineteen hundred ninety-four, and each year thereafter, a complete application received between January first and June thirtieth of each year shall be reviewed by the appropriate health systems agency and the department and presented to the public health and health planning council for its consideration prior to June thirtieth of the following year and a complete application received between July first and December thirty-first of each year shall be reviewed by the appropriate health systems agency and the department and presented to the public health and health planning council for consideration prior to December thirty-first of the following year.

2-c. An application for the relocation of long-term ventilator beds from one residential health care facility to another residential health care facility with common ownership shall be subject, as determined by the commissioner, to either an administrative or limited review by the department. Common ownership shall be found when the ownership or controlling interest in the operator of each residential health care

facility is the same, provided the percentage of ownership interest of each owner may vary between the two facilities but must meet the whole in common ownership. For purposes of this subdivision, the commissioner, when making a determination of public need, may consider access to long-term ventilator beds in the affected portions of the health systems region, and the quality of care provided at the facilities with common ownership. At no time shall an application submitted pursuant to this subdivision result in a change in the total combined number of long-term ventilator and residential health care facility beds, including residential health care facility beds converted from transferred long-term ventilator beds, operated by the two facilities with common ownership.

3. Subject to the provisions of paragraph (b) of subdivision two, the commissioner in approving the construction of a hospital shall take into consideration and be empowered to request information and advice as to (a) the availability of facilities or services such as preadmission, ambulatory or home care services which may serve as alternatives or substitutes for the whole or any part of the proposed hospital construction;

(b) the need for special equipment in view of existing utilization of comparable equipment at the time and place and under the circumstances proposed;

(c) the possible economies and improvements in service to be anticipated from the operation of joint central services including, but not limited to laboratory, research, radiology, pharmacy, laundry and purchasing;

(d) the adequacy of financial resources and sources of future revenue; and

(e) whether the facility is currently in substantial compliance with all applicable codes, rules and regulations, provided, however, that the commissioner shall not disapprove an application solely on the basis that the facility is not currently in substantial compliance, if the application is specifically:

(i) to correct life safety code or patient care deficiencies;

(ii) to correct deficiencies which are necessary to protect the life, health, safety and welfare of facility patients, residents or staff;

(iii) for replacement of equipment that no longer meets the generally accepted operational standards existing for such equipment at the time it was acquired; and

(iv) for decertification of beds and services.

3-a. Review of applications from hospitals in epidemic areas and hospitals serving state correctional facilities to renovate or provide for capital improvement for the purpose of controlling the spread of tuberculosis infection may be approved by the commissioner, who to the extent practicable may, but shall not be required to, consider the recommendations of the health systems agency and the public health and health planning council for applications for which he grants approval. In such cases the commissioner shall take further measures necessary to expedite departmental reviews for such approval.

3-b. Review of applications from rural hospitals seeking approval in the swing bed program, authorized pursuant to section twenty-eight hundred three of this article, may be approved by the commissioner who, to the extent practicable, may consider the recommendations of the respective health systems agency. In such cases, the commissioner shall take further measures necessary to expedite departmental reviews for such approval.

3-c. An application shall state the proposed site or location of the proposed construction. Where the applicant changes the site or location after approval of the application, the commissioner may, subject to regulations under this article, approve the change upon a finding that the change is in the best interest of the service area. In making such determination, the commissioner may seek a review of the proposed change by the public health and health planning council and the health systems agency having geographical jurisdiction.

4. No government agency shall construct any hospital without securing the written approval of the commissioner in accordance with the applicable requirements and procedures of the preceding subdivisions.

5. If the commissioner proposes to disapprove an application for

construction of a hospital, he shall afford the applicant an opportunity to request a public hearing. The commissioner shall not take any action contrary to the advice of the health systems agency until he affords an opportunity to the agency to request a public hearing and, if so requested, a public hearing shall be held.

6. The commissioner, on his own motion, may hold a public hearing on an application for construction of a hospital.

7. (a) The commissioner shall charge to applicants for construction of hospitals the following fees and charges for administrative services so as to recover departmental costs in performing these functions. Each applicant for construction of a hospital shall pay to the department an application fee of two thousand dollars, provided, however, that diagnostic and treatment centers designated by the commissioner as safety net diagnostic and treatment centers, as defined in paragraph (c) of subdivision sixteen of section twenty-eight hundred one-a of this article, shall pay a fee of one thousand two hundred fifty dollars.

(b) At such time as the commissioner's written approval of the construction is granted, each applicant shall pay the following additional fee:

(i) for hospital, nursing home and diagnostic and treatment center applications that require approval by the council, the additional fee shall be fifty-five hundredths of one percent of the total capital value of the application, provided however that applications for construction of a safety net diagnostic and treatment center, as defined in paragraph (c) of subdivision sixteen of section twenty-eight hundred one-a of this article, shall be subject to a fee of forty-five hundredths of one percent of the total capital value of the application; and

(ii) for hospital, nursing home and diagnostic and treatment center applications that do not require approval by the council, the additional fee shall be thirty hundredths of one percent of the total capital value of the application, provided however that safety net diagnostic and treatment center applications, as defined in paragraph (c) of subdivision sixteen of section twenty-eight hundred one-a of this article, shall be subject to a fee of twenty-five hundredths of one percent of the total capital value of the application.

(c) The commissioner is authorized to establish reduced fees for applications subject to limited review, as described in regulation, that do not require review by the council.

(d) The fees and charges paid by an applicant pursuant to this subdivision for any application for construction of a hospital approved in accordance with this section shall be deemed allowable capital costs in the determination of reimbursement rates established pursuant to this article. The cost of such fees and charges shall not be subject to reimbursement ceiling or other penalties used by the commissioner for the purpose of establishing reimbursement rates pursuant to this article. All fees pursuant to this section shall be payable to the department of health for deposit into the special revenue funds - other, miscellaneous special revenue fund - 339, certificate of need account.

§ 2802-a. Transitional care unit demonstration program. 1.

Notwithstanding any other provision of law to the contrary, the commissioner is authorized to approve up to eighteen general hospitals within the state to operate transitional care units by and within such general hospitals. For purposes of this section, "transitional care" shall mean sub acute care services provided to patients of a general hospital who no longer require acute care general hospital inpatient services, but continue to need specialized medical, nursing and other hospital ancillary services and are not yet appropriate for discharge.

2. In order to receive approval from the commissioner to operate a transitional care unit and to provide transitional care services, a general hospital shall file an application on forms prescribed by or acceptable to the commissioner.

(a) The commissioner shall act upon such applications in a manner consistent with section twenty-eight hundred two of this article provided that the commissioner may not waive review and recommendation by the public health and health planning council. In the public health and health planning council's evaluation of applications and the commissioner acting upon such applications, priority shall be given to applicants who have a memorandum of understanding or other cooperative agreement with one or more skilled nursing facilities located within

their service area. Further, in the public health and health planning council evaluating applications and the commissioner acting upon such applications, consideration shall also be given to the geographic distribution of applicants throughout the state, so that applications may be approved from the various geographic regions of the state.

(b) The care provided in a transitional care unit shall be limited in duration and designed to resolve a patient's sub acute care medical problems and result in the timely and appropriate discharge of such a patient to a home, residential health care facility or other appropriate setting.

(c) In order to be approved to operate a transitional care unit and to provide transitional care services, an applicant must comply with and meet all applicable requirements of and conditions of participation under title XVIII of the federal Social Security Act (Medicare).

3. The commissioner shall report to the governor and the legislature concerning the implementation of this section and the operation of transitional care units within three years after the effective date of this section.

§ 2802-b. Health equity impact assessments. 1. Definitions. As used in this section:

(a) "Application" means an application under this article for the construction, establishment, change in the establishment, merger, acquisition, elimination or substantial reduction, expansion, or addition of a hospital service or health-related service of a hospital that requires review or approval by the council or the commissioner, where the application is filed or submitted to the council, the commissioner or the department after this section takes effect. Provided, however, that an application for the change in the establishment, merger or acquisition of a hospital shall not be included in this definition if the application would not result in the elimination, or substantial reduction, expansion, addition or change in location of a hospital service or health related service of the hospital.

(b) "Project" means the construction, establishment, change in the

establishment, merger, acquisition, elimination, or substantial reduction, expansion, or addition of a hospital service or health-related service of a hospital that is the subject of an application.

(c) "Health equity impact assessment" or "impact assessment" means an assessment of whether, and if so how, a project will improve access to hospital services and health care, health equity and reduction of health disparities, with particular reference to members of medically underserved groups, in the applicant's service area.

(d) "Medically underserved group" means: low-income people; racial and ethnic minorities; immigrants; women; lesbian, gay, bisexual, transgender, or other-than-cisgender people; people with disabilities; older adults; persons living with a prevalent infectious disease or condition; persons living in rural areas; people who are eligible for or receive public health benefits; people who do not have third-party health coverage or have inadequate third-party health coverage; and other people who are unable to obtain health care.

2. (a) (i) Every application shall include a health equity impact assessment of the project. The health equity impact assessment shall be filed together with the application, and the application shall not be complete without the impact statement. The applicant shall promptly amend or modify the impact statement as necessary.

(ii) However, in the case of a diagnostic and treatment center whose patient population is over fifty percent combined patients enrolled in Medicaid or uninsured, a health equity impact assessment is not required unless the application includes a change in controlling person, principal stockholder, or principal member (as defined in section twenty-eight hundred one-a of this article) of the applicant.

(b) In considering whether and on what terms to approve an application, the commissioner and the council, as the case may be, shall consider the health equity impact statement.

3. Scope and contents of a health equity impact assessment. A health equity impact assessment shall include:

(a) A demonstration of whether, and if so how, the proposed project will improve access to hospital services and health care, health equity

and reduction of health disparities, with particular reference to members of medically underserved groups, in the applicant's service area.

(b) The extent to which medically underserved groups in the applicant's service area use the applicant's hospital or health-related services or similar services at the time of the application and the extent to which they are expected to if the project is implemented.

(c) The performance of the applicant in meeting its obligations, if any, under section twenty-eight hundred seven-k of this article and federal regulations requiring providing uncompensated care, community services, and access by minorities and people with disabilities to programs receiving federal financial assistance, including the existence of any civil rights access complaints against the applicant, and how the applicant's meeting of these obligations will be affected by implementation of the project.

(d) How and to what extent the applicant will provide hospital and health-related services to the medically indigent, Medicare recipients, Medicaid recipients and members of medically underserved groups if the project is implemented.

(e) The amount of indigent care, both free and below cost, that will be provided by the applicant if the project is approved.

(f) Access by public or private transportation, including applicant-sponsored transportation services, to the applicant's hospital or health-related services if the project is implemented.

(g) The means of assuring effective communication between the applicant's hospital and health-related service staff and people of limited English-speaking ability and those with speech, hearing or visual impairments handicaps if the project is implemented.

(h) The extent to which implementation of the project will reduce architectural barriers for people with mobility impairments.

(i) A review of how the applicant will maintain or improve the quality of hospital and health-related services including a review of:

(i) demographics of the applicant's service area;

(ii) economic status of the population of the applicant's service area;

(iii) physician and professional staffing issues related to the project;

(iv) availability of similar services at other institutions in or near the applicant's service area; and

(v) historical and projected market shares of hospital and health care service providers in the applicant's service area.

(j) The extent to which the availability and provision of reproductive health services and maternal health care in the applicant's service area will be affected if the project is implemented. Applicants shall demonstrate how the project will impact the delivery of statutorily protected reproductive health care, pursuant to section twenty-five hundred ninety-nine-aa of this chapter, and maternity services.

4. The health equity impact assessment shall be prepared for the applicant by an independent entity and include the meaningful engagement of public health experts, organizations representing employees of the applicant, stakeholders, and community leaders and residents of the applicant's service area.

5. The department shall publicly post the application and the health equity impact assessment on its website within one week of the filing with the department, including any filing with the council. The applicant shall publicly post the application and the health equity impact assessment on its website within one week of acknowledgement by the department.

§ 2803. Commissioner and council; powers and duties. 1. (a) The commissioner shall have the power to inquire into the operation of hospitals and to conduct periodic inspections of facilities with respect to the fitness and adequacy of the premises, equipment, personnel, rules and by-laws, standards of medical care, hospital service, including health-related service, system of accounts, records, and the adequacy of financial resources and sources of future revenues. The commissioner or persons designated by him shall conduct at least one unannounced comprehensive inspection of each residential health care facility not later than fifteen months after the previous such inspection to determine the adequacy of care being rendered. Such comprehensive inspection shall include, but not be limited to, a survey to determine

compliance by the facility with applicable statutes and regulations, and observation of a representative sample of all patients or residents and their medical records to determine the quality and adequacy of the care and treatment provided. Additional visits shall be made to facilities as needed to determine whether violations or deficiencies have been corrected, to investigate any report made pursuant to section twenty-eight hundred three-d of this article or any other complaint, and for any other purpose deemed necessary and appropriate by the commissioner. Any employee of the department who gives or causes to be given advance notice of such unannounced inspection to any unauthorized person shall, in addition to any other penalty provided by law, be suspended by the commissioner from all duties without pay for at least five days or for such greater period of time as the commissioner shall determine. Any such suspension shall be made by the commissioner in accordance with all other applicable provisions of law.

(b) The purpose of such inspection shall be to determine compliance by residential health care facilities with statutes, and with regulations promulgated under the provisions of those statutes, governing minimum standards of construction, quality and adequacy of care, rights of patients, rates of payment and reimbursement. At least one such inspection every fifteen months shall include, but shall not be limited to, full on-site examination of the medical, nursing care, dietary and social services records of the facility.

(c) The commissioner shall establish, in consultation with the state office for the aging, a consumer information system for residential health care facilities with respect to their compliance with the standards set forth in this section designed to provide accurate and comprehensible information to consumers on the quality of facilities which shall incorporate a summary of the findings and results of the inspections conducted pursuant to the provisions of this section. Such summary of results and findings shall include, but need not be limited to, a listing of areas in which items were found at the time of such inspections to be not in compliance with such standards and the nature of such non-compliance. Each residential health care facility shall be issued a summary of the findings of inspections of such facility conducted since the issuance of the previous summary of findings, which shall be posted conspicuously within such facility, and any other

information relating to the facility available through the consumer information system. The commissioner shall promulgate rules and regulations necessary to implement the provisions of this paragraph. A facility may appeal the accuracy of a summary findings to the commissioner within twenty days after receipt of such summary. The results and findings of any prior inspections, and any penalties thereby assessed, which have not been previously appealed and overruled, shall not be subject to review.

(d) (i) Notwithstanding any inconsistent provision of law, the commissioner or his designee shall determine the necessity and appropriateness of care and services provided by hospitals to patients eligible for medical assistance pursuant to title eleven of article five of the social services law and shall further determine whether a general hospital has taken an action that results in the admission of patients unnecessarily, unnecessary multiple admissions of the same patients, inappropriate discharge of patients, inappropriate transfer of patients between hospitals or between distinct units of a hospital, inappropriate diagnosis-related group coding, or other inappropriate medical or other practices with respect to hospitalized inpatients eligible for medical assistance pursuant to title eleven of article five of the social services law. In making such determinations the commissioner may utilize the services of department personnel or other authorized representatives. The hospitals shall provide such information, facilities and services as may be required by the commissioner to make such determinations. The commissioner, in implementing this paragraph, shall adopt necessary rules and regulations including but not limited to those for determining the necessity or appropriate level of admission, controlling the length of stay, the provision of surgery and other services, and the methods and procedures for making such determinations.

(ii) In the event the commissioner or his designee makes a determination pursuant to this paragraph that a general hospital or physician has taken an inappropriate action resulting in a denial or adjustment of payment determined in accordance with section twenty-eight hundred seven-c of this article, the general hospital or physician which is the subject of such determination shall be entitled to a review before the commissioner or an appeal agent designated for such purposes by the commissioner at which such hospital or physician may challenge

such determination. In order to be entitled to such review, such hospital or physician must provide the commissioner or his designee, as appropriate, with a written request for such review within thirty days of receipt of the written determination. During such review, the hospital or physician may present documentation or evidence in support of its challenge to the determination, and representatives of the commissioner or his designee may present documentation or evidence in support of the determination. In the event that the determination is sustained, the hospital or physician may seek judicial review of the decision pursuant to article seventy-eight of the civil practice law and rules.

(iii) The commissioner shall certify to the social services officials responsible for making payments for authorized hospital services that specified items of care and services for specified individuals eligible for medical assistance pursuant to title eleven of article five of the social services law are inappropriate or unnecessary and are not authorized for payment or are authorized for payment at the appropriate level of care under the medical assistance program and, for general hospitals, for rate periods beginning on or after January first, nineteen hundred eighty-eight through March thirty-first, nineteen hundred ninety-seven, at the appropriate case based rate of payment determined pursuant to section twenty-eight hundred seven-c of this article.

(e) Notwithstanding any inconsistent provision of law, the commissioner or his designee shall, not later than July first, nineteen hundred seventy-six, determine on an individual patient basis whether identifiable periods of in-patient care in a general hospital are required beyond the maximum length of stay established pursuant to section three hundred sixty-five-a of the social services law, and whether deferral of surgical procedures specified by such commissioner in accordance with paragraph (c) of subdivision five of such section may jeopardize life or essential function, or cause severe pain. In making such determinations the commissioner may utilize the services of department personnel or other authorized representatives. The hospitals shall provide such information, facilities and services as may be required by the commissioner to make such determinations. The commissioner, in implementing this paragraph, shall adopt necessary

rules and regulations including but not limited to the methods and procedures for making such determinations and the utilization of any department staff or other authorized representatives located at such hospital in performing other functions relating to assuring that public funds for medical assistance are utilized exclusively to provide items of care and services in amount, duration and scope specifically authorized under the medical assistance program. The commissioner shall certify to the social services officials responsible for making payments for authorized hospital services that specified items of care and services for specified individuals are not authorized for payment under the medical assistance program.

(f) Notwithstanding any inconsistent provision of law, the commissioner shall establish standards for determining the necessity of care and service for alcoholism and alcohol abuse provided by hospitals. In implementing this paragraph the commissioner, in consultation with the director of the division of alcoholism and alcohol abuse, shall adopt necessary rules and regulations including but not limited to those for determining the necessity or appropriate level of admission, controlling the length of stay, the provision of services and establishing the methods and procedures for making such determinations.

(g) The commissioner shall require that every general hospital adopt and make public an identical statement of the rights and responsibilities of patients, in accordance with applicable law, including, but not limited to:

(i) a patient complaint and quality of care review process;

(ii) a right to receive all information necessary to give informed consent for any proposed intervention, procedure, or treatment, including information regarding the foreseeable and clinically significant risks and benefits of the proposed intervention, procedure, or treatment;

(iii) a right to receive complete information regarding the patient's condition, prognosis, and clinical indications for the proposed intervention, procedure, or treatment;

(iv) a right to receive information regarding alternative treatment options including the foreseeable and clinically significant risks and benefits of such alternative treatment options, taking into consideration any known preconditions;

(v) a right to be informed of the name, position, and functions of any persons, including medical students and physicians exempt from New York state licensure pursuant to section sixty-five hundred twenty-six of the education law, who provide face-to-face care to or direct observation of the patient;

(vi) a right to refuse the proposed intervention, procedure, or treatment and to be informed of the clinical effects of such refusal;

(vii) a right to meaningfully engage and participate in the informed consent process, which shall mean, but not be limited to, affording the patient or their representative time to ask questions and have them answered satisfactorily to the extent reasonable;

(viii) a right to be informed of any human subjects research that the attending physician taking care of the patient participates in and may directly affect a procedure or treatment to be received by the patient, and to provide voluntary written informed consent to participate, should the patient be an appropriate candidate for such human subjects research in the clinical judgment of the attending physician. The informed consent referred to here shall conform with federal requirements regarding protection for human research subjects, and any other applicable laws or regulations;

(ix) a right to an appropriate patient discharge plan; and

(x) for patients other than beneficiaries of title XVIII of the federal social security act (medicare), a right to a discharge review in accordance with section twenty-eight hundred three-i of this article. The form and content of such statement shall be determined in accordance with rules and regulations adopted by the council and approved by the commissioner. A patient who requires continuing health care services in accordance with such patient's discharge plan may not be discharged until such services are secured or determined by the hospital to be reasonably available to the patient. Each general hospital shall give a copy of the statement to each patient, or the appointed personal representative of the patient at or prior to the time of admission to the general hospital, as long as the patient or the appointed personal representative of the patient receives such notice no earlier than fourteen days before admission. Such statement shall also be conspicuously posted by the hospital and shall be a part of the patient's admission package. Nothing herein contained shall be construed

to limit any authority vested in the commissioner pursuant to this article related to the operation of hospitals and care and services provided to patients.

* (h) Every hospital providing treatment to alleged victims of family offenses as defined in article eight of the family court act and section 530.11 of the criminal procedure law shall be responsible for providing a copy of a notice to victims of family offenses as described in section eight hundred twelve of the family court act and subdivision six of section 530.11 of the criminal procedure law. The commissioner shall promulgate such rules and regulations as may be necessary and proper to carry out effectively the provisions of this paragraph.

* NB There are 2 (h)'s

* (h) The statement regarding patient rights and responsibilities which the commissioner shall approve as provided under paragraph (g) of this subdivision shall include a provision stating that every patient shall have the right to authorize those family members and other adults who will be given priority to visit consistent with the patient's ability to receive visitors.

* NB There are 2 (h)'s

(i) The statement regarding patient rights and responsibilities, required pursuant to paragraph (g) of this subdivision, shall include provisions informing the patient of his or her right to make organ, tissue or whole body donations, and the means by which the patient may make such a donation. The commissioner shall promulgate any rules and regulations necessary to implement the provisions of this paragraph.

* (j) As used with regard to applicable regulations issued by the department implementing the statement regarding patient rights and responsibilities required pursuant to paragraph (g) of this subdivision, the term "itemized bill" shall, for all periods on and after January first, two thousand eleven, be defined as reflecting a charges schedule developed by each hospital for all ancillary patient services, which schedule shall set forth separate charges for each ancillary service provided.

* NB There are 2 (j)'s

* (j) The commissioner shall require that the statement regarding patient rights and responsibilities, described in paragraph (g) of this subdivision, shall include a provision informing the patient of his or

her right to not be discriminated against on account of age.

* NB There are 2 (j)'s

(k) The statement regarding patient rights and responsibilities, required pursuant to paragraph (g) of this subdivision, shall include provisions informing the patient of his or her right to choose to submit surprise bills or bills for emergency services to the independent dispute process established in article six of the financial services law, and informing the patient of his or her right to view a list of the hospital's standard charges and the health plans the hospital participates with consistent with section twenty-four of this chapter.

(l) The statement regarding patient rights and responsibilities, required pursuant to paragraph (g) of this subdivision, shall include provisions informing the patient of his or her right to choose to identify a caregiver pursuant to article twenty-nine-cccc of this chapter.

2. (a) The council, by a majority vote of its members, shall adopt and amend rules and regulations, subject to the approval of the commissioner, to effectuate the provisions and purposes of this article, including, but not limited to:

(i) the establishment of requirements for a uniform statewide system of reports and audits relating to the quality of medical and physical care provided, hospital utilization, and costs in accordance with section twenty-eight hundred three-b of this article,

(ii) establishment by the department of schedules of rates, payments, reimbursements, grants and other charges for hospital and health-related services as provided in sections twenty-eight hundred seven, twenty-eight hundred seven-a, twenty-eight hundred seven-c and twenty-eight hundred eight of this article. The schedules established shall be reasonable and adequate to meet the costs which must be incurred by efficiently and economically operated facilities. In adopting regulations related to the computation of general hospital inpatient payments, the council shall take into consideration the elements of cost, geographical differentials in the elements of cost considered, economic factors in the area in which the hospital is located, costs of hospitals of comparable size, and the need for incentives to improve services and institute economies. The council

shall exclude from consideration in the regulations adopted nonallowable costs such as the costs for research and those parts of the costs for educational salaries which the council determines to be not directly related to hospital service,

(iii) the identification of appropriate and reasonable standards for the development of acceptable collection procedures used by general hospitals in an effort to collect unpaid bills prior to the determination that the unpaid bill is a bad debt eligible for reimbursement consideration pursuant to paragraphs (e) and (f) of subdivision eight of section twenty-eight hundred seven-a or paragraph (b) of subdivision fourteen of section twenty-eight hundred seven-c and twenty-eight hundred seven-k of this article,

(iv) subject to the provisions of paragraph (e) of subdivision eleven of section twenty-eight hundred seven-a of this article or subdivision nine of section twenty-eight hundred seven-c of this article, the establishment of guidelines regarding the time to resolve appeals submitted by general hospitals. The council may consider different periods depending upon whether the basis for the appeal is related to a general hospital's existing costs or anticipated future costs,

(v) standards and procedures relating to hospital operating certificates, provided however, that the council shall establish minimum acceptable standards and procedures equal to the standards and procedures which federal law and regulation require for hospitals to qualify as providers pursuant to titles XVIII and XIX of the federal social security act. The existing state standards and procedures in effect on the date that this subdivision becomes effective shall be deemed to constitute maximum standards and procedures for purposes of limiting medical assistance reimbursement pursuant to the social services law. Such standards and procedures may thereafter be changed or added to by the council only upon the recommendation of the commissioner. For the purposes of ensuring that the health and safety of the residents of hospitals are not endangered, the council may promulgate changes in the minimum acceptable standards and procedures referred to herein upon recommendation of the commissioner, and

(vi) the establishment of a system of accounts and cost findings to be used by hospitals, including a classification of such hospitals and the prescription of a system of accounts and cost finding for each class in

accordance with sections twenty-eight hundred three-b and twenty-eight hundred five-a of this article.

(b) The commissioner may propose rules and regulations and amendments thereto for consideration by the council.

3. The commissioner may enter into contracts with any political subdivision, voluntary non-profit agency or health systems agency and such entities are authorized to enter into contracts with the commissioner to effectuate the purposes of this article, however, contracts with voluntary non-profit agencies may not provide for payment for general hospital out-patient and emergency services or for treatment or diagnostic center services unless the commissioner is satisfied that the costs incurred for such services are approvable pursuant to the provisions of section twenty-eight hundred seven of this article.

4. At the request of the commissioner, hospitals shall furnish to the department such reports and information as it may require to effectuate the provisions of this article.

5. The commissioner may institute or cause to be instituted in a court of competent jurisdiction proceedings to compel compliance with the provisions of this article or the determinations, rules, regulations and orders of the commissioner or the council.

6. The council, by a majority vote of its members and subject to the approval of the commissioner, shall adopt rules and regulations to establish (a) a system of penalties of up to one thousand dollars per day for continuing violations of rules and regulations promulgated pursuant to article twenty-eight of this chapter and pertaining to patient care by residential health care facilities, specifying the violations and the amount of the penalty to be assessed in connection with each such violation, and (b) a system by which the rate of payment approved for a residential health care facility pursuant to section twenty-eight hundred seven of this chapter and certified to the department of social services for purposes of reimbursement in the medical assistance program, is reduced in sufficient amount to collect such penalties. Any reduction of rate to collect penalties shall be

limited to five percent of the otherwise established per diem rate or that portion of the per diem rate which represents the owner's return on equity, as defined by regulation, whichever is less.

7. The commissioner shall have the power to assess penalties in accordance with the system of penalties adopted pursuant to subdivision six of this section and pursuant to a hearing conducted in accordance with section twelve-a of this chapter. No penalty shall be assessed pursuant to subdivision six of this section unless the facility has received at least thirty days written notice of the existence of the violation, the amount of the penalty for which it may become liable and the steps which must be taken to rectify the violation. If the facility fails to rectify the violation within said thirty day period, it shall thereafter be liable for such penalty. Any such penalties shall be subject to release and compromise by the commissioner in the same manner as a penalty provided by subdivision one of section twelve of this chapter. Any penalty assessed pursuant to subdivision six of this section shall be subject to recovery in the same manner as a penalty provided by subdivision one of section twelve of this chapter or pursuant to the system for reduction of the rate of payment to the facility adopted pursuant to clause (b) of subdivision six of this section. Any such penalty assessed pursuant to subdivision six of this section shall be additional and cumulative to all other penalties or remedies existing for violations of rules and regulations promulgated pursuant to article twenty-eight of this chapter. The provisions of this subdivision shall not be applicable to nor limit any power to assess penalties pursuant to section twelve of this chapter; provided, however, that if a penalty is assessed for a violation pursuant to this subdivision, no penalty shall be assessed for such violation pursuant to section twelve of this chapter, and if a penalty is assessed for a violation pursuant to section twelve of this chapter, no penalty shall be assessed for such violation pursuant to this subdivision.

8. (a) Notwithstanding any inconsistent provision of law, the commissioner shall establish procedures to be followed by hospitals for notification to mothers and reporting under section three hundred sixty-six-g of the social services law.

(b) Notwithstanding any inconsistent provision of section twelve of this chapter or any other law, the commissioner may impose a civil penalty of up to three thousand five hundred dollars for each violation of the requirements of subdivision one of section three hundred sixty-six-g of the social services law or the rules and regulations promulgated pursuant to such section, pertaining to reporting to the department, or such other entity designated by the department, of each live birth to a woman receiving medical assistance. Any such civil penalties shall be assessed subject to the applicable provisions of sections twelve and twelve-a of this chapter.

8-a. Notwithstanding any inconsistent provision of law to the contrary, the commissioner shall develop a program to facilitate the use of a triage system of care in emergency rooms of hospitals that are subject to the provisions of this article. In developing such program the commissioner shall consider the manner in which such a system would be coordinated, how such a system would provide greater efficiency, provide cost savings to public health programs and a higher quality of care. Within one year from the enactment of such program, the commissioner shall submit a report to the temporary president of the senate and the speaker of the assembly regarding: the impact of such a system on the cost of Medicaid covered services in the hospital setting; quality of care in facilities; along with any other data as may be appropriate.

9. (a) General hospitals shall, no later than April first, two thousand, submit to the commissioner a plan for compliance with part four hundred five of the official compilation of codes, rules and regulations of the state of New York regarding the working conditions of and limits on working hours for certain members of a hospital's medical staff and postgraduate trainees in such form and manner as specified by the commissioner.

(b) The commissioner shall audit each hospital for compliance with its plan and the applicable regulation on an annual basis. Based upon an initial written audit finding of noncompliance the commissioner shall assess a civil penalty of six thousand dollars for each instance of noncompliance identified in such initial audit.

(c) Within thirty days after the hospital's receipt of written notice of noncompliance the hospital shall submit a plan of correction in such form and manner as specified by the commissioner for achieving compliance with its plan and with the applicable regulations. The commissioner shall audit each such hospital for compliance with its plan and the applicable regulations within a reasonable time after submission of such plan of correction. Upon a written finding by the commissioner within one hundred eighty days of the initial audit finding of noncompliance that the hospital has failed to substantially adhere to its plan of correction the commissioner shall assess the hospital a civil penalty of twenty-five thousand dollars. Upon a further subsequent written finding by the commissioner within one hundred eighty days of the initial audit finding of noncompliance that the hospital has failed to substantially adhere to its plan of correction the commissioner shall assess the hospital a civil penalty of fifty thousand dollars. Upon each and every subsequent written finding by the commissioner within three hundred sixty days of the initial audit finding of noncompliance that the hospital has failed to substantially adhere to its plan of correction the commissioner shall assess the hospital a civil penalty of fifty thousand dollars.

(d) The penalties assessed pursuant to paragraph (c) of this subdivision shall be subject to the provisions of section twelve-a of this chapter.

(e) Hospitals shall submit to the commissioner any data necessary to perform audits pursuant to this subdivision. Any hospital which fails to produce data or documentation requested in furtherance of such audit within thirty days of such request may be assessed by the commissioner a civil penalty of ten thousand dollars.

10. (a) All civil penalties assessed and collected pursuant to section twelve of this chapter for violations of this article and regulations promulgated thereunder related to the operation of residential health care facilities, and all civil monetary penalties related to the operation of nursing facilities received from the federal government in accordance with subdivision (h) of section nineteen hundred nineteen of the federal social security act, shall be deposited by the commissioner and credited to the quality of care improvement account which shall be

established by the comptroller in the special revenue fund-other. To the extent of funds appropriated therefor, funds shall be made available to the department for expenditures related to the protection of the health or property of residents of residential health care facilities that are found to be deficient.

(b) Any funds available pursuant to paragraph (a) of this subdivision, not used for the purposes of paragraph (a) of this subdivision, shall be used, at the commissioner's discretion, to support activities and initiatives intended to improve resident quality of care at residential health care facilities found to be deficient, as well as for such other purposes as are described in this paragraph. Such activities may include, but are not limited to, relocation of residents to other facilities and the maintenance and operation of a facility pending correction of deficiencies or closure. The commissioner may also make grants to residential health care facilities that support facilities' activities and initiatives intended to improve residential quality of care pursuant to a request for proposals process.

* 11. (a) The commissioner shall make regulations relating to midwifery birth centers, including relating to establishment, construction, and operation, considering the standards of state and national professional associations of midwifery birth centers, in consultation with representatives of midwives, midwifery birth centers, and general hospitals providing obstetric services.

(b) (i) As used in this subdivision, "accrediting organization" means a national accrediting organization that provides accreditation to midwifery birth centers, recognized by the commissioner in consultation with representatives of midwives, midwifery birth centers, and general hospitals providing obstetric services. The commissioner shall not unreasonably withhold recognition of an organization seeking to be recognized under this paragraph.

(ii) Where a proposed midwifery birth center demonstrates the intent and capability to obtain and maintain accreditation by an accrediting organization, and fully completes and files an application with the public health and health planning council on forms provided by the department, it shall be deemed upon approval of the public health and health planning council to meet the requirements of this article for a midwifery birth center for approval of a certificate of incorporation,

articles of organization and establishment, contingent on obtaining and maintaining that accreditation. Notwithstanding any other provision of this article to the contrary, such application to the public health and health planning council shall include information to: (A) satisfy the character and competence criteria found in subdivision three of section twenty-eight hundred one-a of this article; (B) demonstrate that the legal structure of the proposed operator of the midwifery birth center complies with the requirements for establishment of hospitals under section twenty-eight hundred one-a of this article; (C) evidence the capability to fund any acquisition, renovations, and construction costs; and (D) demonstrate that the premises and equipment comply with required life safety and building standards necessary to protect the life, safety and welfare of patients and staff. Upon receipt of a completed application, the department shall schedule such application for consideration at the next available and appropriate committee meeting by the public health and health planning council. If the department receives an incomplete application, the department shall communicate with the applicant until such time as the application is completed and filed with the public health and health planning council for its approval or disapproval, or the applicant withdraws the application.

(iii) Regulations and requirements of the commissioner under paragraph (a) of this subdivision for approval of a certificate of incorporation, articles of organization, establishment, and operation of a midwifery birth center established or seeking to be established under this article, including a determination of public need and compliance with operational and physical plant standards, shall not be inconsistent with: (A) article one hundred forty of the education law; (B) the standards of the accrediting organization from which the midwifery birth center proposes to seek, seeks or has obtained accreditation; (C) life safety code or other building standards the commissioner deems necessary to protect the life, safety and welfare of patients and staff; and (D) subparagraph (ii) of this paragraph. Regulations, requirements and guidance under this subparagraph shall be made by the commissioner after consultation with representatives of midwives, midwifery birth centers, and general hospitals providing obstetric services. To the extent any of the standards in this subparagraph conflict, the commissioner shall accommodate or modify the application of any standard to harmonize and

maximize the intent of the standards.

* NB There are 2 sb 11's

* 11. Notwithstanding any provision of this article, or any rule or regulation under this article to the contrary, the commissioner shall allow outpatient clinics of general hospitals and diagnostic and treatment centers to provide off-site primary care services that are:

(a) primary care services ordinarily provided to patients on-site at the outpatient clinic or diagnostic and treatment center and are not home care services defined in subdivision one of section thirty-six hundred two of this chapter or the professional services enumerated in subdivision two of such section;

(b) provided by a primary care professional to a patient with a pre-existing clinical relationship with the outpatient clinic or diagnosis and treatment center, or with the health care professional providing the service; and

(c) provided to a patient who is unable to leave his or her residence to receive services at the outpatient clinic or diagnostic and treatment center without unreasonable difficulty due to circumstances, including but not limited to, clinical impairment.

Nothing in this subdivision shall preclude a federally qualified health center from providing off-site services in accordance with department regulations.

* NB There are 2 sb 11's

12. (a) Each residential health care facility shall, no later than ninety days after the effective date of this subdivision and annually thereafter, or more frequently as may be directed by the commissioner, prepare and make available to the public on the facility's website, and immediately upon request, in a form acceptable to the commissioner, a pandemic emergency plan which shall include but not be limited to:

(i) a communication plan:

(A) to update authorized family members and resident representatives of infected residents at least once per day and upon a change in a resident's condition and at least once a week to update all residents and authorized families and resident representatives on the number of infections and deaths at the facility, and to update all residents,

authorized family members, and resident representatives at the facility not later than five o'clock p.m. the next calendar day following the detection of a confirmed infection of a resident or staff member, or at such earlier time as guidance from the federal centers for Medicaid and medicare services or centers for disease control and prevention may provide, by electronic or such other means as may be selected by each resident, authorized family member or resident representative; and

(B) that includes a method to provide all residents with daily access, at no cost, to remote videoconference or equivalent communication methods with family members and guardians; and

(C) that includes a method, consistent with any guidance and regulations issued by the commissioner, to provide all residents with access, at no cost, to state long-term care ombudsman program staff and volunteers, and that provides state long-term care ombudsman program staff and volunteers with access to the facility; and

(ii) protection plans against infection for staff, residents and families, including:

(A) a plan for hospitalized residents to be readmitted to such residential health care facility after treatment, in accordance with all applicable laws and regulations; and

(B) a plan for such residential health care facility to maintain or contract to have at least a two-month supply of personal protective equipment; and

(C) a plan or procedure, consistent with any guidance issued by the federal centers for Medicaid and medicare services or centers for disease control and prevention, for placement or grouping of residents within a facility to reduce transmission of the pandemic disease during an infectious disease outbreak in the residential health care facility; and

(iii) a plan for preserving a resident's place in a residential health care facility if such resident is hospitalized, in accordance with all applicable laws and regulations.

(b) The residential health care facility shall prepare and comply with the pandemic emergency plan. Failure to do so shall be a violation of this subdivision and may be subject to civil penalties pursuant to section twelve and twelve-b of this chapter. The commissioner shall review each residential health care facility for compliance with its

plan and the applicable regulations in accordance with paragraphs (a) and (b) of subdivision one of this section.

(c) Within thirty days after the residential health care facility's receipt of written notice of noncompliance such residential health care facility shall submit a plan of correction in such form and manner as specified by the commissioner for achieving compliance with its plan and with the applicable regulations. The commissioner shall ensure each such residential health care facility complies with its plan of correction and the applicable regulations.

(d) The commissioner shall promulgate any rules and regulations necessary to implement the provisions of this subdivision.

13. The commissioner shall require each residential health care facility to provide residents and their families with a separate document, as part of an intake application, in no less than twelve-point font, that includes information on how a potential resident and their family members can look up complaints, citations, inspections, enforcement actions, and penalties taken against the facility including the web address for the New York state nursing home profiles website that is maintained by the department and the nursing home compare website maintained by the United States department of health and human services, if applicable.

14. (a) The commissioner, in consultation with the state long-term care ombudsman, shall establish policies and procedures for: (i) reporting to the department, by staff and volunteers of the long-term care ombudsman program, on issues identified or witnessed by such staff and volunteers that relate to actions, inactions or decisions that may adversely affect the health, safety and welfare of residents at residential health care facilities licensed or certified by the department in this state. Such policies and procedures shall include, but not be limited to, establishing a telephone hotline number and reporting form on the department's website for use by long-term care ombudsman program staff and volunteers for the submission of reports;

(ii) timely and regular resolution to any such issues reported to the department pursuant to subparagraph (i) of this paragraph. No later than sixty days after the receipt of any such issue, the department shall

provide the state long-term care ombudsman a report on the status of such issue. Following the initial report, the department shall provide additional reports to the state long-term care ombudsman no less than every ninety days thereafter until such issue is resolved. Upon resolution of such issue, the department shall provide a timely report to the state long-term care ombudsman indicating the manner in which the issue was resolved; and

(iii) requiring the department to notify the local ombudsman entity as defined in paragraph (c) of subdivision one of section two hundred eighteen of the elder law after the department conducts a recertification survey of a facility.

(b) Nothing in this subdivision shall be construed to limit in any way a resident's right to privacy and confidentiality pursuant to the regulations of the long-term care ombudsman program or the right to refuse to consent to the involvement of the long-term care ombudsman.

(c) As used in this subdivision: (i) "resolution" shall mean closure of a complaint by the department, whether closed as substantiated or unsubstantiated; and (ii) "status" shall mean whether the complaint has been assigned to department staff for investigation, whether the complaint remains open under active investigation, or whether the complaint has reached resolution.

§ 2803-a. Authority to contract. Hospitals, including hospitals described in subdivision ten of section 1.03 of the mental hygiene law, are hereby authorized, under such rules and regulations as the council may authorize, to enter into contracts and make arrangements among themselves and among other municipal, state, federal or privately owned hospitals, or any medical schools, or other health related facilities having or utilizing hospital services or facilities or voluntary ambulance services registered or certified pursuant to article thirty of the public health law or nutrition programs that receive federal, state or local government funding, whether or not located in this state or elsewhere, for the

1. mutual use, or exchange of medical resources including, but not limited to, real or personal property or employment of personnel;

2. joint purchases of goods, supplies and services; or

3. development of medical information, techniques and facilities useful in the progress of the medical art; reduction of medical costs and promotion of a more efficient and effective approach to the delivery of health care services.

Any contract between any such hospitals and such voluntary ambulance services shall be limited to joint purchases of goods and supplies necessary for the support of such ambulance services or otherwise used by such hospitals.

*** § 2803-aa. Sick cell disease information distribution.** The commissioner shall design an informational packet about sick cell disease, including screening, prevention, and treatment information. Every general hospital shall distribute the packet to every patient, or, if the patient lacks capacity to make health care decisions, to a person who has authority to make health care decisions for the patient, who is suspected to be at high risk of inheriting sick cell disease.

* NB There are 2 § 2803-aa's

*** § 2803-aa. Nursing home infection control competency audit.** 1. The commissioner shall establish in the department a program for audits of nursing homes to measure specific core competencies relating to infection control of each nursing home. The audits shall commence on December 1, 2022, and shall be conducted annually thereafter.

2. (a) The audit shall utilize a checklist that is consistent with focused infection control survey standards issued by the federal centers for Medicare and Medicaid services to evaluate infection control competency of each nursing home.

(b) A nursing home must meet all metrics on the checklist developed pursuant to paragraph (a) of this subdivision to be scored as in compliance with infection control.

(c) If a nursing home fails to meet all metrics on the checklist developed pursuant to paragraph (a) of this subdivision, the department shall conduct another infection control audit within ninety days of the initial determination. The department shall continue to conduct such ninety day audits until the nursing home is scored as in compliance with infection control competency. The department may also pursue administrative penalties, including but not limited to citation for violation of infection control standards and imposing civil monetary penalties pursuant to section twelve of this chapter.

3. An audit of core competencies shall include, but not be limited to, the following, and shall be consistent with focused infection control survey standards issued by the federal centers for Medicare and Medicaid services:

(a) Infection control. (i) The nursing home shall assign an infection lead staff person to implement infection control based on federal and state public health advisories, guidelines and rules.

(ii) The nursing home shall have a written infection control program which includes, but is not limited to:

(A) A plan to investigate, control and take action to prevent infections in the nursing home;

(B) Procedures for isolation and universal precautions for residents suspected or confirmed to have a contagious or infectious disease; and

(C) A record of incidences and corrective actions related to infections at the nursing home.

(iii) During an officially declared national emergency, or state or municipal emergency declared pursuant to article two-B of the executive law, related to a contagious or infectious disease outbreak, the nursing home shall have screening requirements for every individual entering the facility, including staff, for symptoms associated with the infectious disease outbreak.

(iv) The nursing home shall have a staffing and cohorting plan to limit transmission, which is based on national (for example, centers of disease control and centers for Medicare and Medicaid services), state or local public health authority recommendations. Such staffing and cohorting plan may include, but not be limited to:

(A) Having dedicated, consistent staffing teams who directly interact

with residents that are confirmed or suspected to be infected with a contagious or infectious disease;

(B) Limiting clinical and other staff who have direct resident contact to specific areas of the facility and not rotating staff between various areas of the facility during the period they are working each day during periods of recognized outbreaks; and

(C) Having a dedicated space in the facility for cohorting and managing care for residents with an infectious disease, such as COVID-19.

(v) The nursing home shall ensure ongoing access to the necessary supplies for hand hygiene for staff and residents, hospital disinfectants or alternatives to allow for necessary and appropriate cleaning and disinfecting of surfaces and shared resident care equipment.

(vi) The nursing home shall train staff and establish protocols for selecting, donning and doffing appropriate personal protective equipment and demonstrate competency during resident care. The nursing home must keep a record of staff training in proper storage, use, reuse, and disposal of personal protective equipment.

(vii) The nursing home must designate a staff member or members who is responsible for ensuring the proper use of personal protective equipment by all staff.

(b) The nursing home shall demonstrate that there has been advanced planning, in alignment with the facility's emergency preparedness plans and pandemic emergency plan, for contingent staffing needs in the case of staff quarantines that shall have an employee responsible for conducting a daily assessment of staffing status and needs during an outbreak of infectious or contagious diseases, and institute a sick-leave policy that does not punish staff with disciplinary action if they are absent from work because they are exhibiting symptoms, or test positive, for an infectious disease. Such policies shall offer the maximum amount of flexibility to staff and be consistent with state guidance.

(c) The nursing home shall have a written plan for daily communications with staff, residents, and the residents' families regarding the status of infections at the nursing home. Such plan shall be consistent with the requirements set forth in paragraph (a) of

subdivision twelve of section twenty-eight hundred three of this article. The nursing home must designate one or more staff members who are responsible for these communications with staff, residents and residents' families.

* NB There are 2 § 2803-aa's

§ 2803-b. Uniform reports and accounting systems for hospital costs.

1. The council, after public hearings with respect to its proposed systems of uniform hospital accounting and reporting, shall, by majority vote of its members and subject to approval of the commissioner, adopt and amend approved systems of uniform hospital accounting and reporting which are designed to enable hospitals to fairly, accurately and efficiently prepare the financial reports required by subdivision three of this section. Existing systems of accounting and reporting used by hospitals shall be examined and taken into consideration by the council in carrying out its function pursuant to this section. The council shall take such steps as are necessary to adopt the approved system of uniform hospital accounting and reporting by January first, nineteen hundred seventy-five.

2. The council, where appropriate to reflect differences in hospital size and services or in the method of providing or paying for hospital and related services, may allow for modifications in the accounting systems approved pursuant to subdivision one of this section.

3. Every organization which operates, conducts or maintains a hospital, and the officers thereof, shall furnish to the department with respect to each licensed hospital operated, conducted or maintained by the organization, within one hundred twenty days after the close of each fiscal year commencing after the adoption of systems of uniform hospital accounting and reporting approved under subdivision one of this section, all of the following reports on forms specified by the council:

(a) A balance sheet detailing the assets, liabilities and net worth of the hospital at the end of its fiscal year;

(b) A statement of income, expenses, and operating surplus or deficit for the annual period ending on the balance sheet date;

(c) A statement detailing the source of application of all funds expended by the hospital for the period encompassed by the income statement required by paragraph (b) of this subdivision;

(d) A report of hospital expenditures which allocates the costs of nonrevenue-producing departments of a hospital to the other nonrevenue-and revenue-producing centers which they serve. This report shall be accompanied by a sufficiently detailed statistical report containing data describing the hospital's basic services and patient statistics which identifies costs related to categories of hospital services delivered to patients by each department of the hospital, in accordance with a list of such services required by the council pursuant to subdivision one of this section.

4. The commissioner shall adopt forms of authentication for use by hospital officers or licensed accountants preparing reports under this section stating that each such officer or accountant making the authentication believes that to the extent of his knowledge and information each statement in the report is true.

§ 2803-bb. Provision of language assistance. Every general hospital shall develop a language assistance program to ensure meaningful access to the general hospital's services and reasonable accommodation for all patients who require language assistance. Program requirements shall include:

1. the designation of a language assistance coordinator who shall report to general hospital administration and who shall provide oversight for the provision of language assistance services;

2. policies and procedures that ensure timely identification and ongoing access for patients in need of language assistance services;

3. the development of materials that will be made available for patients and potential patients that summarize the process and method to access free language assistance services;

4. ongoing education and training for administrative, clinical and other employees with direct patient care contact regarding the importance of culturally and linguistically competent service delivery and how to access the general hospital's language assistance services on behalf of patients;

5. signage, as designated by the department, regarding the availability of free language assistance services in public entry locations and other public locations;

6. identification of language of preference and language needs of each patient upon initial visit to the general hospital;

7. documentation in the medical record of the patient's language of preference, language needs, and the acceptance or refusal of language assistance services;

8. a provision that family members, friends, or non-general hospital personnel shall not act as interpreters, unless:

(a) the patient agrees to their use;

(b) free interpreter services have been offered by the general hospital and refused; and

(c) issues of age, competency, confidentiality, or conflicts of interest are taken into account. Any individual acting as an interpreter should be sixteen years of age or older; individuals younger than sixteen years of age shall only be used in emergency circumstances and their use documented in the medical record;

9. management of a resource of skilled interpreters and persons skilled in communicating with vision and/or hearing-impaired individuals. Interpreters and persons skilled in communicating with vision and/or hearing-impaired individuals shall be available to patients within a reasonable period of time from a request to general hospital administration by the patient, the patient's family or representative or the provider of medical care. The commissioner may approve reasonable time periods to the provisions of this subdivision regarding interpreters and persons skilled in communicating with vision

and/or hearing-impaired individuals for patients of rural general hospitals which:

(a) demonstrate that they have taken and are continuing to take all reasonable steps to fulfill these requirements but are not able to fulfill such requirements immediately for reasons beyond the general hospital's control; and

(b) have developed and implemented effective interim plans addressing the communications needs of individuals in the general hospital service area;

10. an annual needs assessment utilizing demographic information available from the United States bureau of the census, general hospital administrative data, school system data, or other sources, that shall identify limited English-speaking groups comprising more than one percent of the total general hospital service area population. Translations/transcriptions of significant general hospital forms and instructions shall be regularly available for the languages identified by the needs assessment; and

11. reasonable accommodation for a family member or patient's representative to be present to assist with the communication assistance needs for patients with mental and developmental disabilities.

§ 2803-c. Rights of patients in certain medical facilities. 1. The principles enunciated in subdivision three hereof are declared to be the public policy of the state and a copy of such statement of rights and responsibilities shall be posted conspicuously in a public place in each facility covered hereunder.

2. The commissioner shall require that every nursing home and facility providing health related service, as defined in subdivision two and paragraph (b) of subdivision four of section twenty-eight hundred one of this article, shall adopt and make public a statement of the rights and responsibilities of the patients who are receiving care in such facilities, and shall treat such patients in accordance with the provisions of such statement.

3. Said statement of rights and responsibilities shall include, but not be limited to the following:

a. Every patient's civil and religious liberties, including the right to independent personal decisions and knowledge of available choices, shall not be infringed and the facility shall encourage and assist in the fullest possible exercise of these rights.

b. Every patient shall have the right to have private communications and consultations with his or her physician, attorney, and any other person.

c. Every patient shall have the right to present grievances on behalf of himself or herself or others, to the facility's staff or administrator, to governmental officials, or to any other person without fear of reprisal, and to join with other patients or individuals within or outside of the facility to work for improvements in patient care.

d. Every patient shall have the right to manage his or her own financial affairs, or to have at least a quarterly accounting of any personal financial transactions undertaken in his or her behalf by the facility during any period of time the patient has delegated such responsibilities to the facility.

e. Every patient shall have the right to receive adequate and appropriate medical care, to be fully informed of his or her medical condition and proposed treatment unless medically contraindicated, and to refuse medication and treatment after being fully informed of and understanding the consequences of such actions.

f. Every patient shall have the right to have privacy in treatment and in caring for personal needs, confidentiality in the treatment of personal and medical records, and security in storing personal possessions.

g. Every patient shall have the right to receive courteous, fair, and

respectful care and treatment and a written statement of the services provided by the facility, including those required to be offered on an as-needed basis.

h. Every patient shall be free from mental and physical abuse and from physical and chemical restraints, except those restraints authorized in writing by a physician for a specified and limited period of time or as are necessitated by an emergency in which case the restraint may only be applied by a qualified licensed nurse who shall set forth in writing the circumstances requiring the use of restraint and in the case of use of a chemical restraint a physician shall be consulted within twenty-four hours.

i. A statement of the facility's regulations and an explanation of the patient's responsibility to obey all reasonable regulations of the facility and to respect the personal rights and private property of the other patients.

j. A statement that should the patient be adjudicated incompetent and not be restored to legal capacity, or if a conservator should be appointed for the patient, the above rights and responsibilities shall be exercised by the appointed committee or conservator in a representative capacity.

k. Every patient shall have the right to receive upon request kosher food or food products prepared in accordance with sections two hundred one-a, two hundred one-b and two hundred one-c of the agriculture and markets law.

k-1. Every patient shall have the right to receive upon request halal food or food products prepared in accordance with sections two hundred one-e, two hundred one-f and two hundred one-g of the agriculture and markets law.

l. Pursuant to regulations promulgated by the commissioner, no facility or individual and no general hospital providing medical care to persons having been admitted from such facilities or from adult care

facilities covered by the provisions of section four hundred sixty-one-b of the social services law, or to applicants for readmission to such facilities or to adult care facilities covered by the provisions of section four hundred sixty-one-b of the social services law, shall restrict or prohibit the access to the facility or general hospital nor interfere with the performance of the official duties, including confidential visits with residents, of duly designated persons participating in the long term care ombudsman program as provided for in section two hundred eighteen of the elder law.

m. Pursuant to regulations promulgated by the commissioner in consultation with the director of the office for the aging, no facility shall restrict or prohibit access by records access ombudsmen specially designated under section five hundred forty-four of the executive law to the medical or personal records of any patient or resident if such patient or resident, or, where appropriate, committee for an incompetent, has given express written consent to such disclosure; provided, however, that (i) in the case of medical records, disclosure may be exclusive of the personal notes of the physician as defined in such regulations and (ii) access may be limited to such times as may be specified in such regulations. Such records shall be made available by a member or members of the facility's staff who shall be designated by the facility to provide access to and, where necessary, interpretation of such records to such records access ombudsman, who shall have the right to photocopy such records. The facility may charge a reasonable fee for photocopying pursuant to such regulations. Disclosure to a records access ombudsman of records of any patient or resident pursuant to the written consent of such patient or resident shall not give rise to any claim against the facility, its staff, or the patient's or resident's physician based solely on the fact of such disclosure pursuant to such written consent. Nothing in this paragraph shall be construed to limit or abridge any right of access to records, including financial records, otherwise available to ombudsmen, patients or residents, or any other person.

n. Pursuant to regulations promulgated by the commissioner in consultation with the director of the office for the aging, no facility

or individual shall retaliate or take reprisals against any resident, employee, or other person for having filed a complaint with, or having provided information to, any long term care patient ombudsman functioning in accordance with section five hundred forty-four or five hundred forty-five of the executive law, nor shall any facility or individual interfere with the official duties of any such ombudsman. Such regulations shall provide for appropriate sanctions with respect to such retaliation, reprisals, or interference.

(o) Every patient shall have the right to authorize those family members and other adults who will be given priority to visit consistent with the patient's or resident's ability to receive visitors.

p. A statement informing the patient of his or her right to make organ, tissue or whole body donations, and the means by which the patient may make such a donation. The commissioner shall promulgate any rules and regulations necessary to implement the provisions of this paragraph.

q. A statement indicating the policy of the facility regarding the granting of physician privileges to residents.

r. Every patient shall have the right to remain in care unless the patient is appropriately discharged or transferred in accordance with section two thousand eight hundred three-z of this article and a residential health care facility shall not attempt to compel or retaliate against an individual that chooses to remain in care.

4. Each facility shall give a copy of the statement to each patient at or prior to the time of admission to the facility, or to the appointed personal representative at the time of appointment and to each member of the facility's staff.

5. Each facility shall prepare a written plan and provide appropriate staff training to implement each patient's right included in the statement.

6. The department shall translate and make available to all facilities

the statement in the ten most common non-English languages spoken by individuals with limited-English proficiency in New York state as based on the most recent United States census. Each facility shall post and make available copies of said statement for residents under subdivisions one, two, and four of this section.

§ 2803-c-1. Rights of patients in certain medical facilities; long-term care ombudsman program. 1. Each nursing home and residential health care facility providing health related service, as defined in subdivisions two and three and paragraph (b) of subdivision four of section twenty-eight hundred one of this article, shall post in a conspicuous place or places where notices to residents are customarily posted, and shall provide each member of the facility's staff, and each patient and their appointed personal representative at or prior to the time of admission to the facility, or at the time of the representative's appointment, the following contact information:

(a) contact information for the state and relevant regional office of the long-term care ombudsman program as provided for in section two hundred eighteen of the elder law; and

(b) contact information for the department's nursing home complaint hotline.

2. Nursing homes and residential health care facilities shall provide updated contact information for the state and relevant regional offices of the long-term care ombudsman program to all residents and their appointed personal representatives twice a year.

§ 2803-c-2. Lesbian, gay, bisexual and transgender, and people living with HIV long-term care facility residents' bill of rights. 1.

Definitions. For the purposes of this section:

(a) "Gender identity or expression" shall have the same meaning as defined by section two hundred ninety-two of the executive law.

(b) "Long-term care facilities" or "facilities" shall mean residential health care facilities as defined in subdivision three of section twenty-eight hundred one of this article, adult care facilities as

defined in subdivision twenty-one of section two of the social services law, and assisted living residences, as defined in article forty-six-B of this chapter, or any facilities which hold themselves out or advertise themselves as providing assisted living services and which are required to be licensed or certified under the social services law or this chapter.

(c) "Long-term care facility staff" or "facility staff" shall mean all individuals employed by or contracted directly with the facility.

(d) "Resident" shall mean a resident or patient of a long-term care facility.

2. (a) Except as provided in subdivision three of this section, it shall be unlawful for a long-term care facility or facility staff to discriminate against any resident on the basis of such resident's actual or perceived sexual orientation, gender identity or expression, or human immunodeficiency virus (HIV) status:

(i) deny admission to a long-term care facility, transfer or refuse to transfer a resident within a facility or to another facility, or discharge or evict a resident from a facility;

(ii) deny a request by residents to share a room;

(iii) where rooms are assigned by gender, assigning, reassigning or refusing to assign a room to a transgender resident other than in accordance with the transgender resident's gender identity, unless at the transgender resident's request;

(iv) prohibit a resident from using, or harass a resident who seeks to use or does use, a restroom available to other persons of the same gender identity, regardless of whether the resident has taken or is taking hormones, has had transition-related surgery, or is making a gender transition or appears to be gender-nonconforming. Harassment includes, but is not limited to, requiring a resident to show identity documents in order to gain entrance to a restroom available to other persons of the same gender identity;

(v) willfully and repeatedly fail to use a resident's preferred name or pronouns after being clearly informed of the preferred name or pronouns, even if the resident is not present;

(vi) deny a resident the right to wear or be dressed in clothing, accessories, or cosmetics that are permitted for any other resident;

(vii) restrict a resident's right to associate with other residents or with visitors, including the right to consensual expression of intimacy or sexual relations, unless the restriction is uniformly applied to all residents in a nondiscriminatory manner; and

(viii) deny or restrict a resident from accessing appropriate medical or nonmedical care, or provide medical or nonmedical care, that unreasonably demeans the resident's dignity or causes avoidable discomfort.

(b) The provisions of this subdivision shall not apply to the extent that they are incompatible with any professionally reasonable clinical judgment that is based on articulable facts of clinical significance.

3. Each facility shall post the following notice alongside its current nondiscrimination policy in all places and on all materials where that policy is posted: "(NAME OF FACILITY) DOES NOT DISCRIMINATE AND DOES NOT PERMIT DISCRIMINATION, INCLUDING, BUT NOT LIMITED TO, BULLYING, ABUSE, HARASSMENT, OR DIFFERENTIAL TREATMENT ON THE BASIS OF ACTUAL OR PERCEIVED SEXUAL ORIENTATION, GENDER IDENTITY OR EXPRESSION, OR HIV STATUS, OR BASED ON ASSOCIATION WITH ANOTHER INDIVIDUAL ON ACCOUNT OF THAT INDIVIDUAL'S ACTUAL OR PERCEIVED SEXUAL ORIENTATION, GENDER IDENTITY OR EXPRESSION, OR HIV STATUS. YOU MAY FILE A COMPLAINT WITH THE OFFICE OF THE NEW YORK STATE LONG-TERM CARE OMBUDSMAN PROGRAM (PROVIDE CONTACT INFORMATION) IF YOU BELIEVE THAT YOU HAVE EXPERIENCED THIS KIND OF DISCRIMINATION."

4. (a) A facility shall employ procedures for recordkeeping, including, but not limited to, records generated at the time of admission, that include the gender identity, correct name, as indicated by the resident, and pronoun of each resident, as indicated by the resident and such records shall be kept up to date.

(b) The state long-term care ombudsman program shall establish policies and procedures for recording complaints filed from residents of long-term care facilities pursuant to this section.

5. Long-term care facilities shall protect personally identifiable information regarding residents' sexual orientation, whether a resident is transgender, a resident's transition history, and HIV status from

unauthorized disclosure, as required by the federal Health Insurance Portability and Accountability Act of 1996, if applicable, and any other applicable provision of federal or state law. A facility shall take any steps reasonably necessary to minimize the likelihood of inadvertent or incidental disclosure of that information to other residents, visitors, or facility staff, except to the minimum extent necessary for facility staff to perform their duties.

6. Long-term care facility staff not directly involved in providing direct care to a resident, including, but not limited to, a transgender or gender-nonconforming resident, shall not be present during physical examination or the provision of personal care to such resident if such resident is partially or fully unclothed without the express permission of such resident, or such resident's legally authorized representative or responsible party. A facility shall use doors, curtains, screens, or other effective visual barriers to provide bodily privacy for all residents, including, but not limited to, transgender or gender-nonconforming residents, whenever they are partially or fully unclothed. In addition, all residents, including, but not limited to, lesbian, gay, bisexual, transgender or gender-nonconforming residents, shall be informed of and have the right to refuse to be examined, observed, or treated by any facility staff when the primary purpose is educational or informational rather than therapeutic, or for resident appraisal or reappraisal, and that refusal shall not diminish the resident's access to care for the primary purpose of diagnosis or treatment.

7. (a) At least once every two years, a long-term care facility shall ensure that every facility staff member who works directly with residents receives training on cultural competency focusing on residents who identify as lesbian, gay, bisexual or transgender and residents living with HIV. Such training shall be developed by the commissioner, in consultation with the director of the office for the aging and entities with expertise in the legal and social challenges faced by lesbian, gay, bisexual or transgender older adults and people living with HIV as they age and reside in long-term care facilities, and shall include, but not be limited to, providing facility staff with the

knowledge and skills necessary to provide effective care, in compliance with this section, for residents who identify as lesbian, gay, bisexual or transgender and residents living with HIV.

(b) Facility staff required to receive training under this subdivision shall receive the training within six months of hire unless the person provides proof of having received comparable training within the prior two years that the facility determines complies with this subdivision. If the facility accepts the person's proof of prior training, a record of the content of the prior training sufficient to determine its compliance with this subdivision shall be kept on site at the facility.

8. Nothing in this section should be construed to impede existing programs, benefits, or protections for lesbian, gay, bisexual or transgender residents or residents living with HIV at long-term care facilities.

§ 2803-d. Reporting abuses of persons receiving care or services in residential health care facilities. 1. The following persons are required to report in accordance with this section when they have reasonable cause to believe that a person receiving care or services in a residential health care facility has been abused, mistreated, neglected or subjected to the misappropriation of property by other than a person receiving care or services in the facility: any operator or employee of such facility, or employee of any corporation, partnership, organization or other entity which, and any other person who, is under contract with such facility, and any nursing home administrator, physician, medical examiner, coroner, physician's associate, specialist's assistant, osteopath, chiropractor, physical therapist, occupational therapist, registered professional nurse, licensed practical nurse, dentist, podiatrist, optometrist, pharmacist, psychologist, licensed master social worker, licensed clinical social worker, speech pathologist and audiologist.

2. In addition to those persons required to report suspected abuse, mistreatment, neglect or misappropriation of the property of persons receiving care or services in residential health care facilities, any

other person may make such a report if he or she has reasonable cause to believe that a person receiving care or services has been abused, mistreated, neglected or subjected to the misappropriation of property in the facility.

3. Reports of suspected abuse, mistreatment, neglect or the misappropriation of property made pursuant to this section shall be made immediately by telephone and in writing within forty-eight hours to the department. The department shall provide forms, which shall be available to be downloaded from the department's website, which may be, but are not required to be, used for making the written reports. Written reports shall include the following information: the identity of the person making the report and where he can be found; the name and address of the residential health care facility; the names of the operator and administrator of the facility, if known; the name of the subject of the alleged abuse, mistreatment, neglect or misappropriation of property, if known; the nature and extent of the abuse, mistreatment, neglect or misappropriation of property; the date, time and specific location of the occurrence; the names of next of kin or sponsors of the subject of the alleged abuse, mistreatment, neglect or misappropriation of property, if known; and any other information which the person making the report believes would be helpful to further the purposes of this section. Such written reports shall be admissible in evidence, consistent with the provisions of paragraph (f) of subdivision six of this section, in any actions or proceedings relating to abuse, mistreatment, neglect or misappropriation of property of persons receiving care or services in residential health care facilities. Written reports made other than on forms supplied by the commissioner which contain the information required herein shall be treated as if made on such forms.

4. Any person who in good faith makes a report pursuant to this section shall have immunity from any liability, civil or criminal, for having made such a report. For the purpose of any proceeding, civil or criminal, the good faith of any person required to report instances of abuse, mistreatment, neglect or misappropriation of property of persons receiving care or services in residential health care facilities shall

be presumed.

5. Notwithstanding the provisions of section two hundred thirty of this chapter, any licensed person who commits an act of abuse, mistreatment, neglect or misappropriation of property of a person receiving care or services in a residential health care facility and any licensed person required by this section to report an instance of suspected abuse, mistreatment, neglect or misappropriation of property of a person receiving care or services in a residential health care facility who fails to do so shall be guilty of unprofessional conduct in the practice of his or her profession.

6. (a) Upon receipt of a report made pursuant to this section, the commissioner shall cause an investigation to be made of the allegations contained in the report. Notification of the receipt of a report shall be made immediately by the department to the appropriate district attorney if a prior request in writing has been made to the department by the district attorney. At any time, if the department determines that there is a reasonable belief that a reported allegation may constitute a crime under the laws of the state of New York or the United States, the department shall notify the appropriate law enforcement official or authority. Prior to the completion of the investigation by the department, reasonable effort shall be made to notify, personally or by certified mail, any person under investigation for having committed an act of abuse, mistreatment, neglect or misappropriation of property. The commissioner shall make a written determination, based on the findings of the investigation, of whether or not sufficient credible evidence exists to sustain the allegations contained in the report or would support a conclusion that a person not named in such report has committed an act of abuse, neglect, mistreatment or misappropriation of property. A copy of such written determination, together with a notice of the right to a hearing as provided in this subdivision, shall be sent by registered or certified mail to each person who the commissioner has determined has committed an act of abuse, neglect, mistreatment or misappropriation of property. A letter shall be sent to any other person alleged in such report to have committed such an act stating that a determination has been made that there is not sufficient evidence to

sustain the allegations relating to such person. A copy of each such determination and letter shall be sent to the facility in which the alleged incident occurred.

(b) The commissioner may make a written determination, based on the findings of the investigation, that sufficient credible evidence exists to support a conclusion that a person required by this section to report suspected abuse, mistreatment, neglect or misappropriation of property had reasonable cause to believe that such an incident occurred and failed to report such incident. A copy of such written determination, together with a notice of the right to a hearing as provided in this subdivision, shall be sent by registered or certified mail to each person who the commissioner has determined has failed to report as required by this section.

(c) All information relating to any allegation which the commissioner has determined would not be sustained shall be sealed one hundred twenty days following notification of such determination to the person who made the report pursuant to this section, unless a proceeding pertaining to such allegation is pending pursuant to article seventy-eight of the civil practice law and rules. Whenever information is sealed, the commissioner shall notify any official notified pursuant to paragraph (a) of this subdivision that the information has been sealed.

(d) At any time within thirty days of the receipt of a copy of a determination made pursuant to this section, a person named in such determination as having committed an act of abuse, neglect, mistreatment or misappropriation of property, or as having failed to report such an incident, may request in writing that the commissioner amend or seal the record of such report, to the extent such report applies to such person, or such written determination. If the commissioner does not comply with such request within thirty days, such person shall have the right to a fair hearing to determine whether the record of the report or the written determination should be amended or sealed on the grounds that the record is inaccurate or the determination is not supported by the evidence. The burden of proof in such hearing shall be on the department. Whenever information is sealed, the commissioner shall notify any official notified pursuant to paragraph (a) of this subdivision that the information has been sealed.

(e) Except as hereinafter provided, any report, record of the

investigation of such report and all other information related to such report shall be confidential and shall be exempt from disclosure under article six of the public officers law.

(f) Information relating to a report made pursuant to this section shall be disclosed under any of the following conditions:

(i) pursuant to article six of the public officers law after sealing or amendment, if any, is made in accordance with a hearing conducted pursuant to this section, or at least forty-five days after a written determination is made by the commissioner concerning such report, whichever is later; provided, however, that the identity of the person who made the report, the victim, or any other person named, except a person who the commissioner has determined committed an act of abuse, neglect, mistreatment or misappropriation of property, shall not be disclosed unless such person authorizes such disclosure;

(ii) as may be required by the penal law or any lawful order or warrant issued pursuant to the criminal procedure law; or

(iii) to a person who has requested a hearing pursuant to this section, information relating to the determination upon which the hearing is to be conducted; provided, however, that the identity of the person who made the report or any other person who provided information in an investigation of the report shall not be disclosed unless such person authorizes such disclosure.

(g) Where appropriate, the commissioner shall report instances of abuse, mistreatment, neglect or misappropriation of property or the failure to report as required by this section, to the appropriate committee on professional conduct for the professions enumerated in subdivision one of this section when a determination has been made after the commissioner has provided an opportunity to be heard. The commissioner shall report instances of abuse, mistreatment, neglect, misappropriation of property by a nurse aide or other unlicensed individual and any brief statement by the nurse aide or other unlicensed individual disputing the finding to the nursing home nurse aide registry established pursuant to section twenty-eight hundred three-j of this article when a determination has been made after the commissioner has provided an opportunity to be heard.

7. In addition to any other penalties prescribed by law, any person

who commits an act of abuse, neglect, mistreatment or misappropriation of property, or who fails to report such an act as provided in this section, shall be deemed to have violated this section and shall be liable for a penalty pursuant to section twelve of this chapter after an opportunity to be heard pursuant to this section.

8. No residential health care facility or officer or employee thereof shall discharge or in any manner discriminate or retaliate against any person in any residential health care facility, or any relative, or sponsor thereof, or against any employee of the facility, or against any other person because such person, relative, legal representative, sponsor or employee has made, or is about to make, a report pursuant to this section, or has testified, or is about to testify, in any proceeding relating to abuse, mistreatment, neglect or misappropriation of property of a person receiving care or services in a residential health care facility. The supreme court may grant injunctive relief to any person subject to such retaliation or discrimination. Any violation of this subdivision shall be punishable pursuant to section twelve of this chapter.

9. No later than March fifteenth of every year the commissioner shall prepare and transmit to the governor and the legislature a report on the incidents of abuse, mistreatment, neglect and misappropriation of property of persons receiving care or services in residential health care facilities. No individual identifying information concerning any individual subjected to abuse, mistreatment, neglect or misappropriation of property shall be disclosed in a report made pursuant to this subdivision, or in any other report, except information which would be available pursuant to article six of the public officers law as provided in this section. Nothing in this section shall be construed to prohibit the maintenance or disclosure of, or require the sealing of, statistical data which would not reveal the identity of any person.

10. An investigation shall be made of each incident reported pursuant to this section.

11. The commissioner shall adopt regulations necessary to implement

this section.

*** § 2803-e. Residential health care facilities; return and redistribution of unused medication.** 1. Notwithstanding any inconsistent provision of law, rule or regulation to the contrary, the commissioner is hereby authorized and directed to permit either a resident or consultant pharmacist in a residential health care facility to return to the pharmacy from which it was purchased any unused medication provided that such medication is sealed in unopened, individually packaged units and within the recommended period of shelf life, and provided that such medication is not a controlled substance as defined in section thirty-three hundred six of the public health law.

2. The pharmacy to which such medication as described in subdivision one of this section is returned shall be permitted to receive, restock and redistribute that medication.

3. The pharmacy to which such medication as described in subdivision one of this section is returned shall be required to reimburse or credit the purchaser of that medication for the unused medication that is restocked and redistributed. No pharmacy shall be required to accept any medication returned under subdivision one of this section.

4. Neither an individual patient or the state, if a patient is a recipient of a state funded program, shall be charged for unused medication which according to the provisions of this law is returned for reimbursement or credit.

* NB There are 2 § 2803-e's

*** § 2803-e. Reporting incidents of possible professional misconduct.** 1. (a) Hospitals and other facilities approved pursuant to this article shall make a report or cause a report to be made within thirty days of the occurrence of any of the following: the suspension, restriction, termination or curtailment of the training, employment, association or professional privileges or the denial of the certification of completion

of training of an individual licensed pursuant to the provisions of title eight of the education law or of a medical resident with such facility for reasons related in any way to alleged mental or physical impairment, incompetence, malpractice or misconduct or impairment of patient safety or welfare; the voluntary or involuntary resignation or withdrawal of association or of privileges with such facility to avoid the imposition of disciplinary measures; or the receipt of information which indicates that any professional licensee or medical resident has been convicted of a crime; the denial of staff privileges to a physician if the reasons stated for such denial are related to alleged mental or physical impairment, incompetence, malpractice, misconduct or impairment of patient safety or welfare.

(b) Hospitals and other facilities approved pursuant to this article shall make a report or cause a report to be made within thirty days of obtaining knowledge of any information which reasonably appears to show that a physician is guilty of professional misconduct as defined in section sixty-five hundred thirty or sixty-five hundred thirty-one of the education law. A violation of this paragraph shall not be subject to the provisions of section twelve-b of this chapter.

2. Reports of possible professional misconduct made pursuant to this section shall be made in writing to the education department with respect to all individuals licensed pursuant to title eight of the education law except that such reports shall be made to the department of health in the case of physicians, physician's assistants and specialist's assistants. Written reports shall include the following information:

- (a) name, address, profession and license number of the individual;
- (b) a description of the action taken by the hospital including the reason for the action and the date thereof, or the nature of the action or conduct which led to the resignation or withdrawal, and the date thereof, stated with sufficient specificity to allow a reasonable person to understand which of the reasons enumerated in subdivision one of this section led to the action of the hospital or the resignation or withdrawal of the individual, and, if the reason was an act or omission of the individual, the particular act or omission;
- (c) any criminal conviction of which the hospital has knowledge; and

(d) such other information as the education department or the department of health shall require.

3. (a) Any report or information furnished to the education department or department of health in accordance with the provisions of this section shall be deemed a confidential communication and shall not be subject to inspection or disclosure in any manner except upon formal written request by a duly authorized public agency or pursuant to a judicial subpoena issued in a pending action or proceeding.

(b) Any person, facility or corporation which makes a report pursuant to this section in good faith and without malice shall have immunity from any liability, civil or criminal, for having made such a report. For the purpose of any proceeding, civil or criminal, the good faith of any person required to make a report shall be presumed.

* NB There are 2 § 2803-e's

§ 2803-f. Respite projects. Residential health care facilities shall be permitted, with the prior approval of the commissioner in consultation with the director of the state office for the aging, to participate in respite projects pursuant to section two hundred eight of the elder law. No person shall receive services providing respite in a residential health care facility unless such person is medically eligible for admission to such facility. Reimbursement for services in a residential health care facility shall be as provided in sections twenty-eight hundred seven and twenty-eight hundred eight of this article for skilled nursing facility services or health-related services. The commissioner, in consultation with the director of the state office for the aging, shall promulgate rules and regulations to implement the provisions of this section.

§ 2803-g. Board of visitors in county owned residential health care facility. 1. Each public residential health care facility owned by a county may have a board of visitors consisting of at least seven members. Members shall be appointed by the county executive of the county in which the facility is located where the county charter or, in

the absence of such, county law provides that members of county boards, commissions, authorities or agencies are to be appointed by such an officer. Such appointments shall be made with the approval of the local legislative body of that county. In those counties without a county executive, appointments shall be made by the legislative body of the county. A visitor may be removed by the county legislative body for cause after notice and an opportunity for hearing on the charges.

2. Unless provided otherwise by local law, each board shall elect annually one member to serve as president of the board and one member to serve as secretary.

3. Visitors shall not receive compensation but may be reimbursed for their actual expenses in connection with their service as visitors by the facility they serve.

4. The board of visitors shall hold no less than six regular meetings annually, but a greater number of regular meetings may be scheduled by the board. The conditions under which special meetings may be called shall be established by local law or in by-laws of the board. The board may require the head administrator of the facility to submit a report at each meeting. The board shall keep a record of its proceedings and activities. A member of a board of visitors who has failed to attend three consecutive meetings shall be considered to have vacated his office unless the board has adopted rules to the contrary.

5. Upon the request of the head administrator of the facility or upon the board's initiative, the board shall consult, advise and work with the director with respect to community relations, conditions at the facility, preliminary plans for construction and alterations and programs and activities of the facility.

6. The board or any member of the board may visit and inspect the facility at any time without prior notice and may report on conditions to the local legislative body or the county executive and the commissioner of the New York state department of health. In addition, the board shall insure that a member or a committee of members shall

inspect the facility once every three months without prior notice. A member of a board of visitors who has failed to visit and inspect the facility at least twice a year shall be considered to have vacated his office unless otherwise ordered by the board.

7. The board shall have the power to investigate all charges against the administrator of the facility, all cases of alleged patient abuse or mistreatment, and any other complaint filed against the facility. The board shall receive from the facility copies of all accident reports and any reports of abuse or neglect involving patients of the facility. The board or any member of the board shall have the right to examine any books or papers of the facility at anytime, except that access to patient medical records shall be with the written consent of the patient or his legal representative. Unless provided otherwise by local law, the board shall have the power, in accordance with the civil practice law and rules, to require the production of any books or papers deemed relevant to the investigation. The board or a member may include in the report of their investigation or separately at any time, any matter pertaining to the management and affairs of the facility and may make recommendations to the county executive, or in the absence of such, the county legislative body and to the commissioner.

8. Once each year, the board shall make an independent assessment of conditions at the facility and shall submit a report on the assessment and recommendations to the commissioner and to the county executive, or in the absence of such, the county legislative body.

9. The county executive or the local legislative body shall notify the board of visitors of a residential health care facility of the proposed appointment of a head administrator to such facility with a request that the board report an expression of its opinion of the appointment and, if it objects thereto, the reasons for such an objection.

10. The board may establish by-laws which shall be available for public inspection at the facility and the office of the county attorney.

11. Members of the board of visitors shall be considered officers of

the county by which they are compensated for purposes of section four hundred nine of the county law. The county legislative body shall establish a code of ethics for the members of such board, including but not limited to provisions on conflict of interest and course of conduct.

§ 2803-h. Health related facility; pet therapy programs.

Notwithstanding any inconsistent provision of law, rule or regulation to the contrary, and subject to the approval of the commissioner, every residential health care facility, as defined in section twenty-eight hundred one of this article, may, at the discretion of such facility, board animals in such facility where such boarding would, in the determination of the commissioner and such facility, tend to promote the general well-being of the residents of such facility. The commissioner shall adopt rules and regulations necessary to implement the provisions of this section.

§ 2803-i. General hospital inpatient discharge review program. 1. A general hospital inpatient discharge review program applicable to all patients other than beneficiaries of title XVIII of the federal social security act (medicare) shall be established in accordance with this section. No general hospital inpatient subject to the provisions of this section may be discharged on the basis that inpatient hospital service in a general hospital is no longer medically necessary and that an appropriate discharge plan has been established unless a written notice of such determinations and a copy of the discharge plan have been provided to the patient or the appointed personal representative of the patient. The patient or the appointed personal representative of the patient shall have the opportunity to sign the notice and a copy of the discharge plan and receive a copy of both signed documents. Every general hospital shall use a common notice developed and disseminated in accordance with rules and regulations adopted by the council and approved by the commissioner which shall indicate that the patient is to be discharged, shall state the reasons therefor and shall state that the patient may request a review of such determinations. The patient, or the appointed personal representative of the patient may request a review of

such determinations by the appropriate independent professional review agent (or "review agent") in accordance with subdivision four of this section. Notwithstanding that the patient discharge review process provided in accordance with federal law and regulation shall apply to beneficiaries of title XVIII of the federal social security act (medicare), a written copy of the discharge plan, and discharge notice shall be provided to the beneficiary or the appointed personal representative of the beneficiary. The beneficiary or the appointed personal representative of the beneficiary shall have the opportunity to sign the documents and receive a copy of the signed documents.

2. (a) For patients eligible for payments by state governmental agencies for general hospital inpatient services as the patient's primary payor, an independent professional review agent shall mean the commissioner or his designee. In conducting general hospital inpatient discharge reviews in accordance with this section, the commissioner may utilize the services of department personnel or other authorized representatives, including a review agent approved in accordance with paragraph (b) of this subdivision.

(b) For patients who are not beneficiaries of title XVIII of the federal social security act (medicare) nor eligible for payments by state governmental agencies as the patient's primary payor, an independent professional review agent shall mean a third party payor of hospital services or other corporation approved by the commissioner in writing for purposes of conducting general hospital inpatient discharge reviews in accordance with this section. For a third party payor of hospital services or other corporation to be approved as an independent professional review agent in accordance with this paragraph, such third party payor or other corporation must meet the following criteria: (i) the review agent shall employ or otherwise secure the services of adequate medical personnel qualified to determine the necessity of continued inpatient hospital services and the appropriateness of hospital discharge plans; (ii) the review agent shall demonstrate the ability to render review decisions in a timely manner as provided in this section; (iii) the review agent shall agree to provide ready access by the commissioner to all data, records and information it collects and maintains concerning its review activities under this section; (iv) the

review agent shall agree to provide to the commissioner such data, information and reports as the commissioner determines necessary to evaluate the review process provided pursuant to this section; (v) the review agent shall provide assurances that review personnel shall not have a conflict of interest in conducting a discharge review for a patient based on hospital or professional affiliation; and (vi) the review agent meets such other performance and efficiency criteria regarding the conduct of reviews pursuant to this section established by the commissioner. The commissioner may withdraw approval of an independent professional review agent where such review agent fails to continue to meet approval criteria established pursuant to this paragraph.

(c) (i) Each general hospital shall enter into contracts with one or more independent professional review agents approved by the commissioner in accordance with paragraph (b) of this subdivision for purposes of conducting general hospital inpatient discharge reviews in accordance with this section for patients, including uncompensated care patients, who are not beneficiaries of title XVIII of the federal social security act (medicare) nor eligible for payments by state governmental agencies as the patients' primary payor; provided, however, a payor of hospital service included in the payor categories specified in paragraph (a) of subdivision one of section twenty-eight hundred seven-c of this article, other than state governmental agencies, may designate the review agent for their subscribers or beneficiaries or enrolled members and shall reimburse such designated review agent for costs of the discharge review program.

(ii) Notwithstanding any inconsistent provision of law, general hospital contract costs incurred in accordance with subparagraph (i) of this paragraph may be included as an additional charge for general hospital inpatient services in determining patient charges for payors included in the payor categories specified in paragraph (c) of subdivision one of section twenty-eight hundred seven-c of this article, or as a charge in addition to rates of payment for general hospital inpatient services in determining payment due for payors included in the payor categories specified in paragraph (b) of subdivision one of section twenty-eight hundred seven-c of this article, or paragraph (a) of such subdivision one if a payor has not designated a review agent for

such payor's subscribers or beneficiaries or enrolled members, or paragraph (a) or (b) of subdivision two of section twenty-eight hundred seven-c of this article. Such additional charges shall not be subject to maximum charge or rate of payment ceilings determined in accordance with section twenty-eight hundred seven-c of this article for such payors.

3. (a) If a general hospital and the attending physician agree that inpatient hospital service in a general hospital is no longer medically necessary for a patient, other than a beneficiary of title XVIII of the federal social security act (medicare), and an appropriate discharge plan has been established for such patient, at that time the hospital shall provide the patient or the appointed personal representative of the patient with a written discharge notice and a copy of the discharge plan, meeting the requirements of subdivision one of this section.

(b) If a general hospital has determined that inpatient hospital service in a general hospital is no longer medically necessary for a patient, other than a beneficiary of title XVIII of the federal social security act (medicare), and an appropriate discharge plan has been established for such patient but the attending physician has not agreed with the hospital's determinations, the hospital may request by telephone a review of the validity of the hospital's determinations by the appropriate independent professional review agent. Such review agent shall conduct a review of the hospital's determinations and prior to the conclusion of the review shall provide an opportunity to the treating physician and an appropriate representative of the hospital to confer and provide information which may include the patient's clinical records if requested by the review agent. Such review agent shall notify the hospital of the results of its review not later than one working day after the date the review agent has received the request, the records required to conduct such review, and the date of such conferring and receipt of any additional information requested. The hospital shall provide notice to the attending physician of the results of the review. If the review agent concurs with the hospital's determinations, the hospital shall provide the patient or his appointed personal representative with a written notice of such determinations and notice that the patient shall be financially responsible for continued stay, and with a copy of the proposed discharge plan. The patient or the

appointed personal representative of the patient shall have the opportunity to sign the notice and a copy of the proposed discharge plan and receive a copy of both signed documents. Every general hospital shall use a common notice developed and disseminated in accordance with rules and regulations adopted by the council and approved by the commissioner which shall indicate the determinations made, shall state the reasons therefor and that the patient's attending physician has disagreed and shall state that the patient or the appointed personal representative of the patient may request a review of such determinations by the appropriate review agent.

4. A patient in a general hospital, or the appointed personal representative of the patient, who receives a written notice in accordance with paragraph (a) or (b) of subdivision three of this section, may request a review by the appropriate review agent of the determinations set forth in such notice related to medical necessity of continued inpatient hospital service, the appropriateness of the discharge plan and the availability of required continuing health care services.

(a) If a patient while still hospitalized or while no longer an inpatient, or the appointed personal representative of such patient, requests a review by the appropriate review agent, the hospital shall promptly provide to the review agent the records required to review the determinations. Such request for a patient no longer an inpatient shall take place no later than thirty days after receipt of a notice provided in accordance with subdivision three of this section or seven days after receipt of a complete bill for all inpatient services rendered, whichever is later. The review agent shall conduct a review of such determinations and shall provide the treating physician and an appropriate representative of the hospital with an opportunity to confer and provide information prior to the conclusion of the review. The review agent shall provide written notice to the patient, or the appointed personal representative of the patient, and the hospital of the results of the review within three working days of receipt of the requests for review and the records required to review the determinations. The hospital shall provide notice to the attending physician of the results of the review.

(b) Notwithstanding the provisions of paragraph (a) of this subdivision, if a patient while still an inpatient in the general hospital, or the appointed personal representative of the patient, requests a review by the appropriate review agent not later than noon of the first working day after the date the patient, or the appointed personal representative of the patient, receives the written notice, the hospital shall provide to the appropriate review agent the records required to review the determinations by the close of business of such working day. The appropriate review agent shall conduct a review of such determinations and provide written notice to the patient, or the appointed personal representative of the patient, and the hospital of the results of the review not later than one full working day after the date the review agent has received the request for review and such records. The hospital shall provide notice to the attending physician of the results of the review.

5. Notwithstanding any inconsistent provision of law, if the appropriate review agent, upon any review conducted pursuant to paragraph (b) of subdivision three or pursuant to subdivision four of this section does not concur in the determinations, continued stay in a general hospital shall be deemed necessary and appropriate for the patient for purposes of payment for such continued stay in accordance with section twenty-eight hundred seven-c of this article.

6. If a patient eligible for payment for inpatient hospital services under a case based payment per discharge determined in accordance with section twenty-eight hundred seven-c of this article, or the appointed personal representative of the patient, requests a review by the appropriate review agent in accordance with paragraph (b) of subdivision four of this section, the hospital may not demand or request any payment for additional inpatient hospital services provided to such patient subsequent to the proposed time of discharge and prior to noon of the day after the date the patient or the appointed personal representative of the patient receives notice of the results of the review by the review agent other than payment determined in accordance with section twenty-eight hundred seven-c of this article and deductibles, copayments, or other charges that would be authorized for a patient for

whom inpatient hospital services in a general hospital continue to be necessary and appropriate.

7. In any review conducted pursuant to paragraph (b) of subdivision three or pursuant to subdivision four of this section, the review agent shall solicit the views of the patient involved, or the appointed personal representative of the patient, and the attending physician.

8. Each patient, or the appointed personal representative of the patient, provided a notice by a general hospital in accordance with subdivision three of this section shall be provided at such time by the hospital with a notice, in a form developed in accordance with rules and regulations adopted by the council and approved by the commissioner, of such patient's right to request a discharge review in accordance with this section. The patient or the appointed personal representative of the patient shall have the opportunity to sign this form and receive a copy of the signed form.

9. Upon discharge of a blind or visually impaired patient, a hospital shall offer to provide the patient's discharge plan in a large print version or, at the patient's or patient's representative's request, as an audio recording, to be made available to such patient or such patient's representative on compact disc or other medium as the hospital may offer, or as an electronically transmitted digital file, in addition to a written copy of the discharge plan.

10. The council shall adopt rules and regulations, subject to the approval of the commissioner, necessary to implement this section.

*** § 2803-j. Information for maternity patients.** 1. The commissioner shall require that every hospital and birth center shall prepare in printed or photocopied form and distribute at the time of pre-booking directly to each prospective maternity patient and, upon request, to the general public an informational leaflet. Such leaflet shall be designed by the commissioner and shall contain brief definitions of maternity related procedures and practices as specified in subdivision two of this

section and such other material as deemed appropriate by the commissioner. Hospitals and birth centers may also elect to distribute additional explanatory material along with the maternity patients informational leaflet. The commissioner shall make the information contained in the leaflet available on the department's website and shall present all annual statistical information compiled pursuant to subdivision three of this section on the department's website for the most recent five years for which such data is available.

1-a. The informational leaflet shall also include an explanation of the special provisions relating to maternity care and coverage under the insurance law and section twenty-eight hundred three-n of this article, and suggest that expectant parents check their insurance policies for the details of their maternity coverage.

1-b. The informational leaflet shall also include information relating to the physical and mental health of the maternity patient after discharge from the hospital, including, but not limited to, information about maternal depression. The commissioner, in collaboration with the commissioner of mental health, shall review and update the information on maternal depression contained in the leaflet, as necessary. The informational leaflets shall be made available to patients in the top six languages spoken in the state, other than English, according to the latest available data from the United States Census Bureau.

1-c. The informational leaflet shall also include a description of the dangers of shaking infants and young children. The description shall include information on the effects of shaking infants and young children, appropriate ways to manage the causes of shaking infants and young children, and discussion on how to reduce the risks of shaking infants and young children.

1-d. The informational leaflet shall also include the recommendations from the American Academy of Pediatrics relating to safe sleep, including sleep space and sleep position, and discussion on how to reduce the risk of infant death through safe sleep practices. The information described in this subdivision may take the form of a video

in lieu of a leaflet.

2. Such leaflet shall also include statistics relating to the annual percentage of maternity related procedures performed at such hospital or birth center, as provided by the commissioner, including but not limited to the following:

- (a) the annual rate of cesarean sections, primary, repeat and total, performed at such facility;
- (b) the annual percentage of women with previous cesarean sections who have had a subsequent successful vaginal birth;
- (c) the annual percentage of deliveries by midwives;
- (d) the annual percentage of births utilizing electronic fetal monitoring listed on the basis of external and internal;
- (e) the annual percentage of births utilizing forceps, listed on the basis of low forceps delivery and mid forceps delivery;
- (f) the annual percentage of breech births delivered vaginally;
- (g) the annual percentage of births utilizing analgesia;
- (h) the annual percentage of births utilizing anesthesia including general, spinal, epidural, and paracervical listed on the basis of vaginal and cesarean births;
- (i) the annual percentage of births utilizing induction of labor;
- (j) the annual percentage of births utilizing augmentation of labor;
- (k) the annual percentage of vaginal births utilizing episiotomies;
- (l) whether birthing rooms are available for use in the facility;
- (m) whether rooming-in is available in the facility, on the basis of twenty-four hours a day or daytime;
- (n) whether the facility conducts safety drills to prepare for obstetric emergencies;
- (o) whether the facility participates in quality improvement initiatives;
- (p) whether the facility has an agreement and policy to arrange for emergent transfer of care for critically ill pregnant people/infants to higher levels of care (applicable only for those facilities that are not the designated regional perinatal center or a quaternary or tertiary care center with Level III-IV NICU);
- (q) whether the facility has a written community needs assessment plan to reduce racial disparities and address community needs;

(r) whether the facility offers, upon patient request, an autopsy for stillbirth; and

(s) whether the facility offers bereavement support for patients that have suffered a stillbirth or third trimester fetal loss.

3. Compilation of the statistics set out in subdivision two of this section shall be the responsibility of the commissioner.

4. Statistical information shall be presented in the most recent one year aggregate.

5. (a) The commissioner shall establish an immunization schedule for newborn children. The immunization schedule shall chart out recommended immunizations against certain diseases and illnesses and age-appropriate times for the administration of each immunization. The immunization schedule shall also include information on the importance of getting children immunized at the recommended ages. The immunization schedule shall also include the toll-free telephone number operated by the department as part of its immunization education efforts. The immunization schedule shall be in accordance with recommendations established by the New York state department of health.

(b) The commissioner shall provide the immunization schedule to the local registrars for distribution pursuant to paragraph (b) of subdivision one of section four thousand one hundred thirty-seven of this chapter.

6. Every hospital and birth center shall request that a parent and/or parents, which shall mean and include biological and adoptive parents, guardians, or other persons in parental relationship to a newborn child, if available, view (a) a video presentation, approved by the commissioner, on the dangers of shaking infants and young children, and the symptoms of shaken baby syndrome, and (b) a video presentation, approved by the commissioner, on the dangers of drowning for infants and young children. After viewing such video presentations or upon refusal to view such video presentations, the hospital or birth center shall request that such parent and/or parents sign a form stating that they have viewed or refused to view such video presentations. All training

materials and forms required to implement the provisions of this subdivision shall be provided by the commissioner.

* NB There are 2 § 2803-j's

*** § 2803-j. Nursing home nurse aide registry.** 1. The department shall develop and maintain, or cause to be developed and maintained, a nurse aide registry of individuals who have successfully completed a nurse aide training program approved by the commissioner or the commissioner of education or the accrediting body of other states or federal authorities including the military, and a competency evaluation program approved by the commissioner. The department, or any entity with which the department contracts, may charge a fee not to exceed one hundred sixty-five dollars, adjusted annually to reflect increases in the consumer price index for the purposes of implementing the competency evaluation program approved by the commissioner and maintaining the registry, as provided for in this section.

2. In accordance with federal law and regulation, no charges shall be imposed on a nurse aide for any costs for the nurse aide training or competency evaluation program.

3. The nurse aide registry shall include, but not be limited to, the following information:

(a) Identification of individuals who have successfully completed a nurse aide training and competency evaluation program, or a nurse aide competency evaluation program;

(b) Name, address (at time competency test was passed), and date of birth, of individuals listed in the registry;

(c) Name and date of state approved training and competency evaluation program successfully completed by an individual; and

(d) In accordance with the provisions of section twenty-eight hundred three-d of this article, findings of instances of physical abuse, mistreatment, neglect or misappropriation of resident property by a nurse aide in a nursing home, and any brief statement by the nurse aide disputing the findings.

4. Notwithstanding any inconsistent provision of this article, unless otherwise required by federal law or regulation as a condition of federal aid, in which case such law or regulation shall be controlling and the provisions of paragraph a of subdivision seven of section twenty-eight hundred seven of this article shall not apply, the cost of any fee charged pursuant to subdivision one of this section paid by a residential health care facility shall be included in rates of payment determined in accordance with this article for such residential health care facility based on estimated costs for a prospective rate period and subsequently reconciled to actual expenses and statistics for such rate period by prospective adjustments of rates of payment.

* NB There are 2 § 2803-j's

§ 2803-k. In-patient nasogastric feeding procedures. The commissioner shall promulgate and administer regulations and policies governing the maximum size of nasogastric feeding tubes in hospitals and residential health care facilities to protect patients from undue discomfort.

§ 2803-l. Community service plans. 1. The governing body of a voluntary non-profit general hospital must issue an organizational mission statement identifying at a minimum the populations and communities served by the hospital and the hospital's commitment to meeting the health care needs of the community.

2. The governing body must at least every three years:

- (i) review and amend as necessary the hospital mission statement;
- (ii) solicit the views of the communities served by the hospital on such issues as the hospital's performance and service priorities;
- (iii) demonstrate the hospital's operational and financial commitment to meeting community health care needs, to provide charity care services and to improve access to health care services by the underserved; and
- (iv) prepare and make available to the public a statement showing on a combined basis a summary of the financial resources of the hospital and related corporations and the allocation of available resources to hospital purposes including the provision of free or reduced charge

services.

3. The governing body must at least annually prepare and make available to the public an implementation report regarding the hospital's performance in meeting the health care needs of the community, providing charity care services, and improving access to health care services by the underserved.

4. The governing body shall file with the commissioner its mission statement, its annual implementation report, and at least every three years a report detailing amendments to the statement and reflecting changes in the hospital's operational and financial commitment to meeting the health care needs of the community, providing charity care services, and improving access to health care services by the underserved.

§ 2803-m. Discharge of hospital patients to adult homes. (1) A patient about to be discharged as an inpatient from a hospital as defined in section twenty-eight hundred one of this article to an adult home, enriched housing program or residence for adults as defined in section two of the social services law, shall be referred only to such home, program or residence that is consistent with that patient's needs and that operates pursuant to section four hundred sixty of the social services law. No patient shall be directly referred to any facility that is on the "do not refer list" pursuant to subdivision fifteen of section four hundred sixty-d of the social services law; provided, however, that any patient who was a resident of an adult care facility at the time of his or her admission to the hospital shall be permitted to return to such adult care facility regardless of the status of its operating certificate.

(2) No patient about to be discharged as an inpatient from a hospital shall be referred to any adult home, enriched housing program or residence for adults, as defined in section two of the social services law, where the hospital has received a written notice pursuant to subdivision eleven of section four hundred sixty-d of the social services law that such home or residence is subject to enforcement

actions by the department; provided, however, that any patient who was a resident of an adult care facility at the time of his or her admission to the hospital shall be permitted to return to such adult care facility regardless of any enforcement actions. Referrals may resume when such enforcement actions are resolved.

§ 2803-n. Hospital care for maternity patients. 1. When a general hospital provides maternity care:

(a) Inpatient care for mothers and newborns shall be offered for not less than forty-eight hours after childbirth for any delivery other than a caesarean section, and for more than forty-eight hours when medically necessary. For a caesarean section, inpatient care for mothers and newborns shall be offered for not less than ninety-six hours after childbirth, and for more than ninety-six hours when medically necessary.

(b) Maternity care shall also include, at minimum, parent education, assistance and training in breast or bottle feeding, education on maternal depression, education on maternal depression screening and referrals, and the performance of any necessary or appropriate maternal and newborn clinical assessments and screenings and appropriate referrals. Notwithstanding this requirement, nothing in this paragraph is intended to result in the hospital charging any amount for such services in addition to the applicable charge for the maternity inpatient hospital admission.

(c) (i) The hospital shall adopt, implement and periodically update standard protocols for management of obstetric hemorrhage. Such protocols shall address early recognition and assessment and readiness to respond in a multidisciplinary manner. Such protocols shall utilize risk assessment tools such as the toolkit established or identified by the department under subdivision three of this section and shall include a response plan providing for the triage and transfer to higher level facilities if needed.

(ii) The hospital shall maintain and furnish protocols for management of obstetric hemorrhage required pursuant to subparagraph (i) of this paragraph to the department, immediately upon request.

2. This section shall not limit the mother's option to be discharged

earlier than the time periods established in subdivision one of this section.

3. The commissioner shall develop guidance to hospitals on obstetric hemorrhage protocols, in consultation with clinical experts, and develop or identify an existing toolkit on obstetric hemorrhage management, which may include a hemorrhage care checklist for use by hospitals as part of the protocols and guidance on simulation training. The commissioner shall post the guidance and toolkit on the department's website.

4. The hospital shall adopt, implement and periodically update standard protocols for management of other emergency medical conditions related to pregnancy for expectant mothers being admitted to the hospital or presenting to the emergency department, including but not limited to pre-term labor. Such protocols shall require the hospital to determine whether an expectant mother is experiencing an emergency medical condition, and upon making a diagnosis of an emergency medical condition, admit the expectant mother to the hospital or treat them in the emergency room for close observation and continuous monitoring until it is deemed medically safe for discharge or transfer in accordance with state and federal requirements including the federal Emergency Medical Treatment and Labor Act (EMTALA).

§ 2803-o. Hospital care for mastectomy, lumpectomy, and lymph node dissection patients. 1. When a general hospital provides mastectomy surgery, lymph node dissection or a lumpectomy, inpatient care shall be offered for a period as determined by the attending physician in consultation with the patient to be medically appropriate.

2. Every general hospital that provides mastectomy surgery, lymph node dissection or a lumpectomy shall provide information to the patient concerning the option of reconstructive surgery following such procedures, including both breast and chest wall reconstructive surgery and the availability of coverage for reconstructive surgery, in accordance with the provisions of sections three thousand two hundred

sixteen, three thousand two hundred twenty-one and four thousand three hundred three of the insurance law and applicable provisions of federal law. The information shall be provided to the patient in writing and in advance of obtaining consent to the surgical procedure. The information provided shall include at least the following:

- (a) a description of the various reconstructive options and the advantages and disadvantages of each. Such description shall include aesthetic flat closure as such term is defined by the National Cancer Institute;

- (b) a description of the provisions assuring coverage by public and private insurance plans of the costs related to reconstructive surgery under federal and state law;

- (c) a description of how a patient may access reconstructive care, including the potential of transferring care to a facility that provides reconstructive care or choosing to pursue reconstruction after completion of breast cancer surgery and chemo/radiotherapy, if warranted;

- (d) such other information as may be required by the commissioner.

§ 2803-p. Disclosure of information concerning family violence. 1. As used in this section:

- (a) Domestic violence shall mean acts as referred to in and qualified by section four hundred fifty-nine-a of the social services law.

- (b) Child abuse and maltreatment shall have the same meaning as provided for in section four hundred twelve of the social services law.

- (c) Family violence shall mean any act which would constitute domestic violence as defined in paragraph (a) of this subdivision or any act which would constitute child abuse and maltreatment as defined in paragraph (b) of this subdivision.

2. Every hospital having maternity and newborn services shall provide information concerning family violence to parents of newborn infants at any time prior to the discharge of the mother. Such information shall also be provided by every diagnostic and treatment center offering prenatal care services to women upon an initial prenatal care visit. The commissioner shall, in consultation with the state office for the

prevention of domestic violence and the department of social services, prepare, produce and transmit such notice to such facilities in quantities sufficient to comply with the requirements of this section. Such notice shall contain information which shall include but not be limited to the effects of family violence and the services available to women and children experiencing family violence.

Such information shall be in clear and concise language readily comprehensible. Nothing in this section shall preclude a facility from providing the notice required by this section as an addendum to, or in connection with, any other information required to be provided by any other provision of law, rule or regulation.

3. No cause of action of whatever nature or kind arising out of a failure to give or receive the notice required by this section shall accrue to any person against the state or any subdivision or agency thereof or any hospital or diagnostic and treatment center providing prenatal care services.

§ 2803-q. Family councils in residential health care facilities. 1. As used in this section:

(a) Family council means an organization of family members, friends, or representatives of two or more residents of a residential health care facility, organized to act under this section.

(b) Facility means the residential health care facility for which a family council is formed.

2. No residential health care facility may prohibit the formation of a family council, and, when requested by a member of the resident's family or the resident's representative, the family council shall be allowed to meet in a common meeting room of the facility, in private without facility staff at least once a month during mutually agreed upon hours.

3. Facility policies on family councils shall in no way limit the right of residents, family members, and family council members to meet independently with outside persons, including members of nonprofit or

government organizations or with facility personnel during non-working hours.

4. Family councils shall also be provided adequate space on a prominent bulletin board or other posting area for the display of meeting notices, minutes, newsletters, or other information pertaining to the operation or interest of the family council.

5. Staff or visitors may attend family council meetings, at the group's invitation.

6. The facility shall provide a designated staff person who shall be responsible for providing assistance and responding to written requests that result from family council meetings.

7. The facility shall consider the views and act upon the grievances and recommendations of a family council concerning proposed policy and operational decisions affecting resident care and life in the facility.

8. The facility shall respond in writing to written requests or concerns of the family council, within ten working days.

9. When a family council exists, the facility shall include notice of the family council meetings in at least a quarterly mailing, and shall inform family members or representatives of new residents who are identified on the admissions agreement, during the admissions process, or in the resident's records, of the existence of the family council. The notice shall include the time, place, and date of meetings, and the person to contact regarding involvement in the family council.

10. No facility shall willfully interfere with the formation, maintenance, or promotion of a family council. For the purposes of this subdivision, willful interference shall include, but not be limited to, discrimination or retaliation in any way against an individual as a result of his or her participation in a family council, or the willful scheduling of facility events in conflict with a previously scheduled family council meeting.

11. Violation of the provisions of this section shall constitute a violation of the resident's rights pursuant to this chapter.

§ 2803-r. Dissemination of information about the abandoned infant protection act. 1. All hospitals and clinics shall notify their prenatal care and obstetric patients of the provisions of the abandoned infant protection act, using materials provided by the office of children and family services. The department shall develop agreements with societies and organizations of medical practitioners under which the department or the office of children and family services shall provide materials to such societies to provide appropriate education and outreach concerning the abandoned infant protection act to their members and the public. Criminal penalties for violation pursuant to subdivisions one and two of section twelve-b of this chapter shall not apply to this section.

2. The commissioner, in consultation with the office of children and family services, shall adopt rules and regulations necessary to implement this section.

§ 2803-s. Access to product recall information. The commissioner shall require that every hospital and birth center distribute at the time of pre-booking or admission directly to each maternity patient and, upon request, to the general public an informational leaflet. Such leaflet shall be designed by the commissioner in conjunction with the secretary of state and shall contain information detailing how parents or guardians of infants and children can subscribe to the United States consumer product safety commission's e-mail subscription lists to receive consumer product recall and safety news by e-mail from the United States consumer product safety commission and such other material as deemed appropriate by the commissioner. Such leaflet shall be made available to hospitals and birth centers by the department on its website and shall be provided in English, as well as the top six languages other than English spoken in the state according to the latest available data from the United States Bureau of Census.

§ 2803-t. Preadmission information. 1. Any general hospital that provides preadmission information to a patient, shall offer a blind or visually impaired patient a large print version or, at the patient's or patient's representative's request, an audio recording, to be made available to such patient or such patient's representative on compact disc or other medium as the hospital may offer, or as an electronically transmitted digital file, in addition to a written copy of any preadmission information.

2. Each general hospital, during the intake and registration of each patient, shall obtain and record information as specified by the department in regulation or guidance to determine whether such patient requires a reasonable accommodation for a disability.

3. Nothing contained herein shall require a patient to answer the inquiries about a disability if they wish not to do so.

§ 2803-u. Hospital substance use disorder policies and procedures. 1. The office of alcoholism and substance abuse services, in consultation with the department, shall develop or utilize existing educational materials to be provided to general hospitals to disseminate to individuals with a documented substance use disorder or who appear to have or be at risk for a substance use disorder during discharge planning pursuant to section twenty-eight hundred three-i of this article. Such materials shall include information regarding the various types of treatment and recovery services, including but not limited to: inpatient, outpatient, and medication-assisted treatment; how to recognize the need for treatment services; information for individuals to determine what type and level of treatment is most appropriate and what resources are available to them; and any other information the commissioner deems appropriate. General hospitals shall include in their policies and procedures treatment protocols, consistent with medical standards, to be utilized by the emergency departments in general hospitals for the appropriate use of medication-assisted treatment,

including buprenorphine, prior to discharge, or referral protocols for evaluation of medication-assisted treatment when initiation in an emergency department of a general hospital is not feasible.

2. Every general hospital shall: (a) within existing or in addition to current policies and procedures, develop, maintain and disseminate, written policies and procedures, for the identification, assessment and referral of individuals with a documented substance use disorder or who appear to have or be at risk for a substance use disorder as defined in section 1.03 of the mental hygiene law;

(b) establish and implement training, within existing or in addition to current training programs, for all individuals licensed or certified pursuant to title eight of the education law who provide direct patient care regarding the policies and procedures established pursuant to this section; and

(c) except where an individual has come into the hospital under section 22.09 of the mental hygiene law, if the hospital does not directly provide substance use disorder services, then it shall refer individuals in need of substance use disorder services to and coordinate with substance use disorder services programs that provide behavioral health services, as defined in section 1.03 of the mental hygiene law.

3. Upon commencement of treatment, admission, or discharge of an individual with a documented substance use disorder or who appears to have or be at risk for a substance use disorder, including discharge from the emergency department, such hospital shall inform the individual of the availability of the substance use disorder treatment services that may be available to them through a substance use disorder services program.

4. The commissioner, in consultation with the commissioner of the office of alcoholism and substance abuse services, shall make regulations as may be necessary and proper to carry out the provisions of this section.

*** § 2803-v. Lymphedema information distribution.** 1. For the purposes

of this section, the term "lymphedema" shall mean an accumulation of fluid in the interstitial tissue that causes swelling, most often in the arms and/or legs, and occasionally in other parts of the body, from any cause.

2. The commissioner shall design an informational packet about lymphedema and shall require that every general hospital distribute such packet to all patients at high risk of developing lymphedema. Patients deemed high risk shall include:

(a) patients who experience any significant injury to soft tissue that could reasonably be expected, using sound medical judgment, as a result of severity and nature thereof, to compromise or cause to be ineffective the drainage of the lymphatic system;

(b) patients who experience recurrent or persistent bacterial infections that could reasonably be expected, using sound medical judgment, as a result of severity and nature thereof, to compromise or cause to be ineffective the drainage of the lymphatic system; or

(c) patients who have had corrective surgical procedures performed that may have interfered with the lymph drainage by severing local lymphatics in a manner that may jeopardize reconstitution and recovery of lymph drainage.

* NB There are 2 § 2803-v's

*** § 2803-v. Standing orders for newborn care in a hospital.** 1. A hospital may establish standing orders for the care of newborns in the hospital until the discharge of the newborn from the hospital following the birth, which may authorize an attending nurse to provide services and care to healthy newborns.

2. As used in this section, unless the context clearly requires otherwise:

(a) "Hospital" means a hospital that routinely provides perinatal care to newborns.

(b) "Attending practitioner" means the physician, nurse practitioner, physician assistant or midwife, acting within his or her lawful scope and terms of practice, attending the birth or postnatal care of a

newborn in a hospital.

(c) "Attending nurse" means a registered nurse attending the postnatal care of a newborn, acting within his or her lawful scope of practice.

(d) "Standing order" means a non-patient specific order for the care of healthy newborns in the hospital, established under this section.

3. A standing order may be implemented in the case of any newborn when (a) directed by the attending practitioner, or (b) in the absence of a specific direction by the attending practitioner, the attending nurse determines, in his or her professional judgment, that implementing the standing order for the newborn is clinically appropriate and consistent with the standing order, the hospital's policies and applicable regulations. The standing order shall not be implemented in a specific situation where the hospital's policies, the standing order, or applicable regulations provide otherwise.

4. (a) A standing order shall provide for the circumstances in which the condition or change in condition of the newborn or the newborn's mother, or other circumstances relating to providing services and care to the newborn, require departure from the terms of the standing order.

(b) Where an attending nurse implementing a standing order becomes aware of circumstances that, in his or her professional judgment, reasonably indicate a need to depart from the terms of the standing order, he or she shall so advise the attending practitioner. In such circumstances, if the attending nurse determines, in his or her professional judgment, that the health of the newborn requires departing from the standing order prior to receiving direction from the attending practitioner, the attending nurse may do so, consistent with his or her lawful scope of practice, the hospital's policies and applicable regulations.

(c) The standing order shall provide, including the times and manner, that an attending practitioner shall review and acknowledge in writing the services and care provided to the newborn under the standing order and the condition of the newborn.

5. (a) A standing order may provide for circumstances in which it shall not be implemented, or implemented only at the order of an

attending practitioner, which may include but not be limited to:

- (i) lack of or inadequate prenatal care;
- (ii) a birth not attended by an attending practitioner;
- (iii) a birth not occurring in a hospital; or
- (iv) a premature or low birth weight birth.

(b) A standing order shall be dated, timed, and authenticated promptly in the patient's medical record by the attending practitioner acting in accordance with law, including scope-of-practice laws, hospital policies, and medical staff bylaws, rules and regulations.

6. A standing order may be implemented only if the implementing hospital:

(a) establishes that the order has been reviewed and approved by the hospital's medical staff and nursing and pharmacy leadership, and signed by a physician affiliated with the hospital or, in the case of a midwifery birth center, by a midwife affiliated with the hospital;

(b) demonstrates that the order is consistent with nationally recognized evidence-based guidelines; and

(c) ensures that the periodic and regular review of the order is conducted by the hospital's medical staff and nursing and pharmacy leadership to determine the continuing usefulness and safety of the order.

7. A standing order is a medical regimen; it shall be consistent with the lawful scope of practice of a registered nurse.

8. The commissioner may make regulations governing the terms, procedures and implementation of standing orders.

* NB There are 2 § 2803-v's

*** § 2803-w. Independent quality monitors for residential health care facilities.** The department may require a residential health care facility to contract with an independent quality monitor selected, and on reasonable terms determined, by the department, pursuant to a selection process conducted notwithstanding sections one hundred twelve or one hundred sixty-three of the state finance law, for purposes of

monitoring the operator's compliance with a written and mandatory corrective plan and reporting to the department on the implementation of such corrective action, when the department has determined in its discretion that operational deficiencies exist at such facility that show:

1. a condition or conditions in substantial violation of the standards for health, safety, or resident care established in law or regulation that constitute a danger to resident health or safety;

2. a pattern or practice of habitual violation of the standards of health, safety, or resident care established in law or regulation; or

3. any other condition dangerous to resident life, health, or safety. Such written mandatory corrective plans shall include caps on administrative and general costs that are unrelated to providing direct care (including providing at least minimum staffing levels as determined by the department) or care coordination.

* NB There are 2 § 2803-w's

*** § 2803-w. Disclosure of information concerning pregnancy complications.** Every hospital offering maternity or women's wellness services shall provide the information developed pursuant to subdivisions two and four of section two hundred sixty-six of this chapter, as added by chapter 342 of the laws of 2014, to pregnant patients as clinically appropriate, but prior to discharge. In addition, such information shall be provided at the time of pre-booking to each prospective maternity patient and, upon request, to the general public. Such information shall also be provided by every diagnostic and treatment center offering prenatal care services upon the initial prenatal care visit.

* NB There are 2 § 2803-w's

§ 2803-x. Requirements related to nursing homes and related assets and operations. 1. The operator of a nursing home shall notify the

commissioner of any common or familial ownership of any corporation, other entity or individual providing services to the operator or the facility. Such information shall also be included in the residency agreement for prospective residents and as addendums for residents currently residing in the residential health care facility nursing home. The operator shall notify the department at least ninety days prior to entering into any new common or familial ownership of any corporation, or other entity or individual providing services to the operator of the facility. The operator shall also provide notification to all residents and their representatives, staff and their representatives, and the state office of the long-term care ombudsman.

2. The operator of a nursing home shall, on an annual basis, attest to the department, in a form determined by the department, to the accuracy of the information provided to the department under this section.

3. The operator of a nursing home may not enter into any arrangement to guarantee the debt or other obligation of a party which has not received establishment approval.

4. The operator of a nursing home shall notify the department and the state office of the long-term care ombudsman at least ninety days prior to executing a letter of intent or other contractual agreement related to:

a. the sale, mortgaging, encumbrance, or other disposition of the real property of the facility; and

b. the consulting, operations, staffing agency or other entity to be involved in the operations of the facility.

5. The operator of a nursing home shall notify all residents and their representatives, staff and their representatives, and the state office of the long-term care ombudsman within five days of executing a binding letter of intent or other contractual agreement as described in paragraphs a and b of subdivision four of this section.

6. Where the operator of a nursing home provides or purports to provide, by any contract, agreement or arrangement, for any party to carry out or be delegated any activity or responsibility relating to the nursing home, that shall not diminish any responsibility or liability that the operator would otherwise have for any such activity or responsibility or for the operation of the nursing home.

7. Any new owner or operator of a nursing home shall retain all employees of the nursing home for at least a sixty-day transition period, except for cause, and except for the nursing home administrator, the director of nursing and any other supervisors, or any controlling person, principal stockholder or principal member, and shall not reduce the wages or benefits, or modify any other terms and conditions of employment, economic or otherwise during the transition period. Nothing herein shall require any owner or operator to discontinue any pending disciplinary actions, including but not limited to termination, that were initiated before the sale of the nursing home. Nothing herein shall prevent an owner or operator from determining the overall size of the workforce at the facility, except as provided otherwise in this section or other applicable law.

8. In any instance where a nursing home is sold or otherwise transferred and used for a purpose which is not a health care purpose, the operator shall remit to the department an amount equivalent to the undepreciated value of capital assets for which the provider has been funded or reimbursed through Medicaid rate adjustments or otherwise funded or reimbursed with resources provided by the state for the purpose of improvement or transformation.

§ 2803-y. Provision of residency agreement. The operator of a residential health care facility shall provide to prospective residents who inquire about admission, and post on its website, a copy of the facility's entire approved residency agreement, including the non-governmental rates charged to residents.

*** § 2803-z. Transfer, discharge and voluntary discharge requirements for residential health care facilities.** 1. (a) No residential health care facility shall transfer or discharge a resident unless such transfer or discharge is necessary for the resident's health, safety, or welfare, such transfer or discharge is necessary to preserve the health, safety, or welfare of other residents, the facility discontinues operation or the resident has failed to pay or make arrangements for payment for a stay at the facility, unless stated otherwise by this section.

(b) Prior to a facility initiating a transfer or discharge of a resident, the facility shall use its best efforts, including compliance with applicable federal and state regulations, to secure appropriate placement or a residential arrangement for the resident, other than temporary housing assistance. For purposes of this section, "temporary housing assistance" shall include but not be limited to a family shelter, a shelter for adults, a hotel, an emergency apartment, a domestic violence shelter, or a safe house for refugees. No residential health care facility shall initiate a transfer or discharge of a resident to the home of another individual without the written consent of the resident and the other individual and the other individual has received and acknowledged the comprehensive discharge plan to address the resident's needs.

(c) At least thirty days prior to a facility-initiated transfer or discharge, the residential health care facility shall provide written notification of the transfer or discharge to the resident, the resident's lawful representative, if any, a family member of the resident, if known, and the long-term care ombudsman under section two hundred eighteen of the elder law. The notification shall be in a language and manner that is understandable to the resident and shall state the basis for the transfer or discharge, which shall be recorded in the resident's clinical record.

(d) A resident may be transferred or discharged if the facility is unable to meet the needs of the resident. In that case, the resident's clinical record shall document (i) the specific need or needs that cannot be met, (ii) the facility's attempts to meet the resident's needs, and (iii) the services available at the receiving facility.

(e) When a resident is being transferred or discharged because the

resident cannot be cared for safely, or is a danger to others, prior notice may be provided less than thirty days prior to the transfer or discharge but shall be provided as soon as practicable prior to transfer or discharge. The facility shall document in the resident's clinical record the risks to the resident or others if the resident were to remain in the facility.

(f) A residential health care facility may transfer or discharge a resident because the resident does not need residential health care facility services.

2. Where the resident's transfer or discharge is initiated by the resident and the clinical record notes that a family member or designated representative has requested notification, and such notification is otherwise lawful, the residential health care facility shall notify the family member or designated representative of the resident's voluntary transfer or discharge as soon as practicable after the resident initiates the voluntary transfer or discharge process and in no event more than forty-eight hours thereafter. The notice shall not be provided if the resident specifically requests that the family member or designated representative not be notified.

3. A residential health care facility shall not compel or attempt to compel an individual to voluntarily transfer or discharge from the facility. In the event a resident seeks a voluntary transfer or discharge, the facility shall document, as part of the resident's medical records, the reason the resident is seeking a transfer or discharge. If the resident declines to provide a reason, the facility shall document that in the resident's medical record.

4. Nothing in this section shall diminish a resident's rights to independent personal decisions and knowledge of available choices, nor shall it diminish the facility's responsibility to encourage and assist in the fullest possible exercise of those rights under section two thousand eight hundred three-c of this article, or other applicable law.

* NB There are 2 § 2803-z's

*** § 2803-z. Antimicrobial resistance prevention and education. 1.**

Every general hospital and nursing home shall comply with and meet all applicable requirements of the federal Medicare and Medicaid conditions of participation for antimicrobial stewardship programs in health care facilities, including training requirements regarding antimicrobial resistance and infection prevention and control. Additionally, such program shall incorporate an ongoing process to measure the impact of the program, including review, at least annually, of antimicrobial utilization data with development of response plans for high or increasing utilization.

2. The commissioner shall make such rules and regulations as may be necessary and proper to carry out the provisions of this section.

* NB There are 2 § 2803-z's

§ 2804. Units for hospital and health-related affairs. 1. The commissioner shall establish within the department a unit for hospital affairs to assist him in carrying out the provisions of this article.

2. The commissioner shall establish within the department a unit to assist him in carrying out the provisions of this article relating to facilities providing health-related service. He shall also appoint a council to advise on matters affecting health-related service.

*** § 2804-a. State task force on clinical practice guidelines and medical technology assessment.**

1. A state task force is hereby created on clinical practice guidelines and medical technology assessment which shall consist of sixteen members. At least half of the membership shall be physicians certified by specialty society boards officially recognized by the American Board of Medical Specialties. Such physician board members shall be selected from nominees recommended by specialty societies recognized by the American Board of Medical Specialties. Appointments shall be made as follows: six shall be appointed by the governor of

which at least two shall be from specialty society nominees; four shall be appointed by the temporary president of the senate of which at least two shall be from specialty society nominees; four shall be appointed by the speaker of the assembly of which at least two shall be from specialty society nominees; and one each shall be appointed by the minority leaders of the senate and assembly both of whom shall be specialty society nominees. The commissioner shall also serve as an ex officio member of the task force. The membership of the task force shall appoint a chairperson who shall be selected by a majority vote of the task force membership. All appointments shall be made by April first, nineteen hundred ninety-four.

2. For the purposes of this section, the following terms shall have the following meanings: (a) "clinical practice guidelines" shall mean systematically developed statements to assist physician and patient decisions about appropriate health care for specific clinical circumstances; and

(b) "medical technology" shall mean an instrument or unit of equipment or technique for use as a health related treatment, testing or diagnostic tool.

3. Task force members shall receive no compensation but shall be reimbursed for travel expenses incurred in the performance of their duties.

4. The task force may establish medical specialty advisory committees to assist in carrying out its responsibilities pursuant to this section.

5. The task force shall solicit the cooperation and participation of medical specialty organizations recognized by the American Board of Medical Specialties with clinical practice guideline experience. The state task force shall meet as necessary to fulfill its responsibilities.

6. The task force, in consultation with the commissioner, shall solicit specific research and/or project proposals from medical specialty societies recognized by the American Board of Medical

Specialties to promote the development and application of clinical practice guidelines and appropriate use of medical technology. Speciality societies, at their option, may incorporate the involvement of any other organization which they deem appropriate into their proposal. The task force shall then recommend to the commissioner specific research projects to be undertaken by such specialty society candidates for grants and contracts pursuant to subdivision fifteen of section two hundred six of this chapter. The task force shall not recommend any projects for the purpose of developing clinical practice guideline-based reimbursement methodologies or any other regulations.

7. The task force in cooperation with the medical specialty organizations recognized by the American Board of Medical Specialties shall issue a report to the governor and legislature by May first, nineteen hundred ninety-five which shall:

(i) describe the current status of practice guidelines, their uses and their impact on health care delivery and outcomes;

(ii) identify appropriate uses of practice guidelines and medical technology for purposes of improving health care quality and efficiency;

(iii) identify inappropriate uses or applications of practice guidelines and medical technology;

(iv) identify by what means the uses of practice guidelines should be facilitated, if appropriate or warranted; and

(v) identify what role, if any, state government should have relative to practice guidelines.

8. Staff of the department shall be made available to provide technical assistance to the task force as necessary.

* NB Expired June 30, 1996

§ 2805. Approval of hospitals; operating certificates. 1. No hospital shall be operated unless it shall: (a) possess a valid operating certificate issued pursuant to this article, which certificate may specify the kind or kinds of hospital services the facility is authorized to provide; (b) establish and maintain a uniform system of cost analysis approved by the commissioner; and (c) establish and

maintain a uniform system of reports and audits meeting the requirements of the commissioner.

2. (a) Application for an operating certificate for a hospital shall be made upon forms prescribed by the department. The application shall contain the name of the hospital, the kind or kinds of hospital service to be provided, the location and physical description of the institution, and such other information as the department may require.

(b) An operating certificate shall not be issued by the department unless it finds that the premises, equipment, personnel, rules and by-laws, standards of medical care, and hospital service are fit and adequate and that the hospital will be operated in the manner required by this article and rules and regulations thereunder.

(d) In the case of a state, county or municipal hospital an operating certificate shall not be issued by the department unless the hospital maintains a record of all charges and collections made by any person, partnership, organization or other entity whatsoever for services rendered to patients in such hospital, including, but not limited to, the person making the charge, the amount of the charge and the purpose for which the charge was made. Such record shall be made in a form acceptable to the commissioner and include any charges relating to admission to or discharge from such hospital.

§ 2805-a. Disclosure of financial transactions. 1. Every general hospital operating under the provisions of this article shall file with the commissioner of health within one hundred twenty days after the end of its fiscal year a certified report showing its financial condition and all of its financial transactions, including receipts and expenditures during the fiscal year.

The report shall be in such form as shall disclose all financial transactions as the commissioner of health may determine necessary to disclose accurately and specifically the financial condition of each hospital and its expenditures for the preceding year including but not limited to:

(a) Its operations and accomplishments.

(b) Its receipts and disbursements, or revenues and expenses, during such fiscal year in accordance with generally accepted accounting principles by categories, clinical services and departments as set forth under the by-laws of the institution and including but not limited to salaries and other benefits, personnel expenses, operating expenses, equipment and supplies, and all other direct and indirect disbursements allocated to each department and clinical service.

(c) Assets and liabilities at the end of its fiscal year including the status of reserves, depreciation, special or other funds, and including the receipts and payments of these funds.

(d) Loans and investments, interest, rents and profits from investments of the hospital.

(e) The location of any real property owned by the hospital.

2. Every general hospital shall also submit:

(a) A report of hospital expenses incurred in providing services during the period covered by the reports required under this section for which payment was not received and is not anticipated for such periods for which pool distributions pursuant to section twenty-eight hundred seven-c or section twenty-eight hundred seven-k of this article are made related to such expenses. The report shall be completed in accordance with regulations developed by the council and approved by the commissioner which shall include definitions for bad debts and charity care. The report shall identify as bad debts or charity care the cost of services provided to emergency inpatients, non-emergency inpatients, emergency ambulatory patients, clinic patients and referred or private ambulatory patients for which the hospital did not receive and does not anticipate payment.

(b) A statement of anticipated capital related expenses as defined in subdivision eight of section twenty-eight hundred seven-c of this article for the forthcoming calendar year at least one hundred twenty days, or such shorter period as the commissioner shall determine, prior to the commencement of such year. The report shall be completed in accordance with subdivision eight of section twenty-eight hundred seven-c of this article and any regulations adopted pursuant thereto.

3. Every general hospital shall submit a monthly report of gross

inpatient revenue received and within one hundred twenty days after the end of the calendar year a certified annual report of gross inpatient revenue received for hospital inpatient service provided on or after January first, nineteen hundred eighty-eight through December thirty-first, nineteen hundred ninety-nine and on and after January first, two thousand. The reports shall be in such form as may be prescribed by the commissioner to accurately disclose gross inpatient revenue received.

* 4. The commissioner may, to effectuate the purpose of this article, vary the nature of the report required according to the size or capacity of the hospital.

The contents of all reports submitted hereunder shall be public information and such reports shall be available for public inspection under such conditions as the commissioner shall prescribe.

The commissioner of health when he has reasonable cause to believe that the books or records do not accurately reflect the financial condition and/or financial transactions of the hospital, may examine the books and records of the hospital, subpoena witnesses and documents and make such other investigation as is necessary to enable him to determine the facts relative thereto.

* NB Effective until October 1, 2025

* 4. (a) Every general hospital operating under the provisions of this article that is required to file an IRS Form 990 in accordance with federal regulations shall file with the commissioner, by July first of each calendar year, a completed copy of the most recent IRS Form 990 as submitted to the IRS, and the information the general hospital used to complete the IRS Form 990 in a manner prescribed by the department, showing how the hospital spent community benefit expenses, which shall include but not be limited to, information to identify the specific community benefit expenses supporting the hospital's local community. General hospitals operating under the provisions of this article that are not required to file an IRS Form 990 shall be required to submit information, in a manner prescribed by the department, showing how the hospital spent community benefit expenses in the same manner.

(b) The department shall compile the information reported in a report

issued and posted on the department's website by October first, two thousand twenty-six, and on an annual basis thereafter, and delivered to the governor, the speaker of the assembly, the temporary president of the senate, the chair of the assembly health committee, the chair of the senate health committee, the chair of the senate finance committee, the chair of the assembly ways and means committee, and the minority leaders of the assembly and the senate. The report shall include, at a minimum, information on:

(i) Total community benefit expenses in the state reported by each general hospital;

(ii) How such community benefit expenses were distributed in the aggregate across the following categories:

(1) Financial assistance at cost, which shall include any free or discounted services for those who cannot afford to pay and meet the hospital's financial assistance criteria;

(2) Unreimbursed costs from Medicaid;

(3) Unreimbursed costs from the children's health insurance program or other means-tested government programs;

(4) Community health improvement services and community benefit operations, which shall include costs associated with planning or operating community benefit programs, but shall not include activities or programs if they are provided primarily for marketing purposes or if they are more beneficial to the hospital than to the community;

(5) Health professions education programs that result in a degree or certificate or training necessary for residents or interns to be certified;

(6) Subsidized health services, which shall include services with a negative margin, services that meet an identifiable community need and services that if no longer offered would be unavailable or fall to the responsibility of another nonprofit or government agency;

(7) Research that produces generalizable knowledge and is funded by tax-exempt sources; and

(8) Cash and in-kind contributions for community benefit, for which in-kind donations may include the indirect cost of space donated to community groups and the direct cost of donated food or supplies;

(iii) Details on negative-margin services that were reported by hospitals as part of community benefit expenses; and

(iv) Details on community benefit programs reported by hospitals as part of community benefit expenses.

* NB Effective October 1, 2025

* 5. The commissioner may, to effectuate the purpose of this article, vary the nature of the report required according to the size or capacity of the hospital.

The contents of all reports submitted hereunder shall be public information and such reports shall be available for public inspection under such conditions as the commissioner shall prescribe.

The commissioner of health when he has reasonable cause to believe that the books or records do not accurately reflect the financial condition and/or financial transactions of the hospital, may examine the books and records of the hospital, subpoena witnesses and documents and make such other investigation as is necessary to enable him to determine the facts relative thereto.

* NB Effective October 1, 2025

*** § 2805-b. Admission of patients and emergency treatment of nonadmitted patients.** 1. For purposes of this section, the following terms shall have the following meanings:

(a) "Emergency medical condition" shall mean:

(i) a medical condition manifesting itself by acute symptoms of sufficient severity (including severe pain) such that the absence of immediate medical attention could reasonably be expected to result in:

(1) placing the health of the individual in serious jeopardy;

(2) serious impairment to bodily functions, including risks to future fertility;

(3) serious dysfunction of any bodily organ or part; or

(ii) with respect to a pregnant person who is in active labor:

(1) that there is inadequate time to effect a safe transfer to another hospital before delivery; or

(2) that transfer poses a threat to the health or safety of the pregnant person or the pregnancy.

(b) "Stabilize" shall mean, with respect to an emergency medical

condition described in subparagraph (i) of paragraph (a) of this subdivision, to provide such medical treatment of the condition as may be necessary to assure, within reasonable medical probability, that no material deterioration of the condition is likely to result from or occur during the transfer of the individual from a facility, or, with respect to an emergency medical condition described in subparagraph (ii) of paragraph (a) of this subdivision, to deliver, including the placenta. "Stabilizing treatment" includes abortion pursuant to section twenty-five hundred ninety-nine-bb of this article when failure to provide an abortion will, within reasonable probability, result in material deterioration of the patient's condition upon or during transfer of the patient from the facility.

(c) "Transfer" shall mean the movement (including the discharge) of an individual outside of a general hospital's facilities at the direction of any person employed by, or affiliated or associated, directly or indirectly, with, the general hospital, but does not include such a movement of an individual who (i) has been declared dead, or (ii) leaves the facility without the permission of any such person.

(d) "Appropriate transfer" shall mean a transfer to a medical facility:

(i) in which the transferring general hospital provides the medical treatment within its capacity which minimizes the risks to the individual's health;

(ii) in which the receiving facility:

(1) has available space and qualified personnel for the treatment of the individual; and

(2) has agreed to accept transfer of the individual and to provide appropriate medical treatment;

(iii) in which the transferring general hospital sends to the receiving facility all medical records related to the emergency condition for which the individual has presented available at the time of the transfer, including records related to the individual's emergency medical condition, observations of signs or symptoms, preliminary diagnosis, treatment provided, results of any tests and the informed written consent or certification or copy thereof provided under paragraph (d) of subdivision three of this section, unless the patient objects; and

(iv) in which the transfer is effected through qualified personnel and transportation equipment, as required, including the use of necessary and medically appropriate life support measures during the transfer.

2. Every general hospital as defined in this article shall admit any person who is in need of immediate hospitalization with all convenient speed and shall not before admission question the patient or any member of the patient's family concerning insurance, credit or payment of charges, provided, however, that the patient or a member of the patient's family shall agree to supply such information promptly after the patient's admission. However, no general hospital shall require any patient or member of the patient's family to write or to sign during those times when the religious tenets of such person temporarily prohibit such person from performing such acts. No general hospital shall transfer any patient to another hospital or health care facility on the grounds that the patient is unable to pay or guarantee payment for services rendered. Every general hospital which maintains facilities for providing out-patient emergency medical care must provide such care to any person who, in the opinion of a health care practitioner licensed, certified, or authorized under title eight of the education law, acting within their lawful scope of practice, requires such care.

3. (a) Medical screening required. Every general hospital must provide appropriate medical screening examination within the capability of the general hospital's emergency department, including ancillary services routinely available to the emergency department when a request is made by an individual or on the individual's behalf for examination or treatment for a medical condition to determine whether an emergency medical condition exists. With respect to a pregnant person, such medical screening examination must include a determination by a health care practitioner licensed, certified, or authorized under title eight of the education law, acting within their lawful scope of practice as to whether the individual is in active labor. A general hospital may not delay provision of an appropriate medical screening examination or further medical examination, and treatment required under paragraph (b) of this subdivision in order to inquire about the individual's method of payment or insurance status.

(b) Necessary stabilizing treatment for emergency medical conditions and labor. If any individual comes to a general hospital and the general hospital determines that the individual has an emergency medical condition, the general hospital must provide either:

(i) within the staff and facilities available at the general hospital, for such further medical examination and such treatment as may be required to stabilize the medical condition; or

(ii) for transfer of the individual to another medical facility in accordance with paragraph (e) of this subdivision.

(c) Obligation to provide treatment in accordance with applicable standard of care. Admission of an individual experiencing an emergency medical condition does not relieve a general hospital of the obligation to provide treatment that is within the hospital's abilities and consistent with the applicable standard of care.

(d) Refusal to consent to treatment. A general hospital is deemed to meet the requirements of paragraph (b) of this subdivision with respect to an individual if the general hospital offers the individual the further medical examination and treatment described in such paragraph and informs the individual, or a person legally authorized to make health care decisions on behalf of the individual, of the risks and benefits to the individual of such examination and treatment, but the individual, or a person legally authorized to make health care decisions on behalf of the individual, refuses to consent to the examination and treatment. The general hospital shall take all reasonable steps to secure the individual's written informed consent, or that of an individual legally authorized to make health care decisions on behalf of the individual, to refuse such examination and treatment.

(e) Restricting transfers until individual stabilized. (i) If an individual at a general hospital has an emergency medical condition which has not been stabilized, the general hospital may not transfer the individual unless:

(1) the individual, or a person legally authorized to make health care decisions on behalf of the individual, after being informed of the general hospital's obligations under this section and of the risk of transfer, in writing requests transfer to another medical facility; and

(2) a health care practitioner licensed, certified, or authorized under title eight of the education law, acting within their lawful scope

of practice has signed a certification that:

(A) based upon the information available at the time of transfer, the medical benefits reasonably expected from the provision of appropriate medical treatment at another medical facility outweigh the increased risks to the individual; and

(B) the transfer is an appropriate transfer to that facility;

(ii) A certification described in clauses one and two of subparagraph (i) of this paragraph shall include a summary of the risks and benefits upon which the certification is based.

(f) Acceptance of transfer. A general hospital shall not refuse to accept an appropriate transfer of an individual who requires such specialized capabilities or facilities if the general hospital has the capacity to treat the individual.

(g) No delay in examination or treatment. A general hospital may not delay provision of an appropriate medical screening examination required under paragraph (a) of this subdivision or further medical examination and treatment required under paragraph (b) of this subdivision in order to inquire about the individual's method of payment or insurance status.

(h) Retaliation prohibited. A general hospital may not penalize, retaliate, discriminate or otherwise take an adverse action against a health care practitioner, because the practitioner refuses to authorize the transfer of an individual with an emergency medical condition that has not been stabilized or because the practitioner provides treatment necessary to stabilize a patient who is, in the practitioner's reasonable medical judgment, experiencing an emergency medical condition. A general hospital may not penalize, retaliate, discriminate or otherwise take an adverse action against any individual because the individual reports a violation of a requirement of this subdivision.

(i) Nothing herein shall be interpreted as requiring the provision of care in violation of state or federal law.

4. General hospitals shall adopt, implement, and periodically update standard protocols for the management of emergency medical conditions, including diagnosis, stabilization, treatment, or transfer to another medical unit or facility.

5. A general hospital within a city with a population of one million

or more may request the emergency medical service of such city's health and hospitals corporation or any person, firm, organization or corporation providing ambulance service to divert ambulances to another hospital only under the following circumstances:

A request for diversion of emergency patients with life threatening conditions shall only be made by a hospital when acceptance of an additional critical patient may endanger the life of that patient or the life of another patient. A request for the diversion of other emergency patients shall only be made when all appropriate beds are filled and shall be withdrawn as soon as a bed is available. Notwithstanding the foregoing, all requests for diversion must be renewed at the beginning of each tour of duty as designated by the emergency medical service of such city's health and hospitals corporation.

Diversion of patients with certain medical conditions which, in the best interest of the patients, require their transport directly to specialty referral centers shall be permitted following the designation of such specialty referral centers. Diversion of patients with psychiatric conditions to comprehensive psychiatric emergency programs, as such term is defined in section 1.03 of the mental hygiene law, and subject to the provisions of section 31.27 of such law, shall only be permitted following the designation of the programs by the commissioners of health and mental health to receive such patients.

6. Nothing in this section shall be construed to deny to a health care practitioner licensed, certified, or authorized under title eight of the education law, acting within their lawful scope of practice the right to evaluate the medical needs of persons arriving at the hospital for emergency treatment and to delay or deny medical treatment where, in the opinion of the health care practitioner, no emergency medical condition exists.

7. The staff of a general hospital shall: (a) inquire whether or not the person admitted has served in the United States armed forces. Such information shall be listed on the admissions form; (b) notify any admittee who is a veteran of the possible availability of services at a

hospital operated by the United States veterans health administration, and, upon request by the admittee, such staff shall make arrangements for the individual's transfer to a United States veterans health administration hospital, provided, however, that transfers shall be authorized only after it has been determined, according to accepted clinical and medical standards, that the patient's condition has stabilized and transfer can be accomplished safely and without complication; and (c) provide any admittee who has served in the United States armed forces with a copy of the "Information for Veterans concerning Health Care Options" fact sheet, maintained by the department of veterans' services pursuant to subdivision twenty-nine of section four of the veterans' services law prior to discharging or transferring the patient. The commissioner shall promulgate rules and regulations for notifying such admittees of possible available services and for arranging a requested transfer.

* NB Effective until July 1, 2027

* § 2805-b. Admission of patients and emergency treatment of nonadmitted patients. 1. For purposes of this section, the following terms shall have the following meanings:

(a) "Emergency medical condition" shall mean:

(i) a medical condition manifesting itself by acute symptoms of sufficient severity (including severe pain) such that the absence of immediate medical attention could reasonably be expected to result in:

(1) placing the health of the individual in serious jeopardy;

(2) serious impairment to bodily functions, including risks to future fertility;

(3) serious dysfunction of any bodily organ or part; or

(ii) with respect to a pregnant person who is in active labor:

(1) that there is inadequate time to effect a safe transfer to another hospital before delivery; or

(2) that transfer poses a threat to the health or safety of the pregnant person or the pregnancy.

(b) "Stabilize" shall mean, with respect to an emergency medical condition described in subparagraph (i) of paragraph (a) of this subdivision, to provide such medical treatment of the condition as may be necessary to assure, within reasonable medical probability, that no material deterioration of the condition is likely to result from or

occur during the transfer of the individual from a facility, or, with respect to an emergency medical condition described in subparagraph (ii) of paragraph (a) of this subdivision, to deliver, including the placenta. "Stabilizing treatment" includes abortion pursuant to section twenty-five hundred ninety-nine-bb of this article when failure to provide an abortion will, within reasonable probability, result in material deterioration of the patient's condition upon or during transfer of the patient from the facility.

(c) "Transfer" shall mean the movement (including the discharge) of an individual outside of a general hospital's facilities at the direction of any person employed by, or affiliated or associated, directly or indirectly, with, the general hospital, but does not include such a movement of an individual who (i) has been declared dead, or (ii) leaves the facility without the permission of any such person.

(d) "Appropriate transfer" shall mean a transfer to a medical facility:

(i) in which the transferring general hospital provides the medical treatment within its capacity which minimizes the risks to the individual's health;

(ii) in which the receiving facility:

(1) has available space and qualified personnel for the treatment of the individual; and

(2) has agreed to accept transfer of the individual and to provide appropriate medical treatment;

(iii) in which the transferring general hospital sends to the receiving facility all medical records related to the emergency condition for which the individual has presented available at the time of the transfer, including records related to the individual's emergency medical condition, observations of signs or symptoms, preliminary diagnosis, treatment provided, results of any tests and the informed written consent or certification or copy thereof provided under paragraph (d) of subdivision three of this section, unless the patient objects; and

(iv) in which the transfer is effected through qualified personnel and transportation equipment, as required, including the use of necessary and medically appropriate life support measures during the transfer.

2. Every general hospital as defined in this article shall admit any person who is in need of immediate hospitalization with all convenient speed and shall not before admission question the patient or any member of the patient's family concerning insurance, credit or payment of charges, provided, however, that the patient or a member of the patient's family shall agree to supply such information promptly after the patient's admission. However, no general hospital shall require any patient or member of the patient's family to write or to sign during those times when the religious tenets of such person temporarily prohibit such person from performing such acts. No general hospital shall transfer any patient to another hospital or health care facility on the grounds that the patient is unable to pay or guarantee payment for services rendered. Every general hospital which maintains facilities for providing out-patient emergency medical care must provide such care to any person who, in the opinion of a health care practitioner licensed, certified, or authorized under title eight of the education law, acting within their lawful scope of practice, requires such care.

5. A general hospital within a city with a population of one million or more may request the emergency medical service of such city's health and hospitals corporation or any person, firm, organization or corporation providing ambulance service to divert ambulances to another hospital only under the following circumstances:

A request for diversion of emergency patients with life threatening conditions shall only be made by a hospital when acceptance of an additional critical patient may endanger the life of that patient or the life of another patient. A request for the diversion of other emergency patients shall only be made when all appropriate beds are filled and shall be withdrawn as soon as a bed is available. Notwithstanding the foregoing, all requests for diversion must be renewed at the beginning of each tour of duty as designated by the emergency medical service of such city's health and hospitals corporation.

Diversion of patients with certain medical conditions which, in the best interest of the patients, require their transport directly to specialty referral centers shall be permitted following the designation

of such specialty referral centers. Diversion of patients with psychiatric conditions to comprehensive psychiatric emergency programs, as such term is defined in section 1.03 of the mental hygiene law, and subject to the provisions of section 31.27 of such law, shall only be permitted following the designation of the programs by the commissioners of health and mental health to receive such patients.

6. Nothing in this section shall be construed to deny to a health care practitioner licensed, certified, or authorized under title eight of the education law, acting within their lawful scope of practice the right to evaluate the medical needs of persons arriving at the hospital for emergency treatment and to delay or deny medical treatment where, in the opinion of the health care practitioner, no emergency medical condition exists.

7. The staff of a general hospital shall: (a) inquire whether or not the person admitted has served in the United States armed forces. Such information shall be listed on the admissions form; (b) notify any admittee who is a veteran of the possible availability of services at a hospital operated by the United States veterans health administration, and, upon request by the admittee, such staff shall make arrangements for the individual's transfer to a United States veterans health administration hospital, provided, however, that transfers shall be authorized only after it has been determined, according to accepted clinical and medical standards, that the patient's condition has stabilized and transfer can be accomplished safely and without complication; and (c) provide any admittee who has served in the United States armed forces with a copy of the "Information for Veterans concerning Health Care Options" fact sheet, maintained by the department of veterans' services pursuant to subdivision twenty-nine of section four of the veterans' services law prior to discharging or transferring the patient. The commissioner shall promulgate rules and regulations for notifying such admittees of possible available services and for arranging a requested transfer.

* NB Effective July 1, 2027

§ 2805-c. Every private proprietary nursing home having a capacity of eighty patients or more may have a licensed medical doctor in attendance, upon the premises, for the care and treatment of patients.

§ 2805-d. Limitation of medical, dental or podiatric malpractice action based on lack of informed consent. 1. Lack of informed consent means the failure of the person providing the professional treatment or diagnosis to disclose to the patient such alternatives thereto and the reasonably foreseeable risks and benefits involved as a reasonable medical, dental or podiatric practitioner under similar circumstances would have disclosed, in a manner permitting the patient to make a knowledgeable evaluation.

2. The right of action to recover for medical, dental or podiatric malpractice based on a lack of informed consent is limited to those cases involving either (a) non-emergency treatment, procedure or surgery, or (b) a diagnostic procedure which involved invasion or disruption of the integrity of the body.

3. For a cause of action therefor it must also be established that a reasonably prudent person in the patient's position would not have undergone the treatment or diagnosis if he had been fully informed and that the lack of informed consent is a proximate cause of the injury or condition for which recovery is sought.

4. It shall be a defense to any action for medical, dental or podiatric malpractice based upon an alleged failure to obtain such an informed consent that:

(a) the risk not disclosed is too commonly known to warrant disclosure; or

(b) the patient assured the medical, dental or podiatric practitioner he would undergo the treatment, procedure or diagnosis regardless of the risk involved, or the patient assured the medical, dental or podiatric practitioner that he did not want to be informed of the matters to which he would be entitled to be informed; or

(c) consent by or on behalf of the patient was not reasonably

possible; or

(d) the medical, dental or podiatric practitioner, after considering all of the attendant facts and circumstances, used reasonable discretion as to the manner and extent to which such alternatives or risks were disclosed to the patient because he reasonably believed that the manner and extent of such disclosure could reasonably be expected to adversely and substantially affect the patient's condition.

§ 2805-e. Reports of residential health care facilities. 1. Every residential health care facility operating under the provisions of this article shall, within one hundred twenty days after the end of its fiscal year, file an annual report with the commissioner of health. Said annual report shall be in such form and shall contain such information as shall be prescribed by the commissioner of health, including the following:

(a) A balance sheet of the facility as of the end of such fiscal year, setting forth assets and liabilities at such date, including all capital, surplus, reserve, depreciation and similar accounts.

(b) A statement of operations of the facility for such fiscal year, setting forth all revenues, expenses, taxes, extraordinary items and other credits or charges.

(c) The name and address of each of the following persons:

(i) the operator of the facility;

(ii) any person who, directly or indirectly, beneficially owns any interest in the land on which the facility is located;

(iii) any person who, directly or indirectly, beneficially owns any interest in the building in which the facility is located;

(iv) any person who, directly or indirectly, beneficially owns any interest in any mortgage, note, deed of trust or other obligation secured in whole or in part by the land on which or building in which the facility is located; and

(v) any person who, directly or indirectly, has any interest as lessor or lessee in any lease or sub-lease of the land on which or the building in which the facility is located.

(d) If the facility or any person named in response to paragraph (c) is a partnership, then the name and address of each partner.

(e) If the facility or any person named in response to paragraph (c) is a corporation, other than a corporation whose shares are traded on a national securities exchange or are regularly quoted in an over-the-counter market or which is a commercial bank, savings bank or savings and loan association, then the name and address of each officer, director, stockholder, and, if known, each principal stockholder and controlling person of such corporation.

(f) If any corporation named in response to paragraph (c) is a corporation whose shares are traded on a national securities exchange or are regularly quoted in an over-the-counter market or which is a commercial bank, savings bank or savings and loan association, then the name and address of the principal executive officers and each director and, if known, each principal stockholder of such corporation.

(g) If the facility paid or received an aggregate of five hundred dollars or more during the fiscal year in connection with transactions with any person named in response to paragraphs (c), (d), (e) or (f) or any affiliate of said person, a description of the transactions, naming the parties thereto and describing the relationships which require the transactions to be described and the goods, services, payment or other consideration received by each party to the transactions.

(h) If known, the nature and amount of any interest in, or relationship with, any other residential health care facility, held by any person named in response to paragraph (c) above, or by any affiliate of such person.

2. The following definitions shall be applicable to this section and to any reports filed pursuant hereto:

(a) "Affiliate" means:

(i) with respect to a partnership, each partner thereof;

(ii) with respect to a corporation, each officer, director, principal stockholder and controlling person thereof;

(iii) with respect to a natural person (a) each member of said person's immediate family, (b) each partnership and each partner thereof of which said person or any affiliate of said person is a partner, and (c) each corporation in which said person or any affiliate of said person is an officer, director, principal stockholder or controlling person.

(b) "Controlling person" of any corporation, partnership or other entity means any person who by reason of a direct or indirect ownership interest (whether of record or beneficial) has the ability, acting either alone or in concert with others with ownership interests, to direct or cause the direction of the management or policies of said corporation, partnership or other entity. Neither the commissioner nor any employee of the department nor any member of a local legislative body of a county or municipality, nor any county or municipal official except when acting as the administrator of a residential health care facility, shall by reason of his or her official position, be deemed a controlling person of any corporation, partnership or other entity nor shall any person who serves as an officer, administrator or other employee of any corporation, partnership or other entity or as a member of a board of directors or trustees of any corporation be deemed to be a controlling person of such corporation, partnership or other entity as a result of such position or his or her official actions in such position.

(c) "Immediate family" of any person includes each parent, child, spouse, brother, sister, first cousin, aunt and uncle of such person, whether such relationship arises by reason of birth, marriage or adoption.

(d) "Principal stockholder" of a corporation means any person who beneficially owns, holds or has the power to vote, ten percent or more of any class of securities issued by said corporation.

3. Every report filed by a residential health care facility pursuant to this section shall contain a written statement, sworn to by or on behalf of such facility and the operator of such facility, to the effect that the report is, to the best of such person's knowledge, true and complete and prepared in accordance with the provisions of this section.

§ 2805-f. Money deposited or advanced for admittance to nursing homes; waiver void; administration expenses. 1. Whenever money shall be deposited or advanced on a contract or license agreement for admittance to a nursing home as security for performance of the contract or agreement or to be applied to payments upon such contract or agreement when due, such money, with interest accruing thereon, until repaid or so

applied, shall continue to be the money of the person making such deposit or advance and shall be held in trust by the person with whom such deposit or advance shall be made and shall not be mingled with the personal moneys or become an asset of the person receiving the same.

2. The person receiving money so deposited or advanced shall deposit such money in an interest bearing account in a banking organization provided, however, that monies which are advanced pursuant to the provisions of subdivision one of this section for the purpose of being applied to payments in performance of a contract or license agreement when due need not be deposited in an interest bearing account until the sixty-first day next succeeding the day upon which such money was deposited or advanced. Such person shall thereupon notify in writing each of the persons making such security deposit or advance, giving the name and address of the banking organization in which the deposit of security money is made, and the amount of such deposit. Such person shall be entitled to receive, as administration expenses, a sum equivalent to one percent per annum upon the security money so deposited, which shall be in lieu of all other administrative and custodial expenses. The balance of the interest paid by the banking organization shall be the money of the person making the deposit or advance.

3. Any provision of such a contract or agreement whereby a person who so deposits or advances money waives any provision of this section is absolutely void.

4. Whoever knowingly and willfully:

(a) charges for any service provided to a recipient pursuant to title eleven of article five of the social services law, or a recipient pursuant to title XVIII of the federal social security act, money or other consideration at a rate in excess of the rates established by the department of health and certified by the director of the division of budget or established pursuant to title XVIII of the federal social security act, as the case may be; or

(b) charges, solicits, accepts or receives, in addition to any amount otherwise required to be paid pursuant to title eleven of article five

of the social services law, or pursuant to title XVIII of the federal social security act, any gift, money, donation or other consideration, other than a charitable, religious or philanthropic contribution from an organization or from a person not acting on behalf of such recipient or applicant for assistance under title eleven of article five of the social services law:

(i) as a precondition, express or implied, to admitting or expediting the admission of such recipient or applicant to a hospital or residential health care facility; or

(ii) as a requirement for the recipient's or applicant's continued stay in such facility,

when the cost of the services, provided therein to the recipient is paid for, in whole or in part, pursuant to title eleven of article five of the social services law, or pursuant to title XVIII of the federal social security act, shall be guilty of a class E felony.

§ 2805-g. Maintenance of records. 1. Every hospital shall maintain, as public information available for public inspection under such conditions as the commissioner shall prescribe, records containing copies of all inspection reports pertaining to the facility that have been filed with or issued by any governmental agency. Copies of such inspection reports shall be retained in said records for ten years from the date said reports are filed or issued.

2. The office of the commissioner and each regional office of the department shall make available for public inspection and at a nominal cost provide copies of all financial and inspection reports of hospitals filed with or issued by the department.

3. Nothing contained in this section shall be construed or deemed to require the public disclosure of confidential medical, social, personal or financial records of any patient. The commissioner shall adopt such regulations as may be necessary to give effect to the provisions of this section and to preserve the confidentiality of medical, social, personal or financial records of patients.

§ 2805-h. Immunizations. 1. Immunizations against poliomyelitis, mumps, measles, diphtheria and rubella. (a) It shall be the duty of the administrative officer or other person in charge of each hospital to inquire of each person in its care under the age of eighteen, or of a person in parental relation to such person, whether all necessary immunizations have been received for poliomyelitis, mumps, measles, diphtheria and rubella and, if not, to make available such immunizations and a certificate or certificates of such immunizations.

(b) This subdivision shall not apply to children whose parent, parents, or guardian are bona fide members of a recognized religious organization whose teachings are contrary to the practices herein required.

(c) If any physician licensed to practice medicine in this state certifies that such immunization may be detrimental to a child's health, the requirements of this section shall be inapplicable until such immunization is found no longer to be detrimental to the child's health.

2. Immunizations against influenza for certain persons fifty or older and immunizations against pneumococcal for certain persons sixty-five or older. (a) Annually between September first and April first, it shall be the duty of the administrative officer or other person in charge of each general hospital to offer each admitted person age fifty or older vaccination against influenza virus. Such officer or person need not offer the vaccination to persons who have already received such vaccine or for whom it is otherwise inappropriate.

(b) It shall be the duty of the administrative officer or other person in charge of each general hospital to offer vaccination against pneumococcal disease to each admitted person age sixty-five or older in the hospital's care. Such officer or person need not offer the vaccination to people who have already received it, are not in need of a booster, or for whom it is otherwise inappropriate.

(c) Each general hospital shall adopt an influenza and pneumococcal immunization policy which shall include, but not be limited to, the following: procedures for identifying persons age fifty or older for influenza, sixty-five or older for pneumococcal disease and at the

discretion of the facility other individuals at risk; procedures for the offering of immunization against influenza virus upon admission or discharge to persons age fifty or older, between September first and April first, and pneumococcal disease upon admission or discharge to persons age sixty-five or older; procedures for ensuring that individuals offered immunization or their guardian receive information regarding the risks and benefits of vaccination; a standing order policy approved by the medical director or other appropriate physician which shall include, but not be limited to, an assessment for contra-indications; and a system for documenting vaccine administration, medical contra-indications, patient refusals and any post-vaccination adverse events.

(d) The commissioner may waive the requirements of this subdivision due to a shortage of influenza and/or pneumococcal vaccine.

3. Immunizations against influenza and Bordetella pertussis; neonatal intensive care units.

(a) It shall be the duty of each general hospital (i) with a neonatal intensive care unit to offer, annually between September first and April first, to every parent or person in parental relation who is reasonably anticipated to be a caregiver in the household of a newborn being treated in the neonatal intensive care unit vaccination against influenza virus; and (ii) having a newborn nursery or providing obstetric services to offer to every parent, person in parental relation or other person who is reasonably anticipated to be a caregiver of a newborn being treated in such hospital vaccination against Bordetella pertussis (whooping cough). If the parent or person in parental relation wishes to be vaccinated, the hospital shall provide the person with the vaccination. If the parent or person in parental relation declines the hospital offer or wishes to defer vaccination, the hospital shall provide information on where such person may be vaccinated. Such general hospital need not offer the vaccination to parents and persons in parental relation who have already received such vaccine or for whom it is medically inappropriate.

(b) Each general hospital shall adopt a policy for implementing this subdivision, documenting the offer of vaccine administration.

(c) The commissioner may waive the requirements of this subdivision

due to a shortage of influenza vaccine.

§ 2805-i. Treatment of sexual offense victims and maintenance of evidence in a sexual offense. 1. Every hospital providing treatment to alleged victims of a sexual offense shall be responsible for:

- * (a) maintaining sexual offense evidence and the chain of custody as provided in subdivision two of this section;

- * NB Effective until May 9, 2027

- * (a) Maintaining the following full-time, part-time, contracted, or on-call staff:

- (1) One or more hospital sexual violence response coordinators who are designated to ensure that the hospital's sexual violence response is integrated within the hospital's clinical oversight and quality improvement structure, to ensure chain of custody is maintained, and to ensure availability and coordination of certified sexual assault forensic examiners;

- (2) Certified sexual assault forensic examiners sufficient to meet hospital needs. Such individuals shall:

- (i) be a registered professional nurse, certified nurse practitioner, licensed physician assistant or licensed physician acting within their lawful scope of practice and specially trained in forensic examination of sexual offense victims and the preservation of forensic evidence in such cases and qualified to provide such services, pursuant to regulations promulgated by the commissioner; and

- (ii) have successfully completed a didactic and clinical training course and post course preceptorship as appropriate to scope of practice that aligns with guidance released by the commissioner.

- * NB Effective May 9, 2027

- * (b) informing sexual offense victims of the availability of rape crisis and local victim assistance organizations, if any, in the geographic area served by the hospital, and contacting a rape crisis or local victim assistance organization to establish the coordination of non-medical services, including but not limited to transportation within the geographic area served by that organization, upon the conclusion of initial medical services, free of charge from the medical facility to sexual offense victims who request such coordination and services;

* NB Effective until May 9, 2027

* (b) Ensuring that such sexual assault forensic examiners are on-call and available on a twenty-four hour a day basis every day of the year;

* NB Effective May 9, 2027

* (c) offering and making available appropriate HIV post-exposure treatment therapies; including the full regimen of HIV post-exposure prophylaxis in cases where it has been determined, in accordance with guidelines issued by the commissioner, that a significant exposure to HIV has occurred, and informing the victim that payment assistance for such therapies and other crime related expenses may be available from the office of victim services pursuant to the provisions of article twenty-two of the executive law. With the consent of the victim of a sexual assault, the hospital emergency room department shall provide or arrange for an appointment for medical follow-up related to HIV post-exposure prophylaxis and other care as appropriate; and

* NB Effective until May 9, 2027

* (c) Ensuring that such sexual assault forensic examiners maintain a current certification from the department, pursuant to regulations, in providing sexual assault examinations. The commissioner shall issue regulations consistent with subparagraph one of paragraph (b) of subdivision four-b of this section, establishing a process for individuals to apply for and receive certification upon meeting the required criteria, as well as a process for recertification.

* NB Effective May 9, 2027

* (d) ensuring sexual assault survivors are not billed for sexual assault forensic exams and are notified orally and in writing of the option to decline to provide private health insurance information and have the office of victim services reimburse the hospital for the exam pursuant to subdivision thirteen of section six hundred thirty-one of the executive law.

* NB Effective until May 9, 2027

* (d) maintaining sexual offense evidence and the chain of custody as provided in subdivision two of this section;

* NB Effective May 9, 2027

* (e) informing sexual offense victims of the availability of rape crisis and local victim assistance organizations, if any, in the geographic area served by the hospital, and contacting a rape crisis or

local victim assistance organization to establish the coordination of non-medical services, including but not limited to transportation within the geographic area served by that organization, upon the conclusion of initial medical services, free of charge from the medical facility to sexual offense victims who request such coordination and services;

* NB Effective May 9, 2027

* (f) offering and making available appropriate HIV post-exposure treatment therapies; including the full regimen of HIV post-exposure prophylaxis in cases where it has been determined, in accordance with guidelines issued by the commissioner, that a significant exposure to HIV has occurred, and informing the victim that payment assistance for such therapies and other crime related expenses may be available from the office of victim services pursuant to the provisions of article twenty-two of the executive law. With the consent of the victim of a sexual assault, the hospital emergency room department shall provide or arrange for an appointment for medical follow-up related to HIV post-exposure prophylaxis and other care as appropriate; and

* NB Effective May 9, 2027

* (g) ensuring sexual assault survivors are not billed for sexual assault forensic exams and are notified orally and in writing of the option to decline to provide private health insurance information and have the office of victim services reimburse the hospital for the exam pursuant to subdivision thirteen of section six hundred thirty-one of the executive law.

* NB Effective May 9, 2027

2. Sexual offense evidence shall be collected and maintained as follows:

* (a) All sexual offense evidence shall be kept in a locked, separate and secure area for twenty years from the date of collection; provided that such evidence shall be transferred to a new location(s) pursuant to this subdivision.

* NB Effective until December 2, 2027

* (a) All sexual offense evidence shall be kept in a locked, separate and secure area for twenty years from the date of collection or until the victim's fortieth birthday, whichever is later; provided that such evidence shall be transferred to a new location(s) pursuant to this

subdivision.

* NB Effective December 2, 2027

(b) Sexual offense evidence shall include, but not be limited to, slides, cotton swabs, clothing and other items. Where appropriate, such items shall be refrigerated and the clothes and swabs shall be dried, stored in paper bags, and labeled. Each item of evidence shall be marked and logged with a code number corresponding to the alleged sexual offense victim's medical record.

* (c) Upon collection, the hospital shall notify the alleged sexual offense victim that, after twenty years, the sexual offense evidence will be discarded in compliance with state and local health codes and that the alleged sexual offense victim's clothes or personal effects will be returned to the alleged sexual offense victim at any time upon request. The alleged sexual offense victim shall be given the option of providing contact information for purposes of receiving notice of the planned destruction of such evidence after the expiration of the twenty-year period.

* NB Effective until December 2, 2027

* (c) Upon collection, the hospital shall notify the alleged sexual offense victim that, after twenty years or until the victim's fortieth birthday, whichever is later, the sexual offense evidence will be discarded in compliance with state and local health codes and that the alleged sexual offense victim's clothes or personal effects will be returned to the alleged sexual offense victim at any time upon request. The alleged sexual offense victim shall be given the option of providing contact information for purposes of receiving notice of the planned destruction of such evidence after the expiration of the twenty-year period or until the victim's fortieth birthday, whichever is later.

* NB Effective December 2, 2027

(d) Until September thirtieth, two thousand twenty-two, or earlier if determined feasible by the director of budget, hospitals shall be responsible for securing long-term sexual offense evidence pursuant to this section, after which such storage shall be the responsibility of the office of victim services, provided, however, that law enforcement shall transfer sexual offense evidence that is reported to law enforcement but for which consent is later withdrawn to the office of victim services for long-term storage. Storage of reported kits

transferred to the office of victim services or retained by law enforcement shall comport with the provisions of this subdivision. Hospitals may enter into contracts with other entities that will ensure appropriate and secure long-term storage of sexual offense evidence pursuant to this section until September thirtieth, two thousand twenty-two.

(e) Beginning April first, two thousand eighteen, the department, the office of victim services, the division of criminal justice services and the division of state police shall jointly study, evaluate and make recommendations concerning the storage and monitoring of sexual offense evidence for twenty years, including studying options for the use of: state-owned or operated facilities; facilities owned or operated by local government or law enforcement agencies; and facilities owned or operated by private entities.

* (f) Between thirty and ten days prior to the transfer of sexual offense evidence to the office of victim services, hospitals shall make diligent efforts to notify the alleged sexual offense victim of the transfer of custody for the remainder of the twenty-year storage period.

* NB Effective until December 2, 2027

* (f) Between thirty and ten days prior to the transfer of sexual offense evidence to the office of victim services, hospitals shall make diligent efforts to notify the alleged sexual offense victim of the transfer of custody for the remainder of the twenty-year storage period or until the victim's fortieth birthday, whichever is later.

* NB Effective December 2, 2027

(g) On September thirtieth, two thousand twenty-two, or earlier if determined feasible by the director of budget, responsibility for long-term storage of sexual offense evidence shall transfer to the office of victim services.

(h) After September thirtieth, two thousand twenty-two, or earlier if determined feasible by the director of budget, hospitals shall ensure transfer of sexual offense evidence collected pursuant to this section to the office of victim services within ten days of collection of such evidence, while maintaining chain of custody.

* (i) At least ninety days prior to the expiration of the twenty-year storage period for any sexual offense evidence, the office of victim services shall make diligent efforts to contact the alleged sexual

offense victim to notify the alleged sexual offense victim that the sexual offense evidence will be discarded in compliance with state and local health codes and that the alleged sexual offense victim's clothes and personal effects will be returned to the alleged sexual offense victim upon request.

* NB Effective until December 2, 2027

* (i) At least ninety days prior to the expiration of the twenty-year storage period for any sexual offense evidence or until the victim's fortieth birthday, whichever is later, the office of victim services shall make diligent efforts to contact the alleged sexual offense victim to notify the alleged sexual offense victim that the sexual offense evidence will be discarded in compliance with state and local health codes and that the alleged sexual offense victim's clothes and personal effects will be returned to the alleged sexual offense victim upon request.

* NB Effective December 2, 2027

* (j) Notwithstanding any other provision in this section, sexual offense evidence shall not continue to be stored where: (i) such evidence is not privileged and law enforcement requests its release, in which case the custodian or custodians shall comply with such request; or (ii) such evidence is privileged and either (A) the alleged sexual offense victim gives permission to release the evidence to law enforcement, upon which the hospital collecting such evidence must record the collection of such evidence in the electronic tracking system and notify the appropriate law enforcement agency within forty-eight hours and law enforcement must retrieve the evidence within ten days of such notice and report such evidence in the statewide electronic tracking system pursuant to subdivision eight of this section, or (B) the alleged sexual offense victim signs a statement directing the custodian or custodians to dispose of the evidence, in which case the sexual offense evidence will be discarded in compliance with state and local health codes.

* NB Effective until December 2, 2027

* (j) (i) Notwithstanding any other provision in this section, sexual offense evidence shall not continue to be stored where: (A) such evidence is not privileged and law enforcement requests its release, in which case the custodian or custodians shall comply with such request;

or (B) such evidence is privileged and either (1) the alleged sexual offense victim gives permission to release the evidence to law enforcement, upon which the hospital collecting such evidence must record the collection of such evidence in the electronic tracking system and notify the appropriate law enforcement agency within forty-eight hours and law enforcement must retrieve the evidence within ten days of such notice and report such evidence in the statewide electronic tracking system pursuant to subdivision eight of this section, or (2) the alleged sexual offense victim signs a statement directing the custodian or custodians to dispose of the evidence, in which case the sexual offense evidence will be discarded in compliance with state and local health codes. Where the alleged sexual offense victim is under the age of eighteen, a vulnerable elderly person, or an incompetent or physically disabled person as defined in section 260.31 of the penal law, the office of victim services shall not destroy sexual offense evidence at the direction of a parent, guardian, conservator, or other party.

(ii) Where the alleged sexual offense victim is under the age of eighteen and had capacity to independently consent to a forensic rape exam, such victim may independently request the destruction of sexual offense evidence or may independently make decisions impacting the status of their kit as "reported" or "unreported" as defined in subparagraphs three and four of paragraph (g) of subdivision eight of this section.

* NB Effective December 2, 2027

* (k) Where the alleged sexual offense victim was under the age of eighteen at the time of the alleged sexual offense, the office of victim services shall, upon the victim's eighteenth birthday, make diligent efforts to contact the alleged sexual offense victim and provide information described in section six hundred forty-one of the executive law and subparagraphs one, five, six, seven and eight of paragraph (a) of subdivision six of this section.

* NB Effective December 2, 2027

3. Upon admittance or commencement of treatment of the alleged sexual offense victim, the hospital shall advise the victim of the availability of the services of a local rape crisis or victim assistance

organization, if any, to accompany the victim through the sexual offense examination. If after receiving such advice the sexual offense victim wishes the presence of a rape crisis or victim assistance advocate, the hospital shall contact the appropriate organization and request that one be provided, provided, however, that if in the professional judgment of the treating practitioner a delay in treatment is detrimental to the provision of medical treatment, then examination or treatment need not be delayed pending the arrival of such advocate and further provided that the presence or continued presence of such advocate does not interfere with the provision of necessary medical care to the victim.

4. No hospital or treating practitioner shall be liable in civil damages for failing to comply with the requirements of subdivision one, two or three of this section or acting in good faith to provide treatment as provided in subdivision three of this section.

4-a. On and after April first, two thousand one, a hospital providing treatment to alleged victims of sexual offenses shall be eligible to receive from the division of criminal justice services, at no cost, sexual offense evidence collection kits.

4-b. (a) The commissioner shall, with the consent of the directors of interested hospitals in the state and in consultation with the commissioner of the division of criminal justice services, designate hospitals in the state as the sites of a twenty-four hour sexual assault forensic examiner program. The hospital sites shall be designated in urban, suburban and rural areas to give as many state residents as possible ready access to the sexual assault forensic examiner program. The commissioner, in consultation with the commissioner of the division of criminal justice services, shall consider the following criteria when designating these sexual assault forensic examiner program sites:

(1) the location of the hospital;

(2) the hospital's capacity to provide on-site comprehensive medical services to victims of sexual offenses;

(3) the capacity of the hospital site to coordinate services for victims of sexual offenses including medical treatment, rape crisis counseling, psychological support, law enforcement assistance and

forensic evidence collection;

(4) the hospital's capacity to provide access to the sexual assault forensic examiner site for disabled victims;

(5) the hospital's existing services for victims of sexual offenses;

(6) the capacity of the hospital site to collect uniform data and insure confidentiality of such data; and

(7) the hospital's compliance with state and federally mandated standards of medical care.

(b) Each sexual assault forensic examiner program site designated pursuant to this subdivision shall comply with the requirements of subdivisions one, two and three of this section, and shall also provide treatment to the victim as follows:

(1) The victim shall, absent exigent circumstances, be met by a sexual assault forensic examiner within sixty minutes of arriving at the hospital, who shall be a nurse practitioner, physician assistant, registered nurse or physician specially trained in forensic examination of sexual offense victims and the preservation of forensic evidence in such cases and certified as qualified to provide such services pursuant to regulations promulgated by the commissioner. Such program shall assure that such a specially-trained forensic examiner is on-call and available on a twenty-four hour a day basis every day of the year.

(2) An examination of the victim shall be performed promptly by such forensic examiner in a private room designated for such examinations. An obstetrician/gynecologist or other appropriate medical doctor shall be readily available to the forensic examiner if there is a need for more specialized medical evaluation or treatment.

(3) Promptly after the examination is completed, the victim shall be permitted to shower, be provided with a change of clothing, be informed that a rape crisis or victim assistance organization providing victim assistance to the geographic area served by that hospital is available to provide transportation within the geographic area served by that organization, upon the conclusion of initial medical services, free of charge from the medical facility, and receive follow-up information, counseling, medical treatment and referrals for same.

(c) Nothing in this subdivision shall affect the existence or continued existence of any program in this state through which a trained nurse practitioner, physician assistant, registered nurse or physician

is providing appropriate forensic examinations and related services to survivors of sexual assault.

5. The commissioner shall promulgate such rules and regulations as may be necessary and proper to carry out effectively the provisions of this section. Prior to promulgating such rules and regulations, the commissioner shall consult with relevant police agencies, forensic laboratories, rape crisis centers, hospitals, and other such persons as the commissioner deems necessary. Such rules and regulations shall identify the offenses subject to the provisions of this section, provide a specific definition of sexual offense evidence and require each hospital to contact its local police agency and forensic laboratory to determine their specific needs or requirements.

6. (a) The department, in consultation with the division of criminal justice services, the office of victim services, hospitals, other health care providers and victim advocacy organizations, shall publish a sexual assault victim bill of rights for purposes of informing sexual offense victims of their rights under state law. Such bill of rights shall be prominently published on the department's website, in at least the ten most common languages spoken in this state, and distributed to hospitals as a document which shall be provided to every presenting sexual offense victim. The department may update the bill of rights as necessary to reflect changes in state law and more accurately explain the law. Such bill of rights shall be in plain, easy to understand language, and include the right of the victim to:

(1) consult with a local rape crisis or local victim assistance organization, to have a representative of such organization accompany the victim through the sexual offense examination, to have such an organization be summoned by the medical facility, police agency, prosecutorial agency or other law enforcement agency before the commencement of the physical examination or interview, pursuant to this section, and to have such organization provide transportation within the geographic area served by that organization, free of charge from the medical facility to sexual offense victims who request such services upon discharge;

(2) be offered and have made available at no cost appropriate

post-exposure treatment therapies, including a seven day starter pack of HIV post-exposure prophylaxis in accordance with paragraph (c) of subdivision one of this section and subdivision thirteen of section six hundred thirty-one of the executive law;

(3) a health care forensic examination at no cost and the right to be notified of the option to decline to provide private health insurance information and have the office of victim services reimburse the hospital for the examination under subdivision thirteen of section six hundred thirty-one of the executive law;

(4) receive information relating to and the provision of emergency contraception in accordance with section twenty-eight hundred five-p of this article;

(5) be offered contact information for the police agency, prosecutorial agency or other law enforcement agency with jurisdiction over the sexual offense and be informed, upon request of the victim, of the date and location at which such sexual offense evidence kit was assessed for Combined DNA Index System (CODIS) eligibility and analyzed, whether a CODIS eligible profile was developed and whether or not a DNA match was identified, provided, however, that the police agency, prosecutorial agency or other law enforcement agency serving the jurisdiction may temporarily delay release of such DNA match information to the victim, prior to the arrest of a suspect alleged to have committed such offense, if such agency documents in writing and notifies the victim that release of such information would compromise the successful investigation of such sexual offense;

* (6) be notified between thirty and ten days prior to the transfer of a sexual offense evidence kit from the hospital to another storage facility in accordance with paragraph (h) of subdivision two of this section, the right to have a sexual offense evidence kit maintained at an appropriate storage facility for twenty years from the date of collection, the right, if not previously consented to, to consent to release the evidence to law enforcement at any time during the twenty years from collection, and the right to be notified by such facility at least ninety days prior to the expiration of the twenty-year storage period in accordance with paragraph (k) of subdivision two of this section; and

* NB Effective until December 2, 2027

* (6) be notified between thirty and ten days prior to the transfer of a sexual offense evidence kit from the hospital to another storage facility in accordance with paragraph (h) of subdivision two of this section, the right to have a sexual offense evidence kit maintained at an appropriate storage facility for twenty years from the date of collection or until the victim's fortieth birthday, whichever is later, the right, if not previously consented to, to consent to release the evidence to law enforcement at any time during the twenty years from collection, and the right to be notified by such facility at least ninety days prior to the expiration of the twenty-year storage period in accordance with paragraph (i) of subdivision two of this section; and

* NB Effective December 2, 2027

(7) be notified by the prosecutorial agency with jurisdiction of judicial proceedings relating to their case in accordance with article twenty-three of the executive law; and

(8) decide whether or not the victim wishes to report the offense to law enforcement.

(b) Before a medical facility commences a physical examination of a sexual offense victim, or a police agency, prosecutorial agency or other law enforcement agency commences an interview of a sexual offense victim, the health care professional conducting the exam, police agency, prosecutorial agency or other law enforcement agency shall inform the victim of the victim's rights by providing a copy of this sexual assault victim bill of rights and offering to explain such rights.

7. (a) The division of criminal justice services and the office of victim services, in consultation with the division of state police forensic investigations center and the department, shall convene a working group to:

(1) address the creation of a coordinated tracking system for sexual offense evidence kits;

(2) assess and make recommendations related to the forensic testing of sexual offense evidence collection kits when a survivor declines to report to law enforcement; and

(3) make recommendations to strengthen existing sexual offense evidence collection and testing for all sexual offense evidence kits.

(b) The working group shall report its findings and recommendations to

the governor, the temporary president of the senate, and the speaker of the assembly on or before November thirtieth, two thousand twenty-six.

8. (a) The division of criminal justice services in consultation with the department, the office of victim services, the division of state police, and the New York State Coalition Against Sexual Assault shall develop a statewide electronic tracking system for reported evidence collection kits used to collect and preserve evidence of a sexual assault or other sex offense.

(b) The division of criminal justice services shall promulgate rules and guidelines to ensure that sexual offense evidence collection kits are trackable on a statewide electronic tracking system developed pursuant to this subdivision, and that survivors are given notice of how they may track their own reported evidence collection kit. Any law enforcement agency, forensic laboratory, or prosecutor that has taken custody of an evidence collection kit used for a forensic medical examination shall comply with the established protocols, rules and guidelines established by the division of criminal justice services pursuant to this paragraph.

(c) The statewide electronic tracking system shall:

(1) Track the location and status of each reported evidence collection kit from collection to final disposition;

(2) Allow a hospital, law enforcement agency, accredited crime laboratory, prosecutor, employees of the long-term sexual offense evidence storage facility, or any other entity providing a chain of custody for a reported evidence collection kit, to update and track the status and location of the reported evidence collection kits;

(3) Allow a survivor to anonymously track or receive updates regarding the status and location of such survivor's reported evidence collection kit; and

(4) Incorporate any relevant findings from the working group referenced in subdivision seven of this section.

(d) No later than December first, two thousand twenty-seven, any hospital, law enforcement agency, accredited crime laboratory, prosecutor, employee of the long-term sexual offense evidence storage facility, or any other entity providing a chain of custody for a reported evidence collection kit to update and track the status and

location of such kit, shall participate in the tracking system and comply with all established protocols, rules and guidelines. A participating entity shall be permitted to access the entity's tracking information through the statewide electronic tracking system.

(e) Records entered into the tracking system are confidential. Records relating to a reported evidence collection kit shall be accessed only by the survivor for whom the reported evidence collection kit was completed.

(f) The provisions of this subdivision shall apply to all reported evidence collection kits submitted prior to, on, or after the effective date of this subdivision.

(g) For purposes of this section:

(1) "evidence collection kit" shall mean a human biological specimen or specimens collected by a healthcare provider during a forensic medical examination from the victim of a sexual assault or other sex offense;

(2) "survivor" shall mean an individual who is the victim of a sexual offense from whom a human biological specimen or specimens were collected by a healthcare provider during a forensic medical examination;

(3) "reported evidence collection kit" means a sexual offense evidence kit in which the survivor has consented to evidence collection and forensic testing; and

(4) "unreported evidence collection kit" means a sexual offense evidence collection kit for which the survivor has not consented to or withdraws their consent to release to law enforcement.

§ 2805-j. Medical, dental and podiatric malpractice prevention program. 1. Every hospital shall maintain a coordinated program for the identification and prevention of medical, dental and podiatric malpractice. Such program shall include at least the following:

(a) The establishment of a quality assurance committee with the responsibility to review the services rendered in the hospital in order to improve the quality of medical, dental and podiatric care of patients and to prevent medical, dental and podiatric malpractice. Such committee shall oversee and coordinate the medical, dental and podiatric

malpractice prevention program and shall insure that information gathered pursuant to the program is utilized to review and to revise hospital policies and procedures. At least one member of the committee shall be a member of the governing board of the hospital who is not otherwise affiliated with the hospital in an employment or contractual capacity;

(b) A medical, dental and podiatric staff privileges sanction procedure through which credentials, physical and mental capacity and competence in delivering health care services are periodically reviewed, and reviewed as otherwise warranted in specific instances and circumstances, as part of an evaluation of staff privileges;

(c) The periodic review and the review as otherwise warranted in specific instances and circumstances of the credentials, physical and mental capacity and competence in delivering health care services of all persons who are employed or associated with the hospital;

(d) A procedure for the prompt resolution of grievances by patients or their representatives related to accidents, injuries, treatment and other events that may result in claims of medical, dental or podiatric malpractice;

(e) The maintenance and continuous collection of information concerning the hospital's experience with negative health care outcomes and incidents injurious to patients, patient grievances, professional liability premiums, settlements, awards, costs incurred by the hospital for patient injury prevention and safety improvement activities;

(f) The maintenance of relevant and appropriate information gathered pursuant to paragraphs (a) through (e) of this subdivision concerning individual physicians, dentists and podiatrists within the physician's, dentist's or podiatrist's personnel or credential file maintained by the hospital;

(g) Education programs dealing with patient safety, injury prevention, staff responsibility to report professional misconduct, the legal aspects of patient care, improved communication with patients and causes of malpractice claims for staff personnel engaged in patient care activities;

(h) Continuing education programs for medical, dental and podiatric staff in their areas of specialty; and

(i) Policies to ensure compliance with the reporting requirements of

section twenty-eight hundred three-e of this article and subdivision eleven of section two hundred thirty of this chapter.

(j) For the purposes of this section, the term "hospital" shall have the same meaning as is set forth in subdivision ten of section twenty-eight hundred one of this article.

2. Any person who, in good faith and without malice, provides information to further the purposes of the medical, dental and podiatric malpractice prevention program or who, in good faith and without malice, participates on the quality assurance committee shall not be subject to an action for civil damages or other relief as a result of such activity. Any hospital, or any person acting on behalf of such hospital, who, in good faith and without malice, takes or fails to take any action as a result of a review conducted pursuant to paragraph (b) or (c) of subdivision one of this section, shall not be subject to an action for civil damages or other monetary relief as a result of such action or failure to act, provided, however, that nothing in this subdivision shall relieve any hospital of any liability in an action for medical, dental or podiatric malpractice based on an act or failure to act as a result of a review conducted pursuant to paragraph (b) or (c) of subdivision one of this section, and provided further that nothing herein shall affect the authority of the commissioner pursuant to this chapter.

3. The commissioner shall make, adopt, promulgate and enforce such rules and regulations as he may deem appropriate to effectuate the purposes of this section.

§ 2805-k. Investigations prior to granting or renewing privileges. 1. Prior to granting or renewing professional privileges or association of any physician, dentist or podiatrist or hiring a physician, dentist or podiatrist, a hospital or facility approved pursuant to this article shall request from the physician, dentist or podiatrist and the physician, dentist or podiatrist shall be required to provide the following information:

(a) The name of any hospital or facility with or at which the

physician, dentist or podiatrist had or has any association, employment, privileges or practice;

(b) Where such association, employment, privilege or practice was discontinued, the reasons for its discontinuation;

(c) Any pending professional medical, dental or podiatric misconduct proceedings or any pending medical malpractice actions in this state or another state, the substance of the allegations in such proceedings or actions, and any additional information concerning such proceedings or actions as the physician, dentist or podiatrist may deem appropriate;

(d) The substance of the findings in such actions or proceedings and any additional information concerning such actions or proceedings as the physician, dentist or podiatrist may deem appropriate;

(e) A waiver by the physician, dentist or podiatrist of any confidentiality provisions concerning the information required to be provided to hospitals pursuant to this subdivision; and

(f) Documentation that the physician, dentist or podiatrist has completed the course work or training as mandated by section two hundred thirty-nine of this chapter or section six thousand five hundred five-b of the education law. A hospital or facility shall not grant or renew professional privileges or association to a physician, dentist, or podiatrist who has not completed such course work or training.

(g) A verification by the physician, dentist or podiatrist that the information provided by the physician, dentist or podiatrist is true and accurate.

2. Prior to granting privileges or association to any physician, dentist or podiatrist, or hiring a physician, dentist or podiatrist, any hospital or facility approved pursuant to this article shall request from any hospital with or at which such physician, dentist or podiatrist had or has privileges, was associated, or was employed, the following information concerning such physician, dentist or podiatrist:

(a) Any pending professional medical conduct proceedings or any pending medical malpractice actions, in this state or another state;

(b) Any judgment or settlement of a medical malpractice action and any finding of professional misconduct in this state or another; and

(c) Any information required to be reported by hospitals pursuant to section twenty-eight hundred three-e of this article.

3. If requested by the department, a hospital shall provide documentation that, prior to granting privileges, association or employing a physician, dentist or podiatrist, it has complied with the requirements of subdivisions one and two of this section and that, prior to renewing privileges, association or employment, it has complied with the requirements of subdivision one of this section. Copies of the information and documentation required pursuant to subdivisions one and two of this section shall be placed in the physician's, dentist's or podiatrist's personnel or credentials file maintained by the hospital.

4. Any hospital which receives a request for information from another hospital pursuant to subdivision one or two of this section shall provide such information concerning the physician, dentist or podiatrist in question to the extent such information is known to the hospital receiving such a request, including the reasons for suspension, termination, curtailment of employment or privileges at the hospital. Any hospital or hospital employee providing such information in good faith shall not be liable in any civil action for the release of such information.

§ 2805-1. Adverse event reporting. 1. (a) All hospitals shall be required to report events described by subdivision two of this section to the department in a manner and within time periods as may be specified by regulation of the department.

(b) For purposes of this section, "hospital" means any general hospital or diagnostic and treatment center.

2. The following adverse events shall be reported to the department:

(a) patients' deaths or impairments of bodily functions in circumstances other than those related to the natural course of illness, disease or proper treatment in accordance with generally accepted medical standards;

(b) fires in the hospital which disrupt the provision of patient care services or cause harm to patients or staff;

(c) equipment malfunction during treatment or diagnosis of a patient

which did or could have adversely affected a patient or hospital personnel;

(d) poisoning occurring within the hospital;

(e) strikes by hospital staff;

(f) disasters or other emergency situations external to the hospital environment which affect hospital operations; and

(g) termination of any services vital to the continued safe operation of the hospital or to the health and safety of its patients and personnel, including but not limited to the anticipated or actual termination of telephone, electric, gas, fuel, water, heat, air conditioning, rodent or pest control, laundry services, food or contract services.

3. Notwithstanding any provision of this section to the contrary, the commissioner is authorized, as appropriate in the interest of promoting patient safety, and after consulting with clinicians, hospital administrators, researchers, and consumers with expertise in the area of patient safety and quality improvement, to add, modify or eliminate one or more adverse events set forth in subdivision two of this section, by regulation, consistent with national consensus standards endorsed by the consensus-based entity selected for the purpose of pursuing certain activities relating to healthcare performance measurement by the U.S. Department of Health and Human Services pursuant to the Medicare Improvements for Patients and Providers Act (Pub. L. 110-275).

4. The hospital shall conduct an investigation of events described in paragraphs (a) through (d) of subdivision two of this section within thirty days of obtaining knowledge of any information which reasonably appears to show that such an event has occurred, provided that, if the hospital reasonably expects such investigation to extend beyond such thirty day period, the hospital shall notify the department of such expectation and the reason therefor, and shall inform the department of the expected completion date of the investigation. The hospital shall provide to the department a copy of the investigation report within twenty-four hours of completion. Nothing herein shall limit the authority of the department to conduct an investigation of events occurring in hospitals.

5. The department shall:

(a) analyze event reports, findings of the investigations, their root cause analyses, and corrective action plans to determine patterns of systemic failure in the health care system and identify successful methods to correct these failures; and

(b) communicate to facilities the department's conclusions, if any, regarding event reports, patterns of systemic failure, and recommendations for corrective action resulting from the analysis of submissions from facilities; and may release, in a format that does not identify specific patients and does not provide reasonable basis to believe that the information can be used to identify a patient; (i) analyses and findings derived from the adverse event data to hospitals or the public and (ii) adverse event data to researchers for patient safety research projects approved by the commissioner, subject to any terms and conditions imposed by the commissioner concerning the security and confidentiality of the data and their use; and provided that no such data, record, documentation or action subject to subdivision two of section twenty-eight hundred five-m of this article, shall be subject to disclosure under article six of the public officers law nor article thirty-one of the civil practice law and rules.

6. The commissioner shall establish protocols for hospital personnel where a patient under the age of eighteen years dies during transportation to the hospital or while at the hospital, under circumstances other than those related to the natural course of illness, disease or proper treatment in accordance with generally accepted medical standards. Such protocols shall address matters including, but not limited to, the following:

- (a) medical and social history, and examination of the patient;
- (b) preservation of evidence and chain of custody;
- (c) questioning of the patient's family, guardian or person in parental authority;
- (d) circumstances surrounding the injury resulting in death;
- (e) determination of the cause of death;
- (f) notification of law enforcement personnel; and
- (g) reporting requirements under title six of article six of the

social services law.

In developing such protocols, the commissioner shall consult with the office of children and family services, local departments of social services, coordinators of child fatality review teams established pursuant to section four hundred twenty-two-b of the social services law, law enforcement agencies, pediatricians preferably with expertise in the area of child abuse and maltreatment or forensic pediatrics, and such other persons as the commissioner deems necessary.

7. The commissioner shall make, adopt, promulgate and enforce such rules and regulations as he may deem appropriate to effectuate the purposes of this section.

§ 2805-m. Confidentiality. 1. The information required to be collected and maintained pursuant to sections twenty-eight hundred five-j and twenty-eight hundred five-k of this article, reports required to be submitted pursuant to section twenty-eight hundred five-l of this article and any incident reporting requirements imposed upon diagnostic and treatment centers pursuant to the provisions of this chapter shall be kept confidential and shall not be released except to the department or pursuant to subdivision four of section twenty-eight hundred five-k of this article.

2. Notwithstanding any other provisions of law, none of the records, documentation or committee actions or records required pursuant to sections twenty-eight hundred five-j and twenty-eight hundred five-k of this article, the reports required pursuant to section twenty-eight hundred five-l of this article nor any incident reporting requirements imposed upon diagnostic and treatment centers pursuant to the provisions of this chapter shall be subject to disclosure under article six of the public officers law or article thirty-one of the civil practice law and rules, except as hereinafter provided or as provided by any other provision of law. No person in attendance at a meeting of any such committee shall be required to testify as to what transpired thereat. The prohibition relating to discovery of testimony shall not apply to

the statements made by any person in attendance at such a meeting who is a party to an action or proceeding the subject matter of which was reviewed at such meeting.

3. There shall be no monetary liability on the part of, and no cause of action for damages shall arise against, any person, partnership, corporation, firm, society, or other entity on account of the communication of information in the possession of such person or entity, or on account of any recommendation or evaluation, regarding the qualifications, fitness, or professional conduct or practices of a physician, to any governmental agency, medical or specialists society, or hospital as required by sections twenty-eight hundred five-j, twenty-eight hundred five-k and twenty-eight hundred five-l of this article or any incident reporting requirements imposed upon diagnostic and treatment centers pursuant to the provisions of this chapter. The foregoing shall not apply to information which is untrue and communicated with malicious intent.

4. (a) Hospital sepsis data submitted to the department, shall for the initial phase of data collection be considered a "pilot phase", the purpose of which is to ensure the completeness and accuracy of reporting by hospitals.

(b) For data reported during the pilot phase, hospital identifiers shall be encrypted by the department in any and all public databases and reports. The department shall provide each hospital with an encryption key for that hospital only to permit access to its own performance data for internal quality improvement purposes. Hospital specific public reporting of sepsis data including, but not limited to risk adjusted sepsis mortality rates, may require up to, but no more than, two years of "pilot phase" collection depending on the validity and reliability outcomes of the data collected.

(c) As described in the regulations pertaining to the submission of data on sepsis to the department, consultation with appropriate national, hospital and expert stakeholders will assist in determining the appropriate public release of hospital performance.

(d) The department shall issue regular reports as needed to hospitals assessing the accuracy of the data submitted during the pilot phase and

provide guidance for improving the accuracy of data reporting.

(e) After the pilot phase is completed, all data submitted under this section and compiled in the database established herein and all public reports derived therefrom shall include hospital identifiers.

(f) Clinical performance data, including but not limited to individual hospital mortality rates adjusted for potential differences in risk factors and comparisons with state (or national, if available) averages, shall be developed and posted on the department's web site.

§ 2805-n. Child abuse prevention. All hospitals shall: (i) develop, maintain and disseminate written policies and procedures pursuant to title six of article six of the social services law and applicable provisions of article ten of the family court act, regarding the mandatory reporting of child abuse or neglect, reporting procedures and obligations of persons required to report, provisions for taking a child into protective custody, mandatory reporting of deaths, immunity from liability, penalties for failure to report and obligations for the provision of services and procedures necessary to safeguard the life or health of the child; and (ii) establish, and implement on an ongoing basis, a training program for all current and new employees regarding the policies and procedures established pursuant to this section.

§ 2805-o. Identification of veterans and their spouses by nursing homes, residential health care facilities, and adult care facilities. 1. Every nursing home and residential health care facility as defined in subdivisions two and three of section two thousand eight hundred one of this article and every adult care facility licensed and certified by the department pursuant to title two of article seven of the social services law or article forty-six-B of this chapter, including all adult homes, enriched housing programs, residences for adults, assisted living programs, and assisted living residences shall keep and maintain accurate records identifying veterans and their spouses residing within such facilities. Such information shall be solicited by nursing home and/or residential health care facility staff upon a patient's admission, noted on the admission form, and included with the patient's

file by asking the question "Have you or your spouse ever served in the United States military?". In the case of patients currently residing at such nursing homes or residential health care facilities, staff shall solicit such information by asking the question "Have you or your spouse ever served in the United States military?" from each patient residing at such institution and update the patient's file to indicate veteran status.

2. Every nursing home, residential health care facility and every adult care facility licensed and certified by the department pursuant to title two of article seven of the social services law or article forty-six-B of this chapter, including all adult homes, enriched housing programs, residences for adults, assisted living programs, and assisted living residences shall in writing advise all individuals identifying themselves as veterans or spouses of veterans that the department of veterans' services and local veterans' service agencies established pursuant to section fourteen of the veterans' services law to provide assistance to veterans and their spouses regarding benefits under federal and state law. Such written information shall include the name, address and telephone number of the New York state department of veterans' services, the nearest department of veterans' services office, the nearest county or city veterans' service agency and the nearest accredited veterans' service officer.

3. Every nursing home, residential health care facility and every adult care facility licensed and certified by the department pursuant to title two of article seven of the social services law or article forty-six-B of this chapter, including all adult homes, enriched housing programs, residences for adults, assisted living programs, and assisted living residences, with the permission of individuals identifying themselves as veterans or spouses of veterans, shall transmit such veteran status information to the division of veterans' services.

4. Any person who violates the provisions of this section shall be subject to a civil fine not to exceed fifty dollars per violation but in no event shall any fine exceed one thousand dollars.

§ 2805-p. Emergency treatment of rape survivors. 1. As used in this section:

(a) "Emergency contraception" shall mean one or more prescription drugs used separately or in combination to be administered or self-administered by a patient to prevent pregnancy within a medically recommended amount of time after sexual intercourse and dispensed for that purpose in accordance with professional standards of practice and determined by the United States Food and Drug Administration to be safe.

(b) "Emergency treatment" shall mean any medical examination or treatment provided by a hospital to a rape survivor following an alleged rape.

(c) "Rape" shall mean any act defined in section 130.25, 130.30 or 130.35 of the penal law.

(d) "Rape survivor" or "survivor" shall mean any person who alleges or is alleged to have been raped and who presents as a patient.

2. Every hospital providing emergency treatment to a rape survivor shall promptly:

(a) provide such survivor with written information prepared or approved, pursuant to subdivision three of this section, relating to emergency contraception;

(b) orally inform such survivor of the availability of emergency contraception, its use and efficacy; and

(c) provide emergency contraception to such survivor, unless contraindicated, upon such survivor's request. No hospital may be required to provide emergency contraception to a rape survivor who is pregnant.

3. The commissioner shall develop, prepare and produce informational materials relating to emergency contraception for distribution to and use in all hospitals in the state, in quantities sufficient to comply with the requirements of this section. The commissioner may also approve informational materials from medically recognized sources for the purposes of this section. Such informational material shall be in clear and concise language, readily comprehensible, in such varieties and forms as the commissioner shall deem necessary to inform survivors in

English and languages other than English. Such materials shall explain the nature of emergency contraception including its use and efficacy.

4. The commissioner shall promulgate all such rules and regulations as may be necessary and proper to implement the provisions of this section.

§ 2805-q. Hospital visitation by domestic partner. 1. No domestic partner or surrogate as defined by subdivision twenty-nine of section twenty-nine hundred ninety-four-a of this chapter shall be denied any rights of visitation of his or her domestic partner or of the patient or resident for whom he or she is the surrogate, when such rights are accorded to spouses and next-of-kin at any hospital, nursing home or health care facility.

2. For purposes of this section only, "domestic partner" means a person who, with respect to another person:

(a) is formally a party in a domestic partnership or similar relationship with the other person, entered into pursuant to the laws of the United States or of any state, local or foreign jurisdiction, or registered as the domestic partner of the other person with any registry maintained by the employer of either party or any state, municipality, or foreign jurisdiction; or

(b) is formally recognized as a beneficiary or covered person under the other person's employment benefits or health insurance; or

(c) is dependent or mutually interdependent on the other person for support, as evidenced by the totality of the circumstances indicating a mutual intent to be domestic partners including but not limited to: common ownership or joint leasing of real or personal property; common householding, shared income or shared expenses; children in common; signs of intent to marry or become domestic partners under paragraph (a) or (b) of this subdivision; or the length of the personal relationship of the persons.

3. Each party to a domestic partnership shall be considered to be the domestic partner of the other party. "Domestic partner" shall not include a person who is related to the other person by blood in a manner

that would bar marriage to the other person in New York state. "Domestic partner" also shall not include any person who is less than eighteen years of age or who is the adopted child of the other person or who is related by blood in a manner that would bar marriage in New York state to a person who is the lawful spouse of the other person.

§ 2805-r. Patients unable to verbally communicate. 1. The department shall make regulations concerning the treatment of general hospital patients who are unable to verbally communicate, for whatever reason, with a health care practitioner or aide.

2. Such regulations shall establish standards for a patient to have present during his or her period of admission a parent, guardian, representative or authorized helper to assist in the communication with health care personnel.

3. The standards established under this section shall be incorporated into the statement of rights and responsibilities adopted pursuant to paragraph (g) of subdivision one of section twenty-eight hundred three of this article.

§ 2805-s. Circulating nurse required. A registered nurse, qualified by training and experience in operating room nursing, shall be present as a circulating nurse in any and each separate operating room where surgery is being performed for the duration of the operative procedure. Nothing in this section precludes a circulating nurse from leaving the operating room as part of the operative procedure, leaving the operating room for short periods; or, in accordance with employee rules or regulations, being relieved during an operative procedure by another circulating nurse assigned to continue the operative procedure.

§ 2805-t. Clinical staffing committees and disclosure of nursing quality indicators. 1. Legislative intent. The legislature hereby finds and declares:

(a) Research demonstrates that nurses play a critical role in improving patient safety and quality of care;

(b) Appropriate staffing of general hospital personnel, including registered nurses available for patient care, assists in reducing errors, complications and adverse patient care events, improves staff safety and satisfaction, and reduces incidences of workplace injuries;

(c) Health care professional, technical, and support staff comprise vital components of the patient care team, bringing their particular skills and services to ensuring quality patient care;

(d) Ensuring sufficient staffing of general hospital personnel, including registered nurses, is an urgent public policy priority in order to protect patients and support greater retention of registered nurses and safer working conditions; and

(e) It is the public policy of the state to promote evidence-based nurse staffing standards and increase transparency of health care data and decision making based on the data.

2. Clinical staffing committee. (a) Each general hospital licensed pursuant to this article shall establish and maintain a clinical staffing committee, either by creating a new committee or assigning the functions of the clinical staffing committee to an existing committee, no later than January first, two thousand twenty-two.

(b) Where a collective bargaining agreement provides for a staffing committee, the required functions of the clinical staffing committee established pursuant to this section shall be incorporated into that committee. Any staffing or non-staffing committees established by a collective bargaining agreement, shall continue to function in accordance with the terms of the agreement, and the clinical staffing committee established by this section shall not limit or otherwise supplant the collective bargaining agreement.

(c) At least one-half of the members of the clinical staffing committee shall be registered nurses, licensed practical nurses, and ancillary members of the frontline team currently providing or supporting direct patient care and up to one-half of the members shall be selected by the general hospital administration and shall include but not be limited to the chief financial officer, the chief nursing officer, and patient care unit directors or managers or their designees.

The selection of the registered nurses, licensed practical nurses, and ancillary frontline team members of the committee shall be according to their respective collective bargaining agreements if there is one in effect at the general hospital for their bargaining unit. If there is no applicable collective bargaining agreement, the members of the clinical staffing committee who are registered nurses, licensed practical nurses, and ancillary members providing direct patient care shall be selected by their peers. Ancillary members of the frontline team on the committee shall include but are not limited to patient care technicians, certified nursing assistants, other non-licensed staff assisting with nursing or clerical tasks, and unit clerks.

3. Employee participation. Participation in the clinical staffing committee by a general hospital employee shall be on scheduled work time and compensated at the appropriate rate of pay. Clinical staffing committee members shall be fully relieved of all other work duties during meetings of the committee and shall not have work duties added or displaced to other times as a result of their committee responsibilities.

4. Primary responsibilities. Primary responsibilities of the clinical staffing committee shall include the following functions:

(a) Development and oversight of implementation of an annual clinical staffing plan. The clinical staffing plan shall include specific staffing for each patient care unit and work shift and shall be based on the needs of patients. Staffing plans shall include specific guidelines or ratios, matrices, or grids indicating how many patients are assigned to each registered nurse and the number of nurses and ancillary staff to be present on each unit and shift and shall be used as the primary component of the general hospital staffing budget.

(b) Factors to be considered and incorporated in the development of the plan shall include, but are not limited to:

(i) Census, including total numbers of patients on the unit on each shift and activity such as patient discharges, admissions, and transfers;

(ii) Measures of acuity and intensity of all patients and nature of the care to be delivered on each unit and shift;

(iii) Skill mix;

(iv) The availability, level of experience, and specialty certification or training of nursing personnel providing patient care, including charge nurses, on each unit and shift;

(v) The need for specialized or intensive equipment;

(vi) The architecture and geography of the patient care unit, including but not limited to placement of patient rooms, treatment areas, nursing stations, medication preparation areas, and equipment;

(vii) Mechanisms and procedures to provide for one-to-one patient observation, when needed, for patients on psychiatric or other units as appropriate;

(viii) Other special characteristics of the unit or community patient population, including age, cultural and linguistic diversity and needs, functional ability, communication skills, and other relevant social or socio-economic factors;

(ix) Measures to increase worker and patient safety, which could include measures to improve patient throughput;

(x) Staffing guidelines adopted or published by other states or local jurisdictions, national nursing professional associations, specialty nursing organizations, and other health professional organizations;

(xi) Availability of other personnel supporting nursing services on the unit;

(xii) Waiver of plan requirements in the case of unforeseeable emergency circumstances as defined in subdivision fourteen of this section;

(xiii) Coverage to enable registered nurses, licensed practical nurses, and ancillary staff to take meal and rest breaks, planned time off, and unplanned absences that are reasonably foreseeable as required by law or the terms of an applicable collective bargaining agreement, if any, between the general hospital and a representative of the nursing or ancillary staff;

(xiv) The nursing quality indicators required under subdivision seventeen of this section;

(xv) General hospital finances and resources; and

(xvi) Provisions for limited short-term adjustments made by appropriate general hospital personnel overseeing patient care operations to the staffing levels required by the plan, necessary to

account for unexpected changes in circumstances that are to be of limited duration.

(c) Semiannual review of the staffing plan against patient needs and known evidence-based staffing information, including the nursing sensitive quality indicators collected by the general hospital.

(d) Review, assessment, and response to complaints regarding potential violations of the adopted staffing plan, staffing variations, or other concerns regarding the implementation of the staffing plan and within the purview of the committee.

5. Compliance provisions. (a) The clinical staffing plan shall comply with all federal and state laws and regulations and shall not diminish other standards contained in state or federal law and regulations, or the terms of an applicable collective bargaining agreement, if any.

(b) The clinical staffing plan shall comply with applicable laws and regulations, including, but not limited to:

(i) Regulations made by the department on burn unit staffing, liver transplant staffing, and operating room circulating nurse staffing;

(ii) Staffing regulations to be promulgated by the commissioner relating to staffing in intensive care and critical care units no later than January first, two thousand twenty-two. Such regulations shall consider the factors set forth in paragraph (b) of subdivision four of this section, standards in place in neighboring states, and a minimum standard of twelve hours of registered nurse care per patient per day;

(iii) Such other staffing standards or regulations as are currently in effect or may hereafter be established by the department or enacted by the legislature; and

(iv) The provisions of section one hundred sixty-seven of the labor law and any related regulations.

(c) The clinical staffing plan shall comply with and incorporate any minimum staffing levels provided for in any applicable collective bargaining agreement, including but not limited to nurse-to-patient ratios, caregiver-to-patient ratios, staffing grids, staffing matrices, or other staffing provisions.

6. Process for adoption of clinical staffing plans. (a) The clinical staffing committee shall produce the general hospital's annual clinical

staffing plan by July first of each year.

(b) Clinical staffing plans shall be developed and adopted by consensus of the clinical staffing committee. For the purposes of determining whether there is a consensus, the management members of the committee shall have one vote and the employee members of the committee shall have one vote, regardless of the actual number of members of the committee. Each side may determine its own method of casting its vote to adopt all or part of the clinical staffing plan.

(c) The general hospital shall adopt any clinical staffing plan that is wholly or partially recommended by a consensus of the clinical staffing committee. If there is no consensus on the recommended staffing plan or any of its parts, the chief executive officer of the general hospital shall use the officer's discretion to adopt a plan or partial plan for which there is no consensus. In this case, the chief executive officer shall provide a written explanation of the elements of the clinical staffing plan that the committee was unable to agree on, including the final written proposals from the two parties and their rationales. In no event may a chief executive officer fail to include in the adopted plan any staffing related terms and conditions of the plan that has previously been adopted through any applicable collective bargaining agreement.

(d) Each general hospital shall adopt and submit its first hospital clinical staffing plan under this section to the department no later than July first, two thousand twenty-two and annually thereafter. The plan submitted to the department shall, where applicable, include the written explanation from the chief executive officer and written proposals from the two parties regarding elements that the committee did not agree on as required in paragraph (c) of this subdivision. The submitted clinical staffing plan shall include data, from at least the previous year, on the frequency and duration of variations from the adopted clinical staffing plan, the number of complaints relating to the clinical staffing plan and their disposition, as well as descriptions of unresolved complaints submitted pursuant to paragraph (b) of subdivision seven of this section. The department shall post the plan as part of each individual general hospital's health profile on the website of the department no later than July thirty-first of each year. If the adopted clinical staffing plan is subsequently amended, the amended plan shall

be submitted to the department within thirty days of adoption. Adopted staffing plans shall be amended to include newly created units and existing units that undergo clinical or programmatic changes that fundamentally alter their character or nature. The department shall post amended staffing plans upon receipt.

7. Implementation of clinical staffing plans. (a) Beginning January first, two thousand twenty-three, and annually thereafter, each general hospital shall implement the clinical staffing plan adopted by July first of the prior calendar year, and any subsequent amendments, and assign personnel to each patient care unit in accordance with the plan.

(b) A registered nurse, licensed practical nurse, ancillary member of the frontline team, or collective bargaining representative may report to the clinical staffing committee any variations where the personnel assignment in a patient care unit is not in accordance with the adopted staffing plan and may make a complaint to the committee based on the variations.

(c) The clinical staffing committee shall develop a process to examine, respond to, and track data submitted under paragraph (b) of this subdivision. The clinical staffing committee may by consensus, as described in paragraph (b) of subdivision six of this section, determine a complaint resolved or dismissed. The clinical staffing committee shall also establish agreed upon rules and criteria to provide for confidentiality of complaints that are in the process of being examined or are found to be unsubstantiated. This subdivision does not infringe upon or limit the rights of any collective bargaining representative of employees, or of any employee or group of employees pursuant to applicable law, including without limitation any applicable state or federal labor laws.

8. Posting of staffing information. Each general hospital shall post, in a publicly conspicuous area on each patient care unit, the clinical staffing plan for that unit and the actual daily staffing for that shift on that unit as well as the relevant clinical staffing.

9. Retaliation and intimidation prohibited. A general hospital shall not retaliate against or engage in any form of intimidation of:

(a) An employee for performing any duties or responsibilities in connection with the clinical staffing committee; or

(b) An employee, patient, or other individual who notifies the clinical staffing committee or the hospital administration of the individual's staffing concerns.

10. Special considerations. Nothing in this section is intended to create unreasonable burdens on critical access hospitals under 42 U.S.C. Sec. 1395i-4 and sole community hospitals under 42 U.S.C. Sec. 1395ww(d)(5) related to the operation of their clinical staffing committees. Critical access and sole community hospitals may develop flexible approaches to accomplish the requirements of this section. Clinical staffing plans from such entities submitted to the department shall contain a description of any ways in which the general hospital's approach to creating the plan differed from the process outlined in this section. This subdivision does not relieve such entities from compliance with other provisions of this section related to the adoption, implementation and adherence to an adopted clinical staffing plan, reporting and disclosure, or other requirements of this section.

11. Investigations. (a) The department shall investigate potential violations of this section following receipt of a complaint with supporting evidence, of failure to:

(i) Form or establish a clinical staffing committee;

(ii) Comply with the requirements of this section in creating a clinical staffing plan;

(iii) Adopt all or part of a clinical staffing plan that is approved by consensus of the clinical staffing committee and submitted to the department;

(iv) Conduct a semiannual review of a clinical staffing plan; or

(v) Submit to the department a clinical staffing plan on an annual basis and any updates.

(b) The department shall initiate an investigation of unresolved complaints, that have first been submitted to the clinical staffing committee, regarding compliance with the clinical staffing plan, personnel assignments in a patient care unit or staffing levels, or any other requirement of the adopted clinical staffing plan, excluding

complaints determined by the clinical staffing committee to be resolved or dismissed as determined by consensus of the clinical staffing committee as described in paragraph (b) of subdivision six of this section.

(c) The department shall initiate an investigation after making an assessment that there is a pattern of failure to resolve complaints submitted to the clinical staffing committee or a pattern of failure to reach consensus on the adoption of all or part of a clinical staffing plan. In the case of a pattern of failure to resolve complaints or to reach consensus on the adoption of all or part of a clinical staffing plan, the department shall determine if the pattern was due to one of the parties routinely refusing to resolve complaints or reach consensus.

(d) Any department investigation of a complaint under this subdivision shall consider whether unforeseeable emergency circumstances as defined in subdivision fourteen of this section contributed to the failure of the general hospital to comply with this section.

(e) After an investigation conducted under paragraph (a) or (b) of this subdivision, if the department determines that there has been a violation, the department shall require the general hospital to submit a corrective plan of action within forty-five days of the presentation of findings from the department to the hospital. If the department determines after investigation under paragraph (c) of this subdivision that the general hospital representatives on the clinical staffing committee were responsible for a pattern of not resolving complaints or for a pattern of not reaching consensus, the department shall require the general hospital to submit a corrective action plan within forty-five days of the presentation of findings to the general hospital. If the department finds that the frontline staff representatives on the clinical staffing committee were responsible for a pattern of not resolving complaints or for a pattern of not reaching consensus, the department shall not require the general hospital to submit a corrective action plan or impose a civil penalty on the general hospital pursuant to subdivision twelve of this section.

12. Civil penalties. In the event that a general hospital fails to submit or submits but fails to implement a corrective action plan in response to a violation or violations found by the department based on a

complaint filed pursuant to paragraph (a), (b) or (c) of subdivision eleven of this section, the department may impose a civil penalty as authorized by section twelve of this chapter for all violations asserted against the general hospital, until the general hospital submits or implements a corrective action plan or takes other action directed by the department.

13. Posting of penalties and related information. The department shall maintain for public inspection, including posting on the general hospital profile on the department website, records of any civil penalties, administrative actions, or license suspensions or revocations imposed on general hospitals under this section.

14. Unforeseeable emergency circumstances. (a) For purposes of this section, "unforeseeable emergency circumstance" means:

- (i) Any officially declared national, state, or municipal emergency;
- (ii) When a general hospital disaster plan is activated; or
- (iii) Any unforeseen disaster or other catastrophic event that immediately affects or increases the need for health care services.

(b) In determining whether a general hospital has violated its obligations under this section to comply with the general hospital's clinical staffing plan, it shall not be a defense that it was unable to secure sufficient staff if the lack of staffing was foreseeable and could be prudently planned for or involved routine nurse staffing needs that arose due to typical staffing patterns, typical levels of absenteeism, and time off typically approved by the employer for vacation, holidays, sick leave, and personal leave.

15. Complaints. Nothing in this section shall be construed to preclude the ability to submit a complaint to the department as provided for under this chapter. Nothing in this section shall be construed as supplanting other complaint mechanisms established by a general hospital, including mechanisms designed to aid in compliance with other federal, state or local laws. Nothing in this section shall be construed as limiting or supplanting the rights of employees and their collective bargaining representatives to fully enforce any and all rights under the terms of a collective bargaining agreement. An employer shall not assert

or attempt to assert a claim that enforcement of the collective bargaining agreement is barred or limited by any provisions of this section.

16. Annual report. (a) The department shall submit an annual report to the speaker of the assembly, the temporary president of the senate, and the chairs of the health committees of the assembly and senate and the governor on or before December thirty-first of each year. This report shall include the number of complaints submitted to the department, the disposition of these complaints, the number of investigations conducted, and the associated costs for complaint investigations, if any.

(b) Prior to the submission of the report, the commissioner shall convene a stakeholder workgroup consisting of hospital associations and unions representing nurses and other ancillary members of the frontline team. The stakeholder workgroup shall review the report prior to its submission to the speaker of the assembly, the temporary president of the senate, and the chairs of the health committees of the assembly and senate.

17. Disclosure of nursing quality indicators. (a) Every facility with an operating certificate pursuant to the requirements of this article shall make available to the public information regarding nurse staffing and patient outcomes as specified by the commissioner by rule and regulation. The commissioner shall promulgate rules and regulations on the disclosure of nursing quality indicators providing for the disclosure of information including at least the following, as appropriate to the reporting facility:

(i) The number of registered nurses providing direct care and the ratio of patients per registered nurse, full-time equivalent, providing direct care. This information shall be expressed in actual numbers, in terms of total hours of nursing care per patient, including adjustment for case mix and acuity, and as a percentage of patient care staff, and shall be broken down in terms of the total patient care staff, each unit, and each shift.

(ii) The number of licensed practical nurses providing direct care. This information shall be expressed in actual numbers, in terms of total hours of nursing care per patient including adjustment for case mix and

acuity, and as a percentage of patient care staff, and shall be broken down in terms of the total patient care staff, each unit, and each shift.

(iii) The number of unlicensed personnel utilized to provide direct patient care, including adjustment for case mix and acuity. This information shall be expressed both in actual numbers and as a percentage of patient care staff and shall be broken down in terms of the total patient care staff, each unit, and each shift.

(iv) Incidence of adverse patient care, including incidents such as medication errors, patient injury, decubitus ulcers, nosocomial infections, and nosocomial urinary tract infections.

(v) Methods used for determining and adjusting staffing levels and patient care needs and the facility's compliance with these methods.

(vi) Data regarding complaints filed with any state or federal regulatory agency, or an accrediting agency, and data regarding investigations and findings as a result of those complaints, degree of compliance with acceptable standards, and the findings of scheduled inspection visits.

(b) Such information shall be provided to the commissioner of any state agency responsible for licensing or accrediting the facility, or responsible for overseeing the delivery of services either directly or indirectly, to any employee of a general hospital or the employee's collective bargaining agent, if any, and to any member of the public who requests such information directly from the facility. Written statements containing such information shall state the source and date thereof.

(c) The commissioner shall make regulations to provide a uniform format or form for complying with the reporting requirements of subparagraphs (i), (ii) and (iii) of paragraph (a) of this subdivision, allowing patients and the public to clearly understand and compare staffing patterns and actual levels of staffing across facilities. Such uniform format or form shall allow facilities to include a description of additional resources available to support unit level patient care and a description of the general hospital. The information required by subparagraphs (i), (ii) and (iii) of paragraph (a) of this subdivision, reported in a manner determined by the commissioner, shall be filed with the department electronically on a quarterly basis and shall be available to the public on the department's website. The regulations

shall take effect no later than December thirty-first, two thousand twenty-two. Information required to be provided pursuant to subparagraphs (i), (ii) and (iii) of paragraph (a) of this subdivision shall be made available to the public no later than July first, two thousand twenty-three.

18. Advisory commission. (a) There is hereby established an independent advisory commission, composed of nine experts in staffing standards and quality of patient care, including: three experts in nursing practice, quality of nursing care or patient care standards, one of whom shall be appointed by the governor, one of whom shall be appointed by the speaker of the assembly and one of whom shall be appointed by the temporary president of the senate; three representatives of unions representing nurses, one of whom shall be appointed by the governor, one of whom shall be appointed by the speaker of the assembly and one of whom shall be appointed by the temporary president of the senate; and three members representing general hospitals, one of whom shall be appointed by the governor, one of whom shall be appointed by the speaker of the assembly and one of whom shall be appointed by the temporary president of the senate. The members of the commission shall serve at the pleasure of the appointing official. Members of the commission shall keep confidential any information received in the course of their duties and may only use such information in the course of carrying out their duties on the commission, except those reports required to be issued by the commission under this section, which may only include de-identified information.

(b) The advisory commission shall convene from time to time in order to evaluate the effectiveness of the clinical staffing committees required by this section. Such review shall evaluate the following metrics, including but not limited to quantitative and qualitative data on whether staffing levels were improved and maintained, patient satisfaction, employee satisfaction, patient quality of care metrics, workplace safety, and any other metrics the commission deems relevant. The commission shall also review the annual report submitted by the department and make recommendations to the speaker of the assembly, the temporary president of the senate, and the chairs of the health committees of the assembly and senate as set forth in paragraph (d) of

this subdivision.

(c) The advisory commission may collect and shall be provided all relevant information, necessary to carry out its functions, from the department and other state agencies. The commission may also invite testimony by experts in the field and from the public. In making its recommendations to the speaker of the assembly, the temporary president of the senate, and the chairs of the health committees of the assembly and senate, the commission shall analyze relevant data, including data and factors set forth in paragraph (b) of subdivision four of this section related to clinical staffing plans. The commission may also make recommendations for additional or enhanced enforcement mechanisms or powers to address general hospital failure to comply with this section and recommend the appropriation of funding for the department to enforce this section or to assist general hospitals in hiring additional staff to comply with this section.

(d) The advisory commission shall submit to the speaker of the assembly, the temporary president of the senate and the chairs of the health committees of the assembly and senate, and make available to the public a report that makes recommendations to the speaker of the assembly, the temporary president of the senate, and the chairs of the health committees of the assembly and senate for further legislative action, if any, in order to improve working conditions and quality of care in general hospitals pursuant to this section and its intent.

(e) The commission shall submit its report and recommendations to the speaker of the assembly, the temporary president of the senate, and the chairs of the health committees of the assembly and senate no later than October thirty-first, two thousand twenty-four, once three years of staffing plans have been submitted to the department pursuant to this section.

(f) Members of the commission shall receive no compensation for their services, but shall be allowed their actual and necessary expenses incurred in the performance of their duties hereunder.

(g) The legislature may appropriate funding for the commission to hire staff or consultants and provide for the operation of the commission as reasonably necessary to fulfill its functions.

§ 2805-u. Credentialing and privileging of health care practitioners providing telemedicine services. 1. For purposes of this section:

(a) "Distant site hospital" means a hospital licensed pursuant to this article or a hospital licensed by another state, that has entered into an agreement with an originating hospital to make available one or more health care practitioners that are members of its clinical staff to the originating hospital for the purposes of providing telemedicine services. To qualify as a distant site hospital for purposes of this article, a hospital licensed by another state must comply with the federal regulations governing participation by hospitals in Medicare.

(b) "Health care practitioner" shall mean a person licensed pursuant to article one hundred thirty-one, one hundred thirty-one-B, one hundred thirty-three, one hundred thirty-nine, one hundred forty, one hundred forty-one, one hundred forty-three, one hundred forty-four, one hundred fifty-three, one hundred fifty-four or one hundred fifty-nine of the education law, or as otherwise authorized by the commissioner.

(c) "Originating hospital" means the hospital at which a patient is located at the time telemedicine services are provided to him or her.

(d) "Telemedicine" means the delivery of clinical health care services by means of real time two-way electronic audio-visual communications which facilitate the assessment, diagnosis, consultation, treatment, education, care management and self management of a patient's health care while such patient is at the originating site and the health care provider is at a distant site.

2. When telemedicine services are provided to an originating hospital's patients pursuant to an agreement with a distant site hospital, the originating hospital may, in lieu of satisfying the requirements set forth in section twenty-eight hundred five-k of this article, rely on the credentialing and privileging decisions made by the distant site hospital in granting or renewing privileges to a health care practitioner who is a member of the clinical staff of the distant site hospital, provided that:

- (a) the distant site hospital participates in Medicare and Medicaid;
- (b) each health care practitioner providing telemedicine is licensed to practice in this state;
- (c) the distant site hospital, in accordance with requirements

otherwise applicable to that hospital, collects and evaluates all credentialing information concerning each health care practitioner providing telemedicine services, performs all required verification activities, and acts on behalf of the originating site hospital for such credentialing purposes;

(d) the distant site hospital reviews periodically, at least every two years, and as otherwise warranted based on outcomes, complaints or other circumstances, the credentials, privileges, physical and mental capacity, and competence in delivering health care services of each health care practitioner providing telemedicine services, consistent with requirements otherwise applicable to that hospital; reports the results of such review to the originating hospital; and notifies the originating hospital immediately upon any suspension, revocation, or limitation of such privileges;

(e) with respect to each distant site health care practitioner who holds privileges at the originating hospital, the originating hospital conducts a periodic internal review, at least every two years, of the distant site practitioner's performance of these privileges and provides the distant site hospital with such performance information for use in the distant hospital's periodic appraisal of the distant site physician or health care practitioner. Such information shall include, at a minimum, all adverse events that result from the telemedicine services provided by the distant site health care practitioner to the originating hospital's patients, all complaints the originating hospital has received about the distant site practitioner, and any revocation, suspension or limitation of the distant site practitioner's privileges by the originating hospital; and

(f) the agreement entered into between the originating site hospital and distant site hospital shall be in writing and shall, at a minimum:

(i) provide the categories of health care practitioners that are eligible candidates for appointment to the originating hospital's clinical staff,

(ii) require the governing body of the distant site hospital to comply with the Medicare conditions of participation governing the appointment of medical staff with regard to the health care practitioners providing telemedicine services,

(iii) itemize the credentialing information to be collected and the

required verification activities to be performed by the distant site hospital and relied upon by the originating hospital in considering the recommendations of the distant site hospital,

(iv) require each distant site health care practitioner providing telemedicine services to be licensed to practice in this state and privileged at the distant site hospital,

(v) require the distant site hospital to provide to the originating hospital a current list of each distant site health care practitioner's privileges at the distant site hospital, and

(vi) require the distant site hospital to conduct a periodic review consistent with requirements otherwise applicable to that hospital, at least every two years, and as otherwise warranted based on outcomes, complaints or other circumstances, the credentials, privileges, physical and mental capacity, and competence in delivering health care services of each health care practitioner providing telemedicine services; to provide the originating hospital with the results of such review; and to notify the originating hospital immediately upon any suspension, revocation, or limitation of such privileges.

3. Nothing in this section shall be construed as allowing an originating hospital to delegate its authority over and responsibility for decisions concerning the credentialing and granting staff membership or professional privileges to health care practitioners providing telemedicine services.

4. Notwithstanding any contrary provision of law, an originating hospital shall not be required to provide a physical examination or to maintain recorded medical history including immunizations for a health care provider providing consultations solely through telemedicine from a distant site hospital.

§ 2805-v. Observation services. 1. If a general hospital provides observation services, such services shall be provided in accordance with this section, and regulations adopted by the council and approved by the commissioner.

2. Observation services may be provided for such period of time as is permitted by the commissioner by regulation. Such regulations shall be consistent with federal policies for providing observation services to beneficiaries, as set forth in title XVIII of the federal social security act (medicare), except where necessary, in the discretion of the commissioner, to protect and promote patient care and safety.

3. Based on the clinical needs of the patient, which shall be determined in prompt fashion by appropriate staff, and the availability of services to meet those needs and patient safety, a general hospital shall determine (a) the proper clinical location for the care of a specific patient requiring observation services, including whether or not to provide such services in a distinct physical space, and (b) the appropriate oversight of observation services.

4. Every general hospital providing observation services shall develop and adopt policies and procedures for observation services, including: (a) assignment of a provider who will be responsible for the care of the patient and timely discharge from observation services; (b) clinical criteria for observation assignment and discharge; and (c) integration with quality assurance activities of the hospital.

5. The commissioner shall develop outpatient rates for observation services provided in accordance with this section to patients eligible for payments made by state governmental entities.

§ 2805-w. Patient notice of observation services. 1. Every general hospital shall provide patients who are placed into observation services by such general hospital with an oral and written notice within twenty-four hours of such placement that the patient is not admitted to the hospital and is under observation status. Such written notice shall be signed by the patient or the patient's legal representative to acknowledge receipt and shall include, but not be limited to, the following information:

(a) a statement that observation status may affect the patient's Medicare, Medicaid and/or private insurance coverage for the current

hospital services, including medications and other pharmaceutical supplies, as well as coverage for any subsequent discharge to a skilled nursing facility or home and community based care; and

(b) that the patient should contact his or her insurance plan to better understand the implications of being placed in observation status.

2. The commissioner shall develop and make available guidance on the notice as described in this section.

§ 2805-x. Hospital-home care-physician collaboration program. 1. The purpose of this section shall be to facilitate innovation in hospital, home care agency and physician collaboration in meeting the community's health care needs. It shall provide a framework to support voluntary initiatives in collaboration to improve patient care access and management, patient health outcomes, cost-effectiveness in the use of health care services and community population health. Such collaborative initiatives may also include payors, skilled nursing facilities and other interdisciplinary providers, practitioners and service entities.

2. For purposes of this section:

(a) "Hospital" shall include a general hospital as defined in this article or other inpatient facility for rehabilitation or specialty care within the definition of hospital in this article.

(b) "Home care agency" shall mean a certified home health agency, long term home health care program or licensed home care services agency as defined in article thirty-six of this chapter.

(c) "Payor" shall mean a health plan approved pursuant to article forty-four of this chapter, or article thirty-two or forty-three of the insurance law.

(d) "Practitioner" shall mean any of the health, mental health or health related professions licensed pursuant to title eight of the education law.

3. The commissioner is authorized to provide financing including, but not limited to, grants or positive adjustments in medical assistance

rates or premium payments, to the extent of funds available and allocated or appropriated therefor, including funds provided to the state through federal waivers, funds made available through state appropriations and/or funding through section twenty-eight hundred seven-v of this article, as well as waivers of regulations under title ten of the New York codes, rules and regulations, to support the voluntary initiatives and objectives of this section.

4. Hospital-home care-physician collaborative initiatives under this section may include, but shall not be limited to:

(a) Hospital-home care-physician integration initiatives, including but not limited to:

(i) transitions in care initiatives to help effectively transition patients to post-acute care at home, coordinate follow-up care and address issues critical to care plan success and readmission avoidance;

(ii) clinical pathways for specified conditions, guiding patients' progress and outcome goals, as well as effective health services use;

(iii) application of telehealth/telemedicine services in monitoring and managing patient conditions, and promoting self-care/management, improved outcomes and effective services use;

(iv) facilitation of physician house calls to homebound patients and/or to patients for whom such home visits are determined necessary and effective for patient care management;

(v) additional models for prevention of avoidable hospital readmissions and emergency room visits;

(vi) health home development;

(vii) development and demonstration of new models of integrated or collaborative care and care management not otherwise achievable through existing models; and

(viii) bundled payment demonstrations for hospital-to-post-acute-care for specified conditions or categories of conditions, in particular, conditions predisposed to high prevalence of readmission, including those currently subject to federal/state penalty, and other discharges with extensive post-acute needs;

(b) Recruitment, training and retention of hospital/home care direct care staff and physicians, in geographic or clinical areas of demonstrated need. Such initiatives may include, but are not limited to,

the following activities:

(i) outreach and public education about the need and value of service in health occupations;

(ii) training/continuing education and regulatory facilitation for cross-training to maximize flexibility in the utilization of staff, including:

(A) training of hospital nurses in home care;

(B) dual certified nurse aide/home health aide certification; and

(C) dual personal care aide/HHA certification;

(iii) salary/benefit enhancement;

(iv) career ladder development; and

(v) other incentives to practice in shortage areas; and

(c) Hospital - home care - physician collaboratives for the care and management of special needs, high-risk and high-cost patients, including but not limited to best practices, and training and education of direct care practitioners and service employees.

(d) Collaborative programs to address disparities in health care access or treatment, and/or conditions of higher prevalence, in certain populations, where such collaborative programs could provide and manage services in a more effective, person-centered and cost-efficient manner for reduction or elimination of such disparities.

(i) Such programs may target one or more disparate conditions, or areas of under-service, evidenced in defined populations, including but not be limited to:

(A) cardiovascular disease;

(B) hypertension;

(C) diabetes;

(D) chronic kidney disease;

(E) obesity;

(F) asthma;

(G) sickle cell disease;

(H) sepsis;

(I) lupus;

(J) breast, lung, prostate and colorectal cancers;

(K) geographic shortage of primary care, prenatal/obstetric care, specialty medical care, home health care, or culturally and linguistically compatible care;

- (L) alcohol, tobacco, or substance abuse;
- (M) post-traumatic stress disorder and other conditions more prevalent among veterans of the United States military services;
- (N) attracting members of minority populations to the field and practice of medicine; and
- (O) such other areas approved by the commissioner.

(ii) Collaborative hospital-home care-physician, and as applicable additional partner, models may include under such disparities programs:

- (A) service planning and design;
- (B) recruitment of specialty personnel and/or specialty training of professionals or other direct care personnel (including physicians, home care and hospital staffs), patients and informal caregivers;
- (C) continuing medical education and clinical training for physicians, follow-up evaluations, and supporting educational materials;
- (D) use of evidenced-based approaches and/or best practices to treatment;
- (E) reimbursement of uncovered services;
- (F) bundled or other integrated payment methods to support the necessary, coordinated and cost-effective services;
- (G) regulatory waivers to facilitate flexibility in provider collaboration and person-centered care;
- (H) patient/family peer support and education;
- (I) data collection, research and evaluation of efficacy; and/or
- (J) other components or innovations satisfactory to the commissioner.

(iii) Nothing contained in this paragraph shall prevent a physician, physicians group, home care agency, or hospital from individually applying for said grant.

(iv) The commissioner shall consult with physicians, home care agencies, hospitals, consumers, statewide associations representative of such participants, and other experts in health care disparities, in developing an application process for grant funding or rate adjustment, and for request of state regulatory waivers, to facilitate implementation of disparities programs under this paragraph.

5. Hospitals and home care agencies which are provided financing or waivers pursuant to this section shall report to the commissioner on the patient, service and cost experiences pursuant to this section,

including the extent to which the project goals are achieved. The commissioner shall compile and make such reports available on the department's website.

§ 2805-y. Identification and assessment of human trafficking victims.

1. As used in this section:

(a) "human trafficking victim" shall have the meaning set forth in section four hundred eighty-three-aa of the social services law;

(b) "subject facility" shall mean a general hospital, public health center, diagnostic center, treatment center or outpatient department;

(c) "subject facility personnel" shall mean nursing, medical, social work and other clinical care personnel, and security personnel in the subject facility service units; and

(d) "subject facility service units" shall mean the service units of the subject facility that include the following areas: (i) emergency services; (ii) pediatrics; (iii) obstetrics and gynecology; (iv) orthopedics; (v) internal medicine; (vi) family medicine; (vii) radiology; (viii) surgery; (ix) psychiatry; and (x) dental services to the extent the subject facility maintains a dental clinic, center or department on site of the subject facility.

2. Every subject facility shall provide for the identification, assessment, and appropriate treatment or referral of persons suspected as human trafficking victims, and in the case of persons under eighteen years old, the reporting of such persons as an abused or maltreated child if required under title six of article six of the social services law. The subject facility shall establish and implement written policies and procedures under this section which shall apply to all subject facility service units.

3. Every subject facility shall provide, on an ongoing basis, to all subject facility personnel training regarding the policies and procedures established under this section, including training in the recognition of indicators of a human trafficking victim and the responsibilities of such personnel in dealing with persons suspected as human trafficking victims. Such training may be incorporated as part of

the subject facility's existing training programs, provided that the training includes all of the requirements of this section.

4. The commissioner may identify organizations or providers for consideration by subject facilities to provide training under this section. The commissioner may, in consultation with the office of temporary and disability assistance and the office of children and family services, make regulations under this section.

§ 2805-z. Hospital domestic violence policies and procedures. 1. Every general hospital shall: (a) develop, maintain and disseminate written policies and procedures for the identification, assessment, treatment and referral of confirmed or suspected cases of domestic violence; (b) establish, and implement on an ongoing basis, a training program for all nursing, medical, social work and other clinical personnel, and security personnel working in hospital service units regarding the policies and procedures established pursuant to this section; and (c) designate a staff member to contact the domestic violence or victim assistance organization identified by the commissioner under subdivision three of this section providing victim assistance to the geographic area served by such hospital to establish the coordination of services to domestic violence victims.

2. Upon admittance or commencement of treatment of a confirmed or suspected domestic violence victim, such hospital shall advise the victim of the availability of the services of a domestic violence or victim assistance organization. If after receiving such advice the domestic violence victim wishes the presence of a domestic violence or victim assistance advocate, such hospital shall contact the appropriate organization and request that one be provided.

3. The commissioner shall promulgate such rules and regulations as may be necessary and proper to carry out effectively the provisions of this section. Prior to promulgating such rules and regulations, the commissioner shall consult with the office for the prevention of domestic violence and other such persons as the commissioner deems

necessary to develop a model policy for hospitals to utilize in complying with this section and to identify the domestic violence or victim assistance organizations operating in each hospital's geographic area, a list of which the commissioner shall provide to hospitals with the model policy.

§ 2806. Hospital operating certificates; suspension or revocation. 1.

A hospital operating certificate may be revoked, suspended, limited or annulled by the commissioner on proof that: (a) the hospital has failed to comply with the provisions of this article or rules and regulations promulgated thereunder; or (b) a general hospital has refused or failed to admit or to provide for necessary emergency care and treatment for an unidentified person brought to it in an unconscious, seriously ill or wounded condition. A hospital operating certificate shall be revoked, limited or annulled by the commissioner upon revocation, limitation or annulment by the public health council of approval of establishment of such hospital.

2. No hospital operating certificate shall be revoked, suspended, limited or annulled without a hearing, except for operating certificates revoked, limited or annulled because of revocation, limitation, or annulment of establishment approval.

Also, an operating certificate may be temporarily suspended or limited without a hearing for a period not in excess of sixty days upon written notice to the hospital and opportunity for a hearing following a finding by the department that the public health or safety is in imminent danger or there exists any condition or practice or a continuing pattern of conditions or practices which poses imminent danger to the health or safety of any patient. The department may also, consistent with applicable federal law and regulations, prohibit or limit the placement of new patients in a residential health care facility without a hearing for a period not in excess of sixty days upon written notice to such facility and opportunity for a hearing upon a determination that such facility no longer substantially meets the requirements of this article and the regulations thereunder and that such deficiencies do not pose an

imminent danger to the health and safety of any patient, provided, however, that the department shall not make such a determination with respect to a facility until the facility has had a reasonable opportunity, following the initial determination that such facility no longer substantially meets the requirements of this article, to correct its deficiencies and following this period, has been given written notice and opportunity for a hearing. Provided, however, that any delay in the hearing process during the sixty-day period occasioned by the hospital shall toll the running of said suspension or limitation and shall not abridge the full time provided for in this subdivision. Upon such finding and notice the power of the commissioner temporarily to suspend or limit a hospital operating certificate shall include, but shall not be limited to, the power to:

- (a) prohibit or limit the placement of new patients in the hospital;
- (b) remove or cause to be removed some or all of the patients in the hospital;
- (c) suspend or limit or cause to be suspended or limited the payment of any governmental funds to the hospital.

At any time subsequent to the suspension or limitation of any operating certificate pursuant to this subdivision, the hospital may request the department to reinspect the hospital to redetermine whether a specific condition or practice continues to exist. After the receipt of such a request the department shall reinspect the hospital within ten days and in the event that the previously found condition or practice has been eliminated the suspension or limitation shall be withdrawn. If the condition or practice has not been eliminated, the commissioner shall not thereafter be required to reinspect the hospital during the temporary period of suspension or limitation. Nor shall the commissioner be required to reinspect upon request during a temporary period of suspension or limitation any hospital whose operating certificate has been temporarily suspended or limited due to the existence of a continuing pattern of conditions or practices which poses imminent danger to the health and safety of any patient.

3. The commissioner shall fix a time and place for the hearing. A copy of the charges, together with the notice of the time and place of the

hearing, shall be served in person or mailed by registered or certified mail to the hospital at least ten days before the date fixed for the hearing. The hospital shall file with the department not less than three days prior to the hearing a written answer to the charges.

4. All orders or determinations hereunder shall be subject to review as provided in article seventy-eight of the civil practice law and rules. Application for such review must be made within sixty days after service in person or by registered or certified mail of a copy of the order or determination upon the applicant.

5. (a) Except as provided in paragraphs (b) and (d) of this subdivision, anything contained in this section or in a certificate of relief from disabilities or a certificate of good conduct issued pursuant to article twenty-three of the correction law to the contrary notwithstanding, a hospital operating certificate of a hospital under control of a controlling person as defined in paragraph (a) of subdivision twelve of section twenty-eight hundred one-a of this article, or under control of any other entity, shall be revoked upon a finding by the department that such controlling person or any individual, member of a partnership or shareholder of a corporation to whom or to which an operating certificate has been issued, has been convicted of a class A, B or C felony, or a felony related in any way to any activity or program subject to the regulations, supervision, or administration of the department or of the office of temporary and disability assistance or in violation of the public officers law in a court of competent jurisdiction in the state, or of a crime outside the state which, if committed within the state, would have been a class A, B or C felony or a felony related in any way to any activity or program subject to the regulations, supervision, or administration of the department or of the office of temporary and disability assistance or in violation of the public officers law.

(b) In the event one or more members of a partnership or shareholders of a corporation shall have been convicted of a felony as described in paragraph (a) of this subdivision, the commissioner shall, in addition to his other powers, limit the existing operating certificate of such partnership or corporation so that it shall apply only to the remaining

partner or shareholders, as the case may be, provided that every such convicted person immediately and completely ceases and withdraws from participation in the management and operation of the hospital, and further provided that an application for approval of change of ownership or transfer of stock is filed without delay in accordance with the pertinent provisions of section twenty-eight hundred one-a of this chapter.

(c) With respect to the conviction of any such person of a class D or E felony, the commissioner shall make a determination before revoking, or limiting pursuant to paragraph (b), the operating certificate that such conviction was related to an activity or program subject to the regulations, supervision, or administration of the department or of the department of social services. With respect to the conviction of such person of a crime committed outside the state, the commissioner shall make a determination before revoking, or limiting pursuant to paragraph (b), the operating certificate that such crime, if committed within the state, would have been a class A, B or C felony or a felony related to an activity or program subject to the regulations, supervision, or administration of the department or of the department of social services or in violation of the public officers law. The commissioner shall notify the person convicted that such determination has been made and shall give such person thirty days to request a hearing pursuant to this subdivision.

(d) The commissioner shall not revoke, or limit pursuant to paragraph (b) of this subdivision, the operating certificate of any facility solely because of a conviction, more than ten years prior to the effective date of this paragraph, of any person of a felony unless the commissioner makes a determination that such conviction was related to an activity or program subject to the regulations, supervision, or administration of the department or of the department of social services. The commissioner shall not revoke, or limit pursuant to paragraph (b) of this subdivision, the operating certificate of any facility solely because of the conviction, more than ten years prior to the effective date of this paragraph, of any person of a crime outside the state unless the commissioner makes a determination that such crime, if committed within the state, would have been a felony related to an activity or program subject to the regulations, supervision, or

administration of the department or of the department of social services or in violation of the public officers law. The commissioner shall notify the person convicted that such determination has been made and shall give such person thirty days to request a hearing pursuant to this subdivision.

(e) Any hearing conducted hereunder shall be strictly limited to the issue of whether the determination of the commissioner is supported by the evidence. All such hearings shall be conducted as provided in paragraph (f) of this subdivision, and no hearing, revocation or limitation shall be stayed by the pendency of any appeal or other challenge to the conviction.

(f) The commissioner shall fix a time and place for the hearing. A copy of the notice and charges shall be served in person or mailed by registered or certified mail no less than ten days before the date fixed for the hearing. A written answer to the charges shall be filed with the department not less than two days prior to the hearing. No adjournment shall be granted in excess of forty-eight hours. The respondent may attend the hearing in person, with or without counsel, or be represented by counsel alone, but need not attend personally if unavailable because of incarceration, hospitalization or other reason. If no answer is filed with the department within the time limitation of this paragraph, a hearing shall be deemed to have been waived, and the commissioner shall issue an order based on the record before him.

(g) Nothing in this subdivision shall be construed to limit the authority of the public health council to revoke, limit or annul any approval of establishment.

6. (a) Notwithstanding the provisions of subdivisions two through four of this section, the commissioner shall suspend, limit, modify, or revoke a hospital operating certificate, after taking into consideration the total number of beds necessary to meet the public need, the availability of facilities or services such as preadmission, ambulatory, home care or other services which may serve as alternatives or substitutes for the whole or any part of any such hospital facility, and, in the case of modification, the level of care and the nature and type of services provided or required by all or some of the patients in or seeking admission to such hospital facility, and whether such level

of care is consistent with the operating certificate of the hospital, and after finding that suspending, limiting, modifying, or revoking the operating certificate of such facility would be within the public interest in order to conserve health resources by restricting the number of beds and/or the level of services to those which are actually needed.

(b) Whenever any finding as described in paragraph (a) of this subdivision is under consideration with respect to any particular facility, the commissioner shall cause to be published, in a newspaper of general circulation in the geographic area of the facility at least thirty days prior to making such a finding an announcement that such a finding is under consideration and an address to which interested persons can write to make their views known. The commissioner shall take all public comments into consideration in making such a finding.

(c) The commissioner shall, upon making any finding described in paragraph (a) of this subdivision with respect to any facility, cause such facility and the appropriate health systems agency to be notified of the finding at least thirty days in advance of taking the proposed action to revoke, suspend, limit, or modify the facility's operating certificate. Upon receipt of any such notification and before the expiration of the thirty days or such longer period as may be specified in the notice, the facility or the appropriate health systems agency may request a public hearing to be held in the county in which the hospital is located. In no event shall the revocation, suspension or limitation take effect prior to the thirtieth day after the date of the notice, or prior to the effective date specified in the notice or prior to the date of the hearing decision, whichever is later.

(d) In the case of a modification of an operating certificate by the commissioner pursuant to paragraph (a) of this subdivision, the commissioner may not modify an operating certificate to reclassify beds previously authorized as hospital beds to domiciliary care beds or to increase the total number of beds authorized by such certificate, and, provided further that no patient in a hospital is to be removed as a result of the pendency or conclusion of a proceeding pursuant to this subdivision.

(e) Except as otherwise provided by law, all appeals from a finding of the commissioner made pursuant to paragraph (a) of this subdivision shall be directly to the appellate division of the supreme court in the

third department. Except as otherwise expressly provided by law, such appeals shall have preference over all issues in all courts.

(f) In determining whether there is a public need for any services or facilities as required by this subdivision, the commissioner shall consider the advice of the state health planning and development agency designated pursuant to the provisions of the national health planning and resources development act of nineteen hundred seventy-four and any amendments thereto and the state health plan developed thereunder.

*** § 2806-a. Temporary operator.** 1. For the purposes of this section:

(a) "adult care facility" shall mean an adult home or enriched housing program licensed pursuant to article seven of the social services law or an assisted living residence licensed pursuant to article forty-six-B of this chapter;

(b) "established operator" shall mean the operator of an adult care facility, a general hospital or a diagnostic and treatment center that has been established and issued an operating certificate as such pursuant to this article;

(c) "facility" shall mean (i) a general hospital or a diagnostic and treatment center that has been issued an operating certificate as such pursuant to this article; or (ii) an adult care facility;

(d) "temporary operator" shall mean any person or entity that:

(i) agrees to operate a facility on a temporary basis in the best interests of its residents or patients and the community served by the facility; and

(ii) has demonstrated that he or she has the character, competence and financial ability to operate the facility in compliance with applicable standards;

(e) "serious financial instability" shall include but not be limited to defaulting or violating key covenants of loans, or missed mortgage payments, or general untimely payment of obligations, including but not limited to employee benefit fund, payroll tax, and insurance premium obligations, or failure to maintain required debt service coverage ratios or, as applicable, factors that have triggered a written event of default notice to the department by the dormitory authority of the state of New York; and

(f) "extraordinary financial assistance" shall mean state funds provided to a facility upon such facility's request for the purpose of assisting the facility to address serious financial instability. Such funds may be derived from existing programs within the department, special appropriations, or other funds.

(g) "improper delegation of management authority by the governing authority or operator" of a general hospital shall include, but not be limited to, the delegation to an entity that has not been established as an operator of the general hospital of (i) authority to hire or fire the administrator or other key management employees; (ii) maintenance and control of the books and records; (iii) authority over the disposition of assets and the incurring of liabilities on behalf of the facility; and (iv) the adoption and enforcement of policies regarding the operation of the facility. The criteria set forth in this paragraph shall not be the sole determining factors, but indicators to be considered with such other factors that may be pertinent in particular instances. Professional expertise shall be exercised in the utilization of the criteria. All of the listed indicia need not be present in a given instance for there to be an improper delegation of authority.

2. (a) In the event that: (i) a facility seeks extraordinary financial assistance and the commissioner finds that the facility is experiencing serious financial instability that is jeopardizing existing or continued access to essential services within the community, or (ii) the commissioner finds that there are conditions within the facility that seriously endanger the life, health or safety of residents or patients, the commissioner may appoint a temporary operator to assume sole control and sole responsibility for the operations of that facility, or (iii) the commissioner finds that there has been an improper delegation of management authority by the governing authority or operator of a general hospital, the commissioner shall appoint a temporary operator to assume sole control and sole responsibility for the operations of that facility. The appointment of the temporary operator shall be effectuated pursuant to this section and shall be in addition to any other remedies provided by law.

(b) The established operator of a facility may at any time request the commissioner to appoint a temporary operator. Upon receiving such a

request, the commissioner may, if he or she determines that such an action is necessary to restore or maintain the provision of quality care to the residents or patients or alleviate the facility's financial instability, enter into an agreement with the established operator for the appointment of a temporary operator to assume sole control and sole responsibility for the operations of that facility.

3. (a) A temporary operator appointed pursuant to this section shall, prior to his or her appointment as temporary operator, provide the commissioner with a work plan satisfactory to the commissioner to address the facility's deficiencies and serious financial instability and a schedule for implementation of such plan. A work plan shall not be required prior to the appointment of the temporary operator pursuant to clause (ii) of paragraph (a) of subdivision two of this section if the commissioner has determined that the immediate appointment of a temporary operator is necessary because public health or safety is in imminent danger or there exists any condition or practice or a continuing pattern of conditions or practices which poses imminent danger to the health or safety of any patient or resident of the facility. Where such immediate appointment has been found to be necessary, the temporary operator shall provide the commissioner with a work plan satisfactory to the commissioner as soon as practicable.

(b) The temporary operator shall use his or her best efforts to implement the work plan provided to the commissioner, if applicable, and to correct or eliminate any deficiencies or financial instability in the facility and to promote the quality and accessibility of health care services in the community served by the facility. Such correction or elimination of deficiencies or serious financial instability shall not include major alterations of the physical structure of the facility. During the term of his or her appointment, the temporary operator shall have the sole authority to direct the management of the facility in all aspects of operation and shall be afforded full access to the accounts and records of the facility. The temporary operator shall, during this period, operate the facility in such a manner as to promote safety and the quality and accessibility of health care services or residential care in the community served by the facility. The temporary operator shall have the power to let contracts therefor or incur expenses on

behalf of the facility, provided that where individual items of repairs, improvements or supplies exceed ten thousand dollars, the temporary operator shall obtain price quotations from at least three reputable sources. The temporary operator shall not be required to file any bond. No security interest in any real or personal property comprising the facility or contained within the facility, or in any fixture of the facility, shall be impaired or diminished in priority by the temporary operator. Neither the temporary operator nor the department shall engage in any activity that constitutes a confiscation of property without the payment of fair compensation.

4. The temporary operator shall be entitled to a reasonable fee, as determined by the commissioner, and necessary expenses incurred during his or her performance as temporary operator, to be paid from the revenue of the facility. The temporary operator shall collect incoming payments from all sources and apply them to the reasonable fee and to costs incurred in the performance of his or her functions as temporary operator in correcting deficiencies and causes of serious financial instability. The temporary operator shall be liable only in his or her capacity as temporary operator for injury to person and property by reason of conditions of the facility in a case where an established operator would have been liable; he or she shall not have any liability in his or her personal capacity, except for gross negligence and intentional acts.

5. (a) The initial term of the appointment of the temporary operator shall not exceed one hundred eighty days. After one hundred eighty days, if the commissioner determines that termination of the temporary operator would cause significant deterioration of the quality of, or access to, health care or residential care in the community or that reappointment is necessary to correct the conditions within the facility that seriously endanger the life, health or safety of residents or patients, or the financial instability that required the appointment of the temporary operator, the commissioner may authorize up to two additional ninety-day terms.

(b) Upon the completion of the two ninety-day terms referenced in paragraph (a) of this subdivision,

(i) if the established operator is the debtor in a bankruptcy proceeding, and the commissioner determines that the temporary operator requires additional terms to operate the facility during the pendency of the bankruptcy proceeding and to carry out any plan resulting from the proceeding, the commissioner may reappoint the temporary operator for additional ninety-day terms until the termination of the bankruptcy proceeding, provided that the commissioner shall provide for notice and a hearing as set forth in subdivision six of this section; or

(ii) if the established operator requests the reappointment of the temporary operator, the commissioner may reappoint the temporary operator for one additional ninety-day term, pursuant to an agreement between the established operator, the temporary operator and the department.

(c) Within fourteen days prior to the termination of each term of the appointment of the temporary operator, the temporary operator shall submit to the commissioner and to the established operator a report describing:

(i) the actions taken during the appointment to address such deficiencies and financial instability,

(ii) objectives for the continuation of the temporary operatorship if necessary and a schedule for satisfaction of such objectives,

(iii) recommended actions for the ongoing operation of the facility subsequent to the term of the temporary operator including recommendations regarding the proper management of the facility and ongoing agreements with individuals or entities with proper delegation of management authority; and

(iv) with respect to the first ninety-day term referenced in paragraph (a) of this subdivision, a plan for sustainable operation to avoid closure, or transformation of the facility which may include any option permissible under this chapter or the social services law and implementing regulations thereof. The report shall reflect best efforts to produce a full and complete accounting.

(d) The term of the initial appointment and of any subsequent reappointment may be terminated prior to the expiration of the designated term, if the established operator and the commissioner agree on a plan of correction and the implementation of such plan.

6. (a) The commissioner, upon making a determination to appoint a temporary operator pursuant to paragraph (a) of subdivision two of this section shall, prior to the commencement of the appointment, cause the established operator of the facility to be notified of the determination by registered or certified mail addressed to the principal office of the established operator. Such notification shall include a detailed description of the findings underlying the determination to appoint a temporary operator, and the date and time of a required meeting with the commissioner and/or his or her designee within ten business days of the date of such notice. At such meeting, the established operator shall have the opportunity to review and discuss all relevant findings. At such meeting or within ten additional business days, the commissioner and the established operator shall attempt to develop a mutually satisfactory plan of correction and schedule for implementation. In the event such plan of correction is agreed upon, the commissioner shall notify the established operator that the commissioner no longer intends to appoint a temporary operator. A meeting shall not be required prior to the appointment of the temporary operator pursuant to clause (ii) of paragraph (a) of subdivision two of this section if the commissioner has determined that the immediate appointment of a temporary operator is necessary because public health or safety is in imminent danger or there exists any condition or practice or a continuing pattern of conditions or practices which poses imminent danger to the health or safety of any patient or resident of the facility. Where such immediate appointment has been found to be necessary, the commissioner shall provide the established operator with a notice as required under this paragraph on the date of the appointment of the temporary operator.

(b) Should the commissioner and the established operator be unable to establish a plan of correction pursuant to paragraph (a) of this subdivision, or should the established operator fail to respond to the commissioner's initial notification, a temporary operator shall be appointed as soon as is practicable and shall operate pursuant to the provisions of this section.

(c) The established operator shall be afforded an opportunity for an administrative hearing on the commissioner's determination to appoint a temporary operator. Such administrative hearing shall occur prior to such appointment, except that the hearing shall not be required prior to

the appointment of the temporary operator pursuant to clause (ii) of paragraph (a) of subdivision two of this section if the commissioner has determined that the immediate appointment of a temporary operator is necessary because public health or safety is in imminent danger or there exists any condition or practice or a continuing pattern of conditions or practices which poses imminent danger to the health or safety of any patient or resident of the facility. An administrative hearing as provided for under this paragraph shall begin no later than sixty days from the date of the notice to the established operator and shall not be extended without the consent of both parties. Any such hearing shall be strictly limited to the issue of whether the determination of the commissioner to appoint a temporary operator is supported by substantial evidence. A copy of the decision shall be sent to the established operator.

(d) The commissioner shall, upon making a determination to reappoint a temporary operator for the first of an additional ninety-day term pursuant to paragraph (a) of subdivision five of this section, cause the established operator of the facility to be notified of the determination by registered or certified mail addressed to the principal office of the established operator. If the commissioner determines that additional reappointments pursuant to subparagraph (i) of paragraph (b) of subdivision five of this section are required, the commissioner shall again cause the established operator of the facility to be notified of such determination by registered or certified mail addressed to the principal office of the established operator at the commencement of the first of every two additional terms. Upon receipt of such notification at the principal office of the established operator and before the expiration of ten days thereafter, the established operator may request an administrative hearing on the determination to begin no later than sixty days from the date of the reappointment of the temporary operator. Any such hearing shall be strictly limited to the issue of whether the determination of the commissioner to reappoint the temporary operator is supported by substantial evidence.

7. No provision contained in this section shall be deemed to relieve the established operator or any other person of any civil or criminal liability incurred, or any duty imposed by law, by reason of acts or

omissions of the established operator or any other person prior to the appointment of any temporary operator hereunder; nor shall anything contained in this section be construed to suspend during the term of the appointment of the temporary operator any obligation of the established operator or any other person for the payment of taxes or other operating and maintenance expenses of the facility nor of the established operator or any other person for the payment of mortgages or liens.

8. The commissioner shall cause the temporary president of the senate, the speaker of the assembly, and the chairs of the senate and the assembly health committees to be notified of the appointment of a temporary operator pursuant to paragraph (a) of subdivision two of this section upon such appointment. Such notification shall include, but not be limited to, the name of the established operator, the name of the appointed temporary operator and a description of the reasons for such appointment to the extent practicable under the circumstances and in the sole discretion of the commissioner.

* NB Repealed April 1, 2031

§ 2806-b. Residential health care facilities; revocation of operating certificate. Upon a determination by the commissioner that there exist operational deficiencies in a residential health care facility which show:

(a) a condition or conditions in substantial violation of the standards for health, safety or patient care established under federal or state law or regulations; or

(b) any other conditions dangerous to life, health or safety; or

(c) that there exists in the facility a pattern or practice of habitual violation of the standards of health, safety or patient care established under federal or state law or regulations, the commissioner shall take the actions prescribed by section twenty-eight hundred six of this article to revoke the operating certificate of the residential health care facility which was the subject of such finding and, where he deems it to be in the public interest, he may petition a court of competent jurisdiction to appoint a caretaker as defined in section twenty-eight hundred one of this article. The petition, the proceedings

and the procedures for the appointment of a caretaker shall be governed by the provisions of subdivision two of section twenty-eight hundred ten of this article, and the powers, duties and rights of a caretaker appointed pursuant to this section shall be the same as those authorized by such subdivision.

§ 2807. Hospital reimbursement provisions; generally. 1. Valid operating certificate requirement. No government agency and no corporation organized and operating in accordance with article forty-three of the insurance law and no health maintenance organization organized and operating in accordance with article forty-four of this chapter, shall purchase, pay for or make reimbursement or grants-in-aid for any hospital or health-related service, unless, at the time the service was provided, the hospital possessed a valid operating certificate authorizing such service. No government agency shall purchase, pay for or make reimbursement or grants-in-aid for any hospital or health-related service that has been determined by the commissioner of health to be unauthorized for payment under the medical assistance program pursuant to section twenty-eight hundred three of this article.

2. (a) Rate approvals. Payments for hospital service and health-related service made by government agencies or for services provided prior to January first, nineteen hundred ninety-seven by organizations operating in accordance with the provisions of article forty-four of this chapter shall be at rates approved by the state director of the budget in the case of government agencies and approved by the commissioner in the case of plans, organized and operating under the provisions of article forty-four of this chapter, under which such payments are made by agencies other than government agencies or corporations organized and operating in accordance with article forty-three of the insurance law. Payments for hospital service and health-related service by corporations organized and operating in accordance with article forty-three of the insurance law for services provided prior to January first, nineteen hundred ninety-seven shall be at rates approved by the commissioner of health.

(a-1) Notwithstanding any inconsistent provision of law, rates of payment by governmental agencies for the operating cost component of general hospital out-patient and emergency services, and for the operating cost component of treatment or diagnostic center services shall not require a certification by the commissioner that they are reasonably related to the costs of efficient production of such services nor that they are reasonable and adequate to meet the costs which must be incurred by efficiently and economically operated facilities.

(b) During the period October first, nineteen hundred ninety-four through September thirtieth, nineteen hundred ninety-five and for each twelve month rate period commencing on October first thereafter, rates of payment by governmental agencies for the operating cost component of treatment or diagnostic center services shall be based on operating costs in the base year cost report adjusted by a trend factor determined in accordance with rules and regulations promulgated pursuant to paragraph (b) of subdivision two of section twenty-eight hundred three of this article; provided, however, that prior to such adjustment, allowable operating costs shall be established by the commissioner after taking into account the cost of services provided in facilities offering similar services and regional economic factors, plus the addition of the capital cost per visit. The capital cost per visit shall be based on the base year cost report except that the capital cost per visit may be adjusted for major outpatient capital expenditures, incurred subsequent to the reporting year, when such expenditures have received the requisite approvals and the facility has provided the commissioner with a certified statement of expenditures. The base year for the rate period commencing on October first, nineteen hundred ninety-four shall be nineteen hundred ninety-two and shall be advanced one year thereafter for each subsequent rate period.

(c) Notwithstanding any other provision of law to the contrary, for a diagnostic and treatment center licensed pursuant to this article that provides, as its principal mission, services to individuals with developmental disabilities, the commissioner may fully or partially waive or modify recoupment of medical assistance payments based on retroactive changes to the applicable formula for capital costs for the period of September first, two thousand nine to December thirty-first, two thousand twelve.

* (e) Notwithstanding any inconsistent provisions of this subdivision or any other law, payments made by governmental agencies for ambulatory surgical services provided by a hospital, including general hospitals and diagnostic and treatment centers, during the period June first, nineteen hundred eighty-nine through December thirty-first, nineteen hundred eighty-nine and the period January first, nineteen hundred ninety through December thirty-first, nineteen hundred ninety and every twelve month rate period thereafter shall be at case based rates of reimbursement established by the commissioner and approved by the state director of the budget. Ambulatory surgical services case based rates of payment shall be established prospectively and shall include operating costs and capital costs. Factors considered in establishing such case based rates shall include, but not be limited to: a classification of procedures with individual or combined rates established for each services classification; operating and capital costs of ambulatory surgical services efficiently and economically provided, considering regional economic factors, trended to the rate period; and the need for incentives to improve services and institute economies.

* NB Expired April 1, 2011

* (f) (i) During the period July first, nineteen hundred ninety through March thirty-first, nineteen hundred ninety-one, the rate periods during the period April first, nineteen hundred ninety-one through September thirtieth, nineteen hundred ninety-four and for each fiscal year period commencing on October first thereafter, comprehensive clinic rates of payment by governmental agencies established in accordance with paragraph (b) of this subdivision, applicable for services provided to individuals eligible for medical assistance pursuant to title eleven of article five of the social services law for voluntary non-profit or publicly sponsored diagnostic and treatment centers providing a comprehensive range of primary health care services which can demonstrate, on forms provided by the commissioner, losses from a disproportionate share of bad debt and charity care during a base year period established by regulation may include an allowance determined in accordance with this paragraph to reflect the needs of the diagnostic and treatment center for the financing of losses resulting from bad debt and the costs of charity care. Losses resulting from bad debt and the costs of charity care shall be determined by the

commissioner considering, but not limited to, such factors as the losses resulting from bad debt and the costs of charity care provided by the diagnostic and treatment center and the availability of other financial support, including state and local assistance public health aid, to meet the losses resulting from bad debt and the costs of charity care of the diagnostic and treatment center. The bad debt and charity care allowance for a diagnostic and treatment center for a rate period shall be determined by the commissioner in accordance with rules and regulations adopted by the council and approved by the commissioner, and shall be consistent with the purposes for which such allowances are authorized for general hospitals pursuant to the provisions of article twenty-eight of this chapter and rules and regulations promulgated by the commissioner. A diagnostic and treatment center applying for a bad debt and charity care allowance pursuant to this paragraph shall provide assurances satisfactory to the commissioner that it shall undertake reasonable efforts to maintain financial support from community and public funding sources and reasonable efforts to collect payments for services from third party insurance payors, governmental payors and self-paying patients. To be eligible for an allowance pursuant to this paragraph, a diagnostic and treatment center must provide a comprehensive range of primary health care services and must demonstrate that a minimum of fifteen percent of total clinic visits reported during the applicable base year period were to uninsured individuals. The commissioner may retrospectively reduce the bad debt and charity care allowance of a diagnostic and treatment center if it is determined that provider management actions or decisions have caused a significant reduction for the rate period in the delivery of comprehensive primary health care services to bad debt and charity care residents of the community.

(ii) The total amount of funds to be allocated and distributed for bad debt and charity care allowances to eligible voluntary and nonprofit diagnostic and treatment centers for a rate period in accordance with this paragraph shall be limited to an annual aggregate amount of seven million three hundred thousand dollars. The total amount of funds to be allocated and distributed for bad debt and charity care allowances to eligible publicly sponsored diagnostic and treatment centers for a rate period in accordance with this paragraph shall be limited to an annual

aggregate amount of seven million seven hundred thousand dollars; provided, however, that twenty percent of the amount of funds allocated for distribution to eligible publicly sponsored diagnostic and treatment centers shall be available for clinics operating under the auspices of the Health and Hospitals Corporation. Notwithstanding the foregoing and any other provision of this chapter municipalities which received state aid, pursuant to article two of the public health law and prior to the effective date of this chapter, in support of non-hospital based free-standing or local health department operated general medical clinics, shall receive a bad debt and charity care allowance of not less than the amount received in the nineteen hundred eighty-nine--nineteen hundred ninety state fiscal year for general medical clinics, plus the applicable local share for medical assistance expenditures under title XIX of the federal social security act. Funds to be distributed pursuant to this subparagraph shall be based on losses associated with the delivery of bad debt and charity care excluding the amount of such losses determined in accordance with subparagraph (ix) of this paragraph as the incremental loss basis for a supplemental allowance for a diagnostic and treatment center designated as a preferred primary care provider.

(iii) No diagnostic and treatment center may receive a bad debt and charity care allowance in accordance with this paragraph in an amount which exceeds its need for the financing of losses associated with the delivery of bad debt and charity care.

(iv) A nominal payment amount for the financing of losses associated with the delivery of bad debt and charity care will be established for each eligible diagnostic and treatment center. The nominal payment amount shall be calculated as the sum of the dollars attributable to the application of an incrementally increasing nominal coverage percentage of base year period losses associated with the delivery of bad debt and charity care for percentage increases in the relationship between base year period eligible bad debt and charity care clinic visits and base year period total clinic visits according to the following scale:

% of eligible bad debt and charity care	% of nominal financial
---	------------------------

clinic visits to total visits	loss coverage
up to 15%	50%

15 - 30%

75%

30%+

100%

If the sum of the nominal payment amounts for all eligible voluntary non-profit diagnostic and treatment centers or for all eligible public diagnostic and treatment centers is less than the amount allocated for bad debt and charity care allowances pursuant to subparagraph (ii) or (ix) respectively of this paragraph for such diagnostic and treatment centers respectively, the nominal coverage percentages of base year period losses associated with the delivery of bad debt and charity care pursuant to this scale may be increased to not more than one hundred percent for voluntary non-profit diagnostic and treatment centers or for public diagnostic and treatment centers in accordance with rules and regulations adopted by the council and approved by the commissioner.

(v) The bad debt and charity care allowance for each eligible voluntary non-profit diagnostic and treatment center shall be based on the dollar value of the result of the ratio of total funds allocated for bad debt and charity care allowances for voluntary non-profit diagnostic and treatment centers pursuant to subparagraph (ii) of this paragraph to the total statewide nominal payment amounts for all eligible voluntary non-profit diagnostic and treatment centers determined in accordance with subparagraph (iv) of this paragraph applied to the nominal payment amount for each such diagnostic and treatment center.

(vi) The bad debt and charity care allowance for each eligible public diagnostic and treatment center shall be based on the dollar value of the result of the ratio of total funds allocated for bad debt and charity care allowances for public diagnostic and treatment centers pursuant to subparagraph (ii) of this paragraph to the total statewide nominal payment amounts for all eligible public diagnostic and treatment centers determined in accordance with subparagraph (iv) of this paragraph applied to the nominal payment amount for each such diagnostic and treatment center.

(vii) Diagnostic and treatment centers shall furnish to the department such reports and information as may be required by the commissioner to assess the cost, quality, access to, effectiveness and efficiency of bad debt and charity care provided. The council shall adopt rules and regulations, subject to the approval of the commissioner, to establish uniform reporting and accounting principles designed to enable

diagnostic and treatment centers to fairly and accurately determine and report bad debt and charity care visits and the costs of bad debt and charity care. In order to be eligible for an allowance pursuant to this paragraph, a diagnostic and treatment center must be in compliance with bad debt and charity care reporting requirements.

(viii) Of the funds allocated and distributed for bad debt and charity care allowances to eligible voluntary and non-profit diagnostic and treatment centers for a rate period in accordance with subparagraph (ii) of this paragraph, an annual aggregate amount not to exceed three million eight hundred thousand dollars within a rate period shall be paid by or on behalf of diagnostic and treatment centers into a primary care initiative pool established by the commissioner. Such funds shall be distributed to diagnostic and treatment centers in accordance with the provisions of subdivisions one through six of section twenty-eight hundred seven-b of this article.

(ix) During the period January first, nineteen hundred ninety-four through September thirtieth, nineteen hundred ninety-four and for each twelve month rate period commencing on October first thereafter, to the extent of funds available therefor, a diagnostic and treatment center which is approved as a preferred primary care provider pursuant to subdivision twelve of section twenty-eight hundred seven of this article and meets the requirements of this paragraph may be eligible for a supplemental allowance determined in accordance with this paragraph. The supplemental allowance shall be based on losses associated with the delivery of bad debt and charity care incurred by a preferred primary care provider to the extent such losses exceed any losses associated with the delivery of bad debt and charity care incurred for nineteen hundred ninety-three or, if later, the year immediately preceding the year in which the diagnostic and treatment center is first designated a preferred primary care provider.

(x) This paragraph shall be effective if, and as long as, federal financial participation is available for expenditures made for beneficiaries eligible for medical assistance under title XIX of the federal social security act based upon the allowances determined in accordance with this paragraph.

(xi) Notwithstanding any inconsistent provision of this paragraph, adjustments to rates of payment for diagnostic and treatment centers

determined in accordance with subparagraphs (i) through (x) of this paragraph shall apply only for services provided on or before December thirty-first, nineteen hundred ninety-six.

* NB Expired December 31, 1996

(g)(i) During the period April first, nineteen hundred ninety-four through December thirty-first, nineteen hundred ninety-four and for each calendar year rate period commencing on January first thereafter, rates of payment by governmental agencies for the operating cost component of general hospital outpatient services shall be based on the operating costs reported in the base year cost report adjusted by the trend factor applicable to the general hospital in which the services were provided; provided, however, that the maximum payment for the operating cost component of outpatient services shall be sixty-seven dollars and fifty cents plus the addition of the capital cost per visit. The capital cost per visit shall be based on the base year cost report except that the capital cost per visit may be adjusted for major outpatient capital expenditures incurred subsequent to the reporting year, when such expenditures have received the requisite approvals and the facility has provided the commissioner with a certified statement of the expenditures. The base year for the period April first, nineteen hundred ninety-four through December thirty-first, nineteen hundred ninety-four shall be nineteen hundred ninety-two and shall be advanced one year thereafter for each subsequent calendar year rate period. Further, the provisions of subdivision seven of this section shall not apply. The commissioner may waive the maximum allowable payment and limitations on the rate of payment as prescribed herein to provide for the reimbursement of offering and arranging services eligible for ninety percent federal funds as set forth in section nineteen hundred three of the federal social security act, and to provide for the reimbursement of specialized services having separately identifiable costs and statistics, including but not limited to hemodialysis services and surgical services provided on an outpatient basis. Such waiver shall be granted only when the commissioner finds that the services are being provided efficiently and at minimum cost. The commissioner shall promptly promulgate rules and regulations necessary to identify such services. Among the criteria which the commissioner shall consider in the case of specialized services are whether the services require highly

specialized staff, equipment or facilities, thereby generating a cost that substantially exceeds that of more routine diagnostic or treatment services; whether the facility in which the services are provided is presently providing the services to the population in need; and, whether the services may be provided safely and effectively on an outpatient basis at a lower cost than through inpatient admission. In addition the commissioner shall provide for a waiver of the maximum allowable payment for those outpatient services medically necessary which include surgical procedures where delay in surgical intervention would substantially increase the medical risk associated with such surgical intervention. Where the commissioner waives the maximum allowable payment for any specified service he may, in accordance with the foregoing criteria and such other criteria as he deems appropriate, establish a maximum allowable payment for such specified service.

(ii) During the period April first, nineteen hundred ninety-four through December thirty-first, nineteen hundred ninety-four and for each calendar year rate period commencing on January first thereafter, rates of payment by governmental agencies for the operating cost component of general hospital emergency services shall be based on the operating costs reported in the base year cost report adjusted by the trend factor applicable to the general hospital in which the services were provided, and in addition shall include that portion of the reasonable incremental emergency service operating costs incurred by such hospital in excess of emergency service costs reported in the nineteen hundred eighty-eight cost report, after application of the trend factor, attributable to meeting additional quality of care standards for emergency services that became effective on or after January first, nineteen hundred eighty-nine; provided, however, that the maximum payment for the operating component shall be ninety-five dollars, provided further, however, that for the period January first, two thousand seven through December thirty-first, two thousand seven the maximum payment for the operating component shall be one hundred twenty-five dollars, and during the period January first, two thousand eight through December thirty-first, two thousand eight, the maximum payment for the operating component shall be one hundred forty dollars; and during the period January first, two thousand nine through December thirty-first, two thousand nine and for each calendar year thereafter, the maximum payment

for the operating component shall be one hundred fifty dollars. A capital cost per visit shall be based on the base year cost report except that the capital cost per visit may be adjusted for the major outpatient capital expenditures incurred subsequent to the report year, when such expenditures have received the requisite approvals and the facility has provided the commissioner with a certified statement of expenditures. The base year for the period April first, nineteen hundred ninety-four through December thirty-first, nineteen hundred ninety-four shall be nineteen hundred ninety-two and shall be advanced one year thereafter for each subsequent calendar year rate period. Further, the provisions of subdivision seven of this section shall not apply prior to January first, two thousand seven.

* (iii) (A) For purposes of this subparagraph:

(1) "Children with medical fragility" shall mean an individual who is under twenty-one years of age and has a chronic debilitating condition or conditions, who may or may not be hospitalized or institutionalized, and who meets one or more of the following criteria: (I) is technology-dependent for life or health sustaining functions; (II) requires complex medication regimens or medical interventions to maintain or to improve their health status; or (III) is in need of ongoing assessment or intervention to prevent serious deterioration of their health status or medical complications that place their life, health or development at risk.

(2) "Pediatric residential health care facility" shall mean a free-standing facility or discrete unit within a facility authorized by the commissioner to provide extensive nursing, medical, psychological, and counseling support services solely to children under the age of twenty-one.

(3) "Pediatric diagnostic and treatment center" shall mean a diagnostic and treatment center established pursuant to this article, which as of April first, two thousand twenty-four, has been participating in the demonstration program authorized under subdivision one of section twenty-eight hundred eight-e of this article, for which at least eighty percent of its total Medicaid fee-for-service reimbursements derive from the provision of services to children under the age of twenty-one with medical fragility and is affiliated with a pediatric residential health care facility.

(B) (1) Notwithstanding any law, rule, or regulation to the contrary, the commissioner shall establish rates of reimbursement for pediatric diagnostic and treatment centers for all services provided on or after April first, two thousand twenty-four, to children eligible for medical assistance that reflect the costs necessary to provide care and services to children with medical fragility being treated at such pediatric diagnostic and treatment center.

(2) For the period April first, two thousand twenty-four, to December thirty-first, two thousand twenty-four, and until such time as a certified annual cost report for such period is received and verified by the department, the operating component of such rate shall reflect budgeted costs for the period January first, two thousand twenty-four, through December thirty-first, two thousand twenty-four, as submitted to the department and adjusted as the commissioner deems appropriate. Upon submission and subsequent verification of the cost report, the operating component of the rate shall be reflective of actual costs for the period January first, two thousand twenty-four, through December thirty-first, two thousand twenty-four, subject to further adjustments as the commissioner deems appropriate. Thereafter, the base period reported operating costs used to establish rates pursuant to this subparagraph shall be updated no less frequently than every two years. In addition to required annual cost reports, pediatric diagnostic and treatment centers, as defined by this subparagraph, shall submit additional data as the commissioner requires.

(3) Notwithstanding any law, rule, or regulation to the contrary, pediatric diagnostic and treatment centers shall be reimbursed for services provided to children enrolled in Medicaid managed care plans at the rates of reimbursement promulgated pursuant to this subparagraph.

(4) The capital component of the rate shall reflect actual base year costs.

(5) All rates established under this subparagraph shall be subject to the availability of federal financial participation.

(6) The commissioner may promulgate or amend regulations as the commissioner determines appropriate and necessary to establish the rates provided for in this subparagraph and/or exempt pediatric diagnostic and treatment centers from the ambulatory payment group reimbursement methodology applicable to diagnostic and treatment centers.

* NB Repealed April 1, 2029

(h) Notwithstanding any inconsistent provisions of this subdivision or any other law, except as provided in section 43.02 of the mental hygiene law, the commissioner may, in accordance with rules and regulations adopted by the council and approved by the commissioner, establish rates of reimbursement for payments made by governmental agencies, subject to the approval of the state director of the budget, for services provided on an outpatient basis by a general hospital or diagnostic and treatment center designated as a preferred primary care provider pursuant to subdivision twelve of this section or providing specialty services including hemo and peritoneal dialysis, outpatient rehabilitative and psychiatric services, methadone maintenance, and other organized outpatient or clinic services which are structured to address extensive and complex medical needs for patients with chronic or infectious medical conditions based on factors other than those prescribed by paragraph (b) or subparagraph (i) of paragraph (g) of this subdivision or subdivision three of this section provided, however, that the use of such an alternative approach will not result in any increase to other rates of reimbursement established pursuant to this article. During the initial rate period such rates of payment for preferred primary care providers shall be at least equal to the average rate of payment per visit which would otherwise be provided pursuant to subparagraph (i) of paragraph (g) or paragraph (b) of this subdivision. Factors used to establish rates shall include a reasonable classification of medical procedures with individual or combined rates established for each service classification group which will be prospectively determined based upon an estimate of the costs of such outpatient services efficiently and economically provided by general hospitals and diagnostic and treatment centers, considering regional economic factors and the need for incentives to improve services and institute economies. Notwithstanding any inconsistent provisions of law, rates of payment by governmental agencies for outpatient services provided by a general hospital or diagnostic and treatment center, shall not require a certification by the commissioner that they are reasonable and adequate to meet the costs which must be incurred by efficiently and economically operated facilities.

2-a. Notwithstanding any provision of which is inconsistent with or contrary to the structure established by this subdivision and subdivision thirty-three of section twenty-eight hundred seven-c of this article, and subject to the availability of federal financial participation, rates of payment by governmental agencies, established pursuant to this article, for general hospital outpatient services, general hospital emergency services, ambulatory surgical services provided by a hospital as defined by subdivision one of section twenty-eight hundred one of this article, and diagnostic and treatment center services, but excepting any facility whose reimbursement is governed by subdivision eight of this section or any payments made on behalf of persons enrolled in Medicaid managed care or in the family health plus program, shall be in accordance with the following:

(a)(i) for the period December first, two thousand eight through November thirtieth, two thousand nine, seventy-five percent of such rates of payment for each general hospital's outpatient services shall reflect the average Medicaid payment per claim, as determined by the commissioner, for services provided by that facility in the two thousand seven calendar year, but excluding any payments for services covered by the facility's licensure, if any, under the mental hygiene law, and twenty-five percent of such rates of payment shall, for the operating cost component, reflect the utilization of the ambulatory patient groups reimbursement methodology described in paragraph (e) of this subdivision;

(ii) for the period December first, two thousand nine through December thirty-first, two thousand ten, fifty percent of such rates for each facility shall reflect the average Medicaid payment per claim, as determined by the commissioner, for services provided by that facility in the two thousand seven calendar year, but excluding any payments for services covered by the facility's licensure, if any, under the mental hygiene law, and fifty percent of such rates of payment shall, for the operating cost component, reflect the utilization of the ambulatory patient groups reimbursement methodology described in paragraph (e) of this subdivision;

(iii) for the period January first, two thousand eleven through December thirty-first, two thousand eleven, twenty-five percent of such rates shall reflect the average Medicaid payment per claim, as

determined by the commissioner, for services provided by that facility for the two thousand seven calendar year, but excluding any payments for services covered by the facility's licensure, if any, under the mental hygiene law, and seventy-five percent of such rates of payment shall, for the operating cost component, reflect the utilization of the ambulatory patient groups reimbursement methodology described in paragraph (e) of this subdivision; and

(iv) for periods on and after January first, two thousand twelve, one hundred percent of such rates of payment shall reflect the utilization of the ambulatory patient groups reimbursement methodology described in paragraph (e) of this subdivision.

(v) This paragraph shall be effective the later of: (i) December first, two thousand eight, or (ii) after the commissioner receives final approval of federal financial participation in payments made for beneficiaries eligible for medical assistance under title XIX of the federal social security act for the rate methodology established pursuant to subparagraph (i) of paragraph (a) of subdivision thirty-three of section twenty-eight hundred seven-c of this article.

(b) (i) for the period September first, two thousand nine through November thirtieth, two thousand nine, seventy-five percent of such rates of payment for services provided by each diagnostic and treatment center and each free-standing ambulatory surgery center shall reflect the average Medicaid payment per claim, as determined by the commissioner, for services provided by that facility in the two thousand seven calendar year, but excluding any payments for services covered by the facility's licensure, if any, under the mental hygiene law, and twenty-five percent of such rates of payment shall, for the operating cost component, reflect the utilization of the ambulatory patient groups reimbursement methodology described in paragraph (e) of this subdivision;

(ii) for the period December first, two thousand nine through December thirty-first, two thousand ten, fifty percent of such rates for each facility shall reflect the average Medicaid payment per claim, as determined by the commissioner, for services provided by that facility in the two thousand seven calendar year, but excluding any payments for services covered by the facility's licensure, if any, under the mental hygiene law, and fifty percent of such rates of payment shall, for the

operating cost component, reflect the utilization of the ambulatory patient groups reimbursement methodology described in paragraph (e) of this subdivision;

(iii) for the period January first, two thousand eleven through December thirty-first, two thousand eleven, twenty-five percent of such rates for each facility shall reflect the average Medicaid payment per claim, as determined by the commissioner, for services provided by that facility in the two thousand seven calendar year, but excluding any payments for services covered by the facility's licensure, if any, under the mental hygiene law, and seventy-five percent of such rates of payment shall, for the operating cost component, reflect the utilization of the ambulatory patient groups reimbursement methodology described in paragraph (e) of this subdivision; and

(iv) for periods on and after January first, two thousand twelve, one hundred percent of such rates of payment shall reflect the utilization of the ambulatory patient groups reimbursement methodology described in paragraph (e) of this subdivision.

(c) for periods on and after December first, two thousand eight, such rates of payment for ambulatory surgical services provided by general hospitals shall reflect the utilization of the ambulatory patient groups reimbursement methodology described in paragraph (e) of this subdivision, provided however, that the capital cost component for such rates shall be separately computed in accordance with regulations promulgated in accordance with paragraph (e) of this subdivision.

(d) for periods on and after January first, two thousand nine, the operating cost component of such rates of payment for general hospital emergency services shall reflect the utilization of the ambulatory patient groups reimbursement methodology described in paragraph (e) of this subdivision and shall not reflect any maximum payment amount as otherwise provided for in subparagraph (ii) of paragraph (g) of subdivision two of this section.

(e) (i) notwithstanding any inconsistent provisions of this subdivision, the commissioner shall promulgate regulations establishing, subject to the approval of the state director of the budget, methodologies for determining rates of payment for the services described in this subdivision. Such regulations shall reflect utilization of the ambulatory patient group (APG) methodology, in which

patients are grouped based on their diagnosis, the intensity of the services provided and the medical procedures performed, and with each APG assigned a weight reflecting the projected utilization of resources. Such regulations shall provide for the development of one or more base rates and the multiplication of such base rates by the assigned weight for each APG to establish the appropriate payment level for each such APG. Such regulations may also utilize bundling, packaging and discounting mechanisms.

If the commissioner determines that the use of the APG methodology is not, or is not yet, appropriate or practical for specified services, the commissioner may utilize existing payment methodologies for such services or may promulgate regulations, and may promulgate emergency regulations, establishing alternative payment methodologies for such services.

(ii) Notwithstanding this subdivision and any other contrary provision of law, the commissioner may incorporate within the payment methodology described in subparagraph (i) of this paragraph payment for services provided by facilities pursuant to licensure under the mental hygiene law, provided, however, that such APG payment methodology may be phased into effect in accordance with a schedule or schedules as jointly determined by the commissioner, the commissioner of mental health, the commissioner of alcoholism and substance abuse services, and the commissioner of the office for people with developmental disabilities.

(iii) Regulations issued pursuant to this paragraph may incorporate quality related measures limiting or excluding reimbursement related to potentially preventable conditions and complications; provided however, such quality related measures shall not include any preventable conditions and complications not identified for Medicare nonpayment or limited payment.

* (iv) Effective April first, two thousand twenty, regulations issued pursuant to this paragraph for public general hospitals or public health systems, other than those operated by the state of New York or the state university of New York, located in a city having a population of one million or more shall reflect additional reimbursement for costs, to the extent permitted under 42 CFR 447.321(b)(1) and based on actual utilization of services. Such rate add-on shall be contingent upon

federal financial participation and approval, and subject to the terms of a binding memorandum of understanding executed between the department of health and the public general hospital or public health system receiving the rate add-on. If payment of such rate add-on is projected to cause Medicaid disbursements for such period to exceed the projected department of health Medicaid state funds in the enacted budget financial plan pursuant to subdivision three of section twenty-three of the state finance law, as determined by the director of the budget, or the memorandum of understanding is not executed or is breached, the commissioner, in consultation with the director of the budget, may either cancel or reduce payment of such rate add-on to achieve compliance with the enacted budget financial plan.

* NB Repealed March 31, 2029

(f)(i) The commissioner shall periodically measure the utilization and intensity of services provided to medical assistance recipients in ambulatory settings. Such analysis shall include, but not be limited to: measurement of the shift of surgical procedures from the inpatient hospital setting to the ambulatory setting including measurement of the impact of any such shift on quality of care and outcomes; changes in the utilization and intensity of services provided in the outpatient hospital department and in diagnostic and treatment centers; and the change in the utilization and intensity of services provided in the emergency department.

(ii) notwithstanding the provisions of paragraphs (a) and (b) of this subdivision, for periods on and after January first, two thousand nine, the following services provided by general hospital outpatient departments and diagnostic and treatment centers shall be reimbursed with rates of payment based entirely upon the ambulatory patient group methodology as described in paragraph (e) of this subdivision, provided, however, that the commissioner may utilize existing payment methodologies or may promulgate regulations establishing alternative payment methodologies for one or more of the services specified in this subparagraph, effective for periods on and after March first, two thousand nine:

(A) services provided in accordance with the provisions of paragraphs (q), (r), and (ll) of subdivision two of section three hundred sixty-five-a of the social services law; and

(B) all services, but only with regard to additional payment amounts, as determined in accordance with regulations issued in accordance with paragraph (e) of this subdivision, for the provision of such services during times outside the facility's normal hours of operation, as determined in accordance with criteria set forth in such regulations; and

(C) services provided by licensed social workers, licensed mental health counselors, and licensed marriage and family therapists, in accordance with licensing criteria set forth in applicable regulations; and

(D) individual psychotherapy services provided by licensed social workers, in accordance with licensing criteria set forth in applicable regulations, at diagnostic and treatment centers that provided, billed for, and received payment for these services between January first, two thousand seven and December thirty-first, two thousand seven;

(E) services provided to pregnant women pursuant to paragraph (s) of subdivision two of section three hundred sixty-five-a of the social services law and, for periods on and after January first, two thousand ten, all other services provided pursuant to such paragraph (s) and services provided pursuant to paragraph (t) of subdivision two of section three hundred sixty-five-a of the social services law;

(F) wheelchair evaluation services and eyeglass dispensing services; and

(G) immunization services, effective for services rendered on and after June tenth, two thousand nine.

(f-1) Notwithstanding any inconsistent provision of this section or any other contrary provision of law, the commissioner may with the approval of the director of the budget, for periods prior to two thousand twelve, establish rates of payments for selected patient service categories that are based entirely upon the ambulatory patient groups methodology as authorized pursuant to paragraph (e) of this subdivision.

(g) for the purposes set forth in paragraphs (a) and (b) of this subdivision, rates described as in effect for the two thousand seven calendar year shall mean those rates which are in effect for that year on the date this subdivision becomes effective and such rates shall not thereafter, for the purposes set forth in such paragraphs (a) and (b),

be subject to further adjustment.

(h)(i) To the degree that rates of payment computed in accordance with paragraphs (a) and (d) of this subdivision reflect utilization of the ambulatory patient groups reimbursement methodology described in paragraph (e) of this subdivision for purposes of computing the operating component of such rates, the computation of the capital cost component of such rates shall remain subject to the provisions of subparagraphs (i) and (ii) of paragraph (g) of subdivision two of this section, provided, however, that this subparagraph shall not be understood as applying to those portions of rates of payment computed pursuant to paragraph (a) of this subdivision which are based on average Medicaid payments per claim.

(ii) To the degree that rates of payment computed in accordance with paragraph (b) of this subdivision reflect utilization of the ambulatory patient groups reimbursement methodology described in paragraph (e) of this subdivision for purposes of computing the operating component of such rates, the computation of the capital cost component of such rates shall, for diagnostic and treatment centers, remain subject to the provisions of paragraph (b) of subdivision two of this section and shall, for free-standing ambulatory surgery centers, be separately computed in accordance with regulations promulgated in accordance with paragraph (e) of this subdivision, provided, however, that this subparagraph shall not be understood as applying to those portions of rates of payment which are based on average Medicaid payments per claim.

(i) Notwithstanding any provision of law to the contrary, rates of payment by governmental agencies for general hospital outpatient services, general hospital emergency services and ambulatory surgical services provided by a general hospital established pursuant to paragraphs (a), (c) and (d) of this subdivision shall result in an aggregate increase in such rates of payment of fifty-six million dollars for the period December first, two thousand eight through March thirty-first, two thousand nine and one hundred seventy-eight million dollars for periods after April first, two thousand nine, through March thirty-first, two thousand thirteen, and one hundred fifty-three million dollars for state fiscal year periods on and after April first, two thousand thirteen, provided, however, that for periods on and after April first, two thousand nine, such amounts may be adjusted to reflect

projected decreases in fee-for-service Medicaid utilization and changes in case-mix with regard to such services from the two thousand seven calendar year to the applicable rate year, and provided further, however, that funds made available as a result of any such decreases may be utilized by the commissioner to increase capitation rates paid to Medicaid managed care plans and family health plus plans to cover increased payments to health care providers for ambulatory care services and to increase such other ambulatory care payment rates as the commissioner determines necessary to facilitate access to quality ambulatory care services.

3. Commissioner rate certification, governmental payments. Prior to the approval of such rates, as provided in subdivision two of this section, the commissioner shall determine, and in the case of approvals by the state director of the budget, certify to such official that the proposed rate schedules for payments to hospitals for hospital and health-related services are reasonable and adequate to meet the costs which must be incurred by efficiently and economically operated facilities. In making such certification, the commissioner shall take into consideration the elements of cost, geographical differentials in the elements of cost considered, economic factors in the area in which the hospital is located, the rate of increase or decrease of the economy in the area in which the hospital is located, costs of hospitals of comparable size, and the need for incentives to improve services and institute economies. The commissioner shall also take into consideration the economies and improvements in service to be anticipated from the operation of joint central service or use of facilities or services which may serve as alternatives or substitutes for the whole or any part of in-hospital service, including, but not limited to, obstetrical, pediatric, laboratory, training, radiology, pharmacy, laundry, purchasing, preadmission, nursing home, ambulatory or home care services. The commissioner shall exclude costs for research and those parts of the costs for educational salaries which the commissioner shall determine to be not directly related to hospital service, and allowances for costs which are not specifically identified except for allowances authorized under section twenty-eight hundred seven-a or twenty-eight hundred seven-c of this article. In determining

and certifying to the state director of the budget rates of payment, including rates of payment for residential health care facilities, the commissioner shall take into consideration the different levels of care authorized to be provided in such hospital or health-related service and determine and certify distinct rates of payment for each such level of care. If the modification of an operating certificate of a hospital pursuant to subdivision six of section twenty-eight hundred six of this article requires the establishment of a rate for a level of service not previously provided in such hospital during the rate period existing at the time of such modification, a new rate period for that portion of the hospital reclassified as a result of such modification may be established upon sixty days' prior notice.

4. Commissioner rate certifications, payments pursuant to the provisions of the workers' compensation law, the volunteer firefighters' benefit law, the volunteer ambulance workers' benefit law and the comprehensive motor vehicle insurance reparations act. For the rate years commencing January first, nineteen hundred eighty-six and January first, nineteen hundred eighty-seven the commissioner shall submit to the chairman of the workers' compensation board a schedule of hospital inpatient reimbursement rates computed in accordance with subdivision two of section twenty-eight hundred seven-a of this article or as revised pursuant to subdivisions eleven and fourteen of section twenty-eight hundred seven-a of this article. Beginning with the rate period commencing January first, nineteen hundred eighty-eight the commissioner shall submit, and beginning with the rate period January first, nineteen hundred ninety-seven and certify, to the chairman of the workers' compensation board for an established rate period a schedule of hospital inpatient reimbursement rates computed in accordance with subdivision one of section twenty-eight hundred seven-c of this article for payments pursuant to the workers' compensation law, the volunteer firefighters' benefit law and the comprehensive motor vehicle insurance reparations act and beginning with the rate year commencing January first, nineteen hundred ninety-one including payments pursuant to the volunteer ambulance workers' benefit law.

5. Audit authority. The commissioner shall make available to the

commissioner of social services, in a mutually satisfactory manner, all information necessary to conduct or have conducted, on a cost sharing basis among payors, an appropriate review or audit of the fiscal and statistical records of a hospital necessary to implement the provisions of this article.

6. Consideration of economic status in certain cases. Notwithstanding the provisions of this section, the commissioner, in determining and certifying rates of payment for services provided by a party to a contract entered into pursuant to the provisions of subdivision three of section twenty-eight hundred three of this article, shall take into consideration the economic status of the patients receiving such services.

7. Reimbursement rate promulgation. The commissioner shall notify each residential health care facility and health-related service of its approved rates of payment which shall be used in reimbursing for services provided to persons eligible for payments made by state governmental agencies at least sixty days prior to the beginning of an established rate period for which the rate is to become effective and for general hospitals at least thirty days prior to the beginning of an established rate period for which the rate is to become effective. Notification shall be made only after approval of rate schedules by the state director of the budget. The sixty and thirty day notice provisions, herein, shall not apply to rates issued following judicial annulment or invalidation of any previously issued rates, or rates issued pursuant to changes in the methodology used to compute rates which changes are promulgated following the judicial annulment or invalidation of previously issued rates. Notwithstanding any provision of law to the contrary, nothing in this subdivision shall prohibit the recalculation and payment of rates, including both positive and negative adjustments, based on a reconciliation of amounts paid by residential health care facilities beginning April first, nineteen hundred ninety-seven for additional assessments or further additional assessments pursuant to section twenty-eight hundred seven-d of this article with the amounts originally recognized for reimbursement purposes.

7-a. Notwithstanding any inconsistent provision of law, with regard to a general hospital the provisions of subdivisions four and seven of this section and the provisions of section eighteen of chapter two of the laws of nineteen hundred eighty-eight relating to the requirement of prior notice and the time frames for notice, approval or certification of rates of payment, maximum rates of payment or maximum charges where not otherwise waived pursuant to law shall be applicable only to such rates of payment or maximum charges prospectively established for an annual rate period and such provisions shall not be applicable to a general hospital with regard to prospective adjustments or retrospective adjustments of established rates of payment or maximum charges for or during an annual rate period based on correction of errors or omissions of data or in computation, rate appeals, audits or other rate adjustments authorized by law or regulations adopted pursuant to section twenty-eight hundred three of this article.

7-b. Notification of diagnostic and treatment center approved rates.
(a) For rate periods or portions of rate periods beginning on or after October first, nineteen hundred ninety-four, the commissioner shall notify each diagnostic and treatment center of its approved rates of payment, which shall be used in the reimbursement for services provided to persons eligible for payments made by state governmental agencies at least thirty days prior to the beginning of the period for which such rates are to become effective.

(b) Notwithstanding any contrary provision of law, all diagnostic and treatment centers certified on or before September second, nineteen hundred ninety-seven shall, not later than September second, nineteen hundred ninety-seven, notify the commissioner whether they intend to maintain all books and records utilized by the diagnostic and treatment center for cost reporting and reimbursement purposes on a calendar year basis or, commencing on July first, nineteen hundred ninety-six, on a July first through June thirtieth basis, and shall thereafter maintain all books and records on such basis. All diagnostic and treatment centers certified after September second, nineteen hundred ninety-seven shall notify the commissioner at the time of certification whether they intend to maintain all books and records on a calendar year basis or on

or a July first through June thirtieth basis, and shall thereafter maintain all books and records on such a basis.

(c) The books and records maintained pursuant to paragraph (b) of this subdivision shall be utilized and made available to the commissioner in promulgating rates of payment for annual rate periods beginning on or after October first, nineteen hundred ninety-seven.

(d) Notwithstanding any provision of the law to the contrary, rates of payment established in accordance with paragraph (b) as amended, and paragraph (f) of subdivision two of this section for the rate period beginning April first, nineteen hundred ninety-three shall continue in effect through September thirtieth, nineteen hundred ninety-four, and applicable trend factors shall be applied to that portion of such rates of payment for the rate period which begins April first, nineteen hundred ninety-four.

8. Rates for federally qualified health centers and rural health centers. Notwithstanding section four of chapter eighty-one of the laws of nineteen hundred ninety-five, as amended by section twenty-seven of chapter one of the laws of nineteen hundred ninety-nine, and any other law, rule or regulation to the contrary, for periods on and after January first, two thousand one, rates of payment made by governmental agencies for services provided by diagnostic and treatment centers or general hospital outpatient clinics licensed under this article to individuals eligible for medical assistance pursuant to title eleven of article five of the social services law which are also designated, in accordance with 42 USC § 1396a(aa), as federally qualified health centers or rural health centers shall be established in accordance with the following:

(a) For periods on and after January first, two thousand one, and prior to October first, two thousand one, such rates of payment shall be computed in accordance with paragraph (b) of subdivision two of this section, provided, however, that the operating and capital cost components of such rates and the applicable ceilings on allowable operating costs shall reflect an average of nineteen hundred ninety-nine and two thousand base year costs as reported to the department.

(b) For each twelve month period following September thirtieth, two thousand one, the operating cost component of such rates of payment

shall reflect the operating cost component in effect on September thirtieth of the prior period as increased by the percentage increase in the Medicare Economic Index as computed in accordance with the requirements of 42 USC § 1396a(aa)(3) and as adjusted pursuant to applicable regulations to take into account any increase or decrease in the scope of services furnished by the facility.

(c) Rates of payments to facilities which first qualify as federally qualified health centers or rural health centers on or after October first, two thousand shall be computed in accordance with the provisions of paragraph (b) of subdivision two of this section, provided, however, that the operating cost component of such rates shall reflect an average of the operating cost component of rates of payments issued to other facilities subject to this subdivision during the same rate period, located in the same geographic region and with a similar case load, and further provided that the capital cost component of such rates shall reflect the most recently available capital cost data as reported to the department. For each twelve month period following the rate period in which such facilities commence operation, the operating cost component of rates of payment for such facilities shall be computed in accordance with paragraph (b) of this subdivision. In calculating the operating cost component of such rates for facilities which first qualify as federally qualified health care centers on or after October first, two thousand, the counties comprising the geographic region known as downstate shall be the same as the counties comprising the downstate region for purposes of reimbursing diagnostic and treatment centers under ambulatory patient groups, which counties are specified in the regulations adopted by the commissioner implementing section 18 of part C of chapter fifty-eight of the laws of two thousand eight.

(d) Subject to receipt of all necessary federal approvals, rates of payment computed in accordance with this subdivision may be further adjusted in accordance with the provisions of subdivision seventeen of this section, provided, however, that such adjustments shall not be subject to trend adjustments as provided in paragraph (b) of this subdivision.

(e) Diagnostic and treatment centers eligible for rates of payment computed pursuant to paragraphs (a) and (b) of this subdivision, which were, on December thirty-first, two thousand, receiving rates of payment

as preferred primary care providers computed pursuant to paragraph (h) of subdivision two of this section, may elect to continue to receive rates of payment computed in accordance with such paragraph (h), provided that in no event shall such rates of payment be less than the rates of payment computed pursuant to paragraphs (a) and (b) of this subdivision.

(f) For any rate periods after March thirty-first, two thousand eight, subject to the availability of federal financial participation, the commissioner may prospectively adjust rates of payment for facilities otherwise subject to this subdivision to reflect alternative rate-setting methodologies, provided, however, that such alternative rate-setting methodologies must: (i) be authorized by applicable state law, (ii) be agreed to by the commissioner and each facility to which they are applied and (iii) in no event result in rates that are, in aggregate, less than the rates of payment otherwise provided for in this subdivision.

9. Payments under this section not to preclude other lawful payments. Any payments made under the authority of this section or section twenty-eight hundred seven-c of this article shall not preclude payments under any other section of law.

10. Notwithstanding the provisions of this article, the commissioner may waive, subject to the approval of the state director of the budget, the requirements of any provisions of this section, section twenty-eight hundred seven-a or twenty-eight hundred seven-c of this article to permit the development and/or continuation of limited pilot reimbursement programs to provide additional knowledge and experience in different types of reimbursement mechanisms for general hospitals.

* 11. Notwithstanding the provisions of this article, the commissioner may waive, subject to the approval of the state director of the budget, the requirements of any provision of this section, section twenty-eight hundred seven-a or twenty-eight hundred seven-c of this article to permit the development, implementation and operation of limited pilot reimbursement programs for general hospital outpatient services and diagnostic and treatment center services that would be prospective and associated to the resource use patterns in rendering ambulatory care

services.

* NB Expired April 1, 2020

12. (a) Notwithstanding any inconsistent provision of this article or any other law, for the purpose of improving access to and availability of comprehensive primary health care to persons receiving medical assistance pursuant to title eleven of article five of the social services law, the commissioner, upon application by a health care provider, may designate such provider as a preferred primary care provider in accordance with the provisions of this subdivision.

(b) Health care providers designated as preferred primary care providers pursuant to this subdivision shall meet such requirements as may be established by the commissioner in regulation, including, but not limited to:

(i) access by the medically indigent and medicaid eligible to ambulatory services;

(ii) provision, to the maximum extent practicable, of continuity of care;

(iii) arrangements for specialty physician care and necessary ancillary services;

(iv) reasonably accessible hours of operation;

(v) services which are accessible to medically underserved populations and communities including, to the maximum extent feasible, offering such services within the medically underserved community; and

(vi) participation in local social services district managed care programs established pursuant to section three hundred sixty-four-j of the social services law, provided that the commissioner, in consultation with the commissioner of social services, may exempt a health care provider from such participation for good cause. Good cause shall include but not be limited to geographic inaccessibility to managed care programs, inability to coordinate services of managed care programs, or that participation in the managed care program would significantly affect the provider's financial ability to provide services.

(c) For the purposes of this subdivision, a health care provider eligible to be designated as a preferred primary care provider shall mean a general hospital, a diagnostic and treatment center, a private physician, a nurse practitioner, a midwife, a professional corporation

or a group of physicians or nurse practitioners. The designation of any general hospital or a diagnostic and treatment center as a preferred primary care provider shall apply only to the specific site where the entity provides comprehensive primary health care services.

* 13. Subject to the availability of funds, the commissioner shall authorize health occupation development and workplace demonstration programs pursuant to the provisions of section two thousand eight hundred seven-h of this article for diagnostic and treatment centers, and the commissioner is hereby directed to make rate adjustments to cover the cost of such programs.

* NB Expired July 1, 2017

* 14. Notwithstanding any inconsistent provision of law or regulation, for purposes of establishing rates of payment by governmental agencies for diagnostic and treatment centers for services provided on or after April first, nineteen hundred ninety-five, the reimbursable base year administrative and general costs of a provider, excluding a provider reimbursed on an initial budget basis, shall not exceed the statewide average of total reimbursable base year administrative and general costs of diagnostic and treatment centers. For the purposes of this subdivision, reimbursable base year administrative and general costs shall mean those base year administrative and general costs remaining after application of all other efficiency standards, including, but not limited to, peer group cost ceilings or guidelines. The limitation on reimbursement for provider administrative and general expenses provided by this subdivision shall be expressed as a percentage reduction of the operating cost component of the rate promulgated by the commissioner for each diagnostic and treatment center with base year administrative and general costs exceeding the average.

* NB Expired March 31, 2011

15. Notwithstanding any inconsistent provision of law, including subdivision fourteen of this section, the facility-specific impact of eliminating the statewide cap on administrative and general costs, as imposed pursuant to subdivision fourteen of this section, for the period April first, nineteen hundred ninety-nine through June thirtieth, nineteen hundred ninety-nine pursuant to a chapter of the laws of nineteen hundred ninety-nine, shall be included in rates of payment for

facilities affected by such elimination for the period October first, nineteen hundred ninety-nine through December thirty-first, nineteen hundred ninety-nine. In addition, rates for diagnostic and treatment centers for the period October first, nineteen hundred ninety-nine through December thirty-first, nineteen hundred ninety-nine shall include, in the aggregate, the sum of fourteen million dollars which shall be added to rates of payment established in accordance with paragraphs (b) and (h) of subdivision two of this section based on an apportionment of such amount using a ratio of each individual provider's estimated medicaid expenditures to total estimated medicaid expenditures for diagnostic and treatment centers, as determined by the commissioner, for the October first, nineteen hundred ninety-nine through September thirtieth, two thousand rate period.

16. Notwithstanding any inconsistent provision of law, payment for drugs which may not be dispensed without a prescription as required by section sixty-eight hundred ten of the education law provided to persons receiving medical assistance pursuant to title eleven of article five of the social services law by any non-hospital based diagnostic and treatment center licensed under this article in existence on the effective date of this subdivision providing comprehensive primary medical care services and registered by the state board of pharmacy pursuant to section sixty-eight hundred eight of the education law shall be on a fee-for-service basis and shall not be included in any comprehensive clinic rate paid to such facility by governmental agencies established in accordance with paragraph (b) of subdivision two of this section.

17. (a) Notwithstanding any contrary provision of law or regulation, the commissioner shall, subject to the availability of federal financial participation, adjust medical assistance rates of payment established pursuant to paragraph (b) of subdivision two of this section for free-standing diagnostic and treatment centers licensed pursuant to this article and which are: a "covered provider" as defined in subdivision one of section three hundred sixty-four-j-two of the social services law; or eligible for an allocation under paragraph (a-1) of subdivision two of section three hundred sixty-four-j-two of the social services

law; or which provides services to individuals with developmental disabilities as their principal mission, in accordance with paragraphs (b) and (c) of this subdivision for purposes of improving recruitment and retention of non-supervisory workers at health care facilities or any worker with direct patient care responsibility in the following aggregate amounts for the following periods:

(i) for the period April first, two thousand two through December thirty-first, two thousand two, thirteen million dollars;

(ii) for the period January first, two thousand three through December thirty-first, two thousand three, thirteen million dollars;

(iii) for the period January first, two thousand four through December thirty-first, two thousand four, thirteen million dollars;

(iv) for the period January first, two thousand five through December thirty-first, two thousand five, thirteen million dollars;

(v) for the period January first, two thousand six through December thirty-first, two thousand six, thirteen million dollars;

(vi) for the period January first, two thousand seven through June thirtieth, two thousand seven, six million five hundred thousand dollars;

(vii) for the period July first, two thousand seven through March thirty-first, two thousand eight, nine million seven hundred fifty thousand dollars; and

(viii) thirteen million dollars for the period April first, two thousand eight through March thirty-first, two thousand nine;

(ix) thirteen million dollars for the period April first, two thousand nine through March thirty-first, two thousand ten; and

(x) thirteen million dollars for the period April first, two thousand ten through March thirty-first, two thousand eleven.

(b) Such adjustments to rates of payments shall be allocated proportionally based on each diagnostic and treatment center's total annual gross salary and fringe benefit costs, as reported in each such diagnostic and treatment center's nineteen hundred ninety-nine cost report as submitted to the department prior to November first, two thousand one, provided, however, that for periods on and after July first, two thousand seven, such adjustments to rates of payment shall be allocated proportionally, based on each such diagnostic and treatment center's total reported medicaid visits, as reported in each such

diagnostic and treatment center's two thousand four cost report as submitted to the department prior to January thirty-first, two thousand seven, to the total of such medicaid visits for all diagnostic and treatment centers.

(c) Rate adjustments made pursuant to this subdivision shall not be subject to subsequent adjustment or reconciliation.

(d) Diagnostic and treatment centers which have their rates adjusted pursuant to this subdivision shall use such funds for the purpose of recruitment and retention of non-supervisory workers at health care facilities or any worker with direct patient care responsibility and are prohibited from using such funds for any other purpose. Each such diagnostic and treatment center shall submit, at a time and in a manner to be determined by the commissioner, a written certification attesting that such funds will be used solely for the purpose of recruitment and retention of non-supervisory workers at health care facilities or any worker with direct patient care responsibility. The commissioner is authorized to audit each such diagnostic and treatment center to ensure compliance with the written certification required by this paragraph and shall recoup any funds determined to have been used for purposes other than recruitment and retention of non-supervisory workers at health care facilities or any worker with direct patient care responsibility. Such recoupment shall be in addition to any other penalties provided by law.

18. (a) Notwithstanding any contrary provision of law or regulation, the commissioner shall, subject to the provisions of paragraph (c) of this subdivision and to the availability of federal financial participation, increase medical assistance rates of payment established pursuant to paragraph (b) of subdivision two of this section for eligible diagnostic and treatment centers by three percent for services provided on and after December first, two thousand two for purposes of improving recruitment and retention of non-supervisory workers or any worker with direct patient care responsibility.

(b) For the purposes of this subdivision, "eligible diagnostic and treatment center" shall mean a voluntary, not-for-profit diagnostic and treatment center licensed under this article that received medical assistance rates of payment reflecting assignment to limited primary care or drug free peer groups as established pursuant to applicable

rate-setting regulations and that provides primary health care services to a patient population primarily comprised of substance abuse patients and that is ineligible for an adjustment to medical assistance rates of payment under subdivision seventeen of this section.

(c) Diagnostic and treatment centers which have their rates adjusted pursuant to this subdivision shall use such funds solely for the purpose of recruitment and retention of non-supervisory workers or any worker with direct patient care responsibility and are prohibited from using such funds for any other purpose. Each such diagnostic and treatment center shall submit, at a time and in a manner to be determined by the commissioner, a written certification attesting that such funds will be used solely for the purpose of recruitment and retention of non-supervisory workers or any worker with direct patient care responsibility. The commissioner is authorized to audit each such diagnostic and treatment center to ensure compliance with the written certification required by this paragraph and shall recoup any funds determined to have been used for purposes other than recruitment and retention of non-supervisory workers or any worker with direct patient care responsibility. Such recoupment shall be in addition to any other penalties provided by law.

19. (a) Notwithstanding any provision of law, rule or regulation to the contrary and subject to the provisions of paragraph (b) of this subdivision and to the availability of federal financial participation, the commissioner shall increase medical assistance rates of payment by three percent for services provided on and after December first, two thousand two by freestanding methadone maintenance service and program providers issued operating certificates pursuant to this article and section 32.09 of the mental hygiene law for the purposes of improving recruitment and retention of methadone maintenance workers.

(b) Freestanding methadone maintenance services and program providers which are eligible for rate adjustments pursuant to this subdivision and which are also eligible for rate adjustments pursuant to subdivision seventeen of this section, shall, on or before July first, two thousand two, submit, in a form and manner determined by the commissioner, amendments to designated sections of their AHCF-1 cost report segregating wages and fringe benefit costs associated with methadone

maintenance services from all other services for the purposes of determining awards made pursuant to subdivision seventeen of this section for rate periods ending in two thousand three and in two thousand four.

(c) Freestanding methadone maintenance service and program providers which have their rates adjusted pursuant to this subdivision shall use such funds solely for the purpose of recruitment and retention of non-supervisory workers or any worker with direct patient care responsibility and are prohibited from using such funds for any other purpose. Each such methadone maintenance service and program provider shall submit, at a time and in a manner to be determined by the commissioner, a written certification attesting that such funds will be used solely for the purpose of recruitment and retention of non-supervisory workers at such programs or any worker with direct patient care responsibility. The commissioner is authorized to audit each such methadone maintenance service and program provider to ensure compliance with the written certification required by this paragraph and shall recoup any funds determined to have been used for purposes other than recruitment and retention of non-supervisory workers or any worker with direct patient care responsibility. Such recoupment shall be in addition to any other penalties provided by law.

20. (a) Notwithstanding any contrary provision of law and subject to the receipt of all necessary federal approvals and the availability of federal financial participation, the commissioner is authorized to enter into agreements with SUNY downstate medical center, other public general hospitals, and/or with the sponsoring local governments of such other public general hospitals, under which such facilities and/or such local government shall, by intergovernmental transfer, fund the non-federal share of Medicaid funds made available for Delivery System Reform Incentive Payments ("DSRIP") to such facilities. Such non-federal share payments shall be deemed voluntary and, further, such payments shall be excluded from computations made pursuant to section one of part C of chapter fifty-eight of the laws of two thousand five, as amended. In addition, the facilities, and/or the sponsoring local governments of such facilities or the state may, by written notification to the other parties to the agreement, cancel such agreement at any time prior to the

payment of the DSRIP funds. The commissioner shall, to the maximum degree practicable, and to the extent permitted by the federal Centers for Medicare and Medicaid Services ("CMS"), ensure that the DSRIP program is implemented throughout the entire state.

(b) The commissioner shall establish an advisory panel to provide assistance with regard to the DSRIP program. The panel shall be charged with reviewing recommendations for DSRIP funding made by the state's contracted DSRIP assessor and advising the commissioner regarding the results of such review. Such panel shall also review applications under paragraph (b) of subdivision two of section twenty-eight hundred twenty-five of this article. Panel membership shall be comprised of individuals with significant health care system experience. Members may not be elected officials or employed by providers that would benefit from DSRIP funding, and must not have any conflict of interest that would prevent them from providing an impartial review of DSRIP assessor recommendations. The panel shall consist of members appointed by the commissioner and shall in addition consist of one member appointed by the majority leader of the New York state senate, and one member appointed by the speaker of the New York state assembly. The panel shall carry out the review of DSRIP recommendations in strict accordance with all requirements set forth in the state's federal 1115 Medicaid waiver standard terms and conditions. The panel shall submit its recommendations to the commissioner for final determination, in accordance with all requirements set forth in the state's federal 1115 Medicaid waiver standard terms and conditions. The commissioner may modify the requirements of this paragraph and paragraph (c) of this subdivision if such modifications are required by the federal CMS.

(c)(i) Project advisory committees. 1. Lead entities of systems established under the Medicaid delivery system reform incentive payment ("DSRIP") program shall establish a project advisory committee. The committee shall consider and advise the entity on matters concerning system operations, service delivery issues, elimination of health care disparities, measurement of project outcomes, the degree to which project goals are being reached and the development of any plans or programs. The entity may establish rules with respect to its project advisory committee.

(ii) The members of the committee shall be representatives of the

community, or geographic service areas, served by the system, including Medicaid consumers attributed to that system, and any other members required by the terms and conditions of the DSRIP program. The lead entity shall file with the commissioner, and from time to time update, an up-to-date list of the members of the committee, which shall be made available to the public by the department on its website.

(iii) Notwithstanding any inconsistent provision of law, no officer or employee of the state or of any civil division thereof, shall be deemed to have forfeited or shall forfeit his or her office or employment by reason of his or her acceptance of membership on a project advisory committee. No member of a project advisory committee shall receive compensation or allowance for services rendered on the committee, except, however, that members of a committee may be reimbursed by the entity or system for necessary expenses incurred in relation to service on a project advisory committee.

(d) For periods on and after April first, two thousand fourteen, the commissioner shall provide a report on a quarterly basis to the chairs of the senate finance, assembly ways and means, senate health and assembly health committees with regard to the status of the DSRIP program. Such reports shall be submitted no later than sixty days after the close of the quarter, and shall include the most current information submitted by providers to the state and the federal CMS. The reports shall include:

- (i) analysis of progress made toward DSRIP goals;
- (ii) the impact on the state's health care delivery system;
- (iii) information on the number and types of providers who participate;
- (iv) plans and progress for monitoring provider compliance with requirements;
- (v) a status update on project milestone progress;
- (vi) information on project spending and budget;
- (vii) analysis of impact on Medicaid beneficiaries served;
- (viii) a summary of public engagement and public comments received;
- (ix) a description of DSRIP funding applications that were denied;
- (x) a description of all regulation waivers issued pursuant to paragraph (f) of this subdivision; and
- (xi) a summary of the statewide geographic distribution of funds.

(e) For periods on and after April first, two thousand fourteen the commissioner shall promptly make all DSRIP governing documents, including 1115 waiver standard terms and conditions, supporting attachments and detailed project descriptions, and all materials made available to the legislature pursuant to paragraph (d) of this subdivision, available on the department's website. The commissioner shall also provide a detailed overview on the department's website of the opportunities for public comment on the DSRIP program.

(f) Notwithstanding any provision of law to the contrary, the commissioners of the department of health, the office of mental health, the office for people with developmental disabilities, and the office of alcoholism and substance abuse services are authorized to waive any regulatory requirements as are necessary, consistent with applicable law, to allow applicants under this subdivision and paragraph (a) of subdivision two of section twenty-eight hundred twenty-five of this article to avoid duplication of requirements and to allow the efficient implementation of the proposed project; provided, however, that regulations pertaining to patient safety may not be waived, nor shall any regulations be waived if such waiver would risk patient safety. Such waiver shall not exceed the life of the project or such shorter time periods as the authorizing commissioner may determine. Any regulatory relief granted pursuant to this subdivision shall be described, including each regulation waived and the project it relates to, in the report provided pursuant to paragraph (d) of this subdivision.

* 20-a. Notwithstanding any provision of law to the contrary, the commissioners of the department of health, the office of mental health, the office of people with developmental disabilities, and the office of alcoholism and substance abuse services are authorized to waive any regulatory requirements as are necessary, consistent with applicable law, to allow providers that are involved in DSRIP projects or replication and scaling activities, as approved by the authorizing commissioner, to avoid duplication of requirements and to allow the efficient scaling and replication of DSRIP promising practices, as determined by the authorizing commissioner; provided however, that regulations pertaining to patient safety, patient autonomy, patient privacy, patient rights, due process, scope of practice, professional licensure, environmental protections, provider reimbursement

methodologies, or occupational standards and employee rights may not be waived, nor shall any regulations be waived if such waiver would risk patient safety. Any regulatory action under this subdivision shall be published on the applicable website of the authorizing commissioner and shall include a description of each waiver, including a citation of each regulation waived, and a description of the project of which such relief was granted.

* NB Expires April 1, 2028

21. (a) Notwithstanding any contrary provision of law and subject to the receipt of all necessary federal approvals and the availability of federal financial participation, the commissioner is authorized to enter into agreements with SUNY downstate medical center, other public general hospitals, and/or with the sponsoring local governments of such other public general hospitals, under which such facilities and/or such local government shall, by intergovernmental transfer, fund the non-federal share of Medicaid funds made available for implementation of Medicaid Redesign Team initiatives. Such non-federal share payments shall be deemed voluntary and, further, such payments shall be excluded from computations made pursuant to section one of part C of chapter fifty-eight of the laws of two thousand five, as amended. In addition, the facilities, and/or the sponsoring local governments of such facilities or the state may, by written notification to the other parties to the agreement, cancel such agreement at any time prior to the payment of the Medicaid Redesign Team initiatives funds.

(b) Applications by eligible applicants for Medicaid Redesign Team initiatives funded by monies made available pursuant to paragraph (a) of this subdivision shall be submitted for review to the advisory panel established pursuant to paragraph (b) of subdivision twenty of this section and such panel shall submit their recommendations to the commissioner for final determination. For periods on and after April first, two thousand fourteen, the commissioner shall provide a report on a quarterly basis to the majority leader of the New York state senate and to the speaker of the New York state assembly with regard to the status of such applications and approved projects. Such reports shall be submitted no later than sixty days after the close of the quarter, and shall include the most current information submitted by applicants to

the state. The reports shall be submitted in conjunction with and as a part of the reports submitted pursuant to paragraph (c) of subdivision twenty of this section and shall include:

- (i) analysis of progress made toward project goals;
- (ii) the impact on the state's health care delivery system;
- (iii) information on the number and types of providers who participate;
- (iv) plans and progress for monitoring provider compliance with requirements;
- (v) a status update on project milestone progress;
- (vi) information on project spending and budget;
- (vii) analysis of impact on Medicaid beneficiaries served;
- (viii) a summary of public engagement and public comments received;
- (ix) a description of applications that were denied;
- (x) a description of all regulation waivers issued pursuant to paragraph (e) of this subdivision; and
- (xi) a summary of the statewide geographic distribution of funds.

(c) The commissioner shall make all reports prepared pursuant to paragraph (b) of this subdivision and all supporting attachments and materials available on the department's website.

(d) Notwithstanding any inconsistent law to the contrary, and subject to federal financial participation, and subject to amounts appropriated for purposes herein, the department may distribute funds to make rate adjustments for health home providers as described in section three hundred sixty-five-l of the social services law for member engagement, staff training and retraining, health information technology implementation, joint governance technical assistance, and other such purposes as the commissioner, in consultation with the commissioners of the office of mental health and the office of alcoholism and substance abuse services determines.

(e) Notwithstanding any provisions of law to the contrary, the commissioners of the department of health, the office of mental health, the office for people with developmental disabilities, and the office of alcoholism and substance abuse services are authorized to waive any regulatory requirements as are necessary, consistent with applicable law, to allow applicants under this subdivision and paragraph (a) of subdivision two of section twenty-eight hundred twenty-five of this

article to avoid duplication of requirements and to allow the efficient implementation of the proposed project; provided, however, that regulations pertaining to patient safety may not be waived, nor shall any regulation be waived if such waiver would risk patient safety. Such waiver shall not exceed the life of the project or such shorter time period as the authorizing commissioner may determine. Any regulatory relief granted pursuant to this subdivision shall be described, including each regulation waived and the project it relates to, in the report provided pursuant to paragraph (b) of this subdivision.

§ 2807-a. General hospital nineteen hundred eighty-six and nineteen hundred eighty-seven inpatient rates and charges.

1. For the rate period from January first, nineteen hundred eighty-six through December thirty-first, nineteen hundred eighty-six and for the rate period from January first, nineteen hundred eighty-seven through December thirty-first, nineteen hundred eighty-seven, the rates of payment to general hospitals for services provided to persons eligible for payments made by state governmental agencies and subscribers to article forty-three insurance law corporations and subscribers of organizations organized under article forty-four of this chapter (unless application is made to the commissioner under subdivision three of this section) shall be based on the reimbursable operating costs used in determining payments for services provided during the rate period from January first, nineteen hundred eighty-five through December thirty-first, nineteen hundred eighty-five. Such operating costs shall include the annualized cost impact of rate revisions or adjustments made with respect to such services. In addition to the reimbursable operating costs identified in accordance with this subdivision, payment rates by governmental agencies and article forty-three insurance law corporations shall be adjusted each year to reflect:

(a) capital related expenses determined in accordance with subdivision seven of this section;

(b) additional financial needs or revenue requirements in accordance with subdivision eight of this section; and

(c) projection of reimbursable costs identified in accordance with

this subdivision by a trend factor established by the panel of economists as set forth in subdivision fourteen of this section.

2. For the rate period from January first, nineteen hundred eighty-six through December thirty-first, nineteen hundred eighty-six and for the rate period from January first, nineteen hundred eighty-seven through December thirty-first, nineteen hundred eighty-seven, rates of payment pursuant to the provisions of the workers' compensation law, the volunteer firefighters' benefit law and the comprehensive motor vehicle insurance reparations act shall be established on the basis of one hundred twelve percent of the trended nineteen hundred eighty-one average operating reimbursable per diem inpatient cost of the hospital, plus the additions specified in subdivisions seven and eight of this section and such revisions that may be made pursuant to subdivisions eleven and fourteen of this section.

3. Nothing in this section shall prohibit the negotiation by health maintenance organizations operating in accordance with the provisions of article forty-three of the insurance law or article forty-four of this chapter, of agreements with general hospitals for rates of payment other than those provided herein. Such contracts shall require approval by the commissioner and must include provision for special benefit packages or arrangements for providing inpatient services to encourage patient management behavior that will minimize the length of patient stay, such as special admission arrangements, bed leasing or other inpatient capitation arrangements.

4. Hospital inpatient services reimbursement provided to patients who are not beneficiaries or subscribers of corporations organized and operating in accordance with article forty-three of the insurance law, eligible for payments made by state governmental agencies, eligible for payments as beneficiaries of subchapter XVIII of the federal social security act, enrolled in organizations operating in accordance with the provisions of article forty-four of this chapter, enrolled in a self-insured and self-administered group covered under the provisions of paragraph (b) of subdivision twelve of this section, or eligible for payments pursuant to the provisions of the workers' compensation law,

the volunteer firefighters' benefit law or the comprehensive motor vehicle insurance reparations act shall be at charges established by the hospital in accordance with subdivision twelve of this section.

5. Specialty hospitals shall receive reimbursement for general hospital inpatient services in accordance with the provisions of this section unless other reimbursement methodologies are adopted by the council and approved by the commissioner. In such event the allowances provided in subdivision eight of this section shall be included in certified and approved inpatient rates.

6. The establishment of separate rates of payment for patients who require different levels or types of care shall require a reallocation of costs to insure that costs are equitably allocated to service areas and appropriate rate adjustments are made.

7. Capital related expenses. Capital related inpatient expenses, including but not limited to straight line depreciation on buildings and non-movable equipment, accelerated depreciation on movable equipment if requested by the hospital, rentals and interest on capital debt (or for hospitals financed pursuant to article twenty-eight-b of this chapter, such expenses, including amortization in lieu of depreciation, as determined pursuant to the reimbursement regulations promulgated pursuant to that article and article twenty-eight of this chapter), shall be included in rates established on a budget basis and subsequently reconciled to actual expenses through appropriate audit procedures. General hospitals shall submit to the commissioner, at least one hundred twenty days prior to the commencement of each year, a schedule of capital related inpatient expenses for the forthcoming year. Any capital related inpatient expense generated by a capital expenditure which requires or required approval pursuant to this article, must have received such approval for the capital related expense to be included in the rates established. The submitted budget may include the capital related inpatient expenses for all existing capital assets as well as estimates of capital related inpatient expenses for capital assets to be acquired or placed in use prior to the commencement of the rate year or during the rate year provided all required approvals have been obtained.

The basis for determining capital related inpatient expenses shall be the lesser of actual cost or the final amount specifically approved for the construction of the capital asset. The council shall adopt, with the approval of the commissioner, regulations to:

- (a) identify by type the eligible capital related inpatient expenses;
- (b) safeguard the future financial viability of voluntary, non-profit general hospitals by requiring funding of inpatient depreciation on building and fixed and movable equipment;
- (c) provide authorization to adjust inpatient rates by advancing payment of depreciation as needed, in instances of capital debt related financial distress of a voluntary, non-profit general hospital; and
- (d) provide a methodology for the reimbursement treatment of sales.

8. Allowances. All rates established for the two years commencing on January first, nineteen hundred eighty-six in accordance with subdivisions one, two, three, four, five and six of this section shall include the allowances specified in paragraphs (a), (b), (c), (e) and (f) of this subdivision. The allowances shall be computed on the basis of the general hospitals' reimbursable inpatient costs after application of the trend factor. For the purposes of this subdivision and subdivisions sixteen and twenty-four of this section, major public general hospitals are defined as all state operated general hospitals, all general hospitals operated by the New York city health and hospitals corporation as established by chapter one thousand sixteen of the laws of nineteen hundred sixty-nine as amended and all other public general hospitals having annual inpatient operating costs in excess of twenty-five million dollars.

(a) An allowance of one percent of the general hospitals' reimbursable inpatient costs computed in accordance with this section to be used at the discretion of hospital governing boards.

(b) For public general hospitals an additional allowance of up to two percent subject to the provisions of paragraph (d) of this subdivision.

(c) For voluntary non-profit and private proprietary general hospitals an additional allowance up to one percent subject to the provisions of paragraph (d) of this subdivision.

(d) The additional allowances in paragraphs (b) and (c) of this subdivision shall be available to general hospitals receiving approval

from the commissioner as to the acceptable use of the allowance which uses shall include but not be limited to retirement of short term non-capital debt, meeting costs related to bad debts and charity care not met by the distributions as specified in subdivisions sixteen and twenty-four of this section, offsetting reductions in anticipated revenue resulting from charge limits below those applicable to the particular hospital immediately prior to the enactment of subdivision twelve of this section, and needed improvement of current ratio. Allowances authorized by paragraphs (b) and (c) of this subdivision are not to be considered as a substitute for operational funds that are otherwise reimbursable or subject to appeal.

(e) A percentage to reflect the needs for the financing of losses resulting from bad debts and the costs of charity care of general hospitals within article forty-three insurance law regions, or such other regions as adopted pursuant to subdivision fifteen of this section, and within a statewide determination of financial resources to be committed for this purpose. Regional needs shall be equal to the total of inpatient losses from bad debts reduced to cost and the inpatient costs of charity care increased by any deficit of such hospitals from providing ambulatory services, excluding any portion of such deficit resulting from governmental payments below average visit costs, and revenues and expenses related to the provision of referred ambulatory services. The regional amounts to be included in rates approved for the rate year commencing January first, nineteen hundred eighty-six and for the rate year commencing January first, nineteen hundred eighty-seven will be equal to the result of the application of the percentage of statewide need for voluntary non-profit, private proprietary and public general hospitals, other than major public general hospitals, that can be met from available resources in regional pools, created in accordance with subdivision fifteen of this section computed without consideration of inpatient uncollectible amounts, to the regional need for voluntary non-profit, private proprietary and public general hospitals, other than major public general hospitals, expressed in dollars plus the dollar amount resulting from the application of the ratio of major public general hospitals inpatient reimbursable costs within the region to total statewide general inpatient reimbursable cost (as computed on the basis of nineteen

hundred eighty-four financial and statistical reports and excluding costs related to services to beneficiaries of subchapter XVIII of the federal social security act) to the statewide resources committed for this purpose to regional pools computed without consideration of inpatient uncollectible amounts and the ratio of these total dollars to the total regional reimbursable inpatient costs, excluding inpatient costs related to services provided to beneficiaries of subchapter XVIII of the federal social security act, after application of the trend factor. For each year of the two year period commencing on January first, nineteen hundred eighty-six the statewide amount to be available in regional pools for this purpose will equal four and one-half percent of the total hospital reimbursable inpatient cost, excluding inpatient costs related to services provided to beneficiaries of subchapter XVIII of the federal social security act and inpatient uncollectible amounts, after application of the trend factor. The allocations of resources made available under this paragraph, as specified in subdivision sixteen of this section may be changed only as follows: An annual review shall be conducted pursuant to rules and regulations adopted by the council and approved by the commissioner with respect to bad debt and charity care need within each article forty-three insurance law region or such other regions as are adopted pursuant to subdivision fifteen of this section. If within such a region there is a definitive finding as a result of such review that there has been a change in the proportional amounts of bad debts and charity care provided by (i) major public general hospitals and (ii) voluntary non-profit, private proprietary and public general hospitals, other than major public general hospitals, the allocation of resources made available under this paragraph shall be adjusted pursuant to the rules and regulations adopted pursuant to this paragraph so as to reflect this change.

(f) An additional allowance of fifty-eight hundredths of one percent shall be included in each rate established for each voluntary non-profit and private proprietary general hospital to be returned to a regional pool and distributed in accordance with paragraph (b) of subdivision sixteen of this section.

10. Special provisions for payments by governmental agencies. In the event that the allowances specified in subdivision eight of this section

are not approved by the federal government for federal financial participation in payments made for beneficiaries eligible for medical assistance under subchapter XIX of the federal social security act, rates of payment by governmental agencies for the operating cost component of general hospital inpatient services shall be based on the reimbursable operating costs used in determining payments for services provided during the rate period from January first, nineteen hundred eighty-five through December thirty-first, nineteen hundred eighty-five, including the annualized cost impact of rate revisions or adjustments made with respect to such services, projected by a trend factor determined in accordance with subdivision fourteen of this section, and adjusted by a base period adjustment factor to reflect the difference between the actual regional increase in inpatient general hospital operating cost for those regions as established pursuant to subdivision fifteen of this section between cost reporting periods for nineteen hundred eighty-one and nineteen hundred eighty-four and the trend factors developed to project costs for such period, provided, however, such base period adjustment factor shall not exceed an amount equal to the percentage allowances calculated in accordance with paragraphs (a), (b), (c), (e) and (f) of subdivision eight of this section. The commissioner shall assess all general hospitals within a region an amount equal to the regional allowance percentage as determined in accordance with paragraph (e) of subdivision eight of this section applied to actual inpatient revenues received from providing inpatient services to persons eligible for payments from state governmental agencies excluding inpatient revenues related to services provided to beneficiaries of subchapter XVIII of the federal social security act. The commissioner shall also assess an additional fifty-eight hundredths of one percent of actual inpatient revenues received by voluntary non-profit and private proprietary general hospitals for services provided to persons eligible for payments made by state governmental agencies excluding inpatient revenues related to services provided to beneficiaries of subchapter XVIII of the federal social security act. Such assessments shall be returned to regional pools in accordance with the methodology contained in subdivision fifteen of this section and distributed in accordance with the provisions of subdivision sixteen of this section.

11. Adjustments. (a) For the period from January first, nineteen hundred eighty-six through December thirty-first, nineteen hundred eighty-seven, the commissioner shall on his own initiative, or on the basis of a request from a general hospital, adjust an established rate to reflect:

(i) the reduction of costs related to the elimination of a general hospital inpatient service in instances where the costs of such service were included in the rate established; and

(ii) the correction of errors or omissions of data or in computation.

(b) General hospitals may request and the commissioner shall consider an adjustment to an established rate to reflect increased expenses or reconsideration of disallowed expenses based on:

(i) justification of all or a portion of expenses not included in the rate resulting from the cost analysis process contained in subparagraph (i) of paragraph (a) of this subdivision;

(ii) additional operational expenses related to approved construction or service changes;

(iii) the addition of costs related to a state requirement for additional services to be provided or additional costs to be incurred in meeting state and federal requirements;

(iv) additional expenses to permit a more efficient and economical method of delivering a service; and

(v) increased costs for compensation of employees.

(c) In determining the reasonableness or justification of an adjustment to an established rate related to subparagraph (v) of paragraph (b) of this subdivision, the commissioner shall consider:

(i) the fiscal capability of the general hospital to finance such increases from its own resources;

(ii) the past history of the general hospital with respect to compensation increases and allowed compensation trend factors; and

(iii) the economy in the area in which the general hospital is located.

(d) The commissioner shall adjust a prospectively established inpatient rate on the basis of subsequent data that demonstrates a significant cost influencing change in patient mix or volume of service. Such adjustments shall be based on rules and regulations adopted by the

council and approved by the commissioner. Such rules and regulations for a volume adjustment shall take into consideration only volume changes to other than beneficiaries of subchapter XVIII of the federal social security act.

(e) All appeals shall be submitted to the commissioner, who may submit a copy of the appeal to interested parties for the purpose of providing an opportunity for comment within a specified time period.

(f) The commissioner shall act upon all properly documented appeals for adjustments concerning base year costs by November first of the calendar year for which the rate is effective provided that all information necessary to determine whether an adjustment is justified is submitted by the facility prior to May first of such year. In the event such an appeal is filed by May first, but information necessary to determine whether an adjustment is justified is submitted after such date, the commissioner shall act on the appeal within six months after receiving the necessary information.

(g) The commissioner shall consider an adjustment to a hospital's reported base year costs in instances where it is demonstrated that recurring costs resulting from multi-year commitments beginning late in a base year should be calculated on an annual basis in establishing a rate in order to avoid a significant inequity. In making such an adjustment the commissioner shall consider the offset of non-recurring base year costs.

12. Hospital charge schedules. (a) Effective for the year commencing January first, nineteen hundred eighty-six and thereafter each general hospital shall establish a charge schedule for available and authorized services in accordance with a gross charge determination formula provided by the commissioner which shall establish gross inpatient charges such that the payment rate to be made on behalf of subscribers of article forty-three insurance law plans, adjusted for uncovered services shall be at a discount which shall not exceed twelve percent of the gross charge rate billed to or on behalf of charge paying patients. For general hospitals subject to the provisions of paragraphs (a) and (b) of subdivision twenty-one of this section, the costs (including all allowances specified in subdivision eight of this section) of services provided to charge paying patients shall not exceed a twelve percent

discount from the gross charge rate billed to or on behalf of charge paying patients. In the event that a hospital's gross inpatient charges exceed the maximum inpatient charges computed in accordance with the gross charge determination formula prescribed by the commissioner, direct repayment or adjustment of subsequent charges for inpatient services shall be effectuated in accordance with regulations adopted by the council and approved by the commissioner.

(b) For the period January first, nineteen hundred eighty-six through December thirty-first, nineteen hundred eighty-seven, negotiated payment rate determination systems between self-insured and self-administered groups and hospitals which were in effect on May first, nineteen hundred eighty-five may continue.

13. Working capital. General hospitals may include as a financing or working capital charge an addition of two percent of any valid claim not paid within thirty days of submission or determination of payor liability, whichever is later, and one percent per month thereafter. Revenues received from such financing or working capital charges shall not be considered as a cost offset or as part of the hospital's gross inpatient charges. Financing or working capital charges shall not be applied to hospital billings to third party payors participating in a periodic interim payment system.

14. Trend factors. (a) The commissioner in accordance with the methodology developed by the consultants pursuant to paragraph (b) of this subdivision shall establish trend factors to project for the effects of inflation. The factors shall be applied to the appropriate portion of reimbursable costs as defined in subdivision one of this section, or, if effective, subdivision ten of this section. The methodology for developing the trend factor shall include the appropriate external price indicators and shall also include the data from major collective bargaining agreements as reported quarterly by the federal department of labor, bureau of labor statistics, for non-supervisory employees.

(b) The methodology shall be developed by four independent consultants with expertise in health economics appointed by the commissioner. Not later than September first of each year, the consultants shall provide

to the commissioner and the council, the methodology to be used to determine the trend factors for the subsequent twelve month period commencing January first. The commissioner shall monitor the actual price movement during this twelve month period of the external price indicators used in the methodology, shall report the results of the monitoring to the consultants, and shall implement, semi-annually, the recommendations of the consultants for adjustments to the trend factor, provided, however, that adjustments, except for the final adjustment of the trend factor, shall not be required unless such adjustment would result in the weighted average of the operating cost component of the rates differing by more than one-half of one percent from that which was previously determined.

15. Regional and statewide pools, general. Funds will be made available in regional pools for regional distributions through the submissions by general hospitals of the allowances included in rates and charges in accordance with paragraphs (e) and (f) of subdivision eight of this section and, if effective, the amount of the assessment in accordance with subdivision ten of this section. Funds will be made available for distribution from a statewide pool in accordance with the assessments authorized in subdivision twenty-three of this section. The regions are established as the article forty-three insurance plan regions, with the exception that the southern sixteen counties shall be divided into three regions for the purposes of subdivisions eight and sixteen of this section with separate regions consisting of Richmond, Manhattan, Bronx, Queens and Kings counties; Nassau and Suffolk counties, and Delaware, Columbia, Ulster, Sullivan, Orange, Dutchess, Putnam, Rockland and Westchester counties. Such regions shall be the same regions established and in effect January first, nineteen hundred eighty-five. The council with the approval of the commissioner may combine regions, with the exception of the above specified regions for the southern sixteen counties, upon application of the article forty-three insurance law plans involved and a demonstration that significant inequities would not occur. The commissioner is authorized to contract with the article forty-three insurance law plans to receive funds for the pools and distribute such funds. In the event contracts with the article forty-three insurance law plans are effectuated, the

commissioner shall conduct annual audits of the receipt and distribution of the pooled funds. In order for general hospitals to participate in the distribution of funds from the pools the general hospital must implement collection policies and procedures approved by the commissioner.

16. Regional pools. Funds accumulated in regional pools, including income from invested funds, shall be distributed in accordance with the following methodology and sequence:

(a) Funds accumulated in regional pools, including income from invested funds, from the allowance specified in paragraph (e) of subdivision eight of this section and, if effective, the assessment against all general hospitals as authorized in subdivision ten of this section shall be distributed as follows:

(i) Each eligible major public general hospital as defined in subdivision eight of this section shall receive a portion of its bad debt and charity care need equal to the result of the application of its percentage of statewide inpatient reimbursable costs excluding costs related to services to beneficiaries of subchapter XVIII of the federal social security act, developed on the basis of nineteen hundred eighty-four financial and statistical reports to the total of all regional pools.

(ii) Funds remaining in the regional pools after distribution in accordance with subparagraph (i) of this paragraph shall be distributed proportionately to voluntary non-profit, private proprietary and public general hospitals, other than major public general hospitals, on the basis of need within the region as defined in paragraph (e) of subdivision eight of this section.

(b) Funds accumulated in regional pools, including income from invested funds, created by the allowance specified in paragraph (f) of subdivision eight of this section and, if effective, the fifty-eight hundredths of one percent assessment against voluntary non-profit and private proprietary general hospitals as authorized by subdivision ten of this section, shall be available for distribution by the commissioner in accordance with rules adopted by the council to assist in offsetting losses resulting from bad debts and the costs of charity care of voluntary non-profit and private proprietary general hospitals

experiencing severe fiscal hardship because of insufficient resources to finance such losses and costs. Such losses and costs may include losses and costs incurred prior to the year used in determining hospital need pursuant to paragraph (e) of subdivision eight of this section. Amounts to be distributed shall be determined after consideration of amounts to be distributed from regional pools in accordance with paragraph (a) of this subdivision and from the statewide pool in accordance with subparagraph (iii) of paragraph (a) of subdivision twenty-four of this section.

(c) Any balance in the portion of regional pools created by the allowance in paragraph (f) of subdivision eight of this section, and if effective, the fifty-eight hundredths of one percent assessment as authorized by subdivision ten of this section, including income from invested funds, after distribution in accordance with paragraph (b) of this subdivision shall be distributed to voluntary non-profit and private proprietary general hospitals within the region on a basis related to specific hospital need as defined in paragraph (e) of subdivision eight of this section.

20. Unit of service. For the rate period from January first, nineteen hundred eighty-six through December thirty-first, nineteen hundred eighty-six and for the rate period from January first, nineteen hundred eighty-seven through December thirty-first, nineteen hundred eighty-seven the unit of service on which payment is made to general hospitals for inpatient services shall be the unit of service in effect during the rate period from January first, nineteen hundred eighty-five through December thirty-first, nineteen hundred eighty-five unless specifically provided otherwise in this section or modified pursuant to a subsequent chapter.

21. Provisions for article forty-three insurance law corporations and article forty-four of this chapter organizations. Except as provided in paragraphs (a) and (b) of this subdivision, general hospital charges for inpatient and outpatient services to subscribers or beneficiaries of contracts entered into pursuant to the provisions of article forty-three of the insurance law or to members of a comprehensive health services plan operating pursuant to the provisions of article forty-four of this

chapter for patient services rendered shall not exceed the rates of payment approved by the superintendent of financial services or approved or certified by the commissioner, whichever is applicable and required by this section, for payments by such article forty-three insurance law corporations or article forty-four of this chapter organizations. No general hospital may demand or request any charge for such covered services in addition to the charges or rates authorized by this article.

(a) Any general hospital which terminated its contract with an article forty-three insurance law corporation or a comprehensive health services plan after October first, nineteen hundred seventy-six and prior to May first, nineteen hundred seventy-eight, may not charge subscribers or beneficiaries of contracts entered into pursuant to the provisions of article forty-three of the insurance law, or members of a comprehensive health services plan operating pursuant to the provisions of article forty-four of this chapter, amounts in excess of the schedule of charges established by such hospital for patient services in accordance with the provisions of subdivision twelve of this section.

(b) Any general hospital which has notified in writing an article forty-three insurance law corporation or a comprehensive health services plan prior to June first, nineteen hundred seventy-eight of its intention to terminate its contract with such corporation or plan in accordance with the terms of such contract, except a general hospital subject to the provisions of paragraph (a) of this subdivision may not charge a subscriber or beneficiary of a contract entered into pursuant to the provisions of article forty-three of the insurance law, or a member of a comprehensive health services plan operating pursuant to the provisions of article forty-four of this chapter, after the effective date of termination of such contract, amounts in excess of the schedule of charges established by such hospital for patient services in accordance with the provisions of subdivision twelve of this section.

(c) No general hospital shall refuse to provide patient services to such subscribers or beneficiaries solely on the grounds of such subscription or membership.

22. Restitution authorization. In enforcing the provisions of subdivisions twelve and twenty-one of this section, the commissioner may, in addition to the penalties and injunctions set forth in section

twelve of this chapter, order that any general hospital provide restitution for any overpayments made by any party. Any hospital may request a formal hearing pursuant to the provisions of section twelve-a of this chapter in the event the hospital does not consent to any order of the commissioner hereunder. The commissioner may direct that such a hearing be held without any request by a hospital.

23. Bad debt and charity care assessments. The commissioner shall create a bad debt and charity care statewide pool through assessments which shall be charged to general hospitals to reflect the needs for the financing of losses resulting from bad debts and the costs of charity care. Such assessments will be submitted to a statewide pool as designated by the commissioner and distributed on a monthly basis in accordance with subdivision twenty-four of this section. The bad debt and charity care assessments shall be:

(a) Three and eight-tenths percent aggregate assessment of each general hospital's gross revenue received for inpatient hospital service provided during the period July first, nineteen hundred eighty-six through December thirty-first nineteen hundred eighty-six composed of the following: (i) an assessment of three and eight hundredths percent to be allocated to a statewide bad debt and charity care account in the statewide pool and distributed in accordance with paragraph (a) of subdivision twenty-four of this section, (ii) an assessment of thirty-eight hundredths of one percent to be allocated to a statewide financially distressed hospital account in the statewide pool and distributed in accordance with paragraph (b) of subdivision twenty-four of this section, and (iii) an assessment of thirty-four hundredths of one percent to be allocated to a statewide transition account in the statewide pool and distributed in accordance with paragraph (c) of subdivision twenty-four of this section;

(b) One and nine-tenths percent aggregate assessment of each general hospital's gross revenue received for inpatient hospital service provided during the period January first, nineteen hundred eighty-seven through December thirty-first, nineteen hundred eighty-seven composed of the following: (i) an assessment of one and fifty-four hundredths percent to be allocated to a statewide bad debt and charity care account in the statewide pool and distributed in accordance with paragraph (a)

of subdivision twenty-four of this section, (ii) an assessment of nineteen hundredths of one percent to be allocated to a statewide financially distressed hospital account in the statewide pool and distributed in accordance with paragraph (b) of subdivision twenty-four of this section, and (iii) an assessment of seventeen hundredths of one percent to be allocated to a statewide transition account in the statewide pool and distributed in accordance with paragraph (c) of subdivision twenty-four of this section;

(c) Provided, however, there shall be no assessment against those voluntary non-profit and private proprietary general hospitals which qualify for distributions made in accordance with paragraph (b) of subdivision sixteen of this section and paragraph (b) of subdivision twenty-four of this section.

(d) For the purposes of this subdivision and subdivision twenty-four of this section, gross revenue received is defined as all monies received for or on account of inpatient hospital service, provided, however, that gross revenue received shall not include distributions from regional and statewide pools established in accordance with this section and shall not include the component of rates of payment related to the allowances provided in accordance with subdivision eight or, if effective, the base period adjustment factor provided in accordance with subdivision ten of this section.

24. Statewide pool distribution. (a) Funds accumulated in the statewide bad debt and charity care account in the statewide pool, including income from invested funds, shall be distributed in accordance with the following methodology:

(i) There shall be set aside within such account, from accumulated funds, from the total allocation to the statewide bad debt and charity care account of the assessment of three and eight hundredths percent of gross revenue received in accordance with subparagraph (i) of paragraph (a) of subdivision twenty-three of this section an amount equal to eighty-six hundredths of one percent of gross revenue received, as defined in paragraph (d) of subdivision twenty-three of this section, and from the total allocation to the statewide bad debt and charity care account of the assessment of one and fifty-four hundredths percent of gross revenue received in accordance with subparagraph (i) of paragraph

(b) of subdivision twenty-three of this section an amount equal to forty-three hundredths of one percent of gross revenue received, as defined in paragraph (d) of subdivision twenty-three of this section. Each eligible major public general hospital, as defined in subdivision eight of this section, shall receive from such funds a portion of its bad debt and charity care need equal to the result of the application of its percentage of statewide major public general hospital gross revenue received to such funds.

(ii) Any funds within the statewide bad debt and charity care account set aside for major public general hospitals and not distributed in accordance with subparagraph (i) of this paragraph shall be distributed in accordance with subparagraph (iii) of this paragraph.

(iii) Funds remaining in the statewide bad debt and charity care account, after allocation in accordance with subparagraph (i) of this paragraph, including funds available pursuant to subparagraph (ii) of this paragraph, and including income from invested funds, shall be distributed proportionately on a statewide basis to voluntary non-profit, private proprietary and public general hospitals, other than major public general hospitals, on the basis of need as defined in paragraph (e) of subdivision eight of this section. Amounts to be distributed shall be determined after consideration of amounts to be distributed from regional pools in accordance with paragraph (a) of subdivision sixteen of this section.

(b) Funds accumulated in the statewide financially distressed general hospital account in the statewide pool, including income from invested funds, shall be distributed or retained in accordance with the following methodology:

(i) Funds in the statewide financially distressed general hospital account, including income from invested funds, shall be made available on a statewide basis for distribution by the commissioner in accordance with rules and regulations adopted by the council and approved by the commissioner to assist voluntary non-profit and private proprietary general hospitals experiencing severe fiscal hardship because of insufficient resources to finance losses resulting from bad debts and the costs of charity care, and to meet reasonable and necessary costs related to securing financing of capital improvement projects for such general hospitals. Such losses and costs may include losses and costs

incurred prior to the year used in determining hospital need pursuant to paragraph (e) of subdivision eight of this section. Amounts to be distributed shall be determined after consideration of amounts to be distributed from regional pools in accordance with subdivision sixteen of this section and from the statewide bad debt and charity care account in accordance with subparagraph (iii) of paragraph (a) of this subdivision. The commissioner, in accordance with rules and regulations adopted by the council and approved by the commissioner, may allocate a portion of the accumulated funds for the purpose of securing financing of capital improvement projects for such general hospitals.

(ii) Any balance remaining in the statewide financially distressed general hospital account, including income from invested funds, not including that portion of accumulated funds allocated for the purpose of securing financing of capital improvement projects, after distribution in accordance with subparagraph (i) of this paragraph shall be distributed to voluntary non-profit, private proprietary and public general hospitals, other than major public general hospitals, on a basis related to need as defined in paragraph (e) of subdivision eight of this section.

(c) (i) Funds accumulated in the statewide transition account in the statewide pool, including income from invested funds, shall be distributed to voluntary non-profit, private proprietary and public general hospitals that have high percentages of gross revenue received from payors whose rates and maximum charges are determined in accordance with this section compared to total gross revenue received. For purposes of this subparagraph, major public general hospitals operated by the New York city health and hospitals corporation as established by chapter one thousand sixteen of the laws of nineteen hundred sixty-nine as amended shall be considered on a consolidated basis. Rules for such distribution will be those adopted by the state hospital review and planning council and approved by the commissioner.

(ii) Any balance remaining in the statewide transition account, including income from invested funds, after distribution in accordance with subparagraph (i) of this paragraph shall be distributed to voluntary non-profit, private proprietary and public general hospitals, other than major public general hospitals, on a basis related to need as defined in paragraph (e) of subdivision eight of this section.

25. Maximum distributions. No general hospital may receive in total from the distributions made in accordance with paragraphs (a) and (c) of subdivision sixteen of this section and paragraph (a), subparagraph (ii) of paragraph (b) and subparagraph (ii) of paragraph (c) of subdivision twenty-four of this section an amount which exceeds its need for financing losses related to bad debts and the costs of charity care as defined in paragraph (e) of subdivision eight of this section.

26. Undistributed funds. Any funds, including income from invested funds, remaining in the statewide pool after distributions in accordance with paragraphs (a), (b) and (c) of subdivision twenty-four of this section shall be distributed proportionately to voluntary non-profit, private proprietary and public general hospitals, excluding major public general hospitals, on the basis of hospital specific assessments submitted to the pool.

27. Payment of assessments. Payments by or on behalf of general hospitals of funds due for the bad debt and charity care assessments pursuant to subdivision twenty-three of this section shall be made on a time schedule established by the council, subject to the approval of the commissioner, by regulation. Upon receipt of notification from the commissioner, the comptroller or a fiscal intermediary designated by the director of the budget shall withhold from the amount of any payment to be made by the state to a general hospital the amount of any arrearage resulting from such general hospital's failure to make a timely payment of the bad debt and charity care assessments. Upon withholding such amount, the comptroller or a designated fiscal intermediary shall pay the commissioner, or his designee, such amount withheld. Any general hospital in arrears resulting from failure to make a timely payment shall not be eligible for a distribution from the statewide pool in accordance with subdivision twenty-four of this section until such arrearage is satisfied.

28. Reimbursement rates. The assessments pursuant to subdivision twenty-three of this section shall not be an allowable cost in the determination of general hospital inpatient reimbursement rates in

accordance with this section and section twenty-eight hundred seven of this chapter.

§ 2807-aa. Nurse loan repayment program. 1.(a) Monies shall be made available, subject to appropriations, for purposes of loan repayment awards in accordance with the provisions of this section for registered professional nurses licensed to practice under section sixty-nine hundred five of the education law and licensed practical nurses licensed under section sixty-nine hundred six of the education law.

Notwithstanding sections one hundred twelve and one hundred sixty-three of the state finance law and sections one hundred forty-two and one hundred forty-three of the economic development law, or any other contrary provision of law, such funding shall be allocated regionally with one-third of available funds going to New York city and two-thirds of available funds going to the rest of the state and shall be distributed in a manner to be determined by the commissioner without a competitive bid or request for proposals.

(i) Loan repayment awards made under this section shall be awarded to repay student loans of nurses who work in areas determined to be underserved areas in New York state and who agree to work in such areas for a period of three consecutive years. A nurse may be deemed to be practicing in an underserved area if they practice in a facility, physician's office, nurse practitioner's office, or physician assistant's office that primarily serves an underserved population, without regard to whether the population or the facility or office is located in an underserved area. For purposes of this section, "underserved areas" shall be located in New York state and shall include, but not be limited to, areas designated by the federal government as a health professional shortage area, a medically underserved area, or medically underserved population, non-profit diagnostic and treatment centers which primarily serve Medicaid eligible or uninsured patients, and other areas and populations as determined by the commissioner.

(ii) Loan repayment awards made under this section shall not exceed the total qualifying outstanding debt of the nurse from student loans to cover tuition and other related educational expenses, made by or

guaranteed by the federal or state government, or made by a lending or educational institution approved under title IV of the federal higher education act. Loan repayment awards shall be used solely to repay such outstanding debt.

(iii) Nurses shall be eligible for a loan repayment award to be determined by the commissioner over a three-year period distributed as follows: thirty percent of total award for the first year; thirty percent of total award for the second year; and any unpaid balance of the total award not to exceed the maximum award amount for the third year.

(iv) In the event that a three-year commitment under this section is not fulfilled, the recipient shall be responsible for repayment of amounts paid which shall be calculated in accordance with the formula set forth in subdivision (b) of section two hundred fifty-four-o of title forty-two of the United States Code, as amended, or any regulations made thereunder.

(b) The commissioner may postpone, change or waive the service obligation and repayment amounts set forth in subparagraphs (i) and (iv) of paragraph (a) of this subdivision in individual circumstances where there is compelling need or hardship.

2. To develop a streamlined application process for the nurse loan repayment program set forth under this section, the department shall appoint a stakeholder work group from recommendations made by associations representing nurses, general hospitals and other health care facilities. Such recommendations shall be made by September thirtieth, two thousand twenty-two.

3. In the event there are undistributed funds within amounts made available for distributions under this section, such funds shall be reallocated and distributed in current or subsequent distribution periods in a manner determined by the commissioner for the purpose set forth in this section.

§ 2807-b. Outstanding payments and reports due under subdivision eighteen of section twenty-eight hundred seven-c, sections twenty-eight

hundred seven-d, twenty-eight hundred seven-j, twenty-eight hundred seven-s and twenty-eight hundred seven-t of this article. 1. If there is a basis for estimating the amount of outstanding payments due in accordance with subdivision eighteen of section twenty-eight hundred seven-c of this article, and sections twenty-eight hundred seven-d, twenty-eight hundred seven-j, twenty-eight hundred seven-s and twenty-eight hundred seven-t of this article, the commissioner shall bill applicable providers and payors for such payments, including any interest and penalties set forth in this article, no later than ninety days after each calendar quarter following enactment of this section.

2. If there is no basis for estimating the amount of outstanding payments due in accordance with subdivision eighteen of section twenty-eight hundred seven-c of this article, and sections twenty-eight hundred seven-d, twenty-eight hundred seven-j, twenty-eight hundred seven-s and twenty-eight hundred seven-t of this article, the commissioner shall notify applicable providers and payors of outstanding reports and payments no later than ninety days after each calendar quarter following the effective date of this section. Such notice shall include information regarding any interest, penalties or other sanctions which may be implemented in accordance with this article.

§ 2807-c. General hospital inpatient reimbursement for annual rate periods beginning on or after January first, nineteen hundred eighty-eight. 1. Payor payments. Payments to general hospitals for inpatient hospital services provided to persons who are not eligible for payments as beneficiaries of title XVIII of the federal social security act (medicare) shall be determined pursuant to this section. Payor payments shall be as follows unless an alternative reimbursement methodology is authorized in accordance with paragraph (e), (f), (g), (h) or (i) of subdivision four of this section.

* (a) Payments to general hospitals for reimbursement of inpatient hospital services provided to patients eligible for payments made by state governmental agencies for patients discharged prior to January first, two thousand and on and after January first, two thousand; or for patients discharged prior to January first, nineteen hundred

ninety-seven provided in accordance with policies written by corporations organized and operating in accordance with article forty-three of the insurance law, or payment by such a corporation on behalf of subscribers of a foreign corporation as described in paragraph (d) of subdivision twelve of this section, which provide for reimbursement on an expense incurred basis; or for patients discharged prior to January first, nineteen hundred ninety-seven provided to subscribers of organizations operating in accordance with the provisions of article forty-four of this chapter, shall be case based payments per discharge, for each diagnosis-related group established in accordance with paragraph (a) of subdivision three of this section, and shall include:

- (i) a reimbursable inpatient operating cost component determined in accordance with subdivision five of this section;

- (ii) capital related inpatient expenses determined in accordance with subdivision eight of this section;

- (iii) for patients discharged prior to January first, nineteen hundred ninety-seven (A) a bad debt and charity care allowance determined in accordance with subdivision fourteen of this section, (B) a general health care services allowance determined in accordance with subdivision fourteen-b of this section, and (C) a bad debt and charity care allowance for financially distressed hospitals determined in accordance with subdivision fourteen-c of this section;

- (iv) a projection of reimbursable inpatient operating costs to the rate year by the trend factor determined in accordance with subdivision ten of this section; and

- (v) adjustments for any modifications to the case payments determined in accordance with paragraph (a), (b), (c) or (d) of subdivision four of this section.

* NB Effective until December 31, 2029

- * (a) Payments to general hospitals for reimbursement of inpatient hospital services provided to patients eligible for payments made by state governmental agencies; or provided in accordance with policies written by corporations organized and operating in accordance with article forty-three of the insurance law, or payment by such a corporation on behalf of subscribers of a foreign corporation as described in paragraph (d) of subdivision twelve of this section, which

provide for reimbursement on an expense incurred basis; or provided to subscribers of organizations operating in accordance with the provisions of article forty-four of this chapter, shall be case based payments per discharge, for each diagnosis-related group established in accordance with paragraph (a) of subdivision three of this section, and shall include:

- (i) a reimbursable inpatient operating cost component determined in accordance with subdivision five of this section;

- (ii) capital related inpatient expenses determined in accordance with subdivision eight of this section;

- (iii) (A) a bad debt and charity care allowance determined in accordance with subdivision fourteen of this section, (B) a general health care services allowance determined in accordance with subdivision fourteen-b of this section, and (C) a bad debt and charity care allowance for financially distressed hospitals determined in accordance with subdivision fourteen-c of this section;

- (iv) a projection of reimbursable inpatient operating costs to the rate year by the trend factor determined in accordance with subdivision ten of this section; and

- (v) adjustments for any modifications to the case payments determined in accordance with paragraph (a), (b), (c) or (d) of subdivision four of this section.

* NB Effective December 31, 2029

- (a-1) Payments made by local governmental agencies to general hospitals for reimbursement of inpatient hospital services provided to incarcerated individuals of local correctional facilities as defined in subdivision sixteen of section two of the correction law shall be at the rates of payment determined pursuant to this section for state governmental agencies, excluding adjustments pursuant to subdivision fourteen-f of this section.

* NB Effective until December 31, 2029

- (a-1) Payments made by local governmental agencies to general hospitals for reimbursement of inpatient hospital services provided to incarcerated individuals of local correctional facilities as defined in subdivision sixteen of section two of the correction law shall be at the rates of payment determined pursuant to this section for state governmental agencies.

* NB Effective December 31, 2029

* (a-2) (i) With the exception of those enrollees covered under a payment rate methodology agreement negotiated with a general hospital, payments for inpatient hospital services provided to patients eligible for medical assistance pursuant to title eleven of article five of the social services law made by organizations operating in accordance with the provisions of article forty-four of this chapter or by health maintenance organizations organized and operating in accordance with article forty-three of the insurance law shall be the rates of payment that would be paid for such patients under the medical assistance program, (i) determined pursuant to this section, excluding adjustments pursuant to subdivision fourteen-f of this section, and (ii) excluding medical education costs that are reimbursed directly to the general hospital in accordance with paragraph (a-3) of this subdivision.

(ii) Effective July first, two thousand seven, with the exception of those enrollees covered under a payment rate methodology agreement negotiated with a general hospital, payment for inpatient hospital services provided to patients enrolled in the child health insurance program pursuant to title one-A of article twenty-five of this chapter made by organizations operating in accordance with the provisions of article forty-four of this chapter or by health maintenance organizations organized and operating in accordance with article forty-three of the insurance law shall be the rates of payment that would be paid under the medical assistance program determined pursuant to this section, excluding adjustments pursuant to subdivision fourteen-f of this section.

* NB Expires December 31, 2029

* (a-3) Notwithstanding any inconsistent provision of law:

(i) the commissioner shall establish, subject to the approval of the director of the budget, discrete rates of payment for general hospitals for the period July first, nineteen hundred ninety-six through December thirty-first, nineteen hundred ninety-nine and periods on and after January first, two thousand for payments under the medical assistance program pursuant to title eleven of article five of the social services law for persons eligible for medical assistance who are enrolled in health maintenance organizations and for payments under the family health plus program for persons enrolled in approved organizations

pursuant to title eleven-D of article five of the social services law based on the components of rates of payment established pursuant to this section for persons eligible for medical assistance who are not enrolled in health maintenance organizations for a general hospital for such rate period that reflect the estimated reimbursable costs of direct medical education expenses and indirect medical education expenses in the determination of:

(A) the hospital-specific average reimbursable inpatient operating cost per discharge pursuant to subdivision six of this section, and

(B) group category average inpatient reimbursable operating cost per discharge pursuant to subdivision seven of this section, and

(C) the operating cost component of rates of payment pursuant to paragraphs (f) and (k) of subdivision four of this section, and

(D) the operating cost component of rates of payment in accordance with paragraphs (e), (g) and (i) of subdivision four of this section for general hospitals or distinct units of general hospitals not reimbursed on the basis of case based payments per discharge; and

(E) notwithstanding clauses (A) through (D) of this subparagraph, for periods on and after December first, two thousand nine, the operating cost component of rates of payment subject to subdivision thirty-five of this section, and

(F) notwithstanding clauses (A) through (D) of this subparagraph, for periods on and after December first, two thousand nine, the operating cost component of rates of payment subject to paragraphs (e-1), (e-2) and (1) of subdivision four of this section for general hospitals or distinct units of general hospitals not reimbursed on the basis of case based payments per discharge; and

(ii) such rates of payment may be established by the commissioner on any appropriate payment basis, including a case mix adjusted per discharge basis.

* NB Expires December 31, 2029

* (b) For patients discharged prior to January first, nineteen hundred ninety-seven, payments to general hospitals for reimbursement of inpatient hospital services provided to patients eligible for payments pursuant to the comprehensive motor vehicle insurance reparations act; or enrolled in a self-insured fund which provides for reimbursement directly to general hospitals on an expense incurred basis, with the

exception of those enrollees covered under a payment rate methodology agreement in accordance with the provisions of paragraph (a) of subdivision two of this section; or insured under a commercial insurer licensed to do business in this state and authorized to write accident and health insurance and whose policy provides inpatient hospital coverage on an expense incurred basis; or receiving inpatient hospital services pursuant to an out-of-plan benefits system authorized pursuant to section four thousand four hundred six of this chapter, except where such out-of-plan, inpatient hospital services are offered by an organization organized pursuant to the not-for-profit corporation law or which meets the qualifications of section 501(c) of the internal revenue code, shall be case based payments per discharge, for each diagnosis-related group established in accordance with paragraph (a) of subdivision three of this section, and equal to the case payments to general hospitals provided in accordance with paragraph (a) of this subdivision for services provided to subscribers of corporations organized and operating in accordance with article forty-three of the insurance law, adjusted for uncovered services, and increased by thirteen percent or, for payments pursuant to the workers' compensation law, the volunteer firefighters' benefit law and the volunteer ambulance workers' benefit law, increased by five percent. Funds received by a general hospital based on the payment differential applied pursuant to this paragraph shall be hospital funds for patient care purposes. Without due cause general hospitals shall not refuse to accept direct payments from a payor who would otherwise be eligible to reimburse hospitals for inpatient services on a case based payment per discharge in accordance with this subdivision.

(b-1) (i) For patients discharged on and after January first, nineteen hundred ninety-seven and prior to January first, two thousand and on and after January first, two thousand, payments to general hospitals for reimbursement of inpatient hospital services provided to patients eligible for payments pursuant to the workers' compensation law, the volunteer firefighters' benefit law, the volunteer ambulance workers' benefit law, and the comprehensive motor vehicle insurance reparations act shall be at the rates of payment determined pursuant to this section for state governmental agencies, excluding adjustments pursuant to subdivision fourteen-f of this section and subdivision thirty-three of

this section, excluding such further reductions to such payments as are enacted as part of the state budget for the state fiscal year commencing April first, two thousand ten and excluding such further reductions to such payments as are enacted as part of the state budget for state fiscal years commencing on and after April first, two thousand eleven.

(ii) The provisions of paragraph (d) of subdivision eleven of this section shall continue to apply to such payors for payments determined pursuant to this paragraph.

(b-2) A payor included in the payor categories specified in paragraph (a) or (b-1) of this subdivision shall not be provided the option of payment to a general hospital for inpatient services based on the lower of hospital charges or the case based payment per discharge determined in accordance with this section for a patient or apportioning the appropriate case based payment per discharge for a patient by excluding payment for a preexisting condition or acquired condition which has to be treated along with the reason for the admission or, except as may affect qualification for payments in accordance with paragraph (b) or (d) of subdivision four of this section, for days within the inlier stay determined to be medically unnecessary.

* NB Effective until December 31, 2029

* (b) Payments to general hospitals for reimbursement of inpatient hospital services provided to patients eligible for payments pursuant to the comprehensive motor vehicle insurance reparations act; or enrolled in a self-insured fund which provides for reimbursement directly to general hospitals on an expense incurred basis, with the exception of those enrollees covered under a payment rate methodology agreement in accordance with the provisions of paragraph (a) of subdivision two of this section; or insured under a commercial insurer licensed to do business in this state and authorized to write accident and health insurance and whose policy provides inpatient hospital coverage on an expense incurred basis; or receiving inpatient hospital services pursuant to an out-of-plan benefits system authorized pursuant to section four thousand four hundred six of this chapter, except where such out-of-plan, inpatient hospital services are offered by an organization organized pursuant to the not-for-profit corporation law or which meets the qualifications of section 501 (c) of the internal revenue code, shall be case based payments per discharge, for each

diagnosis-related group established in accordance with paragraph (a) of subdivision three of this section, and equal to the case payments to general hospitals provided in accordance with paragraph (a) of this subdivision for services provided to subscribers of corporations organized and operating in accordance with article forty-three of the insurance law, adjusted for uncovered services, and increased by thirteen percent or, for payments pursuant to the workers' compensation law, the volunteer firefighters' benefit law and the volunteer ambulance workers' benefit law, increased by five percent. Funds received by a general hospital based on the payment differential applied pursuant to this paragraph shall be hospital funds for patient care purposes. Without due cause general hospitals shall not refuse to accept direct payments from a payor who would otherwise be eligible to reimburse hospitals for inpatient services on a case based payment per discharge in accordance with this subdivision. A payor included in the payor categories specified in this paragraph or in paragraph (a) of this subdivision shall not be provided the option of payment to a general hospital for inpatient services based on the lower of hospital charges or the case based payment per discharge determined in accordance with this section for a patient or apportioning the appropriate case based payment per discharge for a patient by excluding payment for a preexisting condition or acquired condition which has to be treated along with the reason for the admission or, except as may affect qualification for payments in accordance with paragraph (b) or (d) of subdivision four of this section, for days within the inlier stay determined to be medically unnecessary.

* NB Effective December 31, 2029

* (c) Charge based payments. For patients discharged prior to January first, nineteen hundred ninety-seven, payments to general hospitals for reimbursement of inpatient hospital services provided to those for whom a case based payment per discharge system is not authorized by paragraph (a) or (b) of this subdivision, or who are not covered under the provisions of paragraph (a) of subdivision two of this section, shall be on the basis of the hospital's charges; provided, however, for these patients the definition of a short stay patient pursuant to paragraph (d) of subdivision four of this section shall apply, and reimbursement to hospitals for such patients shall be at payments developed in

accordance with paragraph (d) of subdivision four of this section, increased by thirteen percent. The maximum amount to be charged to any charge paying patient for a case shall be one hundred twenty percent of the case based payment per discharge as determined under paragraph (b) of this subdivision for the diagnosis-related group with which the patient is identified. Each general hospital shall establish a charge schedule and inpatient charges from this schedule shall be applied uniformly for all inpatient charge based payments made in accordance with this section.

* NB Effective until December 31, 2029

* (c) Charge based payments. Payments to general hospitals for reimbursement of inpatient hospital services provided to those for whom a case based payment per discharge system is not authorized by paragraph (a) or (b) of this subdivision, or who are not covered under the provisions of paragraph (a) of subdivision two of this section, shall be on the basis of the hospital's charges; provided, however, for these patients the definition of a short stay patient pursuant to paragraph (d) of subdivision four of this section shall apply, and reimbursement to hospitals for such patients shall be at payments developed in accordance with paragraph (d) of subdivision four of this section, increased by thirteen percent. The maximum amount to be charged to any charge paying patient for a case shall be one hundred twenty percent of the case based payment per discharge as determined under paragraph (b) of this subdivision for the diagnosis-related group with which the patient is identified. Each general hospital shall establish a charge schedule and inpatient charges from this schedule shall be applied uniformly for all inpatient charge based payments made in accordance with this section.

* NB Effective December 31, 2029

(d) The components of rates of payment calculated in accordance with this section related to inpatient operating costs shall be based on general hospital reimbursable inpatient operating costs used in determining payments for services pursuant to section twenty-eight hundred seven-a of this article during the rate period January first, nineteen hundred eighty-seven through December thirty-first, nineteen hundred eighty-seven (or for a distinct unit of a general hospital excluded from case based payments pursuant to paragraph (e) or (g) of

subdivision four of this section such distinct unit reimbursable inpatient operating costs), excluding inpatient operating costs related to services provided to beneficiaries of title XVIII of the federal social security act (medicare) in accordance with paragraph (g) of subdivision eleven of this section and adjusted to reflect the annualized cost impact of rate revisions or adjustments, including the volume adjustment and case mix adjustment for the nineteen hundred eighty-seven rate period, made with respect to such services, which shall be defined as a general hospital's or distinct unit's reimbursable inpatient operating cost base; a projection to the nineteen hundred eighty-eight rate period by the trend factor determined in accordance with subdivision ten of this section; and an increase to reflect special additional inpatient operating costs determined and allocated in accordance with paragraph (e) of this subdivision.

(e) General hospital special additional inpatient operating costs shall be determined and allocated among general hospitals in accordance with subparagraphs (i), (iii) and (iv) of this paragraph. For purposes of computing group category average inpatient reimbursable operating costs in accordance with paragraph (a) of subdivision seven of this section and an equivalent cost component for general hospitals that are excluded from the case based payment per diagnosis-related group system in accordance with paragraph (e) or (g) of subdivision four of this section special additional inpatient operating costs shall include an additional increase determined and allocated among general hospitals in accordance with subparagraph (ii) of this paragraph.

(i) The total cost increases pursuant to this subparagraph for all general hospitals shall in the aggregate be one hundred thirty million dollars for the nineteen hundred eighty-eight rate period to reflect nineteen hundred eighty-five costs incurred in excess of the trend factor between nineteen hundred eighty-one and nineteen hundred eighty-five, such cost increases to be projected from nineteen hundred eighty-eight to subsequent annual rate periods by the applicable trend factor, and shall be allocated among general hospitals in accordance with the following methodology:

Five hundred dollars per bed shall be allocated to costs of each general hospital based on the total number of inpatient beds for which

the hospital is certified pursuant to the operating certificate issued for such general hospital in accordance with section twenty-eight hundred five of this article in effect on January first, nineteen hundred eighty-eight.

A factor of one quarter of one percent of a general hospital's reimbursable inpatient operating cost base as defined in paragraph (d) of this subdivision, trended through nineteen hundred eighty-eight, shall be allocated to costs of general hospitals for technology advances and a further one quarter of one percent of such costs shall be allocated to costs of general hospitals for increased activities related to quality assurance and patient discharge planning.

The balance of one hundred thirty million dollars after deducting the dollar value of the per bed cost enhancement and the dollar value of the percentage cost enhancements shall be allocated to costs of general hospitals based on the ratio of each general hospital's nineteen hundred eighty-five cost incurred in excess of the trend factor between nineteen hundred eighty-one and nineteen hundred eighty-five in the following discrete areas, summed, to the total sum of such cost over trend of all general hospitals applied to such balance: malpractice insurance costs, infectious and other waste disposal costs, water charges, direct medical education expenses, working capital interest costs of hospitals that qualified for distributions made in accordance with paragraph (b) of subdivision sixteen of section twenty-eight hundred seven-a of this article, costs of distinct psychiatric units excluded from case based payments per diagnosis-related group, and ambulance costs. For purposes of this subparagraph, nineteen hundred eighty-five cost incurred in excess of the trend factor between nineteen hundred eighty-one and nineteen hundred eighty-five shall be calculated for each such discrete area based on a general hospital's inpatient operating costs for the fiscal year ending in nineteen hundred eighty-five, after excluding inpatient operating costs related to services provided to beneficiaries of title XVIII of the federal social security act (medicare), for such discrete area in excess of the hospital's comparable component of reimbursable inpatient operating costs for its fiscal year ending in nineteen hundred eighty-one, after excluding inpatient operating costs

related to services provided to beneficiaries of title XVIII of the federal social security act (medicare), trended through nineteen hundred eighty-five by the appropriate component of the trend factors and adjusted to reflect approved decreases or increases in inpatient operating costs resulting from all rate adjustments.

(ii) The total additional cost increases pursuant to this subparagraph for all general hospitals shall in the aggregate be forty million dollars for the nineteen hundred eighty-eight rate period, such additional cost increases to be projected from nineteen hundred eighty-eight to the rate period by the applicable trend factor, to be allocated among general hospitals in accordance with the following methodology:

The additional increase of forty million dollars shall be allocated to costs of general hospitals that are included in group categories established pursuant to paragraph (b) of subdivision seven of this section based on the ratio of the nineteen hundred eighty-eight intermediate group operating costs of each such general hospital, and to costs of general hospitals that are excluded from the case based payment per diagnosis-related group system in accordance with paragraph (e) or (g) of subdivision four of this section based on the ratio of the nineteen hundred eighty-eight intermediate operating costs of each such general hospital, to the total sum of such intermediate group operating costs and intermediate operating costs applied to the forty million dollars. For purposes of this subparagraph, intermediate group operating costs of a general hospital shall be calculated in accordance with rules and regulations adopted by the council and approved by the commissioner based on the reimbursable inpatient operating cost base determined in accordance with paragraph (d) of this subdivision of such general hospital; adjusted to exclude operating costs related to specialized hospital services for which an alternative reimbursement methodology is adopted pursuant to paragraph (e) or (g) or, if effective, (i) of subdivision four of this section; and trended to the nineteen hundred eighty-eight rate period by the trend factor determined in accordance with subdivision ten of this section; and increased to reflect special additional inpatient operating costs determined and allocated in accordance with subparagraph (i) of this paragraph; and adjusted to

exclude a factor for operating costs of patients who required an alternate level of care in accordance with paragraph (h) of subdivision four of this section; and adjusted to exclude the components of the trended reimbursable inpatient operating cost base related to education, physician, ambulance services and organ acquisition costs determined in accordance with subparagraphs (i), (iii) and (iv) of paragraph (c) of subdivision seven of this section and malpractice insurance costs, and the components of special additional inpatient operating costs determined and allocated in accordance with subparagraph (i) of this paragraph associated with cost increases in such costs. For purposes of this subparagraph, intermediate operating costs of a general hospital excluded from the case based payment per diagnosis-related group system shall be calculated in accordance with rules and regulations adopted by the council and approved by the commissioner based on the reimbursable inpatient operating cost base determined in accordance with paragraph (d) of this subdivision of such general hospital; trended to the nineteen hundred eighty-eight rate period by the trend factor determined in accordance with subdivision ten of this section; and increased to reflect special additional inpatient operating costs determined and allocated in accordance with subparagraph (i) of this paragraph; and adjusted to exclude a factor for operating costs of patients who required an alternate level of care developed consistent with the provisions of paragraph (h) of subdivision four of this section; and adjusted to exclude the components of the trended reimbursable inpatient operating cost base related to education, physician, ambulance services and organ acquisition costs determined consistent with the provisions of subparagraphs (i), (iii) and (iv) of paragraph (c) of subdivision seven of this section and malpractice insurance costs, and the components of special additional inpatient operating costs determined and allocated in accordance with subparagraph (i) of this paragraph associated with cost increases in such costs.

(iii) Cost increases pursuant to this subparagraph shall be made for the nineteen hundred ninety-one rate period to reflect cost increases incurred in excess of the trend factor and not included in the costs used in determining payments in accordance with paragraph (d) of this subdivision and subparagraphs (i) and (ii) of this paragraph. Such costs shall in the aggregate be three hundred twenty-nine million dollars

exclusive of costs related to services provided to beneficiaries of title XVIII of the federal social security act (medicare). Such costs increases shall be projected from nineteen hundred ninety-one to subsequent annual rate periods by the applicable trend factor, and shall be allocated among general hospitals, except those general hospitals whose base year for determining payments for services in such facilities is nineteen hundred eighty-seven, in accordance with the following methodology:

(A) Up to two hundred twenty-two million dollars shall be allocated for labor adjustments. If the total of the adjustments is less than two hundred twenty-two million dollars, then the adjustments shall be fully funded. If the total of the adjustments is more than two hundred twenty-two million dollars, then the adjustment specified in accordance with item (II) of this clause shall be funded at the lower of twenty percent of the total amount allocated for labor adjustments or its proportional share of the labor adjustments unless the labor adjustment specified in item (I) of this clause is less than eighty percent of the total amount allocated for labor adjustments in which case the adjustment specified in item (II) of this clause shall be equal to the difference between two hundred twenty-two million dollars and the total amount of the adjustment specified in item (I) of this clause.

(I) A portion of the amount allocated for labor adjustments shall be for labor cost increases related to registered nurses' salaries and fringes (twenty percent of salaries) and an add-on for the ripple effect on other health care professionals of at least thirty-five percent. Such adjustment shall cover both inpatient and outpatient cost incurred, based on costs reported in a survey conducted by the department for the period January first, nineteen hundred ninety through June thirtieth, nineteen hundred ninety on forms specified by the commissioner and received by the department no later than November first, nineteen hundred ninety, annualized, in excess of nineteen hundred eighty-five labor costs related to registered nurses' salaries and fringes trended to nineteen hundred ninety and the nineteen hundred eighty-eight statewide nurse salary adjustment trended to nineteen hundred ninety by the appropriate components of the trend factors adjusted to reflect the effect of the annualization of nineteen hundred ninety data and the result trended to nineteen hundred ninety-one and shall be based

exclusively on regional experience. Such regional adjustment shall not be less than zero. Each individual hospital within a region shall receive a portion of the regional adjustment equal to its share of the total inpatient and outpatient reimbursable operating costs for the region excluding costs related to services provided to beneficiaries of title XVIII of the federal social security act (medicare) and excluding direct medical education costs.

(II) A portion of the amount allocated for labor adjustments shall be for personnel costs other than those related to registered nurses' salaries and fringes and the ripple effect on other health care professionals. Such adjustment shall cover both inpatient and outpatient costs incurred, based on costs reported in a survey conducted by the department for the period January first, nineteen hundred ninety through June thirtieth, nineteen hundred ninety on forms specified by the commissioner and received by the department no later than November first, nineteen hundred ninety, annualized, in excess of nineteen hundred eighty-five personnel costs covered by this adjustment trended to nineteen hundred ninety and the annualized rate adjustments approved in nineteen hundred eighty-nine for personnel costs covered by this adjustment for increased hospital costs to meet additional state requirements that became effective July first, nineteen hundred eighty-nine trended to nineteen hundred ninety by the appropriate components of the trend factors adjusted to reflect the effect of the annualization of nineteen hundred ninety data and the result trended to nineteen hundred ninety-one and shall be based exclusively on regional data.

(III) In the event that federal financial participation in payments made for beneficiaries eligible for medical assistance under title XIX of the federal social security act based upon the allocation and adjustment specified in items (I) and (II) of this clause related to outpatient costs as a component of such payments is not approved by the federal government then such outpatient costs shall not be considered in calculating such adjustment.

(C) Thirty-three million dollars shall be allocated for technology advances and changes in medical practice. A fixed amount per bed shall be allocated to the costs of each general hospital based on the total number of inpatient beds for which the general hospital is certified

pursuant to the operating certificate issued for such general hospital in accordance with section twenty-eight hundred five of this article in effect on June thirtieth, nineteen hundred ninety.

(D) Thirty-four million dollars shall be allocated to those general hospitals providing comprehensive health care to the communities they serve as determined by the commissioner pursuant to regulations approved by the council. Comprehensive health care includes providing and/or accommodating patients' health care needs at the appropriate levels and settings of care, and reaches outside of traditional inpatient services to outpatient and other services. Factors to be considered in deciding which general hospitals are providing comprehensive health care and the size of the adjustment shall include but not be limited to: clinic and emergency room volume compared to inpatient volume (measured using total volume and/or volume related to medicaid and medically indigent patients); number and type of clinic services offered; availability of services; whether the general hospital is an AIDS designated center, prenatal care assistance program provider, home health care provider, trauma center, burn center; whether the general hospital offers neonatal intensive care services, dialysis services, birthing center backup agreements, AIDS outpatient programs, specific mental health, drug and alcohol programs including outpatient and emergency services and those designated pursuant to section 9.39 of the mental hygiene law; and whether the general hospital's emergency room is designated as a 911 receiving hospital. In the event that federal financial participation in payments made for beneficiaries eligible for medical assistance under title XIX of the federal social security act based upon the adjustment specified in this clause as a component of such payments is not approved by the federal government because of the inclusion of outpatient services then such outpatient services shall not be considered in calculating such adjustment. If such exclusion results in the allocation for this adjustment not being spent, then any unspent portion shall be reallocated to further fund the adjustments specified in clauses (D) and (E) of this subparagraph in the same proportion as their original funding.

(E)(I) Twenty-six million dollars shall be allocated to the costs of general hospitals based on the ratio of each general hospital's nineteen hundred eighty-nine cost incurred in excess of the trend factor between

nineteen hundred eighty-five and nineteen hundred eighty-nine in the certain discrete areas, summed, to the total sum of such cost over trend of all general hospitals applied to the total funds under this allocation. Such discrete cost areas shall include but not be limited to: infectious and other waste disposal costs, universal precautions, working capital interest costs, costs for asbestos removal, costs of low osmolality contrast media, malpractice costs, water and sewer charges, ambulance costs and costs related to designation as a trauma center. For purposes of this clause, nineteen hundred eighty-nine cost incurred in excess of the trend factor between nineteen hundred eighty-five and nineteen hundred eighty-nine shall be calculated for each such discrete area based on a general hospital's inpatient operating costs for the fiscal year ending in nineteen hundred eighty-nine, after excluding inpatient operating costs related to services provided to beneficiaries of title XVIII of the federal social security act (medicare), for such discrete area in excess of the hospital's comparable component of reimbursable inpatient operating costs for its fiscal year ending in nineteen hundred eighty-five, after excluding inpatient operating costs related to services provided to beneficiaries of title XVIII of the federal social security act (medicare), trended through nineteen hundred eighty-nine by the appropriate component of the trend factors and adjusted to reflect approved decreases or increases in inpatient operating costs resulting from all rate adjustments.

(II) Any funds allocated under this clause and not distributed pursuant to item (I) of this clause shall be allocated for the following: to reimburse for a portion of the cost increases incurred above the trend factor between nineteen hundred eighty-one and nineteen hundred eighty-five for those discrete cost areas specified in the last paragraph of subparagraph (i) of paragraph (e) of this subdivision as added by chapter two of the laws of nineteen hundred eighty-eight and not reimbursed in accordance with such paragraph. Such funds shall be allocated to general hospitals in the same manner as specified in such paragraph.

(F) Seven million two hundred thousand dollars shall be allocated to account for the increase in the number of patients admitted through the emergency room and the high costs of treating such patients which has resulted in an increase in severity within diagnosis related groups.

Such funds shall be allocated to general hospitals based on the nineteen hundred eighty-nine hospital-specific data on increased admissions through the emergency room since nineteen hundred eighty-one, excluding those admissions related to providing services to beneficiaries of title XVIII of the federal social security act (medicare).

(G) Two hundred fifty dollars per bed shall be allocated to the costs of each general hospital having two hundred or less certified acute care beds and classified as a rural hospital for purposes of determining payment for inpatient acute care services provided to beneficiaries of title XVIII of the federal social security act (medicare) or under state regulations, for recruiting and retaining health care personnel, based on the total number of inpatient acute care beds for which such general hospital is certified pursuant to the operating certificate issued for such general hospital in accordance with section twenty-eight hundred five of this article in effect on June thirtieth, nineteen hundred ninety.

(H) One million dollars shall be allocated to assist general hospitals involved in a merger, acquisition, or consolidation in meeting the costs associated with such merger, acquisition, or consolidation on or after January first, nineteen hundred ninety-one. The commissioner shall make rate adjustments for such allocations.

(I) Five hundred thousand dollars shall be allocated for a practitioner placement program to assist general hospitals in the placement of physicians and other health care practitioners to practice primary health care and/or dentistry in underserved areas, to serve the medically needy, and including services with affiliated community based providers. The commissioner shall make rate adjustments for such allocations. Notwithstanding any inconsistent provision of this subdivision, this clause shall not apply in rate periods commencing on or after January first, nineteen hundred ninety-four.

(iv) Cost increases pursuant to this subparagraph shall be made for the nineteen hundred ninety-four rate period to reflect cost increases incurred in excess of the trend factor and not included in the costs used in determining payments in accordance with paragraph (d) of this subdivision and subparagraphs (i), (ii) and (iii) of this paragraph. Such costs shall in the aggregate be one hundred seventy-three million dollars exclusive of costs related to services provided to beneficiaries

of title XVIII of the federal social security act (medicare). Such cost increases shall be projected from nineteen hundred ninety-four to subsequent annual rate periods by the applicable trend factor, and shall be allocated among general hospitals in accordance with the following methodology:

(A) Forty-six million dollars shall be allocated to the costs of general hospitals for treating tuberculosis patients. Each general hospital shall receive a portion of this total equal to its share of the statewide total of inpatient tuberculosis discharges based on the most recent twelve month period for which data is available.

(B) Sixty-three million dollars shall be allocated for labor adjustments in accordance with the following methodology:

(I) Fifty-five million dollars shall be for labor cost increases incurred prior to June thirtieth, nineteen hundred ninety-three. Each general hospital shall receive a portion of this total equal to its share of the statewide total of inpatient and outpatient reimbursable operating costs based on nineteen hundred ninety data excluding costs related to services provided to beneficiaries of title XVIII of the federal social security act (medicare) and excluding direct medical education costs.

(II) Eight million dollars of the amount to be allocated for labor adjustments pursuant to this clause shall be distributed to general hospitals located in the counties of Ulster, Sullivan, Orange, Dutchess, Putnam, Rockland, Columbia, Delaware and Westchester, to account for prior disproportionate increases in unreimbursed labor costs. Each individual hospital shall receive a portion of the eight million dollars equal to its share of the total inpatient and outpatient reimbursable operating costs based on nineteen hundred ninety data for all hospitals located in the above-referenced counties excluding costs related to services provided to beneficiaries of title XVIII of the federal social security act (medicare) and excluding direct medical education costs.

(C) Fifty-five million dollars shall be allocated to the costs of increased activities related to regulatory compliance, universal precautions and infection control related to AIDS, tuberculosis, and other infectious diseases, including the training of employees with regard to infection control, and for infectious and other waste disposal costs. A fixed amount per bed shall be allocated to the costs of each

general hospital based on the total number of inpatient beds for which the general hospital is certified pursuant to the operating certificate issued for each general hospital in accordance with section twenty-eight hundred five of this article in effect on August twenty-fourth, nineteen hundred ninety-three.

(D) Three million dollars shall be allocated as follows:

(I) Two hundred fifty dollars per bed shall be allocated to the costs of each general hospital having two hundred or less certified acute care beds and classified as a rural hospital for purposes of determining payment for inpatient services provided to beneficiaries of title XVIII of the federal social security act (medicare) or under state regulations, in recognition of the unique costs incurred by these facilities in complying with state regulations, based on the total number of inpatient acute care beds for which such general hospital is certified pursuant to the operating certificate issued for such general hospital in accordance with section twenty-eight hundred five of this article in effect on August twenty-fourth, nineteen hundred ninety-three.

(II) The remainder shall be allocated on a proportional basis to the costs of each general hospital classified as a rural hospital for purposes of determining payment for inpatient services provided to beneficiaries of title XVIII of the federal social security act (medicare) or under state regulations, in recognition of the unique costs incurred by these facilities to provide hospital services in remote or sparsely populated areas, according to the following methodology:

(1) the net income, or the net loss expressed as a negative, as a proportion of the net patient revenue, of each such hospital, based on operating results for the nineteen hundred ninety and nineteen hundred ninety-one rate years, shall be computed and averaged, and expressed as a percentage;

(2) each such resulting percentage average shall be multiplied by each such hospital's number of inpatient beds for which such hospital is certified pursuant to the operating certificate issued for such hospital in accordance with section two thousand eight hundred five of this article in effect on June thirtieth, nineteen hundred ninety, and such resulting products for all such hospitals shall be summed, and such sum

shall be divided by the total of all such beds for all such hospitals, and the resulting quotient shall be the weighted average rural operating margin expressed as a percentage; and

(3) one percentage point shall be subtracted from each such hospital's average net operating margin, and the resulting difference shall be divided by the weighted average rural operating margin; and

(4) (a) if the quotient resulting from the computation in subitem three above is less than zero, then the absolute value of such quotient shall be multiplied by each such hospital's number of inpatient beds for which such hospital is certified pursuant to the operating certificate issued for such hospital in accordance with section two thousand eight hundred five of this chapter in effect on June thirtieth, nineteen hundred ninety, such product shall be multiplied by one hundred fifty dollars, and such resulting amount shall be such hospital's adjustment pursuant to this clause;

(b) if the quotient resulting from the computation in subitem three above is zero or greater, such hospital's adjustment pursuant to this clause shall be zero; and

(c) provided, however, that if the total of all such adjustments so computed exceeds the amount to be allocated in accordance with this item, each such hospital's adjustment shall be proportionately reduced.

(E) Three million dollars shall be allocated to assist general hospitals involved in a merger, acquisition, or consolidation in meeting the costs associated with such merger, acquisition, or consolidation on or after January first, nineteen hundred ninety-four. The commissioner shall make rate adjustments for such allocations.

(F) (I) One million five hundred thousand dollars shall be allocated for enhanced rates for general hospitals participating within a rural health network as defined in subdivision two of section twenty-nine hundred fifty-one of this chapter. Such rate enhancements shall be established only for inpatient services provided by such hospitals through the written rural health network agreement, where such services have been approved for enhanced rates by the commissioner. Notwithstanding any inconsistent provision of law, such enhanced rates shall be subject to the availability of federal financial participation pursuant to title XIX of the federal social security act in expenditures made for eligible patients, including pooling arrangements and volume

adjustments, provided, however that such enhanced rates shall not affect the calculation for any other general hospital of the group price component calculated pursuant to subparagraph (i) of paragraph (a) of subdivision seven of this section.

(II) One million five hundred thousand dollars shall be allocated for enhanced rates for general hospitals participating within a central services facility rural health network as defined in subdivision three of section twenty-nine hundred fifty-one of this chapter. Such rate enhancements shall be established only for inpatient services provided by such hospitals through the network operational plan, where such services have been approved for enhanced rates by the commissioner. Notwithstanding any inconsistent provision of law, such enhanced rates shall be subject to the availability of federal financial participation pursuant to title XIX of the federal social security act in expenditures made for eligible patients, including pooling arrangements and volume adjustments, provided, however that such enhanced rates shall not affect the calculation for any other general hospital of the group price component calculated pursuant to subparagraph (i) of paragraph (a) of subdivision seven of this section.

(f) The commissioner and the state director of the budget shall consider providing a supplementary increase to general hospital reimbursable inpatient operating costs for purposes of computing rates of payment for annual rate periods beginning on or after January first, nineteen hundred eighty-nine in accordance with this section for reasonable and necessary supplementary cost increases in general hospital operating costs for such rate period or periods based on increased minimum standards and procedures relating to general hospital operating certificates adopted by the council and approved by the commissioner or state initiatives related to recruitment or maintenance of an appropriate level of personnel providing professional services to patients. Any such supplementary increase shall be allocated to costs of general hospitals in accordance with rules and regulations adopted by the council and approved by the commissioner.

(g) Hospital discharges for purposes of computing case based payments per discharge pursuant to this section shall be based on the number of patient discharges during the rate period from January first, nineteen hundred eighty-seven through December thirty-first, nineteen hundred

eighty-seven excluding discharges of beneficiaries of title XVIII of the federal social security act (medicare) and adjusted as provided in specific provisions of this section, or the number of such patient discharges during a recent twelve month period prior thereto established by regulation for which data are available subsequently reconciled by an adjustment to reflect nineteen hundred eighty-seven discharge data.

* (h) Notwithstanding any inconsistent provision of this section, commencing April first, nineteen hundred ninety-five:

(i) rates of payment for patients eligible for payments made by state governmental agencies shall be reduced by the commissioner to reflect an exclusion from reimbursable inpatient operating costs commencing April first, nineteen hundred ninety-five of the special additional inpatient operating costs determined and allocated among general hospitals in accordance with clause (C) of subparagraph (iii) and clause (C) of subparagraph (iv) of paragraph (e) of this subdivision and the factor of one quarter of one percent of general hospitals' reimbursable inpatient operating cost base allocated to costs of general hospitals for technology advances in accordance with subparagraph (i) of paragraph (e) of this subdivision; and

(ii) general hospitals may not request and the commissioner shall not consider any pending or further appeals for an adjustment to rates of payment based on costs associated with technology advances and changes in medical practice and such adjustments to reimbursable inpatient operating costs pursuant to clause (C) of subparagraph (iv) of paragraph (e) of this subdivision.

(iii) Notwithstanding the foregoing, or any other provision of this section, the commissioner may establish pass through payments, or other appropriate methodologies, for the period ending December thirty-first, two thousand three for innovative medical device advances for which the federal centers for medicare and medicaid services adopts new codes to the hospital inpatient prospective payment system prior to the federal food and drug administration's approval of such medical device.

* NB Expired March 31, 2011

(i) For the rate period July first, two thousand seven through March thirty-first, two thousand eight and for rates applicable to the state fiscal year commencing April first, two thousand eight, and each state fiscal year thereafter through March thirty-first, two thousand nine,

and for the period April first, two thousand nine through November thirtieth, two thousand nine, provided, however, that for the period April first, two thousand nine through November thirtieth, two thousand nine the aggregate rate adjustments calculated pursuant to subparagraph (ii) of this paragraph shall not exceed four million dollars, and contingent upon the availability of federal financial participation:

(i) The commissioner shall adjust inpatient medical assistance rates of payment calculated pursuant to this section for public hospitals other than non-state public hospitals located in a city with a population of more than one million persons, that meet the targeted medicaid discharge percentage in accordance with the methodology set forth in subparagraph (ii) of this paragraph. For purposes of this paragraph, "targeted medicaid discharge percentage" shall mean that at least seventeen and one-half percent of a public hospital's total discharges were patients eligible for payments under the medical assistance program pursuant to title eleven of article five of the social services law, including those enrolled in health maintenance organizations, and patients eligible for payments under the family health plus program pursuant to title eleven-D of article five of the social services law, based on data reported in such hospital's institutional cost report submitted for the two thousand four period and filed with the department by November first, two thousand six. Any hospital that meets the filing deadline shall have until June first, two thousand seven to submit revised and corrected data schedules in such institutional cost report which established eligibility for such adjusted rate.

(ii) The aggregate amount of rate adjustments calculated pursuant to this paragraph shall not exceed six million dollars for each rate period. Such amount shall be allocated proportionally based on the relative numbers of medicaid discharges among those public hospitals eligible for rate adjustments in accordance with subparagraph (i) of this paragraph based on each such hospital's reported medical assistance data specified in subparagraph (i) of this paragraph. Such amounts shall be included as an add-on to medical assistance inpatient rates of payment, excluding exempt unit rates, and shall not be reconciled to reflect changes in medical assistance utilization between two thousand four and the current rate year.

(j) For the rate period July first, two thousand seven through March thirty-first, two thousand eight and for rates applicable to the state fiscal year commencing April first, two thousand eight, and each state fiscal year thereafter through March thirty-first, two thousand nine and for the period April first, two thousand nine through November thirtieth, two thousand nine, provided, however, that for the period April first, two thousand nine through November thirtieth, two thousand nine the aggregate rate adjustments calculated pursuant to subparagraph (ii) of this paragraph shall not exceed twenty-eight million dollars, and contingent upon the availability of federal financial participation:

(i) The commissioner shall adjust inpatient medical assistance rates of payment calculated pursuant to this section for voluntary hospitals other than voluntary hospitals located in a city with a population of more than one million persons that meet the targeted medicaid discharge percentage in accordance with the methodology set forth in subparagraph (ii) of this paragraph. For purposes of this paragraph, "targeted Medicaid discharge percentage" shall mean between seventeen and one-half percent and thirty-five percent of a voluntary hospital's total discharges were patients eligible for payments under the medical assistance program pursuant to title eleven of article five of the social services law, including those enrolled in health maintenance organizations, and patients eligible for payments under the family health plus program pursuant to title eleven-D of article five of the social services law, based on data reported in such hospital's institutional cost report submitted for the two thousand four period and filed with the department by November first, two thousand six. Any hospital that meets the filing deadline shall have until June first, two thousand seven to submit revised and corrected data schedules in such institutional cost report which established eligibility for such adjusted rate.

(ii) The aggregate amount of rate adjustments calculated pursuant to this paragraph shall not exceed forty-two million dollars for each rate period. Such amount shall be allocated proportionally based on relative numbers of medicaid discharges among those voluntary hospitals eligible for rate adjustments in accordance with subparagraph (i) of this paragraph based on each such hospital's reported medical assistance data specified in subparagraph (i) of this paragraph. Such amounts shall be

included as an add-on to medical assistance inpatient rates of payment, excluding exempt unit rates, and shall not be reconciled to reflect changes in medical assistance utilization between two thousand four and the rate year.

(k) Subject to the availability of federal financial participation, the commissioner shall adjust inpatient rates of payment for non-public general hospitals located in a city with a population of more than one million persons for the following periods and in the following amounts in order to ensure meaningful access to the hospital's services and reasonable accommodation for all medicaid patients who require language assistance:

(i) for the period July first, two thousand seven through December thirty-first, two thousand seven, thirty-eight million dollars shall be allocated proportionally to such hospitals based on fifty percent of each such hospital's reported general clinic medicaid visits and fifty percent on each such hospital's reported medicaid inpatient discharges, as reported in each hospital's two thousand four institutional cost report, as submitted to the department prior to November first, two thousand six, to the total of all such general clinic visits reported by all such hospitals.

(ii) for the period April first, two thousand eight through March thirty-first, two thousand nine, and each state fiscal year thereafter through November thirtieth, two thousand nine, thirty-eight million dollars shall be allocated on an annualized basis for such purpose to such hospitals in accordance with the methodology set forth in subparagraph (i) of this paragraph, provided, however, that thirty percent of such funds shall be allocated proportionally, based on the number of foreign languages utilized by one or more percent of the residents in each hospital total service area population, provided, however, that for the period April first, two thousand nine through November thirtieth, two thousand nine, such allocation shall be reduced to twenty-five million three hundred thirty-three thousand dollars.

(l) Effective for periods on and after July first, two thousand seven through November thirtieth, two thousand nine:

(i) Subject to the availability of federal financial participation, the commissioner shall adjust inpatient medical assistance rates of payment calculated pursuant to this section for general hospitals

located in the counties of Nassau and Suffolk in accordance with the methodology set forth in subparagraph (ii) of this paragraph. For purposes of this paragraph, "medicaid inpatient discharges" shall mean the total number of such general hospital's discharges where the patients were eligible for payments under the medical assistance program pursuant to title eleven of article five of the social services law, including those enrolled in health maintenance organizations, and patients eligible for payments under the family health plus program pursuant to title eleven-D of article five of the social services law, based on data reported in such hospital's institutional cost report submitted for the two thousand four period and filed with the department by November first, two thousand six.

(ii) The amount of rate adjustments calculated pursuant to this paragraph shall not exceed five million dollars in the aggregate annually. Such amount shall be allocated proportionally based on the relative numbers of medicaid discharges among those general hospitals eligible for rate adjustments in accordance with subparagraph (i) of this paragraph based on each such hospital's reported medical assistance data specified in subparagraph (i) of this paragraph. Such amounts shall be included as an add-on to medical assistance inpatient rates of payment, excluding exempt unit rates, and shall not be reconciled to reflect changes in medical assistance utilization between two thousand four and the current rate year.

2. Special payment rate methodology agreements, negotiated rates. (a) Any payment rate methodology agreement negotiated between a self-insured and self-administered fund and a specific general hospital or its successor which was in effect on May first, nineteen hundred eighty-five shall be permitted to continue with such fund, or a self-insured and self-administered fund related in interest to such fund through merger, consolidation or corporate reorganization subsequent to May first, nineteen hundred eighty-five, as long as any revision to such methodology does not provide more of an economic advantage to the fund than the previous agreement. A general hospital which has any such agreement shall file with the commissioner information regarding each such agreement, as may be required by regulations adopted by the council and approved by the commissioner.

(b)(i) Nothing in this section shall prohibit the establishment of special payment rate methodologies in arrangements between general hospitals and health maintenance organizations operating in accordance with the provisions of article forty-three of the insurance law or article forty-four of this chapter, provided the commissioner has been notified of the proposed arrangement, has reviewed such proposed arrangement and has issued his written approval of the arrangement. The commissioner shall not approve such an arrangement if it would result in payments to a general hospital for inpatient services provided to subscribers of health maintenance organizations which in the aggregate are less than what otherwise would have been paid under the provisions of this section, unless the health maintenance organization demonstrates that such lower payments are justified because the arrangement will result in lower costs to the general hospital, and the payments approximate costs. Such arrangements may be approved by the commissioner to: integrate the medical delivery functions of the health maintenance organization with the medical delivery functions of the hospital, including but not limited to joint staffing arrangements or pre-admission testing arrangements; or integrate the method of payment and financial incentives to the hospital with the method of payment and financial incentives to physicians or other providers in the health maintenance organization; or integrate the method of payment and financial incentives to the hospital with the health maintenance organization, including, but not limited to, bed leasing or capitation payments. Notwithstanding any inconsistent provision of this section, for periods beginning on or after January first, nineteen hundred ninety-four, negotiated agreements between health maintenance organizations and general hospitals which were approved by the commissioner and which were in effect on December thirty-first, nineteen hundred ninety-three, may continue.

(ii) Notwithstanding any inconsistent provisions of this section, health maintenance organizations operating in accordance with the provisions of article forty-three of the insurance law or article forty-four of this chapter, having enrollees eligible for inpatient general hospital payments as beneficiaries of title XVIII of the federal social security act (medicare) shall reimburse general hospitals for inpatient services for these enrollees in accordance with the provisions

contained in title XVIII of the federal social security act (medicare).

(c) Special payment rate methodology agreements other than those permitted in accordance with the provisions of paragraphs (a) and (b) of this subdivision shall not be authorized, and no other arrangements with a general hospital for inpatient rates of payment other than those established in accordance with this section shall be negotiated.

* (d) Notwithstanding any inconsistent provision of law, the provisions of paragraphs (a), (b) and (c) of this subdivision shall not apply to payments for patients discharged on or after January first, nineteen hundred ninety-seven.

* NB Expires December 31, 2029

3. Diagnosis-related groups and weights. (a) The commissioner shall establish as a basis for case classification for case based rates of payment the same system of diagnosis-related groups for classification of hospital discharges as established for purposes of reimbursement of inpatient hospital service pursuant to title XVIII of the federal social security act (medicare) in effect on the first day of July in the year preceding the rate period. However, the council may adopt rules and regulations, subject to the approval of the commissioner, to adjust such diagnosis-related groups or establish additional diagnosis-related groups to reflect subsequent revisions applicable to reimbursement for discharges of beneficiaries of title XVIII of the federal social security act (medicare) effective subsequent to the first day of July in the year preceding the rate period, or to identify medically appropriate patterns of health resource use efficiently and economically provided. No such regulations, however, except those to reflect subsequent revisions applicable to reimbursement for discharges of beneficiaries of title XVIII of the federal social security act (medicare) or for changes made to diagnosis-related groups for neonatal services and services to acquired immune deficiency syndrome (AIDS) patients shall apply to the rate period beginning January first, nineteen hundred eighty-eight. For subsequent rate periods regulations other than those to reflect subsequent revisions applicable to reimbursement for discharges of beneficiaries of title XVIII of the federal social security act (medicare) may in addition apply to changes to the diagnosis-related groups for other services, including but not limited to, pediatric

services; provided, however, that psychiatric and rehabilitation services shall not be included.

Notwithstanding section one hundred twelve or one hundred seventy-four of the state finance law or any other law, rule or regulation to the contrary, the commissioner may contract with a vendor for nominal consideration to develop the specifications for the adjusted or additional diagnosis-related groups if the commissioner certifies to the comptroller that such contract is in the best interest of the health of the people of the state. Notwithstanding that such specifications shall be available pursuant to article six of the public officers law, such contract may provide that the specifications for such adjusted or additional diagnosis-related groups provided by the vendor shall be subject to copyright protection pursuant to federal copyright law.

(b) The methodology for assignment of patient discharges within diagnosis-related groups applicable for purposes of determining payments for discharges of beneficiaries of title XVIII of the federal social security act (medicare) in effect on the first day of July in the year preceding the rate period, revised to reflect such adjustments as may be made to the diagnosis-related group classification system pursuant to paragraph (a) of this subdivision, shall be applied to assign specific patient discharges within the diagnosis-related groups established pursuant to paragraph (a) of this subdivision. The council may adopt rules and regulations, subject to the approval of the commissioner, to revise the methodology for the assignment of specific patient discharges within the diagnosis-related groups to reflect revisions to the methodology applicable for purposes of determining payments for discharges of beneficiaries of title XVIII of the federal social security act (medicare) effective subsequent to the first day of July in the year preceding the rate period.

* (c) (i) The commissioner shall determine an appropriate weighting factor for each diagnosis-related group which reflects the relative general hospital resources used by all patients, other than beneficiaries of title XVIII of the federal social security act (medicare), with respect to discharges classified within that diagnosis-related group compared to discharges classified within other diagnosis-related groups. For rate periods during the period January

first, nineteen hundred eighty-eight through December thirty-first, nineteen hundred ninety, the appropriate weighting factor for each diagnosis-related group shall be determined using nineteen hundred eighty-five costs and statistics for a representative sample of general hospitals. For rate periods during the period January first, nineteen hundred ninety-one through December thirty-first, nineteen hundred ninety-three, the appropriate weighting factor for each diagnosis-related group shall be determined using nineteen hundred eighty-nine costs and statistics for a representative sample of general hospitals. For rate periods during the period January first, nineteen hundred ninety-four through December thirty-first, nineteen hundred ninety-nine and on and after January first, two thousand through December thirty-first, two thousand seven, the appropriate weighting factor for each diagnosis-related group shall be determined using nineteen hundred ninety-two costs and statistics for a representative sample of general hospitals. For rate periods on and after January first, two thousand eight, the appropriate weighting factor for each diagnosis-related group shall be determined using two thousand four costs and statistics for a representative sample of general hospitals, and, further, the computation of the group average arithmetic inlier length-of-stays for each diagnostic related group, as otherwise determined in accordance with applicable regulations, shall utilize two thousand four data as reported to the department, and, be based on a representative sample of general hospitals, and further, the short-stay and long-stay length-of-stay trimpoints, as otherwise determined in accordance with applicable regulations, shall be computed utilizing two thousand four data as reported to the department and based on a representative sample of general hospitals. Provided however, that if the department does not release updated data and documentation described in subparagraph (iii) of this paragraph, the effective rate period shall be April 1, 2008. Discharges and costs related to the exceptions to case payment provided in accordance with paragraphs (e), (g) and (i) of subdivision four of this section shall be eliminated from the costs and statistics used in determining the appropriate weighting factors, while the cost factor related to the exception provided in paragraph (h) of subdivision four of this section shall be eliminated. The costs and statistics for the case payment modifications calculated pursuant to

paragraphs (a), (b), (c) and (d) of subdivision four of this section shall be eliminated in accordance with paragraph (c) of subdivision six of this section. Costs related to education, physician, ambulance services and organ acquisition identified consistent with the provisions of paragraph (c) of subdivision seven of this section and costs related to malpractice insurance shall also be eliminated. The council may adopt rules and regulations, subject to the approval of the commissioner, to prospectively adjust weighting factors determined in accordance with this paragraph to reflect changes in medical technology. After the commissioner issues rate certifications pursuant to subdivision four of section twenty-eight hundred seven of this article the commissioner shall expeditiously make available for inspection by general hospitals and payors the data, consistent with appropriate department procedures for the release and protection of confidential data, and the methodology utilized to determine the appropriate weighting factors.

(ii) Notwithstanding any contrary provision of law, the case mix adjustment to the operating component of per diem rates of payment paid to general hospitals or units of general hospitals that are exempt from case based payments, as determined in accordance with subdivision four of this section and as otherwise computed in accordance with applicable regulations, shall, for periods on and after January first, two thousand eight, be computed utilizing the diagnosis-related group classification system in effect for the rate year for inpatient case based medicaid rates of payment and the related per day cost weights calculated using two thousand four data as reported to the department and based on a representative sample of general hospitals. For rate periods on and after the two thousand eleven rate period, such case mix adjustment shall utilize the same base period data as determined in accordance with paragraph (e) of this subdivision.

(iii) The department shall, by no later than June first, two thousand seven, make available to hospital industry representatives relevant updated data and documentation that the department will utilize, in accordance with this paragraph, in developing appropriate service intensity weights for each diagnosis-related group for the two thousand eight rate period. The department will thereafter consult with hospital industry representatives in developing regulations to implement the utilization of such updated service intensity weight data applicable to

rate periods on and after two thousand eight. If it is deemed appropriate by the commissioner, in consultation with hospital industry representatives, such regulations may provide for the phase-in over a period of time of the application of such updated data in determining Medicaid rates on and after two thousand eight, provided, however, that the application of such updated data shall be fully reflected in such rates by no later than January first, two thousand ten.

(iv) By no later than December first, two thousand seven, the commissioner shall issue a report to the governor and the legislature describing the updated data utilization applicable, in accordance with the provisions of this paragraph, to periods on and after two thousand eight and setting forth the factors considered in developing it.

* NB Effective until December 31, 2029

* (c) The commissioner shall determine an appropriate weighting factor for each diagnosis-related group which reflects the relative general hospital resources used by all patients, other than beneficiaries of title XVIII of the federal social security act (medicare), with respect to discharges classified within that diagnosis-related group compared to discharges classified within other diagnosis-related groups. For rate periods during the period January first, nineteen hundred eighty-eight through December thirty-first, nineteen hundred ninety, the appropriate weighting factor for each diagnosis-related group shall be determined using nineteen hundred eighty-five costs and statistics for a representative sample of general hospitals. For rate periods during the period January first, nineteen hundred ninety-one through December thirty-first, nineteen hundred ninety-three, the appropriate weighting factor for each diagnosis-related group shall be determined using nineteen hundred eighty-nine costs and statistics for a representative sample of general hospitals. For rate periods during the period January first, nineteen hundred ninety-four through June thirtieth, nineteen hundred ninety-six, the appropriate weighting factor for each diagnosis-related group shall be determined using nineteen hundred ninety-two costs and statistics for a representative sample of general hospitals. Discharges and costs related to the exceptions to case payment provided in accordance with paragraphs (e), (g) and (i) of subdivision four of this section shall be eliminated from the costs and statistics used in determining the appropriate weighting factors, while

the cost factor related to the exception provided in paragraph (h) of subdivision four of this section shall be eliminated. The costs and statistics for the case payment modifications calculated pursuant to paragraphs (a), (b), (c) and (d) of subdivision four of this section shall be eliminated in accordance with paragraph (c) of subdivision six of this section. Costs related to education, physician, ambulance services and organ acquisition identified consistent with the provisions of paragraph (c) of subdivision seven of this section and costs related to malpractice insurance shall also be eliminated. The council may adopt rules and regulations, subject to the approval of the commissioner, to prospectively adjust weighting factors determined in accordance with this paragraph to reflect changes in medical technology. After the commissioner issues rate certifications pursuant to subdivision four of section twenty-eight hundred seven of this chapter the commissioner shall expeditiously make available for inspection by general hospitals and payors the data, consistent with appropriate department procedures for the release and protection of confidential data, and the methodology utilized to determine the appropriate weighting factors.

* NB Effective December 31, 2029

(d) The commissioner shall consult with technical advisory groups as necessary in establishing diagnosis-related groups and weights in accordance with paragraphs (a), (b) and (c) of this subdivision and in making adjustments in accordance with paragraphs (b) and (c) of subdivision six of this section.

(e) The appropriate weighting factor for each diagnosis-related group, the group average arithmetic inlier length-of-stays for each diagnosis-related group, and the short-stay and long-stay length-of-stay trimpoints shall, by no later than the two thousand eleven rate period, be based on reported costs and statistics from a representative sample of general hospitals from a base period no earlier than two thousand seven. Thereafter, the base period reported costs and statistics utilized for such purposes shall be updated no less frequently than every four years and the new base periods utilized shall be no more than four years prior to the applicable rate period.

3-a. Dispute resolution system. (a) * The commissioner shall establish, in accordance with rules and regulations adopted by the

council and approved by the commissioner, a payment dispute resolution system to resolve disputes between payors of inpatient hospital services and general hospitals for patients discharged on or after January first, nineteen hundred ninety-one and prior to January first, nineteen hundred ninety-seven. The commissioner shall designate the use of a uniform set of guidelines for determining the application of particular diagnosis-related group categories to particular patients which may include guidelines published by associations, universities or other organizations. The dispute resolution process shall apply to all payors of hospital services described in paragraphs (a), (b) and (c) of subdivision one of this section, including patients or payors which pay hospitals' charges or coinsurance, provided, however, such process shall not include payments made for persons eligible for payments as beneficiaries of title XVIII of the federal social security act (medicare) as a patients' primary payor or payments made pursuant to title eleven of article five of the social services law, provided that this exception shall not include payments for medical assistance participants in health maintenance organizations or prepaid health services plans. A payor of hospital services included in paragraph (a) of subdivision one of this section may serve as, or designate, the review agent for their subscribers, beneficiaries or enrolled members for an initial review and a reconsideration review but the final step in such dispute resolution process shall be an independent party unrelated to the payor which party shall be approved by the commissioner pursuant to this section.

* NB Effective until December 31, 2029

* The commissioner shall establish, in accordance with rules and regulations adopted by the council and approved by the commissioner, a payment dispute resolution system to resolve disputes between payors of inpatient hospital services and general hospitals for patients discharged on or after January first, nineteen hundred ninety-one. The commissioner shall designate the use of a uniform set of guidelines for determining the application of particular diagnosis-related group categories to particular patients which may include guidelines published by associations, universities or other organizations. The dispute resolution process shall apply to all payors of hospital services described in paragraphs (a), (b) and (c) of subdivision one of this

section, including patients or payors which pay hospitals' charges or coinsurance, provided, however, such process shall not include payments made for persons eligible for payments as beneficiaries of title XVIII of the federal social security act (medicare) as a patients' primary payor or payments made pursuant to title eleven of article five of the social services law, provided that this exception shall not include payments for medical assistance participants in health maintenance organizations or prepaid health services plans. A payor of hospital services included in paragraph (a) of subdivision one of this section may serve as, or designate, the review agent for their subscribers, beneficiaries or enrolled members for an initial review and a reconsideration review but the final step in such dispute resolution process shall be an independent party unrelated to the payor which party shall be approved by the commissioner pursuant to this section.

* NB Effective December 31, 2029

In the event a third party payor or patient desires to challenge the appropriateness of a bill for hospital services rendered by a general hospital for a particular patient, or in the event a general hospital desires to challenge the appropriateness of a payment by a third party payor on behalf of a particular patient, then either the hospital or the payor may submit the question to the dispute resolution process established pursuant to this subdivision. The disputes submitted for resolution may include the appropriateness of the application of a particular diagnosis-related group category, as described in subdivision three of this section, to a particular patient; the appropriate classification and payment of an inpatient stay as a modification of a case payment pursuant to paragraph (a), (b), (c), or (d) of subdivision four of this section, including whether payment for services should be, based on medical necessity or other reasons, made as a case payment or payment as a modification of a case payment; whether payment should appropriately be made pursuant to an alternative reimbursement methodology authorized in accordance with paragraph (e) or (h) of subdivision four of this section and the payment for such services; whether payment for services rendered by a general hospital should be appropriately, based on medical necessity or other reasons, made as payment for inpatient care or payment for outpatient care and the

payment for such services; or whether the hospital stay should be classified as a readmission as defined in accordance with regulations adopted pursuant to paragraph (l) of subdivision eleven of this section and the payment for such stay.

The dispute resolution system established shall provide for an initial review and a reconsideration review. The council shall adopt necessary rules and regulations, subject to the approval of the commissioner, including but not limited to those for determining the parties to a dispute resolution review and any reconsideration review; the procedures and time limits to initiate a dispute resolution review or any reconsideration review; the procedures for notification of all parties involved in the dispute upon initiation of a dispute resolution review or any reconsideration review; time limits for resolving disputes; the establishment of dispute resolution and reconsideration fees; and required documents to be submitted including the hospital bill in dispute, a copy of the patient medical record, or so much thereof as may be required, and a statement of issues including the basis for the dispute. During a dispute resolution review or any reconsideration review, a party may present documentation or evidence in support of its position regarding the appropriate diagnosis-related group to which the patient discharge should be assigned or the proper payment for the case. The commissioner shall approve a statewide utilization review organization or regional utilization review organization to conduct and determine such dispute resolution reviews including any reconsideration reviews in accordance with paragraph (b) of this subdivision. Every general hospital bill issued for a patient discharged on or after January first, nineteen hundred ninety-one other than for discharges of patients eligible for medical assistance pursuant to title eleven of article five of the social services law subject to case based payments determined pursuant to this section based on diagnosis-related group assigned or maximum hospital charges for a case determined pursuant to this section based on diagnosis-related group assigned shall include or be accompanied by a notice of the payment dispute resolution system; provided, however, that a general hospital issuing bills to a payor for twenty-five or more patients per year may send such notice to such payor on an annual basis. The form and content of such notice shall be

determined in accordance with rules and regulations adopted by the council and approved by the commissioner.

(b) The commissioner shall approve a statewide utilization review organization or regional utilization review organizations to conduct and determine dispute resolution reviews, including reconsideration reviews, pursuant to this subdivision. To be approved as a utilization review organization in accordance with this subdivision such organization must meet the following criteria: the organization shall employ or otherwise secure the services of adequate personnel, including medical personnel, qualified to review such disputes, the organization shall demonstrate the ability to render decisions in a timely manner, the organization shall agree to provide ready access by the commissioner to all data, records and information it collects and maintains concerning its review activities under this subdivision, the organization shall agree to provide to the commissioner such data, information and reports as the commissioner determines necessary to evaluate the review process provided pursuant to this subdivision, the organization shall provide assurances that review personnel shall not have a conflict of interest in conducting a review based on payor, hospital or professional affiliation, and the organization meets such other performance and efficiency criteria regarding the conduct of reviews pursuant to this subdivision established by the commissioner. The commissioner may withdraw approval of a utilization review organization where such organization fails to continue to meet approval criteria established pursuant to this paragraph. A utilization review organization approved pursuant to this paragraph shall be authorized to receive and review patient medical records and shall develop and implement appropriate procedures to maintain confidentiality of such patient medical records.

(c) Upon resolution of a payment dispute in accordance with this paragraph, the parties involved in the dispute shall be notified of the reason for the decision and the hospital bill in dispute shall be adjusted to reflect such resolution.

(d) The party initiating a payment dispute resolution review or any reconsideration review must submit to the utilization review organization a dispute resolution fee established to recover the costs related to the conduct of the initial dispute resolution reviews or a reconsideration review fee established to recover the costs related to

the conduct of such reconsideration reviews, except that for payors in paragraph (a) of subdivision one of this section which serve as or designate the review agent for their subscribers, beneficiaries, or enrolled members a fee shall be charged only for the final step in the dispute resolution process. Upon resolution of a payment dispute in accordance with this subdivision in favor of the payor, the amount due to the hospital by a payor based upon the hospital bill shall be reduced by the amount of any fee paid pursuant to this paragraph by such payor. Upon resolution of a payment dispute in accordance with this subdivision in favor of the general hospital, the amount due to the hospital based upon the hospital bill shall be increased by the amount of any fee paid pursuant to this paragraph by such general hospital.

(e) Nothing herein shall relieve the responsibilities of the payors as set forth in paragraphs (a), (b) and (c) of subdivision one of this section.

(f)(i) Whenever the amount of payment made by a payor to a general hospital is less than the amount of payment due determined by a utilization review organization in accordance with this subdivision, general hospitals in accordance with paragraph (d) of subdivision eleven of this section may include financing or working capital charges on such balance owed to the general hospital by a payor.

(ii) Whenever the amount of payment made by a payor to a general hospital is in excess of the amount of payment due determined by a utilization review organization in accordance with this subdivision, interest shall be due on such excess owed by the general hospital to a payor of two percent for the first thirty days and one percent per month thereafter from the date of payment of such excess amount. Interest shall not be applied to excess amounts owed to third party payors participating in an advance payment system.

(g) For payment amounts eligible for payment dispute resolution pursuant to this subdivision, a general hospital shall not bill a patient or pursue collection efforts against a patient for the difference between a hospital bill and the payment made on such bill by a payor within the payor categories specified in paragraph (a), (b) or (c) of subdivision one of this section, except for uncovered services by a payor, deductibles and coinsurance based on maximum hospital charges calculated based on the undisputed amount of the hospital bill, until

final decision of the utilization review organization. Nothing in this subdivision shall be construed to prohibit a general hospital from issuing an informational bill to a patient regarding such difference between the hospital bill and the payment made on such bill to advise the patient of the amount in dispute.

(h) The formal written decision of a utilization review organization approved by the commissioner to conduct and determine dispute resolution reviews in accordance with paragraph (b) of this subdivision upon a reconsideration review, or if there is no reconsideration review upon an initial review, or for a payor of hospital services included in paragraph (a) of subdivision one of this section which serves as or designates the review agent for their subscribers, beneficiaries or enrolled members upon the final step in the dispute resolution process as to the questions of the appropriateness of a bill for hospital services or the calculation of the proper payment for such hospital services shall be admissible in evidence at any subsequent trial upon the request of any party to the action. The decision shall not be binding upon the jury or, in a case tried without a jury, upon the trial court, but shall be considered prima facie evidence to establish the facts resolved by the utilization review organization.

4. Modifications and exceptions to case payment rates. Case based rates of payment shall be modified and per diem or other unit of service payments shall be provided, or exceptions shall be made to case payments, in accordance with rules and regulations adopted by the council and approved by the commissioner, in the following circumstances:

(a) where a case that is eligible for payment under the case based payment system is transferred between general hospitals, the receiving hospital shall be reimbursed its total case payment amount for the diagnosis-related group (including any payments made in accordance with this subdivision), and the transferring hospital shall receive reimbursement on a basis consistent with the methodology developed for the elimination of transfer patient costs in accordance with subparagraph (i) of paragraph (c) of subdivision six of this section plus additions contained in subparagraph (ii) of paragraph (a) of subdivision one of this section on a per diem basis. The payment to a

transferring general hospital shall not exceed the case payment amount for the diagnosis-related group computed in accordance with this section;

(b) where the cost per case for a patient that does not qualify for payment pursuant to paragraph (a) or (d) of this subdivision is in excess of the basic case payment rate for the diagnosis-related group multiplied by two and the overall hospital-specific average cost per case multiplied by six, the payment to the general hospital in addition to the basic case payment rate will be one hundred percent, or such percentage as computed in accordance with subparagraph (ii) of paragraph (c) of subdivision six of this section, multiplied by the difference between the general hospital's cost for the case and the greater of the basic case payment rate for the diagnosis-related group multiplied by two or the overall hospital-specific cost per case multiplied by six. In determining whether a case qualifies for payment under this paragraph, prospective rate adjustments made in accordance with paragraph (c) of subdivision eleven of this section to reflect the retroactive impact of an adjustment on prior rates, shall be excluded. Where a case qualifies for payment pursuant to both this paragraph and paragraph (c) of this subdivision then payment shall be made in accordance with this paragraph if such payment exceeds that which would be made in accordance with paragraph (c) of this subdivision. The general hospital's costs per case shall be computed by adjusting the general hospital's actual charges for the case by the general hospital's inpatient cost to charge ratio;

(c) where a patient is identified as a long stay patient, payment to the general hospital in addition to the basic case payment rate shall be on a basis consistent with the methodology developed for the elimination of long stay patient costs in accordance with subparagraph (iii) of paragraph (c) of subdivision six of this section. Where a case qualifies for payment pursuant to both this paragraph and paragraph (b) of this subdivision then payment shall be made in accordance with paragraph (b) of this subdivision if such payment exceeds that which would be made in accordance with this paragraph. A long stay patient is defined as an inpatient whose hospital stay exceeds the long stay outlier threshold for the diagnosis-related group;

(d) where a patient is identified as a short stay patient, payment to the general hospital shall be on a basis consistent with the methodology

developed for the elimination of short stay patient costs in accordance with subparagraph (iv) of paragraph (c) of subdivision six of this section plus additions contained in subparagraph (ii) of paragraph (a) of subdivision one of this section on a per diem basis. A short stay patient is defined as an inpatient discharged from the hospital on the same day of admission, or the day after admission except for those stays where the statewide mean length of stay for the diagnosis-related group is less than three days, or whose hospital stay is not greater than twenty percent of the statewide mean length of stay for the diagnosis-related group with which the patient is identified, excluding normal newborn cases and normal deliveries;

(e) in cases where a general hospital or distinct unit of a general hospital is not or would not have been reimbursed on a case based payment per diagnosis-related group for inpatient services provided on or before December thirty-first, two thousand one, to beneficiaries of title XVIII of the federal social security act (medicare), reimbursement shall be on a per diem basis computed for excluded general hospitals based on the hospital's reimbursable inpatient operating cost base, or for excluded distinct units of general hospitals based on the distinct unit's reimbursable inpatient operating cost base, determined in accordance with paragraph (d) of subdivision one of this section, projected to the applicable rate period by the trend factor determined in accordance with subdivision ten of this section, and increased in accordance with subparagraphs (i), (iii) and (iv) of paragraph (e) of subdivision one of this section to reflect special additional inpatient operating costs, and adjusted to exclude a factor for operating costs of patients who required an alternate level of care developed consistent with the provisions of paragraph (h) of this subdivision, and increased for excluded general hospitals to reflect the product of the group category percentage amount applicable for purposes of determining group category average inpatient reimbursable operating cost per discharge (price) in the rate period pursuant to paragraph (b) of subdivision five of this section for general hospitals reimbursed on a case based payment per diagnosis-related group applied to such excluded general hospital's additional cost increases determined in accordance with subparagraph (ii) of paragraph (e) of subdivision one of this section, and adjusted on a payor category basis to reflect allocation of malpractice insurance

costs in accordance with the methodology developed pursuant to subparagraph (ii) of paragraph (h) of subdivision eleven of this section, for those patients included in the payor categories pursuant to the provisions of paragraph (a) or (b) of subdivision one of this section; provided, however, for those patients included in the payor categories pursuant to the provisions of paragraph (b) of subdivision one of this section payment shall be at the per diem payment to the hospital or distinct unit of the hospital for services provided to subscribers of corporations organized and operating in accordance with article forty-three of the insurance law, adjusted for uncovered services, and increased by thirteen percent or by five percent, as the case may be; provided further, however, for those general hospitals that are not reimbursed on a case-based payment per diagnosis-related group for inpatient services provided to beneficiaries of title XVIII of the federal social security act (medicare) as a result of their designation by the secretary of health and human services as a comprehensive cancer hospital or as a result of their status as an acute care exempt children's hospital, the base year for determining payments for services in such facilities shall be nineteen hundred eighty-seven, provided, however, such hospitals shall be allowed adjustments in rates of payment to reflect costs incurred subsequent to nineteen hundred eighty-seven but not reflected in such base. Funds received by a general hospital based on the payment differential in accordance with paragraph (b) of subdivision one of this section applied pursuant to this paragraph shall be hospital funds for patient care purposes. For those patients not covered under the provisions of paragraph (a) or (b) of subdivision one of this section, or who are not covered under the provisions of paragraph (a) of subdivision two of this section, payment shall be on the basis of the hospital's charge schedule, limited to one hundred twenty percent of the total per diem payment that would have been made if the patient were included in the payor categories pursuant to the provisions of paragraph (b) of subdivision one of this section. Rates of payment for excluded general hospitals and excluded distinct units of general hospitals for a rate period shall be increased on a per diem basis by additions and allowances specified in subparagraphs (ii) and (iii) of paragraph (a) of subdivision one of this section. In adopting regulations for purposes of determining rates of payment for psychiatric

services pursuant to this paragraph, the council and the commissioner shall consider the advice of the commissioner of mental health and may include case mix and other adjustments for such rates of payment. The commissioner of mental health shall study and report on alternative procedures for the development of rates of payment for inpatient psychiatric care. Such report shall be submitted to the governor, the legislature and the commissioner of health by January first, nineteen hundred ninety-three. Recommendations for alternative financing shall take into consideration methods to improve access to inpatient care for seriously mentally ill persons.

(e-1) Notwithstanding any inconsistent provision of paragraph (e) of this subdivision or any other contrary provision of law and subject to the availability of federal financial participation, per diem rates of payment by governmental agencies for a general hospital or a distinct unit of a general hospital for inpatient psychiatric services that would otherwise be subject to the provisions of paragraph (e) of this subdivision shall, with regard to days of service associated with admissions occurring on and after April first, two thousand ten, be in accordance with the following:

(i) For rate periods on or after April first, two thousand ten, the commissioner, in consultation with the commissioner of the office of mental health, shall promulgate regulations, and may promulgate emergency regulations, establishing methodologies for determining the operating cost components of rates of payments for services described in this paragraph. The commissioner may make such adjustments to the methodology for computing such rates as is necessary to achieve no aggregate, net growth in overall Medicaid expenditures related to such rates, as compared to such aggregate expenditures from the prior year. In determining the updated base year to be utilized pursuant to this subparagraph, the commissioner shall take into account the base year determined in accordance with paragraph (c) of subdivision thirty-five of this section.

Furthermore, the commissioner shall establish such rates in consultation with industry representatives to achieve an appropriate base year update to the operating cost components of rates of payment for services described in this paragraph and that takes into account

facility cost, mix of services, and patient specific conditions.

(ii) Rates of payment established pursuant to subparagraph (i) of this paragraph shall reflect an aggregate net statewide increase in reimbursement for such services of up to twenty-five million dollars on an annual basis.

(iii) Capital cost reimbursement for general hospitals otherwise subject to the provisions of this paragraph shall remain subject to the provisions of subdivision eight of this section.

(e-2) Notwithstanding any inconsistent provision of paragraph (e) of this subdivision or any other contrary provision of law and subject to the availability of federal financial participation, per diem rates of payment by governmental agencies for inpatient services provided by a general hospital or a distinct unit of a general hospital for services, as described below, that would otherwise be subject to the provisions of paragraph (e) of this subdivision, shall, with regard to days of service occurring on and after December first, two thousand nine, be in accord with the following:

(i) For physical medical rehabilitation services and for chemical dependency rehabilitation services, the operating cost component of such rates shall reflect the use of two thousand five operating costs for each respective category of services as reported by each facility to the department prior to July first, two thousand nine and as adjusted for inflation pursuant to paragraph (c) of subdivision ten of this section, as otherwise modified by any applicable statute, provided, however, that such two thousand five reported operating costs, but not including reported direct medical education cost, shall, for rate-setting purposes, be held to a ceiling of one hundred ten percent of the average of such reported costs in the region in which the facility is located, as determined pursuant to clause (E) of subparagraph (iv) of paragraph (1) of this subdivision; and provided, further, that for physical medical rehabilitation services, the commissioner is authorized to make adjustments to such rates for the purposes of reimbursing pediatric ventilator services.

(ii) For services provided by rural hospitals designated as critical access hospitals in accordance with title XVIII of the federal social security act, the operating cost component of such rates shall reflect the use of two thousand five operating costs as reported by each

facility to the department prior to July first, two thousand nine and as adjusted for inflation pursuant to paragraph (c) of subdivision ten of this section, as otherwise modified by any applicable statutes, provided, however, that such two thousand five reported operating costs shall, for rate-setting purposes, be held to a ceiling of one hundred ten percent of the average of such reported costs for all such designated hospitals statewide.

(iii) For inpatient services provided by specialty long term acute care hospitals and for inpatient services provided by cancer hospitals as so designated as of December thirty-first, two thousand eight, the operating cost component of such rates shall reflect the use of two thousand five operating costs for each respective category of facility as reported by each facility to the department prior to July first, two thousand nine and as adjusted for inflation pursuant to paragraph (c) of subdivision ten of this section, as otherwise modified by any applicable statutes.

(iv) For facilities designated by the federal department of health and human services as exempt acute care children's hospitals as of December thirty-first, two thousand eight, for which a discrete institutional cost report was filed for the two thousand seven calendar year, and which has reported Medicaid discharges greater than fifty percent of total discharges in such cost report, shall be determined in accordance with the following:

(A) The operating cost component of such rates shall reflect the use of two thousand seven operating costs as reported by each facility to the department prior to July first, two thousand nine and as adjusted for the inflation pursuant to paragraph (c) of subdivision ten of this section, as otherwise modified by any applicable statutes, and as further adjusted as the commissioner deems appropriate, including transition adjustments. Such rates shall be determined on a per case basis or per diem basis, as set forth in regulations promulgated by the commissioner.

(B) The operating component of outpatient specialty rates of hospitals subject to this subparagraph shall reflect the use of two thousand seven operating costs as reported to the department prior to December first, two thousand eight, and shall include such adjustments as the commissioner deems appropriate.

(C) The base period reported operating costs used to establish inpatient and outpatient rates determined pursuant to this subparagraph shall be updated no less frequently than every two years and each such hospital shall submit such additional data as the commissioner may require to assist in the development of ambulatory patient groups (APGs) rates for such hospitals' outpatient specialty services.

(D) Notwithstanding any other provisions of law to the contrary and subject to the availability of federal financial participation, for all rate periods on and after April first, two thousand fourteen, the operating component of outpatient specialty rates of hospitals subject to this subparagraph shall be determined by the commissioner pursuant to regulations, including emergency regulations, and in consultation with such specialty outpatient facilities, provided however, that for the period beginning October first, two thousand thirteen through September thirtieth, two thousand fourteen, services provided to patients enrolled in medicaid managed care shall be paid by the medicaid managed care plans at no less than the otherwise applicable medicaid fee-for-service rates, as computed in accordance with clause (B) of this subparagraph for the period beginning October first, two thousand thirteen through March thirty-first, two thousand fourteen and as computed in accordance with this clause for the period beginning April first, two thousand fourteen through September thirtieth, two thousand fourteen.

(E) For facilities subject to the provisions of this subparagraph, the department shall examine the feasibility of reimbursing such facilities for services provided to children eligible for medical assistance on a non-fee-for-service basis. For purposes of this clause, "non-fee-for-service" shall be defined as an alternative payment method to bundle certain services rendered by such facility, including inpatient, outpatient, specialty outpatient and physician services, in amounts determined by the commissioner. The department shall examine:

(a) what services could be provided pursuant to the non-fee-for-service basis;

(b) how to ensure, for children enrolled in Medicaid managed care, that their health plans can continue to assist in the coordination of their care, particularly upon discharge from inpatient, outpatient or specialty outpatient services; and

(c) whether incentives should be incorporated for meeting quality

benchmarks or achieving efficiencies in the delivery and coordination of care or whether other means should be considered to achieve these objectives.

The department shall provide a report of its findings and recommendations to the governor and legislature no later than March first, two thousand fifteen.

(v) Rates established pursuant to this paragraph shall be deemed as excluding reimbursement for physician services for inpatient services and claims for Medicaid fee payments for such physician services for such inpatient care may be submitted separately from the rate in accordance with otherwise applicable law.

(vi) Capital cost reimbursement for general hospitals otherwise subject to the provisions of this paragraph shall remain subject to the provisions of subdivision eight of this section.

(vii) The commissioner may promulgate regulations, including emergency regulations, implementing the provisions of this paragraph, and, further, such regulations may provide for an update of the base year costs and statistics used to compute such rates, provided, however, that such base year update shall take effect no earlier than April first, two thousand fifteen, and provided further, however, that the commissioner may make such adjustments to such utilization and to the methodology for computing such rates as is necessary to achieve no aggregate, net growth in overall Medicaid expenditures related to such rates, as compared to such aggregate expenditures from the prior year. In determining the updated base year to be utilized pursuant to this subparagraph, the commissioner shall take into account the base year determined in accordance with paragraph (c) of subdivision thirty-five of this section.

(viii) The operating cost component of rates of payment pursuant to this paragraph for a general hospital or distinct unit of a general hospital without adequate cost experience shall be based on the lower of the facility's or unit's inpatient budgeted operating costs per day, adjusted to actual, or the applicable regional ceiling, if any.

(ix) The operating cost component of inpatient medicaid rates subject to subparagraphs (i), (ii) and (iii) of this paragraph shall, with regard to alternative level of care (ALC) days of care be subject to

computation pursuant to paragraph (h) of this subdivision.

* (f) where a general hospital having two hundred or less certified acute care beds, based on the total number of inpatient acute care beds for which such general hospital is certified pursuant to the operating certificate issued for such general hospital in accordance with section twenty-eight hundred five of this article in effect on June thirtieth, nineteen hundred ninety, is classified as a rural hospital for purposes of determining payment for inpatient services provided to beneficiaries of title XVIII of the federal social security act (medicare) or under state regulations, such general hospital may at its option have its reimbursable inpatient operating cost component of case based rates of payment per diagnosis-related group based one hundred percent on the general hospital's hospital-specific average reimbursable inpatient operating cost per discharge determined in accordance with subdivision six of this section; provided however, commencing April first, nineteen hundred ninety-six the reimbursable inpatient operating cost component of case based rates of payment per diagnosis-related group for patients eligible for payments made by state governmental agencies shall be reduced by five percent to encourage improved productivity and efficiency. Such election shall not alter the calculation of the group price component calculated pursuant to subparagraph (i) of paragraph (a) of subdivision seven of this section;

* NB There are 2 par. (f)'s

* (f) where a general hospital having two hundred or less certified acute care beds, based on the total number of inpatient acute care beds for which such general hospital is certified pursuant to the operating certificate issued for such general hospital in accordance with section twenty-eight hundred five of this article in effect on June thirtieth, nineteen hundred ninety, is classified as a rural hospital for purposes of determining payment for inpatient services provided to beneficiaries of title XVIII of the federal social security act (medicare) or under state regulations, such general hospital may at its option have its reimbursable inpatient operating cost component of case based rates of payment per diagnosis-related group based one hundred percent on the general hospital's hospital-specific average reimbursable inpatient operating cost per discharge determined in accordance with subdivision six of this section; provided however,

(i) commencing April first, nineteen hundred ninety-six through July thirty-first, nineteen hundred ninety-six, the reimbursable inpatient operating cost component of case based rates of payment per diagnosis-related group, excluding any operating cost components related to direct and indirect expenses of graduate medical education, for patients eligible for payments made by state governmental agencies shall be reduced by five percent; and

(ii) commencing August first, nineteen hundred ninety-six through March thirty-first, nineteen hundred ninety-seven, the reimbursable inpatient operating cost component of case based rates of payment per diagnosis-related group, excluding any operating cost components related to direct and indirect expenses of graduate medical education, for patients eligible for payments made by state governmental agencies shall be reduced by two and five-tenths percent; and

(iii) commencing April first, nineteen hundred ninety-seven through March thirty-first, nineteen hundred ninety-nine and commencing July first, nineteen hundred ninety-nine through March thirty-first, two thousand and April first, two thousand through March thirty-first, two thousand five and for periods commencing April first, two thousand five through March thirty-first, two thousand six and for periods commencing on and after April first, two thousand six through March thirty-first, two thousand seven, and for periods commencing on and after April first, two thousand seven through March thirty-first, two thousand nine, and for periods commencing on and after April first, two thousand nine through March thirty-first, two thousand eleven, the reimbursable inpatient operating cost component of case based rates of payment per diagnosis-related group, excluding any operating cost components related to direct and indirect expenses of graduate medical education, for patients eligible for payments made by state governmental agencies shall be reduced by three and thirty-three hundredths percent to encourage improved productivity and efficiency. Such election shall not alter the calculation of the group price component calculated pursuant to subparagraph (i) of paragraph (a) of subdivision seven of this section;

* NB Effective until December 31, 2029

* (f) where a general hospital having two hundred or less certified acute care beds, based on the total number of inpatient acute care beds for which such general hospital is certified pursuant to the operating

certificate issued for such general hospital in accordance with section twenty-eight hundred five of this article in effect on June thirtieth, nineteen hundred ninety, is classified as a rural hospital for purposes of determining payment for inpatient services provided to beneficiaries of title XVIII of the federal social security act (medicare) or under state regulations, such general hospital may at its option have its reimbursable inpatient operating cost component of case based rates of payment per diagnosis-related group based one hundred percent on the general hospital's hospital-specific average reimbursable inpatient operating cost per discharge determined in accordance with subdivision six of this section; provided however,

(i) commencing April first, nineteen hundred ninety-six through July thirty-first, nineteen hundred ninety-six, the reimbursable inpatient operating cost component of case based rates of payment per diagnosis-related group, excluding any operating cost components related to direct and indirect expenses of graduate medical education, for patients eligible for payments made by state governmental agencies shall be reduced by five percent; and

(ii) commencing August first, nineteen hundred ninety-six through March thirty-first, nineteen hundred ninety-seven, the reimbursable inpatient operating cost component of case based rates of payment per diagnosis-related group, excluding any operating cost components related to direct and indirect expenses of graduate medical education, for patients eligible for payments made by state governmental agencies shall be reduced by two and five-tenths percent; and

(iii) commencing April first, nineteen hundred ninety-seven through March thirty-first, nineteen hundred ninety-nine and commencing July first, nineteen hundred ninety-nine through March thirty-first, two thousand, the reimbursable inpatient operating cost component of case based rates of payment per diagnosis-related group, excluding any operating cost components related to direct and indirect expenses of graduate medical education, for patients eligible for payments made by state governmental agencies shall be reduced by three and thirty-three hundredths percent to encourage improved productivity and efficiency. Such election shall not alter the calculation of the group price component calculated pursuant to subparagraph (i) of paragraph (a) of subdivision seven of this section;

* NB Effective and expires December 31, 2029

* (f) where a general hospital having two hundred or less certified acute care beds, based on the total number of inpatient acute care beds for which such general hospital is certified pursuant to the operating certificate issued for such general hospital in accordance with section twenty-eight hundred five of this article in effect on June thirtieth, nineteen hundred ninety, is classified as a rural hospital for purposes of determining payment for inpatient services provided to beneficiaries of title XVIII of the federal social security act (medicare) or under state regulations, such general hospital may at its option have its reimbursable inpatient operating cost component of case based rates of payment per diagnosis-related group based one hundred percent on the general hospital's hospital-specific average reimbursable inpatient operating cost per discharge determined in accordance with subdivision six of this section. Such election shall not alter the calculation of the group price component calculated pursuant to subparagraph (i) of paragraph (a) of subdivision seven of this section;

* NB Effective December 31, 2029

* NB There are 2 par (f)'s

(g) in cases where general hospitals or distinct units of general hospitals, other than those specified in paragraphs (e) and (f) of this subdivision, may be excluded from case based payments or receive an adjustment to case based payment rates. An exclusion or adjustment shall be provided only where the council, subject to the approval of the commissioner, determines that the case based rates of payment determined in accordance with this section would not reflect medically appropriate patterns of health resource use for such general hospital services efficiently and economically provided. If an exclusion is provided, then the reimbursement provisions contained in paragraph (e) of this subdivision shall apply. The commissioner shall provide to the council an analysis of the effect of case based payments on rural general hospitals and the council, subject to the above criteria and the approval of the commissioner, may exclude for any of the annual rate periods beginning on or after January first, nineteen hundred eighty-eight any of these general hospitals from case based payments or provide an adjustment to the case based payments in addition to that authorized in accordance with paragraph (f) of this subdivision;

(h) where alternate level of care (ALC) days are provided, a factor as determined in subparagraph (i) of this paragraph for the costs of these patients in a general hospital shall not be included in computations relating to the determination of general hospital case based rates of payment pursuant to this section. Alternate level of care days shall be days of care provided by a general hospital to a patient for whom it has been determined that inpatient hospital services are not medically necessary, but that post-hospital extended care services are medically necessary and are being provided by the general hospital. Separate rates of payment shall be established for such patients based on the level of care required and shall reflect: (i) operating costs based on the nineteen hundred eighty-seven regional average operating cost component of rates of payment for hospital based residential health care facilities determined in accordance with section twenty-eight hundred eight of this article and trended to the rate period, and (ii) additions contained in subparagraph (iii) of paragraph (a) of subdivision one of this section. In the event that federal financial participation in payments made for beneficiaries eligible for medical assistance under title XIX of the federal social security act based upon the rates calculated in accordance with this paragraph is not approved by the federal government, the council subject to the approval of the commissioner shall adopt regulations for such payments;

(i) if diagnosis-related groups are not adjusted or established in accordance with paragraph (a) of subdivision three of this section for services to acquired immune deficiency syndrome (AIDS) patients, then general hospitals shall receive separate payments for these patients based on regulations adopted by the council and approved by the commissioner;

(j) where general hospitals or distinct units of general hospitals are excluded from or receive an adjustment to case based payments per diagnosis-related group in accordance with paragraph (e), (f) or (g) of this subdivision, reimbursement shall continue to be calculated in accordance with such paragraph until the beginning of the rate period immediately following the date when the general hospital or the distinct unit of the general hospital is no longer excluded from or no longer receives an adjustment to case based payments per diagnosis-related group for inpatient services provided to beneficiaries of title XVIII of

the federal social security act (medicare), or until appropriate diagnosis-related groups have been developed for the specialized service provided by the general hospital or distinct unit of the general hospital, pursuant to paragraph (a) of subdivision three of this section; and

* (k) for facilities designated by the federal department of health and human services as an exempt acute care children's hospital, payment effective January first, nineteen hundred ninety-four will be based upon a hospital specific case payment amount inclusive of high cost and high length of stay outlier costs. The nineteen hundred eighty-seven base year cost, trended, volume adjusted and case mix adjusted where applicable to nineteen hundred ninety-two, trended will be utilized to determine the rate of payment effective January first, nineteen hundred ninety-four. Commencing April first, nineteen hundred ninety-six, the operating cost component of rates of payment for patients eligible for payments made by a state governmental agency shall be reduced by five percent to encourage improved productivity and efficiency. The facility will be eligible to receive the financial incentives for the physician specialty weighting incentive towards primary care pursuant to subparagraph (ii) of paragraph (a) of subdivision twenty-five of this section.

* NB There are 2 par (k)'s

* (k) for facilities designated by the federal department of health and human services as an exempt acute care children's hospital, payment effective January first, nineteen hundred ninety-four will be based upon a hospital specific case payment amount inclusive of high cost and high length of stay outlier costs. The nineteen hundred eighty-seven base year cost, trended, volume adjusted and case mix adjusted where applicable to nineteen hundred ninety-two, trended will be utilized to determine the rate of payment effective January first, nineteen hundred ninety-four.

(i) Commencing April first, nineteen hundred ninety-six through July thirty-first, nineteen hundred ninety-six, the operating cost component of rates of payment, excluding any operating cost components related to direct and indirect expenses of graduate medical education, for patients eligible for payments made by a state governmental agency shall be reduced by five percent; and

(ii) commencing August first, nineteen hundred ninety-six through March thirty-first, nineteen hundred ninety-seven the operating cost component of rates of payment, excluding any operating cost components related to direct and indirect expenses of graduate medical education, for patients eligible for payments made by a state governmental agency shall be reduced by two and five-tenths percent; and

(iii) commencing April first, nineteen hundred ninety-seven through March thirty-first, nineteen hundred ninety-nine and commencing July first, nineteen hundred ninety-nine through March thirty-first, two thousand and April first, two thousand through March thirty-first, two thousand five and commencing April first, two thousand five through March thirty-first, two thousand six, and for periods commencing on and after April first, two thousand six through March thirty-first, two thousand seven, and for periods commencing on and after April first, two thousand seven through March thirty-first, two thousand nine, and for periods commencing on and after April first, two thousand nine through March thirty-first, two thousand eleven, the operating cost component of rates of payment, excluding any operating cost components related to direct and indirect expenses of graduate medical education, for patients eligible for payments made by a state governmental agency shall be reduced by three and thirty-three hundredths percent to encourage improved productivity and efficiency. The facility will be eligible to receive the financial incentives for the physician specialty weighting incentive towards primary care pursuant to subparagraph (ii) of paragraph (a) of subdivision twenty-five of this section.

* NB Effective until December 31, 2029

* (k) for facilities designated by the federal department of health and human services as an exempt acute care children's hospital, payment effective January first, nineteen hundred ninety-four will be based upon a hospital specific case payment amount inclusive of high cost and high length of stay outlier costs. The nineteen hundred eighty-seven base year cost, trended, volume adjusted and case mix adjusted where applicable to nineteen hundred ninety-two, trended will be utilized to determine the rate of payment effective January first, nineteen hundred ninety-four.

(i) Commencing April first, nineteen hundred ninety-six through July thirty-first, nineteen hundred ninety-six, the operating cost component

of rates of payment, excluding any operating cost components related to direct and indirect expenses of graduate medical education for patients eligible for payments made by a state governmental agency shall be reduced by five percent; and

(ii) commencing August first, nineteen hundred ninety-six through March thirty-first, nineteen hundred ninety-seven the operating cost component of rates of payment, excluding any operating cost components related to direct and indirect expenses of graduate medical education, for patients eligible for payments made by a state governmental agency shall be reduced by two and five-tenths percent; and

(iii) commencing April first, nineteen hundred ninety-seven through March thirty-first, nineteen hundred ninety-nine and commencing July first, nineteen hundred ninety-nine through March thirty-first, two thousand, the operating cost component of rates of payment, excluding any operating cost components related to direct and indirect expenses of graduate medical education, for patients eligible for payments made by a state governmental agency shall be reduced by three and thirty-three hundredths percent to encourage improved productivity and efficiency. The facility will be eligible to receive the financial incentives for the physician specialty weighting incentive towards primary care pursuant to subparagraph (ii) of paragraph (a) of subdivision twenty-five of this section.

* NB Effective and expires December 31, 2029

* (k) for facilities designated by the federal department of health and human services as an exempt acute care children's hospital, payment effective January first, nineteen hundred ninety-four will be based upon a hospital specific case payment amount inclusive of high cost and high length of stay outlier costs. The nineteen hundred eighty-seven base year cost, trended, volume adjusted and case mix adjusted where applicable to nineteen hundred ninety-two, trended will be utilized to determine the rate of payment effective January first, nineteen hundred ninety-four. The facility will be eligible to receive the financial incentives for the physician specialty weighting incentive towards primary care pursuant to subparagraph (ii) of paragraph (a) of subdivision twenty-five of this section.

* NB Effective December 31, 2029

* NB There are 2 par (k)'s

(l) Notwithstanding any inconsistent provision of this section and subject to the availability of federal financial participation, rates of payment by governmental agencies for general hospitals which are certified by the office of alcoholism and substance abuse services to provide inpatient detoxification and withdrawal services and, with regard to inpatient services provided to patients discharged on and after December first, two thousand eight and who are determined to be in diagnosis-related groups as defined by the commissioner and published on the New York state department of health website, shall be made on a per diem basis in accordance with the following:

(i) for the period December first, two thousand eight through March thirty-first, two thousand nine, seventy-five percent of the operating cost component of such rates of payments shall reflect the operating cost component of rates of payment effective for December thirty-first, two thousand seven, as adjusted for inflation pursuant to paragraph (c) of subdivision ten of this section, as otherwise modified by any applicable statutes, and twenty-five percent of such rates shall reflect the use of two thousand six operating costs as reported by each facility to the department prior to two thousand eight and as computed in accordance with the provisions of subparagraph (iv) of this paragraph;

(ii) for the period April first, two thousand nine through March thirty-first, two thousand ten, thirty-seven and five tenths percent of the operating cost component of such rates of payment shall reflect the operating cost component of rates of payment effective December thirty-first, two thousand seven, as adjusted for inflation pursuant to paragraph (c) of subdivision ten of this section, as otherwise modified by any applicable statutes, and sixty-two and five tenths percent of such rates of payment shall reflect the use of two thousand six operating costs as reported by each facility to the department prior to two thousand eight and as computed in accordance with the provisions of subparagraph (iv) of this paragraph;

(iii) for periods on and after April first, two thousand ten, one hundred percent of the operating cost component of such rates of payment shall reflect the use of two thousand six operating costs as reported to the department prior to two thousand eight and as computed in accordance with the provisions of subparagraph (iv) of this paragraph.

(iv) rates of payment computed in accordance with this paragraph and

reflecting the use of two thousand six base year operating costs shall be in accord with the following, provided, however that the commissioner may establish criteria under which reimbursement may be provided at higher percentages and for longer periods.

(A) For each of the regions within the state as described in clause (E) of this subparagraph the commissioner shall determine the average per diem cost incurred by general hospitals in that region subject to the provisions of this paragraph with regard to inpatients requiring medically managed detoxification services, as defined by applicable regulations promulgated by the office of alcoholism and substance abuse services. In determining such costs the commissioner shall utilize two thousand six costs and statistics as reported by such hospitals to the department prior to two thousand eight.

(B) Per diem payments for inpatients requiring medically managed inpatient detoxification services shall reflect one hundred percent of the per diem amounts computed pursuant to clause (A) of this subparagraph for the applicable region in which the facility is located and as trended forward to adjust for inflation, provided however, that such payments shall be reduced by fifty percent for any such services provided on or after the sixth day of services through the tenth day of services, and further provided that no payments shall be made for any services provided on or after the eleventh day.

(C) Per diem payments for inpatients requiring medically supervised withdrawal services, as defined by applicable regulations promulgated by the office of alcoholism and substance abuse services, shall reflect one hundred percent of the per diem amounts computed pursuant to clause (A) of this subparagraph for the applicable region in which the facility is located for the period January first, two thousand nine through December thirty-first, two thousand nine, and as trended forward to adjust for inflation, and shall reflect seventy-five percent of such per diem amounts for periods on and after January first, two thousand ten, as trended forward to adjust for inflation, provided, however, that such payments shall be reduced by fifty percent for any services provided on or after the sixth day of services through the tenth day of services, and further provided that no payments shall be made for any services provided on and after the eleventh day.

(D) Per diem payments for inpatients placed in observation beds, as

defined by applicable regulations promulgated by the office of alcoholism and substance abuse services, shall be at the same level as would be paid pursuant to clause (A) of this paragraph, provided, however, that such payments shall not apply for more than two days of care, after which payments for such inpatients shall reflect their designation as requiring either medically managed detoxification services or medically supervised withdrawal services, and further provided that days of care provided in such observation beds shall, for reimbursement purposes, be fully reflected in the computation of the initial five days of care as set forth in clauses (A) and (B) of this subparagraph.

(E) For the purposes of this paragraph, the regions of the state shall be as follows:

(I) New York city, consisting of the counties of Bronx, New York, Kings, Queens and Richmond;

(II) Long Island, consisting of the counties of Nassau and Suffolk;

(III) Northern metropolitan, consisting of the counties of Columbia, Delaware, Dutchess, Orange, Putnam, Rockland, Sullivan, Ulster and Westchester;

(IV) Northeast, consisting of the counties of Albany, Clinton, Essex, Fulton, Greene, Hamilton, Montgomery, Rensselaer, Saratoga, Schenectady, Schoharie, Warren and Washington;

(V) Utica/Watertown, consisting of the counties of Franklin, Herkimer, Lewis, Oswego, Otsego, St. Lawrence, Jefferson, Chenango, Madison and Oneida;

(VI) Central, consisting of the counties of Broome, Cayuga, Chemung, Cortland, Onondaga, Schuyler, Seneca, Steuben, Tioga and Tompkins;

(VII) Rochester, consisting of Monroe, Ontario, Livingston, Wayne and Yates;

(VIII) Western, consisting of the counties of Allegany, Cattaraugus, Chautauqua, Erie, Genesee, Niagara, Orleans and Wyoming.

(F) Capital cost reimbursement for general hospitals otherwise subject to the provisions of this paragraph shall remain subject to the provisions of subdivision eight of this section.

(v) the commissioner may promulgate regulations, including emergency regulations, providing for an update of the base year costs and statistics used to compute rates of payment pursuant to this paragraph,

provided, however, that such base year update shall take effect no earlier than April first, two thousand fifteen, and provided further, however, that the commissioner may make such adjustments to such utilization and to the methodology for computing such rates as is necessary to achieve no aggregate, net growth in overall Medicaid expenditures related to such rates, as compared to such aggregate expenditures from the prior year. In determining the updated base year to be utilized pursuant to this subparagraph, the commissioner shall take into account the base year determined in accordance with paragraph (c) of subdivision thirty-five of this section.

5. Reimbursable inpatient operating cost component. (a) The reimbursable inpatient operating cost component of case based rates of payment per diagnosis-related group for general hospital inpatient hospital services shall be the product of the average reimbursable inpatient operating cost per discharge determined in accordance with paragraph (b) of this subdivision, adjusted by a third-party payor of hospital services for uncovered services by such payor, and the weighting factors determined in accordance with paragraph (c) of subdivision three of this section.

(b) (i) For the rate year January first, nineteen hundred eighty-eight through December thirty-first, nineteen hundred eighty-eight, average reimbursable inpatient operating cost per discharge shall be a composite sum of no less than ninety percent of the general hospital's hospital-specific average reimbursable inpatient operating cost per discharge determined in accordance with paragraph (a) of subdivision six of this section and a percentage amount not to exceed ten percent of the general hospital's group category average inpatient reimbursable operating cost per discharge (price) determined in accordance with paragraph (a) of subdivision seven of this section such that the composite sum equals one hundred percent.

(ii) For the rate year commencing January first, nineteen hundred eighty-nine, average reimbursable inpatient operating cost per discharge shall be a composite sum of no less than seventy-five percent of the general hospital's hospital-specific average reimbursable inpatient operating cost per discharge determined in accordance with paragraph (a) of subdivision six of this section and a percentage amount not to exceed

twenty-five percent of the general hospital's group category average inpatient reimbursable operating cost per discharge (price) determined in accordance with paragraph (a) of subdivision seven of this section, such that the composite sum equals one hundred percent.

(iii) Except as provided in clause (C) of this subparagraph, for annual rate years commencing on or after January first, nineteen hundred ninety, average reimbursable inpatient operating cost per discharge shall be a composite sum of no less than forty-five percent of the general hospital's hospital-specific average reimbursable inpatient operating cost per discharge determined in accordance with paragraph (a) of subdivision six of this section and a percentage amount not to exceed fifty-five percent of the general hospital's group category average inpatient reimbursable operating cost per discharge (price) determined in accordance with paragraph (a) of subdivision seven of this section, such that the composite sum equals one hundred percent.

** (A) Except as provided in clause (B) of this subparagraph and subparagraph (iv) of this paragraph, for annual rate years commencing on or after January first, nineteen hundred ninety, average reimbursable inpatient operating cost per discharge shall be a composite sum of no less than forty-five percent of the general hospital's hospital-specific average reimbursable inpatient operating cost per discharge determined in accordance with paragraph (a) of subdivision six of this section and a percentage amount not to exceed fifty-five percent of the general hospital's group category average inpatient reimbursable operating cost per discharge (price) determined in accordance with paragraph (a) of subdivision seven of this section, such that the composite sum equals one hundred percent.

** NB There are 2 clause (A)'s

** (A) Except as provided in clauses (B) and (C) of this subparagraph and subparagraphs (iv), (v) and (vi) of this paragraph, for annual rate years commencing on or after January first, nineteen hundred ninety, average reimbursable inpatient operating cost per discharge shall be a composite sum of no less than forty-five percent of the general hospital's hospital-specific average reimbursable inpatient operating cost per discharge determined in accordance with paragraph (a) of subdivision six of this section and a percentage amount not to exceed fifty-five percent of the general hospital's group category average

inpatient reimbursable operating cost per discharge (price) determined in accordance with paragraph (a) of subdivision seven of this section, such that the composite sum equals one hundred percent.

** NB Effective until December 31, 2029

** (A) Except as provided in clause (B) of this subparagraph, for annual rate years commencing on or after January first, nineteen hundred ninety, average reimbursable inpatient operating cost per discharge shall be a composite sum of no less than forty-five percent of the general hospital's hospital-specific average reimbursable inpatient operating cost per discharge determined in accordance with paragraph (a) of subdivision six of this section and a percentage amount not to exceed fifty-five percent of the general hospital's group category average inpatient reimbursable operating cost per discharge (price) determined in accordance with paragraph (a) of subdivision seven of this section, such that the composite sum equals one hundred percent.

** NB Effective December 31, 2029

** NB There are 2 clause (A)'s

* (B) For discharges on or after April first, nineteen hundred ninety-five for purposes of reimbursement of inpatient hospital services for patients eligible for payments made by state governmental agencies assigned to one of the twenty most common diagnosis-related groups for all general hospitals, the average reimbursable inpatient operating cost per discharge of a general hospital shall be the lower of (I) the amount determined in accordance with clause (A) of this subparagraph or (II) the average amount determined in accordance with clause (A) of this subparagraph for all general hospitals in the group category to which the hospital is assigned. The twenty most common diagnosis-related groups shall be determined using discharge data for the year two years prior to the rate year for all general hospitals, excluding beneficiaries of title XVIII of the federal social security act (medicare) and patients assigned to diagnosis related groups for human immunodeficiency virus (HIV) infection, acquired immune deficiency syndrome, alcohol/drug use or alcohol/drug induced organic mental disorders, and exempt unit or exempt hospital patients.

* NB Expired March 31, 2011

* (C) (I) For discharges on or after July first, two thousand six through December thirty-first, two thousand six, and subject to the

availability of federal financial participation, rates of payment by state governmental agencies to Westchester medical center shall be increased by an aggregate amount of twenty-five million dollars to assist the medical center to maintain critically needed health care services.

(II) For discharges on or after January first, two thousand seven through December thirty-first, two thousand seven, and subject to the availability of federal financial participation, rates of payment by state governmental agencies to Westchester medical center shall be increased by an aggregate amount of twenty-five million dollars to assist the medical center to maintain critically needed health care services.

(III) For discharges on or after January first, two thousand eight through December thirty-first, two thousand eight, and subject to the availability of federal financial participation, rates of payment by state governmental agencies to Westchester medical center shall be increased by an aggregate amount of twenty-five million dollars to assist the medical center to maintain critically needed health care services.

* NB Expired March 31, 2011

* (iv) for discharges on or after April first, nineteen hundred ninety-six for purposes of reimbursement of inpatient hospital services for patients eligible for payments made by state governmental agencies, the average reimbursable inpatient operating cost per discharge of a general hospital shall be the sum of:

(A) the amount determined in accordance with clause (B) of subparagraph (iii) of this paragraph, excluding the value of direct medical education expenses, as defined in subparagraph (i) of paragraph (c) of subdivision seven of this section, reflected in the general hospital's hospital-specific average reimbursable inpatient operating cost per discharge and group category average inpatient reimbursable operating cost per discharge, and excluding the value of forty-five percent of the indirect medical education expenses, as defined in subparagraph (ii) of paragraph (c) of subdivision seven of this section, reflected in the general hospital's hospital specific average reimbursable inpatient operating cost per discharge, and excluding the value of fifty-five percent of the indirect medical education expenses

reflected in a general hospital's group category average inpatient reimbursable operating cost per discharge in accordance with subdivision twenty-five of this section as amended;

(B) minus five percent of the amount determined in accordance with clause (A) of this subparagraph;

(C) plus the value of direct medical education expenses, as defined in subparagraph (i) of paragraph (c) of subdivision seven of this section, reflected in the general hospital's hospital-specific average reimbursable inpatient operating cost per discharge and group category average inpatient reimbursable operating cost per discharge;

(D) minus five percent of the costs of hospital based physicians reflected in the direct medical education amount determined in accordance with clause (C) of this subparagraph;

(E) plus the value of forty-five percent of the indirect medical education expenses, as defined in subparagraph (ii) of paragraph (c) of subdivision seven of this section, reflected in the general hospital's hospital-specific average reimbursable inpatient operating cost per discharge; and

(F) plus the value of fifty-five percent of the indirect medical education expenses reflected in the general hospital's group category average inpatient operating cost per discharge in accordance with subdivision twenty-five of this section as amended.

* NB There are 3 subpar (iv)'s

* (iv) for discharges on or after April first, nineteen hundred ninety-six for purposes of reimbursement of inpatient hospital services for patients eligible for payments made by state governmental agencies, the average reimbursable inpatient operating cost per discharge of a general hospital shall to encourage improved productivity and efficiency be the sum of:

(A) the amount determined in accordance with clause (B) of subparagraph (iii) of this paragraph, excluding the value of direct medical education expenses, as defined in subparagraph (i) of paragraph (c) of subdivision seven of this section, reflected in the general hospital's hospital-specific average reimbursable inpatient operating cost per discharge and group category average inpatient reimbursable operating cost per discharge, and excluding the value of forty-five percent of the indirect medical education expenses, as defined in

subparagraph (ii) of paragraph (c) of subdivision seven of this section, reflected in the general hospital's hospital specific average reimbursable inpatient operating cost per discharge, and excluding the value of fifty-five percent of the indirect medical education expenses reflected in a general hospital's group category average inpatient reimbursable operating cost per discharge in accordance with subdivision twenty-five of this section as amended;

(B) minus five percent of the amount determined in accordance with clause (A) of this subparagraph;

(C) plus the value of direct medical education expenses, as defined in subparagraph (i) of paragraph (c) of subdivision seven of this section, reflected in the general hospital's hospital-specific average reimbursable inpatient operating cost per discharge and group category average inpatient reimbursable operating cost per discharge;

(D) minus five percent of the costs of hospital based physicians reflected in the direct medical education amount determined in accordance with clause (C) of this subparagraph;

(E) plus the value of forty-five percent of the indirect medical education expenses, as defined in subparagraph (ii) of paragraph (c) of subdivision seven of this section, reflected in the general hospital's hospital-specific average reimbursable inpatient operating cost per discharge; and

(F) plus the value of fifty-five percent of the indirect medical education expenses reflected in the general hospital's group category average inpatient operating cost per discharge in accordance with subdivision twenty-five of this section as amended.

* NB There are 3 subpar (iv)'s

* (iv) for discharges on or after April first, nineteen hundred ninety-six through July thirty-first, nineteen hundred ninety-six for purposes of reimbursement of inpatient hospital services for patients eligible for payments made by state governmental agencies, the average reimbursable inpatient operating cost per discharge of a general hospital shall, to encourage improved productivity and efficiency, be the sum of:

(A) the amount determined in accordance with clause (B) of subparagraph (iii) of this paragraph, excluding the value of direct medical education expenses, as defined in subparagraph (i) of paragraph

(c) of subdivision seven of this section, reflected in the general hospital's hospital-specific average reimbursable inpatient operating cost per discharge and group category average inpatient reimbursable operating cost per discharge, and excluding the value of forty-five percent of the indirect medical education expenses, as defined in subparagraph (ii) of paragraph (c) of subdivision seven of this section, reflected in the general hospital's hospital specific average reimbursable inpatient operating cost per discharge, and excluding the value of fifty-five percent of the indirect medical education expenses reflected in a general hospital's group category average inpatient reimbursable operating cost per discharge in accordance with subdivision twenty-five of this section as amended;

(B) minus five percent of the amount determined in accordance with clause (A) of this subparagraph;

(C) plus the value of direct medical education expenses, as defined in subparagraph (i) of paragraph (c) of subdivision seven of this section, reflected in the general hospital's hospital-specific average reimbursable inpatient operating cost per discharge and group category average inpatient reimbursable operating cost per discharge;

(D) minus five percent of the costs of hospital based physicians reflected in the direct medical education amount determined in accordance with clause (C) of this subparagraph;

(E) plus the value of forty-five percent of the indirect medical education expenses, as defined in subparagraph (ii) of paragraph (c) of subdivision seven of this section, reflected in the general hospital's hospital-specific average reimbursable inpatient operating cost per discharge; and

(F) plus the value of fifty-five percent of the indirect medical education expenses reflected in the general hospital's group category average inpatient operating cost per discharge in accordance with subdivision twenty-five of this section as amended.

* NB Expires December 31, 2029

* NB There are 3 subpar (iv)'s

* (v) for discharges on or after August first, nineteen hundred ninety-six through March thirty-first, nineteen hundred ninety-seven for purposes of reimbursement of inpatient hospital services for patients eligible for payments made by state governmental agencies, the average

reimbursable inpatient operating cost per discharge of a general hospital shall, to encourage improved productivity and efficiency, be the sum of:

(A) the amount determined in accordance with clause (B) of subparagraph (iii) of this paragraph, excluding the value of direct medical education expenses, as defined in subparagraph (i) of paragraph (c) of subdivision seven of this section, reflected in the general hospital's hospital-specific average reimbursable inpatient operating cost per discharge and group category average inpatient reimbursable operating cost per discharge, and excluding the value of forty-five percent of the indirect medical education expenses, as defined in subparagraph (ii) of paragraph (c) of subdivision seven of this section, reflected in the general hospital's hospital specific average reimbursable inpatient operating cost per discharge, and excluding the value of fifty-five percent of the indirect medical education expenses reflected in a general hospital's group category average inpatient reimbursable operating cost per discharge in accordance with subdivision twenty-five of this section as amended;

(B) minus two and five-tenths percent of the amount determined in accordance with clause (A) of this subparagraph;

(C) plus the value of direct medical education expenses, as defined in subparagraph (i) of paragraph (c) of subdivision seven of this section, reflected in the general hospital's hospital-specific average reimbursable inpatient operating cost per discharge and group category average inpatient reimbursable operating cost per discharge;

(D) minus two and five-tenths percent of the costs of hospital based physicians reflected in the direct medical education amount determined in accordance with clause (C) of this subparagraph;

(E) plus the value of forty-five percent of the indirect medical education expenses, as defined in subparagraph (ii) of paragraph (c) of subdivision seven of this section, reflected in the general hospital's hospital-specific average reimbursable inpatient operating cost per discharge; and

(F) plus the value of fifty-five percent of the indirect medical education expenses reflected in the general hospital's group category average inpatient operating cost per discharge in accordance with subdivision twenty-five of this section as amended.

* NB Expires December 31, 2029

* (vi) for discharges on or after April first, nineteen hundred ninety-seven through March thirty-first, nineteen hundred ninety-nine and for discharges on or after July first, nineteen hundred ninety-nine through March thirty-first, two thousand and for discharges on or after April first, two thousand through March thirty-first, two thousand five and for discharges on or after April first, two thousand five through March thirty-first, two thousand six, and for discharges on or after April first, two thousand six through March thirty-first, two thousand seven, and for discharges on or after April first, two thousand seven through March thirty-first, two thousand nine, and for discharges on or after April first, two thousand nine through March thirty-first, two thousand eleven, for purposes of reimbursement of inpatient hospital services for patients eligible for payments made by state governmental agencies, the average reimbursable inpatient operating cost per discharge of a general hospital shall, to encourage improved productivity and efficiency, be the sum of:

(A) the amount determined in accordance with clause (B) of subparagraph (iii) of this paragraph, excluding the value of direct medical education expenses, as defined in subparagraph (i) of paragraph (c) of subdivision seven of this section, reflected in the general hospital's hospital-specific average reimbursable inpatient operating cost per discharge and group category average inpatient reimbursable operating cost per discharge, and excluding the value of forty-five percent of the indirect medical education expenses, as defined in subparagraph (ii) of paragraph (c) of subdivision seven of this section, reflected in the general hospital's hospital-specific average reimbursable inpatient operating cost per discharge, and excluding the value of fifty-five percent of the indirect medical education expenses reflected in a general hospital's group category average inpatient reimbursable operating cost per discharge in accordance with subdivision twenty-five of this section as amended;

(B) minus three and thirty-three hundredths percent of the amount determined in accordance with clause (A) of this subparagraph;

(C) plus the value of direct medical education expenses, as defined in subparagraph (i) of paragraph (c) of subdivision seven of this section, reflected in the general hospital's hospital-specific average

reimbursable inpatient operating cost per discharge and group category average inpatient reimbursable operating cost per discharge;

(D) minus three and thirty-three hundredths percent of the costs of hospital based physicians reflected in the direct medical education amount determined in accordance with clause (C) of this subparagraph;

(E) plus the value of forty-five percent of the indirect medical education expenses, as defined in subparagraph (ii) of paragraph (c) of subdivision seven of this section, reflected in the general hospital's hospital-specific average reimbursable inpatient operating cost per discharge; and

(F) plus the value of fifty-five percent of the indirect medical education expenses reflected in the general hospital's group category average inpatient operating cost per discharge in accordance with subdivision twenty-five of this section as amended.

* NB Effective until December 31, 2029

* (vi) for discharges on or after April first, nineteen hundred ninety-seven through March thirty-first, nineteen hundred ninety-nine and for discharges on or after July first, nineteen hundred ninety-nine through March thirty-first, two thousand for purposes of reimbursement of inpatient hospital services for patients eligible for payments made by state governmental agencies, the average reimbursable inpatient operating cost per discharge of a general hospital shall, to encourage improved productivity and efficiency, be the sum of:

(A) the amount determined in accordance with clause (B) of subparagraph (iii) of this paragraph, excluding the value of direct medical education expenses, as defined in subparagraph (i) of paragraph (c) of subdivision seven of this section, reflected in the general hospital's hospital-specific average reimbursable inpatient operating cost per discharge and group category average inpatient reimbursable operating cost per discharge, and excluding the value of forty-five percent of the indirect medical education expenses, as defined in subparagraph (ii) of paragraph (c) of subdivision seven of this section, reflected in the general hospital's hospital-specific average reimbursable inpatient operating cost per discharge, and excluding the value of fifty-five percent of the indirect medical education expenses reflected in a general hospital's group category average inpatient reimbursable operating cost per discharge in accordance with subdivision

twenty-five of this section as amended;

(B) minus three and thirty-three hundredths percent of the amount determined in accordance with clause (A) of this subparagraph;

(C) plus the value of direct medical education expenses, as defined in subparagraph (i) of paragraph (c) of subdivision seven of this section, reflected in the general hospital's hospital-specific average reimbursable inpatient operating cost per discharge and group category average inpatient reimbursable operating cost per discharge;

(D) minus three and thirty-three hundredths percent of the costs of hospital based physicians reflected in the direct medical education amount determined in accordance with clause (C) of this subparagraph;

(E) plus the value of forty-five percent of the indirect medical education expenses, as defined in subparagraph (ii) of paragraph (c) of subdivision seven of this section, reflected in the general hospital's hospital-specific average reimbursable inpatient operating cost per discharge; and

(F) plus the value of fifty-five percent of the indirect medical education expenses reflected in the general hospital's group category average inpatient operating cost per discharge in accordance with subdivision twenty-five of this section as amended.

* NB Effective and expires December 31, 2029

* (c) Notwithstanding any inconsistent provision of this section, commencing July first, nineteen hundred ninety-six through March thirty-first, nineteen hundred ninety-nine and July first, nineteen hundred ninety-nine through March thirty-first, two thousand and April first, two thousand through March thirty-first, two thousand five and for periods on and after April first, two thousand five through March thirty-first, two thousand six, and for periods on and after April first, two thousand six through March thirty-first, two thousand seven, and for periods on and after April first, two thousand seven through March thirty-first, two thousand nine, and for periods on and after April first, two thousand nine through March thirty-first, two thousand eleven, rates of payment for a general hospital for patients eligible for payments made by state governmental agencies shall be further reduced by the commissioner to encourage improved productivity and efficiency by providers by a factor determined as follows:

(i) an aggregate reduction shall be calculated for each general

hospital commencing July first, nineteen hundred ninety-six through March thirty-first, nineteen hundred ninety-nine and July first, nineteen hundred ninety-nine through March thirty-first, two thousand and April first, two thousand through March thirty-first, two thousand five and for periods on and after April first, two thousand five through March thirty-first, two thousand six, and for periods on and after April first, two thousand six through March thirty-first, two thousand seven, and for periods on and after April first, two thousand seven through March thirty-first, two thousand nine, and for periods on and after April first, two thousand nine through March thirty-first, two thousand eleven, as the result of (A) eighty-nine million dollars on an annualized basis for each year, multiplied by (B) the ratio of patient days for patients eligible for payments made by state governmental agencies provided in a base year two years prior to the rate year by a general hospital, divided by the total of such patient days summed for all general hospitals; and

(ii) (A) the result for each general hospital shall be allocated to units within such hospital exempt from case based rates of payment based on the ratio of such patient days provided in the exempt unit to the total of such patient days provided by the general hospital, and (B) the result divided by such patient days provided in the exempt unit, for a per diem unit of service reduction in rates of payment for such exempt unit for patients eligible for payments made by state governmental agencies for such general hospital; and

(iii) any amount not allocated to exempt units shall be divided by case based discharges (or for exempt hospitals by patient days) in the base year two years prior to the rate year for patients eligible for payments made by state governmental agencies, for a per case (or for exempt hospitals a per diem) unit of service reduction in rates of payment for patients eligible for payments made by state governmental agencies for such general hospital.

* NB Effective until December 31, 2029

* (c) Notwithstanding any inconsistent provision of this section, commencing July first, nineteen hundred ninety-six through March thirty-first, nineteen hundred ninety-nine and July first, nineteen hundred ninety-nine through March thirty-first, two thousand rates of payment for a general hospital for patients eligible for payments made

by state governmental agencies shall be further reduced by the commissioner to encourage improved productivity and efficiency by providers by a factor determined as follows:

(i) an aggregate reduction shall be calculated for each general hospital commencing July first, nineteen hundred ninety-six through March thirty-first, nineteen hundred ninety-nine and July first, nineteen hundred ninety-nine through March thirty-first, two thousand as the result of (A) eighty-nine million dollars on an annualized basis for each year, multiplied by (B) the ratio of patient days for patients eligible for payments made by state governmental agencies provided in a base year two years prior to the rate year by a general hospital, divided by the total of such patient days summed for all general hospitals; and

(ii) (A) the result for each general hospital shall be allocated to units within such hospital exempt from case based rates of payment based on the ratio of such patient days provided in the exempt unit to the total of such patient days provided by the general hospital, and (B) the result divided by such patient days provided in the exempt unit, for a per diem unit of service reduction in rates of payment for such exempt unit for patients eligible for payments made by state governmental agencies for such general hospital; and

(iii) any amount not allocated to exempt units shall be divided by case based discharges (or for exempt hospitals by patient days) in the base year two years prior to the rate year for patients eligible for payments made by state governmental agencies, for a per case (or for exempt hospitals a per diem) unit of service reduction in rates of payment for patients eligible for payments made by state governmental agencies for such general hospital.

* NB Effective and expires December 31, 2029

6. Operating costs. (a) A general hospital's hospital-specific average reimbursable inpatient operating cost per discharge shall be determined in accordance with rules and regulations adopted by the council and approved by the commissioner based on the hospital's reimbursable inpatient operating cost base determined in accordance with paragraph (d) of subdivision one of this section; adjusted in accordance with paragraph (b) of this subdivision to reflect exceptions to case

payments; and projected to the applicable rate period by a trend factor determined in accordance with subdivision ten of this section; and increased in accordance with subparagraphs (i), (iii) and (iv) of paragraph (e) of subdivision one of this section to reflect special additional inpatient operating costs; and adjusted in accordance with subparagraphs (i), (ii) and (iv) of paragraph (c) of this subdivision to reflect modifications to case payments; and standardized to reflect nineteen hundred eighty-seven hospital case mix. A general hospital's hospital-specific average reimbursable inpatient operating cost per discharge shall be adjusted on a payor category basis to reflect allocation of malpractice insurance costs in accordance with the methodology developed pursuant to subparagraph (ii) of paragraph (h) of subdivision eleven of this section.

(b) In accordance with rules and regulations adopted by the council and approved by the commissioner, the commissioner shall adjust reimbursable inpatient operating costs and discharges to exclude operating costs and statistics related to specialized hospital services for which an alternative reimbursement methodology is adopted pursuant to paragraph (e) or (g) of subdivision four of this section, a factor for operating costs of patients who required an alternate level of care in accordance with paragraph (h) of subdivision four of this section and the operating costs and statistics of AIDS patients pursuant to paragraph (i) of subdivision four of this section if effective.

(c) In accordance with rules and regulations adopted by the council and approved by the commissioner, the commissioner shall adjust weighting factors developed pursuant to paragraph (c) of subdivision three of this section and reimbursable inpatient operating costs and statistics on which case payment rates are based to take into account the provisions for additional payments in accordance with paragraph (a), (b), (c) or (d) of subdivision four of this section. The rules and regulations are to be designed to identify an estimate of costs and statistics as if the payment methodology effective for the applicable rate period including payment based on the higher of high-cost outliers or long-stay outliers was in effect during the period used to establish such costs and statistics to accomplish the following:

(i) an estimate of costs for inpatient services to patients transferred to another general hospital receiving case payment rates

pursuant to paragraph (a) of subdivision four of this section shall be eliminated from reimbursable inpatient operating costs considering a transfer patient cost conversion factor determined based on nineteen hundred eighty-five data from a representative sample of general hospitals; a case mix neutral acute care cost component of a general hospital's reimbursable inpatient operating cost base per day after application of the trend factor and the addition of special additional inpatient operating costs; transfer patient days incurred by such general hospital in nineteen hundred eighty-seven or the number of such transfer patient days during a recent twelve month period prior thereto established by regulation for which data are available subsequently reconciled by an adjustment to reflect nineteen hundred eighty-seven data; and the specific diagnosis-related groups with which the transfer patients are identified. Such costs shall be eliminated in accordance with rules and regulations adopted by the council and approved by the commissioner which shall contain the specific methodology to adequately identify the costs related to transfer cases. Transfer cases shall be eliminated in computing discharges of the transferring hospital. The costs and discharges for transfer cases for each general hospital participating in the determination of the weighting factors shall be removed before calculating the weighting factors;

(ii) an estimate of costs for the outlier portion of inpatient services which would qualify for additional payments as cost outliers in accordance with paragraph (b) of subdivision four of this section shall be eliminated from reimbursable inpatient operating costs based on a general hospital's high cost percentage outlier factor, applied to an acute care cost component of such general hospital's reimbursable inpatient operating cost base after application of the trend factor and the addition of special additional inpatient operating costs. The high cost percentage outlier factor shall be calculated based on a determination of the percentage of nineteen hundred eighty-seven discharges of patients other than beneficiaries of title XVIII of the federal social security act (medicare) for which the commissioner has complete hospital bill submissions or such discharges during a recent twelve month period prior thereto established by regulation for which hospital bills are available, as follows, (a) for general hospitals that have complete hospital bill submissions for at least ninety percent of

their discharges, a high cost percentage outlier factor based on such data, and (b) for general hospitals that have complete hospital bill submissions for at least eighty percent but less than ninety percent of their discharges, a high cost percentage outlier factor based on such data plus an additional one-quarter of one percent, and (c) for general hospitals that have complete bill submissions for less than eighty percent of their discharges, a high cost percentage outlier factor determined based on nineteen hundred eighty-five data from a representative sample of general hospitals plus an additional one-quarter of one percent. The calculation of the high cost percentage outlier factor shall be subsequently reconciled by an adjustment to reflect the percentage of such complete hospital bill submissions for such nineteen hundred eighty-seven discharges as submitted to the commissioner prior to August first, nineteen hundred eighty-eight.

The minimum percentage threshold applicable pursuant to clause (a) of the first paragraph of this subparagraph may be increased to "at least ninety-five percent" and the percentage ceiling applicable pursuant to clause (b) of the first paragraph of this subparagraph increased to "less than ninety-five percent" pursuant to rules and regulations adopted by the council and approved by the commissioner based upon a study and a report by the commissioner of a sample of incomplete discharge records which showed that there was a significant difference in the value of high cost outlier cases potentially reflected in incomplete records from the value of high cost outlier cases reflected in records for which the commissioner has complete hospital bill submissions.

The maximum amount to be eliminated on a statewide basis shall be three percent of the total of nineteen hundred eighty-eight acute care cost components of general hospital reimbursable inpatient operating costs reimbursed on the case payment system. In the event that the total amount as calculated exceeds three percent, the calculated amount will be reduced to three percent by the application of a percentage computed by dividing expected outlier costs based on the three percent by actual outlier costs, which shall also be the percentage of outlier costs to be reimbursed in the payment year. The costs for the outlier portion of

cost outliers for general hospitals participating in the determination of the weighting factors shall be removed from each diagnosis-related group before determining the weighting factors;

* (iii) an estimate of inpatient costs which are related to a hospital stay in excess of the long stay threshold for long stay patients as defined in paragraph (c) of subdivision four of this section shall be eliminated from reimbursable inpatient operating costs in determining group category average inpatient reimbursable operating costs considering a long stay patient cost conversion factor, which shall be established at sixty percent provided, however, such long stay patient cost conversion factor may be revised for an annual rate period or periods beginning on or after January first, nineteen hundred eighty-nine in accordance with rules and regulations adopted by the council and approved by the commissioner; a case mix neutral acute care cost component of a general hospital's reimbursable inpatient operating cost base per day after application of the trend factor and the addition of special additional inpatient operating costs; long stay patient days incurred by such general hospital in nineteen hundred eighty-seven or the number of such long stay patient days during a recent twelve month period prior thereto established by regulation for which data are available subsequently reconciled by an adjustment to reflect nineteen hundred eighty-seven data; and the specific diagnosis-related groups with which the long stay patients are identified. The long stay outlier thresholds shall be determined by adding a sufficient number of standard deviations to the mean length of stay for each diagnosis-related group such that it is estimated for rates of payment during the period January first, nineteen hundred eighty-eight through December thirty-first, nineteen hundred ninety based upon nineteen hundred eighty-five data from a representative sample of general hospitals and for rates of payment during the period January first, nineteen hundred ninety-one through December thirty-first, nineteen hundred ninety-three based upon nineteen hundred eighty-nine data from a representative sample of general hospitals and for rates of payment during the period January first, nineteen hundred ninety-four through December thirty-first, nineteen hundred ninety-nine and periods on and after January first, two thousand based upon nineteen hundred ninety-two data from a representative sample of general hospitals that the costs associated

with the portion of hospital stays in excess of the long stay outlier thresholds do not exceed three percent of the total of the acute care cost components of reimbursable inpatient operating costs related to the determination of case based rates of payment. The costs associated with the outlier portion of long stay outliers for each general hospital participating in the determination of the weighting factors shall be removed from each diagnosis-related group before calculating the weighting factors;

* NB Effective until December 31, 2029

* (iii) an estimate of inpatient costs which are related to a hospital stay in excess of the long stay threshold for long stay patients as defined in paragraph (c) of subdivision four of this section shall be eliminated from reimbursable inpatient operating costs in determining group category average inpatient reimbursable operating costs considering a long stay patient cost conversion factor, which shall be established at sixty percent provided, however, such long stay patient cost conversion factor may be revised for an annual rate period or periods beginning on or after January first, nineteen hundred eighty-nine in accordance with rules and regulations adopted by the council and approved by the commissioner; a case mix neutral acute care cost component of a general hospital's reimbursable inpatient operating cost base per day after application of the trend factor and the addition of special additional inpatient operating costs; long stay patient days incurred by such general hospital in nineteen hundred eighty-seven or the number of such long stay patient days during a recent twelve month period prior thereto established by regulation for which data are available subsequently reconciled by an adjustment to reflect nineteen hundred eighty-seven data; and the specific diagnosis-related groups with which the long stay patients are identified. The long stay outlier thresholds shall be determined by adding a sufficient number of standard deviations to the mean length of stay for each diagnosis-related group such that it is estimated for rates of payment during the period January first, nineteen hundred eighty-eight through December thirty-first, nineteen hundred ninety based upon nineteen hundred eighty-five data from a representative sample of general hospitals and for rates of payment during the period January first, nineteen hundred ninety-one through December thirty-first, nineteen hundred ninety-three based upon

nineteen hundred eighty-nine data from a representative sample of general hospitals and for rates of payment during the period January first, nineteen hundred ninety-four through December thirty-first, nineteen hundred ninety-nine based upon nineteen hundred ninety-two data from a representative sample of general hospitals that the costs associated with the portion of hospital stays in excess of the long stay outlier thresholds do not exceed three percent of the total of the acute care cost components of reimbursable inpatient operating costs related to the determination of case based rates of payment. The costs associated with the outlier portion of long stay outliers for each general hospital participating in the determination of the weighting factors shall be removed from each diagnosis-related group before calculating the weighting factors;

* NB Effective and expires December 31, 2029

* (iii) an estimate of inpatient costs which are related to a hospital stay in excess of the long stay threshold for long stay patients as defined in paragraph (c) of subdivision four of this section shall be eliminated from reimbursable inpatient operating costs in determining group category average inpatient reimbursable operating costs considering a long stay patient cost conversion factor, which shall be established at sixty percent provided, however, such long stay patient cost conversion factor may be revised for an annual rate period or periods beginning on or after January first, nineteen hundred eighty-nine in accordance with rules and regulations adopted by the council and approved by the commissioner; a case mix neutral acute care cost component of a general hospital's reimbursable inpatient operating cost base per day after application of the trend factor and the addition of special additional inpatient operating costs; long stay patient days incurred by such general hospital in nineteen hundred eighty-seven or the number of such long stay patient days during a recent twelve month period prior thereto established by regulation for which data are available subsequently reconciled by an adjustment to reflect nineteen hundred eighty-seven data; and the specific diagnosis-related groups with which the long stay patients are identified. The long stay outlier thresholds shall be determined by adding a sufficient number of standard deviations to the mean length of stay for each diagnosis-related group such that it is estimated for rates of payment during the period January

first, nineteen hundred eighty-eight through December thirty-first, nineteen hundred ninety based upon nineteen hundred eighty-five data from a representative sample of general hospitals and for rates of payment during the period January first, nineteen hundred ninety-one through December thirty-first, nineteen hundred ninety-three based upon nineteen hundred eighty-nine data from a representative sample of general hospitals and for rates of payment during the period January first, nineteen hundred ninety-four through June thirtieth, nineteen hundred ninety-six based upon nineteen hundred ninety-two data from a representative sample of general hospitals that the costs associated with the portion of hospital stays in excess of the long stay outlier thresholds do not exceed three percent of the total of the acute care cost components of reimbursable inpatient operating costs related to the determination of case based rates of payment. The costs associated with the outlier portion of long stay outliers for each general hospital participating in the determination of the weighting factors shall be removed from each diagnosis-related group before calculating the weighting factors;

* NB Effective December 31, 2029

(iv) an estimate of inpatient costs which are related to short stay patients as defined in paragraph (d) of subdivision four of this section shall be eliminated from reimbursable inpatient operating costs considering a short stay patient cost conversion factor determined based on nineteen hundred eighty-five data from a representative sample of general hospitals; a case mix neutral acute care cost component of a general hospital's reimbursable inpatient operating cost base per day after application of the trend factor and the addition of special additional inpatient operating costs; short stay patient days incurred by such general hospital in nineteen hundred eighty-seven or the number of such short stay patient days during a recent twelve month period prior thereto established by regulation for which data are available subsequently reconciled by an adjustment to reflect nineteen hundred eighty-seven data; and the specific diagnosis-related groups with which the short stay patients are identified. Such costs shall be eliminated in accordance with rules and regulations adopted by the council and approved by the commissioner which shall contain the specific methodology to adequately identify the costs related to short stay

patients. Short stay cases shall be eliminated in computing discharges of a general hospital. The costs and discharges for short stay cases for each general hospital participating in the determination of the weighting factors shall be removed before calculating the weighting factors.

7. Operating cost group component. (a) A general hospital's group category average inpatient reimbursable operating cost per discharge (price) shall be a composite factor determined in accordance with rules and regulations adopted by the council and approved by the commissioner based on a group price component determined in accordance with subparagraph (i) of this paragraph, a hospital-specific price component determined in accordance with subparagraph (ii) of this paragraph, and an adjustment in accordance with subparagraph (iii) of this paragraph.

(i) The group price component shall be based on the costs and statistics of general hospitals in the group category established pursuant to paragraph (b) of this subdivision to which the hospital is assigned by the commissioner to compute a group based average inpatient reimbursable operating cost per discharge for the group category. General hospital costs and statistics shall be determined consistent with the methodology to determine hospital-specific average reimbursable inpatient operating cost per discharge pursuant to subdivision six of this section; adjusted to reflect additional cost increases in accordance with subparagraph (ii) of paragraph (e) of subdivision one of this section; and adjusted to exclude the components of hospital-specific inpatient reimbursable operating costs related to education, physician, ambulance services and organ acquisition costs determined in accordance with paragraph (c) of this subdivision and malpractice insurance costs, and the components of special additional inpatient operating costs determined and allocated in accordance with subparagraphs (i), (iii) and (iv) of paragraph (e) of subdivision one of this section associated with cost increases in such costs; and adjusted to exclude the components of special additional inpatient operating costs determined and allocated in accordance with clauses (B), (D), (H), and (I) of subparagraph (iii) and clauses (A), (E) and (F) of subparagraph (iv) of paragraph (e) of subdivision one of this section; and adjusted to reflect additional modifications to case payments in

accordance with subparagraph (iii) of paragraph (c) of subdivision six of this section. The group based average inpatient reimbursable operating costs computed for a general hospital shall be adjusted to reflect the hospital-specific indirect medical education costs percentage of such hospital determined in accordance with subparagraph (ii) of paragraph (c) of this subdivision.

Hospital costs shall be standardized for comparison purposes considering differences in wage and wage-related costs levels and such other economic factors, such as a power equalization factor, as may be determined in accordance with rules and regulations adopted by the council and approved by the commissioner.

(ii) A hospital-specific price component shall be determined for each general hospital based on such hospital's hospital-specific education, physician, ambulance services and organ acquisition costs determined in accordance with subparagraphs (i), (iii) and (iv) of paragraph (c) of this subdivision and malpractice insurance costs, and the components of special additional inpatient operating costs determined and allocated in accordance with subparagraphs (i), (iii) and (iv) of paragraph (e) of subdivision one of this section associated with cost increases in such costs, and special additional inpatient operating costs determined and allocated in accordance with clauses (B), (D), (H) and (I) of subparagraph (iii) and clauses (A), (E) and (F) of subparagraph (iv) of paragraph (e) of subdivision one of this section, as excluded pursuant to subparagraph (i) of this paragraph, per discharge, standardized to reflect nineteen hundred eighty-seven hospital case mix.

(iii) A general hospital's group category average inpatient reimbursable operating cost per discharge shall be adjusted on a payor category basis to reflect allocation of malpractice insurance costs in accordance with the methodology developed pursuant to subparagraph (ii) of paragraph (h) of subdivision eleven of this section.

(b) General hospital group categories shall be established in accordance with rules and regulations adopted by the council and approved by the commissioner for purposes of computing group category average inpatient reimbursable operating cost per discharge considering, but not limited to, factors such as hospital size, hospital medical education activity, teaching status and geographic divisions of the

state.

(c) Education, physician, ambulance services and organ acquisition costs shall include:

(i) direct medical education expenses, defined as the reimbursable costs of residents, fellows, and supervising physicians, combined with the costs of hospital based physicians;

(ii) indirect medical education expenses, defined as an estimate of the costs, other than direct costs, of educational activities in teaching hospitals attributable to factors including but not limited to increased overhead, more severely ill patients and the tendency of residents to provide more tests than experienced licensed physicians. For the rate period beginning January first, nineteen hundred eighty-eight and ending December thirty-first, nineteen hundred eighty-eight, an estimate of indirect medical education costs shall be determined in accordance with the methodology applicable for purposes of determining an estimate of indirect medical education costs for reimbursement for inpatient hospital service pursuant to title XVIII of the federal social security act (medicare) in effect on the first day of July in the year preceding the rate period. The council may adopt rules and regulations, subject to the approval of the commissioner, to revise the methodology for the determination of an estimate of indirect medical education costs to reflect revisions to the methodology applicable for purposes of determining reimbursement for inpatient hospital service pursuant to title XVIII of the federal social security act (medicare) effective subsequent to the first day of July in the year preceding the rate period. For annual rate periods beginning on or after January first, nineteen hundred eighty-nine an estimate of indirect medical education costs shall be determined in accordance with rules and regulations adopted by the council and approved by the commissioner;

(iii) the reimbursable costs of schools of nursing, allied professional programs and ambulance services; and

(iv) the reimbursable costs of organ acquisition services not reimbursed pursuant to the methodology applicable for purposes of reimbursement pursuant to title XVIII of the federal social security act (medicare).

(d) The commissioner shall establish, in accordance with rules and regulations adopted by the council and approved by the commissioner, the

methodology to determine the hospital's group category average inpatient reimbursable operating cost per discharge (price) and the percentage amounts, pursuant to subparagraphs (i), (ii) and (iii) of paragraph (b) of subdivision five of this section, of the group category average inpatient reimbursable operating cost per discharge to be used to determine the inpatient reimbursable operating cost component of case based rates for annual rate periods beginning on or after January first, nineteen hundred eighty-eight.

8. Capital related inpatient expenses. (a) Capital related inpatient expenses including but not limited to straight line depreciation on buildings and non-movable equipment, accelerated depreciation on major movable equipment if requested by the hospital, rentals and interest on capital debt (or for hospitals financed pursuant to article twenty-eight-B of this chapter, such expenses, including amortization in lieu of depreciation, as determined pursuant to the reimbursement regulations promulgated pursuant to such article and article twenty-eight of this chapter), shall be included in rates of payment determined pursuant to this section based on a budget for capital related inpatient expenses and subsequently reconciled to actual expenses and statistics through appropriate audit procedures. General hospitals shall submit to the commissioner, at least one hundred twenty days prior to the commencement of each year, a schedule of capital related inpatient expenses for the forthcoming year. Any capital expenditure which requires or required approval pursuant to this article must have received such approval for any capital related expense generated by such capital expenditure to be included in rates of payment. The basis for determining capital related inpatient expenses shall be the lesser of actual cost or the final amount specifically approved for the construction of the capital asset. The submitted budget may include the capital related inpatient expenses for all existing capital assets as well as estimates of capital related inpatient expenses for capital assets to be acquired or placed in use prior to the commencement of the rate year or during the rate year provided all required approvals have been obtained.

The council shall adopt, with the approval of the commissioner,

regulations to:

- (i) identify by type the eligible capital related inpatient expenses;
- (ii) safeguard the future financial viability of voluntary, non-profit general hospitals by requiring funding of inpatient depreciation on building and fixed and movable equipment;
- (iii) provide authorization to adjust inpatient rates by advancing payment of depreciation as needed, in instances of capital debt related financial distress of voluntary, non-profit general hospitals; and
- (iv) provide a methodology for the reimbursement treatment of sales.

(b) Capital related inpatient expenses shall be included in case based payments based on the hospital's average capital related inpatient expenses per discharge. Adjustments shall be made to capital related costs and statistics to reflect capital related inpatient expenses reimbursed on a per diem basis in accordance with paragraphs (a), (d), (e), (g) and (i) of subdivision four of this section.

(c) (i) In order to reconcile capital related inpatient expenses included in rates of payment based on a budget to actual expenses and statistics for the rate period for a general hospital, rates of payment for a general hospital shall be adjusted to reflect the dollar value of the difference between capital related inpatient expenses included in the computation of rates of payment for a prior rate period based on a budget and actual capital related inpatient expenses for such prior rate period, each as determined in accordance with paragraph (a) of this subdivision, adjusted to reflect increases or decreases in volume of service in such prior rate period compared to statistics applied in determining the capital related inpatient expenses component of rates of payment based on a budget for such prior rate period.

(ii) For rates effective April first, two thousand twenty through March thirty-first, two thousand twenty-one, the budgeted capital-related expenses add-on as described in paragraph (a) of this subdivision, based on a budget submitted in accordance to paragraph (a) of this subdivision, shall be reduced by five percent relative to the rate in effect on such date; and the actual capital expenses add-on as described in paragraph (a) of this subdivision, based on actual expenses and statistics through appropriate audit procedures in accordance with paragraph (a) of this subdivision shall be reduced by five percent relative to the rate in effect on such date.

(iii) For rates effective April first, two thousand twenty-one through September thirtieth, two thousand twenty-four, the budgeted capital-related expenses add-on as described in paragraph (a) of this subdivision, based on a budget submitted in accordance to paragraph (a) of this subdivision, shall be reduced by ten percent relative to the rate in effect on such date; and the actual capital expenses add-on as described in paragraph (a) of this subdivision, based on actual expenses and statistics through appropriate audit procedures in accordance with paragraph (a) of this subdivision shall be reduced by ten percent relative to the rate in effect on such date.

(iv) For rates effective October first, two thousand twenty-four through March thirty-first, two thousand twenty-six, the budgeted capital-related expenses add-on as described in paragraph (a) of this subdivision, based on a budget submitted in accordance with paragraph (a) of this subdivision, shall be reduced by twenty percent relative to the rate in effect on such date; and the actual capital expenses add-on as described in paragraph (a) of this subdivision shall be reduced by twenty percent relative to the rate in effect on such date.

(v) For rates effective on and after April first, two thousand twenty-six, the budgeted capital-related expenses add-on as described in paragraph (a) of this subdivision, based on a budget submitted in accordance with paragraph (a) of this subdivision, shall be reduced by ten percent relative to the rate in effect on such date; and the actual capital expenses add-on as described in paragraph (a) of this subdivision shall be reduced by ten percent relative to the rate in effect on such date. Such rate adjustments shall be subject to federal financial participation.

(vi) For any rate year, all reconciliation add-on amounts calculated for the period of April first, two thousand twenty through September thirtieth, two thousand twenty-four shall be reduced by ten percent, and all reconciliation recoupment amounts calculated for the period of April first, two thousand twenty through September thirtieth, two thousand twenty-four shall increase by ten percent.

(vii) For any rate year, all reconciliation add-on amounts calculated for the period October first, two thousand twenty-four through March thirty-first, two thousand twenty-six shall be reduced by twenty percent, and all reconciliation recoupment amounts calculated for the

period October first, two thousand twenty-four through March thirty-first, two thousand twenty-six, shall increase by twenty percent. Such rate adjustments shall be subject to federal financial participation.

(viii) For any rate year, all reconciliation add-on amounts calculated on and after April first, two thousand twenty-six shall be reduced by ten percent, and all reconciliation recoupment amounts calculated on or after April first, two thousand twenty-six shall increase by ten percent. Such rate adjustments shall be subject to federal financial participation.

(ix) Notwithstanding any inconsistent provision of subparagraph (i) of paragraph (e) of subdivision nine of this section, capital related inpatient expenses of a general hospital included in the computation of rates of payment based on a budget shall not be included in the computation of a volume adjustment made in accordance with such subparagraph. Adjustments to rates of payment for a general hospital made pursuant to this paragraph shall be made in accordance with paragraph (c) of subdivision eleven of this section. Such adjustments shall not be carried forward except for such volume adjustment as may be authorized in accordance with subparagraph (i) of paragraph (e) of subdivision nine of this section for such general hospital.

* (e) Notwithstanding any inconsistent provision of this subdivision, commencing April first, nineteen hundred ninety-five, when a factor for reconciliation of budgeted capital related inpatient expenses to actual capital related inpatient expenses for a prior year is included in the capital related inpatient expenses component of rates of payment, such capital related inpatient expenses component of rates of payment shall be reduced by the commissioner by the difference between the reconciled capital related inpatient expenses included in rates of payment determined in accordance with paragraphs (a), (b) and (c) of this subdivision for such prior year and capital related inpatient expenses for such prior year calculated based on the hospital's average capital related inpatient expenses computed on a per diem basis.

* NB Effective through March 31, 2029

* (f) Notwithstanding any inconsistent provision of this section, commencing April first, nineteen hundred ninety-five for purposes of determining the capital related inpatient expenses component of rates of

payment for patients eligible for payments made by state governmental agencies for a rate year, the submitted budget for capital related inpatient expenses of a general hospital applicable to the rate year shall be decreased by the commissioner to reflect the percentage amount by which the budget for the base year two years prior to the rate year for capital related inpatient expenses of the hospital exceeded actual expenses.

* NB Effective through March 31, 2029

* (g) Notwithstanding any inconsistent provision of this article, commencing April first, nineteen hundred ninety-five for rates of payment for patients eligible for payments made by state governmental agencies, the capital related inpatient expenses component determined in accordance with paragraph (a) of this subdivision and the capital cost per visit components determined in accordance with subparagraphs (i) and (ii) of paragraph (g) of subdivision two of section twenty-eight hundred seven of this article shall be adjusted by the commissioner to exclude such expenses related to:

- (i) forty-four percent of the costs of major movable equipment; and
- (ii) staff housing.

* NB Effective through March 31, 2029

9. Adjustments. For annual rate periods beginning on or after January first, nineteen hundred eighty-eight:

(a) The commissioner shall on his own initiative, or on the basis of a request from a general hospital, adjust an established rate to reflect:

(i) the reduction of costs related to the elimination of a general hospital inpatient service in instances where the costs of such service were included in the rate established; and

(ii) the correction of errors or omissions of data or in computation.

(b) General hospitals may request and the commissioner shall consider an adjustment to an established rate to reflect increased expenses in excess of costs reported by the general hospital in the nineteen hundred eighty-five cost report, after application of the trend factor, or reconsideration of disallowed expenses based on:

(i) justification of all or a portion of expenses not included in the rate resulting from the cost analysis process contained in subparagraph (i) of paragraph (a) of this subdivision;

(ii) additional operational expenses related to approved construction or service changes;

(iii) the addition of costs related to a state requirement for additional services to be provided or additional costs to be incurred in meeting state and federal requirements;

(iv) additional operational expenses to permit a more efficient and economical method of delivering a service;

(v) increased costs determined to be needed to recruit or maintain an appropriate level of personnel providing professional services to patients; and

(vi) increased costs for compensation of employees.

(c) In determining the reasonableness or justification of an adjustment to an established rate related to subparagraph (vi) of paragraph (b) of this subdivision, the commissioner shall consider:

(i) the fiscal capability of the general hospital to finance such increases from its own resources;

(ii) the past history of the general hospital with respect to compensation increases and allowed compensation trend factors; and

(iii) the economy in the area in which the general hospital is located.

(d) General hospitals may request and the commissioner shall consider a change in assignment among the group categories established pursuant to paragraph (b) of subdivision seven of this section to which the hospital is assigned for purposes of computing group category average reimbursable inpatient operating cost per discharge.

(e) (i) Volume adjustments which would result in revisions in case payment rates shall not be made to reflect increases or decreases in discharges for other than beneficiaries of title XVIII of the federal social security act (medicare) in rate years beginning on or after January first, nineteen hundred eighty-eight, except in those specific instances where a decrease in volume as measured by discharges, including discharges of patients for whom reimbursement is provided on a per diem basis in accordance with paragraph (a) of subdivision eleven of this section, is equal to or greater than one percent of discharges in nineteen hundred eighty-seven for those general hospitals having two hundred or less certified acute care beds and classified as a rural hospital for purposes of determining payment for inpatient services

provided to beneficiaries of title XVIII of the federal social security act (medicare) or under state regulations, based on the total number of inpatient acute care beds for which such general hospital is certified pursuant to the operating certificate issued for such general hospital in accordance with section twenty-eight hundred five of this article in effect on June thirtieth, nineteen hundred ninety, or equal to or greater than ten percent of discharges in nineteen hundred eighty-seven for all other general hospitals, and the failure to make such adjustment seriously impacts on the financial stability of a needed hospital, and except in those specific instances where an increase in volume as measured by discharges is equal to or greater than ten percent of discharges in nineteen hundred eighty-seven. Provided, however, that an adjustment for volume increases shall not apply to those general hospitals having two hundred or less certified acute care beds and classified as a rural hospital for purposes of determining payment for inpatient services provided to beneficiaries of title XVIII of the federal social security act (medicare) or under state regulations, based on the total number of inpatient acute care beds for which such general hospital is certified pursuant to the operating certificate issued for such general hospital in accordance with section twenty-eight hundred five of this article in effect on June thirtieth, nineteen hundred ninety. For general hospitals and distinct units of general hospitals not reimbursed on a case based payment per discharge basis, volume adjustments may be made during the above indicated rate years in accordance with regulations adopted by the council and approved by the commissioner.

(ii) The commissioner shall adjust the rates for those general hospitals and units of general hospitals excluded from case payment in accordance with paragraph (e) or (g) of subdivision four of this section for case mix changes for other than beneficiaries of title XVIII of the federal social security act (medicare).

(f) General hospitals that did not qualify for a volume adjustment for the nineteen hundred eighty-six and nineteen hundred eighty-seven rate periods for rates of payment determined in accordance with section twenty-eight hundred seven-a of this article may request and the commissioner shall consider an adjustment to an established case based rate of payment for nineteen hundred eighty-eight based on increases in

volume as measured by discharges, based on a comparison between nineteen hundred eighty-five and nineteen hundred eighty-seven discharges, excluding in such comparison discharges of patients who are beneficiaries of title XVIII of the federal social security act (medicare) and discharges related to transfer cases (transferring hospital) and short stay cases as defined in this section, provided such general hospital meets performance criteria established in accordance with rules and regulations adopted by the council and approved by the commissioner. Such criteria shall include but need not be limited to: maintenance of like patient occupancy rates for the rate periods nineteen hundred eighty-five, nineteen hundred eighty-six and nineteen hundred eighty-seven; a reduction in patient length of stay for other than beneficiaries of title XVIII of the federal social security act (medicare) based on a comparison with nineteen hundred eighty-five data; and an expanded use of ambulatory surgery by the general hospital based on a comparison with nineteen hundred eighty-five data. Such adjustment shall consider, but need not be limited to, the variable costs related to volume changes in accordance with rules and regulations adopted by the council and approved by the commissioner.

(g) All appeals shall be submitted to the commissioner, who may submit a copy of the appeal to interested parties for the purpose of providing an opportunity for comment within a specified time period.

(h) The commissioner shall act upon all properly documented appeals for adjustments concerning base year costs by November first of the calendar year for which the rate is effective provided that all information necessary to determine whether an adjustment is justified is submitted by the facility prior to May first of such year. In the event such an appeal is filed by May first, but information necessary to determine whether an adjustment is justified is submitted after such date, the commissioner shall act on the appeal within six months after receiving the necessary information.

* 10. Trend factors. (a) The commissioner, in accordance with the methodology developed for rate periods through March thirty-first, two thousand, for rates of payment for state governmental agencies and through December thirty-first, nineteen hundred ninety-six for rates of payment for all other payors pursuant to paragraph (b) of this subdivision, shall establish trend factors to project for the effects of

inflation. The factors shall be applied to the appropriate portion of reimbursable costs. The methodology for developing the trend factor shall include the appropriate external price indicators and shall also include the data from major collective bargaining agreements as reported quarterly by the federal department of labor, bureau of labor statistics, for non-supervisory employees.

(b) The methodology shall be developed for rate periods through March thirty-first, two thousand, for rates of payment for state governmental agencies and through December thirty-first, nineteen hundred ninety-six for rates of payment for all other payors by four independent consultants with expertise in health economics or reimbursement methodologies for health-related services appointed by the commissioner. For nineteen hundred ninety-six, through March thirty-first, two thousand, the commissioner shall apply the nineteen hundred ninety-five trend factor methodology. The commissioner shall monitor the actual price movements of the external price indicators used in the methodology for one interim adjustment to the trend factors to reflect such price movements and one final adjustment to the trend factors to reflect such price movements. At the same time adjustments are made to the trend factors in accordance with this paragraph, adjustments shall be made to all inpatient rates of payment affected by the adjusted trend factors.

(c) (1) For rate periods on and after April first, two thousand, the commissioner shall establish trend factors for rates of payment for state governmental agencies to project for the effects of inflation except that such trend factors shall not be applied to services for which rates of payment are established by the commissioners of the department of mental hygiene. The factors shall be applied to the appropriate portion of reimbursable costs.

(2) In developing trend factors for such rates of payment, the commissioner shall use the most recent Congressional Budget Office estimate of the rate year's U.S. Consumer Price Index for all urban consumers published in the Congressional Budget Office Economic and Budget Outlook after June first of the rate year prior to the year for which rates are being developed.

(3) After the final U.S. Consumer Price Index (CPI) for all urban consumers is published by the United States Department of Labor, Bureau

of Labor Statistics, for a particular rate year, the commissioner shall reconcile such final CPI to the projection used in subparagraph two of this paragraph and any difference will be included in the prospective trend factor for the current year.

(4) At the time adjustments are made to the trend factors in accordance with this paragraph, adjustments shall be made to all inpatient rates of payment affected by the trend factor adjustment.

* NB Effective until December 31, 2029

* 10. Trend factors. (a) The commissioner, in accordance with the methodology developed pursuant to paragraph (b) of this subdivision, shall establish trend factors to project for the effects of inflation. The factors shall be applied to the appropriate portion of reimbursable costs. The methodology for developing the trend factor shall include the appropriate external price indicators and shall also include the data from major collective bargaining agreements as reported quarterly by the federal department of labor, bureau of labor statistics, for non-supervisory employees.

(b) The methodology shall be developed by four independent consultants with expertise in health economics or reimbursement methodologies for health-related services appointed by the commissioner. On or about September first of each year, the consultants shall provide to the commissioner and the council a report in writing detailing the methodology to be used to determine the trend factors for the subsequent twelve month period commencing January first. The commissioner shall monitor the actual price movements during this twelve month period of the external price indicators used in the methodology, shall report the results of the monitoring to the consultants and shall implement the recommendations of the consultants for one prospective interim annual adjustment to the trend factors to reflect such price movements and to be effective on January first, one year after the initial trend factor was established and one prospective final annual adjustment to the trend factors to reflect such price movements and to be effective on January first, two years after the initial trend factor was established. At the same time adjustments are made to the trend factors in accordance with this paragraph, adjustments shall be made to all inpatient rates of payment affected by the adjusted trend factors.

* NB Effective December 31, 2029

11. Special provisions. (a) Notwithstanding any inconsistent provision of this chapter or any other law to the contrary, payment for inpatient hospital services provided on or after January first, nineteen hundred eighty-eight to a patient admitted to a general hospital prior to January first, nineteen hundred eighty-eight otherwise eligible for payment on a case based payment per discharge basis for a diagnosis-related group shall be at the rate of payment for such general hospital for such patient in effect for December thirty-first, nineteen hundred eighty-seven provided, however, that the operating cost components of such rates of payment for inpatient hospital services provided on or after January first, nineteen hundred eighty-eight shall be projected to the rate period by the trend factor determined in accordance with subdivision ten of this section and reconciled on a cumulative basis on or about March thirty-first, nineteen hundred eighty-eight and December thirty-first, nineteen hundred eighty-eight for payment of adjusted rates of payment based on such trend factor adjustment. The component of such rates of payment based on the allowances provided in accordance with paragraphs (e) and (f) of subdivision eight of section twenty-eight hundred seven-a of this article shall be returned to the applicable regional pool created in accordance with subdivision fifteen of such section and distributed in accordance with subdivision sixteen of such section based on needs for the financing of losses resulting from bad debts and the costs of charity care as determined for purposes of nineteen hundred eighty-seven distributions.

(b) The council shall adopt rules and regulations subject to the approval of the commissioner regarding payor payment responsibilities when a patient has coverage with more than one payor for general hospital inpatient services and during a hospital stay exhausts benefits available from the primary payor, or receives services not reimbursed by the primary payor, so that the hospital shall be reimbursed by a secondary payor for services not reimbursed by the primary payor that are included as a benefit of the secondary payor. A primary payor for purposes of this paragraph shall include benefits available pursuant to title XVIII of the federal social security act (medicare).

* (c)(i) Adjustments to rates made pursuant to this section for rate

periods commencing on or after January first, nineteen hundred ninety-seven may be made prospectively or retrospectively on the next following January or July unless otherwise specifically authorized.

(ii) The commissioner may further adjust rates retrospectively for payments by state governmental agencies upon a finding that the failure to do so seriously impacts on a general hospital's financial stability.

(iii) Regardless of whether rates are adjusted prospectively or retrospectively the authorized dollar value of the adjustment shall be the same, calculated by including the retroactive impact of such adjustment if such adjustment is made prospectively. A prospective adjustment to reflect the retroactive impact of an adjustment shall be included in the determination of rates of payment for a prospective rate period based on the methodology applied in accordance with this section for calculation of rates of payment for such prospective rate period. The allowance reflected in payments to a general hospital or a pool related to a prospective adjustment which reflects the retroactive impact of an adjustment shall be computed based on the allowance percentage in effect during the prospective period such adjustment is in effect. No recalculation of the basis for distribution of funds from bad debt and charity care regional pools determined in accordance with subdivision seventeen of this section shall be made for a prospective adjustment which reflects the retroactive impact of an adjustment.

* NB Effective until December 31, 2029

* (c)(i) Adjustments to rates made pursuant to this section shall be made prospectively on the next following January or July unless otherwise specifically authorized provided, however, that adjustments to rates of payment to reflect nineteen hundred eighty-seven data and statistics may be made retrospectively and such retrospective adjustments shall, to the extent practicable, be cumulated for one comprehensive adjustment.

(ii) The commissioner may further adjust rates retrospectively upon a finding that the failure to do so seriously impacts on a general hospital's financial stability.

(iii) Regardless of whether rates are adjusted prospectively or retrospectively the authorized dollar value of the adjustment shall be the same, calculated by including the retroactive impact of such adjustment if such adjustment is made prospectively. A prospective

adjustment to reflect the retroactive impact of an adjustment shall be included in the determination of rates of payment for a prospective rate period based on the methodology applied in accordance with this section for calculation of rates of payment for such prospective rate period, provided, however, that no recalculation of bad debt and charity care allowance percentages determined in accordance with subdivision fourteen of this section shall be made for a prospective adjustment which reflects the retroactive impact of an adjustment. The bad debt and charity care allowance of a general hospital related to a prospective adjustment which reflects the retroactive impact of an adjustment shall be computed based on the bad debt and charity care allowance percentage of such hospital in effect during the prospective period such adjustment is in effect. No recalculation of the basis for distribution of funds from bad debt and charity care regional pools determined in accordance with subdivision seventeen of this section shall be made for a prospective adjustment which reflects the retroactive impact of an adjustment.

* NB Effective December 31, 2029

(d) Working capital. General hospitals may include as a financing or working capital charge an addition of two percent of any valid claim not paid within thirty days of submission or determination of payor liability, whichever is later, and one percent per month thereafter. Financing or working capital charges shall not be applied to hospital billings to third party payors participating in an advance payment system. Any payor not participating in an advance payment system or offering admission billing shall allow interim billing for a patient whose stay exceeds thirty days.

(e) (i) Except for payments made pursuant to the workers' compensation law, the volunteer firefighters' benefit law, or the volunteer ambulance workers' benefit law, a two percent discount from general hospital payments shall be available to all payors whose payments are calculated in accordance with paragraphs (b) and (c) of subdivision one of this section making payment in full to a general hospital for covered hospital services within ten calendar days of receipt from the hospital by the appropriate payor of a bill for such services.

(ii) A three percentage point reduction in the differential of five percent for general hospital payments shall be available to all payors

whose payments are calculated in accordance with paragraph (b) of subdivision one or paragraph (e) of subdivision four of this section which are making payments pursuant to the workers' compensation law, the volunteer firefighters' benefit law, or the volunteer ambulance workers' benefit law when such payments are made in full to a general hospital for covered hospital services within ninety calendar days of receipt from the hospital by the appropriate payor of a bill for such services, and an additional two percentage point reduction shall be available for such payors if such payment is made within forty-five calendar days of receipt of such a bill.

(f) (i) * In order to allow for real increases in general hospital case mix while limiting the effect of potential case mix changes that are the result of changes in coding practices rather than real changes in case mix, the commissioner shall annually for rate periods through December thirty-first, nineteen hundred ninety-six, in accordance with rules and regulations adopted by the council and approved by the commissioner, adjust individual general hospitals' case payment rates determined in accordance with paragraphs (a) and (b) of subdivision one of this section to account for increases in the statewide average case mix, based on increases in statewide average assignment to diagnosis-related groups for all patients other than beneficiaries of title XVIII of the federal social security act (medicare), that exceed the allowable statewide increase determined in accordance with this subparagraph. The commissioner further shall adjust individual general hospitals' case payment rates determined in accordance with this section for state governmental agencies for the periods January first, nineteen hundred ninety-seven through March thirty-first, two thousand and on and after April first, two thousand, in accordance with clause (G) of this subparagraph and to account for increases in statewide average case mix, based on increases in statewide average assignment to diagnosis-related groups based on data only for patients that are eligible for medical assistance pursuant to title eleven of article five of the social services law, including such patients enrolled in health maintenance organizations, that exceed the allowable statewide increase determined in accordance with clause (B-1) of this subparagraph.

* NB Effective until December 31, 2029

* In order to allow for real increases in general hospital case mix

while limiting the effect of potential case mix changes that are the result of changes in coding practices rather than real changes in case mix, the commissioner shall annually for rate periods through December thirty-first, nineteen hundred ninety-six, in accordance with rules and regulations adopted by the council and approved by the commissioner, adjust individual general hospitals' case payment rates determined in accordance with paragraphs (a) and (b) of subdivision one of this section to account for increases in the statewide average case mix, based on increases in statewide average assignment to diagnosis-related groups for all patients other than beneficiaries of title XVIII of the federal social security act (medicare), that exceed the allowable statewide increase determined in accordance with this subparagraph. The commissioner further shall adjust individual general hospitals' case payment rates determined in accordance with this section for state governmental agencies for the periods January first, nineteen hundred ninety-seven through March thirty-first, two thousand in accordance with clause (G) of this subparagraph and to account for increases in statewide average case mix, based on increases in statewide average assignment to diagnosis-related groups based on data only for patients that are eligible for medical assistance pursuant to title eleven of article five of the social services law, including such patients enrolled in health maintenance organizations, that exceed the allowable statewide increase determined in accordance with clause (B-1) of this subparagraph.

* NB Effective and expires December 31, 2029

* In order to allow for real increases in general hospital case mix while limiting the effect of potential case mix changes that are the result of changes in coding practices rather than real changes in case mix, the commissioner shall annually, in accordance with rules and regulations adopted by the council and approved by the commissioner, adjust individual general hospitals' case payment rates determined in accordance with paragraphs (a) and (b) of subdivision one of this section to account for increases in the statewide average case mix, based on increases in statewide average assignment to diagnosis-related groups for all patients other than beneficiaries of title XVIII of the federal social security act (medicare), that exceed the allowable statewide increase determined in accordance with this subparagraph.

* NB Effective December 31, 2029

(A) The increase in the statewide average case mix in a rate year during the period January first, nineteen hundred eighty-eight through December thirty-first, nineteen hundred ninety-three from the nineteen hundred eighty-seven statewide average case mix shall not exceed two percent in nineteen hundred eighty-eight compared to nineteen hundred eighty-seven, three percent in nineteen hundred eighty-nine compared to nineteen hundred eighty-seven, four percent in nineteen hundred ninety compared to nineteen hundred eighty-seven, five percent in nineteen hundred ninety-one compared to nineteen hundred eighty-seven, and, notwithstanding any inconsistent rule or regulation, for rates of payment for state governmental agencies six percent in nineteen hundred ninety-two compared to nineteen hundred eighty-seven and seven percent in nineteen hundred ninety-three compared to nineteen hundred eighty-seven, and for rates of payment for payors other than state governmental agencies six and seven-tenths percent in nineteen hundred ninety-two compared to nineteen hundred eighty-seven and seven percent in nineteen hundred ninety-three compared to nineteen hundred eighty-seven.

* (B) The increase in the statewide average case mix in a rate year during the period January first, nineteen hundred ninety-four through December thirty-first, nineteen hundred ninety-six from the nineteen hundred ninety-two statewide average case mix, plus adjustments, shall not exceed: for rates of payment for state governmental agencies two percent in the period January first, nineteen hundred ninety-four through June thirtieth, nineteen hundred ninety-four, and, notwithstanding any inconsistent rule or regulation, six and two-tenths percent in the period July first, nineteen hundred ninety-four through December thirty-first, nineteen hundred ninety-four, three percent in the period January first, nineteen hundred ninety-five through March thirty-first, nineteen hundred ninety-five, two percent in the period April first, nineteen hundred ninety-five through December thirty-first, nineteen hundred ninety-five, and three percent in the period January first, nineteen hundred ninety-six through December thirty-first, nineteen hundred ninety-six; and for rates of payment for payors other than state governmental agencies two percent in nineteen hundred ninety-four, three percent in nineteen hundred ninety-five, and four

percent in the period January first, nineteen hundred ninety-six through December thirty-first, nineteen hundred ninety-six. Adjustments to the nineteen hundred ninety-two statewide average case mix shall mean an adjustment for any increase in nineteen hundred ninety-two statewide average case mix compared to nineteen hundred eighty-seven statewide average case mix in excess of six percent of nineteen hundred eighty-seven statewide average case mix and a further adjustment to reflect that measurement of case mix increase from the nineteen hundred ninety-two statewide average case mix rather than the nineteen hundred eighty-seven statewide average case mix reflects the increase in statewide average case mix from nineteen hundred eighty-seven to nineteen hundred ninety-two in order to maintain the effective maximum rate of allowable statewide average case mix increases at a percentage per year of the nineteen hundred eighty-seven statewide average case mix. Nineteen hundred ninety-two case mix shall be determined based on nineteen hundred ninety-two data received by the department by April thirtieth, nineteen hundred ninety-three.

* NB Effective until December 31, 2029

* (B) The increase in the statewide average case mix in a rate year during the period January first, nineteen hundred ninety-four through June thirtieth, nineteen hundred ninety-six from the nineteen hundred ninety-two statewide average case mix, plus adjustments, shall not exceed: for rates of payment for state governmental agencies two percent in the period January first, nineteen hundred ninety-four through June thirtieth, nineteen hundred ninety-four, and, notwithstanding any inconsistent rule or regulation, six and two-tenths percent in the period July first, nineteen hundred ninety-four through December thirty-first, nineteen hundred ninety-four, three percent in the period January first, nineteen hundred ninety-five through March thirty-first, nineteen hundred ninety-five, and two percent in the period April first, nineteen hundred ninety-five through December thirty-first, nineteen hundred ninety-five, and three percent in the period January first, nineteen hundred ninety-six through June thirtieth, nineteen hundred ninety-six; and for rates of payment for payors other than state governmental agencies two percent in nineteen hundred ninety-four, three percent in nineteen hundred ninety-five, and four percent in the period January first, nineteen hundred ninety-six through June thirtieth,

nineteen hundred ninety-six. Adjustments to the nineteen hundred ninety-two statewide average case mix shall mean an adjustment for any increase in nineteen hundred ninety-two statewide average case mix compared to nineteen hundred eighty-seven statewide average case mix in excess of six percent of nineteen hundred eighty-seven statewide average case mix and a further adjustment to reflect that measurement of case mix increase from the nineteen hundred ninety-two statewide average case mix rather than the nineteen hundred eighty-seven statewide average case mix reflects the increase in statewide average case mix from nineteen hundred eighty-seven to nineteen hundred ninety-two in order to maintain the effective maximum rate of allowable statewide average case mix increases at a percentage per year of the nineteen hundred eighty-seven statewide average case mix. Nineteen hundred ninety-two case mix shall be determined based on nineteen hundred ninety-two data received by the department by April thirtieth, nineteen hundred ninety-three.

* NB Effective December 31, 2029

(B-1) The increase in the statewide average case mix in the periods January first, nineteen hundred ninety-seven through March thirty-first, two thousand and on and after April first, two thousand through March thirty-first, two thousand six and on and after April first, two thousand six through March thirty-first, two thousand seven, and on and after April first, two thousand seven through March thirty-first, two thousand nine, and on and after April first, two thousand nine through March thirty-first, two thousand eleven, from the statewide average case mix for the period January first, nineteen hundred ninety-six through December thirty-first, nineteen hundred ninety-six shall not exceed one percent for nineteen hundred ninety-seven, two percent for nineteen hundred ninety-eight, three percent for the period January first, nineteen hundred ninety-nine through September thirtieth, nineteen hundred ninety-nine, four percent for the period October first, nineteen hundred ninety-nine through December thirty-first, nineteen hundred ninety-nine, and four percent for two thousand plus an additional one percent per year thereafter, based on comparison of data only for patients that are eligible for medical assistance pursuant to title eleven of article five of the social services law, including such patients enrolled in health maintenance organizations.

(C) Rate year case mix shall be determined based on rate year data

received by the department by April thirtieth next following the end of the rate year. Case mix may be determined based on general hospital data received or amended after such due dates provided, however, that a general hospital that does not submit the appropriate data in a timely manner shall be subject to the provisions of section twelve-d of this chapter.

* (D) If in any rate period on an annualized basis the cumulative case mix increase exceeds the allowable statewide increase, rates of payment to general hospitals shall be adjusted in accordance with rules and regulations adopted by the council and approved by the commissioner which shall contain the specific methodology to allocate the reduction among general hospitals, in order to reduce the effect of the statewide increase on rates of payment to reflect the allowable increase.

Notwithstanding any inconsistent provision of this paragraph, rate adjustments for purposes of this paragraph shall be made on a six month rate period basis for the period July first, nineteen hundred ninety-four through December thirty-first, nineteen hundred ninety-four. The retroactive impact of adjustments to rates of payment for payors other than state governmental agencies based on the amendments to this paragraph effective July first, nineteen hundred ninety-four shall be reflected in a prospective adjustment to rates of payment for such payors for the period July first, nineteen hundred ninety-four through December thirty-first, nineteen hundred ninety-four.

* NB Effective until December 31, 2029

* (D) If in any rate year the cumulative case mix increase exceeds the allowable statewide increase, rates of payment to general hospitals shall be adjusted in accordance with rules and regulations adopted by the council and approved by the commissioner which shall contain the specific methodology to allocate the reduction among general hospitals, in order to reduce the effect of the statewide increase on rates of payment to reflect the allowable increase. Notwithstanding any inconsistent provision of this paragraph, rate adjustments for purposes of this paragraph shall be made on a six month rate period basis for the period July first, nineteen hundred ninety-four through December thirty-first, nineteen hundred ninety-four. The retroactive impact of adjustments to rates of payment for payors other than state governmental agencies based on the amendments to this paragraph effective July first,

nineteen hundred ninety-four shall be reflected in a prospective adjustment to rates of payment for such payors for the period July first, nineteen hundred ninety-four through December thirty-first, nineteen hundred ninety-four.

* NB Effective December 31, 2029

(E) Such methodology shall take into account past trends of individual general hospitals' case mix changes, and, within the aggregate allowable statewide increase in case mix, permit general hospitals to appeal to the commissioner their proposed allocation of a reduction in rates of payment related to increases in statewide average case mix based on such factors as changes in hospital service delivery and referral patterns.

(F) Case mix changes due to acquired immune deficiency syndrome, tuberculosis, epidemics or other catastrophes resulting in extraordinary hospital utilization shall not be subject to this limitation.

* (G) Adjustments determined in accordance with clause (B) of this subparagraph for the period January first, nineteen hundred ninety-six through December thirty-first, nineteen hundred ninety-six on a final basis, and in accordance with subparagraph (ii) of this paragraph on an interim basis, shall be applied to rates of payment for state governmental agencies during the period January first, nineteen hundred ninety-seven through March thirty-first, two thousand and periods on and after April first, two thousand.

* NB Expires December 31, 2029

* (G) Adjustments determined in accordance with clause (B) of this subparagraph for the period January first, nineteen hundred ninety-six through December thirty-first, nineteen hundred ninety-six on a final basis, and in accordance with subparagraph (ii) of this paragraph on an interim basis, shall be applied to rates of payment for state governmental agencies during the period January first, nineteen hundred ninety-seven through March thirty-first, two thousand.

* NB Effective and repealed December 31, 2029

* (ii) (A) The commissioner shall, in accordance with rules and regulations adopted by the council and approved by the commissioner, for purposes of payments on an interim basis periodically compute an adjustment to individual general hospitals' case payment rates for prior periods for the payor categories specified in paragraphs (a) and (b) of subdivision one of this section to account for increases in the

statewide average case mix, based on increases in statewide average assignment to diagnosis-related groups for all patients other than beneficiaries of title XVIII of the federal social security act (medicare), that exceed the allowable statewide increase. The increase in the statewide average case mix in a rate year during the period January first, nineteen hundred eighty-eight through December thirty-first, nineteen hundred ninety-three from the nineteen hundred eighty-seven statewide average case mix and in a rate year during the period January first, nineteen hundred ninety-four through December thirty-first, nineteen hundred ninety-six from the adjusted nineteen hundred ninety-two statewide average case mix shall not exceed the allowable statewide increase as determined in accordance with subparagraph (i) of this paragraph. Adjustments may be made on a quarterly basis consistent with this annual limitation. If in any quarter of the rate year the cumulative case mix increase for the rate year exceeds the allowable statewide increase, payment rates to general hospitals shall be adjusted in accordance with rules and regulations adopted by the council and approved by the commissioner which shall contain the specific methodology to allocate the reduction among general hospitals provided, however, that any funds to be recovered from hospitals based on such adjustments for prior periods shall be recovered by prospective adjustment of rates of payment in accordance with paragraph (c) of this subdivision, in order to reduce the effect of the statewide increase on rates of payment to reflect the allowable increase, taking into consideration the effect of any adjustment applicable in the rate period made in accordance with subparagraph (iii) of this paragraph. Case mix changes due to acquired immune deficiency syndrome, tuberculosis, epidemics or other catastrophes resulting in extraordinary hospital utilization shall not be subject to this limitation, pursuant to rules and regulations adopted by the council and approved by the commissioner.

(B) The commissioner further shall for purposes of payments on an interim basis periodically compute an adjustment to individual general hospitals' case payment rates for prior periods for payments made by state governmental agencies to account for increases in the statewide average case mix, based on increases in statewide average assignment to diagnosis-related groups for patients that are eligible for medical

assistance pursuant to title eleven of article five of the social services law eligible for payments made by state governmental agencies or by health maintenance organizations, that exceed the allowable statewide increase as determined in accordance with clause (B-1) of subparagraph (i) of this paragraph.

* NB Effective until December 31, 2029

* (ii) The commissioner shall, in accordance with rules and regulations adopted by the council and approved by the commissioner, for purposes of payments on an interim basis periodically compute an adjustment to individual general hospitals' case payment rates for prior periods for the payor categories specified in paragraphs (a) and (b) of subdivision one of this section to account for increases in the statewide average case mix, based on increases in statewide average assignment to diagnosis-related groups for all patients other than beneficiaries of title XVIII of the federal social security act (medicare), that exceed the allowable statewide increase. The increase in the statewide average case mix in a rate year during the period January first, nineteen hundred eighty-eight through December thirty-first, nineteen hundred ninety-three from the nineteen hundred eighty-seven statewide average case mix and in a rate year during the period January first, nineteen hundred ninety-four through June thirtieth, nineteen hundred ninety-six from the adjusted nineteen hundred ninety-two statewide average case mix shall not exceed the allowable statewide increase as determined in accordance with subparagraph (i) of this paragraph. Adjustments may be made on a quarterly basis consistent with this annual limitation. If in any quarter of the rate year the cumulative case mix increase for the rate year exceeds the allowable statewide increase, payment rates to general hospitals shall be adjusted in accordance with rules and regulations adopted by the council and approved by the commissioner which shall contain the specific methodology to allocate the reduction among general hospitals provided, however, that any funds to be recovered from hospitals based on such adjustments for prior periods shall be recovered by prospective adjustment of rates of payment in accordance with paragraph (c) of this subdivision, in order to reduce the effect of the statewide increase on rates of payment to reflect the allowable increase, taking into consideration the effect of any adjustment

applicable in the rate period made in accordance with subparagraph (iii) of this paragraph. Case mix changes due to acquired immune deficiency syndrome, tuberculosis, epidemics or other catastrophes resulting in extraordinary hospital utilization shall not be subject to this limitation, pursuant to rules and regulations adopted by the council and approved by the commissioner.

* NB Effective December 31, 2029

(iii) The commissioner shall, in accordance with rules and regulations adopted by the council and approved by the commissioner, periodically prospectively adjust for purposes of payments on an interim basis individual general hospitals' case payment rates for the payor categories specified in paragraphs (a) and (b) of subdivision one of this section to account for increases in statewide average assignment to diagnosis-related groups which exceed the allowable statewide increase as determined in accordance with subparagraph (ii) of this paragraph.

(iv) Rates of payment of a general hospital shall be adjusted in accordance with paragraph (c) of this subdivision to reflect the difference between an individual general hospital's case payment rates adjusted in accordance with subparagraph (i) of this paragraph for a rate period and such rates determined in accordance with paragraphs (a) and (b) of subdivision one of this section, taking into consideration any adjustment to case payment rates applicable for such rate period made in accordance with subparagraphs (ii) and (iii) and for the periods beginning on or after July first, nineteen hundred ninety, subparagraph (v) of this paragraph.

(v) Notwithstanding any inconsistent provision of law, for the periods beginning on or after July first, nineteen hundred ninety and subsequent annual rate periods beginning January first the commissioner shall reduce, in accordance with the methodology adopted for purposes of adjustments pursuant to subparagraph (ii) of this paragraph, for purposes of payments on an interim basis individual general hospitals' case payment rates applicable to state governmental agencies for a prospective period to reflect an estimate of the cumulative increase in statewide average assignment to diagnosis-related groups for prior periods including prior quarters of the rate period which exceeds the allowable statewide increase specified in subparagraph (i) of this paragraph for the prospective period. Such adjustment if effected for

less than an annual prospective rate period shall reflect an annualized adjustment.

(vi) Notwithstanding any inconsistent provision of law, adjustments to rates of payment pursuant to this paragraph based on nineteen hundred ninety-three data that reflects an increase in statewide average case mix compared to nineteen hundred eighty-seven that exceeds the increase based on nineteen hundred ninety-two data in statewide average case mix compared to nineteen hundred eighty-seven shall not be implemented until April first, nineteen hundred ninety-five and shall be made prospectively for rates of payment issued effective April first, nineteen hundred ninety-five including the impact of such adjustment for the period January first, nineteen hundred ninety-five through March thirtieth, nineteen hundred ninety-five.

(g) Notwithstanding any other provisions of this section, all costs and statistics that are related to inpatient services provided to beneficiaries of title XVIII of the federal social security act (medicare) shall not be included in the establishment of any payment rates computed in accordance with the provisions of this section.

(i) Unless provided otherwise in specific provisions included in this section, the exclusion of costs which are related to routine inpatient services provided to beneficiaries of title XVIII of the federal social security act (medicare) and covered by title XVIII of the federal social security act (medicare) shall be based on the nineteen hundred eighty-five inpatient days actually paid on behalf of beneficiaries of title XVIII of the federal social security act (medicare) plus any days for such beneficiaries not paid on the basis of a decision by a review agent that the days were unnecessary. Ancillary costs related to inpatient services provided to beneficiaries of title XVIII of the federal social security act (medicare) and covered by title XVIII of the federal social security act (medicare) shall be excluded on the basis of the nineteen hundred eighty-five cost center ratio of hospital ancillary inpatient service charges related to such beneficiaries to total hospital cost center inpatient ancillary services charges applied to cost center costs. Inpatient malpractice insurance costs which are attributable to title XVIII of the federal social security act (medicare) shall be excluded based on the methodology employed by title XVIII of the federal social security act (medicare) to identify such

costs.

(ii) Costs and statistics related to inpatient services provided to beneficiaries of title XVIII of the federal social security act (medicare) and covered by a secondary payor shall be excluded in accordance with rules and regulations adopted by the council and approved by the commissioner in the determination of case payment rates computed in accordance with the provisions of this section.

(h)(i) Any malpractice insurance costs which are the result of general hospitals having to purchase or provide excess malpractice insurance coverage for physicians in accordance with section nineteen of chapter two hundred ninety-four of the laws of nineteen hundred eighty-five or section eighteen of chapter two hundred sixty-six of the laws of nineteen hundred eighty-six as amended shall not be included in calculating malpractice insurance costs for purposes of paragraph (e) of subdivision one of this section.

(ii) The component of general hospital reimbursable inpatient operating costs based on the general hospital's inpatient malpractice insurance costs plus the component of special additional inpatient operating costs determined in accordance with subparagraphs (i) and (iii) of paragraph (e) of subdivision one of this section specifically related to inpatient malpractice insurance costs used to determine payment rates for annual rate periods beginning on or after January first, nineteen hundred eighty-eight shall be allocated among the payors in accordance with regulations adopted by the council and approved by the commissioner.

(i) For patients discharged during the period April first, nineteen hundred ninety-two through March thirty-first, nineteen hundred ninety-three insured under a commercial insurer licensed to do business in this state and authorized to write accident and health insurance and whose policy provides inpatient hospital coverage on an expense incurred basis, the payment rate shall be increased in addition to the payment rate conversion factor of thirteen percent by a supplementary payment rate conversion factor of eleven percent for a total conversion factor of twenty-four percent. This paragraph shall not apply to payments pursuant to the workers' compensation law, the volunteer firefighters' benefit law, the volunteer ambulance workers' benefit law, the comprehensive motor vehicle insurance reparations act, the terms of any

personal injury liability insurance policy, marine and inland marine insurance policy or marine protections and indemnity insurance policy.

(j) No operating cost ceilings or disallowances other than those applicable for purposes of the determination of a general hospital's reimbursable inpatient operating cost base in accordance with paragraph (d) of subdivision one of this section shall be applied to general hospitals, except for any cost ceilings or disallowances applied for purposes of subdivision twenty-four of this section and cost disallowances for general hospitals with rates based on budgeted costs.

(k) Notwithstanding any inconsistent provision of this section, case based rates of payment per discharge may, in accordance with rules and regulations adopted by the council and approved by the commissioner, reflect incorporation of severity of illness considerations in the methodology to determine such rates of payment.

(l) Notwithstanding any inconsistent provision of this section, nothing in this section shall preclude a modification to case based rates of payment per discharge in accordance with rules and regulations adopted by the council and approved by the commissioner to reflect readmission of an individual or unnecessary multiple admissions of an individual to a general hospital or general hospitals.

(m) Notwithstanding any inconsistent provision of this section, a general hospital that exceeded maximum charge limitations as determined by the commissioner in the rate periods nineteen hundred eighty-four through nineteen hundred eighty-seven may be authorized in accordance with rules and regulations adopted by the council and approved by the commissioner to reduce payments determined pursuant to this section in order to effect a reduction equivalent to such amount by which such general hospital exceeded maximum charge limitations.

(n) (i) For a patient discharged from a general hospital on or after August first, nineteen hundred eighty-eight and covered by a payor included in the payor categories specified in paragraph (a) or (b) of subdivision one of this section that provides for a percentage coinsurance responsibility by or on behalf of such patient for covered hospital services: (A) the dollar value of such percentage coinsurance responsibility by or on behalf of such patient shall be determined by multiplying such coinsurance percentage by the hospital's charges for such patient, determined in accordance with paragraph (c) of subdivision

one of this section or paragraph (e) of subdivision four of this section for a general hospital or distinct unit of a general hospital not reimbursed on case based payments, for the services covered by the payor, considering any applicable deductibles, and (B) the payment due to a general hospital for reimbursement of inpatient hospital services by such payor shall be determined by multiplying the payment rate determined in accordance with this section for such patient for covered hospital services by the coinsurance percentage for which such payor is responsible, considering any applicable deductibles.

(ii) A patient covered by a payor included in the payor categories specified in paragraph (a) or (b) of subdivision one of this section shall be deemed liable for the payment rate for inpatient hospital services for such patient for covered services determined in accordance with this section based on the rate of payment for such payor, provided, however, that for a patient discharged from a general hospital on or after August first, nineteen hundred eighty-eight a percentage coinsurance responsibility by or on behalf of such patient shall be deemed satisfied by payment of the dollar value of such percentage coinsurance responsibility determined in accordance with clause (A) of subparagraph (i) of this paragraph.

(o) No general hospital shall refuse to provide hospital services to a person presented or proposed to be presented for admission to such general hospital by a representative of a correctional facility or a local correctional facility as defined respectively in subdivisions four, fifteen and sixteen of section two of the correction law based solely on the grounds such person is an incarcerated individual of such correctional facility or local correctional facility. No general hospital may demand or request any charge for hospital services provided to such person in addition to the charges or rates authorized in accordance with this article, except for charges for identifiable additional hospital costs associated with or reasonable additional charges associated with security arrangements for such person.

(p)(i) Notwithstanding any inconsistent provision of law, a general hospital that provides an inpatient component of hospice care for persons eligible for payments to a hospice by a government agency made in accordance with subdivisions two and three of section four thousand twelve of this chapter shall be reimbursed for such inpatient services

by or on behalf of the hospice at a rate of payment no greater than the applicable rate of payment determined in accordance with subdivisions two and three of section four thousand twelve of this chapter for such hospice and no general hospital may charge for such inpatient services rendered an amount in excess of such applicable rate of payment.

(ii) Notwithstanding any inconsistent provision of law, a general hospital that provides in accordance with contractual arrangements between a hospice and such general hospital an inpatient component of hospice care for persons who are not eligible for payments to the hospice by a government agency made in accordance with subdivisions two and three of section four thousand twelve of this chapter or as beneficiaries of title XVIII of the federal social security act (medicare) shall be reimbursed for such inpatient services by or on behalf of the hospice in accordance with such contractual arrangements.

(q) A third-party payor specified in paragraph (a), (b) or (c) of subdivision one of this section, with the exception of governmental agencies, shall provide the general hospital with a remittance advice at the time payment or adjustment to such payment is made. Such remittance advice shall include the patient's name, date of service, admission or financial control number if available and diagnosis-related group classification number if applicable and if different than that billed by the hospital. Such remittance advice shall also include (i) the amount or percentage payable under the policy or certificate after deductibles, co-payments and any other reduction of the amount billed including deductions for prompt payment; and (ii) a specific explanation of any denial, reduction, or other reason including any other third-party payor coverage, for not providing full reimbursement of the amount claimed.

* (r) Notwithstanding any inconsistent provision of this section, for purposes of establishing rates of payment by state governmental agencies for general hospital inpatient services provided for discharges on or after April first, nineteen hundred ninety-five, the reimbursable base year inpatient administrative and general costs of a general hospital, which shall include but not be limited to reported administrative and general, data processing, non-patient telephone, purchasing, admitting, and credit and collection costs, excluding a provider reimbursed on an initial budget basis, shall not exceed the statewide average of total reimbursable base year inpatient administrative and general costs. For

the purposes of this paragraph, reimbursable base year administrative and general costs shall mean those base year administrative and general costs remaining after application of all other efficiency standards, including, but not limited to, peer group cost ceilings or guidelines. The limitation on reimbursement for provider administrative and general expenses provided by this paragraph shall be expressed as a percentage reduction of the operating cost component of the rate promulgated by the commissioner for each general hospital.

* NB Expired March 31, 2011

* (s) Notwithstanding any inconsistent provisions of this section, for the period July first, nineteen hundred ninety-six through March thirty-first, nineteen hundred ninety-seven, the commissioner shall increase rates of payment for patients eligible for payments made by state governmental agencies by an amount not to exceed forty-five million dollars in the aggregate to be allocated among those voluntary non-profit and private proprietary general hospitals which qualified for rate adjustments pursuant to this paragraph as in effect for the period July first, nineteen hundred ninety-five through June thirtieth, nineteen hundred ninety-six proportionally based on each such general hospital's proportional share of the total funds allocated pursuant to this paragraph as in effect for the period of July first, nineteen hundred ninety-five through June thirtieth, nineteen hundred ninety-six.

* NB Expires December 31, 2029

(s-1) To the extent funds are available pursuant to the provisions of paragraph (s-2) of this subdivision and otherwise notwithstanding any inconsistent provision of law to the contrary, for the rate periods September first, nineteen hundred ninety-seven through March thirty-first, nineteen hundred ninety-eight, and April first, nineteen hundred ninety-eight through March thirty-first, nineteen hundred ninety-nine, the commissioner shall increase rates of payment for patients eligible for payments made by state governmental agencies by an amount not to exceed forty-eight million dollars in the aggregate for each such rate period, allocated among those voluntary non-profit and private proprietary general hospitals which qualified for rate adjustments pursuant to paragraph (s) of this subdivision as in effect for the period July first, nineteen hundred ninety-five through June thirtieth, nineteen hundred ninety-six proportionally based on each such

general hospital's proportional share of total funds allocated pursuant to paragraph (s) of this subdivision as in effect for the period of July first, nineteen hundred ninety-five through June thirtieth, nineteen hundred ninety-six. The rate adjustments calculated in accordance with this paragraph shall be subject to retrospective reconciliation to ensure that each hospital receives in the aggregate its proportionate share of the full allocation, to the extent allowable under federal law, provided however that the department shall not be required to reconcile payments made pursuant to paragraph (s) of this subdivision applicable to periods prior to September first, nineteen hundred ninety-seven.

(s-2) (i) Notwithstanding any inconsistent provision of law to the contrary, the following funds heretofore or hereinafter accumulated shall be transferred by the commissioner and credited to the credit of the state general fund medical assistance local assistance account in an aggregate amount equal to the non-federal share of the costs of the rate adjustments authorized pursuant to paragraph (s-1) of this subdivision:

(A) from pool reserves from statewide and regional pools established pursuant to sections twenty-eight hundred seven-a, twenty-eight hundred seven-c, and twenty-eight hundred eight-c of this article;

(B) from unobligated monies available pursuant to paragraph (b) of subdivision nineteen of section twenty-eight hundred seven-c of this article;

(C) from interest income derived from pools established pursuant to sections twenty-eight hundred seven-k, twenty-eight hundred seven-l and twenty-eight hundred seven-s of this article.

(ii) To the extent that funds available pursuant to the provisions of subparagraph (i) of this paragraph are insufficient to meet the non-federal share of the costs of the rate adjustments authorized pursuant to paragraph (s-1) of this subdivision, the following funds hereto or hereinafter accumulated may be transferred by the commissioner to the state general fund medical assistance local assistance account for the purposes set forth in subparagraph (i) of this paragraph:

(A) from unobligated monies available pursuant to paragraphs (g) and (j) of subdivision 1 of section twenty-eight hundred seven-l of this article;

(B) from unobligated monies available pursuant to clause (D) of subparagraph (ii) of paragraph (b) of subdivision one of section

twenty-eight hundred seven-1 of this article.

(iii) Notwithstanding any inconsistent provision of law to the contrary, the commissioner shall transfer up to an additional two million dollars from the funding sources identified in subparagraph (i) of this paragraph to the state general fund. To the extent monies available from the funding sources identified in subparagraph (i) of this paragraph total less than two million dollars, the commissioner shall transfer monies from funding sources identified in subparagraph (ii) of this paragraph to the state general fund so that the total amount transferred pursuant to this provision equals two million dollars.

(s-3) To the extent funds are available pursuant to the provisions of paragraph (s-4) of this subdivision and otherwise notwithstanding any inconsistent provision of law to the contrary, for the rate period July first, nineteen hundred ninety-nine through March thirty-first, two thousand, the commissioner shall increase rates of payment for patients eligible for payments made by state governmental agencies by an amount not to exceed thirty-six million dollars in the aggregate. Such amount shall be allocated among those voluntary non-profit and private proprietary general hospitals which continue to provide inpatient services as of July first, nineteen hundred ninety-nine under a previous or new name and which qualified for rate adjustments pursuant to paragraph (s) of this subdivision as in effect for the period July first, nineteen hundred ninety-five through June thirtieth, nineteen hundred ninety-six proportionally based on each such general hospital's proportional share of total funds allocated pursuant to paragraph (s) of this subdivision as in effect for the period of July first, nineteen hundred ninety-five through June thirtieth, nineteen hundred ninety-six, provided however, that amounts allocable to previously but no longer qualified hospitals shall be proportionally reallocated to the remaining qualified hospitals. The rate adjustments calculated in accordance with this paragraph shall be subject to retrospective reconciliation to ensure that each hospital receives in the aggregate its proportionate share of the full allocation, to the extent allowable under federal law, provided however that the department shall not be required to reconcile payments made pursuant to paragraph (s) of this subdivision applicable to periods prior to September first, nineteen hundred ninety-seven.

(s-4) Notwithstanding any inconsistent provision of law to the contrary, funds available pursuant to section 32-c of part F of the chapter of the laws of nineteen hundred ninety-nine which adds this paragraph shall be transferred by the commissioner and credited to the credit of the state general fund medical assistance local assistance account in an aggregate amount equal to the non-federal share of the costs of the rate adjustments authorized pursuant to paragraph (s-3) of this subdivision.

* (s-5) To the extent funds are available pursuant to paragraph (s) of subdivision one of section twenty-eight hundred seven-v of this article and otherwise notwithstanding any inconsistent provision of law, for rate periods April first, two thousand through March thirty-first, two thousand three, the commissioner shall increase rates of payment for patients eligible for payments made by state governmental agencies by an amount not to exceed forty-eight million dollars annually in the aggregate. Such amount shall be allocated among those voluntary non-profit and private proprietary general hospitals which continue to provide inpatient services as of July first, nineteen hundred ninety-nine under a previous or new name and which qualified for rate adjustments pursuant to paragraph (s) of this subdivision as in effect for the period July first, nineteen hundred ninety-five through June thirtieth, nineteen hundred ninety-six proportionally based on each such general hospital's proportional share of total funds allocated pursuant to paragraph (s) of this subdivision as in effect for the period of July first, nineteen hundred ninety-five through June thirtieth, nineteen hundred ninety-six, provided however, that amounts allocable to previously but no longer qualified hospitals shall be proportionally reallocated to the remaining qualified hospitals. The rate adjustments calculated in accordance with this paragraph shall be subject to retrospective reconciliation to ensure that each hospital receives in the aggregate its proportionate share of the full allocation, to the extent allowable under federal law, provided however that the department shall not be required to reconcile payments made pursuant to paragraph (s) of this subdivision applicable to periods prior to September first, nineteen hundred ninety-seven.

* NB Expires December 31, 2029

(s-6) To the extent funds are available otherwise notwithstanding any

inconsistent provision of law to the contrary, for rate periods April first, two thousand three through March thirty-first, two thousand five, the commissioner shall increase rates of payment for patients eligible for payments made by state governmental agencies by an amount not to exceed forty-eight million dollars annually in the aggregate. Such amount shall be allocated among those voluntary non-profit and private proprietary general hospitals which continue to provide inpatient services as of July first, nineteen hundred ninety-nine under a previous or new name and which qualified for rate adjustments pursuant to paragraph (s) of this subdivision as in effect for the period July first, nineteen hundred ninety-five through June thirtieth, nineteen hundred ninety-six proportionally based on each such general hospital's proportional share of total funds allocated pursuant to paragraph (s) of this subdivision as in effect for the period of July first, nineteen hundred ninety-five through June thirtieth, nineteen hundred ninety-six, provided however, that amounts allocable to previously but no longer qualified hospitals shall be proportionally reallocated to the remaining qualified hospitals. The rate adjustments calculated in accordance with this paragraph shall be subject to retrospective reconciliation to ensure that each hospital receives in the aggregate its proportionate share of the full allocation, to the extent allowable under federal law, provided however that the department shall not be required to reconcile payments made pursuant to paragraph (s) of this subdivision applicable to periods prior to September first, nineteen hundred ninety-seven. These payments may be added to rates of payment or made as aggregate payments to eligible hospitals.

(s-7) To the extent funds are available otherwise notwithstanding any inconsistent provision of law to the contrary, for rate periods April first, two thousand five through March thirty-first, two thousand seven, the commissioner shall increase rates of payment for patients eligible for payments made by state governmental agencies by an amount not to exceed forty-eight million dollars annually in the aggregate. Such amount shall be allocated among those voluntary non-profit and private proprietary general hospitals which continue to provide inpatient services as of April first, two thousand five under a previous or new name and which qualified for rate adjustments pursuant to paragraph (s) of this subdivision as in effect for the period July first, nineteen

hundred ninety-five through June thirtieth, nineteen hundred ninety-six proportionally based on each such general hospital's proportional share of total funds allocated pursuant to paragraph (s) of this subdivision as in effect for the period of July first, nineteen hundred ninety-five through June thirtieth, nineteen hundred ninety-six, provided however, that amounts allocable to previously but no longer qualified hospitals shall be proportionally reallocated to the remaining qualified hospitals. The rate adjustments calculated in accordance with this paragraph shall be subject to retrospective reconciliation to ensure that each hospital receives in the aggregate its proportionate share of the full allocation, to the extent allowable under federal law, provided however that the department shall not be required to reconcile payments made pursuant to paragraph (s) of this subdivision applicable to periods prior to September first, nineteen hundred ninety-seven.

(s-8) To the extent funds are available and otherwise notwithstanding any inconsistent provision of law to the contrary, for rate periods on and after April first, two thousand seven through November thirtieth, two thousand nine, the commissioner shall increase rates of payment for patients eligible for payments made by state governmental agencies by an amount not to exceed sixty million dollars annually in the aggregate. Such amount shall be allocated among those voluntary non-profit general hospitals which continue to provide inpatient services as of April first, two thousand seven through March thirty-first, two thousand eight and which have medicaid inpatient discharges percentages equal to or greater than thirty-five percent. This percentage shall be computed based upon data reported to the department in each hospital's two thousand four institutional cost report, as submitted to the department on or before January first, two thousand seven. The rate adjustments calculated in accordance with this paragraph shall be allocated proportionally based on each eligible hospital's total reported medicaid inpatient discharges in two thousand four, to the total reported medicaid inpatient discharges for all such eligible hospitals in two thousand four, provided, however, that such rate adjustments shall be subject to reconciliation to ensure that each hospital receives in the aggregate its proportionate share of the full allocation to the extent allowable under federal law. Such payments may be added to rates of payment or made as aggregate payments to eligible hospitals, provided,

however, that subject to the availability of federal financial participation and solely for the period April first, two thousand seven through March thirty-first, two thousand eight, six million dollars in the aggregate of this sixty million dollars shall be allocated to voluntary non-profit hospitals which continue to provide inpatient services as of April first, two thousand seven through March thirty-first, two thousand eight and which have Medicaid inpatient discharge percentages of less than thirty-five percent and which had previously qualified for distributions pursuant to paragraph (s-7) of this subdivision. The rate adjustment calculated in accordance with this paragraph shall be allocated proportionally based on the amount of money the hospital had received in two thousand six.

12. Provisions for article forty-three insurance law corporations and article forty-four of this chapter organizations. Except as provided in paragraphs (a) and (b) of this subdivision, general hospital charges for inpatient and outpatient services to subscribers or beneficiaries of contracts entered into pursuant to the provisions of article forty-three of the insurance law or to members of a comprehensive health services plan operating pursuant to the provisions of article forty-four of this chapter for patient services rendered shall not exceed the rates of payment approved by the commissioner for payments by such article forty-three insurance law corporations or article forty-four organizations. No general hospital may demand or request any charge for such covered services in addition to the charges or rates authorized by this article.

(a) Any general hospital which terminated its contract with an article nine-c insurance law corporation or a comprehensive health services plan after October first, nineteen hundred seventy-six and prior to May first, nineteen hundred seventy-eight, may not charge subscribers or beneficiaries of contracts entered into pursuant to the provisions of article forty-three of the insurance law, or members of a comprehensive health services plan operating pursuant to the provisions of article forty-four of this chapter, amounts in excess of the payments established by such hospital for patient services in accordance with the provisions of paragraph (c) of subdivision one of this section, or in the event the article forty-three insurance law corporation or

comprehensive health services plan operating pursuant to the provisions of article forty-four of this chapter provides for reimbursement on an expense incurred basis and makes payment directly to such hospital for patient services for its subscribers or beneficiaries, such article forty-three insurance law corporation or comprehensive health services plan shall be an additional category of payor of inpatient hospital services whose rates of payment are determined in accordance with paragraph (b) of subdivision one of this section based on an imputed rate of payment determined in accordance with paragraph (a) of subdivision one of this section for an article forty-three insurance law corporation, adjusted for uncovered services, and increased by thirteen percent.

(b) Any general hospital which had notified in writing an article nine-c corporation or a comprehensive health services plan prior to June first, nineteen hundred seventy-eight of its intention to terminate its contract with such corporation or plan in accordance with the terms of such contract, except a general hospital subject to the provisions of paragraph (a) of this subdivision may not charge a subscriber or beneficiary of a contract entered into pursuant to the provisions of article forty-three of the insurance law, or a member of a comprehensive health services plan operating pursuant to the provisions of article forty-four of this chapter, after the effective date of termination of such contract, amounts in excess of the payments established by such hospital for patient services in accordance with the provisions of paragraph (c) of subdivision one of this section, or in the event the article forty-three insurance law corporation or comprehensive health services plan operating pursuant to the provisions of article forty-four of this chapter provides for reimbursement on an expense incurred basis and makes payment directly to such hospital for patient services for its subscribers or beneficiaries, such article forty-three insurance law corporation or comprehensive health services plan shall be an additional category of payor of inpatient hospital services whose rates of payment are determined in accordance with paragraph (b) of subdivision one of this section based on an imputed rate of payment determined in accordance with paragraph (a) of subdivision one of this section for an article forty-three insurance law corporation, adjusted for uncovered services, and increased by thirteen percent.

(c) No general hospital shall refuse to provide patient services to such subscribers or beneficiaries solely on the grounds of such subscription or membership.

(d) The provisions of this subdivision shall also apply to payments to general hospitals by a corporation organized and operating in accordance with article forty-three of the insurance law for inpatient and outpatient services on behalf of subscribers of a foreign corporation which performs similar functions in another state or which belongs to a national association comprised of similar corporations to which the article forty-three corporation also belongs; provided, however, the foreign corporation or the laws of the state in which the foreign corporation is organized extends to article forty-three corporations organized and operating in this state a reciprocal right to have the foreign corporation make payments to hospitals in that other state on behalf of subscribers of the article forty-three corporations at the same rate of payment as that foreign corporation pays for its own subscribers.

* (e) The provisions of this subdivision shall not apply to patients discharged on or after January first, nineteen hundred ninety-seven.

* NB Expires December 31, 2029

13. Restitution authorization. In enforcing the provisions of subdivisions one and twelve of this section, the commissioner may, in addition to the penalties and injunctions set forth in section twelve of this chapter, order that any general hospital provide restitution for any overpayments made by any party. Any hospital may request a formal hearing pursuant to the provisions of section twelve-a of this chapter in the event the hospital objects to any order of the commissioner hereunder. The commissioner may direct that such a hearing be held without any request by a hospital.

14. Bad debt and charity care allowance. * (a) With the exception of rates of payment for services provided to beneficiaries of title XVIII of the federal social security act (medicare), all rates and general hospital charges, including rates of payment for state governmental agencies provided all federal approvals necessary by federal law and regulation for federal financial participation in payments made for

beneficiaries eligible for medical assistance under title XIX of the federal social security act based upon the allowance provided herein as a component of such payments are granted, established for rate periods commencing on or after January first, nineteen hundred eighty-eight and prior to January first, nineteen hundred ninety-seven in accordance with this section shall include the allowance specified in paragraph (c) of this subdivision. The allowance shall be computed on the basis of the operating and capital related components of such rates after trending of the operating portion. For the purposes of this subdivision and subdivision seventeen of this section, major public general hospitals are defined as all state operated general hospitals, all general hospitals operated by the New York city health and hospitals corporation as established by chapter one thousand sixteen of the laws of nineteen hundred sixty-nine as amended and all other public general hospitals having annual inpatient operating costs in excess of twenty-five million dollars.

* NB Effective until December 31, 2029

* (a) With the exception of rates of payment for services provided to beneficiaries of title XVIII of the federal social security act (medicare), all rates and general hospital charges, including rates of payment for state governmental agencies provided all federal approvals necessary by federal law and regulation for federal financial participation in payments made for beneficiaries eligible for medical assistance under title XIX of the federal social security act based upon the allowance provided herein as a component of such payments are granted, established for rate periods commencing on or after January first, nineteen hundred eighty-eight in accordance with this section shall include the allowance specified in paragraph (c) of this subdivision. The allowance shall be computed on the basis of the operating and capital related components of such rates after trending of the operating portion. For the purposes of this subdivision and subdivision seventeen of this section, major public general hospitals are defined as all state operated general hospitals, all general hospitals operated by the New York city health and hospitals corporation as established by chapter one thousand sixteen of the laws of nineteen hundred sixty-nine as amended and all other public general hospitals having annual inpatient operating costs in excess of twenty-five million

dollars.

* NB Effective December 31, 2029

(b) The allowance shall be a percentage to reflect the needs for the financing of losses resulting from bad debts and the costs of charity care of general hospitals within article forty-three insurance law regions, or such other regions as adopted pursuant to subdivision sixteen of this section, and within a statewide determination of financial resources to be committed for this purpose.

Need shall be defined as inpatient losses from bad debts reduced to cost and the inpatient costs of charity care increased by any deficit of such hospital from providing ambulatory services, excluding any portion of such deficit resulting from governmental payments below average visit costs, and revenues and expenses related to the provision of referred ambulatory services. Funds received by major public general hospitals pursuant to article forty-one of the mental hygiene law shall be considered to have been provided for inpatient hospital deficits only. The council shall adopt rules and regulations, subject to the approval of the commissioner, to establish uniform reporting and accounting principles designed to enable hospitals to fairly and accurately determine and report losses from bad debts and the costs of charity care.

(c) The regional amounts to be included in rates approved for the rate year commencing January first, nineteen hundred eighty-eight shall be equal to the sum of the following two components divided by the total reimbursable inpatient costs for the general hospitals located in the region, excluding inpatient costs related to beneficiaries of title XVIII of the federal social security act (medicare), and after application of the trend factor. The first component shall be the result of the ratio between the total nominal payment amount in dollars as determined in subparagraph (i) of this paragraph that would be allocated to voluntary non-profit, private proprietary and public general hospitals other than major public general hospitals in the region based on a targeted need formula applied in accordance with subparagraphs (i) and (ii) of this paragraph and the statewide sum of such nominal payment amounts to voluntary non-profit, private proprietary and public general hospitals other than major public general hospitals applied to the total

statewide resources committed for this purpose to regional pools in the rate year, excluding the total statewide amount allocated in the rate year for this purpose to major public general hospitals in accordance with subparagraph (iii) of this paragraph. The second component shall be the dollar amount allocated to major public general hospitals in the region in accordance with subparagraph (iii) of this paragraph. The regional amount to be included in the rates approved for the rate years commencing on or after January first, nineteen hundred eighty-nine shall be computed in the same manner except that the base year for the targeted need as specified in subparagraph (i) of this paragraph shall be the calendar year which is two years prior to the rate year. For each annual rate period commencing on or after January first, nineteen hundred eighty-eight, the statewide amount to be available in regional pools for this purpose shall equal five and forty-eight hundredths percent of the total hospital reimbursable inpatient costs, excluding inpatient costs related to services provided to beneficiaries of title XVIII of the federal social security act (medicare), computed without consideration of inpatient uncollectible amounts, and after application of the trend factor.

(i) Targeted need shall be defined as the relationship of need to net patient service revenue expressed as a percentage. Net patient service revenue shall be defined as net patient revenue attributable to inpatient and outpatient services excluding referred ambulatory services. For the rate year beginning January first, nineteen hundred eighty-eight and ending December thirty-first, nineteen hundred eighty-eight the scale specified in subparagraph (ii) of this paragraph shall be utilized to calculate individual hospital's nominal payment amounts on the basis of the percentage relationship between their nineteen hundred eighty-six need and nineteen hundred eighty-six net patient service revenues. The nominal payment amount shall be defined as the sum of the dollars attributable to the application of an incrementally increasing proportion of reimbursement for percentage increases in targeted need according to the scale specified in subparagraph (ii) of this paragraph. The sum of the nominal payment amounts for all hospitals in a region shall be the region's total nominal payment amount.

(ii) The scale utilized for development of each hospital's nominal

payment amount shall be as follows:

Targeted Need Percentage		Percentage of Reimbursement Attributable to that Portion of Targeted Need
0	-1%	35%
1+	-2%	50%
2+	-3%	65%
3+	-4%	85%
4+	-5%	90%
5%+		95%

(iii) The dollar amount allocated to major public general hospitals in a region in the rate years nineteen hundred eighty-eight, nineteen hundred eighty-nine and in that portion of the nineteen hundred ninety rate year beginning on January first and ending on June thirtieth shall be one hundred two percent and in that portion of the nineteen hundred ninety rate year beginning on July first and ending on December thirty-first, and in subsequent rate years shall be one hundred ten percent of the result of the application of the ratio of the major public general hospitals' inpatient reimbursable costs within the region to total statewide general hospital inpatient reimbursable costs, as computed on the basis of nineteen hundred eighty-five financial and statistical reports and excluding costs related to services to beneficiaries of title XVIII of the federal social security act (medicare), to the statewide resources committed for this purpose to regional pools, computed without consideration of inpatient uncollectible amounts.

(iv) Notwithstanding any inconsistent provision of this section, commencing April first, nineteen hundred ninety-five the allowance pursuant to this subdivision shall be a uniform regional allowance percentage of five and forty-eight hundredths percent for all regions.

(d) In the event the regional percentage bad debt and charity care allowances for general hospitals for a rate period commencing on or after January first, nineteen hundred ninety-four determined in accordance with paragraph (c) of this subdivision to be submitted to bad debt and charity care regional pools established pursuant to subdivision sixteen of this section and deposited in accordance with subdivision seventeen of this section do not qualify for waiver pursuant to federal

law and regulation related to such regional allowance variations, in order for such allowances to be qualified as a broad-based health care related tax for purposes of the revenues received by the state from such allowances not reducing the amount expended by the state as medical assistance for purposes of federal financial participation, but the regional percentage allowances for the nineteen hundred ninety-three rate year do so qualify, then the regional percentage allowances for the regions for the nineteen hundred ninety-three rate year determined in accordance with paragraph (c) of this subdivision shall be further continued for such period for such regions.

14-a. Supplementary bad debt and charity care adjustment. (a) Notwithstanding any inconsistent provision of this section, rates of payment for inpatient hospital services for persons eligible for payments made by state governmental agencies for the period April first, nineteen hundred eighty-nine to December thirty-first, nineteen hundred eighty-nine and for each annual period commencing January first during the period January first, nineteen hundred ninety to December thirty-first, nineteen hundred ninety-three applicable to patients eligible for federal financial participation under title XIX of the federal social security act in medical assistance provided pursuant to title eleven of article five of the social services law determined in accordance with this section for a major public general hospital, as defined in paragraph (a) of subdivision fourteen of this section, shall include a supplementary bad debt and charity care adjustment determined in accordance with paragraph (b) of this subdivision provided the state governmental agency or the county government in which such general hospital is located, or the city of New York for a general hospital operated by the New York city health and hospitals corporation, files in such time and manner as may be specified by the commissioner an election for such adjustment for such hospital for each period provided that such election is subject to the approval of the state director of the budget and provided all federal approvals necessary by federal law and regulation for federal financial participation in payments made for beneficiaries eligible for medical assistance under title XIX of the federal social security act based upon the adjustment provided herein as a component of such payments are granted.

(b)(i) A supplementary bad debt and charity care adjustment for the period April first, nineteen hundred eighty-nine to December thirty-first, nineteen hundred eighty-nine and for each annual period commencing January first during the period January first, nineteen hundred ninety to December thirty-first, nineteen hundred ninety-three for an eligible major public general hospital shall be determined for each period in accordance with rules and regulations adopted by the council and approved by the commissioner based upon the amount calculated by subtracting the amount projected to be distributed to such major public general hospital pursuant to paragraph (a) of subdivision seventeen of this section for such period from an amount calculated as the product of the projected bad debt and charity care nominal payment amount coverage ratio for such period for voluntary non-profit, private proprietary and public general hospitals other than major public general hospitals multiplied by the base year bad debt and charity care imputed nominal payment amount for such major public general hospital determined in accordance with the methodology provided in paragraph (c) of subdivision fourteen of this section for calculation of a nominal payment amount for voluntary non-profit, private proprietary and public general hospitals other than major public general hospitals. The coverage ratio shall be computed as the ratio between the sum of the dollar value of the amount committed to the regional pools in accordance with paragraph (c) of subdivision fourteen of this section and paragraph (a) of subdivision nineteen of this section for the rate period that would be allocated to voluntary non-profit, private proprietary and public general hospitals other than major public general hospitals in accordance with paragraph (b) of subdivision seventeen of this section and the base year nominal payment amount for such hospitals.

(ii) A supplementary bad debt and charity care adjustment provided in accordance with subparagraph (i) of this paragraph shall be adjusted to reflect actual distributions pursuant to paragraph (a) and (b) of subdivision seventeen of this section.

* (c) Notwithstanding any inconsistent provision of this subdivision, a supplementary bad debt and charity care adjustment shall be determined and provided for each of the nineteen hundred ninety-four, nineteen hundred ninety-five and nineteen hundred ninety-six rate periods, provided that the election pursuant to paragraph (a) of this subdivision

is continued for such period, for a major public general hospital equal to the higher of such adjustment for the nineteen hundred ninety-one rate period or for the nineteen hundred ninety-three rate period. The adjustment may be made to rates of payment or as aggregate payments to an eligible hospital.

* NB Effective until December 31, 2029

* (c) Notwithstanding any inconsistent provision of this subdivision, a supplementary bad debt and charity care adjustment shall be determined and provided for each of the nineteen hundred ninety-four, nineteen hundred ninety-five and for the period January first, nineteen hundred ninety-six through June thirtieth, nineteen hundred ninety-six rate periods, provided that the election pursuant to paragraph (a) of this subdivision is continued for such period, for a major public general hospital equal to the higher of such adjustment for the nineteen hundred ninety-one rate period or for the nineteen hundred ninety-three rate period. The adjustment may be made to rates of payment or as aggregate payments to an eligible hospital.

* NB Effective December 31, 2029

* (d) Notwithstanding any inconsistent provision of law, the provisions of paragraphs (a), (b) and (c) of this subdivision shall not apply to payments for patients discharged on or after January first, nineteen hundred ninety-seven.

* NB Expires December 31, 2029

14-b. General health care services allowance. (a) With the exception of rates of payment for services provided to beneficiaries of title XVIII of the federal social security act (medicare), all rates and general hospital charges established for rate periods commencing on or after January first, nineteen hundred ninety-one in accordance with this section shall include a percentage allowance of the general hospital's reimbursable inpatient costs, excluding inpatient costs related to services provided to beneficiaries of title XVIII of the federal social security act (medicare), computed without consideration of inpatient uncollectible amounts, and after application of the trend factor, as follows:

(i) for the nineteen hundred ninety-one, nineteen hundred ninety-two and nineteen hundred ninety-three rate periods, an allowance of

twenty-three hundredths of one percent;

(ii) for the nineteen hundred ninety-four rate period, an allowance of six hundred fourteen thousandths of one percent;

(iii) for the January first, nineteen hundred ninety-five through June thirtieth, nineteen hundred ninety-five rate period, an allowance of six hundred thirty-seven thousandths of one percent;

(iv) for the July first, nineteen hundred ninety-five through December thirty-first, nineteen hundred ninety-five rate period, an allowance of one and forty-two hundredths percent; and

* (v) for the January first, nineteen hundred ninety-six through December thirty-first, nineteen hundred ninety-six rate period, an allowance of one and nine hundredths percent.

* NB Effective until December 31, 2029

* (v) for the January first, nineteen hundred ninety-six through June thirtieth, nineteen hundred ninety-six rate period, an allowance of one and nine hundredths percent.

* NB Effective December 31, 2029

(b) For rate periods beginning on or after January first, nineteen hundred ninety-one but prior to January first, nineteen hundred ninety-four, funds will be accumulated and made available in regional pools created by the commissioner for regional distributions in accordance with section twenty-eight hundred seven-bb of this chapter through the submission by or on behalf of general hospitals of the allowance included in rates and charges in accordance with paragraph (a) of this subdivision. Such regions shall be those established pursuant to paragraph (b) of subdivision sixteen of this section. The regional pools may be administered in accordance with the provisions of paragraph (c) of subdivision sixteen of this section applicable to bad debt and charity care regional pools. Payments by or on behalf of general hospitals to regional pools shall be due and arrearages shall be treated in accordance with the provisions of subdivision twenty of this section applicable to bad debt and charity care regional pools.

(c) If on September thirtieth, nineteen hundred ninety-four, any funds accumulated over the period January first, nineteen hundred ninety-one through December thirty-first, nineteen hundred ninety-three are unused or uncommitted for the allocations provided for in this subdivision, such unused or uncommitted funds shall be reallocated for use in

accordance with the provisions of subdivision seventeen of this section.

(d) For the rate periods commencing on or after January first, nineteen hundred ninety-four, funds will be accumulated in a statewide pool created by the commissioner through the submission by or on behalf of general hospitals of the allowance included in rates and charges in accordance with paragraph (a) of this subdivision, for distributions in accordance with subdivision nineteen-a of this section.

(e) The commissioner is authorized to contract with a pool administrator designated in accordance with paragraph (c) of subdivision sixteen of this section or, if not available, such other administrators as the commissioner shall designate, to receive funds for the pools created pursuant to this subdivision and to distribute funds in accordance with this subdivision and subdivision nineteen-a of this section. If a pool administrator is designated, the commissioner shall conduct or cause to be conducted an annual audit of the receipt and distribution of pool funds. The reasonable costs and expenses of a pool administrator as approved by the commissioner, not to exceed for personnel services on an annual basis two hundred thousand dollars, shall be paid from the pooled funds.

(f) (i) Payments to the pools by or on behalf of general hospitals of funds due based on the allowances provided in accordance with this subdivision shall be due in accordance with the provisions of subdivision twenty of this section in the same manner as applicable to bad debt and charity care regional pools. Arrearages in payments due may be collected and interest and penalties due shall be determined and may be collected by the commissioner in accordance with the provisions of subdivision twenty of this section in the same manner as applicable to bad debt and charity care regional pools.

(ii) Notwithstanding any inconsistent provision of this section, as shall be necessary to obtain federal financial participation in medical assistance expenditures in accordance with title XIX of the federal social security act, the allowances included in rates of payment pursuant to this subdivision on behalf of patients eligible for medical assistance pursuant to title eleven of article five of the social services law shall be withheld from medical assistance payments to general hospitals and paid to pools on behalf of the general hospitals where a general hospital elects such withholding in such time and manner

as specified by the commissioner, and in the event a general hospital does not elect such withholding, payments by such general hospital to a pool based on an allowance received for medical assistance patients shall be due within five days of receipt of such funds. Funds withheld by a payor and paid to a pool on behalf of a general hospital shall be considered received by such general hospital and paid to the pool by such general hospital for all purposes.

(g) The allowances provided pursuant to paragraph (a) of this subdivision shall be effective and implemented for purposes of determining rates of payment for state governmental agencies contingent on receipt of all federal approvals necessary by federal law or regulations for federal financial participation in payments made for beneficiaries eligible for medical assistance under title XIX of the federal social security act based upon such allowances as a component of such payments. If such federal approvals are not granted for such allowances or components thereof, rates of payment for state governmental agencies shall be determined in accordance with the provisions of this section without consideration of such allowances or such components plus an adjustment not subject to federal financial participation equal to one-half of the difference between such rates of payment determined without consideration of such allowances or components and a rate of payment determined based on such allowances or components. The pools established pursuant to this subdivision shall refund to the state governmental agency from pool reserves, current funds or future receipts any overpayment received based on a retroactive reduction pursuant to this paragraph in the allowances.

(h) The allowances provided pursuant to paragraph (a) of this subdivision or components thereof shall be of no force and effect and shall be deemed to have been null and void as of January first, nineteen hundred ninety-four in the event the secretary of the department of health and human services determines that such allowances or such components thereof are an impermissible health care related tax for purposes of the federal medicaid voluntary contribution and provider-specific tax amendments of nineteen hundred ninety-one for purposes of such funds reducing the amount deemed expended by the state as medical assistance for purposes of federal financial participation.

14-c. Bad debt and charity care allowance for financially distressed hospitals. * (a) With the exception of rates of payment for services provided to beneficiaries of title XVIII of the federal social security act (medicare), all rates and general hospital charges established for rate periods commencing on or after January first, nineteen hundred ninety-one but prior to January first, nineteen hundred ninety-four in accordance with this section shall include an allowance of two hundred thirty-five thousandths of one percent; and for the rate periods during the period January first, nineteen hundred ninety-four through December thirty-first, nineteen hundred ninety-six an allowance of three hundred twenty-five thousandths of one percent of the general hospital's reimbursable inpatient costs, excluding inpatient costs related to services provided to beneficiaries of title XVIII of the federal social security act (medicare), computed without consideration of inpatient uncollectible amounts, and after application of the trend factor.

* NB Effective until December 31, 2029

* (a) With the exception of rates of payment for services provided to beneficiaries of title XVIII of the federal social security act (medicare), all rates and general hospital charges established for rate periods commencing on or after January first, nineteen hundred ninety-one but prior to January first, nineteen hundred ninety-four in accordance with this section shall include an allowance of two hundred thirty-five thousandths of one percent; and for the rate periods during the period January first, nineteen hundred ninety-four through June thirtieth, nineteen hundred ninety-six an allowance of three hundred twenty-five thousandths of one percent of the general hospital's reimbursable inpatient costs, excluding inpatient costs related to services provided to beneficiaries of title XVIII of the federal social security act (medicare), computed without consideration of inpatient uncollectible amounts, and after application of the trend factor.

* NB Effective December 31, 2029

(b) A statewide pool shall be created through the submissions by or on behalf of general hospitals of the allowance included in rates and charges in accordance with paragraph (a) of this subdivision. Funds accumulated in the statewide pool, including income from invested funds, shall be deposited by the commissioner and credited to a special revenue-other fund to be established by the comptroller. To the extent

of funds appropriated therefor, funds shall be made available for distributions by or on behalf of the state, as payments under the state medical assistance program provided pursuant to title eleven of article five of the social services law, from the statewide pool in the same manner as distributions made in accordance with paragraph (c) of subdivision nineteen of this section. The statewide pools may be administered in accordance with the provisions of paragraph (c) of subdivision sixteen of this section applicable to bad debt and charity care regional pools. Payments by or on behalf of general hospitals to statewide pools shall be due and arrearages, interest and penalties shall be treated in accordance with the provisions of subdivision twenty of this section applicable to bad debt and charity care regional pools.

(c) Notwithstanding any inconsistent provision of law, the commissioner may allocate and distribute funds accumulated in the statewide pool created pursuant to this subdivision and funds accumulated in the statewide pool created by the assessments authorized in accordance with subdivision eighteen of this section and available for distribution in accordance with paragraphs (c) and (d) of subdivision nineteen of this section for contracts for independent management audits of financially distressed hospitals, provided, however, that the total amount for audits pursuant to this paragraph shall not exceed two million five hundred thousand dollars over the period January first, nineteen hundred ninety-four through December thirty-first, nineteen hundred ninety-five. Copies of management audit reports of financially distressed hospitals shall be provided by the commissioner to the chairs of the senate and assembly health committees.

14-d. Supplementary low income patient adjustment. * (a) Notwithstanding any inconsistent provision of this section, payment for inpatient hospital services for persons eligible for payments made by state governmental agencies for rate periods during the period January first, nineteen hundred ninety-one through December thirty-first, nineteen hundred ninety-six applicable to patients eligible for federal financial participation under title XIX of the federal social security act in medical assistance provided pursuant to title eleven of article five of the social services law determined in accordance with this section shall include for eligible general hospitals a supplementary low

income patient adjustment determined in accordance with paragraph (b) of this subdivision, provided all federal approvals necessary by federal law and regulation for federal financial participation in payments made for beneficiaries eligible for medical assistance under title XIX of the federal social security act based upon the adjustment provided herein as a component of such payments are granted. The adjustment may be made to rates of payment or as aggregate payments to an eligible hospital.

* NB Effective until December 31, 2029

* (a) Notwithstanding any inconsistent provision of this section, payment for inpatient hospital services for persons eligible for payments made by state governmental agencies for rate periods during the period January first, nineteen hundred ninety-one through June thirtieth, nineteen hundred ninety-six applicable to patients eligible for federal financial participation under title XIX of the federal social security act in medical assistance provided pursuant to title eleven of article five of the social services law determined in accordance with this section shall include for eligible general hospitals a supplementary low income patient adjustment determined in accordance with paragraph (b) of this subdivision, provided all federal approvals necessary by federal law and regulation for federal financial participation in payments made for beneficiaries eligible for medical assistance under title XIX of the federal social security act based upon the adjustment provided herein as a component of such payments are granted. The adjustment may be made to rates of payment or as aggregate payments to an eligible hospital.

* NB Effective December 31, 2029

* (b) A supplementary low income patient adjustment for the period January first, nineteen hundred ninety-one through December thirty-first, nineteen hundred ninety-three shall be determined, subject to the provisions of subparagraph (iv) of this paragraph, and for the period January first, nineteen hundred ninety-four through December thirty-first, nineteen hundred ninety-six shall be determined for each eligible hospital according to the scale specified in subparagraph (iii) of this paragraph based upon the amount calculated by multiplying the applicable supplemental percentage coverage of need amount for the hospital by the hospital's need as defined in paragraph (b) of subdivision fourteen of this section; provided, however, that for the

period January first, nineteen hundred ninety-four through December thirty-first, nineteen hundred ninety-six if the sum of the adjustments pursuant to clause (C) of subparagraph (iii) of this paragraph would exceed thirty-six million dollars for a rate year on an annualized basis the supplemental percentage coverage of need scale pursuant to clause (C) of subparagraph (iii) of this paragraph shall be reduced on a pro rata basis so that the sum of such adjustments provided for the rate year on an annualized basis shall not exceed thirty-six million dollars.

(i) The low income patient percentage of a general hospital shall be defined as the ratio of the sum of inpatient discharges of patients eligible for medical assistance pursuant to title eleven of article five of the social services law plus inpatient discharges of self-pay patients plus inpatient discharges of charity care patients divided by total inpatient discharges expressed as a percentage. For the period January first, nineteen hundred ninety-one through December thirty-first, nineteen hundred ninety-three, the percentages shall be calculated based on base year nineteen hundred eighty-nine, received by the department no later than November first, nineteen hundred ninety, data from the statewide planning and research cooperative system consistent with data submitted in accordance with section twenty-eight hundred five-a of this article. For the period January first, nineteen hundred ninety-four through December thirty-first, nineteen hundred ninety-six, the percentages shall be calculated based on base year nineteen hundred ninety-one, received by the department no later than November first, nineteen hundred ninety-three, data from the statewide planning and research cooperative system consistent with data submitted in accordance with section twenty-eight hundred five-a of this article. In order to be eligible for an adjustment pursuant to this subdivision, a hospital must maintain its collection efforts to obtain payment in full from self-pay patients.

(ii) For the period January first, nineteen hundred ninety-one through December thirty-first, nineteen hundred ninety-three, hospital need shall be calculated based on base year nineteen hundred eighty-nine data. For the period January first, nineteen hundred ninety-four through December thirty-first, nineteen hundred ninety-six, hospital need shall be calculated based on base year nineteen hundred ninety-one data.

(iii)(A) The scale utilized for development of a hospital's

supplementary low income patient adjustment shall be as follows for the period January first, nineteen hundred ninety-one through June thirtieth, nineteen hundred ninety-one:

Low Income		Supplemental Percentage
Patient Percentage		Coverage of Need
50+	55%	5%
55+	60%	10%
60+	65%	15%
65+	70%	22.5%
70+	75%	30%
75+	80%	37.5%
80+		45%

(B) The scale utilized for development of a hospital's supplementary low income adjustment shall be as follows for the period July first, nineteen hundred ninety-one for a public general hospital through December thirty-first, nineteen hundred ninety-six and for a voluntary non-profit or a private proprietary general hospital through September thirtieth, nineteen hundred ninety-two:

Low Income		Supplemental Percentage
Patient Percentage		Coverage of Need
35+	55%	20%
55+	60%	25%
60+	65%	30%
65+	70%	37.5%
70+		45%

(C) The scale utilized for development of a voluntary non-profit or private proprietary general hospital's supplementary low income patient adjustment shall be as follows for the period October first, nineteen hundred ninety-two through March thirty-first, nineteen hundred ninety-three and for the period January first, nineteen hundred ninety-four through December thirty-first, nineteen hundred ninety-six:

Low Income		Supplemental Percentage
Patient Percentage		Coverage of Need
35+	50%	10%
50+	55%	20%
55+	60%	25%
60+	65%	30%

65+ 70%

37.5%

70+

45%

(D) The scale utilized for development of a voluntary non-profit or private proprietary general hospital's supplementary low income patient adjustment for the period May fifteenth, nineteen hundred ninety-three through December thirty-first, nineteen hundred ninety-three shall be at one hundred twenty percent of the supplemental percentage coverage of need scale specified in clause (C) of this subparagraph.

(iv) A supplementary low income patient adjustment determined according to the scale specified in subparagraph (iii) of this paragraph shall be limited for rate periods during the period January first, nineteen hundred ninety-one through December thirty-first, nineteen hundred ninety-three such that the amount of such adjustment for an eligible hospital, plus the amount committed to the regional pools in accordance with paragraph (c) of subdivision fourteen of this section and paragraph (a) of subdivision nineteen of this section for the rate period that would be allocated to such hospital, plus, if applicable, any distribution for the rate period pursuant to paragraph (d) of subdivision nineteen of this section for such hospital, and plus for a major public general hospital the amount of any supplementary bad debt and charity care adjustment provided pursuant to subdivision fourteen-a of this section for the rate period shall not exceed ninety percent of need.

(v) The provisions of this subdivision shall not apply to a general hospital eligible for distributions made pursuant to paragraph (c) of subdivision nineteen of this section.

* NB Effective until December 31, 2029

* (b) A supplementary low income patient adjustment for the period January first, nineteen hundred ninety-one through December thirty-first, nineteen hundred ninety-three shall be determined, subject to the provisions of subparagraph (iv) of this paragraph, and for the period January first, nineteen hundred ninety-four through June thirtieth, nineteen hundred ninety-six shall be determined for each eligible hospital according to the scale specified in subparagraph (iii) of this paragraph based upon the amount calculated by multiplying the applicable supplemental percentage coverage of need amount for the hospital by the hospital's need as defined in paragraph (b) of

subdivision fourteen of this section; provided, however, that for the period January first, nineteen hundred ninety-four through June thirtieth, nineteen hundred ninety-six if the sum of the adjustments pursuant to clause (C) of subparagraph (iii) of this paragraph would exceed thirty-six million dollars for a rate year on an annualized basis the supplemental percentage coverage of need scale pursuant to clause (C) of subparagraph (iii) of this paragraph shall be reduced on a pro rate basis so that the sum of such adjustments provided for the rate year on an annualized basis shall not exceed thirty-six million dollars.

(i) The low income patient percentage of a general hospital shall be defined as the ratio of the sum of inpatient discharges of patients eligible for medical assistance pursuant to title eleven of article five of the social services law plus inpatient discharges of self-pay patients plus inpatient discharges of charity care patients divided by total inpatient discharges expressed as a percentage. For the period January first, nineteen hundred ninety-one through December thirty-first, nineteen hundred ninety-three, the percentages shall be calculated based on base year nineteen hundred eighty-nine, received by the department no later than November first, nineteen hundred ninety, data from the statewide planning and research cooperative system consistent with data submitted in accordance with section twenty-eight hundred five-a of this article. For the period January first, nineteen hundred ninety-four through June thirtieth, nineteen hundred ninety-six, the percentages shall be calculated based on base year nineteen hundred ninety-one, received by the department no later than November first, nineteen hundred ninety-three, data from the statewide planning and research cooperative system consistent with data submitted in accordance with section twenty-eight hundred five-a of this article. In order to be eligible for an adjustment pursuant to this subdivision, a hospital must maintain its collection efforts to obtain payment in full from self-pay patients.

(ii) For the period January first, nineteen hundred ninety-one through December thirty-first, nineteen hundred ninety-three, hospital need shall be calculated based on base year nineteen hundred eighty-nine data. For the period January first, nineteen hundred ninety-four through June thirtieth, nineteen hundred ninety-six, hospital need shall be calculated based on base year nineteen hundred ninety-one data.

(iii)(A) The scale utilized for development of a hospital's supplementary low income patient adjustment shall be as follows for the period January first, nineteen hundred ninety-one through June thirtieth, nineteen hundred ninety-one:

Low Income		Supplemental Percentage
Patient Percentage		Coverage of Need
50+	55%	5%
55+	60%	10%
60+	65%	15%
65+	70%	22.5%
70+	75%	30%
75+	80%	37.5%
80+		45%

(B) The scale utilized for development of a hospital's supplementary low income adjustment shall be as follows for the period July first, nineteen hundred ninety-one for a public general hospital through June thirtieth, nineteen hundred ninety-six and for a voluntary non-profit or a private proprietary general hospital through September thirtieth, nineteen hundred ninety-two:

Low Income		Supplemental Percentage
Patient Percentage		Coverage of Need
35+	55%	20%
55+	60%	25%
60+	65%	30%
65+	70%	37.5%
70+		45%

(C) The scale utilized for development of a voluntary non-profit or private proprietary general hospital's supplementary low income patient adjustment shall be as follows for the period October first, nineteen hundred ninety-two through March thirty-first, nineteen hundred ninety-three and for the period January first, nineteen hundred ninety-four through June thirtieth, nineteen hundred ninety-six:

Low Income		Supplemental Percentage
Patient Percentage		Coverage of Need
35+	50%	10%
50+	55%	20%
55+	60%	25%

60+	65%	30%
65+	70%	37.5%
70+		45%

(D) The scale utilized for development of a voluntary non-profit or private proprietary general hospital's supplementary low income patient adjustment for the period May fifteenth, nineteen hundred ninety-three through December thirty-first, nineteen hundred ninety-three shall be at one hundred twenty percent of the supplemental percentage coverage of need scale specified in clause (C) of this subparagraph.

(iv) A supplementary low income patient adjustment determined according to the scale specified in subparagraph (iii) of this paragraph shall be limited for rate periods during the period January first, nineteen hundred ninety-one through December thirty-first, nineteen hundred ninety-three such that the amount of such adjustment for an eligible hospital, plus the amount committed to the regional pools in accordance with paragraph (c) of subdivision fourteen of this section and paragraph (a) of subdivision nineteen of this section for the rate period that would be allocated to such hospital, plus, if applicable, any distribution for the rate period pursuant to paragraph (d) of subdivision nineteen of this section for such hospital, and plus for a major public general hospital the amount of any supplementary bad debt and charity care adjustment provided pursuant to subdivision fourteen-a of this section for the rate period shall not exceed ninety percent of need.

(v) The provisions of this subdivision shall not apply to a general hospital eligible for distributions made pursuant to paragraph (c) of subdivision nineteen of this section.

* NB Effective December 31, 2029

(c) A supplementary low income patient adjustment provided in accordance with this subdivision for rate periods during the period January first, nineteen hundred ninety-one through December thirty-first, nineteen hundred ninety-three shall be adjusted to reflect actual distributions pursuant to paragraphs (a) and (b) of subdivision seventeen of this section and paragraph (d) of subdivision nineteen of this section and adjustments provided pursuant to subdivision fourteen-a of this section.

(d) Notwithstanding any inconsistent provision of law, a voluntary

non-profit or proprietary general hospital where the low income patient percentage, as determined in accordance with provisions of this subdivision, is between thirty-five and sixty-five percent shall be charged an assessment which for the period July first, nineteen hundred ninety-one through December thirty-first, nineteen hundred ninety-one shall equal five percent of the general hospital's bad debt and charity care need as determined in accordance with paragraph (b) of subdivision fourteen of this section and for the period January first, nineteen hundred ninety-two through September thirtieth, nineteen hundred ninety-two shall equal seven and one-half percent of the general hospital's bad debt and charity care need as determined in accordance with paragraph (b) of subdivision fourteen of this section. Such assessment shall be paid to the commissioner or his designee prior to October first, nineteen hundred ninety-two in accordance with a schedule established by the commissioner. The assessments may be administered in accordance with the provisions of paragraph (c) of subdivision sixteen of this section applicable to bad debt and charity care regional pools. Payments of the assessments shall be due and arrearages shall be treated in accordance with the provisions of subdivision twenty of this section applicable to bad debt and charity care regional pools. Funds accumulated shall be deposited by the commissioner and credited to the department of social services medical assistance program general fund - local assistance account appropriation.

* (e) Notwithstanding any inconsistent provision of law, the provisions of paragraphs (a) and (b) of this subdivision shall not apply to payments for patients discharged on or after January first, nineteen hundred ninety-seven.

* NB Expires December 31, 2029

* 14-f. Public general hospital indigent care adjustment.

Notwithstanding any inconsistent provision of this section and subject to the availability of federal financial participation, payment for inpatient hospital services for persons eligible for payments made by state governmental agencies for the period January first, nineteen hundred ninety-seven through December thirty-first, nineteen hundred ninety-nine and periods on and after January first, two thousand applicable to patients eligible for federal financial participation under title XIX of the federal social security act in medical assistance

provided pursuant to title eleven of article five of the social services law determined in accordance with this section shall include for eligible public general hospitals a public general hospital indigent care adjustment equal to the aggregate amount of the adjustments provided for such public general hospital for the period January first, nineteen hundred ninety-six through December thirty-first, nineteen hundred ninety-six pursuant to subdivisions fourteen-a and fourteen-d of this section on an annualized basis, provided, however, that for periods on and after January first, two thousand thirteen an annual amount of four hundred twelve million dollars shall be allocated to eligible major public hospitals based on each hospital's proportionate share of medicaid and uninsured losses to total medicaid and uninsured losses for all eligible major public hospitals, net of any disproportionate share hospital payments received pursuant to sections twenty-eight hundred seven-k and twenty-eight hundred seven-w of this article. The adjustment may be made to rates of payment or as aggregate payments to an eligible hospital.

* NB Effective until December 31, 2029

* 14-f. Public general hospital indigent care adjustment.

Notwithstanding any inconsistent provision of this section, payment for inpatient hospital services for persons eligible for payments made by state governmental agencies for the period January first, nineteen hundred ninety-seven through December thirty-first, nineteen hundred ninety-nine applicable to patients eligible for federal financial participation under title XIX of the federal social security act in medical assistance provided pursuant to title eleven of article five of the social services law determined in accordance with this section shall include for eligible public general hospitals a public general hospital indigent care adjustment equal to the aggregate amount of the adjustments provided for such public general hospital for the period January first, nineteen hundred ninety-six through December thirty-first, nineteen hundred ninety-six pursuant to subdivisions fourteen-a and fourteen-d of this section on an annualized basis, provided all federal approvals necessary by federal law and regulation for federal financial participation in payments made for beneficiaries eligible for medical assistance under title XIX of the federal social security act based upon the adjustment provided herein as a component of

such payments are granted. The adjustment may be made to rates of payment or as aggregate payments to an eligible hospital.

* NB Effective and repealed December 31, 2029

15. Special provisions for payments by governmental agencies. In the event that federal financial participation in payments made for beneficiaries eligible for medical assistance under title XIX of the federal social security act based upon the allowance specified in paragraph (c) of subdivision fourteen of this section as a component of such payments is not approved by the federal government, rates of payment by governmental agencies for the operating cost component of general hospital inpatient services shall be increased for each hospital by the same percentage allowance as each hospital's federal fiscal year nineteen hundred eighty-seven disproportionate share payment adjustment factor for revenues received from services provided to beneficiaries of title XVIII of the federal social security act (medicare) as determined in accordance with the provisions of section eighteen hundred eighty-six-d of title XVIII of the federal social security act (medicare). Increased amounts received by general hospitals in accordance with the provision of this subdivision shall be offset against distributions to such hospitals that were made or would be made pursuant to the provisions contained in subdivisions seventeen and nineteen of this section. In the event that distributions had been made to such hospitals pursuant to such subdivisions, the hospital shall, on a proportional basis, return to the pool from which the distributions were made an amount equal to the increased amounts received under this subdivision to the extent that such increased amounts do not exceed distributions made. Funds in the statewide pool created in accordance with subdivision sixteen of this section, which would have been distributed in accordance with paragraph (c) of subdivision nineteen of this section if the provisions of this subdivision were not in effect, less any amounts not distributed as the result of the offset provisions of this subdivision shall be distributed to regional pools to the extent that such funds are available and necessary to maintain regional pool distributions, with consideration of the offset provisions in this subdivision, at the levels that would be available pursuant to the provisions of subdivision fourteen of this section if the provisions of

this subdivision did not apply.

16. Bad debt and charity care regional pools and bad debt and charity care and capital statewide pool, general. (a) Funds will be made available in bad debt and charity care regional pools created by the commissioner for distributions in accordance with subdivision seventeen of this section through the submissions by or on behalf of general hospitals of the allowance included in rates and charges in accordance with paragraph (c) of subdivision fourteen of this section and through the transfer of funds available from the bad debt and charity care and capital statewide pool in accordance with paragraph (a) of subdivision nineteen of this section. Funds will be made available for distributions in accordance with subdivision nineteen of this section from a bad debt and charity care and capital statewide pool created by the commissioner through the submissions by general hospitals of the amount of the assessments authorized in accordance with subdivision eighteen of this section.

(b) The regions are established as the article forty-three insurance plan regions, with the exception that the southern sixteen counties shall be divided into three regions for the purposes of subdivisions fourteen and seventeen of this section with separate regions consisting of Richmond, Manhattan, Bronx, Queens and Kings counties; Nassau and Suffolk counties; and Delaware, Columbia, Ulster, Sullivan, Orange, Dutchess, Putnam, Rockland and Westchester counties. Such regions shall be the same regions established and in effect January first, nineteen hundred eighty-five. The council with the approval of the commissioner may combine regions, with the exception of the above specified regions for the southern sixteen counties, upon application of the article forty-three insurance law plans involved and a demonstration that significant inequities would not occur.

(c) For periods prior to January first, two thousand five, the commissioner and the commissioner of social services are authorized to contract with the article forty-three insurance law plans, or if not available such other administrators as the commissioner and the commissioner of social services shall designate, to receive funds for the bad debt and charity care regional pools and/or the bad debt and charity care and capital statewide pool and distribute funds from such

pools. In the event contracts with the article forty-three insurance law plans or other commissioners' designees are effectuated, the commissioner and the commissioner of social services shall jointly conduct or cause to be conducted annual audits of the receipt and distribution of the pooled funds. The reasonable costs and expenses of a pool administrator as approved by the commissioner and the commissioner of social services, not to exceed for personnel services on an annual basis four hundred thousand dollars for all pools, shall be paid from the pooled funds. Such pool administrator or pool administrators shall be acting on behalf of the state medical assistance program provided pursuant to title eleven of article five of the social services law in the distribution to hospitals pursuant to subdivisions fourteen-c, seventeen and paragraphs (c) and (d) of subdivision nineteen of this section of pooled funds.

(d) In order for a general hospital to participate in the distribution of funds from the pools, the general hospital must implement collection policies and procedures approved by the commissioner.

(e) In order for a general hospital to be eligible for distribution of funds from the pools, such general hospital if it provides obstetrical care and services must agree to participate in a program approved by the department for the provision of prenatal care to persons eligible for medical assistance or medically indigent persons if requested by such a program. Nothing stated herein shall require a hospital to grant admitting privileges to a physician solely because such person is part of an approved program. The participation of hospitals in an approved program shall include, but not be limited to:

(i) arrangements with designated prenatal care providers for prebooking pregnant women for approximate delivery time, and provision of staff and facilities for the delivery and necessary postpartum care for women and infants involved in such programs;

(ii) a system for medical record transfer from a prenatal care provider to hospital staff participating in delivery and for the transfer of information regarding hospital delivery and care back to the prenatal care provider for postpartum follow-up; and

(iii) an agreement with designated prenatal care providers to accept the care of high risk patients on a referral basis and/or to provide special tests and procedures which are not ordinarily available to

prenatal care clinics if such hospital is capable of caring for high risk patients and/or providing special tests and procedures.

(f) The council may adopt regulations subject to the approval of the commissioner to allow advanced distributions from these pools to a general hospital qualifying for distributions in accordance with paragraph (c) of subdivision nineteen of this section, based on a demonstration by the hospital that there is an inability to finance current obligations and obtain needed working capital.

* (g) Notwithstanding any inconsistent provision of law to the contrary, from interest heretofore earned or hereinafter earned on funds in bad debt and charity care regional pools and the bad debt and charity care and capital statewide pool established pursuant to this section, such amounts as shall be necessary, within amounts appropriated, shall be reallocated to, and the state comptroller is hereby authorized and directed to receive for deposit to, the credit of the department of health's special revenue fund - other, hospital based grants program account, for purposes of services and expenses related to general hospital based grant programs for the period April first, nineteen hundred ninety-four through June thirtieth, nineteen hundred ninety-six and for the period July first, nineteen hundred ninety-six through March thirty-first, nineteen hundred ninety-seven.

* NB Effective until December 31, 2029

* (g) Notwithstanding any inconsistent provision of law to the contrary, from interest heretofore earned or hereinafter earned on funds in bad debt and charity care regional pools and the bad debt and charity care and capital statewide pool established pursuant to this section, such amounts as shall be necessary, within amounts appropriated, shall be reallocated to, and the state comptroller is hereby authorized and directed to receive for deposit to, the credit of the department of health's special revenue fund - other, hospital based grants program account, for purposes of services and expenses related to general hospital based grant programs for the period April first, nineteen hundred ninety-four through June thirtieth, nineteen hundred ninety-six.

* NB Effective December 31, 2029

16-a. Pool administration, general. (a) If a general hospital fails to timely file a report with the department of funds due to a regional pool

or a statewide pool established pursuant to this section, the commissioner may estimate the amount due from such hospital based on available financial and statistical data and may collect in accordance with subdivision twenty of this section any amount due based on such estimate as a deficiency in payments to such regional pool or statewide pool with interest and penalties. The commissioner shall provide a general hospital with notice of any estimate of the amount due pursuant to this paragraph at least three days prior to collection of a deficiency by the commissioner. Such notice shall contain the financial basis for the commissioner's estimate.

* (b) Notwithstanding any inconsistent provision of section one hundred twelve or one hundred seventy-four of the state finance law or any other law, at the discretion of the commissioner and the commissioner of social services without a competitive bid or request for proposal process, regional pool and statewide pool administration contracts in effect for rate year nineteen hundred ninety-three may be extended for administration of regional pools and statewide pools established for rate years nineteen hundred ninety-four and nineteen hundred ninety-five and nineteen hundred ninety-six to provide an uninterrupted continuation of services and may be amended as may be necessary.

* NB Effective until December 31, 2029

* (b) Notwithstanding any inconsistent provision of section one hundred twelve or one hundred seventy-four of the state finance law or any other law, at the discretion of the commissioner and the commissioner of social services without a competitive bid or request for proposal process, regional pool and statewide pool administration contracts in effect for rate year nineteen hundred ninety-three may be extended for administration of regional pools and statewide pools established for rate years nineteen hundred ninety-four and nineteen hundred ninety-five and for the rate period January first, nineteen hundred ninety six through June thirtieth, nineteen hundred ninety-six to provide an uninterrupted continuation of services and may be amended as may be necessary.

* NB Effective December 31, 2029

17. Bad debt and charity care regional pool distributions. Funds

accumulated in bad debt and charity care regional pools, including income from invested funds, from the allowance specified in paragraph (c) of subdivision fourteen of this section and funds accumulated in bad debt and charity care regional pools, including income from invested funds, from the transfer of funds available from the bad debt and charity care and capital statewide pool in accordance with paragraph (a) of subdivision nineteen of this section shall be deposited by the commissioner and credited to a special revenue-other fund to be established by the comptroller. To the extent of funds appropriated therefor, funds shall be made available for distribution by or on behalf of the state, as payments under the state medical assistance program provided pursuant to title eleven of article five of the social services law, from bad debt and charity care regional pools in accordance with the following methodology and sequence:

(a) For the nineteen hundred eighty-eight, nineteen hundred eighty-nine and for that portion of the nineteen hundred ninety rate year beginning on January first and ending on June thirtieth, each eligible major public general hospital shall receive a portion of its bad debt and charity care need equal to one hundred two percent of the result of the application of its percentage of statewide inpatient reimbursable costs excluding costs related to services provided to beneficiaries of title XVIII of the federal social security act (medicare), developed on the basis of nineteen hundred eighty-five financial and statistical reports, to the total of all regional pools. For that portion of the nineteen hundred ninety rate year beginning on July first and ending on December thirty-first and in the annual rate years beginning on or after January first, nineteen hundred ninety-one, each eligible major public general hospital shall receive a portion of its bad debt and charity care need equal to one hundred ten percent of the result of the application of its percentage of statewide inpatient reimbursable costs excluding costs related to services provided to beneficiaries of title XVIII of the federal social security act (medicare), developed on the basis of nineteen hundred eighty-five financial and statistical reports, to the total of all regional pools.

(b) (i) Funds remaining in the regional pools after distribution in accordance with paragraph (a) of this subdivision shall be distributed to voluntary non-profit, private proprietary and public general

hospitals, other than major public general hospitals, on the basis of each hospital's targeted need share. For the rate year beginning January first, nineteen hundred eighty-eight, an individual hospital's targeted need share shall be defined as the relationship between each hospital's nineteen hundred eighty-six nominal payment amount as defined in subparagraph (i) of paragraph (c) of subdivision fourteen of this section to the nineteen hundred eighty-six nominal payment amounts for all hospitals in the region other than major public general hospitals. For annual rate years beginning on or after January first, nineteen hundred eighty-nine, the base need shall be the calendar year which is two years prior to the rate year. The amount of funds to be distributed in accordance with this paragraph and paragraph (a) of this subdivision shall be limited to the amount of funds accumulated in the pools.

(ii) Notwithstanding any inconsistent provision of this section, commencing April first, nineteen hundred ninety-five funds remaining in the regional pools after distribution in accordance with paragraph (a) of this subdivision shall be aggregated on a statewide basis and treated as a common pool for statewide distributions and distributed to voluntary non-profit, private proprietary and public general hospitals, other than major public general hospitals, on the basis of each hospital's targeted need share defined as the relationship between each hospital's base year nominal payment amount as defined in subparagraph (i) of paragraph (c) of subdivision fourteen of this section to the base year nominal payment amounts for all hospitals statewide other than major public general hospitals.

(d) The department may provide for interim payments to general hospitals of funds available for distribution from regional pools pursuant to this subdivision, subject to reasonable retainage for adjustments, subsequently reconciled to amounts due determined in accordance with this subdivision.

(e) Notwithstanding any inconsistent provision of this section, in the event funds available pursuant to paragraph (b-1) of subdivision nineteen of this section for programs to provide health care coverage for uninsured or underinsured children are inadequate to provide coverage to all eligible children for whom application for coverage is made in a rate period, such additional amounts not to exceed twenty-five million dollars for nineteen hundred ninety-four as shall be necessary

to provide such coverage shall be reserved by the commissioner from the amount to be available in bad debt and charity care regional pools for such rate period for additional distributions to such programs. Ten million dollars of the amount reserved for nineteen hundred ninety-four shall not result in a decrease to disproportionate share payments to hospitals.

18. Bad debt and charity care and capital statewide pool funding.

* The commissioner shall create a bad debt and charity care and capital statewide pool which shall be funded by a transfer of funds, which is hereby authorized, for the period January first, nineteen hundred ninety-five through December thirty-first, nineteen hundred ninety-five, the period January first, nineteen hundred ninety-six through June thirtieth, nineteen hundred ninety-six and the period July first, nineteen hundred ninety-six through December thirty-first, nineteen hundred ninety-six equal to seven million five hundred thousand dollars for the nineteen hundred ninety-five period, three million seven hundred fifty thousand dollars for the January first, nineteen hundred ninety-six through June thirtieth, nineteen hundred ninety-six period and three million seven hundred fifty thousand dollars for the July first, nineteen hundred ninety-six through December thirty-first, nineteen hundred ninety-six period to be submitted to a statewide pool, as designated by the commissioner, from the medical malpractice insurance association pursuant to section five thousand five hundred sixteen-c of the insurance law and through an assessment which shall be charged to general hospitals. In the event that the transfers of funds authorized by section five thousand five hundred sixteen-c of the insurance law do not occur by January first, nineteen hundred ninety-five, January first, nineteen hundred ninety-six and August first, nineteen hundred ninety-six respectively, the commissioner for each period for which such transfer from the medical malpractice insurance association has not occurred shall transfer seven million five hundred thousand dollars for the nineteen hundred ninety-five period, three million seven hundred fifty thousand dollars for the January first, nineteen hundred ninety-six through June thirtieth, nineteen hundred ninety-six period and three million seven hundred fifty thousand dollars for the July first, nineteen hundred ninety-six through December

thirty-first, nineteen hundred ninety-six period from regional or statewide pool reserves for pools established pursuant to this section and section twenty-eight hundred eight-c or twenty-eight hundred seven-a of this article to the bad debt and charity care and capital statewide pool established pursuant to this subdivision. Such assessment shall be submitted to a statewide pool as designated by the commissioner and distributed on a monthly basis in accordance with subdivision twenty of this section. The assessment shall be:

- * NB Effective until December 31, 2029

- * The commissioner shall create a bad debt and charity care and capital statewide pool which shall be funded by a transfer of funds, which is hereby authorized, for the period January first, nineteen hundred ninety-five through December thirty-first, nineteen hundred ninety-five and the period January first, nineteen hundred ninety-six through June thirtieth, nineteen hundred ninety-six equal to seven million five hundred thousand dollars for the nineteen hundred ninety-five period and three million seven hundred fifty thousand dollars for the January first, nineteen hundred ninety-six through June thirtieth, nineteen hundred ninety-six period to be submitted to a statewide pool, as designated by the commissioner, from the medical malpractice insurance association pursuant to section five thousand five hundred sixteen-c of the insurance law and through an assessment which shall be charged to general hospitals. In the event that the transfers of funds authorized by section five thousand five hundred sixteen-c of the insurance law do not occur by January first, nineteen hundred ninety-five and January first nineteen hundred ninety-six respectively, the commissioner for each period for which such transfer from the medical malpractice insurance association has not occurred shall transfer seven million five hundred thousand dollars for the nineteen hundred ninety-five period and three million seven hundred fifty thousand dollars for the January first, nineteen hundred ninety-six through June thirtieth, nineteen hundred ninety-six period from regional or statewide pool reserves for pools established pursuant to this section and section twenty-eight hundred eight-c or twenty-eight hundred seven-a of this article to the bad debt and charity care and capital statewide pool established pursuant to this subdivision. Such assessment shall be submitted to a statewide pool as designated by the commissioner

and distributed on a monthly basis in accordance with subdivision twenty of this section. The assessment shall be:

- * NB Effective December 31, 2029

- * (a) one and seventy-five thousandths percent of each general hospital's gross revenue received for inpatient hospital services provided during the period January first, nineteen hundred eighty-eight through December thirty-first, nineteen hundred eighty-eight; one and five hundredths percent of each general hospital's gross revenue received for inpatient hospital services provided during the period January first, nineteen hundred eighty-nine through December thirty-first, nineteen hundred eighty-nine; and one percent of each general hospital's gross revenue received for inpatient hospital services provided during annual periods beginning on or after January first, nineteen hundred ninety through December thirty-first, nineteen hundred ninety-nine and on or after January first, two thousand,

- * NB Effective until December 31, 2029

- * (a) one and seventy-five thousandths percent of each general hospital's gross revenue received for inpatient hospital services provided during the period January first, nineteen hundred eighty-eight through December thirty-first, nineteen hundred eighty-eight; one and five hundredths percent of each general hospital's gross revenue received for inpatient hospital services provided during the period January first, nineteen hundred eighty-nine through December thirty-first, nineteen hundred eighty-nine; and one percent of each general hospital's gross revenue received for inpatient hospital services provided during annual periods beginning on or after January first, nineteen hundred ninety through December thirty-first, nineteen hundred ninety-nine,

- * NB Effective and expires December 31, 2029

- * (a) one and seventy-five thousandths percent of each general hospital's gross revenue received for inpatient hospital services provided during the period January first, nineteen hundred eighty-eight through December thirty-first, nineteen hundred eighty-eight; one and five hundredths percent of each general hospital's gross revenue received for inpatient hospital services provided during the period January first, nineteen hundred eighty-nine through December thirty-first, nineteen hundred eighty-nine; and one percent of each

general hospital's gross revenue received for inpatient hospital services provided during annual rate periods beginning on or after January first, nineteen hundred ninety,

* NB Effective December 31, 2029

* (b) provided, however, subject to the provisions of paragraph (e) of this subdivision there shall be no assessment against those voluntary non-profit and private proprietary general hospitals which qualify for distributions made in accordance with paragraph (c) of subdivision nineteen of this section, or for the annual assessment period January first, nineteen hundred ninety-seven through December thirty-first, nineteen hundred ninety-seven which qualified for distributions made in accordance with paragraph (c) of subdivision nineteen of this section as of December thirty-first, nineteen hundred ninety-five, and

* NB Effective until December 31, 2029

* (b) provided, however, subject to the provisions of paragraph (e) of this subdivision there shall be no assessment against those voluntary non-profit and private proprietary general hospitals which qualify for distributions made in accordance with paragraph (c) of subdivision nineteen of this section, and

* NB Effective December 31, 2029

* (c) provided further, however, subject to the provisions of paragraph (e) of this subdivision the assessment against those voluntary non-profit and private proprietary general hospitals which qualified for distributions made in accordance with paragraph (c) of subdivision nineteen of this section as of December thirty-first, nineteen hundred ninety-five shall for the annual assessment period January first, nineteen hundred ninety-eight through December thirty-first, nineteen hundred ninety-eight be abated in the amount of three-quarters of one percent of gross revenue received and for the annual assessment period January first, nineteen hundred ninety-nine through December thirty-first, nineteen hundred ninety-nine be abated in the amount of one-quarter of one percent of gross revenue received.

* NB Effective until December 31, 2029

* (c) provided further, however, subject to the provisions of paragraph (e) of this subdivision the assessment against those voluntary non-profit and private proprietary general hospitals which qualified for distributions made in accordance with paragraph (b) of subdivision

sixteen of section twenty-eight hundred seven-a of this article during the nineteen hundred eighty-seven rate period or qualified for distributions made in accordance with paragraph (c) of subdivision nineteen of this section during a rate period or rate periods but which do not continue to qualify for distributions made in accordance with paragraph (c) of subdivision nineteen of this section during a rate period or rate periods shall for the initial rate period in which such general hospital does not continue to qualify for distributions made in accordance with paragraph (c) of subdivision nineteen of this section be abated in the amount of two-thirds of one percent of gross revenue received and for the next succeeding annual rate period be abated in the amount of one-third of one percent of gross revenue received.

* NB Effective December 31, 2029

* (d) Gross revenue received shall mean all moneys received for or on account of inpatient hospital service, provided, however, that subject to the provisions of paragraph (e) of this subdivision gross revenue received shall not include distributions from bad debt and charity care regional pools, health care services pools, bad debt and charity care for financially distressed hospitals statewide pools and bad debt and charity care and capital statewide pools created in accordance with this section or distributions from funds allocated in accordance with section twenty-eight hundred seven-l, twenty-eight hundred seven-k, twenty-eight hundred seven-v or twenty-eight hundred seven-w of this article and shall not include the components of rates of payment or charges related to the allowances provided in accordance with subdivisions fourteen, fourteen-b and fourteen-c of this section, the adjustment provided in accordance with subdivision fourteen-a of this section, the adjustment provided in accordance with subdivision fourteen-d of this section, the adjustment for health maintenance organization reimbursement rates provided in accordance with former subdivision two-a of this section, payments made pursuant to paragraph (i) of subdivision thirty-five of this section or, if effective, the adjustment provided in accordance with subdivision fifteen of this section, the adjustment provided in accordance with section eighteen of chapter two hundred sixty-six of the laws of nineteen hundred eighty-six as amended, revenue received from physician practice or faculty practice plan discrete billings for private practicing physician services, revenue from affiliation

agreements or contracts with public hospitals for the delivery of health care services at such public hospitals, revenue received as disproportionate share hospital payments in accordance with title nineteen of the federal social security act, or revenue from government deficit financing, provided, however, that funds received as medical assistance payments which include state share amounts authorized pursuant to section twenty-eight hundred seven-v of this article that are not disproportionate share hospital payments shall be included within the meaning of gross revenue for purposes of this subdivision.

* NB Effective until December 31, 2029

* (d) Gross revenue received shall mean all moneys received for or on account of inpatient hospital service, provided, however, that subject to the provisions of paragraph (e) of this subdivision gross revenue received shall not include distributions from bad debt and charity care regional pools, health care services pools, bad debt and charity care for financially distressed hospitals statewide pools and bad debt and charity care and capital statewide pools created in accordance with this section and shall not include the components of rates of payment or charges related to the allowances provided in accordance with subdivisions fourteen, fourteen-b and fourteen-c of this section, the adjustment provided in accordance with subdivision fourteen-a of this section, the adjustment provided in accordance with subdivision fourteen-d of this section, the adjustment for health maintenance organization reimbursement rates provided in accordance with subdivision two-a of this section, or, if effective, the adjustment provided in accordance with subdivision fifteen of this section or the adjustment provided in accordance with section eighteen of chapter two hundred sixty-six of the laws of nineteen hundred eighty-six as amended.

* NB Effective December 31, 2029

(e) Each exclusion of hospitals or sources of gross revenue received from the assessments effective on or after October first, nineteen hundred ninety-two established pursuant to this subdivision shall be contingent upon either: (i) qualification of the assessments for waiver pursuant to federal law and regulation; or, (ii) consistent with federal law and regulation, not requiring a waiver by the secretary of the department of health and human services related to such exclusion; in order for the assessments under this section to be qualified as a

broad-based health care related tax for purposes of the revenues received by the state pursuant to the assessments not reducing the amount expended by the state as medical assistance for purposes of federal financial participation. The commissioner shall collect the assessments relying on such exclusions, pending any contrary action by the secretary of the department of health and human services. In the event the secretary of the department of health and human services determines that the assessments do not so qualify based on any such exclusion, then the exclusion shall be deemed to have been null and void as of October first, nineteen hundred ninety-two and the commissioner shall collect any retroactive amount due as a result, without interest or penalty provided the hospital pays the retroactive amount due within ninety days of notice from the commissioner to the hospital that the exclusion is null and void. Interest and penalties shall be measured from the due date of ninety days following notice from the commissioner to the hospital.

(f) Payments of assessments and allowances required to be submitted by general hospitals pursuant to this subdivision and subdivisions fourteen and fourteen-b of this section and paragraph (a) of subdivision two of section twenty-eight hundred seven-d of this article shall be subject to audit by the commissioner for a period of six years following the close of the calendar year in which such payments are due, after which such payments shall be deemed final and not subject to further adjustment or reconciliation, including through offset adjustments or reconciliations made by general hospitals with regard to subsequent payments, provided, however, that nothing herein shall be construed as precluding the commissioner from pursuing collection of any such assessments and allowances which are identified as delinquent within such six year period, or which are identified as delinquent as a result of an audit commenced within such six year audit period, or from conducting an audit of any adjustment or reconciliation made by a general hospital within such six year period, or from conducting an audit of payments made prior to such six year period which are found to be commingled with payments which are otherwise subject to timely audit pursuant to this section. General hospitals which, in the course of such an audit, fail to produce data or documentation requested in furtherance of such an audit, within thirty days of such request may be assessed a civil penalty of up to ten

thousand dollars for each such failure, provided, however, that such civil penalty shall not be imposed if the hospital demonstrates good cause for such failure. The imposition of such civil penalties shall be subject to the provisions of section twelve-a of this chapter.

(g) If a general hospital fails to produce data or documentation requested in furtherance of an audit for a month to which an assessment applies, the commissioner may estimate, based on available financial and statistical data as determined by the commissioner, the amount due for such month. If the impact of exemptions permitted pursuant to paragraph (d) of this subdivision cannot be determined from such available financial and statistical data the estimated amount due may be calculated on the basis of the general hospital's aggregate gross inpatient revenue amount, as determined from such available financial and statistical data for the year subject to audit. Estimated amounts due pursuant to this paragraph shall be paid by a general hospital within sixty days or within such other time period as agreed to by the commissioner and the facility. Thereafter the commissioner shall take all necessary steps to collect amounts owed pursuant to this paragraph, including by offsetting, or by directing the state comptroller to offset, such amounts due from any other payments made by state governmental agencies to the general hospital pursuant to this article. Interest and penalties shall be applied to such amounts due in accordance with the provisions of paragraph (c) of subdivision twenty of this section.

(h) The commissioner shall take all necessary steps to collect delinquent amounts owed pursuant to this subdivision, including by recoupment or offsetting, or by directing the state comptroller to offset, such amounts due from any other payments made by state governmental agencies to the general hospital pursuant to this article. Interest and penalties shall be applied to such amounts due in accordance with the provisions of paragraph (c) of subdivision twenty of this section. Delinquent amounts which have been referred for recoupment or offset pursuant to this paragraph, or which have been referred to the office of the attorney general for collection, shall be deemed final and not subject to further revision or reconciliation by the commissioner based on any additional reports or other information submitted by the hospital, provided, however, that such delinquencies shall not be

referred for such recoupment or for such collection based on estimated amounts unless the hospital has received written notification of such delinquencies and has been given no less than thirty days in which to submit delinquent reports.

(i) The commissioner may enter into agreements with general hospitals subject to this subdivision, in regard to which audit findings or prior settlements have been made pursuant to this subdivision, extending and applying such audit findings or prior settlements or a portion thereof, in settlement and satisfaction of potential audit liabilities for subsequent un-audited periods. The commissioner may reduce or waive payment of interest and penalties otherwise applicable to such subsequent un-audited periods when such amounts due as a result of such agreement, other than reduced or waived penalties and interest, are paid in full to the commissioner or the commissioner's designee within sixty days of execution of such agreement by all parties to the agreement. Any payments made pursuant to agreements entered into in accordance with this paragraph shall be deemed to be in full satisfaction of any liability arising under this subdivision, as referenced in such agreements and for the time periods covered by such agreements, provided, however, that the commissioner may audit future retroactive adjustments to payments made for such periods based on reports filed by hospitals subsequent to such agreements.

19. Bad debt and charity care and capital statewide pool distribution.

* Funds accumulated in the statewide pool created by the assessment authorized in accordance with subdivision eighteen of this section for periods through December thirty-first, nineteen hundred ninety-six, including income from invested funds, shall be distributed or retained in accordance with the following sequence:

* NB Effective until December 31, 2029

* Funds accumulated in the statewide pool created by the assessment authorized in accordance with subdivision eighteen of this section, including income from invested funds, shall be distributed or retained in accordance with the following sequence:

* NB Effective December 31, 2029

(a) Funds shall be distributed by the commissioner to bad debt and charity care regional pools established pursuant to subdivision sixteen

of this section to provide additional funds for distribution from such bad debt and charity care regional pools in accordance with subdivision seventeen of this section equal to the amount computed as the difference between the amount that would be available in such regional pools based on a statewide determination of financial resources to be committed to regional pools in each year in accordance with paragraph (c) of subdivision fourteen of this section based upon a percentage factor equal to five and ninety-three hundredths percent and the amount to be available in such regional pools based on a statewide determination of financial resources to be committed to regional pools in each year in accordance with paragraph (c) of subdivision fourteen of this section based upon a percentage factor equal to five and forty-eight hundredths percent.

* (b) An amount not to exceed seventeen million dollars on an annualized basis from the assessment through December thirty-first, nineteen hundred ninety-six may annually be placed in a statewide account in accordance with rules and regulations adopted by the council and approved by the commissioner for the purpose of securing financing of capital improvement projects for general hospitals qualifying for distributions made in accordance with paragraph (c) of this subdivision. Any reserved funds available on September first, nineteen hundred ninety-seven and not obligated, in accordance with section twelve of chapter nine hundred thirty-four of the laws of nineteen hundred eighty-five as amended, for the purpose of securing financing of capital improvement projects for general hospitals and any reserved funds that thereafter become available may be transferred by the commissioner, in consultation with the director of the budget and the dormitory authority, to the health facility restructuring pool established pursuant to section twenty-eight hundred fifteen of this article or to the general hospital indigent care pool established pursuant to section twenty-eight hundred seven-k of this article.

* NB Effective until December 31, 2029

* (b) An amount not to exceed seventeen million dollars may annually be placed in a statewide account in accordance with rules and regulations adopted by the council and approved by the commissioner for the purpose of securing financing of capital improvement projects for general hospitals qualifying for distributions made in accordance with

paragraph (c) of this subdivision.

* NB Effective December 31, 2029

* (b-1) An amount equal to: twenty million dollars annually for the period January first, nineteen hundred ninety-one through December thirty-first, nineteen hundred ninety-three; thirty million dollars for the period January first, nineteen hundred ninety-four through December thirty-first, nineteen hundred ninety-four; thirty-seven million five hundred thousand dollars for the period January first, nineteen hundred ninety-five through December thirty-first, nineteen hundred ninety-five; eighteen million seven hundred fifty thousand dollars for the period January first, nineteen hundred ninety-six through June thirtieth, nineteen hundred ninety-six; and eighteen million seven hundred fifty thousand dollars for the period July first, nineteen hundred ninety-six through December thirty-first, nineteen hundred ninety-six shall annually be reserved and accumulated from year to year by the commissioner for distributions to programs to provide health care coverage for uninsured or underinsured children. Such accumulated funds shall not be used for any other purpose other than those authorized in section twenty-five hundred ten and twenty-five hundred eleven of this chapter. If on March thirty-first, nineteen hundred ninety-eight, any funds accumulated during the period January first, nineteen hundred ninety-one through December thirty-first, nineteen hundred ninety-seven are unused or uncommitted for such distributions, such unused or uncommitted funds shall be immediately transferred by the commissioner to the health care initiatives pool established by the commissioner to provide additional funds for distribution to programs to provide health care coverage for uninsured or underinsured children pursuant to sections twenty-five hundred ten and twenty-five hundred eleven of this chapter. For cash flow purposes, the commissioner may borrow from regional or statewide pool reserves for pools established pursuant to this section such funds as shall be necessary not to exceed the amount authorized to be reserved annually to meet premium requirements pursuant to sections twenty-five hundred ten and twenty-five hundred eleven of this chapter for a rate year and shall refund such moneys when pool funds become available pursuant to this paragraph for such rate year.

* NB Effective until December 31, 2029

* (b-1) An amount equal to: twenty million dollars annually for the

period January first, nineteen hundred ninety-one through December thirty-first, nineteen hundred ninety-three; thirty million dollars for the period January first, nineteen hundred ninety-four through December thirty-first, nineteen hundred ninety-four; thirty-seven million five hundred thousand dollars for the period January first, nineteen hundred ninety-five through December thirty-first, nineteen hundred ninety-five; and eighteen million seven hundred fifty thousand dollars for the period January first, nineteen hundred ninety-six through June thirtieth, nineteen hundred ninety-six shall annually be reserved and accumulated from year to year by the commissioner for distributions to programs to provide health care coverage for uninsured or underinsured children. Such accumulated funds shall not be used for any other purpose other than those authorized in section twenty-five hundred ten and twenty-five hundred eleven of this chapter. If on September thirtieth, nineteen hundred ninety-seven, any funds accumulated during the period January first, nineteen hundred ninety-one through June thirtieth, nineteen hundred ninety-six are unused or uncommitted for such distributions, such unused or uncommitted funds shall be immediately transferred by the commissioner to bad debt and charity care regional pools established pursuant to subdivision sixteen of this section to provide additional funds for distribution from such bad debt and charity care regional pools in accordance with subdivision seventeen of this section. For cash flow purposes, the commissioner may borrow from regional or statewide pool reserves for pools established pursuant to this section such funds as shall be necessary not to exceed the amount authorized to be reserved annually to meet premium requirements pursuant to sections twenty-five hundred ten and twenty-five hundred eleven of this chapter for a rate year and shall refund such moneys when pool funds become available pursuant to this paragraph for such rate year.

* NB Effective December 31, 2029

(b-2) Funds available for distribution in accordance with paragraphs (c) and (d) of this subdivision shall be deposited by the commissioner and credited to a special revenue-other fund to be established by the comptroller. To the extent of funds appropriated therefor, funds shall be made available for distributions by or on behalf of the state, as payments under the state medical assistance program provided pursuant to title eleven of article five of the social services law from the bad

debt and charity care and capital statewide pool pursuant to paragraphs (c) and (d) of this subdivision.

(c) Funds shall be made available on a statewide basis for distribution by the commissioner in accordance with rules and regulations adopted by the council and approved by the commissioner to assist voluntary non-profit and private proprietary general hospitals experiencing severe fiscal hardship because of insufficient resources to finance losses resulting from bad debts and the costs of charity care. Amounts to be distributed for bad debt and charity care purposes shall be determined after consideration of amounts to be distributed from regional pools in accordance with subdivision seventeen of this section and shall result in up to one hundred percent as defined in paragraph (b) of subdivision fourteen of this section being financed for these general hospitals.

(d) Funds shall be made available on a statewide basis for distribution by the commissioner in accordance with rules and regulations adopted by the council and approved by the commissioner to assist voluntary non-profit and private proprietary general hospitals which qualified for distributions made in accordance with paragraph (b) of subdivision sixteen of section twenty-eight hundred seven-a of this article during the nineteen hundred eighty-seven rate period or qualified for distributions made in accordance with paragraph (c) of this subdivision during a rate period or rate periods but which do not continue to qualify for distributions made in accordance with paragraph (c) of this subdivision during a rate period or rate periods. Amounts to be distributed to a general hospital pursuant to this paragraph for the initial rate period in which such general hospital does not continue to qualify for distributions made in accordance with paragraph (c) of this subdivision shall be two-thirds of the amount such general hospital would have received in accordance with paragraph (c) of this subdivision for such initial rate period if the hospital had continued to be eligible for such distribution and for the next succeeding annual rate period one-third of the amount such general hospital would have received in accordance with paragraph (c) of this subdivision for such succeeding rate period.

(e) There shall be set aside within a transition account in the statewide pool, from accumulated funds, from the total allocation to the

bad debt and charity care and capital statewide pool of the assessment of one and seventy-five thousandths percent of gross revenue received in accordance with paragraph (a) of subdivision eighteen of this section for the rate period commencing January first, nineteen hundred eighty-eight and the assessment of one and five hundredths percent of gross revenue received in accordance with paragraph (a) of subdivision eighteen of this section for the rate period commencing January first, nineteen hundred eighty-nine an amount equal to seventy-five thousandths of one percent of gross revenue received and five hundredths of one percent of gross revenue received respectively to be distributed to voluntary non-profit, private proprietary and public general hospitals receiving less bad debt and charity care funds under the provisions of this section than if the provisions of section twenty-eight hundred seven-a of this article had applied using the same base year need as calculated in accordance with subdivision fourteen of this section. Rules for such distribution shall be those adopted by the council and approved by the commissioner.

(f) Any balance in the statewide pool shall be distributed in accordance with the following:

(i) Fifty percent of the balance shall be reserved and accumulated from year to year by the commissioner for distributions to regional pilot projects to provide health care coverage under insurance or equivalent mechanisms for uninsured or underinsured individuals and families and to provide health care coverage for catastrophic expenses provided legislation is enacted before July fifteenth, nineteen hundred eighty-eight authorizing such regional pilot projects and including an authorization for such regional pilot projects, notwithstanding any inconsistent provision of law, to negotiate special payment rate methodologies with general hospitals for inpatient hospital services.

(ii) * The remaining balance shall be reserved and accumulated from year to year by the commissioner for priority distributions in accordance with rules and regulations adopted by the council and approved by the commissioner: (A) to assist general hospitals in offsetting losses from bad debt and the costs of charity care in providing existing or expanded priority health services to the medically indigent or medically underserved in urban and rural areas including, but not limited to, services for pregnant women, services for children

under the age of six, and services related to acquired immune deficiency syndrome; (B) for quality assurance demonstration projects; (C) for severity of illness measurement demonstration projects; (D) for cost analyses and evaluations of health care provider services; (E) for quality improvement program grants and contracts pursuant to subdivision fifteen of section two hundred six of this chapter and department of health administrative costs related thereto; and (F) for initiatives to improve public health and to expand the availability of health care services.

* NB Effective until December 31, 2029

* The remaining balance shall be reserved and accumulated from year to year by the commissioner for priority distributions in accordance with rules and regulations adopted by the council and approved by the commissioner: (A) to assist general hospitals in offsetting losses from bad debt and the costs of charity care in providing existing or expanded priority health services to the medically indigent or medically underserved in urban and rural areas including, but not limited to, services for pregnant women, services for children under the age of six, and services related to acquired immune deficiency syndrome; (B) for quality assurance demonstration projects; (C) for severity of illness measurement demonstration projects; (D) for cost analyses and evaluations of health care provider services; and (E) for quality improvement program grants and contracts pursuant to subdivision fifteen of section two hundred six of this chapter and department of health administrative costs related thereto.

* NB Effective December 31, 2029

Notwithstanding any provision of law to the contrary, a sum not to exceed three million five hundred thousand dollars from funds available for distribution pursuant to this subparagraph may be allocated and distributed to regional pilot projects to provide health care coverage under insurance or equivalent mechanisms for uninsured or underinsured individuals and families pursuant to chapter seven hundred three of the laws of nineteen hundred eighty-eight.

Notwithstanding any inconsistent provision of section one hundred twelve or one hundred seventy-four of the state finance law or any other

law, funds available for distribution pursuant to this subparagraph may be allocated and distributed without a competitive bid or request for proposal process.

(iii) Any unused funds from the allocations provided for in paragraph (b) and paragraph (e) of this subdivision and subparagraph (i) of this paragraph and any funds contingently allocated to regional pilot projects pursuant to subparagraph (i) of this paragraph if authorizing legislation is not enacted as required by such subparagraph shall be reallocated for use in accordance with the provisions of subparagraph (ii) of this paragraph.

(iv) Notwithstanding any inconsistent provision of this section, the commissioner shall enter into agreements with one or more persons, not-for-profit corporations, or other organizations, other than a state employee, official or agency, for the purposes of an independent evaluation of the implementation and effectiveness of primary care initiatives, including preferred primary care provider designations, applicable to general hospitals, diagnostic and treatment centers and participating practitioners and may allocate and distribute funds otherwise available for distribution in accordance with subparagraph (ii) of this paragraph for the costs of such evaluation. The evaluation shall assess factors including but not limited to:

(A) the overall effect of such primary care initiatives on access to and utilization of health care services;

(B) the extent to which such initiatives have fostered cooperative working relationships between various providers of health care services;

(C) the impact of such initiatives on the cost of health care services.

An initial evaluation pursuant to this subparagraph shall be submitted to the governor and the legislature on or before April first, nineteen hundred ninety-two and a further evaluation shall be submitted by April first, nineteen hundred ninety-three.

* 19-a. Health care services allowance statewide pool distribution. Funds accumulated in the statewide pool created by the allowance authorized in accordance with subparagraphs (ii) and (iii) of paragraph (a) of subdivision fourteen-b of this section, including income from invested funds, shall be distributed or retained in accordance with the

following:

(a) Funds shall be transferred to primary health care services regional pools created by the commissioner, and shall be available, including income from invested funds, for distributions in accordance with section twenty-eight hundred seven-bb of this article. Such funds shall be transferred to each regional pool so that the regional pool receives, for the rate periods January first, nineteen hundred ninety-four through December thirty-first, nineteen hundred ninety-four fifty-one and five-tenths percent, January first, nineteen hundred ninety-five through December thirty-first, nineteen hundred ninety-five forty-nine and six-tenths percent, and January first, nineteen hundred ninety-six through December thirty-first, nineteen hundred ninety-six forty-nine and six-tenths percent of the total funds to be accumulated in the statewide pool from the allowance submitted by or on behalf of hospitals in that region. Such regions shall be those established for purposes of section two thousand nine hundred four-b of this chapter.

(b) A fixed percentage of the total funds accumulated in the statewide pool, including income from invested funds, shall be available for primary care education and training. For the rate periods January first, nineteen hundred ninety-four through December thirty-first, nineteen hundred ninety-four, such percentage shall be twenty-two and one-tenth percent, and January first, nineteen hundred ninety-five through December thirty-first, nineteen hundred ninety-five, such percentage shall be twenty and four-tenths percent, and January first, nineteen hundred ninety-six through December thirty-first, nineteen hundred ninety-six such percentage shall be twenty and four-tenths percent. Funds shall be available for distributions as follows:

(i) up to four million dollars annually plus income thereon from invested funds shall be set aside and reserved from accumulated funds and may be accumulated for the following year for distribution by the commissioner for primary care undergraduate medical education in accordance with section nine hundred two of this chapter;

(ii) up to four million dollars annually plus income thereon from invested funds shall be set aside and reserved from accumulated funds and may be accumulated for the following year for distribution by the commissioner for the primary care physician loan repayment program in accordance with section nine hundred three of this chapter;

(iii) up to two million dollars annually plus income thereon from invested funds shall be set aside and reserved from accumulated funds and may be accumulated for the following year for distribution by the commissioner for the primary care practitioner scholarship program in accordance with section nine hundred four of this chapter;

(iv) up to two million dollars annually plus income thereon from invested funds shall be set aside and reserved from accumulated funds and may be accumulated for the following year for distribution by the commissioner for the primary care practitioner education program in accordance with section nine hundred five of this chapter;

(v) the balance remaining annually plus income thereon from invested funds shall be set aside and reserved from accumulated funds and may be accumulated from year to year for distributions by the commissioner for health care development in accordance with section nine hundred six of this chapter; and

(vi) provided, however, that the commissioner in the absence of qualified recipients within a category may reallocate any funds remaining or unallocated within such a category for distribution by the commissioner for the primary care practitioner scholarship program in accordance with section nine hundred four of this chapter and the primary care practitioner education program in accordance with section nine hundred five of this chapter.

(c) A fixed percentage of the total funds accumulated in the statewide pool, including income from invested funds, shall be deposited by the commissioner into the miscellaneous special revenue fund - 339, health care planning account, which is established for services and expenses for health planning, for purposes of: (i) per capita support of health systems agencies, provided no health systems agency shall receive less than two hundred fifty thousand dollars annually from the per capita allocation, and provided further that a health systems agency receiving the minimum level of funding provided pursuant to a per capita formula shall also be entitled to receive matching support; (ii) matching support for other contributions received by health systems agencies from qualified sources as determined by the commissioner; (iii) five hundred thousand dollars for global budgeting demonstrations grants authorized pursuant to section twenty-eight hundred fourteen of this article; and (iv) five hundred thousand dollars for health networks grants authorized

pursuant to section twenty-eight hundred fourteen of this article. For the rate period January first, nineteen hundred ninety-four through December thirty-first, nineteen hundred ninety-four such percentage shall be eight and eight-tenths percent, and for the rate period January first, nineteen hundred ninety-five through December thirty-first, nineteen hundred ninety-six such percentage shall be eight and two-tenths percent.

(c-1) Notwithstanding any other provision of law to the contrary, any unspent funds available for programs and services pursuant to subparagraphs (iii) and (iv) of paragraph (c) of this subdivision as of April first, nineteen hundred ninety-five and any additional funds available for programs and services pursuant to subparagraphs (iii) and (iv) of paragraph (c) of this subdivision for the period April first, nineteen hundred ninety-five through December thirty-first, nineteen hundred ninety-five shall be transferred by the commissioner and deposited and credited to the medical assistance program general fund - local assistance account.

(c-2) Notwithstanding any other provision of law to the contrary, funds accumulated for programs and services pursuant to subparagraphs (i) and (ii) of paragraph (c) of this subdivision for nineteen hundred ninety-five shall be transferred by the commissioner and deposited and credited to the general fund - local assistance account.

(d) A fixed percentage of the total funds accumulated in the statewide pool, including income from invested funds, shall be deposited by the commissioner and credited to the emergency medical services training account established for purposes of section ninety-seven-q of the state finance law for services and expenses related to emergency medical services training and administration. For the rate period January first, nineteen hundred ninety-four through December thirty-first, nineteen hundred ninety-four, such percentage shall be seventeen and six-tenths percent, for the rate period January first, nineteen hundred ninety-five through December thirty-first, nineteen hundred ninety-five, such percentage shall be twenty-one and eight-tenths percent, and for the rate period January first, nineteen hundred ninety-six through December thirty-first, nineteen hundred ninety-six, such percentage shall be twenty-one and eight-tenths percent.

(f) Distributions from the pools created in accordance with this

subdivision and subdivision fourteen-b of this section, and the components of rates of payment or charges related to the allowances provided in accordance with subdivision fourteen-b of this section shall not be included in gross revenue received for purposes of the assessments pursuant to subdivision eighteen of this section, subject to the provisions of paragraph (e) of subdivision eighteen of this section, and shall not be included in gross receipts received for purposes of the assessments pursuant to section twenty-eight hundred seven-d of this article, subject to the provisions of subdivision twelve of section twenty-eight hundred seven-d of this article.

(g) Notwithstanding any inconsistent provisions of law, the commissioner may borrow from regional or statewide pool reserves for pools established pursuant to sections twenty-eight hundred eight-c, twenty-eight hundred seven-a or this section of this article such funds as shall be necessary, not to exceed the amounts projected to be available pursuant to paragraph (d) of subdivision fourteen-b of this section, annually for distributions in accordance with paragraphs (a), (b), (c), (d) and (h) of this subdivision for a rate year and shall refund such moneys when pool funds become available pursuant to paragraphs (a), (b), (c), (d) and (h) of this subdivision for such rate year.

(h) Notwithstanding any inconsistent provision of this subdivision, prior to allocation of funds in accordance with paragraphs (a), (b), (c) and (d) of this subdivision from the allowance for the period July first, nineteen hundred ninety-five through December thirty-first, nineteen hundred ninety-five and from the allowance for the period January first, nineteen hundred ninety-six through June thirtieth, nineteen hundred ninety-six, thirty-nine million five hundred thousand dollars from the nineteen hundred ninety-five pool and forty-four million five hundred thousand dollars from the nineteen hundred ninety-six pool respectively shall be reserved by the commissioner from the amount accumulated in the statewide pool, proportionally based on the total amount of funds projected to be accumulated in the pool for the year, for additional distributions in accordance with paragraph (b-1) of subdivision nineteen of this section to programs to provide health care coverage for uninsured or underinsured children, and the balance of funds accumulated in the statewide pool shall be

proportionally allocated in accordance with paragraphs (a), (b), (c) and (d) of this subdivision.

* NB Effective until December 31, 2029

* 19-a. Health care services allowance statewide pool distribution. Funds accumulated in the statewide pool created by the allowance authorized in accordance with subparagraphs (ii) and (iii) of paragraph (a) of subdivision fourteen-b of this section, including income from invested funds, shall be distributed or retained in accordance with the following:

(a) Funds shall be transferred to primary health care services regional pools created by the commissioner, and shall be available, including income from invested funds, for distributions in accordance with section twenty-eight hundred seven-bb of this article. Such funds shall be transferred to each regional pool so that the regional pool receives, for the rate periods January first, nineteen hundred ninety-four through December thirty-first, nineteen hundred ninety-four fifty-one and five-tenths percent, January first, nineteen hundred ninety-five through December thirty-first, nineteen hundred ninety-five forty-nine and six-tenths percent, and January first, nineteen hundred ninety-six through June thirtieth, nineteen hundred ninety-six forty-nine and six tenths percent of the total funds to be accumulated in the statewide pool from the allowance submitted by or on behalf of hospitals in that region. Such regions shall be those established for purposes of section two thousand nine hundred four-b of this chapter.

(b) A fixed percentage of the total funds accumulated in the statewide pool, including income from invested funds, shall be available for primary care education and training. For the rate periods January first, nineteen hundred ninety-four through December thirty-first, nineteen hundred ninety-four, such percentage shall be twenty-two and one-tenth percent, January first, nineteen hundred ninety-five through December thirty-first, nineteen hundred ninety-five, such percentage shall be twenty and four-tenths percent, and January first, nineteen hundred ninety-six through June thirtieth, nineteen hundred ninety-six, such percentage shall be twenty and four-tenths percent. Funds shall be available for distributions as follows:

(i) up to four million dollars annually plus income thereon from invested funds shall be set aside and reserved from accumulated funds

and may be accumulated for the following year for distribution by the commissioner for primary care undergraduate medical education in accordance with section nine hundred two of this chapter;

(ii) up to four million dollars annually plus income thereon from invested funds shall be set aside and reserved from accumulated funds and may be accumulated for the following year for distribution by the commissioner for the primary care physician loan repayment program in accordance with section nine hundred three of this chapter;

(iii) up to two million dollars annually plus income thereon from invested funds shall be set aside and reserved from accumulated funds and may be accumulated for the following year for distribution by the commissioner for the primary care practitioner scholarship program in accordance with section nine hundred four of this chapter;

(iv) up to two million dollars annually plus income thereon from invested funds shall be set aside and reserved from accumulated funds and may be accumulated for the following year for distribution by the commissioner for the primary care practitioner education program in accordance with section nine hundred five of this chapter;

(v) the balance remaining annually plus income thereon from invested funds shall be set aside and reserved from accumulated funds and may be accumulated from year to year for distributions by the commissioner for health care development in accordance with section nine hundred six of this chapter; and

(vi) provided, however, that the commissioner in the absence of qualified recipients within a category may reallocate any funds remaining or unallocated within such a category for distribution by the commissioner for the primary care practitioner scholarship program in accordance with section nine hundred four of this chapter and the primary care practitioner education program in accordance with section nine hundred five of this chapter.

(c) A fixed percentage of the total funds accumulated in the statewide pool including income from invested funds, shall be deposited by the commissioner into the miscellaneous special revenue fund - 339, health care planning account, which is established for services and expenses for health planning, for purposes of: (i) per capita support of health systems agencies, provided no health systems agency shall receive less than two hundred fifty thousand dollars annually from the per capita

allocation, and provided further that a health systems agency receiving the minimum level of funding provided pursuant to a per capita formula shall also be entitled to receive matching support; (ii) matching support for other contributions received by health systems agencies from qualified sources as determined by the commissioner; (iii) five hundred thousand dollars for global budgeting demonstrations grants authorized pursuant to section twenty-eight hundred fourteen of this article; and (iv) five hundred thousand dollars for health networks grants authorized pursuant to section twenty-eight hundred fourteen of this article. For the rate period January first, nineteen hundred ninety-four through December thirty-first, nineteen hundred ninety-four such percentage shall be eight and eight-tenths percent, and for the rate period January first, nineteen hundred ninety-five through June thirtieth, nineteen hundred ninety-six such percentage shall be eight and two-tenths percent.

(c-1) Notwithstanding any other provision of law to the contrary, any unspent funds available for programs and services pursuant to subparagraphs (iii) and (iv) of paragraph (c) of this subdivision as of April first, nineteen hundred ninety-five and any additional funds available for programs and services pursuant to subparagraphs (iii) and (iv) of paragraph (c) of this subdivision for the period April first, nineteen hundred ninety-five through December thirty-first, nineteen hundred ninety-five shall be transferred by the commissioner and deposited and credited to the medical assistance program general fund local assistance account.

(c-2) Notwithstanding any other provision of law to the contrary, funds accumulated for programs and services pursuant to subparagraphs (i) and (ii) of paragraph (c) of this subdivision for nineteen hundred ninety-five shall be transferred by the commissioner and deposited and credited to the general fund - local assistance account.

(d) A fixed percentage of the total funds accumulated in the statewide pool, including income from invested funds, shall be deposited by the commissioner and credited to the emergency medical services training account established for purposes of section ninety-seven-q of the state finance law for services and expenses related to emergency medical services training and administration. For the rate period January first, nineteen hundred ninety-four through December thirty-first, nineteen

hundred ninety-four, such percentage shall be seventeen and six-tenths percent, for the rate period January first, nineteen hundred ninety-five through December thirty-first, nineteen hundred ninety-five, such percentage shall be twenty-one and eight-tenths percent, and for the rate period January first, nineteen hundred ninety-six through June thirtieth, nineteen hundred ninety-six, such percentage shall be twenty-one and eight-tenths percent.

(e) If on September thirtieth, nineteen hundred ninety-seven, any funds accumulated over the period January first, nineteen hundred ninety-four through June thirtieth, nineteen hundred ninety-six in the regional pools established pursuant to paragraph (a) of this subdivision are unused or uncommitted for the allocations provided for, such unused or uncommitted funds shall be reallocated for use in accordance with the provisions of subdivision seventeen of this section.

(f) Distributions from the pools created in accordance with this subdivision and subdivision fourteen-b of this section, and the components of rates of payment or charges related to the allowances provided in accordance with subdivision fourteen-b of this section shall not be included in gross revenue received for purposes of the assessments pursuant to subdivision eighteen of this section, subject to the provisions of paragraph (e) of subdivision eighteen of this section, and shall not be included in gross receipts received for purposes of the assessments pursuant to section twenty-eight hundred seven-d of this article, subject to the provisions of subdivision twelve of section twenty-eight hundred seven-d of this article.

(g) Notwithstanding any inconsistent provisions of law, the commissioner may borrow from regional or statewide pool reserves for pools established pursuant to sections twenty-eight hundred eight-c, twenty-eight hundred seven-a or this section of this article such funds as shall be necessary, not to exceed the amounts projected to be available pursuant to paragraph (d) of subdivision fourteen-b of this section, annually for distributions in accordance with paragraphs (a), (b), (c), (d) and (h) of this subdivision for a rate year and shall refund such moneys when pool funds become available pursuant to paragraphs (a), (b), (c), (d) and (h) of this subdivision for such rate year.

(h) Notwithstanding any inconsistent provision of this subdivision,

prior to allocation of funds in accordance with paragraphs (a), (b), (c) and (d) of this subdivision from the allowance for the period July first, nineteen hundred ninety-five through December thirty-first, nineteen hundred ninety-five and from the allowance for the period January first, nineteen hundred ninety-six through June thirtieth, nineteen hundred ninety-six, thirty-nine million five hundred thousand dollars from the nineteen hundred ninety-five pool and twenty-two million two hundred fifty thousand dollars from the nineteen hundred ninety-six pool respectively shall be reserved by the commissioner from the amount accumulated in the statewide pool, proportionally based on the total amount of funds projected to be accumulated in the pool for the year, for additional distributions in accordance with paragraph (b-1) of subdivision nineteen of this section to programs to provide health care coverage for uninsured or underinsured children, and the balance of funds accumulated in the statewide pool shall be proportionally allocated in accordance with paragraphs (a), (b), (c) and (d) of this subdivision.

* NB Effective December 31, 2029

* 19-b. Funds accumulated in the statewide pool created by the assessment authorized in accordance with subdivision eighteen of this section for a period during the period January first, nineteen hundred ninety-seven through December thirty-first, nineteen hundred ninety-nine and periods on and after January first, two thousand, including income from invested funds, shall be transferred by the commissioner and consolidated with funds accumulated from the allowance pursuant to subdivision two of section twenty-eight hundred seven-j of this article for such period and allocated in accordance with subdivision nine of section twenty-eight hundred seven-j of this article.

* NB Effective until December 31, 2029

* 19-b. Funds accumulated in the statewide pool created by the assessment authorized in accordance with subdivision eighteen of this section for a period during the period January first, nineteen hundred ninety-seven through December thirty-first, nineteen hundred ninety-nine, including income from invested funds, shall be transferred by the commissioner and consolidated with funds accumulated from the allowance pursuant to subdivision two of section twenty-eight hundred seven-j of this article for such period and allocated in accordance with

subdivision nine of section twenty-eight hundred seven-j of this article.

* NB Effective and repealed December 31, 2029

20. Payments to pools. (a) Payments by or on behalf of general hospitals to bad debt and charity care regional pools of funds due based on the allowance included in rates and charges in accordance with paragraph (c) of subdivision fourteen of this section and to regional pools created pursuant to paragraph (b) of subdivision fourteen-b and to a statewide pool created pursuant to paragraph (b) of subdivision fourteen-c of this section shall be made on a time schedule established by the council, subject to the approval of the commissioner, by regulation; provided, however, that estimated payments of amounts due for patients discharged in a calendar month commencing on or after October first, nineteen hundred ninety-one must be made within sixty days of the end of each month unless payments of actual amounts due for such calendar months have been made within such sixty day time period. Upon receipt of notification from the commissioner, the comptroller, or a fiscal intermediary designated by the director of the budget, or the commissioner of social services, or a corporation organized and operating in accordance with article forty-three of the insurance law or an organization operating in accordance with article forty-four of this chapter shall withhold from the amount of any payment to be made by the state or such article forty-three corporation or article forty-four organization to a general hospital the amount of any arrearage resulting from such general hospital's failure to make a timely payment to the pools of funds due based on the allowances included in rates and charges in accordance with paragraph (c) of subdivision fourteen, paragraph (a) of subdivision fourteen-b and paragraph (a) of subdivision fourteen-c of this section. Upon withholding such amount, the comptroller, or a designated fiscal intermediary, or the commissioner of social services, or a corporation organized and operating in accordance with article forty-three of the insurance law or an organization operating in accordance with article forty-four of this chapter shall pay the commissioner, or his designee, such amount withheld for deposit into the applicable pool. Any general hospital in arrears resulting from failure to make a timely payment to a pool shall not be eligible for a

distribution from a bad debt and charity care regional pool in accordance with subdivision seventeen of this section until such arrearage is satisfied.

(b) (i) Payments by or on behalf of general hospitals to the bad debt and charity care and capital statewide pool of funds due from the assessments pursuant to subdivision eighteen of this section shall be made on a time schedule established by the council, subject to the approval of the commissioner, by regulation; provided, however, that estimated payments of amounts due for patients discharged in a calendar month commencing on or after October first, nineteen hundred ninety-one must be made within sixty days of the end of each month unless payments of actual amounts due for such calendar months have been made within such sixty day time period. Upon receipt of notification from the commissioner, the comptroller, or a fiscal intermediary designated by the director of the budget, or a corporation organized and operating in accordance with article forty-three of the insurance law or an organization operating in accordance with article forty-four of this chapter shall withhold from the amount of any payment to be made by the state or such article forty-three corporation or article forty-four organization to a general hospital the amount of any arrearage resulting from such general hospital's failure to make a timely payment to the bad debt and charity care and capital statewide pool of funds due from the assessments. Upon withholding such amount, the comptroller, or a designated fiscal intermediary, or a corporation organized and operating in accordance with article forty-three of the insurance law or an organization operating in accordance with article forty-four of this chapter shall pay the commissioner, or his designee, such amount withheld for deposit into the applicable pool. Any general hospital in arrears resulting from failure to make a timely payment to the bad debt and charity care and capital statewide pool shall not be eligible for a distribution from the bad debt and charity care regional pools in accordance with subdivision seventeen of this section or the bad debt and charity care and capital statewide pool in accordance with subdivision nineteen of this section until such arrearage is satisfied.

(ii) For periods on and after January first, two thousand five, reports submitted by general hospitals to implement the assessment set forth in subdivision eighteen of this section shall be submitted

electronically in a form as may be required by the commissioner; provided, however, general hospitals are not prohibited from submitting reports electronically on a voluntary basis prior to such date, and provided further, however, that all such electronic submissions submitted on and after July first, two thousand twelve shall be verified with an electronic signature as prescribed by the commissioner.

(c) (i) Interest shall be due and payable to the commissioner by a general hospital or by a payor paying directly to a pool on the difference between the amount paid to a pool and the amount due to such pool by the hospital or payor from the day of the month the payment was due until the date of payment. The rate of interest shall be twelve percent per annum or at the rate of interest set by the commissioner of taxation and finance with respect to underpayments of tax pursuant to subsection (e) of section one thousand ninety-six of the tax law minus four percentage points. Interest under this paragraph shall not be paid if the amount thereof is less than one dollar. Interest may be collected by the commissioner in the same manner as an arrearage pursuant to this subdivision.

(ii) If a payment by a general hospital or by a payor paying directly to a pool is less than seventy percent of the amount due to such pool by the hospital or payor, a penalty shall be due and payable to the commissioner by the hospital or payor of five percent of the difference between the amount paid to the pool and the amount due to such pool when the failure to pay is for a duration of not more than one month after the due date of the payment with an additional five percent for each additional month or fraction thereof during which such failure continues, not exceeding twenty-five percent in the aggregate. A penalty may be collected by the commissioner in the same manner as an arrearage pursuant to this subdivision.

21. Maximum distributions. (a) No general hospital may receive in total from the distributions made in accordance with paragraph (b) of subdivision fourteen-c, paragraphs (a) and (b) of subdivision seventeen and paragraphs (c), (d) and (e) of subdivision nineteen of this section an amount which exceeds its need for financing losses related to bad debts and the costs of charity care as defined in paragraph (b) of subdivision fourteen of this section.

* (b)(i) No public general hospital may receive in total from disproportionate share payment distributions made in accordance with subdivision seventeen of this section and adjustments in accordance with subdivisions fourteen-a and fourteen-d of this section for the period April first, nineteen hundred ninety-four through December thirty-first, nineteen hundred ninety-four or for annual rate periods beginning on January first on or after January first, nineteen hundred ninety-five through December thirty-first, nineteen hundred ninety-six, or made in accordance with section twenty-eight hundred seven-k of this article and adjustments in accordance with subdivision fourteen-f of this section for annual periods beginning on January first on and after January first, nineteen hundred ninety-seven through December thirty-first, nineteen hundred ninety-nine and on and after January first, two thousand an amount which exceeds the costs incurred during such period of furnishing inpatient and ambulatory hospital services, net of medical assistance payments pursuant to title eleven of article five of the social services law, other than disproportionate share payments pursuant to subdivision twenty-six of this section or subdivision thirteen of section twenty-eight hundred seven-k of this article, and payments by uninsured patients, by the hospital to individuals who either are eligible for medical assistance pursuant to title eleven of article five of the social services law or have no health insurance or other source of third party coverage; provided, however, that the commissioner shall make such increase to such maximum or to the manner in which the limitation on disproportionate share payments is applied as shall increase the maximum limit for a period or part of a period as authorized by federal law or regulation or the secretary of the department of health and human services for purposes of federal financial participation pursuant to title XIX of the federal social security act. For purposes of this paragraph, payments to a general hospital for services provided to indigent patients made by the state or a unit of local government within the state shall not be considered to be a source of third party payment.

(ii) Reductions pursuant to this paragraph shall be made in the following sequence:

(A) for periods through December thirty-first, nineteen hundred ninety-six, adjustments in accordance with subdivision fourteen-d of

this section; adjustments in accordance with subdivision fourteen-a of this section; and distributions in accordance with subdivision seventeen of this section, and

(B) for periods during the period January first, nineteen hundred ninety-seven through December thirty-first, nineteen hundred ninety-nine and on and after January first, two thousand, adjustments in accordance with subdivision fourteen-f of this section; and distributions in accordance with section twenty-eight hundred seven-k of this article.

(iii) (A) In the event a reduction pursuant to subparagraphs (i) and (ii) of this paragraph is effective for distributions in accordance with subdivision seventeen of this section for a general hospital, such general hospital shall receive a supplementary distribution not as a disproportionate share payment and not subject to federal financial participation from funds available pursuant to subdivision seventeen of this section for periods through December thirty-first, nineteen hundred ninety-six equal to one-half of such reduction.

(B) In the event a reduction pursuant to subparagraphs (i) and (ii) of this paragraph is effective for distributions in accordance with section twenty-eight hundred seven-k of this article for a general hospital, such general hospital shall receive a supplementary distribution not as a disproportionate share payment and not subject to federal financial participation from funds available pursuant to section twenty-eight hundred seven-k of this article for periods during the period January first, nineteen hundred ninety-seven through December thirty-first, nineteen hundred ninety-nine and on and after January first, two thousand equal to one-half of such reduction.

* NB Effective until December 31, 2029

* (b)(i) No public general hospital may receive in total from disproportionate share payment distributions made in accordance with subdivision seventeen of this section and adjustments in accordance with subdivisions fourteen-a and fourteen-d of this section for the period April first, nineteen hundred ninety-four through December thirty-first, nineteen hundred ninety-four or for annual rate periods beginning on January first on or after January first, nineteen hundred ninety-five through December thirty-first, nineteen hundred ninety-six, or made in accordance with section twenty-eight hundred seven-k of this article and adjustments in accordance with subdivision fourteen-f of this section

for annual periods beginning on January first on and after January first, nineteen hundred ninety-seven through December thirty-first, nineteen hundred ninety-nine an amount which exceeds the costs incurred during such period of furnishing inpatient and ambulatory hospital services, net of medical assistance payments pursuant to title eleven of article five of the social services law, other than disproportionate share payments pursuant to subdivision twenty-six of this section or subdivision thirteen of section twenty-eight hundred seven-k of this article, and payments by uninsured patients, by the hospital to individuals who either are eligible for medical assistance pursuant to title eleven of article five of the social services law or have no health insurance or other source of third party coverage; provided, however, that the commissioner shall make such increase to such maximum or to the manner in which the limitation on disproportionate share payments is applied as shall increase the maximum limit for a period or part of a period as authorized by federal law or regulation or the secretary of the department of health and human services for purposes of federal financial participation pursuant to title XIX of the federal social security act. For purposes of this paragraph, payments to a general hospital for services provided to indigent patients made by the state or a unit of local government within the state shall not be considered to be a source of third party payment.

(ii) Reductions pursuant to this paragraph shall be made in the following sequence:

(A) for periods through December thirty-first, nineteen hundred ninety-six, adjustments in accordance with subdivision fourteen-d of this section; adjustments in accordance with subdivision fourteen-a of this section; and distributions in accordance with subdivision seventeen of this section, and

(B) for periods during the period January first, nineteen hundred ninety-seven through December thirty-first, nineteen hundred ninety-nine, adjustments in accordance with subdivision fourteen-f of this section; and distributions in accordance with section twenty-eight hundred seven-k of this article.

(iii) (A) In the event a reduction pursuant to subparagraphs (i) and (ii) of this paragraph is effective for distributions in accordance with subdivision seventeen of this section for a general hospital, such

general hospital shall receive a supplementary distribution not as a disproportionate share payment and not subject to federal financial participation from funds available pursuant to subdivision seventeen of this section for periods through December thirty-first, nineteen hundred ninety-six.

(B) In the event a reduction pursuant to subparagraphs (i) and (ii) of this paragraph is effective for distributions in accordance with section twenty-eight hundred seven-k of this article for a general hospital, such general hospital shall receive a supplementary distribution not as a disproportionate share payment and not subject to federal financial participation from funds available pursuant to section twenty-eight hundred seven-k of this article for periods during the period January first, nineteen hundred ninety-seven through December thirty-first, nineteen hundred ninety-nine equal to one-half of such reduction.

* NB Effective and expires December 31, 2029

* (b) (i) No public general hospital may receive in total from disproportionate share payment distributions made in accordance with subdivision seventeen of this section and adjustments in accordance with subdivisions fourteen-a and fourteen-d of this section for the period April first, nineteen hundred ninety-four through December thirty-first, nineteen hundred ninety-four or for annual rate period beginning on January first on or after January first, nineteen hundred ninety-five an amount which exceeds the costs incurred during such period of furnishing inpatient and ambulatory hospital services, net of medical assistance payments pursuant to title eleven of article five of the social services law, other than disproportionate share payments pursuant to subdivision twenty-six of this section, and payments by uninsured patients, by the hospital to individuals who either are eligible for medical assistance pursuant to title eleven of article five of the social services law or have no health insurance or other source of third party coverage; provided, however, that the commissioner shall make such increase to such maximum or to the manner in which the limitation on disproportionate share payments is applied as shall increase the maximum limit for a period or part of a period as authorized by federal law or regulation or the secretary of the department of health and human services for purposes of federal financial participation pursuant to title XIX of the federal social security act. For purposes of this

paragraph, payments to a general hospital for services provided to indigent patients made by the state or a unit of local government within the state shall not be considered to be a source of third party payment.

(ii) Reductions pursuant to this paragraph shall be made in the following sequence: adjustments in accordance with subdivision fourteen-d of this section; adjustments in accordance with subdivision fourteen-a of this section; and distributions in accordance with subdivision seventeen of this section.

(iii) In the event a reduction pursuant to subparagraphs (i) and (ii) of this paragraph is effective for distributions in accordance with subdivision seventeen of this section for a general hospital, such general hospital shall receive a supplementary distribution not as a disproportionate share payment and not subject to federal financial participation from funds available pursuant to subdivision seventeen of this section equal to one-half of such reduction.

* NB Effective December 31, 2029

* (c)(i) No general hospital other than a public general hospital may receive in total from disproportionate share payment distributions made in accordance with paragraph (b) of subdivision fourteen-c, subdivision seventeen and paragraphs (c) and (d) of subdivision nineteen of this section and adjustments in accordance with subdivision fourteen-d of this section for the period April first, nineteen hundred ninety-five through December thirty-first, nineteen hundred ninety-five or for the annual rate period beginning on January first, nineteen hundred ninety-six through December thirty-first, nineteen hundred ninety-six, or made in accordance with section twenty-eight hundred seven-k of this article for annual periods beginning on January first on and after January first, nineteen hundred ninety-seven through December thirty-first, nineteen hundred ninety-nine and on and after January first, two thousand an amount which exceeds the costs incurred during such period of furnishing inpatient and ambulatory hospital services, net of medical assistance payments pursuant to title eleven of article five of the social services law, other than disproportionate share payments pursuant to subdivision twenty-six of this section or subdivision thirteen of section twenty-eight hundred seven-k of this article, and payments by uninsured patients, by the hospital to individuals who either are eligible for medical assistance pursuant to

title eleven of article five of the social services law or have no health insurance or other source of third party coverage; provided, however, that the commissioner shall make such modifications to the manner in which the limitation on disproportionate share payments is applied to such hospitals as shall increase the maximum limit for a period or part of a period as authorized by federal law or regulation or the secretary of the department of health and human services for purposes of federal financial participation pursuant to title XIX of the federal social security act. For purposes of this paragraph, payments to a general hospital for services provided to indigent patients made by the state or a unit of local government within the state shall not be considered to be a source of third party payment.

(ii)(A) Reductions pursuant to this paragraph for periods through December thirty-first, nineteen hundred ninety-six shall be made in the following sequence for general hospitals other than financially distressed hospitals: adjustments in accordance with subdivision fourteen-d of this section; and distributions in accordance with subdivision seventeen of this section.

(B) Reductions pursuant to this paragraph for periods through December thirty-first, nineteen hundred ninety-six shall be made in the following sequence for general hospitals designated as financially distressed hospitals: distributions in accordance with paragraph (b) of subdivision fourteen-c of this section; distributions in accordance with paragraphs (c) and (d) of subdivision nineteen of this section; and distributions in accordance with subdivision seventeen of this section.

(C) Reductions pursuant to this paragraph for periods during the period January first, nineteen hundred ninety-seven through December thirty-first, nineteen hundred ninety-nine and on and after January first, two thousand, shall be made from distributions in accordance with section twenty-eight hundred seven-k of this article.

(iii) (A) In the event a reduction pursuant to subparagraphs (i) and (ii) of this paragraph is effective for distributions in accordance with paragraph (b) of subdivision fourteen-c of this section, paragraph (c) or (d) of subdivision nineteen of this section, subdivision fourteen-d of this section or subdivision seventeen of this section for a general hospital, such general hospital shall receive a supplementary distribution not as a disproportionate share payment and not subject to

federal financial participation from funds available pursuant to such subdivisions equal to one-half of such reduction for periods through December thirty-first, nineteen hundred ninety-six.

(B) In the event a reduction pursuant to subparagraphs (i) and (ii) of this paragraph is effective for distributions in accordance with section twenty-eight hundred seven-k of this article for a general hospital, such general hospital shall receive a supplementary distribution not as a disproportionate share payment and not subject to federal financial participation from funds available pursuant to section twenty-eight hundred seven-k of this article for periods during the period January first, nineteen hundred ninety-seven through December thirty-first, nineteen hundred ninety-nine and on and after January first, two thousand equal to one-half of such reduction.

* NB Effective until December 31, 2029

* (c)(i) No general hospital other than a public general hospital may receive in total from disproportionate share payment distributions made in accordance with paragraph (b) of subdivision fourteen-c, subdivision seventeen and paragraphs (c) and (d) of subdivision nineteen of this section and adjustments in accordance with subdivision fourteen-d of this section for the period April first, nineteen hundred ninety-five through December thirty-first, nineteen hundred ninety-five or for the annual rate period beginning on January first, nineteen hundred ninety-six through December thirty-first, nineteen hundred ninety-six, or made in accordance with section twenty-eight hundred seven-k of this article for annual periods beginning on January first on and after January first, nineteen hundred ninety-seven through December thirty-first, nineteen hundred ninety-nine an amount which exceeds the costs incurred during such period of furnishing inpatient and ambulatory hospital services, net of medical assistance payments pursuant to title eleven of article five of the social services law, other than disproportionate share payments pursuant to subdivision twenty-six of this section or subdivision thirteen of section twenty-eight hundred seven-k of this article, and payments by uninsured patients, by the hospital to individuals who either are eligible for medical assistance pursuant to title eleven of article five of the social services law or have no health insurance or other source of third party coverage; provided, however, that the commissioner shall make such modifications

to the manner in which the limitation on disproportionate share payments is applied to such hospitals as shall increase the maximum limit for a period or part of a period as authorized by federal law or regulation or the secretary of the department of health and human services for purposes of federal financial participation pursuant to title XIX of the federal social security act. For purposes of this paragraph, payments to a general hospital for services provided to indigent patients made by the state or a unit of local government within the state shall not be considered to be a source of third party payment.

(ii)(A) Reductions pursuant to this paragraph for periods through December thirty-first, nineteen hundred ninety-six shall be made in the following sequence for general hospitals other than financially distressed hospitals: adjustments in accordance with subdivision fourteen-d of this section; and distributions in accordance with subdivision seventeen of this section.

(B) Reductions pursuant to this paragraph for periods through December thirty-first, nineteen hundred ninety-six shall be made in the following sequence for general hospitals designated as financially distressed hospitals: distributions in accordance with paragraph (b) of subdivision fourteen-c of this section; distributions in accordance with paragraphs (c) and (d) of subdivision nineteen of this section; and distributions in accordance with subdivision seventeen of this section.

(C) Reductions pursuant to this paragraph for periods during the period January first, nineteen hundred ninety-seven through December thirty-first, nineteen hundred ninety-nine, shall be made from distributions in accordance with section twenty-eight hundred seven-k of this article.

(iii) (A) In the event a reduction pursuant to subparagraphs (i) and (ii) of this paragraph is effective for distributions in accordance with paragraph (b) of subdivision fourteen-c of this section, paragraph (c) or (d) of subdivision nineteen of this section, subdivision fourteen-d of this section or subdivision seventeen of this section for a general hospital, such general hospital shall receive a supplementary distribution not as a disproportionate share payment and not subject to federal financial participation from funds available pursuant to such subdivisions equal to one-half of such reduction for periods through December thirty-first, nineteen hundred ninety-six.

(B) In the event a reduction pursuant to subparagraphs (i) and (ii) of this paragraph is effective for distributions in accordance with section twenty-eight hundred seven-k of this article for a general hospital, such general hospital shall receive a supplementary distribution not as a disproportionate share payment and not subject to federal financial participation from funds available pursuant to section twenty-eight hundred seven-k of this article for periods during the period January first, nineteen hundred ninety-seven through December thirty-first, nineteen hundred ninety-nine equal to one-half of such reduction.

* NB Effective and expires December 31, 2029

* (c) (i) No general hospital other than a public general hospital may receive in total from disproportionate share payment distributions made in accordance with paragraph (b) of subdivision fourteen-c, subdivision seventeen and paragraphs (c) and (d) of subdivision nineteen of this section and adjustments in accordance with subdivision fourteen-d of this section for the period April first, nineteen hundred ninety-five through December thirty-first, nineteen hundred ninety-five or for the annual rate period beginning on January first, nineteen hundred ninety-six an amount which exceeds the costs incurred during such period of furnishing inpatient and ambulatory hospital services, net of medical assistance payments pursuant to title eleven of article five of the social services law, other than disproportionate share payments pursuant to subdivision twenty-six of this section, and payments by uninsured patients, by the hospital to individuals who either are eligible for medical assistance pursuant to title eleven of article five of the social services law or have no health insurance or other source of third party coverage; provided, however, that the commissioner shall make such modifications to the manner in which the limitation on disproportionate share payments is applied to such hospitals as shall increase the maximum limit for a period or part of a period as authorized by federal law or regulation or the secretary of the department of health and human services for purposes of federal financial participation pursuant to title XIX of the federal social security act. For purposes of this paragraph, payments to a general hospital for services provided to indigent patients made by the state or a unit of local government within the state shall not be considered to be a source of third party payment.

(ii)(A) Reductions pursuant to this paragraph shall be made in the

following sequence for general hospitals other than financially distressed hospitals: adjustments in accordance with subdivision fourteen-d of this section; and distributions in accordance with subdivision seventeen of this section.

(B) Reductions pursuant to this paragraph shall be made in the following sequence for general hospitals designated as financially distressed hospitals: distributions in accordance with paragraph (b) of subdivision fourteen-c of this section; distributions in accordance with paragraphs (c) and (d) of subdivision nineteen of this section; and distributions in accordance with subdivision seventeen of this section.

(iii) In the event a reduction pursuant to subparagraphs (i) and (ii) of this paragraph is effective for distributions in accordance with paragraph (b) of subdivision fourteen-c of this section, paragraph (c) or (d) of subdivision nineteen of this section, subdivision fourteen-d of this section or subdivision seventeen of this section for a general hospital, such general hospital shall receive a supplementary distribution not as a disproportionate share payment and not subject to federal financial participation from funds available pursuant to such subdivisions equal to one-half of such reduction.

* NB Effective December 31, 2029

* (d)(i) Commencing April first, nineteen hundred ninety-four, no general hospital may be eligible to receive disproportionate share payments determined in accordance with subdivision twenty-six of this section through December thirty-first, nineteen hundred ninety-six or in accordance with section twenty-eight hundred seven-k of this article for periods during the period January first, nineteen hundred ninety-seven through December thirty-first, nineteen hundred ninety-nine and on and after January first, two thousand unless the hospital has an inpatient utilization rate for patients eligible for payments pursuant to title eleven of article five of the social services law eligible for federal financial participation pursuant to title nineteen of the federal social security act of not less than one percent.

(ii) In the event a general hospital is disqualified pursuant to subparagraph (i) of this paragraph from receiving disproportionate share payments for a period, such general hospital shall receive distributions not as disproportionate share payments and not subject to federal financial participation from funds available pursuant to subdivision

seventeen of this section for periods through December thirty-first, nineteen hundred ninety-six, and pursuant to section twenty-eight hundred seven-k of this article for periods during the period January first, nineteen hundred ninety-seven through December thirty-first, nineteen hundred ninety-nine and on and after January first, two thousand equal to one-half of the distributions for which such general hospital would have been qualified pursuant to subdivision seventeen of this section for periods through December thirty-first, nineteen hundred ninety-six, and pursuant to section twenty-eight hundred seven-k of this article for periods during the period January first, nineteen hundred ninety-seven through December thirty-first, nineteen hundred ninety-nine and on and after January first, two thousand without consideration of subparagraph (i) of this paragraph.

* NB Effective until December 31, 2029

* (d)(i) Commencing April first, nineteen hundred ninety-four, no general hospital may be eligible to receive disproportionate share payments determined in accordance with subdivision twenty-six of this section through December thirty-first, nineteen hundred ninety-six or in accordance with section twenty-eight hundred seven-k of this article for periods during the period January first, nineteen hundred ninety-seven through December thirty-first, nineteen hundred ninety-nine unless the hospital has an inpatient utilization rate for patients eligible for payments pursuant to title eleven of article five of the social services law eligible for federal financial participation pursuant to title nineteen of the federal social security act of not less than one percent.

(ii) In the event a general hospital is disqualified pursuant to subparagraph (i) of this paragraph from receiving disproportionate share payments for a period, such general hospital shall receive distributions not as disproportionate share payments and not subject to federal financial participation from funds available pursuant to subdivision seventeen of this section for periods through December thirty-first, nineteen hundred ninety-six, and pursuant to section twenty-eight hundred seven-k of this article for periods during the period January first, nineteen hundred ninety-seven through December thirty-first, nineteen hundred ninety-nine equal to one-half of the distributions for which such general hospital would have been qualified pursuant to

subdivision seventeen of this section for periods through December thirty-first, nineteen hundred ninety-six, and pursuant to section twenty-eight hundred seven-k of this article for periods during the period January first, nineteen hundred ninety-seven through December thirty-first, nineteen hundred ninety-nine without consideration of subparagraph (i) of this paragraph.

* NB Effective and expires December 31, 2029

* (d)(i) Commencing April first, nineteen hundred ninety-four, no general hospital may be eligible to receive disproportionate share payments determined in accordance with subdivision twenty-six of this section unless the hospital has an inpatient utilization rate for patients eligible for payments pursuant to title eleven of article five of the social services law eligible for federal financial participation pursuant to title nineteen of the federal social security act of not less than one percent.

(ii) In the event a general hospital is disqualified pursuant to subparagraph (i) of this paragraph from receiving disproportionate share payments for a period, such general hospital shall receive distributions not as disproportionate share payments and not subject to federal financial participation from funds available pursuant to subdivision seventeen of this section equal to one-half of the distributions for which such general hospital would have been qualified pursuant to subdivision seventeen of this section without consideration of subparagraph (i) of this paragraph.

* NB Effective December 31, 2029

* (e) For purposes of calculations pursuant to paragraphs (b) and (c) of this subdivision of maximum disproportionate share payment distributions for a year or part thereof, costs incurred of furnishing hospital services net of medical assistance payments, other than disproportionate share payments, and payments by uninsured patients shall be determined initially based on base year data and statistics for the base year two years immediately preceding the year projected to the year by the trend factor determined in accordance with subdivision ten of this section and shall be subsequently revised to reflect actual period data and statistics. For purposes of calculations pursuant to paragraph (d) of this subdivision of eligibility to receive disproportionate share payments for a year or part thereof, the hospital

inpatient utilization rate shall be determined based on base year statistics in accordance with a methodology established by the commissioner, and costs incurred of furnishing hospital services shall be determined in accordance with a methodology established by the commissioner consistent with requirements of the secretary of the department of health and human services for purposes of federal financial participation pursuant to title XIX of the federal social security act in disproportionate share payments.

* NB Effective until December 31, 2029

* (e) For purposes of calculations pursuant to paragraphs (b) and (c) of this subdivision of maximum disproportionate share payment distributions for a rate year or part thereof, costs incurred of furnishing hospital services net of medical assistance payments, other than disproportionate share payments, and payments by uninsured patients shall be determined initially based on base year data and statistics for the base year two years immediately preceding the rate year projected to the rate year by the trend factor determined in accordance with subdivision ten of this section and shall be subsequently revised to reflect actual rate period data and statistics. For purposes of calculations pursuant to paragraph (d) of this subdivision of eligibility to receive disproportionate share payments for a rate year or part thereof, the hospital inpatient utilization rate shall be determined based on base year statistics in accordance with a methodology established by the commissioner, and costs incurred of furnishing hospital services shall be determined in accordance with a methodology established by the commissioner consistent with requirements of the secretary of the department of health and human services for purposes of federal financial participation pursuant to title XIX of the federal social security act in disproportionate share payments.

* NB Effective December 31, 2029

(e-1) For periods on and after January first, two thousand eleven, for purposes of calculations pursuant to paragraphs (b) and (c) of this subdivision of maximum disproportionate share payment distributions for a rate year or part thereof, costs incurred of furnishing hospital services net of medical assistance payments, other than disproportionate share payments, and payments by uninsured patients shall for the two thousand eleven calendar year, shall be determined initially based on

each hospital's submission of a fully completed two thousand eight disproportionate share hospital data collection tool, which is required to be submitted to the department by March thirty-first, two thousand eleven, and shall be subsequently revised to reflect each hospital's submission of a fully completed two thousand nine disproportionate share hospital data collection tool, which is required to be submitted to the department by October first, two thousand eleven.

For calendar years on and after two thousand twelve, such initial determinations shall reflect submission of data as required by the commissioner on a specified date. All such initial determinations shall subsequently be revised to reflect actual rate period data and statistics. Indigent care payments will be withheld in instances when a hospital has not submitted required information by the due dates prescribed in this paragraph, provided, however, that such payments shall be made upon submission of such required data. For purposes of calculations pursuant to paragraph (d) of this subdivision of eligibility to receive disproportionate share payments for a rate year or part thereof, the hospital inpatient utilization rate shall be determined based on the base year statistics in accordance with the methodology established by the commissioner, and costs incurred of furnishing hospital services shall be determined in accordance with a methodology established by the commissioner consistent with requirements of the secretary of the department of health and human services for purposes of federal financial participation pursuant to the title XIX of the federal social security act in disproportionate share payments.

(f) The commissioner may recover any amounts paid in excess of maximum permissible distributions and adjustments determined pursuant to this subdivision by retroactive adjustment and recoupment from payments made for beneficiaries eligible for payments pursuant to title eleven of article five of the social services law.

(g) Notwithstanding any inconsistent provision of this subdivision, the provision of subparagraph (iii) of paragraph (b), subparagraph (iii) of paragraph (c) or subparagraph (ii) of paragraph (d) of this subdivision shall be of no force and effect and shall be deemed to have been null and void as of January first, nineteen hundred ninety-four in the event the secretary of the department of health and human services

determines that distributions based on such provisions would render a health care related tax on general hospitals an impermissible health care related tax for purposes of the federal medicaid voluntary contribution and provider specific tax amendments of nineteen hundred ninety-one for purposes of such health care related tax receipts reducing the amount deemed expended by the state as medical assistance for purposes of federal financial participation.

22. Undistributed funds. Any funds, including income from invested funds, remaining in the bad debt and charity care and capital statewide pool after distributions in accordance with paragraphs (a), (b), (b-1), (c), (d), (e) and (f) of subdivision nineteen of this section shall be distributed proportionately to voluntary non-profit, private proprietary and public general hospitals, excluding major public general hospitals, on the basis of hospital specific assessments submitted to the pool.

23. Reimbursement rates. The assessments pursuant to subdivision eighteen of this section shall not be an allowable cost in the determination of general hospital inpatient reimbursement rates in accordance with this section and section twenty-eight hundred seven of this article.

24. Federal financial participation. The council may adopt rules and regulations, subject to the approval of the commissioner, to adjust rates of payment by governmental agencies for general hospital inpatient services determined in accordance with this section as necessary to meet federal requirements for securing federal financial participation pursuant to title XIX of the federal social security act in the event the state cannot provide assurances satisfactory to the secretary of health and human services related to a comparison of rates of payment in the aggregate to maximum aggregate payments determined in accordance with federal law and regulation which are substantially the same as such assurances as in effect on October twenty-sixth, nineteen hundred eighty-seven for securing such federal financial participation. Notwithstanding any other law, the state reserves the right to recoup any payments by governmental agencies for general hospital inpatient services authorized by this section for which federal financial

participation has been denied in connection with that determination by the department of health and human services.

25. Medical education expenses. (a) Notwithstanding any inconsistent provision of this section, to encourage the training of more primary care physicians, for annual rate periods beginning on or after January first, nineteen hundred ninety-two, indirect medical education expenses, as defined in subparagraph (ii) of paragraph (c) of subdivision seven of this section, of a general hospital included in the determination of the operating cost component of general hospital rates of payment for a rate period in accordance with subdivisions six and seven of this section or in accordance with paragraph (e), (g) or (i) of subdivision four of this section for general hospitals or distinct units of general hospitals not reimbursed on the basis of case based payments per discharge shall be adjusted to reflect the following modifications:

(i) the calculation of interns and residents to bed ratios for purposes of determining indirect reimbursement shall include residents in non-hospital ambulatory settings. The sum in total for all general hospitals of the indirect medical education expenses shall equal the sum in total for each general hospital determined as if the provisions of this section were applied without consideration of residents in non-hospital ambulatory settings; and

(ii) for annual rate periods beginning on or after January first, nineteen hundred ninety-two, residencies shall be weighted to provide higher weights for primary care and emergency medicine physicians. Primary care residents specialties shall include family medicine, general pediatrics, primary care internal medicine and primary care obstetrics and gynecology. In determining whether a residency is in primary care, the commissioner shall consult with the New York state council on graduate medical education and the state hospital review and planning council. Reimbursable indirect expenses of medical education of a general hospital for a rate period shall be weighted based on projected medical education statistics for such general hospital for such rate period, and subsequently reconciled through appropriate audit procedures to actual statistics by a prospective adjustment to rates of payment. The weighting factors shall be determined based on nineteen hundred ninety data and statistics and shall include residents

identified in subparagraph (i) of this paragraph not previously included in such calculations such that the sum in total for all general hospitals of the results of the weighting factors multiplied by the indirect medical education expenses for each general hospital shall equal, approximately, the sum in total for all general hospitals of the indirect medical education expenses for each general hospital determined as if the provisions of this section were applied without consideration of the weighting factors or residents in non-hospital ambulatory settings determined pursuant to this subdivision. Residency positions in any specialty shall be weighted to equal no less than nine-tenths of what such position would have equaled if reimbursement were to have been calculated without regard to the weighting factors. If a general hospital is reimbursed by this provision in excess of the amount such hospital would have been reimbursed without regard to the weighting factors, such general hospital shall apply such additional funds to encourage the training of primary care physicians. The provisions of this subparagraph shall not apply to those four specialty eye and ear, special surgery and orthopedic and joint disease hospitals, specified by the commissioner, whose primary mission is to engage in research, training, and clinical care in the above-named areas.

(b) Hospitals shall furnish to the department such reports and information as may be required by the commissioner to assess the cost, quality and health system needs for medical education provided.

(c) For purposes of determining how such weighting factors have resulted in the increased training of physicians in primary care specialties, the council on graduate medical education shall prepare a report on or before March thirty-first, nineteen hundred ninety-five. Such report shall include, but shall not be limited to: an evaluation of the effectiveness such weighting factors have had on the number of residents matched in primary care specialties; the degree to which such weighting factors have impacted general hospitals to redirect their residency programs toward training primary care physicians; and the impact such weighting factors have had on graduate medical education within general hospitals. Such report shall also include recommendations to the governor and the legislature on the continuation, expiration or modification of such weighting factors.

(d) Notwithstanding any inconsistent provision of this section and

subject to the availability of federal financial participation:

(i) For periods on and after April first, two thousand four, the commissioner shall adjust inpatient medical assistance rates of payment established pursuant to this section, including discrete rates of payment calculated pursuant to paragraph a-three of subdivision one of this section, for non-public general hospitals, and for periods on and after April first, two thousand seven, for public and non-public general hospitals, in accordance with subparagraph (ii) of this paragraph, for purposes of reimbursing graduate medical education costs based on the following methodology:

(ii) Rate adjustments for each general hospital shall be based on the difference between the graduate medical education component, direct and indirect, of the two thousand three medical assistance inpatient rates of payment, including exempt unit per diem rates, and an estimate of what the graduate medical education component, direct and indirect, of such medical assistance inpatient rates of payment, including exempt unit per diem rates would be, stated at two thousand three levels and calculated as follows:

(A) Each general hospital's total direct medical education costs as reported in the two thousand one institutional cost report submitted as of December thirty-first, two thousand three, and

(B) An estimate of the total indirect medical education costs for two thousand one calculated in accordance with the methodology applicable for purposes of determining an estimate of indirect medical education costs pursuant to subparagraph (ii) of paragraph (c) of subdivision seven of this section. The indirect medical education costs shall equal the product of two thousand one hospital specific inpatient operating costs, including exempt unit costs, and the indirect teaching cost percentage determined by the following formula:

$$1 - (1 / (1 + 1.89((1 + r)^{.405} - 1)))$$

where r equals the ratio of residents and fellows to beds for two thousand one adjusted to reflect the projected two thousand three resident counts.

(C) Each hospital's rate adjustment shall be limited to seventy-five percent of the graduate medical education component included in its two thousand three medical assistance inpatient rates of payment, including exempt unit rates. For periods on and after April first, two thousand

seven, the seventy-five percent limit shall not apply to rate decreases calculated pursuant to this paragraph.

(D) For the period April first, two thousand four through March thirty-first, two thousand seven, no hospital shall receive a rate adjustment pursuant to this paragraph if such rate adjustment would be a negative amount. For periods on and after April first, two thousand seven, no public general hospital shall receive a rate increase calculated pursuant to this paragraph.

(iii) If the aggregate amount of rate adjustments calculated pursuant to this paragraph exceeds the upper payment limit calculated pursuant to federal regulations, such rate adjustments shall be reduced proportionally by the amount in excess of the federal upper payment limit. Such reduction, if applicable, shall be calculated on an annual basis.

(iv) Such rate adjustment shall be included as an add-on to medical assistance inpatient rates of payment, excluding exempt unit rates, but including inpatient rates of payment established in accordance with paragraph a-three of subdivision one of this section. Such rate add-on shall be based on medical assistance data reported in each hospital's annual cost report submitted for the period two years prior to the rate year and filed with the department by November first of the year prior to the rate year. Such amounts shall not be reconciled to reflect changes in medical assistance utilization between the year two years prior to the rate year and the rate year.

(e) From amounts available pursuant to paragraph (oo) of subdivision one of section twenty-eight hundred seven-v of this article, allocations shall be made to non-public general hospitals receiving a rate adjustment pursuant to paragraph (d) of this subdivision when the rate adjustment pursuant to paragraph (d) of this subdivision results in the general hospital exceeding its applicable disproportionate share payment limit in the year in which the adjustment is made and the amount of the associated reduction in the hospital's disproportionate share payments would result in the hospital receiving less than its total distribution amount in that year. A hospital's "total distribution amount" shall be the amount that the hospital would have received pursuant to paragraphs (c) and (d) of subdivision three of section twenty-eight hundred seven-m of this article prior to the effective date of this paragraph. A

hospital's eligible loss for purposes of this paragraph shall be the amount of the loss in such total distribution amount. Each eligible hospital's allocation of available funds pursuant to this paragraph within a year shall be determined based on its proportionate share of the aggregate eligible losses for all such hospitals, limited by the amount of the rate adjustment pursuant to paragraph (d) of this subdivision.

26. Disproportionate share payments. Distributions to general hospitals from bad debt and charity care regional pools pursuant to subdivision seventeen of this section, distributions to general hospitals from the bad debt and charity care and capital statewide pool pursuant to paragraphs (c) and (d) of subdivision nineteen of this section, distributions to general hospitals from the bad debt and charity care for financially distressed hospitals statewide pool pursuant to subdivision fourteen-c of this section and the adjustment provided in accordance with subdivision fourteen-a of this section and the adjustment provided in accordance with subdivision fourteen-d of this section shall be considered disproportionate share payments for inpatient hospital services to general hospitals serving a disproportionate number of low income patients with special needs for purposes of providing assurances to the secretary of health and human services as necessary to meet federal requirements for securing federal financial participation pursuant to title XIX of the federal social security act.

27. Reports. (a) The commissioner of health shall submit a report to the legislature and the council on health care financing on or before February first, nineteen hundred eighty-eight detailing the objective, impact, design and computation for an inpatient pricing component. In terms of the design and computation for a pricing system such report shall include but not be limited to: a description and methodology for developing peer groups, identification of costs included in the calculation of a group average and any adjustments made to such costs, the methodology developed to reflect outliers, any teaching or disproportionate share adjustments made, the calculation of wage and power equalization factors, and identification of any adjustments made

to the service intensity weights or diagnosis-related group categories. The commissioner shall explore methodologies for the inclusion of severity of illness considerations in determining group average costs and rates and shall include all details of his analysis in the report required under this subparagraph. If it is determined that a severity of illness adjustment cannot be developed for incorporation in the computations, the report filed shall include the specific reasons for this conclusion. With regard to a fiscal impact analysis such report shall include but not be limited to the impact on major types of general hospitals including rural, urban, teaching, non-teaching, plus a regional analysis; and should indicate any characteristics which can be observed regarding general hospitals which would be significantly impacted by the introduction of a pricing component. The commissioner shall expeditiously make available for inspection by interested parties pertinent data used in the development of the inpatient pricing component consistent with appropriate department procedures for the release and protection of confidential data.

(b) The commissioner shall submit a report to the governor and the legislature on or before February first, nineteen hundred ninety-five regarding the objective, impact, design and implementation of the case based payment system for inpatient hospital services based on diagnosis-related groups created pursuant to this section including, in particular, an analysis of the group price component of case based rates of payment and the appropriateness and effectiveness of the provisions relating to financing of uncompensated care. The reports shall include but not be limited to a fiscal impact analysis of the impact of the case based payment system on major types of general hospitals including rural, urban, teaching and non-teaching, plus a regional analysis. Such reports shall evaluate the impact of the case based payment system on general hospital inpatient medical and clinical care and the quality of hospital services. The reports shall also include recommendations for continuation or modification of the case based payment system for inpatient hospital services provided on or after January first, nineteen hundred ninety-six.

** (c) The commissioner shall report to the governor and the legislature on or before December first, nineteen hundred eighty-eight with a plan relating to the structure and financing of graduate medical

education. Such plan shall include an evaluation of and recommendations for graduate medical education with respect to health services delivery and educational goals including but not limited to the following: appropriate supply and distribution of primary care providers by geographic area; adequate supply and distribution of medical specialists according to projected population needs; educational opportunities representative of current and future practice settings; the impact of such plan on health care delivery in currently underserved and rural areas; and reimbursement changes to effectuate the recommendations included in the plan. Such plan shall be developed with substantial participation by the department of education, the medical schools, residency training programs, health systems agencies, health care institutions, and physicians.

** NB Inadvertently omitted from 731/93 amendment

* 28. Notwithstanding any inconsistent provision of this section:

(a) the commissioner may adjust, on a per unit of service basis, general hospital inpatient services rates of payment established pursuant to this section as in effect on and before December thirty-first, nineteen hundred ninety-six prospectively as an additional factor to be paid, including the impact of payment differentials as were in effect pursuant to this section, in addition to, or as a reduction to, any hospital charges or negotiated rate (the adjustment may not be negotiated by the payor); including, but not limited to, capital related inpatient expenses reconciliation adjustments pursuant to subdivision eight of this section, rate adjustments for corrections, appeals and volume changes pursuant to subdivision nine of this section, rate adjustments to reflect trend factor adjustments pursuant to subdivision ten of this section, maximum case mix change adjustments pursuant to paragraph (f) of subdivision eleven of this section, and adjustments based on audits;

(b) the allowances percentages established pursuant to this article in effect for a rate period shall be applied to hospital charges or negotiated rates plus the prospectively adjusted payment of rates of payment of a general hospital in accordance with paragraph (a) of this subdivision;

(c) no recalculation of the basis for distribution of funds from regional or statewide pools established pursuant to this section shall

be made based on the impact of a prospective adjustment to rates of payment authorized pursuant to this subdivision; and

(d) prospective rate adjustments authorized pursuant to this subdivision for a general hospital based on appeals approved after January first, nineteen hundred ninety-eight shall be included in rates of payment as a one hundred percent facility specific adjustment and shall not affect the calculation of the group category average inpatient reimbursable operating cost per discharge for such retrospective period for any other general hospital.

* NB Expires December 31, 2029

* 29. Coinsurance and deductibles. (a) If a general hospital and a third-party payor agree to a negotiated payment methodology for a period on or after January first, nineteen hundred ninety-seven that is based on a discount from hospital charges, such discount shall apply to the calculation of the charge basis for deductible and coinsurance amounts for such period owed for any patient covered by such third-party payor as the primary payor.

(b) If a general hospital and a third-party payor agree to a negotiated payment methodology for a period on or after January first, nineteen hundred ninety-seven that is not based on a discount from hospital charges, excluding capitation arrangements, the maximum amount to be charged for deductible and coinsurance amounts for such period for any patient covered by such third-party payor as the primary payor shall not exceed the amount calculated by applying the deductible and coinsurance amounts to the amount due on the basis of such negotiated payment arrangement.

* NB Expires December 31, 2029

30. General hospital recruitment and retention of health care workers. Notwithstanding any inconsistent provision of this section and subject to the availability of federal financial participation:

(a) (i) The commissioner shall adjust inpatient medical assistance rates of payment established pursuant to this section for non-public general hospitals in accordance with subparagraph (ii) of this paragraph for purposes of recruitment and retention of health care workers in the following aggregate amounts for the following periods:

(A) ninety-three million two hundred thousand dollars on an annualized

basis for the period April first, two thousand two through December thirty-first, two thousand two; one hundred eighty-seven million eight hundred thousand dollars on an annualized basis for the period January first, two thousand three through December thirty-first, two thousand three; two hundred sixty-two million one hundred thousand dollars on an annualized basis for the period January first, two thousand four through December thirty-first, two thousand six; one hundred thirty-one million one hundred thousand dollars for the period January first, two thousand seven through June thirtieth, two thousand seven, and two hundred forty-three million five hundred thousand dollars for the period July first, two thousand seven through March thirty-first, two thousand eight, two hundred forty-three million five hundred thousand dollars for the period April first, two thousand eight through March thirty-first, two thousand nine; one hundred sixty-three million one hundred forty-five thousand dollars for the period April first, two thousand nine through November thirtieth, two thousand nine.

(ii) Such increases shall be allocated proportionally based on each non-public general hospital's reported total gross salary and fringe benefit costs as reported on exhibit 11 of the 1999 institutional cost report submitted as of November first, two thousand one to the total of such reported costs for all non-public general hospitals, provided, however, that for periods on and after July first, two thousand seven, fifty percent of such increases shall be allocated proportionally, based on each non-public hospital's reported total gross salary and fringe benefit costs, as reported on exhibit 11 of the nineteen hundred ninety-nine institutional cost report as submitted to the department prior to November first, two thousand one, to the total of such reported costs for all non-public general hospitals, and fifty percent of such increases shall be allocated proportionally, based on each such hospital's total reported medicaid inpatient discharges, as reported in the two thousand four institutional cost report as submitted to the department prior to November first, two thousand six, to the total of such reported medicaid inpatient discharges for all non-public general hospitals, as weighted proportionally to reflect the relative medicaid case mix of each such hospital. These amounts shall be included as a reimbursable cost add-on to medical assistance inpatient rates of payment established pursuant to this section for non-public general

hospitals based on medical assistance utilization data in each hospital's annual cost report submitted two years prior to the rate year. Such amounts shall be reconciled to reflect changes in medical assistance utilization between the year two years prior to the rate year and the rate year based on data reported in each hospital's cost report for the respective rate year. These amounts shall be included as a reimbursable cost add-on to medical assistance inpatient rates of payment established pursuant to this section for non-public general hospitals based on medical assistance utilization data in each facility's annual cost report submitted two years prior to the rate year. For rate adjustments effective May first, two thousand five and thereafter such amounts shall be reconciled to reflect changes in medical assistance utilization between the year two years prior to the rate year and the rate year based upon data reported in each hospital's institutional cost report for the respective rate year.

(b) (i) Notwithstanding sections one hundred twelve and one hundred sixty-three of the state finance law and any other inconsistent provision of law, the commissioner shall make grants to public general hospitals without a competitive bid or request for proposal process for purposes of recruitment and retention of health care workers in the following aggregate amounts for the following periods:

(A) eighteen million five hundred thousand dollars on an annualized basis for the period April first, two thousand two through December thirty-first, two thousand two; thirty-seven million four hundred thousand dollars on an annualized basis for the period January first, two thousand three through December thirty-first, two thousand three; fifty-two million two hundred thousand dollars on an annualized basis for the period January first, two thousand four through December thirty-first, two thousand six; twenty-six million one hundred thousand dollars for the period January first, two thousand seven through June thirtieth, two thousand seven, forty-nine million dollars for the period July first, two thousand seven through March thirty-first, two thousand eight, and forty-nine million dollars for the period April first, two thousand eight through March thirty-first, two thousand nine.

(ii) Such grants shall be allocated proportionally based on each public general hospital's reported total gross salary and fringe benefit costs as reported on exhibit 11 of the 1999 institutional cost report

submitted as of November first, two thousand one to the total of such reported costs for all public general hospitals.

(c) From amounts available pursuant to paragraph (gg) of subdivision one of section twenty-eight hundred seven-v of this article, allocations shall be made to non-public general hospitals whose allocated labor adjustments pursuant to paragraphs (a) and (e) of this subdivision and adjustment pursuant to subdivision thirty-two of this section results in the general hospital exceeding its applicable disproportionate share payment limit. Each such hospital's allocation of available funds pursuant to this paragraph within a year shall be determined based on its proportionate share of the aggregate reduction of federal disproportionate share funding for all such hospitals for the year resulting from the allocated labor adjustments pursuant to paragraphs (a) and (e) of this subdivision and from the adjustment pursuant to subdivision thirty-two of this section.

(d) General hospitals which have their rates adjusted or receive grants pursuant to paragraphs (a) and (b) of this subdivision, respectively, shall use such funds for the purpose of recruitment and retention of non-supervisory workers at health care facilities or any worker with direct patient care responsibility and are prohibited from using such funds for any other purpose. Funds under this subdivision are not intended to supplant support provided by a local government. Each such general hospital shall submit, at a time and in a manner to be determined by the commissioner, a written certification attesting that such funds will be used solely for the purpose of recruitment and retention of non-supervisory workers at health care facilities or any worker with direct patient care responsibility. The commissioner is authorized to audit each general hospital to ensure compliance with the written certification required by this paragraph and shall recoup any funds determined to have been used for purposes other than recruitment and retention of non-supervisory workers at health care facilities or any worker with direct patient care responsibility. Such recoupment shall be in addition to applicable penalties under sections twelve and twelve-b of this chapter.

(e)(i) The commissioner shall adjust inpatient medical assistance rates of payment established pursuant to this section for general hospitals in accordance with subparagraph (ii) of this paragraph and

shall establish discrete rates of payment for such hospitals in accordance with subparagraph (iii) of this paragraph, for purposes of additional support of recruitment and retention of health care workers in the following aggregate amounts for the following periods:

(A) one hundred twenty-one million dollars for the period May first, two thousand five through December thirty-first, two thousand five and one hundred twenty-one million dollars for the period January first, two thousand six through December thirty-first, two thousand six.

(ii) Such increases shall be allocated proportionally based on each general hospital's reported gross salary and fringe benefit costs as reported on exhibit 11 of the 1999 institutional cost report submitted as of November first, two thousand one to the total of such reported costs for all general hospitals. These amounts shall be included as a reimbursable cost add-on to medical assistance inpatient rates of payment established pursuant to this section for general hospitals based on medical assistance utilization data in each facility's annual cost report submitted two years prior to the rate year. Such amounts shall be reconciled to reflect changes in medical assistance utilization between the year two years prior to the rate year and the rate year based upon data reported in each hospital's institutional cost report for the respective rate year.

(iii) The commissioner shall establish, subject to the approval of the director of the budget, discrete rates of payment for general hospitals for payments under the medical assistance program pursuant to titles eleven and eleven-D of article five of the social services law for persons eligible for medical assistance and family health plus who are enrolled in health maintenance organizations based on the calculation set forth in subparagraph (ii) of this paragraph for such general hospitals. If discrete rates of payment under this subparagraph are not established, the commissioner shall adjust the calculation established pursuant to subparagraph (ii) of this paragraph to account for medical assistance utilization described under this subparagraph for such non-public general hospital.

(iv) Payment of the non-federal share of the medical assistance payments made pursuant to this paragraph shall be the responsibility of the state and shall not include a local share. Payments made pursuant to this paragraph or pursuant to paragraph (a) of this subdivision may be

added to rates of payment or made as aggregate payments to eligible general hospitals.

(f) In the event that a hospital entitled to an adjustment pursuant to paragraph (a) or (e) of this subdivision closes or otherwise experiences a change in status that eliminates its ability to continue to receive such adjustments, the commissioner shall allocate the amount determined under subparagraph (ii) of paragraph (a) and subparagraph (ii) of paragraph (e) of this subdivision for such hospital to hospitals in the immediate region of the closing hospital based upon the remaining hospitals' reported gross salary and fringe benefit costs as reported on exhibit eleven of the two thousand four institutional cost report submitted as of November first, two thousand five to the total of such reported costs for all general hospitals in the region, provided, however, that for periods on and after July first, two thousand seven, such allocations shall be based on such remaining hospitals' reported medicaid inpatient discharges, as reported in the two thousand four institutional cost report submitted to the department prior to November first, two thousand six, to the total of such reported medicaid inpatient discharges for all such remaining hospitals. The commissioner shall define the immediate region as the county or counties within which workers displaced from the closing hospital are likely to seek re-employment.

31. Supplemental general hospital recruitment and retention adjustment. (a) Notwithstanding any law, rule or regulation to the contrary, the commissioner shall, within amounts appropriated, and contingent on the availability of federal financial participation, make Medicaid rate adjustments for non-public general hospitals to address extraordinary costs associated with recruitment and retention of non-supervisory workers at health care facilities or any worker with direct patient care responsibility at such general hospitals. Eligible hospitals shall be selected by the commissioner pursuant to a competitive process. Requests for proposals for eligible projects shall be issued by the commissioner.

(b) Such eligible projects may include:

(i) an increase in non-supervisory staff, either facility wide or targeted at a particular area of care or shift;

(ii) increased training and education of non-supervisory staff, including allowing non-supervisory staff to increase their level of licensure relevant to general hospital care;

(iii) efforts to decrease staff turn-over; and

(iv) other efforts related to the recruitment and retention of non-supervisory staff or any worker with direct patient care responsibility that will affect the quality of care at such facility.

(c) The commissioner shall consider, in selecting eligible projects, the likelihood that such project will provide needed resources to meet legal commitments for increased labor costs, the financial need of the facility, the existence of a shortage of qualified hospital workers in the geographic area in which the facility is located, the existence of high employee turn-over at the facility and such other matters as the commissioner deems appropriate.

(d) In implementing rate adjustments authorized under this subdivision, the commissioner shall establish, subject to the approval of the director of the budget, discrete rates of payment for non-public general hospitals for payments under the medical assistance program pursuant to titles eleven and eleven-D of article five of the social services law for persons eligible for medical assistance and family health plus who are enrolled in health maintenance organizations.

(e) Adjustments to Medicaid rates of payment made pursuant to this section shall not be subject to subsequent adjustment or reconciliation.

(f) Adjustments to Medicaid rates of payment made pursuant to this section shall not, in aggregate, exceed fifteen million dollars for the period beginning April first, two thousand two and ending December thirty-first, two thousand two and, on an annualized basis, for each annual period thereafter beginning January first, two thousand three and ending December thirty-first, two thousand six, and shall not, in aggregate, exceed seven million five hundred thousand dollars for the period January first, two thousand seven through June thirtieth, two thousand seven.

32. Rural hospital supplemental rate adjustment. Notwithstanding any inconsistent provision of this section:

(a) The commissioner shall adjust inpatient medical assistance rates of payment established pursuant to this section for rural hospitals as

defined in paragraph (c) of subdivision one of section twenty-eight hundred seven-w of this article in accordance with paragraph (b) of this subdivision for purposes of supporting critically needed health care services in rural areas in the following aggregate amounts for the following periods:

seven million dollars for the period May first, two thousand five through December thirty-first, two thousand five, seven million dollars for the period January first, two thousand six through December thirty-first, two thousand six, seven million dollars for the period April first, two thousand seven through December thirty-first, two thousand seven, seven million dollars for calendar year two thousand eight, and six million four hundred seventeen thousand dollars for the period January first, two thousand nine through November thirtieth, two thousand nine.

(b) Such increases shall be allocated proportionately based on each such rural hospital's total reported medicaid inpatient discharges as reported in the two thousand two institutional cost report to the total of such discharges for all rural hospitals. These amounts shall be included as a reimbursable cost add-on to medical assistance inpatient rates of payment established pursuant to this section for rural hospitals based on medical assistance utilization data in each facility's annual cost report submitted two years prior to the rate year. Such amounts shall be reconciled to reflect changes in medical assistance utilization between the year two years prior to the rate year and the rate year based upon data reported in each hospital's institutional cost report for the respective rate year.

(c) Payment of the non-federal share of the medical assistance payments made pursuant to this subdivision shall be the responsibility of the state and shall not include a local share. Payments made pursuant to this subdivision may be added to rates of payment or made as aggregate payments to eligible general hospitals.

33. Notwithstanding any provision of law which is inconsistent with or contrary to the structure established by this subdivision and subdivision two-a of section twenty-eight hundred seven of this article in order to transition from nineteen hundred eighty-one base year costs

to two thousand five base year costs by no later than December thirty-first, two thousand twelve, and subject to the availability of federal financial participation, medicaid per diem and per discharge rates of payment for general hospital inpatient services for discharges and days occurring on and after December first, two thousand eight, shall be computed in accordance with the following:

(a)(i) for the period December first, two thousand eight through March thirty-first, two thousand nine, such rates shall be subject to a uniform transition adjustment which shall be based on each general hospital's proportional share of projected medicaid reimbursable inpatient operating costs and result in an aggregate reduction in such rates equal to fifty-one million five hundred thousand dollars, as determined by the commissioner, provided, however, that such transition adjustment shall not apply to rates computed pursuant to paragraph (1) of subdivision four of this section; and

(ii) for the period April first, two thousand nine through March thirty-first, two thousand ten, such rates shall be revised pursuant to a chapter of the laws of two thousand nine and as reflecting the findings and recommendations of the commissioner as issued pursuant to the provisions of paragraph (b) of this subdivision, provided, however, that such revisions shall reflect an aggregate reduction in such rates of no less than one hundred fifty-four million five hundred thousand dollars, provided further, however, that, notwithstanding any contrary provision of law, as determined by the commissioner, to the extent that a chapter of the laws of two thousand nine is not enacted resulting in such an aggregate annual reduction of no less than one hundred fifty-four million five hundred thousand dollars in such rates, the commissioner shall implement a uniform reduction of such rates in accordance with the methodology described in subparagraph (i) of this paragraph to the extent necessary, as determined by the commissioner, to achieve such an aggregate reduction in such rates for the state fiscal year beginning April first, two thousand nine and each state fiscal year thereafter; and

(iii) for the periods April first, two thousand ten through March thirty-first, two thousand twelve, rates shall reflect prior year rate reductions and such additional reductions as are required to establish rates based on two thousand five reported allowable Medicaid costs

pursuant to a chapter of the laws of two thousand ten.

(b) In consultation with the chairs of the senate and assembly health committees, the commissioner shall, by no later than July first, two thousand eight, establish a technical advisory committee for the purposes of examining data and evaluating rate-setting methodological issues, including the impact on hospitals of different methodologies in preparation for the phased transition to the utilization of reported allowable two thousand five operating costs for the purpose of setting inpatient rates of payment for periods on and after April first, two thousand nine, which phased transition shall be authorized in accordance with a chapter of the laws of two thousand nine. The technical advisory committee shall consist of three representatives of hospital associations, two representatives of the health care industry and three representatives of community providers and consumers as determined by the commissioner. By no later than August first, two thousand eight, the commissioner shall make available to the technical advisory committee updated data and documentation relevant to the projected phased transition to utilization of reported allowable two thousand five operating costs for rate-setting purposes. The issues to be examined by the technical advisory committee shall include, but not be limited to, hospital re-basing, workforce recruitment and retention funding, graduate medical education funding, peer group pricing, wage equalization factors, case mix and such other related elements of the general hospital inpatient reimbursement system as deemed appropriate by the commissioner. The technical advisory committee shall also examine the scope and volume of hospital out-patient services. By no later than November first, two thousand eight the commissioner shall issue a report setting forth findings and recommendations, including divergent views of members of the technical advisory committee members concerning the matters examined by the technical advisory committee and the projected phased transition to utilization of two thousand five base year reported allowable operating costs for inpatient rates of payments on and after April first, two thousand nine.

(c) Paragraph (a) of this subdivision shall be effective the later of: (i) December first, two thousand eight; (ii) after the commissioner receives final approval of federal financial participation in payments made for beneficiaries eligible for medical assistance under title XIX

of the federal social security act for the rate methodology established pursuant to subdivision two-a of section twenty-eight hundred seven of this article; or (iii) after the commissioner determines that the department of health has the capability, for payments made pursuant to subdivision two-a of section twenty-eight hundred seven of this article, to electronically receive and process claims and transmit payments with remittance statements. Prior to the commissioner making such a determination, the department shall provide training sessions on the rate methodology and billing requirements for services pursuant to subdivision two-a of section twenty-eight hundred seven of this article and opportunity for hospitals to perform end-to-end testing on claims submission, processing and payment.

34. Enhanced safety net hospital program. (a) For the purposes of this subdivision, "enhanced safety net hospital" shall mean a hospital which:

(i) in any of the previous three calendar years, has met the following criteria:

(A) not less than fifty percent of the patients it treats receive medicaid or are medically uninsured;

(B) not less than forty percent of its inpatient discharges are covered by medicaid;

(C) twenty-five percent or less of its discharged patients are commercially insured;

(D) not less than three percent of the patients it provides services to are attributed to the care of uninsured patients; and

(E) provides care to uninsured patients in its emergency room, hospital based clinics and community based clinics, including the provision of important community services, such as dental care and prenatal care;

(ii) is a public hospital operated by a county, municipality, public benefit corporation or the state university of New York;

(iii) is an acute children's hospital licensed by the department primarily for the provision of pediatric and neonatal services for which a discrete institutional cost report was filed for the past three calendar years, and which has medicaid discharges in excess of fifty percent of its total discharges;

(iv) is federally designated as a critical access hospital; or

(v) is federally designated as a sole community hospital.

(b) Within amounts appropriated, the commissioner shall adjust medical assistance rates to enhanced safety net hospitals for the purposes of supporting critically needed health care services and to ensure the continued maintenance and operation of such hospitals.

(c) Payments made pursuant to this subdivision may be added to rates of payment or made as aggregate payments to eligible general hospitals.

35. Notwithstanding any inconsistent provision of this section, or any other contrary provision of law and subject to the availability of federal financial participation, rates of payment by governmental agencies for general hospital inpatient services with regard to discharges occurring on and after December first, two thousand nine shall be in accordance with the following:

(a) For periods on and after December first, two thousand nine the operating cost component of such rates of payments shall reflect the use of two thousand five operating costs as reported by each facility to the department prior to July first, two thousand nine and as otherwise computed in accordance with the provisions of this subdivision;

(b) The commissioner shall promulgate regulations, and may promulgate emergency regulations, establishing methodologies for the computation of general hospital inpatient rates and such regulations shall include, but not be limited to, the following:

(i) The computation of a case-mix neutral statewide base price, applicable to each rate period, but excluding adjustments for graduate medical education costs, high cost outlier costs, costs related to patient transfers, and other non-comparable costs as determined by the commissioner, such statewide base prices may be periodically adjusted to reflect changes in provider coding patterns and case-mix and such other factors as may be determined by the commissioner;

(ii) Only those two thousand five base year costs which relate to the cost of services provided to Medicaid inpatients, as determined by the applicable ratio of costs to charges methodology, shall be utilized for rate-setting purposes, provided, however, that the commissioner may utilize updated Medicaid inpatient related base year costs and statistics as necessary to adjust inpatient rates in accordance with clause (C) of subparagraph (x) of this paragraph;

(iii) Such rates shall reflect the application of hospital specific wage equalization factors reflecting differences in wage rates;

(iv) Such rates shall reflect the utilization of the all patient refined (APR) case mix methodology, utilizing diagnostic related groups with assigned weights that incorporate differing levels of severity of patient condition and the associated risk of mortality, and as may be periodically updated by the commissioner;

* (iv-a) Effective April first, two thousand twenty, such rates for public general hospitals or public health systems, other than those operated by the state of New York or the state university of New York, located in a city having a population of one million or more shall include a rate add-on that reflects reimbursement for costs, to the extent permitted under 42 CFR 447.272(b)(1) and based on actual utilization of services. Such rate add-on shall be contingent upon federal financial participation and approval, and subject to the terms of a binding memorandum of understanding executed between the department of health and the public general hospital or public health system receiving the rate add-on. If payment of such rate add-on is projected to cause Medicaid disbursements for such period to exceed the projected department of health Medicaid state funds in the enacted budget financial plan pursuant to subdivision three of section twenty-three of the state finance law, as determined by the director of the budget, or memorandum of understanding is not executed or is breached, the commissioner, in consultation with the director of budget, may either cancel or reduce payment of such rate add-on to achieve compliance with the enacted budget financial plan.

* NB Repealed March 31, 2029

(v) such regulations shall incorporate quality related measures, including, but not limited to, potentially preventable re-admissions (PPRs) and provide for rate adjustments or payment disallowances related to PPRs and other potentially preventable negative outcomes (PPNOs), which shall be calculated in accordance with methodologies as determined by the commissioner, provided, however, that such methodologies shall be based on a comparison of the actual and risk adjusted expected number of PPRs and other PPNOs in a given hospital and with benchmarks established by the commissioner and provided further that such rate adjustments or payment disallowances shall result in an aggregate reduction in Medicaid

payments of no less than thirty-five million dollars for the period July first, two thousand ten through March thirty-first, two thousand eleven and no less than fifty-one million dollars for annual periods beginning April first, two thousand eleven through March thirty-first, two thousand fifteen, provided further that such aggregate reductions shall be offset by Medicaid payment reductions occurring as a result of decreased PPRs during the period July first, two thousand ten through March thirty-first, two thousand eleven and the period April first, two thousand eleven through March thirty-first, two thousand fifteen and as a result of decreased PPNOs during the period April first, two thousand eleven through March thirty-first, two thousand fifteen; and provided further that for the period July first, two thousand ten through March thirty-first, two thousand fifteen, such rate adjustments or payment disallowances shall not apply to behavioral health PPRs; or to readmissions that occur on or after fifteen days following an initial admission. By no later than July first, two thousand eleven the commissioner shall enter into consultations with representatives of the health care facilities subject to this section regarding potential prospective revisions to applicable methodologies and benchmarks set forth in regulations issued pursuant to this subparagraph;

(vi) Such regulations shall address adjustments based on the costs of high cost outlier patients;

(vii) Such rates shall continue to reflect trend factor adjustments as otherwise provided in paragraph (c) of subdivision ten of this section;

(viii) Such rates shall not include any adjustments pursuant to subdivision nine of this section;

(ix) Rates for non-public, not for profit general hospitals which have not, as of the effective date of this subdivision, published an ancillary charges schedule as provided in paragraph (j) of subdivision one of section twenty-eight hundred three of this article shall have their inlier payments increased by an amount equal to the average of cost outlier payments for comparable hospitals or by a methodology that uses a statewide or regional ratio of cost to charges applied to statewide or regional comparable charges for those cases determined by the commissioner;

(x) Such regulations shall provide for administrative rate appeals, but only with regard to: (A) the correction of computational errors or

omissions of data, including with regard to the hospital specific computations pertaining to graduate medical education, wage equalization factor adjustments, (B) capital cost reimbursement, and, (C) changes to the base year statistics and costs used to determine the direct and indirect graduate medical education components of the rates as a result of new teaching programs at new teaching hospitals and/or as a result of residents displaced and transferred as a result of teaching hospital closures;

(xi) Rates for teaching general hospitals shall include reimbursement for direct and indirect graduate medical education as defined and calculated pursuant to such regulations. In addition, such regulations shall specify the reports and information required by the commissioner to assess the cost, quality and health system needs for medical education provided;

(xii) Such regulations may incorporate quality related measures pertaining to the inappropriate use of certain medical procedures, including, but not limited to, cesarean deliveries, coronary artery bypass grafts and percutaneous coronary interventions;

(xiii) Such regulations may impose a fee on general hospital sufficient to cover the costs of auditing the institutional cost reports submitted by general hospitals, which shall be deposited in the Health Care Reform Act (HCRA) resources account.

(c) 1. The base period reported costs and statistics used for rate-setting for operating cost components, including the weights assigned to diagnostic related groups, shall be updated no less frequently than every four years and the new base period shall be no more than four years prior to the first applicable rate period that utilizes such new base period provided, however, that the first updated base period shall begin on or after April first, two thousand fourteen, but no later than July first, two thousand fourteen; and further provided that the updated base period subsequent to July first, two thousand eighteen shall begin on or after January first, two thousand twenty-four.

2. In the event of a declaration of a federal public health emergency, as defined in 42 USC § 247d, or a state disaster emergency, as defined in section twenty of the executive law, that severely impacts general

hospitals within the state, the department may exclude, for purposes of this paragraph, the audited reported costs and statistics during such declaration.

(d) Capital cost reimbursement for general hospitals otherwise subject to the provisions of this subdivision shall remain subject to the provisions of subdivision eight of this section.

(e) The provisions of this subdivision shall not apply to those general hospitals or distinct units of general hospitals whose inpatient reimbursement does not, as of November thirtieth, two thousand nine, reflect case based payment per diagnosis-related group or whose inpatient reimbursement is, for periods on and after July first, two thousand nine, governed by the provisions of paragraphs (e-1) or (e-2) of subdivision four of this section.

(f) Notwithstanding section one hundred twelve or one hundred sixty-three of the state finance law or any other law, rule or regulation to the contrary, the commissioner may contract with a vendor for consideration to develop the specifications for the diagnosis-related groups methodology as provided for in regulations promulgated pursuant to paragraph (b) of this subdivision if the commissioner certifies to the comptroller that such contract is in the best interest of the health of the people of the state. Notwithstanding that such specifications shall be available pursuant to article six of the public officers law, such contract may provide that the specifications for such adjusted or additional diagnosis-related groups provided by the vendor shall be subject to copyright protection pursuant to federal copyright law.

(g) Notwithstanding any inconsistent provision of this subdivision or any other contrary provision of law, the commissioner may, for rate periods on and after December first, two thousand nine and subject to the availability of federal financial participation, make additional adjustments to the inpatient rates of payment of eligible general hospitals, to facilitate improvements in hospital operations and finances, in accordance with the following:

(i) General hospitals eligible for distributions pursuant to this paragraph shall be those non public hospitals with Medicaid discharges equal to or greater than seventeen and one-half percent for two thousand seven.

(ii) Funds distributed pursuant to this paragraph shall be allocated to eligible hospitals pursuant to a formula such that, to the extent of funds available, no hospital's reduction in Medicaid inpatient revenue as a result of the application of the provisions of paragraphs (a) and (b) of this subdivision exceeds a percentage reduction as determined by the commissioner.

(iii) Funding pursuant to this paragraph shall be available for the following periods and in the following amounts:

(A) for the period December first, two thousand nine through March thirty-first, two thousand ten, up to thirty-three million five hundred thousand dollars;

(B) for the period April first, two thousand ten through March thirty-first, two thousand eleven, up to seventy-five million dollars, provided, however, that, notwithstanding subparagraph (ii) of this paragraph, no facility shall receive an amount pursuant to this clause that is less than such facility received pursuant to clause (A) of this subparagraph;

(C) for the period April first, two thousand eleven through March thirty-first, two thousand twelve, up to fifty million dollars;

(D) for the period April first, two thousand twelve through March thirty-first, two thousand thirteen, up to twenty-five million dollars.

(iv) Payments made pursuant to this paragraph shall be added to rates of payments and not be subject to retroactive adjustment or reconciliation.

(v) Each hospital receiving funds pursuant to this paragraph shall, as a condition for eligibility for such funds, adopt a resolution of the board of directors of each such hospital setting forth its current financial condition and a plan for reforming and improving such financial condition, including ongoing board oversight, and shall, after two years, issue a report as adopted by each such board of directors setting forth what progress has been achieved regarding such improvement, provided, however, if such report is not issued and adopted by each such board of directors, or if such report fails to set forth adequate progress, as determined by the commissioner, the commissioner may deem such facility ineligible for further distributions pursuant to this paragraph and may redistribute such further distributions to other eligible facilities in accordance with the provisions of this paragraph.

The commissioner shall be provided with copies of all such resolutions and reports.

(h) Inpatient rate adjustments made pursuant to paragraphs (a) through (f) of this subdivision after application of adjustments authorized pursuant to subdivision thirty-three of this section shall result in a net statewide decrease in aggregate Medicaid payments of no less than seventy-five million dollars for the period December first, two thousand nine through March thirty-first, two thousand ten, and no less than two hundred twenty-five million dollars for the period April first, two thousand ten through March thirty-first, two thousand eleven and each state fiscal year thereafter, provided, however, that such reductions shall be in addition to the reductions required pursuant to subparagraph (ii) of paragraph (a) of subdivision thirty-three of this section.

(i) (i) Notwithstanding any inconsistent provision of this subdivision or any other contrary provision of law and subject to the availability of federal financial participation, for each state fiscal year from July first, two thousand ten through December thirty-first, two thousand twenty-four; and for the calendar year January first, two thousand twenty-five through December thirty-first, two thousand twenty-five, the commissioner shall make additional inpatient hospital payments up to the aggregate upper payment limit for inpatient hospital services after all other medical assistance payments, but not to exceed two hundred thirty-five million five hundred thousand dollars for the period July first, two thousand ten through March thirty-first, two thousand eleven, three hundred fourteen million dollars for each state fiscal year beginning April first, two thousand eleven, through March thirty-first, two thousand thirteen, and no less than three hundred thirty-nine million dollars for each state fiscal year until December thirty-first, two thousand twenty-four; and then from calendar year January first, two thousand twenty-five through December thirty-first, two thousand twenty-five, to general hospitals, other than major public general hospitals, providing emergency room services and including safety net hospitals, which shall, for the purpose of this paragraph, be defined as having either: a Medicaid share of total inpatient hospital discharges of at least thirty-five percent, including both fee-for-service and managed care discharges for acute and exempt services; or a Medicaid share of total discharges of at least thirty percent, including both

fee-for-service and managed care discharges for acute and exempt services, and also providing obstetrical services. Eligibility to receive such additional payments shall be based on data from the period two years prior to the rate year, as reported on the institutional cost report submitted to the department as of October first of the prior rate year. Such payments shall be made as medical assistance payments for fee-for-service inpatient hospital services pursuant to title eleven of article five of the social services law for patients eligible for federal financial participation under title XIX of the federal social security act and in accordance with the following:

(A) Thirty percent of such payments shall be allocated to safety net hospitals based on each eligible hospital's proportionate share of all eligible safety net hospitals' Medicaid discharges for inpatient hospital services, including both Medicaid fee-for-service and managed care discharges for acute and exempt services, based on data from the period two years prior to the rate year, as reported on the institutional cost report submitted to the department as of October first of the prior rate year;

(B) Seventy percent of such payments shall be allocated to eligible general hospitals based on each such hospital's proportionate share of all eligible hospitals' Medicaid discharges for inpatient hospital services, including both Medicaid fee-for-service and managed care discharges for acute and exempt services, based on data from the period two years prior to the rate year, as reported on the institutional cost report submitted to the department as of October first of the prior rate year;

(C) No eligible general hospital's annual payment amount pursuant to this paragraph shall exceed the lower of the sum of the annual amounts due that hospital pursuant to section twenty-eight hundred seven-k and section twenty-eight hundred seven-w of this article; or the hospital's facility specific projected disproportionate share hospital payment ceiling established pursuant to federal law, provided, however, that payment amounts to eligible hospitals pursuant to clauses (A) and (B) of this subparagraph in excess of the lower of such sum or payment ceiling shall be reallocated to eligible hospitals that do not have excess payment amounts. Such reallocations shall be proportional to each such hospital's aggregate payment amount pursuant to clauses (A) and (B) of

this subparagraph to the total of all payment amounts for such eligible hospitals;

(D) Subject to the availability of federal financial participation, the payment methodology set forth in this subparagraph may be further revised by the commissioner on an annual basis pursuant to regulations issued pursuant to this subdivision for periods on and after April first, two thousand eleven; and

(E) Subject to the availability of federal financial participation and in conformance with all applicable federal statutes and regulations, such payments shall be made as upper payment limit payments and, further, such payments shall be made as aggregate monthly payments to eligible general hospitals.

(ii) In the event that the commissioner determines that federal financial participation will not be available for aggregate payments made in accordance with clause (E) of subparagraph (i) of this paragraph, payments pursuant to this paragraph shall be included as rate add-ons to medical assistance inpatient rates of payment established pursuant to this subdivision based on data from the period two years prior to the rate year, as reported on the institutional cost report submitted to the department as of October first of the prior rate year, provided, however, that if such payments are made as rate add-ons, the commissioner shall establish a procedure to reconcile payment amounts to reflect changes in medical assistance utilization from the period two years prior to the rate year and the actual rate year based on data as reported on each hospital's annual institutional cost report for the respective rate year, as submitted to the department as of October first of the year following the rate year.

(iii) Notwithstanding any other law, rule or regulation to the contrary, projections of each general hospital's disproportionate share limitations as computed by the commissioner pursuant to applicable regulations shall be adjusted to reflect any additional revenue received or anticipated to be received by each such general hospital pursuant to this paragraph.

(j) Notwithstanding any contrary provision of law, with regard to inpatient and outpatient Medicaid rates of payment for general hospital services, the commissioner may make such adjustments to such rates and to the methodology for computing such rates as is necessary to achieve

no aggregate, net increase or decrease in overall Medicaid expenditures related to the implementation of the International Classification of Diseases Version 10 (ICD-10) coding system on or about October first, two thousand fourteen, as compared to such aggregate expenditures from the twelve-month period immediately prior to such implementation.

§ 2807-d. Hospital assessments. 1. (a) Hospitals, as defined in this article, excluding hospitals specified in paragraph (b) of this subdivision, are charged assessments on their gross receipts received from all patient care services and other operating income, less personal needs allowances and refunds, on a cash basis in the percentage amounts and for the periods specified in subdivision two of this section. Such assessments shall be submitted by or on behalf of hospitals to the commissioner or his designee.

(b) Subject to the provisions of subdivision twelve of this section, the following categories of hospitals shall not be charged assessments pursuant to this section: (i) voluntary nonprofit and private proprietary general hospitals which qualify for distributions made in accordance with paragraph (c) of subdivision nineteen of section twenty-eight hundred seven-c of this article, or for assessments during the period January first, nineteen hundred ninety-seven through December thirty-first, nineteen hundred ninety-seven voluntary nonprofit and private proprietary general hospitals which qualified for distributions made in accordance with paragraph (c) of subdivision nineteen of section twenty-eight hundred seven-c of this article as of December thirty-first, nineteen hundred ninety-five; (ii) voluntary nonprofit hospitals totally financed by charitable contributions or by the income thereon dedicated to free care of low income patients; and (iii) any facility dedicated solely to the care of police, firefighters, volunteer firefighters, and emergency service personnel.

(c) On and after December first, nineteen hundred ninety-seven, the term "general hospital", as used in this section, includes specialty hospitals for persons who are developmentally disabled, licensed by the office for people with developmental disabilities and which are also issued an operating certificate pursuant to section twenty-eight hundred five of this article.

2. (a) (i) For general hospitals the overall assessment shall be six-tenths of one percent and the assessment shall vary from 0.5% to 0.675% of each general hospital's gross receipts received from all patient care services and other operating income on a cash basis during the period January first, nineteen hundred ninety-one through March thirty-first, nineteen hundred ninety-two for hospital or health-related services, including but not limited to inpatient service, outpatient service, emergency service, referred ambulatory service and ambulatory surgical service. The assessment shall vary according to the percentage of nineteen hundred eighty-nine medicaid inpatient revenues as a percentage of total nineteen hundred eighty-nine inpatient revenues as reported on the institutional cost report submitted to the department for nineteen hundred eighty-nine according to the following: for hospitals with medicaid revenue up to and including 10%, the assessment shall be .5%, for hospitals with medicaid revenue greater than 10% up to and including 15%, the assessment shall be .525%, for hospitals with medicaid revenue greater than 15% up to and including 20%, the assessment shall be .65%, and for hospitals with medicaid revenue over 20%, the assessment shall be .675%. In the event that the provisions relating to the additional supplementary low income patient adjustment established in accordance with subdivision fourteen-d of section twenty-eight hundred seven-c of this article cannot be implemented, then the general hospital assessment established in accordance with this paragraph shall be calculated without variation specified in this paragraph and the assessment for each general hospital whose assessment was greater than six-tenths of one percent shall become six-tenths of one percent.

(ii) For general hospitals the assessment shall be six-tenths of one percent of each general hospital's gross receipts received from all patient care services and other operating income on a cash basis beginning April first, nineteen hundred ninety-two for hospital or health-related services, including, but not limited to inpatient service, outpatient service, emergency service, referred ambulatory service and ambulatory surgical service; provided, however, that for all such gross receipts received on or after December first, nineteen hundred ninety-eight, such assessment shall be two-tenths of one

percent, and further provided that for all such gross receipts received on or after April first, nineteen hundred ninety-nine, such assessment shall be one-tenth of one percent, and further provided that such assessment shall expire and be of no further effect for all such gross receipts received on or after January first, two thousand.

(iii) For general hospitals an additional assessment shall be one-tenth of one percent of each general hospital's gross receipts received from all patient care services and other operating income on a cash basis beginning April first, nineteen hundred ninety-two for hospital or health-related services, including, but not limited to inpatient service, outpatient service, emergency service, referred ambulatory service and ambulatory surgical service; provided, however, that such additional assessment shall expire and be of no further effect for all such gross receipts received on or after December first, nineteen hundred ninety-seven.

(iv) Subject to the provisions of subdivision twelve of this section, the assessment and additional assessment pursuant to subparagraphs (ii) and (iii) of this paragraph during the period January first, nineteen hundred ninety-eight through December thirty-first, nineteen hundred ninety-eight for voluntary nonprofit and private proprietary general hospitals which qualified for distributions made in accordance with paragraph (c) of subdivision nineteen of section twenty-eight hundred seven-c of this article as of December thirty-first, nineteen hundred ninety-five shall be abated by seventy-five percent, and during the period January first, nineteen hundred ninety-nine through December thirty-first, nineteen hundred ninety-nine shall be abated by twenty-five percent.

(v) Notwithstanding any contrary provisions of this paragraph or any other provision of law or regulation, for general hospitals the assessment shall be thirty-five hundredths of one percent of each general hospital's gross receipts received from all patient care services and other operating income on a cash basis for the period April first, two thousand five through March thirty-first two thousand seven for hospital or health-related services, including, but not limited to inpatient service, outpatient service, emergency service, referred ambulatory service and ambulatory surgical services, but not including residential health care facilities services or home health care

services.

(vi) Notwithstanding any contrary provisions of this paragraph or any other provision of law or regulation, for general hospitals the assessment shall be thirty-five hundredths of one percent of each general hospital's gross receipts received from all patient care services and other operating income on a cash basis for periods on and after April first, two thousand nine, for hospital or health-related services, including, but not limited to inpatient services, outpatient services, emergency services, referred ambulatory services and ambulatory surgical services, but not including residential health care facilities services or home health care services.

(b) (i) For residential health care facilities the assessment shall be six-tenths of one percent of each residential health care facility's gross receipts received from all patient care services and other operating income on a cash basis beginning April first, nineteen hundred ninety-one for hospital or health-related services, including adult day services; provided, however, that for all such gross receipts received on or after September first, nineteen hundred ninety-seven such assessment shall be three-tenths of one percent, and further provided that such assessment shall expire and be of no further effect for all such gross receipts received on or after December first, nineteen hundred ninety-eight.

(ii) For residential health care facilities an additional assessment shall be one and two-tenths percent of each residential health care facility's gross receipts received from all patient care services and other operating income on a cash basis beginning April first, nineteen hundred ninety-two for hospital or health-related services, including adult day services; provided, however, that such additional assessment shall expire and be of no further effect for all such gross receipts received on or after April first, nineteen hundred ninety-nine.

(iii) For residential health care facilities a further additional assessment shall be three and eight tenths percent of each residential health care facility's gross receipts received from all patient care services and other operating income on a cash basis for the period of July first, nineteen hundred ninety-five through March thirty-first, nineteen hundred ninety-six for hospital or health-related services, including adult day services. The residential health care facility shall

file the assessment return with any balance due or any refund claimed by May first, nineteen hundred ninety-six. Notwithstanding any inconsistent provision of this section, the residential health care facility shall make estimated payments to the commissioner on a monthly basis starting August fifteenth, nineteen hundred ninety-five and continuing on the fifteenth of each month through March fifteenth, nineteen hundred ninety-six equal to one-eighth of the total estimated for this further additional assessment for the further additional assessment period. If the total of estimated payments is less than ninety-five percent of the actual payment due, the residential health care facility shall pay to the commissioner a penalty of fifteen percent of the difference due for each month in addition to the amount due. The commissioner may recoup deficiencies and penalties pursuant to paragraph (c) of subdivision six of this section.

* (iv) For residential health care facilities a further additional assessment shall be one and nine-tenths percent of each residential health care facility's gross receipts received from all patient care services and other operating income on a cash basis for the period of April first, nineteen hundred ninety-six through March thirty-first, nineteen hundred ninety-seven for hospital or health-related services, including adult day services. The residential health care facility shall file the assessment return with any balance due or any refund claimed by May first, nineteen hundred ninety-seven. Notwithstanding any inconsistent provision of this section, the residential health care facility shall make estimated payments to the commissioner on a monthly basis starting May fifteenth, and continuing on the fifteenth of each month through March fifteenth equal to one-eleventh of the total estimated for this further additional assessment for the period April first, nineteen hundred ninety-six through March thirty-first nineteen hundred ninety-seven. If the total of estimated payments is less than ninety-five percent of the actual payment due, the residential health care facility shall pay to the commissioner a penalty of fifteen percent of the difference due each month in addition to the amount due. The commissioner may recoup deficiencies and penalties pursuant to paragraph (c) of subdivision six of this section.

* NB There are 2 subpar (iv)'s

* (iv) For residential health care facilities a further additional

assessment shall be one and nine-tenths percent of each residential health care facility's gross receipts received from all patient care services and other operating income on a cash basis for the period of April first, nineteen hundred ninety-six through March thirty-first, nineteen hundred ninety-seven for hospital or health-related services, including adult day services. The residential health care facility shall file the assessment return with any balance due or any refund claimed by May first, nineteen hundred ninety-seven. Notwithstanding any inconsistent provision of this section, the residential health care facility shall make estimated payments to the commissioner on a monthly basis starting May fifteenth, and continuing on the fifteenth of each month through March fifteenth, equal to one-eleventh of the total estimated for this further additional assessment for the period beginning April first of nineteen hundred ninety-six and ending March thirty-first, nineteen hundred ninety-seven. If the total of the eleven required estimated payments is less than ninety-five percent of the actual payment due, the residential health care facility shall pay to the commissioner a penalty of fifteen percent of the difference due for each month in addition to the amount due. The commissioner may recoup deficiencies and penalties pursuant to paragraph (c) of subdivision six of this section.

* NB There are 2 subpar (iv)'s

* (v) For residential health care facilities in addition a further additional assessment shall be (a) two and three-tenths percent of each residential care facility's gross receipts received from all patient care services and other operating income on a cash basis beginning May first, nineteen hundred ninety-six through December thirty-first, nineteen hundred ninety-six for hospital or health-related services, including adult day services and (b) one and nine-tenths percent of each residential care facility's gross receipts received from all patient care services and other operating income on a cash basis beginning January first, nineteen hundred ninety-seven and ending February twenty-eighth, nineteen hundred ninety-seven for hospital or health-related services, including adult day services.

* NB There are 2 subpar (v)'s

* (v) For residential health care facilities in addition a further additional assessment shall be (a) two and three-tenths percent of each

residential care facility's gross receipts received from all patient care services and other operating income on a cash basis beginning May first, nineteen hundred ninety-six and ending December thirty-first, nineteen hundred ninety-six for hospital or health-related services, including adult day services and (b) one and nine-tenths percent of each residential care facility's gross receipts received from all patient care services and other operating income on a cash basis beginning January first, nineteen hundred ninety-seven and ending February twenty-eighth, nineteen hundred ninety-seven for hospital or health-related services, including adult day services; provided, however, that for all such gross receipts received on or after April first, nineteen hundred ninety-seven, such further additional assessment shall be three and six-tenths percent, and further provided that for all such gross receipts received on or after April first, nineteen hundred ninety-nine, such further additional assessment shall be two and four-tenths percent, and further provided that such further additional assessment shall expire and be of no further effect for all such gross receipts received on or after January first, two thousand.

* NB There are 2 subpar (v)'s

(vi) Notwithstanding any contrary provision of this paragraph or any other provision of law or regulation to the contrary, for residential health care facilities the assessment shall be six percent of each residential health care facility's gross receipts received from all patient care services and other operating income on a cash basis for the period April first, two thousand two through March thirty-first, two thousand three for hospital or health-related services, including adult day services; provided, however, that residential health care facilities' gross receipts attributable to payments received pursuant to title XVIII of the federal social security act (medicare) shall be excluded from the assessment; provided, however, that for all such gross receipts received on or after April first, two thousand three through March thirty-first, two thousand five, such assessment shall be five percent, and further provided that for all such gross receipts received on or after April first, two thousand five through March thirty-first, two thousand nine, and on or after April first, two thousand nine through March thirty-first, two thousand eleven such assessment shall be six percent, and further provided that for all such gross receipts

received on or after April first, two thousand eleven through March thirty-first, two thousand thirteen such assessment shall be six percent, and further provided that for all such gross receipts received on or after April first, two thousand thirteen through March thirty-first, two thousand fifteen such assessment shall be six percent, and further provided that for all such gross receipts received on or after April first, two thousand fifteen through March thirty-first, two thousand seventeen such assessment shall be six percent, and further provided that for all such gross receipts received on or after April first, two thousand seventeen through March thirty-first, two thousand nineteen such assessment shall be six percent, and further provided that for all such gross receipts received on or after April first, two thousand nineteen through March thirty-first, two thousand twenty-one such assessment shall be six percent, and further provided that for all such gross receipts received on or after April first, two thousand twenty-one through March thirty-first, two thousand twenty-three such assessment shall be six percent, and further provided that for all such gross receipts received on or after April first, two thousand twenty-three through March thirty-first, two thousand twenty-five such assessment shall be six percent, and further provided that for all such gross receipts received on or after April first, two thousand twenty-five through March thirty-first, two thousand twenty-nine such assessment shall be six percent.

(c) For all other facilities issued an operating certificate pursuant to section twenty-eight hundred five of this article, including diagnostic and treatment centers, the assessment shall be six-tenths of one percent of each facility's gross receipts received from all patient care services and other operating income on a cash basis beginning January first, nineteen hundred ninety-one for hospital or health-related services, including diagnostic and treatment center services; provided, however, that for all such gross receipts received on or after April first, nineteen hundred ninety-nine, such assessment shall be two-tenths of one percent, and further provided that such assessment shall expire and be of no further effect for all such gross receipts received on or after January first, two thousand.

3. Gross receipts received from all patient care services and other

operating income for purposes of the assessment pursuant to this section shall include, but not be limited to:

(a) for general hospitals, all monies received for or on account of inpatient hospital service, outpatient service, emergency service, referred ambulatory service and ambulatory surgical service, or other hospital or health-related services, excluding, subject to the provisions of subdivision twelve of this section: distributions from bad debt and charity care regional pools, primary health care services regional pools, bad debt and charity care for financially distressed hospitals statewide pools and bad debt and charity care and capital statewide pools created in accordance with section twenty-eight hundred seven-c of this article and the components of rates of payment or charges related to the allowances provided in accordance with subdivisions fourteen, fourteen-b and fourteen-c, the adjustment provided in accordance with subdivision fourteen-a, the adjustment provided in accordance with subdivision fourteen-d, the adjustment for health maintenance organization reimbursement rates provided in accordance with section twenty-eight hundred seven-f of this article, the adjustment for commercial insurer reimbursement rates provided in accordance with paragraph (i) of subdivision eleven of section twenty-eight hundred seven-c of this article or, if effective, the adjustment provided in accordance with subdivision fifteen of section twenty-eight hundred seven-c of this article or the adjustment provided in accordance with section eighteen of chapter two hundred sixty-six of the laws of nineteen hundred eighty-six as amended and physician practice or faculty practice plan revenue received by a general hospital based on discrete billings for private practicing physician services, revenue received by a general hospital from a public hospital pursuant to an affiliation agreement contract for the delivery of health care services to such public hospital, revenue received pursuant to paragraph (i) of subdivision thirty-five of section twenty-eight hundred seven-c of this article, revenue received pursuant to section twenty-eight hundred seven-w of this article, all revenue received as disproportionate share hospital payments, in accordance with title nineteen of the federal Social Security Act, revenue received pursuant to sections eleven, twelve, thirteen and fourteen of part A of chapter one of the laws of two thousand two, revenue received pursuant to

sections thirteen and fourteen of part B of chapter one of the laws of two thousand two, revenue from patient personal fund allowances, revenue from income earned on patient funds, investment income from externally restricted funds, revenue from investment sinking funds, revenue from investment operating escrow accounts, investment income from funded depreciation, investment income from mortgage repayment escrow accounts, revenue derived from the operation of schools leading to licensure, and revenue from the collection of sales and excise taxes;

(b) for residential health care facilities, all monies received for or on account of hospital or health-related service, including adult day services, excluding subject to the provisions of subdivision twelve of this section the component of rates of payment related to the adjustment provided in accordance with subdivision twelve of section twenty-eight hundred eight of this article;

(c) for all other facilities issued an operating certificate pursuant to section twenty-eight hundred five of this article, including diagnostic and treatment centers, all monies received for or on account of hospital or health-related services, however, subject to the provisions of subdivision twelve of this section, excluding the component of rates of payment related to the allowance provided in accordance with paragraph (f) of subdivision two of section twenty-eight hundred seven of this article, excluding for a diagnostic and treatment center operated by a health maintenance organization operating in accordance with the provisions of article forty-four of this chapter or article forty-three of the insurance law monies received for or on account of services provided to subscribers of such health maintenance organization and excluding patient care services which if provided to persons eligible for medical assistance pursuant to title eleven of article five of the social services law would be eligible for ninety percent federal funds as set forth in section nineteen hundred three of the federal social security act; and

(d) for all hospitals, excluding diagnostic and treatment centers operated by a health maintenance organization operating in accordance with the provisions of article forty-four of this chapter or article forty-three of the insurance law, shall include monies received for or on account of such revenue sources as investment income, parking lots, cafeterias, gift shops and rental income, provided, however, that

subject to the provisions of subdivision twelve of this section income received from grants, charitable contributions, donations and bequests and governmental deficit financing and the component of rates of payment reflecting any cost of the assessment reimbursable pursuant to subdivision ten of this section shall not be included.

4. For periods prior to January first, two thousand five, the commissioner is authorized to contract with the article forty-three insurance law plans, or if not available such other administrators as the commissioner shall designate, to receive and distribute hospital assessment funds. In the event contracts with the article forty-three insurance law plans or other commissioner's designees are effectuated, the commissioner shall conduct annual audits of the receipt and distribution of the assessment funds. The reasonable costs and expenses of an administrator as approved by the commissioner, not to exceed for personnel services on an annual basis four hundred thousand dollars for all assessments established pursuant to this section, shall be paid from the assessment funds.

5. Estimated payments by or on behalf of hospitals to the commissioner or his designee of funds due from the assessments pursuant to subdivision two of this section shall be made on a monthly basis. Estimated payments shall be due on or before the fifteenth day following the end of a calendar month to which an assessment applies.

6. (a) If an estimated payment made for a month to which an assessment applies is less than seventy percent of an amount the commissioner determines is due, based on evidence of prior period moneys received by a hospital or evidence of moneys received by such hospital for that month, the commissioner may estimate the amount due from such hospital and may collect the deficiency pursuant to paragraph (c) of this subdivision.

(b) If an estimated payment made for a month to which an assessment applies is less than ninety percent of an amount the commissioner determines is due, based on evidence of prior period moneys received by a hospital or evidence of moneys received by such hospital for that month, and at least two previous estimated payments within the preceding

six months were less than ninety percent of the amount due, based on similar evidence, the commissioner may estimate the amount due from such hospital and may collect the deficiency pursuant to paragraph (c) of this subdivision.

(c) Upon receipt of notification from the commissioner of a hospital's deficiency under this section, the comptroller or a fiscal intermediary designated by the director of the budget, or the commissioner of social services, or a corporation organized and operating in accordance with article forty-three of the insurance law, or an organization operating in accordance with article forty-four of this chapter shall withhold from the amount of any payment to be made by the state or by such article forty-three corporation or article forty-four organization to the hospital the amount of the deficiency determined under paragraph (a) or (b) of this subdivision or paragraph (e) of subdivision seven of this section. Upon withholding such amount, the comptroller or a designated fiscal intermediary, or the commissioner of social services, or corporation organized and operating in accordance with article forty-three of the insurance law or organization operating in accordance with article forty-four of this chapter shall pay the commissioner, or his designee, such amount withheld on behalf of the hospital.

(d) The commissioner shall provide a hospital with notice of any estimate of an amount due for an assessment pursuant to paragraph (a) or (b) of this subdivision or paragraph (e) of subdivision seven of this section at least three days prior to collection of such amount by the commissioner. Such notice shall contain the financial basis for the commissioner's estimate.

(e) In the event a hospital objects to an estimate by the commissioner pursuant to paragraph (a) or (b) of this subdivision or paragraph (e) of subdivision seven of this section of the amount due for an assessment, the hospital, within sixty days of notice of an amount due, may request a public hearing. If a hearing is requested, the commissioner shall provide the hospital an opportunity to be heard and to present evidence bearing on the amount due for an assessment within thirty days after collection of an amount due or receipt of a request for a hearing, whichever is later. An administrative hearing is not a prerequisite to seeking judicial relief.

(f) The commissioner may direct that a hearing be held without any

request by a hospital.

7. (a) Every hospital shall submit reports on a cash basis of actual gross receipts received from all patient care services and operating income for each month as follows:

(i) for the period January first, nineteen hundred ninety-one through January thirty-first, nineteen hundred ninety-one, the report shall be filed on or before March fifteenth, nineteen hundred ninety-one; and

(ii) for the quarter year ending March thirty-first, nineteen hundred ninety-one and for each quarter thereafter, the report shall be filed on or before the forty-fifth day after the end of such quarter.

(b) Every hospital shall submit a certified annual report on a cash basis of gross receipts received in such calendar year from all patient care services and operating income.

(c) The reports shall be in such form as may be prescribed by the commissioner to accurately disclose information required to implement this section, provided, however, that for periods on and after July first, two thousand twelve, such reports and any associated certifications shall be submitted electronically in a form as may be required by the commissioner.

(d) Final payments shall be due for all hospitals for the assessments pursuant to subdivision two of this section upon the due date for submission of the applicable quarterly report.

(e) The commissioner may recoup deficiencies in final payments pursuant to paragraph (c) of subdivision six of this section. Delinquent amounts which have been referred for recoupment or offset pursuant to paragraph (c) of subdivision six of this section, or which have been referred to the office of the attorney general for collection, shall be deemed final and not subject to further revision or reconciliation by the commissioner based on any additional reports or other information submitted by the hospital, provided, however, that such delinquencies shall not be referred for such recoupment or for such collection based on estimated amounts unless the hospital has received written notification of such delinquencies and has been given no less than thirty days in which to submit delinquent reports.

(f) Payments and reports submitted or required to be submitted to the commissioner or to the commissioner's designee pursuant to this section

shall be subject to audit by the commissioner for a period of six years following the close of the calendar year in which such payments and reports are due, after which such payments shall be deemed final and not subject to further adjustment or reconciliation, including through offset adjustments or reconciliations made to subsequent payments made pursuant to this section, provided, however, that nothing herein shall be construed as precluding the commissioner from pursuing collection of any such payments which are identified as delinquent within such six year period, or which are identified as delinquent as a result of an audit commenced within such six year period, or from conducting an audit of any adjustment or reconciliation made by a hospital.

8. (a) If an estimated payment made for a month to which an assessment applies is less than ninety percent of the actual amount due for such month, interest shall be due and payable to the commissioner on the difference between the amount paid and the amount due from the day of the month the estimated payment was due until the date of payment. The rate of interest shall be twelve percent per annum or at the rate of interest set by the commissioner of taxation and finance with respect to underpayments of tax pursuant to subsection (e) of section one thousand ninety-six of the tax law minus four percentage points. Interest under this paragraph shall not be paid if the amount thereof is less than one dollar. Interest, if not paid by the due date of the following month's estimated payment, may be collected by the commissioner pursuant to paragraph (c) of subdivision six of this section in the same manner as an assessment pursuant to subdivision two of this section.

(b) If an estimated payment made for a month to which an assessment applies is less than seventy percent of the actual amount due for such month, a penalty shall be due and payable to the commissioner of five percent of the difference between the amount paid and the amount due for such month when the failure to pay is for a duration of not more than one month after the due date of the payment with an additional five percent for each additional month or fraction thereof during which such failure continues, not exceeding twenty-five percent in the aggregate. A penalty may be collected by the commissioner pursuant to paragraph (c) of subdivision six of this section in the same manner as an assessment pursuant to subdivision two of this section.

(c) Overpayment by a hospital of an estimated payment shall be applied to any other payment due from the hospital pursuant to this section, or, if no payment is due, at the election of the hospital shall be applied to future estimated payments or refunded to the hospital. Interest shall be paid on overpayments from the date of overpayment to the date of crediting or refund at the rate determined in accordance with paragraph (a) of this subdivision if the overpayment was made at the direction of the commissioner. Interest under this paragraph shall not be paid if the amount thereof is less than one dollar.

9. Funds accumulated, including income from invested funds, from the assessments specified in this section, including interest and penalties, shall be deposited by the commissioner and:

(a) credited to the general fund;

(b) provided, however, that funds accumulated, including income from invested funds, from the assessments provided in accordance with subparagraph (v) of paragraph (a) and subparagraphs (iii), (iv), (v) and (vi) of paragraph (b) of subdivision two of this section, including interest and penalties, shall be deposited by the commissioner and credited to the special revenue fund-other, miscellaneous special revenue fund (339), medical assistance account. To the extent of funds appropriated therefor, funds shall be made available for payments under the medical assistance program provided pursuant to title eleven of article five of the social services law;

(c) and provided further, however, that funds accumulated, including income from invested funds, for a period from the assessment and additional assessment provided in accordance with subparagraphs (ii) and (iii) of paragraph (a) of subdivision two of this section, including interest and penalties, on voluntary nonprofit and private proprietary general hospitals which qualified for distributions made in accordance with paragraph (c) of subdivision nineteen of section twenty-eight hundred seven-c of this article as of December thirty-first, nineteen hundred ninety-five shall be transferred by the commissioner and consolidated with funds accumulated from the allowance pursuant to subdivision two of section twenty-eight hundred seven-j of this article for such period and allocated in accordance with subdivision nine of section twenty-eight hundred seven-j of this article.

10. Notwithstanding any inconsistent provision of law or regulation to the contrary:

(a) the assessments pursuant to this section shall not be an allowable cost in the determination of reimbursement rates pursuant to this article;

(b) provided, however, that for purposes of determining rates of payment pursuant to this article for residential health care facilities, for the period January first, nineteen hundred ninety-two through March thirty-first, nineteen hundred ninety-nine, the additional assessment of one and two-tenths percent, and for the period July first, nineteen hundred ninety-five through March thirty-first, nineteen hundred ninety-six the further additional assessment of three and eight-tenths percent, and for the period April first, nineteen hundred ninety-six through March thirty-first, nineteen hundred ninety-seven the further additional assessment of one and nine-tenths percent, and for the period May first, nineteen hundred ninety-six through December thirty-first, nineteen hundred ninety-six the further additional assessment of two and three-tenths percent and for the period January first, nineteen hundred ninety-seven through February twenty-eighth, nineteen hundred ninety-seven the further additional assessment of one and nine-tenths percent, and for the period April first, nineteen hundred ninety-seven through March thirty-first, nineteen hundred ninety-nine the further additional assessment of three and six-tenths percent, and for the period April first, nineteen hundred ninety-nine through December thirty-first, nineteen hundred ninety-nine the further additional assessment of two and four-tenths percent, imposed pursuant to this section shall be a reimbursable cost to be reflected as timely as practicable in rates of payment applicable within the assessment period, contingent, for payments by governmental agencies, on all federal approvals necessary by federal law and regulations for federal financial participation in payments made for beneficiaries eligible for medical assistance under title XIX of the federal social security act.

(c) provided, however, that for the purposes of determining rates of payment pursuant to this article for residential health care facilities, the assessment imposed pursuant to subparagraph (vi) of paragraph (b) of subdivision two of this section shall be a reimbursable cost to be

reflected as timely as practicable, and subsequently reconciled to actual cost, in rates of payment applicable within the assessment period, provided further, however, that insofar as such assessment is in excess of six percent it shall not be deemed a reimbursable cost and shall not be reflected in such rates of payment.

(d) provided, however, that the adjustment to rates of payment made pursuant to paragraph (c) of this subdivision shall be calculated on a per diem basis and based on total reported patient days of care minus reported days attributable to title XVIII of the federal social security act (medicare) units of service.

(e) the provisions of paragraphs (c) and (d) of this subdivision shall each be contingent upon receipt of all federal approvals required by federal law and regulations for federal financial participation in payments made in accordance with paragraphs (c) and (d) of this subdivision.

11. (a) (ii) The assessment shall not be collected in excess of one hundred thirty-four million three hundred thousand dollars from general hospitals for the period of April first, nineteen hundred ninety-seven through March thirty-first, nineteen hundred ninety-eight. The amount of the assessment collected pursuant to paragraph (a) of subdivision two of this section in excess of one hundred thirty-four million three hundred thousand dollars for the period of April first, nineteen hundred ninety-seven through March thirty-first, nineteen hundred ninety-eight shall be refunded to general hospitals by the commissioner based on the ratio which a general hospital's assessment for such period bears to the total of the assessments for such period paid by general hospitals.

(iii) The additional assessment shall not be collected in excess of fourteen million nine hundred thousand dollars from general hospitals for the period of April first, nineteen hundred ninety-seven through November thirtieth, nineteen hundred ninety-seven. The amount of the additional assessment collected pursuant to paragraph (a) of subdivision two of this section in excess of fourteen million nine hundred thousand dollars for the period of April first, nineteen hundred ninety-seven through November thirtieth, nineteen hundred ninety-seven shall be refunded to general hospitals by the commissioner based on the ratio which a general hospital's additional assessment for such period bears

to the total of the additional assessments for such period paid by general hospitals.

(b) (ii) The assessment shall not be collected in excess of fifteen million dollars from residential health care facilities for the period of April first, nineteen hundred ninety-eight through March thirty-first, nineteen hundred ninety-nine. The amount of the assessment collected pursuant to paragraph (b) of subdivision two of this section in excess of fifteen million dollars for the period of April first, nineteen hundred ninety-eight through March thirty-first, nineteen hundred ninety-nine shall be refunded to residential health care facilities by the commissioner based on the ratio which a residential health care facility's assessment for such period bears to the total of the assessments for such period paid by residential health care facilities.

(iii) The additional assessment shall not be collected in excess of eighty-nine million nine hundred thousand dollars from residential health care facilities for the period of April first, nineteen hundred ninety-eight through March thirty-first, nineteen hundred ninety-nine. The amount of the additional assessment collected pursuant to paragraph (b) of subdivision two of this section in excess of eighty-nine million nine hundred thousand dollars for the period of April first, nineteen hundred ninety-eight through March thirty-first, nineteen hundred ninety-nine shall be refunded to residential health care facilities by the commissioner based on the ratio which a residential health care facility's additional assessment for such period bears to the total of the additional assessments for such period paid by residential health care facilities.

(iv) The further additional assessment shall not be collected in excess of one hundred sixty-four million seven hundred thousand dollars from residential health care facilities for the period July first, nineteen hundred ninety-five through March thirty-first, nineteen hundred ninety-six. The amount of the further additional assessment collected pursuant to paragraph (b) of subdivision two of this section in excess of one hundred sixty-four million seven hundred thousand dollars for the period of July first, nineteen hundred ninety-five through March thirtyfirst, nineteen hundred ninety-six shall be refunded to residential health care facilities by the commissioner based on the

ratio which a residential health care facility's further additional assessment for such period bears to the total of the further additional assessments for such period paid by residential health care facilities.

(v) The further additional assessment imposed pursuant to subparagraph (iv) of paragraph (b) of subdivision two of this section shall not be collected in excess of one hundred twelve million dollars from residential health care facilities for the period April first, nineteen hundred ninety-six through March thirty-first, nineteen hundred ninety-seven. The amount of the further additional assessment collected pursuant to subparagraph (iv) of paragraph (b) of subdivision two of this section in excess of one hundred twelve million dollars for the period of April first, nineteen hundred ninety-six through March thirty-first, nineteen hundred ninety-seven shall be refunded to residential health care facilities by the commissioner based on the ratio which a residential health care facility's further additional assessment for such period bears to the total of the further additional assessments for such period paid by residential health care facilities.

(vi) The further additional assessment shall not be collected in excess of one hundred ten million dollars from residential health care facilities for the period May first, nineteen hundred ninety-six through February twenty-eighth, nineteen hundred ninety-seven. The amount of the further additional assessment collected pursuant to subparagraph (v) of paragraph (b) of subdivision two of this section in excess of one hundred ten million dollars for the period May first, nineteen hundred ninety-six through February twenty-eighth, nineteen hundred ninety-seven shall be refunded to residential health care facilities by the commissioner based on the ratio which a residential health care facility's further additional assessment for such period bears to the total of the further additional assessments for such period paid by residential health care facilities.

(vii) The further additional assessment shall not be collected in excess of two hundred forty million dollars from residential health care facilities for the period April first, nineteen hundred ninety-seven through March thirty-first, nineteen hundred ninety-eight. The amount of the further additional assessment collected pursuant to subparagraph (v) of paragraph (b) of subdivision two of this section in excess of two hundred forty million dollars for the period of April first, nineteen

hundred ninety-seven through March thirty-first, nineteen hundred ninety-eight shall be refunded to residential health care facilities by the commissioner based on the ratio which a residential health care facility's further additional assessments for such a period bears to the total of the further additional assessments for such period paid by residential health care facilities.

(viii) The further additional assessment shall not be collected in excess of two hundred fifty-six million eight hundred thousand dollars from residential health care facilities for the period April first, nineteen hundred ninety-eight through March thirty-first, nineteen hundred ninety-nine. The amount of the further additional assessment collected pursuant to subparagraph (v) of paragraph (b) of subdivision two of this section in excess of two hundred fifty-six million eight hundred thousand dollars for the period April first, nineteen hundred ninety-eight through March thirty-first, nineteen hundred ninety-nine shall be refunded to residential health care facilities by the commissioner based on the ratio which a residential health care facility's further additional assessments for such period bears to the total of the further additional assessments for such period paid by residential health care facilities.

(c) (ii) The assessment shall not be collected in excess of seven million four hundred thousand dollars from all other facilities issued an operating certificate pursuant to section twenty-eight hundred five of this article for the period of April first, nineteen hundred ninety-seven through March thirty-first, nineteen hundred ninety-eight. The amount of the assessment collected pursuant to paragraph (c) of subdivision two of this section in excess of seven million four hundred thousand dollars for the period of April first, nineteen hundred ninety-seven through March thirty-first, nineteen hundred ninety-eight shall be refunded by the commissioner based on the ratio which a facility's assessment for such period bears to the total of the assessments for such period paid by such facilities.

12. (a) Each exclusion of hospitals or sources of gross receipts received from the assessments effective on or after April first, nineteen hundred ninety-two, and prior to April first, two thousand two, established pursuant to this section shall be contingent upon either:

(i) qualification of the assessments for waiver pursuant to federal law and regulation; or (ii) consistent with federal law and regulation, not requiring a waiver by the secretary of the department of health and human services related to such exclusion; in order for the assessments under this section to be qualified as a broad-based health care related tax for purposes of the revenues received by the state pursuant to the assessments not reducing the amount expended by the state as medical assistance for purposes of federal financial participation. The commissioner shall collect the assessments relying on such exclusions, pending any contrary action by the secretary of the department of health and human services. In the event the secretary of the department of health and human services determines that the assessments do not so qualify based on any such exclusion, then the exclusion shall be deemed to have been null and void as of April first, nineteen hundred ninety-two, and the commissioner shall collect any retroactive amount due as a result, without interest or penalty provided the hospital pays the retroactive amount due within ninety days of notice from the commissioner to the hospital that an exclusion is null and void. Interest and penalties shall be measured from the due date of ninety days following notice from the commissioner to the hospital.

(b) The exclusion of the hospitals described in paragraph (b) of subdivision one of this section and the exclusion of revenue described in subdivision two of this section from the assessments set forth in subdivision two of this section for periods on and after April first, two thousand two shall be contingent upon either: (i) qualification of the assessments for waiver pursuant to federal law and regulation; or (ii) consistent with federal law and regulation, not requiring a waiver by the secretary of the department of health and human services related to such exclusion; in order for the assessments under this section to be qualified as a broad-based health care related tax for purposes of the revenues received by the state pursuant to the assessments not reducing the amount expended by the state as medical assistance for purposes of federal financial participation. The commissioner shall collect such assessments relying on such exclusion, pending any contrary action by the secretary of the department of health and human services. In the event the secretary of the department of health and human services determines that such assessments do not so qualify based on such

exclusion, then the commissioner shall, to the extent necessary to achieve such qualification for federal financial participation, deem such exclusions null and void as of the first day of the period for which such assessments apply, and the commissioner shall collect any retroactive amount due as a result, without interest or penalty provided the hospital pays the retroactive amount due within ninety days of notice from the commissioner to the hospital that such exclusion is null and void.

(c) No hospital shall be obligated to pay assessments pursuant to subparagraph (v) of paragraph (a) of subdivision two of this section prior to December first, two thousand five. The commissioner shall collect payment obligations incurred prior to December first, two thousand five proportionally over the remaining months in the state fiscal year.

§ 2807-dd. Temporary nursing home stability contributions. 1.

Notwithstanding any contrary provision of law and subject to the receipt of all necessary federal approvals or waivers, for periods on and after April first, two thousand eleven, a temporary nursing home stability contribution shall be imposed on the gross receipts of each residential health care facility equal to four tenths of one percent of such receipts and provided further, however, that on and after April first, two thousand twelve through October thirty-first, two thousand twelve such contributions shall be reduced to two tenths of one percent, and provided further, however, that on and after November first, two thousand twelve, such contributions shall be reduced to zero.

2. The gross receipts subject to this section shall be as defined in paragraph (b) of subdivision three of section twenty-eight hundred seven-d of this article and shall include income from all patient care services and other operating income on a cash basis, but excluding revenue received pursuant to the federal Medicare program. The contributions described in this section shall be administered in accordance with and subject to the provisions of subdivisions four, five, six, seven, eight, nine and twelve of section twenty-eight hundred seven-d of this article, provided, however, that such contributions

shall not be an allowable cost in the determination of reimbursement rates of payment computed pursuant to this article.

§ 2807-d-1. Hospital quality contributions. 1. Notwithstanding any contrary provision of law and subject to the receipt of all necessary federal approvals or waivers, for periods on and after July first, two thousand eleven, a quality contribution shall be imposed on the inpatient revenue of each general hospital that is received for the provision of inpatient obstetrical patient care services in an amount equal to one and six-tenths percent of such revenue, as defined in accordance with paragraph (a) of subdivision three of section twenty-eight hundred seven-d of this article, provided, however, that in the event the commissioner, in consultation with the director of the budget, determines that such quality contribution shall raise less than or more than the total quality collection amount set forth in subdivision two of this section, the commissioner, in consultation with the director of the budget, may promulgate regulations, and may promulgate emergency regulations, increasing or decreasing such quality contributions by amounts sufficient to ensure the collection of such annual quality contribution amount.

2. The annual quality contribution amount referenced in subdivision one of this section shall be thirty million dollars for the state fiscal year beginning April first, two thousand eleven, and for each subsequent state fiscal year thereafter it shall be the amount of the preceding year as increased by the ten year rolling average of the medical component of the consumer price index as published by the United States department of labor, bureau of labor statistics, for the preceding ten years.

3. The quality contributions described in this section shall be administered in accordance with and subject to the provisions of subdivisions four, five, six, seven, eight and twelve of section twenty-eight hundred seven-d of this article, provided, however, that such quality contributions shall be deposited in the HCRA resources fund as established pursuant to section ninety-two-dd of the state finance

law; and provided further, however, that such contributions shall not be an allowable cost in the determination of reimbursement rates of payment computed pursuant to this article.

§ 2807-e. Uniform bills. 1. Definitions. For the purposes of this section, unless the context clearly requires otherwise:

(a) "Ambulatory care services" shall mean ambulatory surgical services, diagnostic and treatment services, emergency services, hospital outpatient services and physician services.

(b) "Superintendent" shall mean the superintendent of financial services.

(c) "Third-party payor" shall mean those payors within the payor categories specified in paragraphs (a) and (b) of subdivision one of section twenty-eight hundred seven-c of this article, except for payments made for persons who are eligible as beneficiaries of title XVIII of the federal social security act (medicare).

(d) "Bill," other than a patient bill, shall include a claim form for a third-party payor.

2. Uniform bills. (a) Notwithstanding any inconsistent provisions of law, the commissioner shall, on or after July first, nineteen hundred ninety-five, develop a uniform patient bill for the purpose of providers providing a health care consumer with a patient bill for hospital and health-related services, in consultation with the superintendent of financial services, statewide organizations representative of providers of hospital and health-related services, third-party payors as described in paragraphs (a) and (b) of subdivision one of section two thousand eight hundred seven-c of this article, and representatives of health care consumers. Such patient bill shall be in such form and shall contain such information as may be required in accordance with rules and regulations developed by the commissioner, provided that distinct uniform patient bills may be developed for each type or level of health-related service.

(b) No provider of hospital or health-related services shall provide a health care consumer with any patient bill, on or after September first, nineteen hundred ninety-five, for services provided to such consumer

except such uniform patient bill as developed by the commissioner pursuant to paragraph (a) of this subdivision.

(c) Notwithstanding any inconsistent provision of this article or any other law, beginning on or after April first, nineteen hundred ninety-four, each general hospital providing inpatient services shall use a uniform data set, developed by the commissioner in consultation with representatives of providers and third-party payors, for the purpose of billing a third-party payor for inpatient services containing such information as may be required in accordance with rules and regulations of the commissioner.

(d) Notwithstanding any inconsistent provision of this article or any other law, beginning on or after September first, nineteen hundred ninety-four, each general hospital, diagnostic and treatment center, or ambulatory surgery center providing ambulatory care services shall use a uniform bill, developed by the commissioner in consultation with representatives of providers and third-party payors, for the purpose of billing a third-party payor for ambulatory care services containing such information as may be required in accordance with rules and regulations of the commissioner.

(e) Notwithstanding any inconsistent provision of this article or any other law, beginning on or after January first, nineteen hundred ninety-five, each physician providing physician services shall use a uniform bill, developed by the commissioner in consultation with representatives of providers and third-party payors, for the purpose of billing a third-party payor for physician services containing such information as may be required in accordance with rules and regulations of the commissioner.

(f) Notwithstanding any inconsistent provision of this article or any other law, the commissioner in consultation with the superintendent and the commissioner of social services shall establish procedures for requiring any payor for inpatient services, ambulatory care services or physician services making payment pursuant to the provisions of this section to utilize a uniform bill for patient services required pursuant to paragraphs (c), (d) and (e) of this subdivision.

* 3. Fiscal intermediary. Notwithstanding any inconsistent provision of law, the commissioner shall not enter into an agreement for a pilot program which provides for among its purposes a single fiscal

intermediary for the processing of hospital bills in a region, unless the commissioner shall first notify the chairs of the senate and assembly standing committees on health not less than one hundred twenty-days prior to entering into such agreement. Such notification shall include, but need not be limited to, the following:

- (a) the source of funding and anticipated expenditures for such program;
- (b) the geographic region and participants in such program;
- (c) the nature and policy objectives of such program, including its relationship to long range policy objectives, and including but not limited to its relationship to establishing a universal health insurance coverage system;
- (d) a discussion of the design, proposed implementation, and time-frames for such program; and
- (e) a copy of any proposed agreements or other contractual arrangements relating to the program.

In the event the commissioner subsequently enters into an agreement for such a pilot program the commissioner shall promptly provide a copy of such agreement to such chairs. The commissioner shall report every six months thereafter on the progress of implementation of such program and provide a final evaluation of the program upon its conclusion.

* NB Expired July 1, 2017

4. Electronic transfer of claims information. (a) Claims submitted to third-party payors for payment for inpatient hospital services provided by a general hospital on or after April first, nineteen hundred ninety-four shall be submitted in electronic formats consistent with this section.

(b) Claims for payment made to third-party payors for ambulatory care services provided by a general hospital, diagnostic and treatment center or ambulatory surgery center on or after January first, nineteen hundred ninety-five shall be submitted in electronic formats consistent with this section.

(c) Claims for payment made to third-party payors for physician services on or after July first, nineteen hundred ninety-five shall be submitted in electronic formats consistent with this section.

(d) The provisions of this section shall not apply to claims for payment to third-party payors for which the content, processing and payment thereof are regulated solely by federal law or regulation, provided, however that such third-party payors may voluntarily participate in the electronic submission of claims information.

(e) Consistent with their capabilities hospitals, diagnostic and treatment centers, physicians, other practitioners and third-party payors may be permitted to elect to submit claims information electronically prior to the above dates.

(f) The commissioner shall delay or waive the implementation of this section in particular instances for diagnostic and treatment centers or practitioners and, in consultation with the superintendent, third-party payors where such diagnostic and treatment centers, practitioners or third-party payors have a small volume of services or business.

(g) The commissioner, in consultation with the superintendent and the commissioner of social services, shall establish procedures for requiring third-party payors to accept the electronic submission of claims information for inpatient or ambulatory care services made pursuant to the provision of this section.

5. The commissioner, in consultation with the superintendent, shall make recommendations, to the legislature, by June thirtieth, nineteen hundred ninety-four, for improving the efficiency of processing electronic claims by health care providers and third-party payors; including but not limited, to the use of electronic claims clearing-house.

§ 2807-f. Health maintenance organization payment factor. 1. For purposes of this section, the following terms shall have the following meaning:

(a) "HMO" shall mean a health maintenance organization operating in accordance with the provisions of article forty-four of this chapter or article forty-three of the insurance law.

(b) "Medicaid" shall mean the medical assistance program established pursuant to title eleven of article five of the social services law.

2. For periods commencing on or after July first, nineteen hundred ninety-eight, an HMO payment factor shall be determined in accordance with subdivision three of this section. Such subdivision shall apply during the period July first, nineteen hundred ninety-eight through June thirtieth, nineteen hundred ninety-nine; provided, however, that this section shall expire and be deemed repealed on and after the date on which New York state is granted the authority, by federal waiver, agreed upon by the state and the secretary of the federal department of health and human services, or federal statute, to operate a mandatory medicaid managed care program.

3. (a) In recognition of the public benefits resulting from enrolling medicaid enrollees into managed care plans, HMOs are required to make a good faith effort to enroll medicaid recipients. A good faith effort shall be defined as:

(i) submitting a reasonable bid in response to a state or county procurement process;

(ii) willingness to enter into reasonable managed care contracts with counties in its approved service area;

(iii) demonstrating a willingness to enroll medicaid recipients including accepting referrals from counties, brokers and auto-assignments; and

(iv) such other factors as may be established by the commissioner.

(b) In the event that an HMO has not made a good faith effort to enroll medicaid recipients, the commissioner shall impose a payment factor of nine percent on payments to general hospitals for the calendar year by such HMO. The commissioner shall notify HMOs of any failure to make a good faith effort and the application of the payment factor by November first preceding the applicable calendar year.

4. (a) Each HMO on behalf of general hospitals shall pay into a statewide health maintenance organization pool created by the commissioner the factor established pursuant to subdivision two or three and this subdivision for each patient discharged in the previous calendar month commencing with July first, nineteen hundred ninety-six through December thirty-first, nineteen hundred ninety-nine or contracted hospital inpatient service obligations for periods on or

after July first, nineteen hundred ninety-six through December thirty-first, nineteen hundred ninety-nine. Funds accumulated in the pool, including income from invested funds, shall be deposited by the commissioner and credited to the general fund.

(b) Payments by HMOs to the pool shall be due on or before the fifteenth day following the end of each month.

(c) (i) If a payment made for a month to which a payment factor applies is less than ninety percent of the actual amount due for such month, interest shall be due and payable to the commissioner by a health maintenance organization on the difference between the amount paid and the amount due from the day of the month the payment was due until the date of payment. The rate of interest shall be twelve percent per annum or, if greater, at the rate of interest set by the commissioner of taxation and finance with respect to underpayments of tax pursuant to subsection (e) of section one thousand ninety-six of the tax law minus four percentage points. Interest under this paragraph shall not be paid if the amount thereof is less than one dollar.

(ii) If a payment made for a month to which a payment factor applies is less than seventy percent of the actual amount due for such month, a penalty shall be due and payable to the commissioner by a health maintenance organization of five percent of the difference between the amount paid and the amount due for such month when the failure to pay is for a duration of not more than one month after the due date of the payment with an additional five percent for each additional month or fraction thereof during which such failure continues, not exceeding twenty-five percent in the aggregate.

(iii) Overpayment by a health maintenance organization of a payment shall be applied to any other payment due pursuant to this section, or, if no payment is due, at the election of the health maintenance organization shall be applied to future payments or refunded to the health maintenance organization. Interest shall be paid on overpayments from the date of overpayment to the date of crediting or refund at the rate determined in accordance with paragraph (a) of this subdivision only if the overpayment was made at the direction of the commissioner. Interest under this paragraph shall not be paid if the amount thereof is less than one dollar.

(d) The commissioner is authorized to contract with a pool

administrator designated for purposes of administering pools pursuant to subdivision two-a of section twenty-eight hundred seven-c of this article as in effect on June thirtieth, nineteen hundred ninety-six, or if not available such other administrators as the commissioner shall designate, to receive and distribute health maintenance organization pool funds. In the event contracts are effectuated, the commissioner shall conduct or cause to be conducted annual audits of the receipt and distribution of the pool funds. The reasonable costs and expenses of an administrator as approved by the commissioner, not to exceed for personnel services on an annual basis two hundred thousand dollars, shall be paid from the pooled funds.

5. Payment factors established pursuant to this section shall not apply to payments for subscribers who are eligible for medical assistance pursuant to the social services law, participants in regional pilot projects established pursuant to chapter seven hundred three of the laws of nineteen hundred eighty-eight or successor insurance programs, and enrollees in the child health insurance program pursuant to sections twenty-five hundred ten and twenty-five hundred eleven of this title.

6. Notwithstanding any inconsistent provisions of the state administrative procedure act or any other provision of law, the commissioner is authorized to adopt or amend on an emergency basis any regulation he or she determines necessary to implement this section.

7. HMOs shall provide to the commissioner such information as the commissioner may require to effectuate the provisions of this section.

§ 2807-ff. New York managed care organization provider tax. 1. The commissioner, subject to the approval of the director of the budget, shall: apply for a waiver or waivers of the broad-based and uniformity requirements related to the establishment of a New York managed care organization provider tax (the "MCO provider tax") in order to secure federal financial participation for the costs of the medical assistance program; and, subject to approval by the centers for Medicare and

Medicaid services, impose the MCO provider tax as an assessment upon insurers, health maintenance organizations, and managed care organizations (collectively referred to as "health plan") offering the following plans or products:

(a) Medical assistance program coverage provided by managed care providers pursuant to section three hundred sixty-four-j of the social services law;

(b) A health insurance plan serving individuals enrolled pursuant to title one-A of article twenty-five of this chapter;

(c) Essential plan coverage certified pursuant to title eleven-D of article five of the social services law;

(d) Coverage purchased on the New York insurance exchange established pursuant to section two hundred sixty-eight-b of this chapter; or

(e) Any other comprehensive coverage subject to articles thirty-two, forty-two and forty-three of the insurance law, or article forty-four of this chapter.

1-a. On or after April first, two thousand twenty-six, the commissioner, subject to the approval of the director of the budget, shall apply for an amendment of the MCO provider tax, subject to approval by the centers for Medicare and Medicaid services, to impose an amended MCO provider tax as an assessment upon health plans no sooner than January first, two thousand twenty-seven, as established in paragraph (b) of subdivision four of this section.

2. The MCO provider tax shall comply with all relevant provisions of federal laws, rules and regulations.

3. The department shall post on its website the MCO provider tax approval letter by the centers for Medicare and Medicaid services (the "approval letter").

4. (a) Prior to January first, two thousand twenty-seven, a health plan, as defined in subdivision one of this section, shall pay the MCO provider tax for each calendar year as follows:

(i) For Medicaid member months below two hundred fifty thousand member months, a health plan shall pay one hundred twenty-six dollars per

member month;

(ii) For Medicaid member months greater than or equal to two hundred fifty thousand member months but less than five hundred thousand member months, a health plan shall pay eighty-eight dollars per member month;

(iii) For Medicaid member months greater than or equal to five hundred thousand member months, a health plan shall pay twenty-five dollars per member month;

(iv) For essential plan member months less than two hundred fifty thousand member months, a health plan shall pay thirteen dollars per member month;

(v) For essential plan member months greater than or equal to two hundred fifty thousand member months, a health plan shall pay seven dollars per member month;

(vi) For non-essential plan non-Medicaid member months, consisting of the populations covered by the products described in paragraphs (b), (d), and (e) of subdivision one of this section, less than two hundred fifty thousand member months, a health plan shall pay two dollars per member month; and

(vii) For non-essential plan non-Medicaid member months greater than or equal to two hundred fifty thousand member months, a health plan shall pay one dollar and fifty cents per member month.

(b) Effective January first, two thousand twenty-seven, subject to any required approvals by the centers for Medicare and Medicaid services, a health plan, as defined in subdivision one of this section, shall pay the MCO provider tax for each calendar year at a rate of 0.35% of the health plan's total premium revenue.

5. A health plan shall remit the MCO provider tax due pursuant to this section to the commissioner or their designee quarterly or at a frequency defined by the commissioner.

6. Funds accumulated from the MCO provider tax, including interest and penalties, shall be deposited and credited by the commissioner, or the commissioner's designee, to the healthcare stability fund established in section ninety-nine-ss of the state finance law.

7. (a) Every health plan subject to the approved MCO provider tax

shall submit reports in a form prescribed by the commissioner to accurately disclose information required to implement this section.

(b) If a health plan fails to file reports required pursuant to this subdivision within sixty days of the date such reports are due and after notification of such reporting delinquency, the commissioner may assess a civil penalty of up to ten thousand dollars for each failure; provided, however, that such civil penalty shall not be imposed if the health plan demonstrates good cause for the failure to timely file such reports.

8. (a) If a payment made pursuant to this section is not timely, interest shall be payable in the same rate and manner as defined in subdivision eight of section twenty-eight hundred seven-j of this article.

(b) The commissioner may waive a portion or all of either the interest or penalties, or both, assessed under this section if the commissioner determines, in their sole discretion, that the health plan has demonstrated that imposition of the full amount of the MCO provider tax pursuant to the timelines applicable under the approval letter has a high likelihood of creating an undue financial hardship for the health plan or creates a significant financial difficulty in providing needed services to Medicaid beneficiaries. In addition, the commissioner may waive a portion or all of either the interest or penalties, or both, assessed under this section if the commissioner determines, in their sole discretion, that the health plan did not have the information necessary from the department to pay the tax required in this section. Waiver of some or all of the interest or penalties pursuant to this subdivision shall be conditioned on the health plan's agreement to make MCO provider tax payments on an alternative schedule developed by the department that takes into account the financial situation of the health plan and the potential impact on the delivery of services to Medicaid beneficiaries.

(c) Overpayment by or on behalf of a health plan of a payment shall be applied to any other payment due from the health plan pursuant to this section, or, if no payment is due, at the election of the health plan, shall be applied to future payments or refunded to the health plan. Interest shall be paid on overpayments from the date of overpayment to

the date of crediting or refunding at the rate determined in accordance with this subdivision only if the overpayment was made at the direction of the commissioner. Interest under this paragraph shall not be paid if the amount thereof is less than one dollar.

9. Payments and reports submitted or required to be submitted to the commissioner pursuant to this section by a health plan shall be subject to audit by the commissioner for a period of six years following the close of the calendar year in which such payments and reports are due, after which such payments shall be deemed final and not subject to further adjustment or reconciliation, including through offset adjustments or reconciliations made by a health plan; provided, however, that nothing in this section shall be construed as precluding the commissioner from pursuing collection of any such payments which are identified as delinquent within such six-year period, or which are identified as delinquent as a result of an audit commenced within such six-year period, or from conducting an audit of any adjustment or reconciliation made by a health plan, or from conducting an audit of payments made prior to such six-year period which are found to be commingled with payments which are otherwise subject to timely audit pursuant to this section.

10. In the event of a merger, acquisition, establishment, or any other similar transaction that results in the transfer of health plan responsibility for all enrollees under this section from a health plan to another health plan or similar entity, and that occurs at any time during which this section is effective, the resultant health plan or similar entity shall be responsible for paying the full tax amount as provided in this section that would have been the responsibility of the health plan to which that full tax amount was assessed upon the effective date of any such transaction. If a merger, acquisition, establishment, or any other similar transaction results in the transfer of health plan responsibility for only some of a health plan's enrollees under this section but not all enrollees, the full tax amount as provided in this section shall remain the responsibility of that health plan to which that full tax amount was assessed.

§ 2807-i. Service and quality improvement grants. 1. Grants to facilitate cooperative ventures for sharing administrative, management and operational services. a. Notwithstanding any inconsistent provision of law to the contrary, within amounts available therefor, the commissioner shall make grants pursuant to this subdivision to eligible applicants to facilitate cooperative ventures for sharing administrative, management and operational services among general hospitals and other health care providers. Funded projects shall include two or more hospitals and may also include other health care providers in coordination with those hospitals. Funded projects shall be designed to demonstrate the extent to which such cooperative arrangements would result in a reduction in costs to the facilities involved.

b. In order to be eligible to receive a grant under this subdivision, applicants shall prepare and submit to the commissioner a proposal at such time, in such manner and containing such information as the commissioner may require, including:

(i) a statement that such providers desire to negotiate and enter into a voluntary agreement;

(ii) a description of the nature and scope of the activities contemplated in the cooperative agreement;

(iii) a description of the financial arrangement between the providers that are parties to the agreement;

(iv) a description of the geographic area generally served by the providers;

(v) a description of the anticipated benefits and advantages to providers and to health care consumers;

(vi) a description of how the proposal will be coordinated with the regional health plan; and

(vii) any other information determined appropriate by the commissioner.

c. In awarding grants under this subdivision, the commissioner shall assure that there is a sufficiently representative geographic and size distribution of grantees, including urban, rural and suburban grantees.

d. Amounts provided under a grant awarded under this subdivision shall only be used for the planning of cooperative ventures and shared services.

e. Grantees shall submit reports to the commissioner in such form and at such times as the commissioner may by regulation require, for the purpose of evaluating the operations and results of such program.

f. The commissioner in evaluating proposals pursuant to this section shall give primary consideration to the financial condition of applicants; provided however, that an applicant's financial condition shall not be the sole grounds for approval or rejection.

2. Management information systems grants. Notwithstanding any inconsistent provision of law to the contrary, within amounts available therefor, the commissioner shall make grants pursuant to this subdivision to general hospitals, not to exceed two hundred thousand dollars per hospital, for the purposes of expanding and improving their information management capabilities. In order to be eligible for grants pursuant to this subdivision, general hospitals which have experienced operating losses for the past two consecutive years, provided such operating losses have been at least two percent of such hospital's operating expenses, shall submit proposals which demonstrate that:

a. hospital management, productivity, and operations would be enhanced by improvements to the hospital's current management information system capabilities;

b. the cost of providing services would be contained or patient access to care or the quality of patient care would be improved;

c. such hospital's clinical, management and finance information systems would be integrated; and

d. cost finding and cost accounting capabilities would be enhanced.

3. Continuous quality improvement grants. Grants shall be awarded to

general hospitals, within amounts available therefor, to establish programs to improve quality assurance activities. Such programs shall seek to promote and encourage continuous quality improvement by integrating traditional medical staff review functions with risk management and infection control activities. Grants shall be used to support the following:

a. the establishment of a mission statement, an accompanying long term strategic plan and allocation of institutional resources which reflect the institution's commitment to continuous quality improvement;

b. the establishment of quality improvement activities which will enhance all institutional processes, including clinical, managerial and support functions;

c. activities which support a multidisciplinary collaborative approach to quality improvement;

d. integration of management information systems to improve health care delivery; and

e. an educational program on continuous quality improvement to inform staff of the institution's mission and plan for quality.

4. Equitable distribution. Funding shall as far as practicable be equitably distributed among applicants in urban, suburban and rural areas of the state.

*** § 2807-j. Patient services payments.** 1. Payments to designated providers of services, as defined in paragraph (a) of subdivision one-a of this section, by all payors, including the state governmental agencies, corporations organized and operating in accordance with article forty-three of the insurance law, organizations operating in accordance with the provisions of article forty-four of this chapter, local governmental agencies, self-insured funds, commercial insurers, payors pursuant to the comprehensive motor vehicle insurance reparations

act, the workers' compensation law, the volunteer firefighters' benefit law and the volunteer ambulance workers' benefit law, and any other rate, charge, or negotiated payment payor, for patient services provided to persons who are not eligible for payments as beneficiaries of title XVIII of the federal social security act (medicare) shall include a surcharge for an allowance on net patient service revenues in the percentage amount and for the periods specified in subdivision two of this section. Any such allowance shall be submitted by or on behalf of designated providers of services to the commissioner or the commissioner's designee in accordance with subdivision five of this section.

1-a. Definitions. (a) "Designated providers of services", for purposes of this section, shall mean providers of services in the following classes:

- (i) general hospitals;

- (ii) diagnostic and treatment centers that provide:

- (A) a comprehensive range of primary health care services; or

- (B) ambulatory surgical services; and

- (iii) for periods prior to October first, two thousand, subject to the provisions of paragraph (d) of subdivision three of this section, free-standing clinical laboratories issued a permit pursuant to title five of article five of this chapter.

(b) "Third-party coverage", for purposes of this section, shall include, but not be limited to: payments by a governmental agency, insurer, health maintenance organization, self-insured fund, or other third-party entity making payments on behalf of a patient; whether made directly to a designated provider of services or indirectly as indemnity or similar payments made to the patient (or patient's representative such as parent or family member) for services provided by a designated provider of services, or through the use of payments made payable to both the designated provider of services and the patient or patient's representative, or similar devices.

(c) "Third-party payors", for purposes of this section, shall include, but not be limited to: governmental agencies; corporations organized and operating in accordance with article forty-three of the insurance law; organizations operating in accordance with the provisions of article

forty-four of this chapter; providers of coverage pursuant to the comprehensive motor vehicle insurance reparations act, the workers' compensation law, the volunteer firefighters' benefit law, and the volunteer ambulance workers' benefit law; self-insured funds and administrators acting on behalf of self-insured funds; and commercial insurers licensed to do business in this state and authorized to write accident and health insurance and whose policy provides coverage on an expense incurred basis.

2. (a) The total percentage allowance for any period during the period January first, nineteen hundred ninety-seven through December thirty-first, nineteen hundred ninety-nine and on and after January first, two thousand, for a designated provider of services applicable to a payor shall be determined in accordance with this subdivision and applied to net patient service revenues.

(b) The total percentage allowance for each payor, other than governmental agencies, or health maintenance organizations for services provided to subscribers eligible for medical assistance pursuant to title eleven of article five of the social services law, or approved organizations for services provided to subscribers eligible for the family health plus program pursuant to title eleven-D of article five of the social services law, and other than payments for a patient that has no third-party coverage in whole or in part for services provided by a designated provider of services, shall be:

(i) the sum of (A) eight and eighteen-hundredths percent, provided, however, that for services provided on and after July first, two thousand three, the percentage shall be eight and eighty-five hundredths percent, and further provided that for services provided on and after January first, two thousand six, the percentage shall be eight and ninety-five hundredths percent, and further provided that for services provided on and after April first, two thousand nine, the percentage shall be nine and sixty-three hundredths percent, plus (B) twenty-four percent, provided, however, that for services provided on and after July first, two thousand three, the percentage shall be twenty-five and ninety-seven hundredths percent, and further provided that for services provided on and after January first, two thousand six, the percentage shall be twenty-six and twenty-six hundredths percent, and further

provided that for services provided on and after April first, two thousand nine, the percentage shall be twenty-eight and twenty-seven hundredths percent, and plus (C) for a specified third-party payor as defined in subdivision one-a of section twenty-eight hundred seven-s of this article the percentage allowance applicable for a general hospital for inpatient hospital services pursuant to subdivision two of section twenty-eight hundred seven-s of this article;

(ii) unless (A) an election in accordance with paragraph (a) of subdivision five of this section to pay the allowance directly to the commissioner or the commissioner's designee is in effect for a third-party payor, and in addition (B) for a specified third-party payor an election to pay the assessment in accordance with section twenty-eight hundred seven-t of this article is in effect.

(c) If an election in accordance with subdivision five of this section is in effect for a third-party payor and in addition in accordance with section twenty-eight hundred seven-t of this article for a specified third-party payor, the total percentage allowance factor shall be reduced to eight and eighteen-hundredths percent, provided, however, that for services provided on and after July first, two thousand three the total percentage allowance factor shall be reduced to eight and eighty-five hundredths percent, and further provided that for services provided on and after January first, two thousand six, the total percentage allowance factor shall be reduced to eight and ninety-five hundredths percent, and further provided that for services provided on and after April first, two thousand nine, the total percentage allowance factor shall be reduced to nine and sixty-three hundredths percent.

(d) The total percentage allowance for payments by governmental agencies, as determined in accordance with paragraphs (a) and (a-1) of subdivision one of section twenty-eight hundred seven-c of this article as in effect on December thirty-first, nineteen hundred ninety-six, or health maintenance organizations for services provided to subscribers eligible for medical assistance pursuant to title eleven of article five of the social services law, or approved organizations for services provided to subscribers eligible for the family health plus program pursuant to title eleven-D of article five of the social services law, shall be five and ninety-eight-hundredths percent, provided, however, that for services provided on and after July first, two thousand three

the total percentage allowance shall be six and forty-seven hundredths percent, and further provided that for services provided on and after January first, two thousand six, the total percentage allowance shall be six and fifty-four hundredths percent, and further provided that for services provided on and after April first, two thousand nine, the total percentage allowance shall be seven and four hundredths percent.

(e) The total percentage allowance for payments for services provided by designated providers of services for which there is no third-party coverage in whole or in part shall be eight and eighteen-hundredths percent, provided, however, that for services provided on and after July first, two thousand three the total percentage allowance shall be eight and eighty-five hundredths percent, and further provided that for services provided on and after January first, two thousand six, the total percentage allowance shall be eight and ninety-five hundredths percent, and further provided that for services provided on and after April first, two thousand nine, the total percentage allowance shall be nine and sixty-three hundredths percent. This paragraph shall not apply to patient deductibles and coinsurance amounts.

(f) The total percentage allowance for patient deductibles and coinsurance amounts shall be the same percentage allowance applicable to payments by the primary third-party payor covering the patient in each case determined in accordance with paragraphs (a), (b) and (c) of this subdivision.

(g) The total percentage allowance for secondary third-party payors under coordination of benefits principles shall be the same percentage allowance applicable to payments by the primary third-party payor in the case determined in accordance with paragraphs (a), (b) and (c) of this subdivision.

3. Net patient service revenues, for purposes of this section, shall mean:

(a) for general hospitals all moneys received for or on account of inpatient hospital services, outpatient services (including referred ambulatory services), emergency services, ambulatory surgical services, and other hospital or health-related services, including capitation payments allocable to inpatient hospital services, outpatient services (including referred ambulatory services), emergency services, ambulatory

surgical services and other hospital or health-related services excluding services listed below, less refunds, for discharges occurring or for visits made or services performed on or after January first, nineteen hundred ninety-seven, or contracted service obligations for periods on or after January first, nineteen hundred ninety-seven excluding the following subject to the provisions of subdivision eleven of this section:

(i) revenue received for services provided to beneficiaries of title XVIII of the federal social security act (medicare);

(ii) revenue received by a general hospital for residential health care facility services, adult day care services, hospice services, and home care services;

(iii) revenue received from the allowances pursuant to this section and section twenty-eight hundred seven-s of this article;

(iv) revenue received from bad debt and charity care and indigent care rate adjustments and pool distributions pursuant to section twenty-eight hundred seven-c of this article, general hospital indigent care pool distributions pursuant to section twenty-eight hundred seven-k of this article, health care services pool distributions pursuant to section twenty-eight hundred seven-c of this article, health care initiatives pool distributions pursuant to section twenty-eight hundred seven-l of this article, professional education pool distributions pursuant to section twenty-eight hundred seven-m of this article, tobacco control and insurance initiatives pool distributions pursuant to section twenty-eight hundred seven-v of this article, and high need indigent care adjustment pool distributions pursuant to section twenty-eight hundred seven-w of this article, provided, however, that funds received as medical assistance payments which include state share amounts authorized pursuant to section twenty-eight hundred seven-v of this article that are not disproportionate share hospital payments shall be included within the meaning of net patient service revenue for the purposes of this section;

(v) revenue received from physician practice or faculty practice plan discrete billings for physician services;

(vi) revenue received by a general hospital from a public hospital pursuant to an affiliation agreement contract for the delivery of health care services to such public hospital;

(vii) revenue received from governmental deficit financing;

(viii) subject to the provisions of paragraph (d) of this subdivision, revenue received for or on account of referred ambulatory clinical laboratory visits made or services performed on and after October first, two thousand.

(b) for diagnostic and treatment centers providing services designated in subparagraph (ii) of paragraph (a) of subdivision one-a of this section all moneys received, including capitation payments allocable to diagnostic and treatment center services otherwise covered by the assessment, less refunds, for or on account of visits made or services performed on or after January first, nineteen hundred ninety-seven or contracted service obligations for periods on or after January first, nineteen hundred ninety-seven:

(i) for the following services:

(A) for diagnostic and treatment centers providing a comprehensive range of primary health care services, for all services;

(B) for diagnostic and treatment centers providing ambulatory surgical services, for all ambulatory surgical services;

(ii) excluding the following subject to the provisions of subdivision eleven of this section:

(A) revenue received for services provided to beneficiaries of title XVIII of the federal social security act (medicare);

(B) revenue received from the allowances pursuant to this section;

(C) revenue received from bad debt and charity care rate adjustments pursuant to paragraph (f) of subdivision two of section twenty-eight hundred seven of this article, health care services pool distributions pursuant to section twenty-eight hundred seven-c of this article, health care initiatives pool distributions pursuant to section twenty-eight hundred seven-l of this article, professional education pool distributions pursuant to section twenty-eight hundred seven-m of this article, tobacco control and insurance initiatives pool distributions pursuant to section twenty-eight hundred seven-v of this article, and high need indigent care adjustment pool distributions pursuant to section twenty-eight hundred seven-w of this article;

(D) revenue received from physician practice or faculty practice plan discrete billings for physician services;

(E) for a diagnostic and treatment center operated by a health

maintenance organization operating in accordance with the provisions of article forty-four of this chapter or article forty-three of the insurance law, revenue received for or on account of services provided to subscribers of such health maintenance organization;

(F) revenue received from governmental deficit financing; and

(G) subject to the provisions of paragraph (d) of this subdivision, revenue received for or on account of referred clinical laboratory visits made or services performed on and after October first, two thousand.

(c) for free-standing clinical laboratories, all moneys received, including capitation payments, less refunds, for or on account of visits made or services performed on or after January first, nineteen hundred ninety-seven and prior to October first, two thousand, subject to the provisions of paragraph (d) of this subdivision, or contracted service obligations for periods on or after January first, nineteen hundred ninety-seven and prior to October first, two thousand, subject to the provisions of paragraph (d) of this subdivision, for clinical laboratory services, excluding, subject to the provisions of subdivision eleven of this section:

(i) revenue received for services provided to beneficiaries of title XVIII of the federal social security act (medicare);

(ii) revenue received from the allowances pursuant to this section;

(iii) for a clinical laboratory operated by a health maintenance organization operating in accordance with the provisions of article forty-four of this chapter or article forty-three of the insurance law, revenue received for or on account of services provided to subscribers of such health maintenance organization; and

(iv) revenue received from governmental deficit financing.

(d) Provided, however, that if either the provisions of clause (G) of subparagraph (ii) of paragraph (b) of this subdivision or subparagraph (viii) of paragraph (a) of this subdivision which exclude certain revenues from the definition of net patient service revenues for the purpose of imposing surcharges pursuant to this section, result in a determination of an impermissible provider tax by the secretary of the U.S. department of health and human services under the provisions of section 1903(w) of the federal social security act, then clause (G) of subparagraph (ii) of paragraph (b) of this subdivision, subparagraph

(viii) of paragraph (a) of this subdivision, and sections forty-eight and forty-nine of chapter one of the laws of nineteen hundred ninety-nine are rendered null and void as of October first, two thousand. The commissioner will collect any retroactive amounts due as a result of surcharges imposed on such services on and after October first, two thousand, without interest or penalty.

4. (a) For periods prior to January first, two thousand five, the commissioner is authorized to contract with the article forty-three insurance law plans, or such other contractors as the commissioner shall designate, to receive and distribute funds from the allowances established pursuant to this section, and funds from the assessments established pursuant to subdivision eighteen of section twenty-eight hundred seven-c of this article. In the event contracts with the article forty-three insurance law plans or other commissioner's designees are effectuated, the commissioner shall conduct annual audits of the receipt and distribution of the funds. The reasonable costs and expenses of an administrator as approved by the commissioner, not to exceed for personnel services on an annual basis two million two hundred thousand dollars for collection and distribution of allowances and assessments established pursuant to this section and subdivision eighteen of section twenty-eight hundred seven-c of this article, shall be paid from the allowance and assessment funds.

(b) Notwithstanding any inconsistent provision of section one hundred twelve or one hundred sixty-three of the state finance law or any other law, at the discretion of the commissioner without a competitive bid or request for proposal process, contracts in effect for administration of bad debt and charity care pools for the period January first, nineteen hundred ninety-six through December thirty-first, nineteen hundred ninety-six pursuant to section twenty-eight hundred seven-c of this article may be extended to provide for administration pursuant to this section and distributions of allowance and assessment funds pursuant to this article and may be amended as may be necessary.

(c) The commissioner shall contract with an independent certified public accountant to conduct an annual independent audit, in conformance with generally accepted auditing standards, of the receipts, disbursements, revenues, expenditures and cash flows of funds, for each

calendar year beginning with nineteen hundred eighty-three, through the most recent calendar year. As used in this section, "funds" shall mean:

(i) Funds accumulated and pooled pursuant to this section, paragraph (a) of subdivision eighteen of section twenty-eight hundred seven-c of this article, and sections twenty-eight hundred seven-s and twenty-eight hundred seven-t of this article; and

(ii) Funds accumulated and pooled pursuant to chapters five hundred thirty-six, five hundred thirty-seven and five hundred thirty-eight of the laws of nineteen hundred eighty-two, chapters eight hundred seven and nine hundred six of the laws of nineteen hundred eighty-five, chapters two and six hundred five of the laws of nineteen hundred eighty-eight, chapters nine hundred twenty-two and nine hundred twenty-three of the laws of nineteen hundred ninety, chapter seven hundred thirty-one of the laws of nineteen hundred ninety-three and chapter eighty-one of the laws of nineteen hundred ninety-five.

Such annual independent audit shall be submitted to the director of the budget, the temporary president of the senate and the speaker of the assembly no later than April fifteenth of each year.

5. (a) Any third-party payor for services provided by a designated provider of services may make an election to make payments on an aggregated basis of funds due from the allowance determined pursuant to subdivision two of this section directly to the commissioner or the commissioner's designee on behalf of designated providers of services.

(i) The election pursuant to this paragraph to be effective must be in writing, filed with the commissioner or the commissioner's designee on such forms and in such manner as the commissioner shall require. An election must apply to all classes of designated providers of service and to all providers within each class. An election by a payor shall take effect for nineteen hundred ninety-seven, on the next following January first, April first, July first, or October first, and for each calendar year thereafter on the next following January first, not less than thirty days after the election is filed. Beginning December first, nineteen hundred ninety-seven, an election pursuant to this paragraph must be made no later than December first of the year prior to the assessment year. However, any payor licensed pursuant to the insurance

law or certified pursuant to article forty-four of this chapter between December first of the year prior to the assessment year and December thirty-first of the assessment year may make an election subsequent to such licensure, and during said time period, to take effect on the next following January first, April first, July first or October first not less than thirty days after such election is filed. Payors other than those licensed pursuant to the insurance law or certified pursuant to this chapter which have not provided third-party coverage prior to December first of the year prior to the assessment year may make an election at any time from December first of the year prior to said assessment year to December thirty-first of the assessment year, to take effect on the next following January first, April first, July first or October first not less than thirty days after the election is filed. Beginning June first, two thousand three an election by any payor or organization shall begin on the first day of the month following the date it was received by the commissioner.

(ii) An election shall remain in effect unless revoked in writing by a specified third-party payor, which revocation shall be effective on the first day of the next month, provided that such payor has provided notice of its intention to so revoke at least twenty days prior to the beginning of such month.

(iii) A payor filing an election pursuant to this paragraph must agree:

(A) to provide reports in accordance with the provisions of paragraph (b) of subdivision seven of this section;

(B) to provide such certification of data and access to allowance expenditure data for audit verification purposes as the commissioner shall require for purposes of this section; and

(C) to the jurisdiction of the state to maintain an action in the courts of the state of New York to enforce any provision of this section related to payment of the allowances.

(D) for periods on and after January first, two thousand nine, to provide the commissioner or the commissioner's designee the payor's federal tax identification number and agree to the use of such identification number in connection with identifying the payor's election status to designated providers of services, including the posting of such identification numbers on secure websites maintained by

the commissioner or the commissioner's designee in furtherance of the purposes of this section. The commissioner shall include for periods on and after January first, two thousand nine on such secure websites, the date such payor was first posted.

(iv) If a payor is acting in an administrative services capacity on behalf of an organization, such as a self-insured fund, the consent of the organization to the election and the conditions pursuant to subparagraph (iii) of this paragraph must be submitted with the election. Such consent may be set forth in writing in the agreement between the payor and the organization and a photocopy of that portion of the agreement submitted by the payor, together with a photocopy of the signatures of the organization and the payor on the agreement, shall be accepted in lieu of a separate election form from the organization. On and after January first, two thousand four, the commissioner shall have discretion to accept payments made on a timely basis if the reports and information reports are routinely submitted, notwithstanding the fact that the full and complete election form by or on behalf of an organization was not filed on a timely basis. In the event the commissioner accepts payments pursuant to this section where an election form is missing or incomplete but the payments and information reports were routinely submitted as if the election forms had been filed, the election form from the payor and organization shall be deemed to have been filed (and the organization and the payor shall be as legally bound by the terms of the election form as if it had signed and filed the election) and neither the payor nor the organization shall subsequently refuse to abide by the terms of the election form for any year in which payments were submitted and accepted pursuant to this section.

(v) If a payor, including a payor operating in accordance with the insurance law or article forty-four of this chapter, making an election pursuant to this paragraph is acting in an administrative services capacity on behalf of an organization or organizations, such payor must specify whether such election applies to payments on behalf of all such organizations and establish, in accordance with guidelines established by the superintendent of financial services, a system through which designated providers of services and the commissioner can identify the status of a patient as a patient for whom the election does not apply.

(b) The commissioner may deny a payor the opportunity to remit

directly to the commissioner or the commissioner's designee based on repeated late payments, failure to remit correct amounts, or failure to provide adequate verification of the accuracy of payments. The percentage allowance for any such payor shall be the percentage determined in accordance with paragraph (b) of subdivision two of this section.

(c) The commissioner or the commissioner's designee shall make available to all designated providers of services a list of the payors which have elected pursuant to this paragraph to remit payments directly.

5-a. (a) Payments by or on behalf of designated providers of services to the commissioner or the commissioner's designee of funds due from the allowances pursuant to subdivision two of this section or pursuant to payment obligations incurred pursuant to section twenty-eight hundred seven-s of this article or section twenty-eight hundred seven-t of this article shall be made on a monthly basis, provided, however, that for reporting periods relating to payments for services provided or dates of inpatient discharge or contracted service obligations occurring on or after January first, two thousand one, the commissioner may permit certain third-party payors which have at least one full year of pool payment experience to submit such payments on an annual basis, based on an annual demonstration by a payor through its prior year's pool payment experience that total pool obligations under this section and sections twenty-eight hundred seven-s and twenty-eight hundred seven-t of this article are not expected to exceed ten thousand dollars for annual periods prior to January first, two thousand four, and twenty-five thousand dollars for annual periods on and after January first, two thousand four. Payments due by designated providers of services on account of payors in accordance with paragraph (b) of subdivision two of this section shall be two percentage points less than the percentage specified in such paragraph. The designated provider of services shall retain for compensation for such provider's administrative responsibilities the amount that represents the difference. Payments due by designated providers of services on account of all other payors shall be calculated on the basis of the percentage allowance applicable to such payor pursuant to paragraphs (d), (e), (f) and (g) of subdivision

two of this section. Payments shall be due on or before the thirtieth day following the end of a calendar month to which an allowance applies.

(b) Notwithstanding any inconsistent provision of this section, as shall be necessary to obtain federal financial participation in medical assistance expenditures in accordance with title XIX of the federal social security act, the allowances included in rates of payment pursuant to this section on behalf of patients eligible for medical assistance pursuant to title eleven of article five of the social services law shall be withheld from medical assistance payments to designated providers of services and paid to pools on behalf of the designated provider of services where a designated provider of services elects such withholding in such time and manner as specified by the commissioner, and in the event a designated provider of services does not elect such withholding, payments by such designated provider of services to a pool based on an allowance received for medical assistance patients shall be due within five days of receipt of such funds. Funds withheld by a payor and paid to a pool on behalf of a designated provider of services shall be considered received by such designated provider of services and paid to the pool by such designated provider of services for all purposes.

6. (a) If a payment made by a designated provider of services for a month to which an allowance applies is less than seventy percent of the amount due or which the commissioner estimates is due, based on available financial and statistical data, the commissioner may collect the deficiency pursuant to paragraph (c) of this subdivision.

(b) If a payment made by a designated provider of services for a month to which an allowance applies is less than ninety percent of the amount due or which the commissioner estimates is due, based on available financial and statistical data, and at least two previous payments within the preceding six months were less than ninety percent of the amount due, based on similar evidence, the commissioner may collect the deficiency pursuant to paragraph (c) of this subdivision.

(c) Upon receipt of notification from the commissioner of a designated provider of services' deficiency under this section, the comptroller or a fiscal intermediary designated by the director of the budget, or the commissioner of the office of temporary and disability assistance, or a

corporation organized and operating in accordance with article forty-three of the insurance law, or an organization operating in accordance with article forty-four of this chapter shall withhold from the amount of any payment to be made by the state or by such article forty-three corporation or article forty-four organization to the designated provider of services the amount of the deficiency determined under paragraph (a), (b) or (e) of this subdivision or paragraph (d) of subdivision eight-a of this section. Upon withholding such amount, the comptroller or a designated fiscal intermediary, or the commissioner of the office of temporary and disability assistance, or corporation organized and operating in accordance with article forty-three of the insurance law or organization operating in accordance with article forty-four of this chapter shall pay the commissioner, or the commissioner's designee, such amount withheld on behalf of the designated provider of services. Such amount shall represent, in whole or in part, the amounts due from the designated provider of services.

(d) The commissioner shall provide a designated provider of services with notice of any estimate of an amount due for an allowance pursuant to paragraph (a) or (b) of this subdivision or paragraph (d) of subdivision eight-a of this section at least three days prior to collection of such amount by the commissioner. Such notice shall contain the financial basis for the commissioner's estimate.

(e) In the event a designated provider of services objects to an estimate by the commissioner pursuant to paragraph (a) or (b) of this subdivision or paragraph (d) of subdivision eight-a of this section of the amount due for an allowance, the designated provider of services, within sixty days of notice of an amount due, may request a public hearing. If a hearing is requested, the commissioner shall provide the designated provider of services an opportunity to be heard and to present evidence bearing on the amount due for an allowance within thirty days after collection of an amount due or receipt of a request for a hearing, whichever is later. An administrative hearing is not a prerequisite to seeking judicial relief.

(f) The commissioner may direct that a hearing be held without any request by a designated provider of services.

(g) In the event a hearing pursuant to paragraph (e) of this subdivision is not requested and the delinquent amounts in question have

been referred for recoupment or offset pursuant to paragraph (c) of this subdivision, or have been referred to the office of the attorney general for collection, the amount of such delinquencies shall be deemed final and not subject to further revision or reconciliation by the commissioner based on any additional reports or other information submitted by the designated provider of services, provided, however, that such delinquencies shall not be referred for such recoupment or for such collection based on estimated amounts unless the hospital has received written notification of such delinquencies and has been given no less than thirty days in which to submit delinquent reports.

7. (a) (i) Every designated provider of services shall submit reports of net patient service revenues received for or on account of patient services for each month which shall be in such form as may be prescribed by the commissioner to accurately disclose information required to implement this section. For periods on and after January first, two thousand five, reports by designated providers of services shall be submitted electronically in a form as may be required by the commissioner; provided, however, any designated provider of services is not prohibited from submitting reports electronically on a voluntary basis prior to such date, and provided further, however, that all such electronic submissions submitted on and after July first, two thousand twelve shall be verified with an electronic signature as prescribed by the commissioner.

(ii) For periods on and after January first, two thousand nine, every designated provider of services shall provide the commissioner or commissioner's designee with its federal tax identification number and such identification number shall be used in connection with identifying such providers for purposes pursuant to this section, including the posting of such identification numbers on secure websites maintained by the commissioner or the commissioner's designee in furtherance of the purposes of this section. The commissioner shall include for periods on and after January first, two thousand nine on such secure websites, the date such designated provider of services was first posted. In addition, the commissioner shall, as a part of a final resolution of an audit conducted pursuant to subdivision eight-a of this section, waive payment of interest and penalties otherwise applicable pursuant to subdivision

eight of this section, when the audit findings conclusively indicate that the liability for such interest and penalties are the result of a delay in the listing of a new designated provider of services on the secure website maintained by the department.

(b) (i) Every third-party payor making an election in accordance with paragraph (a) of subdivision five of this section shall submit reports of patient service expenditures for services provided by designated providers of services for each month which shall be in such form as may be prescribed by the commissioner to accurately disclose information required to implement this section, provided, however, that for reporting periods relating to payments for services provided or dates of inpatient discharge or contracted service obligations occurring on or after January first, two thousand one, the commissioner may permit certain third-party payors which have at least one full year of pool payment experience to submit such reports on an annual basis, based on an annual demonstration by a payor through its prior year's pool payment experience that total pool obligations under this section and sections twenty-eight hundred seven-s and twenty-eight hundred seven-t of this article are not expected to exceed ten thousand dollars for annual periods prior to January first, two thousand four, and twenty-five thousand dollars for annual periods on and after January first, two thousand four.

(ii) For periods on and after July first, two thousand four, reports submitted on a monthly basis by third-party payors in accordance with subparagraph (i) of this paragraph and reports submitted on a monthly or annual basis by payors acting in an administrative services capacity on behalf of electing third-party payors in accordance with subparagraph (i) of this paragraph shall be made electronically in a form as may be required by the commissioner; provided, however, any third-party payor, except payors acting in an administrative services capacity on behalf of electing third-party payors, which, on or after January first, two thousand four, elects to make payments directly to the commissioner or the commissioner's designee pursuant to subdivision five of this section, shall be subject to this subparagraph only after one full year of pool payment experience which results in reports being submitted on a monthly basis, and provided further, however, that all such electronic submissions submitted on and after July first, two thousand twelve shall

be verified with an electronic signature as prescribed by the commissioner. This subparagraph shall not be interpreted to prohibit any third-party payor from submitting reports electronically on a voluntary basis.

(c) If a designated provider of services or a third-party payor fails to file reports required pursuant to paragraph (a) or (b) of this subdivision and which are due on and after January first, two thousand, within sixty days of the date such reports are due and after notification of such reporting delinquency, the commissioner may assess a civil penalty of up to ten thousand dollars for each such failure, provided, however, that such civil penalty shall not be imposed if the payor or provider demonstrates good cause for the failure to timely file such reports. Such penalties shall be subject to the provisions of section twelve-a of this chapter.

8. (a) If a payment made pursuant to this section or to section twenty-eight hundred seven-s or twenty-eight hundred seven-t of this article for a month to which an allowance applies is less than ninety percent of the amount due or which the commissioner estimates, based on available financial and statistical data, is due for such month, interest shall be due and payable to the commissioner by a designated provider of services, or by a third-party payor, other than a state governmental agency, that has elected to pay an allowance directly, on the difference between the amount paid and the amount due or estimated to be due from the day of the month the payment was due until the date of payment. The rate of interest shall be twelve percent per annum or, if greater, at the rate of interest set by the commissioner of taxation and finance with respect to underpayments of tax pursuant to subsection (e) of section one thousand ninety-six of the tax law minus four percentage points. Interest under this paragraph shall not be paid if the amount thereof is less than one dollar. Interest due from a designated provider of services, if not paid by the due date of the following month's payment, may be collected by the commissioner pursuant to paragraph (c) of subdivision six of this section in the same manner as an allowance pursuant to subdivision two of this section.

(b) If a payment made for a month to which an allowance applies is less than seventy percent of the amount due or which the commissioner

estimates, based on available financial and statistical data, is due for such month, a penalty shall be due and payable to the commissioner by a designated provider of services, or by a third-party payor, other than a state governmental agency, that has elected to pay an allowance directly, of five percent of the difference between the amount paid and the amount due or estimated to be due for such month when the failure to pay is for a duration of not more than one month after the due date of the payment with an additional five percent for each additional month or fraction thereof during which such failure continues, not exceeding twenty-five percent in the aggregate. A penalty due from a designated provider of services may be collected by the commissioner pursuant to paragraph (c) of subdivision six of this section in the same manner as an allowance pursuant to subdivision two of this section.

(c) Overpayment by or on behalf of a designated provider of services of a payment shall be applied to any other payment due from the designated provider of services pursuant to this section, or, if no payment is due, at the election of the designated provider of services shall be applied to future payments or refunded to the designated provider of services. Interest shall be paid on overpayments from the date of overpayment to the date of crediting or refund at the rate determined in accordance with paragraph (a) of this subdivision only if the overpayment was made at the direction of the commissioner. Interest under this paragraph shall not be paid if the amount thereof is less than one dollar.

8-a. (a) Payments and reports submitted or required to be submitted to the commissioner or to the commissioner's designee pursuant to this section and section twenty-eight hundred seven-s of this article by designated providers of services and by third-party payors which have elected to make payments directly to the commissioner or to the commissioner's designee in accordance with subdivision five-a of this section, shall be subject to audit by the commissioner for a period of six years following the close of the calendar year in which such payments and reports are due, after which such payments shall be deemed final and not subject to further adjustment or reconciliation, including through offset adjustments or reconciliations made by designated providers of services or by third-party payors with regard to subsequent

payments, provided, however, that nothing herein shall be construed as precluding the commissioner from pursuing collection of any such payments which are identified as delinquent within such six year period, or which are identified as delinquent as a result of an audit commenced within such six year period, or from conducting an audit of any adjustment or reconciliation made by a designated provider of services or by a third party payor which has elected to make such payments directly to the commissioner or the commissioner's designee, or from conducting an audit of payments made prior to such six year period which are found to be commingled with payments which are otherwise subject to timely audit pursuant to this section.

(b) Designated providers of services or third-party payors which, in the course of an audit pursuant to this section or section twenty-eight hundred seven-s of this article, fail to produce data or documentation requested in furtherance of such an audit, within thirty days of such request, may be assessed a civil penalty of up to ten thousand dollars for each such failure, provided, however, that such civil penalty shall not be imposed if the audited entity demonstrates good cause for such failure. The imposition of civil penalties pursuant to this section shall be subject to the provisions of section twelve-a of this chapter.

(c) Records required to be retained for audit verification purposes by designated providers of services and third-party payors in accordance with this section and section twenty-eight hundred seven-s of this article shall include, but not be limited to, on a monthly basis, the source records generated by supporting information systems, detailed claims information, detailed patient revenue information, capitation arrangements, financial accounting records, relevant correspondence and such other records as may be required to prove compliance with, and to support the reports submitted in accordance with, this section and section twenty-eight hundred seven-s of this article.

(d) If a designated provider of services or a third party payor fails to produce data or documentation requested in furtherance of an audit pursuant to this section or pursuant to section twenty-eight hundred seven-s of this article, for a month to which an allowance applies, the commissioner may estimate, based on available financial and statistical data as determined by the commissioner, the amount due for such month. If the impact of the patient services revenue exemptions specified

pursuant to this section, or pursuant to section twenty-eight hundred seven-s of this article, cannot be determined from such available financial and statistical data, the amount due may be calculated on the basis of the aggregate total of patient services revenue derived from such data for the year subject to audit. The commissioner shall take all necessary steps to collect amounts due as determined pursuant to this paragraph, including directing the state comptroller to offset such amounts due from any payments made by the state pursuant to this article to a designated provider of services or a third party payor. Interest and penalties shall be applied to such amounts due in accordance with the provisions of subdivision eight of this section.

(e) The commissioner may, as part of a final resolution of an audit conducted pursuant to this subdivision, waive payment of interest and penalties otherwise applicable pursuant to subdivision eight of this section when amounts due as a result of such audit, other than such waived penalties and interest, are paid in full to the commissioner or the commissioner's designee within sixty days of the issuance of a final audit report that is mutually agreed to by the commissioner and auditee, provided, however, that if such final audit report is not so mutually agreed upon, then neither the commissioner nor the auditee shall have any obligations pursuant to this paragraph.

(f) The commissioner may enter into agreements with designated providers of services, and with third-party payors, in regard to which audit findings or prior settlements have been made pursuant to this section or section twenty-eight hundred seven-s of this article, extending and applying such audit findings or prior settlements, or a portion thereof, in settlement and satisfaction of potential audit liabilities for subsequent un-audited periods. The commissioner may reduce or waive payment of interest and penalties otherwise applicable to such subsequent unaudited periods when such amounts due as a result of such agreement, other than reduced or waived penalties and interest, are paid in full to the commissioner or the commissioner's designee within sixty days of execution of such agreement by all parties to the agreement. Any payments made pursuant to agreements entered into in accordance with this paragraph shall be deemed to be in full satisfaction of any liability arising under this section and section twenty-eight hundred seven-s of this article, as referenced in such

agreements and for the time periods covered by such agreements, provided, however, that the commissioner may audit future retroactive adjustments to payments made for such periods based on reports filed by providers and payors subsequent to such agreements.

9. Funds accumulated, including income from invested funds, from the allowances specified in this section, and the assessments pursuant to subdivision eighteen of section twenty-eight hundred seven-c of this article, and the assessments pursuant to paragraph (c) of subdivision nine of section twenty-eight hundred seven-d of this article, plus such funds as may be allocated in accordance with section twenty-eight hundred seven-s of this article, including interest and penalties, shall be deposited by the commissioner or the commissioner's designee as follows:

(a) funds shall be deposited and credited to a special revenue-other fund to be established by the comptroller or to the health care reform act (HCRA) resources fund established pursuant to section ninety-two-dd of the state finance law, whichever is applicable. To the extent of funds appropriated therefore, the commissioner shall make payments to general hospitals related to bad debt and charity care pursuant to section twenty-eight hundred seven-k of this article. Funds shall be deposited in the following amounts:

(i) fifty-seven and thirty-three-hundredths percent of the funds accumulated for the period January first, nineteen hundred ninety-seven through December thirty-first, nineteen hundred ninety-seven,

(ii) fifty-seven and one-hundredths percent of the funds accumulated for the period January first, nineteen hundred ninety-eight through December thirty-first, nineteen hundred ninety-eight,

(iii) fifty-five and thirty-two-hundredths percent of the funds accumulated for the period January first, nineteen hundred ninety-nine through December thirty-first, nineteen hundred ninety-nine, and

(iv) seven hundred sixty-five million dollars annually of the funds accumulated for the periods January first, two thousand through December thirty-first, two thousand twenty-eight, and

(v) one hundred ninety-one million two hundred fifty thousand dollars of the funds accumulated for the period January first, two thousand twenty-nine through March thirty-first, two thousand twenty-nine.

(b) funds shall be accumulated in a health care initiatives pool established by the commissioner, for distribution in accordance with section twenty-eight hundred seven-l of this article, in the following amounts:

(i) forty-two and sixty-seven-hundredths percent of the funds accumulated for the period January first, nineteen hundred ninety-seven through December thirty-first, nineteen hundred ninety-seven,

(ii) forty-two and ninety-nine-hundredths percent of the funds accumulated for the period January first, nineteen hundred ninety-eight through December thirty-first, nineteen hundred ninety-eight,

(iii) forty-four and sixty-eight-hundredths percent of the funds accumulated for the period January first, nineteen hundred ninety-nine through December thirty-first, nineteen hundred ninety-nine, and

(iv) the remaining balance of the funds accumulated for each period on and after January first, two thousand.

10. Notwithstanding any inconsistent provision of law or regulation to the contrary, the allowances applicable to payments by state governmental agencies pursuant to subdivision two of this section shall be reflected in the determination of reimbursement rates pursuant to sections twenty-eight hundred seven and twenty-eight hundred seven-c of this article and fees for clinical laboratory services under the medical assistance program.

11. Each exclusion from the allowances effective on or after January first, nineteen hundred ninety-seven established pursuant to this section shall be contingent upon either: (a) qualification of the allowances for waiver pursuant to federal law and regulation; or (b) consistent with federal law and regulation, not requiring a waiver by the secretary of the department of health and human services related to such exclusion; in order for the allowances under this section to be qualified as a broad-based health care related tax for purposes of the revenues received by the state pursuant to the allowances not reducing the amount expended by the state as medical assistance for purposes of federal financial participation. The commissioner shall collect the allowances relying on such exclusions, pending any contrary action by the secretary of the department of health and human services. In the

event the secretary of the department of health and human services determines that the allowances do not so qualify based on any such exclusion, then the exclusion shall be deemed to have been null and void as of January first, nineteen hundred ninety-seven, and the commissioner shall collect any retroactive amount due as a result, without interest or penalty provided the designated provider of services or third-party payor that has elected to pay directly pays the retroactive amount due within ninety days of notice from the commissioner to the designated provider of services or third-party payor that has elected to pay directly that an exclusion is null and void. Interest and penalties shall be measured from the due date of ninety days following notice from the commissioner or the commissioner's designee to the designated provider of services or third-party payor that has elected to pay directly.

12. Revenue from the allowances pursuant to this section shall not be included in gross revenue received for purposes of the assessments pursuant to subdivision eighteen of section twenty-eight hundred seven-c of this article, subject to the provisions of paragraph (e) of subdivision eighteen of section twenty-eight hundred seven-c of this article, and shall not be included in gross revenue received for purposes of the assessments pursuant to section twenty-eight hundred seven-d of this article, subject to the provisions of subdivision twelve of section twenty-eight hundred seven-d of this article.

* NB Expires December 31, 2029

§ 2807-k. General hospital indigent care pool. 1. Definitions. For purposes of this section, the following words or phrases shall have the following meanings, unless the context otherwise requires:

(a) "Major public general hospital" means all state operated general hospitals, all general hospitals operated by the New York city health and hospitals corporation as established by chapter one thousand sixteen of the laws of nineteen hundred sixty-nine as amended and all other public general hospitals having annual inpatient operating costs in excess of twenty-five million dollars.

(b) "Nominal payment amount" shall mean the sum of the dollars

attributable to the application of an incrementally increasing proportion of reimbursement for percentage increases in targeted need according to a scale.

(c) "Targeted need" shall mean the relationship of uncompensated care need to reported costs expressed as a percentage. Reported costs shall mean costs allocated as prescribed by the commissioner to general hospital inpatient and ambulatory services, excluding referred ambulatory services. Targeted need shall be determined based on base year data and statistics for the calendar year two years prior to the distribution period. Base year data and statistics for the calendar year two years prior to the distribution period shall be considered final, for purposes of this section, one hundred twenty days after hospitals receive the department's initial statewide rates for the same period as the distribution period and shall include any appropriate revisions reported by hospitals during such one hundred twenty days.

(d) "Uncompensated care need" means losses from bad debts reduced to cost and the costs of charity care of a general hospital for inpatient and ambulatory services, excluding referred ambulatory services. The cost of services provided as an employment benefit or as a courtesy shall not be included.

(e) "Uninsured care" means losses from bad debts reduced to cost and the costs of charity care of a general hospital for inpatient and ambulatory services, excluding referred ambulatory services, which are not eligible for payment in whole or in part by a governmental agency, insurer or other third-party payor on behalf of a patient, including payments made directly to the general hospital and indemnity or similar payments made to the person who is a payor of hospital services. The cost of services denied reimbursement, other than emergency room services, for lack of medical necessity or lack of compliance with prior authorization requirements, or provided as an employment benefit, or as a courtesy shall not be included.

(f) "Ambulatory services" of a general hospital shall mean all services delivered on an ambulatory basis, including, for periods on and after January first, two thousand four, services provided at qualified hospital-controlled diagnostic and treatment centers except as otherwise provided in subdivision thirteen of this section.

(g) "Qualified hospital-controlled diagnostic and treatment center"

shall mean a voluntary, non-profit diagnostic and treatment center providing a comprehensive range of primary health care services that is controlling, controlled by, or under common control with a general hospital, and as of June thirtieth, two thousand three:

(i) qualified for an allocation of funds pursuant to section twenty-eight hundred seven-p of this article or pursuant to section seven of chapter four hundred thirty-three of the laws of nineteen hundred ninety-seven, as amended; or

(ii) the outpatient department of such general hospital had been designated a federally-qualified health center under section 330 of the Public Health Service Act (42 U.S.C. § 254b) and had directly received a grant under such section.

(h) "Underinsured" shall mean an individual with out of pocket medical costs accumulated in the past twelve months that amount to more than ten percent of such individual's gross annual income.

2. To the extent of funds appropriated therefor, funds shall be made available for distribution by or on behalf of the state in accordance with the following methodology, as payments under the state medical assistance program provided pursuant to title eleven of article five of the social services law, from a general hospital indigent care pool established by the commissioner.

3. Each major public general hospital shall be allocated for distribution from the pools established pursuant to this section for each year through December thirty-first, two thousand fourteen, an amount equal to the amount allocated to such major public general hospital from the regional pool established pursuant to subdivision seventeen of section twenty-eight hundred seven-c of this article for the period January first, nineteen hundred ninety-six through December thirty-first, nineteen hundred ninety-six, provided, however, that payments on and after January first, two thousand nine shall be subject to the provisions of subdivision five-a of this section.

4. (a) From funds in the pool for each year, thirty-six million dollars shall be reserved on an annual basis through December thirty-first, two thousand fourteen, for distribution as high need

adjustments in accordance with subdivision six of this section, provided, however, that payments on and after January first, two thousand nine shall be subject to the provisions of subdivision five-a of this section.

(a-1) From funds in the pool for each year, twenty-seven million dollars shall be reserved on an annual basis for the periods January first, two thousand through December thirty-first, two thousand ten, for distribution in accordance with subdivision sixteen of this section, provided, however, that payments on and after January first, two thousand nine through December thirty-first, two thousand nine shall be subject to the provisions of subdivisions five-a and five-b of this section, and shall be subject to the provisions of subdivision five-b of this section for periods on and after January first, two thousand ten.

(b) The balance of funds in a pool not allocated in accordance with subdivision three of this section or reserved for distributions pursuant to subdivisions six and sixteen of this section shall be distributed to eligible general hospitals, excluding major public general hospitals, on the basis of each general hospital's targeted need share, adjusted for transition factors in accordance with subdivision seven of this section.

(c) To be eligible for distributions from the pool, a general hospital's targeted need must exceed one-half of one percent.

(d) For the periods January first, nineteen hundred ninety-seven through December thirty-first, nineteen hundred ninety-seven, January first, nineteen hundred ninety-eight through December thirty-first, nineteen hundred ninety-eight, and January first, nineteen hundred ninety-nine through December thirty-first, nineteen hundred ninety-nine and on and after January first, two thousand, each eligible general hospital's targeted need share shall mean the relationship of each general hospital's nominal payment amount of uncompensated care need determined in accordance with the scale specified in subdivision five of this section to the nominal payment amounts of uncompensated care need for all eligible general hospitals applied to funds available in the pool.

5. The scale utilized for development of each eligible general hospital's nominal payment amount shall be as follows:

Percentage of Reimbursement

Targeted Need Percentage		Attributable to that Portion of Targeted Need
0	-.5%	60%
.5+	-2%	65%
2+	-3%	70%
3+	-4%	75%
4+	-5%	80%
5+	-6%	85%
6+	-7%	90%
7+	-8%	95%
8+		100%

5-a. Notwithstanding any inconsistent provision of this section, section twenty-eight hundred seven-w of this article or any other contrary provision of law, subject to the availability of federal financial participation and within amounts appropriated, for periods on and after January first, two thousand nine, ten percent of the aggregate distributions to each general hospital made otherwise pursuant to this section and section twenty-eight hundred seven-w of this article shall be reserved and set aside and distributed in accordance with the following:

(a) Thirteen million nine hundred thirty thousand dollars of such reserved funds shall be distributed to major public hospitals and shall be allocated proportionally, based on each facility's relative uncompensated care need as determined in accordance with the provisions of paragraph (c) of this subdivision; and

(b) Seventy million seven hundred seventy thousand dollars of such reserved funds shall be distributed to general hospitals other than major public general hospitals and shall be allocated proportionally, based on each facility's relative uncompensated care need as determined in accordance with the provisions of paragraph (c) of this subdivision; and

(c) For the purposes of distributions in accordance with paragraphs (a) and (b) of this subdivision, each facility's relative uncompensated care need amount shall be determined in accordance with the following:

(i) inpatient units of services for all uninsured patients from the calendar year two years prior to the distribution year, but excluding

referred ambulatory units of services, shall be multiplied by the applicable Medicaid inpatient rates in effect for such prior year, but not including prospective rate adjustments and rate add-ons, provided, however, that for distributions on and after January first, two thousand ten, the uncompensated amount for inpatient services shall utilize the inpatient rates in effect as of July first of the prior year;

(ii) outpatient units of service for all uninsured patients from the calendar year two years prior to the distribution year, including emergency department services and ambulatory surgery services, but excluding referred ambulatory services units of service, shall be multiplied by Medicaid outpatient rates that reflect the exclusive utilization of the ambulatory patient groups (APG) rate-setting methodology as set forth in regulations promulgated pursuant to subdivision two-a of section twenty-eight hundred seven of this article, as in effect for the distribution year, provided further, however, that for those services for which APG rates are not available the applicable Medicaid outpatient rate shall be the rate in effect for the calendar year two years prior to the distribution year;

(iii) the uncompensated care need for each facility for periods on and after January first, two thousand ten shall be reduced by the sum of all payment amounts collected from such patients; and

(iv) the total uncompensated care need for each facility subject to this subdivision shall then be adjusted by application of the nominal need scale set forth in subdivision five of this section.

(d)(i) For annual periods commencing on and after January first, two thousand nine, no general hospital may receive disproportionate share payment distributions made in accordance with this section, section twenty-eight hundred seven-w of this article or made in accordance with other provisions of law, that exceed, in aggregate, the costs incurred by such general hospital during such period in furnishing inpatient and outpatient hospital services to Medicaid eligible patients or to patients who have no health insurance or other source of third party coverage, net of all monies received from non-disproportionate share related Medicaid payments and from payments made by such uninsured patients. For purposes of this paragraph, non-Medicaid payments made to a general hospital by the state or by a unit of local government within the state for services provided to indigent patients shall not be

considered to be a source of third party payment.

(ii) Reductions pursuant to this paragraph shall be made in the following sequence:

(A) payments in accordance with subdivision fourteen-f of section twenty-eight hundred seven-c of this article;

(B) payments made to eligible hospitals pursuant to this section and section twenty-eight hundred seven-w of this article.

(iii) Notwithstanding any contrary provision of this section or section twenty-eight hundred seven-w of this article, in the event a payment made pursuant to this section or section twenty-seven hundred seven-w of this article exceeds a hospital's applicable facility specific disproportionate share limit, then fifty percent of the amount in excess of such limit shall be paid to such facility as a grant from state funds available for distribution in accordance with this section and section twenty-eight hundred seven-w of this article, provided, however, that if payments made to an eligible rural hospital pursuant to this subdivision or section twenty-eight hundred seven-w of this article, result in payments in excess of such disproportionate share limits, then up to one hundred forty thousand dollars of such payments shall be made at one hundred percent of the amount in excess of such limits for each eligible rural hospital.

(e) By no later than December first, two thousand ten, the commissioner shall issue a report evaluating the impact of the distributions made pursuant to this subdivision with regard to units of service to uninsured patients provided by each facility, and with regard to the extent of services provided by each facility to patients eligible for financial aid in accordance with each facility's financial aid policies and procedures as mandated by subdivision nine-a of this section. Such report shall also include the use of data on services to the uninsured to model the impact of the distribution methodology set forth in this subdivision against all funding authorized pursuant to this section and section twenty-eight hundred seven-w of this article.

(f) The commissioner shall conduct outreach and educational activities to inform hospitals on matters relating to data collection and reporting requirements related to services provided to the uninsured and patients eligible for financial aid, including definitions to be utilized for identifying uninsured units of service and proper identification of

out-of-pocket collections from uninsured patients.

5-b. Notwithstanding any inconsistent provision of this section, section twenty-eight hundred seven-w of this article or any other contrary provision of law and subject to the availability of federal financial participation, for periods on and after May first, two thousand nine, funds as hereinafter described shall be reserved and set aside and distributed in accordance with the following:

(a) For the period May first, two thousand nine through December thirty-first, two thousand nine payments shall be made as follows:

(i) Ninety percent of funds available for the two thousand nine calendar year pursuant to paragraph (a-1) of subdivision four of this section shall be reserved and set aside and distributed as Medicaid disproportionate share (DSH) payments to the same hospitals and in the same proportional amounts as received pursuant to such paragraph (a-1) in two thousand eight;

(ii) Three hundred seven million dollars shall be distributed as Medicaid DSH payments to facilities designated by the department as teaching hospitals as of December thirty-first, two thousand eight in accordance with a schedule of payments to be set forth in regulations promulgated by the commissioner to compensate such facilities for Medicaid and self-pay losses reported in each facility's two thousand seven annual cost report;

(iii) Sixteen million dollars shall be proportionally distributed as Medicaid DSH payments to non-teaching hospitals based upon their proportion of uninsured losses as defined in paragraph (c) of subdivision five-a of this section to such losses of all non-teaching hospitals on a statewide basis;

(iv) Twenty-five million dollars shall be distributed as Medicaid DSH payments to non-major public hospitals having Medicaid discharges of forty percent or greater as established by the commissioner from data reported in each hospital's two thousand seven annual cost report, in accordance with a schedule to be set forth in regulations promulgated by the commissioner, to compensate such facilities for projected Medicaid net losses, as determined by the commissioner, stemming from modifications to Medicaid payments made pursuant to a chapter of the laws of two thousand nine.

(b) For annual periods beginning January first, two thousand ten payments shall be made as follows:

(i) Two hundred sixty-nine million five hundred thousand dollars shall be distributed as Medicaid DSH payments to non-major public teaching hospitals, and such distributions shall be made on a regional basis to cover, within amounts available for each region, each eligible facility's proportional regional share of unmet need for two thousand seven, provided, however, that such regions and regional allocations and the definition of unmet need shall be set forth in regulations promulgated by the commissioner;

(ii) Twenty-five million dollars shall be distributed as Medicaid DSH payments to hospitals eligible for payments made pursuant to subparagraph (iv) of paragraph (a) of this subdivision based upon each facility's proportion of uninsured losses, as defined in paragraph (c) of subdivision five-a of this section, to such losses for all hospitals eligible for such payments;

(iii) Sixteen million dollars shall be distributed in accordance with the provisions of subparagraph (iii) of paragraph (a) of this subdivision;

(iv) Twenty-five million dollars shall be distributed in accordance with the provisions of subparagraph (iv) of paragraph (a) of this subdivision;

5-c. (a) Notwithstanding any contrary provision of law and subject to the availability of federal financial participation, for the period July first, two thousand ten through December thirty-first, two thousand ten, distributions pursuant to this section and section twenty-eight hundred seven-w of this article, shall reflect an aggregate reduction of sixty-nine million four hundred thousand dollars, based on the proportion of each hospital's indigent care allocations to the total allocations of all hospitals' indigent care allocations prior to application of this reduction, provided, however, that such reductions shall not be applied to distributions to major public hospitals, including major public hospitals operated by public benefit corporations, and also shall not be applied to distributions made pursuant to subparagraph (ii), (iii) or (iv) of paragraph (b) of subdivision five-b of this section.

(b) Notwithstanding any contrary provision of law and subject to the availability of federal financial participation, for the period January first, two thousand eleven through December thirty-first, two thousand eleven and each calendar year thereafter, distributions pursuant to this section and section twenty-eight hundred seven-w of this article shall reflect an aggregate reduction of seventy-three million two hundred thousand dollars, based on the proportion of each hospital's indigent care allocation to the total allocations of all hospitals' indigent care allocations prior to application of this reduction, provided, however, that such reductions shall not be applied to distributions to major public hospitals, including major public hospitals operated by public benefit corporations, and shall also not be applied to distributions made pursuant to subparagraph (ii), (iii) or (iv) of paragraph (b) of subdivision five-b of this section.

5-d. (a) Notwithstanding any inconsistent provision of this section, section twenty-eight hundred seven-w of this article or any other contrary provision of law, and subject to the availability of federal financial participation, for periods on and after January first, two thousand twenty, through December thirty-first, two thousand twenty-nine, all funds available for distribution pursuant to this section, except for funds distributed pursuant to paragraph (b) of subdivision five-b of this section, and all funds available for distribution pursuant to section twenty-eight hundred seven-w of this article, shall be reserved and set aside and distributed in accordance with the provisions of this subdivision.

(b) The commissioner shall promulgate regulations, and may promulgate emergency regulations, establishing methodologies for the distribution of funds as described in paragraph (a) of this subdivision and such regulations shall include, but not be limited to, the following:

(i) Such regulations shall establish methodologies for determining each facility's relative uncompensated care need amount based on uninsured inpatient and outpatient units of service from the cost reporting year two years prior to the distribution year, multiplied by the applicable medicaid rates in effect January first of the distribution year, as summed and adjusted by a statewide cost adjustment factor and reduced by the sum of all payment amounts collected from such

uninsured patients, and as further adjusted by application of a nominal need computation that shall take into account each facility's medicaid inpatient share.

(ii) Annual distributions pursuant to such regulations for the two thousand twenty through two thousand twenty-nine calendar years shall be in accord with the following:

(A) (1) one hundred thirty-nine million four hundred thousand dollars shall be distributed as Medicaid Disproportionate Share Hospital ("DSH") payments to major public general hospitals;

(2) for the calendar years two thousand twenty-five and thereafter, the total distributions to major public general hospitals shall be subject to an aggregate reduction of one hundred thirteen million four hundred thousand dollars annually, provided that general hospitals operated by the New York city health and hospitals corporation as established by chapter one thousand sixteen of the laws of nineteen hundred sixty-nine, as amended, shall not receive distributions pursuant to this subdivision; and

(B) nine hundred sixty-nine million nine hundred thousand dollars as Medicaid DSH payments to eligible general hospitals, other than major public general hospitals.

For the calendar years two thousand twenty through two thousand twenty-two, the total distributions to eligible general hospitals, other than major public general hospitals, shall be subject to an aggregate reduction of one hundred fifty million dollars annually, provided that eligible general hospitals, other than major public general hospitals, that qualify as enhanced safety net hospitals under section two thousand eight hundred seven-c of this article shall not be subject to such reduction.

For the calendar years two thousand twenty-three through two thousand twenty-nine, the total distributions to eligible general hospitals, other than major public general hospitals, shall be subject to an aggregate reduction of two hundred thirty-five million four hundred thousand dollars annually, provided that eligible general hospitals, other than major public general hospitals that qualify as enhanced safety net hospitals under section two thousand eight hundred seven-c of

this article as of April first, two thousand twenty, shall not be subject to such reduction.

Such reductions shall be determined by a methodology to be established by the commissioner. Such methodologies may take into account the payor mix of each non-public general hospital, including the percentage of inpatient days paid by Medicaid.

(iii) For calendar years two thousand twenty through two thousand twenty-nine, sixty-four million six hundred thousand dollars shall be distributed to eligible general hospitals, other than major public general hospitals, that experience a reduction in indigent care pool payments pursuant to this subdivision, and that qualify as enhanced safety net hospitals under section two thousand eight hundred seven-c of this article as of April first, two thousand twenty. Such distribution shall be established pursuant to regulations promulgated by the commissioner and shall be proportional to the reduction experienced by the facility.

(iv) Such regulations shall reserve one percent of the funds available for distribution in the two thousand fourteen and two thousand fifteen calendar years, and for calendar years thereafter, pursuant to this subdivision, subdivision fourteen-f of section twenty-eight hundred seven-c of this article, and sections two hundred eleven and two hundred twelve of chapter four hundred seventy-four of the laws of nineteen hundred ninety-six, in a "financial assistance compliance pool" and shall establish methodologies for the distribution of such pool funds to facilities based on their level of compliance, as determined by the commissioner, with the provisions of subdivision nine-a of this section.

(c) The commissioner shall annually report to the governor and the legislature on the distribution of funds under this subdivision including, but not limited to:

(i) the impact on safety net providers, including community providers, rural general hospitals and major public general hospitals;

(ii) the provision of indigent care by units of services and funds distributed by general hospitals; and

(iii) the extent to which access to care has been enhanced.

6. Funds reserved for high need adjustments shall be distributed to

general hospitals, excluding major public general hospitals, with nominal need in excess of four percent as follows: each general hospital's share of the reserved amount shall be based on such hospital's aggregate share of nominal need above four percent compared to the total aggregate nominal need above four percent of all eligible hospitals.

7. (a) Hospital specific transition adjustment. Notwithstanding any inconsistent provision of this section, distributions to general hospitals determined in accordance with subdivision four of this section shall be adjusted as follows:

(i) For general hospitals which qualified for distributions pursuant to paragraph (c) of subdivision nineteen of section twenty-eight hundred seven-c of this article as of December thirty-first, nineteen hundred ninety-five:

(A) for the period January first, nineteen hundred ninety-seven through December thirty-first, nineteen hundred ninety-seven, each such general hospital shall receive as an allocation one hundred percent of the projected distribution, as of June first, nineteen hundred ninety-seven, to such general hospital pursuant to subdivisions fourteen-c and seventeen and paragraph (c) of subdivision nineteen of section twenty-eight hundred seven-c of this article for nineteen hundred ninety-six; and

(B) for the period January first, nineteen hundred ninety-eight through December thirty-first, nineteen hundred ninety-eight, each such general hospital shall receive as an allocation seventy-five percent of the amount determined in accordance with clause (A) of this subparagraph and twenty-five percent of the amount determined in accordance with subdivision four of this section; and

(C) for the period January first, nineteen hundred ninety-nine through December thirty-first, nineteen hundred ninety-nine, each such general hospital shall receive as an allocation fifty percent of the amount determined in accordance with clause (A) of this subparagraph and fifty percent of the amount determined in accordance with subdivision four of this section; and

(D) for the period January first, two thousand through December thirty-first, two thousand, each such general hospital shall receive as

an allocation twenty-five percent of the amount determined in accordance with clause (A) of this subparagraph and seventy-five percent of the amount determined in accordance with subdivision four of this section provided, however, that for any general hospital whose distribution is greater when determined solely in accordance with subdivisions four and six of this section than when determined according to this clause, such general hospital's distribution shall not be adjusted pursuant to this clause; and

(E) for periods on and after January first, two thousand one, each such general hospital shall receive as an allocation one hundred percent of the amount determined in accordance with subdivision four of this section.

(ii) For all other general hospitals, excluding major public general hospitals, general hospitals qualifying for an adjustment pursuant to subparagraph (i) of this paragraph, general hospitals which qualified for an adjustment pursuant to subdivision fourteen-d of section twenty-eight hundred seven-c of this article and rural general hospitals that met the qualifications as a rural general hospital pursuant to paragraph (f) of subdivision four of section twenty-eight hundred seven-c of this article in nineteen hundred ninety-six:

(A) for the period January first, nineteen hundred ninety-seven through December thirty-first, nineteen hundred ninety-seven, each such general hospital shall receive as an allocation fifty percent of the projected distribution, as of June first, nineteen hundred ninety-seven, to such general hospital pursuant to subdivision seventeen of section twenty-eight hundred seven-c of this article for nineteen hundred ninety-six and fifty percent of the amount determined in accordance with subdivision four of this section; and

(B) for the period January first, nineteen hundred ninety-eight through December thirty-first, nineteen hundred ninety-eight, each such general hospital shall receive as an allocation twenty-five percent of the projected distribution, as of June first, nineteen hundred ninety-seven, to such general hospital pursuant to subdivision seventeen of section twenty-eight hundred seven-c of this article for nineteen hundred ninety-six and seventy-five percent of the amount determined in accordance with subdivision four of this section.

(b) Hospital category adjustment. Notwithstanding any inconsistent

provision of this section, distributions to each general hospital, excluding major public general hospitals, for nineteen hundred ninety-seven determined in accordance with subdivision four of this section and paragraph (a) of this subdivision within the categories specified in subparagraph (i) of this paragraph shall be adjusted in accordance with subparagraph (ii) of this paragraph.

(i)(A) General hospitals that qualified for distributions in accordance with subdivision fourteen-d of section twenty-eight hundred seven-c of this article for nineteen hundred ninety-six.

(B) Rural general hospitals that met the qualifications as a rural general hospital pursuant to paragraph (f) of subdivision four of section twenty-eight hundred seven-c of this article for nineteen hundred ninety-six.

(C) All other general hospitals, excluding general hospitals that qualified for distributions pursuant to paragraph (c) of subdivision nineteen of section twenty-eight hundred seven-c of this article.

(ii) For each category specified in subparagraph (i) of this paragraph, fifty percent of the amount by which the allocation pursuant to subdivision four of this section and paragraph (a) of this subdivision to a general hospital within such category exceeds the projected distribution, as of June first, nineteen hundred ninety-seven, pursuant to subdivision seventeen and, if applicable, subdivision fourteen-d of section twenty-eight hundred seven-c of this article for nineteen hundred ninety-six to such general hospital shall be reserved by the commissioner for allocation to general hospitals within such category that would experience a loss based on such comparison based on each such general hospital's proportionate share of the aggregate losses for all general hospitals within such category; provided however, that the amount reserved within a category shall not exceed the aggregate amount of losses within such category.

8. Notwithstanding any inconsistent provision of this section, up to five percent of the amount allocated for each of the periods for distributions pursuant to this section may be transferred by the commissioner, to the extent of funds appropriated therefor, and allocated for distributions pursuant to the child health insurance plan established pursuant to title one-A of article twenty-five of this

chapter.

9. In order for a general hospital to participate in the distribution of funds from the pool, the general hospital must implement minimum collection policies and procedures approved by the commissioner, utilizing only a uniform financial assistance form developed and provided by the department. All general hospitals that do not participate in the indigent care pool shall also utilize only the uniform financial assistance form and otherwise comply with subdivision nine-a of this section governing the provision of financial assistance and hospital collection procedures.

9-a. (a) For periods on and after January first, two thousand nine, general hospitals shall, effective for periods on and after January first, two thousand seven, establish financial aid policies and procedures, in accordance with the provisions of this subdivision, for reducing charges otherwise applicable to low-income individuals without health insurance or underinsured individuals, or who have exhausted their health insurance benefits, and who can demonstrate an inability to pay full charges, and also, at the hospital's discretion, for reducing or discounting the collection of co-pays and deductible payments from those individuals who can demonstrate an inability to pay such amounts. Immigration status shall not be an eligibility criterion for the purpose of determining financial assistance under this section.

(b) Such reductions from charges for patients with incomes below at least four hundred percent of the federal poverty level shall result in a charge to such individuals that does not exceed the amount that would have been paid for the same services provided pursuant to title XIX of the federal social security act (medicaid), and provided further that such amounts shall be adjusted according to income level as follows:

(i) For patients with incomes below at least two hundred percent of the federal poverty level, the hospital shall waive all charges. No nominal payment shall be collected;

(ii) For patients with incomes between at least two hundred percent and up to three hundred percent of the federal poverty level, the hospital shall collect no more than the amount identified after application of a proportional sliding fee schedule under which patients

with lower incomes shall pay the lowest amount. Such schedule shall provide that the amount the hospital may collect for such patients increases in equal increments as the income of the patient increases, up to a maximum of ten percent of the amount that would have been paid for the same services provided pursuant to title XIX of the federal social security act (medicaid), or for underinsured patients, up to a maximum of ten percent of the amount that would have been paid pursuant to such patient's insurance cost sharing;

(iii) For patients with incomes between at least three hundred one percent and four hundred percent of the federal poverty level, the hospital shall collect no more than the amount identified after application of a proportional sliding fee schedule under which patients with lower income shall pay the lowest amounts. Such schedule shall provide that the amount the hospital may collect for such patients increases from the ten percent figure described in subparagraph (ii) of this paragraph in equal increments as the income of the patient increases, up to a maximum of twenty percent of the amount that would have been paid for the same services provided pursuant to title XIX of the federal social security act (medicaid), or for underinsured patients, up to a maximum of twenty percent of the amount that would have been paid pursuant to such patient's insurance cost sharing;

(iv) Nothing in this paragraph shall be construed to limit a hospital's ability to establish patient eligibility for payment discounts at income levels higher than those specified herein and/or to provide greater payment discounts for eligible patients than those required by this paragraph.

(c) Such policies and procedures shall be clear, understandable, in writing and publicly available in summary form and each general hospital participating in the pool shall ensure that every patient is made aware of the existence of such policies and procedures and is provided, in a timely manner, with a summary of such policies and procedures. Any summary provided to patients shall, at a minimum, include specific information as to income levels used to determine eligibility for assistance, a description of the primary service area of the hospital and the means of applying for assistance. For general hospitals with twenty-four hour emergency departments, such policies and procedures shall require the written notification of patients during the intake and

registration process, and during discharge of the patient, and through the conspicuous posting of language-appropriate information in the general hospital, and information on bills and statements sent to patients, that financial aid may be available to qualified patients and how to obtain further information. For specialty hospitals without twenty-four hour emergency departments, such notification shall take place through written materials provided to patients during the intake and registration process prior to the provision of any health care services or procedures, and during discharge of the patient, and through information on bills and statements sent to patients, that financial aid may be available to qualified patients and how to obtain further information. Application materials shall include a notice to patients that upon submission of a completed application, including any information or documentation needed to determine the patient's eligibility pursuant to the hospital's financial assistance policy, the patient may disregard any bills until the hospital has rendered a decision on the application in accordance with this paragraph.

(d) Such policies and procedures shall include clear, objective criteria for determining a patient's ability to pay and for providing such adjustments to payment requirements as are necessary. In addition to adjustment mechanisms such as sliding fee schedules and discounts to fixed standards, such policies and procedures shall also provide for the use of installment plans for the payment of outstanding balances by patients pursuant to the provisions of the financial assistance policy. The monthly payment under such a plan shall not exceed five percent of the gross monthly income of the patient. The rate of interest charged to the patient on the unpaid balance, if any, shall not exceed two percent and no plan shall include an accelerator or similar clause under which a higher rate of interest is triggered upon a missed payment. If such policies and procedures include a requirement of a deposit prior to non-emergent, medically-necessary care, such deposit must be included as part of any financial aid consideration. Such policies and procedures shall be applied consistently to all eligible patients.

(e) Such policies and procedures shall permit patients to apply for assistance at any time during the collection process. Such policies and procedures may require that patients seeking payment adjustments provide appropriate financial information and documentation in support of their

application, provided, however, that such application process shall not be unduly burdensome or complex. General hospitals shall, upon request, assist patients in understanding the hospital's policies and procedures and in applying for payment adjustments. Application forms shall be printed in the "primary languages" of patients served by the general hospital. For the purposes of this paragraph, "primary languages" shall include any language that is either (i) used to communicate, during at least five percent of patient visits in a year, by patients who cannot speak, read, write or understand the English language at the level of proficiency necessary for effective communication with health care providers, or (ii) spoken by non-English speaking individuals comprising more than one percent of the primary hospital service area population, as calculated using demographic information available from the United States Bureau of the Census, supplemented by data from school systems. Decisions regarding such applications shall be made within thirty days of receipt of a completed application. Such policies and procedures shall require that the hospital issue any denial/approval of such application in writing with information on how to appeal the denial and shall require the hospital to establish an appeals process under which it will evaluate the denial of an application. Nothing in this subdivision shall be interpreted as prohibiting a hospital from making the availability of financial assistance contingent upon the patient first applying for coverage under title XIX of the social security act (medicaid) or another publicly subsidized insurance program if, in the judgment of the hospital, the patient may be eligible for medicaid or another publicly subsidized insurance program, and upon the patient's cooperation in following the financial assistance application requirements, including the provision of information needed to make a determination on the patient's application in accordance with the hospital's financial assistance policy, provided, however, that this requirement shall not apply to any patient that would otherwise not qualify for coverage based on their immigration status.

(f) Such policies and procedures shall provide that patients with incomes below four hundred percent of the federal poverty level are deemed presumptively eligible for payment adjustments and shall conform to the requirements set forth in paragraph (b) of this subdivision, provided, however, that nothing in this subdivision shall be interpreted

as precluding hospitals from extending such payment adjustments to other patients, either generally or on a case-by-case basis. Such policies and procedures shall provide financial aid for emergency hospital services, including emergency transfers pursuant to the federal emergency medical treatment and active labor act (42 USC 1395dd), to patients who reside in New York state and for medically necessary hospital services for patients who reside in the hospital's primary service area as determined according to criteria established by the commissioner. In developing such criteria, the commissioner shall consult with representatives of the hospital industry, health care consumer advocates and local public health officials. Such criteria shall be made available to the public no less than thirty days prior to the date of implementation and shall, at a minimum:

- (i) prohibit a hospital from developing or altering its primary service area in a manner designed to avoid medically underserved communities or communities with high percentages of uninsured residents;

- (ii) ensure that every geographic area of the state is included in at least one general hospital's primary service area so that eligible patients may access care and financial assistance; and

- (iii) require the hospital to notify the commissioner upon making any change to its primary service area, and to include a description of its primary service area in the hospital's annual implementation report filed pursuant to subdivision three of section twenty-eight hundred three-1 of this article.

(g) Nothing in this subdivision shall be interpreted as precluding hospitals from extending payment adjustments for medically necessary non-emergency hospital services to patients outside of the hospital's primary service area. For patients determined to be eligible for financial aid under the terms of a hospital's financial aid policy, such policies and procedures shall prohibit any limitations on financial aid for services based on the medical condition of the applicant, other than typical limitations or exclusions based on medical necessity or the clinical or therapeutic benefit of a procedure or treatment.

(h) Such policies and procedures shall prohibit the denial of admission or denial of treatment for services that are reasonably anticipated to be medically necessary because the patient has an unpaid medical bill. Such policies and procedures shall prohibit the forced

sale or foreclosure of a patient's primary residence in order to collect an outstanding medical bill and shall require the hospital to refrain from sending an account to collection if the patient has submitted a completed application for financial aid, including any required supporting documentation, while the hospital determines the patient's eligibility for such aid. Such policies and procedures shall prohibit the sale of medical debt accumulated pursuant to this section to a third party, unless the third party explicitly purchases such medical debt in order to relieve the debt of the patient. Such policies and procedures shall provide for written notification, which shall include notification on a patient bill, to a patient not less than thirty days prior to the referral of debts for collection and shall require that the collection agency obtain the hospital's written consent prior to commencing a legal action. Such policies and procedures shall prohibit a hospital from commencing a legal action related to the recovery of medical debt or unpaid bills against patients with incomes below four hundred percent of the federal poverty level. In any legal action related to the recovery of medical debt or unpaid bills by or on behalf of a hospital, the complaint shall be accompanied by an affidavit by the hospital's chief financial officer stating that based upon the hospital's reasonable effort to determine the patient's income, the patient whom they are taking legal action against does not have an income below four hundred percent of the federal poverty level. Such policies and procedures shall require all general hospital staff who interact with patients or have responsibility for billing and collections to be trained in such policies and procedures, and require the implementation of a mechanism for the general hospital to measure its compliance with such policies and procedures. Such policies and procedures shall require that any collection agency under contract with a general hospital for the collection of debts follow the hospital's financial assistance policy, including providing information to patients on how to apply for financial assistance where appropriate. Such policies and procedures shall prohibit collections from a patient who is determined to be eligible for medical assistance pursuant to title XIX of the federal social security act at the time services were rendered and for which services medicaid payment is available.

(i) Reports required to be submitted to the department by each general

hospital as a condition for participation in the pools, and which contain, in accordance with applicable regulations, a certification from an independent certified public accountant or independent licensed public accountant or an attestation from a senior official of the hospital that the hospital is in compliance with conditions of participation in the pools, shall also contain, for reporting periods on and after January first, two thousand seven:

(i) a report on hospital costs incurred and uncollected amounts in providing services to eligible patients without insurance during the period covered by the report;

(ii) hospital costs incurred and uncollected amounts for deductibles and coinsurance for eligible patients with insurance or other third-party payor coverage;

(iii) the number of patients, organized according to United States postal service zip code, who applied for financial assistance pursuant to the hospital's financial assistance policy, and the number, organized according to United States postal service zip code, whose applications were approved and whose applications were denied;

(iv) the number of patients, including their age, race, ethnicity, gender and insurance status, who applied for financial assistance under the hospital's financial assistance policy, and the number of patients, including their age, race, ethnicity, gender and insurance status, whose applications were approved and denied;

(v) the reimbursement received for indigent care from the pool established pursuant to this section;

(vi) the amount of funds that have been expended on charity care from charitable bequests made or trusts established for the purpose of providing financial assistance to patients who are eligible in accordance with the terms of such bequests or trusts;

(vii) for hospitals located in social services districts in which the district allows hospitals to assist patients with such applications, the number of applications for eligibility under title XIX of the social security act (medicaid) that the hospital assisted patients in completing and the number denied and approved; and

(viii) the hospital's financial losses resulting from services provided under medicaid.

(j) Within ninety days of the effective date of this subdivision each

hospital shall submit to the commissioner a written report on its policies and procedures for financial assistance to patients which are used by the hospital on the effective date of this subdivision. Such report shall include copies of its policies and procedures, including material which is distributed to patients, and a description of the hospital's financial aid policies and procedures. Such description shall include the income levels of patients on which eligibility is based, the financial aid eligible patients receive and the means of calculating such aid, and the service area, if any, used by the hospital to determine eligibility.

(k) Notwithstanding section twelve of this chapter, failure to comply with the provisions of this subdivision by a hospital on and after the date of such determination shall make such hospital liable for a civil penalty not to exceed ten thousand dollars for each such violation. The imposition of such civil penalties shall be subject to the provisions of section twelve-a of this chapter.

(l) A hospital or its collection agent shall not commence a civil action against a patient or delegate a collection activity to a debt collector for nonpayment for at least one hundred eighty days after the first post-service bill is issued and until a hospital has made reasonable efforts to determine whether a patient qualifies for financial assistance.

10. In order for a general hospital to be eligible for distribution of funds from the pool, such general hospital if it provides obstetrical care and services must be in compliance with the provisions of paragraph (e) of subdivision sixteen of section twenty-eight hundred seven-c of this article.

11. Minimum hospital procedures to determine the availability of insurance or other third-party coverage for hospital services shall be specified by the commissioner.

12. Each general hospital shall submit reports to the department at such time and in such form as the commissioner shall require of:

(a) hospital costs incurred and uncollected amounts in providing services to the uninsured during the period covered by the report; and

(b) hospital costs incurred and uncollected amounts for deductibles and coinsurance for patients with insurance or other third-party payor coverage.

(c) Such reports shall comply with the reporting requirements established for receipt of bad debt and charity care pool payments as provided in accordance with section twenty-eight hundred seven-c of this article and regulations promulgated thereunder for periods prior to January first, nineteen hundred ninety-seven.

13. Distributions to general hospitals pursuant to this section and the adjustments provided in accordance with subdivision fourteen-f of section twenty-eight hundred seven-c of this article shall be considered disproportionate share payments for inpatient hospital services to general hospitals serving a disproportionate number of low income patients with special needs for purposes of providing assurances to the secretary of health and human services as necessary to meet federal requirements for securing federal financial participation pursuant to title XIX of the federal social security act.

14. Notwithstanding any inconsistent provision of law to the contrary, the availability or payment of funds to a general hospital pursuant to this section shall not be admissible as a defense, offset or reduction in any action or proceeding relating to any bill or claim for amounts due for hospital services provided.

15. Revenue from distributions pursuant to this section and adjustments pursuant to subdivision fourteen-f of section twenty-eight hundred seven-c of this article shall not be included in gross revenue received for purposes of the assessments pursuant to subdivision eighteen of section twenty-eight hundred seven-c of this article, subject to the provisions of paragraph (e) of subdivision eighteen of section twenty-eight hundred seven-c of this article, and shall not be included in gross revenue received for purposes of the assessments pursuant to section twenty-eight hundred seven-d of this article, subject to the provisions of subdivision twelve of section twenty-eight hundred seven-d of this article.

16. Supplemental indigent care distributions. From available resources established pursuant to paragraph (a-1) of subdivision four of this section, each hospital shall receive a proportionate share, provided that no hospital shall receive less than the reduction amount calculated pursuant to paragraph (d) of subdivision three of section twenty-eight hundred seven-m of this article, subject to hospital specific disproportionate share payment limits calculated in accordance with subdivision twenty-one of section twenty-eight hundred seven-c of this article.

17. Indigent care reductions. For each hospital receiving payments pursuant to paragraph (i) of subdivision thirty-five of section twenty-eight hundred seven-c of this article, the commissioner shall reduce the sum of any amounts paid pursuant to this section and pursuant to section twenty-eight hundred seven-w of this article, as computed based on projected facility specific disproportionate share hospital ceilings, by an amount equal to the lower of such sum or each such hospital's payments pursuant to paragraph (i) of subdivision thirty-five of section twenty-eight hundred seven-c of this article, provided, however, that any additional aggregate reductions enacted in a chapter of the laws of two thousand ten to the aggregate amounts payable pursuant to this section and pursuant to section twenty-eight hundred seven-w of this article shall be applied subsequent to the adjustments otherwise provided for in this subdivision.

§ 2807-1. Health care initiatives pool distributions. 1. Funds accumulated in the health care initiatives pools pursuant to paragraph (b) of subdivision nine of section twenty-eight hundred seven-j of this article, or the health care reform act (HCRA) resources fund established pursuant to section ninety-two-dd of the state finance law, whichever is applicable, including income from invested funds, shall be distributed or retained by the commissioner or by the state comptroller, as applicable, in accordance with the following.

(a) Funds shall be reserved and accumulated from year to year and shall be available, including income from invested funds, for purposes of distributions to programs to provide health care coverage for

uninsured or underinsured children pursuant to sections twenty-five hundred ten and twenty-five hundred eleven of this chapter from the respective health care initiatives pools established for the following periods in the following amounts:

(i) from the pool for the period January first, nineteen hundred ninety-seven through December thirty-first, nineteen hundred ninety-seven, up to one hundred twenty million six hundred thousand dollars;

(ii) from the pool for the period January first, nineteen hundred ninety-eight through December thirty-first, nineteen hundred ninety-eight, up to one hundred sixty-four million five hundred thousand dollars;

(iii) from the pool for the period January first, nineteen hundred ninety-nine through December thirty-first, nineteen hundred ninety-nine, up to one hundred eighty-one million dollars;

(iv) from the pool for the period January first, two thousand through December thirty-first, two thousand, two hundred seven million dollars;

(v) from the pool for the period January first, two thousand one through December thirty-first, two thousand one, two hundred thirty-five million dollars;

(vi) from the pool for the period January first, two thousand two through December thirty-first, two thousand two, three hundred twenty-four million dollars;

(vii) from the pool for the period January first, two thousand three through December thirty-first, two thousand three, up to four hundred fifty million three hundred thousand dollars;

(viii) from the pool for the period January first, two thousand four through December thirty-first, two thousand four, up to four hundred sixty million nine hundred thousand dollars;

(ix) from the pool or the health care reform act (HCRA) resources fund, whichever is applicable, for the period January first, two thousand five through December thirty-first, two thousand five, up to one hundred fifty-three million eight hundred thousand dollars;

(x) from the health care reform act (HCRA) resources fund for the period January first, two thousand six through December thirty-first, two thousand six, up to three hundred twenty-five million four hundred thousand dollars;

(xi) from the health care reform act (HCRA) resources fund for the period January first, two thousand seven through December thirty-first, two thousand seven, up to four hundred twenty-eight million fifty-nine thousand dollars;

(xii) from the health care reform act (HCRA) resources fund for the period January first, two thousand eight through December thirty-first, two thousand ten, up to four hundred fifty-three million six hundred seventy-four thousand dollars annually;

(xiii) from the health care reform act (HCRA) resources fund for the period January first, two thousand eleven, through March thirty-first, two thousand eleven, up to one hundred thirteen million four hundred eighteen thousand dollars;

(xiv) from the health care reform act (HCRA) resources fund for the period April first, two thousand eleven, through March thirty-first, two thousand twelve, up to three hundred twenty-four million seven hundred forty-four thousand dollars;

(xv) from the health care reform act (HCRA) resources fund for the period April first, two thousand twelve, through March thirty-first, two thousand thirteen, up to three hundred forty-six million four hundred forty-four thousand dollars;

(xvi) from the health care reform act (HCRA) resources fund for the period April first, two thousand thirteen, through March thirty-first, two thousand fourteen, up to three hundred seventy million six hundred ninety-five thousand dollars; and

(xvii) from the health care reform act (HCRA) resources fund for each state fiscal year for periods on and after April first, two thousand fourteen, within amounts appropriated.

(b) Funds shall be reserved and accumulated from year to year and shall be available, including income from invested funds, for purposes of distributions for health insurance programs under the individual subsidy programs established pursuant to the expanded health care coverage act of nineteen hundred eighty-eight as amended, and for evaluation of such programs from the respective health care initiatives pools or the health care reform act (HCRA) resources fund, whichever is applicable, established for the following periods in the following amounts:

(i) (A) an amount not to exceed six million dollars on an annualized

basis for the periods January first, nineteen hundred ninety-seven through December thirty-first, nineteen hundred ninety-nine; up to six million dollars for the period January first, two thousand through December thirty-first, two thousand; up to five million dollars for the period January first, two thousand one through December thirty-first, two thousand one; up to four million dollars for the period January first, two thousand two through December thirty-first, two thousand two; up to two million six hundred thousand dollars for the period January first, two thousand three through December thirty-first, two thousand three; up to one million three hundred thousand dollars for the period January first, two thousand four through December thirty-first, two thousand four; up to six hundred seventy thousand dollars for the period January first, two thousand five through June thirtieth, two thousand five; up to one million three hundred thousand dollars for the period April first, two thousand six through March thirty-first, two thousand seven; and up to one million three hundred thousand dollars annually for the period April first, two thousand seven through March thirty-first, two thousand nine, shall be allocated to individual subsidy programs; and

(B) an amount not to exceed seven million dollars on an annualized basis for the periods during the period January first, nineteen hundred ninety-seven through December thirty-first, nineteen hundred ninety-nine and four million dollars annually for the periods January first, two thousand through December thirty-first, two thousand two, and three million dollars for the period January first, two thousand three through December thirty-first, two thousand three, and two million dollars for the period January first, two thousand four through December thirty-first, two thousand four, and two million dollars for the period January first, two thousand five through June thirtieth, two thousand five shall be allocated to the catastrophic health care expense program.

(ii) Notwithstanding any law to the contrary, the characterizations of the New York state small business health insurance partnership program as in effect prior to June thirtieth, two thousand three, voucher program as in effect prior to December thirty-first, two thousand one, individual subsidy program as in effect prior to June thirtieth, two thousand five, and catastrophic health care expense program, as in effect prior to June thirtieth, two thousand five, may, for the purposes

of identifying matching funds for the community health care conversion demonstration project described in a waiver of the provisions of title XIX of the federal social security act granted to the state of New York and dated July fifteenth, nineteen hundred ninety-seven, may continue to be used to characterize the insurance programs in sections four thousand three hundred twenty-one-a, four thousand three hundred twenty-two-a, four thousand three hundred twenty-six and four thousand three hundred twenty-seven of the insurance law, which are successor programs to these programs.

(c) Up to seventy-eight million dollars shall be reserved and accumulated from year to year from the pool for the period January first, nineteen hundred ninety-seven through December thirty-first, nineteen hundred ninety-seven, for purposes of public health programs, up to seventy-six million dollars shall be reserved and accumulated from year to year from the pools for the periods January first, nineteen hundred ninety-eight through December thirty-first, nineteen hundred ninety-eight and January first, nineteen hundred ninety-nine through December thirty-first, nineteen hundred ninety-nine, up to eighty-four million dollars shall be reserved and accumulated from year to year from the pools for the period January first, two thousand through December thirty-first, two thousand, up to eighty-five million dollars shall be reserved and accumulated from year to year from the pools for the period January first, two thousand one through December thirty-first, two thousand one, up to eighty-six million dollars shall be reserved and accumulated from year to year from the pools for the period January first, two thousand two through December thirty-first, two thousand two, up to eighty-six million one hundred fifty thousand dollars shall be reserved and accumulated from year to year from the pools for the period January first, two thousand three through December thirty-first, two thousand three, up to fifty-eight million seven hundred eighty thousand dollars shall be reserved and accumulated from year to year from the pools for the period January first, two thousand four through December thirty-first, two thousand four, up to sixty-eight million seven hundred thirty thousand dollars shall be reserved and accumulated from year to year from the pools or the health care reform act (HCRA) resources fund, whichever is applicable, for the period January first, two thousand five through December thirty-first, two thousand five, up to ninety-four

million three hundred fifty thousand dollars shall be reserved and accumulated from year to year from the health care reform act (HCRA) resources fund for the period January first, two thousand six through December thirty-first, two thousand six, up to seventy million nine hundred thirty-nine thousand dollars shall be reserved and accumulated from year to year from the health care reform act (HCRA) resources fund for the period January first, two thousand seven through December thirty-first, two thousand seven, up to fifty-five million six hundred eighty-nine thousand dollars annually shall be reserved and accumulated from year to year from the health care reform act (HCRA) resources fund for the period January first, two thousand eight through December thirty-first, two thousand ten, up to thirteen million nine hundred twenty-two thousand dollars shall be reserved and accumulated from year to year from the health care reform act (HCRA) resources fund for the period January first, two thousand eleven through March thirty-first, two thousand eleven, and for periods on and after April first, two thousand eleven, up to funding amounts specified below and shall be available, including income from invested funds, for:

(i) deposit by the commissioner, within amounts appropriated, and the state comptroller is hereby authorized and directed to receive for deposit to, to the credit of the department of health's special revenue fund - other, hospital based grants program account or the health care reform act (HCRA) resources fund, whichever is applicable, for purposes of services and expenses related to general hospital based grant programs, up to twenty-two million dollars annually from the nineteen hundred ninety-seven pool, nineteen hundred ninety-eight pool, nineteen hundred ninety-nine pool, two thousand pool, two thousand one pool and two thousand two pool, respectively, up to twenty-two million dollars from the two thousand three pool, up to ten million dollars for the period January first, two thousand four through December thirty-first, two thousand four, up to eleven million dollars for the period January first, two thousand five through December thirty-first, two thousand five, up to twenty-two million dollars for the period January first, two thousand six through December thirty-first, two thousand six, up to twenty-two million ninety-seven thousand dollars annually for the period January first, two thousand seven through December thirty-first, two thousand ten, up to five million five hundred twenty-four thousand

dollars for the period January first, two thousand eleven through March thirty-first, two thousand eleven, up to thirteen million four hundred forty-five thousand dollars for the period April first, two thousand eleven through March thirty-first, two thousand twelve, and up to thirteen million three hundred seventy-five thousand dollars each state fiscal year for the period April first, two thousand twelve through March thirty-first, two thousand fourteen;

(ii) deposit by the commissioner, within amounts appropriated, and the state comptroller is hereby authorized and directed to receive for deposit to, to the credit of the emergency medical services training account established in section ninety-seven-q of the state finance law or the health care reform act (HCRA) resources fund, whichever is applicable, up to sixteen million dollars on an annualized basis for the periods January first, nineteen hundred ninety-seven through December thirty-first, nineteen hundred ninety-nine, up to twenty million dollars for the period January first, two thousand through December thirty-first, two thousand, up to twenty-one million dollars for the period January first, two thousand one through December thirty-first, two thousand one, up to twenty-two million dollars for the period January first, two thousand two through December thirty-first, two thousand two, up to twenty-two million five hundred fifty thousand dollars for the period January first, two thousand three through December thirty-first, two thousand three, up to nine million six hundred eighty thousand dollars for the period January first, two thousand four through December thirty-first, two thousand four, up to twelve million one hundred thirty thousand dollars for the period January first, two thousand five through December thirty-first, two thousand five, up to twenty-four million two hundred fifty thousand dollars for the period January first, two thousand six through December thirty-first, two thousand six, up to twenty million four hundred ninety-two thousand dollars annually for the period January first, two thousand seven through December thirty-first, two thousand ten, up to five million one hundred twenty-three thousand dollars for the period January first, two thousand eleven through March thirty-first, two thousand eleven, up to eighteen million three hundred fifty thousand dollars for the period April first, two thousand eleven through March thirty-first, two thousand twelve, up to eighteen million nine hundred

fifty thousand dollars for the period April first, two thousand twelve through March thirty-first, two thousand thirteen, up to nineteen million four hundred nineteen thousand dollars for the period April first, two thousand thirteen through March thirty-first, two thousand fourteen, and up to nineteen million six hundred fifty-nine thousand seven hundred dollars each state fiscal year for the period of April first, two thousand fourteen through March thirty-first, two thousand twenty-nine;

(iii) priority distributions by the commissioner up to thirty-two million dollars on an annualized basis for the period January first, two thousand through December thirty-first, two thousand four, up to thirty-eight million dollars on an annualized basis for the period January first, two thousand five through December thirty-first, two thousand six, up to eighteen million two hundred fifty thousand dollars for the period January first, two thousand seven through December thirty-first, two thousand seven, up to three million dollars annually for the period January first, two thousand eight through December thirty-first, two thousand ten, up to seven hundred fifty thousand dollars for the period January first, two thousand eleven through March thirty-first, two thousand eleven, up to two million nine hundred thousand dollars each state fiscal year for the period April first, two thousand eleven through March thirty-first, two thousand fourteen, and up to two million nine hundred thousand dollars each state fiscal year for the period April first, two thousand fourteen through March thirty-first, two thousand twenty-nine to be allocated (A) for the purposes established pursuant to subparagraph (ii) of paragraph (f) of subdivision nineteen of section twenty-eight hundred seven-c of this article as in effect on December thirty-first, nineteen hundred ninety-six and as may thereafter be amended, up to fifteen million dollars annually for the periods January first, two thousand through December thirty-first, two thousand four, up to twenty-one million dollars annually for the period January first, two thousand five through December thirty-first, two thousand six, and up to seven million five hundred thousand dollars for the period January first, two thousand seven through March thirty-first, two thousand seven;

(B) pursuant to a memorandum of understanding entered into by the commissioner, the majority leader of the senate and the speaker of the

assembly, for the purposes outlined in such memorandum upon the recommendation of the majority leader of the senate, up to eight million five hundred thousand dollars annually for the period January first, two thousand through December thirty-first, two thousand six, and up to four million two hundred fifty thousand dollars for the period January first, two thousand seven through June thirtieth, two thousand seven, and for the purposes outlined in such memorandum upon the recommendation of the speaker of the assembly, up to eight million five hundred thousand dollars annually for the periods January first, two thousand through December thirty-first, two thousand six, and up to four million two hundred fifty thousand dollars for the period January first, two thousand seven through June thirtieth, two thousand seven; and

(C) for services and expenses, including grants, related to emergency assistance distributions as designated by the commissioner.

Notwithstanding section one hundred twelve or one hundred sixty-three of the state finance law or any other contrary provision of law, such distributions shall be limited to providers or programs where, as determined by the commissioner, emergency assistance is vital to protect the life or safety of patients, to ensure the retention of facility caregivers or other staff, or in instances where health facility operations are jeopardized, or where the public health is jeopardized or other emergency situations exist, up to three million dollars annually for the period April first, two thousand seven through March thirty-first, two thousand eleven, up to two million nine hundred thousand dollars each state fiscal year for the period April first, two thousand eleven through March thirty-first, two thousand fourteen, up to two million nine hundred thousand dollars each state fiscal year for the period April first, two thousand fourteen through March thirty-first, two thousand seventeen, up to two million nine hundred thousand dollars each state fiscal year for the period April first, two thousand seventeen through March thirty-first, two thousand twenty, up to two million nine hundred thousand dollars each state fiscal year for the period April first, two thousand twenty through March thirty-first, two thousand twenty-three, up to two million nine hundred thousand dollars each state fiscal year for the period April first, two thousand twenty-three through March thirty-first, two thousand twenty-six, and up to two million nine hundred thousand dollars each state fiscal year for

the period April first, two thousand twenty-six through March thirty-first, two thousand twenty-nine. Upon any distribution of such funds, the commissioner shall immediately notify the chair and ranking minority member of the senate finance committee, the assembly ways and means committee, the senate committee on health, and the assembly committee on health;

(iv) distributions by the commissioner related to poison control centers pursuant to subdivision seven of section twenty-five hundred-d of this chapter, up to five million dollars for the period January first, nineteen hundred ninety-seven through December thirty-first, nineteen hundred ninety-seven, up to three million dollars on an annualized basis for the periods during the period January first, nineteen hundred ninety-eight through December thirty-first, nineteen hundred ninety-nine, up to five million dollars annually for the periods January first, two thousand through December thirty-first, two thousand two, up to four million six hundred thousand dollars annually for the periods January first, two thousand three through December thirty-first, two thousand four, up to five million one hundred thousand dollars for the period January first, two thousand five through December thirty-first, two thousand six annually, up to five million one hundred thousand dollars annually for the period January first, two thousand seven through December thirty-first, two thousand nine, up to three million six hundred thousand dollars for the period January first, two thousand ten through December thirty-first, two thousand ten, up to seven hundred seventy-five thousand dollars for the period January first, two thousand eleven through March thirty-first, two thousand eleven, up to two million five hundred thousand dollars each state fiscal year for the period April first, two thousand eleven through March thirty-first, two thousand fourteen, up to three million dollars each state fiscal year for the period April first, two thousand fourteen through March thirty-first, two thousand seventeen, up to three million dollars each state fiscal year for the period April first, two thousand seventeen through March thirty-first, two thousand twenty, up to three million dollars each state fiscal year for the period April first, two thousand twenty through March thirty-first, two thousand twenty-three, up to three million dollars each state fiscal year for the period April first, two thousand twenty-three through March thirty-first, two

thousand twenty-six, and up to three million dollars each state fiscal year for the period April first, two thousand twenty-six through March thirty-first, two thousand twenty-nine; and

(v) deposit by the commissioner, within amounts appropriated, and the state comptroller is hereby authorized and directed to receive for deposit to, to the credit of the department of health's special revenue fund - other, miscellaneous special revenue fund - 339 maternal and child HIV services account or the health care reform act (HCRA) resources fund, whichever is applicable, for purposes of a special program for HIV services for women and children, including adolescents pursuant to section twenty-five hundred-f-one of this chapter, up to five million dollars annually for the periods January first, two thousand through December thirty-first, two thousand two, up to five million dollars for the period January first, two thousand three through December thirty-first, two thousand three, up to two million five hundred thousand dollars for the period January first, two thousand four through December thirty-first, two thousand four, up to two million five hundred thousand dollars for the period January first, two thousand five through December thirty-first, two thousand five, up to five million dollars for the period January first, two thousand six through December thirty-first, two thousand six, up to five million dollars annually for the period January first, two thousand seven through December thirty-first, two thousand ten, up to one million two hundred fifty thousand dollars for the period January first, two thousand eleven through March thirty-first, two thousand eleven, and up to five million dollars each state fiscal year for the period April first, two thousand eleven through March thirty-first, two thousand fourteen;

(d) (i) An amount of up to twenty million dollars annually for the period January first, two thousand through December thirty-first, two thousand six, up to ten million dollars for the period January first, two thousand seven through June thirtieth, two thousand seven, up to twenty million dollars annually for the period January first, two thousand eight through December thirty-first, two thousand ten, up to five million dollars for the period January first, two thousand eleven through March thirty-first, two thousand eleven, up to nineteen million six hundred thousand dollars each state fiscal year for the period April first, two thousand eleven through March thirty-first, two thousand

fourteen, up to nineteen million six hundred thousand dollars each state fiscal year for the period April first, two thousand fourteen through March thirty-first, two thousand seventeen, up to nineteen million six hundred thousand dollars each state fiscal year for the period of April first, two thousand seventeen through March thirty-first, two thousand twenty, up to nineteen million six hundred thousand dollars each state fiscal year for the period of April first, two thousand twenty through March thirty-first, two thousand twenty-three, up to nineteen million six hundred thousand dollars each state fiscal year for the period of April first, two thousand twenty-three through March thirty-first, two thousand twenty-six, and up to nineteen million six hundred thousand dollars each state fiscal year for the period of April first, two thousand twenty-six through March thirty-first, two thousand twenty-nine, shall be transferred to the health facility restructuring pool established pursuant to section twenty-eight hundred fifteen of this article;

(ii) provided, however, amounts transferred pursuant to subparagraph (i) of this paragraph may be reduced in an amount to be approved by the director of the budget to reflect the amount received from the federal government under the state's 1115 waiver which is directed under its terms and conditions to the health facility restructuring program.

(f) Funds shall be accumulated and transferred from as follows:

(i) from the pool for the period January first, nineteen hundred ninety-seven through December thirty-first, nineteen hundred ninety-seven, (A) thirty-four million six hundred thousand dollars shall be transferred to funds reserved and accumulated pursuant to paragraph (b) of subdivision nineteen of section twenty-eight hundred seven-c of this article, and (B) eighty-two million dollars shall be transferred and deposited and credited to the credit of the state general fund medical assistance local assistance account;

(ii) from the pool for the period January first, nineteen hundred ninety-eight through December thirty-first, nineteen hundred ninety-eight, eighty-two million dollars shall be transferred and deposited and credited to the credit of the state general fund medical assistance local assistance account;

(iii) from the pool for the period January first, nineteen hundred ninety-nine through December thirty-first, nineteen hundred ninety-nine,

eighty-two million dollars shall be transferred and deposited and credited to the credit of the state general fund medical assistance local assistance account;

(iv) from the pool or the health care reform act (HCRA) resources fund, whichever is applicable, for the period January first, two thousand through December thirty-first, two thousand four, eighty-two million dollars annually, and for the period January first, two thousand five through December thirty-first, two thousand five, eighty-two million dollars, and for the period January first, two thousand six through December thirty-first, two thousand six, eighty-two million dollars, and for the period January first, two thousand seven through December thirty-first, two thousand seven, eighty-two million dollars, and for the period January first, two thousand eight through December thirty-first, two thousand eight, ninety million seven hundred thousand dollars shall be deposited by the commissioner, and the state comptroller is hereby authorized and directed to receive for deposit to the credit of the state special revenue fund - other, HCRA transfer fund, medical assistance account;

(v) from the health care reform act (HCRA) resources fund for the period January first, two thousand nine through December thirty-first, two thousand nine, one hundred eight million nine hundred seventy-five thousand dollars, and for the period January first, two thousand ten through December thirty-first, two thousand ten, one hundred twenty-six million one hundred thousand dollars, for the period January first, two thousand eleven through March thirty-first, two thousand eleven, twenty million five hundred thousand dollars, and for each state fiscal year for the period April first, two thousand eleven through March thirty-first, two thousand fourteen, one hundred forty-six million four hundred thousand dollars, shall be deposited by the commissioner, and the state comptroller is hereby authorized and directed to receive for deposit, to the credit of the state special revenue fund - other, HCRA transfer fund, medical assistance account.

(g) Funds shall be transferred to primary health care services pools created by the commissioner, and shall be available, including income from invested funds, for distributions in accordance with former section twenty-eight hundred seven-bb of this article from the respective health care initiatives pools for the following periods in the following

percentage amounts of funds remaining after allocations in accordance with paragraphs (a) through (f) of this subdivision:

(i) from the pool for the period January first, nineteen hundred ninety-seven through December thirty-first, nineteen hundred ninety-seven, fifteen and eighty-seven-hundredths percent;

(ii) from the pool for the period January first, nineteen hundred ninety-eight through December thirty-first, nineteen hundred ninety-eight, fifteen and eighty-seven-hundredths percent; and

(iii) from the pool for the period January first, nineteen hundred ninety-nine through December thirty-first, nineteen hundred ninety-nine, sixteen and thirteen-hundredths percent.

(h) Funds shall be reserved and accumulated from year to year by the commissioner and shall be available, including income from invested funds, for purposes of primary care education and training pursuant to article nine of this chapter from the respective health care initiatives pools established for the following periods in the following percentage amounts of funds remaining after allocations in accordance with paragraphs (a) through (f) of this subdivision and shall be available for distributions as follows:

(i) funds shall be reserved and accumulated:

(A) from the pool for the period January first, nineteen hundred ninety-seven through December thirty-first, nineteen hundred ninety-seven, six and thirty-five-hundredths percent;

(B) from the pool for the period January first, nineteen hundred ninety-eight through December thirty-first, nineteen hundred ninety-eight, six and thirty-five-hundredths percent; and

(C) from the pool for the period January first, nineteen hundred ninety-nine through December thirty-first, nineteen hundred ninety-nine, six and forty-five-hundredths percent;

(ii) funds shall be available for distributions including income from invested funds as follows:

(A) for purposes of the primary care physician loan repayment program in accordance with section nine hundred three of this chapter, up to five million dollars on an annualized basis;

(B) for purposes of the primary care practitioner scholarship program in accordance with section nine hundred four of this chapter, up to two million dollars on an annualized basis;

(C) for purposes of minority participation in medical education grants in accordance with section nine hundred six of this chapter, up to one million dollars on an annualized basis; and

(D) provided, however, that the commissioner may reallocate any funds remaining or unallocated for distributions for the primary care practitioner scholarship program in accordance with section nine hundred four of this chapter.

(i) Funds shall be reserved and accumulated from year to year and shall be available, including income from invested funds, for distributions in accordance with section twenty-nine hundred fifty-two and section twenty-nine hundred fifty-eight of this chapter for rural health care delivery development and rural health care access development, respectively, from the respective health care initiatives pools or the health care reform act (HCRA) resources fund, whichever is applicable, for the following periods in the following percentage amounts of funds remaining after allocations in accordance with paragraphs (a) through (f) of this subdivision, and for periods on and after January first, two thousand, in the following amounts:

(i) from the pool for the period January first, nineteen hundred ninety-seven through December thirty-first, nineteen hundred ninety-seven, thirteen and forty-nine-hundredths percent;

(ii) from the pool for the period January first, nineteen hundred ninety-eight through December thirty-first, nineteen hundred ninety-eight, thirteen and forty-nine-hundredths percent;

(iii) from the pool for the period January first, nineteen hundred ninety-nine through December thirty-first, nineteen hundred ninety-nine, thirteen and seventy-one-hundredths percent;

(iv) from the pool for the periods January first, two thousand through December thirty-first, two thousand two, seventeen million dollars annually, and for the period January first, two thousand three through December thirty-first, two thousand three, up to fifteen million eight hundred fifty thousand dollars;

(v) from the pool or the health care reform act (HCRA) resources fund, whichever is applicable, for the period January first, two thousand four through December thirty-first, two thousand four, up to fifteen million eight hundred fifty thousand dollars, for the period January first, two thousand five through December thirty-first, two thousand five, up to

nineteen million two hundred thousand dollars, for the period January first, two thousand six through December thirty-first, two thousand six, up to nineteen million two hundred thousand dollars, for the period January first, two thousand seven through December thirty-first, two thousand ten, up to eighteen million one hundred fifty thousand dollars annually, for the period January first, two thousand eleven through March thirty-first, two thousand eleven, up to four million five hundred thirty-eight thousand dollars, for each state fiscal year for the period April first, two thousand eleven through March thirty-first, two thousand fourteen, up to sixteen million two hundred thousand dollars, up to sixteen million two hundred thousand dollars each state fiscal year for the period April first, two thousand fourteen through March thirty-first, two thousand seventeen, up to sixteen million two hundred thousand dollars each state fiscal year for the period April first, two thousand seventeen through March thirty-first, two thousand twenty, up to sixteen million two hundred thousand dollars each state fiscal year for the period April first, two thousand twenty through March thirty-first, two thousand twenty-three, up to sixteen million two hundred thousand dollars each state fiscal year for the period April first, two thousand twenty-three through March thirty-first, two thousand twenty-six, and up to sixteen million two hundred thousand dollars each state fiscal year for the period April first, two thousand twenty-six through March thirty-first, two thousand twenty-nine.

(j) Funds shall be reserved and accumulated from year to year and shall be available, including income from invested funds, for purposes of distributions related to health information and health care quality improvement pursuant to former section twenty-eight hundred seven-n of this article from the respective health care initiatives pools established for the following periods in the following percentage amounts of funds remaining after allocations in accordance with paragraphs (a) through (f) of this subdivision:

(i) from the pool for the period January first, nineteen hundred ninety-seven through December thirty-first, nineteen hundred ninety-seven, six and thirty-five-hundredths percent;

(ii) from the pool for the period January first, nineteen hundred ninety-eight through December thirty-first, nineteen hundred ninety-eight, six and thirty-five-hundredths percent; and

(iii) from the pool for the period January first, nineteen hundred ninety-nine through December thirty-first, nineteen hundred ninety-nine, six and forty-five-hundredths percent.

(k) Funds shall be reserved and accumulated from year to year and shall be available, including income from invested funds, for allocations and distributions in accordance with section twenty-eight hundred seven-p of this article for diagnostic and treatment center uncompensated care from the respective health care initiatives pools or the health care reform act (HCRA) resources fund, whichever is applicable, for the following periods in the following percentage amounts of funds remaining after allocations in accordance with paragraphs (a) through (f) of this subdivision, and for periods on and after January first, two thousand, in the following amounts:

(i) from the pool for the period January first, nineteen hundred ninety-seven through December thirty-first, nineteen hundred ninety-seven, thirty-eight and one-tenth percent;

(ii) from the pool for the period January first, nineteen hundred ninety-eight through December thirty-first, nineteen hundred ninety-eight, thirty-eight and one-tenth percent;

(iii) from the pool for the period January first, nineteen hundred ninety-nine through December thirty-first, nineteen hundred ninety-nine, thirty-eight and seventy-one-hundredths percent;

(iv) from the pool for the periods January first, two thousand through December thirty-first, two thousand two, forty-eight million dollars annually, and for the period January first, two thousand three through June thirtieth, two thousand three, twenty-four million dollars;

(v) (A) from the pool or the health care reform act (HCRA) resources fund, whichever is applicable, for the period July first, two thousand three through December thirty-first, two thousand three, up to six million dollars, for the period January first, two thousand four through December thirty-first, two thousand six, up to twelve million dollars annually, for the period January first, two thousand seven through December thirty-first, two thousand thirteen, up to forty-eight million dollars annually, for the period January first, two thousand fourteen through March thirty-first, two thousand fourteen, up to twelve million dollars for the period April first, two thousand fourteen through March thirty-first, two thousand seventeen, up to forty-eight million dollars

annually, for the period April first, two thousand seventeen through March thirty-first, two thousand twenty, up to forty-eight million dollars annually, for the period April first, two thousand twenty through March thirty-first, two thousand twenty-three, up to forty-eight million dollars annually, for the period April first, two thousand twenty-three through March thirty-first, two thousand twenty-six, up to forty-eight million dollars annually, and for the period April first, two thousand twenty-six through March thirty-first, two thousand twenty-nine, up to forty-eight million dollars annually;

(B) from the health care reform act (HCRA) resources fund for the period January first, two thousand six through December thirty-first, two thousand six, an additional seven million five hundred thousand dollars, for the period January first, two thousand seven through December thirty-first, two thousand thirteen, an additional seven million five hundred thousand dollars annually, for the period January first, two thousand fourteen through March thirty-first, two thousand fourteen, an additional one million eight hundred seventy-five thousand dollars, for the period April first, two thousand fourteen through March thirty-first, two thousand seventeen, an additional seven million five hundred thousand dollars annually, for the period April first, two thousand seventeen through March thirty-first, two thousand twenty, an additional seven million five hundred thousand dollars annually, for the period April first, two thousand twenty through March thirty-first, two thousand twenty-three, an additional seven million five hundred thousand dollars annually, for the period April first, two thousand twenty-three through March thirty-first, two thousand twenty-six, an additional seven million five hundred thousand dollars annually, and for the period April first, two thousand twenty-six through March thirty-first, two thousand twenty-nine, an additional seven million five hundred thousand dollars annually for voluntary non-profit diagnostic and treatment center uncompensated care in accordance with subdivision four-c of section twenty-eight hundred seven-p of this article; and

(vi) funds reserved and accumulated pursuant to this paragraph for periods on and after July first, two thousand three, shall be deposited by the commissioner, within amounts appropriated, and the state comptroller is hereby authorized and directed to receive for deposit to the credit of the state special revenue funds - other, HCRA transfer

fund, medical assistance account, for purposes of funding the state share of rate adjustments made pursuant to section twenty-eight hundred seven-p of this article, provided, however, that in the event federal financial participation is not available for rate adjustments made pursuant to paragraph (b) of subdivision one of section twenty-eight hundred seven-p of this article, funds shall be distributed pursuant to paragraph (a) of subdivision one of section twenty-eight hundred seven-p of this article from the respective health care initiatives pools or the health care reform act (HCRA) resources fund, whichever is applicable.

(l) Funds shall be reserved and accumulated from year to year by the commissioner and shall be available, including income from invested funds, for transfer to and allocation for services and expenses for the payment of benefits to recipients of drugs under the AIDS drug assistance program (ADAP) - HIV uninsured care program as administered by Health Research Incorporated from the respective health care initiatives pools or the health care reform act (HCRA) resources fund, whichever is applicable, established for the following periods in the following percentage amounts of funds remaining after allocations in accordance with paragraphs (a) through (f) of this subdivision, and for periods on and after January first, two thousand, in the following amounts:

(i) from the pool for the period January first, nineteen hundred ninety-seven through December thirty-first, nineteen hundred ninety-seven, nine and fifty-two-hundredths percent;

(ii) from the pool for the period January first, nineteen hundred ninety-eight through December thirty-first, nineteen hundred ninety-eight, nine and fifty-two-hundredths percent;

(iii) from the pool for the period January first, nineteen hundred ninety-nine and December thirty-first, nineteen hundred ninety-nine, nine and sixty-eight-hundredths percent;

(iv) from the pool for the periods January first, two thousand through December thirty-first, two thousand two, up to twelve million dollars annually, and for the period January first, two thousand three through December thirty-first, two thousand three, up to forty million dollars; and

(v) from the pool or the health care reform act (HCRA) resources fund, whichever is applicable, for the periods January first, two thousand

four through December thirty-first, two thousand four, up to fifty-six million dollars, for the period January first, two thousand five through December thirty-first, two thousand six, up to sixty million dollars annually, for the period January first, two thousand seven through December thirty-first, two thousand ten, up to sixty million dollars annually, for the period January first, two thousand eleven through March thirty-first, two thousand eleven, up to fifteen million dollars, each state fiscal year for the period April first, two thousand eleven through March thirty-first, two thousand fourteen, up to forty-two million three hundred thousand dollars and up to forty-one million fifty thousand dollars each state fiscal year for the period April first, two thousand fourteen through March thirty-first, two thousand twenty-nine.

(m) Funds shall be reserved and accumulated from year to year and shall be available, including income from invested funds, for purposes of distributions pursuant to section twenty-eight hundred seven-r of this article for cancer related services from the respective health care initiatives pools or the health care reform act (HCRA) resources fund, whichever is applicable, established for the following periods in the following percentage amounts of funds remaining after allocations in accordance with paragraphs (a) through (f) of this subdivision, and for periods on and after January first, two thousand, in the following amounts:

(i) from the pool for the period January first, nineteen hundred ninety-seven through December thirty-first, nineteen hundred ninety-seven, seven and ninety-four-hundredths percent;

(ii) from the pool for the period January first, nineteen hundred ninety-eight through December thirty-first, nineteen hundred ninety-eight, seven and ninety-four-hundredths percent;

(iii) from the pool for the period January first, nineteen hundred ninety-nine and December thirty-first, nineteen hundred ninety-nine, six and forty-five-hundredths percent;

(iv) from the pool for the period January first, two thousand through December thirty-first, two thousand two, up to ten million dollars on an annual basis;

(v) from the pool for the period January first, two thousand three through December thirty-first, two thousand four, up to eight million nine hundred fifty thousand dollars on an annual basis;

(vi) from the pool or the health care reform act (HCRA) resources fund, whichever is applicable, for the period January first, two thousand five through December thirty-first, two thousand six, up to ten million fifty thousand dollars on an annual basis, for the period January first, two thousand seven through December thirty-first, two thousand ten, up to nineteen million dollars annually, and for the period January first, two thousand eleven through March thirty-first, two thousand eleven, up to four million seven hundred fifty thousand dollars.

(n) Funds shall be accumulated and transferred from the health care reform act (HCRA) resources fund as follows: for the period April first, two thousand seven through March thirty-first, two thousand eight, and on an annual basis for the periods April first, two thousand eight through November thirtieth, two thousand nine, funds within amounts appropriated shall be transferred and deposited and credited to the credit of the state special revenue funds - other, HCRA transfer fund, medical assistance account, for purposes of funding the state share of rate adjustments made to public and voluntary hospitals in accordance with paragraphs (i) and (j) of subdivision one of section twenty-eight hundred seven-c of this article.

2. Notwithstanding any inconsistent provision of law, rule or regulation, any funds accumulated in the health care initiatives pools pursuant to paragraph (b) of subdivision nine of section twenty-eight hundred seven-j of this article, as a result of surcharges, assessments or other obligations during the periods January first, nineteen hundred ninety-seven through December thirty-first, nineteen hundred ninety-nine, which are unused or uncommitted for distributions pursuant to this section shall be reserved and accumulated from year to year by the commissioner and, within amounts appropriated, transferred and deposited into the special revenue funds - other, miscellaneous special revenue fund - 339, child health insurance account or any successor fund or account, for purposes of distributions to implement the child health insurance program established pursuant to sections twenty-five hundred ten and twenty-five hundred eleven of this chapter for periods on and after January first, two thousand one; provided, however, funds reserved and accumulated for priority distributions pursuant to subparagraph

(iii) of paragraph (c) of subdivision one of this section shall not be transferred and deposited into such account pursuant to this subdivision; and provided further, however, that any unused or uncommitted pool funds accumulated and allocated pursuant to paragraph (j) of subdivision one of this section shall be distributed for purposes of the health information and quality improvement act of 2000.

3. Revenue from distributions pursuant to this section shall not be included in gross revenue received for purposes of the assessments pursuant to subdivision eighteen of section twenty-eight hundred seven-c of this article, subject to the provisions of paragraph (e) of subdivision eighteen of section twenty-eight hundred seven-c of this article, and shall not be included in gross revenue received for purposes of the assessments pursuant to section twenty-eight hundred seven-d of this article, subject to the provisions of subdivision twelve of section twenty-eight hundred seven-d of this article.

§ 2807-m. Distribution of the professional education pools. 1.

Definitions. For purposes of this section, the following definitions shall apply, unless the context clearly requires otherwise:

(a) "Clinical research" means patient-oriented research, epidemiologic and behavioral studies, or outcomes research and health services research that is approved by an institutional review board by the time the clinical research position is filled.

(b) "Clinical research plan" means a plan submitted by a consortium or teaching general hospital for a clinical research position which demonstrates, in a form to be provided by the commissioner, the following:

(i) financial support for overhead, supervision, equipment and other resources equal to the amount of funding provided pursuant to subparagraph (i) of paragraph (b) of subdivision five-a of this section by the teaching general hospital or consortium for the clinical research position;

(ii) experience the sponsor-mentor and teaching general hospital has in clinical research and the medical field of the study;

(iii) methods, data collection and anticipated measurable outcomes of

the clinical research to be performed;

(iv) training goals, objectives and experience the researcher will be provided to assess a future career in clinical research;

(v) scientific relevance, merit and health implications of the research to be performed;

(vi) information on potential scientific meetings and peer review journals where research results can be disseminated;

(vii) clear and comprehensive details on the clinical research position;

(viii) qualifications necessary for the clinical research position and strategy for recruitment;

(ix) non-duplication with other clinical research positions from the same teaching general hospital or consortium;

(x) methods to track the career of the clinical researcher once the term of the position is complete; and

(xi) any other information required by the commissioner to implement subparagraph (i) of paragraph (b) of subdivision five-a of this section.

(xii) The clinical review plan submitted in accordance with this paragraph may be reviewed by the commissioner in consultation with experts outside the department of health.

(c) "Clinical research position" means a post-graduate residency position which:

(i) shall not be required in order for the researcher to complete a graduate medical education program;

(ii) may be reimbursed by other sources but only for costs in excess of the funding distributed in accordance with subparagraph (i) of paragraph (b) of subdivision five-a of this section;

(iii) shall exceed the minimum standards that are required by the residency review committee in the specialty the researcher has trained or is currently training;

(iv) shall not be previously funded by the teaching general hospital or supported by another funding source at the teaching general hospital in the past three years from the date the clinical research plan is submitted to the commissioner;

(v) may supplement an existing research project;

(vi) shall be equivalent to a full-time position comprising of no less than thirty-five hours per week for one or two years;

(vii) shall provide, or be filled by a researcher who has formalized instruction in clinical research, including biostatistics, clinical trial design, grant writing and research ethics;

(viii) shall be supervised by a sponsor-mentor who shall either (A) be employed, contracted for employment or paid through an affiliated faculty practice plan by a teaching general hospital which has received at least one research grant from the National Institutes of Health in the past five years from the date the clinical research plan is submitted to the commissioner; (B) maintain a faculty appointment at a medical, dental or podiatric school located in New York state that has received at least one research grant from the National Institutes of Health in the past five years from the date the clinical research plan is submitted to the commissioner; or (C) be collaborating in the clinical research plan with a researcher from another institution that has received at least one research grant from the National Institutes of Health in the past five years from the date the clinical research plan is submitted to the commissioner; and

(ix) shall be filled by a researcher who is (A) enrolled or has completed a graduate medical education program, as defined in paragraph (i) of this subdivision; (B) a United States citizen, national, or permanent resident of the United States; and (C) a graduate of a medical, dental or podiatric school located in New York state, a graduate or resident in a graduate medical education program, as defined in paragraph (i) of this subdivision, where the sponsoring institution, as defined in paragraph (q) of this subdivision, is located in New York state, or resides in New York state at the time the clinical research plan is submitted to the commissioner.

(d) "Consortium" means an organization or association, approved by the commissioner in consultation with the council, of general hospitals which provide graduate medical education, together with any affiliated site; provided that such organization or association may also include other providers of health care services, medical schools, payors or consumers, and which meet other criteria pursuant to subdivision six of this section.

(e) "Council" means the New York state council on graduate medical education.

(f) "Direct medical education" means the direct costs of residents,

interns and supervising physicians.

(g) "Distribution period" means each calendar year set forth in subdivision two of this section.

(h) "Faculty" means persons who are employed by or under contract for employment with a teaching general hospital or are paid through a teaching general hospital's affiliated faculty practice plan and maintain a faculty appointment at a medical school. Such persons shall not be limited to persons with a degree in medicine.

(i) "Graduate medical education program" means a post-graduate medical education residency in the United States which has received accreditation from a nationally recognized accreditation body or has been approved by a nationally recognized organization for medical, osteopathic, podiatric or dental residency programs including, but not limited to, specialty boards.

(j) "Indirect medical education" means the estimate of costs, other than direct costs, of educational activities in teaching hospitals as determined in accordance with the methodology applicable for purposes of determining an estimate of indirect medical education costs for reimbursement for inpatient hospital service pursuant to title XVIII of the federal social security act (medicare).

(k) "Medicare" means the methodology used for purposes of reimbursing inpatient hospital services provided to beneficiaries of title XVIII of the federal social security act.

(l) "Primary care" residents specialties shall include family medicine, general pediatrics, primary care internal medicine, and primary care obstetrics and gynecology. In determining whether a residency is in primary care, the commissioner shall consult with the council.

(m) "Regions", for purposes of this section, shall mean the regions as defined in paragraph (b) of subdivision sixteen of section twenty-eight hundred seven-c of this article as in effect on June thirtieth, nineteen hundred ninety-six. For purposes of distributions pursuant to subdivision five-a of this section, except distributions made in accordance with paragraph (a) of subdivision five-a of this section, "regions" shall be defined as New York city and the rest of the state.

(n) "Regional pool" means a professional education pool established on a regional basis by the commissioner from funds available pursuant to

sections twenty-eight hundred seven-s and twenty-eight hundred seven-t of this article.

(o) "Resident" means a person in a graduate medical education program which has received accreditation from a nationally recognized accreditation body or in a program approved by any other nationally recognized organization for medical, osteopathic or dental residency programs including, but not limited to, specialty boards.

(p) "Shortage specialty" means a specialty determined by the commissioner, in consultation with the council, to be in short supply in the state of New York.

(q) "Sponsoring institution" means the entity that has the overall responsibility for a program of graduate medical education. Such institutions shall include teaching general hospitals, medical schools, consortia and diagnostic and treatment centers.

(r) "Weighted resident count" means a teaching general hospital's total number of residents as of July first, nineteen hundred ninety-five, including residents in affiliated non-hospital ambulatory settings, reported to the commissioner. Such resident counts shall reflect the weights established in accordance with rules and regulations adopted by the state hospital review and planning council and approved by the commissioner for purposes of implementing subdivision twenty-five of section twenty-eight hundred seven-c of this article and in effect on July first, nineteen hundred ninety-five. Such weights shall not be applied to specialty hospitals, specified by the commissioner, whose primary care mission is to engage in research, training and clinical care in specialty eye and ear, special surgery, orthopedic, joint disease, cancer, chronic care or rehabilitative services.

(s) "Adjustment amount" means an amount determined for each teaching hospital for periods prior to January first, two thousand nine by:

(i) determining the difference between (A) a calculation of what each teaching general hospital would have been paid if payments made pursuant to paragraph (a-3) of subdivision one of section twenty-eight hundred seven-c of this article between January first, nineteen hundred ninety-six and December thirty-first, two thousand three were based solely on the case mix of persons eligible for medical assistance under the medical assistance program pursuant to title eleven of article five of the social services law who are enrolled in health maintenance

organizations and persons paid for under the family health plus program enrolled in approved organizations pursuant to title eleven-D of article five of the social services law during those years, and (B) the actual payments to each such hospital pursuant to paragraph (a-3) of subdivision one of section twenty-eight hundred seven-c of this article between January first, nineteen hundred ninety-six and December thirty-first, two thousand three.

(ii) reducing proportionally each of the amounts determined in subparagraph (i) of this paragraph so that the sum of all such amounts totals no more than one hundred million dollars;

(iii) further reducing each of the amounts determined in subparagraph (ii) of this paragraph by the amount received by each hospital as a distribution from funds designated in paragraph (a) of subdivision five of this section attributable to the period January first, two thousand three through December thirty-first, two thousand three, except that if such amount was provided to a consortium then the amount of the reduction for each hospital in the consortium shall be determined by applying the proportion of each hospital's amount determined under subparagraph (i) of this paragraph to the total of such amounts of all hospitals in such consortium to the consortium award;

(iv) further reducing each of the amounts determined in subparagraph (iii) of this paragraph by the amounts specified in paragraph (t) of this subdivision; and

(v) dividing each of the amounts determined in subparagraph (iii) of this paragraph by seven.

(t) "Extra reduction amount" shall mean an amount determined for a teaching hospital for which an adjustment amount is calculated pursuant to paragraph (s) of this subdivision that is the hospital's proportionate share of the sum of the amounts specified in paragraph (u) of this subdivision determined based upon a comparison of the hospital's remaining liability calculated pursuant to paragraph (s) of this subdivision to the sum of all such hospital's remaining liabilities.

(u) "Allotment amount" shall mean an amount determined for teaching hospitals as follows:

(i) for a hospital for which an adjustment amount pursuant to paragraph (s) of this subdivision does not apply, the amount received by the hospital pursuant to paragraph (a) of subdivision five of this

section attributable to the period January first, two thousand three through December thirty-first, two thousand three, or

(ii) for a hospital for which an adjustment amount pursuant to paragraph (s) of this subdivision applies and which received a distribution pursuant to paragraph (a) of subdivision five of this section attributable to the period January first, two thousand three through December thirty-first, two thousand three that is greater than the hospital's adjustment amount, the difference between the distribution amount and the adjustment amount.

2. Regional pools. (a) The commissioner shall establish regional pools for each of the periods January first, nineteen hundred ninety-seven through December thirty-first, nineteen hundred ninety-seven, January first, nineteen hundred ninety-eight through December thirty-first, nineteen hundred ninety-eight, and January first, nineteen hundred ninety-nine through December thirty-first, nineteen hundred ninety-nine and on and after January first, two thousand from funds available pursuant to sections twenty-eight hundred seven-s and twenty-eight hundred seven-t of this article.

(b) For periods prior to January first, two thousand nine, each regional pool shall be distributed on a monthly basis to teaching general hospitals for costs associated with graduate medical education provided by such teaching general hospitals in accordance with the distribution methodology set forth in subdivision three of this section; provided however, teaching general hospitals with a resident count of zero as of July first of the year preceding the distribution period shall not be eligible for distributions pursuant to this section. General hospitals may elect to have their distribution paid through the consortium.

3. Regional pool distributions. (a) Distributions to teaching general hospitals shall be made from the regional pools described in subdivision two of this section for each period prior to January first, two thousand nine, less amounts set aside pursuant to subdivision five of this section. To be eligible to participate in distributions pursuant to this section, a teaching general hospital and consortium must be in compliance with graduate medical education reporting requirements set

forth in subdivision four of this section.

(b) For periods prior to January first, two thousand nine, each teaching general hospital in a region shall have a proxy calculated for its graduate medical education costs as follows:

(i) The direct medical education portion of the proxy shall be the product of: the teaching general hospital's medicare direct medical education payment amount per resident for federal fiscal year nineteen hundred ninety-five--ninety-six and the teaching general hospital's weighted resident count as of July first, nineteen hundred ninety-five and the teaching general hospital's inpatient percentage of total costs and percentage of inpatient days, excluding medicare days, patient days eligible for payments by governmental agencies, the comprehensive motor vehicle insurance reparations act, workers' compensation law, volunteer firefighters' benefit law, volunteer ambulance workers' benefit law and self-pay patient days, to total days as such costs and days are reported in the institutional cost report for periods ending March thirty-first, nineteen hundred ninety-five, June thirtieth, nineteen hundred ninety-five or December thirty-first, nineteen hundred ninety-five, whichever is applicable. The teaching general hospital's medicare direct medical education payment amount for purposes of this calculation shall not exceed one hundred fifty percent of the regional average per resident amount for the region in which the teaching general hospital is located.

(ii) The indirect medical education portion of the proxy for a teaching general hospital shall be calculated using the medicare resident per bed formula in existence on June thirtieth, nineteen hundred ninety-six, except the teaching general hospital's weighted resident count as of July first, nineteen hundred ninety-five and number of certified acute care beds as of January first, nineteen hundred ninety-five shall be used in the application of the formula. The formula result shall be applied to the teaching general hospital's applicable case mix neutral and wage adjusted medicare standardized rate amount for federal fiscal year nineteen hundred ninety-five--ninety-six. The result of this application shall be multiplied by the teaching general hospital's total number of discharges as reported in the institutional cost report for periods ending March thirty-first, nineteen hundred ninety-five, June thirtieth, nineteen hundred ninety-five or December

thirty-first, nineteen hundred ninety-five, whichever is applicable, excluding discharges relating to patients eligible for medicare, payments by governmental agencies, payments pursuant to the comprehensive motor vehicle insurance reparations act, payments pursuant to the workers' compensation law, the volunteer firefighters' benefit law, the volunteer ambulance workers' benefit law, and self-pay patients, and applicable weighting factors developed in accordance with subdivision three of section twenty-eight hundred seven-c of this article as in effect in nineteen hundred ninety-five. For teaching general hospitals which are specialty hospitals reimbursed on a per diem basis, the applicable case mix neutral and wage adjusted medicare standardized rate amount for purposes of this calculation shall be the amount determined for the majority of teaching general hospitals within a region.

(iii) The teaching general hospital's graduate medical education proxy shall equal the sum of its direct medical education proxy and indirect medical education proxy.

(c) For periods prior to January first, two thousand nine, a distribution amount for each teaching general hospital shall be calculated from the applicable regional pool described in subdivision two of this section as adjusted pursuant to paragraph (d) of this subdivision based upon its percentage of the regional total of the graduate medical education proxies, except that for purposes of this paragraph the statewide amount used to compute such distribution amounts shall be four hundred ninety million dollars on an annual basis for the periods January first, two thousand through December thirty-first, two thousand two and two hundred forty-five million dollars for the period January first, two thousand three through June thirtieth, two thousand three, less amounts set aside each period pursuant to subdivision seven of this section.

(d) For periods prior to January first, two thousand nine, each teaching general hospital shall receive a distribution from the applicable regional pool based on its distribution amount determined under paragraph (c) of this subdivision adjusted by a reduction amount that is determined as follows:

(i) the commissioner shall establish a reduction percentage by dividing twenty-seven million dollars each year for the period January

first, two thousand through December thirty-first, two thousand ten and six million seven hundred fifty thousand dollars for the period January first, two thousand eleven through March thirty-first, two thousand eleven, by the sum of initial hospital distribution amounts calculated pursuant to paragraph (c) of this subdivision;

(ii) the commissioner shall multiply the reduction percentage by the amount calculated pursuant to paragraph (c) of this subdivision for each teaching general hospital;

(iii) each teaching general hospital shall have its initial distribution amount as determined pursuant to paragraph (c) of this subdivision reduced by an amount up to the amount calculated pursuant to subparagraph (ii) of this paragraph and subject to the requirements of subparagraph (iv) of this paragraph, provided, however, that if the sum of reduction amounts for all facilities thus calculated is less than twenty-seven million dollars on a statewide basis each year for the period January first, two thousand through December thirty-first, two thousand ten and six million seven hundred fifty thousand dollars for the period January first, two thousand eleven through March thirty-first, two thousand eleven, the commissioner may increase the reduction percentage subject to the provisions of subparagraph (iv) of this paragraph so that the sum of the reduction amounts for all facilities is twenty-seven million dollars each year for the period January first, two thousand through December thirty-first, two thousand ten and six million seven hundred fifty thousand dollars for the period January first, two thousand eleven through March thirty-first, two thousand eleven.

(iv) for distribution periods prior to January first, two thousand eleven, an individual hospital's reduction amount shall not exceed the hospital's projected losses for treating medicaid and uninsured patients after all other projected medical assistance, including all other projected disproportionate share payments for the applicable period. Such cap on the reduction amount shall also not be reconciled to reflect actual medicaid and uninsured losses for the applicable period.

(e) Effective April first, two thousand four through December thirty-first, two thousand eight, the distribution amount calculated pursuant to paragraphs (c) and (d) of this subdivision for each non-public teaching general hospital shall be reduced by the amount

calculated and included in rates pursuant to paragraph (d) of subdivision twenty-five of section twenty-eight hundred seven-c of this article.

(f) Effective January first, two thousand five through December thirty-first, two thousand eight, each teaching general hospital shall receive a distribution from the applicable regional pool based on its distribution amount determined under paragraphs (c), (d) and (e) of this subdivision and reduced by its adjustment amount calculated pursuant to paragraph (s) of subdivision one of this section and, for distributions for the period January first, two thousand five through December thirty-first, two thousand five, further reduced by its extra reduction amount calculated pursuant to paragraph (t) of subdivision one of this section.

4. Reporting requirements. Each teaching general hospital and consortium shall furnish to the department such reports and information as may be required by the commissioner to implement this section and to assess the cost, quality and health system needs for graduate medical education, including, but not limited to:

(a) each teaching general hospital and site other than a general hospital at which residents receive training shall describe annually its graduate medical education program or programs and report the number of residents in each program; and

(b) each consortium shall provide annually a list of the teaching general hospitals and sites other than general hospitals at which residents receive training participating in the consortium as members and an implementation report relating to achievement of the goals and objectives of the consortium plan; and

(c) each teaching general hospital and sponsoring institution shall jointly prepare and submit to the commissioner on an annual basis an institutional graduate medical education budget reflecting all sources of graduate medical education revenue and expenditures for a calendar year. In a form and manner to be specified by the commissioner, such budget shall be prepared and reviewed by the residency training director and certified by the chief executive officer as to accuracy and completeness prior to submission to the commissioner. Such budget shall be submitted to the commissioner by February first, two thousand nine

for the two thousand nine calendar year and each February first, thereafter.

5. Supplemental distributions. (a) Up to thirty-one million dollars annually for the periods January first, two thousand through December thirty-first, two thousand three, and up to twenty-five million dollars plus the sum of the amounts specified in paragraph (n) of subdivision one of this section for the period January first, two thousand five through December thirty-first, two thousand five, and up to thirty-one million dollars annually for the period January first, two thousand six through December thirty-first, two thousand seven, shall be set aside and reserved by the commissioner from the regional pools established pursuant to subdivision two of this section for supplemental distributions in each such region to be made by the commissioner to consortia and teaching general hospitals in accordance with a distribution methodology developed in consultation with the council and specified in rules and regulations adopted by the commissioner.

(b) Funds available shall be distributed to consortia and teaching general hospitals that substantially meet the following training goals and objectives:

- (i) reducing the number of graduate medical education programs and/or the number of residents in such programs;
- (ii) increasing the number of residents training in underserved areas;
- (iii) increasing the number of residents training in ambulatory care facilities;
- (iv) improving the quality of training programs;
- (v) increasing training of minorities; and
- (vi) such other factors as may be specified in rules and regulations adopted by the commissioner in consultation with the council.

The distribution of funds pursuant to this subdivision shall not be conditioned on a consortia or teaching general hospital reducing the number of graduate medical education programs and/or the number of residents in such program.

(c) In the event that funds available under this subdivision are not distributed to consortia or teaching general hospitals in accordance with this subdivision, such funds shall be distributed to teaching

general hospitals in accordance with the methodology described in subdivision three of this section.

(d) Notwithstanding any other provision of law or regulation, for the period January first, two thousand five through December thirty-first, two thousand five, the commissioner shall distribute as supplemental payments the allotment specified in paragraph (n) of subdivision one of this section.

5-a. Graduate medical education innovations pool. (a) Supplemental distributions. (i) Thirty-one million dollars for the period January first, two thousand eight through December thirty-first, two thousand eight, shall be set aside and reserved by the commissioner from the regional pools established pursuant to subdivision two of this section and shall be available for distributions pursuant to subdivision five of this section and in accordance with section 86-1.89 of title 10 of the codes, rules and regulations of the state of New York as in effect on January first, two thousand eight; provided, however, for purposes of funding the empire clinical research investigation program (ECRIP) in accordance with paragraph eight of subdivision (e) and paragraph two of subdivision (f) of section 86-1.89 of title 10 of the codes, rules and regulations of the state of New York, distributions shall be made using two regions defined as New York city and the rest of the state and the dollar amount set forth in subparagraph (i) of paragraph two of subdivision (f) of section 86-1.89 of title 10 of the codes, rules and regulations of the state of New York shall be increased from sixty thousand dollars to seventy-five thousand dollars.

(ii) For periods on and after January first, two thousand nine, supplemental distributions pursuant to subdivision five of this section and in accordance with section 86-1.89 of title 10 of the codes, rules and regulations of the state of New York shall no longer be made and the provisions of section 86-1.89 of title 10 of the codes, rules and regulations of the state of New York shall be null and void.

(b) Empire clinical research investigator program (ECRIP). Nine million one hundred twenty thousand dollars annually for the period January first, two thousand nine through December thirty-first, two thousand ten, and two million two hundred eighty thousand dollars for the period January first, two thousand eleven, through March

thirty-first, two thousand eleven, nine million one hundred twenty thousand dollars each state fiscal year for the period April first, two thousand eleven through March thirty-first, two thousand fourteen, up to eight million six hundred twelve thousand dollars each state fiscal year for the period April first, two thousand fourteen through March thirty-first, two thousand seventeen, up to eight million six hundred twelve thousand dollars each state fiscal year for the period April first, two thousand seventeen through March thirty-first, two thousand twenty, up to eight million six hundred twelve thousand dollars each state fiscal year for the period April first, two thousand twenty through March thirty-first, two thousand twenty-three, and up to eight million six hundred twelve thousand dollars each state fiscal year for the period April first, two thousand twenty-three through March thirty-first, two thousand twenty-nine, shall be set aside and reserved by the commissioner from the regional pools established pursuant to subdivision two of this section to be allocated regionally with two-thirds of the available funding going to New York city and one-third of the available funding going to the rest of the state and shall be available for distribution as follows:

Distributions shall first be made to consortia and teaching general hospitals for the empire clinical research investigator program (ECRIP) to help secure federal funding for biomedical research, train clinical researchers, recruit national leaders as faculty to act as mentors, and train residents and fellows in biomedical research skills based on hospital-specific data submitted to the commissioner by consortia and teaching general hospitals in accordance with clause (G) of this subparagraph. Such distributions shall be made in accordance with the following methodology:

(A) The greatest number of clinical research positions for which a consortium or teaching general hospital may be funded pursuant to this subparagraph shall be one percent of the total number of residents training at the consortium or teaching general hospital on July first, two thousand eight for the period January first, two thousand nine through December thirty-first, two thousand nine rounded up to the nearest one position.

(B) Distributions made to a consortium or teaching general hospital

shall equal the product of the total number of clinical research positions submitted by a consortium or teaching general hospital and accepted by the commissioner as meeting the criteria set forth in paragraph (b) of subdivision one of this section, subject to the reduction calculation set forth in clause (C) of this subparagraph, times one hundred ten thousand dollars.

(C) If the dollar amount for the total number of clinical research positions in the region calculated pursuant to clause (B) of this subparagraph exceeds the total amount appropriated for purposes of this paragraph, including clinical research positions that continue from and were funded in prior distribution periods, the commissioner shall eliminate one-half of the clinical research positions submitted by each consortium or teaching general hospital rounded down to the nearest one position. Such reduction shall be repeated until the dollar amount for the total number of clinical research positions in the region does not exceed the total amount appropriated for purposes of this paragraph. If the repeated reduction of the total number of clinical research positions in the region by one-half does not render a total funding amount that is equal to or less than the total amount reserved for that region within the appropriation, the funding for each clinical research position in that region shall be reduced proportionally in one thousand dollar increments until the total dollar amount for the total number of clinical research positions in that region does not exceed the total amount reserved for that region within the appropriation. Any reduction in funding will be effective for the duration of the award. No clinical research positions that continue from and were funded in prior distribution periods shall be eliminated or reduced by such methodology.

(D) Each consortium or teaching general hospital shall receive its annual distribution amount in accordance with the following:

(I) Each consortium or teaching general hospital with a one-year ECRIP award shall receive its annual distribution amount in full upon completion of the requirements set forth in items (I) and (II) of clause (G) of this subparagraph. The requirements set forth in items (IV) and (V) of clause (G) of this subparagraph must be completed by the consortium or teaching general hospital in order for the consortium or teaching general hospital to be eligible to apply for ECRIP funding in any subsequent funding cycle.

(II) Each consortium or teaching general hospital with a two-year ECRIP award shall receive its first annual distribution amount in full upon completion of the requirements set forth in items (I) and (II) of clause (G) of this subparagraph. Each consortium or teaching general hospital will receive its second annual distribution amount in full upon completion of the requirements set forth in item (III) of clause (G) of this subparagraph. The requirements set forth in items (IV) and (V) of clause (G) of this subparagraph must be completed by the consortium or teaching general hospital in order for the consortium or teaching general hospital to be eligible to apply for ECRIP funding in any subsequent funding cycle.

(E) Each consortium or teaching general hospital receiving distributions pursuant to this subparagraph shall reserve seventy-five thousand dollars to primarily fund salary and fringe benefits of the clinical research position with the remainder going to fund the development of faculty who are involved in biomedical research, training and clinical care.

(F) Undistributed or returned funds available to fund clinical research positions pursuant to this paragraph for a distribution period shall be available to fund clinical research positions in a subsequent distribution period.

(G) In order to be eligible for distributions pursuant to this subparagraph, each consortium and teaching general hospital shall provide to the commissioner by July first of each distribution period, the following data and information on a hospital-specific basis. Such data and information shall be certified as to accuracy and completeness by the chief executive officer, chief financial officer or chair of the consortium governing body of each consortium or teaching general hospital and shall be maintained by each consortium and teaching general hospital for five years from the date of submission:

(I) For each clinical research position, information on the type, scope, training objectives, institutional support, clinical research experience of the sponsor-mentor, plans for submitting research outcomes to peer reviewed journals and at scientific meetings, including a meeting sponsored by the department, the name of a principal contact person responsible for tracking the career development of researchers placed in clinical research positions, as defined in paragraph (c) of

subdivision one of this section, and who is authorized to certify to the commissioner that all the requirements of the clinical research training objectives set forth in this subparagraph shall be met. Such certification shall be provided by July first of each distribution period;

(II) For each clinical research position, information on the name, citizenship status, medical education and training, and medical license number of the researcher, if applicable, shall be provided by December thirty-first of the calendar year following the distribution period;

(III) Information on the status of the clinical research plan, accomplishments, changes in research activities, progress, and performance of the researcher shall be provided upon completion of one-half of the award term;

(IV) A final report detailing training experiences, accomplishments, activities and performance of the clinical researcher, and data, methods, results and analyses of the clinical research plan shall be provided three months after the clinical research position ends; and

(V) Tracking information concerning past researchers, including but not limited to (A) background information, (B) employment history, (C) research status, (D) current research activities, (E) publications and presentations, (F) research support, and (G) any other information necessary to track the researcher; and

(VI) Any other data or information required by the commissioner to implement this subparagraph.

(H) Notwithstanding any inconsistent provision of this subdivision, for periods on and after April first, two thousand thirteen, ECRIP grant awards shall be made in accordance with rules and regulations promulgated by the commissioner. Such regulations shall, at a minimum:

(1) provide that ECRIP grant awards shall be made with the objective of securing federal funding for biomedical research, training clinical researchers, recruiting national leaders as faculty to act as mentors, and training residents and fellows in biomedical research skills;

(2) provide that ECRIP grant applicants may include interdisciplinary research teams comprised of teaching general hospitals acting in collaboration with entities including but not limited to medical centers, hospitals, universities and local health departments;

(3) provide that applications for ECRIP grant awards shall be based on

such information requested by the commissioner, which shall include but not be limited to hospital-specific data;

(4) establish the qualifications for investigators and other staff required for grant projects eligible for ECRIP grant awards; and

(5) establish a methodology for the distribution of funds under ECRIP grant awards.

(c) Physician loan repayment program. One million nine hundred sixty thousand dollars for the period January first, two thousand eight through December thirty-first, two thousand eight, one million nine hundred sixty thousand dollars for the period January first, two thousand nine through December thirty-first, two thousand nine, one million nine hundred sixty thousand dollars for the period January first, two thousand ten through December thirty-first, two thousand ten, four hundred ninety thousand dollars for the period January first, two thousand eleven through March thirty-first, two thousand eleven, one million seven hundred thousand dollars each state fiscal year for the period April first, two thousand eleven through March thirty-first, two thousand fourteen, up to one million seven hundred five thousand dollars each state fiscal year for the period April first, two thousand fourteen through March thirty-first, two thousand seventeen, up to one million seven hundred five thousand dollars each state fiscal year for the period April first, two thousand seventeen through March thirty-first, two thousand twenty, up to one million seven hundred five thousand dollars each state fiscal year for the period April first, two thousand twenty through March thirty-first, two thousand twenty-three, up to one million seven hundred five thousand dollars each state fiscal year for the period April first, two thousand twenty-three through March thirty-first, two thousand twenty-six, and up to one million seven hundred five thousand dollars each state fiscal year for the period April first, two thousand twenty-six through March thirty-first, two thousand twenty-nine, shall be set aside and reserved by the commissioner from the regional pools established pursuant to subdivision two of this section and shall be available for purposes of physician loan repayment in accordance with subdivision ten of this section. Notwithstanding any contrary provision of this section, sections one hundred twelve and one hundred sixty-three of the state finance law, or any other contrary provision of law, such funding shall be allocated

regionally with one-third of available funds going to New York city and two-thirds of available funds going to the rest of the state and shall be distributed in a manner to be determined by the commissioner without a competitive bid or request for proposal process as follows:

(i) Funding shall first be awarded to repay loans of up to twenty-five physicians who train in primary care or specialty tracks in teaching general hospitals, and who enter and remain in primary care or specialty practices in underserved communities, as determined by the commissioner.

(ii) After distributions in accordance with subparagraph (i) of this paragraph, all remaining funds shall be awarded to repay loans of physicians who enter and remain in primary care or specialty practices in underserved communities, as determined by the commissioner, including but not limited to physicians working in general hospitals, or other health care facilities.

(iii) In no case shall less than fifty percent of the funds available pursuant to this paragraph be distributed in accordance with subparagraphs (i) and (ii) of this paragraph to physicians identified by general hospitals.

(iv) In addition to the funds allocated under this paragraph, for the period April first, two thousand fifteen through March thirty-first, two thousand sixteen, two million dollars shall be available for the purposes described in subdivision ten of this section;

(v) In addition to the funds allocated under this paragraph, for the period April first, two thousand sixteen through March thirty-first, two thousand seventeen, two million dollars shall be available for the purposes described in subdivision ten of this section;

(vi) Notwithstanding any provision of law to the contrary, and subject to the extension of the Health Care Reform Act of 1996, sufficient funds shall be available for the purposes described in subdivision ten of this section in amounts necessary to fund the remaining year commitments for awards made pursuant to subparagraphs (iv) and (v) of this paragraph.

(d) Physician practice support. Four million nine hundred thousand dollars for the period January first, two thousand eight through December thirty-first, two thousand eight, four million nine hundred thousand dollars annually for the period January first, two thousand nine through December thirty-first, two thousand ten, one million two hundred twenty-five thousand dollars for the period January first, two

thousand eleven through March thirty-first, two thousand eleven, four million three hundred thousand dollars each state fiscal year for the period April first, two thousand eleven through March thirty-first, two thousand fourteen, up to four million three hundred sixty thousand dollars each state fiscal year for the period April first, two thousand fourteen through March thirty-first, two thousand seventeen, up to four million three hundred sixty thousand dollars for each state fiscal year for the period April first, two thousand seventeen through March thirty-first, two thousand twenty, up to four million three hundred sixty thousand dollars for each fiscal year for the period April first, two thousand twenty through March thirty-first, two thousand twenty-three, up to four million three hundred sixty thousand dollars for each fiscal year for the period April first, two thousand twenty-three through March thirty-first, two thousand twenty-six, and up to four million three hundred sixty thousand dollars for each fiscal year for the period April first, two thousand twenty-six through March thirty-first, two thousand twenty-nine, shall be set aside and reserved by the commissioner from the regional pools established pursuant to subdivision two of this section and shall be available for purposes of physician practice support. Notwithstanding any contrary provision of this section, sections one hundred twelve and one hundred sixty-three of the state finance law, or any other contrary provision of law, such funding shall be allocated regionally with one-third of available funds going to New York city and two-thirds of available funds going to the rest of the state and shall be distributed in a manner to be determined by the commissioner without a competitive bid or request for proposal process as follows:

(i) Preference in funding shall first be accorded to teaching general hospitals for up to twenty-five awards, to support costs incurred by physicians trained in primary or specialty tracks who thereafter establish or join practices in underserved communities, as determined by the commissioner.

(ii) After distributions in accordance with subparagraph (i) of this paragraph, all remaining funds shall be awarded to physicians to support the cost of establishing or joining practices in underserved communities, as determined by the commissioner, and to hospitals and other health care providers to recruit new physicians to provide

services in underserved communities, as determined by the commissioner.

(iii) In no case shall less than fifty percent of the funds available pursuant to this paragraph be distributed to general hospitals in accordance with subparagraphs (i) and (ii) of this paragraph.

(e) Work group. For funding available pursuant to paragraphs (c), (d) and (e) of this subdivision:

(i) The department shall appoint a work group from recommendations made by associations representing physicians, general hospitals and other health care facilities to develop a streamlined application process by June first, two thousand twelve.

(ii) Subject to available funding, applications shall be accepted on a continuous basis. The department shall provide technical assistance to applicants to facilitate their completion of applications. An applicant shall be notified in writing by the department within ten days of receipt of an application as to whether the application is complete and if the application is incomplete, what information is outstanding. The department shall act on an application within thirty days of receipt of a complete application.

(f) Study on physician workforce. Five hundred ninety thousand dollars annually for the period January first, two thousand eight through December thirty-first, two thousand ten, one hundred forty-eight thousand dollars for the period January first, two thousand eleven through March thirty-first, two thousand eleven, five hundred sixteen thousand dollars each state fiscal year for the period April first, two thousand eleven through March thirty-first, two thousand fourteen, up to four hundred eighty-seven thousand dollars each state fiscal year for the period April first, two thousand fourteen through March thirty-first, two thousand seventeen, up to four hundred eighty-seven thousand dollars for each state fiscal year for the period April first, two thousand seventeen through March thirty-first, two thousand twenty, up to four hundred eighty-seven thousand dollars each state fiscal year for the period April first, two thousand twenty through March thirty-first, two thousand twenty-three, up to four hundred eighty-seven thousand dollars each state fiscal year for the period April first, two thousand twenty-three through March thirty-first, two thousand twenty-six, and up to four hundred eighty-seven thousand dollars each state fiscal year for the period April first, two thousand twenty-six

through March thirty-first, two thousand twenty-nine, shall be set aside and reserved by the commissioner from the regional pools established pursuant to subdivision two of this section and shall be available to fund a study of physician workforce needs and solutions including, but not limited to, an analysis of residency programs and projected physician workforce and community needs. The commissioner shall enter into agreements with one or more organizations to conduct such study based on a request for proposal process.

(g) Scholars in medicine and science and scholarships in medicine programs. Notwithstanding any inconsistent provision of section one hundred twelve or one hundred sixty-three of the state finance law or any other law, one million nine hundred sixty thousand dollars annually for the period January first, two thousand eight through December thirty-first, two thousand ten, four hundred ninety thousand dollars for the period January first, two thousand eleven through March thirty-first, two thousand eleven, one million seven hundred thousand dollars each state fiscal year for the period April first, two thousand eleven through March thirty-first, two thousand fourteen, up to one million six hundred five thousand dollars each state fiscal year for the period April first, two thousand fourteen through March thirty-first, two thousand seventeen, up to one million six hundred five thousand dollars each state fiscal year for the period April first, two thousand seventeen through March thirty-first, two thousand twenty, up to one million six hundred five thousand dollars each state fiscal year for the period April first, two thousand twenty through March thirty-first, two thousand twenty-three, up to one million six hundred five thousand dollars each state fiscal year for the period April first, two thousand twenty-three through March thirty-first, two thousand twenty-six, and up to one million six hundred five thousand dollars each state fiscal year for the period April first, two thousand twenty-six through March thirty-first, two thousand twenty-nine, shall be set aside and reserved by the commissioner from the regional pools established pursuant to subdivision two of this section and shall be available for distributions to the Associated Medical Schools of New York to fund its scholars in medicine and science and scholarships in medicine programs including existing and new post-baccalaureate programs for minority and economically disadvantaged students and encourage participation from all

medical schools in New York. The associated medical schools of New York shall report to the commissioner on an annual basis regarding the use of funds for such purpose in such form and manner as specified by the commissioner.

(h) In the event there are undistributed funds within amounts made available for distributions pursuant to this subdivision, such funds may be reallocated and distributed in current or subsequent distribution periods in a manner determined by the commissioner for any purpose set forth in this subdivision.

5-b. Other graduate medical education reforms. Any funds specifically appropriated for the purposes of this subdivision shall be used to fund innovative graduate medical education reforms to be determined by the commissioner in consultation with the council, including, but not limited to, (a) development of primary care residency and specialty position training tracks for graduates to serve rural or inner-city communities, (b) development of regional pilot network programs to affiliate major academic centers with community teaching general hospitals, (c) support for faculty development programs, including designating faculty to mentor students and residents in primary care, (d) support training in fields which serve the geriatric population; (e) increase training in cultural competence, (f) promote training of physicians who will serve persons with developmental disabilities, and (g) any other reforms necessary to improve patient care management, interdisciplinary training, or quality in graduate medical education programs. Such funding shall be distributed to consortia and teaching general hospitals in each region on a competitive basis pursuant to a request for proposal process.

6. Consortia. (a) A consortium must:

(i) have a governing body and such committees as appropriate which should be responsible for the policy coordination and administration of residency programs and which provides all members of the consortium an opportunity to participate in the establishment of consortium policy goals and objectives;

(ii) have procedures and criteria for processing applications by health care providers in the region for participation in the consortium;

(iii) establish policies to evaluate and to maintain and improve the quality of training programs;

(iv) have a mechanism for resolving educational and financial allocation disputes among participating members; and

(v) comply with such further requirements as the commissioner may reasonably require for purposes of implementing this section to achieve state policy goals and objectives regarding graduate medical education.

(b) Nothing in this section shall preclude a consortium from having members from different regions and from allocating regional pool distributions among regions.

(c) To the extent consortia might be anti-competitive within the meaning and intent of the federal and state antitrust laws, it is the intent of the legislature to supplant competition with such arrangements to the extent necessary to accomplish the purposes of this section, and provide state action immunity under the federal antitrust laws with respect to the planning, implementation and operation of consortia and participation therein by hospitals, other providers of health care services, medical schools, payors and consumers.

(d) Each approved consortium shall submit a plan for each period defined in subdivision two of this section for approval by the commissioner, in consultation with the council, for allocation of funds collected pursuant to paragraph (c) of subdivision three of this section to participating general hospitals which provide graduate medical education and sites other than general hospitals at which residents receive training.

8. Revenue from distributions pursuant to this section shall be included in gross revenue received for purposes of the assessments pursuant to subdivision eighteen of section twenty-eight hundred seven-c of this article and for purposes of the assessments pursuant to section twenty-eight hundred seven-d of this article.

10. Physician loan repayment program. (a) Beginning January first, two thousand eight, the commissioner is authorized, within amounts available pursuant to subdivision five-a of this section, to make loan repayment awards to primary care physicians or other physician specialties determined by the commissioner to be in short supply,

licensed to practice medicine in New York state, who agree to practice for at least five years in an underserved area, as determined by the commissioner. Such physician shall be eligible for a loan repayment award of up to one hundred fifty thousand dollars over a five year period distributed as follows: fifteen percent of total loan debt not to exceed twenty thousand dollars for the first year; fifteen percent of total loan debt not to exceed twenty-five thousand dollars for the second year; twenty percent of total loan debt not to exceed thirty-five thousand dollars for the third year; and twenty-five percent of total loan debt not to exceed thirty-five thousand dollars per year for the fourth year; and any unpaid balance of the total loan debt not to exceed the maximum award amount for the fifth year of practice in such area.

(b) Loan repayment awards made to a physician pursuant to paragraph (a) of this subdivision shall not exceed the total qualifying outstanding debt of the physician from student loans to cover tuition and other related educational expenses, made by or guaranteed by the federal or state government, or made by a lending or educational institution approved under title IV of the federal higher education act. Loan repayment awards shall be used solely to repay such outstanding debt.

(c) In the event that a five-year commitment pursuant to the agreement referenced in paragraph (a) of this subdivision is not fulfilled, the recipient shall be responsible for repayment in amounts which shall be calculated in accordance with the formula set forth in subdivision (b) of section two hundred fifty-four-o of title forty-two of the United States Code, as amended.

(d) The commissioner is authorized to apply any funds available for purposes of paragraph (a) of this subdivision for use as matching funds for federal grants for the purpose of assisting states in operating loan repayment programs pursuant to section three hundred thirty-eight I of the public health service act.

(e) The commissioner may postpone, change or waive the service obligation and repayment amounts set forth in paragraphs (a) and (c), respectively of this subdivision in individual circumstances where there is compelling need or hardship.

(f)(i) When a physician is not actually practicing in an underserved area, he or she shall be deemed to be practicing in an underserved area

if he or she practices in a facility or physician's office that primarily serves an underserved population as determined by the commissioner, without regard to whether the population or the facility or physician's office is located in an underserved area.

(ii) In making criteria and determinations as to whether an area is an underserved area or whether a facility or physician's office primarily serves an underserved population, the commissioner may make separate criteria and determinations for different specialties.

11. The commissioner shall conduct a study of (i) the need for expansion of the physician loan repayment program under subdivision ten of this section to include dentists, midwives, nurse practitioners, and physician assistants; (ii) the level of funding appropriate for that expansion; and (iii) appropriate sources of funding for the future of the program and the expansion. The study may include examination of possible expansion of other programs to recruit people to enter health care professions and serve in underserved areas. The commissioner shall conduct the study in consultation with representatives of the affected professions, educational institutions and training programs that educate and train people for those professions, appropriate health care providers, affected communities and other interested parties. The commissioner shall report to the governor and the legislature on the findings of the study and recommendations by December first, two thousand eight.

12. Notwithstanding any provision of law to the contrary, applications submitted on or after April first, two thousand sixteen, for the physician loan repayment program pursuant to paragraph (c) of subdivision five-a of this section and subdivision ten of this section or the physician practice support program pursuant to paragraph (d) of subdivision five-a of this section, shall be subject to the following changes:

(a) Awards shall be made from the total funding available for new awards under the physician loan repayment program and the physician practice support program, with neither program limited to a specific funding amount within such total funding available;

(b) An applicant may apply for an award for either physician loan

repayment or physician practice support, but not both;

(c) An applicant shall agree to practice for three years in an underserved area and each award shall provide up to forty thousand dollars for each of the three years; and

(d) To the extent practicable, awards shall be timed to be of use for job offers made to applicants.

§ 2807-n. Palliative care education and training. 1. Definitions. The following words or phrases as used in this section shall have the following meanings:

(a) "Palliative care" shall mean (i) the active, interdisciplinary care of patients with advanced, life limiting illness, focusing on relief of distressing physical and psychosocial symptoms and meeting spiritual needs. Its goal is achievement of the best quality of life for patients and families as defined by paragraph (b) of subdivision two of section four thousand twelve-b of this chapter; and (ii) it shall also include similar care for patients with chronic or acute pain.

(b) "Palliative care certified medical school" shall mean a medical school in the state which is an institution granting a degree of doctor of medicine or doctor of osteopathic medicine in accordance with regulations by the commissioner of education under subdivision two of section sixty-five hundred twenty-four of the education law, and which meets standards defined by the commissioner of health, after consultation with the council, pursuant to regulations, and used to determine whether a medical school is eligible for funding under this section.

(c) "Palliative care certified residency program" shall mean a graduate medical education program in the state which has received accreditation from a nationally recognized accreditation body for medical or osteopathic residency programs, and which meets standards defined by the commissioner, after consultation with the council, pursuant to regulations, and used to determine whether a residency training program is eligible for funding under this section.

(d) "New York state palliative care education and training council" or "council" shall mean the New York state palliative care education and training council established pursuant to subdivision six of this

section.

2. Grants for undergraduate medical education in palliative care. (a) The commissioner is authorized, within amounts appropriated for such purpose to make grants to palliative care certified medical schools to enhance the study of palliative care, increase the opportunities for undergraduate medical education in palliative care and encourage the education of physicians in palliative care.

(b) Grant proceeds under this subdivision may be used for faculty development in palliative care; recruitment of faculty with expertise in palliative care; costs incurred teaching medical students at hospital-based sites, non-hospital-based ambulatory care settings, palliative care sites, hospices, certified home health agencies, licensed long term home health care programs and AIDS home care programs including, but not limited to, personnel, administration and student-related expenses; expansion or development of programs that train physicians in palliative care; and other innovative programs designed to increase the competency of medical students to provide hospice or palliative care.

(c) Grants under this subdivision shall be awarded by the commissioner through a competitive application process to the council. The council shall make recommendations for funding to the commissioner. In making awards, consideration shall be given to applicants who:

(i) plan to incorporate palliative care longitudinally throughout the medical school curriculum according to professionally recognized standards including, but not limited to, a plan that covers the seven domains identified in the Palliative Education Assessment Tool (PEAT) as developed by the New York Academy of Medicine and the Associated Medical Schools of New York State and Weill Cornell Medical College;

(ii) function in collaboration with hospital-based palliative care programs and non-hospital-based sites; and

(iii) make complementary efforts to recruit or train qualified faculty in palliative care education.

(d) The intent of this subdivision is to augment or increase palliative care undergraduate medical education. Grant funding shall not be used to offset existing expenditures that the medical school has obligated or intends to obligate for palliative care education programs.

3. Grants for graduate medical education in palliative care. (a) The commissioner is authorized, within amounts appropriated for such purpose to make grants in support of palliative care certified residency education programs to establish or expand education in palliative care for graduate medical education, and to increase the opportunities for trainee education in palliative care in hospital-based palliative care programs or non-hospital-based care sites.

(b) Grants under this subdivision for graduate medical education and education in palliative care may be used for administration, faculty recruitment and development, start-up costs and costs incurred teaching palliative care in hospital-based palliative care programs or non-hospital-based care sites, including, but not limited to, personnel, administration and trainee related expenses and other expenses judged reasonable and necessary by the commissioner.

(c) Grants under this subdivision shall be awarded by the commissioner through a competitive application process to the council. The council shall make recommendations for funding to the commissioner. In making awards, the commissioner shall consider the extent to which the applicant:

(i) plans to incorporate palliative care longitudinally throughout the residency training program according to professionally recognized standards including, but not limited to, a plan that covers the seven domains identified in the Palliative Education Assessment Tool (PEAT) as developed by the New York Academy of Medicine and the Associated Medical Schools of New York State and Weill Cornell Medical College;

(ii) functions in collaboration with hospital-based palliative care programs or non-hospital-based sites, or both; and

(iii) makes complementary efforts to recruit or train qualified faculty in palliative care education.

(d) The intent of this subdivision is to augment or increase training in palliative care during residency. Grant funding shall not be used to offset existing expenditures the institution or program has obligated or intends to obligate for such training programs.

4. Centers for palliative care excellence. The commissioner shall designate organizations licensed pursuant to this article and article

forty of this chapter, upon successful application, as centers for palliative care excellence. Such designations shall be pursuant to an application as designed by the department, and based on service, staffing and other criteria as developed by the council. Such centers of excellence shall provide specialized palliative care, treatment, education and related services. Designation as a center for palliative care excellence shall not entitle a center to enhanced reimbursement, but may be utilized in outreach and other promotional activities.

5. Palliative care practitioner resource centers. The commissioner, in consultation with the council, may designate palliative care practitioner resource centers (a "resource center"). A resource center may be statewide or regional, and shall act as a source of technical information and guidance for practitioners on the latest palliative care strategies, therapies and medications. The department, in consultation with the council, may contract with not-for-profit organizations or associations to establish and manage resource centers. A resource center may charge a fee to defray the cost of the service.

6. New York state palliative care education and training council. (a) The New York state palliative care education and training council is established in the department as an expert panel in palliative medicine, education and training. Its members shall be appointed by the commissioner. The commissioner shall seek recommendations for appointments to such council from New York state-based health care professional, consumer, medical institutional and medical educational leaders. Members of the council shall include: nine representatives of medical schools and hospital organizations; two representatives of medical academies; two patient advocates; individual representatives of an organization broadly representative of physicians, internal medicine, family physicians, nursing, social work, hospice, home care, neurology, psychiatry, pediatrics, obstetrics-gynecology, surgery, and the hospital philanthropic community; and the executive director or a member of the governor's taskforce on life and the law and of the New York state council on graduate medical education. Members shall have expertise in palliative care or pain management. Members shall serve a term of three years with renewable terms. Members shall receive no compensation for

their services, but shall be allowed actual and necessary expenses in the performance of their duties.

(b) A chairperson and vice-chairperson of the council shall be elected annually by the council. The council shall meet upon the call of the chairperson, and may adopt bylaws consistent with this section.

(c) The commissioner shall designate such employees and provide other resources of the department as are reasonably necessary to provide support services to the council. The council, acting by the chair of the council, may employ additional staff and consultants and incur other expenses to carry out its duties, to be paid from amounts which may be made available to the council for that purpose.

(d) The council may provide technical information and guidance for practitioners on the latest palliative care strategies, therapies and medications.

7. Reports. The commissioner, in conjunction with the council, shall prepare and submit a report to the governor and the legislature, on or before February first, two thousand ten reporting the results and evaluating the effectiveness of this section.

§ 2807-o. Early intervention services pool. 1. Definitions. The following words or phrases as used in this section shall have the following meanings:

(a) "Early intervention services" shall mean services delivered to an eligible child, pursuant to an individualized family service plan under the early intervention program.

(b) "Early intervention program" shall mean the early intervention program for toddlers with disabilities and their families as created by title two-A of article twenty-five of this chapter.

(c) "Municipality" shall mean any county outside of the city of New York or the city of New York.

2. Payments for early intervention services. (a) The commissioner shall, from funds allocated for such purpose under paragraph (g) of subdivision six of section twenty-eight hundred seven-s of this article, make payments to municipalities and the state for the delivery of early

intervention services.

(b) Payments under this subdivision shall be made to municipalities and the state by the commissioner. Each municipality and the state of New York shall receive a share of such payments equal to its proportionate share of the total approved statewide dollars not reimbursable by the medical assistance program paid to providers of early intervention services by the state and municipalities on account of early intervention services in the last complete state fiscal year for which such data is available.

§ 2807-p. Comprehensive diagnostic and treatment centers indigent care program. 1. (a) For periods prior to July first, two thousand three, and on and after July first, two thousand five the commissioner is authorized to make payments to eligible diagnostic and treatment centers, to the extent of funds available therefor, up to forty-eight million dollars annually, to assist in meeting losses resulting from uncompensated care. The amount of funds available for such payments pursuant to subdivision four of this section shall be the amount remaining after the allocation provided in section seven of chapter four hundred thirty-three of the laws of nineteen hundred ninety-seven as amended by section seventy-five of chapter one of the laws of nineteen hundred ninety-nine.

(b) For periods on and after July first, two thousand three, through June thirtieth, two thousand five, the commissioner shall, subject to the availability of federal financial participation, adjust medical assistance rates of payment to assist in meeting losses resulting from uncompensated care, provided, however, in the event federal financial participation is not available, the commissioner is authorized to continue to make payments to eligible diagnostic and treatment centers, to the extent of funds available therefor, in accordance with provisions of paragraph (a) of this subdivision and without regard to the provisions of subdivisions four-a and four-b of this section.

(c) Notwithstanding paragraph (a) of this subdivision, subdivision four-c of this section or any other inconsistent provision of this section, distributions made pursuant to this section for annual periods on and after July first, two thousand nine shall be subject to a uniform

reduction of two percent.

(d) The commissioner may require facilities receiving distributions pursuant to this section as a condition of participating in such distributions, to provide reports and data to the department as the commissioner deems necessary to adequately implement the provisions of this section.

2. Definitions. (a) "Eligible diagnostic and treatment centers", for purposes of this section, shall mean voluntary non-profit and publicly sponsored diagnostic and treatment centers providing a comprehensive range of primary health care services which can demonstrate losses from disproportionate share of uncompensated care during a base period two years prior to the grant period; provided that for periods on and after January first, two thousand four an eligible diagnostic and treatment center shall not include any voluntary non-profit diagnostic and treatment center controlling, controlled by or under common control with a health maintenance organization, as defined by subdivision one of section forty-four hundred one of this chapter; provided further that for purposes of this section, a health maintenance organization shall not include a prepaid health services plan licensed pursuant to section forty-four hundred three-a of this chapter. For periods on and after July first, two thousand three, the base period and the grant period shall be the calendar year.

(b) "Uncompensated care need", for purposes of this section, means losses from reported self-pay and free visits multiplied by the facility's medical assistance payment rate for the applicable distribution year, offset by payments received from such patients during the reporting period.

3. (a) During the period January first, nineteen hundred ninety-seven through September thirtieth, nineteen hundred ninety-seven and for each fiscal year period commencing on October first thereafter through December thirty-first, nineteen hundred ninety-nine and for periods on and after January first, two thousand, diagnostic and treatment centers shall be eligible for allocations of funds or for rate adjustments determined in accordance with this section to reflect the needs of the diagnostic and treatment center for the financing of losses resulting

from uncompensated care.

(b) A diagnostic and treatment center qualifying for a distribution or a rate adjustment pursuant to this section shall provide assurances satisfactory to the commissioner that it shall undertake reasonable efforts to maintain financial support from community and public funding sources and reasonable efforts to collect payments for services from third-party insurance payors, governmental payors and self-paying patients.

(c) To be eligible for an allocation of funds or a rate adjustment pursuant to this section, a diagnostic and treatment center must provide a comprehensive range of primary health care services and must demonstrate that a minimum of five percent of total clinic visits reported during the applicable base year period were to uninsured individuals. The commissioner may retrospectively reduce the allocations of funds or the rate adjustments to a diagnostic and treatment center if it is determined that provider management actions or decisions have caused a significant reduction for the grant period in the delivery of comprehensive primary health care services to uncompensated care residents of the community.

4. (a) (i) The total amount of funds to be allocated and distributed for uncompensated care to eligible voluntary non-profit diagnostic and treatment centers for a distribution period prior to July first, two thousand three, and on and after July first, two thousand five through December thirty-first, two thousand six, in accordance with this subdivision shall be limited to thirty-three percent of the funds available therefor pursuant to paragraph (a) of subdivision one of this section and, for the period January first, two thousand seven through December thirty-first, two thousand seven, such distributions shall be limited to sixteen and one-half percent of the funds available therefor.

(ii) The total amount of funds to be allocated and distributed for uncompensated care to eligible publicly sponsored diagnostic and treatment centers for a grant period prior to July first, two thousand three, and on and after July first, two thousand five through December thirty-first, two thousand six, in accordance with this subdivision shall be limited to sixty-seven percent of funds available therefor pursuant to paragraph (a) of subdivision one of this section and, for

the period January first, two thousand seven through December thirty-first, two thousand seven, such distributions shall be limited to thirty-three and one-half percent of the funds available therefor; provided, however, that for periods up through December thirty-first, two thousand seven, forty-one percent of the amount of funds allocated for distribution to eligible publicly sponsored diagnostic and treatment centers shall be available for clinics operating under the auspices of the New York city health and hospitals corporation as established by chapter one thousand sixteen of the laws of nineteen hundred sixty-nine as amended.

(iii) (A) Notwithstanding any inconsistent provision of this paragraph, for the period January first, nineteen hundred ninety-seven through December thirty-first, nineteen hundred ninety-nine and for periods on and after January first, two thousand through December thirty-first, two thousand two, and for periods on and after January first, two thousand four through December thirty-first, two thousand seven, in the event that federal financial participation is not available for rate adjustments pursuant to this section, diagnostic and treatment centers which received an allowance pursuant to paragraph (f) of subdivision two of section twenty-eight hundred seven of this article for the period through December thirty-first, nineteen hundred ninety-six shall receive an annual uncompensated care distribution allocation of funds of not less than the amount that would have been received for any losses associated with the delivery of bad debt and charity care for nineteen hundred ninety-five had the provisions of paragraph (f) of subdivision two of section twenty-eight hundred seven of this article remained in effect, provided, however, that for the period January first, two thousand seven through December thirty-first, two thousand seven, the dollar value of the application of the provisions of this subparagraph for any such diagnostic and treatment center shall be reduced by fifty percent.

(B) For the period January first, two thousand three through June thirtieth, two thousand three, and for the period July first, two thousand three through December thirty-first, two thousand three and in the event that federal financial participation is not available for rate adjustments pursuant to this section, each such diagnostic and treatment center shall receive an uncompensated care distribution allocation of

funds of not less than one-half the amount calculated pursuant to clause (A) of this subparagraph.

(b) (i) A nominal payment amount for the financing of losses associated with the delivery of uncompensated care will be established for each eligible diagnostic and treatment center. The nominal payment amount shall be calculated as the sum of the dollars attributable to the application of an incrementally increasing nominal coverage percentage of base year period losses associated with the delivery of uncompensated care for percentage increases in the relationship between base year period eligible uninsured care clinic visits and base year period total clinic visits according to the following scale:

% of eligible bad debt and charity care clinic visits to total visits	% of nominal financial loss coverage
up to 15%	50%
15 - 30%	75%
30%+	100%

(ii) For periods prior to January first, two thousand eight, if the sum of the nominal payment amounts for all eligible voluntary non-profit diagnostic and treatment centers or for all eligible public diagnostic and treatment centers or for all clinics operating under the auspices of the New York city health and hospitals corporation is less than the amount allocated for uncompensated care allowances pursuant to paragraph (a) of this subdivision for such diagnostic and treatment centers respectively, the nominal coverage percentages of base year period losses associated with the delivery of uncompensated care pursuant to this scale may be increased to not more than one hundred percent for voluntary non-profit diagnostic and treatment centers or for public diagnostic and treatment centers or for all clinics operating under the auspices of the New York city health and hospitals corporation in accordance with rules and regulations adopted by the council and approved by the commissioner.

(c) For periods prior to January first, two thousand eight, the uncompensated care allocations of funds for each eligible voluntary non-profit diagnostic and treatment center, as computed in accordance with paragraph (a) of this subdivision, shall be based on the dollar value of the result of the ratio of total funds allocated for distributions for voluntary non-profit diagnostic and treatment centers

pursuant to paragraph (a) of this subdivision to the total statewide nominal payment amounts for all eligible voluntary non-profit diagnostic and treatment centers determined in accordance with paragraph (b) of this subdivision applied to the nominal payment amount for each such diagnostic and treatment center.

(d) For periods prior to January first, two thousand eight, the uncompensated care allocations of funds for each eligible public diagnostic and treatment center, other than clinics operating under the auspices of the New York city health and hospitals corporation and as computed in accordance with paragraph (a) of this subdivision, shall be based on the dollar value of the result of the ratio of total funds allocated for distributions for public diagnostic and treatment centers, other than clinics operating under the auspices of the New York city health and hospitals corporation, pursuant to paragraph (a) of this subdivision to the total statewide nominal payment amounts for all eligible public diagnostic and treatment centers, other than clinics operating under the auspices of the New York city health and hospitals corporation, determined in accordance with paragraph (b) of this subdivision applied to the nominal payment amount for each such diagnostic and treatment center.

(e) For periods prior to January first, two thousand eight, the uncompensated care grant allocations of funds for each eligible public diagnostic and treatment center operating under the auspices of the New York city health and hospitals corporation, as computed in accordance with paragraph (a) of this subdivision, shall be based on the dollar value of the result of the ratio of total funds allocated for distributions for public diagnostic and treatment centers operating under the auspices of the New York city health and hospitals corporation pursuant to paragraph (a) of this subdivision to the total statewide nominal payment amounts for all eligible public diagnostic and treatment centers operating under the auspices of the New York city health and hospitals corporation determined in accordance with paragraph (b) of this subdivision applied to the nominal payment amount for each such diagnostic and treatment center.

(f) For periods prior to January first, two thousand eight, any residual amount allocated for distribution to a classification of diagnostic and treatment centers in accordance with this subdivision

shall be reallocated by the commissioner for distributions to the other classifications based on remaining need.

(g) For periods on and after January first, two thousand seven, the uncompensated care allocations of funds for each eligible diagnostic and treatment center, other than allocations made pursuant to paragraphs (c), (d), (e) or (f) of this subdivision, shall be based on the dollar value of the result of the ratio of total funds allocated for distributions for all eligible diagnostic and treatment centers to the total statewide nominal payment amounts for all eligible diagnostic and treatment centers determined in accordance with paragraph (b) of this subdivision applied to the nominal payment amount for each such diagnostic and treatment center.

4-a. (a)(i) For periods on and after July first, two thousand three, through June thirtieth, two thousand five, funds shall be made available for adjustments to rates of payments made pursuant to paragraph (b) of subdivision one of this section for eligible voluntary non-profit diagnostic and treatment centers in accordance with subparagraphs (ii) and (iii) of this paragraph, for the following periods in the following aggregate amounts:

(A) For the period July first, two thousand three through December thirty-first, two thousand three, up to seven million five hundred thousand dollars;

(B) For the period January first, two thousand four through December thirty-first, two thousand four, up to fifteen million dollars;

(C) For the period January first, two thousand five through June thirtieth, two thousand five, up to seven million five hundred thousand dollars.

(ii) A nominal payment amount for the financing of losses associated with the delivery of uncompensated care will be established for each eligible diagnostic and treatment center. The nominal payment amount shall be calculated as the sum of the dollars attributable to the application of an incrementally increasing nominal coverage percentage of base year period losses associated with the delivery of uncompensated care for percentage increases in the relationship between base year period eligible uninsured care clinic visits and base year period total clinic visits according to the following scale:

% of eligible bad debt and charity care clinic visits to total visits	% of nominal financial loss coverage
up to 15%	50%
15 - 30%	75%
30%+	100%

(iii) The uncompensated care rate adjustments for each eligible voluntary non-profit diagnostic and treatment center shall be based on the dollar value of the result of the ratio of total funds allocated for distributions for voluntary non-profit diagnostic and treatment centers pursuant to subparagraph (i) of this paragraph, to the total statewide nominal payment amounts for all eligible voluntary non-profit diagnostic and treatment centers determined in accordance with subparagraph (ii) of this paragraph applied to the nominal payment amount for each such diagnostic and treatment center.

(b)(i) For periods on and after July first, two thousand three through June thirtieth, two thousand five, funds shall be made available for adjustments to rates of payments made pursuant to paragraph (b) of subdivision one of this section for eligible public diagnostic and treatment centers, other than clinics operated under the auspices of the New York city health and hospitals corporation, in accordance with subparagraphs (ii) and (iii) of this paragraph, for the following periods in the following aggregate amounts:

(A) For the period July first, two thousand three through December thirty-first, two thousand three, up to nine million dollars;

(B) For the period January first, two thousand four through December thirty-first, two thousand four, up to eighteen million dollars;

(C) For the period January first, two thousand five through June thirtieth, two thousand five, up to nine million dollars.

(ii) A nominal payment amount for the financing of losses associated with the delivery of uncompensated care will be established for each eligible diagnostic and treatment center. The nominal payment amount shall be calculated as the sum of the dollars attributable to the application of an incrementally increasing nominal coverage percentage of base year period losses associated with the delivery of uncompensated care for percentage increases in the relationship between base year period eligible uninsured care clinic visits and base year period total clinic visits according to the following scale:

% of eligible bad debt and charity care clinic visits to total visits	% of nominal financial loss coverage
up to 15%	50%
15 - 30%	75%
30%+	100%

(iii) The uncompensated care rate adjustments for each eligible public diagnostic and treatment center, other than clinics operating under the auspices of the New York city health and hospitals corporation, shall be based on the dollar value of the result of the ratio of total funds allocated for distributions for public diagnostic and treatment centers, other than clinics operating under the auspices of the New York city health and hospitals corporation, pursuant to subparagraph (i) of this paragraph to the total statewide nominal payment amounts for all eligible public diagnostic and treatment centers, other than clinics operating under the auspices of the New York city health and hospitals corporation, determined in accordance with subparagraph (ii) of this paragraph applied to the nominal payment amount for each such diagnostic and treatment center.

(c)(i) For periods on and after July first, two thousand three, through June thirtieth, two thousand five, funds shall be made available for adjustments to rates of payments made pursuant to paragraph (b) of subdivision one of this section for eligible public diagnostic and treatment centers operating under the auspices of the New York city health and hospitals corporation, in accordance with subparagraphs (ii) and (iii) of this paragraph, for the following periods in the following aggregate amounts:

(A) For the period July first, two thousand three through December thirty-first, two thousand three, up to six million dollars;

(B) For the period January first, two thousand four through December thirty-first, two thousand four, up to twelve million dollars;

(C) For the period January first, two thousand five through June thirtieth, two thousand five, up to six million dollars.

(ii) A nominal payment amount for the financing of losses associated with the delivery of uncompensated care will be established for each eligible diagnostic and treatment center. The nominal payment amount shall be calculated as the sum of the dollars attributable to the application of an incrementally increasing nominal coverage percentage

of base year period losses associated with the delivery of uncompensated care for percentage increases in the relationship between base year period eligible uninsured care clinic visits and base year period total clinic visits according to the following scale:

% of eligible bad debt and charity care clinic visits to total visits	% of nominal financial loss coverage
up to 15%	50%
15 - 30%	75%
30%+	100%

(iii) The uncompensated care rate adjustment, for each eligible public diagnostic and treatment center operating under the auspices of the New York city health and hospitals corporation shall be based on the dollar value of the result of the ratio of total funds allocated for distributions for public diagnostic and treatment centers operating under the auspices of the New York city health and hospitals corporation pursuant to subparagraph (i) of this paragraph to the total statewide nominal payment amounts for all eligible public diagnostic and treatment centers operating under the auspices of the New York city health and hospitals corporation determined in accordance with subparagraph (ii) of this paragraph applied to the nominal payment amount for each such diagnostic and treatment center.

(d) (i) Notwithstanding the provisions of paragraph (b) of this subdivision and any other provisions of this chapter, municipalities which received state aid pursuant to article two of this chapter for the nineteen hundred eighty-nine--nineteen hundred ninety state fiscal year in support of non-hospital based free-standing or local health department operated general medical clinics shall receive an uncompensated care rate adjustment for the period July first, two thousand three through December thirty-first, two thousand three, of not less than one-half the amount received in the nineteen hundred eighty-nine--nineteen hundred ninety state fiscal year for general medical clinics.

(ii) For the period January first, two thousand four through December thirty-first, two thousand four, each such municipality shall receive an uncompensated care rate adjustment of not less than twice the amount calculated pursuant to subparagraph (i) of this paragraph.

(iii) For the period January first, two thousand five through June

thirtieth, two thousand five, each such municipality shall receive an annual uncompensated care rate adjustment of not less than the amount calculated pursuant to subparagraph (i) of this paragraph.

(e) (i) Notwithstanding any inconsistent provision of this subdivision, for the period July first, two thousand three through December thirty-first, two thousand three, diagnostic and treatment centers which received an allowance pursuant to paragraph (f) of subdivision two of section twenty-eight hundred seven of this article for the period through December thirty-first, nineteen hundred ninety-six shall receive an uncompensated care rate adjustment of not less than one-half the amount that would have been received for any losses associated with the delivery of bad debt and charity care for nineteen hundred ninety-five had the provisions of paragraph (f) of subdivision two of section twenty-eight hundred seven of this article remained in effect.

(ii) For the period January first, two thousand four through December thirty-first, two thousand four, each such diagnostic and treatment center shall receive an uncompensated care rate adjustment of not less than twice the amount calculated pursuant to subparagraph (i) of this paragraph.

(iii) For the period January first, two thousand five through June thirtieth, two thousand five, each such diagnostic and treatment center shall receive an annual uncompensated care rate adjustment of not less than the amount calculated pursuant to subparagraph (i) of this paragraph, and shall be subject to subsequent adjustment or reconciliation.

(f) Any residual amount allocated for distribution to a classification of diagnostic and treatment centers in accordance with this subdivision shall be reallocated by the commissioner for distributions to the other classifications based on remaining need.

4-b. (a) For periods on and after July first, two thousand three, through June thirtieth, two thousand five, funds shall be made available for adjustments to rates of payment made pursuant to paragraph (b) of subdivision one of this section for eligible diagnostic and treatment centers with less than two years of operating experience, and diagnostic and treatment centers which have received certificate of need approval

on applications which indicate a significant increase in uninsured visits, for the following periods and in the following aggregate amounts:

(i) For the period July first, two thousand three through December thirty-first, two thousand three, up to one million five hundred thousand dollars;

(ii) For the period January first, two thousand four through December thirty-first, two thousand four, up to three million dollars;

(iii) For the period January first, two thousand five through June thirtieth, two thousand five, up to one million five hundred thousand dollars.

(b) To be eligible for a rate adjustment pursuant to this section, a diagnostic and treatment center shall be a voluntary, non-profit or publicly sponsored diagnostic and treatment center providing a comprehensive range of primary health care services and be eligible to receive a medicaid budgeted rate prior to April first of the applicable rate adjustment period after which time, the department shall issue rate adjustments pursuant to this subdivision for such periods. Rate adjustments made pursuant to this subdivision shall be allocated based upon each eligible facility's proportional share of costs for services rendered to uninsured patients which have otherwise not been used for establishing distributions pursuant to subdivision four-a of this section. For the purposes of this subdivision costs shall be measured by multiplying each facility's medicaid budgeted rate by the estimated number of visits reported for services anticipated to be rendered to uninsured patients meeting the aforementioned criteria, less any anticipated patient service revenues received from such uninsured patients, during the applicable rate adjustment period.

4-c. Notwithstanding any provision of law to the contrary, the commissioner shall make additional payments for uncompensated care to voluntary non-profit diagnostic and treatment centers that are eligible for distributions under subdivision four of this section in the following amounts: for the period June first, two thousand six through December thirty-first, two thousand six, in the amount of seven million five hundred thousand dollars, for the period January first, two thousand seven through December thirty-first, two thousand seven, seven

million five hundred thousand dollars, for the period January first, two thousand eight through December thirty-first, two thousand eight, seven million five hundred thousand dollars, for the period January first, two thousand nine through December thirty-first, two thousand nine, fifteen million five hundred thousand dollars, for the period January first, two thousand ten through December thirty-first, two thousand ten, seven million five hundred thousand dollars, for the period January first, two thousand eleven through December thirty-first, two thousand eleven, seven million five hundred thousand dollars, for the period January first, two thousand twelve through December thirty-first, two thousand twelve, seven million five hundred thousand dollars, for the period January first, two thousand thirteen through December thirty-first, two thousand thirteen, seven million five hundred thousand dollars, for the period January first, two thousand fourteen through December thirty-first, two thousand fourteen, seven million five hundred thousand dollars, for the period January first, two thousand fifteen through December thirty-first, two thousand fifteen, seven million five hundred thousand dollars, for the period January first two thousand sixteen through December thirty-first, two thousand sixteen, seven million five hundred thousand dollars, for the period January first, two thousand seventeen through December thirty-first, two thousand seventeen, seven million five hundred thousand dollars, for the period January first, two thousand eighteen through December thirty-first, two thousand eighteen, seven million five hundred thousand dollars, for the period January first, two thousand nineteen through December thirty-first, two thousand nineteen, seven million five hundred thousand dollars, for the period January first, two thousand twenty through December thirty-first, two thousand twenty, seven million five hundred thousand dollars, for the period January first, two thousand twenty-one through December thirty-first, two thousand twenty-one, seven million five hundred thousand dollars, for the period January first, two thousand twenty-two through December thirty-first, two thousand twenty-two, seven million five hundred thousand dollars, for the period January first, two thousand twenty-three through December thirty-first, two thousand twenty-three, seven million five hundred thousand dollars, for the period January first, two thousand twenty-four through December thirty-first, two thousand twenty-four, seven million five hundred

thousand dollars, for the period January first, two thousand twenty-five through December thirty-first, two thousand twenty-five, seven million five hundred thousand dollars, for the period January first, two thousand twenty-six through December thirty-first, two thousand twenty-six, seven million five hundred thousand dollars, for the period January first, two thousand twenty-seven through December thirty-first, two thousand twenty-seven, seven million five hundred thousand dollars, for the period January first, two thousand twenty-eight through December thirty-first, two thousand twenty-eight, seven million five hundred thousand dollars, and for the period January first, two thousand twenty-nine through March thirty-first, two thousand twenty-nine, in the amount of one million six hundred thousand dollars, provided, however, that for periods on and after January first, two thousand eight, such additional payments shall be distributed to voluntary, non-profit diagnostic and treatment centers and to public diagnostic and treatment centers in accordance with paragraph (g) of subdivision four of this section. In the event that federal financial participation is available for rate adjustments pursuant to this section, the commissioner shall make such payments as additional adjustments to rates of payment for voluntary non-profit diagnostic and treatment centers that are eligible for distributions under subdivision four-a of this section in the following amounts: for the period June first, two thousand six through December thirty-first, two thousand six, fifteen million dollars in the aggregate, and for the period January first, two thousand seven through June thirtieth, two thousand seven, seven million five hundred thousand dollars in the aggregate. The amounts allocated pursuant to this paragraph shall be aggregated with and distributed pursuant to the same methodology applicable to the amounts allocated to such diagnostic and treatment centers for such periods pursuant to subdivision four of this section if federal financial participation is not available, or pursuant to subdivision four-a of this section if federal financial participation is available. Notwithstanding section three hundred sixty-eight-a of the social services law, there shall be no local share in a medical assistance payment adjustment under this subdivision.

5. Diagnostic and treatment centers shall furnish to the department such reports and information as may be required by the commissioner to

assess the cost, quality, access to, effectiveness and efficiency of uncompensated care provided. The council shall adopt rules and regulations, subject to the approval of the commissioner, to establish uniform reporting and accounting principles designed to enable diagnostic and treatment centers to fairly and accurately determine and report uncompensated care visits and the costs of uncompensated care. In order to be eligible for an allocation of funds pursuant to this section, a diagnostic and treatment center must be in compliance with uncompensated care reporting requirements.

6. Notwithstanding any inconsistent provision of law to the contrary, the availability or payment of funds to a diagnostic and treatment center pursuant to this section shall not be admissible as a defense, offset or reduction in any action or proceeding relating to any bill or claim for amounts due for services provided by a diagnostic and treatment center.

7. Revenue from distributions to a diagnostic and treatment center pursuant to this section shall not be included in gross revenue received for purposes of the assessments pursuant to section twenty-eight hundred seven-d of this article, subject to the provisions of subdivision twelve of section twenty-eight hundred seven-d of this article.

8. (a) For periods on or after January first, two thousand through June thirtieth, two thousand three, payments made to an eligible diagnostic and treatment center pursuant to this section shall be reduced or increased by an amount equal to the amount of any overpayments or underpayments made against grants awarded pursuant to section seven of chapter four hundred thirty-three of the laws of nineteen hundred ninety-seven for the period three years prior to the annual awards made pursuant to this section.

(b) The determination of such overpayments or underpayments shall be based on the submission by eligible facilities of reports reflecting actual uncompensated care data, as required by the commissioner, which are attributable to prior periods. Submission of such reports is a condition for an eligible facility's receipt of payments pursuant to this section.

(c) For any periods in which a facility does not receive payments pursuant to this section, the amount of any prior period overpayment may be offset against payments for medical assistance made to such facility pursuant to title eleven of article five of the social services law and credited to funds allocated pursuant to this section. Any prior period underpayment to an eligible facility may be paid to such facility in a subsequent period.

9. Adjustments to rates of payment made pursuant to this section may be added to rates of payment or made as aggregate payments to eligible diagnostic and treatment centers and shall not be subject to subsequent adjustment or reconciliation, provided, however, that in the event such adjustments are made as aggregate payments, then notwithstanding any law, rule or regulation to the contrary responsibility for the local share of such aggregate payments shall be apportioned to a local social services district based on the most recent geographic utilization data available to the department for eligible diagnostic and treatment center services for payments in accordance with subdivisions four-a and four-b of this section for all diagnostic and treatment center services provided in accordance with section three hundred sixty-five-a of the social services law, regardless of whether another social services district or the department may otherwise be responsible for furnishing medical assistance to the eligible persons receiving such services.

10. (a) Notwithstanding any inconsistent provision of this section or any other contrary provision of law, the commissioner is authorized to seek a waiver from the federal department of health and human services pursuant to section eleven hundred fifteen of the federal social security act, or such other federal law provision as may be deemed appropriate, seeking federal financial participation in payments made pursuant to this section, in which case the state funding made available pursuant to this section shall be utilized as the non-federal share of such payments. To the extent as may be required, payments made pursuant to this section and in accordance with this subdivision, may be deemed to be disproportionate share hospital payments in accordance with the provisions of the federal social security act.

(b) If federal financial participation in payments made pursuant to

this section are made available in accordance with the provisions of this subdivision, free-standing clinics licensed solely pursuant to article thirty-one of the mental hygiene law shall also be deemed eligible for participation in such payments to the same degree and in accordance with the same distribution methodology otherwise provided in this section, provided, however, that only those units of service provided by such free-standing clinics that constitute medical services that are otherwise eligible for consideration for Medicaid payments shall be reflected in distributions made pursuant to this section, and further provided, however, that the commissioner may, in consultation with the commissioner of the office of mental health, require such clinics, as a condition of receiving such distributions, to provide reports and data to the department as the commissioner deems necessary to adequately implement the provisions of this subdivision with regard to such clinics.

§ 2807-r. Funding for expansion of cancer services. To the extent of funds available therefor pursuant to section twenty-eight hundred seven-l of this article, the commissioner may allocate funds for competitive grants or reimbursement for the expansion of cancer services into medically underserved or high need areas or medically underserved populations, and for training programs for physicians and other practitioners from medically underserved areas to upgrade their training and education in relation to providing cancer education, detection and treatment services in such areas.

*** § 2807-s. Professional education pool funding.** 1. (a) Payments to general hospitals by all specified third-party payors, as defined in paragraph (b) of subdivision one-a of this section, making payments on a rate, charge, negotiated payment, or other basis for inpatient hospital services provided to persons who are not eligible for payments as beneficiaries of title XVIII of the federal social security act (medicare) or eligible for medical assistance pursuant to title eleven of article five of the social services law (including enrollees in medicaid managed care programs) or eligible for the family health plus

program pursuant to title eleven-D of article five of the social services law, and related payments of patient deductible and coinsurance amounts and of secondary third-party payors, shall include a surcharge for a regional allowance on inpatient hospital net patient service revenues in the percentage amount and for the periods specified in subdivision two of this section. Any such allowance shall be submitted by general hospitals to the commissioner or the commissioner's designee in accordance with subdivision five of this section.

(b) The allowance established pursuant to this section shall not be applicable to specified third-party payors filing an election and making payments to the commissioner or the commissioner's designee in accordance with section twenty-eight hundred-seven-t of this article and pursuant to paragraph (a) of subdivision five of section twenty-eight hundred seven-j of this article, nor to related payments of patient deductible and coinsurance amounts and of secondary third-party payors.

1-a. Definitions. (a) "Third-party coverage", for purposes of this section and section twenty-eight hundred seven-t of this article, shall include payments by a specified third-party payor making payments on behalf of a patient; whether made directly to a general hospital or indirectly as indemnity or similar payments made to the patient (or patient's representative such as parent or family member) for inpatient hospital services provided by a general hospital, or through the use of payments made payable to both the general hospital and the patient or patient's representative, or similar devices.

(b) "Specified third-party payors", for purposes of this section and sections twenty-eight hundred seven-j and twenty-eight hundred seven-t of this article, shall include corporations organized and operating in accordance with article forty-three of the insurance law, organizations operating in accordance with the provisions of article forty-four of this chapter, self-insured funds and administrators acting on behalf of self-insured funds, and commercial insurers authorized to write accident and health insurance and whose policy provides coverage on an expense incurred basis. Specified third-party payors, for purposes of this section, shall not include governmental agencies or providers of coverage pursuant to the comprehensive motor vehicle insurance reparations act, the workers' compensation law, the volunteer

firefighters' benefit law, or the volunteer ambulance workers' benefit law.

(c) "Regions", for purposes of this section and section twenty-eight hundred seven-t of this article shall mean the regions as defined in paragraph (b) of subdivision sixteen of section twenty-eight hundred seven-c of this article as in effect on June thirtieth, nineteen hundred ninety-six.

2. (a) The regional percentage allowance for any period during the period January first, nineteen hundred ninety-seven through December thirty-first, nineteen hundred ninety-nine for all general hospitals in the region applicable to a specified third-party payor, and applicable to related patient coinsurance and deductible amounts and to secondary third-party payors under coordination of benefits principles, shall be the following, and shall be applied to inpatient hospital net patient service revenues:

(b) the result expressed as a percentage of:

(i) for each region, the amount allocated to the region in accordance with subdivision six of this section, divided by

(ii) the total estimated nineteen hundred ninety-six general hospital inpatient revenue of all general hospitals in the region, excluding (A) an estimate of revenue from services provided to beneficiaries of title XVIII of the federal social security act (medicare), (B) an estimate of revenue from services provided to patients eligible for payments by governmental agencies, patients eligible for payments pursuant to the comprehensive motor vehicle insurance reparations act, the workers' compensation law, the volunteer firefighters' benefit law, and the volunteer ambulance workers' benefit law, and self-pay patients, (C) from general hospitals providing graduate medical education in the aggregate an amount equal to the amount specified in subparagraph (i) of this subdivision, other than the components of such amount allocable to payors specified in clause (B) of this subparagraph, and (D) an estimate of revenue reductions related to negotiated reimbursement in nineteen hundred ninety-seven with specified third-party payors which shall be a uniform statewide percentage estimated reduction.

(c) (i) The regional percentage allowance for the periods January first, two thousand through June thirtieth, two thousand three, for all

general hospitals in the region applicable to specified third-party payors, and applicable to related patient coinsurance and deductible amounts, shall be the same regional percentage allowance calculated pursuant to paragraph (b) of this subdivision for the period January first, nineteen hundred ninety-nine through December thirty-first, nineteen hundred ninety-nine.

(ii) The regional percentage allowance for the periods July first, two thousand three through December thirty-first, two thousand five, for all general hospitals in the region applicable to specified third-party payors, and applicable to related patient coinsurance and deductible amounts, shall be the same regional percentage allowance calculated pursuant to paragraph (b) of this subdivision for the period January first, nineteen hundred ninety-nine through December thirty-first, nineteen hundred ninety-nine multiplied by one hundred eight and nineteen hundredths percent.

(iii) The regional percentage allowance for the periods January first, two thousand six through June thirtieth, two thousand seven, for all general hospitals in the region applicable to specified third-party payors, and applicable to related patient coinsurance and deductible amounts, shall be the same regional percentage allowance calculated pursuant to subparagraph (ii) of this paragraph for the period January first, two thousand five through December thirty-first, two thousand five multiplied by one hundred one and thirteen hundredths percent.

(iv) The regional percentage allowance for periods on and after July first, two thousand seven, for all general hospitals in the region applicable to specified third-party payors, and applicable to related patient coinsurance and deductible amounts, shall be the same regional percentage allowance calculated pursuant to subparagraph (iii) of this paragraph for the period January first, two thousand six through June thirtieth, two thousand seven.

3. Inpatient hospital net patient service revenues, for purposes of this section, shall mean for general hospitals all moneys received for or on account of inpatient hospital services provided to persons with third-party coverage from a specified third-party payor, including capitation payments allocable to inpatient hospital services, less refunds, for patients discharged or contracted hospital inpatient

service obligations for periods on or after January first, nineteen hundred ninety-seven excluding the following subject to the provisions of subdivision eight of this section:

(a) revenue received from the allowances pursuant to section twenty-eight hundred seven-j of this article and this section; and

(b) revenue received from physician practice or faculty practice plan discrete billings for private practicing physician services.

4. (a) For periods prior to January first, two thousand five, the commissioner is authorized to contract with the article forty-three insurance law plans, or such other contractors as the commissioner shall designate, to receive and distribute funds from the allowances established pursuant to this section and funds from the assessments established pursuant to section twenty-eight hundred seven-t of this article. In the event contracts with the article forty-three insurance law plans or other commissioner's designees are effectuated, the commissioner shall conduct annual audits of the receipt and distribution of the funds. The reasonable costs and expenses of an administrator as approved by the commissioner, not to exceed for personnel services on an annual basis eight hundred fifty thousand dollars for collection and distribution of allowances established pursuant to this section and assessments established pursuant to this section and assessments established pursuant to section twenty-eight hundred seven-t of this article shall be paid from the allowance and assessment funds.

(b) Notwithstanding any inconsistent provision of section one hundred twelve or one hundred sixty-three of the state finance law or any other law, at the discretion of the commissioner without a competitive bid or request for proposal process, contracts in effect for administration of bad debt and charity care pools for the period January first, nineteen hundred ninety-six through June thirtieth, nineteen hundred ninety-six pursuant to section twenty-eight hundred seven-c of this article may be extended to provide for administration pursuant to this section, and section twenty-eight hundred seven-t of this article and may be amended as may be necessary.

5. Funds due by a general hospital to the commissioner or the commissioner's designee from the allowance pursuant to this section

shall be due and shall be collected under the terms and conditions provided for payment and collection of allowances pursuant to section twenty-eight hundred seven-j of this article.

6. The amount allocated to each region for purposes of calculating the regional allowance percentage pursuant to this section for each year during the period January first, nineteen hundred ninety-seven through December thirty-first, nineteen hundred ninety-nine and the regional assessments pursuant to section twenty-eight hundred seven-t of this article for each year during the period January first, nineteen hundred ninety-seven through December thirty-first, nineteen hundred ninety-nine and for each year on and after January first, two thousand, shall be the sum of the factors computed in paragraphs (b), (d) and (f) of this subdivision, if such factors are applicable to a given year, as follows:

(a) (i) A gross annual statewide amount for nineteen hundred ninety-seven shall be five hundred eighty-nine million dollars.

(ii) A gross annual statewide amount for nineteen hundred ninety-eight shall be five hundred eighty-nine million dollars.

(iii) A gross annual statewide amount for nineteen hundred ninety-nine shall be five hundred eighty-nine million dollars.

(iv) A gross annual statewide amount for two thousand shall be five hundred eighty-nine million dollars.

(v) A gross annual statewide amount for two thousand one shall be five hundred sixty-nine million dollars.

(vi) A gross annual statewide amount for two thousand two shall be five hundred eighty-nine million dollars.

(vii) A gross annual statewide amount for two thousand three shall be five hundred eighty-nine million dollars.

(viii) A gross annual statewide amount for two thousand four and two thousand five shall be six hundred twenty-four million dollars.

(ix) A gross annual statewide amount for two thousand six shall be six hundred seventy-four million dollars.

(x) A gross statewide amount for the period January first, two thousand seven through March thirty-first, two thousand seven shall be one hundred sixty-eight million five hundred thousand dollars, and for the period April first, two thousand seven through December thirty-first, two thousand seven shall be five hundred sixty-one million

seven hundred fifty thousand dollars.

(xi) A gross statewide amount for the period January first, two thousand eight through March thirty-first, two thousand eight, shall be one hundred eighty-seven million two hundred fifty thousand dollars.

(xii) A gross statewide amount for the period April first, two thousand eight through December thirty-first, two thousand eight, shall be five hundred sixty-one million seven hundred fifty thousand dollars.

(xiii) A gross statewide amount for the period October first, two thousand eight through March thirty-first, two thousand nine, shall be one hundred seventy-four million two hundred thousand dollars. Such amount shall be separately reported and paid in six monthly installments by the tenth day of each month from October two thousand eight to March two thousand nine. Such reports and payments must initially be based on each payers' monthly enrollment count for the preceding month and shall be reconciled on a month to month basis to reflect the actual monthly enrollment counts for the applicable month.

(xiv) A gross annual statewide amount for the period January first, two thousand nine through December thirty-first, two thousand fourteen, shall be nine hundred forty-four million dollars.

(xv) A gross annual statewide amount for the period January first, two thousand fifteen through December thirty-first, two thousand twenty-two, shall be one billion forty-five million dollars.

(xvi) A gross annual statewide amount for the period January first, two thousand twenty-three to December thirty-first, two thousand twenty-six shall be one billion eighty-five million dollars, forty million dollars annually of which shall be allocated under section twenty-eight hundred seven-o of this article among the municipalities of and the state of New York based on each municipality's share and the state's share of early intervention program expenditures not reimbursable by the medical assistance program for the latest twelve month period for which such data is available.

(xvii) A gross annual statewide amount for the period January first, two thousand twenty-seven to December thirty-first, two thousand twenty-nine shall be one billion eighty-five million dollars, forty million dollars annually of which shall be allocated under section twenty-eight hundred seven-o of this article among the municipalities of and the state of New York based on each municipality's share and the

state's share of early intervention program expenditures not reimbursable by the medical assistance program for the latest twelve month period for which such data is available.

(b) The amount specified in paragraph (a) of this subdivision shall be allocated among the regions based on each region's proportional share of the sum of the estimated revenue of all general hospitals in the region, excluding revenue related to services provided to beneficiaries of title XVIII of the federal social security act (medicare), related to one hundred percent of the direct medical education expenses and fifty-nine and five-tenths percent of indirect medical education expenses reflected in general hospital inpatient revenue compared to the sum of such amounts for all regions, based on estimated nineteen hundred ninety-six data and statistics, excluding an estimate of revenue from services provided to patients eligible for payments by governmental agencies, patients eligible for payments pursuant to the comprehensive motor vehicle insurance reparations act, the workers' compensation law, the volunteer firefighters' benefit law, and the volunteer ambulance workers' benefit law, and self-pay patients.

(c) (i) A further gross annual statewide amount for nineteen hundred ninety-seven shall be sixty-four million dollars.

(ii) A further gross annual statewide amount for nineteen hundred ninety-eight shall be sixty-four million dollars.

(iii) A further gross annual statewide amount for nineteen hundred ninety-nine shall be eighty-nine million dollars.

(iv) A further gross annual statewide amount for two thousand, two thousand one, two thousand two, two thousand three, two thousand four, two thousand five, two thousand six, two thousand seven, two thousand eight, two thousand nine, two thousand ten, two thousand eleven, two thousand twelve and two thousand thirteen shall be eighty-nine million dollars.

(v) A further gross annual statewide amount for the period January first, two thousand fourteen through December thirty-first, two thousand fourteen, shall be eighty-nine million dollars.

(d) For each year, the amount specified in paragraph (c) of this subdivision shall be allocated among the regions based on the same regional percentage allocations as determined in accordance with paragraph (b) of this subdivision.

(e) A further gross annual statewide amount shall be twelve million dollars for each period prior to January first, two thousand fifteen.

(f) For each year, the amount specified in paragraph (e) of this subdivision shall be allocated among the regions based on each region's allocated share of the AIDS drug assistance program expenditures for the latest annual period for which such data are available.

(g) A further gross statewide amount for the state fiscal year two thousand twenty-two shall be forty million dollars.

(h) The amount specified in paragraph (g) of this subdivision shall be allocated under section twenty-eight hundred seven-o of this article among the municipalities and the state of New York based on each municipality's share and the state's share of early intervention program expenditures not reimbursable by the medical assistance program for the latest twelve month period for which such data is available.

7. Funds accumulated, including income from invested funds, from the allowances specified in this section and the assessments pursuant to section twenty-eight hundred seven-t of this article, including interest and penalties, shall be deposited by the commissioner or the commissioner's designee as follows:

(a) funds shall be accumulated in regional professional education pools established by the commissioner or the healthcare reform act (HCRA) resources fund established pursuant to section ninety-two-dd of the state finance law, whichever is applicable, for distribution in accordance with section twenty-eight hundred seven-m of this article, in the following amounts:

(i) ninety-two and forty-five-hundredths percent of the funds accumulated less seventy-six million dollars for the period January first, nineteen hundred ninety-seven through December thirty-first, nineteen hundred ninety-seven,

(ii) ninety-two and forty-five-hundredths percent of the funds accumulated less seventy-six million dollars for the period January first, nineteen hundred ninety-eight through December thirty-first, nineteen hundred ninety-eight,

(iii) ninety-two and forty-five-hundredths percent of the funds accumulated less one hundred one million dollars for the period January first, nineteen hundred ninety-nine through December thirty-first,

nineteen hundred ninety-nine,

(iv) four hundred ninety-four million dollars on an annual basis for the periods January first, two thousand through December thirty-first, two thousand three,

(v) four hundred sixty-three million dollars for the period January first, two thousand four through December thirty-first, two thousand four,

(vi) four hundred eighty-eight million dollars for the period January first, two thousand five through December thirty-first, two thousand five,

(vii) four hundred ninety-four million dollars for the period January first, two thousand six through December thirty-first, two thousand six,

(viii) four hundred seventy million dollars for the period January first, two thousand seven through December thirty-first, two thousand seven,

(ix) four hundred forty-six million six hundred thousand dollars for the period January first, two thousand eight through December thirty-first, two thousand eight,

(x) forty-seven million two hundred ten thousand dollars on an annual basis for the periods January first, two thousand nine through December thirty-first, two thousand ten;

(xi) eleven million eight hundred thousand dollars for the period January first, two thousand eleven through March thirty-first, two thousand eleven;

(xii) twenty-three million eight hundred thirty-six thousand dollars for the period April first, two thousand eleven through March thirty-first, two thousand twelve;

(xiii) twenty-three million eight hundred thirty-six thousand dollars each state fiscal year for the period April first, two thousand twelve through March thirty-first, two thousand twenty-nine;

(xiv) provided, however, for periods prior to January first, two thousand nine, amounts set forth in this paragraph may be reduced by the commissioner in an amount to be approved by the director of the budget to reflect the amount received from the federal government under the state's 1115 waiver which is directed under its terms and conditions to the graduate medical education program established pursuant to section twenty-eight hundred seven-m of this article;

(xv) provided further, however, for periods prior to July first, two thousand nine, amounts set forth in this paragraph shall be reduced by an amount equal to the total actual distribution reductions for all facilities pursuant to paragraph (e) of subdivision three of section twenty-eight hundred seven-m of this article; and

(xvi) provided further, however, for periods prior to July first, two thousand nine, amounts set forth in this paragraph shall be reduced by an amount equal to the actual distribution reductions for all facilities pursuant to paragraph (s) of subdivision one of section twenty-eight hundred seven-m of this article.

(b) funds shall be added to the funds collected by the commissioner for distribution in accordance with section twenty-eight hundred seven-j of this article, in the following amounts:

(i) seven and fifty-five-hundredths percent of the funds accumulated less seventy-six million dollars for the period January first, nineteen hundred ninety-seven through December thirty-first, nineteen hundred ninety-seven,

(ii) seven and fifty-five-hundredths percent of the funds accumulated less seventy-six million dollars for the period January first, nineteen hundred ninety-eight through December thirty-first, nineteen hundred ninety-eight,

(iii) seven and fifty-five-hundredths percent of the funds accumulated less one hundred one million dollars for the period January first, nineteen hundred ninety-nine through December thirty-first, nineteen hundred ninety-nine,

(iv) the remaining balance of the funds accumulated for each period on and after January first, two thousand; and

(c) further funds shall be added to the funds collected by the commissioner for distribution in accordance with section twenty-eight hundred seven-j of this article:

(i) for the nineteen hundred ninety-seven period, seventy-six million dollars;

(ii) for the nineteen hundred ninety-eight period, seventy-six million dollars; and

(iii) for the nineteen hundred ninety-nine period, one hundred one million dollars.

(d) funds shall be added to the funds collected by the commissioner

for distribution in accordance with section twenty-eight hundred seven-o of this article, in the following amount: forty million dollars for the period beginning April first, two thousand twenty-two, and continuing each state fiscal year thereafter.

8. Each exclusion from the allowances effective on or after January first, nineteen hundred ninety-seven established pursuant to this section shall be contingent upon either: (a) qualification of the allowances for waiver pursuant to federal law and regulation; or (b) consistent with federal law and regulation, not requiring a waiver by the secretary of the department of health and human services related to such exclusion; in order for the allowances under this section to be qualified as a broad-based health care related tax for purposes of the revenues received by the state pursuant to the allowances not reducing the amount expended by the state as medical assistance for purposes of federal financial participation. The commissioner shall collect the allowances relying on such exclusions, pending any contrary action by the secretary of the department of health and human services. In the event the secretary of the department of health and human services determines that the allowances do not so qualify based on any such exclusion, then the exclusion shall be deemed to have been null and void as of January first, nineteen hundred ninety-seven, and the commissioner shall collect any retroactive amount due as a result, without interest or penalty provided the general hospital pays the retroactive amount due within ninety days of notice from the commissioner to the general hospital that an exclusion is null and void. Interest and penalties shall be measured from the due date of ninety days following notice from the commissioner or the commissioner's designee to the general hospital.

9. Revenue from the allowances pursuant to this section shall not be included in gross revenue received for purposes of the assessments pursuant to subdivision eighteen of section twenty-eight hundred seven-c of this article, subject to the provisions of paragraph (e) of subdivision eighteen of section twenty-eight hundred seven-c of this article, and shall not be included in gross revenue received for purposes of the assessments pursuant to section twenty-eight hundred seven-d of this article, subject to the provisions of subdivision twelve

of section twenty-eight hundred seven-d of this article.

* NB Expires December 31, 2029

*** § 2807-t. Assessments on covered lives. 1. Definitions. (a)**

"Individual" means a person for whom the specified third-party payor has agreed to provide reimbursement for inpatient hospital services in the period other than:

(i) any person who is eligible for payments as a beneficiary of title XVIII of the federal social security act (medicare);

(ii) any person for whom the specified third-party payor has agreed to provide reimbursement for inpatient hospital services contingent upon such person's relationship to an "individual" as a spouse, child, stepchild, adopted child, family member, or dependent, as defined by the specified third-party payor, or as contingent upon any other similar relationship to an "individual" as such relationship is defined by the specified third-party payor;

(iii) any person for whom the specified third-party payor has agreed to provide coverage for hospital confinement on other than an expense incurred basis;

(iv) any person for whom the specified third-party payor has agreed to provide reimbursement for inpatient hospital services pursuant to the workers' compensation law, the volunteer firefighters' benefit law, or the volunteer ambulance workers' benefit law;

(v) any person for whom the specified third-party payor has agreed to provide reimbursement for inpatient hospital services pursuant to the comprehensive motor vehicle insurance reparations act;

(vi) any person (hereinafter referred to as the "primary insured") otherwise meeting the definition of an "individual" as set forth under this section if the specified third-party payor has agreed to provide reimbursement for such person as part of a "family unit"; and

(vii) effective on and after April first, two thousand five, any person covered under a student policy issued pursuant to article forty-three of the insurance law, or a blanket student accident, blanket student health, or blanket student accident and health insurance policy.

(b) "Family unit" means any person for whom the specified third-party payor has agreed to provide reimbursement for inpatient hospital

services in the period, together with one or more additional persons for whom the specified third-party payor has agreed to provide reimbursement for inpatient hospital services in the period contingent upon such person's relationship to said person as a spouse, child, stepchild, adopted child, family member, or dependent, as defined by the specified third-party payor, or as contingent upon any other similar relationship, as such relationship is defined by the specified third-party payor. Excluded from the definition is any family unit where the specified third-party payor has agreed to provide: coverage for hospital confinement on other than an expense incurred basis; reimbursement for inpatient hospital services pursuant to the worker's compensation law, the volunteer firefighters' benefit law, or the volunteer ambulance workers' benefit law; and reimbursement for inpatient hospital services pursuant to the comprehensive motor vehicle insurance reparations act. If a family unit of two persons includes one person who is eligible for payments as a beneficiary of title XVIII of the social security act (medicare), that family unit shall be deemed an individual for purposes of this section. If a family unit of three or more persons includes one person who is not eligible for medicare and the remaining two or more persons are eligible for medicare, that family unit shall be deemed an individual for purposes of this section. A family unit of two or more persons, all of whom are eligible for medicare, shall not be considered a family unit or an individual for purposes of this section.

(c) "Specified third-party payor", for purposes of this section, shall have the same meaning as set forth in section twenty-eight hundred seven-s of this article.

(d) "Region", for purposes of this section, shall have the same meaning as set forth in section twenty-eight hundred seven-s of this article.

2. Determination of annual regional payment amount. The sum total to be generated each year for each region shall be referred to as the annual regional payment amount, as determined in accordance with subdivision six of section twenty-eight hundred seven-s of this article.

3. Election. Any specified third-party payor may make an election to make payments for the assessments required by this section, on behalf of

the liable persons or entities pursuant to subdivision eight of this section, directly to the commissioner or the commissioner's designee. The election pursuant to this subdivision must be in writing, filed with the commissioner or the commissioner's designee on such forms and in such manner as the commissioner shall require. An election by a specified third-party payor shall take effect for nineteen hundred ninety-seven on the next following January first, April first, July first, or October first not less than thirty days after the election is filed. Beginning December first, nineteen hundred ninety-seven, an election pursuant to this section must be made no later than December first of the year prior to the assessment year. However, any specified third-party payor licensed pursuant to the insurance law or certified pursuant to article forty-four of this chapter between December first of the year prior to the assessment year and December thirty-first of the assessment year may make an election subsequent to such licensure or certification and during said time period, to take effect on the next following January first, April first, July first or October first not less than thirty days after such election is filed. Specified third-party payors other than those licensed pursuant to the insurance law or certified pursuant to this chapter which have not provided coverage prior to December first of the year prior to the assessment year may make an election at any time from December first of the year prior to said assessment year to December thirty-first of said assessment year, to take effect on the next following January first, April first, July first or October first not less than thirty days after the election is filed. An election shall remain in effect unless revoked in writing by a specified third-party payor, which revocation shall be effective on the first day of the next calendar year quarter, provided that such payor has provided notice of its intention to so revoke at least thirty days prior to the beginning of such calendar quarter.

(a) A specified third-party payor filing an election pursuant to this subdivision must agree: to provide the data and information required by subdivision four of this section; to provide such certification of data and access to individual and family unit data for audit verification purposes as the commissioner shall require for purposes of this section; and to the jurisdiction of the state to maintain an action in the courts of the state of New York to enforce any provision of this section

related to payment of the assessments.

(b) If a specified third-party payor is acting in an administrative services capacity on behalf of an organization, such as a self-insured fund, the consent of the organization to the election and the conditions pursuant to paragraph (a) of this subdivision must be submitted with the election. Such consent may be set forth in writing in the agreement between the specified third-party payor and the organization.

(c) If a specified third-party payor, including a payor operating in accordance with the insurance law or article forty-four of this chapter, making an election pursuant to this subdivision is acting in an administrative services capacity on behalf of an organization or organizations, such specified third-party payor must specify (i) whether such election applies to payments on behalf of all such organizations, and (ii) identify any organizations for which such specified third-party payor is acting to which the election does not apply and establish, in accordance with guidelines established by the superintendent of financial services, a system through which general hospitals and the commissioner can identify the status of a patient as a patient for whom the election does not apply.

(d) The commissioner may deny a specified third-party payor the opportunity to make an election pursuant to this subdivision based on repeated late payments, failure to remit correct amounts, or failure to provide adequate verification of the accuracy of payments.

(e) The commissioner or the commissioner's designee shall make available to all general hospitals a list of the specified third-party payors which have elected pursuant to this subdivision to remit payments pursuant to this section.

4. Assessments shall be calculated as follows: (a) Every specified third-party payor that has made an election pursuant to this section shall report to the commissioner or the commissioner's designee the number of individuals for a period as determined by the commissioner during the calendar year prior to the assessment year residing within each region ("individual member months"). Every such specified third-party payor shall also report to the commissioner or the commissioner's designee the number of family units for a period as determined by the commissioner during the calendar year prior to the

assessment year residing within each region ("family member months"). For purposes of this section, the family unit is considered to reside in the region in which the primary insured resides.

(b) The superintendent of financial services shall advise the commissioner of the average number of persons covered under family insurance contracts providing health care coverage approved by the superintendent for the year two years prior to the assessment year.

(c) The commissioner shall calculate the total number of "individual member months" for each region for all specified third-party payors to determine "aggregate individual member months" for each region.

(d) The commissioner shall calculate the total number of "family member months" for each region for all specified third-party payors to determine "aggregate family member months" for each region. The commissioner shall multiply the average number of persons covered under family insurance contracts, as reported to the commissioner by the superintendent of financial services, by the "aggregate family member months" to determine "adjusted aggregate family member months" for each region. The commissioner shall add the number of "adjusted aggregate family member months" for each region to the total number of "aggregate individual member months" for each region. This amount shall be known as "total covered member months" for each region.

(e) The annual regional payment amount for nineteen hundred ninety-seven, nineteen hundred ninety-eight, nineteen hundred ninety-nine, two thousand and each year thereafter, respectively for each region determined pursuant to subdivision two of this section shall be divided by an estimate derived from population based data sources of the total covered member months determined consistent with the provisions of paragraphs (a), (b), (c) and (d) of this subdivision in that region to establish the individual annual assessment for nineteen hundred ninety-seven, nineteen hundred ninety-eight, nineteen hundred ninety-nine, two thousand and each year thereafter, respectively. The individual annual assessment shall be multiplied by the average family size reported to the commissioner by the superintendent of financial services to establish the family unit annual assessment in that region for nineteen hundred ninety-seven, nineteen hundred ninety-eight, nineteen hundred ninety-nine, two thousand and each year thereafter, respectively.

(f) Effective January first, two thousand nine, a specified third-party payor that has made an election pursuant to this section may report to the commissioner or the commissioner's designee the number of individuals and family units enrolled as of the last day of each month in fulfillment of the monthly reporting requirement set forth in paragraph (a) of this subdivision. A specified third-party payor choosing to report monthly enrollment counts on this basis shall indicate its choice at the beginning of a calendar year in a form and manner specified by the commissioner and such reporting method shall remain in effect the entire calendar year.

5. Monthly payments. (a) Within thirty days after the end of each month, a specified third-party payor which made an election pursuant to this section shall remit to the commissioner or the commissioner's designee one-twelfth of the individual annual assessment for each of the individuals residing in this state which were included on the membership rolls of that specified third-party payor during all or any portion of the prior month. Within thirty days after the end of each month, a specified third-party payor which made an election pursuant to this section shall also remit to the commissioner or the commissioner's designee one-twelfth of the family unit annual assessment for each family unit for which the primary insured resided in this state which were included on the membership rolls of that specified third-party payor during all or any portion of the prior month. Provided, however, for assessment obligations arising out of individual and family assessments established pursuant to this section on or after January first, two thousand, the commissioner may permit certain specified third-party payors which have at least one full year of pool payment experience to submit such payments on an annual basis, based on an annual demonstration by a payor through its prior year's pool payment experience that total pool obligations under this section and sections twenty-eight hundred seven-j and twenty-eight hundred seven-s of this article are not expected to exceed ten thousand dollars in the current pool year. If a specified third-party payor fails to make such payments within sixty days of notification of a delinquency, the commissioner may assess a civil penalty of up to ten thousand dollars for each failure, provided, however, that such civil penalty shall not be imposed if the

payor demonstrates good cause for such failure to timely make such payments, and further provided that the amount of such penalty shall not exceed the amount of the delinquent liability.

(b) The specified third party-payor shall be entitled to rely on the residence location information provided to the payor by an employer, group or other party providing enrollment information to the specified third-party payor, provided the specified third-party payor has no reason to doubt the accuracy of the information.

(c) Specified third-party payors shall not be responsible for remitting the monthly assessment for any individual or for any family unit for any month in which it is subsequently determined that the specified third-party payor had no liability to provide coverage for inpatient hospital services for such individual or family unit.

6. Prospective adjustments. (a) The commissioner shall annually reconcile the sum of the actual payments made to the commissioner or the commissioner's designee for each region pursuant to section twenty-eight hundred seven-s of this article and pursuant to this section for the prior year with the regional allocation of the gross annual statewide amount specified in subdivision six of section twenty-eight hundred seven-s of this article for such prior year. The difference between the actual amount raised for a region and the regional allocation of the specified gross annual amount for such prior year shall be applied as a prospective adjustment to the regional allocation of the specified gross annual payment amount for such region for the year next following the calculation of the reconciliation. The authorized dollar value of the adjustments shall be the same as if calculated retrospectively.

(b) Notwithstanding the provisions of paragraph (a) of this subdivision, for covered lives assessment rate periods on and after January first, two thousand fifteen through December thirty-first, two thousand twenty-one, for amounts collected in the aggregate in excess of one billion forty-five million dollars on an annual basis, and for the period January first, two thousand twenty-two to December thirty-first, two thousand twenty-nine for amounts collected in the aggregate in excess of one billion eighty-five million dollars on an annual basis, prospective adjustments shall be suspended if the annual reconciliation calculation from the prior year would otherwise result in a decrease to

the regional allocation of the specified gross annual payment amount for that region, provided, however, that such suspension shall be lifted upon a determination by the commissioner, in consultation with the director of the budget, that sixty-five million dollars in aggregate collections on an annual basis over and above one billion forty-five million dollars on an annual basis for the period on and after January first, two thousand fifteen through December thirty-first, two thousand twenty-one and for the period January first, two thousand twenty-two to December thirty-first, two thousand twenty-nine for amounts collected in the aggregate in excess of one billion eighty-five million dollars on an annual basis have been reserved and set aside for deposit in the HCRA resources fund. Any amounts collected in the aggregate at or below one billion forty-five million dollars on an annual basis for the period on and after January first, two thousand fifteen through December thirty-first, two thousand twenty-two, and for the period January first, two thousand twenty-three to December thirty-first, two thousand twenty-nine for amounts collected in the aggregate in excess of one billion eighty-five million dollars on an annual basis, shall be subject to regional adjustments reconciling any decreases or increases to the regional allocation in accordance with paragraph (a) of this subdivision.

7. (a) In the case two or more specified third-party payors covering a single contract holder where both specified third-party payors cover separate components of the inpatient care benefits otherwise subject to the assessment, the assessment shall be apportioned between the insurers.

(b) With regard to assessment obligations arising out of individual and family assessments established pursuant to this section, where a single contract holder has separate components of the inpatient care benefits otherwise subject to the assessment covered by two or more entities, the assessment may be apportioned between the entities, provided that:

(i) Apportionment agreements or arrangements may only be entered into between or among specified third-party payers which have elected to make direct payments to the commissioner or the commissioner's designee pursuant to this subdivision; and

(ii) The aggregate of apportioned covered lives assessment payments must result in the payment of one hundred percent of the applicable covered lives assessment; and

(iii) Apportionment agreements between or among apportioning payers and any modifications, amendments or termination of such agreements must be in writing and signed by all such payers, provided, however, that where one apportioning payor agrees to pay one hundred percent of the applicable covered lives assessment, no written agreement shall be required, provided there is other written evidence of the arrangement and any modifications, amendments and/or terminations thereof, emanating from the apportioning payor paying one hundred percent of the applicable covered lives assessment to the other apportioning payor or payors or to the particular group to which the arrangement relates, and further provided that such written evidence contains the name of the particular group to which the arrangement relates; and

(iv) Copies of apportionment agreements, and any modifications, amendments and/or terminations thereof, and written evidence of arrangements by which one apportioning payor agrees to pay one hundred percent of the applicable covered lives assessment, and any modifications, amendments and/or terminations thereof, must be maintained in the files of each apportioning payor while the apportionment is in effect and for a period of not less than six years after termination thereof and shall be made available to the department upon request for audit verification purposes.

8. Liability for assessments. (a) The assessments determined in accordance with this section shall, for individuals who have paid premiums directly to an insurer or to a health maintenance organization certified pursuant to article forty-four of this chapter or article forty-three of the insurance law for health care coverage which includes coverage of inpatient hospital services, be the liability of said individuals. The assessments determined in accordance with this section shall, for groups and entities who have paid premiums to an insurer or to a health maintenance organization certified pursuant to article forty-four of this chapter or article forty-three of the insurance law for health care coverage which includes coverage of inpatient hospital services, be the liability of said groups and entities. The assessments

determined in accordance with this section shall, for individuals, groups and entities who have contributed to a self-insured fund for health care coverage which includes coverage of inpatient hospital services, be the liability of said individuals, groups or entities.

(b) Specified third-party payors shall make payments to the commissioner or the commissioner's designee of the full amount of the assessments determined in accordance with this section. Specified third-party payors may recover amounts due or paid to the commissioner or the commissioner's designee from the parties liable in accordance with paragraph (a) of this subdivision.

9. A specified third-party payor must either:

(a) jointly elect to pay the assessment pursuant to this section and the allowance pursuant to paragraph (c) of subdivision two and subdivision five of section twenty-eight hundred seven-j of this article; or

(b) pay the surcharge for an allowance determined in accordance with paragraph (b) of subdivision two of section twenty-eight hundred seven-j of this article, including the allowance determined in accordance with section twenty-eight hundred seven-s of this article.

10. (a) Payments and reports submitted or required to be submitted to the commissioner or to the commissioner's designee pursuant to this section by specified third-party payors shall be subject to audit by the commissioner for a period of six years following the close of the calendar year in which such payments and reports are due, after which such payments shall be deemed final and not subject to further adjustment or reconciliation, including through offset adjustments or reconciliations made by such specified third-party payors with regard to subsequent payments, provided, however, that nothing herein shall be construed as precluding the commissioner from pursuing collection of any such payments which are identified as delinquent within such six year period, or which are identified as delinquent as a result of an audit commenced within such six year period, or from conducting an audit of any adjustments and reconciliation made by a specified third party payor within such six year period, or from conducting an audit of payments made prior to such six year period which are found to be commingled with

payments which are otherwise subject to timely audit pursuant to this section.

(b) Specified third-party payors which, in the course of an audit pursuant to this section fail to produce data or documentation requested in furtherance of such an audit, within thirty days of such request, may be assessed a civil penalty of up to ten thousand dollars for each such failure, provided, however, that such civil penalty shall not be imposed if such specified third-party payor demonstrates good cause for such failure. The imposition of civil penalties pursuant to this section shall be subject to the provisions of section twelve-a of this chapter.

(c) Records required to be retained for audit verification purposes by specified third-party payors in accordance with this section shall include, but not be limited to, on a monthly basis, the source records generated by supporting information systems, financial accounting records, relevant correspondence and the addresses and dates of coverage for all individuals and family units, as defined by paragraphs (a) and (b) of subdivision one of this section, and such other records as may be required to prove compliance with, and to support reports submitted in accordance with, this section.

(d) If a specified third-party payor fails to produce data or documentation requested in furtherance of an audit pursuant to this section for a month to which an assessment applies, the commissioner may estimate, based on available financial and statistical data as determined by the commissioner, the amount due for such month. If the impact of the enrollment exemptions permitted pursuant to this section cannot be determined from such available financial and statistical data, the estimated amount due may be calculated on the basis of aggregate data derived from such available data for the year subject to audit. The commissioner shall take all necessary steps to collect amounts due as determined pursuant to this paragraph, including directing the state comptroller to offset such amounts due from any payments made by the state to the third party payor pursuant to this article. Interest and penalties shall be applied to such amounts due in accordance with the provisions of subdivision eight of section twenty-eight hundred seven-j of this article.

(e) The commissioner may, as part of a final resolution of an audit conducted pursuant to this subdivision, waive payment of interest and

penalties otherwise applicable pursuant to subdivision eight of section twenty-eight hundred seven-j of this article, when amounts due as a result of such audit, other than such waived penalties and interest, are paid in full to the commissioner or the commissioner's designee within sixty days of the issuance of a final audit report that is mutually agreed to by the commissioner and auditee, provided, however, that if such final audit report is not so mutually agreed upon, then neither the commissioner nor the auditee shall have any obligations pursuant to this paragraph.

(f) The commissioner may enter into agreements with specified third-party payors in regard to which audit findings or prior settlements have been made pursuant to this section, extending and applying such audit findings or prior settlements, or a portion thereof, in settlement and satisfaction of potential audit liabilities for subsequent un-audited periods. The commissioner may reduce or waive payment of interest and penalties otherwise applicable to such subsequent unaudited periods when such amounts due as a result of such agreement, other than reduced or waived interest and penalties, are paid in full to the commissioner or the commissioner's designee within sixty days of execution of such agreement by all parties to the agreement. Any payments made pursuant to agreements entered into in accordance with this paragraph shall be deemed to be in full satisfaction of any liability arising under this section, as referenced in such agreements and for the time periods covered by such agreements, provided, however, that the commissioner may audit future retroactive adjustments to payments made for such periods based on reports filed by payors subsequent to such agreements.

* NB Expires December 31, 2029

§ 2807-u. Transfers for tax credits. Upon receipt of the report from the commissioner of taxation and finance required pursuant to subdivision (i) of section fifteen hundred eleven of the tax law and the report from the superintendent of financial services required pursuant to section one thousand one hundred twelve-a of the insurance law, the director of the budget shall forward such reports to the commissioner of health. Within ten days of receipt of such reports, the commissioner of

health or the commissioner of health's designee, from funds allocated for distribution in accordance with paragraphs (a) and (c) of subdivision seven of section twenty-eight hundred seven-s of this article, shall pay over to the state comptroller for deposit into the state's general fund the amounts specified therein as representing (1) the amount of credits claimed under subdivision (i) of section fifteen hundred eleven of the tax law and (2) the amount by which taxes due and owing pursuant to section one thousand one hundred twelve of the insurance law were reduced because the amounts imposed and required to be paid pursuant to section twenty-eight hundred seven-t of this article were allowed as credits in assessing the taxes imposed by such section one thousand one hundred twelve.

§ 2807-v. Tobacco control and insurance initiatives pool distributions. 1. Funds accumulated in the tobacco control and insurance initiatives pool or in the health care reform act (HCRA) resources fund established pursuant to section ninety-two-dd of the state finance law, whichever is applicable, including income from invested funds, shall be distributed or retained by the commissioner or by the state comptroller, as applicable, in accordance with the following:

(a) Funds shall be deposited by the commissioner, within amounts appropriated, and the state comptroller is hereby authorized and directed to receive for deposit to the credit of the state special revenue funds - other, HCRA transfer fund, medicaid fraud hotline and medicaid administration account, or any successor fund or account, for purposes of services and expenses related to the toll-free medicaid fraud hotline established pursuant to section one hundred eight of chapter one of the laws of nineteen hundred ninety-nine from the tobacco control and insurance initiatives pool established for the following periods in the following amounts: four hundred thousand dollars annually for the periods January first, two thousand through December thirty-first, two thousand two, up to four hundred thousand dollars for the period January first, two thousand three through December thirty-first, two thousand three, up to four hundred thousand dollars for the period January first, two thousand four through December

thirty-first, two thousand four, up to four hundred thousand dollars for the period January first, two thousand five through December thirty-first, two thousand five, up to four hundred thousand dollars for the period January first, two thousand six through December thirty-first, two thousand six, up to four hundred thousand dollars for the period January first, two thousand seven through December thirty-first, two thousand seven, up to four hundred thousand dollars for the period January first, two thousand eight through December thirty-first, two thousand eight, up to four hundred thousand dollars for the period January first, two thousand nine through December thirty-first, two thousand nine, up to four hundred thousand dollars for the period January first, two thousand ten through December thirty-first, two thousand ten, up to one hundred thousand dollars for the period January first, two thousand eleven through March thirty-first, two thousand eleven and within amounts appropriated on and after April first, two thousand eleven.

(b) Funds shall be reserved and accumulated from year to year and shall be available, including income from invested funds, for purposes of payment of audits or audit contracts necessary to determine payor and provider compliance with requirements set forth in sections twenty-eight hundred seven-j, twenty-eight hundred seven-s and twenty-eight hundred seven-t of this article from the tobacco control and insurance initiatives pool established for the following periods in the following amounts: five million six hundred thousand dollars annually for the periods January first, two thousand through December thirty-first, two thousand two, up to five million dollars for the period January first, two thousand three through December thirty-first, two thousand three, up to five million dollars for the period January first, two thousand four through December thirty-first, two thousand four, up to five million dollars for the period January first, two thousand five through December thirty-first, two thousand five, up to five million dollars for the period January first, two thousand six through December thirty-first, two thousand six, up to seven million eight hundred thousand dollars for the period January first, two thousand seven through December thirty-first, two thousand seven, and up to eight million three hundred twenty-five thousand dollars for the period January first, two thousand eight through December thirty-first, two thousand eight, up to eight

million five hundred thousand dollars for the period January first, two thousand nine through December thirty-first, two thousand nine, up to eight million five hundred thousand dollars for the period January first, two thousand ten through December thirty-first, two thousand ten, up to two million one hundred twenty-five thousand dollars for the period January first, two thousand eleven through March thirty-first, two thousand eleven, up to fourteen million seven hundred thousand dollars each state fiscal year for the period April first, two thousand eleven through March thirty-first, two thousand fourteen, up to eleven million one hundred thousand dollars each state fiscal year for the period April first, two thousand fourteen through March thirty-first, two thousand seventeen, up to eleven million one hundred thousand dollars each state fiscal year for the period April first, two thousand seventeen through March thirty-first, two thousand twenty, up to eleven million one hundred thousand dollars each state fiscal year for the period April first, two thousand twenty through March thirty-first, two thousand twenty-three, up to eleven million one hundred thousand dollars each state fiscal year for the period April first, two thousand twenty-three through March thirty-first, two thousand twenty-six, and up to eleven million one hundred thousand dollars each state fiscal year for the period April first, two thousand twenty-six through March thirty-first, two thousand twenty-nine.

(c) Funds shall be deposited by the commissioner, within amounts appropriated, and the state comptroller is hereby authorized and directed to receive for deposit to the credit of the state special revenue funds - other, HCRA transfer fund, enhanced community services account, or any successor fund or account, for mental health services programs for case management services for adults and children; supported housing; home and community based waiver services; family based treatment; family support services; mobile mental health teams; transitional housing; and community oversight, established pursuant to articles seven and forty-one of the mental hygiene law and subdivision nine of section three hundred sixty-six of the social services law; and for comprehensive care centers for eating disorders pursuant to the former section twenty-seven hundred ninety-nine-l of this chapter, provided however that, for such centers, funds in the amount of five hundred thousand dollars on an annualized basis shall be transferred

from the enhanced community services account, or any successor fund or account, and deposited into the fund established by section ninety-five-e of the state finance law; from the tobacco control and insurance initiatives pool established for the following periods in the following amounts:

(i) forty-eight million dollars to be reserved, to be retained or for distribution pursuant to a chapter of the laws of two thousand, for the period January first, two thousand through December thirty-first, two thousand;

(ii) eighty-seven million dollars to be reserved, to be retained or for distribution pursuant to a chapter of the laws of two thousand one, for the period January first, two thousand one through December thirty-first, two thousand one;

(iii) eighty-seven million dollars to be reserved, to be retained or for distribution pursuant to a chapter of the laws of two thousand two, for the period January first, two thousand two through December thirty-first, two thousand two;

(iv) eighty-eight million dollars to be reserved, to be retained or for distribution pursuant to a chapter of the laws of two thousand three, for the period January first, two thousand three through December thirty-first, two thousand three;

(v) eighty-eight million dollars, plus five hundred thousand dollars, to be reserved, to be retained or for distribution pursuant to a chapter of the laws of two thousand four, and pursuant to the former section twenty-seven hundred ninety-nine-l of this chapter, for the period January first, two thousand four through December thirty-first, two thousand four;

(vi) eighty-eight million dollars, plus five hundred thousand dollars, to be reserved, to be retained or for distribution pursuant to a chapter of the laws of two thousand five, and pursuant to the former section twenty-seven hundred ninety-nine-l of this chapter, for the period January first, two thousand five through December thirty-first, two thousand five;

(vii) eighty-eight million dollars, plus five hundred thousand dollars, to be reserved, to be retained or for distribution pursuant to a chapter of the laws of two thousand six, and pursuant to former section twenty-seven hundred ninety-nine-l of this chapter, for the

period January first, two thousand six through December thirty-first, two thousand six;

(viii) eighty-six million four hundred thousand dollars, plus five hundred thousand dollars, to be reserved, to be retained or for distribution pursuant to a chapter of the laws of two thousand seven and pursuant to the former section twenty-seven hundred ninety-nine-l of this chapter, for the period January first, two thousand seven through December thirty-first, two thousand seven; and

(ix) twenty-two million nine hundred thirteen thousand dollars, plus one hundred twenty-five thousand dollars, to be reserved, to be retained or for distribution pursuant to a chapter of the laws of two thousand eight and pursuant to the former section twenty-seven hundred ninety-nine-l of this chapter, for the period January first, two thousand eight through March thirty-first, two thousand eight.

(d) Funds shall be deposited by the commissioner, within amounts appropriated, and the state comptroller is hereby authorized and directed to receive for deposit to the credit of the state special revenue funds - other, HCRA transfer fund, medical assistance account, or any successor fund or account, for purposes of funding the state share of services and expenses related to the family health plus program including up to two and one-half million dollars annually for the period January first, two thousand through December thirty-first, two thousand two, for administration and marketing costs associated with such program established pursuant to clause (A) of subparagraph (v) of paragraph (a) of subdivision two of former section three hundred sixty-nine-ee of the social services law from the tobacco control and insurance initiatives pool established for the following periods in the following amounts:

(i) three million five hundred thousand dollars for the period January first, two thousand through December thirty-first, two thousand;

(ii) twenty-seven million dollars for the period January first, two thousand one through December thirty-first, two thousand one; and

(iii) fifty-seven million dollars for the period January first, two thousand two through December thirty-first, two thousand two.

(e) Funds shall be deposited by the commissioner, within amounts appropriated, and the state comptroller is hereby authorized and directed to receive for deposit to the credit of the state special revenue funds - other, HCRA transfer fund, medical assistance account,

or any successor fund or account, for purposes of funding the state share of services and expenses related to the family health plus program including up to two and one-half million dollars annually for the period January first, two thousand through December thirty-first, two thousand two for administration and marketing costs associated with such program established pursuant to clause (B) of subparagraph (v) of paragraph (a) of subdivision two of former section three hundred sixty-nine-ee of the social services law from the tobacco control and insurance initiatives pool established for the following periods in the following amounts:

(i) two million five hundred thousand dollars for the period January first, two thousand through December thirty-first, two thousand;

(ii) thirty million five hundred thousand dollars for the period January first, two thousand one through December thirty-first, two thousand one; and

(iii) sixty-six million dollars for the period January first, two thousand two through December thirty-first, two thousand two.

(f) Funds shall be deposited by the commissioner, within amounts appropriated, and the state comptroller is hereby authorized and directed to receive for deposit to the credit of the state special revenue funds - other, HCRA transfer fund, medicaid fraud hotline and medicaid administration account, or any successor fund or account, for purposes of payment of administrative expenses of the department related to the family health plus program established pursuant to former section three hundred sixty-nine-ee of the social services law from the tobacco control and insurance initiatives pool established for the following periods in the following amounts: five hundred thousand dollars on an annual basis for the periods January first, two thousand through December thirty-first, two thousand six, five hundred thousand dollars for the period January first, two thousand seven through December thirty-first, two thousand seven, and five hundred thousand dollars for the period January first, two thousand eight through December thirty-first, two thousand eight, five hundred thousand dollars for the period January first, two thousand nine through December thirty-first, two thousand nine, five hundred thousand dollars for the period January first, two thousand ten through December thirty-first, two thousand ten, one hundred twenty-five thousand dollars for the period January first, two thousand eleven through March thirty-first, two thousand eleven and

within amounts appropriated on and after April first, two thousand eleven.

(g) Funds shall be reserved and accumulated from year to year and shall be available, including income from invested funds, for purposes of services and expenses related to the health maintenance organization direct pay market program established pursuant to sections four thousand three hundred twenty-one-a and four thousand three hundred twenty-two-a of the insurance law from the tobacco control and insurance initiatives pool established for the following periods in the following amounts:

(i) up to thirty-five million dollars for the period January first, two thousand through December thirty-first, two thousand of which fifty percentum shall be allocated to the program pursuant to section four thousand three hundred twenty-one-a of the insurance law and fifty percentum to the program pursuant to section four thousand three hundred twenty-two-a of the insurance law;

(ii) up to thirty-six million dollars for the period January first, two thousand one through December thirty-first, two thousand one of which fifty percentum shall be allocated to the program pursuant to section four thousand three hundred twenty-one-a of the insurance law and fifty percentum to the program pursuant to section four thousand three hundred twenty-two-a of the insurance law;

(iii) up to thirty-nine million dollars for the period January first, two thousand two through December thirty-first, two thousand two of which fifty percentum shall be allocated to the program pursuant to section four thousand three hundred twenty-one-a of the insurance law and fifty percentum to the program pursuant to section four thousand three hundred twenty-two-a of the insurance law;

(iv) up to forty million dollars for the period January first, two thousand three through December thirty-first, two thousand three of which fifty percentum shall be allocated to the program pursuant to section four thousand three hundred twenty-one-a of the insurance law and fifty percentum to the program pursuant to section four thousand three hundred twenty-two-a of the insurance law;

(v) up to forty million dollars for the period January first, two thousand four through December thirty-first, two thousand four of which fifty percentum shall be allocated to the program pursuant to section four thousand three hundred twenty-one-a of the insurance law and fifty

percentum to the program pursuant to section four thousand three hundred twenty-two-a of the insurance law;

(vi) up to forty million dollars for the period January first, two thousand five through December thirty-first, two thousand five of which fifty percentum shall be allocated to the program pursuant to section four thousand three hundred twenty-one-a of the insurance law and fifty percentum to the program pursuant to section four thousand three hundred twenty-two-a of the insurance law;

(vii) up to forty million dollars for the period January first, two thousand six through December thirty-first, two thousand six of which fifty percentum shall be allocated to the program pursuant to section four thousand three hundred twenty-one-a of the insurance law and fifty percentum shall be allocated to the program pursuant to section four thousand three hundred twenty-two-a of the insurance law;

(viii) up to forty million dollars for the period January first, two thousand seven through December thirty-first, two thousand seven of which fifty percentum shall be allocated to the program pursuant to section four thousand three hundred twenty-one-a of the insurance law and fifty percentum shall be allocated to the program pursuant to section four thousand three hundred twenty-two-a of the insurance law; and

(ix) up to forty million dollars for the period January first, two thousand eight through December thirty-first, two thousand eight of which fifty per centum shall be allocated to the program pursuant to section four thousand three hundred twenty-one-a of the insurance law and fifty per centum shall be allocated to the program pursuant to section four thousand three hundred twenty-two-a of the insurance law.

(h) Funds shall be reserved and accumulated from year to year and shall be available, including income from invested funds, for purposes of services and expenses related to the healthy New York individual program established pursuant to sections four thousand three hundred twenty-six and four thousand three hundred twenty-seven of the insurance law from the tobacco control and insurance initiatives pool established for the following periods in the following amounts:

(i) up to six million dollars for the period January first, two thousand one through December thirty-first, two thousand one;

(ii) up to twenty-nine million dollars for the period January first,

two thousand two through December thirty-first, two thousand two;

(iii) up to five million one hundred thousand dollars for the period January first, two thousand three through December thirty-first, two thousand three;

(iv) up to twenty-four million six hundred thousand dollars for the period January first, two thousand four through December thirty-first, two thousand four;

(v) up to thirty-four million six hundred thousand dollars for the period January first, two thousand five through December thirty-first, two thousand five;

(vi) up to fifty-four million eight hundred thousand dollars for the period January first, two thousand six through December thirty-first, two thousand six;

(vii) up to sixty-one million seven hundred thousand dollars for the period January first, two thousand seven through December thirty-first, two thousand seven; and

(viii) up to one hundred three million seven hundred fifty thousand dollars for the period January first, two thousand eight through December thirty-first, two thousand eight.

(i) Funds shall be reserved and accumulated from year to year and shall be available, including income from invested funds, for purposes of services and expenses related to the healthy New York group program established pursuant to sections four thousand three hundred twenty-six and four thousand three hundred twenty-seven of the insurance law from the tobacco control and insurance initiatives pool established for the following periods in the following amounts:

(i) up to thirty-four million dollars for the period January first, two thousand one through December thirty-first, two thousand one;

(ii) up to seventy-seven million dollars for the period January first, two thousand two through December thirty-first, two thousand two;

(iii) up to ten million five hundred thousand dollars for the period January first, two thousand three through December thirty-first, two thousand three;

(iv) up to twenty-four million six hundred thousand dollars for the period January first, two thousand four through December thirty-first, two thousand four;

(v) up to thirty-four million six hundred thousand dollars for the

period January first, two thousand five through December thirty-first, two thousand five;

(vi) up to fifty-four million eight hundred thousand dollars for the period January first, two thousand six through December thirty-first, two thousand six;

(vii) up to sixty-one million seven hundred thousand dollars for the period January first, two thousand seven through December thirty-first, two thousand seven; and

(viii) up to one hundred three million seven hundred fifty thousand dollars for the period January first, two thousand eight through December thirty-first, two thousand eight.

* (i-1) Notwithstanding the provisions of paragraphs (h) and (i) of this subdivision, the commissioner shall reserve and accumulate up to two million five hundred thousand dollars annually for the periods January first, two thousand four through December thirty-first, two thousand six, one million four hundred thousand dollars for the period January first, two thousand seven through December thirty-first, two thousand seven, two million dollars for the period January first, two thousand eight through December thirty-first, two thousand eight, from funds otherwise available for distribution under such paragraphs for the services and expenses related to the pilot program for entertainment industry employees included in subsection (b) of section one thousand one hundred twenty-two of the insurance law, and an additional seven hundred thousand dollars annually for the periods January first, two thousand four through December thirty-first, two thousand six, an additional three hundred thousand dollars for the period January first, two thousand seven through June thirtieth, two thousand seven for services and expenses related to the pilot program for displaced workers included in subsection (c) of section one thousand one hundred twenty-two of the insurance law.

* NB Repealed July 1, 2027

(j) Funds shall be reserved and accumulated from year to year and shall be available, including income from invested funds, for purposes of services and expenses related to the tobacco use prevention and control program established pursuant to sections thirteen hundred ninety-nine-ii and thirteen hundred ninety-nine-jj of this chapter, from the tobacco control and insurance initiatives pool established for the

following periods in the following amounts:

(i) up to thirty million dollars for the period January first, two thousand through December thirty-first, two thousand;

(ii) up to forty million dollars for the period January first, two thousand one through December thirty-first, two thousand one;

(iii) up to forty million dollars for the period January first, two thousand two through December thirty-first, two thousand two;

(iv) up to thirty-six million nine hundred fifty thousand dollars for the period January first, two thousand three through December thirty-first, two thousand three;

(v) up to thirty-six million nine hundred fifty thousand dollars for the period January first, two thousand four through December thirty-first, two thousand four;

(vi) up to forty million six hundred thousand dollars for the period January first, two thousand five through December thirty-first, two thousand five;

(vii) up to eighty-one million nine hundred thousand dollars for the period January first, two thousand six through December thirty-first, two thousand six, provided, however, that within amounts appropriated, a portion of such funds may be transferred to the Roswell Park Cancer Institute Corporation to support costs associated with cancer research;

(viii) up to ninety-four million one hundred fifty thousand dollars for the period January first, two thousand seven through December thirty-first, two thousand seven, provided, however, that within amounts appropriated, a portion of such funds may be transferred to the Roswell Park Cancer Institute Corporation to support costs associated with cancer research;

(ix) up to ninety-four million one hundred fifty thousand dollars for the period January first, two thousand eight through December thirty-first, two thousand eight;

(x) up to ninety-four million one hundred fifty thousand dollars for the period January first, two thousand nine through December thirty-first, two thousand nine;

(xi) up to eighty-seven million seven hundred seventy-five thousand dollars for the period January first, two thousand ten through December thirty-first, two thousand ten;

(xii) up to twenty-one million four hundred twelve thousand dollars

for the period January first, two thousand eleven through March thirty-first, two thousand eleven;

(xiii) up to fifty-two million one hundred thousand dollars each state fiscal year for the period April first, two thousand eleven through March thirty-first, two thousand fourteen;

(xiv) up to six million dollars each state fiscal year for the period April first, two thousand fourteen through March thirty-first, two thousand seventeen;

(xv) up to six million dollars each state fiscal year for the period April first, two thousand seventeen through March thirty-first, two thousand twenty;

(xvi) up to six million dollars each state fiscal year for the period April first, two thousand twenty through March thirty-first, two thousand twenty-three;

(xvii) up to six million dollars each state fiscal year for the period April first, two thousand twenty-three through March thirty-first, two thousand twenty-six; and

(xviii) up to six million dollars each state fiscal year for the period April first, two thousand twenty-six through March thirty-first, two thousand twenty-nine.

(k) Funds shall be deposited by the commissioner, within amounts appropriated, and the state comptroller is hereby authorized and directed to receive for deposit to the credit of the state special revenue fund - other, HCRA transfer fund, health care services account, or any successor fund or account, for purposes of services and expenses related to public health programs, including comprehensive care centers for eating disorders pursuant to the former section twenty-seven hundred ninety-nine-l of this chapter, provided however that, for such centers, funds in the amount of five hundred thousand dollars on an annualized basis shall be transferred from the health care services account, or any successor fund or account, and deposited into the fund established by section ninety-five-e of the state finance law for periods prior to March thirty-first, two thousand eleven, from the tobacco control and insurance initiatives pool established for the following periods in the following amounts:

(i) up to thirty-one million dollars for the period January first, two thousand through December thirty-first, two thousand;

(ii) up to forty-one million dollars for the period January first, two thousand one through December thirty-first, two thousand one;

(iii) up to eighty-one million dollars for the period January first, two thousand two through December thirty-first, two thousand two;

(iv) one hundred twenty-two million five hundred thousand dollars for the period January first, two thousand three through December thirty-first, two thousand three;

(v) one hundred eight million five hundred seventy-five thousand dollars, plus an additional five hundred thousand dollars, for the period January first, two thousand four through December thirty-first, two thousand four;

(vi) ninety-one million eight hundred thousand dollars, plus an additional five hundred thousand dollars, for the period January first, two thousand five through December thirty-first, two thousand five;

(vii) one hundred fifty-six million six hundred thousand dollars, plus an additional five hundred thousand dollars, for the period January first, two thousand six through December thirty-first, two thousand six;

(viii) one hundred fifty-one million four hundred thousand dollars, plus an additional five hundred thousand dollars, for the period January first, two thousand seven through December thirty-first, two thousand seven;

(ix) one hundred sixteen million nine hundred forty-nine thousand dollars, plus an additional five hundred thousand dollars, for the period January first, two thousand eight through December thirty-first, two thousand eight;

(x) one hundred sixteen million nine hundred forty-nine thousand dollars, plus an additional five hundred thousand dollars, for the period January first, two thousand nine through December thirty-first, two thousand nine;

(xi) one hundred sixteen million nine hundred forty-nine thousand dollars, plus an additional five hundred thousand dollars, for the period January first, two thousand ten through December thirty-first, two thousand ten;

(xii) twenty-nine million two hundred thirty-seven thousand two hundred fifty dollars, plus an additional one hundred twenty-five thousand dollars, for the period January first, two thousand eleven through March thirty-first, two thousand eleven;

(xiii) one hundred twenty million thirty-eight thousand dollars for the period April first, two thousand eleven through March thirty-first, two thousand twelve; and

(xiv) one hundred nineteen million four hundred seven thousand dollars each state fiscal year for the period April first, two thousand twelve through March thirty-first, two thousand fourteen.

(l) Funds shall be deposited by the commissioner, within amounts appropriated, and the state comptroller is hereby authorized and directed to receive for deposit to the credit of the state special revenue funds - other, HCRA transfer fund, medical assistance account, or any successor fund or account, for purposes of funding the state share of the personal care and certified home health agency rate or fee increases established pursuant to subdivision three of section three hundred sixty-seven-o of the social services law from the tobacco control and insurance initiatives pool established for the following periods in the following amounts:

(i) twenty-three million two hundred thousand dollars for the period January first, two thousand through December thirty-first, two thousand;

(ii) twenty-three million two hundred thousand dollars for the period January first, two thousand one through December thirty-first, two thousand one;

(iii) twenty-three million two hundred thousand dollars for the period January first, two thousand two through December thirty-first, two thousand two;

(iv) up to sixty-five million two hundred thousand dollars for the period January first, two thousand three through December thirty-first, two thousand three;

(v) up to sixty-five million two hundred thousand dollars for the period January first, two thousand four through December thirty-first, two thousand four;

(vi) up to sixty-five million two hundred thousand dollars for the period January first, two thousand five through December thirty-first, two thousand five;

(L) up to one hundred thirty-six million dollars each state fiscal year for the period March thirty-first, two thousand fourteen through April first, two thousand seventeen;

(M) up to one hundred thirty-six million dollars each state fiscal year for the period April first, two thousand seventeen through March thirty-first, two thousand twenty;

(N) up to one hundred thirty-six million dollars each state fiscal year for the period April first, two thousand twenty through March thirty-first, two thousand twenty-three;

(O) up to one hundred thirty-six million dollars each state fiscal year for the period April first, two thousand twenty-three through March thirty-first, two thousand twenty-six; and

(P) up to one hundred thirty-six million dollars each state fiscal year for the period April first, two thousand twenty-six through March thirty-first, two thousand twenty-nine.

(ii) Adjustments to Medicaid rates made pursuant to this paragraph shall not, in aggregate, exceed the following amounts for the following periods:

(A) for the period April first, two thousand two through December thirty-first, two thousand two, one hundred ten million dollars;

(B) for the period January first, two thousand three through December thirty-first, two thousand three, one hundred eighty-five million dollars;

(C) for the period January first, two thousand four through December thirty-first, two thousand four, two hundred sixty million dollars;

(D) for the period January first, two thousand five through December thirty-first, two thousand five, three hundred forty million dollars;

(E) for the period January first, two thousand six through December thirty-first, two thousand six, three hundred forty million dollars;

(F) for the period January first, two thousand seven through December thirty-first, two thousand seven, three hundred forty million dollars;

(G) for the period January first, two thousand eight through December thirty-first, two thousand eight, three hundred forty million dollars;

(H) for the period January first, two thousand nine through December thirty-first, two thousand nine, three hundred forty million dollars;

(I) for the period January first, two thousand ten through December thirty-first, two thousand ten, three hundred forty million dollars;

(J) for the period January first, two thousand eleven through March thirty-first, two thousand eleven, eighty-five million dollars;

(K) for each state fiscal year within the period April first, two thousand eleven through March thirty-first, two thousand fourteen, three hundred forty million dollars;

(L) for each state fiscal year within the period April first, two thousand fourteen through March thirty-first, two thousand seventeen, three hundred forty million dollars;

(M) for each state fiscal year within the period April first, two thousand seventeen through March thirty-first, two thousand twenty, three hundred forty million dollars;

(N) for each state fiscal year within the period April first, two thousand twenty through March thirty-first, two thousand twenty-three, three hundred forty million dollars;

(O) for each state fiscal year within the period April first, two thousand twenty-three through March thirty-first, two thousand twenty-six, three hundred forty million dollars; and

(P) for each state fiscal year within the period April first, two

thousand twenty-six through March thirty-first, two thousand twenty-nine, three hundred forty million dollars.

(iii) Personal care service providers which have their rates adjusted pursuant to this paragraph shall use such funds for the purpose of recruitment and retention of non-supervisory personal care services workers or any worker with direct patient care responsibility only and are prohibited from using such funds for any other purpose. Each such personal care services provider shall submit, at a time and in a manner to be determined by the commissioner, a written certification attesting that such funds will be used solely for the purpose of recruitment and retention of non-supervisory personal care services workers or any worker with direct patient care responsibility. The commissioner is authorized to audit each such provider to ensure compliance with the written certification required by this subdivision and shall recoup any funds determined to have been used for purposes other than recruitment and retention of non-supervisory personal care services workers or any worker with direct patient care responsibility. Such recoupment shall be in addition to any other penalties provided by law.

(cc) Funds shall be deposited by the commissioner, within amounts appropriated, and the state comptroller is hereby authorized and directed to receive for deposit to the credit of the state special revenue funds - other, HCRA transfer fund, medical assistance account, or any successor fund or account, for the purpose of supporting the state share of adjustments to Medicaid rates of payment for personal care services provided pursuant to paragraph (e) of subdivision two of section three hundred sixty-five-a of the social services law, for local social service districts which shall not include a city with a population of over one million persons for the purpose of supporting the personal care services worker recruitment and retention program as established pursuant to section three hundred sixty-seven-q of the social services law, from the tobacco control and insurance initiatives pool established for the following periods and the following amounts:

- (i) two million eight hundred thousand dollars for the period April first, two thousand two through December thirty-first, two thousand two;
- (ii) five million six hundred thousand dollars, on an annualized basis, for the period January first, two thousand three through December thirty-first, two thousand three;

(iii) eight million four hundred thousand dollars, on an annualized basis, for the period January first, two thousand four through December thirty-first, two thousand four;

(iv) ten million eight hundred thousand dollars, on an annualized basis, for the period January first, two thousand five through December thirty-first, two thousand five;

(v) ten million eight hundred thousand dollars, on an annualized basis, for the period January first, two thousand six through December thirty-first, two thousand six;

(vi) eleven million two hundred thousand dollars for the period January first, two thousand seven through December thirty-first, two thousand seven;

(vii) eleven million two hundred thousand dollars for the period January first, two thousand eight through December thirty-first, two thousand eight;

(viii) eleven million two hundred thousand dollars for the period January first, two thousand nine through December thirty-first, two thousand nine;

(ix) eleven million two hundred thousand dollars for the period January first, two thousand ten through December thirty-first, two thousand ten;

(x) two million eight hundred thousand dollars for the period January first, two thousand eleven through March thirty-first, two thousand eleven;

(xi) up to eleven million two hundred thousand dollars each state fiscal year for the period April first, two thousand eleven through March thirty-first, two thousand fourteen;

(xii) up to eleven million two hundred thousand dollars each state fiscal year for the period April first, two thousand fourteen through March thirty-first, two thousand seventeen;

(xiii) up to eleven million two hundred thousand dollars each state fiscal year for the period April first, two thousand seventeen through March thirty-first, two thousand twenty;

(xiv) up to eleven million two hundred thousand dollars each state fiscal year for the period April first, two thousand twenty through March thirty-first, two thousand twenty-three;

(xv) up to eleven million two hundred thousand dollars each state

fiscal year for the period April first, two thousand twenty-three through March thirty-first, two thousand twenty-six; and

(xvi) up to eleven million two hundred thousand dollars each state fiscal year for the period April first, two thousand twenty-six through March thirty-first, two thousand twenty-nine.

(dd) Funds shall be deposited by the commissioner, within amounts appropriated, and the state comptroller is hereby authorized and directed to receive for deposit to the credit of the state special revenue fund - other, HCRA transfer fund, medical assistance account, or any successor fund or account, for purposes of funding the state share of Medicaid expenditures for physician services from the tobacco control and insurance initiatives pool established for the following periods in the following amounts:

(i) up to fifty-two million dollars for the period January first, two thousand two through December thirty-first, two thousand two;

(ii) eighty-one million two hundred thousand dollars for the period January first, two thousand three through December thirty-first, two thousand three;

(iii) eighty-five million two hundred thousand dollars for the period January first, two thousand four through December thirty-first, two thousand four;

(iv) eighty-five million two hundred thousand dollars for the period January first, two thousand five through December thirty-first, two thousand five;

(v) eighty-five million two hundred thousand dollars for the period January first, two thousand six through December thirty-first, two thousand six;

(vi) eighty-five million two hundred thousand dollars for the period January first, two thousand seven through December thirty-first, two thousand seven;

(vii) eighty-five million two hundred thousand dollars for the period January first, two thousand eight through December thirty-first, two thousand eight;

(viii) eighty-five million two hundred thousand dollars for the period January first, two thousand nine through December thirty-first, two thousand nine;

(ix) eighty-five million two hundred thousand dollars for the period

January first, two thousand ten through December thirty-first, two thousand ten;

(x) twenty-one million three hundred thousand dollars for the period January first, two thousand eleven through March thirty-first, two thousand eleven; and

(xi) eighty-five million two hundred thousand dollars each state fiscal year for the period April first, two thousand eleven through March thirty-first, two thousand fourteen.

(ee) Funds shall be deposited by the commissioner, within amounts appropriated, and the state comptroller is hereby authorized and directed to receive for deposit to the credit of the state special revenue fund - other, HCRA transfer fund, medical assistance account, or any successor fund or account, for purposes of funding the state share of the free-standing diagnostic and treatment center rate increases for recruitment and retention of health care workers pursuant to subdivision seventeen of section twenty-eight hundred seven of this article from the tobacco control and insurance initiatives pool established for the following periods in the following amounts:

(qq) Funds shall be reserved and accumulated from year to year and shall be available, including income from invested funds, for the purpose of supporting the long-term care insurance education and outreach program established pursuant to section two hundred seventeen-a of the elder law for the following periods in the following amounts:

(i) up to five million dollars for the period January first, two thousand four through December thirty-first, two thousand four; of such funds one million nine hundred fifty thousand dollars shall be made available to the department for the purpose of developing, implementing and administering the long-term care insurance education and outreach program and three million fifty thousand dollars shall be deposited by the commissioner, within amounts appropriated, and the comptroller is hereby authorized and directed to receive for deposit to the credit of the special revenue funds - other, HCRA transfer fund, long term care insurance resource center account of the state office for the aging or any future account designated for the purpose of implementing the long term care insurance education and outreach program and providing the long term care insurance resource centers with the necessary resources to carry out their operations;

(ii) up to five million dollars for the period January first, two thousand five through December thirty-first, two thousand five; of such funds one million nine hundred fifty thousand dollars shall be made available to the department for the purpose of developing, implementing and administering the long-term care insurance education and outreach program and three million fifty thousand dollars shall be deposited by the commissioner, within amounts appropriated, and the comptroller is hereby authorized and directed to receive for deposit to the credit of the special revenue funds - other, HCRA transfer fund, long term care insurance resource center account of the state office for the aging or any future account designated for the purpose of implementing the long term care insurance education and outreach program and providing the long term care insurance resource centers with the necessary resources to carry out their operations;

(iii) up to five million dollars for the period January first, two

thousand six through December thirty-first, two thousand six; of such funds one million nine hundred fifty thousand dollars shall be made available to the department for the purpose of developing, implementing and administering the long-term care insurance education and outreach program and three million fifty thousand dollars shall be made available to the office for the aging for the purpose of providing the long term care insurance resource centers with the necessary resources to carry out their operations;

(iv) up to five million dollars for the period January first, two thousand seven through December thirty-first, two thousand seven; of such funds one million nine hundred fifty thousand dollars shall be made available to the department for the purpose of developing, implementing and administering the long-term care insurance education and outreach program and three million fifty thousand dollars shall be made available to the office for the aging for the purpose of providing the long term care insurance resource centers with the necessary resources to carry out their operations;

(v) up to five million dollars for the period January first, two thousand eight through December thirty-first, two thousand eight; of such funds one million nine hundred fifty thousand dollars shall be made available to the department for the purpose of developing, implementing and administering the long term care insurance education and outreach program and three million fifty thousand dollars shall be made available to the office for the aging for the purpose of providing the long term care insurance resource centers with the necessary resources to carry out their operations;

(vi) up to five million dollars for the period January first, two thousand nine through December thirty-first, two thousand nine; of such funds one million nine hundred fifty thousand dollars shall be made available to the department for the purpose of developing, implementing and administering the long-term care insurance education and outreach program and three million fifty thousand dollars shall be made available to the office for the aging for the purpose of providing the long-term care insurance resource centers with the necessary resources to carry out their operations;

(vii) up to four hundred eighty-eight thousand dollars for the period January first, two thousand ten through March thirty-first, two thousand

ten; of such funds four hundred eighty-eight thousand dollars shall be made available to the department for the purpose of developing, implementing and administering the long-term care insurance education and outreach program.

(rr) Funds shall be reserved and accumulated from the tobacco control and insurance initiatives pool and shall be available, including income from invested funds, for the purpose of supporting expenses related to implementation of the provisions of title three of article twenty-nine-D of this chapter, for the following periods and in the following amounts:

(i) up to ten million dollars for the period January first, two thousand six through December thirty-first, two thousand six;

(ii) up to ten million dollars for the period January first, two thousand seven through December thirty-first, two thousand seven;

(iii) up to ten million dollars for the period January first, two thousand eight through December thirty-first, two thousand eight;

(iv) up to ten million dollars for the period January first, two thousand nine through December thirty-first, two thousand nine;

(v) up to ten million dollars for the period January first, two thousand ten through December thirty-first, two thousand ten; and

(vi) up to two million five hundred thousand dollars for the period January first, two thousand eleven through March thirty-first, two thousand eleven.

(ss) Funds shall be reserved and accumulated from the tobacco control and insurance initiatives pool and used for a health care stabilization program established by the commissioner for the purposes of stabilizing critical health care providers and health care programs whose ability to continue to provide appropriate services are threatened by financial or other challenges, in the amount of up to twenty-eight million dollars for the period July first, two thousand four through June thirtieth, two thousand five. Notwithstanding the provisions of section one hundred twelve of the state finance law or any other inconsistent provision of the state finance law or any other law, funds available for distribution pursuant to this paragraph may be allocated and distributed by the commissioner, or the state comptroller as applicable without a competitive bid or request for proposal process. Considerations relied upon by the commissioner in determining the allocation and distribution of these funds shall include, but not be limited to, the following: (i)

the importance of the provider or program in meeting critical health care needs in the community in which it operates; (ii) the provider or program provision of care to under-served populations; (iii) the quality of the care or services the provider or program delivers; (iv) the ability of the provider or program to continue to deliver an appropriate level of care or services if additional funding is made available; (v) the ability of the provider or program to access, in a timely manner, alternative sources of funding, including other sources of government funding; (vi) the ability of other providers or programs in the community to meet the community health care needs; (vii) whether the provider or program has an appropriate plan to improve its financial condition; and (viii) whether additional funding would permit the provider or program to consolidate, relocate, or close programs or services where such actions would result in greater stability and efficiency in the delivery of needed health care services or programs.

(tt) Funds shall be reserved and accumulated from year to year and shall be available, including income from invested funds, for purposes of providing grants for two long term care demonstration projects designed to test new models for the delivery of long term care services established pursuant to section twenty-eight hundred seven-x of this article, for the following periods and in the following amounts:

(i) up to five hundred thousand dollars for the period January first, two thousand four through December thirty-first, two thousand four;

(ii) up to five hundred thousand dollars for the period January first, two thousand five through December thirty-first, two thousand five;

(iii) up to five hundred thousand dollars for the period January first, two thousand six through December thirty-first, two thousand six;

(iv) up to one million dollars for the period January first, two thousand seven through December thirty-first, two thousand seven; and

(v) up to two hundred fifty thousand dollars for the period January first, two thousand eight through March thirty-first, two thousand eight.

(uu) Funds shall be reserved and accumulated from year to year and shall be available, including income from invested funds, for the purpose of supporting disease management and telemedicine demonstration programs authorized pursuant to section twenty-one hundred eleven of this chapter for the following periods in the following amounts:

(i) five million dollars for the period January first, two thousand four through December thirty-first, two thousand four, of which three million dollars shall be available for disease management demonstration programs and two million dollars shall be available for telemedicine demonstration programs;

(ii) five million dollars for the period January first, two thousand five through December thirty-first, two thousand five, of which three million dollars shall be available for disease management demonstration programs and two million dollars shall be available for telemedicine demonstration programs;

(iii) nine million five hundred thousand dollars for the period January first, two thousand six through December thirty-first, two thousand six, of which seven million five hundred thousand dollars shall be available for disease management demonstration programs and two million dollars shall be available for telemedicine demonstration programs;

(iv) nine million five hundred thousand dollars for the period January first, two thousand seven through December thirty-first, two thousand seven, of which seven million five hundred thousand dollars shall be available for disease management demonstration programs and one million dollars shall be available for telemedicine demonstration programs;

(v) nine million five hundred thousand dollars for the period January first, two thousand eight through December thirty-first, two thousand eight, of which seven million five hundred thousand dollars shall be available for disease management demonstration programs and two million dollars shall be available for telemedicine demonstration programs;

(vi) seven million eight hundred thirty-three thousand three hundred thirty-three dollars for the period January first, two thousand nine through December thirty-first, two thousand nine, of which seven million five hundred thousand dollars shall be available for disease management demonstration programs and three hundred thirty-three thousand three hundred thirty-three dollars shall be available for telemedicine demonstration programs for the period January first, two thousand nine through March first, two thousand nine;

(vii) one million eight hundred seventy-five thousand dollars for the period January first, two thousand ten through March thirty-first, two thousand ten shall be available for disease management demonstration

programs.

(ww) Funds shall be deposited by the commissioner, within amounts appropriated, and the state comptroller is hereby authorized and directed to receive for the deposit to the credit of the state special revenue funds - other, HCRA transfer fund, medical assistance account, or any successor fund or account, for purposes of funding the state share of the general hospital rates increases for recruitment and retention of health care workers pursuant to paragraph (e) of subdivision thirty of section twenty-eight hundred seven-c of this article from the tobacco control and insurance initiatives pool established for the following periods in the following amounts:

(i) sixty million five hundred thousand dollars for the period January first, two thousand five through December thirty-first, two thousand five; and

(ii) sixty million five hundred thousand dollars for the period January first, two thousand six through December thirty-first, two thousand six.

(xx) Funds shall be deposited by the commissioner, within amounts appropriated, and the state comptroller is hereby authorized and directed to receive for the deposit to the credit of the state special revenue funds - other, HCRA transfer fund, medical assistance account, or any successor fund or account, for purposes of funding the state share of the general hospital rates increases for rural hospitals pursuant to subdivision thirty-two of section twenty-eight hundred seven-c of this article from the tobacco control and insurance initiatives pool established for the following periods in the following amounts:

(i) three million five hundred thousand dollars for the period January first, two thousand five through December thirty-first, two thousand five;

(ii) three million five hundred thousand dollars for the period January first, two thousand six through December thirty-first, two thousand six;

(iii) three million five hundred thousand dollars for the period January first, two thousand seven through December thirty-first, two thousand seven;

(iv) three million five hundred thousand dollars for the period

January first, two thousand eight through December thirty-first, two thousand eight; and

(v) three million two hundred eight thousand dollars for the period January first, two thousand nine through November thirtieth, two thousand nine.

(yy) Funds shall be reserved and accumulated from year to year and shall be available, within amounts appropriated and notwithstanding section one hundred twelve of the state finance law and any other contrary provision of law, for the purpose of supporting grants not to exceed five million dollars to be made by the commissioner without a competitive bid or request for proposal process, in support of the delivery of critically needed health care services, to health care providers located in the counties of Erie and Niagara which executed a memorandum of closing and conducted a merger closing in escrow on November twenty-fourth, nineteen hundred ninety-seven and which entered into a settlement dated December thirtieth, two thousand four for a loss on disposal of assets under the provisions of title XVIII of the federal social security act applicable to mergers occurring prior to December first, nineteen hundred ninety-seven.

(zz) Funds shall be reserved and accumulated from year to year and shall be available, within amounts appropriated, for the purpose of supporting expenditures authorized pursuant to section twenty-eight hundred eighteen of this article from the tobacco control and insurance initiatives pool established for the following periods in the following amounts:

(i) six million five hundred thousand dollars for the period January first, two thousand five through December thirty-first, two thousand five;

(ii) one hundred eight million three hundred thousand dollars for the period January first, two thousand six through December thirty-first, two thousand six, provided, however, that within amounts appropriated in the two thousand six through two thousand seven state fiscal year, a portion of such funds may be transferred to the Roswell Park Cancer Institute Corporation to fund capital costs;

(iii) one hundred seventy-one million dollars for the period January first, two thousand seven through December thirty-first, two thousand seven, provided, however, that within amounts appropriated in the two

thousand six through two thousand seven state fiscal year, a portion of such funds may be transferred to the Roswell Park Cancer Institute Corporation to fund capital costs;

(iv) one hundred seventy-one million five hundred thousand dollars for the period January first, two thousand eight through December thirty-first, two thousand eight;

(v) one hundred twenty-eight million seven hundred fifty thousand dollars for the period January first, two thousand nine through December thirty-first, two thousand nine;

(vi) one hundred thirty-one million three hundred seventy-five thousand dollars for the period January first, two thousand ten through December thirty-first, two thousand ten;

(vii) thirty-four million two hundred fifty thousand dollars for the period January first, two thousand eleven through March thirty-first, two thousand eleven;

(viii) four hundred thirty-three million three hundred sixty-six thousand dollars for the period April first, two thousand eleven through March thirty-first, two thousand twelve;

(ix) one hundred fifty million eight hundred six thousand dollars for the period April first, two thousand twelve through March thirty-first, two thousand thirteen;

(x) seventy-eight million seventy-one thousand dollars for the period April first, two thousand thirteen through March thirty-first, two thousand fourteen.

(aaa) Funds shall be reserved and accumulated from year to year and shall be available, including income from invested funds, for services and expenses related to school based health centers, in an amount up to three million five hundred thousand dollars for the period April first, two thousand six through March thirty-first, two thousand seven, up to three million five hundred thousand dollars for the period April first, two thousand seven through March thirty-first, two thousand eight, up to three million five hundred thousand dollars for the period April first, two thousand eight through March thirty-first, two thousand nine, up to three million five hundred thousand dollars for the period April first, two thousand nine through March thirty-first, two thousand ten, up to three million five hundred thousand dollars for the period April first, two thousand ten through March thirty-first, two thousand eleven, up to

two million eight hundred thousand dollars each state fiscal year for the period April first, two thousand eleven through March thirty-first, two thousand fourteen, up to two million six hundred forty-four thousand dollars each state fiscal year for the period April first, two thousand fourteen through March thirty-first, two thousand seventeen, up to two million six hundred forty-four thousand dollars each state fiscal year for the period April first, two thousand seventeen through March thirty-first, two thousand twenty, up to two million six hundred forty-four thousand dollars each state fiscal year for the period April first, two thousand twenty through March thirty-first, two thousand twenty-three, up to two million six hundred forty-four thousand dollars each state fiscal year for the period April first, two thousand twenty-three through March thirty-first, two thousand twenty-six, and up to two million six hundred forty-four thousand dollars each state fiscal year for the period April first, two thousand twenty-six through March thirty-first, two thousand twenty-nine. The total amount of funds provided herein shall be distributed as grants based on the ratio of each provider's total enrollment for all sites to the total enrollment of all providers. This formula shall be applied to the total amount provided herein.

(bbb) Funds shall be reserved and accumulated from year to year and shall be available, including income from invested funds, for purposes of awarding grants to operators of adult homes, enriched housing programs and residences through the enhancing abilities and life experience (EnAble) program to provide for the installation, operation and maintenance of air conditioning in resident rooms, consistent with this paragraph, in an amount up to two million dollars for the period April first, two thousand six through March thirty-first, two thousand seven, up to three million eight hundred thousand dollars for the period April first, two thousand seven through March thirty-first, two thousand eight, up to three million eight hundred thousand dollars for the period April first, two thousand eight through March thirty-first, two thousand nine, up to three million eight hundred thousand dollars for the period April first, two thousand nine through March thirty-first, two thousand ten, and up to three million eight hundred thousand dollars for the period April first, two thousand ten through March thirty-first, two thousand eleven. Residents shall not be charged utility cost for the use

of air conditioners supplied under the EnAbLe program. All such air conditioners must be operated in occupied resident rooms consistent with requirements applicable to common areas.

(ccc) Funds shall be deposited by the commissioner, within amounts appropriated, and the state comptroller is hereby authorized and directed to receive for the deposit to the credit of the state special revenue funds - other, HCRA transfer fund, medical assistance account, or any successor fund or account, for purposes of funding the state share of increases in the rates for certified home health agencies, long term home health care programs, AIDS home care programs, hospice programs and managed long term care plans and approved managed long term care operating demonstrations as defined in section forty-four hundred three-f of this chapter for recruitment and retention of health care workers pursuant to subdivisions nine and ten of section thirty-six hundred fourteen of this chapter from the tobacco control and insurance initiatives pool established for the following periods in the following amounts:

(i) twenty-five million dollars for the period June first, two thousand six through December thirty-first, two thousand six;

(ii) fifty million dollars for the period January first, two thousand seven through December thirty-first, two thousand seven;

(iii) fifty million dollars for the period January first, two thousand eight through December thirty-first, two thousand eight;

(iv) fifty million dollars for the period January first, two thousand nine through December thirty-first, two thousand nine;

(v) fifty million dollars for the period January first, two thousand ten through December thirty-first, two thousand ten;

(vi) twelve million five hundred thousand dollars for the period January first, two thousand eleven through March thirty-first, two thousand eleven;

(vii) up to fifty million dollars each state fiscal year for the period April first, two thousand eleven through March thirty-first, two thousand fourteen;

(viii) up to fifty million dollars each state fiscal year for the period April first, two thousand fourteen through March thirty-first, two thousand seventeen;

(ix) up to fifty million dollars each state fiscal year for the period

April first, two thousand seventeen through March thirty-first, two thousand twenty;

(x) up to fifty million dollars each state fiscal year for the period April first, two thousand twenty through March thirty-first, two thousand twenty-three;

(xi) up to fifty million dollars each state fiscal year for the period April first, two thousand twenty-three through March thirty-first, two thousand twenty-six; and

(xii) up to fifty million dollars each state fiscal year for the period April first, two thousand twenty-six through March thirty-first, two thousand twenty-nine.

(ddd) Funds shall be deposited by the commissioner, within amounts appropriated, and the state comptroller is hereby authorized and directed to receive for the deposit to the credit of the state special revenue funds - other, HCRA transfer fund, medical assistance account, or any successor fund or account, for purposes of funding the state share of increases in the medical assistance rates for providers for purposes of enhancing the provision, quality and/or efficiency of home care services pursuant to subdivision eleven of section thirty-six hundred fourteen of this chapter from the tobacco control and insurance initiatives pool established for the following period in the amount of eight million dollars for the period April first, two thousand six through December thirty-first, two thousand six.

(eee) Funds shall be reserved and accumulated from year to year and shall be available, including income from invested funds, to the Center for Functional Genomics at the State University of New York at Albany, for the purposes of the Adirondack network for cancer education and research in rural communities grant program to improve access to health care and shall be made available from the tobacco control and insurance initiatives pool established for the following period in the amount of up to five million dollars for the period January first, two thousand six through December thirty-first, two thousand six.

(fff) Funds shall be made available to the empire state stem cell trust fund established by section ninety-nine-p of the state finance law within amounts appropriated up to fifty million dollars annually and shall not exceed five hundred million dollars in total.

(ggg) Funds shall be deposited by the commissioner, within amounts

appropriated, and the state comptroller is hereby authorized and directed to receive for deposit to the credit of the state special revenue fund - other, HCRA transfer fund, medical assistance account, or any successor fund or account, for the purpose of supporting the state share of Medicaid expenditures for hospital translation services as authorized pursuant to paragraph (k) of subdivision one of section twenty-eight hundred seven-c of this article from the tobacco control and initiatives pool established for the following periods in the following amounts:

(i) sixteen million dollars for the period July first, two thousand eight through December thirty-first, two thousand eight; and

(ii) fourteen million seven hundred thousand dollars for the period January first, two thousand nine through November thirtieth, two thousand nine.

(hhh) Funds shall be deposited by the commissioner, within amounts appropriated, and the state comptroller is hereby authorized and directed to receive for deposit to the credit of the state special revenue fund - other, HCRA transfer fund, medical assistance account, or any successor fund or account, for the purpose of supporting the state share of Medicaid expenditures for adjustments to inpatient rates of payment for general hospitals located in the counties of Nassau and Suffolk as authorized pursuant to paragraph (l) of subdivision one of section twenty-eight hundred seven-c of this article from the tobacco control and initiatives pool established for the following periods in the following amounts:

(i) two million five hundred thousand dollars for the period April first, two thousand eight through December thirty-first, two thousand eight; and

(ii) two million two hundred ninety-two thousand dollars for the period January first, two thousand nine through November thirtieth, two thousand nine.

(iii) Funds shall be reserved and set aside and accumulated from year to year and shall be made available, including income from investment funds, for the purpose of supporting the New York state medical indemnity fund as authorized pursuant to title four of article twenty-nine-D of this chapter, for the following periods and in the following amounts, provided, however, that the commissioner is

authorized to seek waiver authority from the federal centers for medicare and Medicaid for the purpose of securing Medicaid federal financial participation for such program, in which case the funding authorized pursuant to this paragraph shall be utilized as the non-federal share for such payments:

Thirty million dollars for the period April first, two thousand eleven through March thirty-first, two thousand twelve.

2. (a) For periods prior to January first, two thousand five, the commissioner is authorized to contract with the article forty-three insurance law plans, or such other contractors as the commissioner shall designate, to receive and distribute funds from the tobacco control and insurance initiatives pool established pursuant to this section. In the event contracts with the article forty-three insurance law plans or other commissioner's designees are effectuated, the commissioner shall conduct annual audits of the receipt and distribution of such funds. The reasonable costs and expenses of an administrator as approved by the commissioner, not to exceed for personnel services on an annual basis five hundred thousand dollars, for collection and distribution of funds pursuant to this section shall be paid from such funds.

(b) Notwithstanding any inconsistent provision of section one hundred twelve or one hundred sixty-three of the state finance law or any other law, at the discretion of the commissioner without a competitive bid or request for proposal process, contracts in effect for administration of pools established pursuant to sections twenty-eight hundred seven-k, twenty-eight hundred seven-l and twenty-eight hundred seven-m of this article for the period January first, nineteen hundred ninety-nine through December thirty-first, nineteen hundred ninety-nine may be extended to provide for administration pursuant to this section and may be amended as may be necessary.

§ 2807-w. High need indigent care adjustment pool. Funds allocated pursuant to paragraph (p) of subdivision one of section twenty-eight hundred seven-v of this article, shall be deposited as authorized and used for the purpose of making medicaid disproportionate share payments

of up to eighty-two million dollars on an annualized basis pursuant to subdivision twenty-one of section twenty-eight hundred seven-c of this article, for the period January first, two thousand through March thirty-first, two thousand fourteen, in accordance with the following:

1. From the funds in the pool each year: (a) Each eligible rural hospital shall receive one hundred forty thousand dollars on an annualized basis for the periods January first, two thousand through December thirty-first, two thousand fourteen, provided as a disproportionate share payment; provided, however, that if such payment pursuant to this paragraph exceeds a hospital's applicable disproportionate share limit, then the total amount in excess of such limit shall be provided as a nondisproportionate share payment in the form of a grant directly from this pool without allocation to the special revenue funds - other, indigent care fund - 068, or any successor fund or account, and provided further that payments for periods on and after January first, two thousand nine shall be subject to the provisions of subdivision five-a of section twenty-eight hundred seven-k of this article;

(b) Each such hospital shall also receive an amount calculated by multiplying the facility's uncompensated care need by the appropriate percentage from the following scale based on hospital rankings developed in accordance with each eligible rural hospital's weight as defined by this section.

Rank	Percentage Coverage of Uncompensated Care Need
1-9	60.0%
10-17	52.5%
18-25	45.0%
26-33	37.5%
34-41	30.0%
42-49	22.5%
50-57	15.0%
58+	7.5%

For purposes of calculating the distribution amount to an eligible rural hospital which has merged with another hospital on or after

December thirty-first, nineteen hundred ninety-nine, and continues to be an eligible rural hospital in accordance with paragraph (c) of this subdivision, such merged facility's uncompensated care need pursuant to this paragraph shall be calculated from data provided in the eligible rural hospital's institutional cost report filed for the rate period two years prior to the distribution period, or if such report is not required for such rural hospital, the distribution amount shall be based upon the last institutional cost report required to be filed by such rural hospital.

(c) "Eligible rural hospital", as used in this section, shall mean a general hospital that as of December thirty-first, nineteen hundred ninety-nine or thereafter, was classified as a rural hospital for purposes of determining payment for inpatient services provided to beneficiaries of title XVIII of the federal social security act (medicare) or under state regulations, or a general hospital, which during the same time period, had a service area which has an average population of less than one hundred seventy-five persons per square mile, or a general hospital which has a service area which has an average population of less than two hundred persons per square mile measured as population density by zip code. The average population of the service area is calculated by multiplying annual patient discharges by the population density per square mile of the county of origin or zip code as applicable for each patient discharge and dividing by total discharges. Annual patient discharges shall be determined using discharge data for the nineteen hundred ninety-seven rate year, as reported to the commissioner by October first, nineteen hundred ninety-eight. Population density shall be determined utilizing United States census bureau data for nineteen hundred ninety-seven. If an eligible rural hospital merges with another general hospital, on or after December thirty-first, nineteen hundred ninety-nine, and the merger results in separate facilities operating under a single facility operating certificate, such eligible rural hospital shall continue to be a separate eligible rural hospital for purposes of this subdivision and payments provided in accordance with this section shall be made to the merged entity; provided, however, that payments shall only be made to the merged entity if such separate eligible rural hospital continues to provide inpatient and/or outpatient hospital services at the same

location at which it operated prior to the merger. If an eligible rural hospital merges with another general hospital on or after December thirty-first, nineteen hundred ninety-nine, and the merger results in such rural hospital continuing to operate under a separate facility operating certificate, such rural hospital will continue to be an eligible rural hospital after the merger; provided, however, that payments shall only be made to such rural hospital if such eligible rural hospital continues to provide inpatient and/or outpatient hospital services at the same location at which it is operated prior to the merger.

(d) "Eligible rural hospital weight", as used in this section, shall mean the result of adding, for each eligible rural hospital:

(i) The eligible rural hospital's targeted need, as defined in section twenty-eight hundred seven-k of this article, minus the mean targeted need for all eligible rural hospitals, divided by the standard deviation of the targeted need of all eligible rural hospitals; and

(ii) The mean number of beds of all eligible rural hospitals minus the number of beds for an individual hospital, divided by the standard deviation of the number of beds for all eligible rural hospitals.

2. From the funds in the pool each year, thirty-six million dollars on an annualized basis for the periods January first, two thousand through December thirty-first, two thousand fourteen, of the funds not distributed in accordance with subdivision one of this section, shall be distributed in accordance with the formula set forth in subdivision six of section twenty-eight hundred seven-k of this article, provided, however, that payments for periods on and after January first, two thousand nine shall be subject to the provisions of subdivision five-a of section twenty-eight hundred seven-k of this article.

3. From the funds in the pool each year, any funds not distributed in accordance with subdivision one or two of this section, shall be distributed in accordance with the formula set forth in paragraph (b) of subdivision four of section twenty-eight hundred seven-k of this article.

4. In order for a general hospital to be eligible to participate in

the distribution of funds pursuant to this section, such general hospital must be in compliance with the provisions of subdivisions nine, ten and twelve of section twenty-eight hundred seven-k of this article.

5. For each hospital receiving payments pursuant to paragraph (i) of subdivision thirty-five of section twenty-eight hundred seven-c of this article, the commissioner shall reduce the sum of any amounts paid pursuant to this section and pursuant to section twenty-eight hundred seven-k of this article, as computed based on projected facility specific disproportionate share hospital ceilings, by an amount equal to the lower of such sum or each such hospital's payments pursuant to paragraph (i) of subdivision thirty-five of section twenty-eight hundred seven-c of this article, provided, however, that any additional aggregate reductions enacted in a chapter of the laws of two thousand ten to the aggregate amounts payable pursuant to this section and pursuant to section twenty-eight hundred seven-k of this article shall be applied subsequent to the adjustments otherwise provided for in this subdivision.

§ 2807-x. Grants for long term care demonstration projects. 1. The commissioner shall establish three demonstration projects to develop, evaluate and implement programs to test new models for the organization and delivery of long term care services to encourage community based programs and smaller residential health care models in order to promote consumer choice, improve the efficiency and appropriateness of the use of state and federal resources and ensure the recruitment, retention and training of health care staff to adequately meet the needs of a community and residential long term care system. Notwithstanding the provisions of section one hundred twelve of the state finance law or any other inconsistent provision of the state finance law or any other law, funds available for distribution pursuant to this section may be allocated and distributed by the commissioner without a competitive bid or request for proposal process.

(a) The following factors shall be considered in approving each demonstration project respectively:

(i) Residential health care demonstration project. (A) the extent to

which there is a reduction in the need for skilled nursing beds for a facility that is eligible to replace its existing skilled nursing facility; (B) the potential to design and develop more appropriate smaller residential health care facilities as an alternative to replacing an existing skilled nursing facility; (C) the extent to which the quality, efficiency and continuity of care will be promoted and provided for by the development of integrated long-term care services in the community; (D) the extent to which the project will provide training to health care workers to appropriately staff new community based models of long term care; (E) demonstrate the involvement and support of workforce in the program redesign; (F) the development of a new long-term care reimbursement methodology that encourages care in the least restrictive setting and adequately reflects the resources needed to serve consumers in each level of long term care; (G) and the incorporation of a research component designed to evaluate the project.

(ii) Community based care demonstration project. (A) the extent to which there is a reduction in the need for skilled nursing facility beds on a countywide basis; (B) the development of a new system to inform recently admitted residents of skilled nursing facilities of the availability of community long-term care options; (C) the extent to which the discharge planning program from skilled nursing facilities will inform, assist and maximize freedom of choice to consumers who choose to move back to the community; (D) the extent to which the project will develop community based long term care services, including funding for the recruitment and retention of direct care health care workers necessary to increase community based services; (E) the extent to which the project will provide training to health care staff; and (F) the incorporation of a research component designed to evaluate the projects.

(iii) Managed long term care project. (A) the extent to which a current operator of skilled nursing facilities possesses the necessary authorizations through a related entity to assume risk and receive capitated payments, pursuant to titles 18 and 19 of the federal social security act, for the purpose of providing and arranging for the care of individuals eligible for admission to a skilled nursing facility, (B) the extent to which such services to individuals eligible for benefits pursuant to both titles 18 and 19 of the federal social security act

will be provided through the capitated rate, (C) the extent to which the quality, efficiency and continuity of care will be promoted and provided for by the development of integrated long-term care services in the community, (D) the extent to which the project sponsor will directly or indirectly in association with a joint labor management program, provide for training of health care workers to appropriately staff community based models of long-term care; and (E) the incorporation of a research component designed to evaluate the project, with specific reference to the determination of cost savings to the state, the quality of and satisfaction with services provided to consumers and their families and the satisfaction of direct care workers, with a report of the project's progress and findings submitted annually to the commissioner.

2. The commissioner is authorized to waive, modify or suspend the respective provisions of rules and regulations promulgated pursuant to this chapter if the commissioner determines that such waiver is necessary or appropriate for the successful implementation of a demonstration project and when the health, safety, and general welfare of persons receiving services under such demonstration project will not be impaired as a result of such waiver, modification or suspension, provided however, that for the managed long term care project pursuant to subparagraph (iii) of paragraph (a) of subdivision one of this section, the method for setting the capitated rate of payment under title 19 of the federal social security act shall be consistent with the method used for all managed long term care plans authorized under subdivision eight of section forty-four hundred three-f of the public health law.

3. The commissioner is authorized to seek federal waivers pursuant to titles XVIII and XIX of the federal social security act when such waivers are necessary to develop cost-effective long term care demonstration projects.

§ 2807-y. Pool administration. 1. For periods on and after January first, two thousand five, the commissioner is authorized to contract with the article forty-three insurance law plans, or such other

contractors as the commissioner shall designate, to receive and distribute funds from the allowances and assessments established pursuant to:

(a) subdivision eighteen of section twenty-eight hundred seven-c of this article;

(b) section twenty-eight hundred seven-j of this article;

(c) section twenty-eight hundred seven-s of this article;

(d) section twenty-eight hundred seven-t of this article;

(e) section twenty-eight hundred seven-v of this article;

(f) section twenty-eight hundred seven-d of this article;

(g) section thirty-six hundred fourteen-a of this chapter;

(h) section three hundred sixty-seven-i of the social services law; and

(i) section twenty-eight hundred seven-ff of this article.

2. In the event contracts with the article forty-three insurance law plans or other commissioner's designees are effectuated, the commissioner shall conduct annual audits of the receipt and distribution of the funds and beginning January first, two thousand sixteen shall provide records of all revenues and disbursements made from allocations and assessments listed in subdivision one of this section to the temporary president of the senate and speaker of the assembly on an annual basis.

3. The reasonable costs and expenses of an administrator as approved by the commissioner, not to exceed for personnel services on an annual basis four million five hundred fifty thousand dollars, increased annually by the lower of the consumer price index or five percent, for collection and distribution of allowances and assessments set forth in subdivision one of this section, shall be paid from the allowance and assessment funds.

4. Notwithstanding any inconsistent provision of section one hundred twelve or one hundred sixty-three of the state finance law or any other law, at the discretion of the commissioner without a competitive bid or request for proposal process, contracts in effect for administration of the allowances and assessments set forth in subdivision one of this

section for the period January first, two thousand four through December thirty-first, two thousand four may be extended to provide for administration of the allowances and assessments pursuant to this section and amended as necessary.

§ 2807-z. Review of eligible federally qualified health center capital projects. 1. Notwithstanding any provision of this chapter or regulations or any other state law or regulation, for any eligible capital project as defined in subdivision six of this section, the department shall have thirty days of receipt of the certificate of need application for a limited or administrative review to deem such application complete. If the department determines the application is incomplete or that more information is required, the department shall notify the applicant in writing within thirty days of the date of the application's submission, and the applicant shall have twenty business days to provide additional information or otherwise correct the deficiency in the application.

2. For an eligible capital project requiring a limited or administrative review, within ninety days of the department deeming the application complete, the department shall make a decision to approve or disapprove the certificate of need application for such project. If the department determines to disapprove the project, the basis for such disapproval shall be provided in writing; however, disapproval shall not be based on the incompleteness of the application. If the department fails to take action to approve or disapprove the application within ninety days of the certificate of need application being deemed complete, the application will be deemed approved.

3. For an eligible capital project requiring full review by the council, the certificate of need application shall be placed on the next council agenda following the department deeming the application complete.

4. Where the commissioner or department requires the applicant to submit a contingency submission for an eligible capital project, the

commissioner or department shall have thirty days to review and approve or disapprove the contingency submission. If the commissioner or department determines that the contingency submission is incomplete, it shall so notify the applicant in writing and provide the applicant with ten business days to correct the deficiency or provide additional information. If the commissioner or department determines to disapprove the contingency submission, the basis for such disapproval shall be provided in writing; however, disapproval shall not be based on the incompleteness of the application. Within fifteen days of complete contingency satisfaction, the commissioner or department shall transmit the final approval letter to the applicant.

5. The department shall develop expedited pre-opening survey processes for eligible capital projects approved under this section, but under no circumstances shall pre-opening survey reviews be scheduled later than thirty days after final approval, construction completion and notification of such completion of the department.

6. Definitions. For the purposes of this section the following terms shall be defined as follows:

(a) "Eligible capital project" shall mean:

(i) A project that does not involve the establishment of a new operator pursuant to section twenty-eight hundred one-a of this article, with a total budget of three million dollars or more funded, in whole or in part, with federal monies pursuant to section 330 of the Public Health Service (PHS), 42 USC 254b, as amended; or

(ii) A project that does not involve the establishment of a new operator pursuant to section twenty-eight hundred one-a of this article, with a total budget of three million dollars or more funded, in whole or in part, with federal monies pursuant to the federal Capital Development-Building Capacity (CD-BC) Grant Program and Immediate Facility Improvements (CD-IFI) Grant Program, as authorized by the Patient Protection and Affordable Care Act (Affordable Care Act)((P.L. 111-148), Section 10503(c)).

(b) "Budget" shall mean the budget for the capital project.

7. Capital projects, with a total budget of less than three million

dollars that do not involve the establishment of a new operator pursuant to section twenty-eight hundred one-a of this article, funded in whole or in part through section 330 of the Public Health Service (PHS), 42 USC 254b, as amended, or through the federal Capital Development-Building Capacity (CD-BC) Grant Program and Immediate Facility Improvements (CD-IFI) Grant Program, as authorized by the Patient Protection and Affordable Care Act (Affordable Care Act)((P.L. 111-148), Section 10503(c)), shall not be subject to the requirements set forth in this section or any other law or regulation regarding certificate of need process or requirements.

8. For capital projects exempt from certificate of need requirements pursuant to subdivision seven of this section, the department shall (a) establish mechanisms to account for the capital costs of such projects in the applicant's rate of payment by governmental agencies established pursuant to section twenty-eight hundred seven of this article; (b) establish licensure requirements for such facility, which shall include payment of the fees specified at subdivision seven of section twenty-eight hundred two of this article; and (c) deem such facilities eligible for uncompensated care reimbursement made available pursuant to section seven of chapter four hundred thirty-three of the laws of nineteen hundred ninety-seven, as amended by section seventy-five of chapter one of the laws of nineteen hundred ninety-nine.

9. The commissioner shall promulgate regulations, and may promulgate emergency regulations, to implement the provisions of this section. To the extent that the commissioner has not promulgated such regulations, projects that would otherwise be exempt from certificate of need requirements may be processed, at the option of the applicant, in accordance with statutes and regulations governing the certificate of need process.

§ 2808. Residential health care facilities; rates of payment.

1-a. Notwithstanding sections one hundred twelve and one hundred sixty-three of the state finance law and any other inconsistent

provision of law, the commissioner shall make grants to public residential health care facilities without a competitive bid or request for proposal process for the purposes of addressing the overall increases in input costs borne by such facilities. Such modifications shall also be primarily intended to promote the provision of quality health care, quality operation, updated technology and improved staff development and support by such facilities. Such grants shall be in the following aggregate amounts for the following periods: five million for the period April first, two thousand six through March thirty-first, two thousand seven; fifteen million for the period April first, two thousand seven through March thirty-first, two thousand eight; and ten million for the period April first, two thousand eight through March thirty-first, two thousand nine.

The amount allocated to each eligible public residential health care facility for each period shall be calculated as the result of (i) the total payment for each period multiplied by (ii) the ratio of patient days for patients eligible for medical assistance pursuant to title eleven of article five of the social services law provided by the public residential health care facility, divided by the total of such patient days summed for all eligible public residential health care facilities. Grants under this subdivision shall be made on a quarterly basis.

* 2. (a) The commissioner, with the approval of the state hospital review and planning council, shall promulgate regulations to be effective the first day of January, nineteen hundred seventy-eight, relating the rate of payment for each residential health care facility to real property costs.

(b) Such regulations may differentiate based upon the form of ownership of the facility, and shall provide for consideration of such factors as the age, size, location and condition of the facility.

(c) For facilities granted operating certificates prior to March tenth, nineteen hundred seventy-five, the real property costs shall be computed upon a cost valuation basis of the facility as determined by the commissioner, who, subject to the approval of the director of the budget, may provide exceptions in circumstances where he finds that application of the regulations would result in excessive reimbursement or in severe economic hardship to the facility not caused by

circumstances reasonably under the control of the facility.

(d) For facilities granted operating certificates on or after March tenth, nineteen hundred seventy-five, recognition of real property costs in such regulations shall be based upon historical costs to the owner of the facility, provided that payment for real property costs shall not be in excess of the actual debt service, including principal and interest, and payment with respect to owner's equity. For purposes of this subdivision, owner's equity shall be calculated without regard to any surplus created by revaluation of assets and shall not include amounts resulting from mortgage amortization where the payment therefor has been provided by real property cost reimbursement.

(e) All transactions, including leases and mortgages, which are not bona fide and reasonable shall be disregarded.

* NB Expired December 31, 1978

2-a. (a) The commissioner, with the approval of the state hospital review and planning council, shall promulgate regulations to be effective the first day of January, nineteen hundred seventy-nine, relating the rate of payment for each residential health care facility to real property costs.

(b) Such regulations may differentiate based upon the form of ownership of the facility, and shall provide for consideration of such factors as the age, size, location and condition of the facility.

(c) For facilities granted operating certificates prior to March tenth, nineteen hundred seventy-five, the real property costs shall be computed upon a cost valuation basis of the facility as determined by the commissioner, who, subject to the approval of the director of the budget, may provide exceptions in circumstances where he finds that application of the regulations would result in excessive reimbursement or in severe economic hardship to the facility not caused by circumstances reasonably under the control of the facility.

* (d) For facilities granted operating certificates on or after March tenth, nineteen hundred seventy-five, recognition of real property costs in such regulations shall be based upon historical costs to the owner of the facility, provided that payment for real property costs shall not be in excess of the actual debt service, including principal and interest, and payment with respect to owner's equity, and further provided that,

subject to federal financial participation, and subject to the approval of the commissioner, effective April first, two thousand fifteen, the commissioner may modify such payments for real property costs for purposes of effectuating a shared savings program, whereby facilities share a minimum of fifty percent of savings, for facilities that elect to refinance their mortgage loans. For purposes of this subdivision, owner's equity shall be calculated without regard to any surplus created by revaluation of assets and shall not include amounts resulting from mortgage amortization where the payment therefor has been provided by real property cost reimbursement.

* NB Effective until March 31, 2030

* (d) For facilities granted operating certificates on or after March tenth, nineteen hundred seventy-five, recognition of real property costs in such regulations shall be based upon historical costs to the owner of the facility, provided that payment for real property costs shall not be in excess of the actual debt service, including principal and interest, and payment with respect to owner's equity. For purposes of this subdivision, owner's equity shall be calculated without regard to any surplus created by revaluation of assets and shall not include amounts resulting from mortgage amortization where the payment therefor has been provided by real property cost reimbursement.

* NB Effective March 31, 2030

(e) All transactions, including leases and mortgages, which are not bona fide and reasonable shall be disregarded.

2-b. Notwithstanding any inconsistent provision of this section, or any other contrary provision of law and subject to the availability of federal financial participation, the operating cost component of rates of payment by governmental agencies for inpatient services provided on and after January first, two thousand seven by residential health care facilities shall be in accordance with the following:

(a) (i) Subject to the provisions of subparagraphs (ii) through (vi) of this paragraph, for the two thousand seven rate period the operating cost component of rates of payment shall reflect the operating cost component of rates effective for October first, two thousand six, as adjusted for inflation in accordance with paragraph (c) of subdivision ten of section twenty-eight hundred seven-c of this article; and for the

January first, two thousand eight through March thirty-first, two thousand nine rate period the operating cost component of rates of payment shall reflect the operating cost component of rates effective for December thirty-first, two thousand six, as adjusted for inflation in accordance with paragraph (c) of subdivision ten of section twenty-eight hundred seven-c of this article.

(ii) Rates for the periods two thousand seven and two thousand eight shall be further adjusted by a per diem add-on amount, as determined by the commissioner, reflecting the proportional amount of each facility's projected Medicaid benefit to the total projected Medicaid benefit for all facilities of the imputed use of the rate-setting methodology set forth in paragraph (b) of this subdivision, provided, however, that for those facilities that do not receive a per diem add-on adjustment pursuant to this subparagraph, rates shall be further adjusted to include the proportionate benefit, as determined by the commissioner, of the expiration of the opening paragraph and paragraph (a) of subdivision sixteen of this section and of paragraph (a) of subdivision fourteen of this section, provided, further, however, that the aggregate total of the rate adjustments made pursuant to this subparagraph shall not exceed one hundred thirty-seven million five hundred thousand dollars for the two thousand seven rate period and one hundred sixty-seven million five hundred thousand dollars for the two thousand eight rate period and provided further, however, that such rate adjustments as made pursuant to this subparagraph prior to two thousand twelve shall not be subject to subsequent adjustment or reconciliation.

(iii) Revisions to two thousand six rates occurring on and after January first, two thousand seven, shall be annually incorporated, retroactively and prospectively, into two thousand seven and two thousand eight rates on or about November thirtieth, two thousand seven and November thirtieth, two thousand eight, respectively.

(iv) The capital cost component of rates pursuant to this paragraph shall fully reflect the cost of local property taxes and payments made in lieu of local property taxes, as reported in each facility's cost report submitted for the year two years prior to the rate year.

(v) Rates for the two thousand seven and two thousand eight rate periods, as computed pursuant to this paragraph, shall not be subject to case mix adjustment, provided, however, that a facility may, in

accordance with its existing full house schedule of submission of patient review instruments, submit data in support of a request for a rate adjustment to reflect an increased facility case mix equal to or greater than .05, provided further, however, that such a facility will be required to continue to make such full house submissions in accordance with its existing submission schedule for rate periods up through December thirty-first, two thousand eight.

(vi) For the period January first, two thousand seven through December thirty-first, two thousand eight, notwithstanding any contrary provision of law or regulation, voluntary facilities shall not be required to deposit reimbursement received for depreciation expenses into a segregated depreciation fund account.

(b) (i) (A) Subject to the provisions of subparagraphs (ii) through (xiv) of this paragraph, for periods on and after April first, two thousand nine the operating cost component of rates of payment shall reflect allowable operating costs as reported in each facility's cost report for the two thousand two calendar year, as adjusted for inflation on an annual basis in accordance with the methodology set forth in paragraph (c) of subdivision ten of section twenty-eight hundred seven-c of this article, provided, however, that for those facilities which are determined by the commissioner to be qualifying facilities in accordance with the provisions of clause (B) of this subparagraph, rates shall be further adjusted to include the proportionate benefit, as determined by the commissioner, of the expiration of the opening paragraph and paragraph (a) of subdivision sixteen of this section and of paragraph (a) of subdivision fourteen of this section, and provided further that the operating cost component of rates of payment for those facilities which are determined by the commissioner to be qualifying facilities in accordance with the provisions of clause (B) of this subparagraph shall not be less than the operating component such facilities received in the two thousand eight rate period, as adjusted for inflation on an annual basis in accordance with the methodology set forth in paragraph (c) of subdivision ten of section twenty-eight hundred seven-c of this article and further provided, however, that rates for facilities whose operating cost component reflects base year costs subsequent to January first, two thousand two shall have rates computed in accordance with this paragraph, utilizing allowable operating costs as reported in such

subsequent base year period, and trended forward to the rate year in accordance with applicable inflation factors.

(B) For the purposes of this subparagraph qualifying facilities are those facilities for which the commissioner determines that their reported two thousand two base year operating cost component, as defined in accordance with the regulations of the department as set forth in 10 NYCRR 86-2.10(a)(7); is less than the operating component such facilities received in the two thousand eight rate period, as adjusted by applicable trend factors.

(ii) (A) The operating component of rates shall be subject to case mix adjustment through application of the relative resource utilization groups system of patient classification (RUG-III) employed by the federal government with regard to payments to skilled nursing facilities pursuant to title XVIII of the federal social security act (Medicare), as revised by regulation to reflect New York state wages and fringe benefits, provided, however, that such RUG-III classification system weights shall be increased in the following amounts for the following categories of residents: (1) thirty minutes for the impaired cognition A category, (2) forty minutes for the impaired cognition B category, and (3) twenty-five minutes for the reduced physical functions B category. Such adjustments shall be made in January and July of each calendar year. Such adjustments and related patient classifications in each facility shall be subject to audit review in accordance with regulations promulgated by the commissioner.

(B) Effective April first, two thousand twenty-four, the case mix adjustment from the operating component of the rates for skilled nursing facilities shall remain unchanged from the July two thousand twenty-three rates during the development and until full implementation of a case mix methodology using the Patient Driven Payment Model.

(iii) Specified adjustments to the operating component of rates in effect for periods prior to January first, two thousand nine, with regard to extended care for persons with traumatic brain injury and for the cost of providing hepatitis B vaccinations shall continue on and after January first, two thousand nine.

(iv) The capital cost component of rates on and after January first, two thousand nine shall: (A) fully reflect the cost of local property taxes and payments made in lieu of local property taxes, as reported in

each facility's cost report submitted for the year two years prior to the rate year; (B) provided, however, notwithstanding any inconsistent provision of this article, commencing April first, two thousand twenty for rates of payment for patients eligible for payments made by state governmental agencies, the capital cost component determined in accordance with this subparagraph and inclusive of any shared savings for eligible facilities that elect to refinance their mortgage loans pursuant to paragraph (d) of subdivision two-a of this section, shall be reduced by the commissioner by five percent; and (C) provided, however, notwithstanding any inconsistent provision of this article, commencing April first, two thousand twenty-four and ending March thirty-first, two thousand twenty-six for rates of payment for patients eligible for payments made by state governmental agencies, the capital cost component determined in accordance with this subparagraph and inclusive of any shared savings for eligible facilities that elect to refinance their mortgage loans pursuant to paragraph (d) of subdivision two-a of this section, shall be reduced by the commissioner by an additional ten percent, provided, however, that such reduction shall not apply to rates of payment for patients in pediatric residential health care facilities as defined in paragraph (c) of subdivision two of section twenty-eight hundred eight-e of this article.

(v) The direct component of the operating component of rates of payment shall include allowable direct therapy costs and associated overhead costs and shall exclude administrative overhead costs related to pharmacy services and the costs of non-prescription drugs and supplies, which shall be reflected in facility rates as non-comparable costs.

(vi) For purposes of computing peer group cost ceilings for the direct and indirect component of the operating component of rates, facilities shall be organized into peer groups consisting of: (A) free-standing facilities with certified bed capacities of less than three hundred beds; (B) free-standing facilities with certified bed capacities of three hundred beds or more; and (C) hospital based facilities.

(vii) In determining the operating cost component of rates, for each peer group, a corridor shall be developed around the statewide mean direct and indirect price per day, provided, however, that the corridor around each mean direct and indirect price per day shall have a base no

less than eighty-five percent and no greater than ninety percent of each mean direct and indirect price per day and a ceiling no greater than one hundred fifteen percent and no less than one hundred ten percent of each mean direct and indirect price per day, and further provided, however, that the total financial impact of the application of the ceiling shall be substantially equal to the total financial impact of the application of the base.

(viii) The operating component of rates shall be adjusted to reflect a per diem add-on amount of eight dollars, trended forward to reflect applicable inflation factors from two thousand six to two thousand nine and prospectively thereafter, for each patient who: (A) qualifies under both the RUG-III impaired cognition and the behavioral problems categories, or (B) has been diagnosed with Alzheimer's disease or dementia, is classified in the reduced physical functions A, B or C, or in behavioral problems A or B categories, and has an activities of daily living index score of ten or less.

(ix) The operating component of rates shall be adjusted to reflect a per diem add-on amount of seventeen dollars, trended forward to reflect applicable inflation factors from two thousand six to two thousand nine and prospectively thereafter, for each patient whose body mass index is greater than thirty-five.

(x) For periods on and after January first, two thousand nine, notwithstanding any contrary provision of law or regulation, voluntary facilities shall not be required to deposit reimbursement received for depreciation expenses into a segregated depreciation fund account.

(xi) Public facilities, and non-public facilities with fewer than eighty certified beds, which have a facility specific direct adjusted payment price per day equal to the ceiling direct price per day shall have such direct adjusted payment price per day further adjusted through the addition of fifty percent of the difference between the facility's specific direct cost per day and the ceiling direct price per day. Public facilities, and non-public facilities with fewer than eighty certified beds, which have a facility specific indirect adjusted payment price per day equal to the ceiling indirect price per day shall have such indirect adjusted payment price per day further adjusted through the addition of fifty percent of the difference between the facility's specific indirect cost per day and the ceiling indirect price per day.

Such adjustments to direct and indirect adjusted payment prices per day shall be increased to the rate year by application of the applicable inflation factor and adjusted by the regional direct and indirect input price adjustment factors calculated pursuant to subdivision seventeen of this section.

(xii) Public facilities shall receive rates that are consistent with the provisions of this paragraph, provided, however, that in no event shall such rates, in aggregate, exceed the amount permitted under federal upper payment limits applicable to public facilities. In the event such public facilities are, pursuant to this subparagraph, subject to limitations on such rates, the commissioner shall make grants from state funds to such facilities equal to one-half of the additional amount that such facilities would have received if such limitations had not been applied.

(xiii) The appointment of a receiver or the establishment of a new operator or replacement or renovation of an existing facility on or after January first, two thousand seven shall not result in a revision to the operating component of the facility's rates for any rate period through December thirty-first, two thousand eleven, provided, however, that the provisions of this subparagraph shall not apply to a facility which has a certificate of need application filed with the department as of December thirty-first, two thousand six, which is subsequently approved and which otherwise meets existing department criteria for the establishment of a new base year for rate-setting purposes.

(xiv) The commissioner may promulgate regulations, including emergency regulations, to implement the provisions of this paragraph.

(c) In order to ensure that the quality of resident care is maintained and improved for rate periods on and after January first, two thousand seven, no less than sixty-five percent of the additional Medicaid reimbursement received by a residential health care facility that is attributable to the per-diem add-on amount received pursuant to subparagraph (ii) of paragraph (a) of this subdivision or, for rate periods on and after January first, two thousand nine, that is related to utilization of two thousand two reported base year costs, as compared to the reimbursement each such facility would have received had such facility's Medicaid reimbursement rates continued to reflect base year costs used with regard to such facility's two thousand six rates, shall

be allocated for the purpose of recruitment and retention of non-supervisory workers or any worker with direct resident care responsibility or for purposes authorized under the nursing home quality improvement demonstration program as established by section twenty-eight hundred eight-d of this article, provided, however, in no circumstance shall facilities be required to spend more than seventy-five percent of such funds for these purposes, and provided further, the commissioner is authorized to audit each such facility for the purpose of ensuring compliance with the provisions of this paragraph and shall recoup any amount determined to have been in contravention of the requirements of this paragraph, provided, however, that, upon application of a facility, the commissioner may, after determining that other funds are not available, waive the application of this paragraph insofar as it is determined by the commissioner that additional funds must be expended by such facility to correct deficiencies that constitute a threat to resident safety.

(d) Cost reports submitted by residential health care facilities for the two thousand two calendar year or any part thereof shall, notwithstanding any contrary provision of law, be subject to audit through December thirty-first, two thousand eighteen and facilities shall retain for the purpose of such audits all fiscal and statistical records relevant to such cost reports, provided, however, that any such audit commenced on or before December thirty-first, two thousand eighteen, may be completed and used for the purpose of adjusting any Medicaid rates which utilize such costs.

(e) For rate periods subsequent to two thousand nine which utilize reported costs from a base year subsequent to two thousand two, the following categories of facilities, as established pursuant to applicable regulations, shall receive rates that are no less than equivalent, as determined by the commissioner, to the rates that were in effect for such facilities on December thirty-first, two thousand six, trended forward for inflation to the applicable rate period: (A) AIDS facilities or discrete AIDS units within facilities, (B) discrete units for residents receiving care in a long term inpatient rehabilitation program for traumatic brain injured persons, (C) discrete units for long term ventilator dependent residents, (D) discrete units providing specialized programs for residents requiring behavioral interventions,

and (E) facilities or discrete units within facilities that provide extensive nursing, medical, psychological and counseling support services solely to children.

(f) The operating component of Medicaid rates of payment shall, by no later than the two thousand twelve rate period, be based on allowable costs, as reported on annual facility cost reports, from a base year period no earlier than three years prior to the initial rate year, and then trended forward by applicable inflation factors. Thereafter, the base year utilized for rate-setting purposes shall be updated to be current no less frequently than every six years provided, however, that for the purposes of this paragraph, current shall mean that the operating components of the initial rate year utilizing such updated base year shall reflect allowable costs as reported in annual facility cost reports for periods no earlier than three years prior to such initial rate year and then trended forward to the rate year in accordance with applicable inflation factors.

(g) Notwithstanding any contrary provision of this subdivision or any other contrary provision of law, rule or regulation, rates of payment for inpatient services provided on and after April first, two thousand nine by residential health care facilities shall, except for the establishment of any statewide or any peer group base, mean or ceiling prices per day, be calculated utilizing only the number of patients properly assessed and reported in each patient classification group and eligible for medical assistance pursuant to title eleven of article five of the social services law.

(h) Notwithstanding any contrary provision of law and subject to the availability of federal financial participation, for the period April first, two thousand eleven through June thirtieth, two thousand eleven, the non-capital components of rates shall be subject to a uniform percentage reduction sufficient to reduce such rates by an aggregate amount of twenty-seven million one hundred thousand dollars, and provided further, however, that such reductions shall be disregarded in computations made pursuant to section two of part D of chapter fifty-eight of the laws of two thousand nine, as amended.

2-c. (a) Notwithstanding any inconsistent provision of this section or any other contrary provision of law and subject to the availability of

federal financial participation, the non-capital component of rates of payment by governmental agencies for inpatient services provided by residential health care facilities on or after October first, two thousand eleven, but no later than January first, two thousand twelve, shall reflect a direct statewide price component, and indirect statewide price component, and a facility specific non-comparable component, utilizing allowable operating costs for a base year as determined by the commissioner by regulation. Such rate components shall be periodically updated to reflect changes in operating costs.

(b) The direct and indirect statewide price components shall be adjusted by a wage equalization factor and such other factors as determined to be appropriate to recognize legitimate cost differentials and the direct statewide price component shall be subject to a case mix adjustment utilizing the patients that are eligible for medical assistance pursuant to title eleven of article five of the social services law. Such wage equalization factor shall be periodically updated to reflect current labor market conditions.

(c) The non-capital component of the rates for: (i) AIDS facilities or discrete AIDS units within facilities; (ii) discrete units for residents receiving care in a long-term inpatient rehabilitation program for traumatic brain injured persons; (iii) discrete units providing specialized programs for residents requiring behavioral interventions; (iv) discrete units for long-term ventilator dependent residents; and (v) facilities or discrete units within facilities that provide extensive nursing, medical, psychological and counseling support services solely to children shall reflect the rates in effect for such facilities on January first, two thousand nine, as adjusted for inflation and rate appeals in accordance with applicable statutes, provided, however, that such rates for facilities described in subparagraph (i) of this paragraph shall reflect the application of the provisions of section twelve of part D of chapter fifty-eight of the laws of two thousand nine, and provided further, however, that insofar as such rates reflect trend adjustments for trend factors attributable to the two thousand eight and two thousand nine calendar years the aggregate amount of such trend factor adjustments shall be subject to the provisions of section two of part D of chapter fifty-eight of the laws of two thousand nine, as amended.

(d) The commissioner shall promulgate regulations, and may promulgate emergency regulations, to implement the provisions of this subdivision. Such regulations shall be developed in consultation with the nursing home industry and advocates for residential health care facility residents and, further, the commissioner shall provide notification concerning such regulations to the chairs of the senate and assembly health committees, the chair of the senate finance committee and the chair of the assembly ways and means committee. Such regulations shall include provisions for rate adjustments or payment enhancements to facilitate a minimum four-year transition of facilities to the rate-setting methodology established by this subdivision and may also include, but not be limited to, provisions for facilitating quality improvements in residential health care facilities. For purposes of facilitating quality improvements through the establishment of a nursing home quality pool to be funded at the discretion of the commissioner by (i) adjustments in medical assistance rates, (ii) funds made available through state appropriations, or (iii) a combination thereof, those facilities that contribute to the quality pool, but are deemed ineligible for quality pool payments due exclusively to a specific case of employee misconduct, shall nevertheless be eligible for a quality pool payment if the facility properly reported the incident, did not receive a survey citation from the commissioner or the Centers for Medicare and Medicaid Services establishing the facility's culpability with regard to such misconduct and, but for the specific case of employee misconduct, the facility would have otherwise received a quality pool payment. Regulations pertaining to the facilitation of quality improvement may be made effective for periods on and after January first, two thousand thirteen.

(e) With the exception of those enrollees covered under a payment rate methodology agreement negotiated with a residential health care facility, payments for inpatient residential health care facility services provided to patients eligible for medical assistance pursuant to title eleven of article five of the social services law made by organizations operating in accordance with the provisions of article forty-four of this chapter or by health maintenance organizations organized and operating in accordance with article forty-three of the insurance law, shall be the rates of payment that would be paid for such

patients under the medical assistance program as determined pursuant to this section and subdivision ten of section twenty-eight hundred seven-d of this article and as in effect at the time such services were provided. The provisions of this paragraph shall not apply to payments for patients whose placement in a residential health care facility is for the purpose of receiving time-limited rehabilitation, to be followed by discharge from the facility, during the period such time-limited services are provided.

(f) The commissioner shall establish a prospective per diem adjustment for all nursing homes, other than nursing homes providing services primarily to children under the age of twenty-one, beginning April first, two thousand seventeen and each year thereafter sufficient to achieve eighteen million dollars in savings in each state fiscal year.

* (g) Notwithstanding any other provision of law or regulation to the contrary, any residential health care facility established pursuant to this article located in a county with a population of more than seventy-two thousand and less than seventy-five thousand persons based on the two thousand ten federal census, and operating between one hundred ten and one hundred thirty beds, being reimbursed by the department on a fee-for-services basis, shall be reimbursed at a rate of no less than one hundred seventeen percent of the fee-for-service rate of reimbursement calculated pursuant to this section for that facility for inpatient services provided on or after March first, two thousand eighteen.

* NB There are 2 par (g)'s

* (g) The commissioner shall reduce Medicaid revenue to a residential health care facility in a payment year by two percent if in each of the two most recent payment years for which New York state nursing home quality initiative data is available, the facility was ranked in the lowest two quintiles of facilities based on its nursing home quality initiative performance, and was ranked in the lowest quintile in the most recent payment year. The commissioner shall waive the application of this paragraph to a facility if the commissioner determines that the facility is in financial distress.

* NB There are 2 par (g)'s

2-d. Residential health care facility supplemental payments.

Notwithstanding any inconsistent provision of law, rule or regulation and subject to the availability of federal financial participation, for the period May first, two thousand eleven through May thirty-first, two thousand eleven, the commissioner shall adjust inpatient medicaid rates of payment established pursuant to this article for eligible residential health care facilities in accordance with the following:

(a) Rate adjustments made pursuant to this subdivision shall be in the form of rate add-ons and shall not exceed an aggregate amount of two hundred twenty-one million three hundred thousand dollars.

(b) Eligible facilities are those facilities which the commissioner determines have experienced a net reduction in their inpatient Medicaid reimbursement for the period April first, two thousand nine through March thirty-first, two thousand eleven as a result of the following:

(i) inpatient rate adjustments made pursuant to paragraph (b) of subdivision two-b of this section;

(ii) use of the case mix methodology described in paragraph (g) of subdivision two-b of this section;

(iii) inpatient rate adjustments made pursuant to section two of part D of chapter fifty-eight of the laws of two thousand nine, as amended.

(c) The following eligible facilities shall receive rate adjustments pursuant to this subdivision equal to one hundred percent of their net reimbursement reduction as computed by the commissioner in accordance with paragraph (b) of this subdivision:

(i) facilities that have been determined by the commissioner as being eligible for distributions of amounts available for the two thousand nine period as provided in subdivision twenty-one of this section;

(ii) non-public facilities whose total operating losses equal or exceed five percent of total operating revenue and whose medicaid utilization equals or exceeds seventy percent, based on either their two thousand nine cost report or based on the otherwise most recently available cost report, as determined by the commissioner;

(iii) facilities or distinct units of facilities providing inpatient services primarily to children under the age of twenty-one.

(d) Eligible facilities, other than eligible facilities described in paragraph (c) of this subdivision, shall receive rate adjustments pursuant to this subdivision equal to fifty percent of their net reimbursement reduction as computed by the commissioner in accordance

with paragraph (b) of this subdivision.

(e) Eligible facilities as described in paragraph (d) of this subdivision which, as determined by the commissioner, after application of the rate adjustments authorized by paragraph (d) of this subdivision, remain subject to a net reduction in their inpatient Medicaid revenue that is in excess of two percent, as measured with regard to the non-capital components of facility inpatient rates in effect on March thirty-first, two thousand nine as computed prior to the application of trend factor adjustments attributable to the two thousand eight and two thousand nine calendar years, shall have their rates further adjusted such that such net reduction does not exceed such two percent.

(f) Eligible facilities as described in paragraph (d) of this subdivision which, as determined by the commissioner, have experienced a net reduction in their inpatient rates of more than six million dollars as a result of the application of the factor described in subparagraph (iii) of paragraph (b) of this subdivision shall after application of the provisions of paragraph (e) of this subdivision, have their rates further adjusted such that any such net reduction remaining after the application of the other provisions of this subdivision is reduced to zero.

(g) In computing net reductions of medicaid reimbursement pursuant to paragraph (b) of this subdivision the commissioner shall:

(i) disregard the impact of case mix adjustments as otherwise scheduled for July first, two thousand ten; and,

(ii) disregard the impact of any rate adjustments issued on or after January first, two thousand eleven, including adjustments to rate periods prior to January first, two thousand eleven.

(h) Payments made pursuant to this subdivision shall not be subject to subsequent adjustment or reconciliation and, further, the computation and application of limitations on medicaid rates of payment as described in section two of part D of chapter fifty-eight of the laws of two thousand nine, as amended, and as applicable to the rate periods described in paragraph (a) of this subdivision, shall disregard payments made pursuant to this subdivision.

(i) Additional rate adjustments shall be made pursuant to this subdivision to eligible facilities in the form of rate add-ons for the period May first, two thousand eleven through May thirty-first, two

thousand eleven which shall in aggregate be equal to twenty-five percent of the aggregate amount described in paragraph (a) of this subdivision and which shall be distributed to each eligible facility in the same proportion as the total distributions otherwise received by each facility pursuant to this subdivision.

(j) The commissioner may, with the approval of the director of the budget, and subject to the identification of sufficient nursing home related medicaid savings to offset the expenditures authorized by this paragraph, make additional rate adjustments pursuant to this subdivision to eligible facilities in the form of rate add-ons for the period December first, two thousand eleven through December thirty-first, two thousand eleven which shall in aggregate be equal to twelve and five-tenths percent of the aggregate amount described in paragraph (a) of this subdivision and which shall be distributed to each eligible facility in the same proportion as the total distributions otherwise received by each facility pursuant to this subdivision.

3. The commissioner, with the approval of the state hospital review and planning council, shall promulgate regulations to be effective the first day of January, nineteen hundred seventy-eight, which shall relate the rate of payment to the efficient operation and program management of the facility, as well as to the quality of patient care provided by the facility. Such regulations shall be consistent with the requirements of subdivision three of section twenty-eight hundred seven of this chapter and with federal laws and regulations.

4. The commissioner, in determining and certifying to the director of the budget the rates of payment to residential health care facilities, shall exclude the following costs: (a) contributions or other payments to political parties, candidates or organizations; (b) direct or indirect costs incurred for advertising or promotion except as allowed by the commissioner; (c) costs incurred for the promotion or opposition, directly or indirectly, of the passage of bills or resolutions pending before or passed by a legislative body of any jurisdiction; (d) costs which principally afford diversion, entertainment or amusement to their owners, operators or employees not properly related to patient care or treatment; (e) any penalty imposed by governmental agencies or courts,

and the costs of policies obtained solely to insure against the imposition of such a penalty; and (f) costs incurred by the residential health care facility to obtain the security required under the provisions of section twenty-eight hundred nine of this chapter.

5. (a) Any operator withdrawing equity or assets from a hospital operated for profit so as to create or increase a negative net worth or when the hospital is in a negative net worth position, calculated without regard to any surplus created by revaluation of assets, must obtain the prior approval of the commissioner in accordance with regulations promulgated by the commissioner with the approval of the state hospital review and planning council. The commissioner shall make a determination to approve or disapprove a request for withdrawal of equity or assets under this subdivision within sixty days of the date of the receipt of such a request. Requests shall be made in a form acceptable to the department by certified or registered mail. In addition to any other remedy or penalty available under this chapter, and after opportunity for a hearing, the commissioner may require replacement of the withdrawn equity or assets and may impose a penalty for violation of the provisions of this subdivision, relating to withdrawing equity or assets, or the regulations promulgated thereunder, in an amount not to exceed ten percent of any amount withdrawn without prior approval. No facility shall enter into a real property mortgage or lease transaction without thirty days prior notice in writing to the commissioner.

(b) On and after April first, two thousand ten, no non-public residential health care facility may withdraw equity or transfer assets which in the aggregate exceed:

(i) three percent of such facility's total reported annual revenue for patient care services, based on the facility's most recently available reported data, without prior written notification to the commissioner; or

(ii) in the case of a residential health care facility which (1) over the two immediately preceding successive quarters for which relevant data is available to the department, has been compliant with the minimum staffing level requirements prescribed by section twenty-eight hundred ninety-five-b of this chapter; (2) is not in the special focus facility

program operated by the centers for medicare and Medicaid services or subject to a denial of payment for new admissions imposed by the centers for medicare and Medicaid services; and (3) has not been the subject of an enforcement action brought by the department or the centers for medicare and Medicaid services in the previous eighteen months that resulted in a finding of deficiency, five percent of such facility's total reported annual revenue for patient care services, based on the facility's most recently available reported data, without prior written notification to the commissioner. Notification shall be made in a form acceptable to the department by certified or registered mail.

(c) Notwithstanding any inconsistent provision of this subdivision, on and after April first, two thousand ten, no non-public residential health care facility, whether operated as a for-profit facility or as a not-for-profit facility, may withdraw equity or transfer assets which in the aggregate exceed:

(i) three percent of such facility's total reported annual revenue for patient care services, based on the facility's most recently available reported data, without the prior written approval of the commissioner; or

(ii) in the case of a residential health care facility which (1) over the two immediately preceding successive quarters for which relevant data is available to the department, has been compliant with the minimum staffing level requirements prescribed by section twenty-eight hundred ninety-five-b of this chapter; (2) is not in the special focus facility program operated by the centers for medicare and Medicaid services or subject to a denial of payment for new admissions imposed by the centers for medicare and Medicaid services; and (3) has not been the subject of an enforcement action brought by the department or the centers for medicare and Medicaid services in the previous eighteen months that resulted in a finding of deficiency, five percent of such facility's total reported annual revenue for patient care services, based on the facility's most recently available reported data, without prior written notification to the commissioner. The commissioner shall make a determination to approve or disapprove a request for withdrawal of equity or assets under this subdivision within sixty days of the date of the receipt of a written request from the facility. Requests shall be made in a form acceptable to the department by certified or registered

mail. In reviewing such requests the commissioner shall consider the facility's overall financial condition, any indications of financial distress, whether the facility is delinquent in any payment owed to the department, whether the facility has been cited for immediate jeopardy or substandard quality of care, and such other factors as the commissioner deems appropriate. In addition to any other remedy or penalty available under this chapter, and after opportunity for a hearing, the commissioner may require replacement of the withdrawn equity or assets and may impose a penalty for violation of the provisions of this subdivision in an amount not to exceed ten percent of any amount withdrawn without prior approval.

* 6. Prior to the approval by the state hospital review and planning council of any regulations promulgated pursuant to this section, the commissioner shall convene a public hearing, upon at least seven days notice, to consider the proposed regulations. The commissioner shall include a summary of the comments made at such hearing in a report to the state hospital review and planning council at the meeting at which it considers the regulations for approval.

* NB Expired December 31, 1985

* 7. The commissioner may assess an annual fee on each residential health care facility to be used to reimburse any first instance appropriation for the purpose of making payments to receivers pursuant to subdivision three of section twenty-eight hundred ten of this article. Such fee shall not exceed thirty dollars per bed certified pursuant to this article, and shall be a reimbursable expense for the purposes of determining rates of payment made by government agencies. The reimbursement rate for a facility must reflect the cost of the annual fee prior to requiring that the facility pay the fee. The commissioner shall seek to obtain federal approval to include such fee as a reimbursable expense for purposes of computing reimbursement rates pursuant to title XVIII of the federal social security act.

* NB (Effective pending Federal Law - Expired December 31, 1983)

8. Every lease or lease renewal executed on or after September first, nineteen hundred eighty-six between a landlord and the operator of a residential health care facility shall contain a provision terminating any interest the operator of such facility may have in any lease of

premises used for the operation of such facility after the public health council has approved the establishment of a new operator. Nothing herein shall be construed to affect any interest such operator may have in any movable equipment located on the premises of the facility. In the event any lease or lease renewal executed on or after September first, nineteen hundred eighty-six fails to contain the termination provision required by this subdivision, the lease or lease renewal shall be deemed to be terminated upon the public health council approval of a new operator. The commissioner, the landlord, or the new operator shall be entitled to maintain a summary proceeding to recover possession of the real property in any court of competent jurisdiction upon such termination.

9. Trend factors. (a) The commissioner, in accordance with the methodology developed by the consultants pursuant to paragraph (b) of this subdivision, shall establish trend factors to project for the effect of inflation. The factors shall be applied to the appropriate portion of reimbursable costs of residential health care facilities. The methodology for developing the trend factor shall include the appropriate external price indicators and shall also include the data from major collective bargaining agreements as reported quarterly by the federal department of labor, bureau of labor statistics, for nonsupervisory employees.

(b) The methodology shall be developed by four independent consultants with expertise in health economics appointed by the commissioner pursuant to paragraph (b) of subdivision ten of section twenty-eight hundred seven-c of this chapter. On or about September first of each year following the effective date of this subdivision, the consultants shall provide to the commissioner and the council the methodology to be used to determine the trend factors for subsequent rate periods only, beginning with the nine month period commencing April first, nineteen hundred ninety-one and for subsequent twelve month periods commencing January first, nineteen hundred ninety-two and thereafter. The commissioner shall monitor the actual price movements during these periods of the external price indicators used in the methodology, shall report the results of the monitoring to the consultants and shall implement the recommendations of the consultants for one prospective

interim annual adjustment to the trend factors to reflect such price movements and to be effective on January first, one year after the initial trend factor was established and one prospective final annual adjustment to the trend factors to reflect such price movements and to be effective on January first, two years after the initial trend factor was established.

11. Residential health care facility reimbursement rate promulgation. With regard to a residential health care facility, the provisions of subdivision seven of section twenty-eight hundred seven of this article relating to advance notification of rates shall not apply to prospective or retroactive adjustments to rates that are based on rate appeals filed by such facility, audits, changes in patient conditions or acuity levels, the correction of errors or omissions of data or errors in the computations of such rates, the submission of cost report data from facilities without an established cost basis, the judicial annulment or invalidation of existing rates or changes in the methodology used to compute rates which changes are promulgated following the judicial annulment or invalidation of existing rates or as otherwise authorized by law. Notwithstanding any inconsistent provision of law or regulation, as of April first, two thousand nine, with regard to administrative rate appeals, the department will only review such appeals for (a) the correction of computational errors or omissions of data by the department in determining the operating rate based upon the information provided to the department prior to the computation of the rate, (b) capital cost reimbursement, or (c) such reasons as the commissioner determines are appropriate. The department will not consider any revisions made to a facility's annual cost report for operating rate adjustment purpose later than the due date established by the commissioner.

12. (a) Notwithstanding any inconsistent provision of law or regulation, the commissioner shall increase rates of payment established pursuant to this article for non-state operated public residential health care facilities in an aggregate amount not to exceed one hundred million dollars in additional reimbursement for payments for services provided during the period July first, nineteen hundred ninety-five

through March thirty-first, nineteen hundred ninety-six. The commissioner may adopt rules and regulations necessary to implement this paragraph.

(b) Notwithstanding any inconsistent provision of law or regulation, the commissioner shall provide, in addition to payments established pursuant to this article prior to application of this section, additional payments under the medical assistance program pursuant to title eleven of article five of the social services law for non-state operated public residential health care facilities, excluding public residential health care facilities operated by a town or city within a county, in an aggregate amount of two hundred fifty-seven million dollars in additional payments in the period August first, nineteen hundred ninety-six through March thirty-first, nineteen hundred ninety-seven.

(c) Notwithstanding any inconsistent provision of law or regulation, the commissioner shall provide, in addition to payments established pursuant to this article prior to application of this section, additional payments under the medical assistance program pursuant to title eleven of article five of the social services law for non-state operated public residential health care facilities, including public residential health care facilities located in the county of Nassau and the county of Westchester, but excluding public residential health care facilities operated by a town or city within a county, in an aggregate amount of \$631.1 million in additional payments in the period April first, nineteen hundred ninety-seven through March thirty-first, nineteen hundred ninety-eight, and a like amount in the period April first, nineteen hundred ninety-eight through March thirty-first, nineteen hundred ninety-nine.

(d) Notwithstanding any inconsistent provision of law or regulation, the commissioner shall provide, in addition to payments established pursuant to this article prior to application of this section, additional payments under the medical assistance program pursuant to title eleven of article five of the social services law for non-state operated public residential health care facilities, including public residential health care facilities located in the county of Nassau and the county of Westchester, but excluding public residential health care facilities operated by a town or city within a county, in an aggregate

amount of \$914.5 million in additional payments in the period April first, nineteen hundred ninety-nine through March thirty-first, two thousand.

(e) Notwithstanding any inconsistent provision of law or regulation, the commissioner shall provide, in addition to payments established pursuant to this article prior to application of this section, additional payments under the medical assistance program pursuant to title eleven of article five of the social services law for non-state operated public residential health care facilities, including public residential health care facilities located in the county of Nassau and the county of Westchester, but excluding public residential health care facilities operated by a town or city within a county, in an aggregate amount of up to \$991.5 million in additional payments each state fiscal year for the period beginning April first, two thousand through March thirty-first, two thousand five.

(e-1) Notwithstanding any inconsistent provision of law or regulation, the commissioner shall provide, in addition to payments established pursuant to this article prior to application of this section, additional payments under the medical assistance program pursuant to title eleven of article five of the social services law for non-state operated public residential health care facilities, including public residential health care facilities located in the county of Nassau, the county of Westchester and the county of Erie, but excluding public residential health care facilities operated by a town or city within a county, in aggregate annual amounts of up to one hundred fifty million dollars in additional payments for the state fiscal year beginning April first, two thousand six and for the state fiscal year beginning April first, two thousand seven and for the state fiscal year beginning April first, two thousand eight and of up to three hundred million dollars in such aggregate annual additional payments for the state fiscal year beginning April first, two thousand nine, and for the state fiscal year beginning April first, two thousand ten and for the state fiscal year beginning April first, two thousand eleven, and for the state fiscal years beginning April first, two thousand twelve and April first, two thousand thirteen, and of up to five hundred million dollars in such aggregate annual additional payments for the state fiscal years beginning April first, two thousand fourteen, April first, two thousand

fifteen and April first, two thousand sixteen and of up to five hundred million dollars in such aggregate annual additional payments for the state fiscal years beginning April first, two thousand seventeen, April first, two thousand eighteen, and April first, two thousand nineteen, and of up to five hundred million dollars in such aggregate annual additional payments for the state fiscal years beginning April first, two thousand twenty, April first, two thousand twenty-one, and April first, two thousand twenty-two, and of up to five hundred million dollars in such aggregate annual additional payments for the state fiscal years beginning April first, two thousand twenty-three, and from April first, two thousand twenty-four until December thirty-first, two thousand twenty-four, and for the calendar year January first, two thousand twenty-five through December thirty-first, two thousand twenty-five, and for each calendar year thereafter. The amount allocated to each eligible public residential health care facility for this period shall be computed in accordance with the provisions of paragraph (f) of this subdivision, provided, however, that patient days shall be utilized for such computation reflecting actual reported data for two thousand three and each representative succeeding year as applicable, and provided further, however, that, in consultation with impacted providers, of the funds allocated for distribution in the state fiscal year beginning April first, two thousand thirteen, up to thirty-two million dollars may be allocated in accordance with paragraph (f-1) of this subdivision.

(f) The amount allocated to each eligible public residential health care facility for each period shall be calculated as the result of (A) the total payment for each period multiplied by (B) the ratio of patient days for patients eligible for medical assistance pursuant to title eleven of article five of the social services law provided by the public residential health care facility, divided by the total of such patient days summed for all eligible public residential health care facilities. For the period August first, nineteen hundred ninety-six through March thirty-first, nineteen hundred ninety-seven, nineteen hundred ninety-four patient days shall be utilized; for the period April first, nineteen hundred ninety-seven through March thirty-first, nineteen hundred ninety-eight, nineteen hundred ninety-five patient days shall be utilized; for the period April first, nineteen hundred ninety-eight

through March thirty-first, nineteen hundred ninety-nine, nineteen hundred ninety-six patient days shall be utilized; for the period April first, nineteen hundred ninety-nine through March thirty-first, two thousand, nineteen hundred ninety-seven patient days shall be utilized; for the period April first, two thousand through March thirty-first, two thousand one, nineteen hundred ninety-eight patient days shall be utilized; for the period April first, two thousand one through March thirty-first, two thousand two, nineteen hundred ninety-nine patient days shall be utilized; for the period April first, two thousand two through March thirty-first, two thousand three, two thousand patient days shall be utilized; for the period April first, two thousand three through March thirty-first, two thousand four, two thousand one patient days shall be utilized; for the period April first, two thousand four through March thirty-first, two thousand five, two thousand two patient days shall be utilized.

(f-1) Funds allocated by the provisions of paragraph (e-1) of this subdivision for distribution pursuant to this paragraph, shall be allocated proportionally to those public residential health care facilities which were subject to retroactive reductions in payments made pursuant to this subdivision for state fiscal year periods beginning April first, two thousand six.

(g) Payments may be made based on adjustments to rates of payment for services provided during the applicable period or as lump sum payments to an eligible residential health care facility.

13. Notwithstanding any inconsistent provision of law or regulation to the contrary, residential health care facility rates of payment determined pursuant to this article for governmental agencies for services provided on or after July first, nineteen hundred ninety-five through March thirty-first, nineteen hundred ninety-six shall be reduced by the commissioner, to reflect the elimination of operational requirements previously mandated by law or, consistent with the standards specified in subparagraph (v) of paragraph (a) of subdivision two of section twenty-eight hundred three of this article, regulation or the commissioner or other governmental agency, by a factor determined as follows:

(i) an aggregate reduction shall be calculated for each residential

health care facility as the result of (A) fifty-six million dollars on an annualized basis for nineteen hundred ninety-five, trended to the rate year by the trend factor for projection of reimbursable costs to the rate year, multiplied by (B) the ratio of patient days for patients eligible for payments made by governmental agencies provided in a base year two years prior to the rate year by a residential health care facility, divided by the total of such patient days summed for all residential health care facilities; and

(ii) the result for each residential health care facility shall be divided by such patient days provided in the residential health care facility, for a per diem reduction in rates of payment for such residential health care facility for patients eligible for payments made by governmental agencies.

14. (a) Notwithstanding any inconsistent provision of law or regulation to the contrary, for purposes of establishing rates of payment by governmental agencies for residential health care facilities for services provided on or after April first, nineteen hundred ninety-five through March thirty-first, nineteen hundred ninety-nine and for services provided on or after July first, nineteen hundred ninety-nine through March thirty-first, two thousand and on and after April first, two thousand through March thirty-first, two thousand three and on and after April first, two thousand three through March thirty-first, two thousand six and on and after April first, two thousand six through December thirty-first, two thousand six, the reimbursable base year administrative services and fiscal services costs, as defined in the New York state residential health care facility accounting and reporting manual, of a residential health care facility, excluding a provider of services reimbursed on an initial budget basis, shall, except as otherwise provided in this subdivision, not exceed the statewide average of total reimbursable base year administrative and fiscal services costs of residential health care facilities. For the purposes of this subdivision, reimbursable base year administrative and fiscal services costs shall mean those base year administrative and fiscal services costs remaining after application of all other efficiency standards, including but not limited to, peer group cost ceilings or guidelines.

(b) A separate statewide average of total reimbursable base year administrative and fiscal services costs shall be determined for each of those facilities wherein eighty percent or more of its patients are classified with a patient acuity equal to or less than .83 which is used as the basis for a facility's case mix adjustment. For the period July first, two thousand through March thirty-first, two thousand one, the total reimbursable base year administrative and fiscal services costs of such facilities shall not exceed such separate statewide average plus one and one-half percentage points. For annual periods thereafter through December thirty-first, two thousand six, the total reimbursable base year administrative and fiscal services costs of such facilities shall not exceed such separate statewide average. In no event shall the calculation of such separate statewide average result in a change in the statewide average determined under paragraph (a) of this subdivision.

(c) The limitation on reimbursement for provider administrative and fiscal expenses provided by this subdivision shall be expressed as a percentage reduction of the operating cost component of the rate promulgated by the commissioner for each residential health care facility.

15. Notwithstanding any inconsistent provision of law or regulation to the contrary, for services provided by residential health care facilities for the period April first, nineteen hundred ninety-five through March thirty-first, nineteen hundred ninety-six, the commissioner shall not be required to revise a certified rate of payment established pursuant to this article based on consideration of rate appeals filed by a residential health care facility. In cases where the commissioner determines that a significant financial hardship exists, he or she may, subject to the approval of the director of the budget, consider an exemption to this subdivision. Beginning April first, nineteen hundred ninety-six and thereafter, the commissioner shall consider such rate appeals within a reasonable period. After April first, nineteen hundred ninety-six, through March thirty-first, nineteen hundred ninety-seven, the commissioner shall revise certified rates of payment not to exceed an aggregate payment of forty-seven million dollars, state share medical assistance.

16. Notwithstanding any inconsistent provision of law or regulation to the contrary, residential health care facility rates of payment determined pursuant to this article for governmental agencies for services provided on or after April first, nineteen hundred ninety-six through March thirty-first, nineteen hundred ninety-nine and on or after July first, nineteen hundred ninety-nine through March thirty-first, two thousand and on and after April first, two thousand through March thirty-first, two thousand three and on and after April first, two thousand three through March thirty-first, two thousand six and on and after April first, two thousand six through December thirty-first, two thousand six, shall be further reduced by the commissioner to encourage improved productivity and efficiency by providers by a factor determined as follows:

(a) an aggregate reduction shall be calculated for each residential health care facility commencing April first, nineteen hundred ninety-six through March thirty-first, nineteen hundred ninety-nine and on or after July first, nineteen hundred ninety-nine through March thirty-first, two thousand and on and after April first, two thousand through March thirty-first, two thousand three and on and after April first, two thousand three through March thirty-first, two thousand six and on and after April first, two thousand six through December thirty-first, two thousand six as the result of (i) fifty-six million dollars on an annualized basis multiplied by (ii) the ratio of patient days for patients eligible for payments made by governmental agencies provided in a base year two years prior to the rate year by a residential health care facility, or for residential health care facility beds not fully in operation in such base year by an estimate of projected utilization for the rate year, divided by the total of such patient days summed for all residential health care facilities; and

(b) the result for each residential health care facility shall be divided by such patient days provided in the residential health care facility, for a per diem reduction in rates of payment for such residential health care facility for patients eligible for payments made by governmental agencies.

17. (a) Notwithstanding any inconsistent provision of law or regulation to the contrary, for the period April first, nineteen hundred

ninety-seven through March thirty-first, nineteen hundred ninety-eight, the commissioner shall not be required to revise a certified rate of payment established pursuant to this article based on consideration of rate appeals filed by a residential health care facility or based upon adjustments to capital cost reimbursement as a result of approval by the commissioner of an application for construction under section twenty-eight hundred two of this article. For the period April first, nineteen hundred ninety-eight, through March thirty-first, nineteen hundred ninety-nine, the commissioner shall revise certified rates of payment in an aggregate amount not to exceed twenty million dollars, state share medical assistance. In cases where the commissioner determines that a significant financial hardship exists, he or she may, subject to the approval of the director of the budget, consider an exemption to this subdivision. Beginning April first, nineteen hundred ninety-nine and thereafter, the commissioner shall consider such rate appeals within a reasonable period.

(b) Notwithstanding any inconsistent provision of law or regulation to the contrary, for the state fiscal years beginning April first, two thousand ten and ending March thirty-first, two thousand twenty-nine, the commissioner shall not be required to revise certified rates of payment established pursuant to this article for rate periods prior to April first, two thousand twenty-nine, based on consideration of rate appeals filed by residential health care facilities or based upon adjustments to capital cost reimbursement as a result of approval by the commissioner of an application for construction under section twenty-eight hundred two of this article, in excess of an aggregate annual amount of eighty million dollars for each such state fiscal year provided, however, that for the period April first, two thousand eleven through March thirty-first, two thousand twelve such aggregate annual amount shall be fifty million dollars. In revising such rates within such fiscal limit, the commissioner shall, in prioritizing such rate appeals, include consideration of which facilities the commissioner determines are facing significant financial hardship as well as such other considerations as the commissioner deems appropriate and, further, the commissioner is authorized to enter into agreements with such facilities or any other facility to resolve multiple pending rate appeals based upon a negotiated aggregate amount and may offset such

negotiated aggregate amounts against any amounts owed by the facility to the department, including, but not limited to, amounts owed pursuant to section twenty-eight hundred seven-d of this article; provided, however, that the commissioner's authority to negotiate such agreements resolving multiple pending rate appeals as hereinbefore described shall continue on and after April first, two thousand twenty-nine. Rate adjustments made pursuant to this paragraph remain fully subject to approval by the director of the budget in accordance with the provisions of subdivision two of section twenty-eight hundred seven of this article.

(c) Notwithstanding any other contrary provision of law, rule or regulation, for periods on and after April first, two thousand eleven the commissioner shall promulgate regulations, and may promulgate emergency regulations, establishing priorities and time frames for processing rate appeals, including rate appeals filed prior to April first, two thousand eleven, within available administrative resources; provided, however, that such regulations shall not be inconsistent with the provisions of paragraph (b) of this subdivision.

17-a. Notwithstanding any inconsistent provision of law or regulation to the contrary, for purposes of establishing rates of payment by governmental agencies for residential health care facilities for services provided on and after January first, nineteen hundred ninety-eight, the regional direct and indirect input price adjustment factors to be applied to any such facility's rate calculation shall be based upon the utilization of either nineteen hundred eighty-three, nineteen hundred eighty-seven or nineteen hundred ninety-three calendar year financial and statistical data and for periods beginning April first, two thousand four through March thirty-first, two thousand nine based on either nineteen hundred eighty-three, nineteen hundred eighty-seven, nineteen hundred ninety-three or two thousand one calendar year financial and statistical data; provided, however, the state share amount for the utilization of two thousand one calendar year data shall be no more than twenty-two million dollars on a pro rata basis per calendar year. The determination of which calendar year's data to utilize shall be based upon a methodology that ensures that the particular year chosen by each facility results in a factor that yields no less reimbursement to the facility than would result from the use of

any of the other three years' data. Such methodology shall utilize the nineteen hundred eighty-three and nineteen hundred eighty-seven regional direct and indirect input price adjustment factor corridor percentages in existence on January first, nineteen hundred ninety-seven as well as nineteen hundred ninety-three regional direct and indirect input price adjustment factor corridor percentage in existence on January first, two thousand four as well as a two thousand one regional direct and indirect input price adjustment factor corridor percentage calculated in the same manner as the nineteen hundred ninety-three direct and indirect input price adjustment factor corridor percentages in existence on January first, two thousand four; provided, however, for rate periods on and after April first, two thousand nine, the regional input price adjustment factors shall be based on the case mix predicted staffing for registered nurses, licensed practical nurses, nurses' aides, licensed therapists and therapist aides. For the rate period beginning April first, two thousand nine through the day immediately prior to the day the provisions of subdivision two-c of this section take effect, the regional direct and indirect input price adjustment factors to be applied to a facility's rate calculation shall be based upon the utilization of two thousand two calendar year financial and statistical data. Such methodology shall utilize two thousand two regional direct and indirect input price adjustment factor corridor percentages calculated in the same manner as the two thousand one regional direct and indirect input price adjustment factor corridor percentages in existence on December thirty-first, two thousand six except that every region shall receive a corridor to reflect the region's actual variation subject to a maximum statewide average variable corridor percentage of ten percent.

18. Residential health care facility recruitment and retention of health care workers. Notwithstanding any inconsistent provision of law, rule or regulation and subject to the availability of federal financial participation:

(a) (i) The commissioner shall adjust inpatient medical assistance rates of payment established pursuant to this article for non-public residential health care facilities in accordance with subparagraph (ii) of this paragraph for purposes of recruitment and retention of health

care workers in the following aggregate amounts for the following periods:

(A) fifty-three million five hundred thousand dollars on an annualized basis for the period April first, two thousand two through December thirty-first, two thousand two; eighty-three million three hundred thousand dollars on an annualized basis for the period January first, two thousand three through December thirty-first, two thousand three; one hundred fifteen million eight hundred thousand dollars on an annualized basis for the period January first, two thousand four through December thirty-first, two thousand six; fifty-seven million nine hundred thousand dollars for the period January first, two thousand seven through June thirtieth, two thousand seven, fifty-seven million nine hundred thousand dollars for the period July first, two thousand seven through March thirty-first, two thousand eight, and fifty-nine million four hundred thousand dollars for the period April first, two thousand eight through March thirty-first, two thousand nine.

(ii) Such increases shall be allocated proportionally based on each non-public residential health care facility's reported total gross salary and fringe benefit costs on exhibit H of the 1999 RHCF - 4 cost report or exhibit 11 of the 1999 institutional cost report submitted as of November first, two thousand one, where applicable, to the total of such reported costs for all non-public residential health care facilities, provided, however, that for periods on and after July first, two thousand seven, fifty percent of such increases shall be allocated proportionally, based on each non-public residential health care facility's reported total gross salary and fringe benefit costs on exhibit H of the nineteen hundred ninety-nine RHFC - 4 cost report or exhibit 11 of the nineteen hundred ninety-nine institutional cost report submitted to the department prior to November first, two thousand one, where applicable, to the total of such reported costs for all non-public residential health care facilities, and fifty percent of such increases shall be allocated proportionately, based on each such non-public facility's reported Medicaid revenue, as reported in the applicable two thousand five cost report as submitted to the department prior to November first, two thousand six, to the total of such Medicaid revenue reported by all such non-public facilities. These amounts shall be included as a reimbursable cost add-on to medical assistance inpatient

rates of payment established pursuant to this article for non-public residential health care facilities, based on medical assistance utilization data in each facility's annual cost report submitted two years prior to the rate year. Such amounts shall not be reconciled to reflect changes in medical assistance utilization between the year two years prior to the rate year and the rate year.

(b) (i) Notwithstanding sections one hundred twelve and one hundred sixty-three of the state finance law and any other inconsistent provision of law, the commissioner shall make grants to public residential health care facilities without a competitive bid or request for proposal process for purposes of recruitment and retention of health care workers in the following aggregate amounts for the following periods:

(A) seven million five hundred thousand dollars on an annualized basis for the period April first, two thousand two through December thirty-first, two thousand two; eleven million seven hundred thousand dollars on an annualized basis for the period January first, two thousand three through December thirty-first, two thousand three; sixteen million two hundred thousand dollars on an annualized basis for the period January first, two thousand four through December thirty-first, two thousand six; and eight million one hundred thousand dollars for the period January first, two thousand seven through June thirtieth, two thousand seven, eight million one hundred thousand dollars for the period July first, two thousand seven through March thirty-first, two thousand eight, six million six hundred ninety thousand dollars for the period April first, two thousand eight through March thirty-first, two thousand nine.

(ii) Such grants shall be allocated proportionally based on each public residential health care facility's reported total gross salary and fringe benefit costs on exhibit H of the 1999 RHCF - 4 cost report or exhibit 11 of the 1999 institutional cost report submitted as of November first, two thousand one, where applicable, to the total of such reported costs for all public residential health care facilities.

(c) (i) Non-public and public residential health care facilities in operation as of the effective date of this paragraph which have not submitted 1999 RHCF-4 cost reports or 1999 institutional cost reports but which have submitted such reports for cost years subsequent to 1999,

shall have distributions authorized in subparagraph (i) of paragraph (a) of this subdivision or in subparagraph (i) of paragraph (b) of this subdivision allocated based on total gross salary and fringe benefit costs on exhibit H of the earliest subsequently submitted RHCF-4 cost report or exhibit 11 of the earliest subsequently submitted institutional cost report, as trended downward to 1999 using trend factors authorized in accordance with the provisions of section twenty-one of chapter one of the laws of nineteen hundred ninety-nine.

(ii) Non-public and public residential health care facilities in operation as of the effective date of this paragraph which have not submitted 1999 or subsequent RHCF-4 cost reports or institutional cost reports, shall have distributions authorized in subparagraph (i) of paragraph (a) of this subdivision or in subparagraph (i) of paragraph (b) of this subdivision allocated based on imputed total gross salary and fringe benefit costs reflecting the average of such costs in the region in which each such facility is located, provided, however, that for periods on and after July first, two thousand seven, facilities that have not submitted two thousand five cost reports shall have distributions allocated based on imputed days of care to patients eligible for medical assistance, reflecting the average of such medicaid days of care in the region in which such facilities are located.

(iii) Non-public and public residential health care facilities which received allocations pursuant to subparagraph (ii) of this paragraph and which subsequently submit RHCF-4 cost reports or institutional cost reports shall, for the purpose of setting medical assistance rates of payment, have such allocations adjusted to reflect costs which were incurred in connection with such allocations and which are contained in such cost reports.

(d) Residential health care facilities which have their rates adjusted or receive grants pursuant to paragraphs (a), (b) and (c) of this subdivision, respectively, shall use such funds for the purpose of recruitment and retention of non-supervisory workers at health care facilities or any worker with direct patient care responsibility and are prohibited from using such funds for any other purpose. Funds under this subdivision are not intended to supplant support provided by a local government. Each such residential health care facility shall submit, at a time and in a manner to be determined by the commissioner, a written

certification attesting that such funds will be used solely for the purpose of recruitment and retention of non-supervisory workers at health care facilities or any worker with direct patient care responsibility. The commissioner is authorized to audit each residential health care facility to ensure compliance with the written certification required by this paragraph and shall recoup any funds determined to have been used for purposes other than recruitment and retention of non-supervisory workers at health care facilities or any worker with direct patient care responsibility. Such recoupment shall be in addition to applicable penalties under sections twelve and twelve-b of this chapter.

(e) Residential health care facilities which have their rates adjusted or receive grants pursuant to paragraphs (a), (b) and (c) of this subdivision, respectively, shall use such funds for the purpose of recruitment and retention of non-supervisory workers at health care facilities or any worker with direct patient care responsibility and are prohibited from using such funds for any other purpose. Funds under this subdivision are not intended to supplant support provided by a local government. Each such residential health care facility shall submit, at a time and in a manner to be determined by the commissioner, a written certification attesting that such funds will be used solely for the purpose of recruitment and retention of non-supervisory workers at health care facilities or any worker with direct patient care responsibility. The commissioner is authorized to audit each residential health care facility to ensure compliance with the written certification required by this paragraph and shall recoup any funds determined to have been used for purposes other than recruitment and retention of non-supervisory workers at health care facilities or any worker with direct patient care responsibility. Such recoupment shall be in addition to applicable penalties under sections twelve and twelve-b of this chapter.

19. Notwithstanding any law, rule or regulation to the contrary, the commissioner shall within amounts allocated pursuant to paragraph (hh) of subdivision one of section twenty-eight hundred seven-v of this article, make adjustments to the medical assistance rates of payment to residential health care facilities to assist certain financially

disadvantaged nursing homes, in order to promote financial stability and quality improvement. Such adjustments shall be made pursuant to subdivision twenty-one of this section.

20. a. The commissioner shall timely develop and implement a standardized process for assessing the feasibility of capital mortgage re-financings, including a standard formula for determining the net cost benefit of re-financing, inclusive of all transaction and closing costs. On or before September first, two thousand three or thirty days after the commissioner makes the standard formula available to facilities, each residential health care facility established under this article and certified as a provider pursuant to title XIX of the federal social security act (Medicaid), except for those facilities established under the nursing home companies law or the hospital loan construction law, shall review its existing capital debt structure using the standard formula to evaluate whether or not a material cost benefit could be derived by re-financing its capital mortgage or mortgages, and shall forward the results of such review to the commissioner. The commissioner may request and such facilities shall submit descriptions of existing mortgage arrangements and debt service reserve funds as needed to implement paragraph b of this subdivision. Facilities established under the nursing home companies law or the hospital loan construction law shall submit to the dormitory authority, the housing finance agency and/or the state of New York mortgage agency such information as is required by such agency to evaluate potential re-financing of such capital mortgages.

b. the commissioner shall review each facility's submission and make a written determination as to whether or not the facility should re-finance its capital mortgage or mortgages, and if so, for what amount, within sixty days of the date of the facility's submission based on the following parameters:

(i) the mortgage re-financing must result in a present value cost benefit that "materially exceeds", as such term is defined by the commissioner, the amount of all transaction and closing costs associated with the re-financing, including any pre-payment penalties associated with the current mortgage or mortgages. The commissioner shall do such

calculations in a manner consistent with comparable calculations in the state finance law;

(ii) mortgages may be re-financed for a term greater than the remaining term of the existing debt within certain limits, if doing so would result in the present value cost benefit specified in subparagraph (i) of this paragraph;

(iii) mortgages may be re-financed utilizing variable rate mortgage loans, if doing so would result in the present value cost benefit specified in subparagraph (i) of this paragraph. In such cases, for purposes of determining the reimbursable capital interest expense included in the capital cost component of rates of payment determined pursuant to this article, the average interest rate over the life of the re-financed mortgage shall not exceed the interest rate in effect on the previous mortgage debt immediately prior to the re-financing;

(iv) not-for-profit and governmental residential health care facilities may utilize taxable mortgage loans to re-finance their existing debts, if doing so would result in the present value cost benefit specified in subparagraph (i) of this paragraph;

(v) moneys contained in facility debt service reserve funds may be considered in the evaluation of amounts necessary to be re-financed, but only to the extent such moneys total more than the debt service reserves needed to establish the successor capital mortgage financing;

(vi) in no event shall funded depreciation accounts, or building funds accumulated through donor-restricted contributions or unrestricted contributions, gifts, bequests, or legacies, be considered in the evaluation of amounts necessary to be re-financed; and

(vii) notwithstanding any inconsistent provision of law or regulation to the contrary, the principal amount, including all transaction and closing costs and any pre-payment penalties associated with the previous mortgage or mortgages, that is thereby deemed necessary to be re-financed by the commissioner, as approved by the public authorities control board and the United States department of housing and urban development where appropriate, shall be considered the final, approved mortgage amount for capital cost reimbursement under the relevant provisions of this article.

c. Notwithstanding any inconsistent provision of law or regulation to

the contrary, the capital cost component of rates of payment for services provided for the period beginning October first, two thousand three or one hundred eighty days after the effective date of this subdivision, whichever is later, through March thirty-first, two thousand four for residential health care facilities established under this article and certified as providers pursuant to title XIX of the federal social security act (Medicaid), except for those facilities established under the nursing home companies law or the hospital loan construction law, that have been identified by the commissioner as refinancing candidates pursuant to paragraph b of this subdivision shall reflect capital interest costs equivalent to the lower of the prevailing market borrowing rates available on or about July first, two thousand three or ninety days after the effective date of this subdivision, whichever is later, for refinancing capital mortgages for their remaining term plus two hundred basis points, or the existing rate being paid by the facility on its capital mortgage or mortgages as of that date. The commissioner shall determine, in consultation with mortgage financing experts, the prevailing market borrowing rates available to not-for-profit and governmental residential health care facilities to re-finance capital mortgages on a tax-exempt fixed rate basis, and to proprietary residential health care facilities to re-finance capital mortgages on a tax-exempt fixed rate basis, and to proprietary residential health care facilities to re-finance capital mortgages on a taxable fixed rate basis, for this purpose. Exceptions to this policy shall be provided by the commissioner to each such facility that demonstrates, prior to October first, two thousand three or thirty days after receipt of the commissioner's written determination specified in paragraph (b) of this subdivision, whichever occurs later, that:

(i) it has initiated or completed the process of re-financing the mortgage or mortgages in question, in which case the capital cost component of rates of payment shall be timely revised to reflect capital interest costs associated with a re-financed mortgage that conforms to the standards in paragraph (b) of this subdivision. For this purpose, a facility that has applied for approval by the commissioner, the state hospital review and planning council and/or the public health council to re-finance its existing mortgage debt as part of a larger project involving facility replacement, expansion, renovation or change of

ownership is considered to have initiated the process of re-financing;
or

(ii) it can not re-finance its capital mortgage or mortgages to achieve the relevant present value cost benefit specified in subparagraphs (i) and (ii) of paragraph (b) of this subdivision due to a "lock out" or similar provision in its current mortgage agreement that prevents re-financing; due to some other type of genuine re-financing obstacle, such as an inability of the facility to obtain credit approval from a lender or mortgage insurer, or due to an intervening change in credit market conditions or other relevant circumstances, in which case the capital cost component of rates of payment shall continue to reflect capital interest costs associated with the existing mortgage or mortgages, together with reasonable costs incurred in connection with the facility's attempt to re-finance its existing mortgage debt.

d. Notwithstanding any contrary provision of law, rule or regulation, for rate periods on and after April first, two thousand eleven, the commissioner may reduce or eliminate the payment factor for return on or return of equity in the capital cost component of Medicaid rates of payment for services provided by residential health care facilities, and for rate periods on and after April first, two thousand twenty, there shall be no payment factor for residual equity reimbursement in the capital cost component of Medicaid rates of payment for services provided by residential health care facilities.

e. Notwithstanding any other provision of law or regulation to the contrary, the commissioner shall adopt or amend on an emergency basis any regulation the commissioner determines necessary to implement any provision of this subdivision.

21. (a) Notwithstanding any inconsistent provision of law or regulation to the contrary, for the purposes specified in subdivision nineteen of this section, the commissioner shall adjust medical assistance rates of payment established pursuant to this article for services provided on and after October first, two thousand four through December thirty-first, two thousand four and annually thereafter for services provided on and after January first, two thousand five through

April thirtieth, two thousand eleven and on and after May first, two thousand twelve, to include a rate adjustment to assist qualifying facilities pursuant to this subdivision, provided, however, that public residential health care facilities shall not be eligible for rate adjustments pursuant to this subdivision for rate periods on and after April first, two thousand nine, provided further, however, that notwithstanding any contrary provision of law and subject to the availability of federal financial participation, each facility that receives a rate adjustment pursuant to this subdivision for the period May first, two thousand ten through April thirtieth, two thousand eleven shall have its medicaid rates reduced for the rate period December first, two thousand eleven through December thirty-first, two thousand eleven by an amount equal in aggregate to the aggregate amount of the funds such facility received pursuant to this subdivision for the period May first, two thousand ten through April thirtieth, two thousand eleven.

(b) Eligibility for such rate adjustments shall be determined on the basis of each residential health care facility's operating margin over the most recent three-year period for which financial data are available from the RHCF-4 cost report or the institutional cost report. For purposes of the adjustments made for the period October first, two thousand four through December thirty-first, two thousand four, financial information for the calendar years two thousand through two thousand two shall be utilized. For each subsequent rate year, the financial data for the three-year period ending two years prior to the applicable rate year shall be utilized for this purpose.

(c) Each facility's operating margin for the three-year period shall be calculated by subtracting total operating expenses for the three-year period from total operating revenues for the three-year period, and dividing the result by the total operating revenues for the three-year period, with the result expressed as a percentage. For hospital-based residential health care facilities for which an operating margin cannot be calculated on the basis of the submitted cost reports, the sponsoring hospital's overall three-year operating margin, as reported in the institutional cost report, shall be utilized for this purpose. All facilities with negative operating margins calculated in this way over the three-year period shall be arrayed into quartiles based on the

magnitude of the operating margin. Any facility with a positive operating margin for the most recent three-year period, a negative operating margin that places the facility in the quartile of facilities with the smallest negative operating margins, a positive total margin in the most recent year of the three year period, or an average Medicaid utilization percentage of fifty percent or less during the most recent year of the three-year period shall be disqualified from receiving an adjustment pursuant to this subdivision, provided, however, that for rate periods on and after April first, two thousand nine, such disqualification:

- (i) shall not be applied solely on the basis of a facility's having a positive total margin in the most recent year of such three-year period;

- (ii) shall be extended to those facilities in the quartile of facilities with the second smallest negative operating margins; and

- (iii) shall also be extended to those facilities with an average Medicaid utilization percentage of less than seventy percent during the most recent year of the three-year period.

- (d) For each facility remaining after the exclusions made pursuant to paragraph (c) of this subdivision, the commissioner shall calculate the average annual operating loss for the three-year period by subtracting total operating expenses for the three-year period from total operating revenues for the three-year period, and dividing the result by three, provided, however, that for periods on and after April first, two thousand nine, the amount of such average annual operating loss shall be reduced by an amount equal to the amount received by such facility pursuant to subparagraph (ii) of paragraph (a) of subdivision two-b of this section. For this purpose, for hospital-based residential health care facilities for which the average annual operating loss cannot be calculated on the basis of the submitted cost reports, the sponsoring hospital's overall average annual operating loss for the three-year period shall be apportioned to the residential health care facility based on the proportion the residential health care facility's total revenues for the period bears to the total revenues reported by the sponsoring hospital, and such apportioned average annual operating loss shall then be reduced by an amount equal to the amount received by such facility pursuant to subparagraph (ii) of paragraph (a) of subdivision two-b of this section.

(e) For periods prior to April first, two thousand nine, each such facility's qualifying operating loss shall be determined by multiplying the facility's average annual operating loss for the three-year period as calculated pursuant to paragraph (d) of this subdivision by the applicable percentage shown in the tables below for the quartile within which the facility's negative operating margin for the three-year period is assigned.

i. For a facility located in a county with a total population of two hundred thousand or more as determined by the two thousand U.S. Census:
First Quartile (lowest operating margins): 30 percent

Second Quartile: 15 percent

Third Quartile: 7.5 percent

ii. For a facility located in a county with a total population of fewer than two hundred thousand as determined by the two thousand U.S. Census:
First Quartile (lowest operating margins): 35 percent

Second Quartile: 20 percent

Third Quartile: 12.5 percent

(f) The amount of any facility's financially disadvantaged residential health care facility distribution calculated in accordance with this subdivision shall be reduced by the facility's estimated rate year benefit of the two thousand one update to the regional input price adjustment factors authorized pursuant to former subdivision seventeen of this section as amended by section 24 of part C of chapter 58 of the laws of 2004, or as authorized by subdivision seventeen-a of this section, as added by section 56 of part C of chapter 58 of the laws of 2007, if any, provided, however, that such reduction shall not be applied with regard to rate periods on and after April first, two thousand nine. After all other adjustments to a facility's financially disadvantaged residential health care facility distribution have been made in accordance with this subdivision, the amount of each facility's distribution shall be limited to no more than four hundred thousand dollars during the period October first, two thousand four through December thirty-first, two thousand four and, on an annualized basis, for rate periods through March thirty-first, two thousand nine, and no more than one million dollars for the period April first, two thousand nine through December thirty-first, two thousand nine and for each

annual rate period thereafter.

(g) The adjustment made to each qualifying facility's medical assistance rate of payment determined pursuant to this article shall be calculated by dividing the facility's financially disadvantaged residential health care facility distribution calculated in accordance with this subdivision by the facility's total medical assistance patient days reported in the cost report submitted two years prior to the rate year, provided however, that such rate adjustments for the period October first, two thousand four through December thirty-first, two thousand four shall be calculated based on twenty-five percent of each facility's reported total medical assistance patient days as reported in the applicable two thousand two cost report. Such amounts shall not be reconciled to reflect changes in medical assistance utilization between the year two years prior to the rate year and the rate year.

(h) The total amount of funds to be allocated and distributed as medical assistance for financially disadvantaged residential health care facility rate adjustments to eligible facilities for a rate period in accordance with this subdivision shall be thirty million dollars for the period October first, two thousand four through December thirty-first, two thousand four and thirty million dollars on an annualized basis for rate periods on and after January first, two thousand five through December thirty-first, two thousand eight and thirty million dollars on an annualized basis on and after January first, two thousand nine, provided that, subject to all necessary federal approvals, on and after January first, two thousand thirteen funds allocated under this paragraph shall be distributed pursuant to 10 NYCRR 86-2.39. The nonfederal share of such rate adjustments shall be paid by the state, with no local share, from allocations made pursuant to paragraph (hh) of subdivision one of section twenty-eight hundred seven-v of this article. In the event the statewide total of the annual rate adjustments determined pursuant to paragraph (g) of this subdivision varies from the amounts set forth in this paragraph, each qualifying facility's rate adjustment shall be proportionately increased or decreased such that the total of the annual rate adjustments made pursuant to this subdivision is equal to the amounts set forth in this paragraph on a statewide basis.

(i) This subdivision shall be effective if, and as long as, federal

financial participation is available for expenditures made for beneficiaries eligible for medical assistance under title XIX of the federal social security act for the rate adjustments determined in accordance with this subdivision.

(j) For periods on and after April first, two thousand nine, residential health care facilities which are otherwise eligible for rate adjustments pursuant to this subdivision shall also, as a condition for receipt of such rate adjustments, submit to the commissioner a written restructuring plan that is acceptable to the commissioner and which is in accord with the following:

(i) such an acceptable plan shall be submitted to the commissioner within sixty days of the facility's receipt of rate adjustments pursuant to this subdivision for a rate period subsequent to March thirty-first, two thousand eight, provided, however, that facilities which are allocated four hundred thousand dollars or less on an annualized basis shall be required to submit such plans within one hundred twenty days, and further provided that these periods may be extended by the commissioner by no more than thirty days, for good cause shown; and

(ii) such plan shall provide a detailed description of the steps the facility will take to improve operational efficiency and align its expenditures with its revenues, and shall include a projected schedule of quantifiable benchmarks to be achieved in the implementation of the plan; and

(iii) such plan shall require periodic reports to the commissioner, in accordance with a schedule acceptable to the commissioner, setting forth the progress the facility has made in implementing its plan; and

(iv) such plan may include the facility's retention of a qualified chief restructuring officer to assist in the implementation of the plan, provided, however, that this requirement may be waived by the commissioner, for good cause shown, upon written application by the facility.

(k) If a residential health care facility fails to submit an acceptable restructuring plan in accordance with the provisions of paragraph (j) of this subdivision, the facility shall, from that time forward, be precluded from receipt of all further rate adjustments made pursuant to this subdivision and shall be deemed ineligible from any future re-application for such adjustments. Further, if the commissioner

determines that a facility has failed to make substantial progress in implementing its plan or in achieving the benchmarks set forth in such plan, then the commissioner may, upon thirty days notice to that facility, disqualify the facility from further participation in the rate adjustments authorized by this subdivision and the commissioner may require the facility to repay some or all of the previous rate adjustments.

22. Nursing home incentives for improved performance in patient care. Pursuant to such program, and within amounts as are appropriated therefor, the commissioner shall investigate adjusted quality indicators and quality measures including those defined by the federal centers for medicare and medicaid service (CMS) with respect to nursing home quality and quality benchmarks. The commissioner shall award rate enhancements to those residential health care facilities who demonstrate to the satisfaction of the commissioner, they can meet or exceed such defined quality measures. Such quality measures may include, but not be limited to, outcomes from state survey data, performance measures, and resident outcomes based upon Minimum Data Sets as defined by CMS. The commissioner shall consult with associations representing residential health care facilities and associations representing nursing home residents, and shall by July first, two thousand seven, adopt rules and regulations that incorporate payment incentives, related to such quality indicators and measures, including, but not limited to programs to improve patient care outcomes and performance outcomes. Such programs may include but not be limited to, clinician-centric electronic medical records implementation, automation of assessments and care plans, improved data collection, and the provision of accessible consumer information as well as patient satisfaction, into rates of payment.

22-a. Modifications. (a) Notwithstanding any inconsistent provision of law or regulation to the contrary, effective April first, two thousand six and thereafter, residential health care facility rates of payment determined pursuant to this section for payments made by governmental agencies shall not contain a payment factor for interest on current indebtedness if the residential health care facility cost report utilized to determine such payment factor also shows a withdrawal of

equity, a transfer of assets, or a positive net income.

(b) Notwithstanding any inconsistent provision of law or regulation to the contrary, for residential health care facility rates of payment determined pursuant to this article for services provided on and after April first, two thousand six, the annual cost report filed by each residential health care facility for two thousand five and for each year thereafter shall be examined and in the event the operating costs reported by each such facility in any such cost report is less than ninety percent of the operating costs reported in the cost report which is being utilized to set such facility's existing rates of payment trended to two thousand five and each year thereafter, then such rates of payment shall be recalculated utilizing the more recent reported operating cost data.

(c) Notwithstanding any inconsistent provision of law or regulation to the contrary, effective on and after April first, two thousand six, for purposes of establishing rates of payment by governmental agencies for residential health care facilities licensed pursuant to this article, the operating component of the rate for any residential health care facility that did not or does not achieve ninety percent or greater occupancy for any year within five calendar years from the date of commencing operation, shall be recalculated utilizing the facility's most recently available reported allowable costs divided by patient days imputed at ninety percent occupancy. Such recalculated rates of payment shall be effective January first of the sixth calendar year following the date the facility commenced operations or April first, two thousand six, whichever is later.

(d) (i) Notwithstanding any inconsistent provisions of subdivisions two-b or two-c of this section or any other contrary provision of law, and subject to the availability of federal financial participation, for inpatient services provided by residential health care facilities on and after April first, two thousand eleven, the commissioner may, subject to the approval of the director of the budget, grant approval of a temporary adjustment to Medicaid rates for eligible facilities, as determined in accordance with this paragraph.

(ii) Eligible facilities shall be those residential health care facilities which, as determined by the commissioner, require short-term assistance to accommodate additional patient services requirements

stemming from the closure of other facilities in the area, including, but not limited to, additional staff, service reconfiguration and enhanced information technology capability.

(iii) Eligible facilities shall submit written proposals demonstrating the need for additional short-term resources and how such additional resources will result in improvements to:

(A) the cost effectiveness of service delivery;

(B) quality of care; and

(C) other factors deemed appropriate by the commissioner.

(iv) Such written proposals shall be submitted to the department at least sixty days prior to the requested effective date of the temporary rate adjustment. The temporary rate adjustment shall be in effect for a specified period of time as determined by the commissioner. At the end of the specified timeframe, the facility will be reimbursed in accordance with otherwise applicable rate-setting methodologies. The commissioner may establish, as a condition of receiving such a temporary rate adjustment, benchmarks and goals to be achieved in accordance with the facility's approved proposals and may also require that the facility submit such periodic reports concerning the achievement of such benchmarks and goals as the commissioner deems necessary. Failure to achieve satisfactory progress, as determined by the commissioner, in accomplishing such benchmarks and goals shall be a basis for ending the facility's temporary rate adjustment prior to the end of the specified timeframe.

23. Notwithstanding any inconsistent provision of law or regulation to the contrary:

(a) (i) For adult day health care services provided by residential health care facilities, effective April first, two thousand seven and thereafter, the operating component of the rate of payment established pursuant to this article for an adult day health care program which has achieved an occupancy percentage of ninety percent or greater for a calendar year prior to April first, two thousand seven, shall be calculated utilizing allowable costs reported in the two thousand four, two thousand five, or two thousand six calendar year residential health care facility cost report filed by the sponsoring residential health care facility, whichever is the earliest of such calendar year cost

reports in which the program has achieved an occupancy percentage of ninety percent or greater, except that programs receiving rates of payment based on allowable costs for a period prior to April first, two thousand seven shall continue to receive rates of payment based on such period.

(ii) For such programs which achieved an occupancy percentage of ninety percent or greater prior to calendar year two thousand four, so long as approved capacity in that year is the same as in calendar year two thousand four, but which did not maintain occupancy of ninety percent or greater in calendar years two thousand four, two thousand five, or two thousand six, the operating component of the rate of payment established pursuant to this article shall be calculated utilizing allowable costs reported in the two thousand four calendar year cost report divided by visits imputed at ninety percent occupancy.

(iii) For such programs which have not achieved an occupancy percentage of ninety percent or greater for a calendar year prior to April first, two thousand seven, the operating component of the rate of payment established pursuant to this article shall be calculated utilizing allowable costs reported in the first calendar year after two thousand six in which such a program achieves an occupancy percentage of ninety percent or greater effective January first of such calendar year except for calendar year two thousand seven, effective no earlier than April first of such year, provided, however, that effective January first, two thousand nine, for programs that have not achieved an occupancy percentage of ninety percent or greater for a calendar year prior to January first, two thousand nine, the operating component of the rate of payment established pursuant to this article shall be calculated utilizing allowable costs reported in the two thousand nine cost report filed by the sponsoring residential health care facility divided by visits imputed at actual or ninety percent occupancy, whichever is greater. This subparagraph shall also apply to programs which achieved an occupancy percentage of ninety percent or greater prior to calendar year two thousand four but in such year had an approved capacity that was not the same as in calendar year two thousand four.

(b) For a residential health care facility approved to operate an adult day health care program on or after April first, two thousand

seven, rates of payment for such programs shall be computed based upon annual budgeted allowable costs, as submitted by the residential health care facility, and total estimated annual visits by adult day health care registrants of not less than ninety percent of licensed occupancy, and in accordance with the following:

(i) Each program shall be required to submit an individual budget. Multiple programs operated by the same residential health care facility shall submit a separate budget for each program. Multiple programs operated by the same residential health care facility shall have separate rates of payment.

(ii) Rates developed based upon budgets shall remain in effect for no longer than two calendar years from the earlier of:

(A) the date the program commences operations; or

(B) the date the sponsoring residential health care facility submits a full calendar year residential health care facility cost report in which the program has achieved ninety percent or greater occupancy. If a sponsoring residential health care facility submits such a cost report within two years of the date the program commences operation, rates shall then be computed utilizing such cost report.

(iii) If a program fails to achieve ninety percent or greater occupancy within two calendar years of the date of its commencing operations, rates shall be calculated utilizing allowable costs reported in such second calendar year residential health care facility's cost report for the applicable sponsoring residential health care facility divided by visits imputed at ninety percent occupancy.

(c) Effective January first, two thousand eight, allowable costs shall not include the costs of transportation.

(d) All rates of payment established pursuant to this subdivision are subject to the maximum daily rate provided by law. Such maximum daily rate of payment for adult day health care programs operated by residential health care facilities that undergo a change of ownership subsequent to nineteen hundred ninety shall be determined by utilizing the inpatient rate of payment of the prior operator as in effect on January first, nineteen hundred ninety. In the event a residential health care facility establishes an off-site adult day health care program outside the regional input price adjustment region in which it is located, the computation of the maximum daily rate of payment for

such program shall utilize the weighted average of the inpatient rates of payments for residential health care facilities in the region in which the program is located, as in effect on January first, nineteen hundred ninety, in place of the sponsoring residential health care facility's inpatient rate of payment.

(e) Notwithstanding any inconsistent provision of the state administrative procedure act or any other law or regulation to the contrary, the commissioner shall adopt or amend on an emergency basis any regulations the commissioner shall determine necessary to implement any provision of this subdivision.

24. Notwithstanding any other provisions of this section and any other law, rule or regulation to the contrary, for periods on and after July first, two thousand seven, the operating component of all rates of payment made by governmental agencies for services to individuals eligible for medical assistance pursuant to title eleven of article five of the social services law and provided by a residential health care facility with fewer than sixty beds as of July first, two thousand seven, which provides services primarily to neurologically impaired individuals and is located in a county with a population between two hundred ninety thousand and three hundred ten thousand as of July first, two thousand seven shall be based solely on the methodology used to establish rates for facilities which provide extensive nursing, medical, psychological and counseling support services solely to children; provided, however, this subdivision shall not apply if the application would result in a lesser rate of payment than otherwise provided for under this section. Nothing in this subdivision shall be construed to limit the application to such facility of rate adjustments applied to other residential health care facilities.

25. Reserved bed days. (a) For purposes of this subdivision, a "reserved bed day" is a day for which a governmental agency pays a residential health care facility to reserve a bed for a person eligible for medical assistance pursuant to title eleven of article five of the social services law while he or she is on therapeutic leave of absence from the facility.

(b) Notwithstanding any other provisions of this section or any other

law or regulation to the contrary, for reserved bed days provided on behalf of persons twenty-one years of age or older:

(i) payments for reserved bed days shall be made at ninety-five percent of the Medicaid rate otherwise payable to the facility for services provided on behalf of such person; and

(ii) payment to a facility for reserved bed days provided on behalf of such person for therapeutic leaves of absence may not exceed ten days in any twelve month period.

25-a. Reserved bed days for state veterans' homes. (a) For purposes of this subdivision, a "reserved bed day" is a day for which the state pays New York State Veterans' Home at Oxford, the New York State Veterans' Home at St. Albans, the New York State Veterans' Home at Batavia, the New York State Veterans' Home at Montrose or the Long Island State Veterans' Home to reserve a bed for a person eligible for medical assistance pursuant to title eleven of article five of the social services law while he or she is temporarily hospitalized.

(b) (i) Payments for reserved bed days shall be made at fifty percent of the Medicaid rate otherwise payable to the facility for services provided on behalf of the person.

(ii) Payment to a facility for reserved bed days provided on behalf of the person for temporary hospitalizations may not exceed fourteen days in any twelve-month period.

(iii) The person must have resided in the applicable State Veterans' home for at least thirty days since the date of his or her initial admission.

(iv) Unless medically contraindicated, the applicable State Veterans' home shall reserve the same bed and room the person occupied before being hospitalized or placed on a therapeutic leave of absence.

(v) Reserved bed days under this subdivision are in addition to reserve bed days for therapeutic leave of absence under subdivision twenty-five of this section.

(vi) This subdivision shall apply subject to the availability of federal financial participation.

26. Notwithstanding any inconsistent provision of law, for rate periods on and after April first, two thousand ten, residential health

care facility Medicaid rates of payment shall not include reimbursement for the cost of prescription drugs. Such reimbursement shall be in accordance with otherwise applicable provisions of section three hundred sixty-seven-a of the social services law.

* 27. The commissioner is authorized to conduct an energy audit and/or disaster preparedness review of residential health care facilities. Such audit or review shall explore the energy efficiency and/or disaster preparedness of the real property capital aspects of each facility and develop a cost/benefit analysis of potential modifications for each facility. Such audit or review shall serve as the basis for an energy efficiency and/or disaster preparedness program to be developed by the department in regulations. Participation in such audit or review shall be a condition to participation in any such program developed as a result thereof, and shall also be a condition to receipt of any funding available under such program. Such program shall only be implemented if it is in the best financial interests of the state, as determined by the commissioner. At least forty-five days prior to implementing such program, the department shall report to the senate and assembly health committees, the assembly ways and means committee and the senate finance committee the results of the energy audit authorized herein and the proposed eligibility criteria, funding sources, the manner in which savings may be shared between the state and facilities and any other information requested by such committees about such program prior to the transmittal of the report.

* NB Repealed July 1, 2027

§ 2808-a. Liability of certain persons. 1. Every person who is a controlling person of any residential health care facility liable under any provision of this article to any person or class of persons for damages or to the state for any civil fine, penalty, assessment or damages, shall also be liable, jointly and severally, with and to the same extent as such residential health care facility, to such person or class of persons for damages or to the state for any such civil fine, penalty, assessment or damages.

2. For purposes of this section, a "controlling person" of a

residential health care facility shall be deemed to mean any person who by reason of a direct or indirect ownership interest (whether of record or beneficial) has the ability, acting either alone or in concert with others with ownership interests, to direct or cause the direction of the management or policies of said facility. Neither the commissioner nor any employee of the department nor any member of a local legislative body of a county or municipality, nor any county or municipal official except when acting as the administrator of a residential health care facility, shall, by reason of his or her official position, be deemed to be a controlling person of any residential health care facility nor shall any person who serves as an officer, administrator or other employee or as a member of a board of directors or trustees of any facility be deemed to be a controlling person of said facility as a result of such position or his or her official actions in such position.

§ 2808-b. Certification of financial statements and financial information. 1. All financial statements or financial information required by law or regulation to be submitted by a nursing home or facility providing health-related service shall be certified in their entirety by an independent certified public accountant or independent public accountant. The commissioner shall by regulation establish the form of certification which shall ensure that the certified public accountant or public accountant:

(a) has disclosed any and all material facts known to him, disclosure of which is necessary to make the financial statements or financial information not misleading; and

(b) during the period of his professional engagement, at the time of expressing his opinion, or during the period covered by the financial statements, did not have nor was committed to acquire, any direct financial interest or material indirect financial interest in the ownership or operation of the nursing home or facility; and

(c) during the period of his professional engagement, at the time of expressing his opinion or during the period covered by the financial statements, was not connected in any way with the ownership, financing or operation of the nursing home or facility as a director, officer or employee, or in any capacity other than as an independent certified

public accountant or independent public accountant; and

(d) subsequent to such certification discloses any material fact discovered by him which existed at the time of such certification and was not disclosed in the financial statements or financial information, the disclosure of which is necessary to make the financial statements or financial information not misleading and discloses any material misstatement in said financial statements or financial information.

2. Any person submitting a financial statement or financial information which he knows to be false or certifying a financial statement or financial information which he knows to be false shall be guilty of a class E felony.

*** § 2808-c. Reimbursement of general hospital inpatient services.** 1. General hospital rates and inpatient revenue cap. In determining payments from all sources for general hospital inpatient services for the rate year commencing on January first, nineteen hundred eighty-three and ending on December thirty-first, nineteen hundred eighty-three, the allowances set forth in subdivision four of this section shall be included. Effective January first, nineteen hundred eighty-four, the commissioner shall establish, in accordance with regulations adopted by the council and approved by the commissioner, the maximum amount of inpatient revenue a general hospital will be authorized to receive for services during a designated period not to exceed twelve months from all payors for the provision of inpatient services. This maximum amount will be known as the inpatient revenue cap and shall be established for each general hospital possessing a valid operating certificate issued pursuant to section twenty-eight hundred five of this article. The inpatient revenue cap shall be established by projecting to anticipated expense levels the reimbursable historical inpatient expenses and financial needs as defined in subdivision four of this section, of a general hospital approved for financing through inpatient service revenues. Expenses included in the inpatient revenue cap are those determined to be allowable and reasonable in the provision of authorized inpatient services.

The inpatient revenue caps for the rate years nineteen hundred eighty-four and nineteen hundred eighty-five shall be determined by computing an imputed revenue cap for the period beginning January first, nineteen hundred eighty-three and ending December thirty-first, nineteen hundred eighty-three, which has been based on the cost analysis pursuant to paragraphs (a) and (b) of subdivision two of this section and adjusted each year to reflect the trend factors developed and applied in accordance with paragraph (e) of subdivision two of this section, capital related expenses in accordance with paragraph (c) of subdivision two of this section, redetermination of additional financial needs or revenue requirements in accordance with paragraph (d) of subdivision two of this section, adjustments made in accordance with subdivision five of this section and adjustments to reflect audit findings.

Hospital inpatient services to patients who are not beneficiaries or subscribers of corporations organized and operating in accordance with article forty-three of the insurance law, subchapter XVIII of the federal social security act (medicare), eligible for payments made by state governmental agencies, enrolled in organizations operating in accordance with the provisions of article forty-four of this chapter, or enrolled in a self-insured and self administered group covered under the provisions of subdivision six of this section shall be at charges established by the hospital in accordance with the provisions of subdivision six of this section with the exception that for the period from January first, nineteen hundred eighty-three through December thirty-first, nineteen hundred eighty-three rates of payment pursuant to the provisions of the workers' compensation law, the volunteer firemen's benefit law and the comprehensive automobile insurance reparations act shall be established at one hundred twelve percent of trended average per diem reimbursable cost including allowances as specified in subdivision four of this section.

Amounts prospectively established for payments for general hospital inpatient services provided in rate years subsequent to nineteen hundred eighty-three made on behalf of subscribers of corporations organized and operating in accordance with article forty-three of the insurance law, beneficiaries of subchapter XVIII of the federal social security act

(medicare), eligibles for payments made by state governmental agencies and those enrolled in organizations operating in accordance with the provisions of article forty-four of this chapter shall be based on that portion of the prospectively established inpatient revenue cap that is related to the utilization of inpatient services by the above programs, provided, however, that that share of the cost of bad debt and charity care to be paid under subchapter XVIII of the federal social security act shall be based upon the ratio of subchapter XVIII inpatient charges to total inpatient and outpatient charges, except for hospitals using an all inclusive rate, in which case the subchapter XVIII share shall be based upon the ratio of subchapter XVIII inpatient cost to total inpatient and outpatient hospital costs. After reducing the dollar amount liability of all payors by subtracting the dollar amount liability of the subchapter XVIII payor, all other payors shall pay the remaining liability in proportion to the ratio of their hospital inpatient charges to total hospital inpatient charges less the subchapter XVIII inpatient charges. These proportions shall be computed on the basis of costs for hospitals using an all inclusive rate.

Any adjustments in the overall revenue cap in accordance with subdivision five of this section shall be reflected in an appropriate adjustment to this portion of the revenue cap and payment levels by these programs. The year end adjustment as provided for in paragraph (d) of subdivision five of this section which is based on data contained in the financial and statistical report filed for the effective year of the revenue cap may be further adjusted within the revenue cap when actual data indicates a change in payor utilization and cost apportionment between and among the above specified programs and all other payors. After such adjustments the portion of the revenue cap initially established, or as adjusted, that is related to the actual utilization of covered inpatient services of the above programs shall constitute guaranteed revenue to the general hospital. Nothing in this section shall prohibit the negotiation by health maintenance organizations operating in accordance with the provisions of article forty-three of the insurance law or article forty-four of this chapter, of agreements with general hospitals for rates of payment other than those provided herein. Such contracts shall require approval by the commissioner and

must include provision for special benefit packages or arrangements for providing inpatient services to encourage patient management behavior that will minimize the length of patient stay, such as special admission arrangements, bed leasing or other inpatient capitation arrangements.

2. The inpatient revenue cap established shall include:

(a) allowable historical inpatient operational expenses which are comparable in nature and can reasonably be expected to be comparable in amount to other general hospitals with similar cost influencing characteristics (adjusted for comparison purposes for differences in wage and fringe benefit levels) and which are equal to or less than reasonable reimbursable operational cost ceilings developed from the average allowable cost per unadjusted (except for newborn days) appropriate unit of service of all hospitals in the comparison group. The comparison group shall consist of general hospitals sharing similar cost influencing characteristics and classified in accordance with variables defined in regulation;

(b) allowable historical inpatient operational expenses, other than capital related expenses as defined in subdivision three of this section, and other than costs included in paragraph (a) hereof, which may be subject to reasonable reimbursable cost standards adopted by the council and approved by the commissioner;

(c) capital related expenses determined in accordance with subdivision three of this section;

(d) additional financial needs or revenue requirements in accordance with subdivision four of this section;

(e) projection of reimbursable expenses identified through the application of paragraphs (a) and (b) of this subdivision by a trend factor established by the panel of economists as set forth in subdivision eight of this section; and

(f) an amount to reflect anticipated additional revenues resulting from the implementation of the gross charge determination formula provided by the commissioner in accordance with subdivision six of this section.

The establishment of separate rates of payment for patients who require different levels or types of care shall require a reallocation

of costs to insure that the total hospital inpatient revenue cap (or in the case of the period January one, nineteen hundred eighty-three to December thirty-one, nineteen hundred eighty-three the imputed revenue cap), which shall include the revenue for different levels or types of care, established under this subdivision remains unchanged except that adjustments may be made based on the cost analysis pursuant to paragraphs (a) and (b) of this subdivision.

Effective January first, nineteen hundred eighty-three through December thirty-first, nineteen hundred eighty-five, the cost limitations, utilization standards and limits on disallowances shall be computed in accordance with the methodology approved by the federal government to permit the determination of all payments for inpatient services provided by general hospitals to be made in accordance with the amendments made to sections twenty-eight hundred seven and twenty-eight hundred seven-a of this chapter by sections three and four of a chapter of the laws of nineteen hundred eighty-two. Specialty hospitals shall not be included in any computations relating to disallowances, limitations or ceilings pursuant to this paragraph but shall receive reimbursement in accordance with rules and regulations adopted by the state hospital review and planning council and approved by the commissioner. In order to provide for a transition period for the application of reimbursable cost limitations to payments authorized under subchapter XVIII of the federal social security act, a reasonable phase-in over a three year period is to be implemented.

3. Capital related inpatient expenses. Effective for the year beginning January first, nineteen hundred eighty-four and thereafter, capital related inpatient expenses including but not limited to depreciation, rentals and interest on capital debt (or for hospitals financed pursuant to article twenty-eight-B of this chapter, such expenses, including amortization in lieu of depreciation, as determined pursuant to the reimbursement regulations promulgated pursuant to that article and article twenty-eight of this chapter, in the case of payments on behalf of other than beneficiaries under subchapter XVIII of the federal social security act), shall be included in the revenue cap on a budget basis, and subsequently reconciled to actual expenses

through appropriate audit procedures. General hospitals shall submit to the commissioner, at least one hundred twenty days prior to the commencement of each revenue cap year, a schedule of capital related inpatient expenses for the forthcoming year. Any capital related inpatient expense generated by a capital expenditure which requires or required approval pursuant to this article, must have received such approval for the capital related expense to be included in the revenue cap. The submitted budget may include the capital related inpatient expenses of all existing capital assets as well as estimates of capital related inpatient expenses for capital assets to be acquired or placed in use prior to the commencement of the revenue cap year. Any capital related expense generated by a capital asset acquired or placed in use during a revenue cap year, provided all required approvals pursuant to this article have been obtained, shall be carried forward to the subsequent revenue cap year. In instances where such approvals have been obtained, the budget may include estimates for capital related inpatient expenses. The basis for determining capital related inpatient expenses shall be the lesser of actual cost or the final amount specifically approved for the construction of the capital asset. The council shall adopt, with the approval of the commissioner, regulations to:

- (a) identify by type the eligible capital related inpatient expenses;
- (b) safeguard the future financial viability of voluntary, non-profit general hospitals by requiring funding of inpatient depreciation on building and fixed and movable equipment;
- (c) provide authorization to adjust the inpatient revenue cap by advancing payment of depreciation as needed, in instances of capital debt related financial distress of a voluntary, non-profit general hospital; and
- (d) provide a methodology for the reimbursement treatment of sales.

4. Allowances. Inpatient revenue caps established, or rates for general hospital inpatient services, shall include for the three years commencing on January first, nineteen hundred eighty-three, the allowances specified below in paragraphs (a), (b), (c), (d) and (e) of this subdivision. For the period from January first, nineteen hundred eighty-three through December thirty-first, nineteen hundred

eighty-three the allowances shall be computed on the basis of the general hospital's reimbursable inpatient costs after application of the trend factor. Any additional allowances for the periods January first, nineteen hundred eighty-four through December thirty-first, nineteen hundred eighty-four and from January first, nineteen hundred eighty-five through December thirty-first, nineteen hundred eighty-five shall be included in the certified inpatient revenue caps after application of the trend factor and such adjustments as may be appropriate pursuant to subdivision two of this section. For the purposes of this subdivision and subdivision nine of this section, major public general hospitals are defined as all state operated general hospitals, all general hospitals operated by the New York city health and hospitals corporation as established by chapter one thousand sixteen of the laws of nineteen hundred sixty-nine, as amended and all other public general hospitals having annual inpatient operating costs in excess of twenty-five million dollars.

(a) For the period from January first, nineteen hundred eighty-three through December thirty-first, nineteen hundred eighty-five an allowance of one percent of the general hospital's reimbursable inpatient costs to provide funds to be used at the discretion of hospital governing boards.

(b) For public general hospitals an additional allowance of up to one percent for the second year and up to a further additional one percent in the third year of the three year period commencing January first, nineteen hundred eighty-three subject to the provisions of paragraph (d) of this subdivision.

(c) For voluntary non-profit and private proprietary general hospitals an additional allowance of up to one percent for the second year of the three year period commencing January first, nineteen hundred eighty-three and continued for the third year of the three year period subject to the provisions of paragraph (d) of this subdivision.

(d) The additional allowances in paragraphs (b) and (c) of this subdivision shall be available to general hospitals receiving approval from the commissioner as to the acceptable use of the allowance which uses shall include but be not limited to retirement of short term non-capital debt, meeting costs related to bad debts and charity care not met by the regional pool distributions as specified in subdivision nine of this section, offsetting reductions in anticipated revenue

resulting from charge limits substantially below those applicable to the particular hospital immediately prior to the enactment of subdivision six of this section and needed improvement of current ratio. Allowances authorized in paragraphs (b) and (c) of this subdivision are not to be considered as a substitute for operational funds that are otherwise reimbursable or subject to appeal.

(e) A percentage to reflect the needs for the financing of losses resulting from bad debts and the costs of charity care of general hospitals within article forty-three insurance law regions, or such other regions as adopted pursuant to subdivision nine of this section, and within a statewide determination of financial resources to be committed for this purpose. Regional needs shall be equal to the total of inpatient losses from bad debts reduced to cost and the inpatient costs of charity care increased by any deficit of general hospitals from providing ambulatory services, excluding any portion of such deficit resulting from governmental payments below average visit costs and revenues and expenses related to the provision of referred ambulatory services. The regional amount to be included in rates approved for the year commencing January first, nineteen hundred eighty-three and in the inpatient revenue caps established in subsequent years for each general hospital in the region will be equal to the result of the application of the percentage of statewide need for voluntary non-profit, private proprietary and public general hospitals, other than major public general hospitals that can be met from available resources computed without consideration of inpatient uncollectible amounts to the regional need for voluntary non-profit, private proprietary and public general hospitals, other than major public general hospitals expressed in dollars plus the dollar amount resulting from the application of the ratio of major public general hospitals inpatient reimbursable costs within the region to total statewide general inpatient reimbursable cost (as computed on the basis of nineteen hundred eighty-one financial and statistical reports) to the statewide resources committed for this purpose computed without consideration of inpatient uncollectible amounts and the ratio of these total dollars to the total regional reimbursable inpatient cost after application of the trend factor. For the three year period commencing on January first, nineteen hundred eighty-three and ending on December thirty-first, nineteen hundred

eighty-five, the percentage allowances for this purpose shall not be less than an average three percent of the total statewide general hospital reimbursable inpatient cost after application of the trend factor. The allocation of resources made available under this paragraph, as specified in subdivision nine of this section, may be changed only as follows: An annual review shall be conducted pursuant to rules and regulations adopted by the council and approved by the commissioner with respect to bad debt and charity care need within each article forty-three insurance law region or such other regions as are adopted pursuant to subdivision nine of this section. If within such a region there is a definitive finding as a result of such review that there has been a change in the proportional amounts of bad debts and charity care provided by (i) major public general hospitals and (ii) voluntary non-profit, private proprietary and public general hospitals, other than major public general hospitals, the allocation of resources made available under this paragraph shall be adjusted pursuant to the rules and regulations adopted pursuant to this paragraph so as to reflect this change.

(f) An additional allowance of one-fourth of one percent shall be included in each rate or revenue cap established for each voluntary non-profit and private proprietary general hospital to be returned to a regional pool and distributed in accordance with paragraph (c) of subdivision nine of this section.

(g) An additional allowance of one-third of one percent shall be included in each rate or revenue cap established for voluntary non-profit and private proprietary general hospitals to be returned to a regional pool and distributed in accordance with paragraph (d) of subdivision nine of this section.

5. Adjustments. (a) The commissioner shall, on his own initiative, or on the basis of a request from a general hospital, adjust an established inpatient revenue cap to reflect:

(i) the reduction of costs related to the elimination of a general hospital inpatient service in instances where the costs of such service were included in the basis of the inpatient revenue cap established; and

(ii) the correction of errors or omissions of data or in computations.

(b) General hospitals may request and the commissioner shall consider

an adjustment to an established revenue cap to reflect increased expenses or reconsideration of disallowed expenses based on:

- (i) justification of all or a portion of expenses not included in the inpatient revenue cap resulting from the cost analysis process contained in subparagraph (i) of paragraph (a) of this subdivision;

- (ii) additional operational expenses related to construction or service changes. These changes if applicable must be approved under section twenty-eight hundred two of this article;

- (iii) the addition of costs related to a state requirement for additional services to be provided or additional costs to be incurred in meeting state or federal requirements;

- (iv) additional expenses to permit a more efficient and economical method of delivering a service; and

- (v) increased costs for compensation of employees.

(c) In determining the reasonableness or justification of an adjustment to an established inpatient revenue cap based on a request related to subparagraph (v) of paragraph (b) of this subdivision the commissioner shall consider:

- (i) the fiscal capability of the general hospital to finance such increases from its own resources;

- (ii) the past history of the general hospital with respect to compensation increases and allowed compensation trend factors; and

- (iii) the economy in the area in which the general hospital is located.

(d) The commissioner shall adjust a prospectively established inpatient revenue cap on the basis of subsequent data that demonstrates a significant cost influencing change in patient mix or volume of service. Such adjustment will be made in conformity with regulations adopted by the council as approved by the commissioner.

(e) All appeals shall be submitted to the commissioner, who may submit a copy of the appeal to interested parties for the purpose of providing an opportunity for comment within a specified time period.

(f) The commissioner shall act upon all properly documented appeals for adjustments concerning base year costs by November first of the calendar year for which the revenue cap is effective provided that all information necessary to determine whether an adjustment is justified is submitted by the facility prior to May first of such year. In the event

such an appeal is filed by May first, but information necessary to determine whether an adjustment is justified is submitted after such date, the commissioner shall act on the appeal within six months after receiving the necessary information.

(g) The commissioner shall consider an adjustment to a hospital's reported base year costs in instances where it is demonstrated that recurring costs resulting from multi-year commitments beginning late in a base year should be calculated on an annual basis in establishing a revenue cap in order to avoid a significant inequity. In making such an adjustment the commissioner shall consider the offset of non-recurring base year costs.

6. Hospital charge schedules. Effective for the year beginning January first, nineteen hundred eighty-four and thereafter, each general hospital shall establish a charge schedule for available and authorized services in accordance with a gross charge determination formula provided by the commissioner which shall:

(a) Establish gross charges sufficient to generate the inpatient revenue authorized by the revenue cap; and

(b) Establish gross charges such that (i) the payment rate to be made on behalf of subscribers of corporations organized and operating in accordance with article forty-three of the insurance law, adjusted for uncovered services, shall be at a specified discount from the gross charge rate billed to or on behalf of charge paying patients; (ii) permit the continuation of negotiated payment rate determination systems between self-insured and self-administered groups and hospitals which were in effect on May first, nineteen hundred eighty-two; and (iii) for general hospitals subject to the provisions of paragraph (a) or (b) of subdivision twelve of this section, the costs (including all allowances specified in subdivision four of this section) of services provided to charge paying patients shall be at a specified discount from the gross charge rate billed to or on behalf of charge paying patients.

During the period January first, nineteen hundred eighty-four through December thirty-first, nineteen hundred eighty-five, the discount referred to in subparagraphs (i) and (iii) of paragraph (b) of this subdivision shall not exceed twelve percent for those hospitals which

had a discount of less than twelve percent during the previous year, shall be no greater than the discount in effect during the previous year for those hospitals whose previous year's discount was between twelve and fifteen percent and shall not exceed fifteen percent for all others. Self-insured and self-administered negotiated systems as described in subparagraph (ii) of paragraph (b) of this subdivision may remain in effect for the period commencing January first, nineteen hundred eighty-three and ending on December thirty-first, nineteen hundred eighty-five and shall be incorporated in the formula methodology provided by the commissioner.

The commissioner shall effectuate direct repayment or adjustment of a subsequent inpatient revenue cap to reflect actual inpatient revenues received for inpatient services provided by a general hospital that exceed the inpatient revenue cap initially established or adjusted in accordance with provisions of this section. Revenue received in excess of the revenue cap established as the result of the provisions of subchapter XVIII of the federal social security act (medicare) phase-in policies or from charges authorized under subdivision seven of this section shall not be included in the adjustment.

7. Working capital. General hospitals may include as a financing or working capital charge an addition of two percent of any valid claim not paid within thirty days of submission or determination of payor liability, whichever is later, and one percent per month thereafter. Revenues received from such financing or working capital charges shall not be included in a revenue cap established or considered as a cost offset. Financing or working capital charges shall not be applied to hospital billings to third party payors participating in a periodic interim payment system.

8. Trend factor. (a) The commissioner in accordance with the methodology developed by the consultants pursuant to paragraph (b) of this subdivision shall establish trend factors to project for the effects of inflation. The factors shall be applied to the appropriate portion of charge levels and reimbursement rates in effect until December thirty-first, nineteen hundred eighty-three and the appropriate portion

of the inpatient revenue cap in subsequent years. The methodology for developing the trend factor shall include the appropriate external price indicators and shall also include the data from major collective bargaining agreements as reported quarterly by the federal department of labor, bureau of labor statistics, for non-supervisory employees.

(b) The methodology shall be developed by four independent consultants with expertise in health economics appointed by the commissioner. Not later than September first of each year, the consultants shall provide to the commissioner and the council, the methodology to be used to determine the trend factors for the subsequent twelve month period commencing January first. The commissioner shall monitor the actual price movement during this twelve month period of the external price indicators used in the methodology, shall report the results of the monitoring to the consultants, and shall implement, semi-annually, the recommendations of the consultants for adjustments to the trend factor provided, however, that adjustments, except for the final adjustment in the trend factor shall not be required unless such adjustment would result in the weighted average of the operating cost component of the rates or charge limits differing by more than one-half of one percent from that which was previously determined.

9. Bad debt, charity care and transition pool. Regional pools consisting of funds made available within each region through the allowances specified in paragraphs (e), (f) and (g) of subdivision four of this section shall be created. The regions are established as the article forty-three insurance law plan regions, with the exception that the southern sixteen counties will be divided into three regions for the purposes of this subdivision and subdivision four of this section with separate regions consisting of Richmond, Manhattan, Bronx, Queens and Kings counties; Nassau and Suffolk counties; and Delaware, Columbia, Ulster, Sullivan, Orange, Dutchess, Putnam, Rockland and Westchester counties. The council with the approval of the commissioner may combine regions, with the exception of the above specified regions for the southern sixteen counties, upon application of the article forty-three insurance law plans involved and a demonstration that significant inequities would not occur. The commissioner is authorized to contract with the article forty-three insurance law plans to receive funds for

the pools and distribute such funds. In the event contracts with the article forty-three insurance law plans are effectuated, the commissioner shall conduct annual audits of the receipt and distribution of pooled funds and issue an annual report on the receipt and distribution of the pooled funds. In order for general hospitals to participate in the distribution of funds from the pool the general hospital must implement collection policies and procedures approved by the commissioner. Funds available in each regional pool shall be distributed or retained in the following sequence:

(a) Each eligible major public general hospital as defined in subdivision four of this section shall receive from its regional pool created by the allowance in paragraph (e) of subdivision four of this section a portion of its bad debt and charity care need equal to the result of the application of its percentage of statewide inpatient reimbursable costs developed on the basis of nineteen hundred eighty-one financial and statistical reports to the total of all regional pools.

(b) Funds remaining in the regional pool created by the allowance in paragraph (e) of subdivision four of this section, after distribution in accordance with paragraph (a) of this subdivision, shall be distributed proportionately to voluntary non-profit, private proprietary and public general hospitals, other than major public general hospitals on the basis of need within the region as determined in accordance with paragraph (e) of subdivision four, with the exception that any funds in a regional pool that were allocated to major public general hospitals and not distributed shall be distributed to each major third party payor on the basis of its percentage of major third party payor liability for bad debt and charity care as described in subdivision one of this section, in the specific major public general hospital to which distribution was not made.

(c) Funds in regional pools created by the allowance in paragraph (f) of subdivision four of this section shall not be available for immediate distribution from the regional pool but shall be retained in the pool for distribution by the commissioner in accordance with rules adopted by the state hospital review and planning council to assist in offsetting losses from bad debts and the costs of charity care of voluntary non-profit and private proprietary general hospitals experiencing severe fiscal hardship because of insufficient resources to finance such losses

or costs.

(d) Funds in regional pools created by the allowance in paragraph (g) of subdivision four of this section shall be distributed by including one-fourth of such funds with the funds to be distributed in accordance with paragraph (c) of this subdivision and three-quarters of such funds to be distributed to voluntary non-profit and private proprietary general hospitals within the region that are severely negatively impacted by the inclusion of title XVIII (medicare) patients, or changes in the determination of payor liability, resulting from the implementation of the reimbursement provisions in this section. Rules for such distribution will be those adopted by the state hospital review and planning council and approved by the commissioner.

(e) Any balance in the portion of regional pools created by the allowance in paragraph (e) of subdivision four of this section, after distribution in accordance with paragraph (b) of this subdivision, including income from invested funds, shall be distributed to voluntary non-profit, private proprietary and public general hospitals other than major public general hospitals within the region on a basis related to specific hospital need as defined for regional purposes in paragraph (e) of subdivision four of this section. Any balance in the portion of regional pools created by the allowance in paragraph (f) of subdivision four of this section and the distribution specified in paragraph (d) of this subdivision after distribution in accordance with paragraph (c) of this subdivision, including income from invested funds, shall be distributed to voluntary non-profit and private proprietary general hospitals within the region on a basis related to specific hospital need as defined for regional purposes in paragraph (e) of subdivision four of this section. Any balance in the portion of regional pools created by the allowance in paragraph (g) of subdivision four of this section after distribution in accordance with this paragraph and paragraph (d) of this subdivision, including income from invested funds, shall be returned to voluntary non-profit and private proprietary general hospitals on the basis of the reimbursable costs of those hospitals within the region.

10. Unit of service. The unit of general hospital inpatient service on which payment shall be based should be uniform for all payors and shall best identify the cost of services provided.

11. The commissioner shall provide to fiscal intermediaries for subchapter XVIII of the federal social security act (medicare) and article forty-three of the insurance law plans, the information required to effectuate the provisions of this section, exclusive of adjustments for uncovered services.

12. Provisions for article forty-three insurance law corporations and article forty-four of this chapter organizations. Except as provided in paragraphs (a) and (b) of this subdivision, general hospital charges for inpatient and outpatient services to subscribers or beneficiaries of contracts entered into pursuant to the provisions of article forty-three of the insurance law or to members of a comprehensive health services plan operating pursuant to the provisions of article forty-four of this chapter for patient services rendered shall not exceed the rates of payment approved by the superintendent of financial services or approved or certified by the commissioner, whichever is applicable and required by this section, for payments by such article forty-three insurance law corporations or article forty-four organizations. No general hospital may demand or request any charge for such covered services in addition to the charges or rates authorized by this article.

(a) Any general hospital which terminated its contract with an article forty-three insurance law corporation or a comprehensive health services plan after October first, nineteen hundred seventy-six and prior to May first, nineteen hundred seventy-eight, may not charge subscribers or beneficiaries of contracts entered into pursuant to the provisions of article forty-three of the insurance law, or members of a comprehensive health services plan operating pursuant to the provisions of article forty-four of this chapter, amounts in excess of the schedule of charges established by such hospital for patient services in effect on May first, nineteen hundred seventy-eight, adjusted for the rate year nineteen hundred eighty-three in accordance with the provisions of subdivision thirteen of this section, and adjusted for the rate years thereafter in accordance with the provisions of subdivision six of this section.

(b) Any general hospital which has notified in writing an article forty-three corporation or a comprehensive health services plan prior to

June first, nineteen hundred seventy-eight of its intention to terminate its contract with such corporation or plan in accordance with the terms of such contract, except a general hospital subject to the provisions of paragraph (a) of this subdivision may not charge a subscriber or beneficiary of a contract entered into pursuant to the provisions of article forty-three of the insurance law, or a member of a comprehensive health services plan operating pursuant to the provisions of article forty-four of this chapter, after the effective date of termination of such contract, amounts in excess of the schedule of charges established by such hospital for patient services in effect on May first, nineteen hundred seventy-eight, adjusted for the rate year nineteen hundred eighty-three in accordance with the provisions of subdivision thirteen of this section, and adjusted for the rate years thereafter in accordance with the provisions of subdivision six of this section.

(c) No general hospital shall refuse to provide patient services to such subscribers or beneficiaries solely on the grounds of such subscription or membership.

13. Charge control. For the period January first, nineteen hundred eighty-three, and until January first, nineteen hundred eighty-four:

(a) No general hospital shall establish charges for inpatient services in excess of those permitted by law immediately prior to the effective date of this section adjusted by the applicable trend factor.

(b) The commissioner shall establish an appeals board within the department to consider and recommend action in writing on an appeal by a general hospital of the inpatient charge limits established pursuant to this subdivision. The board and the commissioner may only consider, and appeals shall be limited to, changes in the base charge or the allowable limits because of the (i) establishment of an approved new hospital service, (ii) substantial changes in the volume of services provided, or (iii) substantial and adverse changes in the relationship between total accrued inpatient revenues and total inpatient costs due to such factors as significant increases in cost from labor settlements or increases in bad debts. Expenditures resulting from such changes must be essential to assure the continuance of quality medical care. In the event a determination on such appeal is not made by the commissioner within ninety days of receipt of a complete request as determined by the

commissioner, the hospital may increase its inpatient charges in conformance with such request. If the commissioner shall determine thereafter that all or a portion of such increase is not warranted hereunder, the hospital on notice of such determination shall promptly reduce its inpatient charges in conformance therewith. In no event shall the hospital bear any liability to any payor for such interim increase.

(c) In any proceeding under this subdivision the recognized collective bargaining agent shall be entitled to submit any relevant data. All data submitted hereunder shall be agency records under the freedom of information law. All proceedings and appeals hereunder shall be meetings of public bodies under the open meetings law.

(d) No provision of this subdivision or subdivision twelve of this section shall be construed to prohibit a general hospital from continuing the amount of inpatient charges in effect on May first, nineteen hundred seventy-eight.

14. Restitution authorization. In enforcing the provisions of subdivisions twelve and thirteen of this section, the commissioner may, in addition to the penalties and injunctions set forth in section twelve of this chapter, order that any general hospital provide restitution for any overpayments made by any party. Any hospital may request a formal hearing pursuant to the provisions of section twelve-a of this chapter in the event the hospital does not consent to any order of the commissioner hereunder. The commissioner may direct that such a hearing be held without any request by a hospital.

* NB Expired January 1, 1986

§ 2808-d. Nursing home quality improvement demonstration program. 1. Notwithstanding any law, rule or regulation to the contrary, the commissioner shall, within amounts appropriated and subject to the availability of federal financial participation, establish a demonstration program to improve the quality of care for nursing home residents through the increase or improvement of direct care staff at nursing homes. In furtherance of such demonstration program the commissioner shall adjust the Medicaid rates of payment to nursing homes, selected pursuant to a competitive process, provided, however,

that payments made pursuant to this section to public residential health care facilities shall be made as grants and shall not be deemed medical assistance payments. Requests for proposals for eligible projects shall be issued by the commissioner, provided however that the commissioner shall not issue any new requests for proposals after December thirty-first, two thousand four and all awards for subsequent annual periods shall be distributed on the same proportional basis as the most recent available distribution. After December thirty-first, two thousand four, awardees may use funds received for any of the purposes listed in subdivision two of this section, without restriction.

2. Such eligible projects may include:

- (a) an increase in direct care staff, either facility wide or targeted at a particular area of care or shift;
- (b) increased training and education of direct care staff, including allowing direct care staff to increase their level of licensure relevant to nursing home care;
- (c) efforts to decrease staff turn-over; and
- (d) other efforts related to the recruitment and retention of direct care staff that will effect the quality of care at such facility.

3. The commissioner shall consider, in selecting projects, the likelihood that such project will improve the care for the residents of the facility, the financial need of the nursing home and such other matters as the commissioner deems appropriate.

4. Grants and adjustments to Medicaid rates of payment made pursuant to this section shall not, in aggregate, exceed sixty-two million five hundred thousand dollars for the period beginning April first, two thousand two and ending December thirty-first, two thousand two, and, on an annualized basis, for each annual period thereafter beginning January first, two thousand three and ending December thirty-first, two thousand four, and shall not, in aggregate, exceed forty-six million eight hundred seventy-five thousand dollars for the period July first, two thousand five through December thirty-first, two thousand five and shall not, in aggregate, on an annualized basis, exceed seventy-eight million one hundred twenty-five thousand dollars for the period January first,

two thousand six through December thirty-first, two thousand six and sixty-two million five hundred thousand dollars for the period January first, two thousand seven through June thirtieth, two thousand seven.

5. Adjustments to Medicaid rates of payment made pursuant to this section shall not be subject to subsequent adjustment or reconciliation.

6. Notwithstanding any other provisions of this section or any other contrary provision of law, the commissioner may, from funds allocated pursuant to subparagraph (ii) or (iii) or (iv) of paragraph (u) of subdivision one of section twenty-eight hundred seven-v of this article, in calendar year two thousand five, make grants in an aggregate amount not to exceed twelve million five hundred thousand dollars, to residential health care facilities in support of projects or programs designed to improve specific areas of quality of care, as determined by the commissioner using established measures of such quality of care, and provided further the commissioner may, from funds allocated pursuant to paragraph (u) of subdivision one of section twenty-eight hundred seven-v of this article, for the period January first, two thousand six through June thirtieth two thousand seven, make grants in an aggregate amount not to exceed thirty-five million dollars on an annualized basis, to residential health care facilities that have an arbitrator's decision rendered before April first, two thousand six, requiring payments related to the recruitment and retention of direct care staff, including salary and benefits. Each eligible facility shall receive a payment amount proportional to the amount each such facility owes pursuant to the arbitrator's decision compared to such amounts owed by all eligible facilities.

*** § 2808-e. Residential health care for children with medical fragility in transition to young adults and young adults with medical fragility demonstration program.** 1. Notwithstanding any law, rule, or regulation to the contrary, the commissioner shall, within amounts appropriated and subject to the availability of federal financial participation, establish a demonstration program for two eligible pediatric residential health care facilities, as defined in paragraph

(d) of subdivision two of this section, to construct a new facility or repurpose part of an existing facility to operate as a young adult residential health care facility for the purpose of improving the quality of care for young adults with medical fragility.

2. For purposes of this section:

(a) "children with medical fragility" shall mean children up to twenty-one years of age who have a chronic debilitating condition or conditions, are at risk of hospitalization, are technology-dependent for life or health sustaining functions, require complex medication regimens or medical interventions to maintain or to improve their health status, and/or are in need of ongoing assessment or intervention to prevent serious deterioration of their health status or medical complications that place their life, health or development at risk.

(b) "young adults with medical fragility" shall mean individuals who meet the definition of children with medical fragility, but for the fact such individuals are aged between eighteen and thirty-five years old.

(c) "pediatric residential health care facility" shall mean a residential health care facility or discrete unit of a residential health care facility providing services to children under the age of twenty-one.

(d) "eligible pediatric residential health care facilities" shall mean pediatric health care facilities that meet the following eligibility criteria for the demonstration program set forth in subdivision one of this section: (i) has over one hundred and sixty licensed pediatric beds; or (ii) is currently licensed for pediatric beds pursuant to this article, is co-operated by a system of hospitals licensed pursuant to this article, and such hospitals qualify for funds pursuant to a vital access provider assurance program or a value based payment incentive program, as administered by the department in accordance with all requirements set forth in the state's federal 1115 Medicaid waiver standard terms and conditions.

3. Notwithstanding any law, rule, or regulation to the contrary, any child with medical fragility who has resided for at least thirty consecutive days in an eligible pediatric residential health care facility and who has reached the age of twenty-one while a resident, may

continue residing at such eligible pediatric residential health care facility and receiving such services from the facility, provided that such young adult with medical fragility remains eligible for nursing home care, and provided further that the eligible pediatric residential health care facility has prepared, applied for, and submitted to the commissioner, a proposal for a new residential health care facility for the provision of extensive nursing, medical, psychological and counseling support services to young adults with medical fragility in accordance with subdivision four of this section. A young adult with medical fragility may remain in such eligible pediatric residential health care facility until such time that the young adult with medical fragility attains the age of thirty-five years or the young adult residential health care facility is constructed and becomes operational, whichever is sooner.

4. Upon receipt of a certificate of need application from an eligible pediatric residential health care facility selected by the commissioner for the demonstration program authorized under this section, the commissioner is authorized to approve, with the written approval of the public health and health planning council pursuant to section twenty-eight hundred two of this article, the construction of a new residential health care facility to be constructed and operated on a parcel of land within the same county as that of eligible pediatric residential health care facility that is proposing such new facility and over which it will have site control, or the repurposing of a portion of a residential health care facility that is currently serving geriatric residents or those with similar needs for the provision of nursing, medical, psychological and counseling support services appropriate to the needs of nursing home-eligible young adults with medical fragility, referred to herein below as a young adult facility, provided that the established operator of such eligible pediatric residential health care facility proposing the young adult facility is in good standing and possesses at least thirty years' prior experience operating as a pediatric residential health care facility in the state or more than thirty years' experience serving medically fragile pediatric patients, and provided further that such facility qualifies for the demonstration program set forth in subdivision one of this section.

5. A young adult facility established pursuant to subdivision four of this section may admit, from the community-at-large or upon referral from an unrelated facility, young adults with medical fragility who prior to reaching age twenty-one were children with medical fragility, and who are eligible for nursing home care and in need of extensive nursing, medical, psychological and counseling support services, provided that the young adult facility, to promote continuity of care, undertakes to provide priority admission to young adults with medical fragility transitioning from the pediatric residential health care facility or unit operated by the entity that proposed the young adult facility and ensure sufficient capacity to admit such young adults as they approach or attain twenty-one years of age.

6. (a) For inpatient services provided to any young adults with medical fragility eligible for medical assistance pursuant to title eleven of article five of the social services law residing at any eligible pediatric residential health care facility as authorized in subdivision three of this section, the commissioner shall establish the operating component of rates of reimbursement appropriate for young adults with medical fragility residing at a pediatric residential health care facility, to apply to such young adults twenty-one years of age or older. Such methodology shall take into account the methodology used to establish the operating component of the rates pursuant to section twenty eight hundred eight of this article for pediatric residential health care facilities with an increase or decrease adjustment as appropriate to account for any discrete expenses associated with caring for young adults with medical fragility, including addressing their distinct needs as young adults for psychological and counseling support services.

(b) For inpatient services provided to any young adults with medical fragility eligible for medical assistance pursuant to title eleven of article five of the social services law at any young adult facility as authorized in subdivision four of this section, the commissioner shall establish the operating component of rates of reimbursement appropriate for young adults with medical fragility. Such methodology shall take into account the methodology used to establish the operating component

of the rates pursuant to section twenty eight hundred eight of this article for pediatric residential health care facilities with an increase or decrease adjustment as appropriate to account for any discrete expenses associated with caring for young adults with medical fragility, including addressing their distinct needs as young adults for psychological and counseling support services.

7. The commissioner shall have authority to waive any rule or regulation to effectuate the demonstration program authorized pursuant to subdivision one of this section.

* NB Repealed August 17, 2027

* NB There are 2 § 2808-e's

*** § 2808-e. Nursing home ratings.** 1. The commissioner shall provide that the most recent star rating of every nursing home facility in the state, assigned pursuant to the inspection rating system of the U.S. Centers for Medicare and Medicaid Services (overall CMS rating), shall be prominently displayed on the home page of the department's website, or by an easily accessible link to such information.

2. Each nursing home facility shall post its overall CMS rating and ratings for health inspections, staffing and quality measures on the homepage of any website maintained by such facility and on any website or webpage relating to such facility maintained by an entity which owns or operates such facility. Each nursing home shall also conspicuously post its most recent overall CMS rating and ratings for health inspections, staffing and quality measures so that it is visible to the general public and to residents.

* NB There are 2 § 2808-e's

§ 2808-f. Advanced residential health care for aging adults medical fragility demonstration program. 1. Notwithstanding any law, rule, or regulation to the contrary, the commissioner shall, within amounts appropriated and subject to the availability of federal financial participation, establish a demonstration program for eligible adult

residential health care facilities, as defined in paragraph (c) of subdivision two of this section, to construct a new facility or repurpose part of an existing facility to operate as an adult residential health care facility for the purpose of improving the quality of care for aging adults with medical fragility.

2. For purposes of this section:

(a) "Aging adults with medical fragility" shall mean adults from age thirty-five to end of life who have a chronic debilitating condition or conditions, are at risk of hospitalization, are technology-dependent for life or health sustaining functions, require complex medication regimens or medical interventions to maintain or to improve their health status, and/or are in need of ongoing assessment or intervention to prevent serious deterioration of their health status or medical complications that place their life, health or development at risk.

(b) "Adult residential health care facility" shall mean a residential health care facility or discrete unit of a residential health care facility providing services to adults over the age of thirty-five.

(c) "Eligible adult residential health care applicant" shall mean adult health care facilities that meet the following eligibility criteria for the demonstration program set forth in subdivision one of this section: (i) is a nonprofit corporation that operates one hundred ten adult beds licensed under article sixteen of the mental hygiene law; or (ii) is licensed to provide diagnostic and treatment services pursuant to this article.

3. Upon receipt of a certificate of need application from an eligible adult residential health care applicant selected by the commissioner for the demonstration program authorized under this section, the commissioner is authorized to approve, with the written approval of the public health and health planning council pursuant to section twenty-eight hundred two of this article, the construction of a new residential health care facility to be constructed and operated on a parcel of land within the same county as that of an eligible adult residential health care applicant that is proposing such new facility and over which it will have site control, provided that such facility qualifies for the demonstration program set forth in subdivision one of

this section.

4. An aging adult facility established pursuant to subdivision three of this section may admit, from the community-at-large or upon referral from an unrelated facility, aging adults with medical fragility who, prior to reaching age thirty-five, were young adults with medical fragility, and who are eligible for nursing home care and in need of extensive nursing, medical, psychological and counseling support services, provided that the aging adult facility, to promote continuity of care, undertakes to provide priority admission to aging adults with medical fragility transitioning from the pediatric residential health care facility or unit operated by the entity that proposed the aging adult facility and ensure sufficient capacity to admit such adults as they attain thirty-five years of age.

5. For inpatient services provided to any aging adults with medical fragility eligible for medical assistance as authorized in subdivision three of this section, the commissioner shall establish the operating component of rates of reimbursement appropriate for aging adults with medical fragility residing at an adult residential health care facility, to apply to such adults thirty-five years of age or older. Such methodology shall take into account the methodology used to establish the operating component of the rates pursuant to section twenty-eight hundred eight of this article for adult residential health care facilities with an increase or decrease adjustment as appropriate to account for any discrete expenses associated with caring for aging adults with medical fragility, including addressing their distinct needs as aging adults for medical and psychological support services.

§ 2809. Residential health care facilities; powers to require security. 1. If a residential health care facility receives a rating in the lowest category which may be assigned pursuant to subdivision one of section twenty-eight hundred three of this chapter, the commissioner may require, as a condition of continuing to operate, that the facility obtain financial security to ensure that future obligations will be met, which security may be of a form that the commissioner deems appropriate,

and which shall be in an amount determined necessary by the commissioner after considering the rating of the facility; deficiencies in its overall condition and its operating practices; the size of the facility; the ease or difficulty of obtaining given types of security; and the financial burden of obtaining particular types of security; but in no case shall such amount exceed twenty-five thousand dollars.

2. If the commissioner obtains the agreement of any such facility to correct or eliminate any deficiency, by release or compromise of a penalty or for any other reason, he may require as a part of such agreement that the facility obtain security in an amount sufficient to ensure that the agreement be upheld, which security may take a form which the commissioner deems appropriate.

3. If for any reason the security required by the commissioner is depleted, either wholly or partially by civil penalties assessed by the commissioner or for any other cause, the commissioner may require, after considering those factors which were applicable to the original requirement of security, that the amount of security be wholly or partially replenished, or that the total amount of security be increased; but in no case shall such security exceed twenty-five thousand dollars at one time.

§ 2810. Residential health care facilities; receivership. 1. The owner or owners of any residential health care facility may at any time request the department to take over the operation of such facility by the appointment of a receiver. Upon receiving such a request, the department may, if it deems such action desirable, enter into an agreement with any such owners on the appointment of a receiver to take charge of the facility under whatever conditions as shall be found acceptable by both parties. Receivership commenced in accordance with the provisions of this subdivision shall terminate at such time as is agreed upon by the parties, or at such time as either party notifies the other in writing that he wishes to terminate such receivership.

2. a. As a means of protecting the health, safety and welfare of the

patients in a residential health care facility, whenever the commissioner revokes the operating certificate of such a facility he shall apply to the supreme court in the county where the facility is situated for an order directing the owner of the land and/or structure on or in which the facility is located to show cause why the commissioner, or his designee, should not be appointed receiver to take charge of the facility. In those cases where operating certificates have been revoked pursuant to paragraph (a) of subdivision five of section twenty-eight hundred six of this chapter the supreme court shall appoint a receiver who may be the commissioner or his designee. Such application shall contain proof by affidavit that the facility has had its operating certificate revoked. Such order to show cause shall be returnable not less than five days after service is completed and shall provide for personal service of a copy thereof and the papers on which it is based on the owner or owners of the land and/or structure on or in which the facility is located. If any such owner cannot with due diligence be served personally within the county where the property is located and within the time fixed in such order, then service may be made on such person by posting a copy thereof in a conspicuous place within the facility in question, and by sending a copy thereof by registered mail, return receipt requested, to such owner at the last address registered by him with the department, or in the absence of such registration, to the address set forth in the last recorded deed with respect to such facility. Service shall be deemed complete on filing proof of service thereof in the office of the county clerk, or the clerk of the city of New York, as the case may be.

b. On the return of said order to show cause, determination shall have precedence over every other business of the court unless the court shall find that some other pending proceeding, having similar statutory precedence, shall have priority. The court may conduct a hearing at which all interested parties shall have the opportunity to present evidence pertaining to the application. If the court shall find that the facts warrant the granting thereof, then the commissioner, or any person designated by the commissioner, shall be appointed receiver to take charge of the facility, and the court shall determine a fair monthly rental for the facility, and for the furniture, fixtures and movable

equipment therein, taking into account all relevant factors, including the condition of such facility, and the condition of such furniture, fixtures and movable equipment, which amount shall, except in the case where the receiver is assuming an existing bona fide arm's length lease, not exceed the amount which would be reimbursable to the facility under the medical assistance program for real property costs and for the costs of furniture, fixtures and movable equipment if each patient in the facility were a recipient of medical assistance. Such rental shall be paid by the receiver to the owner or owners of the facility and to the owner or owners of the furniture, fixtures and movable equipment therein for each month that the receivership remains in effect.

c. Any receiver appointed pursuant to this subdivision shall have all of the powers and duties of a receiver appointed in an action to foreclose a mortgage on real property, together with such additional powers and duties as are herein granted and imposed. The receiver shall with all reasonable speed but, in any case, within eighteen months after the date on which the receivership was ordered provide for the orderly transfer of all patients in the facility to other facilities or make other provisions for their continued safety and health care. During the interim period when such patients must remain in the facility, the receiver may correct or eliminate those deficiencies in the facility that seriously endanger the life, health or safety of such patients provided that such correction or elimination of deficiencies does not include major alterations of the physical structure of the facility. He shall, during this period, operate the facility in such a manner as to guarantee safety and adequate health care for such patients. He shall have the power to let contracts therefor or incur expenses provided that where individual items of repairs, improvements or supplies exceed three thousand dollars, the receiver shall obtain price quotations from at least three reputable sources. The receiver shall not be required to file any bond. He shall collect incoming payments from all sources and apply them to the costs incurred in the performance of his functions as receiver. The receiver shall honor all existing leases, mortgages and chattel mortgages that had previously been undertaken as obligations of the owners or operators of the facility. No security interest in any real or personal property comprising the facility or contained within

the facility, or in any fixture of the facility, shall be impaired or diminished in priority by the receiver. The receiver shall compensate the owner or owners of any goods held in inventory for those goods which he uses or causes to be used by reimbursing the costs of such goods, except that no such compensation shall be made for any such goods for which the owners or operators of the facility have already been reimbursed. Neither the receiver nor the department shall engage in any activity that constitutes a confiscation of property without the payment of fair compensation.

d. The receiver shall be entitled to the same fees, commissions and necessary expenses as receivers in actions to foreclose mortgages. The receiver shall be liable only in his official capacity for injury to person and property by reason of conditions of the facility in a case where an owner would have been liable; he shall not have any liability in his personal capacity, except for gross negligence and intentional acts. The personnel and facilities of the department shall be available to the receiver for the purposes of carrying out his duties as receiver and the cost of such services shall be deemed a necessary expense of the receiver.

e. (i) The court shall terminate the receivership only under any of the following circumstances:

(a) eighteen months after the date on which it was ordered;

(b) when the department grants the facility a new operating certificate, whether the structure of the facility or the land on which it is located shall be under the same or different ownership; or

(c) at such time as all of the patients in the facility have been provided alternative modes of health care, either in another facility or otherwise.

(ii) At the time of termination, the receiver shall render a full and complete accounting to the court and shall make disposition of surplus money at the direction of the court.

f. (i) Any person who is served a copy of an order of the court appointing the receiver shall, upon being notified of the name and address of the receiver, make all payments for goods supplied by the

facility, or services rendered by the facility, to the receiver. A receipt shall be given for each such payment, and copies of all such receipts shall be kept on file by the receiver. The amount so received shall be deposited by the receiver in a special account which shall also be used for all disbursements made by the receiver.

(ii) Any person refusing or omitting to make such a payment after such service and notice may be sued therefor by the receiver. Such person shall not in such suit dispute the authority of the receiver to incur or order such expenses, or the right of the receiver to have such payments made to him. The receipt of the receiver for any sum paid to him shall, in all suits and proceedings and for every purpose, be as effectual in favor of any person holding the same as actual payment of the amount thereof to the owner or other person or persons who would, but for the provisions of this subdivision, have been entitled to receive the sum so paid. No patient shall be discharged, nor shall any contract or rights be forfeited or impaired, nor any forfeiture or liability be incurred, by reason of any omission to pay any owner, contractor or other person any sum so paid to the receiver.

g. Any other provision of this chapter notwithstanding, the department may, if it deems appropriate, grant to any facility operating or scheduled to operate under a receivership authorized by this subdivision an operating certificate the duration of which shall be limited to the duration of the receivership.

h. No provision contained herein shall be deemed to relieve the owner or any other person of any civil or criminal liability incurred, or any duty imposed by law, by reason of acts or omissions of the owner or any other person prior to the appointment of any receiver hereunder, nor shall anything contained herein be construed to suspend during the receivership any obligation of the owner or any other person for the payment of taxes or other operating and maintenance expenses of the facility nor of the owner or any other person for the payment of mortgages or liens.

* 3. The commissioner is authorized to make non-interest bearing payments to receivers appointed pursuant to this section within the amounts made available therefor by the legislature. No such payment

shall be made unless the commissioner reasonably anticipates that repayment shall be made prior to or upon termination of the receivership. Any such payment to a receiver shall be made pursuant to a repayment agreement entered into by the receiver with the commissioner which shall specify a time within which full repayment must be made. Repayments by receivers shall be applied to reimburse any first instance appropriation made for the purposes of this subdivision.

* NB (Effective pending Federal Law)

§ 2811. Discounts and splitting fees with medical referral services; prohibited. No hospital or facility delivering health care shall grant or receive a discount to or from any medical referral service or in any manner split fees with a medical referral service.

§ 2812. Construction. Notwithstanding the provisions of any general, special or local law, or any city charter or administrative code to the contrary, no county, town, village or city shall enact and enforce regulations and standards for hospitals, except for hospitals maintained and operated by the health services administration of the city of New York or the New York city health and hospitals corporation.

§ 2813. Separability. If any clause, sentence, paragraph, subdivision, section or part of this article shall be adjudged by any court of competent jurisdiction to be invalid, the judgment shall not affect, impair, or invalidate the remainder thereof, but shall be confined in its operation to the clause, sentence, paragraph, subdivision, section or part thereof directly involved in the controversy in which the judgment shall have been rendered.

*** § 2814. Health networks, global budgeting, and health care demonstrations.** 1. For the purposes of this section unless the context clearly requires otherwise:

(a) "Board" shall mean the temporary statewide health advisory board

established pursuant to section nine hundred fifty-seven of the executive law.

(b) "Proposal" shall mean a design or plan developed, as a result of funds received pursuant to this section, to operate a network, global budget, or regional health care demonstration.

2. (a) Notwithstanding any inconsistent provision of law, within amounts available therefor, the commissioner shall make grants pursuant to this section to (i) health care providers to facilitate development of health networks or health care demonstrations (ii) health care providers alone or in conjunction with third party payors to facilitate development of global budgets and (iii) an organization demonstrably representing the interests of the region or communities of the region which demonstrate the support of the respective health systems agency to facilitate development of health care demonstrations or global budgets. Such networks, demonstrations, or global budgets shall be designed to improve cost effectiveness of health care services, establish and improve provider coordinated planning and management mechanisms, and/or improve provider management of care or improve continuity of care. Health care providers eligible to receive funding under section twenty-nine hundred fifty-two of this chapter shall not be eligible for grants under this section for development of health networks.

(b) Grants made pursuant to this section shall provide planning funds which may include, but need not be limited to, funding to:

(i) assess the health care needs of the population and develop an operational plan to meet these needs;

(ii) plan for and carry out any organizational changes needed to integrate services; and

(iii) facilitate financing arrangements such as risk sharing and capitation.

3. In awarding grants under this section, the commissioner shall consult with the appropriate local health systems agency and shall consider the recommendations of the temporary statewide health advisory board on the grant proposals and to the extent practicable assure that there is a sufficiently representative geographic distribution of grantees including rural, urban, and suburban grantees. Grants made

pursuant to this section shall be used solely for the planning of health networks, global budgets or health care demonstrations. Prior to awarding grants, the commissioner shall first take into consideration other financial resources available to the applicant to conduct such planning.

4. In order to be eligible for a grant under this section, applicants shall prepare and submit to the commissioner, the temporary statewide health care advisory board, and the respective health systems agency an application which contains the following:

(a) identification of the principal investigator or applicant for the demonstration;

(b) a description of the nature and scope of the activities contemplated;

(c) a description of the geographic area and populations currently served by the entity;

(d) a description of the community or population to be served;

(e) a description of the anticipated benefits and advantages to providers and consumers of services;

(f) a description of the estimated expenses, including administrative expenses, which will be incurred in the development of the demonstration; and

(g) the time frame proposed for the development of the health network, global budgeting demonstration, or health care demonstration.

(h) the process that the eligible organization used in seeking public participation and local involvement in the development of the program plan; and

(i) the goals of the program, including information on how the program plan will maintain and promote access to and delivery of high quality, appropriate health or health related items and services for persons residing in the region covered by the program.

5. Any grant recipient seeking to implement a proposal developed pursuant to this section, except recipients of health networking grants, shall submit such proposal to the temporary statewide health advisory board, in such form and content determined by the board, which shall evaluate such proposal and consider whether the proposal is likely to:

- (a) aid in meeting the priority health needs and concerns in the region as identified in and supported by evidence in the proposal and consistent with recommendations of the regional health systems agency;
- (b) enhance the quality of care as evidenced by outcome indicators;
- (c) improve the cost-effectiveness of services by the entities involved;
- (d) improve the efficient utilization of the entities' resources and capital equipment;
- (e) enhance the provision of services that would otherwise not be available;
- (f) result in the elimination of unnecessary duplication of resources;
- (g) reduce costs to individuals being served by the network;
- (h) foster information sharing, communications and cooperation between health care providers; and
- (i) foster and improve the management and continuity of care.

6. In addition, the board shall require that the proposal contain assurances that there will be equitable provider involvement in the determination of any rates and rate setting methodology. The board shall also require a description of how the proposed initiative will be evaluated and assurance that the grantee will submit annual reports to the governor and legislature concerning the status and experiences of the initiative.

7. The temporary statewide health advisory board shall forward only proposals recommended for operation to the commissioner for authorization. In granting his authorization, the commissioner shall certify that the proposal will:

- (a) improve the cost effectiveness of health care services;
- (b) improve the quality of care delivered as evidenced by outcome indicators; and
- (c) improve access to appropriate health care services.

8. Upon request by an applicant or grantee the commissioner and the respective health system agency shall provide technical assistance.

9. The commissioner shall submit to the chairs of the senate finance

committee and the assembly ways and means committee and the chairs of the assembly and senate health committees, a copy of any proposal authorized by the commissioner pursuant to this section not more than thirty days after approval.

10. With the exception of health networks, global budgets or health care demonstrations that seek to implement alternative reimbursement methodologies in general hospital settings only and/or for ambulatory services associated with general hospital outpatient and diagnostic and treatment center settings regarding payment for the medical assistance program, as provided for in subdivisions ten and eleven of section twenty-eight hundred seven of this article, no health network, global budget or health care demonstration that seeks to implement alternative reimbursement methodologies shall be approved or implemented without approval pursuant to a chapter of the laws to be enacted by the legislature.

§ 2815. Health facility restructuring program. 1. Definitions. As used in this section, the following words and phrases shall have the following meanings unless a different meaning is plainly required by the context:

(a) "Agency" shall mean the New York state housing finance agency created by article three of the private housing finance law.

(b) "Authority" shall mean the dormitory authority of the state of New York created by title four of article eight of the public authorities law which has succeeded to the powers, functions and duties of the medical care facilities finance agency pursuant to chapter eighty-three of the laws of nineteen hundred ninety-five.

(c) "Participating borrower" shall mean a not-for-profit general hospital, a not-for-profit diagnostic center, a not-for-profit treatment center, a not-for-profit residential health care facility or any other not-for-profit entity in possession of a valid operating certificate issued pursuant to this article, each organized under the laws of this state, which has been approved for participation in this program by the commissioner.

(d) "Restructuring pool" shall mean the health facility restructuring pool authorized to be established by the authority pursuant to this section.

2. The authority shall establish the restructuring pool. Funds shall be transferred by the commissioner to the authority for deposit in the restructuring pool as authorized pursuant to paragraph (d) of subdivision one of section twenty-eight hundred seven-l and paragraph (b) of subdivision nineteen of section twenty-eight hundred seven-c of this article or any other provision of law. Funds in the restructuring pool shall be held by the authority pursuant to this section as custodian, administered by the authority pursuant to an agreement with the commissioner and invested by the authority in accordance with the investment guidelines of the authority. All investment income shall be credited to, and any repayments of loans as hereinafter provided shall be deposited in, the restructuring pool, and spent therefrom only for the purposes set forth in this section.

3. The commissioner, the authority and the agency shall enter into an agreement, subject to the approval of the director of the budget, for the purpose of administering the funds in the restructuring pool in a manner that will benefit the public health by encouraging improvements in the health care delivery system in the state. A copy of such agreement, and any amendment thereto, shall be provided to the chair of the senate finance committee, the director of the division of budget, and the chair of the assembly ways and means committee. Such agreement shall include, but not be limited to, the following provisions:

(a) for the receipt, management and expenditure of funds held in the restructuring pool by the authority;

(b) for the development and implementation of business plans for participating borrowers, addressing the development of service delivery strategies, including strategies for the formation or strengthening of networks, affiliations or other business combinations, designed to provide long-term financial stability within and among participating borrowers;

(c) for the expenditure or loan of funds by the authority from the restructuring pool to reimburse the authority or the agency, where
