§ 119-b. Inflatable restraint system. 1. An inflatable restraint system means an air bag, as defined in subparagraph (b) of S 4.1.5.1 of standard 208 of part 571 of title 49 of the code of federal regulations, that is designed and installed to be activated in a crash.

2. Readiness indicator light means an indicator monitoring the inflatable restraint system's readiness and such light is clearly visible from the driver's designated seating position.
